REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Plan Participants and Plan Administrator of
The Boeing Company 401(k) Retirement Plan
Arlington, Virginia

Opinion on the Financial Statements

We have audited the accompanying statements of net assets available for benefits of The Boeing Company 401(k) Retirement Plan, (the "Plan") as of December 31, 2024 and 2023, the related statement of changes in net assets available for benefits for the year ended December 31, 2024, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2024 and 2023, and the changes in net assets available for benefits for the year ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on the Plan's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Plan in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Report on Supplemental Schedule

The supplemental Schedule of Assets (Held at End of Year) as of December 31, 2024 has been subjected to audit procedures performed in conjunction with the audit of the Plan's financial statements. The supplemental schedule is the responsibility of the Plan's management. Our audit procedures included determining whether the supplemental schedule reconciles to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplemental schedule. In forming our opinion on the supplemental schedule, we evaluated whether the supplemental schedule, including its form and content, is presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. In our opinion, such schedule is fairly stated, in all material respects, in relation to the financial statements as a whole.

/s/ Deloitte & Touche LLP

Chicago, Illinois
June 10, 2025

We have served as the auditor of the Plan since at least 1990; however, an earlier year could not be reliably determined.

NOTES TO FINANCIAL STATEMENTS

AS OF DECEMBER 31, 2024 AND 2023 AND FOR THE YEAR ENDED DECEMBER 31, 2024

(Dollars in millions)

1. DESCRIPTION OF PLAN

The following description of The Boeing Company 401(k) Retirement Plan (the “Plan”) provides only general information. Participants, as defined by the Plan (“Members” or “Participants”), should refer to the plan document for a more complete description of the Plan’s provisions.

General — The Plan is a defined contribution plan intended to qualify under the Internal Revenue Code (“IRC”) as a profit sharing plan with a cash or deferred arrangement and employee stock ownership plan component, and is designed to provide Members with a means of making regular savings for their retirement. An eligible employee of The Boeing Company (the “Company” or “Boeing”) or one of its adopting subsidiaries becomes eligible to participate on the first day of employment.

The Plan includes an auto-enrollment provision for newly-eligible employees unless they affirmatively elect not to participate in the Plan. Automatically enrolled Members have their deferral rate set at a percentage of eligible compensation as defined in the plan document and their contributions are invested in a qualified default investment alternative (“QDIA”) until changed by the Members. The current QDIA for the Plan is the applicable custom target date fund.

The assets of the Plan, excluding notes receivable from participants, are held in The Boeing Company Employee Savings Plans Master Trust (the “Master Trust”). The Northern Trust Company (“NT”) serves as trustee for the Master Trust. The Employee Benefit Plans Committee oversees the operation and administration of the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”), as amended.

Contributions — Members may elect to contribute to the Plan a percentage of their eligible compensation on a pretax, after-tax, Roth, or a combination of those contribution types, as defined in the plan document and subject to statutory limitations. Members who have attained age 50 before the end of the plan year are eligible to make catch-up contributions, as defined in the plan document and subject to statutory limits. Catch-up contributions are ineligible for an employer-matching contribution for certain Members. The Plan also accepts certain rollover contributions.

Under the terms of the Plan, Boeing makes employer-matching and Company contributions for eligible Members. During 2024 and 2023, Boeing’s contributions were made in the form of shares of Company common stock and immediately transferred to other investment funds in accordance with Members’ current investment elections.

Employer contributions receivables as of December 31, 2024 and 2023, included the following:

	2024	2023
Nonelective contribution equal to 2% of certain Members eligible compensation	\$ —	\$ 195
Employer-matching true-up contributions	29	27
Student loan match program contributions	21	14
Total receivables: Employer contributions	<u>\$ 50</u>	<u>\$ 236</u>

Members may elect to change their contribution percentages. These changes are effective the next pay period after the request is received, or as soon as administratively possible thereafter. The allocation of both Members’ contributions and employer

contributions to the funds may be changed at any time and become effective on the day of the change or the next business day, according to the time of the request for a change in relation to the stock market close of business.

Members' Accounts — Individual accounts are maintained for each Member. Each Member's account is credited with the Member's contributions, Boeing's contributions, and allocations of Plan earnings (losses) from the funds in which the account is invested, and charged with an allocation of certain administrative and investment-related expenses, and Member-specific charges, if applicable. Allocations are based on Member earnings or account balances, as defined by the plan document. The benefit to which a Member is entitled is the benefit that can be provided from the Member's account.

Investment Funds — Upon enrollment in the Plan, Members may direct the investment of their contributions and any employer contributions to the investment funds offered under the Plan. These investment funds consisted of common/collective trusts, separately managed U.S. equity accounts, separately managed non-U.S. equity accounts, a separately managed fixed-income account, custom target date funds, a stable value fund (composed of synthetic-guaranteed investment contracts ("synthetic GICs")), and Boeing common stock, which is the Boeing Stock Fund, as of December 31, 2024 and 2023. The Boeing Stock Fund consists of Boeing common stock and cash held in the cash sweep fund. Members may elect that dividends received with respect to their investments in the Boeing Stock Fund be distributed to them in cash or reinvested in the Boeing Stock Fund (a dividend payout program). Investment funds are valued daily and Members may elect to change their investment allocations on a daily basis.

Vesting — Member contributions, Boeing's contributions, and earnings on those contributions are immediately vested.

Withdrawals — Members may elect to withdraw all or a portion of their accounts, at any time on or after the day the Member attains age 59 1/2. If a Member is under age 59 1/2, withdrawals from his or her accounts are subject to restrictions for certain accounts and certain hardship rules as provided by the Plan. If a Member takes a hardship withdrawal, the Member may continue contributions to the Plan; however, for certain Members, employer-matching contributions will be suspended for six months following the hardship withdrawal.

In addition, a Member may elect to withdraw all or part of his or her employer-matching contribution account before the Member attains age 59 1/2, but only if the Member has attained his or her fifth anniversary of employment. If such a withdrawal is made, employer-matching contributions will generally be suspended for six months following the withdrawal. Company contributions may be fully withdrawn upon termination of employment. Withdrawals of after-tax contributions and rollover contributions can be made at any time. Qualified reservist distributions, active military leave distributions, withdrawals upon disability, qualified birth and adoption withdrawals, domestic abuse withdrawals, emergency personal expense withdrawals, and qualified disaster recovery withdrawals are also available to eligible Members.

In the event of illness or injury and if eligible Members have used all of their regular sick leave benefits, the eligible Members may elect to withdraw, subject to Plan requirements, all or a portion of their salary continuation balance, if applicable.

Notes Receivable from Participants — Members may borrow from their fund accounts a minimum of one thousand dollars up to a maximum equal to the lesser of fifty thousand dollars or 50% of their account balance (subject to restrictions for certain accounts and minus any current outstanding loan balance), reduced by the highest outstanding loan balance under all of the Company's savings plans during the last 12 months. Members may generally have a maximum of two loans outstanding under the Plan at any time. Loans may be additionally limited in accordance with the Plan provisions and/or loan policies and procedures. The interest rate on new loans is set every month and is equal to the prime rate published in the Wall Street Journal as of the last business day of the calendar month immediately preceding the date of the loan. Interest rates on outstanding loans ranged from 3.25% to 9.50% at December 31, 2024, with loans maturing at various dates through December 2044.

Loan repayments are made through regular payroll deductions for a period of up to 60 months for general loans and over a longer period for loans used to finance the purchase of a principal residence. If a Member's employment terminates for any reason, and the loan balances are not paid in full by the termination date, the Member may continue to make monthly loan repayments until the loan is scheduled to be paid off. A loan will generally be subject to default if a payment has not been made for 90 days, an outstanding loan balance

[Table of Contents](#)

remains 30 days after the scheduled payoff date, or the Member takes a full distribution of his or her net account balance before the loan is paid off. If the loan defaults, the loan balance will become taxable income to the Member.

Benefit Payments — Upon termination of service, a Member may elect to receive a lump-sum amount equal to the full value of the Member's vested interest in his or her account; a partial payment amount; or monthly, quarterly, semiannual, or annual installments of a fixed dollar amount or for a specific number of years, up to 10 years. Generally, a Member may also elect to have all or a portion of his or her Boeing Stock Fund balance paid in shares and/or cash. A Member also has the option to elect to apply all or a part of his or her account toward the purchase of an annuity contract with payments for a specified number of years, from a provider made available by the Plan administrator in accordance with the procedures established by the Plan administrator. If a Member makes no election, annual distributions of the required minimum amount will generally begin after age 73, in accordance with applicable Plan provisions. Notwithstanding the foregoing, following a Member's termination of service, if his or her account balance is one thousand dollars or less, it will automatically be paid out to the Member in accordance with applicable Plan provisions.

Assets Transferred from Another Plan — Effective December 31, 2024, the Boeing Distribution Services, Inc. Retirement Plan ("BDSI Plan") was merged into the Plan. All assets and liabilities of the BDSI Plan were transferred to the Plan. The net assets transferred totaled \$111, including \$3 of notes receivable from participants.

Plan Amendments — Effective during 2024 as specified in the Plan provisions, the Plan document was amended to permit new lump sum deferrals for certain Members, add new withdrawal options as permitted under the SECURE 2.0 Act of 2022, reflect certain changes as specified or permitted in the applicable collective bargaining agreement for each group, reflect the merger of the BDSI Plan into the Plan, reflect new eligible incentive plans, and clarify or update certain administrative provisions of the Plan. Effective January 1, 2025, the Plan document was updated to incorporate or clarify certain administrative provisions of the Plan and make certain design changes that were effective on or after January 1, 2025.

Subsequent Events — Subsequent events were evaluated through June 10, 2025, the date the financial statements were issued.

2. SUMMARY OF ACCOUNTING POLICIES

Basis of Accounting — The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP").

Use of Estimates — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Risks and Uncertainties — The Plan utilizes various investment instruments. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Market risks include global events, such as a pandemic or international conflict, which could impact the value of investment securities. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Valuation of Investments — Investments in the Master Trust are stated at fair value, except for fully benefit-responsive investment contracts ("FBRICs") or synthetic GICs, which are reported at contract value. Fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. Securities traded in markets that are not considered active may be valued using unobservable inputs, such as less recent trade prices, single broker-dealer quotations, related yield curves, and other assumptions about the security. Contract value is the amount Members would receive if they were to initiate permitted transactions under the terms of the Plan (see Note 3). The Master Trust's investments, as discussed in Note 4, are valued as follows:

[Table of Contents](#)

- Common stock, including Boeing common stock, preferred stock, and other investments (rights, warrants, exchange-traded funds, exchange-traded options, and other exchange-traded derivatives) traded in active markets on national and international exchanges are primarily valued using a market approach based on the closing market prices of identical instruments on the last trading day of the year. The other exchange-traded derivatives are included in other receivables and other liabilities on the Master Trust's statements of net assets.
- Forward and spot currency contracts are valued using a market value approach based on spot foreign currency rates if the contract tenor is two days or less and on interpolated forward rates for any contracts with a tenor greater than two days. Forward and spot currency contracts are included in other receivables and other liabilities on the Master Trust's statements of net assets.
- Investments in common/collective trust funds are valued based on the year-end unit net asset value ("NAV"). The NAV is used as a practical expedient to estimate fair value. Unit values are determined by the issuer or third party administrator by dividing the fair values of the total net assets at year-end by the outstanding units. There were no unfunded commitments, no restrictions on redemption frequency, and no advance notice periods required for redemption for these investments.
- Synthetic GICs are stated at contract value. There are no reserves against contract value for credit risk of the contract issuer. The fixed-income securities underlying the contracts were valued based on the pricing methodology stated below for fixed-income securities.
- Fixed-income securities, including government and agency securities, corporate bonds, and mortgage and asset-backed securities, are primarily valued using a market approach using matrix pricing, which considers a security's relationship to other securities for which quoted prices in an active market may be available, or alternatively based on an income approach, which uses valuation techniques to convert future cash flows to a single present value amount. The valuation approach is designed to maximize the use of observable inputs, such as observable trade prices, multiple broker-dealer quotations, related yield curves, and other assumptions about the security (prepayment projections, cash flows, other security characteristics, etc.) and minimize unobservable inputs. The securities are valued as of the last trading day of the year. Fixed-income instruments that have a delayed future settlement such as to-be-announced securities ("TBAs") are valued similarly to fixed-income securities in active markets. TBAs are included in the underlying assets associated with the synthetic GICs, other receivables, and other liabilities on the Master Trust's statements of net assets.
- Mutual funds, which are registered investment companies, are valued at the daily closing price as reported by the fund. Funds held by the Master Trust are open-ended funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily NAV and to transact at that price.
- Short-term investments include certificates of deposits, commercial paper, treasury bills, and discounted notes with original maturities greater than three months, but less than one year. These investments are primarily valued using a market approach in the same manner as fixed-income securities referenced above.
- Other investments include physical commodities and over-the-counter ("OTC") derivatives, such as options and swap contracts. Physical commodities are valued on a market approach using the front month futures contract for the specific commodity. The derivatives are valued using a market approach and are based upon the expected amount that the Master Trust would receive or pay to exit the derivative at the reporting date. The valuation methodology relies on inputs, including, but not limited to, benchmark yields, swap curves, cash flow analysis, ratings updates, and interdealer broker rates. Credit risk of the derivative counterparties is offset by collateralizing the expected amount that the Master Trust would receive or pay to terminate the derivative.

In accordance with the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 946, *Financial Services - Investment Companies*, the synthetic GICs are included at contract value in

[Table of Contents](#)

participant-directed investments in the statements of net assets available for benefits. Contract value is the amount Members would receive if they were to initiate permitted transactions under the terms of the Plan and the terms of the synthetic GICs. The statement of changes in net assets available for benefits is presented on a contract-value basis.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/depreciation of investments includes both realized and unrealized gains or losses and is calculated as the difference between the fair value of the investments as of the beginning of the plan year or the purchase date in the current year and either the sales price or the end-of-year fair value.

Cash and Cash Equivalents — Cash and cash equivalents include cash and cash collateral. Cash collateral is related to the collateral posted on derivatives.

Valuation Oversight — Plan management has implemented processes that are designed to ensure that fair value measurements used by the Master Trust are appropriate and reliable, that they are based on observable inputs wherever possible, and that the valuation approaches are consistently applied and the assumptions used are reasonable. The valuation framework has a set of processes that provides for oversight and validation of the fair value methodologies as well as valuations.

The Board of Directors of the Company has delegated the fiduciary oversight of plan assets over various retirement plans held within the Master Trust structures to the Employee Benefit Investment Committee (“EBIC”). The EBIC has sub-delegated this responsibility to the Chief Investment Officer (“CIO”), who manages Trust Investments and chairs the Valuation Committee. Trust Investments is responsible for the oversight of the Plan assets including selection and monitoring of investment managers, asset strategies, and risk management. The Valuation Committee is responsible for the oversight of the valuation practices of the Master Trust and is composed of the Managing Directors of Trust Investments, including Risk Management and Trust Operations and each of the Investment teams, along with the Director of Actuarial Services and Enterprise Benefits Accounting. The Valuation Committee meets periodically with the purpose of fulfilling the following responsibilities and provides an annual review to the EBIC of its findings and actions:

- Review and approve annually the Trust Investments valuation practices, and review valuation practices used by third parties
- Review and approve the year-end valuations, including the methods used to develop and substantiate the unobservable inputs used in the fair value measurement
- Review analysis and benchmarks used by the Company and the Master Trust to assess the reasonableness of the year-end valuations and changes in fair value measurements from period to period
- Review and approve annual financial statement disclosures of the investments held in the Master Trust

Common/collective trust funds are generally valued using the NAV or its equivalent. Valuations provided by the funds are reviewed at least quarterly. The asset managers’ audited financial statements are used in the Master Trust’s annual financial reporting process, where applicable. Assessments of reasonableness include regular asset manager meetings and review of quarterly reports, third-party reviews and reconciliations, which includes escalation to Trust Investments for exceptions, quarterly CIO investment reviews, and reviews of manager valuation policies. Valuation policies are reviewed when a new mandate is entered into with an asset manager or as changes to policies are provided by managers.

Fixed income, equity, and derivative instruments are generally valued using valuations obtained from pricing vendors. Pricing vendor valuation methodologies and custodian pricing controls and related documentation are assessed for reasonableness on an annual basis. The pricing vendor due diligence process includes reviews of pricing controls and procedures, as well as discussions in order to maintain a current understanding of the valuation processes and related assumptions and inputs that may be used by

the vendors to price instruments. The custodian due diligence process includes reviews of pricing controls and procedures that are carried out on the Master Trust's behalf. This includes various levels of tolerances checks on price changes, review of stale

or unchanged prices, multi-price source comparisons, and vendor price challenges. Additionally, on a monthly basis, the custodian reconciles its valuations to valuations obtained from each investment manager and any exceptions are reported to Trust Investments for resolution, which may include escalation to the Valuation Committee.

Contributions — Contributions from Members and the matching contributions from the Company are recorded in the year in which the employee contributions are withheld from compensation.

Benefits — Benefits are recorded when paid.

Expenses — Necessary and proper expenses of the Plan are paid from the Plan assets at the Master Trust level, except for those expenses the Company is required by law or chooses to pay. Expenses are paid at the Master Trust level, deducted from income earned and therefore are recorded as a reduction of investment return and are not separately reflected in the Plan's statement of changes in net assets available for benefits.

Notes Receivable from Participants — Notes receivable from participants are measured at the unpaid principal balance, plus any accrued but unpaid interest. Delinquent Member loans are recorded as distributions based on the terms of the plan document.

3. SYNTHETIC GUARANTEED INVESTMENT CONTRACTS

The Master Trust includes the Stable Value Fund ("SVF"), which is managed by Goldman Sachs Asset Management, L.P. ("GSAM"). The SVF holds synthetic GICs.

A synthetic GIC, also known as a wrap contract, is an investment contract issued by an insurance company or other financial institution, backed by diversified fixed income and cash portfolios that are owned by the SVF. These contracts provide that realized and unrealized gains and losses on the underlying assets are not reflected immediately in the net assets of the SVF, but rather are amortized, over the duration of the underlying assets or other agreed upon period, through adjustments to the contracts' future crediting rates. Primary variables impacting the future crediting rate of the SVF include the crediting rates of the various wrap contracts, broader market interest rates, the current yield and historical investment performance of the underlying assets, the duration of the underlying assets covered by the wrap contracts, the existing difference between the market value of the SVF's investment portfolios and the associated wrap contracts' book value, the timing and amount of participant contributions and withdrawals made to or from the SVF, the percentage of the SVF invested in cash, and SVF expenses, among other factors. The contract issuers guarantee (subject to the terms, conditions and exceptions in the wrap contracts) that all qualified participant withdrawals will occur at contract value (or book value), which represents contributions made under the contract, plus credited interest, less withdrawals made under the contract, and less administrative expenses.

The synthetic GICs are included in the Master Trust's statements of net assets, as discussed in Note 2, at contract value. There are no reserves against contract value for credit risk of the contract issuers. The fixed income securities underlying the contracts are valued based on the valuation methodology stated in Note 2.

The assets underlying the synthetic GICs are owned by the SVF, which is part of the Master Trust. NT is the custodian for the Master Trust assets. The underlying assets of the synthetic GICs are invested in diversified fixed income and cash portfolios managed by BlackRock Financial Management, Voya Investment Management Co., J.P. Morgan Investment Management ("JPM"), Pacific Investment Management Company, PGIM (the global investment management business of Prudential Financial), and Western Asset Management Co. In addition to the diversified fixed income portfolios, GSAM oversees an allocation to a cash component, which is invested in a separately managed account, managed by JPM.

The wrap providers are each contractually obligated to pay the principal and specified crediting rate that is guaranteed to the SVF, subject to the terms, conditions and exceptions of each wrap contract. The respective crediting rates are each based on a formula

agreed upon with each wrap contract issuer; each contract provides an interest rate floor of 0%. Such contract crediting rates are reset on a monthly basis while the crediting rate for the SVF is reset on a daily basis.

Certain events, including but not limited to a Plan termination or a Plan merger outside the Master Trust initiated by the Company, could limit the ability of the SVF to transact at contract value or may allow for the termination of the wrap contract at less than contract value. The Company does not believe that any events are probable of occurring that could limit the ability of the SVF to transact at contract value.

4. MASTER TRUST

The Master Trust assets are invested and records are maintained by each investment fund option. Funds are allocated to the participating plans in accordance with the Plan provisions and Member allocation elections. The allocation of net assets is based on the respective number of units held by the plans' Members as of year-end. The allocation of the changes in net assets is calculated daily based on the units held by the plans' Members as of that day's end.

The Plan's interest in the Master Trust represented 100% of the Master Trust's net assets at December 31, 2024 and 2023.

Although the Plan is the only participating plan in the Master Trust as of December 31, 2024, the Company intends to keep the Master Trust for potential future acquired plans and file a Form 5500 as a master trust.

The Master Trust's statements of net assets as of December 31, 2024 and 2023, are as follows:

	2024	2023
ASSETS:		
Investments — at fair value:		
Common/collective trusts	\$ 45,742	\$ 41,439
Common and preferred stock	8,867	7,280
Government and agency securities	737	565
Corporate bonds	553	456
Mortgage and asset-backed securities	356	447
Boeing common stock	5,434	8,444
Mutual funds	133	48
Short-term investments	42	40
Other investments	15	14
Total investments — at fair value	61,879	58,733
Investments — at contract value:		
Synthetic GICs/SVF	11,231	12,536
Total Master Trust investments	73,110	71,269
Cash and cash equivalents	180	139
Receivables:		
Receivables for securities sold	166	68
Accrued investment income	38	30
Other	6	7
Total receivables	210	105
Total assets	73,500	71,513
LIABILITIES:		
Payables for securities purchased	296	68
Accrued investment and administration expenses	26	26
Other	24	32
Total liabilities	346	126
NET ASSETS	\$ 73,154	\$ 71,387

[Table of Contents](#)

The statement of changes in net assets for the Master Trust for the year ended December 31, 2024 is as follows:

Net appreciation of investments	\$ 4,682
Interest income	484
Dividend income	137
Investment income	621
Net investment income	5,303
Amounts received from participating plan	4,032
Deductions:	
Amounts paid to participating plan	7,574
Investment and administration expenses	102
Total deductions	7,676
Assets transferred from another plan	108
Increase in net assets	1,767
Beginning of year	71,387
End of year	\$ 73,154

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

ASC 820, *Fair Value Measurement*, establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 for financial assets and financial liabilities are described below:

Level 1 — Values are based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 — Values are based on (a) quoted prices for similar assets or liabilities in active markets; (b) quoted prices for identical or similar assets or liabilities in nonactive markets; or (c) valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3 — Values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

[Table of Contents](#)

The following tables set forth by level within the fair value hierarchy a summary of Master Trust investments by general types of assets and liabilities measured at fair value on a recurring basis as of December 31, 2024 and 2023. As required by ASC 820, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

NET ASSETS	\$ 15,771	\$ 1,491	\$ 27	\$ 54,098	\$ 71,387

*The amounts not leveled are related to investments using NAV as a practical expedient to estimate fair value, investments measured at contract value, and non-investment assets and liabilities. The amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Master Trust's statements of net assets.

Master Trust net assets at fair value classified within Level 3 consisted of common and preferred stock, government and agency securities, corporate bonds, mortgage and asset-backed securities, and short-term investments. Such amounts were 0.06% and 0.04% of the Master Trust's net assets as of December 31, 2024 and 2023, respectively.

Level 3 Transfers — The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. The significance of transfers between levels is evaluated based upon the nature of the financial instrument and size of the transfer relative to net assets. There were no significant transfers into or out of Level 3 for the years ended December 31, 2024 and 2023.

6. DERIVATIVE FINANCIAL INSTRUMENTS

ASC 815, *Derivatives and Hedging*, requires disclosures on how and why derivatives are used, accounted for, and affect the results of operations and financial position. Derivative instruments held by the Master Trust are not designated as hedging instruments under ASC 815. The Master Trust investments are exposed to the following financial instrument risks:

Interest Rate Risk — Interest rate risk is the risk of change in the market value of the assets due to a change in interest rates. Bond futures, interest rate swaps, and interest rate swaptions are generally used to manage interest rate risk or adjust portfolio duration. A futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. Interest rate swap agreements involve the exchange of respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed rate payments, with respect to the notional amount of principal between the Master Trust and a counterparty. Interest rate swaptions are options to enter into an interest rate swap based on predetermined conditions.

Credit Risk — Credit risk is the risk of change in the market value of assets due to the change in creditworthiness of the underlying issuer. Credit default swaps are used to manage the credit exposure of a security or basket of securities. Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation, or index.

Foreign Currency Risk — Currency risk is the risk of a change in market value due to the change in foreign currency exchange rates. Generally, currency futures and forward contracts are used to achieve the desired currency exposure, or generate value-added performance. Foreign currency futures and forwards are agreements between two parties to buy and sell a set of currencies at a set exchange rate on a specified future date. A currency option gives the buyer the right, but not the obligation, to buy one currency or sell another currency at a set exchange rate on or before a given date.

Equity Risk — Equity risk is the risk of a change in market value of assets due to the change in equity or equity index prices. Equity futures and swaps are generally used to manage the market exposure of a security or index, or rebalance the total portfolio to the target asset allocation. An equity futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. Equity swaps generally exchanges the return on a stock or stock index for the return of another financial instrument such as a different stock or equity index or LIBOR.

Future Settlement Risk — Future settlement risk is the risk of counterparty nonperformance resulting in not receiving the asset or associated gains specified in the contract. Gains are derived from the change in market value of the contract due to a change in price of the underlying security. Mortgage-backed TBAs are used to manage the market exposure of a security or asset class. A TBA is a contract for the purchase or sale of agency mortgage-backed securities to be delivered at a future agreed-upon date.

As of December 31, 2024 and 2023, the Master Trust has invested in derivative contracts. The fair value of these contracts is included in the Master Trust's statements of net assets, as discussed in Note 4, and was not material.

Derivative contracts realized gains and losses and the change in unrealized gains and losses are reflected in the Master Trust's statement of changes in net assets as net appreciation or depreciation of investments. The effect of derivative contracts realized gains and losses and the change in unrealized gains and losses for the year ended December 31, 2024 was not material.

The following table summarizes the gross notional value of derivative contracts outstanding as of December 31, 2024 and 2023. The gross notional amounts give an indication of the volume of the Master Trust's derivative activity and significantly exceed the

fair value of the derivative investments, which is more representative of the economic exposure associated with derivatives in the Master Trust.

TBA's	—	—	—	—	389	389
Total	\$ 4,465	\$ 45	236 \$	255 \$	389 \$	5,390

Derivatives are generally used to manage the market exposure of a security, index or currency, or adjust the portfolio duration. Derivative contracts are instruments that derive their value from underlying assets, indices, reference interest rates, or a combination of these factors. Refer to Note 2 for further description of how derivative instruments are valued. Certain cash instruments, such as mortgage-backed TBAs meet the definition of a derivative instrument under GAAP.

The nature of the counterparty and the settlement mechanism of the derivative affect the credit risk to which the Master Trust is exposed. For OTC derivatives such as swaps, forwards, options and TBAs, the Master Trust is exposed to the credit risk of the derivative counterparty.

For exchange-traded derivatives, such as futures and options, and “cleared” OTC swaps, the Master Trust is generally exposed to the credit risk of the relevant exchange or clearinghouse. Where possible, the Master Trust seeks to mitigate its credit risk exposures arising on derivative transactions through the use of legally enforceable master netting arrangements and collateral agreements.

The Master Trust is also exposed to liquidity risk in the following situations:

- 1) When the derivative contracts require the Master Trust to post additional cash or securities collateral with counterparties as the fair value of the contracts moves in the counterparties’ favor and the Master Trust’s receivables under related contracts are unavailable for offset or insufficient in value to offset the payment obligation to the counterparty.
- 2) When certain derivative contracts have credit-related contingent features under the International Swaps and Derivatives Association Master Agreement (generally swaps) with counterparties for contracts in a net liability position.

The Master Trust has liquidity risk if its assets decline by various, pre-specified rates over predetermined time periods. If this occurs, the Master Trust is required to post more collateral or may be required to pay off the open liability contracts given the counterparty’s right to terminate the contract. At December 31, 2024 and 2023, the Master Trust had an insignificant amount of contracts in a net liability position with contingent features with an insignificant amount posted in collateral against those positions.

7. RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500

The following is a reconciliation of net assets available for benefits per the financial statements as of December 31, 2024 and 2023, to Form 5500:

[Table of Contents](#)

	2024	2023
Net assets available for benefits per the financial statements	\$ 73,910	\$ 72,246
Amounts allocated to withdrawing Members	(76)	(109)
Net assets available for benefits per Form 5500	<u>\$ 73,834</u>	<u>\$ 72,137</u>

The following is a reconciliation of benefits paid per the financial statements for the year ended December 31, 2024, to total benefit payments per Form 5500:

Benefits paid per the financial statements	\$ 7,231
Amounts allocated to withdrawing Members — December 31, 2024	76
Amounts allocated to withdrawing Members — December 31, 2023	(109)
Amounts deemed distributions of Member loans as reflected in the Form 5500	(2)
Total benefit payments per Form 5500	<u>\$ 7,196</u>

Amounts allocated to withdrawing Members are recorded on the Form 5500 for benefit claims that have been processed and approved for payment prior to December 31, but not yet paid as of that date.

Amounts deemed distributions of Member loans as reflected in the Form 5500 are for loans that Members failed to make a payment within 30 days of the expected payment date and did not bring loan payments current within 90 days of the end of the calendar quarter in which the payment was missed, Members failed to repay the loan in full within 30 days after the end of the repayment period, or Members whose loans are in default and have not reached a distributable event and are not eligible for an in-service withdrawal in the amount of the defaulted loan balance.

8. RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

Certain Master Trust investments are managed by NT. NT is the trustee as defined by the Plan and, therefore, these transactions qualify as related party and party-in-interest transactions.

As of December 31, 2024 and 2023, the Plan held approximately 31 million and 32 million shares of common stock of the Company, with a cost basis of \$5,291 and \$5,527, respectively. During the years ended December 31, 2024 and 2023, purchases of shares by the Plan totaled \$227 and \$72, respectively, and sales of shares by the Plan totaled \$2,105 and \$2,116, respectively. Boeing contributed \$1,419 in Company common stock to the Plan during the year ended December 31, 2024.

Newport Trust Company (“Newport”), is the independent fiduciary and investment manager of the Boeing Stock Fund. The Plan has authorized Newport with sole responsibility for deciding whether to restrict investment in the Boeing Stock Fund, or to sell or otherwise dispose of all or any portion of the stock held in the Boeing Stock Fund if Newport determines it is in the best interests of the Members. In the event Newport determined to sell or dispose of stock in the Boeing Stock Fund, Newport would designate an alternative investment fund under the Plan for the temporary investment of any proceeds from the sale or other disposition of the Company’s common stock.

9. TAX STATUS

The IRS has determined and informed the Company by a letter, dated May 11, 2015, that the Plan is designed in accordance with applicable sections of the IRC. The Plan has been amended since receiving the determination letter. The Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, the

Plan administrator believes that the tax-exempt status of the Plan and related trust has not been affected and no provision for income taxes has been included in the Plan's financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are

currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2021.

10. PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event of termination of the Plan, both Member and employer contributions, including any income earned, will be distributed to the Members.
