Government Securities Fund

DEAR SHAREHOLDER:

We are pleased to provide the Annual Report for Smith Barney Shearson Government Securities Fund for the fiscal year ended December 31, 1993. In this report, we will provide you with a review of the Fund's performance, the market environment and portfolio activities during the past twelve months In addition, we have taken this opportunity to simplify the report by separating the historical performance information for Class A and B shares into two distinct sections. Our goal is to give you clear, concise information that makes it easier for you to follow your investment. We are doing this because Smith Barney Shearson believes that an informed investor and an experienced Financial Consultant form the most productive partnerships.

INTEREST RATES AND ECONOMIC ENVIRONMENT

The election in November of 1992 of a new President, especially a Democratic President for the first time in 12 years, created confusion and speculation in the financial markets. Much of the speculation was centered on the question of whether this party's stereotypical label of "government knows best" would continue, or would a "new Presidency" emerge? From our vantage point, there is enough evidence to suggest that both labels are appropriate. We're going to use the graph on the next page to show the effect of the economic and political environment on the interest rate of a 30-year Treasury bond during 1993.

In expectation of a promised budget compromise and continued economic growth that was slow by historical standards, interest rates resumed their downward movement in mid-January (Phase A). Once long-term interest rates dropped below 7%, the market basically treaded water (Phase B), while waiting for the close margin of approval for the budget package. Although economic statistics indicated a reluctantly-improving economy, it was also apparent that renewed inflation was unlikely. Ongoing reports of layoffs and low levels of consumer confidence prompted the Federal Reserve Board to maintain its neutral wait-and-see policy.

1

YIELD ON 30-YEAR U.S. TREASURY BOND 12/31/92 - 12/31/93

[GRAPHIC]

(Phase C) of the interest rate cycle reflects the market's reaction to higher tax rates and concern over the cost of health care reform. As consumers attempted to pare down their debt levels and bolster savings, a vicious downward spiral in interest rates began in mid-May. The combination of mortgage refinancings and thirst for yield caused long-term rates to fall to levels not seen since the early 1970's.

As economic growth gained momentum and attention turned toward the North American Free Trade Agreement (NAFTA) and its implications, fear of a tightening in the Federal Reserve's monetary policy infiltrated the minds of many investors. Many investors subsequently took their profits, and a slowdown in new money entering the financial markets caused rates to rise by 50 basis points (one-half of a percentage point) to the market rate of approximately 6.30% (Phase D).

The key issue confronting the financial markets today is whether the economy truly is finally on the road to a healthy recovery or whether this is yet another example of short-lived growth. By early in the second quarter of 1994, when the effect of the retroactive tax increase becomes more fully felt and the costs of health care reform are clearer, we should have a good idea of the sustainability of the recovery. If the combined costs prove to be surprisingly

2

## D I V I D E N D P O L I C Y

ALTHOUGH NOT EXPLICITLY STATED IN THE PROSPECTUS, THE FUND'S POLICY IS TO PAY A LEVEL MONTHLY DIVIDEND BASED ON OUR PROJECTIONS FOR THE GOVERNMENT SECURITIES MARKET AND THE GENERAL DIRECTION OF INTEREST RATES. THIS POLICY HAS NO APPRECIABLE AFFECT ON THE FUND'S INVESTMENT STRATEGIES OR NET ASSET VALUE PER SHARE SINCE IT IS GUIDED BY MARKET CONDITIONS. IT MEANS THAT WE DO NOT INVEST IN MORE SPECULATIVE SECURITIES THAT MAY UNDERMINE THE FUND'S NET ASSET VALUE PER SHARE IN ORDER TO MAINTAIN AN UNREALISTICALLY HIGH DIVIDEND POLICY. WE CONTINUALLY MONITOR BOTH THE MARKET AND THE FUND'S INCOME STREAM TO SEE THAT OUR DIVIDEND PROJECTIONS ARE REALISTIC.

#### INVESTMENT STRATEGY

The nursery rhyme "Jack be nimble, Jack be quick" epitomized what portfolio managers were up against in 1993. More than ever, the decision to invest in mortgage-backed securities versus Treasury securities was a crucial timing issue. In the final analysis, however, our expectations that mortgage prepayments would continue because of the historically low interest rate environment led us to avoid mortgage securities. We believe that this decision helped the Fund to perform better than many of its peers.

We anticipate that the mortgage market will offer some attractive opportunities in 1994 as the preponderance of mortgage refinancings already have occurred. When mortgage issues offer better relative value than Treasuries, we will take advantage of it. As we wait for those opportunities, the majority of the Fund's assets will be invested in intermediate-term Treasuries.

#### PERFORMANCE

The Fund produced a compounded total return of 10.87% for shareholders of Class A shares and 10.45% for shareholders of Class B shares for the fiscal year ended December 31, 1993. Based on an analysis of its peer group of similarly-managed funds as measured by Lipper Analytical Services, Inc., a nationally recognized mutual fund ranking organization, the Fund was ranked in the first quartile for this twelve-month period. More specific information about the performance of each share class is given in the historical performance and average annual return sections of this report.

3

As the vagaries of the new world order influence fiscal policy and international treaties, we will attempt to give you a timely interpretation of the impact on the financial markets. Once again, we appreciate your continued support of the Fund and look forward to hearing from you.

Sincerely,

Heath B. McLendon Chairman of the Board James E. Conroy Vice President and Investment Officer FEBRUARY 1, 1994

## PORTFOLIO BREAKDOWN

Pie chart depicting the allocation of the Investment Funds Government Securities Fund's investment securities held at December 31, 1993 by security types. The pie is broken in pieces representing security types in the following percentages:

<TABLE>

SECURITY TYPES PERCENTAGE

<S> <C>
U.S. Treasury Securities 75.5%

Mortgage-Backed Securities 22.1%

Repurchase Agreements and Net Other

2.4%

U.S. TREASURY SECURITIES are debt obligations of the U.S. government. They are secured by the full faith and credit of the federal government, and include such instruments as Treasury notes, bills and bonds.

U.S. GOVERNMENT AGENCY SECURITIES are securities issued by government sponsored corporations like the Federal Land Banks or the Student Loan Marketing Association (SLMA). Mortgage-Backed Securities are also agency securities, but are shown separately in this chart and described below.

MORTGAGE-BACKED SECURITIES are debt securities issued by U.S. government agencies such as the Federal Home Loan Mortgage Corporation (FHLMC), Federal National Mortgage Association (FNMA) and Government National Mortgage Association (GNMA). They represent thousands of individual home mortgages that are pooled to form securities. As homeowners pay interest and principal each month, these payments are passed on to investors. Mortgage-Backed Securities are backed by the full faith and credit of the issuing agency.

AVERAGE MATURITY 6.86 years

06/93	10,530	10,916	10,490
09/93	10,914	11,270	10,968
12/93	10,843	11,232	10,900

  |  |  |+ Illustration of \$10,000 invested in Class A shares on November 6, 1992, assuming deduction of the maximum 4.5% sales charge at the time of investment and reinvestment of dividends and capital gains at net asset value through December 31, 1993.

The Lehman Brothers Government Bond Index is an unmanaged, broad-based index of all public debt obligations of the U.S. government and its agencies and has an average maturity of approximately nine years. The Index is useful in depicting the general movement of the government securities market, but because it is unmanaged the Index is not subject to the same management and trading expenses as a mutual fund.

The Lipper Peer Group Average is composed of the Fund's peer group of 110 mutual funds investing in U.S. government securities as of December 31, 1993.

NOTE: All figures cited here and on the other pages represent past performance of the Fund and do not guarantee future results of Class A shares.

NOTES TO FINANCIAL STATEMENTS

## 1. SIGNIFICANT ACCOUNTING POLICIES

Smith Barney Shearson Investment Funds Inc. (the "Company") was incorporated in Maryland on September 29, 1981 and commenced operations on January 4, 1982. The Company is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified open-end management investment company. Prior to the close of business on July 30, 1993, the Company's corporate name was "SLH Investment Portfolios Inc." and it was doing business under the name "Shearson Lehman Brothers Investment Funds." As of the date of this report, the Company is composed of five managed investment Funds (the "Funds"): Investment Grade Bond Fund, Government Securities Fund, Special Equities Fund, Directions Value Fund, and European Fund. The assets of each Fund are segregated and a shareholder's interest is limited to the Fund in which he or she owns shares. As of November 6, 1992, each Fund offered two classes of shares to the general public: Class A shares and Class B shares. Class A shares are sold with a front-end sales charge. Class B shares may be subject to a contingent deferred sales charge ("CDSC"). Class  ${\tt B}$ shares will convert automatically to Class A shares approximately eight years after the date of original purchase, beginning September 30, 1994. As of January 29, 1993, the Government Securities Fund (the "Fund") offered a third class of shares, Class D shares and these shares were first purchased by the public on February 4, 1993. Class D shares are offered to plans participating in the Smith Barney Shearson Inc. ("Smith Barney Shearson") 401(k) program. Class D shares are offered without a front-end sales charge or CDSC. All classes of shares have identical rights and privileges except with respect to the effect of the respective sales charges to each class, the distribution and/or service fees borne by each class, expenses allocable exclusively to each class, voting rights on matters affecting a single class, the exchange privilege of each class and the conversion feature of Class B shares. The following is a summary of significant accounting policies consistently followed by the Fund in preparation of its financial statements.

PORTFOLIO VALUATION: Securities listed on an exchange are valued on the basis of the last sale prior to the time the valuation is made. If there has been no sale since the immediately previous valuation, then the current bid price is used. Over-the-counter securities are valued on the basis of the bid price at

Smith Barney Shearson Government Securities Fund

the close of business on each day. Notwithstanding the above, bonds and other fixed-income securities are valued by using market quotations and may be valued on the basis of prices provided by a pricing service, when the Board of Directors believes that such prices reflect the market value of such securities. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated by or under the authority of the Board of Directors as the primary market. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors. Options are generally valued at the last sale price or, in the absence of a last sale price, the last bid price. Money market instruments maturing within 60 days of the valuation date are valued at amortized cost.

OPTIONS ON FUTURES CONTRACTS: Options on futures generally operate in the same manner as options purchased or written directly on the underlying debt securities. The Fund is required to deposit, in a manner similar to futures contracts as described below, "initial margin" and "variation margin" with respect to put and call options written on futures contracts. In addition, upon exercise, net premiums received will decrease the unrealized loss or increase the unrealized gain on the future. The potential risk to the Fund is that the change in value of the underlying securities may not correlate to the change in value of the contracts.

FUTURES CONTRACTS: The Fund may enter into futures contracts in order to hedge against changes in the value of its portfolio securities due to anticipated changes in market conditions and interest rates.

Upon entering into a futures contract, the Fund is required to deposit with the broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as the "initial margin." Subsequent payments ("variation margin") are made or received by the Fund each day, depending on the daily fluctuation of the value of the contract.

For financial statement purposes, an amount equal to the settlement amount of the contract is included in its Statement of Assets and Liabilities as an asset and as an equivalent liability. For long futures positions, the asset is marked-to-market daily. For short futures positions, the liability is marked-

22

Smith Barney Shearson Government Securities Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

to-market daily. The daily changes in the contract are recorded as unrealized gains or losses. The Fund recognizes a realized gain or loss when the contract is closed.

There are several risks in connection with the use of futures contracts as a hedging device. The change in value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in value of the hedged instruments. In addition, there is the risk the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

REPURCHASE AGREEMENTS: The Fund engages in repurchase agreement transactions. Under the terms of a typical repurchase agreement, the Fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and the Fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the Fund's holding period. The value of the collateral is at least equal at all times to the total amount of the repurchase obligations, including interest. In the event of counterparty default, the Fund has the right to use the collateral to offset losses incurred. There is a potential loss to the Fund in the event the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities including the risk of a possible decline in the value of the underlying securities during the period while the Fund seeks to assert its rights. The Fund's investment adviser, acting under the supervision of the Board of Directors, reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

REVERSE REPURCHASE AGREEMENTS: The Fund may enter into reverse repurchase agreement transactions with member banks on the Federal Reserve Bank of New York's list of reporting dealers for leverage purposes. A reverse repurchase agreement involves a sale by the Fund of securities that it holds with an agreement by the Fund to repurchase the same securities at an agreed upon price and date. A reverse repurchase agreement involves the risk that the market value

23

Smith Barney Shearson Government Securities Fund

\_ \_\_\_\_\_\_

#### NOTES TO FINANCIAL STATEMENTS (CONTINUED)

securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Fund's use of the proceeds of the agreement may be restricted pending a determination by the party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. The Fund will establish a segregated account with its custodian, Boston Safe Deposit and Trust Company ("Boston Safe"), in which the Fund will maintain cash, U.S. government securities or other liquid high grade debt obligations equal in value to its obligations with respect to reverse repurchase agreements.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME: Securities transactions are recorded as of the trade date. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Investment income and realized and unrealized gains and losses are allocated based upon the relative net assets of each class of shares.

FEDERAL INCOME TAXES: The Fund intends to continue to qualify as a regulated investment company, if such qualification is in the best interest of its shareholders, by complying with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS: Distributions from net investment income are determined on a class level and will be declared daily and paid monthly. Distributions from net realized capital gains, after utilization of capital loss carryforwards, are determined on a Fund level and will be distributed at least annually. Net short-term capital gains (including, any short-term capital gains from options transactions) may be paid more frequently, with the distribution of dividends from net investment income. Additional distributions of net investment income and capital gains may be made at the discretion of the Board of Directors to avoid the application of the excise tax imposed under the Code for certain undistributed amounts. Income distributions and capital gain distributions on a Fund level are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. These differences are primarily due

24

Smith Barney Shearson Government Securities Fund

- -----

## NOTES TO FINANCIAL STATEMENTS (CONTINUED)

to differing treatments of income and gains on various investment securities held by the Fund, timing differences and differing characterization of distributions made by the Fund as a whole.

RECLASSIFICATIONS: During the year, the Fund adopted Statement of Position 93-2 "Determination, Disclosure, and Financial Statement Presentation of Income, Capital Gain, and Return of Capital Distributions by Investment Companies." Accordingly, certain reclassifications have been made to the components of capital in the Statement of Net Assets to conform with the accounting and reporting guidelines of this statement. Distributions in excess of book basis accumulated realized gains or undistributed net investment income that were the result of permanent book and tax accounting differences have been reclassified to paid-in capital. In addition, amounts distributed in excess of accumulated net investment income as determined for financial statement purposes which had previously been reported as distributions from paid-in capital have been reclassified to accumulated net investment income. Accordingly, amounts as of December 31, 1992 have been restated to reflect a decrease in paid-in capital of \$26,975,624, a decrease in accumulated net realized losses of \$29,083,669 and a decrease in undistributed net investment income of \$2,108,045. The Statement of Changes in Net Assets and the Financial Highlights have not been restated to reflect this change in presentation. Net investment income, net realized gains and net assets were not affected by this change.

2. INVESTMENT ADVISORY FEE, ADMINISTRATION FEE AND OTHER RELATED PARTY TRANSACTIONS

Up to the close of business on July 30, 1993, the Fund had entered into an investment advisory agreement with Shearson Lehman Brothers Inc. ("Shearson Lehman Brothers") on behalf of Shearson Lehman Advisors, a member of the Asset Management Group of Shearson Lehman Brothers. Under the Advisory Agreement, the Fund paid a monthly fee at the annual rate of 0.35% of the value of its average daily net assets, up to \$2 billion, 0.30% of the value of its average daily net assets on the next \$2 billion, 0.25% of the value of its average daily net assets on the next \$2 billion, 0.20% of the value of average daily net assets of the next \$2 billion and 0.15% of the value of its average daily net assets

25

Smith Barney Shearson Government Securities Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of the close of business on July 30, 1993, The Travelers Inc. (formerly known as Primerica Corporation) ("Travelers") and Smith Barney, Harris Upham & Co. Incorporated completed the acquisition of substantially all of the domestic retail brokerage and asset management businesses of Shearson Lehman Brothers. Smith Barney, Harris Upham & Co. Incorporated was subsequently renamed Smith Barney Shearson.

As of the close of business on July 30, 1993, Greenwich Street Advisors, a division of Mutual Management Corp., which is controlled by Smith Barney Shearson Holdings Inc. ("Holdings"), succeeded Shearson Lehman Advisors as the Fund's investment adviser. Holdings is a wholly owned subsidiary of Travelers. The new investment advisory agreement with Greenwich Street Advisors (the "Advisory Agreement") contains terms and conditions substantially similar to the investment advisory agreement with the predecessor investment adviser and provides for payment of fees at the same rate as was paid to such predecessor investment adviser. For the year ended December 31, 1993, Greenwich Street Advisors voluntarily waived fees of \$522,000, of this amount \$63,840 is receivable at December 31, 1993.

The Fund has also entered into an administration agreement (the "Administration Agreement") with the Boston Company Advisors, Inc. ("Boston Advisors"), an indirect wholly owned subsidiary of Mellon Bank Corporation ("Mellon"). Under the Administration Agreement, the Fund pays a monthly fee at an annual rate of 0.20% of the value of its average daily net assets. Prior to May 21, 1993, Boston Advisors served as sub-investment adviser and administrator to the Fund.

For the year ended December 31, 1993, the Fund incurred total brokerage commissions of \$717,340, of which \$87,550 were paid to Smith Barney Shearson or its predecessor.

For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$48,964 representing commissions (sales charges) on sales of Class A shares.

A CDSC is generally payable by a shareholder in connection with the redemption of Class B shares within five years (eight years in the case of

2.6

Smith Barney Shearson Government Securities Fund

-----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

certain 401(k) plans) after the date of purchase. In circumstances in which the charge is imposed, the amount of the charge ranges between 4.5% and 1% of net asset value depending on the number of years since the date of purchase (except in the case of purchases by certain 401(k) plans in which case a 3% charge is imposed for the eight year period after the date of purchase). For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$820,619 representing CDSC fees on the redemption of Class B shares.

No officer, director or employee of Smith Barney Shearson or Boston Advisors or of any parent or subsidiary of those corporations receives any compensation from the Company for serving as an officer or director of the Company. The Company pays each Director who is not an officer, director or employee of Smith Barney Shearson or Boston Advisors or any of their affiliates \$14,000 per annum plus \$3,000 per meeting attended and reimburses each such Director for travel and out-of-pocket expenses.

Boston Safe, an indirect wholly owned subsidiary of Mellon, serves as the Fund's custodian. The Shareholder Services Group, Inc., a subsidiary of First Data Corporation, serves as the Fund's transfer agent.

#### 3. DISTRIBUTION AGREEMENT

Smith Barney Shearson acts as distributor of the Fund's shares pursuant to a distribution agreement with the Company, and sells shares of all Funds of the Company through Smith Barney Shearson or its affiliates.

Pursuant to Rule 12b-1 under the 1940 Act, the Fund has adopted a Services and Distribution Plan (the "Plan"). Under this Plan, the Company compensates Smith Barney Shearson for servicing shareholder accounts for Class A, Class B, and Class D shareholders, and covers expenses incurred in distributing Class B and Class D shares. Smith Barney Shearson is paid an annual service fee with respect to Class A, Class B and Class D shares of the Fund at the rate of 0.25% of the value of the average daily net assets of each respective class of shares. Smith Barney Shearson is also paid an annual distribution fee with respect to Class B and Class D shares at the rate of 0.50% of the value of the average daily net assets of each respective class of shares. For the year ended December 31, 1993, the service fee for Class A

27

Smith Barney Shearson Government Securities Fund

- ------

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

and Class B shares was \$13,628 and \$2,384,061, respectively. For the period from February 4, 1993 through December 31, 1993, the service fee for Class D shares was \$255. For the year ended December 31, 1993, the distribution fee for Class B shares was \$4,768,122. For the period from February 4, 1993 through December 31, 1993, the distribution fee for Class D shares was \$510.

#### 4. EXPENSE ALLOCATION

Expenses of the Fund not directly attributable to the operations of any class of shares are prorated among the classes based upon the relative net assets of each class. Operating expenses directly attributable to a class of shares are charged to that class' operations. In addition to the above service and distribution fees, class specific operating expenses include the transfer agent fees. For the year ended December 31, 1993, transfer agent fees for Class A and Class B shares were \$5,431 and \$817,821, respectively. For the period from February 4, 1993 through December 31, 1993 transfer agent fees for Class D shares were \$84.

## 5. SECURITIES TRANSACTIONS

Cost of purchases and proceeds from sales of U.S. government securities, excluding short-term investments, aggregated \$5,182,442,051 and \$5,428,165,914, respectively, for the year ended December 31, 1993.

At December 31, 1993, aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$1,684,566 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$8,662,434.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

#### 8. LINE OF CREDIT

The Fund and several affiliated entities participate in a \$50 million line of credit provided by Continental Bank N.A. under an Amended and Restated Line of Credit Agreement (the "Agreement") dated April 30, 1992, primarily for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. Under this Agreement, the Fund may borrow up to the lesser of \$25 million or 20% of its net assets. Interest is payable either at the bank's Money Market Rate or the London Interbank Offered Rate (LIBOR) plus 0.375% on an annualized basis. The Fund and the other affiliated entities are charged an aggregate commitment fee of \$125,000 which is allocated equally among each of the participants. The Agreement requires, among other provisions, each participating fund to maintain a ratio of net assets (not including funds borrowed pursuant to the Agreement) to aggregate amount of indebtedness pursuant to the Agreement of no less than 5to 1. During the year ended December 31, 1993, the Fund had an average outstanding daily balance of \$89,589 with interest rates ranging from 3.3125% to 3.5625%. Interest expense totalled \$3,091 for the year ended December 31, 1993. At December 31, 1993 the Fund had no outstanding borrowings under this Agreement.

REPORT OF INDEPENDENT ACCOUNTANTS

TO THE SHAREHOLDERS AND BOARD OF DIRECTORS OF SMITH BARNEY SHEARSON GOVERNMENT SECURITIES FUND OF SMITH BARNEY SHEARSON INVESTMENT FUNDS INC.:

We have audited the accompanying statement of assets and liabilities of Smith Barney Shearson Government Securities Fund of Smith Barney Shearson Investment Funds Inc., including the schedule of portfolio investments, as of December 31, 1993, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 1993 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Smith Barney Shearson Government Securities Fund of Smith Barney Shearson Investment Funds Inc. as of December 31, 1993, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

Investment Grade Bond Fund

DEAR SHAREHOLDER:

We are pleased to provide the Annual Report for Smith Barney Shearson Investment Grade Bond Fund (the "Fund") for the fiscal year ended December 31, 1993. In this report we will provide you with a review of the Fund's performance, the market environment and portfolio activities during the past twelve months. In addition, we have taken the opportunity to simplify this report by separating the historical performance information for Class A and B shares into two distinct sections. Our goal is to give you clear, concise information that makes it easier for you to follow your investment. We are doing this because Smith Barney Shearson believes that an informed investor and an experienced Financial Consultant form the most productive partnerships.

THE MARKET AND ECONOMIC ENVIRONMENT

The primary concern amongst all participants in capital markets as we entered the dawn of a new Democratic Administration in 1993 was the spectre of unnecessary fiscal stimulus as a panacea

for the fledgling economic recovery. As the year unfolded, President Clinton proceeded to honor his campaign pledge to reduce the Federal budget deficit. In August 1993, legislation was enacted which provided for significant deficit reductions in the years ahead. This helped calm market fears and participants once again shifted their focus to the level of economic activity and the improving outlook for inflation.

Economic growth slowed from the rapid pace recorded in the fourth quarter of 1992. The sharp increase in reported inflation statistics in early 1993 gave way to a series of moderating monthly increases throughout the remainder of the year. At the long end of the maturity spectrum, the yield on the 30-year Treasury bond fell from 7.40% in December 1992 to 5.75% in mid-October 1993. As monthly economic reports strengthened in November and December, 1993, the yield on the 30-year Treasury bond rose to close the year at 6.30%.

The overall decline in rates during 1993 made it very advantageous for corporations to issue debt, and as a result the corporate bond market experienced a record amount of new issuance. Bank and finance, industrial utility and sovereign issuers were extremely active in refinancing older, higher

1

## D I V I D E N D P O L I C Y

ALTHOUGH NOT EXPLICITLY STATED IN THE PROSPECTUS, THE FUND'S POLICY IS TO PAY A LEVEL MONTHLY DIVIDEND BASED ON OUR PROJECTIONS FOR THE CORPORATE BOND MARKET AND THE GENERAL DIRECTION OF INTEREST RATES. THIS POLICY HAS NO APPRECIABLE AFFECT ON THE FUND'S INVESTMENT STRATEGIES OR NET ASSET VALUE PER SHARE SINCE IT IS GUIDED BY MARKET CONDITIONS. IT MEANS THAT WE DO NOT INVEST IN MORE SPECULATIVE SECURITIES THAT MAY UNDERMINE THE FUND'S NET ASSET VALUE PER SHARE IN ORDER TO MAINTAIN AN UNREALISTICALLY HIGH DIVIDEND POLICY. WE CONTINUALLY MONITOR BOTH THE MARKET AND THE FUND'S INCOME STREAM TO SEE THAT OUR DIVIDEND PROJECTIONS ARE REALISTIC.

coupon debt with new issues at lower coupon levels. Because the net new issuance was absorbed readily by insurance companies, mutual funds and pension funds, the yield differential between corporate and other securities narrowed during the year.

### INVESTMENT STRATEGY

We began 1993 with a constructive outlook for the year as a whole and remained fully invested in longer-dated maturities. The average maturity of the Fund's portfolio was 27 years at the end of the Fund's fiscal year. On December 31, 1993, 4.05% of the portfolio was rated AAA, the highest available bond rating by Standard & Poor's Corporation, which is a nationally-recognized bond rating organization, 13.21% of the portfolio was rated AA, 36.91% was rated A, and 30.03% was rated BBB. The majority of assets were invested in the food and beverage, airline, automotive and aerospace sectors.

## PERFORMANCE REVIEW

The Fund had yet another good performance year in 1993. Its Class A and Class B shares were ranked numbers one and two, respectively, among their Lipper Analytical peer group of 73 funds for the twelve months ended December 31, 1993. The Fund's oldest class of shares, the Class B shares, was ranked by Lipper in the first quartile for the three-and five-year periods ended December 31, 1993. More specific information about the performance of each share class is given in the historical performance and average annual total return sections of this report.

2

## THE OUTLOOK FOR 1994

As we look forward to 1994, we envision uneven economic growth accompanied by a relatively stable, low level of inflation. It remains our belief that favorable global factors such as emerging markets and worldwide competition continue to provide a positive backdrop for more improvement in productivity gains. The acceptance of the North American Free Trade Agreement ("NAFTA") and the General Agreement on Trade and Tariffs ("GATT") are more symbolic of how the world is becoming interdependent. This is not an inflationary environment leading to higher interest rates. Conversely, it should lead to a declining worldwide rate environment.

The 1993 fiscal year concluded the Fund's eleventh year of operations. In retrospect, the past years have been filled with an amazing variety of market

and economic conditions and political events. Through it all our investment focus has remained constant, and despite periodic volatility the Fund and its shareholders have been handsomely rewarded. As we begin our twelfth year, we want to thank the shareholders who have been investors since inception and welcome more recent shareholders to the Fund.

Sincerely,

Heath B. McLendon Chairman of the Board George E. Mueller, Jr. Investment Officer FEBRUARY 1, 1994

The Lehman Brothers Long-Term Corporate Bond Index is an unmanaged index comprised of all publicly issued, fixed rate, nonconvertible, dollar-denominated investment-grade corporate debt. The average maturity of the bonds in this index is approximately 23 years and includes bonds from a diverse range of industries. Because it is unmanaged, the Lehman Brothers Long-Term Corporate Bond Index is not subject to the same management and trading expenses as a mutual fund.

The Lipper Corporate Debt A-Rated Average is composed of the Fund's peer group of 75 mutual funds as of December 31, 1993.

NOTE: All figures cited here and on the other pages represent past performance of the Fund and do not guarantee future results of Class A shares.

  |  |  |+ Hypothetical illustration of \$10,000 invested in Class B shares on December 31, 1983, assuming reinvestment of dividends and capital gains at net asset value through December 31, 1993.

The Lehman Brothers Long-Term Corporate Bond Index is an unmanaged index comprised of all publicly issued, fixed rate, nonconvertible, dollar-denominated investment-grade corporate debt. The average maturity of the bonds in this index is approximately 23 years and includes bonds from a diverse range of industries. Because it is unmanaged, the Lehman Brothers Long-Term Corporate Bond Index is not subject to the same management and trading expenses as a mutual fund.

The Lipper Corporate Debt A-Rated Average is composed of the Fund's peer group of 75 mutual funds as of December 31, 1993.

NOTE: All figures cited here and on the other pages represent past performance of the Fund and do not guarantee future results of Class B shares.

FOR A GLOSSARY OF TERMS, PLEASE TURN TO THE END OF THIS REPORT.

\_ \_\_\_\_\_\_

NOTES TO FINANCIAL STATEMENTS

## 1. SIGNIFICANT ACCOUNTING POLICIES

Smith Barney Shearson Investment Funds Inc. (the "Company") was incorporated in Maryland on September 29, 1981 and commenced operations on January 4, 1982. The Company is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified open-end management investment company. Prior to the close of business on July 30, 1993, the Company's corporate name was "SLH Investment Portfolios Inc." and it was doing business under the name "Shearson Lehman Brothers Investment Funds." As of the date of this report, the Company is composed of five managed investment funds (the "Funds"): Investment Grade Bond Fund, Government Securities Fund, Special Equities Fund, Directions Value Fund, and European

<sup>\*</sup>The Fund commenced selling Class D shares on February 26, 1993.

<sup>\*\*</sup>Annualized.

<sup>+</sup>Total return represents aggregate total return for the period indicated.

<sup>++</sup>Per share amounts have been calculated using the monthly average share method.

Fund. The assets of each Fund are segregated and a shareholder's interest is limited to the Fund in which he or she owns shares. As of November 6, 1992, each Fund offered two classes of shares to the general public: Class A shares and Class B shares. Class A shares are sold with a front-end sales charge. Class B shares may be subject to a contingent deferred sales charge ("CDSC") upon redemption. Class B shares will convert automatically to Class A shares approximately eight years after date of purchase, beginning on September 30, 1994. As of January 29, 1993, the Investment Grade Bond Fund ("the Fund") offered a third class of shares, Class D shares, and these shares were first purchased by the public on February 26, 1993. Class D shares are offered to plans participating in the Smith Barney Shearson Inc. ("Smith Barney Shearson") 401(k) program. Class D shares are offered without a front-end sales charge or CDSC. All classes of shares have identical rights and privileges except with respect to the effect of the respective sales charges to each class, the distribution and/or service fees borne by each class, expenses allocable exclusively to each class, voting rights on matters affecting a single class, the exchange privilege of each class and the conversion feature of Class B shares. The following is a summary of significant accounting policies consistently followed by the Fund in preparation of its financial statements.

PORTFOLIO VALUATION: Securities listed on an exchange are valued on the basis of the last sale prior to the time the valuation is made. If there has been no sale since the immediately previous valuation, then the current bid price is used. Over-the-counter securities are valued on the basis of the bid price at the close of business on each day. Notwithstanding the above, bonds and

21

Smith Barney Shearson Investment Grade Bond Fund

- ------

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

other fixed-income securities are valued by using market quotations and may be valued on the basis of prices provided by a pricing service, when the Board of Directors believes that such prices reflect the market value of such securities. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated by or under the authority of the Board of Directors as the primary market. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors. Money market instruments maturing within 60 days of the valuation date are valued at amortized cost.

REPURCHASE AGREEMENTS: The Fund engages in repurchase agreement transactions. Under the terms of a typical repurchase agreement, the Fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and the Fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the Fund's holding period. The value of the collateral is at least equal at all times to the total amount of the repurchase obligations, including interest. In the event of counterparty default, the Fund has the right to use the collateral to offset losses incurred. There is a potential loss to the Fund in the event the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities including the risk of a possible decline in the value of the underlying securities during the period while the Fund seeks to assert its rights. The Fund's investment adviser, acting under the supervision of the Board of Directors, reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME: Securities transactions are recorded as of the trade date. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Investment income and realized and unrealized gains and losses are allocated based upon the relative net assets of each class of shares.

22

Smith Barney Shearson Investment Grade Bond Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

FEDERAL INCOME TAXES: The Fund intends to continue to qualify as a regulated investment company, if such qualification is in the best interest of its shareholders, by complying with the requirements of the Internal Revenue Code of

1986, as amended (the "Code"), applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS: Distributions from net investment income, if any, are determined on a class level and will be declared daily and paid monthly. Distributions from net realized capital gains, after utilization of capital loss carryforwards, are determined on a Fund level and will be distributed at least annually. Net short-term capital gains may be paid more frequently, with the distribution of dividends from net investment income. Additional distributions of net investment income and capital gains may be made at the discretion of the Board of Directors to avoid application of the excise tax imposed under the code for certain undistributed amounts. Income distributions and capital gain distributions on a Fund level are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. These differences are primarily due to differing treatments of income and gains on various investment securities held by the Fund, timing differences and differing characterization of distributions made by the Fund as a whole.

RECLASSIFICATIONS: During the year, the Fund adopted Statement of Position 93-2 "Determination, Disclosure, and Financial Statement Presentation of Income, Capital Gain, and Return of Capital Distributions by Investment Companies." Accordingly, certain reclassifications have been made to the components of capital in the Statement of Net Assets to conform with the accounting and reporting guidelines of this statement. Distributions in excess of book basis accumulated realized gains or undistributed net investment income that were the result of permanent book and tax accounting differences have been reclassified to paid-in capital. In addition, amounts distributed in excess of accumulated net investment income as determined for financial statement purposes which had previously been reported as distributions from paid-in capital have been reclassified to accumulated net investment income. Accordingly, amounts as of December 31, 1992 have been restated to reflect an increase in undistributed net investment income of \$788,270, a decrease in paid-in capital of \$806,152 and a decrease in

23

Smith Barney Shearson Investment Grade Bond Fund

- -----

### NOTES TO FINANCIAL STATEMENTS (CONTINUED)

accumulated net realized losses of \$17,882. The Statement of Changes in Net Assets and Financial Highlights have not been restated to reflect this change in presentation. Net investment income, net realized gains and net assets were not affected by this change.

2. INVESTMENT ADVISORY FEE, ADMINISTRATION FEE AND OTHER RELATED PARTY TRANSACTIONS

Up to the close of business on July 30, 1993, the Fund had entered into an investment advisory agreement with Shearson Lehman Brothers Inc. ("Shearson Lehman Brothers") on behalf of Shearson Lehman Advisors, a member of the Asset Management Group of Shearson Lehman Brothers. Under the investment advisory agreement, the Fund paid a monthly fee at the annual rate of 0.45% of the value of its average daily net assets, up to \$500 million and 0.42% of the value of its average daily net assets thereafter.

As of the close of business on July 30, 1993, The Travelers Inc. (formerly known as Primerica Corporation) ("Travelers") and Smith Barney, Harris Upham & Co. Incorporated completed the acquisition of substantially all of the domestic retail brokerage and asset management businesses of Shearson Lehman Brothers. Smith Barney, Harris Upham & Co. Incorporated was subsequently renamed Smith Barney Shearson.

As of the close of business on July 30, 1993, Greenwich Street Advisors, a division of Mutual Management Corp., which is controlled by Smith Barney Shearson Holdings Inc. ("Holdings"), succeeded Shearson Lehman Advisors as the Fund's investment adviser. Holdings is a wholly owned subsidiary of Travelers. The new investment advisory agreement with Greenwich Street Advisors (the "Advisory Agreement") contains terms and conditions substantially similar to the investment advisory agreement with the predecessor investment adviser and provides for payment of fees at the same rate as was paid to such predecessor investment adviser.

The Fund has also entered into an administration agreement (the "Administration Agreement") dated May 21, 1993, with The Boston Company Advisors, Inc. ("Boston Advisors"), an indirect wholly owned subsidiary of Mellon Bank Corporation ("Mellon"). Under the Administration Agreement, the Fund pays a monthly fee at the annual rate of 0.20% of the value of its

Smith Barney Shearson Investment Grade Bond Fund

- ------

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

average daily net assets up to \$500 million and 0.18% of the value of its average daily net assets thereafter. Prior to May 21, 1993, Boston Advisors served as sub-investment adviser and administrator to the Fund.

For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$110,683 representing commissions (sales charges) on sales of Class A shares.

A CDSC is generally payable by a shareholder in connection with the redemption of Class B shares within five years (eight years in the case of certain 401(k) plans) after the date of purchase. In circumstances in which the charge is imposed, the amount of the charge ranges between 4.5% and 1% of net asset value depending on the number of years since the date of purchase (except in the case of purchases by certain 401(k) plans in which case a 3% charge is imposed for the eight year period after the date of the purchase). For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$498,515 representing CDSC fees on the redemption of Class B shares.

No officer, director or employee of Smith Barney Shearson or Boston Advisors or of any parent or subsidiary of those corporations receives any compensation from the Company for serving as an officer or director of the Company. The Company pays each Director who is not an officer, director or employee of Smith Barney Shearson or Boston Advisors or any of their affiliates \$14,000 per annum plus \$3,000 per meeting attended and reimburses each such Director for travel and out-of-pocket-expenses.

Boston Safe Deposit and Trust Company, an indirect wholly owned subsidiary of Mellon, serves as the Fund's custodian. The Shareholder Services Group, Inc., a subsidiary of First Data Corporation, serves as the Fund's transfer agent.

#### 3. DISTRIBUTION AGREEMENT

Smith Barney Shearson acts as distributor of the Fund's shares pursuant to a distribution agreement with the Company, and sells shares of all the Funds of the Company through Smith Barney Shearson or its affiliates.

25

Smith Barney Shearson Investment Grade Bond Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Pursuant to Rule 12b-1 under the 1940 Act, the Company has adopted a Services and Distribution Plan (the "Plan"). Under this Plan, the Company compensates Smith Barney Shearson for servicing shareholder accounts for Class A, Class B and Class D shareholders, and covers expenses incurred in distributing Class B and Class D shares. Smith Barney Shearson is paid an annual service fee with respect to Class A, Class B and Class D shares of the Fund at the rate of 0.25%of the value of the average daily net assets of each respective class of shares. Smith Barney Shearson is also paid an annual distribution fee with respect to Class B and Class D shares at the rate of 0.50% of the value of the average daily net assets of each respective class of shares. For the year ended December 31, 1993, the service fee for Class A and Class B shares was \$16,729 and \$1,181,850, respectively. For the period from February 26, 1993 through December 31, 1993, the service fee for Class D shares was \$148. For the year ended December 31, 1993, the distribution fee for Class B shares was \$2,363,700. For the period from February 26, 1993 through December 31, 1993, the distribution fee for Class D shares was \$295.

## 4. EXPENSE ALLOCATION

Expenses of the Fund not directly attributable to the operations of any class of shares are prorated among the classes based upon the relative net assets of each class. Operating expenses directly attributable to a class of shares are charged to that class' operations. In addition to the above service and distribution fees, class specific operating expenses include the transfer agent fees. For the year ended December 31, 1993, transfer agent fees for Class A and Class B shares were \$8,253 and \$442,736, respectively. For the period from February 26, 1993 through December 31, 1993 transfer agent fees for Class D shares were \$72.

### 5. SECURITIES TRANSACTIONS

Cost of purchases and proceeds from sales of securities, excluding short-term investments, aggregated \$311,886,167\$ and \$304,511,038\$, respectively, for the year ended December 31, 1993.

At December 31, 1993, aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$39,170,957 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$4,302,485.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

7. LENDING OF PORTFOLIO SECURITIES

The Fund has the ability to lend its securities to brokers, dealers and other financial organizations. Loans of securities by the Fund are collateralized by cash, letters of credit or U.S. government securities that are maintained at all times in an amount at least equal to the current market value of the loaned security.

For the year ended December 31, 1993, the Fund loaned securities to certain brokers for which the Fund received \$9,314,900 as collateral. This amount is invested in a repurchase agreement at December 31, 1993.

At December 31, 1993, the Fund loaned a security with an aggregate market value of 9,279,257 which represents 1.91% of total net assets.

#### 8. NOTES PAYABLE

The Fund and several affiliated entities participate in a \$50 million line of credit provided by Continental Bank N.A. under an Amended and Restated Line of Credit Agreement (the "Agreement") dated April 30, 1992, primarily for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. Under this Agreement, the Fund may borrow up to the lesser of \$25 million or 20% of its net assets. Interest is payable either at the bank's Money Market Rate or the London Interbank Offered Rate (LIBOR) plus 0.375% on an annualized basis. The Fund and the other affiliated entities are charged an aggregate commitment fee of \$125,000 which is allocated equally among each of the participants. The Agreement requires, among other provisions, each participating fund to maintain a ratio of net assets (not including funds borrowed pursuant to the Agreement) to aggregate amount of indebtedness pursuant to the Agreement of no less than 5to 1. During the year ended December 31, 1993, the Fund had an average outstanding daily balance of \$618,356 with interest rates ranging from 3.375% to 4.375%. Interest expense for the year ended December 31, 1993 totalled \$21,407 which has been included in other expenses on the Statement of Operations for the year ended December 31, 1993. At December 31, 1993, the Fund had outstanding borrowings under this Agreement of \$1,900,191.

REPORT OF INDEPENDENT ACCOUNTANTS

TO THE SHAREHOLDERS AND BOARD OF DIRECTORS OF SMITH BARNEY SHEARSON INVESTMENT GRADE BOND FUND OF SMITH BARNEY SHEARSON INVESTMENT FUNDS INC.:

We have audited the accompanying statement of assets and liabilities of Smith Barney Shearson Investment Grade Bond Fund of Smith Barney Shearson Investment Funds Inc., including the schedule of portfolio investments, as of December 31, 1993, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 1993 by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the Smith Barney Shearson Investment Grade Bond Fund of Smith Barney Shearson Investment Funds Inc. as of December 31, 1993, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

GLOSSARY OF COMMONLY USED MUTUAL FUND TERMS

CAPITAL GAIN (OR LOSS) This is the increase (or decrease) in the market value (price) of a security in your portfolio. If a stock or bond appreciates in price, there is a capital gain; if it depreciates there is a capital loss. A capital gain or loss is "realized" upon the sale of a security; if net capital gains exceed net capital losses, there may be a capital gain distribution to shareholders.

CONTINGENT DEFERRED SALES CHARGE (CDSC) One kind of back-end load, a CDSC may be imposed if shares are redeemed during the first few years of ownership. The CDSC may be expressed as a percentage of either the original purchase price or the

redemption proceeds. Most CDSCs decline over time, and some will not be charged if shares are redeemed after a certain period of time.

DISTRIBUTION RATE This is the rate at which a mutual fund pays out (or distributes) interest, dividends and realized capital gains to shareholders. A fund's distribution rate is usually expressed as an annualized percent of the fund's offering price.

 ${\tt DIVIDEND}$  . This is income generated by securities in a portfolio and distributed after expenses to shareholders.

FRONT-END SALES CHARGE  $\,$  This is the sales charge which may be applied to an investment at the time of initial purchase.

NET ASSET VALUE (NAV) Net asset value is the total market value of all securities held by a fund, minus any liabilities, divided by the number of shares outstanding. It is the value of a single share of a mutual fund on a given day. The total value of your investment would be the NAV multiplied by the number of shares you own.

SEC YIELD This standardized calculation of a mutual fund's yield is based on a formula developed by the Securities and Exchange Commission (SEC) to allow funds to be compared on an equal basis. It is an annualized yield based on the portfolio's potential earnings from dividends, interest and yield to maturity of its holdings, and it reflects the payments of all portfolio expenses for the most recent 30-day period. Mutual funds are required to use this figure when stating yield.

TOTAL RETURN Total return measures a fund's performance, taking into account the combination of dividends paid and the gain or loss in the value of the securities held in the portfolio. It may be expressed on an AVERAGE ANNUAL basis or CUMULATIVE basis (total change over a given period). In addition, total return may be expressed with or without the effects of sales charges or the reinvestment of dividends and capital gains.

Whenever a fund reports any type of performance, it must also report the average annual total return according to the standardized calculation developed by the SEC. The SEC AVERAGE ANNUAL TOTAL RETURN calculation includes the effects of all fees and sales charges and assumes the reinvestment of all dividends and capital gains.

1993 Special ANNUAL Equities REPORT Fund

.....

DECEMBER 31, 1993

[LOGO]

Special Equities Fund

DEAR SHAREHOLDER:

We are pleased to provide the Annual Report for Smith Barney Shearson Special Equities Fund for the fiscal year ended December 31, 1993. In this report we

will provide you with a review of the Fund's performance, the market environment and portfolio activities during the past twelve months. In addition, we have taken this opportunity to simplify the report by separating the historical performance information for Class A and B shares into two distinct sections. Our goal is to provide clear, concise information that makes it easier for you to follow your investment.

THE MARKET AND ECONOMIC ENVIRONMENT

In 1993 the economy continued to benefit from low and stable inflation, low interest rates and ample liquidity. The result was four quarters of progressively better "real" growth. As we exited 1993, much improved consumer confidence was captured by both sample statistical surveys and an increase in spending in big ticket items such as homes and autos.

Mother Nature clearly negatively affected the first quarter of 1994; first came the California earthquake just as that state's lagging economy was beginning to awaken, then came the frigid Arctic blast with its seemingly mountainous snowfalls in much of the country's northern tier. At the same time, some signs of an impending pickup in inflationary pricing pressure (particularly in some of the commodities markets) motivated the Federal Reserve Board to take its first move towards tightening monetary policy since 1989. Whether this move is a preemptive strike or an over-reaction, it does signal the first reversal in an accommodative monetary policy that has been supporting the move to ever-higher prices for financial assets. At the risk of overstating this modest Fed action, it must be said that it reflects a change that should be expected on a cyclical basis as the economy's growth pace has accelerated.

INVESTMENT STRATEGY

The immediate response that we as investors should make is to reinforce the importance of earnings when seeking attractive investments. That pushes stock selection to the top of the critical portfolio decisions as opposed to broad market judgments. We reflect this in our investment decisions by purchasing shares of only those companies which have a proven track record of increasing revenues and earnings, some unique attributes which set them apart from their competitors, and sufficient trading activity not only to accommodate a purchase but, more importantly, a sale.

Despite stock market averages hitting new highs and an almost euphoric view toward the economy as the year progressed, 1993 proved to be a more difficult year for performance-oriented funds than it appeared on the surface. Although the averages may have hit new highs, the broader underlying

1

markets did not perform as well. In our view, the year was characterized by rolling corrections or rapid, volatile rotations between sectors of the market, while the overall averages maintained their steady upward pace. This dichotomy of performance proved to be difficult, particularly for growth fund managers, whether large or small-capitalization. Stock selection, therefore, became an even more critical component of the investment process and we think 1994 will be no different. While we believe the small-capitalization world clearly has an upward bias, the road will be bumpy with continued volatile moves. Hence, we once again advise investors in the more aggressive funds to use them as an integral part of an overall investment program.

#### PERFORMANCE

The performance of the Fund in 1993 was good, up approximately 32% for the year. The Fund ended the year ranked fourth for Class A Shares and eighth for Class B Shares among its 166-member peer group investing in small company growth stocks as measured by Lipper Analytical Services, Inc., a nationally-recognized mutual fund ranking service. However, this was not achieved without difficulty in the sense that much of our portfolio was invested in the so-called "out of favor" consumer sector. Moreover, the uniqueness of the companies in the Fund's portfolio greatly contributed to its strong performance. This compares with performance increases for the broader markets in the range of 7% to 17%. While the Dow Jones Industrial Average (DJIA) had risen 13.72%, the Standard & Poor's 500 Composite Stock Price Index (S&P 500), a truer index comparison with the Fund, was up just over 7%.

Our goal in 1994 is to continue to provide our investors with a rational, carefully thought out investment program based on stock selection and geared to outperform the averages. We cannot stress enough the concept of stock selection. With group leadership seemingly lasting only days and weeks, the flexibility needed to participate in such moves is often not available. Thus, we think stock selection of high quality growth issues is a far more prudent strategy.

Once again, we thank you for your continued support and look forward to serving your investment needs in the future.

Sincerely,

Heath B. McLendon Chairman of the Board George V. Novello Investment Officer FEBRUARY 1, 1994

GROWTH OF \$10,000 INVESTMENT IN THE STANDARD & POOR'S

GROWTH OF \$10,000

<sup>\*</sup>Figures assume reinvestment of all dividends and capital gains distributions at net asset value and do not assume deduction of the contingent deferred sales charge (CDSC).

<sup>\*\*</sup>All average annual total return figures shown reflect the reinvestment of dividends and capital gains at net asset value. The Fund's investment adviser, sub-investment adviser and administrator reimbursed expenses during 1988. A shareholder's actual return for the period during which reimbursements were in effect would be the higher of the two numbers shown.

<sup>\*\*\*</sup>Average annual total return figures shown assume the deduction of the applicable CDSC.

  |  |+ Illustration of \$10,000 invested in Class B shares on December 31, 1983, assuming reinvestment of dividends and capital gains at net asset value through December 31, 1993.

The Standard & Poor's 500 Composite Stock Price Index ("S&P 500") is an index composed of 500 widely held common stocks listed on the New York Stock Exchange, American Stock Exchange and over-the-counter market. The S&P 500 is useful in depicting the general movement of the stock market, but because it is unmanaged, it is not subject to the same management and trading expenses as a mutual fund.

NOTE: All figures cited here and on the other pages represent past performance of the Fund and do not guarantee future results of Class B shares.

## NOTES TO FINANCIAL STATEMENTS

## 1. SIGNIFICANT ACCOUNTING POLICIES

Smith Barney Shearson Investment Funds Inc. (the "Company") was incorporated in Maryland on September 29, 1981 and commenced operations on January 4, 1982. The Company is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified open-end management investment company. Prior to the close of business on July 30, 1993, the Company's corporate name was "SLH Investment Portfolios Inc." and it was doing business under the name "Shearson Lehman Brothers Investment Funds". As of the date of this report, the Company is composed of five managed investment funds (the "Funds"): Investment Grade Bond Fund, Government Securities Fund, Special Equities Fund, Directions Value Fund, and European Fund. The assets of each Fund are segregated and a shareholder's interest is limited to the Fund in which he or she owns shares. As of November 6, 1992, each Fund offered two classes of shares to the general public: Class A shares and Class B shares. Class A shares are sold with a front-end sales charge. Class B shares may be subject to a contingent deferred sales charge ("CDSC") upon redemption. Class B shares will convert automatically to Class A shares approximately eight years after the date of original purchase, beginning on September 30, 1994. On January 29, 1993, the Special Equities Fund (the "Fund") offered a third class of shares, Class D shares, and these shares were first purchased by the public on October 18, 1993. Class D shares are offered to plans participating in the Smith Barney Shearson Inc. ("Smith Barney Shearson") 401(k) program. Class D shares are offered without a front-end sales charge or CDSC. All classes of shares have identical rights and privileges except with respect

to the effect of the respective sales charges to each class, the distribution and/or service fees borne by each class, expenses allocable exclusively to each class, voting rights on matters affecting a single class, the exchange privilege of each class and the conversion feature of Class B shares. The following is a summary of significant accounting policies consistently followed by the Fund in preparation of its financial statements.

PORTFOLIO VALUATION: Securities listed on an exchange are valued on the basis of the last sale prior to the time the valuation is made. If there has been no sale since the immediately previous valuation, then the current bid price is used. Over-the-counter securities are valued on the basis of the bid price at the close of business on each day. Notwithstanding the above, bonds and

20

Smith Barney Shearson Special Equities Fund

- ------

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

other fixed-income securities are valued by using market quotations and may be valued on the basis of prices provided by a pricing service, when the Board of Directors believes that such prices reflect the market value of such securities. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated by or under the authority of the Board of Directors as the primary market. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors. Money market instruments maturing within 60 days of the valuation date are valued at amortized cost.

REPURCHASE AGREEMENTS: The Fund engages in repurchase agreement transactions. Under the terms of a typical repurchase agreement, the Fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and the Fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the Fund's holding period. The value of the collateral is at least equal at all times to the total amount of the repurchase obligations, including interest. In the event of counterparty default, the Fund has the right to use the collateral to offset losses incurred. There is a potential loss to the Fund in the event the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities including the risk of a possible decline in the value of the underlying securities during the period while the Fund seeks to assert its rights. The Fund's investment adviser, acting under the supervision of the Board of Directors, reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME: Securities transactions are recorded as of the trade date. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Investment income and realized and unrealized gains and losses are allocated based upon the relative net assets of each class of shares.

21

Smith Barney Shearson Special Equities Fund

-----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

FEDERAL INCOME TAXES: The Fund intends to continue to qualify as a regulated investment company, if such qualification is in the best interest of its shareholders, by complying with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS: Distributions from net investment income, if any, are determined on a class level and will be declared and paid at least annually. Distributions from net realized capitals gains, after utilization of capital loss carry forwards, are determined on a Fund level and will be distributed at least annually. Net short-term capital gains may be paid more frequently, with the distribution of dividends from net investment income. Additional distributions of net investment income and capital gains may be made at the discretion of the Board of Directors to avoid the application of the excise tax imposed under the Code for certain undistributed amounts. Income

distributions and capital gain distributions on a Fund level are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. These differences are primarily due to differing treatments of income and gains on various investment securities held by the fund, timing differences and differing characterization of distributions made by the fund as a whole. Permanent differences incurred during the year ended December 31, 1993 resulting from a tax basis net operating loss were reclassified to paid-in capital at year end.

RECLASSIFICATIONS: During the year, the Fund adopted Statement of Position 93-2 "Determination, Disclosure, and Financial Statement Presentation of Income, Capital Gain, and Return of Capital Distributions by Investment Companies." Accordingly, certain reclassifications have been made to the components of capital in the Statement of Net Assets to conform with the accounting and reporting guidelines of this statement. Distributions in excess of book basis accumulated realized gains or undistributed net investment income that were the result of permanent book and tax accounting differences have been reclassified to paid-in capital. In addition, amounts distributed in excess of accumulated net investment income as determined for financial statement purposes which had previously been reported as distributions from paid-in capital have been reclassified to accumulated net investment income. Accordingly, amounts as of December 31, 1992 have

22

Smith Barney Shearson Special Equities Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

been restated to reflect a decrease in paid-in capital of \$1,789,894, an increase in accumulated net realized loss of \$19,741 and a decrease in accumulated net investment loss of \$1,809,635. The Financial Highlights have not been restated to reflect this change in presentation. Net investment income, net realized gains and net assets were not affected by this change.

2. INVESTMENT ADVISORY FEE, ADMINISTRATION FEE AND OTHER RELATED PARTY TRANSACTIONS

Up to the close of business on July 30, 1993, the Fund had entered into an investment advisory agreement with Shearson Lehman Brothers Inc. ("Shearson Lehman Brothers") on behalf of Shearson Lehman Advisors, a member of the Asset Management Group of Shearson Lehman Brothers. Under the investment advisory agreement, the Fund paid a monthly fee at the annual rate of 0.55% of the value of its average daily net assets.

As of the close of business on July 30, 1993, The Travelers Inc. (formerly known as Primerica Corporation) ("Travelers") and Smith Barney, Harris Upham & Co. Incorporated completed the acquisition of substantially all of the domestic retail brokerage and asset management businesses of Shearson Lehman Brothers. Smith Barney, Harris Upham & Co. Incorporated was subsequently renamed Smith Barney Shearson.

As of the close of business on July 30, 1993, Greenwich Street Advisors, a division of Mutual Management Corp., which is controlled by Smith Barney Shearson Holdings Inc. ("Holdings"), succeeded Shearson Lehman Advisors as the Fund's investment adviser. Holdings is a wholly owned subsidiary of Travelers. The new investment advisory agreement with Greenwich Street Advisors (the "Advisory Agreement") contains terms and conditions substantially similar to the investment advisory agreement with the predecessor investment adviser and provides for payment of fees at the same rate as was paid to such predecessor investment adviser.

The Fund has also entered into an administration agreement (the "Administration Agreement") dated May 21, 1993, with The Boston Company Advisors, Inc. ("Boston Advisors"), an indirect wholly owned subsidiary of Mellon Bank Corporation ("Mellon"). Under the Administration Agreement,

23

Smith Barney Shearson Special Equities Fund

-----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

the Fund pays a monthly fee at an annual rate of 0.20% of the value of its average daily net assets. Prior to May 21, 1993 Boston Advisors served as sub-investment adviser and administrator to the Fund.

For the year ended December 31, 1993, the Fund incurred total brokerage commissions of \$139,427, of which \$16,614 were paid to Smith Barney Shearson or

For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$172,978, representing commissions (sales charges) on sales of Class A shares.

A CDSC is generally payable by a shareholder in connection with the redemption of Class B shares within five years (eight years in the case of certain 401(k)plans) after the date of purchase. In circumstances in which the charge is imposed, the amount of the charge ranges between 5% and 1% of net asset value depending on the number of years since the date of purchase (except in the case of purchases by certain 401(k) plans in which case a 3% charge is imposed for the eight year period after the date of the purchase. For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$73,089 representing CDSC fees on the redemption of Class B shares.

No officer, director or employee of Smith Barney Shearson or Boston Advisors or of any parent or subsidiary of those corporations receives any compensation from the Company for serving as an officer or director of the Company. The Company pays each Director who is not an officer, director or employee of Smith Barney Shearson or Boston Advisors or any of their affiliates \$14,000 per annum plus \$3,000 per meeting attended and reimburses each such Director for travel and out-of-pocket-expenses.

Boston Safe Deposit and Trust Company, an indirect wholly owned subsidiary of Mellon, serves as the Fund's custodian. The Shareholder Services Group, Inc., a subsidiary of First Data Corporation, serves as the Fund's transfer agent.

Smith Barney Shearson Special Equities Fund

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

### 3. DISTRIBUTION AGREEMENT

Smith Barney Shearson acts as distributor of the Fund's shares pursuant to a distribution agreement with the Company, and sells shares of all Funds of the Company through Smith Barney Shearson or its affiliates.

Pursuant to Rule 12b-1 under the 1940 Act, the Fund has adopted a Services and Distribution Plan (the "Plan"). Under this Plan, the Company compensates Smith Barney Shearson for servicing shareholder accounts for Class A, Class B and Class D shareholders, and covers expenses incurred in distributing Class B and Class D shares. Smith Barney Shearson is paid an annual service fee with respect to Class A, Class B and Class D shares of the Fund at the rate of 0.25% of the value of the average daily net assets of each respective class of shares. Smith Barney Shearson is also paid an annual distribution fee with respect to Class B and Class D shares at the rate of 0.75% of the value of the average daily net assets attributable to each respective class of shares. For the year ended December 31, 1993, the service fee for Class A and Class B shares was \$22,380 and \$226,964, respectively. For the period from October 18, 1993 through December 31, 1993, the service fee for Class D shares was \$94. For the year ended December 31, 1993, the distribution fee for Class B shares was \$680,894. For the period from October 18, 1993 through December 31, 1993, the distribution fee for Class D shares was \$281.

## 4. EXPENSE ALLOCATION

Expenses of the Fund not directly attributable to the operations of any class of shares are prorated among the classes based upon the relative net assets of each class. Operating expenses directly attributable to a class of shares are charged to that class' operations. In addition to the above servicing and distribution fees, class specific operating expenses include the transfer agent fees. For the year ended December 31, 1993, transfer agent fees for Class A and Class B shares were \$31,423 and \$241,356, respectively. For the period from October 18, 1993 through December 31, 1993, transfer agent fees for Class D shares were \$43.

25

Smith Barnev Shearson Special Equities Fund

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

## 5. SECURITIES TRANSACTIONS

Cost of purchases and proceeds from sales of securities, excluding short-term investments, aggregated \$136,477,477 and \$105,820,975, respectively, for the year ended December 31, 1993.

At December 31, 1993, aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$40,087,352 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$4,822,593.

### 6. SHARES OF COMMON STOCK

At December 31, 1993, the Fund had authorized capital of 100 million shares of \$.001 par value common stock divided into four classes of shares, Class A, Class B, Class C and Class D. The Fund has not yet commenced offering Class C shares.

Changes in the common stock outstanding were as follows:

#### 7. RESTRICTED SECURITY

The Fund's investment in the following security is restricted as to resale and is valued under the direction of the Fund's Board of Directors in good faith, at fair value, taking into consideration all indications of value available. The following table shows the security description, acquisition date, fair value, percentage of total net assets, aggregate cost and value per unit of the restricted security:

<TABLE> <CAPTION>

The Fund may purchase securities which are subject to legal or contractual restrictions on resale if not more than 10% of the value of the Fund's total assets would be invested in such securities or in securities for which there is

2.7

\_\_\_\_

Smith Barney Shearson Special Equities Fund

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

no readily available market. In purchasing securities which could not be sold by the Fund without registration under the Securities Act of 1933, as amended, the Fund will endeavor to obtain the right to registration at the expense of the issuer. There generally will be a lapse of time between the decision by the Fund to sell any such security and the registration of the security permitting sale. During any such period the security will be subject to market fluctuations.

### 8. LENDING OF PORTFOLIO SECURITIES

The Fund has the ability to lend its securities to brokers, dealers and other financial organizations. Loans of securities by the Fund are collateralized by cash, letters of credit or U.S. government securities that are maintained at all times in amounts at least equal to the current market value of the loaned security.

For the year ended December 31, 1993 the Fund loaned securities to certain brokers for which the Fund received \$5,499,752 as collateral. This amount is invested in a repurchase agreement at December 31, 1993.

At December 31, 1993, the Fund loaned securities with an aggregate market value of \$5,838,588 which represents 3.09% of total net assets.

## 9. LINE OF CREDIT

The Fund and several affiliated entities participate in a \$50 million line of credit provided by Continental Bank N.A. under an Amended and Restated Line of Credit Agreement (the "Agreement") dated April 30, 1992, primarily for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. Under this Agreement, the Fund may borrow up to the lesser of \$25 million or 20% of its net assets. Interest is payable either at the bank's Money Market Rate or the London Interbank Offered Rate (LIBOR) plus 0.375% on an annualized basis. The Fund and the other affiliated entities are charged an aggregate commitment fee of \$125,000 which is allocated equally among each of the participants. The Agreement requires, among other provisions, each participating fund to maintain a ratio of net assets (not including funds borrowed pursuant to the Agreement) to aggregate amount

28

Smith Barnev Shearson Special Equities Fund

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

of indebtedness pursuant to the Agreement of no less than 5 to 1. During the

year ended December 31, 1993, the Fund did not borrow under the Agreement.

#### 10. REORGANIZATION

On November 19, 1993, the Fund (Acquiring Fund) acquired the assets and certain liabilities of Smith Barney Shearson Small Capitalization Fund, (Acquired Fund), in exchange for shares of the Acquiring Fund, pursuant to a plan of reorganization approved by the Acquired Fund's shareholders on November 18, 1993. Total shares issued by the Acquiring Fund, the value of the shares issued by the Acquiring Fund, the value of the shares issued by the Acquiring Fund and the Acquiring Fund and any unrealized appreciation included in the Acquired Fund's total net assets are as follows:

<TABLE> <CAPTION>

REPORT OF INDEPENDENT ACCOUNTANTS

TO THE SHAREHOLDERS AND BOARD OF DIRECTORS OF SMITH BARNEY SHEARSON SPECIAL EQUITIES FUND OF SMITH BARNEY SHEARSON INVESTMENT FUNDS INC.:

We have audited the accompanying statement of assets and liabilities of Smith Barney Shearson Special Equities Fund of Smith Barney Shearson Investment Funds Inc., including the schedule of portfolio investments, as of December 31, 1993, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 1993 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Smith Barney Shearson Special Equities Fund of Smith Barney Shearson Investment Funds Inc. as of December 31, 1993, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

## European Fund

## DEAR SHAREHOLDER:

We are pleased to provide the Annual Report for Smith Barney Shearson European Fund for the year ended December 31, 1993. In this report, we will provide you with a review of the Fund's performance, the market environment and portfolio activities during the past twelve months. In addition, we also have taken this opportunity to simplify this report by separating the historical performance information for A and B classes of shares into two distinct sections. Our goal is to give you clear, concise information that makes it easier for you to follow your investment.

## ECONOMIC REVIEW

The year 1993 has been a very rewarding year for European equity markets with the Morgan Stanley Capital International (MSCI) European Index (which measures the aggregate performance of European markets), appreciating by 37.1% in local currency terms. However, the appreciation of the U.S. dollar against the European currencies over the last 12 months resulted in a return of 29.3% for the MSCI European Index in U.S. dollar terms. The MSCI European Index rose in all four quarters, although the last two quarters provided the strongest returns.

Two trends characterized the European equity markets for most of 1993: (1) continued economic weakness in continental Europe and (2) interest rate declines. Even though there are some indications that most continental European economies may have bottomed out in the second or third quarter of 1993, no significant economic recovery is expected until the second half of 1994. The key concern of European policymakers has now become the continued growth in unemployment.

Monetary policy, which was kept excessively tight by the German Bundesbank in 1992, eased significantly in 1993, with a 2.5% cut in the German discount rate from 8.25% at the start of the year to 5.75% at the end of the year. The easing of monetary policy in Germany was followed and exceeded by most European central banks. The combination of significant declines in interest rates and the strong performance of bond markets provided the main driving force behind the revaluation of European equity markets. However, the speed and extent of

monetary easing caused friction within the European Rate Mechanism (ERM). At the end of July 1993, Germany's reluctance to cut interest rates more quickly led to strong tensions within the ERM. This resulted in the eventual widening of the

1

currency fluctuation bands to 15% and the end of the ERM in all but name. European central banks are no longer required to defend their currencies with interest rates which are out of line with economic fundamentals.

At the end of 1993 the controversial Uruguay round of the General Agreement on Trade and Tariffs ("GATT") talks on further tariff reductions was successfully concluded. The Uruguay round, which started in 1986, has been the most complex and ambitious GATT agreement so far. Its twenty-eight (28) separate accords for the first time extend fair trade to agriculture, textiles, services, intellectual property and foreign investment. This potentially far reaching tariff-cutting deal, as illustrated by the cut by over a third of tariffs on industrial goods, has rekindled investors' interest in Europe which stands to benefit significantly from expanding trade liberalization.

Superior performance during 1993 resulted in markets, such as Finland (+82.7% in \$U.S. terms), Sweden (+37%) and Italy (+28.5% in \$U.S. terms), which experienced significant depreciation of their currency as strong cuts in interest rates improved their competitiveness. Those markets which were perceived as key beneficiaries of a global economic recovery or from trade expansion resulting from the GATT agreement, such as Switzerland (+45.8%), Germany (+35.6%) and The Netherlands (+35.3%), were also strong performers.

### OUTLOOK AND PORTFOLIO STRATEGY

For most of the year the Fund was positioned to take advantage of the decline in interest rates in the European markets. This explains the Fund's exposure to the financial sector through investments in European banks and insurance companies, which traditionally benefit from a declining interest rate environment. The Fund was also underweighted in the United Kingdom ("U.K.") market compared to the MSCI European Index and overweighted in the markets of continental Europe for most of the year because most of the interest cuts in the U.K. had already taken place in 1992 and the U.S. market had discounted most of the benefits resulting from those cuts. In contrast, the continental European markets had seen only limited declines in interest rates in 1992 and were therefore mostly driven by interest rates. The U.K. market was more dependent on positive earnings developments than the continental European markets. This strategy served the Fund well in 1993. However, with the potential for improvement in U.K. corporate earnings and the valuation of the U.K. market falling more in line with that of continental European markets, we may begin to increase the Fund's exposure to the U.K. over the next year.

2

After the recent strong performance of continental European markets, valuations are less attractive than at the beginning of the year. We nevertheless remain bullish for the next twelve months. The forces which drove European bourses higher in 1993 are still in place. We anticipate that core inflation will remain very low in both 1994 and 1995 due in part to the recent decline in the price of oil. This will underpin European bonds and encourage policy makers to ease monetary policy still further. The more monetary policy is eased, the greater the scope for a cyclical recovery in earnings that should take the equity markets higher even when bond yields stop falling. This should maintain the positive liquidity picture coming from continued U.S. investments and increasingly from domestic money market funds shifting into equities. As we go through 1994, earnings will become more important than interest rates. We will strive to position the holdings of the Fund to take advantage of this trend.

Sincerely,

Heath B. McLendon CHAIRMAN OF THE BOARD Erich Stock INVESTMENT OFFICER FEBRUARY 1, 1994

\*\*All average annual total return figures shown reflect the reinvestment of dividends and capital gains at net asset value. The Fund commenced operations on November 6, 1987. The Fund's investment adviser, sub-investment adviser and administrator waived fees and reimbursed expenses from November 1987 to December 1989. A shareholder's actual return for the period during which waivers and reimbursements were in effect would be the higher of the two numbers shown. \*\*\*Average annual total return figures shown assume the deduction of the applicable CDSC, as described in the Fund's prospectus.

NOTE: As of November 6, 1992, outstanding shares of the Fund were designated Class B shares. Class B shares are subject to a maximum 5% CDSC and annual service and distribution fees of 0.25% and 0.75%, respectively, of the value of the average daily net assets attributable to that class.

</TABLE>

<sup>\*</sup>Figures assume reinvestment of all dividends and capital gains distributions at net asset value and do not assume deduction of the contingent deferred sales charge (CDSC).

NOTES TO FINANCIAL STATEMENTS

## 1. SIGNIFICANT ACCOUNTING POLICIES

Smith Barney Shearson Investment Funds Inc. (the "Company") was incorporated in Maryland on September 29, 1981 and commenced operations on January 4, 1982. The Company is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified open-end management investment company. Prior to the close of business on July 30, 1993, the Company's corporate name was "SLH Investment Portfolios Inc." and it was doing business under the name "Shearson Lehman Brothers Investment Funds". As of the date of this report, the Company is composed of five managed investment funds (the "Funds"): Investment Grade Bond Fund, Government Securities Fund, Special Equities Fund, Directions Value Fund and European Fund. The assets of each Fund are segregated and a shareholder's interest is limited to the Fund in which he or she owns shares. As of November 6, 1992, each Fund offered two classes of shares to the general public: Class A shares and Class B

<sup>\*\*\*</sup>Annualized.

<sup>+</sup>Total Return represents aggregate total return for the period indicated and does not reflect any applicable sales charges.

<sup>++</sup>Anualized expense ratios before waiver of fees and reimbursement of expenses by investment adviser, sub-investment adviser and administrator for the years ended December 31, 1989 and 1988 and the period ended December 31, 1987 were 8.33%, 9.11% and 18.07%, respectively.

<sup>+++</sup>Not covered by Coopers & Lybrand's report.

shares. Class A shares are sold with a front-end sales charge. Class B shares may be subject to a contingent deferred sales charge ("CDSC") upon redemption. Class B shares will convert automatically to Class A shares approximately eight years after date of purchase, beginning on September 30, 1994. As of January 29, 1993, the European Fund (the "Fund") offered a third class of shares, Class D shares, to investors eligible to participate in the Smith Barney Shearson Inc. ("Smith Barney Shearson") 401(k) program. Class D shares are offered without a front-end sales charge or CDSC. All classes of shares have identical rights and privileges except with respect to the effect of the respective sales charges to each class, the distribution and/or service fees borne by each class, expenses allocable exclusively to each class, voting rights on matters affecting a single class, the exchange privilege of each class and the conversion feature of Class B shares. The following is a summary of significant accounting policies consistently followed by the Fund in preparation of its financial statements.

PORTFOLIO VALUATION: Securities listed on an exchange are valued on the basis of the last sale prior to the time the valuation is made. If there has been no sale since the immediate previous valuation, then the current bid price is used. Over-the-counter securities are valued on the basis of the bid price at the close of business on each day. Notwithstanding the above, bonds and

21

Smith Barney Shearson European Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

other fixed-income securities are valued by using market quotations and may be valued on the basis of prices provided by a pricing service, when the Board of Directors believes that such prices reflect the market value of such securities. Foreign securities are valued on the basis of prices provided by pricing services. The service generally values foreign securities at the last quoted sales price on the exchange on which such securities are being valued, or lacking any sales, at the last available sale price, except that in certain circumstances, prices provided by the pricing service are within the range of the available bid and offer prices. Unlisted foreign securities are valued at the mean between the last available bid and offer price prior to the time of valuation. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated by or under the authority of the Board of Directors as the primary market. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors. Money market instruments maturing within 60 days of the valuation date are valued at amortized cost.

FOREIGN CURRENCY TRANSACTIONS: The books and records of the Fund are maintained in United States (U.S.) dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at the exchange rates prevailing at the end of the period, and purchases and sales of investment securities, income and expenses are translated on the respective dates of such transactions. Unrealized gains and losses which result from changes in foreign currency exchange rates have been included in the unrealized appreciation/(depreciation) of investments. Exchange gains and losses included in net investment income include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amount actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gains and losses on investment securities sold.

FORWARD FOREIGN CURRENCY CONTRACTS: Forward foreign currency contracts are valued at the forward rate, and are marked-to-market daily. The change in market value is recorded by the Fund as an unrealized gain or loss. When

22

Smith Barney Shearson European Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of forward foreign currency contracts does not eliminate fluctuations in the underlying prices of the Fund securities, but it does establish a rate of

exchange that can be achieved in the future. Although forward foreign currency contracts limit the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts.

REPURCHASE AGREEMENTS: The Fund engages in repurchase agreement transactions. Under the terms of a typical repurchase agreement, the Fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and the Fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the Fund's holding period. The value of the collateral is at least equal at all times to the total amount of the repurchase obligations, including interest. In the event of counterparty default, the Fund has the right to use the collateral to offset losses incurred. There is a potential loss to the Fund in the event the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities including the risk of a possible decline in the value of the underlying securities during the period while the Fund seeks to assert its rights. The Fund's investment adviser, acting under the supervision of the Board of Directors, reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME: Securities transactions are recorded as of the trade date. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recorded as soon as the Fund is informed of the ex-dividend date. Interest income is recorded on the accrual basis. Realized gains and losses from

2:

Smith Barney Shearson European Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

securities transactions are recorded on the identified cost basis. Investment income and realized and unrealized gains and losses are allocated based upon the relative net assets of each class of shares.

FEDERAL INCOME TAXES: The Fund intends to qualify as a regulated investment company, if such qualification is in the best interest of its shareholders, by complying with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS: Distributions from net investment income, if any, are determined on a class level and will be declared and paid at least annually. Distributions from net realized capital gains, after utilization of capital loss carryforwards, are determined on a Fund level and will be distributed at least annually. Net short-term capital gains may be paid more frequently, with the distribution of dividends from net investment income. Additional distributions of net investment income and capital gains may be made at the discretion of the Board of Directors to avoid the application of the excise tax imposed under the Code for certain undistributed amounts. Income distributions and capital gain distributions on a Fund level are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. These differences are primarily due to differing treatments of income and gains on various investment securities held by the Fund, timing differences and differing characterization of distributions made by the Fund as a whole. Permanent differences incurred during the year ended December 31, 1993 resulting from a tax basis net operating loss were reclassified to paid-in capital at year end.

RECLASSIFICATIONS: During the year, the Fund adopted Statement of Position 93-2 "Determination, Disclosure, and Financial Statement Presentation of Income, Capital Gain, and Return of Capital Distributions by Investment Companies." Accordingly, certain reclassifications have been made to the components of capital in the Statement of Net Assets to conform with the accounting and reporting guidelines of this statement. Distributions in excess of book basis accumulated realized gains or undistributed net investment income that were the result of permanent book and tax accounting differences have been reclassified to paid-in capital. In addition, amounts

2

Smith Barney Shearson European Fund

- -----

### NOTES TO FINANCIAL STATEMENTS (CONTINUED)

distributed in excess of accumulated net investment income as determined for financial statement purposes which had previously been reported as distributions from paid-in capital have been reclassified to accumulated net investment income. Accordingly, amounts as of December 31, 1992 have been restated to reflect a decrease in accumulated net investment loss of \$228,426, a decrease in paid-in capital of \$206,891 and an increase in accumulated net realized losses of \$21,535. The Financial Highlights have not been restated to reflect this change in presentation. Net investment income, net realized gains and net assets were not affected by this change.

# 2. INVESTMENT ADVISORY FEES, ADMINISTRATION FEE AND OTHER RELATED PARTY TRANSACTIONS

The Fund has entered into an investment advisory agreement (the "Advisory Agreement") with Lehman Brothers Global Asset Management Limited ("Global Asset Management"), a wholly owned subsidiary of Lehman Brothers Holdings Inc. ("Holdings"). American Express Company owns 100% of Holdings' issued and outstanding common stock, which represents approximately 92% of Holdings' voting stock. The remainder of Holdings' voting stock is owned by Nippon Life Insurance Company. Fees accrued by the Fund to Global Asset Management are payable monthly based on an annual rate of 0.70% of the value of its average daily net assets.

The Fund has also entered into an administration agreement (the "Administration Agreement") dated May 21, 1993, with The Boston Company Advisors, Inc. ("Boston Advisors"), an indirect wholly owned subsidiary of Mellon Bank Corporation ("Mellon"). Under the Administration Agreement, the Fund pays a monthly fee at the annual rate of 0.20% of the value of its average daily net assets. Prior to May 21, 1993, Boston Advisors served as sub-investment advisor and administrator to the Fund.

For the year ended December 31, 1993, the Fund incurred total brokerage commissions of \$100,366, of which \$9,401 were paid to Smith Barney Shearson or its predecessor.

For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$8,730 representing commissions (sales charges) on sales of Class A shares.

25

Smith Barney Shearson European Fund

- -----

## NOTES TO FINANCIAL STATEMENTS (CONTINUED)

A CDSC is generally payable by a shareholder in connection with the redemption of Class B shares within five years (eight years in the case of certain 401(k) plans) after the date of purchase. In circumstances in which the charge is imposed, the amount of the charge ranges between 5% and 1% of net asset value depending on the number of years since the date of purchase (except in the case of purchases by certain 401(k) plans in which case a 3% charge is imposed for the eight year period after the date of the purchase). For the year ended December 31, 1993, Smith Barney Shearson or its predecessor received from investors \$70,120 representing CDSC fees on the redemption of Class B shares.

No officer, director or employee of Smith Barney Shearson or Boston Advisors or any of their affiliates receives any compensation from the Company for serving as an officer or director of the Company. The Company pays each Director who is not an officer, director or employee of Smith Barney Shearson or Boston Advisors or any of their affiliates \$14,000 per annum plus \$3,000 per meeting attended and reimburses each such Director for travel and out-of-pocket expenses.

Boston Safe Deposit and Trust Company, an indirect wholly owned subsidiary of Mellon, serves as the Fund's custodian. The Shareholder Services Group, Inc., a subsidiary of First Data Corporation, serves as the Fund's transfer agent.

## 3. DISTRIBUTION AGREEMENT

Smith Barney Shearson acts as distributor of the Fund's shares pursuant to a distribution agreement with the Company, and sells shares of all the Funds of the Company through Smith Barney Shearson or its affiliates.

Pursuant to Rule 12b-1 under the 1940 Act, the Company has adopted a Services and Distribution Plan (the "Plan"). Under this Plan, the Company compensates Smith Barney Shearson for servicing shareholder accounts for Class A, Class B and Class D shareholders, and covers expenses incurred in distributing Class B and Class D shares. Smith Barney Shearson is paid an annual service fee with

respect to Class A, Class B and Class D shares of the Fund at the rate of 0.25% of the value of the average daily net assets attributable to each respective class of shares. Smith Barney Shearson is also

## NOTES TO FINANCIAL STATEMENTS (CONTINUED)

paid an annual distribution fee with respect to Class B shares at the rate of 0.75% of the value of the average daily net assets of each respective class of shares. For the year ended December 31, 1993, the service fee for Class A and Class B shares was \$2,277 and \$67,600, respectively. For the year ended December 31, 1993 the distribution fee for Class B shares was \$202,801. For the year ended December 31, 1993, no service or distribution fees were paid for Class D

### 4. EXPENSE ALLOCATION

Expenses of the Fund not directly attributable to the operations of any class of shares are prorated among the classes based upon the relative net assets of each class. Operating expenses directly attributable to a class of shares are charged to that class' operations. In addition to the above servicing and distribution fees, class specific operating expenses include transfer agent fees. For the year ended December 31, 1993, transfer agent fees for Class A and Class B shares were \$2,339 and \$63,006, respectively.

### 5. SECURITIES TRANSACTIONS

Cost of purchases and proceeds from sales of securities, excluding short-term investments, aggregated \$23,008,389 and \$17,441,012, respectively, for the year ended December 31, 1993.

At December 31, 1993, aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$5,326,779 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$328,463.

### 6. SHARES OF COMMON STOCK

At December 31, 1993, the Fund had authorized capital of 100 million shares of \$.001 par value common stock divided into four classes, Class A, Class B, Class C and Class D. The Fund has not yet commenced offering Class C shares.

YEAR ENDED

\*The Fund commenced selling Class A shares on November 6, 1992. Any shares outstanding prior to November 6, 1992 were designated Class B shares.

As of December 31, 1993, the Fund had one Class D share issued in the amount of \$14.40 to Smith Barney Shearson. During the period ended December 31, 1993, there was no income or expenses allocated to the one Class D share.

#### 7. ORGANIZATION AND OFFERING EXPENSES

Organization costs were amortized on a straight-line basis over a period of five years. As of December 31, 1993 all costs have been fully amortized.

#### 8. CAPITAL LOSS CARRYFORWARD

At December 31, 1993, the Fund had available for federal tax purposes unused capital loss carryforward (in thousands) of \$1,304 and \$619 expiring in 1999 and 2000, respectively.

### 9. FOREIGN SECURITIES

Investing in securities of foreign companies and foreign governments involves special risks and considerations not typically associated with investing in U.S. companies and the U.S. government. These risks include revaluation of

28

Smith Barney Shearson European Fund

- -----

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

currencies and future adverse political and economic developments. Moreover, securities of many foreign companies and foreign governments and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. companies and the U.S. government.

## 10. LINE OF CREDIT

The Fund and several affiliated entities participate in a \$50 million line of credit provided by Continental Bank N.A. under an Amended and Restated Line of Credit Agreement (the "Agreement") dated April 30, 1992, primarily for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. Under this Agreement, the Fund may borrow up to the lesser of \$25 million or 20% of its net assets. Interest is payable either at the bank's Money Market Rate or the London Interbank Offered Rate (LIBOR) plus 0.375% on an annualized basis. The Fund and the other affiliated entities are charged an aggregate commitment fee of \$125,000 which is allocated equally among the participants. The Agreement requires, among other provisions, each participating fund to maintain a ratio of net assets (not including funds borrowed pursuant to the Agreement) to aggregate amount of indebtedness pursuant to the Agreement of no less than 5 to 1. During the year ended December 31, 1993, the Fund did not borrow under the Agreement.

## 11. SUBSEQUENT EVENT

On February 8, 1994, the Board of Directors of the Fund approved a new investment advisory agreement by and between the Fund and Smith Barney Advisers, Inc., subject to shareholder approval, to take effect on or about April 8, 1994.

REPORT OF INDEPENDENT ACCOUNTANTS

TO THE SHAREHOLDERS AND BOARD OF DIRECTORS OF SMITH BARNEY SHEARSON EUROPEAN FUND OF SMITH BARNEY SHEARSON INVESTMENT FUNDS INC.:

We have audited the accompanying statement of assets and liabilities of Smith Barney Shearson European Fund of Smith Barney Shearson Investment Funds Inc., including the schedule of portfolio investments, as of December 31, 1993, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these

financial statements and financial highlights based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 1993 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Smith Barney Shearson European Fund of Smith Barney Shearson Investment Funds Inc. as of December 31, 1993, the results of its operations for the year then ended, the changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

GLOSSARY OF COMMONLY USED MUTUAL FUND TERMS

CAPITAL GAIN (OR LOSS) This is the increase (or decrease) in the market value (price) of a security in your portfolio. If a stock or bond appreciates in price, there is a capital gain; if it depreciates there is a capital loss. A capital gain or loss is "realized" upon the sale of a security; if net capital gains exceed net capital losses, there may be a capital gain distribution to shareholders.

CONTINGENT DEFERRED SALES CHARGE (CDSC) One kind of back-end load, a CDSC may be imposed if shares are redeemed during the first few years of ownership. The CDSC may be expressed as a percentage of either the original purchase price or the redemption proceeds. Most CDSCs decline over time, and some will not be charged if shares are redeemed after a certain period of time.

 ${\tt DIVIDEND}$  . This is income generated by securities in a portfolio and distributed after expenses to shareholders.

FRONT-END SALES CHARGE This is the sales charge applied to an investment at the time of initial purchase.

NET ASSET VALUE (NAV) Net asset value is the total market value of all securities held by a fund, minus any liabilities, divided by the number of shares outstanding. It is the value of a single share of a mutual fund on a given day. The total value of your investment would be the NAV multiplied by the number of shares you own.

TOTAL RETURN Total return measures a fund's performance, taking into account the combination of dividends paid and the gain or loss in the value of the securities held in the portfolio. It may be expressed on an AVERAGE ANNUAL basis or CUMULATIVE basis (total change over a given period). In addition, total return may be expressed with or without the effects of sales charges or the reinvestment of dividends and capital gains.

Whenever a fund reports any type of performance, it must also report the average annual total return according to the standardized calculation developed by the SEC. The SEC AVERAGE ANNUAL TOTAL RETURN calculation includes the effects of all fees and sales charges and assumes the reinvestment of all dividends and capital gains.
