^{*}Performance data represent past results. Investment return, net asset value and market price will fluctuate so an investor's shares, when sold, may be worth more or less than their original cost.

Terms you need to know

Total return is the change in value of an investment from the beginning to the end of a period, assuming the reinvestment of all distributions. It may be shown at net asset value or at market price.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding shares, not reflecting any sales charge.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on the New York Stock Exchange.

Current dividend rate is calculated by annualizing the income portion of the fund s most recent distribution and dividing by the NAV or market price on the last day of the period.

Please see the fund performance supplement on page 34 for additional information about performance comparisons.

From the Chairman

(photograph of George Putnam)
c. Karsh, Ottawa

George Putnam Chairman of the Trustees

Dear Shareholder:

I am pleased to report that Putnam Master Income Trust has had another successful year. Falling interest rates remained an ongoing trend through most of your fund's fiscal year and they appear likely to remain low well into 1994. These lower rates have brought higher bond prices and have allowed the fund to reap substantial capital gains.

These returns have not gone unnoticed. Morningstar, Inc., an industry research firm, gave the fund its four-star rating (above-average) for risk-adjusted return through October 31, 1993.

Reviewing the year's results for each of the three fixed income sectors in which your fund invests, it s clear that the lower-rated, higher-yielding corporate bonds made the greatest contribution. Careful bond selection, intensive credit research and active management enabled the fund to make the most of opportunities in the high-yield bond market. Meanwhile, the U.S. government and international fixed income securities jockeyed for second-place performance, with the leader shifting back and forth from quarter to quarter.

The past three years have included periods of significant strength for all three sectors of your fund's portfolio. The fund's flexibility to shift assets between sectors enabled it to take advantage of many investment opportunities. Although we may not experience such fortuitous market conditions in the coming year, Rosemary Thomsen and her investment team remain confident of the fund's ability to produce attractive current income while minimizing volatility.

Respectfully yours,

George Putnam
December 15, 1993

Report from Putnam Management

Putnam Master Income Trust continues to reward its shareholders with attractive distributions, relatively low volatility and strong total return. In the 12 months ended October 31, 1993, the

fund produced a total return of 15.74% at net asset value, or 13.27% for those who purchased shares at the market price at the beginning of the period.

High-yield bonds lead returns For the second consecutive year, your fund's total return was driven by the strength of the high-yield bond market. We have emphasized investments in this area and had approximately 40% of total net assets invested in these securities throughout the period. While the prices of our bond holdings in all three sectors have risen, ongoing interest rate declines have affected the income streams available from U.S. government and international fixed income securities. High-yield bonds, while also affected, have benefited from an ongoing supply of new issues, which has helped keep coupon rates attractive versus Treasury bonds.

Early in the year, performance in the high-yield bond sector was led by cyclical companies, like manufacturers of automobiles and heavy machinery, firms that typically do well at the start of an economic recovery. As the year progressed, however, growth-oriented investments, issued by fast-developing companies in such industries as gaming and telecommunications, outperformed other sectors.

Shifting strategies for U.S. government securities During the year, long-term rates declined, with 30-year Treasury bonds falling from 7.63% to 5.97% and 10-year bonds moving from 6.97% to 5.43%. Short-term rates remained relatively stable. These moves provided us with opportunities for capital appreciation, since bond prices rise as rates decline. Early in the year, we began concentrating assets in both short-term securities and 30-year Treasuries. As rates declined, our long-term holdings grew in value.

Mortgage-backed securities have, historically, made up a large part of the fund's U.S. government securities portfolio. However, interest rate declines have prompted record levels of prepayments, putting the income stream from these investments at risk. In anticipation of these developments, we reduced our mortgage-backed holdings and concentrated our investments on those with relatively low coupons. When mortgage-backed securities prices fall to a level that we believe offsets their risk, we expect to build up the fund s holdings.

Changing currencies limit potential return Performance of our overseas holdings this year exemplified the special risks associated with international investing. Although the bond markets of certain countries provided substantial gains, currency exchange-rate shifts reduced our profits when translated back into U.S. dollars.

This year, in anticipation of a stronger dollar, which would decrease the effective return from foreign investments, we relied on hedging strategies to protect our investments. By employing these hedges, we gave up a portion of our current return in exchange for a greater measure of capital protection against changing currency values. Historically, the fund's ability to use hedges has helped us produce better long-term returns than funds that lack this flexibility. This year, however, their use proved less advantageous, particularly when the dollar weakened instead of strengthening.

Outlook With interest rates at unrealistically high levels in the upper-tier European countries, we expect muted growth, low inflation, excess capacity and high unemployment through the end of calendar 1993 and into 1994. We suspect that the European bond market rally may be largely over, and we will look to expand our investment horizons into other parts of the world. We have, in fact, already begun to invest in the bond markets of such emerging economies as Argentina, Mexico and Brazil.

At home, we expect lower rates to prevail and the economy to gain momentum, however slowly. This should translate into an overall improvement in the credit quality of many issuers and, in turn, even greater stability in the domestic high-yield portion of your fund's portfolio. We believe the investment strategies embodied in Putnam Master Income Trust will enable us to take advantage of

many opportunities in the fixed income markets, both at home and abroad.

Putnam Master Income Trust

Annual Report

For the Year Ended October 31, 1993

Report of Independent Accountants

To the Trustees and Shareholders of Putnam Master Income Trust

We have audited the accompanying statement of assets and liabilities of Putnam Master Income Trust, including the portfolio of investments owned, as of October 31, 1993, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the "Financial Highlights" for each of the five years in the period then ended, and for the period December 28, 1987 (commencement of operations) to October 31, 1988. These financial statements and "Financial Highlights" are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and "Financial Highlights" based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and "Financial Highlights" are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of October 31, 1993 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and "Financial Highlights" referred to above present fairly, in all material respects, the financial position of Putnam Master Income Trust as of October 31, 1993, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the "Financial Highlights" for each of the five years in the period then ended and for the period December 28, 1987 (commencement of operations) to October 31, 1988, in conformity with generally accepted accounting

Notes

- (a) Percentages indicated are based on total net assets of \$513,315,877, which corresponds to a net asset value per share of 9.62.
- (b) Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At October 31, 1993 these securities were valued at \$30,510,506 or 5.9% of net assets.
- (c) Non-income-producing security.
- (d) Income may be received in cash or additional securities at the discretion of the issuer.
- (e) Restricted, excluding 144A securities, as to public resale. At the date of acquisition these securities were valued at cost. There were no outstanding unrestricted securities of the same class as those held. Total market value of restricted securities owned at October 31, 1993 was \$5,861,336 or 1.1% of net assets.
- (f) The interest rate and date shown parenthetically represent the new interest rate to be paid and the date the Fund will begin accruing this rate.
- (g) A portion of these securities, having a value of \$3,798,090 or 0.7% of net assets, have been purchased on a "forward commitment basis"—that is, the Fund has agreed to take delivery of and make payment for such securities beyond the settlement time of five business days after the trade date and subsequent to the the date of this report. The purchase price and interest rate of these securities are fixed at the trade date, although the Fund does not earn any interest on such securities until the settlement date.
- (h) Interest Only (IO) Strips represent the right to receive the monthly interest payments on an underlying pool of mortgage loans. No payments of principal on the pool are passed through to the IO holders.
- (i) TBA's are mortgage- backed securities traded under delayed delivery commitments settling after October 31, 1993. Although the unit price for the trades has been established, the principal value has not been finalized. However, the amount of the commitments will not fluctuate more than 2.0% from the principal amount. The cost of TBA purchases at October 31, 1993 was \$28,781,691.
- (j) Foreign-currency denominated. Market value is translated at the current exchange rate.
- (k) The aggregate identified cost for federal income tax purposes is \$515,033,644 resulting in gross unrealized appreciation and depreciation of \$25,086,553 and \$11,504,434, respectively, or net unrealized appreciation of \$13,582,119.

/TABLE

Notes to financial statements October 31, 1993

Note 1 Significant accounting policies

The Fund is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The investment objective of the Fund is to seek high current income consistent with preservation of capital. The Fund intends to diversify its investments among the following three sectors of the fixed income securities market: a U.S. government sector, consisting of debt obligations of the U.S. government and its agencies and instrumentalities and related options, futures and repurchase agreements; a high yield sector, consisting of high yielding, lower-rated U.S. corporate fixed income securities; and an international sector, consisting of obligations of foreign governments, their agencies and instrumentalities and other fixed income securities denominated in foreign currencies.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with generally accepted accounting principles.

A) Security valuation Investments for which market quotations are readily available are stated at market value, which is determined using the last reported sale price, or, if no sales are reported - -- as in the case of some securities traded over-the-counter -the last reported bid price, except that certain U.S. government obligations are stated at the mean between the last reported bid and asked prices. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are stated at amortized cost, which approximates market, and other investments, including restricted securities, are stated at fair value following procedures approved by the Trustees. Market quotations are not considered to be readily available for long-term corporate bonds and notes; such investments are stated at fair value on the basis of valuations furnished by a pricing service, approved by the Trustees, which determines valuations for normal, institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders. (See Section F of Note 1 with respect to valuations of options, forward currency contracts and futures outstanding.)

B) TBA purchase commitments The Fund may enter into "TBA" (to be announced) purchase commitments to purchase securities for a fixed price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitment will not fluctuate more than 2.0% from the principal amount. The Fund holds, and maintains until the settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Fund enters into offsetting contracts for the forward sale of other securities it owns. TBA purchase commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the Fund's other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, generally according to the procedures described under "Security valuation" above.

Although the Fund will generally enter into TBA purchase

commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the Fund may dispose of a commitment prior to settlement if the Fund Manager deems it appropriate to do so.

TBA sale commitments The Fund may enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction.

Unsettled TBA sale commitments are valued at the current market value of the underlying securities, generally according to the procedures described under "Security valuation" above. The contract is "marked-to-market" daily and the change in market value is recorded by the Fund as an unrealized gain or loss. If the TBA sale commitment is closed through the acquisition of an offsetting purchase commitment, the Fund realizes a gain or loss on the commitment without regard to any unrealized gain or loss on the underlying security. If the Fund delivers securities under the commitment, the Fund realizes a gain or loss from the sale of the securities based upon the unit price established at the date the commitment was entered into.

- C) Joint trading account Pursuant to an exemptive order issued by the Securities and Exchange Commission, the Fund may transfer uninvested cash balances into a joint trading account. The order permits the Fund's cash balance to be deposited into a single joint account along with the cash of other registered investment companies managed by Putnam Investment Management, Inc. (formerly known as The Putnam Management Company, Inc.), the Fund's Manager, a wholly-owned subsidiary of Putnam Investments, Inc. (formerly known as The Putnam Companies, Inc.), and certain accounts. These balances may be invested in one or more repurchase agreements and/or short-term money market instruments.
- D) Repurchase agreements The Fund through its custodian, receives delivery of the underlying securities, the market value of which at the time of purchase is required to be in an amount at least equal to the resale price, including accrued interest. The Fund s Manager is responsible for determining that the value of these underlying securities is at all times at least equal to the resale price, including accrued interest.
- E) Security transactions and related investment income Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Interest income is recorded on the accrual basis and dividend income is recorded on the ex-dividend date.

Discount on zero coupon bonds, original issue discount bonds and step-up bonds is accreted according to the effective yield method. Certain securities held by the Fund pay interest in the form of additional securities; interest on such securities is recorded on the accrual basis at the lower of the coupon rate or the market value of the securities to be received, and is allocated to the cost of the securities received on the payment date.

Foreign currency-denominated receivables and payables are "marked-to-market" daily using the current exchange rate. The fluctuation between the original exchange rate and the current exchange rate is recorded daily as unrealized translation gain or loss. Upon receipt or payment, the Fund realizes a gain or loss on foreign currency amounting to the difference between the original value and the ending value of the receivable or payable. Foreign currency gains and losses related to interest receivable are reported as part of interest income.

F) Option accounting principles When the Fund writes a call or put option, an amount equal to the premium received by the Fund is included in the Fund's "statement of assets and liabilities" as an asset and an equivalent liability. The amount of the liability is subsequently "marked-to-market" to reflect the

current market value of an option written. The current market value of an option is the last sale price or, in the absence of a sale, the last offering price, except that certain options on U.S. government obligations are stated at fair value on the basis of valuations furnished by a pricing service approved by the Trustees. If an option expires on its stipulated expiration date, or if the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option is extinguished. If a written call option is exercised, the Fund realizes a gain or loss from the sale of the underlying security and the proceeds of the sale are increased by the premium originally received. If a written put option is exercised, the amount of the premium originally received reduces the cost of the security which the Fund purchases upon exercise of the option.

The premium paid by the Fund for the purchase of a call or put option is included in the Fund's "statement of assets and liabilities" as an investment and is subsequently "marked-to-market" to reflect the current market value of the option. If an option which the Fund has purchased expires on the stipulated expiration date, the Fund realizes a loss in the amount of the cost of the option. If the Fund enters into a closing sale transaction, the Fund realizes a gain or loss, depending on whether proceeds from the closing sale transaction are greater or less than the cost of the option. If the Fund exercises a call option, the cost of securities acquired by exercising the call is increased by the premium paid to buy the call. If the Fund exercises a put option, it realizes a gain or loss from the sale of the underlying security and the proceeds from such sale are decreased by the premium originally paid.

Options on foreign currencies The Fund writes and purchases put and call options on foreign currencies. The accounting principles and risks involved are similar to those described above relating to options on securities. The amount of potential loss to the Fund upon exercise of a written call option is the value (in U.S. dollars) of the currency sold, converted at the spot price, less the value of U.S. dollars received in exchange. The amount of potential loss to the Fund upon exercise of a written put option is the value (in U.S. dollars) of the currency received converted at the spot price, less the value of the U.S. dollars paid in exchange.

Options on futures Options on futures generally operate in the same manner as options purchased or written directly on the underlying debt securities. The Fund is required to deposit in a manner similar to futures contracts as described below, "initial margin" and "variation margin" with respect to put and call options written on futures contracts. In addition, upon exercise, net premiums will decrease the unrealized loss or increase the unrealized gain on the future.

Futures A futures contract is an agreement between two parties to buy and sell a security at a set price on a future date. Upon entering into such a contract the Fund is required to pledge to the broker an amount of cash or U.S. government securities equal to the minimum "initial margin" requirements of the exchange. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as "variation margin," and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The potential risk to the Fund is that the change in value of the underlying securities may not correspond to the change in value of the futures contracts.

Forward currency contracts A forward currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is "marked-to-market" daily and the change in market value is recorded by the Fund as an unrealized gain or loss. When the

contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The maximum potential loss from forward currency contracts is the aggregate face value in U.S. dollars at the time the contract was opened; however, management believes the likelihood of such a loss to be remote.

- G) Federal taxes It is the policy of the Fund to distribute all of its income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the Fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation of securities held and excise tax on income and capital gains.
- H) Distributions to shareholders Distributions to shareholders are recorded by the Fund on the ex-dividend date. At certain times, the Fund may pay distributions at a level rate even though, as a result of market conditions or investment decisions, the Fund may not achieve projected investment results for a given period. Based on investment results for the years ended October 31, 1992, and 1991, \$0.06 and \$0.11 of per share distributions has been designated as a distribution from paid-in capital for financial presentation purposes.
- I) Unamortized organization expenses Expenses incurred by the Fund in connection with its organization aggregated \$36,523. These expenses are being amortized on a straight-line basis over a five-year period.

Note 2 Management fee, administrative services, and other transactions

Compensation of Putnam Investment Management, Inc., for management and investment advisory services is paid quarterly based on the average net assets of the Fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets, 0.65% of the next \$500 million, 0.60% of the next \$500 million and 0.55% of any amount over \$1.5 billion.

The Fund also reimburses the Manager for the compensation and related expenses of certain officers of the Fund and their staff who provide administrative services to the Fund. The aggregate amount of all such reimbursements is determined annually by the Trustees. For the year ended October 31, 1993, the Fund incurred \$15,859 for these services.

Trustees of the Fund receive an annual Trustee's fee of \$1,380 and an additional fee for each Trustees' meeting attended. Trustees who are not interested persons of the Manager and who serve on committees of the Trustees receive additional fees for attendance at certain committee meetings.

Custodial functions for the Fund's assets are provided by Putnam Fiduciary Trust Company (PFTC), a subsidiary of Putnam Investments, Inc. Investor servicing agent functions are provided by Putnam Investor Services, a division of PFTC.

Fees paid for these investor servicing and custodial functions for the year ended October 31, 1993 amounted to \$385,850.

Investor servicing and custodian fees reported in the Statement of operations for the year ended October 31, 1993 have been reduced by credits allowed by PFTC.

Note 3 Purchases and sales of securities During the year ended October 31, 1993, purchases and sales of investment securities other than U.S. government obligations and short-term investments aggregated \$733,415,427 and \$752,936,874, respectively. Purchases and sales of U.S. government obligations aggregated \$416,330,463 and \$417,100,454, respectively. In determining the net gain or loss on securities sold, the cost of securities has been determined on the identified cost basis.

Written option transactions on foreign currencies during the year are summarized as follows:

	Principal Subject	Premiums
to Option	Received	
Options written	\$ 15 , 600	\$ 364,317
Options closed	(15,600)	(364,317)
Written options outstanding at	end of year\$	\$

Purchased option transactions on foreign bonds and currencies during the year are summarized as follows:

Cost

Options purchased \$ 2,880,921
Options sold (1,279,047)
Purchased options outstanding at end of year \$ 1,601,874

Contracts closed (1,335,446,370)
Open at end of year \$ 50,910,959

/TABLE

Dividend Policy

It is the Fund's dividend policy to pay monthly distributions from net investment income and any net realized short-term gains (including gains from options and futures transactions). Long-term capital gains are distributed at least annually. In an effort to maintain a more stable level of distributions, the Fund's monthly distribution rate will be based on Putnam Management's projections of the net investment income and net realized short-term capital gains that the Fund is likely to earn over the long term. Such distributions at times may exceed the current earnings of the Fund resulting in a return of capital to shareholders.

At the time of each distribution, shareholders are furnished Putnam Management's current estimate of the sources of such

distribution. These estimates are subject to adjustment depending on investment results for the Fund's entire fiscal year. Final information regarding such matters is furnished to shareholders in the Fund's annual reports and in tax information provided following the end of each calendar year.

/TABLE

Federal tax information

For federal income tax purposes, \$0.869 per share for the year ended October 31, 1993 constitutes "dividend income". The Fund has designated 2.24% of the dividend income as qualifying for the dividends received deduction for corporations.

In addition, the Fund has designated 0.269 per share as long-term capital gains.

The Form 1099 you receive in January 1994 will show the tax status of all distributions paid to your account in calendar 1993.

As required by law, your Fund reports to the Internal Revenue Service on a calendar year basis the amount of distributions paid to each shareholder.

Fund performance supplement

Putnam Master Income Trust is a portfolio managed for high current income consistent with preservation of capital through a portfolio diversified among U.S. government, high-yield and international fixed income securities. The fund invests in lower-rated, higher yielding securities, which may pose a greater risk to principal than higher-rated securities. High-yield securities are rated lower than investment-grade securities because there is a greater possibility that negative changes in the issuer's financial condition, or in general economic conditions, may hinder the issuer s ability to pay principal and interest on securities.

The Consumer Price Index is a commonly used measure of inflation; it does not represent an investment return.

Morningstar rates a fund in relation to similar funds, based on risk-adjusted 3-, 5- and 10-year total return, as applicable, adjusted for sales charges. Ratings are updated biweekly.

The fund performance supplement has been prepared by Putnam Management to provide additional information about the fund and the indexes used for performance comparisons. The information is not part of the portfolio of investments owned or the financial statements.

APPENDIX TO FORM N30D FILINGS TO DESCRIBE DIFFERENCES BETWEEN PRINTED AND EDGAR-FILED TEXTS:

- (1) Rule lines for tables are omitted.
- (2) Boldface and italic typefaces are displayed in normal type.
- (3) Headers (e.g, the name of the fund) and footers (e.g., page numbers and "The accompanying notes are an integral part of these financial statements") are omitted.
- (4) Because the printed page breaks are not reflected, certain tabular and columnar headings and symbols are displayed differently in this filing.
- (5) Bullet points and similar graphic signals are omitted.
- (6) Page numbering is different.
- (7) "GBP" has replaced the sign for the British Pound, "JPY" has replace the sign for the Japanese Yen.
