To Principal Mutual Life Insurance Company Customers

Equity markets, both domestic and international, began the year quite strong. However, as investors received varying economic data fears of inflation returned. The result was an increasingly nervous marketplace and some weakening of this upward trend.

Though much attention has been paid to the potential for increasing inflation, most financial experts do not see this as a real threat. Instead, they look for a steady economic environment with correspondingly low inflation and interest rates.

The Principal Mutual Funds continue to experience excellent growth both in assets and the number of contracts. The Principal Mutual Funds act as investment options within several different Principal Mutual Life Insurance Company variable annuity and variable life products. Please see your contract prospectus for a description of the Funds specifically available in your contract.

For each contract holder, particularly those who have recently joined us, we hope that you find the information contained in this Semiannual Report helpful in monitoring your investment.

Principal Aggressive Growth Fund, Inc.  
Principal Asset Allocation Fund, Inc.  
Principal Balanced Fund, Inc.  
Principal Bond Fund, Inc.  
Principal Capital Accumulation Fund, Inc.  
Principal Emerging Growth Fund, Inc.  
Principal Government Securities Fund, Inc.  
Principal Growth Fund, Inc.  
Principal High Yield Fund, Inc.  
Principal Money Market Fund, Inc.  
Principal World Fund, Inc.

#### Note 1 - Significant Accounting Policies

Principal Aggressive Growth Fund, Inc., Principal Asset Allocation Fund, Inc., Principal Balanced Fund, Inc., Principal Bond Fund, Inc., Principal Capital Accumulation Fund, Inc., Principal Emerging Growth Fund, Inc., Principal Government Securities Fund, Inc., Principal Growth Fund, Inc., Principal High Yield Fund, Inc., Principal Money Market Fund, Inc. and Principal World Fund, Inc. (the "Funds") are registered under the Investment Company Act of 1940, as amended, as open-end diversified management investment companies and operate in the mutual fund industry.

Principal Money Market Fund, Inc. values its securities at amortized cost, which approximates market. Under the amortized cost method, a security is valued by applying a constant amortization to maturity of the difference between the principal amount due at maturity and the cost of the security to the fund.

The other funds value securities for which market quotations are readily available at market value, which is determined using the last reported sale price or, if no sales are reported, as is regularly the case for some securities traded over-the-counter, the last reported bid price. When reliable market quotations are not considered to be readily available, which may be the case, for example, with respect to certain debt securities and preferred stocks, the investments are valued by using market quotations, prices provided by market makers or estimates of market values obtained from yield data and other factors relating to instruments or securities with similar characteristics in accordance with procedures established in good faith by each fund's Board of Directors. Securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market.

With respect to Principal World Fund, Inc., the value of foreign securities in foreign currency amounts is expressed in U.S. dollars at the closing daily rate of exchange. The identified cost of the portfolio holdings is translated at approximate rates prevailing when acquired. Income and expense amounts are translated at approximate rates prevailing when received or paid, with daily accruals of such amounts reported at approximate rates prevailing at the date of valuation.

Since the carrying amount of the foreign securities in the Principal World Fund, Inc. is determined based on the exchange rate and market values at the close of the period, it is not practicable to isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities during the period.

The Funds record investment transactions generally one day after the trade date. The identified cost basis has been used in determining the net realized gain or loss from investment transactions and unrealized appreciation or depreciation of investments. The Funds record dividend income on the ex-dividend date, except dividend income from foreign securities whereby the ex-dividend date has passed; such dividends are recorded as soon as the Funds are informed of the ex-dividend date. Interest income is recognized on an accrual basis.

Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amount of dividends and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments in securities at fiscal year end, resulting from changes in the exchange rate.

With respect to Principal Money Market Fund, Inc., all net investment income and any realized gains and losses from investment transactions are declared as dividends daily to shareholders of record as of that day. Dividends and distributions to shareholders of the other funds are recorded on the ex-dividend date.

Dividends and distributions to shareholders from net investment income and net realized gain from investment and foreign currency transactions is determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. To the extent these "book/tax" differences are permanent in nature (i.e. that they result from other than timing of recognition - "temporary"), such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification. Reclassifications made for the year ended December 31, 1995 were not material.

Due to the timing of dividend distributions and the differences in accounting for income and realized gains (losses) for financial statement and federal income tax purposes, the fiscal year in which amounts are distributed may differ from the year in which the income and realized gains (losses) are recorded for financial statement purposes by the fund. The differences between the income and gains distributed on a book versus tax basis are shown as excess distributions of net investment income and net realized gain on investments in the accompanying Statements of Changes in Net Assets.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### Note 2 - Federal Income Taxes

No provision for federal income taxes is considered necessary because each fund is qualified as a "regulated investment company" under the Internal Revenue Code and intends to distribute each year, substantially all of its net investment income and realized capital gains to shareholders. The cost of investments is approximately the same for both federal income tax and financial reporting purposes.

#### Note 3 - Management Agreement and Transactions With Affiliates

The Funds have agreed to pay investment advisory and management fees to Princor Management Corporation (wholly owned by Princor Financial Services Corporation, a subsidiary of Principal Mutual Life Insurance Company) (the "Manager"), computed at an annual percentage rate of each fund's average daily net assets. The annual rate used in this calculation for Principal Bond Fund, Inc., Principal Capital Accumulation Fund, Inc., Principal Government Securities Fund, Inc., Principal Growth Fund, Inc. and Principal Money Market Fund, Inc. is .50% of the first \$100 million of the fund's average daily net assets and .45% of the next \$100 million of the fund's average daily net assets. The annual rate used in this calculation for Principal Asset Allocation Fund, Inc. and Principal Aggressive Growth Fund, Inc. is .80% of the first \$100 million of the fund's average daily net assets. With respect to Principal Balanced Fund, Inc. and Principal High Yield Fund, Inc., the annual rate used in this calculation is .60% of the first \$100 million of the fund's average daily net assets. With respect to Principal Emerging Growth Fund, Inc. and Principal World Fund, Inc., the annual rate used in this calculation is .65% and .75%, respectively, of the first \$100 million of the fund's average daily net assets.

Brokerage commissions were paid to affiliates by certain of the funds, as follows:

Six Months Ended	Year Ended
June 30,	December 31,
1996	1995
-----	-----

Principal Balanced Fund, Inc.	\$1,300	\$ 219
Principal Capital Accumulation Fund, Inc.	1,098	8,243
Principal Emerging Growth Fund, Inc.	-	910
Principal Growth Fund, Inc.	-	4,252
Principal World Fund, Inc.	1,134	2,207

All of the shares of the Funds are owned by Principal Mutual Life Insurance Company and/or one or more Separate Accounts sponsored by Principal Mutual Life Insurance Company.

Note 4 - Investment Transactions

For the six months ended June 30, 1996, the cost of investment securities purchased and proceeds from investment securities sold (not including short-term investments and U.S. government securities) by the Funds were as follows:

	Purchases	Sales
	-----	-----
Principal Aggressive Growth Fund, Inc.	\$ 1,624,948	\$ -
Principal Asset Allocation Fund, Inc.	18,423,844	14,981,401
Principal Balanced Fund, Inc.	21,160,727	4,435,701

Note 6 - Line of Credit

The Funds have an unsecured line of credit with a bank which allows each fund to borrow up to \$500,000. Borrowings are made solely to facilitate the handling of unusual and/or unanticipated short-term cash requirements. Interest is charged to each fund, based on its borrowings, at a rate equal to the bank's Fed Funds Unsecured Rate plus 100 basis points. Additionally, a commitment fee is charged at the annual rate of .25% on the line of credit. At June 30, 1996, the Funds had no outstanding borrowings under the line of credit.

June 30, 1996
