**JNL/Mellon Capital Management International Index Fund  
Class A and B**

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund, including the Statement of Additional Information ("SAI") and most recent reports to shareholders, online at <http://hosted.rightprospectus.com/Jackson/JNLSeriesTrust/>. You can also get this information at no cost by calling 1-800-873-5654 (Annuity and Life Service Center), 1-800-599-5651 (NY Annuity and Life Service Center), 1-800-777-7779 (for contracts purchased through a bank or financial institution) or 1-888-464-7779 (for NY contracts purchased through a bank or financial institution), or by sending an email request to [ProspectusRequest@jackson.com](mailto:ProspectusRequest@jackson.com). The current Prospectus and SAI, both dated April 30, 2012, are incorporated by reference into (which means it legally is a part of) this Summary Prospectus.

**Investment Objective.** The investment objective of the Fund is to match the performance of the Morgan Stanley Capital International ("MSCI") Europe Australia Far East ("EAFE") Index. The Fund is constructed to mirror the index to provide long-term capital growth by investing in international equity securities attempting to match the characteristics of each country within the index.

**Expenses.** This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

The expenses do not reflect the expenses of the variable insurance contracts or the separate account, whichever may be applicable and the total expenses would be higher if they were included.

**Shareholder Fees**

**(fees paid directly from your investment)**

None

**Annual Fund Operating Expenses**

**(Expenses that you pay each year as a percentage of the value of your investment)**

	<b>Class A</b>
Management/Administrative Fee	0.42%
Distribution and/or Service (12b-1) Fees	0.20%
Other Expenses	0.03%
<b>Total Annual Fund Operating Expenses</b>	<b>0.65%</b>

**Annual Fund Operating Expenses**

**(Expenses that you pay each year as a percentage of the value of your investment)**

	<b>Class B</b>
Management/Administrative Fee	0.42%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.03%
<b>Total Annual Fund Operating Expenses</b>	<b>0.45%</b>

**Expense Example.** This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. Also, this example does not reflect the expenses of the variable insurance contracts or the separate account, whichever may be applicable, and the total expenses would be higher if they were included. The table below shows the expenses you would pay on a \$10,000 investment, assuming (1) 5% annual return and (2) redemption at the end of each time period. The example also assumes that the Fund operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<b>Class A</b>				
1 year	3 years	5 years	10 years	
\$66	\$208	\$362	\$810	

<b>Class B</b>			
1 year	3 years	5 years	10 years

**Portfolio Turnover (% of average value of portfolio).** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs. These costs, which are not reflected in annual fund operating expenses or in the expense example, affect the Fund’s performance.

Period	Class A
1/1/2011 – 12/31/2011	5%

Period	Class B
1/1/2011 – 12/31/2011	5%

**Principal Investment Strategies.** The Fund invests under normal circumstances at least 80% of its assets in the stocks included in the MSCI EAFE Index or derivative securities economically related to the MSCI EAFE Index.

To implement this strategy, the Fund may invest up to 50% of its net asset value in financial futures, a type of derivative, to obtain exposure, to provide liquidity for cash flows, to hedge dividend accruals or for other purposes that facilitate meeting the Fund’s objective. In addition, the Fund may use foreign currency forward contracts, a type of derivative, to maintain the approximate currency exposure of the MSCI EAFE Index.

The Fund does not employ traditional methods of active investment management, which involves the buying and selling of securities based upon security analysis. Indexing offers a cost-effective approach to gaining diversified market exposure over the long term.

**Principal Risks of Investing in the Fund.** An investment in the Fund is not guaranteed. As with any mutual fund, the value of the Fund’s shares will change, and you could lose money by investing in the Fund.

*Derivatives risk* – Investing in derivative instruments, such as, swaps, options, futures contracts, forward currency contracts, indexed securities and asset-backed securities, to be announced (TBAs) securities, interest rate swaps, credit default swaps, and certain exchange traded funds, involves risks, including liquidity, interest rate, market, counterparty, credit and management risks, mispricing or improper valuation. Changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, and the Fund could lose more than the principal amount invested. These instruments are subject to transaction costs and certain risks, such as unanticipated changes in securities prices and global currency investment. The Fund could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market.

*Foreign regulatory risk* – The Adviser is an indirect wholly-owned subsidiary of Prudential plc, a publicly traded company incorporated in the United Kingdom and is not affiliated in any manner with Prudential Financial Inc., a company whose principal place of business is in the United States of America. Through its ownership structure, the Adviser has a number of global financial industry affiliated entities. As a result of this structure, and the asset management and financial industry business activities of the Adviser and its affiliates, the Adviser and the Funds may be prohibited or limited in effecting transactions in certain securities. The Adviser and the Funds may encounter trading limitations or restrictions because of aggregation issues or other foreign regulatory requirements. Foreign regulators or foreign laws may impose position limits on securities held by the Funds, and the Funds may be limited as to which securities they may purchase or sell, as well as, the timing of such purchases or sales. These foreign regulatory limits may increase the Funds’ expenses and may limit the Funds’ performance.

*Foreign securities risk* – Investments in foreign securities involve risks not typically associated with U.S. investments. These risks include, among others, adverse fluctuations in foreign currency values as well as adverse political, social and economic developments and possible imposition of foreign withholding taxes on income payable on the securities. In addition, there may be less publicly available information and more volatile or less liquid markets and foreign issuers may not be subject to the same accounting, auditing and financial recordkeeping standards and requirements as domestic issuers.

*Index investing risk* – The indexing strategy does not attempt to manage volatility, use defensive strategies, or reduce the effects of any long-term periods of poor stock performance.

*License termination risk* – The licenses from a third party that permit the use by the Fund of intellectual property may be terminated by the licensor, and as a result Fund may lose its ability to use the licensed name or strategy, or receive important data from the licensor.

*Managed portfolio risk* – As an actively managed portfolio, the value of the Fund’s investments could decline because the financial condition of an issuer may change (due to such factors as management performance, reduced demand or overall market changes), financial markets may fluctuate or overall prices may decline, or the manager’s investment techniques could fail to achieve the Fund’s investment objective or negatively affect the Fund’s investment performance.

**Performance.** The performance information shown provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns compared with those of a broad measure of market performance. The Fund's past performance is not necessarily an indication of how the Fund will perform in the future.

The returns shown in the bar chart and table do not include charges that will be imposed by variable insurance products. If these amounts were reflected, returns would be less than those shown.

**Annual Total Returns as of December 31**

**Class A**

**Best Quarter (ended 6/30/2009): 25.22%; Worst Quarter (ended 12/31/08): -20.69%**

Richard A. Brown	2004	Director
Thomas J. Durante	2010	Director

**Purchase and Sale of Fund Shares**

Only separate accounts, registered investment companies, and qualified and non-qualified plans of Jackson National Life Insurance Company (“Jackson”) or Jackson National Life Insurance Company of New York (“Jackson NY”) may purchase shares of the Fund. You may invest indirectly in the Fund through your purchase of a variable annuity or life contract issued by a separate account of Jackson or Jackson NY, or through a Jackson or Jackson NY fund of funds that invests in this Fund and directly through a qualified or non-qualified plan. Any minimum initial or subsequent investment requirements and redemption procedures are governed by the applicable separate account, registered investment company or plan through which you invest indirectly.

This Fund is not sold to the general public but instead serves as an underlying investment by insurance companies, affiliated investment companies, and retirement plans for funding variable insurance contracts and retirement plans.

**Tax Information**

Because the Fund’s shareholders are the separate accounts, registered investment companies, and qualified and non-qualified plans of Jackson or Jackson NY, the tax treatment of dividends and distributions will depend on the tax status of Jackson or Jackson NY, the investment companies, and the qualified and non-qualified plans. Accordingly, no discussion is included about the Federal personal income tax consequences to you, the contract owner or plan participant. For this information, you should consult the prospectus of the appropriate separate account or description of the plan and read the discussion of the Federal income tax consequences to variable insurance contract owners and plan participants.

**Payments to Financial Intermediaries**

If you invest in the Fund under a variable insurance contract or a plan that offers a variable insurance contract as a plan option through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s Web site for more information.
