Fund Inc

SEMI ANNUAL REPORT
April 30, 1995

Letter to Shareholders

June 20, 1995

Dear Shareholder:

Net asset value for the Salomon Brothers Worldwide Income Fund Inc (the "Fund") rose to \$9.55 per share during the three months ended April 30, 1995.

Dividends of \$0.35625 were paid during the quarter. The Fund's investment return for the period, assuming reinvestment of dividends, was 4.30% compared with an increase of 0.12% in the Salomon Brothers Brady Bond Index. On April 28, the Fund's stock price reached \$10.875, representing a 13.9% premium to net asset value.

At quarter end, emerging markets debt securities accounted for about 75% of the Fund's holdings; the balance of the portfolio was in U.S. high-yield debt securities. The largest holdings in the emerging markets debt portfolio, as a percentage of invested assets at April 30, were in the securities of Brazil (14.7%), Argentina (11.4%), Poland (9.5%), Morocco (8.3%) and Venezuela (6.5%).

Emerging Markets

The emerging markets experienced extreme volatility during the April quarter. In February and March the Salomon Brothers Brady Bond Index fell by 6.56% and 3.05%, respectively and rebounded by 10.53% in April. The market remained strong in May.

Early in the year, the markets were temporarily buoyed by President Clinton's decision to bypass Congress and commit the U.S. to a massive aid program for Mexico. Subsequently, analysts began to focus on the damaging effects of a new austerity program on Mexico's economy. Mexico's troubles also began to spill over into other Latin American countries, particularly those, such as Argentina, that require foreign capital.

During February, the performance of non-Latin American emerging markets debt securities began to diverge from that of Latin American countries. Non-Latin Brady Bonds registered a negative .55% return for the month, while Brady Bonds of Latin American countries fell by 7.41%.

Two events dramatically changed the tone of the markets in March. First, Mexico announced a new austerity program on March 9th. The plan was greeted very favorably by investors. Second, Argentina arranged a very large standby financing program with various supranational agencies -- such as the World Bank and the International Monetary Fund -- to slow the rate of capital flow out of the country. These two announcements restored investor confidence, and performance has improved dramatically since they were made.

Country Analysis

Economic reforms should take hold in Brazil over the next 12-18 months. The country's bonds were weak performers in the quarter, falling by 3.69%, because of a poorly handled currency devaluation. Investors were particularly unforgiving in light of their experience with Mexico's devaluation late last year. Market participants were also dismayed by President Cardoso's slow progress in attacking Brazil's fiscal troubles and in obtaining the constitutional reforms required to significantly alter the budget.

Argentina's Brady Bonds rose by 1.68% during a volatile quarter. Market participants were impressed with the ability of the government (led by President Menem and Finance Minister Cavallo) to pass very tough fiscal reforms, including tax increases and budget cuts, on the eve of the May 12th presidential election, in which Menem was reelected.

The economic and credit outlook for Poland is very good. The country has been aggressive in reforming its economy and privatizing key industries. As a consequence, we expect Poland to receive a strong sovereign credit rating this year.

Morocco is likely to remain a core holding in the portfolio. Although a drought will restrain the economy this year, the country currently has no need for additional external capital and we believe its long-term credit fundamentals are sound.

Venezuela's bonds performed well in the latest quarter. This was partly the result of the high yield offered on these securities and partly the result of a rise in oil prices, which should benefit the economy.

Our investment strategy in this market is unchanged. We continue to focus on securities of companies that have improving credit fundamentals and those that would not be hurt by a slowing U.S. economy.

Total borrowings are unchanged at \$60 million.

The Fund held its annual shareholders meeting on February 23, 1995. At the meeting, shareholders elected each of the nominees proposed for election to the Fund's Board of Directors and ratified the selection of Price Waterhouse LLP as the independent accountants of the Fund. The following table provides information concerning the matters voted on at the meeting:

<TABLE>

SALOMON BROTHERS WORLDWIDE
INCOME FUND INC
Notes to Financial Statements
(Unaudited)

The Salomon Brothers Worldwide Income Fund Inc (the ``Fund'') was organized in Maryland on October 21, 1993 and is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. Prior to the commencement of investment operations on December 31, 1993, the Fund had no operations, other than those relating to its organization and registration, and the sale and issuance to Salomon Brothers Asset Management Inc (the ``Adviser'') of 7,133 shares of its common stock for an aggregate purchase price of \$100,005 on December 16, 1993. The investment objective of the Fund is to maintain a high level of current income by investing primarily in a portfolio of high yield foreign sovereign debt securities and high yield non-U.S. and U.S. corporate debt securities. As a secondary objective, the Fund will seek capital appreciation. No assurance can be given that the Fund's investment objectives will be achieved.

The Fund's investment in securities rated below investment grade typically involve risk not associated with higher rated securities including, among others, overall greater risk of timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The market prices of the securities in which the Fund invests are expected to fluctuate with changes in interest rates and the perceived credit quality of such assets. The Fund's investment in sovereign bonds may be affected by political, social, economic or diplomatic changes in such countries.

Note 1. Accounting The following is a summary
Policies of significant accounting poli-
cies consistently followed by the Fund.

Securities Valuation: In valuing the Fund's assets, all securities for which market quotations are readily available are valued (except as described below) (i) at the last sales price prior to the time of determination if there were a sales price on the date of determination, (ii) at the mean between the last current bid and asked prices if there were no sales price on such date and bid and asked quotations are available and (iii) at the bid price if there were no sales price on such date and only bid quotations are available. Publicly traded sovereign bonds are typically traded internationally in the over-the-counter

market and will be valued at the mean between the last current bid and asked price as of the close of business of that market. Securities may be valued by independent pricing services which use prices provided by market-makers or estimates of market values obtained from yield data relating to instruments or securities with similar characteristics.

Short-term investments having a maturity of 60 days or less are valued at amortized cost which approximates market value.

Securities for which reliable quotations are not readily available and any other securities and assets are valued at fair value as determined in good faith by, or under procedures established by, the Board of Directors.

In connection with transactions in repurchase agreements, it is the Fund's policy that its custodian takes possession of the underlying collateral securities, the value of which at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to ensure the adequacy of the collateral. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

Foreign Currency Translation: The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars on the following basis:

(i) market value of investment securities, other assets and liabilities--at the 12:00 noon rate of exchange reported by Reuters;

(ii) purchases and sales of investment securities, income and expenses--at the rate of exchange prevailing on the respective dates of such transactions.

Although the net assets of the Fund are presented at the foreign exchange rates and market values at the close of the period, the Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities held at the end of the period. Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from

-9-

changes in the market prices of portfolio securities sold during the period.

Net realized losses on foreign currency transactions of \$113,792 represents net foreign exchange losses from disposition of foreign currency, gains or losses realized between the trade and settlement dates on security transactions, and the difference between amounts of interest recorded on the Fund's books and the U.S. dollar equivalent amounts actually received. Net currency gains and losses from valuing foreign currency denominated assets, except portfolio securities, and liabilities at period end exchange rates are reflected as a component of unrealized depreciation on foreign currencies.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin as a result of, among other factors, the possibility of political and economic instability and the level of governmental supervision and regulation of foreign securities markets.

Forward Currency Contracts: A forward currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The Fund enters into forward currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings or on specific receivables and payables denominated in a foreign currency. The contracts are valued daily at current exchange rates and any unrealized gain or loss is included in net unrealized appreciation or depreciation on investments. Gain or loss is realized on the settlement date of the contract equal to the difference between the settlement value of the original and renegotiated forward contracts. This gain or loss, if any, is included in net realized gain (loss) on foreign currency transactions. Risks may arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

Loan Participations: The Fund invests in U.S. dollar-denominated fixed and floating rate loans ('`Loans`') arranged through private negotiations between a foreign sovereign entity and one or more financial institutions ('`Lenders`'). The Fund invests in such Loans in the form of participations in Loans ('`Participations`') or assignments of all or a portion of loans from third parties ('`Assignments`'). Participations typically result in the Fund having a contractual relationship only with the Lender, not with the sovereign borrower. The Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the Participation and only upon receipt by the Lender of the payments from the borrower. In connection with purchasing Participations, the Fund generally has no right to enforce compliance by the borrower with the terms of the loan agreements relating to the loan, nor any rights of set-off against the borrower, and the Fund will not benefit directly from any collateral supporting the Loan in which it has purchased the Participation. As a result, the Fund assumes the credit risk of both the borrower and the Lender that is selling the Participation. The Fund may have difficulty disposing of Participations and Assignments because the market for such instruments is not highly liquid.

Cash Flow Information: The Fund invests in securities and distributes dividends and distributions from net investment income and from net realized gains which are paid in cash and may be reinvested at the discretion of shareholders. These activities are reported in the Statement of Changes in Net Assets and additional information on cash receipts and cash payments is presented in the Statement of Cash Flows.

Accounting practices that do not affect reporting activities on a cash basis include carrying investments at value and amortizing discounts or premiums on debt obligations. For the six month period November 1, 1994 through April 30, 1995, the Fund paid interest expense of \$697,499.

Securities Transactions and Investment Income: Securities transactions are recorded on the trade date. Realized and unrealized gains and losses are calculated on the identified cost basis. Interest income is recorded on the accrual basis and the Fund accretes discount on securities purchased using the effective interest method.

Taxes: It is the Fund's intention to continue to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to shareholders. Therefore,

no federal income tax provision is required.

Dividends and Distributions: The Fund declares and pays dividends and distributions monthly first from net investment income, then from realized short-term capital gains and other sources, if necessary. Net long-term capital gains, if any, in excess of loss carryforwards will be distributed annually. Dividends and distributions are recorded on the ex-dividend date.

Income distributions and capital gain distributions are determined in accordance with federal income tax regulations which may differ from generally accepted accounting principles. These ``book/tax'' differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require reclassifications. Dividends which exceed net investment

-10-

income for financial reporting purposes, but not for tax purposes are reported as distributions in excess of net investment income.

Reclassification of Capital Accounts: The Fund accounts and reports for distributions to shareholders in accordance with the American Institute of Certified Public Accountants' Statement of Position 93-2: Determination, Disclosure and Financial Statement Presentation of Income, Capital Gain and Return of Capital Distributions by Investment Companies. During the six months ended April 30, 1995 the Fund reclassified \$2,979,221 of net foreign currency losses to distributions in excess of net investment income from accumulated net realized loss on investments.

Net investment income, net realized gains and net assets were not affected by this change.

Deferred Organization Expenses: A total of \$116,182 was incurred in connection with the organization of the Fund. These costs have been deferred and are being amortized on a straight-line basis over a period of sixty months from the date the Fund commenced investment operations.

Note 2. Agreements

The Fund has an Investment Advisory Agreement with the Adviser, an indirect wholly-owned subsidiary of Salomon Inc, pursuant to which the Adviser acts as the Fund's investment adviser and is responsible for the management of the Fund's portfolio in accordance with the Fund's investment objectives and policies and for making decisions to buy, sell, or hold particular securities. The Fund also has an Administration Agreement with Prudential Mutual Fund Management, Inc. (the ``Administrator''), pursuant to which the Administrator performs administrative services necessary for the operation of the Fund.

The Fund pays the Adviser a monthly fee for its advisory services at an annual rate of .90% of the value of the Fund's average weekly net assets. The Fund pays the Administrator a monthly fee for its administration services at an annual rate of .15% of the value of the Fund's average weekly net assets up to \$250 million and .125% of the value of such net assets in excess of \$250 million.

Note 3. Portfolio Securities

Purchases and sales of investment securities, other than short-term investments, for the six months ended April 30, 1995 aggregated \$76,501,613 and \$78,853,481, respectively.

At April 30, 1995, the Fund had outstanding forward currency contracts, both to purchase and sell foreign currencies, as follows:

<TABLE>
<CAPTION>

Foreign Currency Purchase Contracts	Value at Settlement Date Payable	Current Value	Appreciation
<S>	<C>	<C>	<C>
Netherland Guilders Expiring 7/1/96	\$,3,062,336	\$3,221,012	\$ 158,676

<TABLE>
<CAPTION>

Foreign Currency Sale Contracts	Value at Settlement Date Receivable	Current Value	(Depreciation)
<S>	<C>	<C>	<C>
Netherland Guilders Expiring 7/1/96	\$ 2,691,790	\$3,221,012	\$(529,222)

The federal income tax basis of the Fund's investments at April 30, 1995 was substantially the same as the basis for financial reporting and, accordingly, net unrealized depreciation for federal income tax purposes was \$45,228,898 (gross unrealized appreciation-\$1,546,337; gross unrealized depreciation-\$46,775,235).

For federal income tax purposes, the Fund had a capital loss carryforward as of October 31, 1994 of approximately \$889,000 which expires in 2002. Accordingly, no capital gain distributions are expected to be paid to shareholders until net gains have been realized in excess of such amount.

Note 4. Bank Loan

The Fund borrowed \$60,000,000 pursuant to a secured term loan agreement (the ``Loan'') with Morgan Guaranty Trust Company of New York. The Loan agreement was renewed on December 12, 1994 at an interest rate of 8.1875%, which is equal to six-month LIBOR plus 1.375% and the maturity date is June 12, 1995. Interest is payable upon maturity. In accordance with the terms of the Loan, the Fund must maintain a level of collateral to debt of between 175-225%. The collateral for the Loan was valued at \$135,055,022 on April 30, 1995 and is

being held in a segregated account by the Fund's custodian.

Note 5. Capital There are 100 million shares of \$.001 par value common stock authorized. Of the 12,657,133 shares outstanding at April 30, 1995, the Adviser owned 7,133 shares. The Fund sold 12,650,000 shares of common stock in its initial public offering at a price of \$15 per share and received net proceeds of \$176,622,906, after deducting offering expenditures and underwriting commissions. Initial offering costs of \$793,344 were charged to paid-in capital at the time of the issuance of such shares.

-11-

Note 6. Dividends Subsequent to April 30, 1995, the Board of Directors of the Fund declared dividends of \$.11875 per common share payable May 31, 1995 and June 30, 1995 to shareholders of record on May 11, 1995 and June 12, 1995, respectively.

* Commencement of investment operations.

(a) Total investment return is calculated assuming a purchase of common stock

at the current market price on the first day and a sale at the current market price on the last day of each period reported. Dividends and distributions are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan.

Total investment return does not reflect brokerage commissions. Total investment return for periods of less than one full year are not annualized.

(D) Based on beginning period price of \$14.03 (initial offering price of \$15.00 less sales load of \$.975) and end of period market value of \$10.75 per share.

(D) (D) Net asset value immediately after closing of initial public offering was \$13.96.

Annualized.
