(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 1995
(Unaudited)

NOTE 1.

In the opinion of management, the unaudited financial statements as of March 31, 1995 of Parker & Parsley 85-A, Ltd. (the "Registrant") include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. However, the results of operations for the three months ended March 31, 1995 are not necessarily indicative of the results for the full year ending December 31, 1995.

The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Registrant's Report on Form 10-K for the year ended December 31, 1994, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Steven L. Beal, Senior Vice President, 303 West Wall, Suite 101, Midland, Texas 79701.

NOTE 2.

On May 25, 1993, a final settlement agreement was negotiated, drafted and finally executed, ending litigation which had begun on September 5, 1989, when the Registrant filed suit along with other parties against Dresser Industries, Inc.; Titan Services, Inc.; BJ-Titan Services Company; BJ-Hughes Holding Company; Hughes Tool Company; Baker Hughes Production Tools, Inc.; and Baker Hughes Incorporated alleging that the defendants had intentionally failed to provide the materials and services ordered and paid for by the Registrant and other parties in connection with the fracturing and acidizing of 523 wells, and then fraudulently concealed the shorting practice from the managing general partner, Parker & Parsley Development L.P. ("PPDLP") (see Item 2). The May 25, 1993 settlement agreement called for a payment of \$115 million in cash by the defendants. The managing general partner received the funds, deducted incurred legal expenses, accrued interest, determined the general partner's portion of the funds and calculated any inter-partnership allocations. A distribution of \$91,000,000 was made to the

working interest owners, including the Registrant, on July 30, 1993. The limited partners received their distribution of \$330,598, or \$34.39 per limited partnership interest, in September 1993.

On May 3, 1993, Jack N. Price, the attorney who represented Gary G. "Zeke" Lancaster in the Federal Court lawsuit, filed suit in State Court in Beaumont against all of the plaintiff partnerships, including the Registrant and others, alleging his entitlement to 12% of the settlement proceeds. Price's lawsuit claim for approximately \$13.8 million is

predicated on a purported contract entered into with Southmark Corporation in August 1988, in which he allegedly binds the Registrant and the other defendants, as well as Southmark. Although PPDLP believes the lawsuit is without merit and intends to vigorously defend it, PPDLP is holding in reserve approximately 12.5% of the total settlement pending final resolution of the litigation by the court. Upon payment of the costs associated with the Price litigation, and assuming a successful defense, a second distribution will be made consisting of the balance of the settlement funds, including any accrued interest.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Registrant was formed October 26, 1985. The managing general partner of the Registrant at December 31, 1994 was Parker & Parsley Development Company ("PPDC"). On January 1, 1995, PPDLP, a Texas limited partnership, became the sole managing general partner of the Registrant, by acquiring the rights and assuming the obligations of PPDC. PPDC was merged into PPDLP on January 1, 1995. PPDLP acquired PPDC's rights and obligations as managing general partner of the Registrant in connection with the merger of PPDC, P&P Producing, Inc. and Spraberry Development Corporation into MidPar L.P., which survived the merger with a change of name to PPDLP. The sole general partner of PPDLP is Parker & Parsley Petroleum USA, Inc. PPDLP has the power and authority to manage, control and administer all Program and Registrant affairs. The limited partners contributed \$9,613,000 representing 9,613 interests (\$1,000 per interest) sold to a total of 828 limited partners.

Since its formation, the Registrant invested \$8,337,255 in various prospects that were drilled in Texas. At March 31, 1995, the Registrant had 24 producing oil wells with one well plugged and abandoned during 1989. The Registrant received an additional producing oil and gas well in 1993 due to the Registrant's back-in after payout.

7

8

Results of Operations

Revenues:

The Registrant's oil and gas revenues increased to \$155,060 from \$131,117 for the three months ended March 31, 1995 and 1994, respectively, an increase of 18%. The increase in revenues resulted from increases in the average price received per barrel of oil and mcf of gas, offset by a 3% decrease in barrels of oil produced and sold and a 7% decrease in mcf of gas produced and sold. For the three months ended March 31, 1995, 6,498 barrels of oil were sold compared to 6,675

for the same period in 1994, a decrease of 177 barrels. For the three months ended March 31, 1995, 21,432 mcf of gas were sold compared to 23,092 for the same period in 1994, a decrease of 1,660 mcf. The decreases in production volumes were primarily due to the decline characteristics of the Registrant's oil and gas properties. Because of these characteristics, management expects a certain amount of decline in production to continue in the future until the Registrant's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased 28% from \$13.39 for the three months ended March 31, 1994 to \$17.14 for the same period in 1995, while the average price received per mcf of gas increased 13% from \$1.81 during the three months ended March 31, 1994 to \$2.04 in 1995. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Registrant may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 1995.

Salvage income from equipment disposals of \$27,471 for the three months ended March 31, 1995 consisted of equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses decreased to \$127,982 for the three months ended March 31, 1995 as compared to \$158,210 for the same period in 1994, a decrease of \$30,228, or 19%. This decrease was due to declines in production costs and depletion, offset by an increase in general and administrative expenses ("G&A").

8

9

Production costs were \$80,136 for the three months ended March 31, 1995 and \$101,916 for the same period in 1994, a decrease of \$21,780, or 21%. The decrease was primarily due to less well repair and maintenance costs incurred in an effort to stimulate well production.

G&A's components are independent accounting and engineering fees, computer services, postage and managing general partner personnel costs. During this period, G&A increased, in aggregate, 18% from \$3,933 for the three months ended March 31, 1994 to \$4,652 for the same period in 1995. The Partnership agreement limits G&A to 3% of gross oil and gas revenues.

Depletion was \$43,194 for the three months ended March 31, 1995 compared

to \$52,361 for the same period in 1994. This represented a decrease in depletion of \$9,167, or 18%. Depletion was computed property-by-property utilizing the unit-of-production method based upon the dominant mineral produced, generally oil. Oil production decreased 177 barrels for the three months ended March 31, 1995 from the same period in 1994, while oil reserves of barrels were revised downward by 31,176 barrels, or 12%.

On May 25, 1993, a final settlement agreement was negotiated, drafted and finally executed, ending litigation which had begun on September 5, 1989, when the Registrant filed suit along with other parties against Dresser Industries, Inc.; Titan Services, Inc.; BJ-Titan Services Company; BJ-Hughes Holding Company; Hughes Tool Company; Baker Hughes Production Tools, Inc.; and Baker Hughes Incorporated alleging that the defendants had intentionally failed to provide the materials and services ordered and paid for by the Registrant and other parties in connection with the fracturing and acidizing of 523 wells, and then fraudulently concealed the shorting practice from the managing general partner. The May 25, 1993 settlement agreement called for a payment of \$115 million in cash by the defendants. The managing general partner received the funds, deducted incurred legal expenses, accrued interest, determined the general partner's portion of the funds and calculated any inter-partnership allocations. A distribution of \$91,000,000 was made to the working interest owners, including the Registrant, on July 30, 1993. The limited partners received their distribution of \$330,598, or \$34.39 per limited partnership interest, in September 1993.

On May 3, 1993, Jack N. Price, the attorney who represented Gary G. "Zeke" Lancaster in the Federal Court lawsuit, filed suit in State Court in Beaumont against all of the plaintiff partnerships, including the Registrant and others, alleging his entitlement to 12% of the settlement proceeds. Price's lawsuit claim for approximately \$13.8 million is

predicated on a purported contract entered into with Southmark Corporation in August 1988, in which he allegedly binds the Registrant and the other defendants, as well as Southmark. Although PPDLP believes the lawsuit is without merit and intends to vigorously defend it, PPDLP is holding in reserve approximately 12.5% of the total settlement pending final resolution of the litigation by the court. Upon payment of the costs associated with the Price litigation, and assuming a successful defense, a second distribution will be made consisting of the balance of the settlement funds, including any accrued interest.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased to \$77,820 for the three months ended March 31, 1995, a \$57,413 increase from the same period ended March 31, 1994. This increase was due to an increase in oil and gas sales and decreases in production costs and G&A. The increase in oil and gas sales was due to an increase in the average price received per barrel of oil and mcf of gas. Production costs decreased primarily due to less well repair and maintenance costs. G&A decreased due to less expense being allocated by the managing general partner.

Net Cash Provided by (Used in) Investing Activities

The Registrant's investing activities during the three months ended March 31, 1995 related to repair and maintenance activity on various oil and gas properties and proceeds from salvage income of \$27,471 from equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

Cash was sufficient for the three months ended March 31, 1995 to cover distributions to the partners of \$53,555 of which \$53,019 was distributed to the limited partners and \$536 to the managing general partner. For the same period ended March 31, 1994, cash was sufficient for distributions to the partners of \$39,260 of which \$38,868 was distributed to the limited partners and \$392 to the managing general partner.

It is expected that future net cash provided by operating activities will be sufficient for any capital expenditures and any distributions. As the production from the properties declines, distributions are also expected to decrease.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On May 25, 1993, a final settlement agreement was negotiated, drafted and finally executed, ending litigation which had begun on September 5, 1989, when the Registrant filed suit along with other parties against Dresser Industries, Inc.; Titan Services, Inc.; BJ-Titan Services Company; BJ-Hughes Holding Company; Hughes Tool Company; Baker Hughes Production Tools, Inc.; and Baker Hughes Incorporated alleging that the defendants had intentionally failed to provide the materials and services ordered and paid for by the Registrant and other parties in connection with the fracturing and acidizing of 523 wells, and then fraudulently concealed the shorting practice from the managing general partner. The May 25, 1993 settlement agreement called for a payment of \$115 million in cash by the defendants. The managing general partner

received the funds, deducted incurred legal expenses, accrued interest, determined the general partner's portion of the funds and calculated any inter-partnership allocations. A distribution of \$91,000,000 was made to the working interest owners, including the Registrant, on July 30, 1993. The limited partners received their distribution of \$330,598, or \$34.39 per limited partnership interest, in September 1993.

On May 3, 1993, Jack N. Price, the attorney who represented Gary G. "Zeke" Lancaster in the Federal Court lawsuit, filed suit in State Court in Beaumont against all of the plaintiff partnerships, including the Registrant and others, alleging his entitlement to 12% of the settlement proceeds. Price's lawsuit claim for approximately \$13.8 million is predicated on a purported contract entered into with Southmark Corporation in August 1988, in which he allegedly binds the Registrant and the other defendants, as well as Southmark. Although PPDLP believes the lawsuit is without merit and intends to vigorously defend it, PPDLP is holding in reserve approximately 12.5% of the total settlement pending final resolution of the litigation by the court. Upon payment of the costs associated with the Price litigation, and assuming a successful defense, a second distribution will be made consisting of the balance of the settlement funds, including any accrued interest.
