Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at [www.tiaa-cref.org/lcx\\_pro](http://www.tiaa-cref.org/lcx_pro). You can also get this information at no cost by calling 800 223-1200 or by sending an e-mail request to [disclosure@tiaa-cref.org](mailto:disclosure@tiaa-cref.org). The Fund's prospectus and Statement of Additional Information ("SAI"), each dated October 1, 2012, as subsequently supplemented, and the sections of the Fund's shareholder report dated May 31, 2012 when available, from "Portfolio of Investments" through "Notes to Financial Statements," are incorporated into this Summary Prospectus by reference and may be obtained free of charge at the website, phone number or e-mail address noted above.

### INVESTMENT OBJECTIVE

The Lifecycle Index 2025 Fund seeks high total return over time through a combination of capital appreciation and income.

### FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.42%	0.32%	0.17%

<sup>1</sup> The Retirement Class of the Fund has adopted a Distribution (12b-1) Plan that compensates the Fund's distributor, Teachers Personal Investors Services, Inc. ("TPIS"), for its expenses in providing distribution, promotional and/or shareholder services to Retirement Class shares at the annual rate of 0.05% of average daily net assets attributable to Retirement Class shares. In addition, TPIS has contractually agreed not to seek payment of this fee under the Plan for Retirement Class shares through September 30, 2013, unless changed with approval of the Board of Trustees.

<sup>2</sup> "Acquired Fund Fees and Expenses" are the Fund's proportionate amount of the expenses of any investment companies or pools in which it invests. These expenses are not paid directly by Fund shareholders. Instead, Fund shareholders bear these expenses indirectly because they reduce Fund performance. Because "Acquired Fund Fees and Expenses" are included in the chart above, the Fund's operating expenses here will not correlate with the expenses included in the Financial Highlights in this Prospectus and the Fund's annual report.

<sup>3</sup> Under the Fund's expense reimbursement arrangements, the Fund's investment adviser, Teachers Advisors, Inc. ("Advisors"), has contractually agreed to reimburse the Fund for any Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions or other transactional expenses, Acquired Fund Fees and Expenses and extraordinary expenses) that exceed: (i) 0.35% of average daily net assets for Retirement Class shares; (ii) 0.25% of average daily net assets for Premier Class shares; and (iii) 0.10% of average daily net assets for Institutional Class shares of the Fund. These expense reimbursement arrangements will continue through at least September 30, 2013, unless changed with approval of the Board of Trustees.

<sup>4</sup> In addition to the expense reimbursement arrangements, Advisors has contractually agreed to waive a portion of the Fund's Management Fees equal to, on an annual basis, 0.03%. This waiver will remain in effect through April 30, 2014, unless changed with approval of the Board of Trustees.

**Example**

This example is intended to help you compare the cost of investing in shares of the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses, before expense reimbursements, remain the same. The example assumes that the Fund's fee waiver and/or expense reimbursement agreement will remain in place through September 30, 2013 but that there will be no waiver or expense reimbursement agreement in effect thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

## PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the fiscal year ended May 31, 2012 the Fund’s portfolio turnover rate was 12% of the average value of its portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund is a “fund of funds” that invests in Institutional Class shares of other funds of the Trust and potentially in other investment pools or investment products (collectively, the “Underlying Funds”). In general, the Fund is designed for investors who have an approximate target retirement year in mind, and the Fund’s investments are adjusted from more aggressive to more conservative over time as the target retirement year approaches and for approximately seven to ten years afterwards. The Fund invests in Underlying Funds according to an asset allocation strategy designed for investors retiring or planning to retire within a few years of 2025. The Fund has a policy of investing at least 80% of its assets (net assets, plus the amount of any borrowings for investment purposes) in Underlying Funds that are managed to seek investment returns that track particular market indices.

The Fund expects to allocate approximately 69.20% of its assets to equity Underlying Funds and 30.80% of its assets to fixed-income Underlying Funds. These allocations represent targets for equity and fixed-income asset classes. Target allocations will change over time and actual allocations may vary up to 10% from the targets. The target allocations along the investment glidepath, illustrated in the chart below, gradually become more conservative, moving to target allocations of approximately 50% equity/50% fixed-income in the Fund’s target retirement year of 2025 and reaching the Fund’s final target allocation of approximately 40% equity/60% fixed-income at some point from 2032 to 2035. Within the equity and fixed-income asset classes, the Fund allocates its investments to particular market sectors (U.S. equity, international equity, fixed-income, and inflation-protected assets) represented by various Underlying Funds. These market sector allocations may vary by up to 10% from the Fund’s target market sector allocations. The Fund’s current target market sector allocations for June 30, 2013, which will change over time, are approximately as

follows: U.S. Equity: 51.90%; International Equity: 17.30%; Fixed-Income: 29.60%; and Inflation-Protected Assets: 1.20%.

The Fund's target market sector allocations to Underlying Funds may include the TIAA-CREF Equity Index Fund (U.S. Equity); International Equity Index Fund and Emerging Markets Equity Index Fund (International Equity); Bond Index Fund (Fixed-Income); and Inflation-Linked Bond Fund (Inflation-Protected Assets).

Additional or replacement Underlying Funds for each market sector, as well as additional or replacement market sectors, may be included when making future allocations if Advisors believes that such Underlying Funds and/or market sectors are appropriate in light of the Fund's desired levels of risk and potential return at the particular time. The Fund's portfolio management team may also add a new market sector if it believes that will help to achieve the Fund's investment objective. The relative allocations among Underlying Funds within a market sector may be changed at any time without notice to shareholders. If 10% or more of a Fund's assets are expected to be invested in any Underlying Fund or market sectors not listed above, shareholders will receive prior notice of such change.

The Fund's asset class allocations, market sector allocations within each asset class, and Underlying Fund allocations within each market sector, as of June 30, 2012, are listed in the chart below. These allocations will change over time.

<b>Asset Class</b>	<b>AllocationMarket Sector</b>	<b>AllocationUnderlying Funds</b>	<b>Allocation</b>
<b>EQUITY</b>	71.68%U.S. Equity	53.49%● Equity Index Fund	53.49%

	Inflation-Protected Assets	0.75%● Inflation-Linked Bond Fund	0.75%
	<b>Total</b>	100.00%	100.00%

The following chart shows how the investment glidepath for the Fund is expected to gradually move the Fund's target allocations over time between the different target market sector allocations. The actual market sector allocations of the Fund may differ from this chart. The Fund seeks to achieve its final target market sector allocations approximately seven to ten years following the target date.

4 Summary Prospectus ■ TIAA-CREF Lifecycle Index 2025 Fund

The Fund is designed to accommodate investors who invest in a fund up to their target retirement date, and plan to make gradual systematic withdrawals in retirement. In addition, investors should note that the Fund will continue to have a significant level of equity exposure up to, through and after its target retirement date, and this exposure could cause significant fluctuations in the value of the Fund depending on the performance of the equity markets generally.

Approximately seven to ten years after the Fund enters its target retirement year, the Board of Trustees may authorize the merger of the Fund into the Lifecycle Index Retirement Income Fund or other similar fund. Fund shareholders will receive prior notice of any such merger. The Lifecycle Index Retirement Income Fund is designed to maintain a relatively stable allocation among the Underlying Funds reflecting the resting point on the glidepath described in the chart above. More detailed information about the Lifecycle Index Retirement Income Fund is contained in the prospectus for that fund.

### PRINCIPAL INVESTMENT RISKS

You could lose money over short or long periods by investing in this Fund. Accordingly, an investment in the Fund, or the Underlying Funds, typically is subject to the following principal investment risks:

- **Asset Allocation Risk**—The risk that the Fund may not achieve its target allocations. In addition, there is the risk that the asset allocations may not achieve the desired risk-return characteristic or that the selection of Underlying Funds and the allocations among them will result in the Fund underperforming other similar funds or cause an investor to lose money.
- **Index Risk**—The risk that the Fund’s performance will not correspond to its benchmark index for any period of time and may underperform such index or the overall stock market. Additionally, to the extent that the Fund’s investments vary from the composition of its benchmark index, the Fund’s performance could potentially vary from the index’s performance to a greater extent than if the Fund merely attempted to replicate the index.

- **Underlying Funds Risk**—The Fund is exposed to the risks of the Underlying Funds in which it invests in direct proportion to the amount of assets the Fund allocates to each Underlying Fund.
  - **Equity Underlying Funds Risks**—The risks of investing in equity Underlying Funds include risks specific to their investment strategies, such as style risk, capitalization risk, and foreign investment risk, among others, as well as risks related to the equity markets in general.
  - **Fixed-Income Underlying Funds Risks**—The risks of investing in fixed-income Underlying Funds include credit risk, interest rate risk, and market volatility, liquidity and valuation risk, among others.
- **Active Management Risk**—The risk that the strategy, investment selection or trading execution of Advisors could cause the Fund or an Underlying Fund to underperform its benchmark index or mutual funds with similar investment objectives.
- **Fund of Funds Risk**—The ability of the Fund to achieve its investment objective will depend in part upon the ability of the Underlying Funds to achieve their investment objectives. There can be no guarantee that any Underlying Fund will achieve its investment objective.

*There can be no assurances that the Fund will achieve its investment objective. You should not consider the Fund to be a complete investment program. Please see the non-summary portion of the prospectus for more detailed information about the risks described above, including the risks of the Underlying Funds.*

## PAST PERFORMANCE

The following chart and table help illustrate some of the risks of investing in the Fund by showing changes in the Fund's performance from year to year. The bar chart shows the annual total returns of the Retirement Class of the Fund, before taxes, in each full calendar year since inception of the class. Because the expenses vary across share classes, the performance of the Retirement Class will vary from the other share classes. Below the bar chart are the best and worst returns for a calendar quarter since inception of the Retirement Class. The performance table following the bar chart shows the Fund's average annual total returns for the Retirement, Institutional and Premier Classes over the one-year, five-year, ten-year and since-inception periods (where applicable) ended December 31, 2011, and how those returns compare to those of a broad-based securities market index and a composite index based on the Fund's target allocations. After-tax performance is shown only for the Retirement Class shares, and after-tax returns for the other Classes of shares will vary from the after-tax returns presented for Retirement Class shares.

The returns shown below reflect previous agreements by Advisors to waive or reimburse the Fund and certain Underlying Funds for certain fees and expenses. Without these waivers and reimbursements, the returns of the Fund would have been lower. Past performance of the Fund (before and after taxes) is not necessarily an indication of how it will perform in the future. The indices

listed below are unmanaged, and you cannot invest directly in an index. The returns for the indices reflect no deduction for fees, expenses or taxes.

For current performance information of each share class, including performance to the most recent month-end, please visit [www.tiaa-cref.org](http://www.tiaa-cref.org).

<sup>†</sup> Performance is calculated from the inception date of the Retirement Class.

<sup>‡</sup> As of the close of business on December 31, 2011, the Lifecycle Index 2025 Fund Composite Index consisted of: 53.7% Russell 3000 Index; 27.8% Barclays U.S. Aggregate Bond Index; 17.9% MSCI EAFE + Emerging Markets Index; and 0.6% Barclays U.S. Treasury Inflation Protected Securities Index (Series-L). The Fund's composite benchmark, the components that make up a composite benchmark and the method of calculating a composite benchmark's performance may vary over time.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates in effect during the periods shown and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(a), 401(k) or 403(b) plans or Individual Retirement Accounts (IRAs). After-tax returns are shown for only one class, and after-tax returns for other classes will vary.

accounts. Institutional Class shares are available for purchase directly from the Fund by certain eligible investors or through financial intermediaries.

- There is no minimum initial or subsequent investment for Retirement Class shares. Retirement Class shares are primarily offered through employer-sponsored employee benefit plans.
- There is a \$100 million aggregate plan size and \$5 million initial minimum plan-level investment requirement for Premier Class shares. Premier Class shares are primarily offered through certain financial intermediaries and employer-sponsored employee benefit plans.
- The minimum initial investment is \$2 million and the minimum subsequent investment is \$1,000 for Institutional Class shares, unless an investor purchases shares by or through financial intermediaries that have entered into an appropriate agreement with the Fund or its affiliates.

**Redeeming or Exchanging Shares.** You can redeem (sell) or exchange your shares of the Fund on any business day. Exchanges may be made for shares of the same share class of other funds offered by the Trust. If your shares are held through a third party, please contact that entity for applicable redemption or exchange requirements. If your shares are held directly with the Fund, contact the Fund directly in writing or by telephone.

#### **TAX INFORMATION**

The Fund intends to make distributions to shareholders that may be taxed as ordinary income or capital gains. Distributions made to tax-exempt shareholders or shareholders who hold Fund shares in a tax-deferred account are generally not subject to income tax in the current year, but redemptions made from tax-deferred accounts may be subject to income tax.

#### **PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARY COMPENSATION**

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or its related companies may pay the intermediary for the sale of Fund shares and related services or for other investor services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
