Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, statement of additional information and other information about the Fund online at [franklintempleton.com/ftviptfunds](http://franklintempleton.com/ftviptfunds). You can also get this information at no cost by calling 1-888-FRANKLIN or by sending an e-mail request to [FTVIPTprospectus@franklintempleton.com](mailto:FTVIPTprospectus@franklintempleton.com). The Fund's prospectus and statement of additional information, both dated May 1, 2012, as may be amended from time to time, are incorporated by reference into this Summary prospectus, which means that they are legally a part of this Summary prospectus. Shares of the insurance funds of Franklin Templeton Variable Insurance Products Trust are not offered to the public; they are offered and sold only to: (1) insurance company separate accounts to serve as the underlying investment vehicles for variable contracts; (2) certain qualified plans; and (3) other mutual funds (fund of funds). This Summary prospectus is not intended for use by other investors. Please check with your insurance company for availability. Please read this Summary prospectus together with your variable annuity or variable life insurance product prospectus.

Franklin Templeton Variable Insurance Products Trust | Class 2

SUMMARY PROSPECTUS

## TEMPLETON GROWTH SECURITIES FUND

FRANKLIN TEMPLETON  
INVESTMENTS

Franklin • Templeton • Mutual Series

### Investment Goal

Long-term capital growth.

### Fees and Expenses of the Fund

These tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. **The tables and the example do not include any fees or sales charges imposed by variable insurance contracts, qualified retirement plans or other mutual funds.** If they were included, your costs would be higher.

### SHAREHOLDER FEES *(fees paid directly from your investment)*

	Class 2
Maximum Sales Charge (Load) Imposed on Purchases	N/A

### ANNUAL FUND OPERATING EXPENSES *(expenses that you pay each year as a percentage of the value of your investment)*

	Class 2
Management fees	0.74%
Distribution and service (12b-1) fees	0.25%

Other expenses	0.04%
<b>Total annual Fund operating expenses</b>	<b>1.03%</b>

### Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of the period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
<b>Class 2</b>	\$ 105	\$ 328	\$ 569	\$ 1,259

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 42.13% of the average value of its portfolio.

### Principal Investment Strategies

Under normal market conditions, the Fund invests primarily in the equity securities of companies located anywhere in the world, including emerging markets. The equity securities in which the Fund primarily invests are common stock. Although the Fund seeks investments across a number of countries and sectors, from time to time, based on economic conditions, the Fund may have significant positions in particular countries or sectors.

In addition to the Fund's main investments, depending upon current market conditions, the Fund may invest up to 25% of its total assets in debt securities of companies and governments located anywhere in the world.

When choosing equity investments for the Fund, the investment manager applies a "bottom-up," value-oriented, long-term approach, focusing on the market price of a company's securities relative to the investment manager's evaluation of the company's long-term earnings, asset value and cash flow potential. The investment manager also considers a company's price/earnings ratio, price/cash flow ratio, profit margins and liquidation value.

### Principal Risks

You could lose money by investing in the Fund. Mutual fund shares are not deposits or obligations of, or guaranteed or endorsed by, any bank, and are not insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other agency of the U.S. government.

**Market** The market values of securities owned by the Fund will go up and down, sometimes rapidly or unpredictably. A security's market value may be reduced by market activity or other results of supply and demand unrelated to the issuer. This is a basic risk associated with all securities. When there are more sellers than buyers, prices tend to fall. Likewise, when there are more buyers than sellers, prices tend to rise. Individual stock prices tend to go up and down more dramatically than those of other types of investments. A slower-growth or recessionary economic environment could have an adverse effect on the price of the various stocks held by the Fund.

**Foreign Securities** Investing in foreign securities typically involves more risks than investing in U.S. securities, and includes risks associated with: political and economic developments - the political, economic and social structures of some foreign countries may be less stable and more volatile than those in the U.S.; trading practices - government supervision and regulation of foreign securities and currency markets, trading systems and brokers may be less than in the U.S.; availability of information - foreign issuers may not be subject to the same disclosure, accounting and financial reporting standards and practices as U.S. issuers; limited markets - the securities of certain foreign issuers may be less liquid (harder to sell) and more volatile; and currency exchange rate fluctuations and policies. The risks of foreign investments may be greater in developing or emerging market countries.

**Value Style Investing** A value stock may not increase in price as anticipated by the investment manager if other investors fail to recognize the company's value and bid up the price, the markets favor faster-growing companies, or the factors that the investment manager believes will increase the price of the security do not occur.

**Management** The Fund is subject to management risk because it is an actively managed investment portfolio. The Fund's investment manager applies investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired results.

**Focus** To the extent that the Fund focuses on particular countries, regions, industries, sectors or types of investment from time to time, the Fund may be subject to greater risks of adverse developments in such areas of focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments.

**Interest Rate** When interest rates rise, debt security prices generally fall. The opposite is also generally true: debt security prices rise when interest rates fall. In general, securities with longer maturities are more sensitive to these interest rate changes.

**Credit** An issuer of debt securities may fail to make interest payments and repay principal when due, in whole or in part. Changes in an issuer's financial strength or in a security's credit rating may affect a security's value.

### Performance

The following bar chart and table provide some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance from year to year for Class 2 shares. The table shows how the Fund's average annual returns for 1 year, 5 years, 10 years or since inception, as applicable, compare with those of a broad measure of market performance. Updated performance information is available at: <https://www.franklintempleton.com/retail/app/product/views/FTVIPFunds.jsf>. The Fund's past performance is not necessarily an indication of how the Fund will perform in the future.

The inclusion of the MSCI All Country World Index shows how the Fund's performance compares to a group of securities in an additional leading equity index.

Performance reflects all Fund expenses but does not include any fees or sales charges imposed by variable insurance contracts, qualified plans or other mutual funds. If they had been included, the returns shown below would be lower. Investors should consult the variable insurance contract prospectus, or the disclosure documents for qualified plans or mutual funds for more information.

## ANNUAL TOTAL RETURNS

Best Quarter:	Q2'03	20.77%
Worst Quarter:	Q4'08	-21.61%
As of March 31, 2012, the Fund's year-to-date return was 11.47%.		

## AVERAGE ANNUAL TOTAL RETURNS

For the periods ended December 31, 2011

	1 Year	5 Years	10 Years
<b>Templeton Growth Securities Fund - Class 2</b>	-6.97%	-5.02%	2.51%
MSCI World Index (index reflects no deduction for fees, expenses or taxes)	-5.02%	-1.82%	4.15%
MSCI All Country World Index (index reflects no deduction for fees, expenses or taxes)	-6.86%	-1.41%	4.76%

### Investment Manager

Templeton Global Advisors Limited (Global Advisors)

### Portfolio Managers

**NORMAN BOERSMA, CFA** *President and Director of Global Advisors and portfolio manager of the Fund since 2011.*  
**LISA F. MYERS, J.D., CFA** *Executive Vice President of Global Advisors and portfolio manager of the Fund since 2010.*  
**MATTHEW R. NAGLE, CFA** *Senior Vice President of Global Advisors and portfolio manager of the Fund since 2010.*  
**JAMES HARPER, CFA** *Senior Vice President of Global Advisors and portfolio manager of the Fund since 2010.*

### Purchase and Sale of Fund Shares

Shares of the Fund are sold to insurance companies' separate accounts (Insurers) to fund variable annuity or variable life insurance contracts and to qualified plans. Insurance companies offer variable annuity and variable life insurance products through separate accounts. Shares of the Fund may also be sold to other mutual funds, either as underlying funds in a fund of funds or in other structures. In periods of market volatility, Fund assets may decline significantly, causing total annual fund operating expenses to become higher than the numbers shown in the fees and expenses table above. In addition, Fund shares are held by a limited number of Insurers and, when applicable, funds of funds. Substantial withdrawals by one or more Insurers, qualified retirement plans or funds of funds could reduce Fund assets, causing total Fund expenses to become higher than the numbers shown in the fees and expenses table above.

The terms of the offering of interests in separate accounts are included in the variable annuity or variable life insurance product prospectus. The terms of offerings of funds of funds and feeder funds are included in those funds' prospectuses. Investors should consult the variable contract prospectus, disclosure document or fund of funds prospectus for more information on fees and expenses imposed by variable insurance contracts, qualified retirement plans or investment companies.

### Taxes

Because shares of the Fund are generally purchased through variable annuity contracts or variable life insurance contracts, the Fund's distributions (which the Fund expects, based on its investment objectives and strategies to consist of ordinary income, capital gains or some combination of both) will be exempt from current taxation if left to accumulate within the variable contract. You should refer to your contract prospectus for more information on these tax consequences.

### Payments to Sponsoring Insurance

### Companies and Other Financial Intermediaries

The Fund or its distributor (and related companies) may pay broker/dealers or other financial intermediaries (such as banks and insurance companies, or their related companies) for the sale and retention of variable contracts which offer Fund shares and/or for other services. These payments may create a conflict of interest for a financial intermediary, or be a factor in the insurance company's decision to include the Fund as an investment option in its variable contract. For more information, ask your financial advisor, visit your financial intermediary's website, or consult the variable insurance contract prospectus or this Fund's prospectus.
