Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, statement of additional information and other information about the Fund online at franklintempleton.com/ftviptfunds. You can also get this information at no cost by calling 1-888-FRANKLIN or by sending an e-mail request to FTVIPTprospectus@franklintempleton.com. The Fund's prospectus and statement of additional information, both dated May 1, 2012, as may be amended from time to time, are incorporated by reference into this Summary prospectus, which means that they are legally a part of this Summary prospectus. Shares of the insurance funds of Franklin Templeton Variable Insurance Products Trust are not offered to the public; they are offered and sold only to: (1) insurance company separate accounts to serve as the underlying investment vehicles for variable contracts; (2) certain qualified plans; and (3) other mutual funds (fund of funds). This Summary prospectus is not intended for use by other investors. Please check with your insurance company for availability. Please read this Summary prospectus together with your variable annuity or variable life insurance product prospectus.

Franklin Templeton Variable Insurance Products Trust | Class 2

SUMMARY PROSPECTUS

FRANKLIN RISING DIVIDENDS SECURITIES FUND

Franklin • Templeton • Mutual Series

Investment Goal

Long-term capital appreciation. Preservation of capital, while not a goal, is also an important consideration.

Fees and Expenses of the Fund

These tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. **The tables and the example do not include any fees or sales charges imposed by variable insurance contracts, qualified retirement plans or other mutual funds.** If they were included, your costs would be higher.

SHAREHOLDER FEES *(fees paid directly from your investment)*

	Class 2
Maximum Sales Charge (Load) Imposed on Purchases	N/A

ANNUAL FUND OPERATING EXPENSES *(expenses that you pay each year as a percentage of the value of your investment)*

	Class 2
Management fees	0.62%
Distribution and service (12b-1) fees	0.25%

Other expenses	0.02%
Acquired fund fees and expenses ¹	0.01%
Total annual Fund operating expenses	0.90%
Fee waiver and/or expense reimbursement ²	-0.01%
Total annual Fund operating expenses after fee waiver and/or expense reimbursement¹	0.89%

1. Total annual Fund operating expenses differ from the ratio of expenses to average net assets shown in the Financial Highlights, which reflect the operating expenses of the Fund and do not include acquired fund fees and expenses.

2. The investment manager has contractually agreed in advance to reduce its fee as a result of the Fund's investment in a Franklin Templeton money fund (acquired fund) for at least the next 12-month period. Contractual fee waiver and/or expense reimbursement agreements may not be terminated during the term set forth above.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of the period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example reflects adjustments made to the Fund's operating expenses due to the fee waiver and/or expense reimbursement by the investment manager and/or administrator for the 1 Year numbers only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class 2	\$ 91	\$ 286	\$ 498	\$ 1,107

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 12.76% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of financially sound companies that have paid consistently rising dividends. The Fund invests predominantly in equity securities, mostly common stocks. Companies that have paid consistently rising dividends include those companies that currently pay dividends on their common stocks and have maintained or increased their dividend rate during the last four consecutive years.

Under normal market conditions, the Fund invests at least 65% of its net assets in securities of companies that have:

- consistently increased dividends in at least 8 out of the last 10 years and have not decreased dividends during that time;
- increased dividends substantially (at least 100%) over the last 10 years;
- reinvested earnings, paying out less than 65% of current earnings in dividends;
- either long-term debt that is no more than 50% of total capitalization or senior debt that has been rated investment grade by at least one of the major bond rating organizations; and
- attractive prices, either: (1) in the lower half of the stock's price/earnings ratio range for the past 10 years; or (2) less than price/earnings ratio of the Standard & Poor's[®] 500 Stock Index.

The Fund typically invests the rest of its assets in equity securities of companies that pay dividends but do not meet all of these criteria. The Fund may invest in companies of any size, across the entire market spectrum including smaller and midsize companies. Although the investment manager searches for investments that it believes to meet the criteria across all sectors, from time to time, based on economic conditions, the Fund may have significant positions in particular sectors.

The investment manager is a research driven, fundamental investor. As a "bottom-up" investor focusing primarily on individual securities, the investment manager looks for companies that it believes meet the criteria above and are fundamentally sound and attempts to acquire them at attractive prices. In following these criteria, the Fund does not necessarily focus on companies whose securities pay a high dividend rate but rather on companies that consistently increase their dividends.

The Fund may invest up to 25% of its total assets in foreign securities.

Principal Risks

You could lose money by investing in the Fund. Mutual fund shares are not deposits or obligations of, or guaranteed or endorsed by, any bank, and are not insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other agency of the U.S. government.

Market The market values of securities owned by the Fund will go up and down, sometimes rapidly or unpredictably. A security's market value may be reduced by market activity or other results of supply and demand unrelated to the issuer. This is a basic risk associated with all securities.

When there are more sellers than buyers, prices tend to fall. Likewise, when there are more buyers than sellers, prices tend to rise.

Individual stock prices tend to go up and down more dramatically than those of other types of investments. A slower-growth or recessionary economic environment could have an adverse effect on the price of the various stocks held by the Fund.

Smaller and Midsize Companies Securities issued by smaller and midsize companies may be more volatile in price than those of larger companies, involve substantial risks and should be considered speculative. Such risks may include greater sensitivity to economic conditions, less certain growth prospects, lack of depth of management and funds for growth and development and limited or less developed product lines and

markets. In addition, smaller and midsize companies may be particularly affected by interest rate increases, as they may find it more difficult to borrow money to continue or expand operations, or may have difficulty in repaying any loans.

Focus To the extent that the Fund focuses on particular countries, regions, industries, sectors or types of investment from time to time, the Fund may be subject to greater risks of adverse developments in such areas of focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments.

Foreign Securities Investing in foreign securities typically involves more risks than investing in U.S. securities, including risks related to currency exchange rates and policies, country or government specific issues, less favorable trading practices or regulation and greater price volatility. Certain of these risks also may apply to securities of U.S. companies with significant foreign operations.

Management The Fund is subject to management risk because it is an actively managed investment portfolio. The Fund's investment manager applies investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired results.

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance from year to year for Class 2 shares. The table shows how the Fund's average annual returns for 1 year, 5 years, 10 years or since inception, as applicable, compare with those of a broad measure of market performance. Updated performance information is available at: <https://www.franklintempleton.com/retail/app/product/views/FTVIPFunds.jsf>. The Fund's past performance is not necessarily an indication of how the Fund will perform in the future.

Performance reflects all Fund expenses but does not include any fees or sales charges imposed by variable insurance contracts, qualified plans or other mutual funds. If they had been included, the returns shown below would be lower. Investors should consult the variable insurance contract prospectus, or the disclosure documents for qualified plans or mutual funds for more information.

ANNUAL TOTAL RETURNS

Best Quarter:	Q2'09	14.19%
Worst Quarter:	Q4'08	-15.62%
As of March 31, 2012, the Fund's year-to-date return was 7.33%.		

AVERAGE ANNUAL TOTAL RETURNS

For the periods ended December 31, 2011

	1 Year	5 Years	10 Years
Franklin Rising Dividends Securities Fund - Class 2	6.00%	1.26%	5.79%
S&P 500® Index (index reflects no deduction for fees, expenses or taxes)	2.11%	-0.25%	2.92%

Investment Manager

Franklin Advisory Services, LLC (Advisory Services)

Portfolio Managers

DONALD G. TAYLOR, CPA Senior Vice President of Advisory Services and portfolio manager of the Fund since 1996.

BRUCE C. BAUGHMAN, CPA Senior Vice President of Advisory Services and portfolio manager of the Fund since inception (1992).

WILLIAM J. LIPPMAN President of Advisory Services and portfolio manager of the Fund since inception (1992).

MARGARET MCGEE Vice President of Advisory Services and portfolio manager of the Fund since inception (1992).

Purchase and Sale of Fund Shares

Shares of the Fund are sold to insurance companies' separate accounts (Insurers) to fund variable annuity or variable life insurance contracts and to qualified plans. Insurance companies offer variable annuity and variable life insurance products through separate accounts. Shares of the Fund may also be sold to other mutual funds, either as underlying funds in a fund of funds or in other structures. In periods of market volatility, Fund assets may decline significantly, causing total annual fund operating expenses to become higher than the numbers shown in the fees and expenses table above. In addition, Fund shares are held by a limited number of Insurers and, when applicable, funds of funds. Substantial withdrawals by one or more Insurers, qualified retirement plans or funds of funds could reduce Fund assets, causing total Fund expenses to become higher than the numbers shown in the fees and expenses table above.

The terms of the offering of interests in separate accounts are included in the variable annuity or variable life insurance product prospectus. The terms of offerings of funds of funds and feeder funds are included in those funds' prospectuses. Investors should consult the variable contract prospectus, disclosure document or fund of funds prospectus for more information on fees and expenses imposed by variable insurance contracts, qualified retirement plans or investment companies.

Taxes

Because shares of the Fund are generally purchased through variable annuity contracts or variable life insurance contracts, the Fund's distributions (which the Fund expects, based on its investment objectives and strategies to consist of ordinary income, capital gains or some combination of both) will be exempt from current taxation if left to accumulate within the variable contract. You should refer to your contract prospectus for more information on these tax consequences.

Payments to Sponsoring Insurance

Companies and Other Financial Intermediaries

The Fund or its distributor (and related companies) may pay broker/dealers or other financial intermediaries (such as banks and insurance companies, or their related companies) for the sale and retention of variable contracts which offer Fund shares and/or for other services. These payments may create a conflict of interest for a financial intermediary, or be a factor in the insurance company's decision to include the Fund as an investment option in its variable contract. For more information, ask your financial advisor, visit your financial intermediary's website, or consult the variable insurance contract prospectus or this Fund's prospectus.
