Royal Bank of Canada

Royal Bank of Canada is offering Reverse Convertible Notes linked to the common stock of Peabody Energy Corporation ("RevCons" or the "Notes"). The RevCons will not constitute deposits insured by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation (the "FDIC") or any other Canadian or U.S. government agency or instrumentality.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined that this pricing supplement is truthful or complete. Any representation to the contrary is a criminal offense.

In addition, RBC Capital Markets, LLC or another of our affiliates may use this pricing supplement in a market-making transaction in the RevCons after their initial sale. ***Unless we or our agent informs the purchaser otherwise in the confirmation of sale, this pricing supplement is being used in a market-making transaction.***

HYPOTHETICAL EXAMPLES OF AMOUNTS PAYABLE AT MATURITY

The examples set forth below are provided for illustration purposes only. The assumptions in each of the examples are purely hypothetical and do not relate to the actual performance of the Reference Stock. The hypothetical terms do not purport to be representative of every possible scenario concerning increases or decreases in the price of the Reference Stock on the Valuation Date relative to its price on the Pricing Date. We cannot predict the actual performance of the Reference Stock.

The table below illustrates the Payment at Maturity of the Notes (excluding the final Coupon), given the Initial Stock Price of \$26.26, the Barrier Price of \$21.01 and an initial investment of \$1,000. Hypothetical Final Stock Prices are shown in the first column on the left. For this purpose, we have assumed that there will be no anti-dilution adjustments to the Final Stock Price and no market disruption events. The second column shows the Payment at Maturity (as a percentage of the principal amount) in a case where the market price of the Reference Stock does not fall below the Barrier Price at any time during the Monitoring Period. The third column shows the Payment at Maturity (as a percentage of the principal amount) in a case where the market price of the Reference Stock does fall below the Barrier Price during the Monitoring Period. The fourth column shows the Physical Delivery Amount as a number of shares of the Reference Stock. The fifth column shows the Cash Delivery Amount, should we elect to deliver the Cash Delivery Amount instead of the Physical Delivery Amount.

Hypothetical Final Stock Price	If the closing market price of the Reference Stock does <u>not</u> fall below the Barrier Price on any day during the Monitoring Period: Payment at Maturity as Percentage of Principal Amount	If the closing market price of the Reference Stock falls below the Barrier Price on any day during the Monitoring Period: Payment at Maturity as Percentage of Principal Amount	Physical Delivery Amount as Number of Shares of the Reference Stock	Cash Delivery Amount
\$52.52	100.00%	100.00%	n/a	n/a
\$45.96	100.00%	100.00%	n/a	n/a
\$39.39	100.00%	100.00%	n/a	n/a
\$32.83	100.00%	100.00%	n/a	n/a

\$24.95	100.00%	Physical or Cash Delivery Amount	38.08	\$950.00
\$22.32	100.00%	Physical or Cash Delivery Amount	38.08	\$850.00
\$21.01	100.00%	Physical or Cash Delivery Amount	38.08	\$800.00

\$15.76	n/a	Physical or Cash Delivery Amount	38.08	\$600.00
\$13.13	n/a	Physical or Cash Delivery Amount	38.08	\$500.00
\$6.57	n/a	Physical or Cash Delivery Amount	38.08	\$250.00
\$0	n/a	Physical or Cash Delivery Amount	38.18	\$0

The Payments at Maturity shown above are entirely hypothetical; they are based on market prices for the Reference Stock that may not be achieved on the Valuation Date and on assumptions that may prove to be erroneous. The actual market value of your Notes on the Maturity Date or at any other time, including any time you may wish to sell your Notes, may bear little relation to the hypothetical Payments at Maturity shown above, and those amounts should not be viewed as an indication of the financial return on an investment in the Notes or on an investment in the Reference Stock. Please read "Additional Risk Factors Specific to Your Notes" and "Hypothetical Returns on Your Notes" in the accompanying product prospectus supplement.

Payments on your Notes are economically equivalent to the amounts that would be paid on a combination of other instruments. For example, payments on your Notes are economically equivalent to the amounts that would be paid on a combination of an interest-bearing bond purchased, and an option sold, by the investor (with an implicit option premium paid over time to the investor). The discussion in this paragraph does not modify or affect the terms of the offered Notes or the United States or Canadian income tax treatment of the offered Notes as described under “Supplemental Discussion of Canadian Tax Consequences” and “Supplemental Discussion of U.S. Federal Income Tax Consequences” in the accompanying product prospectus supplement.

SELECTED RISK CONSIDERATIONS

An investment in the Notes involves significant risks. Investing in the Notes is not equivalent to investing directly in the Reference Stock. These risks are explained in more detail in the section “Additional Risk Factors Specific to Your Notes” in the product prospectus supplement. In addition to the risks described in the prospectus supplement and the product prospectus supplement, you should consider the following:

- **Principal at Risk** — Investors in the Notes could lose some or a substantial value of their principal amount if there is a decline in the trading price of the Reference Stock between the pricing date and the valuation date. The rate of interest payable on the Notes, which will be payable for less than one year, may not be sufficient to compensate for any such loss.
- **Market Disruption Events and Adjustments** —The payment at maturity and the valuation date are subject to adjustment as described in the product prospectus supplement. For a description of what constitutes a market disruption event as well as the consequences of that market disruption event, see “General Terms of the Notes—Consequences of Market Disruption Events” in the product prospectus supplement.
- **The Inclusion in the Purchase Price of the Notes of a Selling Concession and of Royal Bank’s Cost of Hedging its Market Risk under the Notes Will Adversely Affect the Value of the Notes Prior to Maturity** — The price at which you purchase of the Notes includes a selling concession (including a broker’s commission), as well as the costs that Royal Bank (or one of its affiliates) expects to incur in the hedging of its market risk under the Notes. Such hedging costs include the expected cost of undertaking this hedge, as well as the profit that Royal Bank (or its affiliates) expects to realize in consideration for assuming the risks inherent in providing such hedge. As a result, assuming no change in market conditions or any other relevant factors, the price, if any, at which you may be able to sell your Notes prior to maturity may be less than your original purchase price. The Notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Notes to maturity.
