AllianzGI NFJ Emerging Markets Value Fund

Before you invest, you may want to review the Fund's statutory prospectus, which contains more information about the Fund and its risks. You can find the Fund's statutory prospectus and other information about the Fund, including its statement of additional information (SAI) and most recent reports to shareholders, online at www.allianzinvestors.com/prospectuses. You can also get this information at no cost by calling 1-800-498-5413 or by sending an email request to Orders@MySummaryProspectus.com. This Summary Prospectus incorporates by reference the Fund's entire statutory prospectus and SAI, each dated April 2, 2012, as revised or supplemented from time to time.

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Share Class	Management Fees	Distribution and/or Service (12b-1) Fees	Estimated Other Expenses ⁽¹⁾	Total Annual Fund Operating Expenses	Expense Reductions ⁽²⁾	Total Annual Fund Operating Expenses After Expense Reductions ⁽²⁾
Institutional	1.00%	None	12.11%	13.11%	(11.81)%	1.30%
Class P	1.00	None	12.21	13.21	(11.81)	1.40
Class D	1.00	0.25 %	12.11	13.36	(11.81)	1.55

⁽¹⁾ Other Expenses are based upon estimated amounts for the Fund's initial fiscal year ending November 30, 2013 and include organizational expenses.

Total Annual Fund Operating Expenses After Expense Reductions reflect the effect of a contractual agreement by the Manager to waive, through December 31, 2013, its management fee and/or reimburse the Fund to the extent that Total Annual Fund Operating Expenses, including payment of organizational expenses but excluding interest, taxes, extraordinary expenses, and certain credits and other expenses, exceed 1.30% for Institutional Class, 1.40% for Class P and 1.55% for Class D shares. Under the Expense Limitation Agreement, the Manager may recoup waived or reimbursed amounts until November 30, 2017, provided total expenses, including such recoupment, do not exceed the annual expenses limit.

Examples. The Examples are intended to help you compare the cost of investing in shares of the Fund with the costs of investing in other mutual funds. The Examples assume that you invest \$10,000 in the noted class of shares for the time periods indicated, your investment has a 5% return each year, and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, the Examples show what your costs would be based on these assumptions. The Examples are based, for the first year, on Total Annual Fund Operating Expenses After Expense Reductions and, for all other periods, on Total Annual Fund Operating Expenses.

Share Class	1 Year	3 Years
Institutional	\$132	\$1,892
Class P	143	1,919
Class D	158	1,959

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). High levels of portfolio turnover may indicate higher transaction costs and may result in higher taxes for you if your Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Examples above, can adversely affect the Fund's investment performance.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by normally investing at least 80% of its net assets (plus borrowings made for investment purposes) in equity securities of companies that are domiciled in or tied economically to countries with emerging securities markets—that is, countries with securities markets which are, in the opinion of the portfolio managers, less sophisticated than

more developed markets in terms of participation by investors, analyst coverage, liquidity and regulation. The Fund may achieve its exposure to non-U.S. equity securities in several ways, including through investing in American Depositary Receipts (ADRs) and other depositary receipts, in addition to direct investments in the securities of non-U.S. issuers. The Fund may also utilize foreign currency

exchange contracts, options, stock index futures contracts and other derivative instruments, as well as access products such as participatory notes. Although the Fund does not expect to invest significantly in foreign currency exchange contracts, options, stock index futures contracts and other derivative instruments, it may do so at any time.

In selecting investments for the Fund, the portfolio managers use a value investing style focusing on equity securities of companies whose securities the portfolio managers believe have low valuations, including smaller capitalization securities and real estate investment trusts (REITs). The portfolio managers partition the Fund's initial selection universe of non-U.S. and U.S. companies for dividend-paying

value opportunities across the emerging markets to determine potential holdings for the Fund representing broad diversification by sector, industry, country and issue. The portfolio managers use quantitative factors to screen the Fund's selection universe, analyzing factors such as price-to-earnings ratios (*i.e.*, share price relative to a company's earnings), dividend yield, price-to-book ratios (*i.e.*, share price relative to a company's balance sheet value), price-to-cash-flow ratios (*i.e.*, share price relative to a company's cash flow). After still further narrowing the universe through a combination of qualitative analysis and fundamental research, the portfolio managers select securities for the Fund.

Principal Risks

The Fund's net asset value, yield and total return will be affected by the allocation determinations, investment decisions and techniques of the Fund's management, factors specific to the issuers of securities and other instruments in which the Fund invests, including actual or perceived changes in the financial condition or business prospects of such issuers, and factors influencing the U.S. or global economies and securities markets or relevant industries or sectors within them (**Management Risk, Issuer Risk, Market Risk**). Equity securities may react more strongly to changes in an issuer's financial condition or prospects than other securities of the same issuer, and securities issued by smaller companies may be more volatile and present increased liquidity risk (**Equity Securities Risk, Smaller Company Risk**). Non-U.S. securities markets and issuers may be more volatile, smaller, less-liquid, less transparent and subject to less oversight, particularly in emerging markets, and non-U.S. securities values may

also fluctuate with currency exchange rates (**Non-U.S. Investment Risk, Emerging Markets Risk, Currency Risk**). Other principal risks include: **Credit Risk** (an issuer or counterparty may default on obligations); **Liquidity Risk** (the lack of an active market for investments may cause delay in disposition or force a sale below fair value); **REIT Risk** (adverse changes in the real estate markets may affect the value of REIT investments); and **Turnover Risk** (high levels of portfolio turnover increase transaction costs and taxes and may lower investment performance). Please see "Summary of Principal Risks" in the Fund's statutory prospectus for a more detailed description of the Fund's risks. It is possible to lose money on an investment in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Performance Information

Performance information for the Fund will be available after the Fund completes a full calendar year of operation.
