(formerly Allianz NFJ Global Dividend Value Fund)

Before you invest, you may want to review the Fund's statutory prospectus, which contains more information about the Fund and its risks. You can find the Fund's statutory prospectus and other information about the Fund, including its statement of additional information (SAI) and most recent reports to shareholders, online at [www.allianzinvestors.com/prospectuses](http://www.allianzinvestors.com/prospectuses). You can also get this information at no cost by calling 1-800-498-5413 or by sending an email request to [Orders@MySummaryProspectus.com](mailto:Orders@MySummaryProspectus.com). This Summary Prospectus incorporates by reference the Fund's entire statutory prospectus and SAI, each dated April 2, 2012, as revised or supplemented from time to time.

## Investment Objective

The Fund seeks long-term growth of capital and income.

## Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund.

**Shareholder Fees (fees paid directly from your investment):** None

**Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)**

Share Class	Management Fees	Distribution and/or Service (12b-1) Fees	Other Expenses	Total Annual Fund Operating Expenses	Expense Reductions(1)	Total Annual Fund Operating Expenses After Expense Reductions(1)
Institutional	0.80%	None	0.83%	1.63%	(0.68)%	0.95%
Class P	0.80	None	1.14	1.94	(0.89)	1.05
Class D	0.80	0.25 %	2.64	3.69	(2.39)	1.30

Total Annual Fund Operating Expenses After Expense Reductions reflect the effect of a contractual agreement by the Manager to irrevocably waive its management fee and/or reimburse the Fund through March 31, 2013, to the extent that Total Annual Fund Operating Expenses, (1) excluding interest, tax, and extraordinary expenses, and certain credits and other expenses, exceed 0.95% for Institutional Class shares, 1.05% for Class P shares and 1.30% for Class D shares. Under the Expense Limitation Agreement, the Manager may recoup waived or reimbursed amounts for three years, provided total expenses, including such recoupment, do not exceed the annual expense limit.

**Examples.** The Examples are intended to help you compare the cost of investing in shares of the Fund with the costs of investing in other mutual funds. The Examples assume that you invest \$10,000 in the noted class of shares for the time periods indicated, your investment has a 5% return each year, and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, the Examples show what your costs would be based on these assumptions. The Examples are based, for the first year, on Total Annual Fund Operating Expenses After Expense Reductions and, for all other periods, on Total Annual Fund Operating Expenses.

Share Class	1 Year	3 Years	5 Years	10 Years
Institutional	\$97	\$448	\$822	\$1,876
Class P	107	523	964	2,192
Class D	132	908	1,704	3,786

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). The Fund's portfolio turnover rate for the fiscal year ended November 30, 2011 was 66% of the average value of its portfolio. High levels of portfolio turnover may indicate higher transaction costs and may result in higher taxes for you if your Fund shares are

held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Examples above, can adversely affect the Fund' s investment performance.

## Principal Investment Strategies

The Fund seeks to achieve its objective by normally investing primarily in common stocks of U.S. and non-U.S. companies with market capitalizations in excess of \$1 billion. Under

normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings made for investment purposes) in common stocks and other equity securities of companies that pay or are expected to pay dividends. The Fund normally invests at least 40% of its total assets in

non-U.S. securities (directly or through depositary receipts) and at least 25% of its total assets in U.S. securities, and allocates its investments across at least three different

countries (including the U.S.). The Fund normally invests no more than 30% of its total assets in emerging market securities. The portfolio managers focus on securities of companies that they believe have low valuations and they use quantitative factors to screen the Fund' s initial selection

The portfolio managers classify this universe by industry (without regard to geographic concentration) in order to determine potential holdings representing a broad range of industry groups. Within each industry group, the portfolio managers further narrow the universe by analyzing factors such as price-to-earnings ratios (*i.e.*, share price relative to a company's earnings), dividend yield, price-to-book ratios (*i.e.*, share price relative to a company's balance sheet value), price-to-cash-flow ratios (*i.e.*, share price relative to a company's cash flow) and price momentum (*i.e.*, changes in security price relative to changes in overall market prices).

The Fund's net asset value, yield and total return will be affected by the allocation determinations, investment decisions and techniques of the Fund's management, factors specific to the issuers of securities and other instruments in which the Fund invests, including actual or perceived changes in the financial condition or business prospects of such issuers, and factors influencing the U.S. or global economies and securities markets or relevant industries or sectors within them (**Management Risk, Issuer Risk, Market Risk**). Equity securities may react more strongly to changes in an issuer's financial condition or prospects than other securities of the same issuer, and securities issued by smaller companies may be more volatile and present increased liquidity risk (**Equity Securities Risk, Smaller Company Risk**). Non-U.S. securities markets and issuers may be more volatile, smaller, less-liquid, less transparent and subject to less oversight, particularly in emerging markets, and non-U.S. securities values may also fluctuate with currency exchange rates (**Non-U.S. Investment Risk, Emerging Markets Risk, Currency Risk**). Other principal risks include: **Credit Risk** (an issuer or counterparty may default on

In addition to common stocks and other equity securities (such as preferred stocks, convertible securities and warrants), the Fund may invest in real estate investment trusts (REITs), and may utilize foreign currency exchange contracts, options, stock index futures contracts and other derivative instruments. Although the Fund did not invest significantly in derivative instruments as of the most recent fiscal year end, it may do so at any time.

obligations); **Derivatives Risk** (derivative instruments are complex, have different characteristics than their underlying assets and are subject to additional risks, including leverage, liquidity and valuation); **Focused Investment Risk** (focusing on a limited number of issuers, sectors, industries or geographic regions increases risk and volatility); **Leveraging Risk** (instruments and transactions that constitute leverage magnify gains or losses and increase volatility); **Liquidity Risk** (the lack of an active market for investments may cause delay in disposition or force a sale below fair value); **REIT Risk** (adverse changes in the real estate markets may affect the value of REIT investments); and **Turnover Risk** (high levels of portfolio turnover increase transaction costs and taxes and may lower investment performance). Please see "Summary of Principal Risks" in the Fund's statutory prospectus for a more detailed description of the Fund's risks. It is possible to lose money on an investment in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

## Performance Information

The performance information below provides some indication of the risks of investing in the Fund by showing changes in its total return from year to year and by comparing the Fund's average annual total returns with those of a broad-based market index and a performance average of similar mutual funds. The bar chart and the information to its right show performance of the Fund's Institutional Class shares.

### Calendar Year Total Returns – Institutional Class

Class P and Class D performance would be lower than Institutional Class performance because of the lower expenses paid by Institutional Class shares. *Past performance, before and after taxes, is not necessarily predictive of future performance.* Visit [www.allianzinvestors.com](http://www.allianzinvestors.com) for more current performance information.

After-tax returns are estimated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.
