LETTER TO THE SHAREHOLDERS OF THE JPM INSTITUTIONAL EMERGING MARKETS EQUITY FUND

December 15, 1995

Dear Shareholder:

The fiscal year ended October 31, 1995 was one of the most challenging on record for emerging markets investors. In an environment dominated, first, by fallout from the Mexican peso devaluation and, second, by fears of economic overheating throughout Asia, emerging markets declined by -22.94% for the year, as measured by the International Finance Corporation (IFC) Investable Index (excluding South Africa). In this difficult environment, The JPM Institutional Emerging Markets Equity Fund outperformed the Index, returning -20.81% for its fiscal year.

Despite recent weakness, we maintain our view that emerging markets remain fundamentally attractive for the long term. Most of these countries -- including Mexico -- are pursuing free market-oriented economic policies that should help them to sustain the higher growth rates they have shown relative to the developed world in the recent past. Setbacks such as Mexico's may occur, but emerging market economies appear to be moving in the right direction and offer attractive growth potential. We therefore believe shareholders of the Fund who are able to tolerate short-term market fluctuations should maintain their exposure to the emerging markets as part of a fully diversified global portfolio.

After paying dividends of \$0.05 from ordinary income and distributions of \$0.13 from short-term capital gains, the Fund's net asset value was \$9.71 per share as of October 31, 1995. The Fund's net assets stood at \$186.0 million at the end of the reporting period. The net assets of The Emerging Markets Equity Portfolio, in which the Fund invests, totaled approximately \$619.5 million as of October 31, 1995.

MARKET ENVIRONMENT

While the IFC Investable Index declined as a whole during the period, regional market returns were mixed. Weakness was concentrated in Latin America, which fell -21.2%. Emerging Asian markets also declined, generally following the downward trend of regional market leaders such as Hong Kong, which was hurt by rising interest rates. The Europe/Africa/Mideast portion of the IFC Investable Index was the only area to post gains, rising 12.2%.

TABLE OF CONTENTS

LETTER TO THE SHAREHOLDERS1	FUND PERFORMANCE 5
FUND FACTS AND HIGHLIGHTS.4	FINANCIAL STATEMENTS 7

Latin American markets declined during the period, but they began to recover during the second quarter of 1995. An aggressive government economic stabilization plan caused investors to regain some confidence in Mexico and the region in general. At the end of the Fund's fiscal year, however, the Mexican peso decline again rippled throughout the markets.

Emerging Asian countries were on better economic footing than those in Latin America. However, markets such as Malaysia and Thailand declined as they were faced with overheating economies and rising interest rates.

Highlights in the Europe/Africa area were the rapid rise of the Turkish market due to the initial optimism about the success of the prime minister's upcoming regional elections. Greece also rose as its rate of domestic inflation fell to a 21-year low, with interest rates following that encouraging lead. South Africa, which is not included in the IFC Investable Index, remained strong as lower interest rates combined with a decline in domestic inflation have helped support this market.

PORTFOLIO REVIEW

The Portfolio's investment process centers on two major decisions -- country

allocation and stock selection -- thereby diversifying its sources of potential added return, while controlling the Portfolio's risk exposure.

The Portfolio maintained an underweighted position in Mexico and Latin America for much of the period because we believed these markets were overvalued. This position helped the Fund's relative performance when the markets declined dramatically following the peso devaluation. While this position held us back slightly when the markets rallied during the second quarter, we maintained it based on our long-term view of this region. As market valuations in this area began to look more compelling, we began to gradually move to a neutral position relative to the IFC Investable Index.

In Europe, our overweighting relative to the IFC Investable Index helped performance. In Turkey, for example, we increased our position when it declined substantially in 1994. This move enabled the Portfolio to participate in the market rally in the first quarter of 1995. We decreased our allocation in Turkey relative to the IFC Investable Index near the market's peak as we believed stock prices became too expensive relative to their appreciation potential. Subsequently, this decision added value since this market began to decline at the end of the period.

In Asia, positive contributions to overall returns also resulted from our decision to limit the Portfolio's exposure to the Indian market, which performed poorly throughout most of the period. On the down side, our underweighted position in Malaysia detracted from returns as its market rose during the period. However, we remained underweighted in Malaysia because our analysis indicated that stock prices were "overvalued" or expensive relative to their long-term growth potential.

2

OUTLOOK AND STRATEGY

Looking ahead, we are maintaining the Portfolio's overweighted position in China, where a long bear market has brought valuations to a very attractive level. We plan to continue the Portfolio's more aggressive investment posture in the Philippines following that nation's debt upgrade by Moody's Investors Service. Europe is also relatively attractive on declining inflation, interest rates, and relatively attractive valuations. We also plan to continue the Portfolio's overweighted position in South African equities. South Africa's earnings potential is large after the stagnation of the past decade gave way to solid 3% growth.

We are planning to move the Portfolio's current exposure to Mexican equities slowly towards neutral, as there are some signs of economic recovery and the market's correction is starting to make valuations more interesting. We expect the Portfolio to remain relatively underweighted in other Latin American markets except Venezuela, where the long-term prospects for success of economic reforms seem positive, but only after a period of generally poor corporate results has passed.

We believe the long-term outlook for the world's emerging markets continues to be favorable -- and therefore that the case for investing in these markets remains compelling. In fact, many countries now arguably stand on a more solid foundation than they had before the Mexican peso devaluation. We therefore remain convinced that exposure to these markets as part of a fully diversified portfolio is appropriate for long-term investors who are willing to ride out the storms.

As always, we welcome your comments or questions. Please call J.P. Morgan Funds Services toll free at (800) 766-7722.

Sincerely,

/s/ Evelyn E. Guernsey

FUND FACTS

INVESTMENT OBJECTIVE

The JPM Institutional Emerging Markets Equity Fund seeks to provide a high total return from a portfolio of equity securities of companies in emerging markets. It is designed for long-term investors who want to diversify their investments by adding exposure to the rapidly growing emerging markets. As an international investment, the Fund is subject to foreign market, political and currency risk.

FUND PERFORMANCE

EXAMINING PERFORMANCE

There are several ways to evaluate a mutual fund's historical performance record. One approach is to look at the growth of a hypothetical investment. The minimum initial investment in the Fund is \$500,000. The chart at right shows that the minimum invested at the Fund's inception would have declined to \$493,775 at October 31, 1995.

Another way to look at performance is to review a fund's average annual total return. This figure takes the fund's actual (or cumulative) return and shows you what would have happened if the fund had achieved that return by performing at a constant rate each year. Average annual total returns represent the average yearly change of a fund's value over various time periods, typically 1, 5, or 10 years (or since inception). Total returns for periods of less than one year are not annualized and provide a picture of how a fund has performed over the short term.

THE JPM INSTITUTIONAL EMERGING MARKETS EQUITY FUND
 NOTES TO FINANCIAL STATEMENTS
 OCTOBER 31, 1995

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The JPM Institutional Emerging Markets Equity Fund (the "Fund") is a separate series of The JPM Institutional Funds, a Massachusetts business trust (the "Trust") which was organized on November 4, 1992. The Trust is registered under the Investment Company Act of 1940, as amended, as a diversified open-end management investment company. The Fund commenced operations on November 15, 1993.

The Fund invests all of its investable assets in The Emerging Markets Equity Portfolio (the "Portfolio"), a diversified open-end management investment company having the same investment objectives as the Fund. The value of such investment reflects the Fund's proportionate interest in the net assets of the Portfolio (30% at October 31, 1995). The performance of the Fund is directly affected by the performance of the Portfolio. The financial statements of the Portfolio, including the schedule of investments, are included elsewhere in this report and should be read in conjunction with the Fund's financial statements.

The following is a summary of the significant accounting policies of the Fund:

- a) Valuation of securities by the Portfolio is discussed in Note 1 of the Portfolio's Notes to Financial Statements which are included elsewhere in this report.
- b) The Fund records its share of net investment income, realized and unrealized gain and loss and adjusts its investment in the Portfolio each day. All the net investment income and realized and unrealized gain and loss of the Portfolio is allocated pro rata among the Fund and other investors in the Portfolio at the time of such determination.
- c) Distributions to shareholders of net investment income and net realized capital gain, if any, are declared and paid annually.
- d) The Fund incurred organization expenses in the amount of \$49,154. These costs were deferred and are being amortized on a straight-line basis over a five-year period from the commencement of operations.
- e) Each series of the Trust is treated as a separate entity for federal income tax purposes. The Fund's policy is to comply with the provisions of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and to distribute substantially all of its income, including net realized capital gains, if any, within the prescribed time periods. Accordingly, no provision for federal income or excise tax is necessary.
- f) Expenses incurred by the Trust with respect to any two or more funds in the Trust are allocated in proportion to the net assets of each fund in the Trust, except where allocations of direct expenses to each fund can otherwise be made fairly. Expenses directly attributable to a fund are charged to that fund.
- g) The Fund accounts for and reports distributions to shareholders in accordance with Statement of Position 93-2 "Determination, Disclosure and Financial Statement Presentation of Income, Capital Gain, and Return of

THE JPM INSTITUTIONAL EMERGING MARKETS EQUITY FUND
NOTES TO FINANCIAL STATEMENTS (CONTINUED)
OCTOBER 31, 1995

statement was to decrease Paid in Capital by \$458,255, decrease Undistributed Net Investment Income by \$183,853 and decrease Accumulated Net Realized Loss on Investment and Foreign Currency Transactions by \$642,108. The adjustments are primarily attributable to tax treatment of partnership allocations of capital gains and losses and foreign currency losses. Net investment income, net realized loss and net assets were not affected by this change.

- h) For United States Federal income tax purposes, the Fund had a capital loss carryforward at October 31, 1995 of approximately \$8,215,000 which will expire in the year 2003. No capital gains distribution is expected to be paid to shareholders until future net gains have been realized in excess of such carryforward.

2. TRANSACTIONS WITH AFFILIATES

- a) The Trust retains Signature Broker-Dealer Services, Inc. ("Signature") to serve as Administrator and Distributor. Signature provides administrative services necessary for the operations of the Fund, furnishes office space and facilities required for conducting the business of the Fund and pays the compensation of the Fund's officers affiliated with Signature. The agreement provides for a fee to be paid to Signature at an annual rate determined by the following schedule: 0.04% of the first \$1 billion of the aggregate average daily net assets of the Trust, as well as two other affiliated fund families for which Signature acts as administrator, 0.032% of the next \$2 billion of such net assets, 0.024% of the next \$2 billion of such net assets, and 0.016% of such net assets in excess of \$5 billion. The daily equivalent of the fee rate is applied each day to the net assets of the Fund. For the fiscal year ended October 31, 1995, the Fund's portion of Signature's fee for these services amounted to \$42,329.
- b) During the period November 1, 1994 through August 31, 1995, the Trust, on behalf of the Fund, had a Financial and Fund Accounting Services Agreement ("Services Agreement") with Morgan Guaranty Trust Company of New York ("Morgan") under which Morgan may receive a fee, based on the percentages described below, for overseeing certain aspects of the administration and operation of the Fund and which was also designed to provide an expense limit for certain expenses of the Fund. This fee was calculated exclusive of the shareholder servicing fee, the fund services fee and amortization of organization expenses, at 0.05% of the Fund's average daily net assets. For the period November 1, 1994 through August 31, 1995, Morgan agreed to reimburse the Fund \$26,975 for expenses that exceeded this limit. Effective September 1, 1995, the Services Agreement was terminated and an interim agreement was entered into between the Trust, on behalf of the Fund, and Morgan which provides for the continuation of the oversight services that were outlined under the prior agreement and that Morgan shall bear all of its expenses incurred in connection with these services. In addition, Morgan has agreed to reimburse the Fund to the extent necessary to maintain the total operating expenses of the Fund, including the expenses allocated to the Fund from the Portfolio, at no more than 1.60% of the average daily net assets of the Fund through at least February 29, 1996. For the fiscal year ended October 31, 1995, no reimbursement was necessary.

12

THE JPM INSTITUTIONAL EMERGING MARKETS EQUITY FUND
NOTES TO FINANCIAL STATEMENTS (CONTINUED)
OCTOBER 31, 1995

- c) The Trust, on behalf of the Fund, has a Shareholder Servicing Agreement with Morgan. The Agreement provides for the Fund to pay Morgan a fee for these services which is computed daily and may be paid monthly at an annual rate of 0.05% of the average daily net assets of the Fund. For the

fiscal year ended October 31, 1995, the fee for these services amounted to \$79,381.

- d) The Trust, on behalf of the Fund, has a Fund Services Agreement with Pierpont Group, Inc. ("Group") to assist the Trustees in exercising their overall supervisory responsibilities for the Trust's affairs. The Trustees of the Trust represent all the existing shareholders of Group. The Fund's allocated portion of Group's costs in performing its services amounted to \$14,527 for the fiscal year ended October 31, 1995.
- e) An aggregate annual fee of \$65,000 is paid to each trustee for serving as a Trustee of the Pierpont Funds, the JPM Institutional Funds, and their corresponding Portfolios. The Trustees' Fees and Expenses shown in the financial statements represent the Fund's allocated portion of the total fees and expenses. Prior to April 1, 1995, the aggregate annual trustee fee was \$55,000. The Trustee who serves as Chairman and Chief Executive Officer of these Funds and Portfolios also serves as Chairman of Group and receives compensation and employee benefits from Group in his role as Group's Chairman. The allocated portion of such compensation and benefits included in the Fund Services Fee shown in the financial statements was \$1,900.

3. TRANSACTIONS IN SHARES OF BENEFICIAL INTEREST

The Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest of one or more series. Transactions in shares of beneficial interest of the Fund were as follows:

REPORT OF INDEPENDENT ACCOUNTANTS

To the Trustees and Shareholders of
The JPM Institutional Emerging Markets Equity Fund

In our opinion, the accompanying statement of assets and liabilities and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of The JPM Institutional Emerging Markets Equity Fund (one of the series constituting part of The JPM Institutional Funds, hereafter referred to as the "Fund") at October 31, 1995, the results of its operations for the year then ended, and the changes in its net assets and the financial highlights for the year then ended and for the period November 15, 1993 (commencement of operations) through October 31, 1994, in conformity with generally accepted accounting principles. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with generally accepted auditing standards which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for the opinion expressed above.

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The Emerging Markets Equity Portfolio (the "Portfolio") is registered under the Investment Company Act of 1940, as amended, (the "Act") as a no-load, diversified, open-end management investment company which was organized as a trust under the laws of the State of New York on June 16, 1993. The Portfolio commenced operations on November 15, 1993 and received a contribution of certain assets and liabilities, including securities, with a value of \$223,722,513 on that date from the JPM Emerging Markets Equity Fund, Ltd. in exchange for a beneficial interest in the Portfolio. The Declaration of Trust permits the Trustees to issue an unlimited number of beneficial interests in the Portfolio.

The following is a summary of the significant accounting policies of the Portfolio:

- a) The value of each security for which readily available market quotations exists is based on a decision as to the broadest and most representative market for such security. The value of such security will be based either on the last sale price on a national securities exchange, or, in the absence of recorded sales, at the readily available closing bid price on such exchanges, or at the quoted bid price in the over-the-counter market. Securities listed on a foreign exchange are valued at the last quoted sale price available before the time when net assets are valued. Unlisted securities are valued at the average of the quoted bid and asked prices in the over-the-counter market. Securities or other assets for which market quotations are not readily available are valued at fair value in accordance with procedures established by the Portfolio's Trustees. Such procedures may include the use of independent pricing services, which use prices based upon yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; operating data and general market conditions. All portfolio securities with a remaining maturity of less than 60 days are valued by the amortized cost method.

Trading in securities on most foreign exchanges and over-the-counter markets is normally completed before the close of the domestic market and may also take place on days on which the domestic market is closed. If events materially affecting the value of foreign securities occur between the time when the exchange on which they are traded closes and the time when the Portfolio's net assets are calculated, such securities will be valued at fair value in accordance with procedures established by and under the general supervision of the Portfolio's Trustees.

Investments in emerging markets may involve certain considerations and risks not typically associated with investments in the United States. Future economic and political developments in emerging market countries could adversely affect the liquidity or value, or both, of such securities in which the Portfolio is invested. The ability of the issuers of the debt securities held by the Portfolio to meet their obligations may be affected by economic and political developments in a specific industry or region.

- b) The books and records of the Portfolio are maintained in U.S. dollars. The market values of investment securities, other assets and liabilities and foreign currency contracts are translated at the prevailing exchange rates at the end of the period. Purchases, sales, income and expense are translated at the exchange rate prevailing on the respective dates of such transactions. Translation gains and losses resulting from changes in exchange rates during the reporting period and gains and losses realized upon settlement of foreign currency transactions are reported in the Statement of Operations.

Since the net assets of the Portfolio are presented at the exchange rates

and market values prevailing at the end of the period, the Portfolio does not isolate the portion of the results of operations arising as a result of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of securities during the period.

- c) Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date or at the time that the relevant ex-dividend date and amount becomes known. Interest income, which includes the amortization of premiums and discounts, if any, is recorded on an accrual basis. For financial and tax reporting purposes, realized gains and losses are determined on the basis of specific lot identification.
- d) The Portfolio may enter into forward and spot foreign currency contracts to protect securities and related receivables against fluctuations in future foreign currency rates. A forward contract is an agreement to buy or sell currencies of different countries on a specified future date at a specified rate. Risks associated with such contracts include the movement in the value of the foreign currency relative to the U.S. Dollar and the ability of the counterparty to perform.

The market value of the contract will fluctuate with changes in currency exchange rates. Contracts are valued daily based on procedures established by and under the general supervision of the Portfolio's Trustees and the change in the market value is recorded by the Portfolio as unrealized appreciation or depreciation of forward and spot foreign currency contract translations. At October 31, 1995 the Portfolio had open spot foreign currency contracts as follows:

SUMMARY OF OPEN CONTRACTS

<TABLE>
<CAPTION>

FOREIGN CURRENCY PURCHASE CONTRACTS	COST	VALUE AT 10/31/95	NET UNREALIZED APPRECIATION (DEPRECIATION)

Net Unrealized Appreciation on Foreign Currency Contracts			\$ 17

</TABLE>

- e) The Portfolio intends to be treated as a partnership for federal income tax purposes. As such, each investor in the Portfolio will be taxable on its share of the Portfolio's ordinary income and capital gains. It is intended that the Portfolio's assets will be managed in such a way that an investor in the Portfolio will be able to satisfy the requirements of Subchapter M of the Internal Revenue Code.
- f) The Portfolio incurred organization expenses in the amount of \$7,629. These costs were deferred and are being amortized on a straight-line basis over a five year period from the commencement of operations.
- g) The Portfolio's custodian takes possession of the collateral pledged for investments in repurchase agreements on behalf of the Portfolio. It is the policy of the Portfolio to value the underlying collateral daily on a mark-to-market basis to determine that the value, including accrued interest, is at least equal to the repurchase price plus accrued interest. In the event of default of the obligation to repurchase, the Portfolio has the right to liquidate the collateral and apply the proceeds in

satisfaction of the obligation. Under certain circumstances, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral or proceeds may be subject to legal

2. a) The Portfolio has an investment advisory agreement with Morgan Guaranty Trust Company of New York ("Morgan"). Under the terms of the investment advisory agreement, the Portfolio pays Morgan at an annual rate of 1.00% of the Portfolio's average daily net assets. For the fiscal year ended October 31, 1995, such fees amounted to \$5,713,506.
- b) The Portfolio has retained Signature Broker - Dealer Services, Inc. ("Signature") to serve as Administrator and exclusive placement agent. Signature provides administrative services necessary for the operations of the Portfolio, furnishes office space and facilities required for conducting the business of the Portfolio and pays the compensation of the Portfolio's officers affiliated with Signature. The agreement provides for a fee to be paid to Signature at an annual fee rate determined by the following schedule: 0.01% of the first \$1 billion of the aggregate average daily net assets of the Portfolio and the other portfolios subject to the Administrative Services Agreement, 0.008% of the next \$2 billion of such net assets, 0.006% of the next \$2 billion of such net assets, and 0.004% of such net assets in excess of \$5 billion. The daily equivalent of the fee rate is applied to the daily net assets of the Portfolio. For the fiscal year ended October 31, 1995, such expenses amounted to \$35,189.
- c) During the period November 1, 1994 through August 31, 1995, the Portfolio had a Financial and Fund Accounting Services Agreement ("Services Agreement") with Morgan under which Morgan may receive a fee, based on the percentages described below, for assisting in certain aspects of the administration and operation of the Portfolio and which was also designed to provide an expense limit for certain expenses of the Portfolio. This fee was calculated exclusive of the advisory fee, custody expenses, fund services fee, amortization of organization expenses, and brokerage costs at 0.15% of the Portfolio's average daily net assets up to \$200 million, 0.10% of the next \$200 million of average daily net assets, 0.05% of the next \$200 million of average daily net assets and 0.03% of average daily net assets thereafter. For the period from November 1, 1994, through August 31, 1995, the fee for these services amounted to \$337,050. Effective September 1, 1995, the Services Agreement was terminated and an interim agreement was entered into between the Portfolio and Morgan which provides for the continuation of the oversight services that were outlined under the prior agreement and that Morgan shall bear all of its expenses incurred in connection with these services.
- d) The Portfolio has a Fund Services Agreement with Pierpont Group, Inc. ("Group") to assist the Trustees in exercising their overall supervisory responsibilities for the Portfolio's affairs. The Trustees of the Portfolio represent all the existing shareholders of Group. The Portfolio's allocated portion of Group's fee for its reasonable costs in performing its services amounted to \$53,162 for the fiscal year ended October 31, 1995.
- e) An aggregate annual fee of \$65,000 is paid to each Trustee for serving as a Trustee of the Pierpont Funds, the JPM Institutional Funds and their corresponding Portfolios. The Trustees' Fees and Expenses shown in the financial statements represents the Portfolio's allocated portion of the total fees and expenses. Prior to April 1, 1995, the aggregate annual trustee fee was \$55,000. The Trustee

who serves as Chairman and Chief Executive Officer of these Funds and Portfolios also serves as Chairman of Group and received compensation and employee benefits from Group in his role as Group's Chairman. The allocated portion of such compensation and benefits included in the Fund Services Fee shown in the financial statements was \$6,800.

3. INVESTMENT TRANSACTIONS

Investment transactions (excluding short-term investments) for the fiscal year ended October 31, 1995 were as follows:

<TABLE>
<CAPTION>

REPORT OF INDEPENDENT ACCOUNTANTS

To the Trustees and Investors of
The Emerging Markets Equity Portfolio

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the supplementary data present fairly, in all material respects, the financial position of The Emerging Markets Equity Portfolio (the "Portfolio") at October 31, 1995, the results of its operations for the year then ended, and the changes in its net assets and the supplementary data for the year then ended and for the period November 15, 1993 (commencement of operations) through October 31, 1994, in conformity with generally accepted accounting principles. These financial statements and supplementary data (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with generally accepted auditing standards which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits which involved confirmation of securities at October 31, 1995 by correspondence with the custodian and brokers and the application of alternative auditing procedures where confirmations from brokers were not received, provide a reasonable basis for the opinion expressed above.
