PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE, WHICH IS NO GUARANTEE OF FUTURE RESULTS, AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE FIGURES SHOWN. FOR THE MOST RECENT MONTH-END PERFORMANCE FIGURES, PLEASE VISIT VANKAMPEN.COM OR SPEAK WITH YOUR FINANCIAL ADVISOR. INVESTMENT RETURNS AND PRINCIPAL VALUE WILL FLUCTUATE AND FUND SHARES, WHEN REDEEMED, MAY BE WORTH MORE OR LESS THAN THEIR ORIGINAL COST.

The returns shown in this report do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Performance of share classes will vary due to differences in sales charges and expenses. Average annual total return with sales charges includes payment of the maximum sales charge of 5.75 percent for Class A shares, a contingent deferred sales charge of 5.00 percent for Class B shares (in year one and declining to zero after year five), a contingent deferred sales charge of 1.00 percent for Class C shares in year one and combined Rule 12b-1 fees and service fees of up to 0.25 percent for Class A shares and up to 1.00 percent for Class B and C shares. The since inception and ten year returns for Class B shares reflect the conversion of Class B shares into Class A shares eight years after purchase. Class I shares are available for purchase exclusively by investors through (i) tax-exempt retirement plans with assets of at least \$1 million (including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase plans, defined benefit plans and non-qualified deferred compensation plans), (ii) fee-based investment programs with assets of at least \$1 million, (iii) qualified state tuition plan (529 plan) accounts, (iv) institutional clients with assets of at least \$1 million and (v) certain Van Kampen investment companies. Class I shares are offered without any sales charges on purchases or sales and do not include combined Rule 12b-1 fees and service fees. Figures shown above assume reinvestment of all dividends and capital gains. Periods of less than one year are not annualized.

Merrill Lynch All Convertible Securities Index is an unmanaged, broad-based market index that is inclusive of all convertibles over \$50 million in issue size. The Lipper Convertible Securities Funds Index represents the average performance of the 10 largest convertible securities mutual funds, as classified by Lipper, Inc. The Indexes do not include any expenses, fees or sales charges, which would lower performance. The Indexes are unmanaged and should not be considered an investment. It is not possible to invest directly in an index.

Fund Report

FOR THE SIX-MONTH PERIOD ENDED JUNE 30, 2008

MARKET CONDITIONS

In the six-month period ended June 30, 2008, the convertible securities market exhibited weak performance but outperformed broad equity markets, as represented by the S&P 500(R) and the Nasdaq Composite Index. During the period, the Federal Open Market Committee (the "Fed") reduced its target federal funds rate several times amid increasing evidence of economic slowdown and higher probabilities of recession. Together with high gasoline prices, high rates of home foreclosures and unemployment took a toll on consumers, who began to significantly curb their spending. With investors still preferring the relative safety of U.S. Treasury bonds in the uncertain economic environment, credit spreads continued to widen and equity markets remained volatile throughout the period.

More specifically, in the first quarter of 2008, the convertible securities market declined against a backdrop of volatility in the equity and credit markets. The Fed again lowered the target rate on the back of ongoing economic weakness. Energy and commodity prices soared to new highs, contributing to concerns about inflationary pressures. The financial sector remained especially turbulent, as billion-dollar losses resulting from mortgage-related investments were widely reported. Bear Stearns, the fifth largest investment bank in the U.S., teetered on bankruptcy until JPMorgan Chase, with the assistance of the Fed, agreed to acquire it for a fraction of its former value.

During the second quarter, the economy remained sluggish. The convertible securities market fell along with the declining equity market and rising credit spreads. Energy prices continued to rise, and unemployment rose again. Financial sector weakness intensified amid rising foreclosures and the deteriorating housing market. Inflation levels moved higher during the period, and softening retail sales data showed a slowdown in consumer spending.

However, new issuance in the convertibles market continued to be strong during the period. With the availability of funding in the credit markets all but evaporated, companies looked to the convertibles market to raise capital, fueling demand for convertible securities. New issue proceeds totaled \$51.6 billion during the period, as compared to \$54 billion for the same six-month period last year.

PERFORMANCE ANALYSIS

All share classes of Van Kampen Harbor Fund outperformed the Merrill Lynch All Convertible Securities Index and the Lipper Convertible Securities Funds Index for the six months ended June 30, 2008, assuming no deduction of applicable sales charges.

</Table>

The performance for the four share classes varies because each has different expenses. The Fund's total return figures assume the reinvestment of all distributions, but do not reflect the deduction of any applicable sales charges. Such costs would lower performance. Past performance is no guarantee of future results. See Performance Summary for standardized performance information and index definitions.

The primary contributors to the Fund's outperformance relative to the Merrill Lynch All Convertible Securities Index were the energy, materials (specifically metals) and health care sectors. In the energy sector, rising oil and natural gas prices continued to bolster energy companies' earnings growth. Moreover, the weakening U.S. dollar during the period also benefited hard assets such as oil and metals, which are priced in U.S. dollars and therefore offer increased purchasing power when the dollar's value is weaker, which attracts investors looking to hedge against inflation. Strong performance in the health care sector was driven by the Fund's exposure to biotechnology securities. The biotech industry benefited from an increase in demand for new drugs. Also within the health care sector, life science investments added to performance as demand grew for instrumentation used in gene sequencing and other diagnostic tools.

However, other investments detracted from relative performance during the period. Although the Fund held an underweight allocation in the financials sector, the ongoing credit crisis continued to roil the share prices of banks, mortgage lenders, and large diversified financial stocks. Exposure to the consumer discretionary sector likewise dampened relative results. In particular, automobile and airlines securities were weak as rising energy prices hurt these companies' earnings and the slowing economy curtailed demand for their products and services.

3

As of the end of the reporting period, the Fund remained underweighted relative to the Merrill Lynch All Convertible Securities Index in the financials and consumer discretionary sectors, while the health care sector represented the Fund's largest absolute weight. As we enter the second half of 2008, we continue to monitor the economic picture and are keeping a close watch on the political situation.

There is no guarantee that any sectors mentioned will continue to perform as discussed herein or that securities in such sectors will be held by the Fund in the future.

Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments of Class A Shares and contingent deferred sales charges on redemptions of Class B and Class C Shares; and redemption fees; and (2) ongoing costs, including management fees; distribution and service (12b-1) fees; and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period 1/1/08 - 6/30/08.

ACTUAL EXPENSE

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not

be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing cost of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) or contingent deferred sales charges or redemption fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Investment Advisory Agreement Approval

Both the Investment Company Act of 1940 and the terms of the Fund's investment advisory agreement require that the investment advisory agreement between the Fund and its investment adviser be approved annually both by a majority of the Board of Trustees and by a majority of the independent trustees voting separately.

At meetings held on April 15, 2008 and May 8, 2008, the Board of Trustees, and the independent trustees voting separately, considered and ultimately determined that the terms of the investment advisory agreement are fair and reasonable and approved the continuance of the investment advisory agreement as being in the best interests of the Fund and its shareholders. In making its determination, the Board of Trustees considered materials that were specifically prepared by the investment adviser at the request of the Board and Fund counsel, and by an

independent provider of investment company data contracted to assist the Board, relating to the investment advisory agreement review process. The Board also considered information received periodically about the portfolio, performance, the investment strategy, portfolio management team and fees and expenses of the Fund. The Board of Trustees considered the investment advisory agreement over a period of several months and the trustees held sessions both with the investment adviser and separate from the investment adviser in reviewing and considering the investment advisory agreement.

In approving the investment advisory agreement, the Board of Trustees considered, among other things, the nature, extent and quality of the services provided by the investment adviser, the performance, fees and expenses of the Fund compared to other similar funds and other products, the investment adviser's expenses in providing the services and the profitability of the investment adviser and its affiliated companies. The Board of Trustees considered the extent to which any economies of scale experienced by the investment adviser are shared with the Fund's shareholders, and the propriety of existing and alternative breakpoints in the Fund's investment advisory fee schedule. The Board of Trustees considered comparative advisory fees of the Fund and other investment companies and/or other products at different asset levels, and considered the trends in the industry versus historical and projected assets of the Fund. The Board of Trustees also reviewed the benefit to the investment adviser of receiving research paid for by Fund assets and the propriety of such arrangements. The Board of Trustees evaluated other benefits the investment adviser and its affiliates derive from their relationship with the Fund. The Board of Trustees reviewed information about the foregoing factors and considered changes, if any, in such information since its previous approval. The Board of Trustees discussed the financial strength of the investment adviser and its affiliated companies and the capability of the personnel of the investment adviser, and specifically the strength and background of its portfolio management personnel. The Board of Trustees reviewed the statutory and

10

regulatory requirements for approval and disclosure of investment advisory agreements. The Board of Trustees, including the independent trustees, evaluated all of the foregoing and does not believe any single factor or group of factors control or dominate the review process, and, after considering all factors together, has determined, in the exercise of its business judgment, that approval of the investment advisory agreement is in the best interests of the Fund and its shareholders. The following summary provides more detail on certain matters considered but does not detail all matters considered.

Nature, Extent and Quality of the Services Provided. On a regular basis, the Board of Trustees considers the roles and responsibilities of the investment adviser as a whole and for those specific portfolio management, support and trading functions servicing the Fund. The trustees discuss with the investment adviser the resources available and used in managing the Fund and changes made in the Fund's portfolio management team and the Fund's portfolio management strategy over time. The Fund discloses information about its portfolio management team members and their experience in its prospectus. The trustees also discuss certain other services which are provided on a cost-reimbursement basis by the investment adviser or its affiliates to the Van Kampen funds including certain accounting, administrative and legal services. The Board has determined that the nature, extent and quality of the services provided by the investment adviser support its decision to approve the investment advisory agreement.

Performance, Fees and Expenses of the Fund. On a regular basis, the Board of Trustees reviews the performance, fees and expenses of the Fund compared to its peers and to appropriate benchmarks. In addition, the Board spends more focused time on the performance of the Fund and other funds in the Van Kampen complex, paying specific attention to underperforming funds. The trustees discuss with

the investment adviser the performance goals and the actual results achieved in managing the Fund. When considering a fund's performance, the trustees and the investment adviser place emphasis on trends and longer-term returns (focusing on one-year, three-year and five-year performance with special attention to three-year performance) and, when a fund's weighted performance is under the fund's benchmark, they discuss the causes and where necessary seek to make specific changes to investment strategy or investment personnel. The Fund discloses more information about its performance elsewhere in this report and in the Fund's prospectus. The trustees discuss with the investment adviser the level of advisory fees for this Fund relative to comparable funds and other products advised by the adviser and others in the marketplace. The trustees review not only the advisory fees but other fees and expenses (whether paid to the adviser, its affiliates or others) and the Fund's overall expense ratio. The Fund discloses more information about its fees and expenses in its prospectus. The Board has determined that the performance, fees and expenses of the Fund support its decision to approve the investment advisory agreement.

11

Investment Adviser's Expenses in Providing the Service and Profitability. At least annually, the trustees review the investment adviser's expenses in providing services to the Fund and other funds advised by the investment adviser and the profitability of the investment adviser. These profitability reports are put together by the investment adviser with the oversight of the Board. The trustees discuss with the investment adviser its revenues and expenses, including among other things, revenues for advisory services, portfolio management-related expenses, revenue sharing arrangement costs and allocated expenses both on an aggregate basis and per fund. The Board has determined that the analysis of the investment adviser's expenses and profitability support its decision to approve the investment advisory agreement.

Economies of Scale. On a regular basis, the Board of Trustees considers the size and growth prospects of the Fund and how that relates to the Fund's expense ratio and particularly the Fund's advisory fee rate. In conjunction with its review of the investment adviser's profitability, the trustees discuss with the investment adviser how more (or less) assets can affect the efficiency or effectiveness of managing the Fund's portfolio and whether the advisory fee level is appropriate relative to current and projected asset levels and/or whether the advisory fee structure reflects economies of scale as asset levels change. The Board has determined that its review of the actual and potential economies of scale of the Fund support its decision to approve the investment advisory agreement.

Other Benefits of the Relationship. On a regular basis, the Board of Trustees considers other benefits to the investment adviser and its affiliates derived from its relationship with the Fund and other funds advised by the investment adviser. These benefits include, among other things, fees for transfer agency services provided to the funds, in certain cases research received by the adviser generated from commission dollars spent on funds' portfolio trading, and in certain cases distribution or service related fees related to funds' sales. The trustees review with the investment adviser each of these arrangements and the reasonableness of its costs relative to the services performed. The Board has determined that the other benefits received by the investment adviser or its affiliates support its decision to approve the investment advisory agreement.

VAN KAMPEN HARBOR FUND

NOTES TO FINANCIAL STATEMENTS -- JUNE 30, 2008 (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen Harbor Fund (the "Fund") is organized as a Delaware statutory trust, and is registered as a diversified, open-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund's investment objective is to seek to provide current income, capital appreciation and conservation of capital. The Fund's investment adviser seeks to achieve the Fund's investment objective by investing principally in a portfolio of debt securities, primarily convertible bonds and convertible preferred stocks. The Fund commenced investment operations on November 15, 1956. The Fund offers Class A Shares, Class B Shares, Class C Shares and Class I Shares. Each class of shares differs by its initial sales load, contingent deferred sales charges, the allocation of class-specific expenses and voting rights on matters affecting a single class.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Investments in securities listed on a securities exchange are valued at their last sale price as of the close of such securities exchange. Equity securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Listed and unlisted securities for which the last sale price is not available are valued at the mean of the bid and asked prices. Unlisted convertible securities are valued at the mean of the last reported bid and asked prices. Fixed income investments and preferred stock are stated at value using market quotations or indications of value obtained from an independent pricing service. For those securities where quotations or prices are not readily available, valuations are determined in accordance with procedures established

in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements ("FAS 157"), effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. FAS 157 establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements

VAN KAMPEN HARBOR FUND

NOTES TO FINANCIAL STATEMENTS -- JUNE 30, 2008 (UNAUDITED) continued

for disclosure purposes. Various inputs are used in determining the value of the Fund's investments. The inputs are summarized in the three broad levels listed below.

- Level 1--quoted prices in active markets for identical investments
- Level 2--other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3--significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of June 30, 2008 in valuing the Fund's investments carried at value:

<Table>
<Caption>

VALUATION INPUTS	INVESTMENTS IN SECURITIES
<S>	<C>
Level 1--Quoted Prices.....	\$ 11,135,516

Level 3--Significant Unobservable Inputs.....	--

Total.....	\$279,978,570

</Table>

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis.

The Fund may purchase and sell securities on a "when-issued" or "delayed delivery" basis, with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Fund will segregate assets with the custodian having an aggregate value at least

equal to the amount of the when-issued or delayed delivery purchase commitments until payment is made. At June 30, 2008, the Fund had no when-issued or delayed delivery purchase commitments.

The Fund may invest in repurchase agreements, which are short-term investments in which the Fund acquires ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price. The Fund may invest independently in repurchase agreements, or transfer uninvested cash balances into a pooled cash account along with other investment companies advised by Van Kampen Asset Management (the "Adviser") or its affiliates, the daily aggregate of which is invested in repurchase agreements. Repurchase agreements are fully collateralized by the underlying debt security. The Fund will make payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Fund.

C. INCOME AND EXPENSES Interest income is recorded on an accrual basis and dividend income is recorded on the ex-dividend date. Discounts are accreted and premiums are amortized over the expected life of each applicable security. Income and expenses of the Fund are allocated on a pro rata basis to each class of shares, except for distribution and service fees and incremental transfer agency costs which are unique to each class of shares.

VAN KAMPEN HARBOR FUND

NOTES TO FINANCIAL STATEMENTS -- JUNE 30, 2008 (UNAUDITED) continued

D. FEDERAL INCOME TAXES It is the Fund's policy to comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income earned or gains realized or repatriated. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. The Fund adopted the provisions of the Financial Accounting Standards Board ("FASB") Interpretation No. 48 ("FIN 48") Accounting for Uncertainty in Income Taxes on June 30, 2007. FIN 48 sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. The implementation of FIN 48 did not result in any unrecognized tax benefits in the accompanying financial statements. If applicable, the Fund recognizes interest accrued related to unrecognized tax benefits in "Interest Expense" and penalties in "Other" expenses on the Statement of Operations. The Fund files tax returns with the U.S. Internal Revenue Service, New York and various states. Generally, each of the tax years in the four year period ended December 31, 2007, remains subject to examination by taxing authorities.

The Fund intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. During the prior fiscal year, the Fund utilized capital losses carried forward of \$21,492,304. At December 31, 2007, the Fund had an accumulated capital loss carryforward for tax purposes of \$2,111,386 which will expire on December 31, 2010.

At June 30, 2008, the cost and related gross unrealized appreciation and depreciation were as follows:

<Table>

<S>	<C>
Cost of investments for tax purposes.....	\$272,917,870

E. DISTRIBUTION OF INCOME AND GAINS The Fund declares and pays dividends quarterly from net investment income. Net realized gains, if any, are distributed at least annually. Distributions from net realized gains for book purposes may include short-term capital gains, which are included in ordinary income for tax purposes.

The tax character of distributions paid during the year ended December 31, 2007 was as follows:

Net realized gains or losses may differ for financial reporting and tax purposes primarily as a result of the deferral of losses relating to book to tax amortization differences.

F. CREDITS EARNED ON CASH BALANCES During the six months ended June 30, 2008, the Fund's custody fee was reduced by \$4,920 as a result of credits earned on cash balances.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Fund's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Fund for an annual fee payable monthly as follows:

<Table>	
<Caption>	
AVERAGE DAILY NET ASSETS	% PER ANNUM
<S>	<C>
First \$350 million.....	.55%

For the six months ended June 30, 2008, the Fund recognized expenses of approximately \$3,200 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom LLP, of which a trustee of the Fund is a partner of such firm and he and his law firm provide legal services as legal counsel to the Fund.

Under separate Accounting Services and Chief Compliance Officer (CCO) Employment agreements, the Adviser provides accounting services and the CCO provides compliance services to the Fund. The costs of these services are allocated to each fund. For the six months ended June 30, 2008, the Fund recognized expenses of approximately \$17,900 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing accounting services to the Fund, as well as, the salary, benefits and related costs of the CCO and related support staff paid by Van Kampen. Services provided pursuant to the Accounting Services and CCO Employment agreement are reported as part of "Accounting and Administrative Expenses" on the Statement of Operations.

Van Kampen Investor Services Inc. (VKIS), an affiliate of the Adviser, serves as the shareholder servicing agent for the Fund. For the six months ended June 30, 2008, the Fund recognized expenses of approximately \$100,800 representing transfer agency fees paid to VKIS and its affiliates. Transfer agency fees are determined through negotiations with the Fund's Board of Trustees.

Certain officers and trustees of the Fund are also officers and directors of Van Kampen. The Fund does not compensate its officers or trustees who are also officers of Van Kampen.

The Fund provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation. Amounts deferred are retained by the Fund and to the extent permitted by the 1940 Act may be invested in the common shares of those funds selected by the trustees. Investments in such funds of approximately \$110,900 are included in "Other" assets on the Statement of Assets and Liabilities at June 30, 2008.

30

VAN KAMPEN HARBOR FUND

NOTES TO FINANCIAL STATEMENTS -- JUNE 30, 2008 (UNAUDITED) continued

Appreciation/depreciation and distributions received from these investments are recorded with an offsetting increase/decrease in the deferred compensation obligation and do not affect the net asset value of the Fund. Benefits under the retirement plan are payable upon retirement for a ten year period and are based upon each trustee's years of service to the Fund. The maximum annual benefit per trustee under the plan is \$2,500.

For the six months ended June 30, 2008, Van Kampen, as Distributor for the Fund, received net commissions on sales of the Fund's Class A Shares of approximately \$10,400 and contingent deferred sales charge (CDSC) on redeemed shares of approximately \$6,000. Sales charges do not represent expenses of the Fund.

At June 30, 2008, Morgan Stanley Investment Management Inc., an affiliate of the Adviser, owned 687 shares of Class I.

For the six months ended June 30, 2008, the Fund paid brokerage commissions

to Morgan Stanley & Co., Inc., an affiliate of the Adviser, totaling \$1,724.

31

VAN KAMPEN HARBOR FUND

months ended June 30, 2008, the Fund received redemption fees of approximately \$100, which are reported as part of "Cost of Shares Repurchased" on the Statement of Changes in Net Assets. The per share impact from redemption fees paid to the Fund was less than \$0.01.

5. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$161,097,899 and \$180,303,048,

respectively.

6. DISTRIBUTION AND SERVICE PLANS

Shares of the Fund are distributed by Van Kampen Funds Inc. (the "Distributor"), an affiliate of the Adviser. The Fund has adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act and a service plan (collectively, the "Plans") for Class A Shares, Class B Shares and Class C Shares to compensate the Distributor for the sale, distribution, shareholder servicing and maintenance of shareholder accounts for these shares. Under the Plans, the Fund will incur annual fees of up to .25% of Class A average daily net assets and up to 1.00% each of Class B and Class C average daily net assets. These fees are accrued daily and paid to the Distributor monthly.

The amount of distribution expenses incurred by the Distributor and not yet reimbursed ("unreimbursed receivable") was approximately \$1,465,900 and \$218,000 for Class B and Class C Shares, respectively. These amounts may be recovered from future payments under the distribution plan or CDSC. To the extent the unreimbursed receivable has been fully recovered, the distribution fee is reduced.

7. INDEMNIFICATIONS

The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

8. ACCOUNTING PRONOUNCEMENT

On March 19, 2008, Financial Accounting Standards Board released Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities (FAS 161).
