PRESIDENT'S MESSAGE

DEAR SHAREHOLDER:

No one wants to pay more taxes than they have to. But a recent survey of 500 U.S. households, conducted by Fidelity and Yankelovich Partners, showed that few people took steps to reduce their taxes under the new tax laws that went into effect last year. In fact, many people were not completely aware of the changes until they filed their 1993 tax returns.

Whether or not you're someone whose tax bill increased as a result of these changes, it may make sense to consider ways to keep more of what you earn. First, if your employer offers a 401(k) or 403(b) retirement savings plan, consider enrolling. These plans are set up so you can make regular contributions -

before taxes - to a retirement savings plan. They offer a disciplined savings strategy, the ability to accumulate earnings tax-deferred, and immediate tax savings. For example, if you earn \$40,000 a year and contribute 7% of your salary to your 401(k) plan, your annual contribution is \$2,800. That reduces your taxable income to \$37,200 and, if you're in the

28% tax bracket, saves you \$784 in federal taxes. In addition, you pay no taxes on any earnings until withdrawal.

It may be a good idea to contact your benefits office as soon as possible to find out when you can enroll or increase your contribution. Most employers allow employees to make changes only a few times each year.

Second, consider an IRA. Many people are eligible to make an IRA contribution (up to \$2,000) that is fully tax deductible. That includes people who are not covered by company pension plans, or those within certain income brackets. Even if you don't qualify for a fully deductible contribution, any IRA earnings will grow tax-deferred until withdrawal.

Third, consider adding to your tax-free investments, either municipal bonds or municipal bond funds. Often these can provide higher after-tax yields than comparable taxable investments. For example, if you're in the new 36% federal income tax bracket and invest \$10,000 in a taxable investment yielding 7%, you'll pay \$252 in federal taxes and receive \$448 in income. That same \$10,000 invested in a tax-free bond fund yielding 5.5% would allow you to keep \$550 in income.

These are three investment strategies that could help lower your tax bill in 1994. If you're interested in learning more, please call us at 1-800-544-8888 or visit a Fidelity Investor Center. We look forward to talking with you.

Best regards,

Edward C. Johnson 3d, Chairman

FIDELITY CALIFORNIA TAX-FREE HIGH YIELD PORTFOLIO

PERFORMANCE: THE BOTTOM LINE

There are several ways to evaluate a fund's historical performance. You can look at the total percentage change in value, the average annual percentage change, or the growth of a hypothetical \$10,000 investment. Each figure includes changes in a fund's share price, reinvestment of any dividends (or income) and capital gains (the profits the fund earns when it sells bonds that have grown in value). You can also look at the fund's income. If Fidelity had not reimbursed certain fund expenses during the periods shown, the total returns, dividends and yields would have been lower.

CUMULATIVE TOTAL RETURNS

PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	PAST 5 YEARS	LIFE OF FUND
California Tax-Free High Yield	5.41%	56.05%	144.91%
Lehman Brothers Municipal Bond Index	5.54%	59.02%	n/a
Average California Tax-Exempt Municipal Bond Fund	5.39%	54.72%	n/a
Consumer Price Index	2.52%	20.64%	41.47%

CUMULATIVE TOTAL RETURNS reflect actual performance over a set period - in this case, one year, five years, or since the fund started on July 7, 1984. For example, if you invested \$1,000 in a fund that had a 5% return over the past year, you would end up with \$1,050. You can compare these figures to the performance of the Lehman Brothers Municipal Bond Index - a broad gauge of the municipal bond market. To measure how the fund stacked up against its peers, you can look at the average California tax-exempt municipal bond fund, which reflects the performance of 75 California tax-exempt municipal bond funds tracked by Lipper Analytical Services. Both benchmarks include reinvested dividends and capital gains, if any. Comparing the fund's performance to the consumer price index helps show how your fund did compared to inflation. (The periods covered by the CPI numbers are the closest available match to those covered by the fund.)

AVERAGE ANNUAL TOTAL RETURNS PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	PAST 5 YEARS	LIFE OF FUND
California Tax-Free High Yield	5.41%	9.31%	9.72%
Lehman Brothers Municipal Bond Index	5.54%	9.72%	n/a
Average California Tax-Exempt Municipal Bond Fund	5.39%	9.12%	n/a
Consumer Price Index	2.52%	3.82%	3.65%

AVERAGE ANNUAL TOTAL RETURNS take the fund's actual (or cumulative) return and show you what would have happened if the fund had performed at a constant rate each year.

\$10,000 OVER LIFE OF FUND

\$27,312

\$24,247

'94

\$10,000 OVER LIFE OF FUND: Let's say you invested \$10,000 in Fidelity California Tax-Free High Yield Portfolio on July 31, 1984, shortly after the fund started. As the chart shows, by February 28, 1994, the value of your investment would have grown to \$24,247 - a 142.47% increase on your initial investment. For comparison, look at how the Lehman Brothers Municipal Bond Index did over the same period. With dividends reinvested, the same \$10,000 would have grown to \$27,312 - a 173.12% increase.

UNDERSTANDING

PERFORMANCE

How a fund did yesterday is no guarantee of how it will do tomorrow. Bond prices, for example, move in the opposite direction of interest rates. In turn, the share price, return, and yield of a fund that invests in bonds will vary. That means if you sell your shares during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

(checkmark)

INCOME

YEARS ENDED FEBRUARY 28,	1994	1993	1992	1991	1990
--------------------------	------	------	------	------	------

Income return	5.82%	6.89%	6.88%	7.00%	7.18%
---------------	-------	-------	-------	-------	-------

Capital gain return	2.24%	0.00%	0.00%	0.00%	0.00%
---------------------	-------	-------	-------	-------	-------

Change in share price	-2.65%	7.34%	2.66%	0.71%	2.66%
-----------------------	--------	-------	-------	-------	-------

Total return	5.41%	14.23%	9.54%	7.71%	9.84%
--------------	-------	--------	-------	-------	-------

INCOME returns, capital gain returns, and changes in share price are all part of a bond fund's total return. An income return reflects the dividends paid by the fund. A capital gain return reflects the amount paid by the fund to shareholders based on the profits it has from selling bonds that have grown in value. Both returns assume the dividends or gains are reinvested. Changes in the fund's share price include changes in the prices of the bonds owned by the fund.

DIVIDENDS AND YIELD

PERIODS ENDED FEBRUARY 28, 1994	PAST 30 DAYS	PAST 6 MONTHS	PAST 1 YEAR
Dividends per share	n/a	35.64 (cents)	71.93 (cents)
Annualized dividend rate	n/a	5.74%	5.79%
Annualized yield	4.99%	n/a	n/a
Tax-equivalent yield	8.76%	n/a	n/a

DIVIDENDS per share show the income paid by the fund for a set period. If you annualize this number, based on an average share price of \$12.52 over the past six months and \$12.43 over the past year, you can compare the fund's income over these two periods. The 30-day annualized YIELD is a standard formula for all funds based on the yields of the bonds in the fund, averaged over the past 30 days. This figure shows you the yield characteristics of the fund's investments at the end of the period. It also

helps you compare funds from different companies on an equal basis. The tax-equivalent yield shows what you would have to earn on a taxable investment to equal the fund's tax-free yield, if you're in the 43.04% combined effective 1994 federal and state tax bracket.
FIDELITY CALIFORNIA TAX-FREE HIGH YIELD PORTFOLIO

FUND TALK: THE MANAGER'S OVERVIEW

MARKET RECAP

Bond investments - including tax-free issues - provided solid returns for the 12 months ended February 28, 1994, despite a dramatic downturn in February. Falling interest rates pushed up bond prices steadily through mid-October, when the yield on the benchmark 30-year Treasury bond reached a historic low of 5.79%. By year-end, a strengthening economy had fueled mild inflation fears. That pushed up the yield on the 30-year bond to 6.35% on December 31, which forced investors to give back some of their earlier profits. Inflation jitters eased and bond yields dropped in January. However, when the Federal Reserve Bank raised short-term interest rates in an attempt to control inflation on February 4, investors reacted negatively. At the end of February, the yield on the 30-year bonds was 6.66%, about 38 basis points higher than at the beginning of the month. Over the year, higher federal income taxes boosted demand for municipal bonds. But municipal bond prices were hurt by the Fed's action in February and by record new issuance, which kept supplies high and dampened prices. The return on the Lehman Brothers Municipal Bond Index, a broad measure of the tax-free market, rose 5.54%. By comparison, the Lehman Brothers Aggregate Bond Index, which tracks investment-grade taxable bonds, returned 5.40%. Globally, falling interest rates and low inflation drove good annual returns in Europe, Japan, and most emerging markets, although many of these markets fell in February along with the U.S. bond market. The Salomon Brothers World Government Bond Index - which includes U.S. issues - returned 9.34%, while the J.P. Morgan Emerging Markets Bond Index was up a dramatic 29.46%.
An interview with John Haley, Portfolio Manager of Fidelity California Tax-Free High Yield Portfolio

Q. JOHN, HOW DID THE FUND PERFORM?

A. About average. The fund had a total return of 5.41% for the year ended February 28, 1994. The average California tax-free bond fund posted a total return of 5.39% during the period, according to Lipper Analytical Services.

Q. WHAT ACCOUNTED FOR THE FUND'S PERFORMANCE?

A. First, having a somewhat longer duration than that of the typical California tax-free bond fund. A longer duration makes a fund's share price more sensitive to interest rate changes. I extended the fund's duration from about 7.5 years to 8.9 years during the year because I expected interest rates would continue to decline and drive bond prices higher. That's what happened during most of the period, although the fund gave back some gains when interest rates rebounded in February. Second, the fund also held several issues that were pre-refunded during the period - that is, their issuers set aside a pool of Treasury securities to pay the remaining interest and principal due to bondholders. As a result, the bonds' credit

ratings went from A to Aaa, causing investors to bid their prices higher. Plus, their maturities shortened, which also helped boost their prices.

Q. WHY DID YOU INCREASE THE FUND'S INVESTMENT IN STATE GENERAL OBLIGATION BONDS (GOS) AND STATE LEASE BONDS?

A. During the early part of the year I avoided state GOs, which are backed by the taxing power of the issuer, as well as California lease bonds, which are backed by leases paid by the state. The state's economy was still struggling, and I believed prices of those issues would lag bonds with higher ratings. That proved to be true. But last fall I increased the fund's investment in California GOs, lease bonds and other bonds backed by the state to around 10% because I thought the California economy had hit bottom. Also, I increased the fund's stake in bonds rated A or lower, which are expected to benefit from improvements in the state's economy. These decisions reduced the average credit rating of the fund's holdings. At the end of February, about 45% of the fund's assets are rated Aa or Aaa. As the economy begins to improve, those state GOs and lease bonds should outperform issues with higher credit ratings.

Q. AT THE END OF FEBRUARY, NEARLY 20% OF THE FUND'S INVESTMENTS WERE IN HEALTH-CARE BONDS, UP FROM 17.2% A YEAR EARLIER. ARE YOU CONCERNED THAT HEALTH-CARE REFORM WILL HURT THOSE ISSUERS?

A. We are cautious on health care because the Clinton plan could affect the health care sector. However, the issues I choose are mainly strong hospitals that are expected to survive and potentially benefit from any shake-up likely to occur. In fact, a number carry ratings of Aa or Aaa.

Q. DID THE LOS ANGELES EARTHQUAKE AFFECT THE FUND'S PERFORMANCE?

A. Not much. During the past two or three years I de-emphasized issuers in the Los Angeles area because the economy in southern California has been especially sluggish. As a result, we only held one or two bonds of issuers in the vicinity of the earthquake. I believe in geographic diversification, so the fund's investments are spread across different regions of the state. That should offer some protection against future natural disasters.

Q. WHAT'S YOUR OUTLOOK FOR THE TAX-EXEMPT BOND MARKET?

A. The economy will probably show modest growth and inflation seems likely to remain under control, so I don't expect interest rates to rise dramatically from here. But interest rates aren't likely to fall much more either, so gains in the bond market won't be driven by falling rates. The tax-exempt market will probably benefit from a lower supply of new issues. Also, demand for tax-exempt bonds will likely increase as investors realize that the new, higher federal income tax rates. The combination of lower supply and higher demand should help support prices in the tax-exempt market.

Q. WHAT ABOUT THE CALIFORNIA TAX-EXEMPT MARKET?

A. I still feel that California bonds are attractive because the state's economy is showing signs that it is set to begin a recovery. As that happens, state GOs and lease bonds, should be especially strong performers, because their credit quality is closely linked to the economy. Those issues may be volatile over the next several months as the state goes through its budget process. But I'll probably take advantage of any price declines to buy more.

FUND FACTS

GOAL: to provide high current income exempt from California state and federal income taxes

START DATE: July 7, 1984

SIZE: as of February 28, 1994 over \$575 million

MANAGER: John Haley, since September, 1985; manager, Spartan California Tax-Free High Yield Portfolio, since December 1989; Fidelity California Tax-Free Insured Portfolio, since September 1986; Fidelity Advisor Tax-Exempt Portfolio, since 1985

(checkmark)

JOHN HALEY ON THE FUND'S

STRATEGY:

"The fund can invest one-third of its holdings in securities rated below investment-grade. However during recent years, there have been few attractive opportunities in this area. At the same time, I expected a more severe economic downturn in the California

economy than most observers. As a result, I stuck mainly with highly-rated issues. But during the past six months I have begun to identify factors that suggest the California economy is reaching a bottom. As a result, I've been increasing the fund's investment in higher-yielding issues. As the economy improves, they should be strong performers."

(bullet) As of February 28, 1994
34.5%

of the funds investments were in Aaa-rated bonds, 39.1% in Aa- and A-rated bonds, and 15.2% in bonds rated Baa or below.

(bullet) The fund's duration as of February 28, 1994 was 8.9 years. That means the fund's share price could decline roughly 8.9% if interest rates rose one percentage point, and rise 8.9% if rates fell one percentage point.

SECURITY TYPE ABBREVIATIONS

TRAN - Tax & Revenue Anticipation Notes
 VRDN - Variable Rate Demand Notes
 LEGEND

- (a) The coupon rate shown on floating or adjustable rate securities represents the rate at period end.
- (b) Standard & Poor's Corporation credit ratings are used in the absence of a rating by Moody's Investors Service, Inc.
- (c) Inverse floating rate security is a security where the coupon is inversely indexed to a floating interest rate. The price will be more volatile than the price of a comparable fixed rate security.
- (d) Security collateralized by an amount sufficient to pay interest and principal.
- (e) Security purchased on a delayed delivery basis (see Note 2 of Notes to Financial Statements).

(f) Security was pledged to cover margin requirements for futures contracts. At the period end, the value of securities pledged amounted to \$3,215,000.

(g) Debt obligation initially issued in zero coupon form which converts to coupon form at a specified rate and date.

OTHER INFORMATION

The composition of long-term debt holdings as a percentage of total value of investment in securities, is as follows (ratings are unaudited):

MOODY'S RATINGS S&P RATINGS
 Aaa, Aa, A 59.2% AAA, AA, A 72.7%
 Baa 7.8% BBB 7.7%

 Caa 0.0% CCC 0.0%
 Ca, C 0.0% CC, C 0.0%
 D 0.0%

The percentage not rated by either S&P or Moody's amounted to 11.0%. The distribution of municipal securities by revenue source, as a percentage of total value of investment in securities, is as follows:

Lease Revenue 21.8%
 Health Care 20.5
 Special Tax 20.0
 Others (individually less than 10%) 37.7
 TOTAL 100.0%

INCOME TAX INFORMATION

At February 28, 1994 the aggregate cost of investment securities for income tax purposes was \$530,077,875. Net unrealized appreciation aggregated \$36,439,089, of which \$39,960,935 related to appreciated investment securities and \$3,521,846 related to depreciated investment securities. The fund hereby designates \$1,160,000 as a capital gain dividend for the purpose of the dividend paid deduction.

At February 28, 1994 the fund was required to defer \$6,602,000 of losses on futures contracts and options.

* ANNUALIZED
(dagger) TOTAL RETURNS FOR PERIODS OF LESS THAN ONE YEAR ARE NOT ANNUALIZED.
FIDELITY CALIFORNIA TAX-FREE INSURED PORTFOLIO

PERFORMANCE: THE BOTTOM LINE

There are several ways to evaluate a fund's historical performance. You can look at the total percentage change in value, the average annual percentage change, or the growth of a hypothetical \$10,000 investment. Each figure includes changes in a fund's share price, reinvestment of any dividends (or income) and capital gains (the profits the fund earns when it sells bonds that have grown in value). You can also look at the fund's income. If Fidelity had not reimbursed certain fund expenses during the periods shown, the total returns, dividends and yields would have been lower.

PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	PAST 5 YEARS	LIFE OF FUND
California Tax-Free Insured	4.59%	56.12%	72.51%
Lehman Brothers Municipal Bond Index	5.54%	59.02%	n/a
Average California Insured Tax-Exempt Municipal Bond Fund	4.99%	57.31%	n/a
Consumer Price Index	2.52%	20.64%	33.12%

CUMULATIVE TOTAL RETURNS reflect actual performance over a set period - in this case, one year, five years, or since the fund started on September 18, 1986. For example, if you invested \$1,000 in a fund that had a 5% return over the past year, you would end up with \$1,050. You can compare these figures to the performance of the Lehman Brothers Municipal Bond Index - a broad gauge of the municipal bond market. To measure how the fund stacked up against its peers, you can look at the average California insured tax-exempt municipal bond fund, which reflects the performance of only 18 California insured tax-exempt municipal bond funds tracked by Lipper Analytical Services. Both benchmarks include reinvested dividends and capital gains, if any. Comparing the fund's performance to the consumer

price index helps show how your fund did compared to inflation. (The periods covered by the CPI numbers are the closest available match to those covered by the fund.)

AVERAGE ANNUAL TOTAL RETURNS

PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	PAST 5 YEARS	LIFE OF FUND
California Tax-Free Insured	4.59%	9.32%	7.59%
Lehman Brothers Municipal Bond Index	5.54%	9.72%	n/a
Average California Insured Tax-Exempt Municipal Bond Fund	4.99%	9.48%	n/a
Consumer Price Index	2.52%	3.82%	3.93%

AVERAGE ANNUAL TOTAL RETURNS take the fund's actual (or cumulative) return and show you what would have happened if the fund had performed at a constant rate each year.

\$10,000 OVER LIFE OF FUND

\$27,312
\$24,247
'94

\$10,000 OVER LIFE OF FUND: Let's say you invested \$10,000 in Fidelity California Tax-Free Insured Portfolio on September 30, 1986, shortly after the fund started. As the chart shows, by February 28, 1994, the value of your investment would have grown to \$17,268 - a 72.68% increase on your initial investment. For comparison, look at how the Lehman Brothers Municipal Bond Index did over the same period. With dividends reinvested, the same \$10,000 would have grown to \$18,561 - a 85.61% increase.

UNDERSTANDING

PERFORMANCE

How a fund did yesterday is no guarantee of how it will do tomorrow. Bond prices, for example, move in the opposite direction of interest rates. In turn, the share price, return, and yield of a fund that invests in bonds will vary. That means if you sell your shares during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

(checkmark)

INCOME

YEARS ENDED FEBRUARY 28,	1994	1993	1992	1991	1990
Income return	5.35%	6.43%	6.48%	6.58%	6.75%

Capital gain return	1.87%	0.00%	0.00%	0.00%	0.00%
Change in share price	-2.63%	9.32%	3.91%	0.73%	2.12%
Total return	4.59%	15.75%	10.39%	7.31%	8.87%

INCOME returns, capital gain returns, and changes in share price are all part of a bond fund's total return. An income return reflects the dividends paid by the fund. A capital gain return reflects the amount paid by the fund to shareholders based on the profits it has from selling bonds that have grown in value. Both returns assume the dividends or gains are reinvested. Changes in the fund's share price include changes in the prices of the bonds owned by the fund.

DIVIDENDS AND YIELD

PERIODS ENDED FEBRUARY 28, 1994	PAST 30 DAYS	PAST 6 MONTHS	PAST 1 YEAR
Dividends per share	n/a	28.43(cents)	58.89(cents)
Annualized dividend rate	n/a	5.15%	5.33%
Annualized yield	4.90%	n/a	n/a
Tax-equivalent yield	8.60%	n/a	n/a

DIVIDENDS per share show the income paid by the fund for a set period. If you annualize this number, based on an average share price of \$11.14 over the past six months and \$11.05 over the past year, you can compare the fund's income over these two periods. The 30-day annualized YIELD is a standard formula for all funds based on the yields of the bonds in the

fund, averaged over the past 30 days. This figure shows you the yield characteristics of the fund's investments at the end of the period. It also helps you compare funds from different companies on an equal basis. The tax-equivalent yield shows what you would have to earn on a taxable investment to equal the fund's tax-free yield, if you're in the 43.04% combined effective 1994 federal and state tax bracket.

FIDELITY CALIFORNIA TAX-FREE INSURED PORTFOLIO

FUND TALK: THE MANAGER'S OVERVIEW

MARKET RECAP

Bond investments - including tax-free issues - provided solid returns for the 12 months ended February 28, 1994, despite a dramatic downturn in February. Falling interest rates pushed up bond prices steadily through mid-October, when the yield on the benchmark 30-year Treasury bond reached a historic low of 5.79%. By year-end, a strengthening economy had fueled mild inflation fears. That pushed up the yield on the 30-year bond to 6.35% on December 31, which forced investors to give back some of their earlier profits. Inflation jitters eased and bond yields dropped in January. However, when the Federal Reserve Bank raised short-term interest rates in an attempt to control inflation on February 4, investors reacted negatively. At the end of February, the yield on 30-year bonds was 6.66%, about 38 basis points higher than at the beginning of the month. Over the year, higher federal income taxes boosted demand for municipal bonds. But municipal bond prices were hurt by the Fed's action in February and by record new issuance, which kept supplies high and dampened prices. The return on the Lehman Brothers Municipal Bond Index, a broad measure of the tax-free market, rose 5.54%. By comparison, the Lehman Brothers Aggregate Bond Index, which tracks investment-grade taxable bonds, returned 5.40%. Globally, falling interest rates and low inflation drove good annual returns in Europe, Japan, and most emerging markets, although many of these markets fell in February along with the U.S. bond market. The Salomon Brothers World Government Bond Index - which includes U.S. issues - returned 9.34%, while the J.P. Morgan Emerging Markets Bond Index was up a dramatic 29.46%.

An interview with John Haley, Portfolio Manager of Fidelity California Tax-Free Insured Portfolio

Q. JOHN, HOW DID THE FUND PERFORM?

A. The fund's performance slipped during the past year. The fund had a total return of 4.59% for the year ended February 28, 1994. The average California insured tax-free bond fund posted a total return of 4.99% during the period, according to Lipper Analytical Services.

Q. WHY DID THE FUND LAG THE AVERAGE?

A. Mainly because its duration was somewhat longer than that of the typical California insured tax-free bond fund. That meant its share price was more sensitive to interest rate changes. During the year I expected interest rates would continue to decline and drive bond prices higher, so I extended the fund's duration from about 7.5 years to 11.3 years. This helped the fund during most of the period. However, when interest rates rose in the fourth quarter of '94 and then again in February, the fund gave back some of its gains.

Q. DID YOU RE-STRUCTURE THE FUND TO INCREASE ITS DURATION?

A. Somewhat. I added to the fund's stake in non-callable coupon and zero-coupon bonds, neither of which can be redeemed early by their issuers. I invested heavily in bonds that are due to mature in 10 to 20 years; they recently accounted for 41% of the fund's investments.

Q. WHY DID THE FUND HOLD SOME UNINSURED BONDS?

A. Insured bonds still accounted for 70% of the fund's investments at the end of the period, while approximately 30% of the fund's investments were in uninsured bonds. As the economy in the state improves, those uninsured bonds should benefit and boost the total return of the fund. Some of the fund's uninsured bonds were pre-refunded during the period-that is, their issuers set aside a pool of Treasury securities to pay the remaining interest and principal due to bondholders. As a result, the bonds' credit ratings went from A to Aaa, causing investors to bid their prices higher.

Q. YOU INCREASED THE PERCENTAGE OF THE FUND'S ASSETS IN HEALTH-CARE BONDS. WHY - WITH ALL THE CONTROVERSY ABOUT HEALTH-CARE REFORM?

A. It's true that in the past six months the fund's stake in health-care has grown from 6% to 9%. That's not to say we aren't cautious on the sector because the Clinton plan could affect these issues. However, the bonds I choose are mainly strong hospitals that are expected to survive and possibly benefit from any shake-up likely to occur. In fact, most are insured.

Q. WHAT EFFECT DID THE RECENT EARTHQUAKE HAVE ON THE FUND'S PERFORMANCE?

A. The fund only held one or two bonds of issuers in the vicinity of the earthquake, and they were insured. Fortunately, during the past two or three years I have de-emphasized issuers in the Los Angeles area because the economy in southern California has been especially sluggish. I've also tried to spread the fund's investments across different regions of the state. That helps offer some protection against natural disasters, if and when they occur.

Q. WHAT'S YOUR OUTLOOK FOR THE TAX-EXEMPT BOND MARKET?

A. The economy will probably show modest growth and inflation seems likely to remain under control, so I don't expect interest rates to rise dramatically from here. But interest rates aren't likely to fall much more either, so gains in the bond market won't be driven by falling rates. The tax-exempt market will probably benefit from a lower supply of new issues, which will likely amount to around \$175 to \$200 billion versus \$290 billion last year. Also, demand for tax-exempt bonds will likely increase as investors realize that the new, higher federal income tax rates increase the value of the tax exemption these issues offer. And about \$35 billion in tax-exempt bonds will mature in 1994, creating still more demand for new bonds. The combination of lower supply and higher demand should help support prices in the tax-exempt market.

Q. WHAT ABOUT THE CALIFORNIA INSURED TAX-EXEMPT MARKET?

A. I still feel that California bonds are attractive because the state's economy is showing signs that it is set to begin a recovery. As that happens, state GOs and lease bonds, which are backed by leases held by the state, should be especially strong performers, because their credit quality is closely linked to the economy. Those issues may be volatile over the next several months as the state goes through its budget process. But I'll probably take advantage of any price declines to increase the fund's investment in them.

FUND FACTS

GOAL: to provide high current income exempt from California state and federal income taxes by investing primarily in long-term California municipal bonds covered by insurance
START DATE: September 18, 1986
SIZE: as of February 28, 1994, over \$291 million
MANAGER: John Haley, since September 1986; manager, Spartan California Municipal High Yield Portfolio, since December 1989; Fidelity California Tax-Free High Yield Portfolio, and Fidelity Advisor Tax-Exempt Portfolio, since September 1985
(checkmark)

JOHN HALEY ON THE FUND'S

STRATEGY:
"During the past two to three years I expected a more severe economic downturn in

the California economy than most observers. As a result, I stuck mainly with insured issues. Recently I have begun to identify factors that suggest the California economy is reaching a bottom. I expect a gradual rebound in the state's economy, and that should help lower-rated investment-grade bonds outperform higher-rated ones. Thus, I'm using Fidelity's fixed-income research analysts to identify stable and improving investment-grade securities that could enhance the yield and total return of the portfolio."

(bullet) As of February 28, 1994, 41% of the fund's investments were in bonds with maturities of 10 to 20 years, and 48% were in bonds with maturities of greater than 20 years.

(bullet) The fund's investment in bonds rated Aaa accounted for 75.5% its total investments.

(bullet) About 30% of the fund's investments were in uninsured bonds, all rated Baa or higher.

(bullet) About one-third of the fund was in lease rental bonds, which could improve with a pickup in the California economy.

LEGEND
(a) The coupon rate shown on floating or adjustable rate securities represents the rate at period end.
(b) Standard & Poor's Corporation credit ratings are used in the absence of a rating by Moody's Investors Service, Inc.
(c) Inverse floating rate security is a security where the coupon is inversely indexed to a floating interest rate. The price will be more volatile than the price of a comparable fixed rate security.
(d) Security collateralized by an amount sufficient to pay interest and principal.
(e) Security purchased on a delayed delivery basis (see Note 2 of Notes to Financial Statements).
(f) Security was pledged to cover margin requirements for futures contracts. At the period end, the value of securities pledged amounted to \$1,106,950.
(g) Debt obligation initially issued in zero coupon form which converts to coupon form at a specified rate and date.

OTHER INFORMATION
The composition of long-term debt holdings as a percentage of total value of investment in securities, is as follows (ratings are unaudited):
MOODY'S RATINGS S&P RATINGS
Aaa, Aa, A 85.5% AAA, AA, A 90.0%
Baa 7.0% BBB 2.4%
Ba 0.0% BB 0.0%
B 0.0% B 0.0%
Caa 0.0% CCC 0.0%
Ca, C 0.0% CC, C 0.0%
D 0.0%

The percentage not rated by either S&P or Moody's amounted to 0.4%.
The distribution of municipal securities by revenue source, as a percentage of total value of investment in securities, is as follows:
Lease Revenue 33.1%
Special Tax 20.1
Others (individually less than 10%) 46.8
TOTAL 100.0%

INCOME TAX INFORMATION
At February 28, 1994, the aggregate cost of investment securities for income tax purposes was \$273,871,483. Net unrealized appreciation aggregated \$10,971,131, of which \$14,074,614 related to appreciated investment securities and \$3,103,483 related to depreciated investment securities.
The fund hereby designates \$2,359,433 as a capital gain dividend for the purpose of the dividend paid deduction.

FIDELITY CALIFORNIA TAX-FREE MONEY MARKET PORTFOLIO

An interview with Deborah Watson, Portfolio Manager of Fidelity California Tax-Free Money Market Portfolio

Q. DEBORAH, HOW HAS THE SHORT-TERM MARKET BEHAVED OVER THE LAST SIX MONTHS?

A. Short-term interest rates remained stable through the fall, despite a mild uptick in November fueled by inflation fears. The Federal Reserve kept the federal funds rate at or near 3% from August through January. Then, on February 4, the Fed pushed the fed funds rate up to 3.25%, essentially raising all short-term rates.

Q. WAS THE FUND WELL POSITIONED FOR HIGHER RATES?

A. For the most part, yes. I had gradually reduced the fund's average maturity through the fall and early winter; it fell from 81 days at the end of August to 48 days at the end of January. The fund's shorter average maturity will allow me to capture the higher yields available following February's rate hike. In addition, supply and demand played a role in how I positioned the fund earlier in the year. California usually issues its heaviest supply of new obligations during the summer months, and 1993 was no exception. I lengthened the fund's average maturity through August, and was able to lock in higher-yielding issues before rates fell further. Issuance then slowed heading into fall, which caused me to gradually shorten the average maturity.

Q. HOW DID CALIFORNIA'S RECESSION AFFECT THE FUND?

A. The state's weak economy caused the financial health of many California issuers to deteriorate. That meant there were fewer securities available that met Fidelity's high standards for credit quality. However, I compensated by buying more of those that did, resulting in little effect on the fund's yield. Rebuilding efforts after January's earthquake should boost economic growth in 1994. However, the annual borrowing season for state and local governments is fast approaching, and their financial picture hasn't improved. This may further reduce the supply of high quality issues in California this summer.

Q. HOW DID THE FUND PERFORM?

A. The fund's seven-day yield on February was 1.91%, up slightly from 1.83% a year ago. The latest yield translates into a tax equivalent yield of 3.35% for investors in the 43.04% combined federal and state tax bracket. The fund's total return - which assumes reinvestment of monthly dividends - for the 12 months ended February 28 was 1.97%. The average California tax-free money market fund tracked by IBC/Donoghue returned 1.96% during the same period.

Q. WHAT'S YOUR VIEW GOING FORWARD?

A. I think short-term interest rates will probably rise gradually over the next six months, while the Fed continues inching up the fed funds rate to control inflation. That said, I'll probably keep the fund's average maturity in a neutral 35- to 50-day range. In addition, I've increased the fund's stake in variable rate instruments to 59% by February 28. The coupons (stated interest rates) on these securities are reset at fixed intervals - for example, weekly or monthly - so when rates rise, the fund can benefit from higher coupons at these reset intervals.

FUND FACTS

GOAL: tax-free income with share price stability by investing in high-quality, short-term California municipal securities

START DATE: July 7, 1984

SIZE: as of February 28, 1994, \$611 million

MANAGER: Deborah Watson, since July 1988; manager, Spartan California Municipal Money Market Portfolio, since November 1989; Spartan Florida Municipal Money Market Portfolio, since August 1992; Spartan Pennsylvania Municipal Money Market Portfolio, since September 1989

(checkmark)

WORDS TO KNOW

COMMERCIAL PAPER: A security issued by a municipality to finance capital or operating needs.

FEDERAL FUNDS RATE: The interest rate banks charge each other for overnight loans.

MATURITY: The time remaining

before an issuer is scheduled to repay the principal amount on a debt security. When the fund's average maturity - weighted by dollar amount - is short, the fund manager is anticipating a rise in interest rates. When the average maturity is long, the manager is expecting rates to fall. When the average maturity is neutral, the manager wants the flexibility to respond to rising rates, while still capturing a portion of the higher yields available from issues with longer maturities.

MUNICIPAL NOTE: A security issued in advance of future tax or other revenues and payable from those specific sources.

TENDER BOND: A variable-rate, long-term security that gives the bond holder the option to redeem the bond at face value before maturity.

VARIABLE RATE DEMAND NOTE (VRDN): A tender bond that can be redeemed on short notice, typically one or seven days. VRDNs are useful in managing the fund's average maturity and liquidity.

FIDELITY CALIFORNIA TAX-FREE MONEY MARKET PORTFOLIO

PERFORMANCE: THE BOTTOM LINE

To measure a money market fund's performance, you can look at either total return or yield. Total return reflects the change in a fund's share price over a given period and reinvestment of its dividends (or income). Yield measures the income paid by a fund. Since a money market fund tries to maintain a \$1 share price, yield is an important measure of performance. If Fidelity had not reimbursed certain fund expenses during the periods shown, the total returns, dividends and yields would have been lower.

CUMULATIVE TOTAL RETURNS

PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	PAST 5 YEARS	LIFE OF FUND
California Tax-Free Money Market	1.97%	20.38%	49.06%
Consumer Price Index	2.52%	20.64%	41.47%
Average California Tax-Free Money Market Fund	1.96%	20.22%	n/a

CUMULATIVE TOTAL RETURNS reflect actual performance over a set period - in this case, one year, five years or since the fund started on July 7, 1984. For example, if you invested \$1,000 in a fund that had a 5% return over the past year, you would end up with \$1,050. Comparing the fund's performance to the consumer price index (CPI) helps show how your investment did compared to inflation. To measure how the fund stacked up against its peers, you can compare its return to the average California tax-free money market fund's total return. This average currently reflects the performance of 42 California tax-free money market funds tracked by IBC/Donoghue. (The periods covered by the CPI and IBC/Donoghue numbers are the closest available match to those covered by the fund.)

AVERAGE ANNUAL TOTAL RETURNS

PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	PAST 5 YEARS	LIFE OF FUND
California Tax-Free Money Market	1.97%	3.78%	4.22%
Consumer Price Index	2.52%	3.82%	3.65%
Average California Tax-Free Money Market Fund	1.96%	3.76%	n/a

AVERAGE ANNUAL TOTAL RETURNS take the fund's actual (or cumulative) return and show you what would have happened if the fund had performed at a constant rate each year.

YIELD refers to the income paid by the fund over a given period. Yields for money market funds are usually for seven-day periods, expressed as annual percentage rates. A yield that assumes income earned is reinvested or compounded is called an effective yield. The chart above shows the fund's current seven-day yield at quarterly intervals over the past year. You can compare these yields to the average tax-free money market fund. Or you can look at the fund's tax-equivalent yield, which is based on a combined effective 1994 federal and state income tax rate of 43.04%. The tax-equivalent figures are useful in seeing how the fund stacked up against the average taxable money market fund as tracked by IBC/Donoghue.

A MONEY MARKET FUND'S TOTAL RETURNS AND YIELDS REFLECT PAST RESULTS RATHER THAN PREDICT FUTURE PERFORMANCE.

COMPARING PERFORMANCE

Yields on tax-free investments are usually lower than yields on taxable investments. However, a straight comparison between the two may be misleading because it ignores the way taxes reduce taxable returns. Tax-equivalent yield - the yield you'd have to earn on a similar taxable investment to match the tax-free yield - makes the comparison more meaningful. Keep in mind that the U.S. government neither insures nor guarantees a money market

fund. And there is no assurance that a money fund will maintain a \$1 share price. (checkmark)

NOTES TO FINANCIAL STATEMENTS

For the period ended February 28, 1994

1. SIGNIFICANT ACCOUNTING

POLICIES.

Fidelity California Tax-Free High Yield Portfolio (the high yield fund) and Fidelity California Tax-Free Insured Portfolio (the insured fund) are funds of Fidelity California Municipal Trust. Fidelity California Tax-Free Money Market Portfolio (the money market fund) is a fund of Fidelity California Municipal Trust II. Each trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company. Fidelity California Municipal Trust and Fidelity California Municipal Trust II (the trusts) are organized as a Massachusetts business trust and a Delaware business trust, respectively. On November 19, 1992, the Trustees approved a change in the fiscal year-end of the trusts to February 28. Each fund is authorized to issue an unlimited number of shares. The following summarizes the significant accounting policies of the funds:

SECURITY VALUATION.

HIGH YIELD AND INSURED FUNDS. Securities are valued based upon a computerized matrix system and/or appraisals by a pricing service, both of which consider market transactions and dealer-supplied valuations. Short-term securities maturing within sixty days are valued either at amortized cost or original cost plus accrued interest, both of which approximate current value. Securities for which quotations are not readily available through the pricing service are valued at their fair value as determined in good faith under consistently applied procedures under the general supervision of the Board of Trustees.

MONEY MARKET FUND. As permitted under Rule 2a-7 of the 1940 Act, and certain conditions therein, securities are valued initially at cost and thereafter assume a constant amortization to maturity of any discount or premium.

INCOME TAXES. As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, each fund is not subject to income taxes to the extent that it distributes all of its taxable income for the fiscal year. The schedules of investments include information regarding income taxes under the caption "Income Tax Information."

INTEREST INCOME. Interest income, which includes amortization of premium and accretion of original issue discount, is accrued as earned. For the money market fund, accretion of market discount represents unrealized gain until realized at the time of a security disposition or maturity.

EXPENSES. Most expenses of each trust can be directly attributed to a fund. Expenses which cannot be directly attributed are apportioned between the funds in the trust.

DISTRIBUTIONS TO SHAREHOLDERS. Dividends are declared daily and paid monthly from net interest income. Distributions to shareholders from realized capital gains on investments, if any, are recorded on the ex-dividend date.

1. SIGNIFICANT ACCOUNTING

POLICIES - CONTINUED

DISTRIBUTIONS TO SHAREHOLDERS - CONTINUED

Income and capital gain distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. These differences are primarily due to differing treatments for losses deferred due to wash sales and futures and options transactions.

SECURITY TRANSACTIONS. Security transactions are accounted for as of trade date. Gains and losses on securities sold are determined on the basis of identified cost.

CHANGE IN ACCOUNTING FOR DISTRIBUTIONS TO SHAREHOLDERS. Effective March 1, 1993 the funds adopted Statement of Position 93-2: Determination, Disclosure, and Financial Statement Presentation of Income, Capital Gain, and Return of Capital Distributions by Investment Companies. As a result, the funds changed the classification of distributions to shareholders to better disclose the differences between financial statement amounts and distributions determined in accordance with income tax regulations. Accordingly, amounts as of February 28, 1994 have been reclassified as follows:

HIGH YIELD FUND. Paid in capital and accumulated net realized loss on investments decreased by \$525,684.

INSURED FUND. Paid in capital and accumulated net realized loss on investments decreased by \$42,568.

MONEY MARKET FUND. Paid in capital and accumulated net realized loss on investments increased by \$2,034.

2. OPERATING POLICIES.

FUTURES CONTRACTS AND OPTIONS. The high yield and insured funds may invest in futures contracts and write options. These investments involve to varying degrees, elements of market risk and risks in excess of the amount recognized in their Statements of Assets and Liabilities. The face or contract amounts reflect the extent of the involvement the high yield and insured funds have in the particular classes of instruments. Risks may be caused by an imperfect correlation between movements in the price of the instruments and the price of the underlying securities and interest rates. Risks also may arise if there is an illiquid secondary market for the instruments, or due to the inability of counterparties to perform.

Futures contracts are valued at the settlement price established each day by the board of trade or exchange on which they are traded. Options traded on an exchange are valued using the last sale price or, in the absence of a sale, the last offering price. Options traded over-the-counter are valued using dealer-supplied valuations.

DELAYED DELIVERY TRANSACTIONS. Each fund may purchase or sell securities on a when-issued or forward commitment basis. Payment and delivery may take place a month or more after the date of the transaction. The price of the underlying securities and the date when the securities will be delivered and paid for are fixed at the time the transaction is negotiated.

3. PURCHASES AND SALES OF

INVESTMENTS.

HIGH YIELD FUND. Purchases and sales of securities, other than short-term securities, aggregated \$251,239,277 and \$251,166,205, respectively. The gross market value of futures contracts opened and closed amounted to \$231,823,309 and \$244,703,050, respectively.

INSURED FUND. Purchases and sales of securities, other than short-term securities, aggregated \$196,311,161 and \$170,227,006, respectively. The gross market value of futures contracts opened and closed amounted to \$122,485,024 and \$135,616,823 respectively.

4. FEES AND OTHER TRANSACTIONS WITH AFFILIATES.

MANAGEMENT FEE. As each fund's investment adviser, Fidelity Management & Research Company (FMR) receives a monthly fee that is calculated on the basis of a group fee rate plus a fixed individual fund fee rate applied to the average net assets of each fund. The group fee rate is the weighted average of a series of rates ranging from .15% to .37% and is based on the monthly average net assets of all the mutual funds advised by FMR. The annual individual fund fee rate is .25%. For the period, the management fees were equivalent to an annual rate of .41% of average net assets for the high yield, insured and money market funds, respectively.

The Board of Trustees approved a new group fee rate schedule with rates ranging from .1325% to .3700%. Effective November 1, 1993, FMR has voluntarily agreed to implement this new group fee rate schedule as it results in the same or a lower management fee (see Note 6).

SUB-ADVISER FEE. As the money market fund's investment sub-adviser, FMR Texas Inc., a wholly owned subsidiary of FMR, receives a fee from FMR of 50% of the management fee payable to FMR. The fee is paid prior to any voluntary expense reimbursements which may be in effect, and after reducing the fee for any payments by FMR pursuant to the fund's Distribution and Service Plan.

DISTRIBUTION AND SERVICE PLAN. Pursuant to the Distribution and Service Plans (the Plans), and in accordance with Rule 12b-1 of the 1940 Act, FMR or the funds' distributor, Fidelity Distributors Corporation (FDC), an affiliate of FMR, may use their resources to pay administrative and promotional expenses related to the sale of each fund's shares. Subject to the approval of each Board of Trustees, the Plans also authorize payments to third parties that assist in the sale of each fund's shares or render shareholder support services. FMR or FDC has informed the funds that payments made to third parties under the Plans amounted to \$3,519, \$4,748 and \$31,948 for the high yield, insured and money market funds, respectively, for the period.

TRANSFER AGENT AND ACCOUNTING FEES. United Missouri Bank, N.A. (the Bank) is the custodian and transfer and shareholder servicing agent for the funds. The Bank has entered into a sub-contract with Fidelity Service Co. (FSC), an affiliate of FMR, under which FSC per

4. FEES AND OTHER TRANSACTIONS WITH AFFILIATES - CONTINUED

TRANSFER AGENT AND ACCOUNTING FEES

- - CONTINUED

forms the activities associated with the funds' transfer and shareholder servicing agent and accounting functions. The funds pay transfer agent fees based on the type, size, number of accounts and number of transactions made by shareholders. FSC pays for typesetting, printing and mailing of all shareholder reports, except proxy statements. The accounting fee is based on the level of average net assets for the month plus out-of-pocket expenses. For the period, FSC received transfer agent and accounting fees amounting to \$558,014 and \$243,183 for the high yield fund, \$346,638, and \$134,786 for the insured fund and \$1,016,834 and \$107,448 for the money market fund, respectively.

Shareholders participating in the Fidelity Ultra Service Account (Registered trademark) Program (the Program) pay a \$5.00 monthly fee to Fidelity Brokerage Services, Inc. (FBSI), an affiliate of FMR, for performing services associated with the Program. For the period, fees paid to FBSI by shareholders participating in the Program amounted to \$148,453.

5. EXPENSE REDUCTIONS

INSURED FUND. For the period, FMR voluntarily agreed to reimburse the fund's operating expenses (excluding interest, taxes, brokerage commissions and extraordinary expenses) above a specified percentage of average net assets. This expense limitation ranged from an annual rate of .35% to .55% of average net assets and the reimbursement reduced expenses by \$352,015.

6. SHAREHOLDER MEETING.

At a special meeting of shareholders of the high yield and insured funds held on February 16, 1994, shareholders approved an amended management contract and amendments to certain fundamental investment limitations of the funds.

The new management contract, which became effective on March 1, 1994 will reflect the new group fee rate schedule which FMR voluntarily implemented on November 1, 1993.

REPORT OF INDEPENDENT ACCOUNTANTS

To the Trustees and Shareholders of Fidelity California Municipal Trust and Fidelity California Municipal Trust II

(the Trusts):

Fidelity California Tax-Free
High Yield Portfolio
Fidelity California Tax-Free
Insured Portfolio
Fidelity California Tax-Free

Money Market Portfolio

In our opinion, the accompanying statements of assets and liabilities, including the schedules of investments (except for Moody's and Standard & Poor's ratings), and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Fidelity California Tax-Free High Yield Portfolio, Fidelity California Tax-Free Insured Portfolio and Fidelity California Tax-Free Money Market Portfolio at February 28, 1994, the results of their operations, the changes in their net assets and the financial highlights for the periods indicated, in conformity with generally accepted accounting principles. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of each portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with generally accepted auditing standards which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities owned at February 28, 1994 by correspondence with the custodian and brokers and the application of alternative auditing procedures where confirmations from brokers were not received, provide a reasonable basis for the opinion expressed above.

PRESIDENT'S MESSAGE

DEAR SHAREHOLDER:

No one wants to pay more taxes than they have to. But a recent survey of 500 U.S. households, conducted by Fidelity and Yankelovich Partners, showed that few people took steps to reduce their taxes under the new tax laws that went into effect last year. In fact, many people were not completely aware of the changes until they filed their 1993 tax returns.

Whether or not you're someone whose tax bill increased as a result of these changes, it may make sense to consider ways to keep more of what you earn. First, if your employer offers a 401(k) or 403(b) retirement savings plan, consider enrolling. These plans are set up so you can make regular contributions -

before taxes - to a retirement savings plan. They offer a disciplined savings strategy, the ability to accumulate earnings tax-deferred, and immediate tax savings. For example, if you earn \$40,000 a year and contribute 7% of your salary to your 401(k) plan, your annual contribution is \$2,800. That reduces your taxable income to \$37,200 and, if you're in the 28% tax bracket, saves you \$784 in federal taxes. In addition, you pay no taxes on any earnings until withdrawal.

It may be a good idea to contact your benefits office as soon as possible to find out when you can enroll or increase your contribution. Most employers allow employees to make changes only a few times each year.

Second, consider an IRA. Many people are eligible to make an IRA contribution (up to \$2,000) that is fully tax deductible. That includes people who are not covered by company pension plans, or those within certain income brackets. Even if you don't qualify for a fully deductible contribution, any IRA earnings will grow tax-deferred until withdrawal.

Third, consider adding to your tax-free investments, either municipal bonds or municipal bond funds. Often these can provide higher after-tax yields than comparable taxable investments. For example, if you're in the new 36% federal income tax bracket and invest \$10,000 in a taxable investment yielding 7%, you'll pay \$252 in federal taxes and receive \$448 in income. That same \$10,000 invested in a tax-free bond fund yielding 5.5% would allow you to keep \$550 in income.

These are three investment strategies that could help lower your tax bill in 1994. If you're interested in learning more, please call us at 1-800-544-8888 or visit a Fidelity Investor Center. We look forward to talking with you.

Best regards,

Edward C. Johnson 3d, Chairman
SPARTAN CALIFORNIA MUNICIPAL HIGH YIELD PORTFOLIO

PERFORMANCE: THE BOTTOM LINE

There are several ways to evaluate a fund's historical performance. You can look at the total percentage change in value, the average annual percentage change, or the growth of a hypothetical \$10,000 investment. Each figure includes changes in a fund's share price, reinvestment of any dividends (or income) and capital gains (the profits the fund earns when it sells bonds that have grown in value), and the effect of the \$5 account closeout fee. You can also look at the fund's income. If Fidelity had not reimbursed certain fund expenses during the periods shown, the total returns, dividends and yields would have been lower.

CUMULATIVE TOTAL RETURNS

PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	LIFE OF FUND
Spartan California Municipal High Yield	5.62%	49.13%
Lehman Brothers Municipal Bond Index	5.54%	n/a
Average California Tax-Exempt Municipal Bond Fund	5.39%	n/a
Consumer Price Index	2.52%	16.52%

CUMULATIVE TOTAL RETURNS reflect actual performance over a set period - in this case, one year or since the fund started on November 27, 1989. For example, if you had invested \$1,000 in a fund that had a 5% return over the past year, you would end up with \$1,050. You can compare these figures to the performance of the Lehman Brothers Municipal Bond Index - a broad gauge of the municipal bond market. To measure how the fund stacked up against its peers, you can look at the average California tax-exempt municipal bond fund, which reflects the performance of 75 California tax-exempt municipal

bond funds tracked by Lipper Analytical Services. Both benchmarks include reinvested dividends and capital gains, if any. Comparing the fund's performance to the consumer price index helps show how your fund did compared to inflation. (The periods covered by the CPI numbers are the closest available match to those covered by the fund.)

AVERAGE ANNUAL TOTAL RETURNS

PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	LIFE OF FUND
Spartan California Municipal High Yield	5.62%	9.84%
Lehman Brothers Municipal Bond Index	5.54%	n/a
Average California Tax-Exempt Municipal Bond Fund	5.39%	n/a
Consumer Price Index	2.52%	3.66%

AVERAGE ANNUAL TOTAL RETURNS take the fund's actual (or cumulative) return and show you what would have happened if the fund had performed at a constant rate each year.

\$10,000 OVER LIFE OF FUND

\$27,312

\$24,247

'94

\$10,000 OVER LIFE OF FUND: Let's say you invested \$10,000 in Spartan California Municipal High Yield Portfolio on November 30, 1989, shortly after the fund started. As the chart shows, by February 28, 1994, the value of your investment would have grown to \$14,834 - a 48.34% increase on your initial investment. This assumes you still own the fund on February 28, 1994 and therefore does not include the effect of the \$5 account closeout fee. For comparison, look at how the Lehman Brothers Municipal Bond Index did over the same period. With dividends reinvested, the same \$10,000 would have grown to \$14,601 - a 46.01% increase.

UNDERSTANDING

PERFORMANCE

How a fund did yesterday is no guarantee of how it will do tomorrow. Bond prices, for example, move in the opposite direction of interest rates. In turn, the share price, return, and yield of a fund that invests in bonds will vary. That means if you sell your shares during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

(checkmark)

INCOME

YEARS ENDED FEBRUARY 28, 1994 1994 1993 1992 1991

Income return 5.62% 6.72% 6.84% 7.51%

Capital gain return 3.54% 0.74% 0.00% 0.00%

Change in share price -3.54% 7.59% 3.43% 1.89%

Total return 5.62% 15.05% 10.27% 9.40%

INCOME returns, capital gain returns, and changes in share price are all part of a bond fund's total return. An income return reflects the dividends paid by the fund. A capital gain return reflects the amount paid by the fund to shareholders based on the profits it has from selling bonds that have grown in value. Both returns assume the dividends or gains are reinvested. Changes in the fund's share price include changes in the prices of the bonds owned by the fund. Change in share price and total return figures include the effect of the \$5 account closeout fee.

DIVIDENDS AND YIELD

PERIODS ENDED FEBRUARY 28, 1994	PAST 30 DAYS	PAST 6 MONTHS	PAST 1 YEAR
Dividends per share	n/a	31.02(cents)	63.06(cents)
Annualized dividend rate	n/a	5.51%	5.59%
Annualized yield	5.26%	n/a	n/a
Tax-equivalent yield	9.23%	n/a	n/a

DIVIDENDS per share show the income paid by the fund for a set period. If you annualize this number, based on an average share price of \$11.35 over the past six months and \$11.28 over the past year, you can compare the fund's income over these two periods. The 30-day annualized YIELD is a standard formula for all funds based on the yields of the bonds in the fund, averaged over the past 30 days. This figure shows you the yield characteristics of the fund's investments at the end of the period. It also helps you compare funds from different companies on an equal basis. The tax-equivalent yield shows what you would have to earn on a taxable investment to equal the fund's tax-free yield, if you're in the 43.04% combined effective 1994 federal and state income tax bracket.

SPARTAN CALIFORNIA MUNICIPAL HIGH YIELD PORTFOLIO

FUND TALK: THE MANAGER'S OVERVIEW

MARKET RECAP

Bond investments - including tax-free issues - provided solid returns for the 12 months ended February 28, 1994, despite a dramatic downturn in February. Falling interest rates pushed up bond prices steadily through mid-October, when the yield on the benchmark 30-year Treasury bond reached a historic low of 5.79%. By year-end, a strengthening economy had fueled mild inflation fears. That pushed up the yield on the 30-year bond to 6.35% on December 31, which forced investors to give back some of their earlier profits. Inflation jitters eased and bond yields dropped in January. However, when the Federal Reserve Bank raised short-term interest rates in an attempt to control inflation on February 4, investors reacted negatively. At the end of February, the yield on the 30-year bonds was 6.66%, about 38 basis points higher than at the beginning of the month. Over the year, higher federal income taxes boosted demand for municipal bonds. But municipal bond prices were hurt by the Fed's action in February and by record new issuance, which kept supplies high and dampened prices. The return on the Lehman Brothers Municipal Bond Index, a broad measure of the tax-free market, rose 5.54%. By comparison, the Lehman Brothers Aggregate Bond Index, which tracks investment-grade taxable bonds, returned 5.40%. Globally, falling interest rates and low inflation drove good annual returns in Europe, Japan, and most emerging markets, although many of these markets fell in February along with the U.S. bond market. The Salomon Brothers World Government Bond Index - which includes U.S. issues - returned 9.34%, while the J.P. Morgan Emerging Markets Bond Index was up a dramatic 29.46%. An interview with John Haley, Portfolio Manager of Spartan California Municipal High Yield Portfolio

Q. JOHN, HOW DID THE FUND PERFORM?

A. Quite well. The fund had a total return of 5.62% for the year ended February 28, 1994. The average California tax-free bond fund posted a total return of 5.39% during the period, according to Lipper Analytical Services.

Q. WHAT ACCOUNTED FOR THE FUND'S PERFORMANCE?

A. First, having a somewhat longer duration than that of the typical

California tax-free bond fund. A longer duration makes a fund's share price more sensitive to interest rate changes. I extended the fund's duration from about 7.5 years to 9.2 years during the year because I expected interest rates would continue to decline and drive bond prices higher. That's what happened during most of the period, although the fund gave back some gains when interest rates rebounded in February. Second, the fund also held several issues that were pre-refunded during the period - that is, their issuers set aside a pool of Treasury securities to pay the remaining interest and principal due to bondholders. As a result, the bonds' credit ratings went from A to Aaa, causing investors to bid their prices higher. Plus, their maturities shortened, which also helped boost their prices.

Q. WHY DID YOU INCREASE THE FUND'S INVESTMENT IN STATE GENERAL OBLIGATION BONDS (GOS) AND STATE LEASE BONDS?

A. During the early part of the year I avoided state GOs, which are backed by the taxing power of the issuer, as well as California lease bonds, which are backed by leases paid by the state. The state's economy was still struggling, and I believed prices of those issues would lag bonds with higher ratings. That proved to be true. But last fall I increased the fund's investment in California GOs, lease bonds and other bonds backed by the state to around 10% because I thought the California economy had hit bottom. Also, I increased the fund's stake in bonds rated A or lower, which are expected to benefit from improvements in the state's economy. These decisions reduced the average credit rating of the fund's holdings. At the end of February, about 40% of the fund's investments were rated Aa or Aaa, down from 80%. As the economy begins to improve, those state GOs and lease bonds should outperform issues with higher credit ratings.

Q. AT THE END OF FEBRUARY, NEARLY 20% OF THE FUND'S INVESTMENTS WERE IN HEALTH-CARE BONDS, UP FROM 13.5% A YEAR EARLIER. ARE YOU CONCERNED THAT HEALTH-CARE REFORM WILL HURT THOSE ISSUERS?

A. We are cautious on health care because the Clinton plan could affect the health care sector. However, the issues I choose are mainly strong hospitals that are expected to survive and potentially benefit from any shake-up likely to occur. In fact, a number carry ratings of Aa or Aaa.

Q. DID THE LOS ANGELES EARTHQUAKE AFFECT THE FUND'S PERFORMANCE?

A. Not much. During the past two or three years I de-emphasized issuers in the Los Angeles area because the economy in southern California has been especially sluggish. As a result, we only held one or two bonds of issuers in the vicinity of the earthquake. I believe in geographic diversification, so the fund's investments are spread across different regions of the state. That should offer some protection against future natural disasters.

Q. WHAT'S YOUR OUTLOOK FOR THE TAX-EXEMPT BOND MARKET?

A. The economy will probably show modest growth and inflation seems likely to remain under control, so I don't expect interest rates to rise dramatically from here. But interest rates aren't likely to fall much more either, so gains in the bond market won't be driven by falling rates. The tax-exempt market will probably benefit from a lower supply of new issues. Also, demand for tax-exempt bonds will likely increase as investors realize that the new, higher federal income tax rates. The combination of lower supply and higher demand should help support prices in the tax-exempt market.

Q. WHAT ABOUT THE CALIFORNIA TAX-EXEMPT MARKET?

A. I still feel that California bonds are attractive because the state's economy is showing signs that it is set to begin a recovery. As that happens, state GO's and lease bonds, should be especially strong performers, because their credit quality is closely linked to the economy. Those issues may be volatile over the next several months as the state goes through its budget process. But I'll probably take advantage of any price declines to buy more.

FUND FACTS

GOAL: to provide high current income exempt from

California state and federal income taxes

START DATE: November 27, 1989

SIZE: as of February 28, 1994 over \$566 million

MANAGER: John Haley, since December, 1989; manager, Fidelity California Tax-Free Insured Portfolio, since 1986; Fidelity California Tax-Free High Yield Portfolio, since 1985; Fidelity Advisor Tax-Exempt Portfolio, since 1985

(checkmark)

JOHN HALEY ON THE FUND'S

STRATEGY:

"The fund can invest one-third of its holdings in securities rated below investment-grade. However during recent years, there have been few attractive opportunities in this area. At the same time, I expected a more severe economic downturn in the California economy than most observers. As a result, I stuck mainly with highly-rated issues. But during the past six months I have begun to identify factors that suggest the California economy is reaching a bottom. As a result, I've been increasing the fund's investment in higher-yielding issues. As the economy improves, they should be strong performers."

(bullet) The fund's duration as of February 28, 1994 was 9.2 years. That means the fund's share price could decline roughly 9.2% if interest rates rose one percentage point, and rise 9.2% if rates fell one percentage point.

SPARTAN CALIFORNIA MUNICIPAL HIGH YIELD PORTFOLIO

INVESTMENT CHANGES

TOP FIVE SECTORS AS OF FEBRUARY 28, 1994

	% OF FUND'S INVESTMENTS	% OF FUND'S INVESTMENT S IN THESE SECTORS 6 MONTHS AGO
Lease Revenue	26.1	23.7
Health Care	19.8	13.8
Special Tax	18.3	20.2
Electric Revenue	8.3	10.2
Housing	6.4	6.0

AVERAGE YEARS TO MATURITY AS OF FEBRUARY 28, 1994
6 MONTHS AGO

Years 22.2 22.6

AVERAGE YEARS TO MATURITY SHOWS THE AVERAGE TIME UNTIL THE PRINCIPAL OF THE BONDS IN THE FUND IS EXPECTED TO BE REPAID, WEIGHTED BY DOLLAR AMOUNT.

DURATION AS OF FEBRUARY 28, 1994
6 MONTHS AGO

Years 9.2 8.8

DURATION SHOWS HOW MUCH A BOND'S PRICE FLUCTUATES WITH CHANGES IN INTEREST RATES. IF RATES RISE 1%, FOR EXAMPLE, THE SHARE PRICE OF A FUND WITH A FIVE-YEAR DURATION WILL FALL 5%.

QUALITY DIVERSIFICATION AS OF FEBRUARY 28, 1994

SECURITY TYPE ABBREVIATIONS

VRDN - Variable Rate Demand Notes

LEGEND

- (a) The coupon rate shown on floating or adjustable rate securities represents the rate at period end.
- (b) Private activity obligations whose interest is subject to the federal alternative minimum tax for individuals (AMT securities).
- (c) Standard & Poor's Corporation credit ratings are used in the absence of a rating by Moody's Investors Service, Inc.
- (d) Inverse floating rate security is a security where the coupon is inversely indexed to a floating interest rate. The price will be more volatile than the price of a comparable fixed rate security.
- (e) Security collateralized by an amount sufficient to pay interest and principal.
- (f) Debt obligation initially issued in zero coupon form which converts to coupon form at a specified rate and date.
- (g) Security purchased on a delayed delivery basis (see Note 2 of Notes to Financial Statements).
- (h) Security was pledged to cover margin requirements for futures contracts. At the period end, the value of securities pledged amounted to \$1,805,000.

OTHER INFORMATION

The composition of long-term debt holdings as a percentage of total value of investment in securities, is as follows (ratings are unaudited):

MOODY'S RATINGS S&P RATINGS
 Aaa, Aa, A 59.5% AAA, AA, A 72.1%
 Baa 9.6% BBB 9.2%
 Ba 0.0% BB 0.0%
 B 0.0% B 0.0%
 Caa 0.0% CCC 0.0%
 Ca, C 0.0% CC, C 0.0%
 D 0.0%

The percentage not rated by either S&P or Moody's amounted to 8.6%.
 The distribution of municipal securities by revenue source, as a percentage of total value of investment in securities, is as follows:

Lease Revenue 26.1%
 Health Care 19.8
 Special Tax 18.3
 Others (individually less than 10%) 35.8
 TOTAL 100.0%

INCOME TAX INFORMATION

At February 28, 1994 the aggregate cost of investment securities for income tax purposes was \$527,536,051. Net unrealized appreciation aggregated \$26,260,968, of which \$30,416,067 related to appreciated investment securities and \$4,155,099 related to depreciated investment securities. The fund hereby designates \$1,656,000 as a capital gain dividend for the purpose of the dividend paid deduction.
 At February 28, 1994 the fund was required to defer \$3,065,000 of losses on futures contracts and options.

SPARTAN CALIFORNIA INTERMEDIATE MUNICIPAL PORTFOLIO

PERFORMANCE: THE BOTTOM LINE

There are several ways to evaluate a fund's historical performance. You can look at the total percentage change in value, the average annual percentage change, or the growth of a hypothetical \$10,000 investment. Each figure includes changes in a fund's share price, reinvestment of any dividends (or

income) and capital gains (the profits the fund earns when it sells bonds that have grown in value), and the effect of the \$5 account closeout fee. You can also look at the fund's income. If Fidelity had not reimbursed certain fund expenses during the periods shown, the total returns, dividends and yields would have been lower.

CUMULATIVE TOTAL RETURNS

PERIOD ENDED FEBRUARY 28, 1994	LIFE OF FUND
Spartan California Intermediate Municipal	-1.72%
Lehman Brothers Municipal Bond Index	n/a
Average California Tax-Exempt Municipal Intermediate Bond Fund	n/a
Consumer Price Index	0.62%

CUMULATIVE TOTAL RETURNS reflect actual performance over a set period - in this case, since the fund started on December 30, 1993. For example, if you had invested \$1,000 in a fund that had a 5% return over the past year, you would end up with \$1,050. Once the fund is six months old, you can compare the fund's results to the performance of the Lehman Brothers Municipal Bond Index - a broad gauge of the municipal bond market. To measure how the fund stacks up against its peers (again, once it's six months old), you can also look at the average California tax-exempt intermediate municipal bond fund, which reflects the performance of 22 California tax-exempt intermediate municipal bond funds tracked by Lipper Analytical Services. Both benchmarks include reinvested dividends and capital gains, if any. Comparing the fund's performance to the consumer price index helps show how your fund did compared to inflation. (The periods covered by the CPI numbers are the closest available match to those covered by the fund.)

AVERAGE ANNUAL TOTAL RETURNS

AVERAGE ANNUAL TOTAL RETURNS take the fund's actual (or cumulative) results and show you what would have happened if the fund had performed at a consistent rate each year. Average annual returns for the fund and its benchmarks will appear in the fund's next annual report, once the fund is older; this next report will also show the effect of investing \$10,000 over the life of the fund for both the fund and the Lehman Brothers Municipal Bond Index.

INCOME

DECEMBER 30, 1993
(COMMENCEMENT
OF OPERATIONS) TO
FEBRUARY 28, 1994

Income return 0.69%

Change in share price -2.41%

Total return -1.72%

INCOME returns and changes in share price are both part of a bond fund's total return. An income return reflects the dividends paid by the fund and assumes the dividends are reinvested. Changes in the fund's share price include changes in the prices of the bonds owned by the fund. Change in share price and total return figures include the effect of the \$5 account closeout fee.

DIVIDENDS AND YIELD

PERIOD ENDED FEBRUARY 28, 1994	PAST 30 DAYS	LIFE OF FUND
Dividends per share	n/a	7.02(cents)
Annualized dividend rate	n/a	4.21%
Annualized yield	4.83%	n/a
Tax-equivalent yield	8.48%	n/a

DIVIDENDS per share show the income paid by the fund for a set period. If you annualize this number, based on an average share price of \$9.97 over the life of the fund, you can compare the fund's income over these two periods. The 30-day annualized YIELD is a standard formula for all funds based on the yields of the bonds in the fund, averaged over the past 30 days. This figure shows you the yield characteristics of the fund's investments at the end of the period. It also helps you compare funds from different companies on an equal basis. The tax-equivalent yield shows what you would have to earn on a taxable investment to equal the fund's tax-free yield, if you're in the 43.04% combined effective 1994 federal and state income tax bracket.

SPARTAN CALIFORNIA INTERMEDIATE MUNICIPAL PORTFOLIO

MARKET RECAP

Bond investments - including tax-free issues - provided solid returns for the 12 months ended February 28, 1994, despite a dramatic downturn in February. Falling interest rates pushed up bond prices steadily through mid-October, when the yield on the benchmark 30-year Treasury bond reached a historic low of 5.79%. By year-end, a strengthening economy had fueled mild inflation fears. That pushed up the yield on the 30-year bond to 6.35% on December 31, which forced investors to give back some of their earlier profits. Inflation jitters eased and bond yields dropped in January. However, when the Federal Reserve Bank raised short-term interest rates in an attempt to control inflation on February 4, investors reacted negatively. At the end of February, the yield on the 30-year bonds was 6.66%, about 38 basis points higher than at the beginning of the month. Over the year, higher federal income taxes boosted demand for municipal bonds. But municipal bond prices were hurt by the Fed's action in February and by record new issuance, which kept supplies high and dampened prices. The return on the Lehman Brothers Municipal Bond Index, a broad measure of the tax-free market, rose 5.54%. By comparison, the Lehman Brothers Aggregate Bond Index, which tracks investment-grade taxable bonds, returned 5.40%. Globally, falling interest rates and low inflation drove good annual returns in Europe, Japan, and most emerging markets, although many of these markets fell in February along with the U.S. bond market. The Salomon Brothers World Government Bond Index - which includes U.S. issues - returned 9.34%, while the J.P. Morgan Emerging Markets Bond Index was up a dramatic 29.46%.

Interview with David Murphy,
Portfolio Manager of Spartan California Intermediate Municipal Portfolio
Q. DAVID, HOW DID THE FUND DO?

A. The fund's total return from the start of operations on December 30, 1993 to February 28, 1994 was -1.72%.

Q. WHAT ACCOUNTED FOR THE NEGATIVE RETURN?

A. In February, the Federal Reserve raised short-term interest rates, which caused short-term bond prices to fall. That also caused longer-term bond prices to drop, which in turn hurt the fund's investments. Despite the municipal bond market's negative reaction, I still think interest rates will continue to stay low over the long term. My view is that the Fed is very serious about being the inflation watchdog. Low inflation is generally good for bonds. Historically, a pick-up in the economy - like we saw in the fourth quarter of 1993 - means higher inflation. But this time, I don't think that relationship will hold up.

Q. WHY IS THAT?

A. Because I think that inflation is low, lower than the market has anticipated. We still haven't seen a broad-based increase in any of the three basic components of higher inflation: commodity prices, labor costs, and the cost of borrowing money. While it's true that some commodity prices - like gold, grains, and copper - have risen, others - like oil - haven't. Plus, some of the hike in agricultural products was due to extraordinary factors like last year's flood and the recent cold weather.

Q. AND THE OTHER TWO INFLATIONARY SIGNALS?

A. On the wage side, many U.S. companies now have the flexibility to move their production overseas, where labor prices are often cheaper, and that has kept pressure on labor costs here. Also, productivity has increased, which means the actual cost of producing one unit of a given good has come down. Finally, the cost of borrowing money is still low. In my view, these all add up to continued low inflation, which in turn could lead to falling interest rates, especially in the longer end of the maturity spectrum between 10 and 30 years.

Q. WHAT'S YOUR VIEW OF THE CALIFORNIA ECONOMY?

A. My view is that the California economy is at a turning point. I think we should start to see evidence of expansion soon, even though that expansion will be modest initially. Employment in California is expected to grow in 1994, and there's been a rebound in retail sales and help-wanted advertising. Plus, the passage of NAFTA should be a positive for the state. Finally, federal assistance and private insurance payments stemming from the recent Los Angeles earthquake will provide a \$14 billion stimulus for California.

Q. IS YOUR OUTLOOK FOR THE STATE'S FISCAL SITUATION ALSO POSITIVE?

A. On that front I have a few concerns. First, the state has drawn down its budget reserves. And second, the proposed 1994 budget assumes a \$2.5 billion federal government appropriation earmarked for immigration issues. Yet it's not certain that appropriation will materialize. But, as the economy improves, so should tax revenues. As more people get back into the work force, income tax receipts will rise. If retail sales improve that would translate into higher sales tax revenues. The effect of those factors probably won't be felt for at least a year. So I think the state will continue to face fiscal pressures for the next 12 months.

Q. IN LIGHT OF THOSE CONCERNS, WHAT HAS YOUR STRATEGY BEEN?

A. Since we haven't seen a significant rebound yet, I've mainly focused on higher quality bonds. The fund's stake in Aaa bonds was 35.5% on February 28. As the economic rebound gains momentum, I may add some A- and Baa-rated bonds. In terms of maturity, I've concentrated on bonds with 10- to 15-year maturities. Out to 15 years, the yield curve - meaning the difference in yield between different maturity bonds - is steep. That means you get more yield buying 12-year bonds than five-year bonds. Beyond 15 years, the yield curve is flat and you don't get rewarded much for buying a longer-term bond.

Q. WHAT DO YOU THINK INVESTORS CAN EXPECT FOR THE NEXT SIX MONTHS?

A. Over the short term, more volatility. The municipal bond market seems to be expecting the Fed to raise short-term interest rates to 4%. Until that happens, the market probably will remain unsettled. But eventually, I believe that long-term municipal rates could start to fall again, and that intermediate rates could come down as well. Plus, the dwindling supply of municipal bonds should help. Falling interest rates and a shrinking supply would be positive for municipal bond prices.

FUND FACTS

GOAL: to provide current income exempt from federal and state income taxes

START DATE: December 30, 1993

SIZE: as of February 28, 1994, over \$22 million

MANAGER: David Murphy, since December, 1993; manager,

Spartan New York Intermediate Portfolio, since December, 1993; Spartan Intermediate Municipal Portfolio, since April 1993; Spartan New Jersey Municipal High Yield Portfolio, since April 1991; Fidelity Limited Term Municipals, since December 1989; Spartan Short-Intermediate Municipal Fund, since December 1989 (checkmark)

DAVID MURPHY ON INTERMEDIATE BONDS:

"I think that intermediate bonds in the five- to 15- year range will be attractive in 1994. The yield curve - or the difference in yield between bonds with various maturities - is very steep up

to 15 years. At the end of the period, a 15-year California Aaa bond paid about 5.40% yield, compared to a five-year bond which paid 4.40%. But in the 15- to 30-year range, the curve was flat. In that longer range, you only got rewarded with about one-quarter of a percentage in incremental yield. What's more, some institutional investors have started to increase their investments in intermediate bonds. That increased demand could be a positive for intermediate municipal bond prices."

(bullet) About one-fifth of the fund's investments were in utilities - - like water, sewer, and electric revenue bonds - on February 28, 1994. These were attractive because the utilities have a stable cash flow, which helps insulate them during times when the economy is weak.

(bullet) Health-care bonds were the fund's second largest concentration, at 19.2% of the total investments. They were attractive because of their relatively high yields.

SECURITY TYPE ABBREVIATIONS

VRDN - Variable Rate Demand Notes

LEGEND

(a) The coupon rate shown on floating or adjustable rate securities represents the rate at period end.

(b) Private activity obligations whose interest is subject to the federal

alternative minimum tax for individuals (AMT securities).
(c) Standard & Poor's Corporation credit ratings are used in the absence of a rating by Moody's Investors Service, Inc.
(d) Inverse floating rate security is a security where the coupon is inversely indexed to a floating interest rate. The price will be more volatile than the price of a comparable fixed rate security.
(e) Security collateralized by an amount sufficient to pay interest and principal.
(f) Security purchased on a delayed delivery basis (see Note 2 of Notes to Financial Statements).

OTHER INFORMATION

The composition of long-term debt holdings as a percentage of total value of investment in securities, is as follows (ratings are unaudited):

MOODY'S RATINGS S&P RATINGS
Aaa, Aa, A 53.4% AAA, AA, A 71.7%
Baa 13.4% BBB 7.1%

SPARTAN CALIFORNIA MUNICIPAL MONEY MARKET PORTFOLIO

PERFORMANCE: THE BOTTOM LINE

To measure a money market fund's performance, you can look at either total return or yield. Total return reflects the change in a fund's share price over a given period, reinvestment of its dividends (or income), and the effect of the fund's \$5 account closeout fee. Yield measures the income paid by a fund. Since a money market fund tries to maintain a \$1 share price, yield is an important measure of performance. Both the fund's returns and yields would have been lower if Fidelity hadn't reimbursed certain fund expenses.

CUMULATIVE TOTAL RETURNS
PERIODS ENDED FEBRUARY 28, 1994

PAST 1 YEAR LIFE OF FUND

Spartan California Municipal Money Market	2.45%	18.04%
Consumer Price Index	2.52%	16.52%
Average California Tax-Free Money Market Fund	1.96%	15.40%

CUMULATIVE TOTAL RETURNS reflect actual performance over a set period - in this case, one year or since the fund started on November 27, 1989. For example, if you invested \$1,000 in a fund that had a 5% return over the past year, you would have \$1,050. Comparing the fund's performance to the consumer price index (CPI) helps show how your investment did compared to inflation. To measure how the fund stacked up against its peers, you can compare its return to the average California tax-free money market fund's total return. This average currently reflects the performance of 42 California tax-free money market funds tracked by IBC/Donoghue. (The periods covered by the CPI and IBC/Donoghue numbers are the closest available match to those covered by the fund.)

AVERAGE ANNUAL TOTAL RETURNS PERIODS ENDED FEBRUARY 28, 1994	PAST 1 YEAR	LIFE OF FUND
Spartan California Municipal Money Market	2.45%	3.97%
Consumer Price Index	2.52%	3.66%
Average California Tax-Free Money Market Fund	1.96%	3.43%

AVERAGE ANNUAL TOTAL RETURNS take the fund's actual (or cumulative) return and show you what would have happened if the fund had performed at a constant rate each year.

YIELD refers to the income paid by the fund over a given period. Yields for money market funds are usually for seven-day periods, expressed as annual percentage rates. A yield that assumes income earned is reinvested or compounded is called an effective yield. The chart above shows the fund's current seven-day yield at quarterly intervals over the past year. You can compare these yields to the average all tax-free money market fund. Or you can look at the fund's tax-equivalent yield, which is based on a combined

effective 1994 federal and state income tax rate of 43.04%. The tax-equivalent figures are useful in seeing how the fund stacked up against the average taxable money market fund as tracked by IBC/Donoghue. A MONEY MARKET FUND'S TOTAL RETURNS AND YIELDS REFLECT PAST RESULTS RATHER THAN PREDICT FUTURE PERFORMANCE.

COMPARING PERFORMANCE

Yields on tax-free investments are usually lower than yields on taxable investments. However, a straight comparison between the two may be misleading because it ignores the way taxes reduce taxable returns. Tax-equivalent yield - the yield you'd have to earn on a similar taxable investment to match the tax-free yield - makes the comparison more meaningful. Keep in mind that the U.S. government neither insures nor guarantees a money market fund. In fact, there is no assurance that a money fund will maintain a \$1 share price.

SPARTAN CALIFORNIA MUNICIPAL MONEY MARKET PORTFOLIO

FUND TALK: THE MANAGER'S OVERVIEW

An interview with Deborah Watson, Portfolio Manager of Spartan California Municipal Money Market Portfolio

Q. DEBORAH, HOW HAS THE SHORT-TERM MARKET BEHAVED OVER THE LAST SIX MONTHS?

A. Short-term interest rates remained stable through the fall, despite a mild uptick in November fueled by inflation fears. The Federal Reserve kept the federal funds rate at or near 3% from August through January. Then, on February 4, the Fed pushed the fed funds rate up to 3.25%, essentially raising all short-term rates.

Q. WAS THE FUND WELL POSITIONED FOR HIGHER RATES?

A. For the most part, yes. I had gradually reduced the fund's average maturity through the fall and early winter; it fell from 79 days at the end of August to 48 days at the end of January. The fund's shorter average maturity will allow me to capture the higher yields available following February's rate hike. In addition, supply and demand played a role in how I positioned the fund earlier in the year. California usually issues its heaviest supply of new obligations during the summer months, and 1993 was no exception. I lengthened the fund's average maturity through August, and was able to lock in higher-yielding issues before rates fell further. Issuance then slowed heading into fall, which, combined with my growing expectation of higher interest rates, caused me to gradually shorten the average maturity.

Q. HOW DID CALIFORNIA'S RECESSION AFFECT THE FUND?

A. The state's weak economy caused the financial health of many California issuers to deteriorate. That meant there were fewer securities available that met Fidelity's high standards for credit quality. However, I compensated by buying more of those that did, resulting in little effect on the fund's yield. Rebuilding efforts after January's earthquake should boost economic growth in 1994. However, the annual borrowing season for state and local governments is fast approaching, and their financial picture hasn't improved. This may further reduce the supply of high quality issues in California this summer.

Q. HOW DID THE FUND PERFORM?

A. The fund's seven-day yield on February 28 was 2.44%, up from 2.16% a year ago. The latest yield translates into a tax equivalent yield of 4.28% for investors in the 43.04% combined federal and state tax bracket. The fund's total return - which assumes reinvestment of monthly dividends - for the 12 months ended February 28 was 2.45%. The average California tax-free money market fund tracked by IBC/Donoghue returned 1.96% during the same period.

Q. WHAT'S YOUR VIEW GOING FORWARD?

A. I think short-term interest rates will probably rise gradually over the next six months, while the Fed continues inching up the fed funds rate to control inflation. That said, I'll probably keep the fund's average maturity in a neutral 35- to 50-day range. In addition, I've increased the fund's stake in variable rate instruments to 59.3% by February 28. The coupons (stated interest rates) on these securities are reset at fixed intervals - for example, weekly or monthly - so when rates rise, the fund can benefit from higher coupons at these reset intervals.

FUND FACTS

GOAL: tax-free income with share price stability by investing in high-quality, short-term California municipal securities
 START DATE: November 27, 1989
 SIZE: as of February 28, 1994, over \$1 billion
 MANAGER: Deborah Watson, since November 1989; manager, Fidelity California Tax-Free Money Market Portfolio, since July 1988; Spartan Florida Municipal Money Market Portfolio, since August 1992; Spartan Pennsylvania Municipal Money Market Portfolio, since September 1989
 (checkmark)

WORDS TO KNOW

COMMERCIAL PAPER: A security issued by a municipality to finance capital or operating needs.

FEDERAL FUNDS RATE: The interest rate banks charge each other for overnight loans.

MATURITY: The time remaining before an issuer is scheduled to repay the principal amount on a debt security. When the fund's average maturity - weighted by dollar amount - is short, the fund manager is anticipating a rise in interest rates. When the average maturity is long, the manager is expecting rates to fall.

When the average maturity is neutral, the manager wants the flexibility to respond to rising rates, while still capturing a portion of the higher yields available from issues with longer maturities.

MUNICIPAL NOTE: A security issued in advance of future tax or other revenues and payable from those specific sources.

TENDER BOND: A variable-rate, long-term security that gives the bond holder the option to redeem the bond at face value before maturity.

VARIABLE RATE DEMAND NOTE (VRDN): A tender bond that can be redeemed on short notice, typically one or seven days. VRDNs are useful in managing the fund's average maturity and liquidity.

NOTES TO FINANCIAL STATEMENTS

For the period ended February 28, 1994

1. SIGNIFICANT ACCOUNTING

POLICIES.

Spartan California Municipal High Yield Portfolio, Spartan California Intermediate Municipal Portfolio and Spartan California Municipal Money

Market Portfolio (the funds) are funds of Fidelity California Municipal Trust (the trust). The trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company organized as a Massachusetts business trust (see Note 6). On November 19, 1992, the Trustees approved a change in the fiscal year-end of the trust to February 28. Each fund is authorized to issue an unlimited number of shares. The following summarizes the significant accounting policies of the funds:

SECURITY VALUATION.

HIGH YIELD AND INTERMEDIATE FUNDS. Securities are valued based upon a computerized matrix system and/or appraisals by a pricing service, both of which consider market transactions and dealer-supplied valuations. Short-term securities maturing within sixty days are valued either at amortized cost or original cost plus accrued interest, both of which approximate current value. Securities for which quotations are not readily available through the pricing service are valued at their fair value as determined in good faith under consistently applied procedures under the general supervision of the Board of Trustees.

MONEY MARKET FUND. As permitted under Rule 2a-7 of the 1940 Act, and certain conditions therein, securities are valued initially at cost and thereafter assume a constant amortization to maturity of any discount or premium.

INCOME TAXES. The intermediate fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. The high yield and money market funds are each qualified as a regulated investment company under Subchapter M of the Internal Revenue Code. By so qualifying, each fund is not subject to income taxes to the extent that it distributes all of its taxable income for the fiscal year. The schedules of investments include information regarding income taxes under the caption "Income Tax Information."

INTEREST INCOME. Interest income, which includes amortization of premium and accretion of original issue discount, is accrued as earned. For the money market fund, accretion of market discount represents unrealized gain until realized at the time of a security disposition or maturity.

EXPENSES. Most expenses of each trust can be directly attributed to a fund. Expenses which cannot be directly attributed are apportioned between the funds in the trust.

DISTRIBUTIONS TO SHAREHOLDERS. Dividends are declared daily and paid monthly from net interest income. Distributions to shareholders from realized capital gains on investments, if any, are recorded on the ex-dividend date.

Income and capital gain distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. These differences are primarily due to differing

1. SIGNIFICANT ACCOUNTING

POLICIES - CONTINUED

DISTRIBUTIONS TO SHAREHOLDERS - CONTINUED

treatments for futures and options transactions, excise tax regulations and losses deferred due to wash sales.

REDEMPTION FEES. Shares held in the high yield fund less than 180 days are subject to a redemption fee equal to .50% of the proceeds of the redeemed shares. The fee, which is retained by the fund is accounted for as an addition to paid in capital.

SECURITY TRANSACTIONS. Security transactions are accounted for as of trade date. Gains and losses on securities sold are determined on the basis of identified cost.

CHANGE IN ACCOUNTING FOR DISTRIBUTIONS TO SHAREHOLDERS. Effective February 1, 1993, the money market and high yield funds adopted Statement of Position 93-2: Determination, Disclosure, and Financial Statement Presentation of Income, Capital Gain, and Return of Capital Distributions by Investment Companies. As a result, the funds changed the classification of distributions to shareholders to better disclose the differences between financial statement amounts and distributions determined in accordance with income tax regulations. Accordingly, amounts as of February 28, 1993 have been restated to reflect an increase in paid in capital and a decrease in accumulated net realized gain of \$45,643 for the high yield fund. No adjustments were necessary for the money market fund.

2. OPERATING POLICIES.

DELAYED DELIVERY TRANSACTIONS. Each fund may purchase or sell securities on a when-issued or forward commitment basis. Payment and delivery may take place a month or more after the date of the transaction. The price of the underlying securities and the date when the securities will be delivered and paid for are fixed at the time the transaction is negotiated.

FUTURES CONTRACTS AND OPTIONS. The high yield and intermediate funds may invest in futures contracts and write options. These investments involve to varying degrees, elements of market risk and risks in excess of the amount recognized in their Statements of Assets and Liabilities. The face or contract amounts reflect the extent of the involvement the high yield and intermediate funds have in the particular classes of instruments. Risks may be caused by an imperfect correlation between movements in the price of the instruments and the price of the underlying securities and interest rates.

Risks also may arise if there is an illiquid secondary market for the instruments, or due to the inability of counterparties to perform. Futures contracts are valued at the settlement price established each day by the board of trade or exchange on which they are traded. Options traded on an exchange are valued using the last sale price or, in the absence of a sale, the last offering price. Options traded over-the-counter are valued using dealer-supplied valuations.

3. PURCHASES AND SALES OF INVESTMENTS.

HIGH YIELD FUND. Purchases and sales of securities, other than short-term securities, aggregated \$315,008,869 and \$283,241,767, respectively. The gross market value of futures contracts opened and closed amounted to \$237,948,678 and \$258,547,360, respectively.

INTERMEDIATE FUND. Purchases of securities, other than short-term securities, aggregated \$17,416,283; there were no sales of securities.

4. FEES AND OTHER TRANSACTIONS WITH AFFILIATES.

MANAGEMENT FEE. As each fund's investment adviser, Fidelity Management & Research Company (FMR) pays all expenses except the compensation of the non-interested Trustees and certain exceptions such as interest, taxes, brokerage commissions and extraordinary expenses. FMR receives a fee that is computed daily at an annual rate of .55%, .55% and .50% of average net assets for the high yield, intermediate and money market funds, respectively.

SUB-ADVISER FEE. As the money market fund's investment sub-adviser, FMR Texas Inc., a wholly owned subsidiary of FMR, receives a fee from FMR of 50% of the management fee payable to FMR. The fee is paid prior to any voluntary expense reimbursements which may be in effect, and after reducing the fee for any payments by FMR pursuant to the fund's Distribution and Service Plan.

FMR also bears the cost of providing shareholder services to each fund. For the period, FMR or its affiliates collected certain transaction fees from shareholders which aggregated \$11,725, \$95 and \$34,156 for the high yield, intermediate and money market funds, respectively.

5. EXPENSE REDUCTIONS

HIGH YIELD FUND. For the period, FMR voluntarily agreed to reimburse the fund's operating expenses (excluding interest, taxes, brokerage commissions and extraordinary expenses) above a specified percentage of average net assets. This expense limitation ranged from an annual rate of .50% to .55% of average net assets and the reimbursement reduced expenses by \$202,856.

INTERMEDIATE FUND. For the period, FMR voluntarily agreed to reimburse all of the fund's operating expenses (excluding interest, taxes, brokerage commissions and extraordinary expenses) and the reimbursement reduced expenses by \$7,123.

MONEY MARKET FUND. For the period, FMR voluntarily agreed to reimburse all of the fund's operating expenses (excluding interest, taxes, brokerage commissions and extraordinary expenses) above a specified percentage of average net assets. This expense limitation ranged from an annual rate of .20% to .35% of average net assets and the reimbursement reduced expenses by \$2,767,561.

6. SHAREHOLDER MEETING.

At a special meeting of shareholders of the high yield and money market funds held on February 16, 1994, shareholders approved amendments to certain fundamental investment limitations of the funds.

6. SHAREHOLDER MEETING - CONTINUED

In addition, shareholders of the money market fund approved an Agreement and Plan of Conversion and Termination (the Plan of Conversion), providing for the conversion of the money market fund (the current fund) from a separate series of Fidelity California Municipal Trust, a Massachusetts business trust, to a separate series (the successor fund) of Fidelity California Municipal Trust II, a Delaware business trust, effective April 20, 1994. The individual investment objective, policies and limitations of the successor fund will be identical to those of the current fund. In connection with the Plan of Conversion, a new management contract, new sub-advisory agreement and new distribution plan identical to those currently in effect for the current fund will take effect on April 20, 1994.

REPORT OF INDEPENDENT ACCOUNTANTS

To the Trustees of Fidelity California
Municipal Trust and Shareholders of:
Spartan California Municipal
High Yield Portfolio
Spartan California
Intermediate Municipal Portfolio
Spartan California
Municipal Money Market Portfolio:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of investments (except for Moody's and Standard & Poor's ratings), and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all

material respects, the financial position of Spartan California Municipal High Yield Portfolio, Spartan California Intermediate Municipal Portfolio and Spartan California Municipal Money Market Portfolio at February 28, 1994, the results of their operations, the changes in their net assets and the financial highlights for the periods indicated, in conformity with generally accepted accounting principles. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of each portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with generally accepted auditing standards which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities owned at February 28, 1994 by correspondence with the custodian and brokers and the application of alternative auditing procedures where confirmations from brokers were not received, provide a reasonable basis for the opinion expressed above.

BALANCES 1-800-544-7544

Just make a selection from this record-
ed menu:

PRESS

For balances on funds you own.

1.

For your most recent fund activity
(purchases, redemptions, and

dividends).

2.

To change your Personal
Identification Number (PIN).

3.

To speak with a Fidelity
representative.

4.

* WHEN YOU CALL THE QUOTES LINE, PLEASE REMEMBER THAT A FUND'S YIELD AND
RETURN WILL
VARY AND, EXCEPT FOR MONEY MARKET FUNDS, SHARE PRICE WILL ALSO VARY. THIS
MEANS THAT
YOU MAY HAVE A GAIN OR LOSS WHEN YOU SELL YOUR SHARES. THERE IS NO
ASSURANCE THAT
MONEY MARKET FUNDS WILL BE ABLE TO MAINTAIN A STABLE \$1 SHARE PRICE; AN
INVESTMENT IN
A MONEY MARKET FUND IS NOT INSURED OR GUARANTEED BY THE U.S. GOVERNMENT.
TOTAL
RETURNS ARE HISTORICAL AND INCLUDE CHANGES IN SHARE PRICE, REINVESTMENT OF
DIVIDENDS
AND CAPITAL GAINS, AND THE EFFECTS OF ANY SALES CHARGES. FOR MORE
INFORMATION ON ANY
FIDELITY FUND INCLUDING MANAGEMENT FEES AND CHARGES, CALL 1-800-544-8888
FOR A FREE
PROSPECTUS. READ IT CAREFULLY BEFORE YOU INVEST OR SEND MONEY.
TO WRITE FIDELITY

Please locate the address that is closest to you. We'll give your
correspondence immediate attention and send you written confirmation upon
completion of your request. Please send ALL correspondence about retirement
accounts to Dallas.
