THE POLICY IS NOT AVAILABLE IN ALL JURISDICTIONS. THIS PROSPECTUS IS NOT CONSIDERED AN OFFERING IN ANY JURISDICTION WHERE THE SALE OF THIS POLICY CANNOT LAWFULLY BE MADE. NYLIAC DOES NOT AUTHORIZE ANY INFORMATION OR REPRESENTATIONS REGARDING THE OFFERING OTHER THAN AS DESCRIBED IN THIS PROSPECTUS, OR IN ANY ATTACHED SUPPLEMENT TO THIS PROSPECTUS, OR IN ANY SUPPLEMENTAL SALES MATERIAL NYLIAC PRODUCES.

IN CERTAIN JURISDICTIONS, DIFFERENT PROVISIONS MAY APPLY TO THE POLICY. PLEASE REFER TO THE POLICY OR ASK YOUR REGISTERED REPRESENTATIVE FOR DETAILS REGARDING YOUR PARTICULAR POLICY.

3

SUMMARY OF BENEFITS AND RISKS

The following is a brief summary of certain features of NYLIAC Corporate Sponsored Variable Universal Life ("CSVUL"). More complete and detailed information regarding these features is discussed later in this prospectus and in the SAI.

BENEFITS

PROTECTION

CSVUL offers you the protection of permanent life insurance which can, over time, become a valuable asset.

CSVUL provides permanent life insurance coverage with the opportunity for tax-deferred Cash Value accumulation. Premium payments, less any applicable charges, are added to the Investment Divisions and Fixed Account according to your instructions. The investment return of the policy is based on:

- the amount in and performance of each Investment Division of the Separate Account;
- the amount in and rate of interest credited to the Fixed Account and Loan Account if any; and
- the charges We deduct.

With CSVUL, you have the potential for higher rates of return and Cash Value accumulation than with a fixed rate life insurance policy.

FLEXIBLE PREMIUMS

CSVUL premium payments are flexible; you can select the timing and amount of premium you pay, within limits. Other than the initial minimum premium payment, there are no required premiums. As long as the Cash Surrender Value is sufficient to cover the policy's monthly deductions, you can increase, decrease, or stop making premium payments to meet your changing needs.

LIQUIDITY THROUGH LOANS

Using the policy as sole security, the policyowner can borrow up to the loan value of the policy. The loan value on any given date is equal to (i) 90% of the Cash Surrender Value, less (ii) any Policy Debt.

LIQUIDITY THROUGH WITHDRAWALS

You can also withdraw an amount up to the Cash Surrender Value of your policy. Partial withdrawals will reduce the policy's Cash Value and can reduce your Life Insurance Benefit. We will not allow a partial withdrawal for an amount that would cause your policy to fall below the policy's minimum Face Amount. Certain charges will apply. Partial withdrawals can result in a taxable event.

ALLOCATION ALTERNATIVES

After We deduct the sales expense, state tax, and federal tax charges from your premium, the policyowner may allocate the remaining amount among up to 20 of the 23 Allocation Alternatives.

CHANGE THE AMOUNT OF COVERAGE

With CSVUL, you are able to increase or decrease the policy's Face Amount. Increases are subject to underwriting. Contestability and Suicide provisions on any increased portion of coverage begin on the effective date of the increase. Increases in the Face Amount will also result in additional cost of insurance charges and a new seven year testing period for modified endowment contract status. In addition, an increase in Face Amount may result in an increase in the Surrender Charge Premium. We can limit any increase in the Face Amount of your policy. Under certain circumstances, it may be advantageous to purchase additional insurance through our term insurance rider rather than increasing your Face Amount under your policy.

4

TWO LIFE INSURANCE BENEFIT OPTIONS

CSVUL offers two different Life Insurance Benefit options that allow you to select the insurance plan that best meets your needs. These options allow you to determine how the death benefit will be paid.

- Option 1--a death benefit equal to the greater of (i) the Face Amount of the policy, or (ii) the Cash Value multiplied by the percentage of the appropriate Internal Revenue Code Section 7702 table.
- Option 2--a death benefit equal to the greater of (i) the Face Amount of the policy, plus the Cash Value, or (ii) the Cash Value multiplied by the percentage of the appropriate Internal Revenue Code Section 7702 table.

OPTIONAL RIDERS

CSVUL offers additional insurance coverage through a term rider, the Adjustable Term Insurance Rider. This rider has costs associated with it.

POLICYHOLDER SUPPORT

As a policyholder, you have telephone support and your registered representative if you have questions about your CSVUL policy.

A HIGHLY-RATED COMPANY

New York Life Insurance and Annuity Corporation (NYLIAC") is a subsidiary of New York Life Insurance Company (NYLIC"). NYLIC has more than 150 years of experience in the offering of insurance products, and is a highly-rated insurer. Ratings reflect only the firm's General Account, applicable to the Fixed Account, and are not applicable to the Investment Divisions.

RISKS

INVESTMENT RISK

While you have the potential for a higher rate of return than with a fixed rate policy, investment returns on the assets in the Separate Account may fall, and you can lose principal. Each Investment Division has its own investment objectives and investment strategy. We do not guarantee the investment performance of the Investment Divisions, which involve varying degrees of risk. Your premium allocation choices should be consistent with your personal investment objective.

RISK OF TERMINATION (ESPECIALLY ON MINIMALLY-FUNDED POLICIES)

Your policy can terminate even if you pay all of the planned premiums on time. When a policy lapses, it has no value and no benefits are payable upon the death of the Insured. Your policy involves risks, including the potential risk of loss of the principal invested. Note that "termination" and "lapse" have the same meaning and effect throughout this prospectus.

A CSVUL policy with a Cash Surrender Value just sufficient to cover monthly deductions and charges or that is otherwise minimally funded is more likely to be unable to maintain its Cash Surrender Value due to market fluctuation and other performance related risks. To continue to keep your policy in force, additional premium payments may be required. In addition, by paying only the minimum required monthly premium, you may forego the opportunity to build up significant Cash Value in the policy. When determining the amount of your planned premium payments, you should consider funding your policy at a level which has the potential to maximize the investment opportunities within your policy and to minimize the risks associated with market fluctuations.

POTENTIAL FOR INCREASED CHARGES

The actual charges deducted reflect those shown as current charges on your policy. However, We have the right to increase those charges at any time up to the amount shown as the guaranteed maximum. In addition, We may increase the amount We deduct as a federal or state tax charge to reflect changes in tax law. However, the actual charges will never exceed the guaranteed charges. (See "Table of Fees and Expenses" for more information.)

5

RISK OF TERMINATION FROM POLICY LOANS

The larger the loan becomes relative to the policy's Cash Value, the greater the risk that the policy's remaining Cash Value will not be sufficient to support the policy's charges and expenses, including any loan interest due, and the greater the risk of the policy terminating.

A loan, repaid or not, has a permanent effect on your Cash Value. The effect could be favorable, if the Investment Divisions earn less than the interest rate charged on the loan amount in the Fixed Account, or unfavorable, if the Investment Divisions earn more. The longer a loan is outstanding, the greater its effect on your Cash Value is likely to be. If it is not repaid, the aggregate amount of the outstanding loan principal and any accrued interest will reduce the Policy Proceeds that might otherwise be paid.

TAX RISKS

The section of this prospectus entitled "Federal Income Tax Considerations" describes a number of tax issues that may arise in connection with the Policy. These risks include: (1) the possibility that the IRS may interpret the rules that apply to variable life insurance contracts in a manner that could result in your being treated as the owner of your policy's pro rata portion of the assets of the Separate Account; (2) the possibility that the IRS may take the position that the policy does not qualify as life insurance for tax purposes; (3) the possibility that, as a result of policy transactions, including the payment of

premiums or increases or decreases in policy benefits, the policy may be treated as a modified endowment contract for federal income tax purposes, with special rules that apply to policy distributions, including loans; (4) the possibility that the policy may not qualify as life insurance under the federal tax law after the Insured becomes age 100 and that the owner may be subject to adverse tax consequences at that time; and (5) the potential that corporate ownership of a policy may affect its exposure to the corporate alternative minimum tax.

CHARGES FOR POLICY SURRENDER

During the first nine years of the policy, surrender charges apply which act as a deterrent to surrendering the policy. CSVUL is designed to be long-term life insurance coverage. It is not suitable as a short-term investment vehicle.

PORTFOLIO RISKS

A discussion of the risks of allocating Cash Value to each Fund can be found in that Fund's prospectus.

POTENTIALLY HARMFUL TRANSFER ACTIVITY

This policy is not designed as a vehicle for market timing. Generally, We require that all transfer requests must be submitted in writing through the U.S. mail or an overnight carrier. In connection with deferred compensation plans, however, We may permit, in certain limited circumstances, transfer requests to be submitted by fax transmission (see "Limits on Transfers" for more information). We cannot guarantee that this limit will be effective at preventing all transfer activity that could disadvantage or potentially hurt the rights or interests of other policyowners. Potentially harmful transfer activity could result in reduced performance results for one or more Investment Divisions, due to among other things:

- Portfolio management decisions driven by the need to maintain higher than normal liquidity or the inability to sustain an investment objective
- increased administrative and Fund brokerage expenses
- dilution of the interests of long-term investors

An underlying Fund portfolio may reject any order from Us if it suspects potentially harmful transfer activity, thereby preventing us from implementing your request for a transfer. (See "Limits on Transfers" for more information on the risks of frequent trading.)

TABLE OF FEES AND EXPENSES

The following tables describe the fees and expenses that you will pay when buying, owning, and surrendering the policy. The first table describes the fees and expenses that you will pay at the time that you purchase the policy, surrender the policy, or transfer cash value between investment options.

TRANSACTION FEES

<Table>
<Caption>

CHARGE	WHEN CHARGE IS DEDUCTED	AMOUNT DEDUCTED
<S> Sales Expense Charge Imposed on Premium Payments (as a percentage of premium payments)	<C> When premium payment is applied up to age 95	<C> Current: 2.25% of each premium Guaranteed Maximum: 4.50% of each premium
Premium Taxes:	When premium payment is applied up to age 95	All taxes may vary and are subject to tax law changes.
State Tax		Current: 2% of each premium payment Guaranteed Maximum: 2%, subject to changes in state tax laws
Federal Tax		Current: 1.25% of each premium payment Guaranteed Maximum: 1.25%, subject to changes in federal tax laws
Surrender Charge (as a percentage of the Surrender Charge Premium) (1)	At time of complete surrender or a decrease in Base Face Amount	Current and Guaranteed Maximum: 32.5%(2)

Partial Withdrawal Charge	At time of partial withdrawal	Current: Lesser of \$25 or 2% of amounts of withdrawal Guaranteed Maximum: \$25
Transfer Fees	Time of transfer	Current: No charge Guaranteed Maximum: \$30 per transfer after 12 transfers in a Policy Year.

Living Benefits Rider	When you exercise the benefit	\$150 (one-time)
-----------------------	-------------------------------	------------------

</Table>

-
- (1) A table of Surrender Charge Premium Rates Per Thousand appears in Appendix A to this prospectus.
 - (2) In Policy Years 6 and beyond, the current and guaranteed Surrender Charge are reduced as follows: 26% in Policy Year 6; 19.5% in Policy Year 7; 13% in Policy Year 8; 6.5% in Policy Year 9; and 0% thereafter.

The next table describes the fees and expenses that you will pay periodically during the time that you own the policy, excluding the Fund's fees and expenses.

PERIODIC CHARGES OTHER THAN FUNDS' OPERATING EXPENSES

<Table>
<Caption>

CHARGE	WHEN CHARGE IS DEDUCTED	AMOUNT DEDUCTED
<S> Cost of Insurance Charge(1)	<C> Each Monthly Deduction Day until Insured reaches age 95	<C> Guaranteed Minimum: \$0.08 per \$1,000 of Net Amount at Risk Guaranteed Maximum: \$29.67 per \$1,000 of Net Amount at Risk Representative Insured: (Male, Age 45-Non-Smoker): \$0.38 per \$1,000 of Net Amount at Risk.(3)
Monthly Contract Charge	Each Monthly Deduction Day	Current \$7.50 (\$90 annualized) Guaranteed Maximum: \$9.00 (\$108 annualized)
Mortality and Expense Risk Charge (as a percentage of the average daily net asset value of each Investment Division)	Monthly	As a percentage of the Average daily net asset value of each Investment Division Current: 0.70%(2) Guaranteed Maximum: 0.90%
Riders -- Adjustable Term Insurance Rider(1)	Monthly until rider expires	Guaranteed Minimum: \$0.08 per \$1,000 of term insurance benefit Guaranteed Maximum: \$29.67 per \$1,000 of term insurance benefit Representative Insured (Male, Age 45-Non-Smoker): \$0.38 per \$1,000 of term insurance benefit.
Loan Interest	Monthly while loan balance is outstanding	Current and Guaranteed Maximum: 6.00%

</Table>

-
- (1) This cost varies based on characteristics of the Insured and the charge shown may not be representative of the charge you pay. To obtain more information about particular Cost of Insurance and other charges as they apply to your policy, please contact your Registered Representative.
 - (2) The current Mortality and Expense Risk Charge is reduced to 0.30% in Policy Year 11 and thereafter.
 - (3) "Net Amount at Risk" is equal to the Life Insurance Benefit minus the policy's Cash Value. See "Life Insurance Benefit Options" for more information.

The next table shows the minimum and maximum total operating expenses deducted from Fund assets (before any fee waiver or expense reimbursement) during the year ended December 31, 2004. Fund expenses may be higher or lower in the future. More detail concerning each underlying Fund's fees and expenses is contained in the prospectus for each Fund.

- * Formerly MainStay VP American Century Income & Growth--Initial Class.
- ** Formerly MainStay VP Dreyfus Large Company Value--Initial Class.
- *** Formerly MainStay VP Eagle Asset Management Growth Equity--Initial Class.
- (a) The Fund or its agents provided the fees and charges which are based on 2004 expense. We have not verified the accuracy of the information provided by the Fund or its agents.
- (b) The Advisory fee for the Portfolio is an annual percentage of the Fund's average daily net assets as follows: 0.60% up to \$250 million and 0.55% in excess of \$250 million. NYLIM has voluntarily agreed to waive its Management Fee to 0.55% on assets up to \$250 million and 0.50% on assets in excess of \$250 million. If NYLIM's voluntary waiver had been in effect for the fiscal period ended December 31, 2004, the Management Fee would have been 0.55% and Total Portfolio Operating Expenses would have been 0.91% for Initial Class Shares. This waiver may be discontinued at any time without notice.
- (c) A portion of the brokerage commissions that the fund pays may be reimbursed and used to reduce the fund's expenses. In addition, through arrangements with the fund's custodian, credits realized as a result of uninvested cash balances are used to reduce the fund's custodian expenses. Including these reductions, the total class operating expenses would have been 0.66% for Fidelity(R) VIP Contrafund(R), 0.57% for Fidelity(R) VIP Equity-Income, 0.65% for Fidelity(R) VIP Growth, 0.68% for Fidelity(R) VIP Mid Cap, and 0.87% for Fidelity(R) VIP Overseas. These offsets may be discontinued at any time.
- (d) All of the fees and expenses shown were determined based on net assets as of the fiscal year ended December 31, 2004, restated to reflect reductions in the Portfolio's management fees, effective July 1, 2004.
- (e) Effective November 1, 2004, the Adviser has voluntarily agreed to limit the ratio of expenses to average net assets to the maximum ratio, excluding certain investment related expenses such as foreign country tax expenses and interest on borrowing, of 1.65% for Morgan Stanley UIF Emerging Markets Equity Class I shares.
- (f) The Portfolio pays T. Rowe Price an annual fee that includes investment management services and ordinary, recurring operating expense, but does not cover interest, taxes, brokerage, non-recurring and extraordinary items, or fees and expenses for the Portfolio's independent directors. The fee is based on Portfolio average daily net assets and is calculated and accrued daily.

8

DEFINITIONS

ACCUMULATION UNIT: An accounting unit We use to calculate the value in the Investment Divisions. We use premiums and transfers allocated to the Investment Divisions to purchase Accumulation Units in those Investment Divisions.

ACCUMULATION VALUE: The sum of the dollar value of the Accumulation Units in all of the Investment Divisions.

ALLOCATION ALTERNATIVES: The 22 Investment Divisions of the Separate Account and the Fixed Account. Policyowners may invest in a total of 20 Allocation Alternatives at any one time.

BASE FACE AMOUNT: The initial face amount shown on page 2 of the policy, plus or minus any changes made to the initial face amount.

BENEFICIARY: The person(s) and/or entity(ies) you name to receive the death benefit after the Insured dies.

BUSINESS DAY: Any day on which the New York Stock Exchange is open for regular trading. Our Business Day ends at 4:00 pm Eastern Time or the closing of regular trading on the New York Stock Exchange, if earlier.

CASH SURRENDER VALUE: The amount We will pay you if you surrender your policy, equal to the Cash Value less any surrender charge.

CASH VALUE: The sum of (a) the Accumulation Value, (b) the value of the Fixed Account, and (c) the value in the Loan Account.

CASH VALUE ACCUMULATION TEST ("CVAT") An IRS test to determine whether a policy can be considered life insurance. See "Life Insurance Benefit Options" for more information.

ELIGIBLE PORTFOLIOS ("PORTFOLIOS"): The mutual fund Portfolios of the Funds that are available for investment through the Investment Divisions of the Separate Account.

FACE AMOUNT: Base face amount, plus the face amount of any riders in effect, plus or minus any changes made to the face amount of any riders.

FIXED ACCOUNT: The Allocation Alternative that credits interest at fixed rates subject to a minimum guarantee. Assets in the Fixed Account are part of NYLIAC's General Account.

FUND: An open-end management investment company.

GENERAL ACCOUNT: An account representing all of NYLIAC's assets, liabilities, capital and surplus, income, gains, or losses that are not included in the Separate Account or any other separate account. We allocate any Net Premium payments you make during the free look period to this account.

GUIDELINE PREMIUM TEST ("GPT"): An IRS test to determine whether a policy can be considered life insurance. See "Life Insurance Benefit Options" for more information.

INSURED: The person whose life the policy insures.

INVESTMENT DIVISIONS: The 22 divisions of the Separate Account that are available as Allocation Alternatives under the policy. Each Investment Division invests exclusively in shares of a specified Eligible Portfolio.

IRC: Internal Revenue Code of 1986, as amended.

ISSUE DATE: The date We issue the policy as specified on the Policy Data Page.

LIFE INSURANCE BENEFIT: The death benefit calculated under the Life Insurance Benefit Option you have chosen.

LOAN ACCOUNT: The account that holds a portion of Cash Value for the purpose of securing any outstanding loans, including accrued interest. It is part of NYLIAC's General Account.

MONTHLY DEDUCTION DAY: The date as of which We deduct your monthly contract charge, cost of insurance charge, and any rider charges from your policy's Cash Value. The first Monthly Deduction Day will be the monthly anniversary of the Policy Date on or following the Issue Date. However, if We have not received your initial premium payment as of the Issue Date, the first Monthly Deduction Day will be the monthly anniversary of the Policy Date on or following the date We receive the initial premium payment.

9

MORTALITY AND EXPENSE RISK: The risk that the group of lives We have insured under our policies will not live as long as We expect (mortality risk); and the risk that the cost of issuing and administering the policies will be greater than We have estimated (expense risk).

NET AMOUNT AT RISK: The difference between the Life Insurance Benefit and the policy's Cash Value.

NET PREMIUM: Premium you pay less the sales expense, state tax, and federal tax charges.

NON-QUALIFIED POLICY: A policy that is issued to a person or an entity other than employee benefit plans that qualify for special federal income tax treatment.

POLICY DATA PAGE: Page 2 of your policy. The Policy Data Page contains your policy's specifications.

POLICY DATE: It is the date We use as the starting point for determining Policy Years and Monthly Deduction Days. Generally, you may not choose a Policy Date that is more than six months before your policy's Issue Date. You can find your

Policy Date on the Policy Data Page.

POLICY DEBT: The amount of any outstanding loans under the policy, including accrued interest.

POLICY PROCEEDS: The benefit We will pay to your Beneficiary when We receive proof that the Insured died while the policy is in effect. It is equal to the Life Insurance Benefit, plus any additional death benefits under any riders you have chosen, minus any outstanding loans (including any accrued loan interest) and charges.

POLICY YEAR: The twelve-month period starting on your Policy Date, and each twelve-month period thereafter.

PORTFOLIOS: The mutual fund portfolios of the Funds that are available for investment through the Investment Divisions of the Separate Account. Portfolios described in this prospectus are different from portfolios available directly to the general public. Investment results will differ.

SEPARATE ACCOUNT: NYLIAC Corporate Sponsored Variable Universal Life Separate Account-I, a segregated asset account NYLIAC established to receive and invest premiums paid under this and certain other policies.

SURRENDER CHARGE PREMIUM: The amount We use to calculate the surrender charges as set forth on the Policy Data Page.

WE, US, OR NYLIAC: New York Life Insurance and Annuity Corporation.

MANAGEMENT AND ORGANIZATION

INSURER

New York Life Insurance and Annuity Company ("NYLIAC")
(a wholly-owned subsidiary of New York Life Insurance Company)
51 Madison Avenue
New York, NY 10010

YOUR POLICY

CSVUL is offered by NYLIAC. Policy assets, allocated to the Investment Divisions, are invested in the NYLIAC Corporate Sponsored Variable Universal Life Separate Account-I (the Separate Account"), which has been in existence since May 24, 1996. The Policy offers life insurance protection, a choice of Life Insurance Benefit options, flexible premium payments, loans and withdrawals (which may be subject to a surrender charge), changes in the Face Amount of the Policy, and the ability to invest in up to 20 of 23 Allocation Alternatives, including the Fixed Account.

The income, gains, and losses credited to, or charged against the Separate Account reflect its own investment experience, and not that of NYLIAC's other assets. It is important to note that the policy's assets may be used to pay only those NYLIAC liabilities that arise from the policies. NYLIAC is obligated to pay all amounts promised to policyowners under the policies.

STATE VARIATIONS Certain provisions of the policies may be different from the general description in this prospectus, and certain riders and options may not be available, because of legal requirements or restrictions in your state. See your policy for specific variations because any such state variations will be included in your policy or in riders or endorsements attached to your policy. See your registered representative or contact Us for specific information that may be applicable to your state. Also see Appendix B for a summary of state variations to the policy free look provision.

ABOUT THE SEPARATE ACCOUNT

NYLIAC Corporate Sponsored Variable Universal Life Separate Account-I (the "Separate Account.") is a segregated asset account that NYLIAC has established to receive and invest your Net Premiums. NYLIAC established the Separate Account on May 24, 1996 under the laws of Delaware, in accordance with resolutions set forth by the NYLIAC Board of Directors. The Separate Account is registered as a unit investment trust with the Securities and Exchange Commission ("SEC") under the Investment Company Act of 1940, as amended. This registration does not mean that the SEC supervises the management, investment practices, or policies of the Separate Account.

Although the assets of the Separate Account belong to NYLIAC, these assets are held separately from the other assets of NYLIAC, and under applicable insurance law cannot be charged for liabilities incurred in any other business operations of NYLIAC (except to the extent that assets in the Separate Account exceed the reserves and other liabilities of the Separate Account). These assets

are not subject to the claims of our general creditors. The income, capital gains, and capital losses incurred on the assets of the Separate Account are credited to or are charged against the assets of the Separate Account without regard to income, capital gains, and capital losses arising out of any other business NYLIAC may conduct. Therefore, the investment performance of the Separate Account is entirely independent of both the investment performance of NYLIAC's Fixed Account and the performance of any other Separate Account of NYLIAC. The obligations under the policies are obligations of NYLIAC.

The Separate Account currently consists of 22 Investment Divisions available under a policy. The Investment Divisions invest exclusively in the corresponding Eligible Portfolios of the Funds. The income, capital gains, and capital losses incurred on the assets of an Investment Division are credited to or charged against the assets of that Investment Division, without regard to the income, capital gains, or capital losses of any other Investment Division. The Investment Divisions of the Separate Account are designed to provide money to pay benefits under your policy, but they do not guarantee a minimum rate of return or protect against asset depreciation. They will fluctuate up and down depending on the performance of the Eligible Portfolios.

OUR RIGHTS

We may take certain actions relating to our operations and the operations of the Separate Account. We will take these actions in accordance with applicable laws including obtaining any required approval of the Securities and Exchange Commission (SEC) and any other required regulatory approvals. If necessary, We will seek approval of our policyowners.

Specifically We reserve the right to:

- add or remove any Investment Division;
- create new separate accounts;
- combine the Separate Account with one or more other separate accounts;
- operate the Separate Account as a management investment company under the 1940 Act or in any other form permitted by law;
- deregister the Separate Account under the 1940 Act;
- manage the Separate Account under the direction of a committee or discharge such committee at any time;
- transfer the assets of the Separate Account to one or more other separate accounts;
- restrict or eliminate any of the voting rights of policyowners or other persons who have voting rights as to the Separate Account; and
- change the name of the Separate Account.

THE FIXED ACCOUNT

The Fixed Account is supported by the assets in our General Account, which includes all of our assets except those assets specifically allocated to separate accounts. These assets are subject to the claims of our general creditors. We can invest the assets of the Fixed Account however We choose, within limits. Your

11

interest in the Fixed Account is not registered under the Securities Act of 1933 as amended (the "1933 Act"), and the Fixed Account is not registered as an investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). Generally, you do not have the benefits and protections of these statutes for amounts allocated to the Fixed Account.

INTEREST CREDITING

Any amounts in the Fixed Account are credited with interest using a fixed interest rate, which We declare periodically. The rate will never be less than 4% per year. Interest accrues daily and is credited on each Monthly Deduction Day. All Net Premiums applied to, and amounts transferred to, less amounts withdrawn, transferred from or charged against the Fixed Account receive the rate in effect at that time.

HOW TO REACH US FOR POLICY SERVICES

You can reach Us in several ways. You can send premiums and make service requests to Us at the following addresses:

FUNDS AND ELIGIBLE PORTFOLIOS

The Portfolios of each Fund eligible for investment, along with their advisers and investment objectives, are listed in the following table. For more information about each of these Portfolios, please read their prospectuses, which are found at the end of this prospectus.

We receive payments or compensation from some or all of the Funds or their investments advisers, or from other service providers of the Funds (who may be affiliates of NYLIAC) in connection with administration, distribution and other services we provide with respect to the Eligible Portfolios and their availability through the policies. The amounts we receive, if any, may be substantial, may vary by Eligible Portfolio, and may depend on how much policy value is invested in the particular Eligible Portfolio or Fund. Currently, we receive payments or revenue under various arrangements in amounts ranging from 0.10% to 0.35% annually of the aggregate net asset value of the shares of some of the Eligible Portfolios held by the Investment Divisions. We also receive compensation under various distribution services arrangements in amounts ranging from 0.05% to 0.25% annually of the aggregate net asset value of the shares of some of the Eligible Portfolios held by the Investment Divisions. The compensation that your registered representative receives remains the same regardless of which Investment Divisions you choose or the particular arrangements applicable to those Investment Divisions.

companies.

</Table>

You are responsible for choosing the Investment Divisions, and the amounts allocated to each, that are appropriate for your own individual circumstances and your investment goals, financial situation, and risk tolerance. Decisions regarding investment allocations should be carefully considered. YOU BEAR THE RISK OF ANY DECLINE IN THE VALUE OF YOUR POLICY RESULTING FROM THE PERFORMANCE OF THE PORTFOLIOS YOU HAVE CHOSEN.

In making your investment selections, We encourage you to thoroughly investigate all of the information regarding the Eligible Portfolios that is available to you, including each Fund's prospectus, statement of additional information, and annual and semi-annual reports. Other sources such as the Fund's website or newspapers and financial and other magazines provide more current information, including information about any regulatory actions or investigations relating to a Fund or Eligible Portfolio. After you select Investment Divisions for your initial premium, you should monitor and periodically re-evaluate your allocations to determine if they are still appropriate.

NYLIAC does not provide investment advice and does not recommend or endorse any particular Eligible Portfolio or Portfolios.

The Investment Divisions invest in the corresponding Eligible Portfolios. You can allocate Net Premium payments or transfer cash value to a maximum of 20 of the 23 Allocation Alternatives, including the Fixed Account. Only 20 of the 23 Allocation Alternatives may be active at one time.

The Investment Divisions offered through the CSVUL policy and described in this prospectus are different from mutual funds that may have similar names, the same adviser, the same investment objective and policies, and substantially similar Portfolio securities, but still investment performance may not be the same.

14

INVESTMENT RETURN

The investment return of a Policy is based on:

- The Accumulation Units held in each Investment Division for that policy;
- The investment experience of each Investment Division as measured by its actual net rate of return;
- The interest rate credited on amounts held in the Fixed Account; and
- The interest rate credited on amounts held in the Loan Account, if any.

The investment experience of an Investment Division reflects increases or decreases in the net asset value of the shares of the underlying Portfolio, any dividend or capital gains distributions declared by the Funds, and the policy's Mortality and Expense Risk charge. These investment returns do not reflect any other policy charges, and, if they did, the returns shown would be reduced.

We will credit any amounts in the Fixed Account with a fixed interest rate which We declare periodically in advance, at our sole discretion. This rate will never be less than an annual rate of 4%. We may credit different interest rates to loaned and unloaned amounts in the Fixed Account. All Net Premiums applied to, and amounts transferred to, the Fixed Account, receive the loaned amount rate or the unloaned amount rate in effect at that time. Interest accrues daily and is credited on each Monthly Deduction Day.

Funds may lose value; are not guaranteed; are not FDIC/NCUA insured; and are not insured by any government agency.

VOTING

We will vote the shares that the Investment Divisions of the Separate Account held in the Portfolio Companies at any regular and special shareholder meetings of the Funds. We will vote these shares according to the instructions We receive from our policyowners who have invested their premiums in Investment Divisions that invest in the Fund holding the meeting. However, if the law changes to allow Us to vote the shares in our own right, We may decide to do so.

While your policy is in effect, you can provide voting instructions to Us for each Investment Division in which you have assets. The number of votes you are entitled to will be determined by dividing the units you have invested in an Investment Division by the net asset value per unit for the Eligible Portfolio underlying that Investment Division.

We will determine the number of votes you are entitled to on the date established by the underlying Fund for determining shareholders that are eligible to vote at the meeting of the relevant Fund. We will send you written voting instructions prior to the meeting according to the procedures established by the Fund. We will send proxy material, reports, and other materials relating to the Fund to each person having a voting interest.

We will vote the Fund shares for which We do not receive timely instructions in the same proportion as the shares for which We receive voting instructions in a timely manner. We will use voting instructions to abstain from voting on an item to reduce the number of votes eligible to be cast.

CHARGES ASSOCIATED WITH THE POLICY

As with all life insurance policies, certain charges apply when you purchase the CSVUL. The following is a summary explanation of these charges.

DEDUCTIONS FROM PREMIUMS

When We receive a premium payment from you, whether planned or unplanned, We will deduct a sales expense charge, a state tax charge, and a federal tax charge.

SALES EXPENSE CHARGE

The sales expense charge is currently 2.25% of any premium. We reserve the right to increase this charge in the future, but it will never exceed 4.5% of premiums. The amount of the sales expense charge in a Policy Year is not necessarily related to our actual sales expenses for that particular year. To the extent that the sales expenses are not covered by the sales expense charge and the surrender charge, they will be

15

recovered from NYLIAC surplus, including any amounts derived from the Mortality and Expense Risk charge and the cost of insurance charge.

STATE TAX CHARGE

Some jurisdictions impose a tax on the premiums insurance companies receive from their policyholders ranging from 0% to 3.5% of the premium payment. (The rate may be higher in some U.S. territories.) We currently deduct 2% of each premium payment you make, or \$20 per \$1,000 of premium, to cover these tax charges. We may increase the amount we deduct as a state tax charge to reflect changes in applicable law. Our right to increase this charge is limited by law in some jurisdictions.

FEDERAL TAX CHARGE

-- We deduct 1.25% of each premium payment you make, or \$12.50 per \$1,000 of premium, as a federal tax charge. We may increase this charge to reflect changes in applicable law.

DEDUCTIONS FROM CASH VALUE

On each Monthly Deduction Day, We will deduct a monthly contract charge, a cost of insurance charge, and a rider charge for the cost of any additional riders from your policy's Cash Value. The first Monthly Deduction Day will be the monthly anniversary of the Policy Date on or following the Issue Date. If the Policy Date is prior to the Issue Date, the deductions made on the first Monthly Deduction Day will cover the period from the Policy Date until the first Monthly Deduction Day. We deduct these charges from the policy's Cash Value in the Investment Divisions and the Fixed Account in proportion to the policy's Cash Value in each.

MONTHLY CONTRACT CHARGE

On each Monthly Deduction Day, We will deduct a monthly contract charge to cover our costs for providing certain administrative services, including premium collection, record-keeping, processing claims, and communicating with policyowners.

Currently, We deduct a monthly contract charge of \$7.50 (\$90 annually). While We can change the monthly contract charge at any time, We guarantee that We will never charge you more than \$9 per month (\$108 annually).

CHARGE FOR COST OF INSURANCE

A charge for the cost of insurance is deducted on each Monthly Deduction Day for the cost of providing a Life Insurance Benefit to you. Maximum cost of insurance rates are set forth on your Policy Data Page. The Life Insurance Benefit varies based on the performance of the Investment Divisions selected, interest credits to the Fixed Accounts, outstanding loans (including loan interest), charges, and premium payments. The current rates are based on the gender, smoker class, policy duration, underwriting class, and issue age of the Insured. We may change the current cost of insurance rates based on changes in future expectations of such factors as mortality, investment income, expenses, and persistency. The cost of insurance charge for any month will equal:

$$a \times (b-c)$$

Where a = the applicable cost of insurance rate

b = the number of thousands of death benefit as of the Monthly Deduction Day divided by 1.0032737,

c = the number of thousands of Cash Value as of the Monthly Deduction Day (before the cost of insurance charge, but after the monthly contract charge and any charges for the riders are deducted).

The cost of insurance charge will never be less than zero.

For Insureds rated sub-standard risks, an additional charge may be assessed as part of the cost of insurance charge. Any additional flat extra charges (which might apply to certain Insureds based on our underwriting) will also be deducted on each Monthly Deduction Day.

16

RIDER CHARGES

Each month, We deduct any applicable charges for any optional riders you have chosen. (For more information about specific riders' charges, see "Table of Fees and Expenses.")

LOAN CHARGES

We currently charge an effective annual loan interest rate of 6.00% payable in arrears. When you request a loan, a transfer of funds will be made from the Separate Account and the Fixed Account to the Loan Account equal to (1) the requested loan amount; plus (2) any Policy Debt; plus (3) the interest to the next policy anniversary on the requested loan amount and on any Policy Debt; minus (4) the amount in the Loan Account.

When you take a loan against your policy, the loaned amount which We hold in the Fixed Account may earn interest at a different rate from the rate We charge you for loan interest. For the first 10 Policy Years, the rate We currently credit on loaned amounts is 2% less than the rate We charge for loan interest. Beginning in the eleventh Policy Year, the rate We currently credit on loaned amounts is 0.5% less than the rate We charge for loan interest. The rate We credit on loaned amounts will never be less than 2.00% less than the rate We charge for policy loans. We guarantee that the interest rate We credit on loaned amounts will always be at least 4.00%. (See "Loans" for more information.)

SEPARATE ACCOUNT CHARGES

MORTALITY AND EXPENSE RISK CHARGE

We charge the Investment Divisions for the Mortality and Expense Risks We assume.

-- Current: For Policy Years 1-10, the charge is equal to an annual rate of 0.70%, or \$7 per \$1,000, of the average daily net asset value of each Investment Division. For Policy Years 11 and later, We currently expect the Mortality and Expense Risk charge to reduce to annual rate of 0.30%, or \$3 per \$1,000, of the average daily net asset value of each Investment Division.

-- Guaranteed Maximum: At our option, We may change the Mortality and Expense Risk charge. We guarantee that the Mortality and Expense Risk

charge will never exceed an annual rate of 0.90%, or \$9 per \$1,000, of the average daily net asset value of each Investment Division.

The mortality risk We assume is that the group of lives insured under our policies may, on average, live for shorter periods of time than We estimated. The expense risk We assume is that our costs of issuing and administering policies may be more than We estimated.

If these charges are insufficient to cover actual costs and assumed risks, the loss will be deducted from the NYLIAC surplus. Conversely, if the charge proves more than sufficient, any excess will be added to the NYLIAC surplus. We may use these funds for any corporate purpose, including expenses relating to the sale of the policies, to the extent that surrender charges do not adequately cover sales expenses.

CHARGES FOR FEDERAL INCOME TAXES

We do not currently deduct a charge for federal income taxes from the Investment Divisions, although We may do so in the future to reflect possible changes in the law.

FUND CHARGES

Each Investment Division of the Separate Account purchases shares of the corresponding Portfolio at the net asset value. The net asset value reflects the investment advisory fees and other expenses that are deducted from the assets of the Portfolio by the relevant Fund. The advisory fees and other expenses are not fixed or specified under the terms of the policy and may vary from year to year. These fees and expenses are described in the Funds' prospectuses. See "Fund Annual Expenses" for more information.

TRANSACTION CHARGES

PARTIAL WITHDRAWAL CHARGE (AND SURRENDER CHARGE)

When you take a partial withdrawal, We reserve the right to deduct a maximum processing fee of \$25. If the partial withdrawal results in a decrease in the Base Face Amount, We will also deduct a surrender charge (as described below).

TRANSFER FEE

We reserve the right to impose a charge of up to \$30 per transfer for each transfer after the first 12 in any Policy Year.

SURRENDER CHARGE

During the first nine Policy Years, We will assess a surrender charge on a complete surrender or a requested decrease in Base Face Amount (not including any term insurance amount). Thus, the surrender charge would be lower if you combine term insurance with the base policy. The surrender charge is based on the Policy Year in which the surrender or decrease in Base Face Amount is made and will be deducted from the policy's Cash Value in the Investment Divisions and the Fixed Account in proportion to the policy's Cash Value in each.

For a surrender, the maximum surrender charge is equal to the applicable percentage shown in the table below multiplied by the Surrender Charge Premium, which appears on page 2.1 of your policy. A table of Surrender Charge Premium Rates Per Thousand appears in Appendix A to this prospectus.

<Table>

<Caption>

POLICY YEAR -----	PERCENTAGE OF SURRENDER CHARGE PREMIUM -----
<S>	<C>
1-5.....	32.5%
6.....	26.0%
7.....	19.5%
8.....	13.0%
9.....	6.5%
10+.....	0%

</Table>

The surrender charge may be less than the maximum surrender charge if a decrease in the Base Face Amount is requested. A requested decrease in Base Face Amount will result in the imposition of a surrender charge equal to the difference between the surrender charge that would have been payable on a complete surrender prior to the decrease and the surrender charge that would be payable on a complete surrender after the decrease. Requested decreases and increases in Base Face Amount will cause a corresponding change in the amount of

your Surrender Charge Premium.

SURRENDER CHARGE LIMITS.

In no event will the surrender charge exceed 50% of premiums paid to date, less (i) any sales expense charges deducted from such premium payments, less (ii) any surrender charge previously deducted.

HOW THE POLICY WORKS.

This example is based on the charges applicable to a policy during the first Policy Year, issued on a medically underwritten, non-smoking insured male, issue age 45, with an initial Face Amount of \$350,000, who has selected Life Insurance Benefit Option 1 and the Guideline Premium Test. The example assumes current

18

charges and a 6% hypothetical gross annual investment return, which results in a net annual investment return of 4.48% for Policy Years 1-10, and 4.90% for Policy Years 11 and later.

<S>	<C>	<C>
Planned Annual Premium.....		\$7,500.00
less: Sales expense charge (2.25%).....		168.75
State tax charge (2%).....		150.00
Federal tax charge (1.25%).....		93.75

equals: Net Premium.....		\$7,087.50
less: Monthly contract charge		
(\$7.50 per month).....		90.00
less: Charges for cost of insurance		
(varies monthly).....		566.25
plus: Net investment performance		
(varies daily).....		301.70

equals: Cash Value.....		\$6,732.95
less: Surrender charge (a percentage of Surrender Charge		
Premium).....		1,023.75

equals: Cash Surrender Value (as of end of the first Policy Year)...		\$5,709.20

There is no guarantee that the current charges illustrated above will continue. Depending on the timing and degree of fluctuation in actual investment returns, the actual policy values could be substantially more or less than those shown. A lower value, under certain circumstances, could result in the lapse of the policy unless the policyowner pays more than the stated premium.

DESCRIPTION OF THE POLICY

THE PARTIES

There are three important parties to the Policy: the POLICYOWNER (or contractowner), the INSURED, and the BENEFICIARY. One individual can have one or more of these roles. Each party plays an important role in a Policy.

POLICYOWNER: This person or entity can purchase and surrender a policy, and can make changes to it, such as:

- increase/decrease the Face Amount
- choose a different Life Insurance Benefit Option
- add/delete riders
- change the Beneficiary
- change underlying investment options
- take a loan against or take a partial withdrawal from the value of the policy

INSURED: This individual's personal information determines the cost of the life insurance coverage. The Policyowner also may be the Insured.

BENEFICIARY: The person (persons) who receives the proceeds of the policy at the time of the Insured's death. The Beneficiary is the person(s) or entity(ies) the Policyowner specifies on our records to receive the proceeds from the policy. The Policyowner may name his or her estate as the Beneficiary.

THE POLICY

The Policy provides life insurance protection on the named Insured, and

pays Policy Proceeds when that Insured dies while the policy is in effect. The policy offers: (1) flexible premium payments where you decide the timing and amount of the payment; (2) a choice of two Life Insurance Benefit Options; (3) access to the policy's Cash Value through loans and partial withdrawal privileges (within limits); (4) the ability to increase or decrease the policy's face amount of insurance (within limits); (5) additional benefits through the use of optional riders; and (7) a selection of premium and expense allocation options, including 22 Investment

Divisions and a Fixed Account with a guaranteed minimum interest rate. However, you may only allocate your premiums among up to 20 of the Allocation Alternatives as available.

HOW THE POLICY IS AVAILABLE

CSVUL is only available as a Non-Qualified Policy. This means that the policy is not available for use in connection with certain employee retirement plans that qualify for special treatment under the federal tax law. The minimum Base Face Amount is \$25,000, unless a higher amount is required by state law. The policyowner may increase the Face Amount, subject to our underwriting rules in effect at the time of the request. The Insured may not be older than age 85 as of the Policy Date or the date of any increase in Face Amount. Before issuing any policy (or increasing its Face Amount), the policyowner must give Us satisfactory evidence of insurability. We may issue the policy based on underwriting rules and procedures which are based on NYLIAC's eligibility standards. These may include guaranteed issue underwriting. If our procedures for any group or sponsored arrangements call for less than full medical underwriting, Insureds in good health may be able to obtain coverage more economically under a policy that requires full medical underwriting.

We may issue the policy in certain states on a unisex basis. For policies issued on a unisex basis, the policyowner should disregard any reference in this prospectus that makes a distinction based on the gender of the Insured.

POLICY PREMIUMS

Planned Premiums: The amount and interval of any planned premiums are shown on page two of the policy. The policyowner does not have to pay a planned premium to keep the policy in force if the Cash Surrender Value, less any Policy Debt, is enough to cover the charges made on the Monthly Deduction Day. The policyowner may increase or decrease the amount of any planned premium subject to the limits We set. However, the policyowner may not make a premium payment which would jeopardize the policy's qualification as "life insurance" under Section 7702 of the Internal Revenue Code. The policyowner may also change the frequency of premiums subject to our minimum premium rules. Planned premiums end on the policy anniversary on which the Insured is age 95.

Unplanned Premiums: While the Insured is living, the policyowner may make unplanned premium payments at any time before the policy anniversary on which the Insured is age 95. However, the policyowner may not make a premium payment which would jeopardize the policy's qualification as "life insurance" under Section 7702 of the Internal Revenue Code. If an unplanned premium would result in an increase in the death benefit greater than the increase in the Cash Value, We reserve the right to require proof of insurability before accepting that payment and applying it to the policy. We also reserve the right to limit the number and amount of any unplanned premiums.

CASH VALUE AND CASH SURRENDER VALUE

CASH VALUE

After the free look period, the Cash Value of the policy is the sum of the Accumulation Value in the Separate Account, the value of the Fixed Account and the value in the Loan Account. Subsequent Net Premiums are allocated among the Fixed Account and/or the Investment Divisions according to the allocation percentages requested in the application, or as subsequently changed by the policyowner. A portion of the Cash Value is allocated to the Loan Account if a loan is taken under the policy. See "Loans" for details. The Cash Value also reflects various charges. See "Charges Under the Policy."

CASH SURRENDER VALUE

The policy may be surrendered for its Cash Surrender Value, less any Policy Debt, at any time before the Insured dies. Unless a later effective date is selected, the surrender is effective on the Business Day We receive a signed surrender request in proper form at our Service Office. The Cash Surrender Value is the Cash Value, less any surrender charges.

INVESTMENT DIVISIONS AND THE FIXED ACCOUNT

The balance of your premium payment after We deduct the premium charges is called your Net Premium. We allocate your Net Premium among your selected Investment Divisions available under the policy (See "Funds and Eligible Portfolios" for our list of available Investment Divisions) and the Fixed Account, based on your instructions. You can allocate your Net Premium to one or more Investment Divisions and/or the Fixed Account.

AMOUNT IN THE SEPARATE ACCOUNT

We use the amount allocated to an Investment Division to purchase Accumulation Units within that Investment Division. We redeem Accumulation Units from an Investment Division when amounts are loaned, withdrawn, transferred, surrendered, or deducted for charges or loan interest. We calculate the number of Accumulation Units purchased or redeemed in an Investment Division by dividing the dollar amount of the transaction by the Investment Division's Accumulation Unit value. On any given day, the amount you have in the Separate Account is the value of the Accumulation Units you have in all of the Investment Divisions of the Separate Account. The value of the Accumulation Units you have in a given Investment Division equals the current Accumulation Unit value for the Investment Division multiplied by the number of Accumulation Units you hold in that Investment Division.

We determine Accumulation Unit values for the Investment Divisions as of the end of each valuation day. A "valuation day" is any day the New York Stock Exchange is open for regular trading.

AMOUNT IN THE FIXED ACCOUNT

You can choose to allocate all or part of your Net Premium payments to the Fixed Account. The amount you have in the Fixed Account equals:

- (1) the sum of the Net Premium payments you have allocated to the Fixed Account;
- plus (2) any transfers you have made from the Separate Account to the Fixed Account;
- plus (3) any interest credited to the Fixed Account;
- less (4) any amounts you have withdrawn from the Fixed Account;
- less (5) any charges We have deducted from the Fixed Account;
- less (6) any transfers you have made from the Fixed Account to the Separate Account.

TRANSFERS AMONG INVESTMENT DIVISIONS AND THE FIXED ACCOUNT

You may transfer all or part of the Cash Value of your policy among the Investment Divisions or from an Investment Division to the Fixed Account. Transfers may also be made from the Fixed Account to the Investment Divisions in certain situations.

The minimum amount that may be transferred from one Investment Division to another Investment Division or to the Fixed Account, is the lesser of (i) \$500 or (ii) the value of the Accumulation Units in the Investment Division from which the transfer is being made. If, after the transfer, the value of the remaining Accumulation Units in an Investment Division or the value of the Fixed Account would be less than \$500, that amount will be included in the transfer. There is no charge for the first twelve transfers in any one Policy Year. NYLIAC reserves the right to charge \$30 for each transfer in excess of twelve per year. This charge is applied on a pro-rata basis to the Allocation Alternatives to which the transfer is being made.

Transfers From the Fixed Account--In each Policy Year, the policyowner may make one transfer from the Fixed Account to the Investment Divisions, subject to the following three conditions:

1. Maximum Transfer. An amount not greater than 10% of the value of the Fixed Account at the beginning of the Policy Year may be transferred during that Policy Year. The 10% maximum transfer limitation does not apply during the retirement year (the Policy Year following the Insured's 65(th) birthday, the date you indicate in the application, or another date We approve).
2. Minimum Transfer. The minimum amount that may be transferred is \$500, unless We agree otherwise.

3. Minimum Remaining Value. The value remaining in the Fixed Account after the transfer must be at least \$500. If the remaining value would be less than \$500, that amount must be included in the transfer.

Transfer requests must be made in writing on a form We have approved. Transfers to or from Investment Divisions will be made based on the Accumulation Unit Values on the Business Day on which NYLIAC receives the transfer request.

LIMITS ON TRANSFERS

PROCEDURES DESIGNED TO LIMIT POTENTIALLY HARMFUL TRANSFERS

This policy is not intended as a vehicle for market timing. Generally, We require that all transfer requests must be submitted in writing through the U.S. mail or an overnight carrier. In connection with deferred compensation plans, however, We may permit, in certain limited circumstances, transfer requests to be submitted by fax transmission. These requirements are designed to limit potentially harmful transfers.

WE MAY CHANGE THIS LIMITATION OR ADD NEW ONES AT ANY TIME WITHOUT PRIOR NOTICE; YOUR POLICY WILL BE SUBJECT TO THESE CHANGES REGARDLESS OF THE ISSUE DATE OF YOUR POLICY. All transfers are subject to the limits set forth in the prospectus in effect on the date of the transfer request, regardless of when your policy was issued. Note, also, that any applicable transfer rules, either as indicated above or that We may utilize in the future, will be applied even if we cannot identify any specific harmful effect from any particular transfer.

We apply our limits on transfers procedures to all owners of this policy without exception.

Orders for the purchase of Fund Portfolio shares are subject to acceptance by the relevant Fund. We will reject or reverse, without prior notice, any transfer request into an Investment Division if the purchase of shares in the corresponding Fund Portfolio is not accepted by the Fund for any reason. For transfers into multiple Investment Divisions, the entire transfer request will be rejected or reversed if any part of it is not accepted by any one of the Funds. We will provide you with written notice of any transfer request We reject or reverse. You should read the Fund prospectuses for more details on their ability to refuse or restrict purchases or redemptions of their shares.

RISKS ASSOCIATED WITH POTENTIALLY HARMFUL TRANSFERS

The procedures described herein are designed to limit potentially harmful transfers. However, We cannot guarantee that our procedures will be effective in detecting and preventing all transfer activity that could disadvantage or potentially hurt the rights or interests of other policyowners. The risks described below apply to policyowners and other persons having material rights under the policies.

-- We do not currently impose redemption fees on transfers or expressly limit the number or size of transfers in a given period. Redemption fees, transfer limits, and other procedures or restrictions may be more or less successful than our procedures in deterring or preventing potentially harmful transfer activity.

-- Our ability to detect and deter potentially harmful transfer activity may be limited by policy provisions.

-- (1) The underlying Fund Portfolios may have adopted their own policies and procedures with respect to trading of their respective shares. The prospectuses for the underlying Fund Portfolios, in effect at the time of any trade, describe any such policies and procedures. The trading policies and procedures of an underlying Fund Portfolio may vary from ours and be more or less effective at preventing harm. Accordingly, the sole protection you may have against potentially harmful frequent transfers is the protection provided by the procedures described herein.

(2) The purchase and redemption orders received by the underlying Fund Portfolios reflect the aggregation and netting of multiple orders from owners of this policy and other variable policies issued by Us. The nature of these combined orders may limit the underlying Fund Portfolios' ability to apply their respective trading policies and procedures. In addition, if an underlying Fund Portfolio believes that a combined order We submit may reflect one or more transfer requests from owners engaged in potentially harmful transfer activity, the underlying Fund Portfolio may reject the entire order and thereby prevent Us from implementing any transfers that day. We do not generally expect this to happen.

-- Other insurance companies, which invest in the Fund Portfolios underlying this policy, may have adopted their own policies and procedures to detect and prevent potentially harmful transfer activity. The policies and procedures of other insurance companies may vary from ours and be more or less effective at preventing harm. If their policies

and procedures fail to successfully discourage potentially harmful transfer activity, there could be a negative effect on the owners of all of the variable policies, including ours, whose variable investment options correspond to the affected underlying Fund Portfolios.

-- Potentially harmful transfer activity could result in reduced performance results for one or more Investment Divisions, due to among other things:

- (1) an adverse effect on Portfolio management, such as:
 - a) impeding a Portfolio manager's ability to sustain an investment objective;
 - b) causing the underlying Fund Portfolio to maintain a higher level of cash than would otherwise be the case; or
 - c) causing an underlying Fund Portfolio to liquidate investments prematurely (or otherwise at an otherwise inopportune time) in order to pay withdrawals or transfers out of the underlying Fund Portfolio.
- (2) increased administrative and Fund brokerage expenses.
- (3) dilution of the interests of long-term investors in an Investment Division if purchases or redemptions into or out of an underlying Fund Portfolio are made when, and if, the underlying Fund Portfolio's investments do not reflect an accurate value (sometimes referred to as "time-zone arbitrage" and "liquidity arbitrage").

How to Request a Transfer--Submit your request in writing on a form We approve to our Service Office at the following address: New York Life and Annuity Corporation, NYLIFE Distributors LLC, Attention: Executive Benefits, 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211

Transfer requests received after 4:00 pm Eastern Time will be priced as of the next Business Day. (See "How to Reach Us for Policy Services" for more information.)

ADDITIONAL BENEFITS THROUGH RIDERS

The policy can include additional benefits that We approve based on our standards and limits for issuing insurance and classifying risks. An additional benefit is provided by rider and is subject to the terms of both the policy and the rider. The following rider is currently available:

-- ADJUSTABLE TERM INSURANCE RIDER: This rider provides term insurance coverage on the Insured. The initial term amount is shown on your Policy Data Page. If the policyowner requests a change in the base policy face amount, or if the amount of death benefit under the base policy automatically increases or decreases in order to satisfy IRC Section 7702 requirements, the term benefit will be adjusted on each policy anniversary accordingly to maintain a level overall total death benefit. In addition, the policyowner can elect to change the term amount at any time. The policyowner must furnish evidence of insurability, satisfactory to Us, in connection with any request to increase the term insurance amount. This rider must be elected at the time the policy is issued.

TERM RIDER VS. BASE POLICY COVERAGE: If you compare a policy with a term insurance rider to one that provides the same initial death benefit without a term rider, the policy with the term rider will have lower surrender charges. See "Charges Associated with the Policy--Surrender Charge."

OPTIONS AVAILABLE AT NO ADDITIONAL CHARGE

TAX-FREE "SECTION 1035" INSURANCE POLICY EXCHANGES

Generally, you can exchange one life insurance policy for another in a "tax-free exchange" under Section 1035 of the IRC. Before making an exchange, you should compare both policies carefully. Remember that if you exchange another policy for the one described in this prospectus, you might have to pay a surrender charge on your old policy. There will be a new surrender charge period for this policy and other charges may be higher (or lower) and the benefits may be different. If the exchange does not qualify for

23

Section 1035 treatment, you may have to pay federal income and penalty taxes on the exchange. You should not exchange another policy for this one unless you determine, after knowing all of the facts, that the exchange is in your best interest.

24 MONTH EXCHANGE PRIVILEGE

At any time within 24 months of the Issue Date, the policyowner may exchange the policy for a policy on a permanent plan of life insurance on the Insured which We offer for this purpose. NYLIAC will not require evidence of insurability. Upon an exchange of a policy, all riders and benefits will end unless We agree otherwise or unless required under state law. The replacement policy will have the same Policy Date, issue age, risk classification and initial Face Amount as the original policy, but will not offer variable investment options such as the Investment Divisions.

In order to exchange the policy, We will require: (a) that the policy be in effect on the date of exchange; (b) repayment of any Policy Debt; and (c) an adjustment, if any, for differences in premiums and cash values under the old policy and the new policy. On the Business Day We receive a written request for an exchange, the Accumulation Value of the policy will be transferred into the Fixed Account, where it will remain until these requirements are met. The date of exchange will be the later of: (a) the Business Day the policyowner sends Us the policy along with a signed request; or (b) the Business Day We receive the policy at our Service Office, or such other location that We indicate to the policyowner in writing and the necessary payment for the exchange, if any.

PREMIUMS

For the purpose of determining whether We require additional underwriting when accepting a premium payment, We divide your premium payments into planned and unplanned premiums. ACCEPTANCE OF INITIAL PREMIUM PAYMENTS ARE SUBJECT TO SUITABILITY STANDARDS.

Factors that are considered in determining your premium payment are: age, underwriting class, gender, policy Face Amount, Fund performance, loans, and riders you add to your policy.

PLANNED PREMIUM

When you apply for your policy, you select a premium payment schedule, which indicates the amount and frequency of premium payments you intend to make. The premium amount you select for this schedule is called your "planned premium." It is shown on the Policy Data Page.

- You may increase or decrease the amount of your planned premium and change the frequency of your payments, within limits.
- Planned premium payments end on the policy anniversary on which the Insured is age 95.
- Your policy will not automatically terminate if you are unable to pay the planned premium. However, payment of your planned premium does not guarantee your policy will remain in effect. Your policy will terminate if the Cash Surrender Value is insufficient to pay the monthly deduction charges, or if you reach the end of the late period and you have not made the necessary payment.

UNPLANNED PREMIUM

An unplanned premium is a payment you make that is not part of the premium schedule you choose.

- While the Insured is living, you may make unplanned premium payments at any time before the policy anniversary on which the Insured is age 95. However, if payment of an unplanned premium will cause the Life Insurance Benefit of your policy to increase more than the Cash Value will increase, We may require proof of insurability before accepting that payment and applying it to your policy. The increase may occur in order for your policy to continue to qualify as life insurance under the IRC.
- If you exchange another life insurance policy to acquire this policy under IRC Section 1035, We will treat the proceeds of that exchange as an unplanned premium.
- The minimum unplanned premium amount We allow is \$50.
- We may limit the number and amount of any unplanned premium payments.

24

Premium payments can be mailed to our Premium Remittance Center at: New York Life Insurance and Annuity Corporation, Attention: Executive Benefits, P.O. Box 930652, Kansas City, Missouri 64193-0652.

RISK OF MINIMALLY FUNDED POLICIES

You can make additional planned or unplanned premium payments at any time up to the Insured's attainment of age 95. We will require one or more additional

premium payments in the circumstance where the Cash Surrender Value of your policy is determined to be insufficient to pay the charges needed to keep your policy in effect. Should the additional payment(s) not be made, your policy will lapse.

Although premium payments are flexible, you may need to make additional premium payments so that the Cash Surrender Value of your policy is sufficient to pay the charges needed to keep your policy in effect. A policy that is maintained with a Cash Surrender Value just sufficient to cover deductions and charges or that is otherwise minimally funded more likely will be unable to maintain its Cash Surrender Value because of market fluctuation and other performance-related risks. When determining the amount of your planned premium payments, you should consider funding your policy at a level which has the potential to maximize the investment opportunities within your policy and to minimize the risks associated with market fluctuations. (Your policy can lapse even if you pay all of the planned premiums on time.)

TIMING AND VALUATION

Your premium will be credited to your policy on the Business Day that it is received, assuming it is received prior to 4:00 p.m. Eastern Time. Any premiums received after that time will be credited to your policy on the next Business Day. A "Business Day" is any day that the New York Stock Exchange ("NYSE") is open. Generally, the NYSE is closed on Saturdays, Sundays, and major U.S. holidays.

The Fund assets making up the Investment Divisions will be valued only on those days that the NYSE is open for trading.

FREE LOOK

You have the right to cancel your policy, within certain limits. Under the free look provision of your policy, in most jurisdictions, you have 20 days after you receive your policy to return the policy to Us and receive a refund. You can cancel increases in the Face Amount of your policy under the same time limits.

We will allocate premium payments you make with your application or during the free look period to our General Account until 20 days after your policy has been delivered. After the end of the Free Look Period We will then allocate the Net Premium plus any accrued interest to the Investment Divisions you have selected. However, if you cancel your policy, We will pay you only the greater of your policy's Cash Value on the date you return the policy or the total premium payments you have made, less any loans and any partial withdrawals you have taken.

You can return the policy to Service Office at: NYLIFE Distributors LLC, Attention: Executive Benefits, 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211 (or any other address We indicate to you in writing), or you can deliver it to the registered representative from whom you purchased the policy.

PREMIUM PAYMENTS

When We receive a premium payment, We deduct the sales expense, state tax, and federal tax charges that apply. The balance of the premium is called the "Net Premium." We apply your Net Premium to the Investment Divisions and/or Fixed Account, according to your instructions.

If you elect the Guideline Premium Test ("GPT") to determine whether your policy qualifies as life insurance under IRC Section 7702, We may limit your premium payments. If the premiums paid during any Policy Year exceed the maximum amount permitted under the Guideline Premium Test, We will return to you the excess amount within 60 days after end of the Policy Year. The excess amount of the premiums We return to you will not include any gains or losses attributable to the investment return on those premiums. We will credit interest at a rate of not less than 3% on those premiums from the date such premiums cause the policy to exceed the amount permitted under the GPT to the date We return the premiums to you. See "Life Insurance Benefit Options" for more information. You can call (913) 906-4000 to determine whether an additional premium payment would be allowed under your policy.

The premium payments you make during the free look period are applied to your Net Premium, which is the balance of any planned or unplanned premium payment after We deduct sales expense, state tax, and any federal tax charges that apply, to our General Account. After this period is over, We allocate the Net Premium, along with any interest credited, to the Investment Divisions of the Separate Account and/or the Fixed Account according to the most recent premium allocation election you have given Us. You can change the premium allocation any time you make a premium payment by submitting a revised premium allocation form. The allocation percentages must be in whole numbers and total 100%.

PREMIUM PAYMENTS RETURNED FOR INSUFFICIENT FUNDS

If your premium payment is returned by the bank for insufficient funds, We will reverse the investment options you have chosen and charge you a \$20 fee for each returned payment. In addition, if We incur any losses as a result of a returned payment, We will deduct the amount of the loss from your policy's Cash Value. If payment by check is returned for insufficient funds for two consecutive months, the privilege to pay by check or electronically will be suspended until We agree to reinstate it.

POLICY PAYMENT INFORMATION

WHEN LIFE INSURANCE COVERAGE BEGINS

Insurance coverage under the policy will begin on the later of the Policy Date or the date We receive the first premium payment.

CHANGING THE FACE AMOUNT OF YOUR POLICY

The policyowner can apply in writing to increase the Face Amount of the policy. In addition, on or after the first policy anniversary, the policyowner can apply in writing to decrease the Face Amount of the policy. The policyowner can change the Face Amount while the Insured is living, but only if the policy will continue to qualify as life insurance under Internal Revenue Code Section 7702 after the change is made. Requested decreases and increases in Base Face Amount will cause a corresponding change in the amount of the Surrender Charge Premium.

The amount of an increase in Face Amount is subject to our maximum retention limits. We require evidence of insurability that is satisfactory to Us for an increase. If this evidence results in a change of underwriting class, We will issue a new policy for the amount of the increase. We reserve the right to limit increases. Any increase will take effect on the Monthly Deduction Day on or after the Business Day We approve the policyowner's request for the increase. An increase in Face Amount may increase the cost of insurance charge.

The policyowner may also request decreases in coverage. For a decrease which reduces the Base Face Amount, the appropriate surrender charge will be deducted from the Cash Value. See "Section III: Charges Under the Policy--Surrender Charge." A decrease in Face Amount is effective on the Monthly Deduction Day on or after the Business Day We receive the policyowner's request for the decrease. Decreases are subject to the minimum Base Face Amount of \$25,000 or that required by state law.

POLICY PROCEEDS

We will pay proceeds to your Beneficiary when We receive satisfactory proof that the Insured died. These proceeds will equal:

- 1) the Life Insurance Benefit calculated under the Life Insurance Benefit Option you have chosen, valued as of the date of death;
- plus 2) any additional death benefits available under the riders you have chosen;
- less 3) any outstanding loans (including any accrued loan interest as of the date of death) on the policy;
- less 4) any outstanding policy charges.

We will pay interest on these proceeds from the date the Insured died until the date We pay the proceeds or the date when the payment option you have chosen becomes effective. See "Life Insurance Benefit Options" for more information.

26

PAYEES

The Beneficiary is the person(s) or entity /ies you have specified on our records to receive insurance proceeds from your policy. You have certain options regarding the policy's Beneficiary:

- You name the Beneficiary when you apply for the policy. The Beneficiary will receive insurance proceeds after the Insured dies.
- You can elect to have different classes of Beneficiaries, such as primary and secondary, where these classes determine the order of payment. You may identify more than one Beneficiary per class.
- You can change a revocable Beneficiary while the Insured is living by writing to our Service Office at: NYLIFE Distributors LLC, Attention: Executive Benefits, 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211 (or any other address We indicate to you in writing).

- If no Beneficiary is living when the Insured dies, We will pay the Policy Proceeds to you (the Policyowner) or if you are deceased, to your estate, unless We have other instructions from you to do otherwise.

You can name only those individuals who are able to receive payments on their own behalf as payees or successor payees, unless We agree otherwise. We may require proof of the age of the payee or proof that the payee is living. If We still have an unpaid amount, or if there are some payments that still must be made when the last surviving payee dies, We will pay the unpaid amount with interest to the date of payment, or We will pay the present value of the remaining payments to that payee's estate. We will make this payment in one sum. The present value of the remaining payments is based on the interest rate used to compute them, and is always less than their sum.

WHEN WE PAY POLICY PROCEEDS

If the policy is still in effect, We will pay any Cash Surrender Value, partial withdrawals, loan proceeds or the Policy Proceeds generally within 7 days after We receive all of the necessary requirements at our Service Office located at: NYLIFE Distributors LLC., Attention: Executive Benefits, 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211 (or any other address We indicate to you in writing).

- We may delay payment of any loan proceeds attributable to the Separate Account, any partial withdrawal from the Separate Account, the Cash Surrender Value or the Policy Proceeds during any period that:

- (a) We are unable to determine the amount to be paid because the NYSE is closed (other than customary weekend and holiday closings), trading is restricted by the Securities and Exchange Commission ("SEC") or the SEC declares that an emergency exists; or
- (b) the SEC, by order, permits Us to delay payment in order to protect our policyowners.

- We may delay payment of any portion of any loan or surrender request, including requests for partial withdrawals, from the Fixed Account for up to 6 months from the date We receive your request.

- We may delay payment of the entire Policy Proceeds if We contest the payment. We investigate all death claims that occur within the two-year contestable period. Upon receiving information from a completed investigation We will make a determination, generally within five days, as to whether the claim should be authorized for payment. Payments are made promptly after the authorization.

- Federal laws made to combat terrorism and prevent money laundering by criminals might, in certain circumstances, require Us to reject a premium payment and/or "freeze" a policy. If these laws apply in a particular policy(ies), We would not be allowed to pay any request for transfers, withdrawals, surrenders, loans, or death benefits. If a policy or an account is frozen, the Cash Value would be moved to a special segregated interest-bearing account and held in that account until instructions are received from the appropriate federal regulator.

- If you have submitted a recent check or draft, We have the right to defer payment of any surrender, withdrawal, death benefit proceeds, or payments under a settlement option until such check or draft has been honored. It may take up to 15 days for a check to clear through the banking system.

We add interest at an annual rate of 3% (or at a higher rate if required by law) if We delay payment of a partial withdrawal or Cash Surrender Value for 30 days or more.

We add interest to Policy Proceeds from the date of death to the date of payment at an annual rate of at least 3%, set each year, and not less than required by law.

27

DEATH CLAIMS

The Beneficiary can elect to have the death benefit proceeds paid into an interest-bearing account opened in the Beneficiary's name. Within seven days of our receipt of due proof of death and payment instructions at our Service Office, We will provide the Beneficiary with a checkbook to access these funds from the account. The Beneficiary can withdraw all or a portion of the death benefit proceeds at any time, and will receive interest on the proceeds remaining in the account. The account is part of our General Account, is not FDIC insured, and is subject to the claims of our creditors. We may receive a benefit from the amounts held in the account.

Any Policy Proceeds paid in one sum will be paid in cash and bear interest compounded each year from the date of the Insured's death to the date of

payment. We set the interest rate each year. This rate will be at least 3% per year (or a higher rate if required by law).

We will pay the Policy Proceeds in one sum unless the Beneficiary chooses otherwise. There are three payment options you may choose from: an Interest Accumulation Option, an Interest Payment Option, and a Life Income Option. If any payment under these options is less than \$100, We may pay any unpaid amount or present value in one sum.

-- Interest Accumulation Option (Option 1 A)

Under this option, the portion of the Policy Proceeds the Beneficiary chooses to keep with Us will earn interest each year. The Beneficiary can make withdrawals from this amount at any time in sums of \$100 or more. We will pay interest on the sum withdrawn up to the date of the withdrawal.

-- Interest Payment Option (Option 1 B)

Under this option, We will pay interest on all or part of the Policy Proceeds you choose to keep with Us. You elect the frequency of the interest payments We make: once each month, every three months, every six months or each year.

-- Life Income Option (Option 2)

Under this option, We make equal monthly payments during the lifetime of the payee or payees. We determine the amount of the monthly payment by applying the Policy Proceeds to the purchase of a corresponding single premium life annuity policy, which is issued when the first payment is due. Payments remain the same and are guaranteed for ten years, even if the specified payee dies sooner.

Payments are based on an adjusted annuity premium rate in effect at the time the annuity policy is issued. This rate will not be less than the corresponding minimum amount shown in the Option 2 table found in your policy. These minimum amounts are based on the 1983 Table "a" with Projection Scale G and with interest compounded each year at 3%.

If you make a request, We will send you a statement of the minimum amount due with respect to each monthly payment in writing. The minimum is based on the gender and adjusted age of the payee(s). To find the adjusted age in the year the first payment is due, We increase or decrease the payee's age at that time, as follows:

<Table>
<Caption>

1996 AND EARLIER	1997-2005	2006-2015	2016-2025	2026-2035	2036 AND LATER
<S>	<C>	<C>	<C>	<C>	<C>
+2 years	+1 year	0	-1 year	-2 years	-3 years

</Table>

A decrease in the payee's age results in lower payments than if no decrease was made.

ELECTING OR CHANGING A PAYMENT OPTION

While the Insured is living, you can elect or change your payment option. You can also name or change one or more of the Beneficiaries who will be the payee(s) under that option.

After the Insured dies, any person who is entitled to receive Policy Proceeds in one sum (other than an assignee) can elect a payment option and name payees. The person who elects a payment option can also name one or more successor payees to receive any amount remaining at the death of the payees. Naming these payees cancels any prior choice of successor payees. A payee who did not elect the payment option has the right to advance or assign payments, take the payments in one sum, change the payment option, or make any other change, only if the person who elects the payment option notifies Us in writing and We agree.

LIFE INSURANCE BENEFIT OPTIONS

The death benefit is the amount payable to the named Beneficiary when the Insured dies. Upon receiving due proof of death at our Service Office, We will pay the Beneficiary the death benefit determined as of the date the Insured dies, less the Policy Debt. All or part of the Death Benefit can be paid in cash or applied under one or more of our payment options described under "Policy Payment Information - Death Claims."

The amount of the death benefit is determined by whether the policyowner has chosen Life Insurance Benefit Option 1 or Life Insurance Benefit Option 2. Life Insurance Benefit Option 1 provides a Life Insurance Benefit equal to the greater of (i) the Face Amount or (ii) the Cash Value multiplied by the

percentage in the appropriate Internal Revenue Code Section 7702 table. Life Insurance Benefit Option 2 provides a Life Insurance Benefit equal to the greater of (i) the Face Amount plus the Cash Value or (ii) the Cash Value multiplied by a percentage in the appropriate IRC Section 7702 table. The value of any additional benefits provided by rider is added to the amount of the death benefit. We pay interest on the death benefit from the date of death to the date the death benefit is paid or a payment option becomes effective. The interest rate equals the rate determined under the Interest Payment Option as described in "Section X: Additional Information - Payment Options." We subtract any Policy Debt and any charges incurred but not deducted, and then credit the interest on the balance.

Beginning on the policy anniversary on which the Insured is age 95, the Face Amount, as shown on page 2 of the policy, will no longer apply. Instead, the Life Insurance Benefit under the policy will equal the Cash Value. We will reduce the amount of the Life Insurance Benefit proceeds by any Policy Debt. Also, note, an insurance contract is uncertain after the Insured is age 100. See "Federal Income Tax Considerations - Status of the Policy After the Insured is Age 95" for more information.

Under Section 7702, a policy will generally be treated as life insurance for federal tax purposes if, at all times, it meets either the Guideline Premium Test ("GPT") or the Cash Value Accumulation Test ("CVAT").

You must choose either the GPT or CVAT before the policy is issued. Once the policy is issued, you may not change to a different test. The Life Insurance Benefit will vary depending on which test is used.

The GPT has two components, a premium limit component and a corridor component. The premium limit restricts the amount of premium that can be paid into a policy. The corridor requires that the Life Insurance Benefit be at least a certain percentage (varying each year by the age of the Insured) of the Cash Value. The CVAT does not have a premium limit, but does have a corridor that requires that the Life Insurance Benefit be at least a certain percentage (varying based on age and sex of the Insured) of the Cash Value.

The corridor under the CVAT is different than the corridor under the GPT. Specifically, the CVAT corridor requires more Life Insurance Benefit in relation to Cash Value than is required by the GPT corridor. Therefore, as your Cash Value increases, your Life Insurance Benefit will increase more rapidly under CVAT than it would under GPT.

Your policy will be issued using the GPT unless you choose otherwise. In deciding whether or not to choose the CVAT, you should consider that the CVAT generally permits more premiums to be contributed to a policy, but may require the policy to have a higher Life Insurance Benefit.

Assuming your Life Insurance Benefit does not increase in order to meet the requirements of IRC Section 7702, and assuming the same Face Amount and premium payments under these options:

- If you choose Option 1, your Life Insurance Benefit will not vary in amount and generally you will have lower total policy cost of insurance charges and lower Policy Proceeds.
- If you choose Option 2, your Life Insurance Benefit will vary with your policy's Cash Value and generally you will have higher total policy cost of insurance charges and higher Policy Proceeds than under Option 1.

</Table>

THE EFFECT OF INVESTMENT PERFORMANCE ON THE DEATH BENEFIT

Positive investment experience in the Investment Divisions may result in a death benefit that will be greater than the Face Amount, but negative investment experience will never result in a death benefit that will be less than the Face Amount, so long as the policy remains in force.

CHANGING YOUR LIFE INSURANCE BENEFIT OPTION

On or after the first policy anniversary, the policyowner can change the Life Insurance Benefit Option. Any change will take effect on the Monthly Deduction Day on or after the Business Day We approve the policyowner's signed request. If the policyowner changes from Option 1 to Option 2, the Base Face Amount of the policy will be decreased by the Cash Value. No surrender charges will apply to this automatic decrease

in Base Face Amount. If the policyowner changes from Option 2 to Option 1, the

Base Face Amount of the policy will be increased by the Cash Value. The Surrender Charge Premium will not be affected by changes in the Life Insurance Benefit Option. You can change the Life Insurance Benefit Option for your policy while the Primary Insured is alive.

We may prohibit you from changing the Life Insurance Benefit Option if the change would (i) cause the Face Amount of the policy to be less than the policy minimum, (ii) cause the policy to fail to qualify as life insurance under Section 7702 of the Internal Revenue Code, or (iii) cause the policy's Face Amount to exceed our limits on the risk We retain, which We set at our discretion. Option changes are not permitted on or after the policy anniversary on which the Insured is age 95.

In order to change your Life Insurance Benefit Option, you must submit a signed request to our Service Center located at: NYLIFE Distributors LLC, Attention: Executive Benefits, 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211 (or any other address We indicate to you in writing).

ADDITIONAL POLICY PROVISIONS

LIMITS ON OUR RIGHTS TO CHALLENGE YOUR POLICY

Generally, We must bring any legal action contesting the validity of your policy within two years of the Issue Date, including any action taken to contest a Face Amount or rider amount increase as a result of a change in the Life Insurance Benefit Option. For any increase(s) in Face Amount or rider amount other than one due to a change in the Life Insurance Benefit Option, this two-year period begins on the effective date of the increase.

SUICIDE

If the Insured commits suicide within two years from the Issue Date or less where required by law (or with respect to an increase in Face Amount or rider amount, the effective date of the increase), and while the policy is in force, the policy will end, and the only amount payable to the Beneficiary will be the premium paid, less any Policy Debt and partial withdrawals.

MISSTATEMENT OF AGE OR GENDER

If the policy application misstates the Insured's age or gender, We will adjust the Cash Value, the Cash Surrender Value, and the Life Insurance Benefit to reflect the correct age and gender. We will adjust the Policy Proceeds provided by your policy based on the most recent mortality charge for the correct date of birth.

ASSIGNMENT

While the Insured is living, the policy may be assigned as collateral for a loan or other obligation. For an assignment to be binding on Us, We must receive a signed copy of it at our Service Office or such other location that We indicate to the policyowner in writing. We are not responsible for the validity of any assignment.

PARTIAL WITHDRAWALS AND SURRENDERS

PARTIAL WITHDRAWALS

The policyowner may make a partial withdrawal of the policy's Cash Surrender Value, at any time while the Insured is living. The maximum partial withdrawal cannot exceed the value of the Accumulation Units in the Investment Divisions plus the value of the Fixed Account less any Policy Debt. The minimum partial withdrawal is \$500, and at least \$500 of Cash Surrender Value, plus any Policy Debt must remain following the withdrawal. The partial withdrawal will be made from the Fixed Account and the Investment Divisions in proportion to the amount in each, or only from the Investment Divisions in an amount or ratio that you tell Us. There may be a processing charge equal to the lesser of \$25 or 2% of the amount withdrawn applied to any partial withdrawal. This fee will be deducted from the remaining balance of the Fixed Account and/or Investment Divisions based on the withdrawal allocation or, if the fee amount exceeds the remaining balance, it will be deducted from the Fixed Account and/or Investment Divisions in proportion to the amount in each.

32

A partial withdrawal will be prohibited if it would cause the Base Face Amount to drop below \$25,000 or that amount required by state law. If Life Insurance Benefit Option 1 is in effect, the Base Face Amount will be reduced by the amount of the partial withdrawal. If Life Insurance Benefit Option 2 is in effect, the Base Face Amount will not be changed by the amount of the partial withdrawal. A partial withdrawal will not be permitted during the first Policy Year if Life Insurance Benefit Option 1 is in effect.

REQUESTING A PARTIAL WITHDRAWAL

You can request a partial withdrawal from your policy by sending a written request to our Service Office at: NYLIFE Distributors LLC, Attention: Executive

Benefits, 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211 (or any other address We indicate to you in writing) or by calling (913) 906-4000. Faxed requests are not acceptable and will not be honored at any time.

We will pay any partial withdrawals generally within seven days after We receive all of the necessary documentation and information. However, We may delay payment under certain circumstances. (See "Policy Proceeds" for more information.)

Unless you choose a later effective date, your requested partial withdrawal will be effective on the date We receive your written request at our Service Office. However, if the day We receive your request is not a Business Day or if your request is received after the NYSE's close at 4:00 p.m., EST, then the requested partial withdrawal will be effective on the next Business Day.

A partial withdrawal may result in taxable income to you. (See "Federal Income Tax Considerations" for more information.)

THE EFFECT OF A PARTIAL WITHDRAWAL

When you make a partial withdrawal, We reduce your Cash Value by the amount of the partial withdrawal, and any applicable withdrawal fee and surrender charge.

-- OPTION 1

If you have elected Life Insurance Benefit Option 1, We reduce your policy's Face Amount and your Policy Proceeds by the amount of the partial withdrawal (not including the effect of any withdrawal fee or surrender charge). This occurs because your Life Insurance Benefit under this option is equal to your policy's Face Amount.

-- OPTION 2

If you have elected Life Insurance Benefit Option 2, We will not reduce your policy's Face Amount but We will reduce your Policy Proceeds by the amount of the partial withdrawal and any applicable withdrawal fee and surrender charge.

SURRENDERS

CASH SURRENDER VALUE

The policy may be surrendered for its Cash Surrender Value, less any Policy Debt at any time before the Insured dies. Unless a later effective date is selected, the surrender is effective on the Business Day We receive a signed surrender request in proper form at our Service Office. The Cash Surrender Value is the Cash Value, less any surrender charges.

REQUESTING A SURRENDER

You can surrender the policy by sending a written request and the policy to our Service Office at: NYLIFE Distributors LLC, Attention: Executive Benefits, 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211 (or any other address We indicate to you in writing). Faxed requests are not acceptable and will not be accepted at any time.

WHEN THE SURRENDER IS EFFECTIVE

Unless you choose a later effective date, your surrender will be effective as of the end of the day We receive your written request and the policy. However, if the day We receive your request is not a Business Day or if your request is received after the NYSE's close, the requested surrender will be effective on the next

33

Business Day on which the NYSE is open. We will mail the surrender proceeds within seven days after the effective date. All life insurance coverage under your Policy ends on the date We receive your surrender request.

SURRENDER CHARGES

During the first nine Policy Years, We will assess a surrender charge on a complete surrender or a requested decrease in Base Face Amount (not including any term insurance amount). Thus, the surrender charge would be lower if you combine term insurance with the base policy. The surrender charge is based on the Policy Year in which the surrender or decrease in Base Face Amount is made and will be deducted from the policy's Cash Value in the Investment Divisions and the Fixed Account in proportion to the policy's Cash Value in each. Because the surrender charge may be significant during early Policy Years, you should not purchase this policy unless you intend to hold the policy for an extended period of time.

LOANS

Using the policy as sole security, the policyowner can borrow up to the

loan value of the policy. The loan value on any given date is equal to (i) 90% of the Cash Surrender Value, less (ii) any Policy Debt.

LOAN ACCOUNT

The Loan Account secures any Policy Debt, and is part of our General Account. When a loan is requested, an amount is transferred to the Loan Account from the Investment Divisions and the Fixed Account (on a pro rata basis unless the policyowner requests otherwise) equal to: (1) the requested loan amount; plus (2) any Policy Debt; plus (3) the interest to the next policy anniversary on the requested loan amount and on any Policy Debt; minus (4) the amount in the Loan Account. On each policy anniversary, the Loan Account will be increased by an amount equal to the loan interest to the next policy anniversary on any Policy Debt. The effective date of the loan is the Business Day We make payment.

The value in the Loan Account will never be less than $(a+b) - c$, where:

a = the amount in the Loan Account on the prior policy anniversary;

b = the amount of any loan taken since the prior policy anniversary; and

c = any loan amount repaid since the prior policy anniversary.

On each policy anniversary, if the outstanding loan plus interest to the next policy anniversary exceeds the amount in the Loan Account, the excess will be transferred from the Investment Divisions and the Fixed Account on a pro rata basis to the Loan Account.

On each policy anniversary, if the amount in the Loan Account exceeds the amount of any outstanding loans plus interest to the next policy anniversary, the excess will be transferred from the Loan Account to the Investment Divisions and to the Fixed Account. We reserve the right to do this on a monthly basis. Amounts transferred will first be transferred to the Fixed Account up to an amount equal to the total amounts transferred from the Fixed Account to the Loan Account. Any additional amounts transferred will be allocated according to the policyowner's premium allocation in effect at the time of transfer unless the policyowner indicated to Us otherwise.

INTEREST ON VALUE IN LOAN ACCOUNT

The amount held in the Loan Account earns interest at a rate We determine. Such rate will never be lower than 2% less than the effective annual loan interest rate and in no event will it be less than 4%. Currently, the amount in the Loan Account is credited with interest at a rate that is 2% less than the effective annual loan interest rate during the first 10 Policy Years, and We currently expect to credit 0.5% less than the effective annual loan interest rate in subsequent Policy Years. These rates are not guaranteed, and We can change them at any time, subject to the above-mentioned minimums.

LOAN INTEREST

Unless We set a lower rate for any period, the effective annual loan interest rate We charge is 6%, payable in arrears. Loan interest accrues each day and is compounded annually. Loan interest not paid as of

34

the policy anniversary becomes part of the loan. An amount may need to be transferred to the Loan Account to cover this increased loan amount.

On the date of death, the date the policy ends, the date of a loan repayment or on any other date We specify, We will make any adjustment in the loan that is required to reflect any interest paid for any period beyond that date.

WHEN LOAN INTEREST IS DUE

The interest We charge on a loan accrues daily and is payable on the earliest of the following dates:

- the policy anniversary;
- the date you increase or repay a loan;
- the date you surrender the policy;
- the date the policy lapses; or
- the date on which the Insured dies.

Any loan interest due on a policy anniversary that you do not pay will be charged against the policy as an additional loan. You should be aware that the larger the loan becomes relative to the Cash Value, the greater the risk that the remaining Cash Value may not be sufficient to support the policy charges and

expenses, including any loan interest due, and the greater the risk of the policy lapsing.

LOAN REPAYMENT

All or part of an unpaid loan can be repaid before the Insured's death or before the policy is surrendered. When a loan repayment is made, We will transfer immediately the excess amount in the Loan Account resulting from the loan repayment in accordance with the procedures set forth under "Loan Account" above. We will also transfer excess amounts in the Loan Account resulting from interest accrued in accordance with those procedures. Payments received by New York Life will be applied as directed by the policy owner.

If a loan is outstanding when the life insurance or surrender proceeds become payable, We will deduct the amount of any Policy Debt, from these proceeds. In addition, if an unpaid loan exceeds the Cash Surrender Value of the policy, We will mail a notice to the policyowner at his or her last known address, and a copy to the last known assignee on our records. All insurance will end 31 days after the date on which We mail that notice to the policyowner if the excess of the unpaid loan over the Cash Surrender Value is not paid within that 31 days.

EXCESS LOAN CONDITION

If the amount of any unpaid loans (including any accrued loan interest) is greater than the Cash Value of your policy less any applicable surrender charges, We will mail a notice to you at your last known address. We will also send a copy of the notice to the last known assignee, if any, on our records. If you do not pay the necessary amount within 31 days after the day We mail you this notice, We will terminate your policy. This could result in a taxable gain to you.

THE EFFECT OF A POLICY LOAN

A loan, repaid or not, has a permanent effect on your Cash Value. This effect occurs because the investment results of each Investment Division apply only to the amounts remaining in such Investment Divisions. The longer a loan is outstanding, the greater the effect on your Cash Value is likely to be. The effect could be favorable or unfavorable. If the Investment Divisions earn more than the annual interest rate for loaned amounts held in the Fixed Account, your Cash Value will not increase as rapidly as it would have had no loan been made. If the Investment Divisions earn less than the interest earned on loaned amounts held in the Fixed Account, then your Cash Value may be greater than it would have been had no loan been made. If not repaid, the aggregate amount of the outstanding loan principal and any accrued interest will reduce the Policy Proceeds that might otherwise be payable.

In addition, unpaid loan interest generally will be treated as a new loan under the Internal Revenue Code ("IRC"). If the policy is a modified endowment contract, a loan may result in taxable income to you. In addition, for all policies, if the loans taken, including unpaid loan interest, exceed the premiums paid, policy

35

surrender or policy lapse will result in a taxable gain to you. (See "Federal Tax Considerations" for more information.)

TERMINATION AND REINSTATEMENT

LATE PERIOD

The late period is the 62 days following the Monthly Deduction Day on which the Cash Surrender Value, less any Policy Debt, of your policy is insufficient to pay for monthly deductions for the next policy month. During this period, you have the opportunity to pay any premium needed to cover any overdue charges. We will mail a notice to your last known address stating this amount. We will send a copy to the last known assignee, if any, on our records. We will mail these notices at least 31 days before the end of the late period. Your policy will remain in effect during the late period. However, if We do not receive the required payment before the end of the late period, We will terminate your policy without any benefits.

If your policy's Cash Surrender Value, less any Policy Debt, on any Monthly Deduction Day is less than the monthly deductions due from Cash Value for the next policy month, your policy will enter a "late period" for 62 days after that date. Your policy will remain in effect during the late period. If the late period expires without sufficient payment, however, then We will terminate your policy without any benefits.

If the Insured dies during the late period, We will pay the Policy Proceeds to the Beneficiary. We will reduce the Life Insurance Benefit by any Policy Debt and any unpaid monthly deductions due from the Cash Value for the full policy month(s) from the beginning of the late period through the policy month in which

the Insured dies. When your policy is terminated, it has no value and no benefits accrue upon the death of the Insured.

REINSTATEMENT OPTION

For a period of five years after termination, the policyowner can request that We reinstate the policy (and any riders) during the Insured's lifetime. We will not reinstate the policy if it has been returned for its Cash Surrender Value less any Policy Debt. Note that a termination and subsequent reinstatement may cause the policy to become a modified endowment contract.

Before We will reinstate the policy, We must receive the following:

- A payment in an amount that is sufficient to keep the policy (and any riders) in force for at least 2 months based on the Cash Surrender Value which is reinstated. This payment will be in lieu of the payment of all premiums in arrears.
- Any unpaid loan must also be repaid, together with loan interest at 6% compounded once each year from the end of the late period to the date of reinstatement. If a loan interest rate of less than 6% is in effect when the policy is reinstated, the interest rate for any unpaid loan at the time of reinstatement will be the same as the loan rate.
- Evidence of insurability satisfactory to Us if the reinstatement is requested more than 31 days after termination.

The Cash Value which will be reinstated is equal to the Cash Value at the time of lapse less the difference between the surrender charge at the time of lapse and the surrender charge which is reinstated. The surrender charge that is reinstated is based on the Policy Year in which the reinstatement is made. If the surrender charge reinstated exceeds the Cash Value reinstated, We will require payment of an amount equal to the difference.

If We do reinstate the policy, the Face Amount for the reinstated policy will be the same as it would have been if the policy had not terminated. The effective date of reinstatement will be the Monthly Deduction Day on or following the date We approve the request for reinstatement.

FEDERAL INCOME TAX CONSIDERATIONS

OUR INTENT

Our intent in the discussion in this section is to provide general information about federal income tax considerations related to the policies. This is not an exhaustive discussion of all tax questions that might arise

36

under the policies. This discussion is not intended to be tax advice for you. Tax results may vary according to your particular circumstances, and you may need tax advice in connection with the purchase or use of your policy.

The discussion in this section is based on our understanding of the present federal income tax laws as they are currently interpreted by the Internal Revenue Service ("IRS"). We have not included any information about applicable state or other tax laws. Further, you should note that tax law changes from time to time. We do not know whether the treatment of life insurance policies under federal income tax or estate or gift tax laws will continue. Future legislation, regulations, or interpretations could adversely affect the tax treatment of life insurance policies. Lastly, there are many areas of the tax law where minimal guidance exists in the form of Treasury Regulations or Revenue Rulings. You should consult a tax advisor for information on the tax treatment of the policies, for the tax treatment under the laws of your state, or for information on the impact of proposed or future changes in tax legislation, regulations, or interpretations.

The ultimate effect of federal income taxes on values under the policy and on the economic benefit to you or the Beneficiary depends upon NYLIAC's tax status, upon the terms of the policy, and upon your circumstances.

TAX STATUS OF NYLIAC AND THE SEPARATE ACCOUNT

NYLIAC is taxed as a life insurance company under Subchapter L of the IRC. The Separate Account is not a separate taxable entity from NYLIAC and We take its operations into account in determining NYLIAC's income tax liability. As a result, NYLIAC takes into account applicable tax attributes of the assets of the Separate Account on its corporate income tax return, including corporate dividends received deductions and foreign tax credits that may be produced by assets of the Separate Account. All investment income and realized net capital gains on the assets of the Separate Account are reinvested and taken into account in determining policy cash values, and are automatically applied to increase the book reserves associated with the policies. Under existing federal income tax law, NYLIAC believes that Separate Account investment income and realized net capital gains should not be taxed to the extent that such income

and gains are retained as part of the tax-deductible reserves under the policy.

CHARGES FOR TAXES

We impose a federal tax charge on Non-Qualified Policies equal to 1.25% of premiums received under the policy to compensate Us for taxes We have to pay under Section 848 of the IRC in connection with our receipt of premiums under Non-Qualified Policies. No other charge is currently made to the Separate Account for our federal income taxes that may be attributable to the Separate Account. In the future, We may impose a charge for our federal income taxes attributable to the Separate Account. In addition, depending on the method of calculating interest on amounts allocated to the Fixed Account, We may impose a charge for the policy's share of NYLIAC's federal income taxes attributable to the Fixed Account.

Under current laws, We may incur state or local taxes (in addition to premium taxes) in several states. At present, We do not charge the Separate Account for these taxes. However, We reserve the right to charge the Separate Account for the portion of such taxes, if any, attributable to the Separate Account or the policies.

DIVERSIFICATION STANDARDS AND CONTROL ISSUES

In addition to other requirements imposed by the IRC, a policy will qualify as life insurance under the Internal Revenue Code only if the diversification requirements of IRC Section 817(h) are satisfied by the Separate Account. We intend for the Separate Account to comply with IRC Section 817(h) and related regulations. To satisfy these diversification standards, the regulations generally require that on the last day of each calendar quarter, no more than 55% of the value of a Separate Account's assets can be represented by any one investment, no more than 70% can be represented by any two investments, no more than 80% can be represented by any three investments, and no more than 90% can be represented by any four investments. For purposes of these rules, all securities of the same issuer generally are treated as a single investment, but each U.S. Government agency or instrumentality is treated as a separate issuer. Under a "look through" rule, We are able to meet the diversification requirements by looking through the Separate Account to the underlying Eligible Portfolio. Each of the Funds has committed to Us that the Eligible Portfolios will meet the diversification requirements.

37

The Internal Revenue Service has stated in published rulings that a variable policyowner will be considered the owner of separate account assets if he or she possesses incidents of ownership in those assets, such as the ability to exercise investment control over the assets. In those circumstances, income and gains from the separate account assets would be includable in the variable policyowner's gross income. In connection with its issuance of temporary regulations under IRC Section 817(h) in 1986, the Treasury Department announced that such temporary regulations did not provide guidance concerning the extent to which policyowners could be permitted to direct their investments to particular Investment Divisions of a separate account and that guidance on this issue would be forthcoming. Regulations addressing this issue have not yet been issued or proposed. The ownership rights under your policy are similar to, but different in certain respects from, those described by the Internal Revenue Service in rulings in which it was determined that policyowners were not owners of separate account assets. For example, you have additional flexibility in allocating premium payments and policy cash values. These differences could result in your being treated as the owner of your policy's pro rata portion of the assets of the Separate Account. In addition, We do not know what standards will be set forth, if any, in the regulations or ruling which the Treasury Department has stated it expects to issue. We therefore reserve the right to modify the policy, as deemed appropriate by Us, to attempt to prevent you from being considered the owner of your policy's pro rata share of the assets of the Separate Account. Moreover, in the event that regulations are adopted or rulings are issued, there can be no assurance that the Eligible Portfolios will continue to be available, will be able to operate as currently described in the Fund prospectuses, or that a Fund will not have to change an Eligible Portfolio's investment objective or investment policies.

LIFE INSURANCE STATUS OF POLICY

We believe that the policy meets the statutory definition of life insurance under IRC Section 7702 and that you and the Beneficiary of your policy will receive the same federal income tax treatment as that accorded to owners and beneficiaries of fixed benefit life insurance policies. Specifically, We believe that the Life Insurance Benefit under your policy will be excludable from the gross income of the Beneficiary subject to the terms and conditions of Section 101(a)(1) of the IRC. Pursuant to Section 101(g) of the IRC, amounts received by the policyowner may also be excludable from the policyowner's gross income when the Insured has a terminal illness and benefits are paid under the Living Benefits Rider. (Life insurance benefits under a "modified endowment contract" as discussed below are treated in the same manner as Life Insurance Benefits under life insurance policies that are not so classified.)

In addition, unless the policy is a "modified endowment contract," in which case the receipt of any loan under the policy may result in recognition of income to the policyowner, We believe that the policyowner will not be deemed to be in constructive receipt of the cash values, including increments thereon, under the policy until proceeds of the policy are received upon a surrender of the policy or a partial withdrawal.

We reserve the right to make changes to the policy if We think it is appropriate to attempt to assure qualification of the policy as a life insurance contract. If a policy were determined not to qualify as life insurance, the policy would not provide the tax advantages normally provided by life insurance.

MODIFIED ENDOWMENT CONTRACT STATUS

IRC Section 7702A defines a class of life insurance policies referred to as modified endowment contracts. Under this provision, the policies will be treated for tax purposes in one of two ways. Policies that are not classified as modified endowment contracts will be taxed as conventional life insurance policies, as described below. Taxation of pre-death distributions (including loans) from policies that are classified as modified endowment contracts and that are entered into on or after June 21, 1988 is somewhat different, as described below.

A life insurance policy becomes a "modified endowment contract" if, at any time during the first seven years, the sum of actual premiums paid exceeds the sum of the "seven-pay premium." Generally, the "seven-pay premium" is the level annual premium, such that if paid for each of the first seven years, will fully pay for all future life insurance and endowment benefits under a life insurance policy. For example, if the "seven-pay premium" was \$1,000, the maximum premium that could be paid during the first seven years to avoid "modified endowment" treatment would be \$1,000 in the first year, \$2,000 through the first two years and \$3,000 through the first three years, etc. Under this test, a policy may or may not be a modified endowment contract, depending on the amount of premium paid during each of the policy's first seven years. A policy

38

received in exchange for a modified endowment contract will be taxed as a modified endowment contract even if it would otherwise satisfy the seven-pay test.

Certain changes in the terms of a policy, including a reduction in Life Insurance Benefits will require a policy to be retested to determine whether the change has caused the policy to become a modified endowment contract. In addition, if a "material change" occurs at any time while the policy is in force, a new seven-pay test period will start and the policy will need to be retested to determine whether it continues to meet the seven-pay test. A "material change" generally includes increases in Life Insurance Benefits, but does not include an increase in Life Insurance Benefits which is attributable to the payment of premiums necessary to fund the lowest level of Life Insurance Benefits payable during the first seven Policy Years, or which is attributable to the crediting of interest with respect to such premiums.

Because the policy provides for flexible premiums, NYLIAC has instituted procedures to monitor whether, under our current interpretation of the law, increases in Life Insurance Benefits or additional premiums cause either the start of a new seven-year test period or the taxation of distributions and loans. All additional premiums will be considered in these determinations.

If a policy fails the seven-pay test, all distributions (including loans) occurring in the Policy Year of failure and thereafter will be subject to the rules for modified endowment contracts. A recapture provision also applies to loans and distributions that are received in anticipation of failing the seven-pay test. Under the IRC, any distribution or loan made within two Policy Years prior to the date that a policy fails the seven-pay test is considered to have been made in anticipation of the failure.

POLICY SURRENDERS AND PARTIAL WITHDRAWALS

Upon a full surrender of a policy for its Cash Surrender Value, you will recognize ordinary income for federal tax purposes to the extent that the Cash Value less surrender charges and any uncollected additional contract charges, exceeds the investment in your policy (the total of all premiums paid but not previously recovered plus any other consideration paid for the policy). The tax consequences of a partial withdrawal from your policy will depend upon whether the partial withdrawal results in a reduction of future benefits under your policy and whether your policy is a modified endowment contract. If upon a full surrender of a policy the premium payments made exceed the surrender proceeds plus the amount of any outstanding loans, you will recognize a loss, which is not deductible for federal income tax purposes.

If your policy is not a modified endowment contract, the general rule is that a partial withdrawal from a policy is taxable only to the extent that it

exceeds the total investment in the policy. An exception to this general rule applies, however, if a reduction of future benefits occurs during the first fifteen years after a policy is issued and there is a cash distribution associated with that reduction. In such a case, the IRC prescribes a formula under which you may be taxed on all or a part of the amount distributed. After fifteen years, cash distributions from a policy that is not a modified endowment contract will not be subject to federal income tax, except to the extent they exceed the total investment in the policy. We suggest that you consult with a tax advisor in advance of a proposed decrease in Face Amount or a partial withdrawal. In addition, any amounts distributed under a "modified endowment contract" (including proceeds of any loan) are taxable to the extent of any accumulated income in the policy. In general, the amount that may be subject to tax is the excess of the Cash Value (both loaned and unloaned) over the previously unrecovered premiums paid.

For purposes of determining the amount of income received upon a distribution (or loan) from a modified endowment contract, the IRC requires the aggregation of all modified endowment contracts issued to the same policyowner by an insurer and its affiliates within the same calendar year. Therefore, loans and distributions from any one such policy are taxable to the extent of the income accumulated in all the modified endowment contracts required to be so aggregated.

If any amount is taxable as a distribution of income under a modified endowment contract (as a result of a policy surrender, a partial withdrawal, or a loan), it may also be subject to a 10% penalty tax under IRC Section 72(v). Limited exceptions from the additional penalty tax are available for certain distributions to individuals who own policies. The penalty tax will not apply to distributions: (i) that are made on or after the date the taxpayer attains age 59 1/2; or (ii) that are attributable to the taxpayer's becoming disabled; or (iii) that are part of a series of substantially equal periodic payments (made not less frequently than annually) made for the life or life expectancy of the taxpayer.

39

POLICY LOANS AND INTEREST DEDUCTIONS

We believe that under current law any loan received under your policy will be treated as Policy Debt to you and that, unless your policy is a modified endowment contract, no part of any loan under your policy will constitute income to you. If your policy is a modified endowment contract (see discussion above) loans will be fully taxable to the extent of the income in the policy (and in any other contracts with which it must be aggregated) and could be subject to the additional 10% penalty tax described above.

Internal Revenue Code Section 264 provides that interest paid or accrued on a loan in connection with a policy is generally nondeductible. Certain exceptions apply, however, with respect to policies covering key employees. In addition, in the case of policies not held by individuals, special rules may limit the deductibility of interest on loans that are not made in connection with a policy. We suggest consultation with a tax advisor for further guidance.

In addition, if your policy lapses or you surrender it with an outstanding loan, and the amount of the loan plus the Cash Surrender Value is more than the sum of premiums you paid, you will generally be liable for taxes on the excess. Such amount will be taxed as ordinary income.

CORPORATE OWNERS

Ownership of a policy by a corporation may affect the policyowner's exposure to the corporate alternative minimum tax. In determining whether it is subject to alternative minimum tax, a corporate policyowner must make two computations. First, the corporation must take into account a portion of the current year's increase in the "inside build up" or income on the contract gain in its corporate-owned policies. Second, the corporation must take into account a portion of the amount by which the death benefits received under any policy exceed the sum of (i) the premiums paid on that policy in the year of death, and (ii) the corporation's basis in the policy (as measured for alternative minimum tax purposes) as of the end of the corporation's tax year immediately preceding the year of death.

EXCHANGES OR ASSIGNMENTS OF POLICIES

If you change the policyowner or exchange or assign your policy, it may have significant tax consequences depending on the circumstances. For example, an assignment or exchange of the policy may result in taxable income to you. Further, Internal Revenue Code Section 101(a) provides, subject to certain exceptions, that where a policy has been transferred for value, only the portion of the Life Insurance Benefit which is equal to the total consideration paid for the policy may be excluded from gross income. For complete information with respect to policy assignments and exchanges, a qualified tax advisor should be consulted.

Another provision of the tax law deals with allowable charges for mortality costs and other expenses that are used in making calculations to determine whether a policy qualifies as life insurance for federal income tax purposes. For life insurance policies entered into on or after October 21, 1988, these calculations must be based upon reasonable mortality charges and other charges reasonably expected to be actually paid. The Treasury Department has issued proposed regulations and is expected to promulgate temporary or final regulations governing reasonableness standards for mortality charges.

OTHER TAX ISSUES

Federal estate and state and local estate, inheritance, and other tax consequences of ownership or receipt of Policy Proceeds depend on the circumstances of each policyowner or Beneficiary.

WITHHOLDING

Under Section 3405 of the Internal Revenue Code, withholding is generally required with respect to certain taxable distributions under insurance policies. In the case of periodic payments (payments made as an annuity or on a similar basis), the withholding is at graduated rates (as though the payments were employee wages). With respect to non-periodic distributions, the withholding is at a flat rate of 10%. If you are an individual, you can elect to have either non-periodic or periodic payments made without withholding except where your tax identification number has not been furnished to Us, or where the Internal Revenue Service has notified Us that a tax identification number is incorrect.

40

Different withholding rules apply to payments made to U.S. citizens living outside the United States and to non-U.S. citizens living outside of the United States. U.S. citizens who live outside of the United States generally are not permitted to elect not to have federal income taxes withheld from payments. Payments to non-U.S. citizens who are not residents of the United States generally are subject to 30% withholding, unless an income tax treaty between their country of residence and the United States provides for a lower rate of withholding or an exemption from withholding.

DISTRIBUTION AND COMPENSATION ARRANGEMENTS

NYLIFE Distributors LLC (NYLIFE Distributors), the underwriter and distributor of the policies, is registered with the SEC and the NASD as a broker-dealer. The firm is an indirect wholly-owned subsidiary of New York Life, and an affiliate of NYLIAC. Its principal business address is 169 Lackawanna Avenue, Parsippany, New Jersey 07054.

The policies are sold by registered representatives of NYLIFE Securities, Inc. ("NYLIFE Securities"), a broker-dealer that is an affiliate of NYLIFE Distributors, and by registered representatives of unaffiliated broker-dealers. Your registered representative is also a licensed insurance agent with New York Life. He or she may be qualified to offer other forms of life insurance, annuities, and other investment products. In certain circumstances, NYLIFE Securities registered representatives can sell both products manufactured and issued by New York Life or its affiliates and products provided by other companies.

The selling broker-dealer, and in turn your registered representative, will receive compensation for selling you this policy or any other investment product. Compensation may consist of commissions, asset-based compensation, and other compensation programs. The amount of compensation received by your registered representative will vary depending on the policy that he or she sells, on sales production goals, and on the specific payment arrangements of the relevant broker-dealer.

Broker-dealers receive commission not to exceed 35% of premiums paid up to the Target Premium in Policy Year 1, and 2.5% for Policy Years 2-10. In addition, during each of the first ten Policy Years, we pay broker-dealers a maximum of 1.25% commission on premiums paid in excess of the Target Premium.

The total commissions paid during the fiscal years ended December 31, 2004, 2003, and 2002 were \$136,171, \$133,592, and \$182,349, respectively. NYLIFE Distributors did not retain any of these commissions.

Service entities, which may be affiliates of broker-dealers, may also receive additional compensation based on a percentage of a policy's Separate Account Value, less any policy loans, beginning in Policy Year 3. The percentages are not expected to exceed 0.25% in Policy Years 3 and beyond.

New York Life also has other compensation programs where registered representatives, managers, and employees involved in the sales process receive additional compensation related to the sale of products manufactured and issued by New York Life or its affiliates. NYLIFE Securities registered representatives

who are members of the General Office management team receive compensation based on a number of sales-related incentive programs designed to compensate for education, supervision, training, and recruiting of agents.

M Holdings Securities, Inc., 1125 Northwest Couch Street, Portland, OR 97208, is a broker-dealer that sell the life insurance products of New York Life and its affiliates. In addition to the commissions described above, M Financial Holdings Incorporated, a Brokerage General Agency affiliated with M Holdings Securities, Inc. receives override commissions on the policies based on a percentage of the commissions its affiliated registered representatives receive.

NYLIFE Securities registered representatives can qualify to attend New York Life-sponsored educational, training, and development conferences based on the sales they make of life insurance, annuities, and investment products during a particular twelve-month period. In addition, qualification for recognition programs sponsored by New York Life depends on the sale of products manufactured and issued by New York Life or its affiliates.

The policies are sold and premium payments are accepted on a continuous basis.

LEGAL PROCEEDINGS

NYLIAC is a defendant in individual and/or alleged class action suits arising from its agency sales force, insurance (including variable contracts registered under Federal securities law), investment, and/or other operations, including actions involving retail sales practices. Most of these actions also seek substantial or unspecified compensatory and punitive damages. NYLIAC is, from time to time involved in various governmental, administrative, and investigative proceedings and inquiries.

41

Notwithstanding the uncertain nature of litigation and regulatory inquiries, the outcome of which cannot be predicted, NYLIAC believes that, after provisions made in the financial statements, the ultimate liability that could result from litigation and proceedings would not have a material adverse effect on NYLIAC's financial position; however, it is possible, that settlements or adverse determinations in one or more actions or other proceedings in the future could have a material adverse effect on NYLIAC's operating results for a given year.

RECORDS AND REPORTS

New York Life or NYLIAC maintains all records and accounts relating to the Separate Account and the Fixed Account. Each year We will mail you a report showing the Cash Value, Cash Surrender Value, and outstanding loans (including accrued loan interest) as of the latest policy anniversary. This report contains any additional information required by any applicable law or regulation. We will also mail you a report each quarter showing this same information as of the end of the previous quarter. This quarterly statement reports transactions that you have requested or authorized. Please review it carefully. If you believe it contains an error, We must be notified within 15 days of the date of the statement.

Reports and promotional literature may contain the ratings New York Life and NYLIAC have received from independent rating agencies. Both companies are among only a few companies that have consistently received among the highest possible ratings from the four major independent rating companies for financial strength and stability: A.M. Best, Fitch, Moody's Investor's Services, Inc. and Standard and Poor's. However, neither New York Life nor NYLIAC guarantees the investment performance of the Investment Divisions.

FINANCIAL STATEMENTS

The balance sheet of NYLIAC as of December 31, 2004 and 2003, and the statement of income, of stockholder's equity and of cash flows for each of the three years in the period ended December 31, 2004 (including the report of independent auditors), and the Separate Account statement of assets and liabilities as of December 31, 2004, and the statement of operations, statement of changes in net assets and financial highlights for each of the periods indicated in the Financial Statements (including the report of independent auditors) are included in the SAI. The independent accountants are PricewaterhouseCoopers LLP, 300 Madison Avenue, New York, NY 10017.

STATE VARIATIONS

NEW YORK

Free Look. Within 10 days after delivery, you can return the policy to the Corporation or to the Registered Representative through whom it was purchased. Payments will be allocated to the General Account until 10 days after delivery of the policy. If this policy is returned, the policy will be void from the start and a refund will be made. The amount We refund will equal the greater of the policy's Cash Value as of the date the policy is mailed or delivered to the

Home Office or to the Service Office, or to the Registered Representative through whom it was purchased, or the premiums paid, less loans and withdrawals.

NORTH CAROLINA

Free Look. Within 20 days after delivery, or if later within 45 days of the date of execution of the application, you can return the policy to the Corporation or to the Registered Representative through whom it was purchased. If this policy is returned, the policy will be void from the start and a refund will be made. The amount We refund will equal the greater of the policy's Cash Value as of the date the policy is returned or the premiums paid, less loans and withdrawals.

OKLAHOMA

Free Look. Within 20 days after delivery, you can return the policy to the Corporation or to the Registered Representative through whom it was purchased. If this policy is returned, the policy will be void from the start and a refund will be made. The amount We refund will equal the greater of the policy's Cash Value as of the date the policy is returned or the premiums paid, less loans and withdrawals. If the refund is not made within 30 days of cancellation, the amount of the refund will accumulate at interest, as required by the Insurance Code of the state of Oklahoma.

A table of Surrender Charge Premium Rates Per Thousand appears in Appendix A to the Policy Prospectus.

APPENDIX A

SURRENDER CHARGE PREMIUM RATES PER THOUSAND

The Surrender Charge Premium for the policy is equal to $(a * b) / 1000$ where (a) is the Surrender Charge Premium rates per thousand applicable to the age of the Insured on the Policy Date, as set forth in the table below, and (b) is the initial Face Amount. The result is then multiplied by the applicable percentage shown in the Section "Surrender Charges."

APPENDIX B

ILLUSTRATIONS

The following tables demonstrate the way in which your policy works. The tables are based on the sex, age, underwriting class, initial Life Insurance Benefit, and premium as follows:

The tables are for a guaranteed issue policy issued to a male with a nonsmoker underwriting class and issue age 45 with a planned annual premium of \$20,000 for 21 years, an initial face amount of \$1,000,000, and no riders. It assumes that 100% of the Net Premium is allocated to the Separate Account.

The tables show how the Life Insurance Benefit, Cash Value and Cash Surrender Value would vary over an extended period of time assuming hypothetical gross rates of return equivalent to a constant annual rate of 0%, 6%, or 12%. The tables will assist in the comparison of the Life Insurance Benefit, Cash Value, and Cash Surrender Value of the policy with other variable life insurance plans.

The Life Insurance Benefit, Cash Value and Cash Surrender Value for a policy would be different from the amounts shown if the actual gross rates of return averaged 0%, 6%, or 12%, but varied above and below those averages for the period. They would also be different depending on the allocation of the assets among the Investment Divisions of the Separate Account and the Fixed Account, if the actual gross rate of return for all Investment Divisions averaged 0%, 6%, or 12%, but varied above or below that average for individual Investment Divisions. They would also differ if any policy loans or partial withdrawals were made or if premium payments were not paid on the policy anniversary during the period of time illustrated. Depending on the timing and degree of fluctuation, the actual values could be substantially more or less than those shown. A lower value may, under certain circumstances, result in the lapse of the policy unless the policyowner pays more than the stated premium.

Table 1 reflects all deductions and charges under the policy and assumes that the cost of insurance charges is based on the current cost of insurance rates. These deductions and charges include all charges from planned premium payments and the Cash Value at their current levels.

Table 2 reflects all deductions and charges under the policy and assumes that the cost of Insurance charges is based on the guaranteed cost of insurance

rates. These deductions and charges include all charges from planned premium payments and the Cash Value at their guaranteed levels.

Table 1 reflects a monthly Mortality and Expense Risk charge equal to an annual rate of 0.7% for years 1-10 and 0.3% for years 11+ (on a current basis) of the cash value allocated to the Separate Account.

Table 2 reflects a monthly Mortality and Expense Risk charge equal to an annual rate of 0.9% (on a guaranteed basis) of the cash value allocated to the Separate Account.

All tables reflect total assumed investment advisory fees together with other expenses incurred by the Funds of 0.76% of the average daily net assets of the Funds. This total is based upon an arithmetic average of the management fees, administrative fees, and other expenses after expense reimbursement for each Investment Division. Please refer to the Fee Table in this prospectus for details of the underlying Fund fees.

Taking into account the arithmetic average investment advisory fees and expenses of the Funds, the gross rates of return of 0%, 6%, and 12% would correspond to illustrated net investment returns of: -1.65%, 4.25%, and 10.15% based on guaranteed assumptions, and -1.45%, 4.46%, and 10.37% based on current assumptions.

The actual investment advisory fees and expenses may be more or less than the amounts illustrated and will depend on the allocations made by the policyowner.

NYLIAC will furnish upon request a comparable illustration using the age, sex, and underwriting classification of the Insured for any initial Life Insurance Benefit and premium requested. In addition to an illustration assuming policy charges at their maximum, We will furnish an illustration assuming current policy charges and current cost of insurance rates.

STATEMENT OF ADDITIONAL INFORMATION

DATED

MAY 1, 2005

FOR

CORPORATE SPONSORED VARIABLE UNIVERSAL LIFE

FROM

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION

This Statement of Additional Information ("SAI") is not a prospectus. The SAI contains information that expands upon subjects discussed in the current NYLIAC Corporate Sponsored Variable Universal Life (CSVUL) prospectus. You should read the SAI in conjunction with the current CSVUL prospectus dated May 1, 2005 and any supplements thereto. This SAI is incorporated by reference into the prospectus. You may obtain the prospectus by calling New York Life Insurance and Annuity Corporation ("NYLIAC") at (888) 695-4748 or writing to NYLIAC at 11400 Tomahawk Creek Parkway, Suite 200, Leawood, KS 66211. Terms used but not defined in the SAI have the same meaning as in the current CSVUL prospectus.

NOTES TO FINANCIAL STATEMENTS

NOTE 1-- Organization and Accounting Policies:

NYLIAC Corporate Sponsored Variable Universal Life Separate Account-I ("CSVUL Separate Account-I") was established on May 24, 1996, under Delaware law by New York Life Insurance and Annuity Corporation ("NYLIAC"), a wholly-owned subsidiary of New York Life Insurance Company. Investments into CSVUL Separate Account-I commenced on March 27, 1998. CSVUL Separate Account-I funds Corporate Sponsored Variable Universal Life policies (CSVUL) ("Series 1 policies"), CorpExec VUL II policies (CESVUL2) ("Series 2 policies"), CorpExec VUL III policies (CESVUL3) ("Series 3 policies") and CorpExec VUL IV policies (CESVUL4) ("Series 3 policies"). The policies are designed for Group or Sponsored arrangements who seek lifetime insurance protection and flexibility with respect to premium payments and death benefits. The policies are distributed by NYLIFE Distributors LLC and sold by registered representatives of broker-dealers who have entered into dealer agreements with NYLIFE Distributors LLC. NYLIFE Distributors LLC is a wholly owned subsidiary of New York Life Investment Management Holdings LLC ("NYLIM Holdings"), which is a wholly owned subsidiary of New York Life Insurance Company. CSVUL Separate Account-I is registered under the Investment Company Act of 1940, as amended, as a unit investment trust. The assets of CSVUL Separate Account-I are invested in the shares of the MainStay VP Series Fund, Inc., the Alger American Fund, the American Century (R) Variable Portfolios, Inc., the Calvert Variable Series, Inc., the Dreyfus Investment Portfolios, the Dreyfus Variable Investment Fund, the Fidelity Variable Insurance Products Fund, the Janus Aspen Series, Lazard Asset Management LLC, the Lord Abbett Series Fund, Inc., the MFS (R) Variable Insurance Trust (SM), Pacific Investment Management Company LLC, the Universal Institutional Funds, Inc., Scudder VIT Funds, Royce and Associates, the T. Rowe Price Equity Series, Inc., and the T. Rowe Price Fixed Income Series, Inc. (collectively, "Funds"). These assets are clearly identified and distinguished

from the other assets and liabilities of NYLIAC. These assets are the property of NYLIAC; however, the portion of the assets attributable to the policies will not be charged with liabilities arising out of any other business NYLIAC may conduct. The Fixed Account represents the general assets of NYLIAC. NYLIAC's Fixed Account may be charged with liabilities arising out of other business NYLIAC may conduct.

New York Life Investment Management LLC ("NYLIM"), a wholly-owned subsidiary of NYLIM Holdings, provides investment advisory services to the MainStay VP Series Fund, Inc. for a fee. NYLIM retains several sub-advisers, including MacKay Shields LLC, a wholly-owned subsidiary of NYLIM Holdings, American Century Investment Management, Inc., The Dreyfus Corporation, Eagle Asset Management, Inc. and Lord, Abnett & Co., to provide investment advisory services to certain Portfolios of the MainStay VP Series Fund, Inc.

The following Investment Divisions are available to CSVUL policyowners: Mainstay VP Bond, Mainstay VP Capital Appreciation, Mainstay VP Cash Management, Mainstay VP Common Stock (formerly known as Mainstay VP Growth Equity), Mainstay VP Convertible, Mainstay VP Government, Mainstay VP High Yield Corporate Bond, Mainstay VP S&P 500 Index (formerly known as Mainstay VP Indexed Equity), Mainstay VP International Equity, Mainstay VP Total Return, Mainstay VP Value, Mainstay VP American Century Income & Growth, Mainstay VP Dreyfus Large Company Value, Mainstay VP Eagle Asset Management Growth Equity, Alger American Small Capitalization -- Class O Shares, Calvert Social Balanced, Fidelity(R) VIP Contrafund(R) -- Initial Class, Fidelity(R) Equity-Income -- Initial Class, Janus Aspen Series Balanced -- Institutional Shares, Janus Aspen Series Worldwide Growth -- Institutional Shares, Morgan Stanley UIF Emerging Markets Equity -- Class I, and T. Rowe Price Equity Income Portfolio.

The following Investment Divisions are available to CESVUL2, CESVUL3 and CESVUL4 policyowners: Mainstay VP Bond, Mainstay VP Capital Appreciation, Mainstay VP Cash Management, Mainstay VP Common Stock (formerly known as Mainstay VP Growth Equity), Mainstay VP Convertible, Mainstay VP Government, Mainstay VP High Yield Corporate Bond, Mainstay VP International Equity, Mainstay VP Mid Cap Core, Mainstay VP Mid Cap Growth, Mainstay VP S&P 500 Index (formerly known as Mainstay VP Indexed Equity), Mainstay VP Small Cap Growth, Mainstay VP Value, Mainstay VP American Century Income & Growth, Mainstay VP Dreyfus Large Company Value, Mainstay VP Eagle Asset Management Growth Equity, Alger American Leveraged AllCap -- Class O Shares, Alger American Small Capitalization -- Class O Shares, American Century(R) VP Value -- Class II, Calvert Social Balanced, Dreyfus IP Technology Growth -- Initial Shares, Dreyfus VIF Developing Leaders -- Initial Shares (formerly known as Dreyfus VIF Small Cap Growth), Fidelity(R) VIP Contrafund(R) -- Initial Class, Fidelity(R) VIP Equity-Income -- Initial Class, Fidelity(R) VIP Growth -- Initial Class, Fidelity(R) VIP Index 500 -- Initial Class, Fidelity(R) VIP Investment Grade Bond -- Initial Class, Fidelity(R) VIP Mid-Cap -- Initial Class, Fidelity(R) VIP Overseas -- Initial Class, Fidelity(R) VIP Value Strategies -- Initial Class, Janus Aspen Series Mid Cap Growth -- Institutional Shares (formerly known as Janus Aspen Series Aggressive Growth), Janus Aspen Series Balanced -- Institutional Shares, Janus Aspen Series Worldwide Growth -- Institutional Shares, Lazard Retirement International Equity, Lord Abnett Mid-Cap Value Portfolio, MFS(R) Investors Trust Series -- Initial Class, MFS(R) New Discovery Series -- Initial Class, MFS(R) Utilities Series -- Initial Class, Morgan Stanley UIF Emerging Markets Debt -- Class I, Morgan Stanley UIF Emerging Markets Equity -- Class I, Morgan Stanley UIF U.S. Real Estate -- Class I, Pimco All Asset -- Administrative Shares, Pimco Low Duration -- Administrative Shares, Pimco Real Return -- Administrative Shares, Pimco Total Return -- Administrative Shares, Royce Micro-Cap Portfolio, Scudder VIT EAFE(R) Equity Index Fund -- Class A Shares, Scudder VIT Small Cap Index Fund -- Class A Shares, T. Rowe Price Blue Chip Growth Portfolio, T. Rowe Price Equity Income Portfolio, T. Rowe Price New America Growth Portfolio, T. Rowe Price Personal Strategy Balanced Portfolio, T. Rowe Price Limited-Term Bond Portfolio, T. Rowe Price International Stock Portfolio and Van Eck Worldwide Absolute Return.

F-26

All investments into the MainStay VP Series funds by CSVUL Separate Account-I will be made into the Initial Class of shares unless otherwise indicated. Each Investment Division of CSVUL Separate Account-I will invest exclusively in the corresponding eligible portfolio.

At the close of the financial reporting period, there have been no investments in the following investment divisions: Lazard Retirement International Equity and Pimco All Asset -- Administrative Shares.

Initial premium payments received are allocated to NYLIAC's General Account until 20 days (10 days in New York) after the policy delivery date. Thereafter, premium payments are allocated to the Investment Divisions of CSVUL Separate Account-I in accordance with the Policyowner's instructions. In addition, the Policyowner has the option to transfer amounts between the Investment Divisions of CSVUL Separate Account-I and the Fixed Account of NYLIAC.

No Federal income tax is payable on investment income or capital gains of CSVUL Separate Account-I under current Federal income tax law.

Security Valuation--The investments are valued at the net asset value of shares of the respective Fund portfolios.

Security Transactions--Realized gains and losses from security transactions are reported on the identified cost basis. Security transactions are accounted for as of the date the securities are purchased or sold (trade date).

Distributions Received--Dividend income and capital gain distributions are recorded on the ex-dividend date and reinvested in the corresponding portfolio.

In December 2003, the Accounting Standards Executive Committee issued Statement of Position 03-5 ("SOP"), "Financial Highlights of Separate Accounts: An Amendment to the Audit Guide Audits of Investment Companies". This SOP, which was adopted as of January 1, 2003, provides guidance on reporting financial highlights. Upon adoption of this SOP, the investment income ratio disclosed in Note 6 has been restated for the years 2001 and 2002. The SOP requires disclosure, in Note 6, of the investment income to average net assets ratio; the disclosure requirement for the years 2001 and 2002 was the net investment income to average net assets ratio.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

F-27

NOTE 3--Expenses and Related Party Transactions:

NYLIAC deducts certain charges from all premiums received for CSVUL, CESVUL2, CESVUL3 and CESVUL4 policies. On CSVUL policies, a sales expense charge of 2.25% is deducted to compensate NYLIAC for expenses associated with selling the policies. This charge may increase in the future, but will never exceed 4.5%. A state premium tax charge of 2% is deducted, this charge may increase consistent with changes in the applicable tax law. A federal tax charge of 1.25% is also deducted, this charge may also increase consistent with changes in the applicable tax law.

On CESVUL2 policies, we deduct 2% from each premium paid for state tax charges, 1.25% from any premium paid for federal tax charges and a sales expense charge to partially cover sales expenses as follows: (1) During the first Policy Year, we currently deduct a sales expense charge of 13.75% from any premiums paid up to the Target Premium. Once the Target Premium for that Policy Year has been reached, we currently deduct a sales expense charge of 1.25% from any additional premiums paid in that Policy Year. (2) During Policy Years two through seven, we currently expect to deduct a sales expense charge of 9.75% from any premiums paid up to the Target Premium. Once the Target Premium for that Policy Year has been reached, we currently expect to deduct a sales expense charge of 0.75% from any additional premiums paid in that Policy Year. (3) During Policy Years eight through ten, we currently expect to deduct a sales expense charge of 2.75% from any premiums paid up to the Target Premium. Once the Target Premium for that Policy Year has been reached, we currently expect to deduct a sales expense charge of 0.25% from any additional premiums paid in that Policy Year. (4) Beginning in the eleventh Policy Year, we currently expect to deduct a sales expense charge of 1.75% from any premiums paid up to the Target Premium for a given Policy Year. Once the Target Premium for that Policy Year has been reached, we currently expect to deduct a sales expense charge of 0.25% from any additional premiums paid in that Policy Year. The Target Premium, as shown in the policy, is determined from the Face Amount of the policy. Any change to the policy which results in a change to the Face Amount, will change the Target Premium.

On CESVUL3 and CESVUL4 policies, we deduct 2% from each premium paid for state tax charges, 1.25% from any premium paid for federal tax charges and a sales expense charge to partially cover sales expenses as follows: (1) During the first Policy Year, we currently deduct a sales expense charge of 10.75% from any premium paid up to the Target Premium. Once the Target Premium for that Policy Year has been reached, we currently deduct a sales expense charge of 3.00% (1.75% of which is assessed for state charges and 1.25% is assessed for federal charges) from any additional premiums paid in those Policy Years. (2) During Policy Years two through five, we currently expect to deduct a sales expense of 5.75% from any premiums paid up to the Target Premium. Once the Target Premium for that Policy Year has been reached, we currently deduct a sales expense charge of 3.00%. During Policy Years six and seven, we currently expect to deduct a sales expense charge of 4.75% from any premiums paid up to the Target Premium. Once the Target Premium for that Policy Year has been reached, we currently deduct a sales expense charge of 3.00%. During Policy Years eight through eleven, we currently expect to deduct a sales expense charge of 1.75% from any premiums paid up to the Target Premium. Once the Target Premium for that Policy Year has been reached, we currently deduct a sales expense charge of 3.00%. The Target Premium, as shown in the policy, is determined from the Face Amount of the policy. Any change to the policy which results in a change to the Face Amount, will change the Target Premium.

On CSVUL, CESVUL2, CESVUL3 and CESVUL4 policies, NYLIAC deducts a monthly contract charge of \$7.50, for CSVUL, and \$5.00, for all others, to compensate for costs incurred in providing administrative services including: premium collection, record-keeping and claims processing. On CSVUL3 and CSVUL4 policies, the monthly contract charge is deducted in policy years two and subsequent. A monthly cost of insurance charge is also deducted based on rates set forth in each policy. Charges for optional benefits added by rider are also deducted monthly. These charges are recorded as cost of insurance in the accompanying statement of changes in net assets.

On CSVUL policies, NYLIAC also assesses a surrender charge on complete surrenders or requested changes in base face amount for the first nine years of the policy. This charge is based on the policy year in which the surrender or decrease in base face amount is made and will be deducted proportionately by investment division from the policy's cash value. This charge ranges from a maximum of 32.5% of the surrender charge premium in policy years 1-5 and declines each year thereafter to a minimum of 6.5% in year nine. Surrender charges are paid to NYLIAC. This charge is included with surrenders on the accompanying statement of changes in net assets.

On CSVUL and CESVUL2 policies, CSVUL Separate Account-I is charged for mortality and expense risks assumed by NYLIAC. For CSVUL policies, these charges are made daily at an annual rate of .70% of the daily variable accumulation value of each Investment Division for policy years one through ten. For policy years eleven and later, it is expected that these charges will be reduced to an annual rate

of .30% of the daily variable accumulation value of each Investment Division. For CESVUL2 policies, in all years, it is expected that the charge will be an annual rate of .25% of the average daily variable accumulation value of each Investment Division's assets. NYLIAC may increase these charges in the future up to a maximum annual rate of .90%. For CESVUL3 and CESVUL4, NYLIAC deducts a mortality and expense risk charge from the cash value. The mortality and expense risk charge is a percentage of the amount of cash value in the Separate Account. In policy year one, the mortality and expense charge deducted is .25%.

F-30

NYLIAC CSVUL SEPARATE ACCOUNT-I

In Policy Years two through twenty-five, the mortality and expense charge deducted is .45%. In Policy Years twenty-six and subsequent, the mortality and expense charge deducted is reduced to .25%. The amounts of these charges retained in the Investment Divisions represent funds of NYLIAC. Accordingly, NYLIAC participates in the results of each Investment Division ratably with the policyowners. These charges are disclosed on the accompanying statement of operations.

NOTE 4 --Distribution of Net Income:

CSVUL Separate Account-I does not expect to declare dividends to Policyowners from accumulated net investment income and realized gains. The income and gains are distributed to Policyowners as part of withdrawals of amounts (in the form of surrenders, death benefits or transfers) in excess of the net premium payments.

F-31

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE 5--Unit Transactions (in 000's):

Transactions in accumulation units for the year ended December 31, 2004 and the year ended December 31, 2003 were as follows:

Rowe Price New America Growth Portfolio, T. Rowe Price Personal Strategy Balanced Portfolio, and Van Eck Worldwide Absolute Return Investment Divisions (constituting the New York Life Insurance and Annuity Corporation Corporate Sponsored Variable Universal Life Separate Account-I) at December 31, 2004, the results of each of their operations, the changes in each of their net assets and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the Standards of Public Company Accounting Oversight Board (United States). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of investments at December 31, 2004 by correspondence with the funds, provide a reasonable basis for our opinion.

F-53

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2004, 2003 AND 2002

NOTE 1 -- NATURE OF OPERATIONS

New York Life Insurance and Annuity Corporation (the "Company") is a direct, wholly owned subsidiary of New York Life Insurance Company ("New York Life"), domiciled in the State of Delaware. The Company offers a wide variety of interest sensitive and variable life insurance and annuity products to a large cross section of the insurance market. The Company markets its products in all 50 of the United States, and the District of Columbia, primarily through its agency force with certain products also marketed through independent brokers and brokerage general agents. Prior to July 1, 2002, the Company also had marketed individual life insurance through its branch office and agency force in Taiwan. On July 1, 2002, the branch office was transferred to an affiliated company, as described in Note 12 -- Related Party Transactions.

BASIS OF PRESENTATION

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements. Actual results may differ from estimates.

Certain amounts in prior years have been reclassified to conform to the current year presentation. These reclassifications had no effect on net income or stockholder's equity as previously reported.

NOTE 2 -- SIGNIFICANT ACCOUNTING POLICIES

INVESTMENTS

Fixed maturity investments classified as available-for-sale or trading are reported at fair value. For publicly traded fixed maturities, estimated fair value is determined using quoted market prices. For fixed maturities without a readily ascertainable fair value, the Company has determined an estimated fair value using either a discounted cash flow approach, broker-dealer quotations or management's pricing model. Unrealized gains and losses on available-for-sale securities are reported in other comprehensive income, net of deferred taxes and related adjustments. Unrealized gains and losses from fixed maturities classified as trading are reflected in net investment gains (losses) in the accompanying Statement of Income.

Changes in future anticipated cash flows on mortgage and asset-backed securities from the original purchase assumptions are accounted for using the retrospective yield adjustment method.

Equity securities are carried at fair value. The estimated fair value of equity securities has been determined using quoted market prices for publicly traded securities and management's pricing model for private placement securities. For equity securities classified as available-for-sale, unrealized gains and losses are reflected in other comprehensive income, net of deferred taxes and related adjustments. Unrealized gains and losses from equity securities classified as trading are reflected in net investment gains (losses) in the accompanying Statement of Income.

The cost basis of fixed maturities and equity securities are adjusted for impairments in value deemed to be other than temporary, with the associated realized loss reported in net investment gains and losses in the accompanying Statement of Income. The Company continuously monitors securities that have an estimated fair value that is below amortized cost in order to determine if there is any evidence that the decline in estimated fair value is not temporary. Factors considered in evaluating whether a decline in value is other than temporary include: 1) whether the decline is substantial; 2) the amount of time that the fair value has been less than cost; 3) the financial condition and near-term prospects of the issuer; and 4) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value.

Mortgage loans on real estate are carried at unpaid principal balance, net of discounts/premiums and valuation allowances, and are secured. Specific valuation allowances are established for the excess carrying value of the mortgage loan over its estimated fair value, when it is probable that, based on current information and events, the Company will be unable to collect all amounts due under the contractual terms of the loan

F-54

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

INVESTMENTS -- (CONTINUED)

agreement. Specific valuation allowances are based upon the fair value of the collateral or the present value of expected future cash flows discounted at the loan's original effective interest rate. The Company also has a general valuation allowance for estimated future credit losses on currently performing mortgages. The general valuation allowance is based on the Company's historical loss experience for the mortgage loan portfolio.

Policy loans are stated at the aggregate balance due, which approximates fair value since loans on policies have no defined maturity date and reduce amounts payable at death or surrender.

Cash equivalents include investments that have original maturities of three months or less at date of purchase and are carried at amortized cost, which approximates fair value.

Short-term investments that have maturities between three and twelve months at date of purchase are included in fixed maturities on the accompanying Balance Sheet and are carried at amortized cost, which approximates fair value.

Other long-term investments consist primarily of investments in limited partnerships and limited liability companies, derivatives, investment real estate and collateralized third party commercial loans. Investments in limited partnerships and limited liability companies are carried on the equity method of accounting. Investments in real estate, which the Company has the intent to hold for the production of income, is carried at depreciated cost net of write-downs for other than temporary declines in fair value. Properties held for sale are carried at the lower of cost or fair value less estimated selling costs. Collateralized third party commercial loans are reported at outstanding principal balance reduced by any charge-off, specific or general valuation allowance and net of any deferred fees or costs on originated loans or unamortized premiums or discounts on purchased loans. Derivative financial instruments are accounted for at fair value. The treatment of changes in the fair value of derivatives depends on the character of the transaction, including whether it has been designated and qualifies as part of a hedging relationship, as discussed in Note 10 -- Derivative Financial Instruments and Risk Management.

Net investment gains (losses) on sales are generally computed using the specific identification method.

LOANED SECURITIES AND REPURCHASE AGREEMENTS

Securities borrowed and securities loaned are treated as financing arrangements and are recorded at the amount of cash advanced or received. With respect to securities loaned, the Company obtains collateral in an amount equal to 102% and 105% of the fair value of the domestic and foreign securities, respectively. The Company monitors the fair value of securities borrowed and loaned with additional collateral obtained as necessary.

Securities purchased under agreements to resell and securities sold under agreements to repurchase are treated as financing arrangements and are carried at fair value including accrued interest. It is the Company's policy to generally take possession or control of the securities purchased under these agreements to resell. Assets to be repurchased or resold are the same or substantially the same as the assets borrowed or sold. The fair value of the securities to be repurchased or resold is monitored and additional collateral is obtained, where appropriate, to protect against credit exposure.

DEFERRED POLICY ACQUISITION COSTS

The costs of acquiring new and maintaining renewal business and certain costs of issuing policies that vary with and are primarily related to the production of new and renewal business have been deferred and recorded as an asset in the accompanying Balance Sheet. These costs consist primarily of commissions, certain expenses of underwriting and issuing contracts, and certain agency expenses.

Acquisition costs for annuity and universal life contracts are amortized in proportion to estimated gross profits over the effective life of the contracts, which is assumed to be 25 years for universal life contracts and 15 years for deferred annuities. Changes in assumptions are reflected as retroactive adjustments in the current year's amortization. The carrying amount of the

deferred policy acquisition cost asset is adjusted at each balance sheet date as if the unrealized gains or losses on investments associated with these insurance contracts had been realized and included in the gross profits used to determine current period amortization.

F-55

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

DEFERRED POLICY ACQUISITION COSTS -- (CONTINUED)

The increase or decrease in the deferred policy acquisition cost asset due to unrealized gains or losses is recorded in other comprehensive income.

POLICYHOLDERS' ACCOUNT BALANCES

Policyholders' account balances on annuity and universal life contracts are equal to cumulative deposits plus interest credited less withdrawals, mortality and expense charges, and administrative charges. This liability includes amounts that have been assessed to compensate the insurer for services to be performed over future periods.

OTHER ASSETS AND OTHER LIABILITIES

Other assets primarily consist of investment income due and accrued, amounts receivable for undelivered securities, deferred sales inducements, furniture and equipment and capitalized software and web development costs. Furniture and equipment is stated at cost less accumulated depreciation. Depreciation is determined using the straight-line method over the estimated useful lives of the related assets, which generally ranges from 3 to 10 years. Capitalized external and internal software and web development costs are amortized on a straight-line basis over the estimated useful life of the software, not to exceed 5 years. Other liabilities consist primarily of securities loaned, payable to affiliates, net deferred tax liabilities and repurchase agreements.

RECOGNITION OF INCOME AND RELATED EXPENSES

Amounts received under annuity and universal life contracts are reported as deposits to policyholders' account balances. Revenues from these contracts consist of amounts assessed during the period for mortality and expense risk, policy administration and surrender charges. Amounts previously assessed to compensate the Company for services to be performed over future periods are deferred and recognized into income in the period benefited using the same assumptions and factors used to amortize deferred policy acquisition costs. Policy benefits and claims that are charged to expense include benefit claims incurred in the period in excess of related policyholders' account balances.

Premiums from whole life and term policies are recognized as income when due. The associated benefits and expenses are matched with income so as to result in the recognition of profits over the life of the contracts. This is accomplished by providing for liabilities for future policy benefits and the deferral and subsequent amortization of policy acquisition costs.

Premiums for contracts with a single premium or a limited number of premium payments due over a significantly shorter period than the total period over which benefits are provided, are recorded as income when due. Any excess profit is deferred and recognized as income in a constant relationship to insurance in force and, for annuities, in relation to the amount of expected future benefit payments.

FEDERAL INCOME TAXES

The Company is a member of a group that files a consolidated federal income tax return with New York Life. The consolidated income tax provision or benefit is allocated among the members of the group in accordance with a tax allocation agreement. The tax allocation agreement provides that the Company is allocated its share of the consolidated tax provision or benefit determined generally on a separate company basis. Intercompany tax balances are settled quarterly on an estimated basis with a final settlement within 30 days of the filing of the consolidated return. Current federal income taxes are charged or credited to operations based upon amounts estimated to be payable or recoverable as a result of taxable operations for the current year and any adjustments to such estimates from prior years. Deferred federal income tax assets ("DTAs") and liabilities ("DTLs") are recognized for expected future tax consequences of temporary differences between GAAP and taxable income. Temporary differences are identified and measured using a balance sheet approach whereby GAAP and tax balance sheets are compared.

As a subsidiary of a mutual life insurance company, for December 31, 2004 and prior years, the Company was subject to a tax on its equity base ("EBT"). The EBT is included in the provision for federal income

F-56

FEDERAL INCOME TAXES -- (CONTINUED)

taxes estimated to be payable. An estimated differential earnings rate ("DER") is used to determine the equity base tax. Adjustments to such estimates, including those related to differences between the estimated and final DER, are recorded in income tax expense in the accompanying Statement of Income. The EBT was suspended for the 2001, 2002, and 2003 tax years. Effective with the tax year beginning after December 31, 2004, the EBT has been repealed. No EBT was accrued for in 2004.

SEPARATE ACCOUNTS

The Company has separate accounts, some of which are registered with the Securities and Exchange Commission (SEC), and others that are not registered with the SEC. The separate accounts have varying investment objectives, and are segregated from the Company's general account and are maintained for the benefit of separate account policyholders. At December 31, 2004 and 2003, all separate account assets are stated at fair value. The liability at December 31, 2004 represents the policyholders' interest in the account, and includes accumulated net investment income and realized and unrealized gains and losses on the assets, which generally reflects fair value. At December 31, 2003, the liability represents either the policyholders' interest in the account, which includes accumulated net investment income and realized and unrealized gains and losses on the assets or the amount due to the policyholder pursuant to the terms of the contract.

FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair values of various assets and liabilities are included throughout the notes to the financial statements. Specifically, fair value disclosure of fixed maturities, short-term investments, cash equivalents, equity securities and mortgage loans are reported in Note 2 -- Significant Accounting Policies and Note 3 -- Investments. Fair values of policyholders' account balances are reported in Note 5 -- Policyholders' Liabilities. Fair values of repurchase agreements are included in Note 11 -- Commitments and Contingencies.

BUSINESS RISKS AND UNCERTAINTIES

The Company's investment portfolio consists principally of fixed income securities as well as mortgage loans, policy loans, limited partnerships, and preferred and common stocks. The fair value of the Company's investments varies depending on economic and market conditions and the interest rate environment. For example, if interest rates rise, the securities in the Company's fixed-income portfolio generally will decrease in value. If interest rates decline, the securities in the fixed-income portfolio generally will increase in value. For various reasons, the Company may, from time to time, be required to sell certain investments at a price and a time when their fair value is less than their book value.

Mortgage loans, many of which have balloon payment maturities, and equity real estate, are generally illiquid and carry a greater risk of investment losses than investment grade fixed maturities. Furthermore, in periods of declining interest rates, bond calls and mortgage prepayments generally increase, resulting in reinvestment at the prevailing markets rates.

The Company regularly invests in mortgage loans, mortgage-backed securities and other securities subject to prepayment and/or call risk. Significant changes in prevailing interest rates and/or geographic conditions may adversely affect the timing and amount of cash flows on these investments, as well as their related values. In addition, the amortization of market premium and accretion of market discount for mortgage-backed securities is based on historical experience and estimates of future payment experience on the underlying mortgage loans. Actual prepayment timing will differ from original estimates and may result in material adjustments to asset values and amortization or accretion recorded in future periods.

Changes in interest rates can have significant effects on the Company's profitability. Under certain circumstances of interest rate volatility, the Company is exposed to disintermediation risk and reduction in net interest spread or profit margins. The fair value of the Company's invested assets fluctuates depending on market and other general economic conditions and the interest rate environment. In addition, mortgage prepayments, life insurance and annuity surrenders and bond calls are affected by interest rate fluctuations. Although management of the Company employs a number of asset/liability management strategies to minimize the effects of interest rate volatility, no assurance can be given that it will be successful in managing

the effects of such volatility and that such volatility will not have a material adverse impact on the Company's financial condition and results of operation.

Credit defaults and impairments may result in writedowns in the value of fixed income and equity securities held by the Company. Additionally, credit rating agencies may in the future downgrade certain issuers of fixed maturity securities held by the Company due to changing assessments of the credit quality of the issuers.

Although the federal government does not directly regulate the business of insurance, federal legislation and administrative policies in several areas, including pension regulations, financial services regulation and federal taxation, can significantly and adversely affect the insurance industry and the Company. The Company is unable to predict whether any of these changes will be made, whether any such administrative or legislative proposals will be adopted in the future, or the effect, if any, such proposals would have on the Company.

The development of policy reserves and deferred policy acquisition costs for the Company's products requires management to make estimates and assumptions regarding mortality, morbidity, lapse, expense and investment experience. Such estimates are primarily based on historical experience and future expectations of mortality, morbidity, expense, persistency and investment assumptions. Actual results could differ from those estimates. Management monitors actual experience, and where circumstances warrant, revises its assumptions and the related estimates for policy reserves and deferred policy acquisition costs.

The Company issues certain variable products with various types of guaranteed minimum benefit features. The Company currently reserves for expected payments resulting from these features. The Company bears the risk that payments may be higher than expected as a result of significant, sustained downturns in the stock market. The Company also bears the risk that additional reserves may be required if partial surrender activity increases significantly during the period when account values are less than guaranteed amounts.

CONTINGENCIES

Amounts related to contingencies are accrued if it is probable that a liability has been incurred and an amount is reasonably estimable. Regarding litigation, management evaluates whether there are incremental legal or other costs directly associated with the ultimate resolution of the matter that are reasonably estimable and, if so, includes these costs in the accrual.

RECENT ACCOUNTING PRONOUNCEMENTS

Effective January 1, 2004, the Company adopted Statement of Position 03-01, "Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts" ("SOP 03-01"). SOP 03-01 provides guidance on (i) the classification and valuation of long-duration contract liabilities, (ii) the accounting for sales inducements, and (iii) separate account presentation and valuation. In accordance with SOP 03-01's guidance for the reporting of certain separate accounts, the Company reclassified \$768 million of separate account assets to general account assets and \$680 million of separate account liabilities to policyholders' account balances and other liabilities. The Company currently offers enhanced crediting rates or day one bonus payments to contractholders on certain of its annuity products. Through December 31, 2003, the expense associated with offering certain of these day one bonuses was deferred and amortized in proportion to estimated gross profits over the effective life of those contracts. Effective January 1, 2004, upon the Company's adoption of SOP 03-01, the expense associated with offering a day one bonus continues to be deferred and amortized over the life of the related contract using the same methodology and assumption used to amortize deferred policy acquisition costs. Enhanced crediting rates offered in certain annuity products will no longer be eligible for capitalization, consistent with the terms of SOP 03-01. Effective January 1, 2004, amortization associated with expenses previously deferred remains unchanged. For the period ending December 31, 2004, the amortization of sales inducements was \$17 million, pretax and is included in interest credited to policyholders' account balances in the accompanying Statement of Income. The cumulative effect of the adoption of SOP 03-01, as of January 1, 2004, resulted in a \$2 million decrease in net income and a \$1 million increase in other comprehensive income, after tax.

F-58

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

RECENT ACCOUNTING PRONOUNCEMENTS -- (CONTINUED)

Effective January 1, 2004, the Company adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133") Implementation Issue No. B36, "Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit

Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor Under Those Instruments ("B36"). B36 indicates that certain reinsurance arrangements, and other similar contracts, in which funds are withheld by the ceding insurer and a return on those withheld funds is paid based on the ceding company's return on certain of its investments, generally contain an embedded derivative feature that should be separately identified and fair valued. As of January 1, 2004, there was no cumulative effect from the adoption of B36 on the Company's results.

The Company has adopted the provisions of Financial Accounting Standards Board Interpretation No. 46(R) "FIN 46(R)". In January 2003, the FASB issued Interpretation FIN No. 46, "Consolidation of Variable Interest Entities". FIN No. 46 requires a variable interest entity ("VIE") to be consolidated by a company if that company is subject to a majority of the risk of loss from the VIE's activities or entitled to receive a majority of the entity's residual returns. On December 17, 2003, the FASB issued FIN 46(R) ("Revised Interpretation" of FIN 46), which amended certain aspects of FIN46. For all VIEs created before December 31, 2003, the Company will be required to adopt FIN 46(R) as of January 1, 2005. For VIEs created after December 31, 2003, the Company applied FIN 46(R) immediately. At December 31, 2004, the Company held \$52 million of invested assets issued by a VIE, created after December 31, 2003, and determined to be significant variable interests under FIN 46(R). These investments consist of fixed maturities (asset-backed securitizations totaling \$20 million and private placement structured notes totaling \$24 million) and other equity investments (asset-backed securitizations totaling \$8 million). This VIE does not require consolidation because management has determined that the Company is not the primary beneficiary. The Company has held \$42 million of invested assets issued by VIEs at December 31, 2004, created before December 31, 2003, determined to be significant variable interests under FIN 46(R). These investments consist of fixed maturities (asset-backed securitizations totaling \$24 million) and other equity investments (asset-backed securitizations totaling \$18 million). These VIEs may be required to consolidate when the new rule becomes effective (January 1, 2005 for these entities). These variable interests are subject to ongoing review for impairment and represent the maximum exposure to losses from the Company's direct involvement with the VIEs. The Company has no additional economic interest in this VIE in the form of derivatives, commitments, related guarantees, credit enhancement or similar instruments and obligations.

NOTE 3 -- INVESTMENTS

FIXED MATURITIES

The amortized cost and estimated fair value of fixed maturities as of December 31, 2004 and 2003, by contractual maturity is presented below (in millions). Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	=====	=====	=====	=====

</Table>

At December 31, 2004 and 2003, the Company had outstanding contractual obligations to acquire additional private placement securities amounting to \$47 million and \$16 million, respectively.

The Company accrues interest income on fixed maturity securities to the extent it is deemed collectible and the security continues to perform under its original contractual terms. Interest income on impaired securities is recognized on a cash basis.

EQUITY SECURITIES

At December 31, 2004 and 2003, the distribution of gross unrealized gains and losses on available for sale equity securities was as follows (in millions):

	COST	UNREALIZED GAINS	UNREALIZED LOSSES	ESTIMATED FAIR VALUE
<S>	<C>	<C>	<C>	<C>
2004	\$38	\$3	\$1	\$40
2003	\$46	\$2	\$1	\$47

</Table>

MORTGAGE LOANS

The Company's mortgage loans are diversified by property type, location and borrower, and are collateralized by the related property.

The fair value of the mortgage loan portfolio at December 31, 2004 and 2003 was estimated to be \$3,264 million and \$2,854 million, respectively. Fair value is determined by discounting the projected cash flows for each loan to determine the current net present value. The discount rate used approximates the current rate for new mortgages with comparable characteristics and similar remaining maturities. As mortgage loans are generally intended to be held to maturity, the fair value does not necessarily represent the values for which those loans could have been sold for at December 31, 2004 or 2003.

F-60

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

MORTGAGE LOANS -- (CONTINUED)

At December 31, 2004 and 2003, contractual commitments to extend credit under commercial and residential mortgage loan agreements amounted to \$83 million and \$58 million at fixed and floating interest rates ranging from 2.7% to 7.2% and from 2.7% to 7.8%, respectively. These commitments are diversified

by property type and geographic region.

The Company accrues interest income on problem loans to the extent it is deemed collectible and the loan continues to perform under its original or restructured contractual terms. Interest income on impaired loans is recognized on a cash basis. Cash payments on loans in the process of foreclosure are treated as a return of principal.

At December 31, 2004 and 2003, the distribution of the mortgage loan portfolio by property type and geographic region was as follows (in millions):

	2004		2003	
	CARRYING VALUE	% OF TOTAL	CARRYING VALUE	% OF TOTAL
Property Type:				
Office buildings	\$1,022	33.1%	\$ 943	35.4%

Total other long-term investments	\$667	\$280

F-61

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

OTHER LONG-TERM INVESTMENTS -- (CONTINUED)

Investments in limited liability company represents the Company's investment in the New York Life Short Term Investment Fund ("STIF"), formed by

New York Life to improve short-term returns through greater flexibility to choose attractive maturities and enhanced portfolio diversification. The STIF is a commingled fund managed by New York Life Investment Management LLC ("NYLIM"), an indirect wholly owned subsidiary of New York Life, where all participants are subsidiaries or affiliates of New York Life.

Accumulated depreciation on real estate at December 31, 2004 and 2003 was \$5 million and \$6 million, respectively. Depreciation expense for December 31, 2004 totaled less than \$1 million. For the years ended December 31, 2003 and 2002, depreciation expense totaled \$1 million. Depreciation expense is recorded as a component of net investment income in the accompanying Statement of Income.

Unfunded commitments on limited partnerships and limited liability companies amounted to \$9 million at December 31, 2004. There were no unfunded commitments at December 31, 2003.

RESTRICTED ASSETS AND SPECIAL DEPOSITS

Assets of \$3 million at December 31, 2004 and 2003 were on deposit with governmental authorities or trustees as required by certain state insurance laws and are included in available-for-sale fixed maturities on the accompanying Balance Sheet.

NOTE 4 -- INVESTMENT INCOME AND INVESTMENT GAINS AND LOSSES

The components of net investment income for the years ended December 31, 2004, 2003 and 2002 were as follows (in millions):

	2004	2003	2002
Fixed maturities	\$1,805	\$1,604	\$1,448
Equity securities	4	2	3
Mortgage loans	185	167	170
Policy loans	45	46	45
Other long-term investments	27	30	30
Gross investment income	2,066	1,849	1,696
Investment expenses	(60)	(48)	(49)
Net investment income	\$2,006	\$1,801	\$1,647

For the years ended December 31, 2004, 2003 and 2002, investment gains (losses) computed generally under the specific identification method were as follows (in millions):

	2004		2003		2002	
	GAINS	LOSSES	GAINS	LOSSES	GAINS	LOSSES
Fixed maturities	\$142	\$ (98)	\$192	\$ (176)	\$192	\$ (236)
Equity securities	13	(1)	5	(7)	8	(8)
Mortgage loans	--	(4)	2	(4)	1	(1)
Derivative instruments	--	(23)	1	(4)	1	(4)
Other long-term investments	3	(1)	--	(12)	--	(2)
Subtotal	\$158	\$ (127)	\$200	\$ (203)	\$202	\$ (251)
Total net investment gains (losses)	\$31		\$ (3)		\$ (49)	

On April 1, 2002, the Company transferred the convertible bond and preferred stock portfolios from available-for-sale into the trading category. The net gain released from unrealized gains in accumulated other comprehensive income in the accompanying Balance Sheet and reflected in net investment gains (losses) in the accompanying Statement of Income at the date of transfer amounted to \$3 million, pre-tax. The convertible portfolio was subsequently sold during 2002.

The gross gains and losses on trading securities amounted to \$16 million and \$20 million for the year ended December 31, 2004. The gross gains and losses on trading securities amounted to \$21 million and \$73 million for the year ended December 31, 2003. The gross gains and losses on trading securities amounted to \$3 million and \$7 million for the period April 1, 2002 through December 31, 2002. Trading gains and losses are included in net investment gains (losses) in the accompanying Statement of Income.

Related losses from other-than-temporary impairments in fixed maturities (included in gross investment losses on fixed maturities above) were \$10 million, \$24 million and \$70 million for the years ended December 31, 2004, 2003 and 2002, respectively. Related losses from other-than-temporary impairments in equities (included in gross investment losses on equity securities above) were \$0 million, \$7 million and \$0 million at December 31, 2004, 2003 and 2002, respectively.

The following table presents the Company's gross unrealized losses and fair values for fixed maturities and equities with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in an unrealized loss position, at December 31, 2004 and 2003 (in millions):

</Table>

* Unrealized loss is less than \$1 million.

CORPORATE BONDS: The amount of unrealized losses on the Company's investment in corporate bonds is principally due to changes in interest rates and widening spreads due to market conditions in certain sectors such as airlines and telecommunications that contributed to the decline in fair value. Because the securities continue to meet their contractual payments, the Company has the ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value.

MORTGAGE-BACKED SECURITIES: The unrealized losses on these investments were caused by interest rate increases. Securities issued by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation or the Government National Mortgage Association that are either direct agencies of or agencies sponsored by the U.S. government, provide a US government guarantee of the contractual cash flows of these investments. Accordingly, it is expected that the securities would not be settled at a price less than amortized cost. Because the decline in market value is attributable to changes in interest rates, the Company has the ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value.

ASSET-BACKED SECURITIES: The unrealized losses on these investments are principally due to changes in interest rates. The Company measures its asset-backed portfolio for impairments based on the security's credit rating and whether it has an unrealized loss. Where the securities fair value is below its amortized cost and there are negative changes in estimated future cash flows, the securities are deemed impaired and a realized loss is recognized in net income in the accompanying Statement of Income.

NET UNREALIZED INVESTMENT GAINS (LOSSES)

Net unrealized investment gains (losses) on available-for-sale investments are included in the accompanying Balance Sheet as a component of accumulated other comprehensive income. Changes in these amounts include reclassification adjustments for prior period unrealized gains (losses) that have been recognized as realized gains (losses) during the current year and are included in net investment gains

	----	----	----
Net unrealized investment gains (losses), end of year	\$653	\$590	\$ 451
	=====	=====	=====

</Table>

Net unrealized gains on investments reported in the preceding table for the years ended December 31, 2004, 2003 and 2002 are net of income tax expense of \$27 million, \$71 million and \$357 million, respectively.

Reclassification adjustments reported in the preceding table for the years ended December 31, 2004, 2003 and 2002 are net of income tax expense of \$31 million, \$10 million and \$5 million, respectively.

Policyholders' account balances and future policy benefits reported in the preceding table for the years ended December 31, 2004, 2003 and 2002 are net of income tax (benefit) expense of \$(4) million, \$14 million and \$(8) million, respectively.

Deferred policy acquisition costs in the preceding table for the years ended December 31, 2004, 2003 and 2002 are net of income tax expense (benefit) of \$33 million, \$0 million and \$(156) million, respectively.

Other assets (deferred sales inducements) in the preceding table for the year ended December 31, 2004 is net of income tax expense of \$8 million.

On July 1, 2002, the cumulative unrealized gain associated with the Taiwan branch was transferred to an affiliated company as described in Note 12 -- Related Party Transactions.

NOTE 5 -- POLICYHOLDERS' LIABILITIES

POLICYHOLDERS' ACCOUNT BALANCES

Policyholders' account balances at December 31, 2004 and 2003 were as follows (in millions):

	2004	2003
	-----	-----
<S>	<C>	<C>
Deferred annuities	\$18,840	\$15,733
Universal life contracts	15,681	13,457
Other	194	176
	-----	-----
Total Policyholders' Account Balances	\$34,715	\$29,366
	=====	=====

</Table>

F-65

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION (A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

POLICYHOLDERS' ACCOUNT BALANCES -- (CONTINUED)

Policyholders' account balances on the above contracts are equal to cumulative deposits plus interest credited less withdrawals and less mortality and expense charges, where applicable. This liability also includes a liability for amounts that have been assessed to compensate the insurer for services to be performed over future periods. For deferred annuities, account value approximates fair value.

The following table highlights the interest rate assumptions generally utilized in calculating policyholders' account balances, as well as certain withdrawal characteristics associated with these accounts at December 31, 2004:

<Table>		
<Caption>		
PRODUCT	INTEREST RATE	WITHDRAWAL/SURRENDER CHARGES
-----	-----	-----
<S>	<C>	<C>
Deferred annuities	2.10% to 7.15%	Surrender charges 0% to 10% for up to 10 years.
Universal life contracts	3.40% to 6.69%	Various up to 19 years.
</Table>		

FUTURE POLICY BENEFITS

Future policy benefits at December 31, 2004 and 2003 were as follows (in millions):

	2004	2003
Life insurance:		
Taiwan business -- 100% coinsured	\$1,021	\$ 716
Other life	46	55
Total life insurance	1,067	771
Individual annuities	293	256
Total Future Policy Benefits	\$1,360	\$1,027

The following table highlights the key assumptions generally utilized in the calculation of future policy benefit reserves at December 31, 2004:

PRODUCT	MORTALITY	INTEREST RATE	ESTIMATION METHOD
Life insurance:			
Taiwan business -- 100% coinsured	Based upon pricing assumptions at time of policy issuance with provision for adverse deviations ("PAD").	3.7% - 7.5%	Net level premium reserve taking into account death benefits, lapses and maintenance expenses with PAD.
Individual payout annuities	Based upon pricing assumptions at time of policy issuance with PAD.	5.5% - 9.5%	Present value of expected future payments at a rate expected at issue with PAD.

GUARANTEED MINIMUM BENEFITS

At December 31, 2004 and 2003, the Company had the following variable contracts with guarantees. (Note that the Company's variable contracts with guarantees may offer more than one type of guarantee in each contract; therefore, the amounts listed are not mutually exclusive.) For guarantees of amounts in the event of death, the net amount at risk is defined as the current guaranteed minimum death benefit ("GMDB") in excess of the current account balance at the balance sheet date. For guarantees of accumulation balances, the net amount at risk is defined as the guaranteed minimum accumulation benefit ("GMAB") minus the current account balance.

VARIABLE ANNUITY CONTRACTS -- GMDB AND GMAB

The Company issues certain variable annuity contracts with GMDB and GMAB features that guarantee either:

- a) Return of deposits: the benefit is the greater of current account value or premiums paid (adjusted for withdrawals)

F-66

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

VARIABLE ANNUITY CONTRACTS -- GMDB AND GMAB -- (CONTINUED)

- b) Ratchet: the benefit is greatest of the current account value, premiums paid (adjusted for withdrawals), or the highest account value on any contractually specified anniversary up to contractually specified ages (adjusted for withdrawals)

The following chart provides the account value, net amount at risk and average attained age of contractholders at December 31, 2004 for GMDB's and GMAB's (\$ in millions):

	RETURN OF NET DEPOSITS		RATCHET
	IN THE EVENT OF DEATH (GMDB)	ACCUMULATION AT SPECIFIED DATE (GMAB)	IN THE EVENT OF DEATH (GMDB)
Account value	\$3,412	\$574	\$12,166
Net amount at risk	\$ 49	\$ 3	\$ 475

The following summarizes the liabilities for guarantees on variable contracts reflected in the general account in future policy benefits in the accompanying Balance Sheet:

	GUARANTEED MINIMUM DEATH BENEFIT (GMDB)	GUARANTEED MINIMUM ACCUMULATION BENEFIT (GMAB)	TOTALS
	-----	-----	-----
<S>	<C>	<C>	<C>
Balance at January 1, 2004	\$29	\$2	\$31
Incurred guarantee benefits	1	1	2
Paid guarantee benefits	(7)	--	(7)
	---	---	---
Balance at December 31, 2004	\$23	\$3	\$26
	===	==	===

For guaranteed minimum accumulation benefits, incurred guaranteed minimum benefits incorporates all changes in fair value other than amounts resulting from paid guarantee benefits. The GMDB liability is determined each period end by estimating the expected value of death benefits in excess of the projected account balance and recognizing the excess ratably over the accumulation period based on total expected assessments. The Company regularly evaluates estimates used and adjusts the additional liability balance, with a related charge or credit to benefit expense, if actual experience or other evidence suggests that earlier assumptions should be revised.

The following assumptions and methodology were used to determine the GMDB liability at December 31, 2004:

- Data used was 1,000 stochastically generated investment performance scenarios.
- Mean investment performance assumption ranged from 6.53% to 6.89%.
- Volatility assumption was 15%.
- Mortality was assumed to be 90% of the Annuity 2000 table.
- Lapse rates vary by contract type and duration and range from 1% to 20%, with an average of 4%.
- Discount rates ranged from 5.89% to 7.61%.

The following table presents the aggregate fair value of assets, by major investment fund options (including the general and separate account fund options), held by variable annuity products that are subject to GMDB and GMAB benefits and guarantees. Since variable contracts with GMDB guarantees may also offer

	-----	----
Total	\$15,393	\$575
	=====	=====

</Table>

NO LAPSE GUARANTEE

The no lapse guaranteed feature contained in variable and interest-sensitive life insurance policies keeps these policies in force in situations where the policy value is not sufficient to cover monthly charges then due. The no lapse guarantee remains in effect so long as the policy meets a contractually specified premium funding test and certain other requirements.

The following table summarizes the no lapse guarantee liabilities reflected in the General Account in future policy benefits on the accompanying Balance Sheet (in millions):

	NO LAPSE GUARANTEE (NLG)

<S>	<C>
Balance at January 1, 2004	\$--
Impact of adoption of SOP 03-01	5
Other changes in reserve	6

Balance at December 31, 2004	\$11
	===

NOTE 6 -- SEPARATE ACCOUNTS

The Company maintains twenty separate accounts for its variable deferred annuity and variable life products; nine of these are registered with the Securities and Exchange Commission. The assets of these separate accounts represent investments in shares of the New York Life sponsored Mainstay VP Series Funds and other non-proprietary funds. The assets in separate accounts for December 31, 2004 and 2003 are as follows:

	2004	2003
	-----	-----
<S>	<C>	<C>
Registered	\$12,615	\$10,807
Non-registered	89	59
	-----	-----
Total separate account assets	\$12,704	\$10,866
	=====	=====

As discussed in Note 2 -- Significant Accounting Policies, the Company adopted SOP 03-01. Upon adoption at January 1, 2004, the Company reclassified \$768 million of separate account assets to general account assets and \$680 million of separate account liabilities to policyholders' account balances and other liabilities.

F-68

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTE 7 -- DEFERRED POLICY ACQUISITION COSTS

An analysis of deferred policy acquisition costs ("DAC") for the years ended December 31, 2004, 2003 and 2002 was as follows (in millions):

	2004	2003	2002
	-----	-----	-----
<S>	<C>	<C>	<C>
Balance at beginning of year	\$2,180	\$1,781	\$1,887
Reclassification due to adoption of SOP 03-01	(156)	--	--
Current year additions	586	645	630
Amortized during year	(268)	(245)	(189)
Adjustment for change in unrealized investment gains	95	(1)	(445)
Transfer of Taiwan branch to an affiliated company	--	--	(102)
	-----	-----	-----
Balance at end of year	\$2,437	\$2,180	\$1,781
	=====	=====	=====

As discussed in Note 2 -- Significant Account Policies, effective January 1, 2004, the Company adopted SOP 03-01. The Company reclassified \$156 million in capitalized sales inducements from DAC to Other Assets on the accompanying Balance Sheet.

On July 1, 2002, the assets and liabilities including deferred policy acquisition costs associated with the Taiwan branch were transferred to an affiliated company, as described in Note 12 -- Related Party Transactions.

NOTE 8 -- FEDERAL INCOME TAXES

A summary of income tax expense (benefit) included in the accompanying Statement of Income was as follows (in millions):

	2004	2003	2002
	----	----	----
	<C>	<C>	<C>
Current:			
Federal	\$ 85	\$ 94	\$ (1)
State and local	2	5	1
	----	----	----
	87	99	--
Deferred:			
Federal	63	17	(1)
	----	----	----
Income tax expense/(benefit)	\$150	\$116	\$ (1)
	=====	=====	=====

The components of the net deferred tax liability as of December 31, 2004 and 2003 were as follows (in millions):

	2004	2003
	-----	-----
	<C>	<C>
Deferred tax assets:		
Future policyholder benefits	\$ 550	\$ 534
Employee and agents benefits	69	62
	-----	-----
Gross deferred tax assets	619	596
	-----	-----
Deferred tax liabilities:		
Deferred policy acquisition costs	646	517
Investments	521	526
Other	4	9
	-----	-----
Gross deferred tax liabilities	1,171	1,052
	-----	-----
Net deferred tax liability	\$ 552	\$ 456
	=====	=====

Deferred income taxes are generally recognized, based on enacted tax rates, when assets and liabilities have different values for financial statement and tax purposes. The Company's management has concluded

F-69

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTE 8 -- FEDERAL INCOME TAXES -- (CONTINUED)

that the deferred tax assets are more likely than not to be realized. Therefore, no valuation allowance has been provided.

Set forth below is a reconciliation of the statutory Federal income tax rate to the effective tax rate for 2004, 2003 and 2002:

	2004	2003	2002
	----	----	----
	<C>	<C>	<C>
Statutory Federal income tax rate	35.0%	35.0%	35.0%
True down of prior year equity base tax	--	--	(22.9)
Tax exempt income	(1.9)	(2.8)	(6.0)
Foreign branch termination	--	--	(3.8)
Other	(0.3)	(1.2)	(2.9)
	----	----	----
Effective tax rate	32.8%	31.0%	(0.6)%
	=====	=====	=====

Pursuant to the tax allocation agreement discussed in Note 2 -- Significant

Accounting Policies, as of December 31, 2004 and 2003, the Company had recorded an income tax receivable from New York Life of \$49 million and \$38 million, respectively, included in Other Assets on the accompanying Balance Sheet.

The Company's federal income tax returns are routinely examined by the IRS and provisions are made in the financial statements in anticipation of the results of these audits. The IRS has completed audits through 1998 and has begun auditing tax years 1999 through 2001. There were no material effects on the Company's results of operations as a result of these audits. The Company believes that its recorded income tax liabilities are adequate for all open years.

As discussed in Note 2 -- Significant Accounting Policies, the Company's equity base tax was suspended for the three year period beginning 2001 and permanently repealed effective with the tax year beginning after December 31, 2004. The Company accrued \$17 million in the equity base tax in 2001 prior to passage of this legislation. This amount was released in 2002 and reflected as an adjustment to 2002 current income tax expense (benefit) in the accompanying Statement of Income. No equity base tax was accrued for in 2004.

NOTE 9 -- REINSURANCE

The Company enters into reinsurance agreements in the normal course of its insurance business to reduce overall risk. The Company remains liable for reinsurance ceded if the reinsurer fails to meet its obligation on the business it has assumed. The Company periodically reviews the financial condition of its reinsurers and amounts recoverable in order to minimize its exposure to significant losses from reinsurer insolvencies. When necessary, an allowance is recorded for reinsurance the Company cannot collect. Three reinsurance companies account for approximately 61% of the reinsurance ceded to non-affiliates at December 31, 2004.

In December 2004, the Company reinsured 90% of a block of inforce life insurance business, consisting of Universal Life, Variable Universal Life (VUL), Target Life and Asset Preserver, with New York Life. The agreement used a combination of coinsurance with funds withheld for the fixed portion maintained in the General Account and modified coinsurance (MODCO) for the VUL policies in the Separate Accounts. Under both the MODCO and Funds Withheld treaties, the Company will retain the assets held in relation to the policyholders' account balances and separate account liabilities. An experience refund will be paid to the Company at the end of each quarterly accounting period for 100% of the profits in excess of \$5 million per year. Under B36, the Funds Withheld and the MODCO treaties, along with the experience rating refund, represent embedded derivatives which are required to be carried at fair value. The fair value of these embedded derivatives at December 31, 2004 is \$0 million.

In connection with the above described reinsurance agreement with New York Life, the Company recorded a deferred gain of \$244 million, which includes the \$25 million purchase price and \$219 million of GAAP reserves recoverable from the reinsurer in excess of the funds withheld liability.

F-70

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTE 9 -- REINSURANCE -- (CONTINUED)

As discussed in Note 12 -- Related Party Transactions, the transfer of the Company's insurance book of business associated with the Company's Taiwan branch, effective July 1, 2002, is accounted for as a long-duration coinsurance transaction.

The effects of all reinsurance for the years ended December 31, 2004, 2003 and 2002 were as follows (in millions):

<Table>

	=====	=====	=====

</Table>

NOTE 10 -- DERIVATIVE FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company uses derivative financial instruments to manage interest rate, currency and market risk. These derivative financial instruments include interest rate options and interest rate and currency swaps. The Company does not engage in derivative financial instrument transactions for speculative purposes.

The Company deals with highly rated counter-parties and does not expect the counter-parties to fail to meet their obligations under the contracts. The Company has controls in place to monitor credit exposures by limiting transactions with specific counter-parties within specified dollar limits and assessing the future creditworthiness of counter-parties. The Company uses master netting agreements and adjusts transaction levels, when appropriate, to minimize risk.

To further minimize risk, credit support annexes are negotiated as part of swap documentation entered into by the Company with counter-parties. The credit support annex requires that a swap counterparty post collateral to secure that portion of its anticipated swap obligation in excess of a specified threshold. The threshold declines with a decline in the counter-parties' rating. Collateral received is invested in short-term investments.

To qualify as a hedge, the hedge relationship is designated and formally documented at inception detailing the particular risk management objective and strategy for the hedge. This includes the item and risk that is being hedged, the derivative that is being used, as well as how effectiveness is being assessed. A derivative must be highly effective in accomplishing the objective of offsetting either changes in fair value or cash flows for the risk being hedged. The hedging relationship is considered highly effective if the changes in fair value or discounted cash flows of the hedging instrument is within 80-125% of the inverse changes in the fair value or discounted cash flows of the hedged item. The Company formally measures effectiveness of its hedging relationships both at the hedge inception and on an ongoing basis in accordance with its risk management policy.

For fair value hedges, the Company generally uses a qualitative assessment to measure hedge effectiveness. For cash flow hedges of interest rate risk, the Company uses either qualitative assessment, if appropriate, or regression analysis to assess hedge effectiveness to changes in the benchmark interest rate. The change in variable cash flows method is used to measure hedge ineffectiveness when appropriate. The

F-71

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTE 10 -- DERIVATIVE FINANCIAL INSTRUMENTS AND RISK MANAGEMENT -- (CONTINUED)

Company discontinues hedge accounting prospectively if: (i) it is determined that the derivative is no longer effective in offsetting changes in the fair value or cash flows of a hedged item, (ii) the derivative expires or is sold, terminated, or exercised, (iii) the derivative is de-designated as a hedge instrument, (iv) it is probable that the forecasted transaction will not occur, or (v) management determines that designation of the derivative as a hedge instrument is no longer appropriate.

For cash flow hedges, in which derivatives hedge the variability of cash flows related to variable rate available-for-sale securities, the accounting treatment depends on the effectiveness of the hedge. To the extent these derivatives are effective in offsetting the variability of the hedged cash flows, changes in the derivatives' fair value will not be included in current earnings but are reported as changes in other comprehensive income. These changes in fair value will be included in earnings of future periods when earnings are also affected by the variability of the hedged cash flows. To the extent these derivatives are not effective, changes in their fair values are immediately included in earnings in net investment gains (losses). The Company's cash flow hedges primarily include hedges of floating rate available-for-sale securities. During 2004 and 2003, there was no hedge ineffectiveness recognized in net investment gains (losses) related to cash flow hedges. The assessment of hedge effectiveness for cash flow hedges of interest rate risk excludes amounts relating to risks other than exposure to the benchmark interest rate. There were \$182 million and \$224 million in notional value of cash flow hedges at December 31, 2004 and December 31, 2003, respectively. The estimated amount of existing gains and losses that are reported in other comprehensive income at December 31, 2004 and 2003 related to periodic interest payments on assets and liabilities being hedged that is expected to be reclassified into earnings within the next

12 months is \$0 million and \$4 million, respectively.

For fair value hedges, in which derivatives hedge the fair value of assets and liabilities, changes in the fair value of derivatives are reflected in net investment losses, together with changes in the fair value of the related hedged item. The net amount, representing hedge ineffectiveness, is reflected in earnings.

Fair value hedge accounting is discontinued immediately when it is determined that the derivative no longer qualifies as an effective fair value hedge. The derivative will continue to be carried on the balance sheet at its fair value, but the changes in the fair value of the hedged asset or liability will no longer offset the changes in the fair value of the derivative. The Company held no fair value hedges at December 31, 2004 and 2003.

Derivatives that do not qualify for hedge accounting are carried at fair value with changes in value included in net investment gains (losses). The Company has derivative instruments that do not qualify for hedge accounting treatment, which include interest rate options and various interest rate swaps. There were \$6 billion and \$4 billion in notional value of non-qualifying hedges at December 31, 2004 and December 31, 2003, respectively.

The Company may enter into contracts that are not themselves derivative instruments but contain embedded derivatives. For each contract, the Company assesses whether the economic characteristics of the embedded derivative are clearly and closely related to those of the host contract and determines whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and that a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is separated from the host contract and accounted for as a stand-alone derivative. Such embedded derivatives are recorded on the balance sheet at fair value and changes in their fair value are recorded currently in net investment gains (losses). If the Company is unable to properly identify and measure an embedded derivative for separation from its host contract, the entire contract is carried on the balance sheet at fair value. As of December 31, 2004 and 2003, there were no such embedded derivatives that could not be separated from their host contracts.

F-72

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTE 11 -- COMMITMENTS AND CONTINGENCIES

LITIGATION

The Company is a defendant in individual suits arising from its agency sales force, insurance (including variable contracts registered under the federal securities law), investment, retail securities, and/or other operations, including actions involving retail sales practices. Most of these actions seek substantial or unspecified compensatory and punitive damages. The Company is also from time to time involved in various governmental, administrative, and investigative proceedings and inquiries.

Notwithstanding the uncertain nature of litigation and regulatory inquiries, the outcome of which cannot be predicted, the Company believes that, after provisions made in the financial statements, the ultimate liability that could result from litigation and proceedings would not have a material adverse effect on the Company's financial position; however, it is possible that settlements or adverse determinations in one or more actions or other proceedings in the future could have a material adverse effect on the Company's operating results for a given year.

ASSESSMENTS

Most of the jurisdictions in which the Company is licensed to transact business, require life insurers to participate in guaranty associations which are organized to pay contractual benefits pursuant to insurance policies issued by impaired, insolvent or failed life insurers. These associations levy assessments, up to prescribed limits, on all member insurers in a particular state on the basis of the proportionate share of the premiums written by member insurers in the line of business in which the impaired, insolvent or failed life insurer is engaged. Some states permit member insurers to recover assessments through full or partial premium tax offsets. The Company is not aware of, nor has it received notification of any significant insolvency by insurance companies.

LOANED SECURITIES AND REPURCHASE AGREEMENTS

The Company participates in a securities lending program for the purpose of enhancing income on securities held. At December 31, 2004 and 2003, \$1,082 million and \$1,424 million, respectively, of the Company's fixed maturity

securities were on loan to others. Collateral on loan securities is obtained in accordance with our policy disclosed in Note 2 -- Significant Accounting Policies. The fair value of securities loaned is monitored, with additional collateral obtained, as necessary. Such assets reflect the extent of the Company's involvement in securities lending, not the Company's risk of loss.

At December 31, 2004 and 2003, the Company recorded cash collateral received under these agreements of \$1,105 million and \$1,474 million, respectively, and established a corresponding liability for the same amount included in other liabilities in the accompanying Balance Sheet.

The Company enters into agreements to sell and repurchase securities for the purpose of enhancing income on securities held. Under these agreements, the Company obtains the use of funds from a broker for generally one month. The liability reported in the accompanying Balance Sheet (included in other liabilities) at December 31, 2004 of \$1,021 million (\$155 million at December 31, 2003) approximates fair value. The investments acquired with the funds received from the securities sold are included in both fixed maturities and cash and cash equivalents in the accompanying Balance Sheet.

NOTE 12 -- RELATED PARTY TRANSACTIONS

New York Life provides the Company with services and facilities for the sale of insurance and other activities related to the business of insurance. New York Life charges the Company for the identified costs associated with these services and facilities under the terms of an administrative service agreement between New York Life and the Company. Such costs, amounting to \$585 million, \$559 million and \$537 million for the years ended December 31, 2004, 2003 and 2002, respectively, are reflected in operating expenses and net investment income in the accompanying Statement of Income.

In addition, the Company is allocated post-retirement and post-employment benefits other than pensions, which are held by New York Life. The Company was allocated \$30 million for its share of the net periodic

F-73

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION (A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTE 12 -- RELATED PARTY TRANSACTIONS -- (CONTINUED)

post-retirement benefits expense in 2004 (\$27 million and \$13 million in 2003 and 2002, respectively) and an expense of \$1 million in 2004 (\$(2) million in 2003 and 2002) for the post-employment benefits expense under the provisions of the service agreement. The expenses are reflected in operating expenses and net investment income in the accompanying Statement of Income.

The Company has entered into an investment advisory and administrative services agreement with New York Life Investment Management LLC ("NYLIM"), an indirect wholly owned subsidiary of New York Life, to provide investment advisory services to the Company. At December 31, 2004, 2003 and 2002, the total cost for these services amounted to \$31 million, \$23 million and \$29 million, respectively, which are included in the costs of services billed by New York Life to the Company, as noted above.

In addition, NYLIM has an Investment Advisory Agreement with the Mainstay VP Series Fund, Inc. (the "Fund"), a registered investment company whose shares are sold to various separate accounts of the Company. NYLIM, the administrator of the Fund and the Company have entered into agreements regarding administrative services to be provided by the Company. Under the terms of the agreement, NYLIM pays the Company administrative fees for providing services to the Fund. The Company recorded fee income from NYLIM for the years ended December 31, 2004, 2003 and 2002 of \$11 million, \$9 million and \$9 million, respectively.

At December 31, 2004 and 2003, the Company had a net liability of \$202 million and \$186 million, respectively, for the above described services which are included in other liabilities in the accompanying Balance Sheet. The terms of the settlement generally require that these amounts be settled in cash within ninety days.

The Company is the obligor for certain structured settlement agreements with unaffiliated insurance companies, beneficiaries and other non-affiliated entities. To satisfy its obligations under these agreements, the Company owns all rights, title and interest in and to certain single premium annuities issued by New York Life. The carrying value of the annuity contracts is based upon the actuarially determined value of the obligations under the structured settlement contracts, which generally have some life contingent benefits. The obligations are based upon the actuarially determined present value of expected future payments. Interest rates used in establishing such obligations range from 5.32% to 7.81%. The Company has directed New York Life to make the payments under the annuity contracts directly to the payees under the structured settlement agreements. At December 31, 2004 and 2003, the carrying value of the interest in annuity contracts and the obligations under structured settlement agreements in

the accompanying Balance Sheet amounted to \$3,712 million and \$3,306 million, respectively.

In addition, the Company has issued certain annuity contracts to New York Life in order that New York Life may satisfy its third party obligations under certain structured settlement agreements. The Company has been directed by New York Life to make the payments under the annuity contracts directly to the beneficiaries under these structured settlement agreements. At December 31, 2004 and 2003, the amount of outstanding reserves on these contracts included in future policy benefits was \$180 million and \$178 million, respectively.

The Company has a variable product distribution agreement with NYLIFE Distributors, an indirect wholly owned subsidiary of New York Life, granting NYLIFE Distributors the exclusive right to distribute, and be the principal underwriter of the Company's variable product policies. NYLIFE Distributors has an agreement with NYLIFE Securities, another indirect wholly owned subsidiary of New York Life, under which registered representatives of NYLIFE Securities solicit sales of these policies. In connection with this agreement, the Company recorded commission expense to NYLIFE Securities' registered representatives of \$94 million, \$89 million and \$71 million, for the years ended December 31, 2004, 2003 and 2002, respectively.

The Company has a credit agreement with New York Life wherein New York Life can borrow funds from the Company. The maximum amount available to New York Life is \$490 million. No outstanding balance was due to the Company at December 31, 2004 and December 31, 2003.

The Company also has a credit agreement with New York Life in which the Company can borrow up to \$490 million. No outstanding balance was due to New York Life at December 31, 2004 and December 31, 2003. Interest expense for 2004, 2003 and 2002 was less than \$1 million.

NEW YORK LIFE INSURANCE AND ANNUITY CORPORATION
(A WHOLLY OWNED SUBSIDIARY OF NEW YORK LIFE INSURANCE COMPANY)

NOTE 12 -- RELATED PARTY TRANSACTIONS -- (CONTINUED)

As an alternative credit facility to the foregoing credit arrangement with New York Life, on December 23, 2004, the Company entered into a credit agreement with New York Life Capital Corporation, an indirect wholly owned subsidiary of New York Life, in which the Company can borrow up to \$490 million. As of December 31, 2004, a \$233 million outstanding balance was due to New York Life Capital Corporation (with various maturities through February 3, 2005) and is included in other liabilities. Interest expense for 2004 was less than \$1 million.

During August 2003, the Company transferred without recourse several private placement debt securities to Madison Capital Funding LLC ("MCF"). MCF is an indirect wholly owned subsidiary of New York Life. MCF paid for the purchase price of the securities transferred by delivering to the Company promissory notes with terms identical to the securities transferred. At December 31, 2004 and 2003, the Company had recorded a receivable from MCF, included in other assets, of \$5 million and \$23 million, respectively. The Company received interest payments from MCF of \$2 million and less than \$1 million for the years ended December 31, 2004 and 2003, respectively.

Effective July 1, 2002, the Company transferred \$37 million in net assets associated with the Company's Taiwan branch including Taiwan's insurance book of business to an affiliated company, New York Life Insurance Taiwan Corporation ("NYLT"), an indirect wholly owned subsidiary of New York Life.

The Company is jointly liable with NYLT for two years from the giving of notice to all obligees for all matured obligations and for two years after the maturity date of not-yet matured obligations. NYLT is also contractually liable, under indemnification provisions of the transaction, for any liabilities that may be asserted against the Company. The transfer of the branch's net assets was accounted for as a long-duration coinsurance transaction. Under this accounting treatment, the insurance related liabilities remain on the books of the Company and an offsetting reinsurance recoverable is established. Additionally, premiums and benefits associated with any business sold prior to July 1, 2002 are reflected on the Company's Statement of Income. Accordingly, the Company recorded the following with respect to this transaction (in millions):

<Table>
<Caption>

	2004	2003
	-----	----
<S>	<C>	<C>
Amounts recoverable from reinsurers	\$1,021	\$716
Premiums ceded	130	171
Benefits ceded	81	38

</Table>

The Company received a capital contribution of \$500 million in 2003 from its parent company, New York Life.

The Company has issued various Corporate Owned Life policies to New York Life, including \$527 million sold during 2004, for the purpose of informally funding certain benefits for New York Life employees and agents. These policies were issued on the same basis as policies sold to unrelated customers. For the years ended December 31, 2004 and 2003, the Company recorded liabilities of approximately \$1,798 million and \$1,138 million, respectively, which are included in policyholders' account balances and separate account liabilities on the accompanying Balance Sheet.

The Company has also issued various Corporate Owned Life policies to separate Voluntary Employees' Beneficiary Association (VEBA) trusts formed for the benefit of New York Life's retired employees and agents. These policies were issued on the same basis as policies sold to unrelated customers. For the years ended December 31, 2004 and 2003, policyholders' account balances and separate account liabilities related to these policies aggregated \$267 million and \$252 million, respectively.

The Company has an agreement with NYLINK Insurance Agency Incorporated ("NYLINK"), an indirect wholly owned subsidiary of New York Life, granting NYLINK the right to solicit applications for the Company's products through NYLINK's subagents. For the year ended December 31, 2004, the Company recorded commission and fee expense to NYLINK agents of \$7 million.

Effective December 31, 2004, the Company entered into a reinsurance agreement with New York Life (see Note 9 - Reinsurance for more details).

NOTE 13 -- SUPPLEMENTAL CASH FLOW INFORMATION

Income taxes paid were \$98 million, \$173 million and \$30 million during 2004, 2003 and 2002, respectively.

Total interest paid was \$10 million, \$10 million and \$7 million during 2004, 2003 and 2002, respectively.

Non-cash financing activity in 2002 consists of the transfer of \$79 million in net liabilities associated with the Taiwan branch to an affiliated company (see Note 12 - Related Party Transactions).

NOTE 14 -- STATUTORY FINANCIAL INFORMATION

Accounting practices used to prepare statutory financial statements for regulatory filings of life insurance companies differ in certain instances from GAAP. The Delaware Insurance Department (the "Department") recognizes only statutory accounting practices for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Delaware Insurance Law. In making such determinations the Department gives no consideration to financial statements prepared in accordance with accounting principles generally accepted in the United States of America.

At December 31, 2004 and 2003, statutory stockholder's equity was \$2,009 million and \$1,882 million, respectively. Statutory net income/(loss) for the years ended December 31, 2004, 2003 and 2002 was \$224 million, \$20 million and \$(95) million, respectively.

The Company is restricted as to the amounts it may pay as dividends to New York Life. Under Delaware Insurance Law, dividends on capital stock can be distributed only out of earned surplus. Furthermore, without prior approval of the Delaware Insurance Commissioner, dividends cannot be declared or distributed which exceed the greater of ten percent of the Company's surplus or one hundred percent of net gain from operations. No dividends were paid or declared for the years ended December 31, 2004, 2003 and 2002. As of December 31, 2004, the amount of available and accumulated funds derived from earned surplus from which the Company can pay dividends is \$574 million. The maximum amount of dividends that may be paid in 2005 without prior approval is \$228 million.

REPORT OF INDEPENDENT AUDITORS

To the Board of Directors and Stockholder of
New York Life Insurance and Annuity Corporation:

In our opinion, the accompanying balance sheet and the related statements of income, of stockholder's equity and of cash flows present fairly, in all material respects, the financial position of New York Life Insurance and Annuity Corporation (the "Company") at December 31, 2004 and 2003, and the results of

its operations and its cash flows for each of the three years in the period ended December 31, 2004, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
