# Independent accountants' review report

To  
The Board of Directors and Shareholders  
Sadia S.A.  
Concórdia - SC

1. We have reviewed the interim financial information of Sadia S.A. and the consolidated interim financial information of Sadia S.A and its subsidiaries, for the six-month period ended June 30, 2006, which comprises the balance sheets, the income statements, management report and other relevant information, prepared in accordance with the accounting practices adopted in Brazil.
2. Our review was prepared in accordance with the review standards established by IBRACON - Brazilian Institute of Independent Auditors and the Federal Council of Accounting, and included, basically: (a) inquiry and discussion with management responsible for the accounting, financial and operating areas of the Company and its subsidiaries, regarding the main criteria adopted in the preparation of the interim financial information; and (b) review of the information and subsequent events, which have, or may have, a material effect on the financial situation and the operations of the Company and its subsidiaries.
3. Based on our special review, we are not aware of any material change which should be made to the interim financial information above for it to be in accordance with accounting practices adopted in Brazil and regulations issued by the Brazilian Securities Exchange Commission (CVM), specifically applicable to the preparation of interim financial information.

4. Our review was performed with the objective of issuing a review report on the interim financial information referred to in the first paragraph. The statements of cash flows and added value for the period ended June 30, 2006, are being presented in the notes to the interim financial information and have been included to facilitate additional analysis. This supplementary information was subject to the same review procedures as applied to the interim financial information and, we are not aware of any material change which should be made to those statements for them to be in accordance with the accounting practices adopted in Brazil and rules issued by the Brazilian Securities Exchange Commission (CVM).

## Notes to the interim financial information (Unaudited)

### Six-month period ended March 31, 2006

*(In thousands of Reais)*

#### 1. Operations

The Company's main business activities are organized into four operational segments: poultry (chickens and turkeys), pork, processed products and beef. The beef segment was included as from the beginning of this fiscal year as the Company decided to resume to this activity for export. The large production chain permit its products to be commercialized in Brazil and abroad by retailers, small groceries and food service chains.

The Company distributes its products through several sales points in the local market and to countries located in Europe, Middle East, Eurasia, Asia and Americas. The Company has 13 industrial units and 16 distribution centers located within 14 Brazilian states.

The industrially processed products segment has been the principal focus of the Company's investments in recent years and comprises products such as oven-ready frozen food, refrigerated pizzas and pasta, margarine, industrially processed poultry and pork by-products, crumbed products, a diet line, pre-sliced ready-packed products, and desserts (Miss Daisy).

The Company has a corporate governance tier one listing for its shares on the Sao Paulo Stock Exchange, the Madrid Stock Exchange (Latibex) and ADRs negotiated on the New York Stock Exchange (NYSE).

#### 2. Preparation and presentation of the interim financial information

The individual and consolidated interim financial information were prepared in accordance with accounting practices derived from the Brazilian Corporation Law and the rules of the Brazilian Securities Commission - CVM.

## Notes to the interim financial information (Unaudited)

*(In thousands of Reais)*

### **3. Summary of the principal accounting practices**

#### ***a. Income statement***

Income and expenses are recognized on the accrual basis. Revenue from the Company's sales is recognized upon shipment of the products and when the following conditions are met: i) the ownership is transferred and therefore risk of loss has passed to the client; ii) collection is probable; iii) there is evidence of an arrangement; and iv) the sales price is fixed or determinable.

#### ***b. Foreign currency***

Monetary assets and liabilities denominated in foreign currencies were translated into reais at the foreign exchange rate ruling at the balance sheet date. Foreign exchange differences arising on translation are recognized in the income statement for the period.

#### ***c. Accounting estimates***

The preparation of the financial information in accordance with accounting practices adopted in Brazil requires that management uses its judgment in determining and recording accounting estimates. Significant assets and liabilities subject to these estimates and assumptions include the residual value of property, plant and equipment, deferred charges, allowance for doubtful accounts, inventories, deferred tax assets, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to employees' benefits. The settlement of transactions involving these estimates may result in significantly different amounts due to the lack of precision inherent to the process of their determination. The Company reviews the estimates and assumptions periodically.

#### ***d. Long and short-term investments***

Investment funds in local and foreign currency are recorded at market value according to the respective shares price at the date of the interim financial information.

Other long and short-term investments in local and foreign currency are recorded at cost income accrued up to the balance sheet date, not exceeding market value.

## Notes to the interim financial information (Unaudited)

*(In thousands of Reais)*

Additionally, the portion receivable from currency swap contracts is recorded at the difference between the nominal amounts of these contracts and the amounts restated by the variation of the foreign currency, plus interest earned up to the date of the interim financial information.

### ***e. Trade accounts receivable***

Trade accounts receivable are recorded at the amount invoiced and interest is not levied. The allowance for doubtful accounts is the best estimate the Company has and is considered sufficient by management to cover any losses arising on collection of accounts receivable. Accounts receivable are written off against the allowance for doubtful accounts after all means of collection have been exhausted and the possibility of recovery of the amounts receivable is considered remote.

### ***f. Inventories***

Finished goods, livestock (excluding breeders), work-in-progress, raw materials and supplies and others are valued at the lower of cost of acquisition or production (average method), or replacement or realization. The cost of finished goods and work-in-progress includes raw materials acquired, labor, production expenses, transport and storage relating to the purchase and production of inventories. Normal production losses are inventoried and abnormal losses are expensed immediately as cost of goods sold.

### ***g. Investments***

Investments in subsidiaries in Brazil and abroad are valued using the equity method of accounting, based on the respective shareholders' equity valued at the same date and in accordance with accounting practices adopted by the Company.

The financial information of foreign subsidiaries is translated into Brazilian Reais, based on the following criteria:

- Balance sheet accounts at the exchange rate at the end of the period.
- Statement of income accounts at the exchange rate at the end of each month.

Other investments are valued at cost less a provision for devaluation, when applicable.

## Notes to the interim financial information (Unaudited)

*(In thousands of Reais)*

### ***h. Property, plant and equipment***

Property, plant and equipment are recorded at cost of acquisition, formation or construction, including the interest incurred on financing, during the period of construction, modernization and expansion of the industrial units. Expenditures that materially extend the useful lives of existing facilities and equipment are capitalized. Depreciation is calculated using the straight-line method at rates that take into account the estimated useful life of the assets, adjusted in keeping with the work shifts, as disclosed in Note 10. Depletion of forestry resources is calculated based on the extraction of timber and the average costs of the forests.

Breeding stock is recorded at the cost of formation which includes the appropriation of costs of the breeding hens, animal feed, medication and labor. These costs are accumulated for approximately six months until the breeding stock initiates the breeding cycle. From then on, the costs of the breeding stock begin to be amortized by the estimated number of offsprings. The productive cycle ranges from fifteen to thirty months.

### ***i. Impairment of long-lived assets***

The Company reviews its property, plant and equipment to verify possible losses considered permanent, whenever events or changes in circumstances indicate that the carrying amount of an asset or group of assets may not be recoverable based on future cash flows. If these events occur, the reviews will be conducted at the lowest level of groups of assets for which the Company manages to attribute future cash flows. If the carrying amount of an asset is higher than the future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Until now, these reviews have not indicated the need to recognize impairment losses.

### ***j. Deferred charges***

Deferred charges are related to pre-operating costs incurred in the implementation of software, and development of new products and markets, and are amortized on a straight-line basis over 5 years as from the beginning of operation.

## Notes to the interim financial information (Unaudited)

*(In thousands of Reais)*

### ***k. Current and noncurrent liabilities***

Current and noncurrent liabilities are stated at known or estimated amounts, plus related charges and monetary and exchange variations up to the interim financial information date.

### ***l. Provisions***

A provision is recognized in the balance sheet when the Company has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation.

### ***m. Income and social contribution taxes***

The income and social contribution taxes, both current and deferred, are calculated monthly based on taxable income at the rates of 15% plus a surcharge of 10% for income tax and 9% for social contribution and consider the offsetting of tax losses and negative basis of social contribution, limited to 30% of taxable income.

The deferred tax assets were recorded in accordance with CVM Instruction 371/02 and are represented significantly by temporary differences arising from non-deductible provisions, including also tax loss carryforward and negative basis of social contribution.

### ***n. Employees' benefits***

Employees' benefits are recorded based on actuarial studies prepared annually at the end of the year in compliance with CVM Deliberation 371/00.

### ***o. Environmental questions***

Our production facilities and our forestry activities are subject to government environmental regulations. The risks associated with environmental questions are reduced through operational controls and procedures, as well as investments in equipment and systems for pollution control. We believe that no provision for losses related to environmental questions is currently necessary, based on existing Brazilian laws and regulations.

### ***p. Supplementary information***

The statements of cash flows and added value are supplementary to the aforementioned interim financial information and have been included to facilitate additional analysis.

The statements of cash flows have been prepared in accordance with NPC 20 - Statement of Cash Flows, issued by IBRACON (Brazilian Institute of Independent Auditors).

The statements of added value have been prepared in accordance with the model of Fundação Instituto de Pesquisas Contábeis, Atuariais e Financeiras (Institute of Accounting, Actuarial and Financial Research) of the University of Sao Paulo, which have the objective of demonstrating the value of the wealth generated by the Company and its distribution among the elements that contributed to its generation.

### ***q. Consolidated financial information***

The transactions and balances between the Parent Company and its subsidiaries included in the consolidation process have been eliminated and the non-realized profit arising from the sales to the subsidiaries were excluded and incorporated into the inventory balances at the end of each period. Minority interests were excluded from shareholders' equity and net income and are presented separately in the consolidated balance sheets and income statements.

In the case of joint ventures, the assets, liabilities and shareholders' equity and the result for the period were consolidated in proportion to the percentage of ownership.

In accordance with the CVM Instruction 408/04, the Company consolidated the interim financial information of its investment funds Concórdia Foreign Investment Fund Class A and Taurus Fund Limited, where it is the wholly owned investment holder. These investment funds have the sole purpose of centralizing the foreign investment fund portfolio, delegating to third party the administrative functions and maximizing shareholder returns. As of June 30, 2006 and March 31, 2006, these investment funds were consolidated in the Company's financial information as they had loans collateralized by its own financial assets.

## Notes to the interim financial information (Unaudited)

*(In thousands of Reais)*

The Company and its subsidiaries abroad (Sadia International Ltd and Wellax Food Comércio de Produtos Alimentares Lda.) entered into an agreement for sale of its receivables with an outside financial institution up to the maximum amount of US\$130 million, with interest rate of 0.375% p.a. + LIBOR.

As of June 30, 2006, the amount of receivables sold under this agreement amounted to approximately R\$250 million (R\$239 million as of March 31, 2006). During the period ended June 30, 2006, the Company received cash proceeds of approximately R\$912 million (R\$862 million for the period ended June 30, 2006) and incurred expenses of R\$6 million (R\$3.5 million in 2005) with respect to this agreement.

A credit insurance policy covering 90% of the value of the receivables was taken out with third parties and the beneficiaries in the event of default are the contracting financial institutions.

The Company also assigned local receivables to a Credit Assignment Investment Fund (FIDC), administered by Concórdia S.A. Corretora de Valores Móbiliarios, Cambio e Commodities. As of June 30, 2006, the net equity of this fund was R\$ 245,540 (R\$ 238,536 at March 31, 2006), of which R\$ 167,124 (R\$ 135,100 at March 31, 2006) was represented by acquisitions of the Company's receivables on the domestic market, with a discounted cost equivalent to 95% of the CDI per senior quota. The assignment of the receivables is made without right of recourse, and the eventual losses from default for Sadia are limited to the value of the subordinated quotas, which at June 30, 2006, represented R\$ 48,366 (R\$ 48,381 at March 31, 2006).

During the period ended June 30, 2006, the Company received cash proceeds related to the local receivables sold of approximately R\$1,324 million (R\$1,186 million for the period ended June 30, 2006) and incurred expenses of R\$17 million (R\$11 million in 2005) with respect to this agreement.

### Contingencies

The Company and its subsidiaries have several on going claims of a labor, civil and tax nature, resulting from normal business activities. The respective provisions for contingencies were constituted based on the opinion of the Company's legal counsel, which considered that unfavorable outcomes are likely.

The Company's management believes that the provision for contingencies shown below is sufficient to cover losses arising from legal proceedings.

### ***Tax litigation***

**The main tax contingencies involve the following cases:**

#### ***a. Income and social contribution taxes on net income***

Provision for income and social contribution taxes on net income amounting to R\$12,475, of which R\$4,000 recorded on the acquisition of the subsidiary Granja Rezende (incorporated in 2002), R\$4,000 withholding income tax on investments of Granja Rezende and R\$1.642 for other provisions.

#### ***b. Sales TAX (ICMS)***

The Company is a defendant in several administrative cases involving ICMS, mainly in the States of São Paulo, Rio de Janeiro and Amazonas (SUFRAMA), totaling a probable contingency estimated at R\$20,644.

#### ***c. Other tax contingencies***

Several cases related to payment of IOF (Tax on Financial Operations), PIS (Social Integration PIS Tax), COFINS (Tax for Social Security Financing) and others totaling a probable loss of R\$10,200.

The Company has other tax contingencies where the claimed amount is R\$371,000, which were assessed as possible losses by the Company's legal counsel and management and, therefore, no provision was recorded.

On November 9, 2005, the Supreme Court declared by a majority of votes that Law 9718/98 is unconstitutional, which changed the calculation basis of PIS and COFINS, including operating and financial income. This decision affects only the taxpayers whose actions have been judged, however, this decision indicates that the court suits that have the same objective will also be successful. The Company's court suit questioning the increase in the basis, however, it has been calculating and paying these taxes in accordance with the law. If the Company had already received a final decision, the credit to be recorded in the financial statements would be approximately R\$90,000.

The Management considers that the deferred assets arising from temporary differences will be realized in proportion to the final solution of the contingencies and to the payment of the liabilities forecast for the employees' benefit plans.

The deferred tax assets related to the income tax loss carryforwards and negative basis of social contributions represented by R\$64,238 of Parent and R\$10,666 from a foreign subsidiary will be realized based on the

taxable income on such companies. Management estimates that the deferred tax asset related to the P will be fully realized during this year and the deferred tax asset related to the foreign subsidiary will realized within three years.

### **21 Risk management and financial instruments**

The Company's operations are exposed to market risks, principally in relation to exchange rate variations, interest rate risk and grain purchase prices. These risks are monitored by the Risk Management Area that uses a system to calculate the "VAR -Value at Risk, Stress Test and Back Testing", and permanently monitored by the finance committee, composed of members of the Board of Directors and other finance executives of the Company, who are responsible for defining the Board's risk management strategy by determining the position and exposure limits. In June 30, 2006 the Value at Risk (VAR) of the financial assets and liabilities, for one year, with a 95% of confidence rating, represents R\$58,987, representing 2.61% of the equity (not reviewed by auditors).

#### ***a. Exchange rate and interest risk***

The exchange rate risk for loans, financing and any other payables denominated in foreign currency is hedged by short-term investments denominated in foreign currency, with same interest rates, and derivative financial instruments, such as rate swaps (dollar to CDI), interest rate swap contracts (dollar to CDI pre-fixed or vice-versa) and future market agreements, in addition to foreign receivables from exports, which also reduce exchange variations by serving as a "natural hedge".

The Company, within its hedge strategy, uses currency futures contracts (US dollars, Euros and Pounds) as a form of mitigating exchange rate risk over operating and financial assets and liabilities. The notional amounts of these contracts are not recorded in the financial statements.

The result realized from the futures contracts in the period ended June 30, 2006, generated a gain of R\$22,487 (R\$101,399 in the same period of 2005), recorded as financial results in positive exchange rate variances.

*(In thousands of Reais)*

The results of the operations in the currency futures market, realized and not financially settled, and the adjustments of currency futures contracts of the Future and Commodities Exchange - BM& F are recorded in the interim financial information as "Amounts receivable from futures contracts" and "Amounts payable for futures contracts".

Unearned income from contracted operations with future maturities is not recognized in the financial information. The market value of these contracts, if they were settled at June 30, 2006, would generate a loss of approximately R\$50,050.

The Company's exposure to exchange variation (mainly in US dollars) is shown below:

	<b>Consolidated</b>	
	<b>June 30, 2006</b>	<b>March 31, 2006</b>
