WHICH BOSTON 1784 MONEY MARKET FUND
IS RIGHT FOR YOU?

BOSTON 1784 U.S. TREASURY MONEY MARKET FUND--
FOR RELATIVELY LOW RISK.

[SQUARE BULLET] Stability and safety are very important to you.

[SQUARE BULLET] You want the opportunity to earn a higher yield than bank
savings and money market deposit accounts.

This Fund invests in U.S. Treasury and related securities. U.S. Treasury securities are among the safest investments because they are backed by the full faith and credit of the U.S. government. As the graph below shows, the Fund's yields have typically been higher than that of bank deposit products such as bank money market deposit accounts, which usually pay the highest short-term rates of any bank account.

BOSTON 1784 PRIME MONEY MARKET FUND--
FOR HIGHER YIELD POTENTIAL.

[SQUARE BULLET] Higher yield potential is important to you.

[SQUARE BULLET] You don't mind taking more risk than a fund that invests
primarily in government securities.

Because this Fund invests in short-term bank and corporate obligations, it may earn a higher yield than a fund that invests solely in lower-risk government securities. The graph below shows how yields of Boston 1784 Prime Money Market Fund have compared with the yields of Boston 1784 U.S. Treasury Money Market Fund.

WHAT ARE THE FUNDS' GOALS?

TAX-FREE MONEY MARKET FUND

The Tax-Free Money Market Fund's goals are to preserve the principal value of a shareholder's investment and maintain a high degree of liquidity while providing current income that is exempt from federal income tax.

U.S. TREASURY MONEY MARKET FUND

INSTITUTIONAL U.S. TREASURY MONEY MARKET FUND

PRIME MONEY MARKET FUND

INSTITUTIONAL PRIME MONEY MARKET FUND

The Funds' goals are to preserve the principal value of a shareholder's investment and to maintain a high degree of liquidity while providing current income.

WHAT IS A MONEY MARKET FUND?

A MONEY MARKET FUND is a type of mutual fund that tries to maintain a share price of \$1.00 while paying income to its shareholders. A stable share price protects your investment from loss ("PRESERVATION OF PRINCIPAL"). If you need to sell your shares at any time, you should receive your initial investment plus any income that you have earned (thereby providing "LIQUIDITY"). However, a money market fund does not guarantee that you will receive your money back.

A money market fund must follow strict rules as to the investment quality, maturity, diversification and other features of the securities it purchases, and the average remaining maturity of the securities cannot be greater than 90 days. The remaining maturity of a security is the period of time until the principal amount must be repaid.

BOSTON 1784 MONEY MARKET FUNDS

[CHES ART OMITTED]
WHAT ARE THE FUNDS' MAIN INVESTMENT STRATEGIES?

TAX-FREE MONEY MARKET FUND

The Tax-Free Money Market Fund invests primarily in short-term municipal securities, which are debt securities issued by states, cities and towns and other political or public entities or agencies. The interest paid on these debt securities is free from federal income tax.

The Fund may also enter into repurchase agreements and invest in limited amounts in securities paying interest that is not free from federal taxes.

U.S. TREASURY MONEY MARKET FUND

The U.S. Treasury Money Market Fund invests primarily in short-term U.S. government obligations including Treasury securities, U.S. government agency securities and repurchase agreements secured by U.S. government securities.

INSTITUTIONAL U.S. TREASURY MONEY MARKET FUND

The Institutional U.S. Treasury Money Market Fund invests primarily in short-term U.S. government obligations, including Treasury securities, U.S. government agency securities and repurchase agreements secured by U.S. government securities.

PRIME MONEY MARKET FUND

The Prime Money Market Fund invests primarily in high quality short-term debt obligations, including commercial paper, asset-backed commercial paper, corporate bonds, U.S. government agency obligations, taxable municipal securities and repurchase agreements.

INSTITUTIONAL PRIME MONEY MARKET FUND

The Institutional Prime Money Market Fund invests primarily in high quality short-term debt obligations, including commercial paper, asset-backed commercial paper, corporate bonds, U.S. government agency obligations, taxable municipal securities and repurchase agreements.

WHAT ARE U.S. GOVERNMENT OBLIGATIONS?

U.S. GOVERNMENT OBLIGATIONS or securities are bonds or other debt obligations issued by, or whose principal and interest are guaranteed by, the U.S. government or one of its agencies or instrumentalities. U.S. Treasury securities and some obligations of U.S. government agencies and instrumentalities are supported by the "full faith and credit" of the United States. Some U.S. government obligations are backed by the right of the issuer to borrow from the U.S. Treasury and others only by the credit of the issuing agency or instrumentality. U.S. government obligations generally have less credit risk than other debt obligations.

YOU CAN FIND MORE INFORMATION ABOUT THE FUNDS' INVESTMENTS IN THE FUNDS' ANNUAL AND SEMI-ANNUAL REPORTS TO SHAREHOLDERS. IN ADDITION, THE FUNDS' ANNUAL REPORT CONTAINS A DISCUSSION OF THE MARKET CONDITIONS AND INVESTMENT STRATEGIES THAT SIGNIFICANTLY AFFECTED THE FUNDS' PERFORMANCE DURING THE LAST FISCAL YEAR. YOU MAY OBTAIN THESE REPORTS AT NO COST BY CALLING 1-800-BKB-1784.

[SIGN ART OMITTED]
WHAT ARE THE MAIN RISKS OF INVESTING IN THE FUNDS?

The principal risks of investing in the Money Market Funds and the circumstances reasonably likely, in the opinion of the Adviser, to affect your investment adversely are described below. Please note that there are many other factors that could adversely affect your investment, and that could prevent a Fund from achieving its objectives, which are not described here. The principal risks are:

- [BULLET] The rate of income will vary from day to day depending on short-term interest rates.
- [BULLET] It is possible that a major change in interest rates or a default on a security or a repurchase agreement held by a Fund could cause the value of your investment to decline.
- [BULLET] Each Money Market Fund may invest up to 5% of its total assets in zero coupon securities called STRIPS, which are the separately traded interest and principal component parts of U.S. Treasury securities. The interest-only component is extremely sensitive to the rate of principal payments on the underlying obligation. The market value of the principal-only component generally is unusually volatile in response to changes in interest rates.
- [BULLET] An investment in a Fund is not a deposit of BankBoston and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.
- [BULLET] Although the Funds seek to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Funds.
