AllianzGI Redwood Fund

(formerly Allianz RCM Redwood Fund)

Before you invest, you may want to review the Fund's statutory prospectus, which contains more information about the Fund and its risks. You can find the Fund's statutory prospectus and other information about the Fund, including its statement of additional information (SAI) and most recent reports to shareholders, online at www.allianzinvestors.com/prospectuses. You can also get this information at no cost by calling 1-800-498-5413 or by sending an email request to Orders@MySummaryProspectus.com. This Summary Prospectus incorporates by reference the Fund's entire statutory prospectus and SAI, each dated April 2, 2012, as revised or supplemented from time to time.

Investment Objective

The Fund seeks long-term capital appreciation with a high degree of downside protection and reduced volatility relative to the broad U.S. equity market.

Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Share Class	Management Fees	Distribution and/or Service (12b-1) Fees	Other Expenses	Total Annual Fund Operating Expenses	Expense Reductions(1)	Total Annual Fund Operating Expenses After Expense Reductions(1)
Institutional	1.00%	None	3.69%	4.69%	(3.29)%	1.40%
Class P	1.00	None	4.23	5.23	(3.73)	1.50
Class D	1.00	0.25 %	4.67	5.92	(4.17)	1.75

Total Annual Fund Operating Expenses After Expense Reductions reflect the effect of a contractual agreement by the Manager to irrevocably waive its management fee and/or reimburse the Fund through March 31, 2013 to the extent that Total Annual Fund Operating Expenses, including payment of organizational and offering expenses but excluding interest, tax, and extraordinary expenses, and certain credits and other expenses, exceed 1.40% for Institutional Class shares, 1.50% for Class P shares and 1.75% for Class D shares. Under the Expense Limitation Agreement, the Manager may recoup waived or reimbursed amounts for three years, provided total expenses, including such recoupment, do not exceed the annual expense limit.

Examples. The Examples are intended to help you compare the cost of investing in shares of the Fund with the costs of investing in other mutual funds. The Examples assume that you invest \$10,000 in the noted class of shares for the time periods indicated, your investment has a 5% return each year, and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, the Examples show what your costs would be based on these assumptions. The Examples are based, for the first year, on Total Annual Fund Operating Expenses After Expense Reductions and, for all other periods, on Total Annual Fund Operating Expenses.

Share Class	1 Year	3 Years	5 Years	10 Years
Institutional	\$143	\$1,117	\$2,098	\$4,577
Class P	153	1,233	2,308	4,974
Class D	178	1,389	2,578	5,456

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). The Fund's portfolio turnover rate from its inception on December 27, 2010 through the end of its fiscal year on November 30, 2011

was 107%. High levels of portfolio turnover may indicate higher transaction costs and may result in higher taxes for you if your Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Examples above, can adversely affect the Fund' s investment performance.

Principal Investment Strategies

The Fund seeks to achieve its objective under normal circumstances by primarily investing in in-the-money (ITM) ~~buy-writes on U.S. equities and writing out-of-the-money put~~ options on U.S. equities. Buy-writes represent the combination of a long equity position and the sale of a call option against that equity position. In

analyzing specific buy-writes for possible investment, the portfolio managers ordinarily look for protection down to a ~~fundamentally derived estimate of "intrinsic value," as~~ described below; attractive potential return relative to risk; and an appropriate correlation between the time to expiration and the estimate of intrinsic value.

AllianzGI Redwood Fund

Based on fundamental research, the portfolio managers estimate the potential downside volatility (the “intrinsic value” level) of each equity security under consideration for the Fund’s buy-write portfolio. The strike price of the call options is usually set at or below the estimated intrinsic value level of the securities against which they are sold and the time to expiration of the options that the Fund sells varies. The Fund may also write (sell) in-the-money call options on equity indexes and/or exchange traded funds and may write call options on individual securities that it does not hold in its portfolio (*i.e.*, “naked” call options). With respect to any long equity position held by the Fund, the Fund may write call options on a greater or lesser number of shares than it holds. To the extent that call options are written on greater than 100% of the position, this would represent naked call option exposure. However, with respect to any naked call option exposure, the fund will segregate liquid assets in an amount equal to its daily exposure under the contract or enter into offsetting positions.

When writing out-of-the-money put options, the Fund typically sets the strike price at or below the estimated intrinsic value level of the securities on which the options are written. The fund typically uses out-of-the-money put options to achieve similar goals as the buy-writes in which it invests. The issuers of equity securities purchased by the Fund will primarily have market capitalizations in excess of \$2 billion. The Fund may invest in companies located within or outside the United States (including companies organized or headquartered in emerging market countries). The Fund is not limited in the percentage of assets it may invest in any one country, region or geographic area. The Fund may invest in initial public offerings (IPOs) and in exchange-traded funds. In addition to common stocks and other equity securities (such as preferred stocks, convertible securities and warrants) and equity-related instruments, the Fund may utilize foreign currency exchange contracts, options, stock index futures contracts and other derivative instruments.

Principal Risks

The Fund’s net asset value, yield and total return will be affected by the allocation determinations, investment decisions and techniques of the Fund’s management, factors specific to the issuers of securities and other instruments in which the Fund invests, including actual or perceived changes in the financial condition or business prospects of such issuers, and factors influencing the U.S. or global economies and securities markets or relevant industries or sectors within them (**Management Risk, Issuer Risk, Market Risk**). Equity securities may react more strongly to changes in an issuer’s financial condition or prospects than other securities of the same issuer, and securities issued by smaller companies may be more volatile and present increased liquidity risk (**Equity Securities Risk, Smaller Company Risk**). Derivative instruments are complex, have different characteristics than their underlying assets and are subject to additional risks, including leverage, liquidity and valuation risk (**Derivatives Risk**). Other principal risks include: **Credit Risk** (an issuer or counterparty may default on obligations); **Non-U.S. Investment Risk, Emerging Markets Risk, Currency Risk** (non-U.S. securities markets and issuers may be more volatile, smaller, less-liquid, less

transparent and subject to less oversight, particularly in emerging markets, and non-U.S. securities values may also fluctuate with currency exchange rates); **Focused Investment Risk** (focusing on a limited number of issuers, sectors, industries or geographic regions increases risk and volatility); **IPO Risk** (securities purchased in initial public offerings have no trading history, limited issuer information and increased volatility); **Leveraging Risk** (instruments and transactions that constitute leverage magnify gains or losses and increase volatility); **Liquidity Risk** (the lack of an active market for investments may cause delay in disposition or force a sale below fair value); and **Turnover Risk** (high levels of portfolio turnover increase transaction costs and taxes and may lower investment performance). Please see “Summary of Principal Risks” in the Fund’s statutory prospectus for a more detailed description of the Fund’s risks. It is possible to lose money on an investment in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

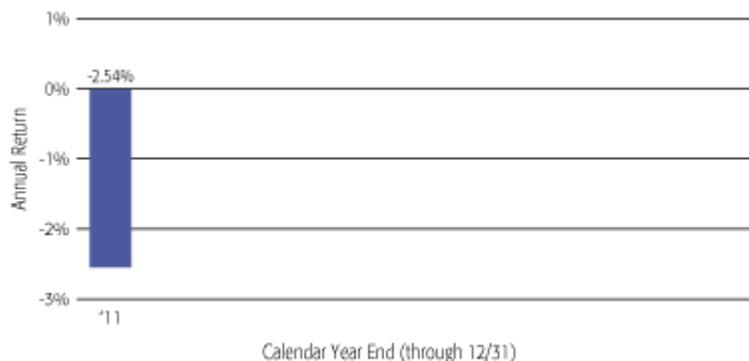

Performance Information

The performance information below provides some indication of the risks of investing in the Fund by showing changes in its total return from year to year and by comparing the Fund’s average annual total returns with those of two broad-based market indexes and a performance average of similar mutual funds. The bar chart and the information to its right show performance of the Fund’s Institutional

Class shares. Class P and Class D performance would be lower than Institutional Class performance because of the lower expenses paid by Institutional Class shares. *Past performance, before and after taxes, is not necessarily predictive of future performance.* Visit www.allianzinvestors.com for more current performance information.

Summary Prospectus

Lipper Equity Market Neutral Funds Average	-0.20%	-0.20%

After-tax returns are estimated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. After-tax returns are for Class A shares only. After-tax returns for other share classes will vary.

Management of the Fund

Investment Manager

Allianz Global Investors Fund Management LLC

Sub-Adviser

RCM Capital Management LLC ("RCM")

Portfolio Managers

Todd G. Hawthorne, Director and Portfolio Manager, has managed the Fund since its inception in 2010.

Raphael L. Edelman, Director and Senior Portfolio Manager, has managed the Fund since its inception in 2010.

Purchase and Sale of Fund Shares

You may purchase or sell (redeem) shares of the Fund on any business day through a broker, dealer, or other financial intermediary, or directly from the Fund's transfer agent by mail (Allianz Institutional Funds, P.O. Box 219968, Kansas City, MO 64121-9968), as further described in the Fund's statutory prospectus and SAI. To avoid delays in a purchase or redemption, please call 1-800-498-5413 with any questions about the requirements before submitting a request. Generally, purchase and redemption orders for Fund shares are processed at the net asset value (NAV) next

Summary Prospectus

determined only on days when the New York Stock Exchange is open for regular trading. For Institutional Class and Class P shares, the minimum initial investment in the Fund is \$1 million, though minimums may be modified for certain financial intermediaries that aggregate trades on behalf of investors. For Class D shares, the minimum initial investment in the Fund is \$1,000 and the minimum subsequent investment is \$50, though financial service firms offering these shares may impose different minimums.

Tax Information

The Fund's distributions are generally taxable to you as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund, its distributor, its investment manager or their affiliates may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or intermediary and your salesperson to recommend the Fund over another

calculated after an order is received by the distributor or an authorized intermediary. NAVs are

investment. Ask your salesperson or visit your financial intermediary's Web site for more information.

Summary Prospectus April 2, 2012
(as revised January 28, 2013)

AllianzGI Redwood Fund

(formerly Allianz RCM Redwood Fund)

Before you invest, you may want to review the Fund's statutory prospectus, which contains more information about the Fund and its risks. You can find the Fund's statutory prospectus and other information about the Fund, including its statement of additional information (SAI) and most recent reports to shareholders, online at www.allianzinvestors.com/prospectuses. You can also get this information at no cost by calling 1-800-988-8380 or by sending an email request to Orders@MySummaryProspectus.com. This Summary Prospectus incorporates by reference the Fund's entire statutory prospectus and SAI, each dated April 2, 2012, as revised or supplemented from time to time.

Investment Objective

The Fund seeks long-term capital appreciation with a high degree of downside protection and reduced volatility relative to the broad U.S. equity market.

Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Class A Shares of eligible funds that are part of the family of mutual funds sponsored by Allianz. More information about these and other discounts is available in the "Classes of Shares" section beginning on page 200 of the Fund's statutory prospectus or from your financial advisor.

Shareholder Fees (fees paid directly from your investment)

Share Class	Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	Maximum Contingent Deferred Sales Charge (CDSC) (Load) (as a percentage of the lower of original purchase price or NAV) ⁽¹⁾
Class A	5.50 %	1 %
Class C	None	1 %

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Share Class	Management Fees	Distribution and/or Service (12b-1) Fees	Other Expenses	Total Annual Fund Operating Expenses	Expense Reductions ⁽²⁾	Total Annual Fund Operating Expenses After Expense Reductions ⁽²⁾
Class A	1.00%	0.25%	3.62%	4.87%	(3.27)%	1.60%
Class C	1.00	1.00	3.77	5.77	(3.27)	2.50

⁽¹⁾ For Class A shares, the CDSC is imposed only in certain circumstances where shares are purchased without a front-end sales charge at the time of purchase. For Class C shares, the CDSC is imposed only on shares redeemed in the first year.

Total Annual Fund Operating Expenses After Expense Reductions reflect the effect of a contractual agreement by the Manager to irrevocably waive its management fee and/or reimburse the Fund through March 31, 2013 to the extent that Total Annual Fund Operating Expenses, including payment of organizational and offering expenses but excluding interest, tax, and extraordinary expenses, and certain credits and other expenses, exceed 1.60% for Class A shares and 2.50% for Class C shares. Under the Expense Limitation Agreement, the Manager may recoup waived or reimbursed amounts for three years, provided total expenses, including such recoupment, do not exceed the annual expense limit.

Examples. The Examples are intended to help you compare the cost of investing in shares of the Fund with the costs of investing in other mutual funds. The Examples assume that you invest \$10,000 in the noted class of shares for the time periods indicated, your investment has a 5% return each year, and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, the Examples show what your costs would be based on these assumptions. The Examples are based, for the first year, on Total Annual Fund Operating Expenses After Expense Reductions and, for all other periods, on Total Annual Fund Operating Expenses.

Example: Assuming you redeem your shares at the end of each period

Example: Assuming you do not redeem your shares

Share Class	1 Year	3 Years	5 Years	10 Years	1 Year	3 Years	5 Years	10 Years
Class A	\$704	\$1,657	\$2,612	\$5,012	\$704	\$1,657	\$2,612	\$5,012
Class C	353	1,427	2,583	5,395	253	1,427	2,583	5,395

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). The Fund’s portfolio turnover rate from its inception on December 27, 2010 through the end of its fiscal year on November 30, 2011 was 107%. High levels of portfolio turnover may indicate higher transaction costs and may result in higher taxes for you if your Fund shares are held in a taxable account.

AllianzGI Redwood Fund

These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Examples above, can adversely affect the Fund's investment performance.

Principal Investment Strategies

The Fund seeks to achieve its objective under normal circumstances by primarily investing in in-the-money (ITM) buy-writes on U.S. equities and writing out-of-the-money put options on U.S. equities. Buy-writes represent the combination of a long equity position and the sale of a call option against that equity position. In analyzing specific buy-writes for possible investment, the portfolio managers ordinarily look for protection down to a fundamentally derived estimate of "intrinsic value," as described below; attractive potential return relative to risk; and an appropriate correlation between the time to expiration and the estimate of intrinsic value. Based on fundamental research, the portfolio managers estimate the potential downside volatility (the "intrinsic value" level) of each equity security under consideration for the Fund's buy-write portfolio. The strike price of the call options is usually set at or below the estimated intrinsic value level of the securities against which they are sold and the time to expiration of the options that the Fund sells varies. The Fund may also write (sell) in-the-money call options on equity indexes and/or exchange traded funds and may write call options on individual securities that it does not hold in its portfolio (i.e., "naked" call options). With respect to any long equity position held by the Fund, the Fund may write call options on a greater or lesser number

of shares than it holds. To the extent that call options are written on greater than 100% of the position, this would represent naked call option exposure. However, with respect to any naked call option exposure, the fund will segregate liquid assets in an amount equal to its daily exposure under the contract or enter into offsetting positions. When writing out-of-the-money put options, the Fund typically sets the strike price at or below the estimated intrinsic value level of the securities on which the options are written. The fund typically uses out-of-the-money put options to achieve similar goals as the buy-writes in which it invests. The issuers of equity securities purchased by the Fund will primarily have market capitalizations in excess of \$2 billion. The Fund may invest in companies located within or outside the United States (including companies organized or headquartered in emerging market countries). The Fund is not limited in the percentage of assets it may invest in any one country, region or geographic area. The Fund may invest in initial public offerings (IPOs) and in exchange-traded funds. In addition to common stocks and other equity securities (such as preferred stocks, convertible securities and warrants) and equity-related instruments, the Fund may utilize foreign currency exchange contracts, options, stock index futures contracts and other derivative instruments.

Principal Risks

The Fund's net asset value, yield and total return will be affected by the allocation determinations, investment decisions and techniques of the Fund's management, factors specific to the issuers of securities and other instruments in which the Fund invests, including actual or perceived changes in the financial condition or business prospects of such issuers, and factors influencing the U.S. or global economies and securities markets or relevant industries or sectors within them (**Management Risk, Issuer Risk, Market Risk**). Equity securities may react more strongly to changes in an issuer's financial condition or prospects than other securities of the same issuer, and securities issued by smaller companies may be more volatile and present increased liquidity risk (**Equity Securities Risk, Smaller Company Risk**). Derivative instruments are complex, have different characteristics than their underlying assets and are subject to additional risks, including leverage, liquidity and valuation risk (**Derivatives Risk**). Other principal risks include: **Credit Risk** (an issuer or counterparty may default on obligations); **Non-U.S. Investment Risk, Emerging Markets Risk, Currency Risk** (non-U.S. securities markets and issuers may be more volatile, smaller, less-liquid, less

transparent and subject to less oversight, particularly in emerging markets, and non-U.S. securities values may also fluctuate with currency exchange rates); **Focused Investment Risk** (focusing on a limited number of issuers, sectors, industries or geographic regions increases risk and volatility); **IPO Risk** (securities purchased in initial public offerings have no trading history, limited issuer information and increased volatility); **Leveraging Risk** (instruments and transactions that constitute leverage magnify gains or losses and increase volatility); **Liquidity Risk** (the lack of an active market for investments may cause delay in disposition or force a sale below fair value); and **Turnover Risk** (high levels of portfolio turnover increase transaction costs and taxes and may lower investment performance). Please see "Summary of Principal Risks" in the Fund's statutory prospectus for a more detailed description of the Fund's risks. It is possible to lose money on an investment in the Fund.
