World's Largest Law Firm Expands Deployment of LegalKEY Enterprise  
Records Management Solution for Law Firms

International law firm, Clifford Chance, ensures records management  
consistency for global teams by extending practice support  
system and upgrading to latest version at UK office

Toronto - April 4, 2005 - Hummingbird Ltd. (NASDAQ: HUMC, TSX: HUM), a leading global provider of integrated enterprise content management (ECM) solutions, today announced that Clifford Chance, the world's largest global law firm, has successfully completed an upgrade of LegalKEY Enterprise Records Management (RM) solution at its Canary Wharf office in the UK. The latest version offers enhanced features and extensive integration capabilities for more flexibility and improved efficiencies. The firm's most recent implementation follows a successful roll-out of the robust and feature-rich RM solution at its New York office.

Clifford Chance recognized the need for a strong records management system if they were to achieve business efficiencies in the future. "Records management had to move forward in the UK and become a key element in developing strong and secure systems for knowledge and information," said Trevor Hughes, Records Manager, Clifford Chance in the UK. "The Records Management team provides a core service to a law firm, and a global leader like Clifford Chance needed a strong RM process and solution."

In 2002, LegalKEY was installed at the London Office. Pivotal to the project success was a massive data clean-up of all data held in existing practice management systems at the firm. It took several months to clean-up all the records held in the various systems, and once this was completed the team needed to migrate the data into the new LegalKEY RM solution.

The result was a great success. "The support and commitment that we received from the LegalKEY team was invaluable," said Hughes. "Without their commitment and their understanding of the legal market and Records Management, the project would not have come in on time or gone so well."

In 2003, when Clifford Chance moved their entire UK office to Canary Wharf, the Records Management team had to clear 500,000 square feet of office space in a 12-month timeframe. In that time, they had to keep most papers and documents active and move active files to archive. "We cleared around 70,000 boxes of documents in 12 months," continued Hughes. "That's over 300,000 folders, and more than twice what we would normally clear in 12 months. We couldn't have achieved that without a strong records management solution in place."

The recent upgrade delivers significant business benefits to Clifford Chance. The team can search for files using an infinite amount of text against any record and the system will provide comprehensive lists, making documents easier to find and retrieve. Records can be traced much more quickly since each one is attributed to a specific lawyer and all history can be recorded down to specific lawyer level.

The records management system allows a vast array of reports to be produced, including activity histories, enabling Records administrators at the firm to make more informed decisions concerning record retention policies and procedures. The system is designed to minimize risk and to accommodate multi-tiered retention and destruction policies and risk management protocols.

#### Looking Ahead

Clifford Chance recognizes that good practice in records keeping is a high priority, and the firm intends to utilize Hummingbird as a prime contributor to its future information and document management solutions. "LegalKEY is the perfect tool for the future of Records Management at Clifford Chance," said Hughes. "With it we can enhance the firm's operations and be of great benefit to the firm - significantly helping to move our business forward."

"The combination of the LegalKEY practice support suite and Hummingbird Enterprise(TM) delivers unrivalled value to our global legal customers," said Yuri Frayman, Vice President, Legal Vertical Solutions, Hummingbird Ltd. "We are looking forward to continued success in enhancing matter lifecycle management practices at Clifford Chance."

#### About Clifford Chance

Clifford Chance Limited Liability Partnership is the first fully integrated global law firm, with 29 offices in 19 countries. The firm aims to provide seamless global services to the world's leading financial institutions and multinational businesses. Unrivalled in its international resources, Clifford Chance has over 3,300 legal advisers and is organised around six global practice areas: capital markets; corporate (including M&A); finance; litigation and dispute resolution; real estate; and tax, pensions and employment law.

#### About LegalKEY(R) Enterprise Records Management System

From a single interface, the LegalKEY Enterprise Records Management System provides for complete management of all electronic and physical information related to a client/matter file, regardless of source of origin or media type, including e-mail, document management files, images, voice mail and fax. Standard features include full text indexing of e-mails, e-mail attachments and documents created within document management systems, retention that allows for content groupings and powerful multi-level approvals, complete viewing of a matter file from a single screen, flexible searching and reporting, circulation management using barcode technology, automatic generation of labels, collective "boxing," and inactive records management.

The LegalKEY product suite includes Enterprise Records Management, Conflicts Management, New Business Intake, Critical Dates Management and Relationship

Management systems -- all fully integrated to enable consistent creation, use and maintenance of client/matter information.

#### About Hummingbird Enterprise(TM)

Hummingbird Enterprise provides an integrated platform for enterprise content management that provides global organizations with solutions to manage business interaction information such as documents, records, virtual deal room exchanges, discussions, email or financial data - linking business processes, information and people. Hummingbird solutions are designed as modular applications that are fully interoperable with each other, enabling customers to incrementally build an enterprise content management solution to meet their evolving information needs in a cost effective manner.

#### Hummingbird Updates Second Quarter FY2005 Financial Outlook

Toronto - April 8, 2005 - Hummingbird Ltd. (NASDAQ: HUMC, TSX: HUM), a leading global provider of integrated enterprise content management (ECM) solutions, today provided a revised outlook for its second quarter results for the period ending March 31, 2005. Hummingbird expects revenue for the second quarter of fiscal 2005 to be approximately US\$54 to US\$54.5 million. The Company expects adjusted diluted earnings per share to be approximately US\$20 to 22 cents. With its continued focus on driving operational efficiencies, Hummingbird expects to maintain its strong profitability.

Barry Litwin, President and Chief Executive Officer of Hummingbird said, "Our

projected results for the second quarter reflect a modest shortfall in revenue on the Connectivity side of our business. In spite of the shortfall we remain profitable and continue to grow our Enterprise Content Management business, which now represents approximately 70% of our total revenue base. We remain very confident in the continued positive growth prospects for our business."

Hummingbird has scheduled a Second Quarter Financial Update conference call on Monday April 11, 2005 at 8:30 a.m. EST. To participate in the teleconference, please call 416-850-1243 (Toll-Free 800-814-4857) 10 minutes ahead of the scheduled start time. To listen to the conference call replay dial 416-640-1917 (Toll-Free 877-289-8525), Passcode: 21121099#

Hummingbird plans to release its financial results for the second quarter ending March 31, 2005 after market close on April 26, 2005 and will provide a further update at that time.

Hummingbird Announces Web Seminar Series for the  
Financial Services Sector

Five-part series showcases Hummingbird Enterprise(TM) solutions that help organizations meet regulatory compliance, improve corporate governance, increase operational effectiveness and gain a competitive advantage

Toronto - April 18, 2005 - Hummingbird Ltd. (NASDAQ: HUMC, TSX: HUM), a leading global provider of integrated enterprise content management (ECM) solutions, today announced that it will present a five-part Web seminar series on Hummingbird Enterprise(TM) solutions for the financial services sector. Beginning April 28th, the five-part series will feature key Hummingbird executives, from both North America and the UK, who will discuss Hummingbird's suite of integrated tools and solutions that are designed to address the information management challenges and regulatory and compliance requirements faced by financial services organizations.

Financial institutions today face an increasing number of regulations that require a formalized process for managing content or information that is core to their business operations. Hummingbird Enterprise for Financial Services provides a flexible, scalable and secure platform that allows organizations to control the creation and management of all key documents, content, information and records; track and log who views or changes these important documents; search and retrieve the documents, providing availability and authentication; and communication and collaboration tools that allow for the effective and controlled dissemination of information.

The complimentary, online events include the following scheduled topics:  
-----

April 28  
Enabling the Organization with Content-Centric Solutions

Executives in the financial services industry need clear and accurate access to information in order to make strong and sound strategic and tactical decisions. Critical information may reside in databases, or departmental applications; or as unstructured content such as electronic-based documents, contracts, forms and e-mails. This session will focus on the importance and value of using content-centric solutions to bridge the gap between unstructured and structured information delivery. Attendees will learn how these solutions enable organizations to meet regulatory compliance, improve corporate governance, increase operational effectiveness and gain a competitive advantage.

May 12  
Customer Complaints Handling for Financial Services Organizations

For many financial services organizations, customer complaints handling is guided by regulatory requirements, including defined and controlled processes

around managing customer feedback and reporting on the effectiveness of the complaints handling processes. In this Web seminar attendees will learn how Hummingbird works with financial services organizations to streamline the process of capturing, processing, resolving and reporting customer feedback and complaints.

May 26

Centralizing and Managing Applications, Agreements and Contracts

Financial institutions can drive value by employing technology solutions that provide a deeper and more contextualized understanding of the risks, obligations and benefits associated with each contract and contractual relationship. Whether it is a commercial loan, an initial public offering or service contract, financial institutions face challenges in managing this type of relationship. This session will address how the management of contracts during their entire lifecycle, from inception to creation, execution through to servicing, provides a significant time and cost savings to financial services organizations.

June 9

Addressing the Challenge of Electronic Messaging

Financial services organizations can leverage the use of electronic messaging to reduce costs and speed communications, enabling them to be more profitable and competitive. Organizations can remove the obstacles to adoption by implementing electronic messaging management practices that comply with industry standards and regulatory requirements. This seminar will introduce e-mail management and other solutions aimed at helping financial services organizations leverage the benefits of electronic messaging technologies. Hummingbird Enterprise provides the foundation for financial institutions to capture, manage, and preserve e-mail and instant messages as corporate records.

June 23

The Anti-Money Laundering Dashboard

Anti-money laundering solutions that can monitor and detect unusual financial transactions coupled with an understanding of the customer behind the transactions offers financial institutions an integrated solution to combat money laundering and adhere to tough new legislation aimed at preventing this type of criminal activity. Attendees will learn how Hummingbird solutions help organizations know their customers and add to their anti-money laundering strategy.

The complimentary, online events will run from 11:00 a.m. - 12:00 p.m. eastern time (US and Canada) and include a short question and answer period at the end of each session.

Please visit: [http://www.hummingbird.com/mailers/webseminar\\_main.html](http://www.hummingbird.com/mailers/webseminar_main.html) to register for the seminars.

FOR IMMEDIATE RELEASE

HUMMINGBIRD REPORTS SECOND QUARTER FY2005  
FINANCIAL AND OPERATING RESULTS

Total Sales of \$54.3 Million; Hummingbird Enterprise Sales up 3.4%;  
Adjusted EPS \$0.21

Toronto - April 26, 2005 - Hummingbird Ltd. (TSX: "HUM" and NASDAQ: "HUMC"), a leading global provider of integrated enterprise content management (ECM) solutions, today reported its consolidated results for the second quarter ended March 31, 2005. The financial figures in this release are reported in U.S. dollars in accordance with U.S. generally accepted accounting principles, except where noted.

<TABLE>  
<CAPTION>

SUMMARY OF FINANCIAL RESULTS  
(millions of U.S dollars except share data)

U.S. GAAP

	Three Months Ended March 31		Six Months Ended March 31

-----  
Note: Adjusted Net Income comprises Net (Loss) Income excluding |  
amortization of intangibles, restructuring and other charges, and |  
deferred income tax rate adjustments, net of related taxes.

</TABLE>

"During the second quarter we continued to grow our Enterprise Content Management business which now represents over 70% of our total revenue mix. We maintained our position of profitability on an adjusted net income basis in the quarter, in spite of a modest shortfall in revenue on the Connectivity side of the company. The fundamentals of our business remain strong, and we

continue to be very confident in the positive growth prospects for Hummingbird," said Barry Litwin, President and Chief Executive Officer of Hummingbird Ltd.

Mr. Litwin continued, "I am pleased to report that Hummingbird announced a number of important operational initiatives during the second quarter that considerably advance the Company's position in the enterprise content management market. I'm particularly excited about two fundamental innovations in the next release of Hummingbird Enterprise™ that we believe will considerably strengthen our market leadership.

The recently announced Hummingbird Content Drive™ represents a unique competitive differentiator that will provide order of magnitude improvements in scalability and performance. The Hummingbird Enterprise(TM) Client for Microsoft Outlook raises the bar for how users will manage content without ever having to leave the familiar Microsoft Outlook desktop application. Based on extensive market validation and testing with our customers, these new capabilities represent an important advancement in usability that will further remove complexity in managing content and lower deployment costs.

In addition, our solutions initiatives are yielding encouraging growth trends, reinforcing that they represent an important growth engine for the Company. These purpose-driven solutions are helping differentiate Hummingbird from our competitors, and are opening up new market opportunities across multiple verticals. Hummingbird is committed to continuing to deliver compelling, innovative and differentiated solutions that will help us to build upon our leadership position in the industry."

#### Financial Highlights

-----

Sales for the quarter ended March 31, 2005 were \$54.3 million, relatively unchanged from the quarter ended March 31, 2004. Hummingbird Enterprise revenues for the quarter were \$38.2 million, a 3.4% increase from the same

quarter last year, and a 4.2% increase from the previous quarter. Connectivity revenues for the quarter were \$16.1 million, compared to the \$17.8 million for the second quarter last year.

Adjusted net income in the current quarter was \$3.7 million, compared to \$6.0 million in the second quarter of last year. Adjusted diluted earnings per share (based on adjusted net income) for this quarter were \$0.21, compared to \$0.34 for the corresponding period last year.

Adjusted net income is presented because management considers it to be a better metric to evaluate and compare the quarterly performance of the Company's core business, since it excludes certain non-cash and non-recurring

expenses. In addition, it is the primary method that management uses to plan and forecast the Company's results. Adjusted net income is not a recognized profitability measure under U.S. GAAP, and the Company's method of calculating adjusted net income may differ from, and accordingly may not be comparable to, similarly titled measures used by other companies. Adjusted net income should not be considered in isolation and its presentation should not be construed an alternative to net income determined in accordance with U.S. GAAP, as an indicator of the Company's performance.

During the quarter, the company recorded restructuring charges of \$3.5 million. This charge relates to the Company's ongoing review of its global operations to align costs with revenues, and to consider areas where there is overlap related to historic acquisitions.

Operating expenses for the current quarter, which exclude amortization of intangibles and restructuring charges, were \$42.7 million, compared to \$39.1 million for the second quarter of the previous fiscal year.

For the second quarter of fiscal 2005, Hummingbird reported a net loss of \$1.2 million, compared to a net income of \$2.1 million for the same quarter of last year. The diluted loss per share of \$0.07 in the current quarter compares to diluted earnings per share of \$0.12 for the similar quarter of the prior year.

Sales for the six months ended March 31, 2005 were \$108.2 million, an increase of 3.3% over the previous year. Hummingbird Enterprise revenues for the current six months were \$74.8 million, up from \$70.0 million in the same period last year, representing a 6.8% increase.

Operating expenses, which exclude amortization of intangibles, and restructuring charges and other charges, increased by 7.9% to \$81.1 million for the first six months of fiscal 2005 compared to the prior year. The net loss for the current six month period was \$2.9 million resulting in a diluted loss per share of \$0.17, compared to net income of \$0.8 million and diluted earnings per share of \$0.04 last year.

Adjusted net income for the current six months was \$9.8 million compared to \$11.3 million for the six months ended March 31, 2004. Adjusted diluted earnings per share for the current six months, based on adjusted net income, was \$0.56 compared to \$0.64 for the prior year.

Total assets as at March 31, 2005 were \$365.3 million, compared to \$371.5 million as at December 31, 2004. The Company's cash position, including short-term investments, was \$129.1 million as at March 31, 2005. Deferred revenue increased to \$67.8 million as at March 31, 2005 from \$66.2 million as at December 31, 2004.

Operational Highlights

The demand for Hummingbird's content life cycle solutions continues to accelerate. In particular, Contract Management across multiple industry segments, and Deal Management for the financial services sector are generating net new customers and a growing sales pipeline. Hummingbird is seeing particular interest for its Contract Management solution in large diversified enterprises where the number of contracts to be managed is in the tens of thousands, and where labour intensive activities to manage contracts contribute to increasing costs of sales. Hummingbird's Deal Management solution supports investment banking teams by providing an integrated work environment to build relationships, win business, close deals and audit activities. Teams can work across multiple organizations and geographies, and

around the clock for faster deal closing and higher deal throughput. Based on Hummingbird's enterprise content management platform, Deal Management provides a collaborative environment for internal and external participants to work together throughout the deal negotiation process.

#### Summit 2005 - A Significant Success -----

Hummingbird's Summit event during the quarter was a significant success, with attendance up over 20% from the previous year. Over 860 people from 26 countries around the world attended, and there was considerable representation across all the Company's targeted industry segments. In addition, over 100 of Hummingbird's valued partners attended Summit. Also during Summit the Company unveiled Hummingbird Enterprise™ 2005 that created a significant amount of interest for attendees that previewed its innovative new features.

#### Upcoming New Release - Hummingbird Enterprise™ 2005 -----

Hummingbird Enterprise™ 2005 further builds on the significant capabilities of prior releases and is designed to address three key market requirements. First, Hummingbird has made significant investments in user interface functionality to measurably improve usability and end user work experience. Second, Hummingbird Enterprise™ 2005 is designed to minimize deployment complexities and lower cost of deployment over pre-existing IT infrastructure investments, to measurably reduce total cost of ownership. And third, to enable organizational compliance with regulatory and enhanced governance standards, Hummingbird Enterprise™ 2005 provides a highly secure framework in which to manage and reduce risk by ensuring that critical business content is always traceable and auditable.

The Company's recently unveiled Hummingbird Content Drive™ technology will be a key component of Hummingbird Enterprise™ 2005. Content Drive™ represents a fundamental shift in enterprise content management architecture that vastly improves performance of content-based interactions between Hummingbird Enterprise and Microsoft's content authoring applications. Content Drive represents a radical leap forward and marks a significant instance of synergy with the Company's legacy Connectivity business.

Also during the quarter Hummingbird unveiled another important innovation available with the release of Hummingbird Enterprise™ 2005. The Hummingbird Enterprise™ Client for Microsoft Outlook provides a fully interactive view of the entire suite of Hummingbird Enterprise functionality from within Microsoft

Outlook. With the familiarity and intuitive value this interface brings the user, the benefits of Hummingbird Enterprise™ Client for Microsoft Outlook include reduced time and effort to manage work product, enhanced work

experience and greatly reduced training time.

#### Awards and Recognition

During the quarter Hummingbird was recognized by KMWorld magazine as one of the 100 Companies that Matter in Knowledge Management. This list recognizes organizations who are leading the way in the knowledge economy by anticipating market requirements and delivering innovative solutions that enable customers to leverage knowledge assets across their enterprise. Hummingbird is one of only a few companies to have received this honour for five consecutive years.

In addition, Network Computing magazine recognized Hummingbird Enterprise Collaboration as a top solution in comparison with collaboration tools from seven other vendors. The Company's Collaboration platform was ranked highly for its advanced security features, ease of use, mobility and instant messaging capabilities and seamless integration with the overall Hummingbird Enterprise suite.

#### About Hummingbird

Hummingbird Ltd. (TSX: HUM, NASDAQ: HUMC) is a leading global provider of enterprise software solutions. Hummingbird and VERITAS to Link Content Management and E-mail  
Archiving Products to Control Lifecycle of Business Information

VERITAS VISION 2005, San Francisco, California - April 27, 2005 - Hummingbird Ltd. (NASDAQ: HUMC, TSX: HUM) and VERITAS Software Corporation (Nasdaq: VRTS) today announced a strategic alliance that will integrate VERITAS Enterprise Vault(TM) 6.0 e-mail and content archiving software with Hummingbird Enterprise(TM) 2005, the next generation of Hummingbird's award-winning enterprise content management platform.

The combination of VERITAS Enterprise Vault software and Hummingbird Enterprise is designed to enable customers to better manage electronic records such as e-mail, Instant Messages, and file system documents as part of an integrated content lifecycle management solution. Joint customers will be able to use a common, unified interface to capture and manage all business content stored in disparate information sources, declare those documents and messages as records and access the content across both systems.

Hummingbird and VERITAS will deliver this functionality from the most common interface for document creation and sharing today - the e-mail client, starting with Microsoft Outlook. This will help allow appropriate corporate practices such as document retention policies to be applied, while enabling easy access to all content including e-mail via the user-friendly interface customers are most familiar with, helping improve productivity of information workers.

According to a recent research report from Gartner, Inc., (1) "Companies that rely on employees to tag and push appropriate e-mails into the record management system or an e-mail record archive must implement a compliance monitoring system and audit to ensure that the corporate policy is being followed. Alternatively, there is the option to deploy a records management system that offers the option to automate some parts of the declaration process while capturing all non-declared records into a large "other e-mail" folder. This adds intelligence to some of the e-mail records while eliminating the need to oversee that all users are in compliance."

"Without proper protection, retention and management of critical business content so often found in e-mail, organizations face increasing administrative costs and, most importantly, increase their risks of violating corporate governance policies, laws and regulations," said Barry Litwin, President and Chief Executive Officer, Hummingbird Ltd. "The combination of Hummingbird

Enterprise and VERITAS Enterprise Vault will ensure that our customers have a seamlessly integrated environment to manage content lifecycle without ever having to leave Microsoft Outlook."

The VERITAS-Hummingbird partnership will provide customers with a tool that leverages the simplicity of the Microsoft Outlook desktop and extends it with enterprise scalable content management and archival capabilities. Integration with VERITAS Enterprise Vault software will support flexible, software-based archiving of e-mail and documents from Hummingbird Enterprise. The integration further helps reduce storage costs and simplifies management of e-mail, attachments and documents via automated, policy-controlled archiving to online stores for active retention and seamless retrieval of information.

"Our lawyers live in the Outlook client which is one of the main reasons we wanted Hummingbird to provide us with a unified system for handling e-mail management and matter centric working. With an existing and very valuable document management system already in place, we need to take advantage of this additional functionality in order to achieve the true value add of the upgrade," said Jon Gould, IT Director at UK-based law firm Charles Russell. "With the Hummingbird solution and VERITAS Enterprise Vault integration not

only will fee-earners be able to manage all content, including e-mail, from within the familiar Outlook interface, they will also be able to apply appropriate archiving and retention policies. This will be very beneficial for the firm to help us to meet our compliance requirements."

"Organizations today are challenged with both managing the mounting volume of electronic information and communication and retaining that information for internal corporate governance or external regulatory compliance," said Michael Speiser, Vice President of VERITAS' Data Management Group. "VERITAS and Hummingbird are committed to delivering a comprehensive solution to systematically capture, protect, control and dispose of important electronic records. At the same time, VERITAS and Hummingbird realize that business users will not easily change their work environments - so all of this must be done from the interface that they work in today - Microsoft Outlook."

Hummingbird and VERITAS will preview the new features and functionalities of the combined solution at VERITAS VISION 2005, VERITAS' worldwide user conference, April 25-28 at the Moscone Convention Center in San Francisco, California.

Availability: The combined Hummingbird Enterprise 2005 and VERITAS Enterprise Vault(TM) 6.0 solution is expected to be generally available for release in the summer of 2005.

#### About VERITAS Software

VERITAS Software, one of the 10 largest software companies in the world, is a leading provider of software and services to enable utility computing. In a utility computing model, IT resources are aligned with business needs, and business applications are delivered with optimal performance and availability on top of shared computing infrastructure, minimizing hardware and labor costs. With 2004 revenue of \$2.04 billion, VERITAS delivers products and services for data protection, storage & server management, high availability and application performance management that are used by 99 percent of the Fortune 500.
