Subject: News Alert: Invensys PLC - Invensys completes Rexnord and Drive
systems disposals

This Email News Alert service is brought to you by Invensys and
<http://www.hemscott.net>

announcement
26 November 2002
Invensys completes Rexnord and Drive Systems disposals
Invensys plc, the international production technology and energy management
Group, announces that it has completed the
sale of its Rexnord business to the Carlyle Group for the agreed
consideration. Invensys has also completed the sale
of its Drive Systems business to Eurotherm Drives Holdings Limited, a
company formed by the management team of Invensys
Drives Systems and their investment partner, Compass Partners European
Equity Fund L.P. The sale proceeds from both
disposals will be used by Invensys to continue to reduce its level of
indebtedness.

About Invensys plc

Invensys plc is a global leader in production technology and energy
management. The group helps customers improve their
performance and profitability using innovative services and technologies
and a deep understanding of their industries
and applications.

Invensys Production Management works closely with customers in order to
drive up performance of their production
assets, maximise their return on investments in production technologies and
remove cost and cash from their whole
supply chain. The division includes APV, Baan-Wonderware-Avantis,
Eurotherm, Foxboro, SIMSCI/Esscor and Triconex. These
businesses address process and batch industries -- including oil, gas and
chemicals, food, beverage and personal health
care -- and the discrete and hybrid manufacturing sectors.

Invensys Energy Management works with clients involved in the supply,
measurement and consumption of energy and water,
to reduce costs and waste and improve the efficiency, reliability and
security of power supply. The division includes
Energy Management Solutions, Appliance Controls, Climate Controls, Building
Systems, Global Services, Metering Systems,
Powerware and Home Control Systems. These businesses focus on markets
connected with power and energy infrastructure
for industrial, commercial and residential buildings.

The company also serves the specialised rail, wind-power and electronic
manufacturing (power components) markets

through Invensys Rail Systems, Hansen Transmissions and Lambda, respectively, in its Development division.

Invensys operates in more than 80 countries, with its headquarters in London.

Subject: News Alert: Invensys PLC - Invensys completes Disposal
Programme early and ahead of target

This Email News Alert service is brought to you by Invensys and
<http://www.hemscott.net>

28 November 2002

Invensys completes Disposal Programme early and ahead of target with
US\$415m sale of Fasco Motors
Invensys plc, the international production technology and energy management
Group, announces that it has agreed to sell
its Fasco Motors business to Tecumseh Products Company for a cash
consideration of US\$415m. The sale proceeds will be
used by Invensys to continue to reduce its level of indebtedness.
When this sale has completed, Invensys will have generated proceeds of over
£1.8bn (\$2.8bn) from its disposal
programme, well ahead of targeted proceeds of £1.5bn and four months ahead
of schedule. Net debt will be reduced as a
result from £3.3bn a year ago to £1.5bn on a proforma basis. On 26
November Invensys announced the completion of the
sale of Rexnord and Drive Systems for over \$1.0bn; these together with the
completed sale of Sensor Systems in October
for US\$394m have resulted in \$1.4bn of cash proceeds in the last six weeks.
The Flow Control and Air Systems
businesses were sold in May and June.

Fasco Motors is a leader in the design, manufacture and testing of
fractional horsepower motors, blowers and gearmotors
for a range of customers and applications in HVAC, automotive, healthcare,
appliance and other industries. For the
twelve months ended 30 September 2002, the business generated revenues of
US\$467m and operating profit of US\$60m. Net
assets which are the subject of the transaction are approximately US\$205m.
Goodwill previously written off to reserves
amounts to approximately US\$550m.

The sale of Fasco Motors is consistent with Invensys previously stated
objectives to divest non-core assets as part of
its overall plan to improve capital strength and increase strategic focus.
The sale is subject to customary regulatory
approvals and other usual conditions and is expected to complete early in
2003.

Rick Haythornthwaite, CEO of Invensys, said:

"With this sale, our programme to dispose of the businesses earmarked as a
result of our strategy review is now
complete. At a total consideration of over £1.8bn we have surpassed our
stated £1.5bn target and we have delivered this
vital element of our strategy well ahead of schedule. The disposals have
reduced our debt significantly, removed
concerns about our financing and given us the headroom to implement our
strategy. The single focus of Invensys will now
be on achieving our stated performance targets for the company."
