*Aggregate cost for federal income taxes is identical. All securities are valued at amortized cost, and as a result, there is no unrealized appreciation or depreciation.

FOOTNOTES:

- (a) Unless the securities are assigned their own ratings, the ratings are those of the bank whose letter of credit guarantees the issue or the insurance company who insures the issue. All letters of credit and insurance are irrevocable and direct pay covering both principal and interest. Ratings are unaudited. In addition, certain issuers may have either a line of credit, a liquidity facility, a standby purchase agreement or some other financing mechanism to ensure the remarketing of the securities. This is not a guarantee and does not serve to insure or collateralize the issue.
- (b) Securities that are not rated which the Fund's adviser has determined to be of comparable quality to those rated securities in which the Fund invests.
- (c) Securities payable on demand at par including accrued interest (usually with seven days notice) and, if indicated unconditionally secured as to principal and interest by a bank letter of credit. The interest rates are adjustable and are based on bank prime rates or other interest rate adjustment indices. The rate shown is the rate in effect at the date of this statement.
- (d) Security subject to alternative minimum tax.

Note 1 - Valuation of Securities -

Investments are recorded on the basis of amortized cost, which approximates value as permitted by Rule 2a-7 under the 1940 Act. Under this method, a portfolio instrument is valued at cost and any discount or premium is amortized on a constant basis to the maturity of the instrument. The maturity of variable rate demand instruments is deemed to be the longer of the period required before the Fund is entitled to receive payment of the principal amount or the period remaining until the next interest rate adjustment.

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157") on September 1, 2008. FAS 157 defines fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. FAS 157 establishes a framework for measuring fair value and three level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the

Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the assets or liability developed based on the best information available in the circumstances. The Fund's investment in its entirety is assigned a level based upon the inputs which are significant to the overall valuation. Various inputs may be used to determine the value of the fund's investments. These inputs are summarized in three broad levels:

Level 1 - quoted prices in active markets for identical securities

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 - significant unobservable inputs (including the fund's own assumptions used to determine the fair value of investments). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following table summarizes the inputs used to value the fund's net assets as of November 30, 2008:

| Valuation Inputs <s> | Investment in Securities <c> |
|---|---------------------------------|
| Level 1 - Quoted Prices | \$ -0- |
| Level 2 - Other Significant Observable Inputs | 90,462,743 |
| Level 3 - Significant Unobservable Inputs | -0- |
| Total | \$ 90,462,743 |

Temporary Guarantee Program for Money Market Funds

On October 2, 2008, the Board of Directors of the Fund approved the participation by the Fund in the U.S. Treasury Department's Temporary Guarantee Program for Money Market Funds through December 18, 2008 (the "Program"). Under the Program, if the Fund's market value per share drops below \$0.995 on any day while the Program is in effect, shareholders of record on that date who also held shares in the Fund on September 19, 2008 may be eligible to receive a payment from the Treasury upon liquidation of the Fund, provided the Fund is liquidated soon after the day on which the Fund's market value per share drops below \$0.995. The Program requires the Fund to pay the U.S. Department of Treasury a fee equal to 0.01% based on the number of shares outstanding as of September 19, 2008. This expense will be borne by the Fund without regard to any expense limitation currently in effect for the Fund.

On December 4, 2008, the Board of Directors of the Fund approved the extension of the Fund's participation in the Program. The extension provides coverage through April 30, 2009.
