Approximate date of commencement of proposed sale of securities to the public: As soon as practicable after the effective date of this registration statement and upon completion of the merger described in the accompanying prospectus.

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If applicable, place an X in the box to designate the appropriate rule provision relied upon in conducting this transaction:

Exchange Act Rule 13e-4(i) (Cross-Border Issuer Tender Offer)

Exchange Act Rule 14d-1(d) (Cross-Border Third-Party Tender Offer)

Indicate by checkmark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933.

Emerging Growth Company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until this registration statement shall become effective on such date as the U.S. Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

EXPLANATORY NOTE

On 17 August 2021, Woodside Petroleum Ltd. (“Woodside”) publicly announced its entry into a merger commitment deed (the “Merger Commitment Deed”) with BHP Group Ltd (“BHP”) to facilitate the combination of their respective oil and gas portfolios through an all-stock merger. The Merger Commitment Deed outlined a process by which Woodside and BHP intended to progress the Merger (as defined below). On 22 November 2021, Woodside and BHP publicly announced they had entered into a share sale agreement (the “Share Sale Agreement”) under which, and subject to the terms and conditions therein, Woodside (or its nominee) will acquire all of the ordinary shares in BHP Petroleum International Pty Ltd (“BHP Petroleum”), a wholly owned subsidiary of BHP that will hold the oil and gas assets of BHP, in exchange for the issuance of new ordinary shares of Woodside, no par value per share (the “Woodside Shares”) and the Completion Payment (as defined below) (subject to adjustment). The Merger effected under the Share Sale Agreement will have an effective time of 11:59 p.m. AEST on 30 June 2021 (the “Effective Time”).

Immediately upon closing of the Merger pursuant to the Share Sale Agreement, the Woodside Shares issued under the Share Sale Agreement (the “New Woodside Shares”) will be issued by Woodside to BHP to be distributed by BHP to eligible holders of ordinary shares of BHP Group Ltd, with no par value per share (the “BHP Shares”), via an in-specie dividend, or to a nominee appointed by BHP following consultation with Woodside (the “Sale Agent”) to receive and sell New Woodside Shares comprising the Share Consideration attributable to the Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders (if applicable).

At its annual general meeting to be held on 19 May 2022 (the “Woodside Shareholders Meeting”), Woodside is proposing a resolution to change its name from “Woodside Petroleum Ltd.” to “Woodside Energy Group Limited.” If approved, this change is expected to take effect shortly after the Woodside Shareholders Meeting. Woodside has also applied to change its ticker symbol on the Australian Securities Exchange (the “ASX”) from “WPL” to “WDS,” subject to shareholder approval of the proposed name change.

Table of Contents

The information contained in this prospectus is not complete and may be changed. The registration statement relating to the securities described in this prospectus has been filed with the U.S. Securities and Exchange Commission. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This prospectus shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful.

PRELIMINARY AND SUBJECT TO COMPLETION, DATED 13 APRIL 2022

PROSPECTUS OF WOODSIDE PETROLEUM LTD.

WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE REQUESTED NOT TO SEND US A PROXY.

MERGER PROPOSED

On 17 August 2021, Woodside Petroleum Ltd. (“Woodside”) publicly announced its entry into a merger commitment deed (the “Merger Commitment Deed”) with BHP Group Ltd (“BHP”) to facilitate the combination of their respective oil and gas portfolios through an all-stock merger. The Merger Commitment Deed outlined a process by which Woodside and BHP intended to progress the Merger (as defined below).

On 22 November 2021, Woodside and BHP publicly announced they had entered into a share sale agreement (the “Share Sale Agreement”) (together with an Integration and Transition Services Agreement which sets out the parties’ obligations in relation to separation, transition and integration of BHP’s oil and gas portfolio with Woodside’s oil and gas portfolio) under which, and subject to the terms and conditions therein, Woodside (or its nominee) will acquire all of the ordinary shares in BHP Petroleum International Pty Ltd (“BHP Petroleum”), a wholly owned subsidiary of BHP that holds the oil and gas assets of BHP, in exchange for the issuance of new ordinary shares of Woodside, no par value per share (the “Woodside Shares”) and the Completion Payment (as defined below) (subject to adjustment). Immediately upon the closing of the Merger pursuant to the Share Sale Agreement (“Implementation”), the Woodside Shares issued under the Share Sale Agreement (the “New Woodside Shares”) will be issued by Woodside to BHP to be distributed by BHP to eligible holders of ordinary shares, with no par value per share, of BHP Group Ltd (the “BHP Shares”) via an in-specie dividend. Woodside refers to the combination of the oil and gas business of BHP with and into Woodside and the other transactions contemplated in the Share Sale Agreement, including the payment or distribution of Woodside Shares to BHP Shareholders upon Implementation, as the “Merger,” and refers to the New Woodside Shares to be issued in the Merger as the “Share Consideration.” The Merger effected under the Share Sale Agreement will have an Effective Time of 11:59 p.m. AEST on 30 June 2021.

Upon Implementation, BHP Shareholders as of the Distribution Record Date (as defined below) will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise (as defined below) and no further declaration of Woodside Dividends (as defined below) occurs prior to Implementation). Upon Implementation, Existing Woodside Shareholders will own approximately 52% and BHP Shareholders will own approximately 48% of the Merged Group (based on the issue of 914,768,948 New Woodside Shares and the number of Woodside Shares outstanding on 24 March 2022) subject to any BHP Shareholders being Ineligible Foreign BHP Shareholders (as defined below) or Relevant Small Parcel BHP Shareholders (as defined below). Each BHP Shareholder that is not an Ineligible Foreign BHP Shareholder or Relevant Small Parcel BHP Shareholder (“Participating BHP Shareholders”) will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022). The actual number of New Woodside Shares that will be issued and to which each BHP Shareholder will be entitled with respect to each BHP Share will be determined as at the applicable record date for the distribution, prior to Implementation, which will be set by BHP and referred to as the “Distribution Record Date.”

The value of the Share Consideration will fluctuate with the market price of Woodside Shares. You should obtain current share price quotations for Woodside Shares on the Australian Securities Exchange (“ASX”). Based on the closing price of Woodside Shares on the ASX of AS\$22.11 on 19 November 2021, the last trading day before the public announcement of entry into the Share Sale Agreement, and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately AS\$4.00, or \$2.91 (converted into dollars based on the exchange rate for such day reported by the Reserve Bank of Australia (the “RBA”) of \$0.7274 = AS1.00). Based on the closing price of Woodside Shares on the ASX of AS\$21.18 on 16 August 2021, the date before the public announcement of entry into the Merger Commitment Deed, and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Woodside Share distribution per BHP Share represented approximately AS\$3.83, or \$2.81 (converted into dollars based on the exchange rate for such day reported by the RBA of \$0.7336 = AS1.00). Based on the closing price of Woodside Shares on the ASX of AS\$33.20 and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately AS\$6.00, or \$4.48 (converted into dollars based on the exchange rate for such day reported by the RBA of \$0.7473 = AS1.00). Eligible holders of American Depositary Shares representing BHP Shares (the “BHP ADSs”) will receive a number of American Depositary Shares, each representing one New Woodside Share (the “New Woodside ADSs”), that corresponds to the New Woodside Shares received on the BHP Shares represented by BHP ADSs (subject to payment of taxes and applicable Woodside Depository and BHP Depository (each as defined below) fees and expenses). Based on the assumptions described above, upon Implementation, each holder of BHP ADSs as of the ADS Distribution Record Date will be entitled to receive 0.3614 of a New Woodside ADSs in respect of each BHP ADS owned on the ADS Distribution Record Date. No fractional New Woodside Shares or New Woodside ADSs will be issued or delivered to holders of BHP Shares or BHP ADSs. Any fractional entitlements to New Woodside Shares will be rounded down to the nearest whole number and aggregated and sold by the Sale Agent (as defined below) and the proceeds retained by BHP. Any fractional entitlements to New Woodside ADSs will be aggregated and sold by Citibank, N.A. (the “BHP Depository”), and the net cash proceeds (after deduction of applicable fees, taxes and expenses) will be distributed to the BHP ADS holders entitled thereto.

The Woodside Shares are listed on the ASX under the ticker symbol “WPL.” Woodside has applied to change its ticker symbol on the ASX from “WPL” to “WDS,” subject to shareholder approval of the proposed name change. No trading market exists in the United States for the Woodside Shares. Woodside has established an American Depositary Receipt program (the “Woodside ADR Program”) for American Depositary Shares representing Woodside Shares (the “Woodside ADSs”), for which Citibank, N.A. is the depository (the “Woodside Depository”), with each Woodside ADS representing one Woodside Share. A registration statement on Form F-6 (Registration No. 333-201669) was filed with the SEC on 23 January 2015 and declared effective 9 February 2015, with respect to existing American Depositary Shares representing Woodside Shares (the “Existing Woodside ADSs”). Existing Woodside ADSs currently trade on the U.S. over-the-counter market through a sponsored ADR facility under the symbol “WOPEY.” Woodside has applied to list the Woodside ADSs on the NYSE under the symbol “WDS” and intends to file a registration statement on Form F-6 with the U.S. Securities and Exchange Commission (the “SEC”) with respect to the New Woodside ADSs (the “F-6 Registration Statement”) and to amend and restate the Woodside Deposit Agreement (as defined below) for the Woodside ADR Program to, among other things, reflect Woodside’s status as an SEC reporting company and certain regulatory changes in Australia and in the United States. Following Implementation, the Woodside Shares will continue to be listed on the ASX and are expected to be listed on the London Stock Exchange plc (the “LSE”).

BHP ADSs are traded on the NYSE under the symbol “BHP,” with each BHP ADS representing two BHP Shares. Each holder of BHP ADSs as of the ADS Distribution Record Date (as defined below) will receive in the Merger, in lieu of New Woodside Shares, New Woodside ADSs. Holders of BHP ADSs will not be able to trade the New Woodside Shares underlying the New Woodside ADSs received as Share Consideration for the BHP ADSs before such New Woodside Shares are deposited with the Woodside Depository and the New Woodside ADSs are issued and delivered to the BHP ADS holders. BHP Shares and BHP ADSs will not be exchanged or cancelled in the Merger, but will continue to represent an interest in BHP without the oil and gas assets in BHP. Following Implementation, Participating BHP Shareholders will hold both New Woodside Shares and BHP Shares, and holders of BHP ADSs will hold both New Woodside ADSs and BHP ADSs.

There can be no assurances regarding the prices at which Woodside Shares or New Woodside ADSs (as applicable) will trade following Implementation of the Merger, including whether the New Woodside ADSs will trade at the equivalent prices at which the Woodside Shares traded prior to the Merger or at which the Woodside Shares may trade following Implementation of the Merger.

The Merger cannot be completed without the satisfaction (or waiver, if permitted) of the several conditions precedent under the Share Sale Agreement (the “Conditions”) by 30 June 2022 (or an agreed later date), including approval by certain regulatory and competition authorities, approval of the shareholders of Woodside (the “Woodside Shareholders”), the issuing of a report with “best interests” conclusions (the “Independent Expert’s Report”) by KPMG Financial Advisory Services (Australia) Pty Ltd (“KPMG”), the independent expert appointed by Woodside (the “Independent Expert”), and the completion of the Restructure of certain of BHP’s subsidiaries. If all Conditions of the Merger are satisfied, including approval by Woodside Shareholders, then (i) 100% of the issued share capital of BHP Petroleum International Pty Ltd will be transferred to Woodside (or its nominee), and BHP Petroleum will become a wholly owned subsidiary of Woodside, (ii) Woodside will pay BHP the Purchase Price (as defined below), including the Share Consideration of approximately 914,768,948 New Woodside Shares in the aggregate which will be issued to BHP, (iii) BHP will immediately distribute to BHP Shareholders (and transfer to the Sale Agent in the case of all New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) as of the Distribution Record Date the Share Consideration, pro rata to their respective ownership of BHP (as more fully defined herein, the “Distribution Entitlement”), and (iv) Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders will receive a cash payment from proceeds of the sale of the New Woodside Shares in lieu of receiving New Woodside Shares. See the section entitled “The Share Sale Agreement and Related Agreements—The Share Sale Agreement—Share Consideration.” From the date of their issuance, the New Woodside Shares received as Share Consideration will be fully paid and rank equally with the Woodside Shares outstanding prior to Implementation of the Merger (the “Existing Woodside Shares”).

Woodside expects to hold a meeting of its shareholders at Perth Convention & Exhibition Centre, 21 Mounts Bay Road, Perth, Western Australia, Australia, on 19 May 2022 at 10:00 a.m. (AWST) time (the “Woodside Shareholders Meeting”) to vote on the issuance by Woodside of the New Woodside Shares. As a holder of BHP Shares or BHP ADSs, you are not permitted to vote at the Woodside Shareholders Meeting (assuming you are not also a Woodside Shareholder). **THIS PROSPECTUS IS NOT A PROXY STATEMENT. WE ARE NOT ASKING YOU FOR A PROXY, AND YOU ARE REQUESTED NOT TO SEND US A PROXY.**

More information about Woodside, BHP Petroleum, the Share Sale Agreement, the Merger and the Woodside Shareholders Meeting can be found elsewhere in this prospectus. **In reviewing this prospectus, you should carefully consider the matters described under the caption “Risk Factors” beginning on page 42.**

NEITHER THE U.S. SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE SECURITIES TO BE ISSUED IN CONNECTION WITH THE MERGER OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The date of this prospectus is

2022.

ABOUT THIS PROSPECTUS

This prospectus forms a part of the registration statement on Form F-4 (Registration No. 333-) filed with the SEC on or about the date of this prospectus and constitutes a prospectus of Woodside under Section 5 of the Securities Act of 1933 (the “Securities Act”) with respect to the issuance of the New Woodside Shares to be delivered to BHP in exchange for all of the issued share capital of BHP Petroleum International Pty Ltd pursuant to the Share Sale Agreement and distributed by BHP to BHP Shareholders (or a nominee appointed by BHP following consultation with Woodside (the “Sale Agent”) to receive and sell New Woodside Shares comprising the Share Consideration attributable to the Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders, if applicable) in the form of New Woodside Shares.

Such New Woodside Shares that are issued with respect to the BHP Shares represented by the BHP ADSs will be deposited with the Woodside Depository. The Woodside Depository will issue the New Woodside ADSs representing the New Woodside Shares in connection with the Merger to the BHP Depository for distribution to the BHP ADS holders.

At Implementation, each BHP Shareholder and holder of BHP ADSs, as further described herein, will be entitled to a number of New Woodside Shares or New Woodside ADSs (as applicable) determined in accordance with the Share Sale Agreement. A registration statement on Form F-6 (Registration No. 333-201669) was filed with the SEC on 23 January 2015 and declared effective 9 February 2015 with respect to the Existing Woodside ADSs. Existing Woodside ADSs currently trade on the U.S. over-the-counter market through a sponsored ADR facility under the symbol “WOPEY.” Woodside has applied to list the Woodside ADSs, including those issued to the holders of BHP ADSs in connection with the Merger, on the NYSE under the symbol “WDS,” and intends to file the F-6 Registration Statement with the SEC with respect to the Woodside ADSs and to amend and restate the Woodside Deposit Agreement for the Woodside ADR Program to, among other things, reflect Woodside’s status as an SEC reporting company and certain regulatory changes in Australia and in the United States. The Amended and Restated Deposit Agreement, dated as of 11 February 2015 (the “2015 Woodside Deposit Agreement”) and the form of the Second Amended and Restated Deposit Agreement (the “Woodside Deposit Agreement Amendment” and the 2015 Woodside Deposit Agreement, as so amended and restated, the “Woodside Deposit Agreement”), will be attached as exhibits to the F-6 Registration Statement.

Neither Woodside nor BHP Petroleum has previously filed periodic reports with the SEC. All important business and financial information about Woodside and BHP Petroleum as of the date of this prospectus have been included in or delivered with this prospectus. Woodside is not incorporating by reference any information with respect to Woodside, BHP or BHP Petroleum into this prospectus other than the exhibits filed with Woodside’s registration statement on Form F-4, of which this prospectus forms a part.

You may ask any questions about the Merger or request copies of documents relating to the Merger, without charge, upon oral or written request to Woodside at Mia Yellagonga, 11 Mount Street, Perth, Western Australia 6000, Australia, (61 8) 9348 4000 or merger@woodside.com.au. To obtain timely delivery of requested materials, you must request the information no later than five business days prior to the date of the Woodside Shareholders Meeting. BHP shareholders who have questions for BHP regarding the Merger or any related matter described in this prospectus are referred to the contacts identified in the information included in BHP’s SEC filings, available for review free of charge through the SEC’s website at www.sec.gov or on BHP’s website, www.bhp.com. The information contained in, or that can be accessed through, the SEC’s or BHP’s website is not intended to be incorporated into this prospectus.

All information contained in this prospectus with respect to Woodside and the Merged Group has been provided by Woodside (except to the extent that such information relates solely to BHP Petroleum). All information contained in this prospectus with respect to BHP and BHP Petroleum is from, or derived from, public information or information provided by BHP. You should rely only on the information contained in this

Table of Contents

prospectus as having been authorized by Woodside, BHP or BHP Petroleum. No one has been authorized to provide you with information that is different from that contained in this prospectus. The information contained in this prospectus is accurate only as of the date of this prospectus unless the information specifically indicates that another date applies. The information contained on any website referenced in this prospectus is not incorporated by reference into this prospectus and should not be considered part of this prospectus. Neither the mailing or delivery of this prospectus nor Woodside's issuance of New Woodside Shares pursuant to the Merger will create any implication to the contrary.

This prospectus does not constitute an offer to sell, or a solicitation of an offer to buy, any securities, including any New Woodside Shares or New Woodside ADSs, in any jurisdiction in which it is unlawful to make any such offer or solicitation in such jurisdiction.

You should not construe the contents of this prospectus as legal, tax or financial advice. You should consult with your own legal, tax, financial or other professional advisers. All summaries of, and references to, the agreements governing the terms of the transactions described in this prospectus are qualified by the full copies of and complete text of such agreements in the forms attached hereto as annexes or filed as exhibits to the registration statement of which this prospectus is a part. Unless otherwise specified, currency amounts referenced in this prospectus are in U.S. dollars.

WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE REQUESTED NOT TO SEND US A PROXY.

DISCLAIMER AND IMPORTANT NOTICES

Service of Process and Enforceability of U.S. Securities Law

Woodside is a public limited company organized under the laws of Australia, and its corporate headquarters will remain in Australia following Implementation of the Merger. Many of Woodside's directors (the "Woodside Directors") and officers are, and following the Merger will be, residents of jurisdictions outside the United States. In addition, although Woodside will, following Implementation of the Merger, have substantial assets in the United States, the majority of Woodside's assets and a large proportion of the assets of certain Woodside Directors and officers will be located outside the United States.

As a result of the foregoing, U.S. investors may find it difficult in a lawsuit based on the civil liability provisions of the United States federal securities laws:

- (1) to effect service within the United States upon Woodside and Woodside's Directors and officers that are located outside the United States;
- (2) to enforce in United States courts or outside the United States, judgments obtained against those persons in United States courts;
- (3) to enforce, in United States courts, judgments obtained against those persons in courts in jurisdictions outside the United States; and
- (4) to enforce against those persons in Australia, whether in original actions or in actions for the enforcement of judgments of United States courts, civil liabilities based solely upon the United States federal securities laws.

Historical Financial Information

The historical financial information presented in this prospectus has been derived from the following:

Woodside

Woodside's audited consolidated financial statements as of 31 December 2021 and 2020 and for the years ended 31 December 2021, 2020 and 2019, which have been prepared in accordance with International Financial Reporting Standards, as issued by the International Accounting Standards Board ("IFRS"), which differ in certain significant respects from U.S. generally accepted accounting principles ("U.S. GAAP"), and the related notes thereto.

The audited consolidated financial statements of Woodside are presented in U.S. dollars.

BHP Petroleum

BHP Petroleum's audited combined financial statements as of 30 June 2021 and 2020 and for the years ended 30 June 2021 and 2020, and its unaudited combined financial statements as of and for the year ended 30 June 2019, which have been prepared in accordance with IFRS, which differ in certain significant respects from U.S. GAAP, and the related notes thereto. Consistent with applicable reporting rules, the BHP Petroleum financial information as and for the year ended 30 June 2019 is unaudited.

BHP Petroleum's unaudited combined interim financial statements as of 31 December 2021 and for the half years ended 31 December 2021 and 2020, and the related notes thereto.

The audited and unaudited combined financial statements of BHP Petroleum are presented in U.S. dollars.

Table of Contents

Woodside and BHP Petroleum have made rounding adjustments to some of the figures contained in this prospectus. Accordingly, numerical figures shown as totals in some tables may not be exact arithmetic aggregations of the figures that preceded them.

Pro Forma Financial Statements

This prospectus includes unaudited pro forma condensed combined financial statements for Woodside. The unaudited pro forma condensed combined statement of profit and loss of Woodside for the twelve months ended 31 December 2021 reflects,

with respect to Woodside, the consolidated income statement of Woodside for the twelve months ended 31 December 2021, and,

with respect to BHP Petroleum, (i) the results for the fiscal year ended 30 June 2021 (derived from BHP Petroleum's audited combined statement of profit and loss for the year ended 30 June 2021), minus (ii) the results for the half year ended 31 December 2020 (derived from BHP Petroleum's unaudited combined historical financial information for the half year ended 31 December 2020), plus (iii) the results for the half year ended 31 December 2021 of BHP Petroleum (derived from BHP Petroleum's unaudited combined interim statement of profit and loss for the half year ended 31 December 2021),

and gives effect to the Merger as if it had been Implemented on 1 January 2021.

The unaudited pro forma condensed combined statement of financial position of Woodside combines the historical statements of financial position of Woodside and BHP Petroleum as of 31 December 2021 and gives pro forma effect to the Merger as if it had been Implemented on 31 December 2021.

The unaudited pro forma condensed combined statement of cash flows of Woodside for the twelve months ended 31 December 2021 reflects,

with respect to Woodside, the consolidated statement of cash flows of Woodside for the twelve months ended 31 December 2021, and,

with respect to BHP Petroleum, (i) the cash flows for the fiscal year ended 30 June 2021 (derived from BHP Petroleum's audited combined statement of statement of cash flows for the year ended 30 June 2021), minus (ii) the cash flows for the half year ended 31 December 2020 (derived from BHP Petroleum's unaudited combined historical financial information for the half year ended 31 December 2020), plus (iii) the cash flows for the half year ended 31 December 2021 of BHP Petroleum (derived from BHP Petroleum's unaudited combined interim statement of cash flows for the half year ended 31 December 2021),

and gives effect to the Merger as if it had been Implemented on 1 January 2021.

The unaudited pro forma condensed combined financial statements for Woodside in this prospectus is presented for illustrative purposes only, is based on certain assumptions, addresses a hypothetical situation and reflects limited historical financial data. Therefore, the unaudited pro forma condensed combined financial statements are not necessarily indicative of what Woodside's actual financial position or results of operations would have been had the Merger been completed on the dates indicated, or of the future consolidated results of operations or financial position of Woodside. Accordingly, Woodside's business, assets, cash flows, results of operations and financial condition may differ significantly from those indicated by the unaudited pro forma condensed combined financial statements included in this prospectus. See the section entitled "*Unaudited Pro Forma Condensed Combined Financial Statements*" for more information.

Table of Contents

Pro Forma Reserve Information

This prospectus includes pro forma reserve information for Woodside. The unaudited pro forma combined reserve information reflects:

- with respect to Woodside, the reserve information as of 31 December 2021, and,
- with respect to BHP Petroleum, the reserve information as of 31 December 2021,

and gives effect to the Merger as if it had been Implemented on 31 December 2021.

This prospectus also includes pro forma information regarding the standardized measure of discounted future net cash flows relating to proved oil, condensate, natural gas liquids (“NGLs”) and natural gas reserves. That information reflects,

- with respect to Woodside, the applicable information for the year ended 31 December 2021,
- with respect to BHP Petroleum, the reserve and production information for the year ended 31 December 2021,

and gives effect to the Merger as if it had been Implemented on 31 December 2021.

Woodside’s reserves as of 31 December 2021 are based on a reserve report prepared by Netherland, Sewell & Associates, Inc., Woodside’s independent reserve engineers. BHP Petroleum’s reserve assessments are prepared each year in connection with BHP Petroleum’s fiscal year end of June 30. The assessments are reviewed prior to BHP Petroleum’s fiscal year end to ensure technical quality, adherence to internally published BHP Petroleum guidelines and compliance with SEC reporting requirements. The December 31 reserves information for BHP Petroleum included in the pro forma reserve information in this prospectus and used for the purposes of BHP Petroleum’s information forming part of the pro forma standardized measure information is an estimate of BHP Petroleum’s reserves as of such date, is derived from internal records, taking into account, among other factors, production, revenues, and operating and capital expenditures for each asset and project, and has not been reviewed by any independent reserve engineers or on the same basis as BHP Petroleum’s reserves are reviewed at BHP Petroleum’s fiscal year end.

The pro forma reserve and production information in this prospectus is presented for illustrative purposes only, is based on certain assumptions, addresses a hypothetical situation and reflects limited historical reserves and production data. Therefore, the pro forma reserve and production information is not necessarily indicative of what the Merged Group’s actual reserve or production data would have been had the Merger been Implemented on the date indicated or of the future reserves or production of the Merged Group. Accordingly, the Merged Group’s reserves and production may differ significantly from those indicated by the pro forma reserve and production information included in this prospectus. See the section entitled “*Risk Factors—Risks Relating to the Implementation of the Merger—The unaudited pro forma condensed combined financial statements and pro forma reserve and production data included in this prospectus may not be representative of the Merged Group’s results after the Merger*” for more information.

Non-GAAP Financial Measures

Certain parts of this prospectus contain financial measures that have not been prepared in accordance with IFRS and are not recognized measures of financial performance or liquidity under IFRS. In addition to the financial information contained in this prospectus presented in accordance with IFRS, certain “non-GAAP financial measures” (as defined in Item 10(e) of Regulation S-K under the Securities Act) have been included in this prospectus.

Woodside believes that the “non-GAAP financial measures” it presents provide a useful means through which to examine the underlying performance of its business. These measures, however, should not be

Table of Contents

considered to be an indication of, or alternative to, corresponding measures of gross profit, net profit, cash flows from operating activities, interest bearing liabilities, or other figures determined in accordance with IFRS. In addition, such measures may not be comparable to similar measures presented by other companies. These measures include:

EBIT, which is calculated as profit before income tax, Petroleum Resource Rent Tax (“PRRT”) and net finance costs;

Underlying EBITDA, which is calculated as profit before income tax, PRRT, net finance costs, depreciation and amortization and impairment;

Gearing, which is calculated as Net debt (as defined below) divided by the sum of Net debt and equity attributable to equity holders of the relevant entity, expressed as a percentage;

Net debt, which is total debt and lease liabilities less cash and cash equivalents;

Adjusted Operating Cash Flow, which is calculated as net cash from operating activities excluding any financing costs (interest received, dividends received and borrowing costs relating to operating activities), plus payments for restoration and less payments for exploration expenditure; and

Unlevered Free Cash Flow, which is calculated as Adjusted Operating Cash Flow minus payments for restoration and minus payments for capital expenditures.

BHP Petroleum presents the non-GAAP financial measure, Underlying EBITDA, which it believes is useful to help assess current operational profitability, excluding the impacts of sunk costs (*i.e.*, depreciation from initial investment). BHP Petroleum defines Underlying EBITDA as profit from operations plus depreciation and amortization expense, net impairments and other. BHP Petroleum also presents net costs, a non-GAAP financial measure, in connection with its presentation of BHP Petroleum unit costs, which BHP Petroleum believes provides a consistent benchmark relative to volumes, that is in line with external market comparisons. BHP Petroleum also uses these non-GAAP financial measures to assess the performance of BHP Petroleum. These measures, however, should not be considered to be an indication of, or alternative to, corresponding measures of gross profit, net profit, cash flows from operating activities or other figures determined in accordance with IFRS. In addition, the measures may not be comparable to similar measures presented by other companies.

Accordingly, undue reliance should not be placed on the non-GAAP financial measures contained in this prospectus, and the non-GAAP financial measures should not be considered in isolation or as a substitute for financial measures computed in accordance with IFRS. Although certain of these data have been extracted or derived from Woodside’s and BHP Petroleum’s consolidated or combined financial statements (as applicable), these data have not been audited or reviewed by Woodside’s or BHP Petroleum’s independent auditors. You are urged to read carefully the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside*,” Woodside’s consolidated financial statements and related notes thereto, the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum*” and BHP Petroleum’s combined financial statements and related notes thereto.

A reconciliation of EBIT, Underlying EBITDA, Unlevered Free Cash Flow, Gearing, Net debt, and Adjusted Operating Cash Flow to Woodside’s financial statements can be found in the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside–Non-GAAP Financial Measures*.” A reconciliation of Underlying EBITDA to BHP Petroleum’s financial statements can be found in the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum–Financial Results–Underlying EBITDA*.” A reconciliation of net costs to BHP Petroleum’s financial statements can be found in the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum–Business Overview, Strategy and Key Performance Drivers–Business Environment–BHP Petroleum Costs*.”

Table of Contents

Currencies and Exchange Rates

References in this prospectus to “dollars,” “USD,” “\$,” or “cents” are to the currency of the United States and references to “A\$” are to the currency of Australia. All dollar figures are expressed in United States currency, unless otherwise stated. Unless otherwise indicated, the U.S. dollar value of Share Consideration presented herein is converted into dollars based on the exchange rate for such day reported by the Reserve Bank of Australia (the “RBA”).

Trademarks and Service Marks

Woodside, BHP, BHP Petroleum and their respective subsidiaries own or have rights to various trademarks, logos, service marks and trade names that each uses in connection with the operation of its business. Woodside, BHP, BHP Petroleum and their respective subsidiaries each also owns or has the rights to copyrights that protect the content of its respective products. Solely for convenience, the trademarks, service marks, trade names and copyrights referred to in this prospectus are listed without the ™, ® and © symbols, but such references do not constitute a waiver of any rights that might be associated with the respective trademarks, service marks, trade names and copyrights included or referred to in this prospectus.

Industry and Market Data

This prospectus contains industry, market and competitive position data that are based on industry publications and studies conducted by third parties as well as Woodside’s internal estimates and research. These industry publications and third-party studies generally state that the information they contain has been obtained from sources believed to be reliable, although they do not guarantee the accuracy or completeness of such information. While Woodside believes that each of these publications and third-party studies is reliable, Woodside has not independently verified the market and industry data obtained from these third-party sources. Forecasts and other forward-looking information obtained from these sources are subject to the same qualifications and uncertainties as the other forward-looking statements contained in this prospectus and may differ among third-party sources. These forecasts and forward-looking information are subject to uncertainty and risk due to a variety of factors, including those described in the sections entitled “*Risk Factors*” and in “*Cautionary Statement Regarding Forward-Looking Statements.*” These and other factors could cause results to differ materially from those expressed in each of Woodside’s and BHP Petroleum’s forecasts or estimates or those of independent third parties. While Woodside believes its internal research is reliable and its selection of industry publications and third-party studies and the description of its market and industry are appropriate, neither such research nor these descriptions have been verified by any independent source. In addition, references to “independent energy company” in this prospectus exclude government-backed national oil companies (“NOCs”), companies with free float less than 60% (e.g., LUKOIL, Wintershall Dea and Rosneft), major integrated oil and gas companies (being BP, Chevron, Eni, ExxonMobil, Repsol, Shell and Total) and Canadian oil sands companies (e.g., Canadian Natural Resources, Cenovus and Suncor). The companies with free float less than 60% and the Canadian oil sands companies identified in the prior sentence are not exhaustive. However, the list of major integrated oil and gas companies includes all such companies that Woodside identifies as major integrated oil and gas companies and that are excluded from the definition of “independent energy company” for the purpose of this prospectus.

Non-Applicability of U.S. Proxy and Other Rules

Woodside will be exempt from certain rules under the Securities Exchange Act of 1934 (the “Exchange Act”), including the proxy rules, which impose certain disclosure and procedural requirements for proxy solicitations under Section 14 of the Exchange Act, and will not be required to comply with Regulation FD, which addresses certain restrictions on the selective disclosure of material information. In addition, among other matters, Woodside’s officers, Directors and principal shareholders will be exempt from the reporting and “short-swing” profit recovery provisions of Section 16 of the Exchange Act and the rules under the Exchange Act with respect to their purchases and sales of Woodside Shares. If Woodside loses its status as a foreign private issuer, it will no longer be exempt from such rules and, among other things, will be required to file periodic reports and financial statements as if it were a domestic U.S. issuer.

Table of Contents

Exchange Controls

The United States does not presently impose restrictions on the transfer of capital to and from the United States beyond certain currency reporting requirements or economic sanctions regimes. Non-United States resident shareholders may currently receive dividend payments without United States governmental approval so long as the recipient is not a designated target of United States sanctions.

Under Australian foreign exchange controls currently in effect, transfers of capital to and from Australia are not subject to prior government approval and, except as described below, Australia does not restrict the flow of currency into or out of the country. Regulations may be made under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 of Australia (“AML/CTF Act”) prohibiting the entering into of transactions involving prescribed foreign countries. As of the date of this prospectus, no such regulations are in place. To control tax evasion and money laundering, the AML/CTF Act also requires certain transactions to be reported to the Australian Transaction Reports and Analysis Center, and prohibits reporting entities from providing certain services to customers without having complied with certain obligations under the AML/CTF Act (for example “know your customer” checks). The Autonomous Sanctions Regulations 2011 promulgated under the Autonomous Sanctions Act 2011 of Australia, the Charter of the United Nations Act 1945 of Australia and other acts and regulations in Australia restrict or prohibit payments, transactions or other dealings with assets having a proscribed connection with certain countries or named individuals or entities subject to financial sanctions or identified with terrorism. The Australian Department of Foreign Affairs and Trade maintains a list of all persons and entities subject to financial sanctions or having a proscribed connection with terrorism which is available to the public at the Department of Foreign Affairs and Trade’s website. There are no specific restrictions regarding the remittance of profits, dividends, or capital.

CERTAIN DEFINED TERMS

| | |
|------------------------------|---|
| \$, \$m | US dollars unless otherwise stated, millions of dollars |
| 1P | proved reserves |
| 2P | proved plus probable reserves |
| A\$ | Australian dollars |
| ACCC | Australian Competition and Consumer Commission |
| Adjusted Operating Cash Flow | calculated as net cash from operating activities excluding any financing costs (interest received, dividends received and borrowing costs relating to operating activities), plus payments for restoration and less payments for exploration expenditure |
| ADS Distribution Record Date | the record date for determining holders of BHP ADSs entitled to receive New Woodside ADSs, which will be publicly announced by the BHP Depository. The ADS Distribution Record Date is expected to be 5:00 p.m. (New York City time) on 26 May 2022. This date and time are indicative and subject to change. |
| ADRs | American Depositary Receipts evidencing American Depositary Shares |
| AEDT | Australian Eastern Daylight Time |
| AEMO | Australian Energy Market Operator |
| AEST | Australian Eastern Standard Time |
| ASIC | Australian Securities and Investments Commission |
| ASX | Australian Securities Exchange Ltd or the Australian Securities Exchange, as the context requires |
| ASX Listing Rules | the listing rules of the ASX |
| ASX Recommendations | the ASX Corporate Governance Council' s Corporate Governance Principles and Recommendations (4th Edition) |
| ATO | Australian Taxation Office |
| AWST | Australian Western Standard Time |
| BHP | BHP Group Ltd, a public company incorporated in Australia with registration number 004 028 077 and having its registered office at 171 Collins Street, Melbourne, Victoria 3000, Australia, which, prior to Implementation, is the ultimate parent company of BHP Petroleum |
| BHP ADSs | American Depositary Shares representing BHP Shares; each BHP ADS represents the right to receive, and to exercise the beneficial ownership interests, in two BHP Shares |
| BHP Board | the directors of BHP from time to time acting as a board |

Table of Contents

| | |
|------------------------|---|
| BHP Competing Proposal | as defined in the Share Sale Agreement, including a proposal which, if entered into or completed, would result in a party other than Woodside directly or indirectly acquiring BHP Petroleum or a substantial part of its business or assets (or would result in a similar outcome), or which would require BHP to abandon or not proceed with the Merger |
| BHP Deposit Agreement | the Second Amended and Restated Deposit Agreement, dated as of 2 July 2007, by and among BHP Group Limited, Citibank, N.A., as BHP Depositary, and the Holders and Beneficial Owners of BHP ADSs issued thereunder |
| BHP Depositary | Citibank, N.A., as depositary bank for the BHP ADSs |
| BHP Petroleum | BHP Petroleum International Pty Ltd with registration number 006 923 897 and, unless context otherwise requires, its subsidiaries, presented on a post-Restructure basis and excludes BHP BK Limited, BHP Billiton Petroleum Great Britain Limited, BHP Mineral Resources Inc., BHP Copper Inc. and its subsidiaries and BHP Capital Inc. |
| BHP Register | the register of members of BHP maintained under the Corporations Act |
| BHP Shareholders | holders of BHP Shares |
| BHP Shares | fully paid ordinary shares in the capital of BHP, including shares held by the custodian in respect of which BHP ADSs have been issued |
| Brent | Intercontinental Exchange (ICE) Brent Crude deliverable futures contract (oil price) |
| Browse | the Browse Project located in the offshore Browse Basin, approximately 425 km north of Broome in Western Australia, comprising the Brecknock, Calliance and Torosa fields |
| Business Day | a day that is not a Saturday, Sunday or a public holiday or bank holiday in Melbourne, Australia; Perth, Australia; London, United Kingdom; or New York City, United States of America |
| CFIUS | the Committee on Foreign Investment in the United States |
| CGT | capital gains tax |
| Chairman | the Chairman of the Woodside Board |
| CHF | Swiss francs |
| CNOOC | CNOOC Limited and / or any one or more of its subsidiaries, as the context requires |
| Code | the Internal Revenue Code of 1986, as amended |
| Completion Payment | the Woodside Dividend Payment, plus or minus the Locked Box Payment (as appropriate) and any other adjustments in accordance with the Share Sale Agreement |
| Condensate | hydrocarbons that are gaseous in a reservoir but that condense to form liquids as they rise to the surface |

Table of Contents

| | |
|--------------------------|---|
| Conditions | the conditions precedent to Implementation of the Merger as set out in the Share Sale Agreement and as detailed in the section entitled “ <i>The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions</i> ” |
| Corporations Act | Corporations Act 2001 (Cth) |
| Cps | cents per share |
| CY | calendar year ended 31 December |
| Dated Brent | pricing marker for physical cargo of North Sea Brent light crude oil, which has been allocated a specific forward-loading date |
| Distribution Entitlement | the Share Consideration to be distributed to BHP Shareholders (and transferred to the Sale Agent in the case of New Woodside Shares attributable to all Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) pro rata to their respective ownership of BHP |
| Distribution Record Date | the time determined by the BHP Board as the date for determining BHP Shareholders’ entitlement to the distribution of the Share Consideration, which is expected to be (i) 7:00 p.m., AEST, on 26 May 2022, for BHP Shareholders on the Australian Register, (ii) 6:00 p.m. (British Summer Time) on 26 May 2022, for BHP depository interest holders, and (iii) 5:00 p.m. (South African Standard Time) on 26 May 2022, for BHP Shareholders on the South African branch register. These times and dates are indicative and subject to change. BHP will publicly announce any change to the indicative Distribution Record Date, if applicable |
| DRS | direct registration system |
| DTC | The Depository Trust Company |
| Effective Time | 11:59 p.m. (AEST) on 30 June 2021, the effective time of the Merger |
| EIP | the Executive Incentive Plan |
| EIS | the Executive Incentive Scheme |
| Equity Award Rules | the rules approved by the Woodside Board in February 2018 that govern offers of incentive securities to eligible employees |
| Equity Right | a right to receive a fully paid Woodside Share (or, in the Woodside Board’ s discretion, a cash equivalent), of a type granted under the Woodside Equity Plan or Supplementary Woodside Equity Plan |
| Equity Ratio | as defined in the Share Sale Agreement |
| ESG | environmental, social and governance |
| Exchange Act | the U.S. Securities Exchange Act of 1934 |
| Executive Committee | Woodside’ s executive committee (including the Executive Directors) |
| Executive Director | a Woodside Director who is an employee of Woodside |
| Existing Woodside ADSs | the Woodside ADSs outstanding prior to Implementation |

Table of Contents

Conversion factors

Except as otherwise disclosed, the following conversion factors are applied in this prospectus.

| Product | Factor | Conversion factors |
|-------------------------------|---------------|---------------------------|
| Pipeline natural gas | 1 TJ | 163.6 boe |
| Liquefied natural gas (LNG) | 1 tonne | 8.9055 boe |
| Condensate | 1 bbl | 1.000 boe |
| Oil | 1 bbl | 1.000 boe |
| Liquefied petroleum gas (LPG) | 1 tonne | 8.1876 boe |
| Natural gas | 1 MMBtu | 0.1724 boe |
| Dry gas | 1 MMboe | 5.7 Bcf |

Minor changes to some conversion factors can occur over time due to gradual changes in the process stream.

QUESTIONS AND ANSWERS ABOUT THE MERGER

The following are some questions that you may have regarding the proposed Merger and related matters and brief answers to those questions. These questions and answers, as well as the following summary, are not meant to be a substitute for the information contained in the remainder of this prospectus, and these questions and answers are qualified in their entirety by the more detailed descriptions and explanations contained elsewhere in this prospectus. Woodside urges you to carefully read the remainder of this prospectus in its entirety, including the sections of this prospectus entitled “Risk Factors,” “The Merger,” and “The Share Sale Agreement and Related Agreements”; the management’s discussion and analysis of financial condition and results of operations of Woodside and BHP Petroleum, the business description of Woodside, BHP Petroleum and the Merged Group, and Woodside’s and BHP Petroleum’s consolidated financial statements and related notes, in addition to the exhibits to the registration statement on Form F-4 of which this prospectus forms a part and the annexes attached hereto, as they contain important information about Woodside, BHP Petroleum, the New Woodside Shares, the New Woodside ADSs, the Share Sale Agreement and the Merger.

Q: What is the proposed transaction?

A: On 17 August 2021, Woodside publicly announced its entry into the Merger Commitment Deed with BHP to facilitate the combination of their respective oil and gas portfolios through an all-stock merger in which Woodside (or its nominee) will acquire all of the ordinary shares of BHP Petroleum (the “Merger”).

With the combination of two high quality asset portfolios, the Merger is expected to create a top 10 global independent energy company by hydrocarbon production (Woodside analysis based on the Wood Mackenzie Corporate Benchmarking Tool Q4 2021, 1 December 2021, see the section titled “*Disclaimer and Important Notices—Industry and Market Data*” for clarification of independent energy company) and the largest energy company listed on the ASX. Woodside believes that the Merger will help it supply the energy needed for global growth and support its financial resilience through the energy transition. The Merger will be on a cash-free and debt-free basis, where BHP Petroleum will settle all intercompany loan balances prior to Implementation of the Merger. See the section entitled “*Unaudited Pro Forma Condensed Combined Financial Statements*” for additional information.

On 22 November 2021, Woodside and BHP publicly announced they had entered into the Share Sale Agreement, under which, and subject to the terms and conditions therein, Woodside (or its nominee) will acquire (with such acquisition to be deemed to have occurred as of the Effective Time) all of the ordinary shares in BHP Petroleum International Pty Ltd, a wholly owned subsidiary of BHP that, following completion of the Restructure, will hold the oil and gas assets of BHP, in exchange for the Share Consideration and the Completion Payment (subject to adjustment). Immediately upon Implementation, the Share Consideration will be issued by Woodside to BHP to be distributed immediately to BHP Shareholders (and transferred to the Sale Agent in the case of all New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) via an in-specie dividend. Upon Implementation, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Upon Implementation, Existing Woodside Shareholders will own approximately 52% and BHP Shareholders will own approximately 48% of the Merged Group (based on the issue of 914,768,948 New Woodside Shares and the number of Woodside Shares outstanding on 24 March 2022) subject to any BHP Shareholders being Ineligible Foreign BHP Shareholders or Relevant Small Parcel BHP Shareholders. Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022). Based on the assumptions described above, upon Implementation, each holder of BHP ADSs as of the ADS Distribution Record Date will be entitled to receive 0.3614 of a New Woodside ADS in respect of each BHP ADS owned on the ADS Distribution Record Date (subject to payment of taxes and applicable Woodside Depositary and BHP Depositary fees and expenses).

Table of Contents

The Woodside Shares are listed on the ASX under the ticker symbol “WPL.” Woodside has applied to change its ticker symbol on the ASX from “WPL” to “WDS,” subject to shareholder approval of the proposed name change. No trading market exists in the United States for the Woodside Shares. Woodside has established the Woodside ADR Program for the Existing Woodside ADSs, with each Woodside ADS representing one Woodside Share. Woodside has applied to list the Woodside ADSs on the NYSE under the symbol “WDS,” and intends to file the F-6 Registration Statement with the SEC with respect to the New Woodside ADSs and to amend and restate the Woodside Deposit Agreement for the Woodside ADR Program to, among other things, reflect Woodside’s status as an SEC reporting company and certain regulatory changes in Australia and in the United States.

BHP ADSs are traded on the NYSE under the symbol “BHP,” with each BHP ADS representing two BHP Shares. Each holder of BHP ADSs as of the ADS Distribution Record Date will receive in the Merger, in lieu of New Woodside Shares, New Woodside ADSs (subject to payment of taxes and applicable Woodside Depositary and BHP Depositary fees and expenses). Holders of BHP ADSs will not be able to trade the New Woodside Shares underlying the New Woodside ADSs received as Share Consideration for the BHP ADSs before such New Woodside Shares are deposited with the Woodside Depositary and the corresponding Woodside ADSs are issued and delivered to the BHP ADS holders. BHP Shares and BHP ADSs will not be exchanged or cancelled in the Merger, but will continue to represent an interest in BHP without the oil and gas assets in BHP. Following Implementation, BHP Shareholders as of the Distribution Record Date that are not Ineligible Foreign BHP Shareholders or Relevant Small Parcel BHP Shareholders (“Participating BHP Shareholders”) will hold both New Woodside Shares and BHP Shares, and holders of BHP ADSs will hold both New Woodside ADSs and BHP ADSs.

Following Implementation, the Woodside Shares will continue to be listed on the ASX and are also expected to be listed on the LSE.

The Merger cannot be completed without the satisfaction (or waiver, if permitted) of several Conditions under the Share Sale Agreement by 30 June 2022 (or an agreed later date), including approval by certain regulatory and competition authorities, approval of Woodside Shareholders, the issuing of the Independent Expert’s Report and the completion of the Restructure. See the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions.*”

If all Conditions of the Merger are satisfied, including the approval of the Woodside Shareholders, then (i) 100% of the issued share capital of BHP Petroleum International Pty Ltd will be transferred to Woodside (or a related entity of Woodside, at Woodside’s direction) and BHP Petroleum will become a wholly owned subsidiary of Woodside, (ii) Woodside will pay the Purchase Price, including the Share Consideration, (iii) BHP will immediately distribute the Share Consideration to BHP Shareholders (and transfer to the Sale Agent in the case of all New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) as of the Distribution Record Date, and (iv) Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders (each as defined below), if applicable, will receive a cash payment in lieu of receiving New Woodside Shares. See the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Purchase Price.*”

Q: Why is Woodside proposing the Merger?

A: The board of directors of Woodside (the “Woodside Board”) considers that the Merger of Woodside and BHP Petroleum is a highly attractive opportunity that is expected to create a top 10 global independent energy company by hydrocarbon production (Woodside analysis based on the Wood Mackenzie Corporate Benchmarking Tool Q4 2021, 1 December 2021, see the section titled “*Disclaimer and Important Notices–Industry and Market Data*” for clarification of independent energy company) and the largest energy company listed on the ASX.

The Merger is expected to deliver benefits for both Woodside Shareholders and BHP Shareholders by creating a long-life conventional portfolio of scale and diversity of geography, product and end markets. See the section entitled “*The Merger–Woodside’s Reasons for the Merger.*”

Table of Contents

Q: After the Merger, how much of the combined company will BHP Shareholders own?

A: Upon Implementation, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Upon Implementation, Existing Woodside Shareholders will own approximately 52% and BHP Shareholders will own approximately 48% of the Merged Group (based on the issue of 914,768,948 New Woodside Shares and the number of Woodside Shares outstanding on 24 March 2022) subject to any BHP Shareholders being Ineligible Foreign BHP Shareholders or Relevant Small Parcel BHP Shareholders. Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022). For additional information relating to the Purchase Price, see the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Purchase Price.*”

Eligible holders of BHP ADSs will receive a number of New Woodside ADSs that corresponds to the Woodside Shares received with respect to the BHP Shares represented by their BHP ADSs (subject to payment of taxes and applicable Woodside Depository and BHP Depository fees and expenses). Based on the assumptions described above, upon Implementation, each holder of BHP ADSs as of the ADS Distribution Record Date will be entitled to receive 0.3614 of a New Woodside ADS in respect of each BHP ADS owned on the ADS Distribution Record Date. See the section entitled “*Description of Woodside American Depositary Shares.*”

Q: Will any new directors be appointed to the Woodside Board in connection with the transaction?

A: Following Implementation, it is intended that the Woodside Board will select a current BHP director to be appointed to the Woodside Board.

Q: What relationship will exist between Woodside and BHP following the Merger with respect to the BHP Petroleum business?

A: Following Implementation, Woodside and BHP will remain as separate entities, with their respective securities listed on several stock exchanges. With respect to BHP Petroleum, the relationship of the two companies will continue through an Integration and Transition Services Agreement, dated as of 22 November 2021, which BHP and Woodside entered into simultaneously with their entry into the Share Sale Agreement. See the section entitled “*The Share Sale Agreement and Related Agreements–The Integration and Transition Services Agreement.*”

Q: Is the obligation of each of Woodside and BHP to complete the Merger subject to any conditions?

A: Implementation of the Merger is subject to the satisfaction (or waiver, if permitted) of a number of Conditions as set forth in the Share Sale Agreement by 30 June 2022 (or an agreed later date), including, among others, approval by certain regulatory and competition authorities, approval of Woodside Shareholders, the issuing of the Independent Expert’s Report, and the completion of the Restructure. No vote of BHP Shareholders is required to complete the Merger nor for the BHP Shareholders to receive the Share Consideration.

The Merger Resolution will be approved if more than 50% of the Woodside Shareholders who cast a vote at the meeting of Woodside Shareholders (the “Woodside Shareholders Meeting”) vote in favor of the Merger Resolution. Three Woodside Shareholders present at the Woodside Shareholders Meeting will constitute a quorum. If the Merger Resolution is not approved by the Woodside Shareholders (or if any other Condition to completion of the Merger is not met or waived), the Merger will not be completed, and BHP Shareholders and BHP ADS holders will not receive the Share Consideration.

For a more detailed discussion of the Conditions to the completion of the Merger, see the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions.*”

Table of Contents

Q: Are there risks associated with the Merger?

A: Yes. There are important risks involved. You are urged to carefully read the section entitled “*Risk Factors*” included in this prospectus, in its entirety.

Q: When will the Merger be completed?

A: Woodside and BHP are working to complete the Merger in accordance with the timetable set out in the Share Sale Agreement. In addition to regulatory approvals, and assuming that the Merger Resolution is approved by the Woodside Shareholders at the Woodside Shareholders Meeting, other important Conditions to the completion of the Merger exist. Assuming the satisfaction of all necessary Conditions, Woodside and BHP are targeting Implementation of the Merger on 1 June 2022.

The Share Sale Agreement contains a cut-off date of 30 June 2022 for Implementation, which may be extended at the agreement of Woodside and BHP. For a discussion of the Conditions to the completion of the Merger, see the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions.*”

Q: What happens if the Merger is not completed?

A: If the Merger is not completed for any reason, BHP Shareholders will not receive the Share Consideration (meaning BHP Shareholders and holders of BHP ADSs will not be entitled to receive any New Woodside Shares or New Woodside ADSs, as applicable, under the Merger), and BHP Petroleum will remain a wholly owned subsidiary of BHP (unless BHP determines otherwise).

Q: Is the Distribution Entitlement subject to adjustment based on changes in the prices of Woodside Shares or BHP Shares? Can it be adjusted for any other reason?

A: BHP Shareholders will be entitled to receive a fixed number of New Woodside Shares and holders of BHP ADSs will be entitled to receive a fixed number of New Woodside ADSs, that will be determined based on a fixed percentage of total outstanding Woodside Shares and the total number of BHP Shares outstanding at the time of the Merger. The market value of Woodside Shares and the market value of BHP Shares at Implementation may vary significantly from their respective values on the date that the Share Sale Agreement was executed or at other dates, such as the date of this prospectus or the date of the Woodside Shareholders Meeting. Share price changes may result from a variety of factors, including changes in Woodside’s or BHP’s respective businesses, operations or prospects, regulatory considerations, and general business, market, industry or economic conditions. The number of New Woodside Shares to be issued to BHP will be adjusted in very limited circumstances but will not be adjusted to reflect any changes in the market value of Woodside Shares or market value of BHP Shares. Therefore, the aggregate market value of the New Woodside Shares and New Woodside ADSs that BHP Shareholders and holders of BHP ADSs, respectively, are entitled to receive at the time that the Merger is completed could vary significantly from the value of such shares on the date of this prospectus.

Q: What are the material U.S. federal income tax consequences of the Special Dividend to U.S. holders of BHP Shares or BHP ADSs?

A: In general, for U.S. federal income tax purposes, a U.S. holder of BHP Shares or BHP ADSs must include in its gross income the gross amount of any dividend paid by BHP to the extent of its current or accumulated earnings and profits (as determined for U.S. federal income tax purposes). However, BHP does not calculate earnings and profits in accordance with U.S. federal income tax principles. Accordingly, U.S. holders of BHP Shares or BHP ADSs should expect to treat the entire amount of the New Woodside Shares or New Woodside ADSs to be issued in connection with the Merger and distributed by BHP by way of an in-specie dividend (the “Special Dividend”) as a taxable dividend for U.S. federal income tax purposes. Tax matters

Table of Contents

are very complicated and the tax consequences of the Special Dividend to each U.S. holder of BHP Shares or BHP ADSs may depend on the holder's particular facts and circumstances. BHP Shareholders and holders of BHP ADSs are urged to consult with and rely solely upon their own tax advisers to understand fully the tax consequences to them of the Special Dividend and of holding Woodside Shares or Woodside ADSs (as applicable). See the sections entitled "*Material U.S. Federal Income Tax Considerations*" and "*Material Australian Tax Considerations*" for additional information.

Q: Where can I find more information about Woodside, BHP Petroleum and the transactions contemplated by the Share Sale Agreement?

A: You can find out more information about Woodside, BHP Petroleum and the transactions contemplated by the Share Sale Agreement by reading this prospectus. See the sections entitled "*Business and Certain Information About Woodside*," "*Business and Certain Information About BHP Petroleum*" "*Business and Certain Information About the Merged Group*," "*Regulatory Information About the Merged Group*," "*Management's Discussion and Analysis of Financial Condition and Results of Operations of Woodside*," "*Management's Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum*," "*Unaudited Pro Forma Condensed Combined Financial Statements*," "*Board of Directors and Management of the Merged Group After the Merger*," and "*Executive Compensation*" for more information about Woodside, BHP Petroleum and the Merged Group. See "*The Merger*," "*The Share Sale Agreement and Related Agreements*" and "*Regulatory Approvals Related to the Merger*" for more information about the transactions contemplated by the Share Sale Agreement.

Q: Who can answer my questions?

A: If you are a Woodside Shareholder or a holder of Existing Woodside ADSs and you have any questions about the Merger or you would like to request additional documents, including copies of this prospectus, please contact Woodside at (61 8) 9348 4000 or merger@woodside.com.au.

BHP Shareholders who have questions for BHP regarding the Merger or any related matter described in this prospectus are referred to the contacts identified in the information included in BHP's SEC filings, available for review free of charge through the SEC's website at www.sec.gov or on BHP's website, www.bhp.com. The information contained in, or that can be accessed through, the SEC's or BHP's website is not intended to be incorporated into this prospectus.

You also are urged to consult your own legal, tax and/or financial advisers with respect to any aspect of the Merger, the Share Sale Agreement or other matters discussed in this prospectus.

Table of Contents

QUESTIONS AND ANSWERS ABOUT WOODSIDE ORDINARY SHARES AND AMERICAN DEPOSITARY SHARES

For the purposes of this section, “I,” “my,” “you” and “your” refer to each Participating BHP Shareholder as of the Distribution Record Date and holder of BHP ADSs as of the ADS Distribution Record Date, as further described herein. The following is only a summary of the questions and answers you may have relating to the Woodside Shares or New Woodside ADSs that you may be entitled to receive as Share Consideration upon Implementation. If you are a holder of BHP ADSs, following distribution of the New Woodside ADSs, your rights as a New Woodside ADS holder will be governed by, among other things, the terms of the Woodside Deposit Agreement. You should read the section below in conjunction with the section entitled “Description of the Woodside American Depositary Shares” and the Woodside Deposit Agreement, which will be amended and restated in connection with the Merger. The Woodside Deposit Agreement and the form of amendment thereto are included as exhibits to the registration statement on Form F-4 of which this prospectus forms a part. For details on how to obtain a full copy of the Woodside Deposit Agreement, see the section entitled “Where You Can Find Additional Information.”

Q: What is an American Depositary Share?

A: An American Depositary Share (“ADS”) is a security representing another security that has been deposited at a custodian bank. ADSs allow investors in the United States to hold and trade interests in foreign-based companies more easily. ADSs may be held either (1) directly (a) by having an American Depositary Receipt, (“ADR”), which is a certificate evidencing a specific number of ADSs, registered in such holder’s name, or (b) by holding uncertificated ADSs in the depository’s direct registration system (“DRS”), or (2) indirectly through the holder’s broker or other financial institution. New Woodside ADSs will be issued through the Woodside Depository’s DRS, unless, subsequently, a New Woodside ADS holder specifically requests certificated ADRs. Each Woodside ADS represents one Woodside Share. For a description of New Woodside ADSs, see the section entitled “Description of Woodside American Depositary Shares.” For a description of the Woodside Shares, see the section entitled “Description of Woodside Shares.”

Q: Will the New Woodside ADSs be listed?

A: Woodside has applied to list the Woodside ADSs on the NYSE under the symbol “WDS.” The Woodside Shares are currently listed on the ASX and quoted in Australian dollars under the symbol “WPL” and, upon Implementation, are expected to be listed on the LSE under the symbol “WDS”. Woodside has applied to change its ticker symbol on the ASX from “WPL” to “WDS,” subject to shareholder approval of the proposed name change.

Q: Can I request a certificated ADS?

A: All New Woodside ADSs issued will be part of the Woodside Depository’s DRS (unless otherwise requested by the applicable holder), and a registered holder will receive periodic statements from the Woodside Depository which will show the number of uncertificated Woodside ADSs registered in such holder’s name. Upon receipt by the Woodside Depository of a proper instruction from a registered holder of uncertificated Woodside ADSs requesting the exchange of uncertificated Woodside ADSs for certificated Woodside ADSs, the Woodside Depository will issue and deliver as directed by the registered holder a certificated ADS (also referred to as an ADR) evidencing those Woodside ADSs.

Q: How can I surrender my Woodside ADS and obtain Woodside Shares or other deposited securities?

A: If you are a registered holder, you may turn in your Woodside ADSs to the Woodside Depository. If you are not a registered holder, you must provide appropriate instructions to your broker in order to turn in your Woodside ADSs. Upon payment of applicable fees and expenses and of any taxes or charges, such as stamp taxes or share transfer taxes or fees, the Woodside Depository will direct the custodian to deliver the Woodside Shares and any other deposited securities underlying the Woodside ADSs to you or a person you designate.

Table of Contents

Q: How do I vote as a Woodside ADS holder?

A: You may vote indirectly by instructing the Woodside Depository to vote the Woodside Shares or other deposited securities underlying your Woodside ADSs. If you hold your ADSs in a brokerage, bank, custodian or other nominee account, you should contact your broker, bank, custodian or other nominee account to find out what actions are required to instruct your broker, bank or other nominee to exercise your voting rights with respect to the Woodside ADSs on your behalf. Otherwise, you could exercise your right to vote directly if you withdraw the Woodside Shares underlying your Woodside ADSs. However, there can be no guarantee that you will be informed about any applicable meeting of Woodside Shareholders sufficiently far in advance to withdraw the Woodside Shares underlying your Woodside ADSs in time to vote such Woodside Shares directly at such meeting.

Upon timely notice from Woodside, the Woodside Depository will notify you of any upcoming vote and arrange to deliver Woodside's voting materials to you by regular mail delivery or by electronic transmission. The materials will (i) describe the matters to be voted on and (ii) explain how you may instruct the Woodside Depository to vote the Woodside Shares or other deposited securities underlying your Woodside ADSs. For your voting instructions to be valid, the Woodside Depository must receive them on or before the date specified. The Woodside Depository will, subject to timely receipt of valid voting instructions, applicable law and the provisions of the Deposit Agreement, the deposited securities and the constitution of Woodside, as amended from time to time (the "Woodside Constitution"), vote or have its agents vote the Woodside Shares or other deposited securities as you instruct. Woodside cannot assure you that you will receive the voting materials in time to ensure that you can instruct the Woodside Depository to vote the Woodside Shares underlying your Woodside ADSs. In addition, the Woodside Depository and its agents are not responsible for failing to carry out voting instructions or for the manner in which any vote is cast. This means that you may not be able to exercise your right to vote and you may have no recourse if the Woodside Shares underlying your Woodside ADSs are not voted as you requested.

Q: How will I receive dividends on the Woodside Shares underlying my Woodside ADSs?

A: Woodside may make various types of distributions with respect to the Woodside Shares. The Woodside Depository has agreed to distribute to you the cash dividends or other cash distributions it or the custodian receives on the Woodside Shares or other deposited securities, after converting the cash distribution into U.S. dollars (if issued in a different currency) and deducting applicable fees, taxes and expenses. You will receive these distributions in proportion to the number of Woodside Shares your Woodside ADSs represent as of the relevant record date set by the Woodside Depository with respect to the Woodside ADSs. The Woodside Depository is not responsible if it determines, to the extent permitted to do so under the Woodside Deposit Agreement, that it is unlawful or impractical to make a distribution available to any Woodside ADS holders. Other than with respect to the Merger, Woodside has no obligation to register the New Woodside ADSs, the Woodside Shares, rights or other securities under the Securities Act. Other than with respect to the Merger, Woodside also has no obligation to take any other action to permit the distribution of the New Woodside ADSs or the New Woodside Shares to BHP Shareholders or holders of BHP ADSs. Except as specified in the Woodside Deposit Agreement, Woodside has no obligation to take any other action to permit the distribution of Woodside Shares, rights or other property to Woodside ADS holders. This means that you may not receive certain distributions Woodside makes on the Woodside Shares or any value for them if it is illegal or impractical for Woodside or the Woodside Depository to make them available to you. See the section entitled "*Description of Woodside American Depository Shares*" for additional information.

Q: Are there possible adverse effects of the Merger on, or other risks to, the value of Woodside Shares or New Woodside ADSs ultimately to be received by BHP Shareholders and holders of BHP ADSs?

A: Issuance of Woodside Shares pursuant to the Merger may negatively affect the market price of Woodside Shares, and in turn, the market price of the Woodside ADSs. The market price of the Woodside Shares and Woodside ADSs also will be affected by the performance of Merged Group's business and other risks

Table of Contents

associated with the Merger. This risk and other risk factors associated with the Merger are described in more detail in the section entitled “*Risk Factors*.”

Holders of BHP ADSs will not be able to trade the New Woodside Shares underlying the New Woodside ADSs received as Share Consideration for the BHP ADSs before such New Woodside Shares are deposited with the Woodside Depository for the New Woodside ADSs and the corresponding New Woodside ADSs are issued and delivered to the BHP ADS holders.

There can be no assurance that the New Woodside ADSs issued in the Merger will trade at prices equivalent to those at which Woodside Shares traded prior to the Merger or at which Woodside Shares may trade after the Merger, due to the costs associated with holding a Woodside ADS as compared to holding a Woodside Share, as well as the differences in rights between a Woodside Shareholder and a Woodside ADS holder. See the section entitled “*Description of Woodside American Depositary Shares*.”

QUESTIONS AND ANSWERS APPLICABLE TO BHP SHAREHOLDERS

For the purposes of this section, “I,” “my,” “mine,” “you” and “your” refer to each Participating BHP Shareholder as of the Distribution Record Date and holder of BHP ADSs as of the ADS Distribution Record Date, as further described elsewhere in this prospectus.

Q: What is this document?

A: This is a prospectus, which forms a part of Woodside’s registration statement on Form F-4, which is being used by Woodside to register the distribution of the New Woodside Shares to BHP Shareholders (and transfer to the Sale Agent in the case of New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) as Share Consideration.

Q: Why am I receiving this document?

A: You are receiving this prospectus because you are a U.S. resident holder of BHP Shares or a holder of BHP ADSs. If you are a Participating BHP Shareholder on the Distribution Record Date, you will be entitled to a fixed number of New Woodside Shares with respect to each BHP Share that you held as of the close of business on the Distribution Record Date. Each holder of BHP ADSs as of the ADS Distribution Record Date will receive in the Merger, in lieu of New Woodside Shares, the whole number of New Woodside ADSs corresponding to the Woodside Shares issued and delivered in respect of the BHP Shares representing the BHP ADSs. Holders of BHP ADSs as of the ADS Distribution Record Date will be entitled to receive (subject to payment of taxes and applicable Woodside Depository and BHP Depository fees and expenses) New Woodside ADSs in connection with the Merger, which will be issued by the Woodside Depository and will be governed by the terms of the Woodside Deposit Agreement. This prospectus will help you understand the Merger and the combined company following Implementation of the Merger, which will comprise Woodside and its subsidiaries (including BHP Petroleum) (the “Merged Group”) after the Merger.

Q: Are BHP Shareholders required to do anything?

A: BHP Shareholders as of the close of business on the Distribution Record Date or BHP ADS holders on the ADS Distribution Record Date, as applicable, will not be required to take any action to receive, subject to eligibility, New Woodside Shares or New Woodside ADSs in connection with the Merger. No vote of BHP Shareholders is required for the Merger or the sale of BHP Petroleum. BHP, as sole shareholder of BHP Petroleum International Pty Ltd prior to Woodside’s acquisition of BHP Petroleum, has approved the Merger. Therefore, you are not being asked for a proxy, and you are requested not to send Woodside or BHP a proxy, in connection with the Merger. You do not need to pay any consideration, exchange or surrender your existing BHP Shares or BHP ADSs or take any other action to receive the New Woodside Shares, or New Woodside ADSs, as applicable, in the Merger. Please do not send in any BHP Share certificates. The Merger will not affect the number of outstanding BHP Shares or any rights of BHP Shareholders.

Q: What will I receive as a BHP Shareholder or BHP ADS holder if the Merger is completed?

A: Pursuant to the Share Sale Agreement, and upon Implementation, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Upon Implementation, Existing Woodside Shareholders will own approximately 52% and BHP Shareholders will own approximately 48% of the Merged Group (based on the issue of 914,768,948 New Woodside Shares and the number of Woodside Shares outstanding on 24 March 2022) subject to any BHP Shareholders being Ineligible Foreign BHP Shareholders or Relevant Small Parcel BHP Shareholders. Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022).

Table of Contents

Holders of BHP ADSs will be entitled to receive a number of New Woodside ADSs that corresponds to the New Woodside Shares received on the BHP Shares represented by BHP ADSs (subject to payment of taxes and applicable Woodside Depository and BHP Depository fees and expenses). Based on the assumptions described above, upon Implementation, each holder of BHP ADSs as of the ADS Distribution Record Date will be entitled to receive 0.3614 of a New Woodside ADS in respect of each BHP ADS owned on the ADS Distribution Record Date.

Q: Will fractional New Woodside Shares or fractional New Woodside ADSs be issued in the Merger to BHP Shareholders or BHP ADS holders?

A: No. All BHP Shareholders will be entitled to receive a whole number of Woodside Shares, with their entitlement rounded down to the nearest whole number. Any fraction of a Woodside Share that a BHP Shareholder would have been entitled to, but for this rounding treatment, will be aggregated and sold by the Sale Agent and the proceeds retained by BHP. No fractional New Woodside ADSs will be issued or delivered. Any fractional entitlements to Woodside ADSs will be aggregated and sold by the BHP Depository, and the net cash proceeds (after deduction of applicable fees, taxes and expenses) will be distributed to the BHP ADS holders entitled thereto.

Q: Where will I be able to trade the New Woodside Shares and New Woodside ADSs?

A: The Woodside Shares are listed on the ASX under the ticker symbol “WPL.” Woodside has also applied to change its ticker symbol on the ASX from “WPL” to “WDS,” subject to shareholder approval of the proposed name change. No trading market exists in the United States for Woodside Shares. Holders of BHP ADSs will not be able to trade the New Woodside Shares underlying the New Woodside ADSs received as Share Consideration for the BHP ADSs before such New Woodside Shares are deposited with the Woodside Depository and corresponding New Woodside ADSs are issued and delivered to the BHP ADS holders. Woodside has applied to list the Woodside ADSs on the NYSE under the symbol “WDS.”

Q: What will happen to the BHP Shares owned by BHP Shareholders?

A: BHP’s current listings will not be changed as a result of the Merger. BHP Shares will continue to trade on the ASX under the ticker symbol “BHP” and will continue to be listed on the LSE and Johannesburg Stock Exchange (“JSE”) after Implementation of the Merger under the symbol “BHP” on the LSE and “BHG” on the JSE. Additionally, BHP ADSs will continue to trade on the NYSE under the symbol “BHP.”

Q: Will the number of BHP Shares or BHP ADSs that I own change as a result of the Merger?

A: No. The number of BHP Shares or BHP ADSs that you own will not change as a result of the Merger. BHP Shares and BHP ADSs will not be exchanged or cancelled in the Merger, but will continue to represent an interest in BHP without the oil and gas assets in BHP. Immediately following the Merger, BHP Shareholders will hold both New Woodside Shares and BHP Shares, and holders of BHP ADSs will hold both New Woodside ADSs and BHP ADSs.

Q: What is the Distribution Record Date for the distribution of Share Consideration?

A: The Distribution Record Date for the distribution is expected to be (i) 7:00 p.m., AEST, on 26 May 2022, for BHP Shareholders on the Australian register, (ii) 6:00 p.m. (British Summer Time) on 26 May 2022, for BHP depository interest holders, and (iii) 5:00 p.m. (South African Standard Time) on 27 May 2022, for BHP Shareholders on the South African branch register. These times and dates are indicative and subject to change. BHP will publicly announce any change to the expected Distribution Record Date, if applicable.

The BHP Depository will announce the ADS Distribution Record Date for distribution of the New Woodside ADSs to the holders of BHP ADSs. The ADS Distribution Record Date is expected to be 5:00 p.m. (New York City time) on 26 May 2022. This date and time are indicative and subject to change.

Table of Contents

If you transfer or sell your BHP Shares on or before the Distribution Record Date, you will have transferred or sold your right to receive the Share Consideration in the Merger. If you transfer or sell your BHP Shares after the Distribution Record Date for the Merger but before Implementation, you will not have transferred the right to receive the Share Consideration in the Merger. If you transfer or sell your BHP ADSs on or before the ADS Distribution Record Date, you will have transferred or sold your right to receive New Woodside ADSs in the Merger. If you transfer or sell your BHP ADSs after the ADS Distribution Record Date but before Implementation, you will not have transferred the right to receive New Woodside ADSs in the Merger.

Q: What if I don't want to hold New Woodside Shares or New Woodside ADSs?

A: If you do not want to hold the New Woodside Shares or New Woodside ADSs that you will receive at Implementation, then you may choose to sell such New Woodside Shares or New Woodside ADSs, subject to market conditions, through your broker or otherwise. Brokerage costs and other fees may apply.

Holders of BHP ADSs who wish to hold New Woodside Shares rather than New Woodside ADSs may surrender their BHP ADSs to the BHP Depository for cancellation and withdraw the BHP Shares that their surrendered BHP ADSs represent prior to 5:00 p.m. (New York City time) on 20 May 2022 (such time representing the time at which it is expected that the BHP Depository will restrict cancellations of BHP ADSs and withdrawals of BHP Shares pursuant to the terms of the BHP Deposit Agreement, and subject to payment of taxes and applicable BHP Depository fees and expenses) and hold such BHP Shares at the Distribution Record Date.

If you are unable to hold the New Woodside Shares under law, then you may contact BHP's share registrar, Computershare Investor Services, for details on whether you are classified as an Ineligible Foreign BHP Shareholder and therefore can participate in the sale facility arrangements in the Share Sale Agreement for Ineligible Foreign BHP Shareholders. You must provide BHP's share registrar with any requested information before 5:00 p.m. (AWST) on the Business Day prior to the Distribution Record Date. BHP may determine in its absolute discretion whether you may be classified as an Ineligible Foreign BHP Shareholder.

BHP will transfer the New Woodside Shares that each Ineligible Foreign BHP Shareholder would otherwise be entitled to receive to the Sale Agent appointed by BHP following consultation with Woodside to receive and sell New Woodside Shares comprising the Share Consideration attributable to the Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders (if applicable) to be dealt with in accordance with the procedures set out in the Share Sale Agreement.

Q: May I choose whether to receive New Woodside Shares or New Woodside ADSs?

A: No. Each Participating BHP Shareholder will receive New Woodside Shares as Share Consideration, and each holder of BHP ADSs will receive a number of New Woodside ADSs that corresponds to the New Woodside Shares received on the BHP Shares represented by their BHP ADSs (or cash in lieu of fractional entitlements to such New Woodside ADSs in certain circumstances).

BHP SHAREHOLDERS WILL NOT BE REQUIRED TO SURRENDER THEIR BHP SHARES IN THE MERGER. THE TRANSACTIONS WILL NOT RESULT IN ANY CHANGE IN BHP SHAREHOLDERS' OWNERSHIP OF BHP SHARES FOLLOWING THE MERGER.

SUMMARY

This summary highlights information contained elsewhere in this prospectus and may not contain all of the information that might be important to you. Woodside urges you to carefully read the remainder of this prospectus in its entirety, including the sections of this prospectus entitled “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum,” “Business and Certain Information About Woodside,” “Business and Certain Information About BHP Petroleum,” “Business and Certain Information About the Merged Group,” “Regulatory Information About the Merged Group,” “Unaudited Pro Forma Condensed Combined Financial Statements” and each of Woodside’s and BHP Petroleum’s consolidated combined financial statements and related notes thereto, in addition to the exhibits to the registration statement on Form F-4 of which this prospectus forms a part and the annexes attached hereto, because they contain important information about Woodside, BHP Petroleum, the New Woodside Shares, the New Woodside ADSs, the Share Sale Agreement and the Merger. Each item in this summary includes a page reference to direct you to a more complete description of the topics presented in this summary.

Information About the Companies (see page 79)

Woodside

Woodside led the development of the LNG industry in Australia and is recognized for its world-class capabilities as an integrated upstream supplier of energy. Woodside’s producing portfolio is primarily centered around the production of LNG from conventional offshore projects in Western Australia and also includes oil, condensate, liquefied petroleum gas (“LPG”) and domestic gas for Western Australian customers. In addition to its producing assets, Woodside is currently progressing the development of the Scarborough gas resource through an expansion of the Pluto LNG facility in Western Australia. Internationally, Woodside is executing the Sangomar Oil Field Development in Senegal. As Australia’s leading LNG operator, Woodside operated 5% of global LNG supply in 2021. Woodside’s proven track record and distinctive capabilities are underpinned by more than 65 years of experience.

Woodside was registered under Australian corporate law in 1971 and listed on the ASX on 18 November 1971. Woodside Shares are currently listed on the ASX under the ticker symbol “WPL.” Woodside has applied to have the Woodside ADSs listed on the NYSE under the symbol “WDS.” As part of the Merger, Woodside is pursuing an application for the quotation of the New Woodside Shares on the LSE. At the Woodside Shareholders Meeting, Woodside is proposing a resolution to change its name from “Woodside Petroleum Ltd.” to “Woodside Energy Group Limited.” If approved, this change is expected to take effect shortly after the Woodside Shareholders Meeting. Woodside has also applied to change its ticker symbol on the ASX from “WPL” to “WDS,” subject to shareholder approval of the proposed name change.

Woodside’s principal office is Mia Yellagonga, 11 Mount Street, Perth, Western Australia 6000, Australia, telephone (61 8) 9348 4000. Additional information about Woodside can be found on its website at www.woodside.com.au. The information contained in, or that can be accessed through, Woodside’s website is not intended to be incorporated into this prospectus.

See the section entitled “*Business and Additional Information About Woodside*” for additional information regarding Woodside.

BHP

BHP is the world’s largest diversified natural resources company by market capitalization with over 80,000 employees and contractors, primarily in Australia and the Americas. BHP’s products are sold worldwide, and

Table of Contents

BHP is among the world's top producers of major commodities, including iron ore, copper, nickel and metallurgical coal.

BHP was incorporated in Australia in 1885 and the BHP Shares are listed on the ASX under the ticker symbol "BHP." BHP is headquartered in Melbourne, Australia with principal offices at 171 Collins Street Melbourne VIC 3000 Australia, telephone (61 3) 1300 55 47 57.

BHP Petroleum

BHP pioneered the development of an oil and gas industry in Australia with the Bass Strait discovery in 1965. The BHP petroleum business, an operating unit within BHP, has conventional oil and gas assets in the U.S. Gulf of Mexico ("U.S. GOM"), Australia and Trinidad and Tobago ("T&T"), and appraisal and exploration options in Mexico, T&T, western U.S. GOM, Eastern Canada, Barbados and Egypt. BHP Petroleum also includes BHP Petroleum's interests in its Algerian assets, which BHP is in the process of divesting. For further information, see "*Business and Additional Information About BHP Petroleum—Producing Assets—Algerian Asset Sales.*"

BHP Petroleum International Pty Ltd, the parent of BHP Petroleum, was incorporated in Australia in 1988 and is a wholly owned subsidiary of BHP. The registered office of BHP Petroleum International Pty Ltd is 125 St Georges Terrace, Perth, Western Australia 6000, Australia, telephone (61 3) 1300 55 47 57.

See the section entitled "*Business and Additional Information About BHP Petroleum*" for additional information regarding BHP Petroleum.

The Merger (see page 79)

On 17 August 2021, Woodside and BHP announced that they had entered into a Merger Commitment Deed to combine their respective oil and gas portfolios through an all-stock merger.

With the combination of two high-quality asset portfolios, the proposed Merger is expected to create a top 10 global independent energy company by hydrocarbon production (Woodside analysis based on the Wood Mackenzie Corporate Benchmarking Tool Q4 2021, 1 December 2021, see the section titled "*Disclaimer and Important Notices—Industry and Market Data*" for clarification of independent energy company) and the largest energy company listed on the ASX. Woodside believes the Merger will help it supply the energy needed for global growth and support its financial resilience, through the energy transition. The Merger will be on a cash-free and debt-free basis, where BHP Petroleum will settle all intercompany loan balances prior to Implementation of the Merger. See the section entitled "*Unaudited Pro Forma Condensed Combined Financial Statements*" for additional information.

Share Sale Agreement. On 22 November 2021, Woodside and BHP entered into a binding Share Sale Agreement which sets out the parties' obligations in relation to Implementation of the Merger (together with the ITSA which sets out the parties' obligations in relation to the separation, transition and integration of BHP's oil and gas portfolio with Woodside's oil and gas portfolio). If the Merger is Implemented, Woodside will acquire all of the issued share capital in BHP Petroleum International Pty Ltd (the "Sale Shares"), which holds BHP's oil and gas business unit, and Woodside will issue the New Woodside Shares to BHP as part of the Purchase Price which will be distributed by BHP to BHP Shareholders (and transferred to the Sale Agent in the case of New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders).

The Merged Group will be owned approximately 52% by Woodside Shareholders prior to Implementation ("Existing Woodside Shareholders") and approximately 48% by BHP Shareholders (prior to the sale of any New Woodside Shares by the Sale Agent). The Merger is subject to satisfaction (or waiver, if permitted) of various

Table of Contents

Conditions including the Woodside Shareholder Approval (as defined below) and regulatory and other approvals, as further detailed in the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions.*”

If the Merger is Implemented, Woodside will acquire 100% of the Sale Shares in exchange for consideration (the “Purchase Price”) comprising:

the “Share Consideration,” being approximately an aggregate of 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation) that will be issued to BHP to be distributed to BHP Shareholders (and transferred to the Sale Agent in the case of New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders); and

the following cash payments:

the Woodside Dividend Payment (as defined below); and

any other adjustments in accordance with the Share Sale Agreement.

The Woodside Dividend Payment is, in effect, the payment to BHP of a cash amount at Implementation representing the cash dividends that would have been received between the Effective Time and Implementation by BHP Shareholders if they had been issued the Share Consideration at the Effective Time. As of 24 March 2022, the Woodside Dividend Payment amounts to \$829,559,222.

Separately, BHP will pay to Woodside, or Woodside will pay to BHP, the Locked Box Payment on Implementation. The Locked Box Payment is a payment from BHP to Woodside at Implementation representing the positive net cash flow generated by BHP Petroleum (adjusted for permitted adjustments) following the Effective Time (or, if that amount were negative, Woodside will be required to make a cash payment to BHP at Implementation). As of 24 March 2022, Woodside estimates the Locked Box Payment (based on an Implementation Date of 1 June 2022) will be approximately \$1.6 billion (such amount to be reduced by any cash held in bank accounts beneficially controlled by BHP Petroleum as at the Implementation Date), payable by BHP to Woodside. The split between the Locked Box Payment and cash in BHP Petroleum bank accounts at Implementation will not impact the economic benefit of the transaction to Woodside or the accounting treatment of that economic benefit within the Merged Group.

This estimate is based on Woodside’s current expectations of BHP Petroleum’s net cash flows (adjusted for permitted adjustments) for the period from 1 July 2021 to 1 June 2022 (when Implementation is expected to occur). The estimate assumes an average Brent oil price in 2022 of \$107/bbl. This is an estimate only, and the actual amount of the Locked Box Payment may vary (potentially significantly) from the amount currently anticipated by Woodside due to a variety of factors, including as a result of volatility in commodity prices. See the section entitled “*Cautionary Statement Regarding Forward-Looking Statements*” for important cautionary information relating to forward-looking statements.

The value of the Share Consideration will fluctuate with the market price of Woodside Shares. You should obtain current share price quotations for Woodside Shares on the ASX. Upon Implementation, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022). Based on the closing price of Woodside Shares on the ASX of A\$22.11 on 19 November 2021, the last trading day before the public announcement of entry into the Share Sale Agreement, and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately A\$4.00, or \$2.91 (converted into dollars based on

Table of Contents

the exchange rate for such day reported by the RBA of \$0.7274 = A\$1.00). Based on the closing price of Woodside Shares on the ASX of A\$21.18 on 16 August 2021, the last trading day before the public announcement of entry into the Merger Commitment Deed, and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately A\$3.83, or \$2.81 (converted into dollars based on the exchange rate for such day reported by the RBA of \$0.7336 = A\$1.00). Based on the closing price of Woodside Shares on the ASX of A\$33.20 and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately A\$6.00, or \$4.48 (converted into dollars based on the exchange rate for such day reported by the RBA of \$0.7473 = A\$1.00). Eligible holders of BHP ADSs will be entitled to receive a number of New Woodside ADSs that corresponds to the New Woodside Shares received on the BHP Shares represented by BHP ADSs. Based on the assumptions described above, upon Implementation, each holder of BHP ADSs as of the ADS Distribution Record Date will be entitled to receive 0.3614 of a New Woodside ADS in respect of each BHP ADS owned on the ADS Distribution Record Date (subject to payment of taxes and applicable Woodside Depository and BHP Depository fees and expenses).

See the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Purchase Price*” for additional information.

If all Conditions are satisfied (or waived, if permitted), including the Woodside Shareholder Approval, then:

The Sale Shares will be transferred to Woodside (or its nominee), and BHP Petroleum will become a wholly owned subsidiary of Woodside;

Woodside will pay BHP the Purchase Price, including the Share Consideration of approximately 914,768,948 New Woodside Shares in the aggregate, which will be issued to BHP;

BHP will immediately distribute to BHP Shareholders (and transfer to the Sale Agent in the case of New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) as of the Distribution Record Date the Share Consideration, pro rata to their respective ownership of BHP;

Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders will receive a cash payment from the proceeds of the sale by the Sale Agent of New Woodside Shares in lieu of receiving New Woodside Shares; and

Each holder of BHP ADSs will receive, in lieu of New Woodside Shares, a number of New Woodside ADSs that corresponds to the New Woodside Shares received on the BHP Shares represented by BHP ADSs (subject to payment of taxes and applicable Woodside Depository and BHP Depository fees and expenses).

Following Implementation, the Merged Group will comprise Woodside and its subsidiaries, including each member of BHP Petroleum.

See the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Distribution of New Woodside Shares*” for additional information.

BHP Shares and BHP ADSs will not be exchanged or cancelled in the Merger, but will continue to represent an interest in BHP without the oil and gas assets in BHP Petroleum. Immediately following the Merger, BHP Shareholders will hold both New Woodside Shares and BHP Shares, and holders of BHP ADSs will hold both New Woodside ADSs and BHP ADSs. See the section entitled “*Description of Woodside American Depository Shares*” for additional information.

From the date of issuance, the New Woodside Shares issued as Share Consideration will be fully paid and rank equally with the Existing Woodside Shares. Following Implementation of the Merger, Woodside will continue to be listed on the ASX. Woodside has applied to change its ticker symbol on the ASX from “WPL” to

Table of Contents

“WDS,” subject to shareholder approval of the proposed name change. No trading market exists in the United States for Woodside Shares. See the section entitled “*American Depositary Shares*” for additional information regarding the New Woodside ADSs. As part of the Merger, in addition to its principal listing on the ASX, Woodside is pursuing an application for the quotation of the Woodside Shares on the LSE.

No Fractional Shares or ADSs. No fractional New Woodside Shares will be delivered to BHP Shareholders, and no fractional New Woodside ADSs will be issued or delivered to holders of BHP ADSs. To the extent that the Distribution Entitlement of any Participating BHP Shareholder would create a fractional entitlement to a New Woodside Share, then the Distribution Entitlement will be rounded down to the nearest whole number of New Woodside Shares, the fraction of a New Woodside Share will be issued to the Sale Agent and sold, and BHP or its nominee will retain the net cash proceeds. Any fractional entitlements to New Woodside ADSs will be aggregated and sold by the BHP Depositary, and the net cash proceeds (after deduction of applicable fees, taxes and expenses) will be distributed to the BHP ADS holders entitled thereto.

Small Parcel BHP Shareholders. A BHP Shareholder (other than an Ineligible Foreign BHP Shareholder) (i) who is registered on the BHP Australian principal share register and holds 1,000 BHP shares or less or on the BHP depositary interest register and holds 1,000 BHP depositary interests or less, (ii) whose registered address in the BHP Australian principal share register or BHP depositary interests register is in any of Australia, Canada, Chile, France, Germany, Ireland, Japan, Jersey, Luxembourg, Malaysia, New Zealand, Norway, Spain, Sweden, Switzerland, the United Arab Emirates and the United Kingdom, and (iii) who is not, and is not acting for the account or benefit of persons, in the United States, is a “Small Parcel BHP Shareholder.”

A Small Parcel BHP Shareholder may deliver a duly completed opt-in notice in accordance with the relevant instructions before 5:00 p.m. (AEST) on 24 May 2022, in which case that BHP Shareholder will be a “Relevant Small Parcel BHP Shareholder.” BHP will transfer, the New Woodside Shares that each Relevant Small Parcel BHP Shareholder would otherwise be entitled to receive to the Sale Agent to be sold, with the net proceeds distributed to the Relevant Small Parcel BHP Shareholder.

Ineligible Foreign BHP Shareholders. An “Ineligible Foreign BHP Shareholder,” for the purposes of the Merger, is (i) a BHP Shareholder whose address is shown in the BHP Register (as determined by BHP) on the Distribution Record Date as being in a jurisdiction other than one of the following jurisdictions: Australia, Canada, Chile, France, Germany, Ireland, Italy, Japan, Jersey, Luxembourg, Malaysia, New Zealand, Netherlands, Norway, Singapore, Spain, Sweden, Switzerland, United Arab Emirates, the United Kingdom, the United States, or any other jurisdiction in respect of which BHP determines (acting reasonably and following consultation with Woodside) that it is not prohibited or unduly onerous or impractical to transfer or distribute New Woodside Shares to the BHP Shareholders in those jurisdictions, or (ii) one of certain South African BHP Shareholders who does not validly elect to receive New Woodside Shares in accordance with arrangements to be outlined by BHP. BHP will transfer the New Woodside Shares that each Ineligible Foreign BHP Shareholder would otherwise be entitled to receive to the Sale Agent to be sold, with the net proceeds distributed to the Ineligible Foreign BHP Shareholder.

American Depositary Shares. Woodside has an established ADR program, with each Woodside ADS representing one Existing Woodside Share. A registration statement on Form F-6 (Registration No. 333-201669) was filed with the SEC on 23 January 2015, and declared effective 9 February 2015, with respect to Existing Woodside ADSs. Existing Woodside ADSs currently trade on the U.S. over-the-counter market through a sponsored ADR facility under the symbol “WOPEY.”

Woodside has applied to list the Woodside ADSs on the NYSE under the symbol “WDS,” and intends to file the F-6 Registration Statement and to amend and restate the Woodside Deposit Agreement for the Woodside ADR Program to, among other things, reflect Woodside’s status as an SEC reporting company and certain regulatory changes in Australia and in the United States.

[Table of Contents](#)

BHP ADSs are traded on the NYSE under the symbol “BHP,” with each BHP ADS representing two BHP Shares. Each holder of BHP ADSs as of the ADS Distribution Record Date will receive in the Merger, in lieu of New Woodside Shares, New Woodside ADSs. If BHP ADS Holders wish to instead receive New Woodside Shares under the Merger, such holders must surrender their BHP ADSs to the BHP Depository for cancellation and withdraw the BHP Shares that their surrendered BHP ADSs represent prior to 5:00 p.m., New York City time, on 20 May 2022 (such time representing the time at which it is expected that the BHP Depository will restrict cancellations of BHP ADSs and withdrawals of BHP Shares pursuant to the terms of the BHP Deposit Agreement, and subject to payment of taxes and applicable BHP Depository fees and expenses) and hold such BHP Shares at the Distribution Record Date.

Deemed Effective Time. The Merger effected under the Share Sale Agreement will have an effective time of 11:59 p.m. AEST on 30 June 2021 (the “Effective Time”), with contractual mechanics giving Woodside and BHP economic outcomes as if Woodside had acquired the Sale Shares of BHP Petroleum at the Effective Time.

Additional Terms. See the sections entitled “*The Merger*” and “*The Share Sale Agreement and Related Agreements*” for additional information relating to the Merger and the Share Sale Agreement. The terms and conditions of the Merger are contained in the Share Sale Agreement, which is described further in this prospectus and is attached to this prospectus as *Annex A* and incorporated by reference into this prospectus. You are encouraged to read the Share Sale Agreement carefully, for it is the legal document that governs the Merger. All descriptions in this summary and elsewhere in this prospectus of the terms and conditions of the Merger and the Share Sale Agreement are qualified by reference to the Share Sale Agreement.

Restructure of BHP Petroleum (see page 108)

In connection with the Merger, BHP has undertaken to complete the Restructure. The Restructure is required to be completed prior to Implementation of the Merger in accordance with the Share Sale Agreement.

For additional information regarding the Restructure, see the section entitled “*The Share Sale Agreement and Related Agreements—Restructure of BHP Petroleum.*”

Related Agreements (see page 100)

Letter Agreement

On 7 April 2022, Woodside and BHP entered into the Letter Agreement (as defined below) in order to confirm a variety of mechanical matters under the Share Sale Agreement. See the section entitled “*The Share Sale Agreement and Related Agreements—Letter Agreement with Respect to Certain Matters Under the Share Sale Agreement*” for additional information regarding the Letter Agreement.

Integration and Transition Services Agreement

On 22 November 2021, simultaneously with the entry into the Share Sale Agreement, Woodside and BHP entered into the ITSA which provides for the terms upon which:

activities will be undertaken prior to Implementation to separate BHP Petroleum from BHP and to facilitate the integration of BHP Petroleum into Woodside on and from the date Implementation occurs (the “Implementation Date”); and

BHP will provide certain transition services to Woodside following Implementation of the Merger.

See the section entitled “*The Share Sale Agreement and Related Agreements—The Integration and Transition Services Agreement*” for additional information regarding the ITSA.

Scarborough Put Option (see page 110)

On 17 August 2021, Woodside Energy Ltd, Woodside Energy Scarborough Pty Ltd and certain subsidiaries of BHP relating to the Scarborough, Jupiter and Thebe projects entered into a Put Option Deed (the

Table of Contents

“Scarborough Put Option Deed”) under which Woodside granted to BHP an option to sell to Woodside its interests in the Scarborough, Jupiter and Thebe Projects on agreed terms and conditions.

See the section entitled “*The Share Sale Agreement and Related Agreements–Related Agreements–Scarborough Put Option*” for additional information.

Woodside’ s Reasons for the Merger (see page 92)

The Woodside Board believes that the proposed Merger of Woodside and BHP Petroleum is a highly attractive opportunity that is expected to create a top 10 global independent energy company by hydrocarbon production (Woodside analysis based on the Wood Mackenzie Corporate Benchmarking Tool Q4 2021, 1 December 2021, see the section titled “*Disclaimer and Important Notices–Industry and Market Data*” for clarification of independent energy company) and the largest energy company listed on the ASX. In evaluating the Merger and reaching its decision with respect to the Merger and the Share Sale Agreement, the Woodside Board consulted with Woodside’ s management and outside legal and financial advisers and considered a number of factors, including:

Greater scale and diversity of geographies, products and end markets through an attractive and long-life conventional gas and high-margin oil portfolio;

Combined asset base that will benefit from enhanced financial resilience through the commodity price cycle, through increased diversification, long-life conventional gas and high-margin oil, assets and operating cash flows. It is expected to support shareholder returns as well as investment in the evolution of the Woodside business through the energy transition;

Strong growth profile and capacity to pursue competitive oil and gas projects as well as lower-carbon growth options within the portfolio;

Proven management and technical capability from both companies;

Shared values and focus on sustainable operations, carbon management and environmental, social and governance (“ESG”) leadership;

Synergies and benefits; and

Greater financial resilience.

For additional information see the section entitled “*The Merger–Woodside’ s Reasons for the Merger.*”

Independent Expert’ s Report (see page 97)

To assist Existing Woodside Shareholders with their assessment of the Merger and their consideration as to whether to vote in favor of the Merger Resolution (as defined below), Woodside engaged KPMG to prepare the Independent Expert’ s Report. The Independent Expert’ s Report was delivered on 8 April 2022. Pursuant to the Independent Expert’ s Report, the Independent Expert has concluded that the Merger is in the best interests of Woodside Shareholders, in the absence of a superior offer.

A copy of the Independent Expert’ s Report, including the report completed by Gaffney Cline & Associates Limited (the “Independent Technical Specialist Report”) annexed thereto, is included as an exhibit to the registration statement of which this prospectus is a part.

Woodside Shareholders Meeting (see page 97)

Woodside expects to hold the Woodside Shareholders Meeting at Perth Convention & Exhibition Centre, 21 Mounts Bay Road, Perth, Western Australia, on 19 May 2022 at 10:00 a.m. (AWST) to vote on the issuance by Woodside of the New Woodside Shares. As a holder of BHP Shares or BHP ADSs, you are not permitted to vote at the Woodside Shareholders Meeting (assuming you are not also a Woodside Shareholder).

Table of Contents

ASX Listing Rule 7.1 imposes a limit on the number of equity securities (*e.g.*, shares or options to subscribe for shares) which an ASX listed company can issue without shareholder approval. In general terms, a company may not, without prior shareholder approval, issue, or agree to issue, equity securities if the equity securities will in themselves or when aggregated with the securities issued by the company during the previous 12 months exceed 15% of the number of fully paid ordinary shares on issue at the commencement of that 12-month period.

If Implemented, the Merger would result in Woodside exceeding the 15% threshold as a result of the issuance of New Woodside Shares comprising the Share Consideration. Therefore, the issuance by Woodside of the New Woodside Shares is subject to the approval by Woodside Shareholders as of the record date for the Woodside Shareholders Meeting of the ordinary resolution to approve the issue of the New Woodside Shares for the purposes of ASX Listing Rule 7.1 and for all other purposes (the “Merger Resolution”) to be proposed at the Woodside Shareholders Meeting. The passing of the Merger Resolution (the “Woodside Shareholder Approval”) is one of the Conditions that is required to be satisfied before the Merger can be Implemented.

Description of Woodside Shares (see page 347)

The rights and liabilities attached to the New Woodside Shares to be issued as Share Consideration are set out in the Woodside Constitution and are also subject to the Corporations Act and the listing rules of the ASX (the “ASX Listing Rules”). See the section entitled “*Description of Woodside Shares*” for additional information.

Description of Woodside American Depositary Shares (see page 358)

Woodside will not treat New Woodside ADS holders as its shareholders. Accordingly, New Woodside ADS holders will not have shareholders’ rights under Australian law or the Woodside Constitution. The Woodside Depositary (or its custodian) will be the holder of the New Woodside Shares underlying the New Woodside ADSs. Holders of New Woodside ADSs will have rights as holders of New Woodside ADSs, which are governed by the Woodside Deposit Agreement. The laws of the State of New York govern the Woodside Deposit Agreement and the Woodside ADSs, including the New Woodside ADSs. See the section entitled “*Description of Woodside American Depositary Shares*” for additional information.

Distribution Entitlement (see page 107)

The Share Consideration will be distributed to BHP Shareholders (and transferred to the Sale Agent in the case of New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders), pro rata to their respective ownership of BHP, which is referred to herein as the Distribution Entitlement. The formula for the Distribution Entitlement is set forth in the Share Sale Agreement under the definition of “Distribution Entitlement.” When this prospectus refers to a Distribution Entitlement, it means the Distribution Entitlement as defined in the Share Sale Agreement.

The value of the Share Consideration, and accordingly the value of a BHP Shareholder’ s Distribution Entitlement, will fluctuate with the market price of Existing Woodside Shares. You should obtain current share price quotations for Existing Woodside Shares on the ASX.

Conditions of the Merger (see page 100)

Implementation under the Share Sale Agreement is subject to satisfaction (or where permitted, waiver) by 30 June 2022 (or an agreed later date) of certain Conditions including, but not limited to:

approval by certain regulatory and competition authorities;

Woodside Shareholder Approval;

[Table of Contents](#)

the Independent Expert's Report concluding that the Merger is in the best interests of Existing Woodside Shareholders; and the registration statements relating to New Woodside Shares and New Woodside ADSs being declared effective by the SEC.

If a Condition has not been satisfied (or where permitted, waived) by the earlier of notification of such failure to satisfy or 30 June 2022 (or an agreed later date), subject to certain requirements to consult in good faith, either Woodside or BHP may terminate the Share Sale Agreement (and therefore the Merger).

For additional information see the section entitled "*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions.*"

Termination of the Share Sale Agreement (see page 106)

The Share Sale Agreement contains customary termination rights for either party, including in relation to the failure of a Condition and for material breach.

In addition:

Woodside has a right to terminate the Share Sale Agreement in the event that there is a reduction of 15% or more of BHP Petroleum's proven and probable reserves calculated in accordance with the Share Sale Agreement (subject to certain exclusions).

BHP has a right to terminate the Share Sale Agreement in the event that a Woodside credit rating on a number of indices is downgraded to Ba1 or BB+ or lower (or a credit rating agency issues an assessment indicating a likely downgrade to those levels after Implementation) or there is a reduction of 15% or more from Woodside's proven and probable reserves calculated in accordance with the Share Sale Agreement (subject to certain exclusions).

Each of Woodside and BHP have agreed to pay a reimbursement fee of \$160 million in certain circumstances (the "Reimbursement Fee"). The Reimbursement Fee is not payable if the Merger is Implemented. Receipt of the Reimbursement Fee is the sole and exclusive remedy under the Share Sale Agreement of the party claiming the Reimbursement Fee.

For additional information see the sections entitled "*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Reimbursement Fee*" and "*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Termination.*"

Board of Directors and Management of the Merged Group Following the Merger (see page 273)

Following Implementation, the Woodside Board is expected to be comprised of ten non-executive Woodside directors and one Executive Woodside Director, being the Chief Executive Officer and Managing Director. It is intended that the Woodside Board will select a current BHP director to be appointed to the Woodside Board following Implementation. The Woodside Constitution provides that Woodside must not have more than 12, nor fewer than three, Directors.

Following Implementation,

Meg O' Neill, who is currently Chief Executive Officer and Managing Director of Woodside and the Woodside Board, will continue to serve as Chief Executive Officer and Managing Director of the Merged Group and will be on the Woodside Board; and

[Table of Contents](#)

Richard Goyder, who is currently Chairman of the Woodside Board, will continue to serve as the Chairman of the Woodside Board.

For additional information relating to the Board of Directors and Management of the Merged Group, see the section entitled “*Board of Directors and Management of the Merged Group*.”

Certain Material U.S. Federal Income Tax Considerations (see page 114)

In general, for U.S. federal income tax purposes, a U.S. holder of BHP Shares or BHP ADSs must include in its gross income the gross amount of any dividend paid by BHP to the extent of its current or accumulated earnings and profits (as determined for U.S. federal income tax purposes). However, BHP does not calculate earnings and profits in accordance with U.S. federal income tax principles. Accordingly, U.S. holders should expect to treat the entire amount of the Special Dividend as a taxable dividend for U.S. federal income tax purposes. Tax matters are very complicated, and the tax consequences of the Special Dividend to each U.S. holder of BHP Shares or BHP ADSs may depend on the shareholder’s particular facts and circumstances. BHP Shareholders and holders of BHP ADSs are urged to consult with, and rely solely upon, their own tax advisers to understand fully the tax consequences to them of the Special Dividend and of holding Woodside Shares or Woodside ADSs (as applicable). Further information on certain taxation consequences of the Special Dividend in certain jurisdictions is set out in the sections entitled “*Material U.S. Federal Income Tax Considerations*” and “*Material Australian Tax Considerations*.”

The sections referenced above do not constitute tax advice and are not comprehensive discussions of all tax consequences of the Special Dividend and holding New Woodside Shares or New Woodside ADSs. This prospectus does not take into account BHP Shareholders’ or BHP ADS holders’ individual investment objectives, financial situation or needs. Further, the sections referenced above are based on the U.S. and Australian tax laws currently in effect and do not take into account or anticipate changes in the applicable tax laws (by legislation or judicial decision) or practice (by ruling or otherwise) after the date of this prospectus. Future amendments to taxation legislation, or its interpretation by the courts or the taxation authorities, may take effect retrospectively or affect the conclusions drawn. This prospectus is not a complete analysis of all taxation laws that may apply in relation to the Special Dividend and holding New Woodside Shares or New Woodside ADSs for Participating BHP Shareholders and eligible BHP ADS holders. All BHP Shareholders and BHP ADS holders should consult with, and rely solely upon, their own independent taxation advisers regarding the taxation implications of the Merger given the particular circumstances which apply to them.

Regulatory Approvals Related to the Merger (see page 111)

To complete the Merger, Woodside and BHP must make and deliver certain filings, submissions and notices to obtain required authorizations, approvals, consents or expiration of waiting periods from certain antitrust and other regulatory authorities, including the FIRB, the ACCC, NOPTA, ASIC, ASX, SARB and JSE, the U.S. Federal Trade Commission and the Antitrust Division of the U.S. Department of Justice, and CFIUS. Pursuant to the Share Sale Agreement, Woodside and BHP have agreed to use their respective reasonable endeavors to cause such required authorizations, approvals, consents or expiration of waiting periods from such antitrust and other regulatory authorities to be obtained, as applicable to each, in order to Implement the Merger. Woodside is not currently aware of any material governmental filings, authorizations, approvals or consents that are required prior to Implementation that have not been obtained or in respect of which waiting periods have not expired (as applicable), except for approval by NOPTA in respect of the change of control of various BHP entities as titleholders.

See the section entitled “*Regulatory Approvals Related to the Merger*” for additional information.

[Table of Contents](#)

Accounting Treatment (see page 97)

The unaudited pro forma condensed combined financial statements have been prepared using the acquisition method of accounting for business combinations, with Woodside treated as the acquirer. Under the acquisition method of accounting, Woodside will record all assets acquired and liabilities assumed from BHP, with respect to BHP Petroleum, at their respective fair values as of the Implementation of the Merger.

For additional information see the section entitled “*The Merger–Accounting Treatment.*”

No Dissenter’ s Rights or Rights of Appraisal (see page 99)

Under Australian law, neither Woodside Shareholders nor BHP Shareholders are entitled to any rights of appraisal or dissenters’ rights in connection with the Merger.

See the section entitled “*The Merger–No Dissenter’ s Rights or Rights of Appraisal.*”

Listing of ADSs (see page 108)

Under the Woodside ADR Program, each Existing Woodside ADS represents one Existing Woodside Share. A registration statement on Form F-6 (Registration No. 333-201669) was filed with the SEC on 23 January 2015, and declared effective 9 February 2015, with respect to the Existing Woodside ADSs. Existing Woodside ADSs currently trade on the U.S. over-the-counter market through a sponsored ADR facility under the symbol “WOPEY.”

Woodside has applied to list the Woodside ADSs on the NYSE under the symbol “WDS,” and intends to file the F-6 Registration Statement with the SEC with respect to the Woodside ADSs and to amend and restate the Woodside Deposit Agreement for the Woodside ADR Program to, among other things, reflect Woodside’ s status as an SEC reporting company and certain regulatory changes in Australia and in the United States. For additional information see the section entitled “*Description of Woodside American Depositary Shares.*”

Pro Forma Ownership of the Merged Group

Upon completion of the Merger, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Upon Implementation, Existing Woodside Shareholders will own approximately 52% and BHP Shareholders will own approximately 48% of the Merged Group (based on the issue of 914,768,948 New Woodside Shares and the number of Woodside Shares outstanding on 24 March 2022) subject to any BHP Shareholders being Ineligible Foreign BHP Shareholders or Relevant Small Parcel BHP Shareholders. Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022). For additional information relating to the Purchase Price see the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Purchase Price.*”

Rights of Woodside Shareholders and BHP Petroleum Shareholders

As a result of the Merger, Participating BHP Shareholders will have the right to receive New Woodside Shares. Such Participating BHP Shareholders will have different rights as holders of the New Woodside Shares with respect to ownership of BHP Petroleum than the rights they have as holders of BHP. BHP Petroleum International Pty Ltd is a wholly owned subsidiary of BHP. Accordingly, BHP Shareholders have no specific rights with respect to BHP Petroleum. For a description of the rights of holders of Woodside Shares, please see the section entitled “*Description of Woodside Shares.*”

[Table of Contents](#)

Risk Factor Summary (see page 42)

The Merger involves risks, some of which are related to the Merger itself and others of which are related to Woodside's business and to investing in and ownership of the New Woodside Shares and New Woodside ADSs following the Merger, assuming the Merger is completed. In considering the Merger, you should carefully consider the information about these risks set forth both in this section and under the section entitled "*Risk Factors*," together with the other information included in this prospectus.

The occurrence of one or more of the events or circumstances described in these summary risk factors and those included under the section entitled "*Risk Factors*," alone or in combination with other events or circumstances, may adversely affect the ability to complete or realize the anticipated benefits of the Merger, and may have a material adverse effect on the business, financial condition, results of operations and trading price of the Woodside Shares or Woodside ADSs following the Merger. Such risks include, but are not limited to, the following:

Woodside may not realize the anticipated cost savings, synergies and other benefits that Woodside expects to achieve from the Merger.

Woodside and the Merged Group will incur significant integration-related costs and challenges in connection with the Merger, including integration of technology and personnel.

Implementation of the Merger may trigger change of control or other provisions in certain agreements to which Woodside or BHP Petroleum are parties. If consents or waivers under such agreements are not obtained or granted, this may have an adverse effect on the Merger or the Merged Group.

The historical financial information of BHP Petroleum may not be representative of its results or financial condition if it had been operated independently of BHP and, as a result, may not be a reliable indicator of its future results.

The unaudited pro forma condensed combined financial statements and pro forma reserve and production data included in this prospectus may not be representative of the Merged Group's results after the Merger.

Uncertainty about the effects of the Merger, including effects on employees, host governments, partners, contractors, regulators, suppliers and customers, may have a material adverse effect on the business, results of operations and financial condition of the Merged Group.

The Merged Group will be exposed to risks resulting from fluctuations in LNG market conditions or the price of crude oil, which can be volatile.

The Merged Group may be exposed to commodity and currency hedging.

The impacts of an epidemic or outbreaks of an infectious disease, such as COVID-19, could materially adversely affect the Merged Group's business, results of operations and financial condition.

The majority of the Merged Group's major projects and operations will be conducted in joint ventures, and therefore the Merged Group's degree of control, as well as its ability to identify and manage risks, may be reduced.

The Merged Group is expected to invest significant amounts of funds in a variety of exploration, development, production, construction, restoration and new energy activities across the world, which involve many uncertainties and operating risks.

The Merged Group operates in a high-risk industry, and there are risks inherent in the Merged Group's exploration, development, production and restoration activities.

Material limitations to the Merged Group's access to capital, a failure in financial risk management, government fiscal, monetary and regulatory policy and variability in interest and exchange rates could all adversely affect the Merged Group's business, results of operations and financial condition.

Table of Contents

The Merged Group may encounter natural disasters or acts of terrorism (whether physical, cyber or otherwise), that may result in diminished production, additional costs or substantial loss.

Woodside's and BHP Petroleum's operations are, and the Merged Group's operations will be, subject to extensive governmental oversight and regulation.

The Merged Group's operations will be subject to governmental and sovereign risks, including political, legal and other uncertainties in the countries in which Woodside and BHP Petroleum do business.

Oversight and review by competition regulatory bodies in the jurisdictions in which the Merged Group will operate may impact the Merged Group's investments and businesses.

The global response to climate change, including ESG matters and conservation measures, is changing the way the world produces and consumes energy, creating risks for the Merged Group.

Estimates of proved reserves and future net cash flows are not precise. The actual quantities and net cash flows of the Merged Group's proved reserves may prove to be lower than estimated.

The Merged Group could be materially and adversely affected if new legislation or regulations are adopted to address global climate change, or if the Merged Group is subject to lawsuits for alleged damage to persons or property resulting from greenhouse gas emissions.

The availability and cost of emission allowances or carbon offsets could adversely impact the Merged Group's costs of operations and its ability to meet its environmental goals.

The financial and operating forecasts are based on various assumptions that may not be realized.

The Merged Group's financial results could be adversely affected by impairments of goodwill or other intangible assets, the application of future accounting policies or interpretations of existing accounting policies including by regulatory direction, and changes in estimates of decommissioning costs.

The Merger could result in Woodside being treated as a U.S. corporation for U.S. federal income tax purposes.

The implied value of the Share Consideration will vary over time depending on the prevailing Woodside Share price.

Liquidity in the market for Woodside securities may be adversely affected by multiple exchange listings.

There is no guarantee that dividends will be paid on the Woodside Shares.

There has been no prior market for the Woodside ADSs on a U.S. national securities exchange, and an active and liquid market for the Woodside ADSs may fail to develop or be sustained.

After Implementation of the Merger, the market price of Woodside ADSs on the NYSE may not be identical, in U.S. dollar terms, to the market price of Woodside Shares on the ASX.

Holders of Woodside ADSs will not directly hold Woodside Shares.

Holders of Woodside ADSs may not receive certain distributions on Woodside Shares represented by Woodside ADSs or any value for such dividends under certain circumstances.

The Woodside ADSs may be subject to limitations on transfer and the withdrawal of the underlying Woodside Shares, and holders of Woodside ADSs may not be able to exercise their right to vote the Woodside Shares underlying their Woodside ADSs.

It may be difficult for holders of Woodside ADSs to bring any action or enforce any judgment obtained in the United States against Woodside or members of the Woodside Board.

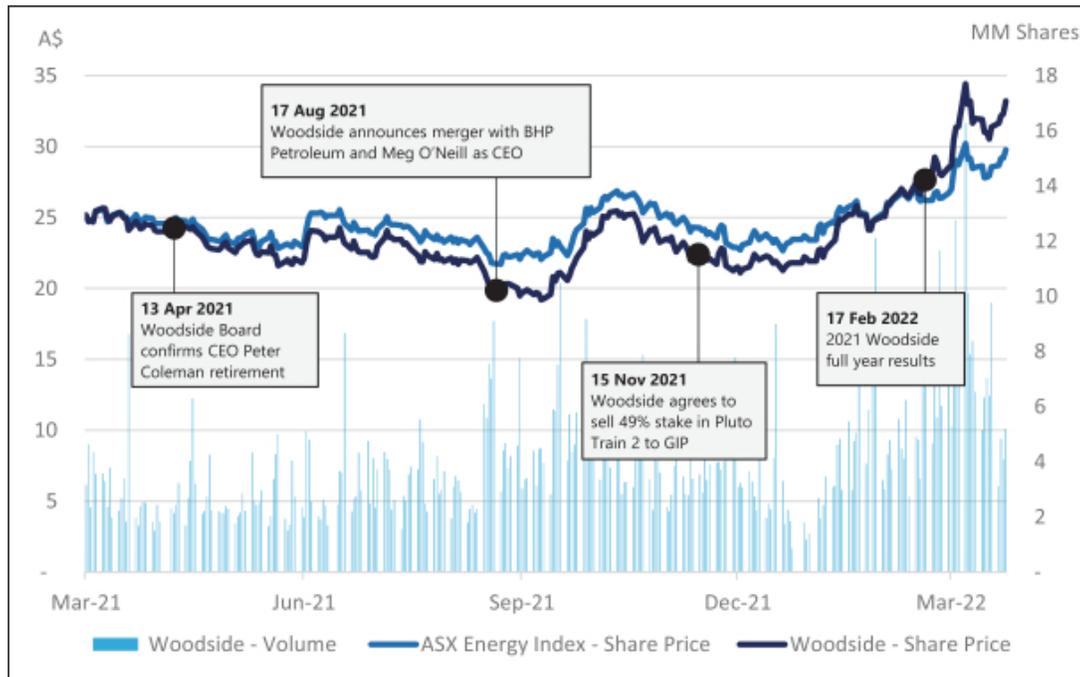

As a foreign private issuer ("FPI") under the rules and regulations of the SEC, Woodside is permitted to, and may, file less or different information with the SEC than a U.S. public company that is not an

Table of Contents

FPI, and will follow certain home country corporate governance practices in lieu of certain NYSE requirements applicable to U.S. issuers.

As a result of registering the distribution of the New Woodside Shares and New Woodside ADSs in the United States, the Merged Group will become subject to additional regulatory compliance requirements, including Section 404 of the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act”), and if the Merged Group fails to maintain an effective system of internal controls, the Merged Group may not be able to accurately report its financial results or prevent fraud.

Woodside Market Price Information and Per Share Data

Source: Capital IQ as at 24 March 2022.

Woodside

Woodside Shares are listed on the ASX under the trading symbol “WPL.” Woodside has applied to change its ticker symbol on the ASX from “WPL” to “WDS,” subject to shareholder approval of the proposed name change. The closing sale price of Woodside Shares on the ASX was A\$21.18 on 16 August 2021, the last trading day before the public announcement of entry into the Merger Commitment Deed. On 19 November 2021, the last trading day before public announcement of entry into the Share Sale Agreement, the closing sale price of Woodside Shares on the ASX was A\$22.11 per share. On 24 March 2022, the closing sale price of Woodside Shares on the ASX was A\$33.20 per share.

BHP Petroleum

Historical market price data for BHP Petroleum has not been presented as BHP Petroleum is currently a wholly owned subsidiary of BHP. Therefore, there is no established trading market in the ordinary shares of BHP Petroleum.

Summary Unaudited Pro Forma Condensed Combined Financial Information

The following (i) summary unaudited pro forma condensed combined statement of profit and loss data for the year ended 31 December 2021 have been prepared to give effect to the Merger as if it occurred on 1 January 2021 and (ii) summary unaudited pro forma condensed combined statement of financial position data at 31 December 2021 have been prepared to give effect to the Merger as if it occurred on 31 December 2021.

The unaudited pro forma condensed combined financial data are provided for illustrative purposes only and are not intended to represent or be indicative of the results of operations or the financial position of the combined company that would have been recorded had the Merger been completed as of the dates presented and should not be taken as representative of future results of operations or the financial position of the combined company. The unaudited pro forma condensed combined financial data does not reflect the effects of any potential operational efficiencies, asset dispositions, cost savings or economies of scale that the combined company may achieve with respect to the combined operations. Future results may vary significantly from the results reflected because of various factors, including those discussed in the section entitled “*Risk Factors*” beginning on page 42 of this prospectus. The summary unaudited pro forma condensed combined financial data should be read in conjunction with “*Unaudited Pro Forma Condensed Combined Financial Statements*” beginning on page 127 of this prospectus.

Summary Pro Forma Reserve Information

The following summary pro forma reserve data at 31 December 2021 have been prepared to give effect to the Merger as if it occurred on 31 December 2021. These estimates of the Merged Group's pro forma proved oil, condensate, NGL and natural gas reserves were prepared by adding reserve estimates as of 31 December 2021 as provided by each of Woodside and BHP Petroleum.

This includes information for overlapping assets, specifically the Northwest Shelf ("NWS"), where reserves values have been added without any adjustments. BHP Petroleum uses a conversion factor of 6,000 MMscf per MMboe while Woodside uses 5,700 MMscf per MMboe. BHP Petroleum includes onshore and offshore fuel used in its operation as reserves while Woodside includes only the onshore fuel used in its operations as reserves. These estimates of the Merged Group's pro forma proved reserves were derived with these assumptions unchanged for each of the entities. Woodside's reserves as of 31 December 2021 are based on a reserve report prepared by Netherland, Sewell & Associates, Inc., Woodside's independent reserve engineers. BHP Petroleum's reserve assessments are prepared by it each year in connection with BHP Petroleum's fiscal year end of June 30. The assessments are reviewed prior to BHP Petroleum's fiscal year end to ensure technical quality, adherence to internally published BHP Petroleum guidelines and compliance with SEC reporting requirements. The December 31 reserves information for BHP Petroleum included below is an estimate of BHP Petroleum's reserves as of such date, is derived from internal records taking into account, among other factors, production, revenues, and operating and capital expenditures for each asset and project, and has not been reviewed by any independent reserve engineers or on the same basis as BHP Petroleum's reserves are reviewed at BHP Petroleum's fiscal year end. Additional information regarding pro forma proved reserves is included in the section entitled "*Business and Certain Information About the Merged Group—Merged Group Reserves and Future Production Capacity.*" Information regarding Woodside's actual historical reserves is included in the section entitled "*Business and Certain Information About Woodside—Reserves and Resources.*" Information regarding BHP's actual historical reserves is included in the section entitled "*Business and Certain Information About BHP Petroleum—Reserves and Resources.*"

| | Pro Forma Merged Group At 31 December 2021 |
|--|---|
| Estimated Proved Developed Reserves | |
| Crude oil and condensate (MMbbl) | 219.4 |
| NGLs (MMbbl) | 19.0 |
| Natural gas (Bcf) | 3,120.2 |
| Total (MMboe) | <u>773.8</u> |
| Estimated Proved Undeveloped Reserves | |
| Crude oil and condensate (MMbbl) | 219.3 |
| NGLs (MMbbl) | 8.4 |
| Natural gas (Bcf) | 7,630.4 |
| Total (MMboe) | <u>1,548.7</u> |
| Estimated Proved Developed and Undeveloped Reserves | |
| Crude oil and condensate (MMbbl) | 438.8 |
| NGLs (MMbbl) | 27.4 |
| Natural gas (Bcf) | 10,750.7 |
| Total (MMboe) | <u>2,322.5</u> |

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

The forward-looking statements contained in this prospectus involve risks and uncertainties that may affect Woodside, BHP Petroleum and the Merged Group businesses' operations, markets, products, services, prices and other matters. This prospectus, may contain forward-looking statements, including, for example, but not limited to, statements about management expectations, strategic objectives, growth opportunities, business prospects, regulatory proceedings, transaction synergies and other benefits of the Merger, and other similar matters. Forward-looking statements are not statements of historical facts and represent only Woodside' s beliefs regarding future performance, which is inherently uncertain. Forward-looking statements are typically identified by words such as "anticipates," "believes," "budgets," "could," "estimates," "expects," "forecasts," "foresees," "goal," "intends," "likely," "may," "might," "plans," "projects," "schedule," "should," "target," "will," or "would" and similar expressions, although not all forward-looking information contains these identifying words.

By their very nature, forward-looking statements require Woodside to make assumptions and are subject to inherent risks and uncertainties that give rise to the possibility that Woodside' s predictions, forecasts, projections, expectations or conclusions will not prove to be accurate, that Woodside' s assumptions may not be correct and that Woodside' s or the combined business' objectives, strategic goals and priorities will not be achieved. If any of the assumptions on which a forward-looking statement is based were to change or found to be incorrect, this would also likely cause outcomes to be different from the statements made in this prospectus. Woodside cautions readers not to place undue reliance on these statements, as a number of important factors could cause actual results to differ materially from the expectations expressed in such forward-looking statements. These factors include, but are not limited to:

- fluctuations in the price of crude oil and a substantial or extended decline in crude oil prices;
- fluctuations in LNG market conditions, prices and buyer preferences, and any material and sustained LNG price deterioration or change in LNG buyer preferences;
- events outside of the Merged Group' s control, including the impacts of an epidemic or outbreaks of an infectious disease, for example the ongoing impacts of COVID-19; natural disasters, severe storms and other adverse weather conditions;
- overall domestic and global political and economic conditions, including the imposition of tariffs or trade or other economic sanctions, political instability or armed conflict in oil and gas producing regions, including the ongoing conflict in Ukraine;
- increased proportion of shorter-term contracts and volatile spot pricing with respect to LNG;
- conducting a majority of major projects and operations through joint ventures, which may limit the Merged Group' s degree of control and ability to identify and manage risks;
- uncertainties and operating risks as a result of significant funds being invested in a variety of exploration, development projects, production, construction and restoration activities;
- reliance on third parties to advance proposed developments and the risk that the Merged Group may not reach agreements with third parties;
- risk of incurring losses due to counterparty exposures;
- the need to acquire or discover additional proved reserves or to develop existing, acquired or developed reserves to supplement proved reserves and production;
- failure to find reserves that can be commercialized successfully;
- limitations on the Merged Group' s access to capital or a failure in financial risk management;
- operating hazards and natural disasters;
- extensive government regulation, including the ability to obtain regulatory approvals;
- governmental and sovereign risk;

Table of Contents

operating in locations suffering from political, legal and other uncertainties, including risk of crime, governmental and business corruption, foreign sanctions and underdeveloped infrastructure;

revocation, failure to renew or alteration of the terms of the Merged Group' s permits;

risks from oversight and review by competition regulatory bodies;

enhanced public and private focus on climate change, greenhouse gas effects and proposed or contemplated laws and regulations relating to carbon emissions;

uncertainty of estimated petroleum reserves;

competition in the exploration, production and marketing of products;

changes to the Merged Group' s portfolio of assets through acquisitions and divestments;

exchange rate risks;

intentional or unintentional disruption of the Merged Group' s information technology systems;

litigation and arbitration;

shortage of skilled labor and construction materials, equipment and supplies;

other factors that may affect future results of Woodside or BHP Petroleum, including changes in trade policies, timely development and introduction of new products and services, changes in tax laws, technological and regulatory changes, and adverse developments in general market, business, economic, labor, regulatory and political conditions; and

other factors referred to in this prospectus.

These risk factors do not take into account the individual investment objectives, financial situation, position or particular needs of individual investors. If you do not understand any part of this prospectus (including the risk factors set out in the section entitled "*Risk Factors*"), or are in any doubt as to any action to take in relation to the Merger, it is recommended that you consult your legal, financial, taxation or other professional adviser.

Woodside cautions that the foregoing list of important factors is not exhaustive, and other factors could also adversely affect Implementation and the future results of Woodside, BHP Petroleum or the Merged Group. The forward-looking statements speak only as of the date of this prospectus. When relying on Woodside' s forward-looking statements to make decisions with respect to Woodside, BHP Petroleum or the Merged Group, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. Except as required by applicable law or regulation, Woodside does not undertake to update any forward-looking statement, whether written or oral, to reflect events or circumstances after the date of this prospectus or to reflect the occurrence of unanticipated events.

For additional information about factors that could cause Woodside' s results to differ materially from those described in the forward-looking statements, please see the section entitled "*Risk Factors*." All written or oral forward-looking statements concerning the Merger or other matters addressed in this prospectus and attributable to Woodside, BHP or any person acting on their behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section.

RISK FACTORS

You should carefully review and consider the following risk factors and the other information contained in this prospectus, including the financial statements and notes to the financial statements included herein, in evaluating the Merger. The risks discussed herein have been identified based on an evaluation of the historical risks faced by Woodside and BHP Petroleum and relate to current expectations as to future risks that may result from the Merger. Certain of the following risk factors apply to the business and operations of Woodside and BHP Petroleum and will also apply to the business and operations of the Merged Group following the Implementation of the Merger. The occurrence of one or more of the events or circumstances described in these risk factors, alone or in combination with other events or circumstances, may adversely affect the ability to complete or realize the anticipated benefits of the Merger and may have a material adverse effect on the business, cash flows, financial condition and results of operations of the Merged Group following the Implementation of the Merger. This could cause the trading price of the Woodside Shares and the Woodside ADSs to decline, perhaps significantly. You should carefully consider the following risk factors in conjunction with the other information included in this prospectus, including matters addressed in the sections entitled “Cautionary Statement Regarding Forward-Looking Statements,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum,” “Unaudited Pro Forma Condensed Combined Financial Statements,” the financial statements of Woodside, the financial statements of BHP Petroleum and notes to the financial statements included herein. The following risks are not exhaustive and are based on certain assumptions made by Woodside and BHP Petroleum which later may prove to be incorrect or incomplete. Investors are encouraged to perform their own investigation with respect to the business, financial condition and prospects of Woodside, BHP Petroleum and the Merged Group. Each of Woodside, BHP Petroleum and the Merged Group may face additional risks and uncertainties that are not currently known to it, or that are currently deemed immaterial, which may also impair their respective businesses, financial conditions or results of operations.

As both companies have significant exposure to the oil and gas sector, a number of the risks relating to the Merged Group are, or will be, risks to which either or both of Woodside Shareholders and BHP Shareholders are already exposed and will continue to be exposed if the Merger does not proceed. Woodside Shareholders already bear these risks to a greater degree than BHP Shareholders due to Woodside’s concentration in the oil and gas sector. In addition, the Merged Group’s increased scale of operations as a result of the Merger may increase the exposure to the risks that Woodside currently faces, including the exposure to challenges associated with climate change and the energy transition.

Risks Relating to the Implementation of the Merger

The Implementation of the Merger is subject to certain Conditions, and if these Conditions are not satisfied or waived in a timely manner, the Implementation of the Merger may be delayed or the Merger may not be Implemented.

Implementation of the Merger is subject to the satisfaction or waiver of a number of outstanding Conditions. There can be no certainty, nor can Woodside provide any assurance or guarantee, that these Conditions will be satisfied or waived or, if satisfied or waived, when that will occur. Details of the outstanding Conditions are set out in the section entitled “*The Share Sale Agreement and Related Agreements—The Share Sale Agreement—Conditions.*”

The satisfaction of a number of the outstanding Conditions is outside the control of Woodside and BHP, including, but not limited to, approval of the Merger by Woodside Shareholders and approvals, waivers, confirmations, exemptions or consents from certain regulators, including NOPTA. If the Conditions are not satisfied or waived on or before 30 June 2022 (or an agreed later date), either party to the Share Sale Agreement may terminate the Share Sale Agreement in accordance with its terms, in which case the Merger will not be Implemented.

Table of Contents

If, for any reason, a Condition is not satisfied or waived and the Merger is not Implemented, there may be adverse consequences for Woodside and Woodside Shareholders. These include that the trading price of Woodside Shares may be affected, certain costs relating to the Merger will still be incurred and the anticipated cost savings, synergies and other benefits that Woodside expects to achieve from the Merger will not be realized, which may adversely affect Woodside's operational and financial performance and the market price of Woodside Shares.

The delay to satisfaction or waiver of Conditions could delay Implementation for a time or prevent it from occurring. Certain Conditions may only be satisfied subject to conditions or undertakings imposed by regulatory bodies or other third parties. Any delay in completing the Merger could result in Woodside not realizing some or all of the benefits that it expects to achieve if the Merger is successfully Implemented within its expected timeframe, which may adversely affect Woodside's operational and financial performance. See the section entitled "*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions.*"

In addition, BHP may terminate the Share Sale Agreement in accordance with the terms of the Share Sale Agreement. In certain circumstances (including where termination by BHP is in breach of the Share Sale Agreement), BHP has agreed to pay Woodside a reimbursement fee of \$160 million. Where payable, the payment of the reimbursement fee would be Woodside's sole and exclusive recourse against BHP.

Failure to Implement the Merger could negatively impact the price of Woodside Shares and the future business and financial results of Woodside, and Woodside may not realize the anticipated cost savings, synergies and other benefits that Woodside expects to achieve from the Merger.

If the Merger is not Implemented, the anticipated cost savings, synergies and other benefits that Woodside expects to achieve from the Merger will not be realized, which may adversely affect Woodside's operational and financial performance and the market price of Woodside Shares.

Woodside estimates that it will incur transaction and integration costs in connection with the Merger regardless of whether or not the Merger is Implemented. Regret costs are estimated at \$100 million. In addition, in certain circumstances, Woodside has agreed to pay to BHP a reimbursement fee of \$160 million if the Merger is not Implemented. If the Merger is not Implemented, Woodside will still have to pay the regret costs and may also be required to pay the reimbursement fee. This may adversely affect Woodside's capital and operating expenditure, which in turn may have a negative impact on its business, results of operations and financial condition.

Further, if the Merger is not Implemented, BHP may between 1 July 2022 and 31 December 2022 exercise the Put Option under the Scarborough Put Option Deed to sell its interests in the Scarborough, Jupiter and Thebe Projects, including interests in certain key contracts and petroleum titles, to Woodside. See the section entitled "*The Share Sale Agreement and Related Agreements–Related Agreements–Scarborough Put Option*" for additional information regarding the Put Option. If BHP exercises the Put Option, Woodside must pay \$1 billion in consideration to BHP (with expenditure adjustment from an effective date of 1 July 2021), and an additional \$100 million is payable by Woodside contingent on a future FID for a Thebe development. These circumstances may adversely impact Woodside, and Woodside may be required to fund (on a 100% basis) the capital expenditure for the Scarborough development. Any of these developments may have an adverse impact on Woodside's cash flows, financial performance and financial position.

If the Merger is not Implemented, Woodside Shareholders will continue to be exposed to the various risk factors that currently apply to an investment in Woodside. The risk factors described in the section entitled "*–Risks Relating to the Merged Group*" as applicable to the Merged Group will also apply to a continuing investment in Woodside as a standalone entity.

Table of Contents

If the Merger is Implemented, there may be adverse tax consequences for investors.

In general, for U.S. federal income tax purposes, a U.S. holder of BHP Shares or BHP ADSs must include in its gross income the gross amount of any dividend paid by BHP to the extent of its current or accumulated earnings and profits (as determined for U.S. federal income tax purposes). However, BHP does not calculate earnings and profits in accordance with U.S. federal income tax principles. Accordingly, U.S. holders should expect to treat the entire amount of the Special Dividend as a taxable dividend for U.S. federal income tax purposes. Tax matters are very complicated, and the tax consequences of the Special Dividend to each U.S. holder of BHP Shares or BHP ADSs may depend on the shareholder's particular facts and circumstances. BHP Shareholders and holders of BHP ADSs are urged to consult with, and rely solely upon, their own tax advisers to understand fully the tax consequences to them of the Special Dividend and of holding Woodside Shares or Woodside ADSs (as applicable). Further information on certain taxation consequences of the Special Dividend in certain jurisdictions is set out in the sections entitled "*Material U.S. Federal Income Tax Considerations*" and "*Material Australian Tax Considerations*."

Woodside may not be able to verify the accuracy, reliability or completeness of all information it has received regarding BHP Petroleum and the Merger, and the Share Sale Agreement may not adequately compensate Woodside for losses attributable to breaches by BHP of any representations or warranties in the Share Sale Agreement.

Woodside has conducted due diligence investigations in connection with the proposed Merger. As part of this, Woodside has relied on the information provided by BHP as well as on the due diligence investigations conducted by its employees and its advisers. To the extent that any investigation by Woodside's employees or advisers, or that any information provided to it, is incomplete, incorrect, inaccurate or misleading, the actual performance of the Merged Group may be different from what was expected, which may have an adverse impact on Woodside's financial position and performance.

Additionally, it is possible that the analysis Woodside has undertaken in connection with the Merger has resulted in conclusions and forecasts which are inaccurate, or which are not realized in due course, whether because of flawed methodology, misinterpretation of economic circumstances, tax treatment or otherwise. For example, there is a risk that the Merged Group will not be able to fully utilize certain tax attributes that are expected to transfer to the Merged Group. These include the rates at which tax loss benefits (for example, historic U.S. net operating losses of entities acquired from BHP) can be utilized and the availability of those losses to offset taxable income in any jurisdiction, which depends on many factors which cannot be assured. To the extent that the actual results achieved by the Merger are different than those anticipated by Woodside's analysis, there may be an adverse impact on Woodside's financial position and performance. To the extent that any investigation by Woodside's employees or advisers, or that any information provided to it, is incomplete, incorrect, inaccurate or misleading, the actual performance of the Merged Group may be different from what was expected, which may have an adverse impact on Woodside's financial position and performance.

There is also no assurance that the due diligence conducted was conclusive and that all material issues and risks in respect of the Merger have been identified and avoided or managed appropriately. Therefore, there is a risk that one or more issues may arise which will have a material impact on the Merged Group that were not identified through due diligence or for which there is no contractual protection for Woodside. This could adversely affect the business, results of operations and financial condition of the Merged Group.

Further, given that BHP Petroleum is a wholly owned subsidiary of BHP, its securities are not publicly listed or priced, making it difficult to determine the value of such securities.

Table of Contents

Woodside and the Merged Group will incur significant integration-related costs and challenges in connection with the Merger. Further, the success of the Merged Group and its ability to achieve the anticipated cost savings, synergies and other benefits of the Merger will partly depend on Woodside's ability to separate BHP Petroleum from BHP and integrate the businesses of Woodside and BHP Petroleum, including development, extraction and production operations, technology and personnel of each business.

There are risks associated with separating the business activities and operations of BHP Petroleum from BHP and then conducting and integrating the business activities and operations of BHP Petroleum into Woodside. While Woodside expects that it will be able to integrate BHP Petroleum's operations with its own, there is a risk that separation may take longer than expected, integration may take longer than expected (as a result of a delay in completion of separation activities or otherwise), or that integration may cost more than anticipated, including as a result of the COVID-19 pandemic and applicable physical separation requirements. Potential factors that may impact a successful integration include:

disruption to the ongoing operations or business relationships of either or both businesses;

disruption to project delivery;

delays in separating BHP Petroleum from corporate services provided by BHP;

higher than anticipated integration costs;

unforeseen costs relating to integration of development, extraction and production operational systems, IT systems and financial and accounting systems of both businesses;

extended period of transition services or duplicated activities due to delays in separation of BHP Petroleum and/or delays in implementing replacement processes or services; and

unanticipated loss of key personnel or expert knowledge, or reduced employee productivity due to uncertainty arising as a result of the Merger.

The occurrence of any of these factors may adversely impact the Merged Group's operations, cash flows, financial performance and financial position. In addition, the demands that the integration process may have on management time may also cause a delay in other projects currently contemplated by Woodside and/or BHP Petroleum.

If integration is not achieved in a timely and effective manner, the full benefits of the combination of the two businesses, including the anticipated cost savings, synergies and other benefits that Woodside expects to achieve from the Merger, may be delayed or achieved only in part or not at all. This could adversely impact the Merged Group's business, results of operations and financial condition and the prospects of the Merged Group.

Implementation of the Merger may trigger change of control or other provisions in certain agreements to which Woodside or BHP Petroleum are parties. If consents or waivers under such agreements are not obtained or granted, this may have an adverse effect on the Merger or the Merged Group.

Certain contracts to which Woodside, BHP Petroleum and their respective subsidiaries are party (including contracts with customers, lenders and joint venture partners) contain change of control or deemed assignment provisions that could be triggered by the Merger (including by entry into the Share Sale Agreement, Implementation, or other events in connection with the Merger). If any third-party right of that type is triggered, it may allow the counterparty to review, adversely modify, exercise rights under or terminate the relevant contract. This may also result in Woodside or BHP Petroleum being obliged to pay termination fees or other fees or costs associated with the change of control or deemed assignment provision. If a counterparty were to do any of the foregoing, this may have an adverse effect on the Merged Group, which may be material. Agreements where such change of control provisions exist include agreements relating to assets in Barbados and Egypt, as well as various seismic contracts.

Table of Contents

Woodside and BHP have particular accounting policies and methods and the integration of these accounting functions may lead to revisions which impact the Merged Group's reported results of operations and/or financial position and performance.

Woodside and BHP Petroleum, as standalone entities, have particular accounting policies and methods which are fundamental to how they record and report their financial position and results of operations. Woodside and BHP Petroleum may have exercised judgment in selecting accounting policies or methods, which might have been reasonable in the circumstances yet might have resulted in reporting materially different outcomes than would have been reported under the other company's policies and methods. The integration of Woodside's and BHP Petroleum's accounting functions may lead to revisions of these accounting policies, which may adversely impact the Merged Group's reported results of operations and/or financial position and performance.

After Implementation, Existing Woodside Shareholders will have significantly lower ownership and voting interests in Woodside than they currently have and therefore will exercise less control over management.

As part of the Merger, Woodside will issue a significant number of New Woodside Shares as the Share Consideration. Immediately after Implementation, it is expected that Existing Woodside Shareholders will own approximately 52% of the Merged Group and BHP Shareholders (and the Sale Agent in the case of New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) will own approximately 48% of the Merged Group, respectively, subject to adjustment for any Permitted Equity Raise or further declaration of Woodside Dividends that occurs prior to Implementation. Unless a Woodside Shareholder is also a Participating BHP Shareholder, the Woodside Shareholder is likely to have its ownership and voting interests in Woodside diluted as a result of the Merger.

BHP ADS Holders are not entitled to appraisal rights in connection with the Merger.

Appraisal rights are statutory rights that enable stockholders to dissent from certain extraordinary transactions, such as certain mergers, and to demand that the corporation pay the fair value for their shares as determined by a court in a judicial proceeding instead of receiving the consideration offered to stockholders in connection with the applicable transaction. Under the Corporations Act, BHP Shareholders will not have rights to an appraisal of the fair value of their BHP Shares in connection with the Merger because they are receiving New Woodside Shares and because Woodside Shares are expected to continue to be traded on ASX during the pendency of the Merger and on ASX and LSE following Implementation. Similarly, holders of BHP ADSs will not have appraisal rights.

The historical financial information of BHP Petroleum may not be representative of its results or financial condition if it had been operated independently of BHP and, as a result, may not be a reliable indicator of its future results.

BHP Petroleum is currently owned by BHP. The historical financial information of BHP Petroleum included in this prospectus has been prepared on a carve-out basis from the accounts of BHP and may not reflect what BHP Petroleum's financial position, results of operations or cash flows would have been had BHP Petroleum been an independent, stand-alone entity during the periods presented, nor are they necessarily indicative of the future financial position, results of operations or cash flows of BHP Petroleum. The combined financial statements of BHP Petroleum include all revenues and costs directly attributable to BHP Petroleum and an allocation of expenses related to certain BHP corporate functions. These expenses have been allocated to BHP Petroleum based on direct usage or benefit where identifiable, with the remainder allocated pro rata based on an applicable measure of headcount, usage of technology or other relevant measures. Although BHP Petroleum considers these allocations to be a reasonable reflection of the utilization of services or the benefit received, the allocations may not be indicative of the actual expense that would have been incurred had BHP Petroleum operated as an independent, stand-alone entity, nor are they indicative of BHP Petroleum's future expenses.

Table of Contents

The unaudited pro forma condensed combined financial statements and pro forma reserve and production data included in this prospectus may not be representative of the Merged Group's results after Implementation of the Merger.

The unaudited pro forma condensed combined financial statements for the Merged Group in this prospectus is presented for illustrative purposes only, is based on certain assumptions, addresses a hypothetical situation and reflects limited historical financial data. Therefore, the unaudited pro forma condensed combined financial statements are not necessarily indicative of what Woodside's actual financial position or results of operations would have been had the Merger been completed on the dates indicated, or the future consolidated results of operations or financial position of Woodside. Accordingly, Woodside's business, assets, cash flows, results of operations and financial condition may differ significantly from those indicated by the unaudited pro forma condensed combined financial statements included in this prospectus. See the section entitled "Unaudited Pro Forma Condensed Combined Financial Statements" for more information.

The pro forma reserve and production information in this prospectus is presented for illustrative purposes only, is based on certain assumptions, addresses a hypothetical situation and reflects limited historical reserves and production data. Therefore, the pro forma reserve and production information is not necessarily indicative of what the Merged Group's actual reserve or production data would have been had the Merger been completed on the date indicated or of the future reserve or production of the Merged Group. Accordingly, the Merged Group's reserves and production may differ significantly from those indicated by the pro forma reserve and production information included in this prospectus. See the section entitled "Disclaimer and Important Notices-Pro Forma Financial Statements" for additional information.

Woodside may be unable to provide the same types and level of benefits, services and resources to BHP Petroleum that historically have been provided by BHP, or may be unable to provide them at the same cost.

As part of BHP, BHP Petroleum has been able to receive benefits and services from BHP and has been able to benefit from BHP's financial strength and extensive business relationships. After Implementation, BHP Petroleum will be owned by Woodside and will no longer benefit from BHP's resources. While Woodside has entered into agreements under which BHP has agreed to provide certain transition services for a period of time following Implementation, it cannot be assured that Woodside will be able to adequately replace those resources or replace them at the same cost. If Woodside is not able to replace the resources provided by BHP or is unable to replace them at the same cost or is delayed in replacing the resources provided by BHP, Woodside's business, financial condition and results of operations may be materially adversely impacted.

The Merger may be Implemented even though material adverse changes may occur subsequent to the announcement of the Merger.

Under the terms of the Share Sale Agreement, either party can terminate the agreement if certain prescribed material adverse changes occur which affect the other party. However, certain types of changes do not permit either party to terminate the Share Sale Agreement or otherwise refuse to Implement the Merger, even if such changes would have a material adverse effect on either of the parties. For example, a worsening of Woodside's or BHP Petroleum's financial condition or results of operations due to a decrease in commodity prices or general economic conditions would not give the other party the right to terminate the Share Sale Agreement or otherwise refuse to Implement the Merger. In addition, the parties have the ability, but are under no obligation, to waive any material adverse change that results in the failure of a Condition and instead proceed with Implementing the Merger. See the section entitled "The Share Sale Agreement and Related Agreements-The Share Sale Agreement."

If a material adverse change occurs that affects either party, but the parties are still required to, or voluntarily decide to, Implement the Merger, the Merged Group's business, results of operations and financial condition may suffer and the expected benefits of the Merger may not be realized as a result of such material adverse changes.

Table of Contents

Between the date of the Share Sale Agreement and Implementation, Woodside, BHP Petroleum and their respective subsidiaries' businesses are subject to restrictions on their business activities. These restrictions could adversely impact the Merged Group, or adversely impact Woodside if the Merger does not proceed to Implementation.

The Share Sale Agreement subjects Woodside and BHP Petroleum to certain customary restrictions on their respective business activities during the period between the date of the Share Sale Agreement and the earlier of Implementation and termination of the Share Sale Agreement. The Share Sale Agreement obliges each of Woodside and BHP Petroleum to use its commercially reasonable efforts to carry on its business in the ordinary course in all material respects, and the Share Sale Agreement obliges BHP Petroleum to use its commercially reasonable efforts to preserve substantially intact its business organization, assets, the services of its current officers, employees and consultants and its goodwill and relationships with material customers, suppliers and others. See the section entitled “*The Share Sale Agreement and Related Agreements – The Share Sale Agreement.*”

These restrictions could prevent Woodside and BHP Petroleum from pursuing certain business opportunities that arise during the period between the date of the Share Sale Agreement and the earlier of Implementation and termination of the Share Sale Agreement and could therefore adversely impact the Merged Group. Alternatively, if the Merger does not proceed to Implementation, the business and the future prospects of Woodside and BHP Petroleum could be adversely impacted.

Uncertainty about the effects of the Merger, including effects on employees, host governments, partners, contractors, regulators, suppliers and customers, may have a material adverse effect on the business, results of operations and financial condition of the Merged Group.

The Merger, and existing programs of work to facilitate the Merger, may exacerbate existing risks relating to, among other things, the Merged Group's social license to operate, climate change, environmental and social governance, people and culture, and regulatory compliance risks.

In addition, stakeholders that have business or other relationships with the Merged Group could defer consummation of a transaction or other decisions, or seek to change their existing business relationship with Woodside or BHP Petroleum.

The Merged Group will need to take action to prevent or minimize any detrimental impact to stakeholder relationships from the Merger and integration of Woodside and BHP Petroleum. No assurance can be given that these actions will be successful.

Risks Relating to the Merged Group

The Merged Group will be exposed to risks resulting from fluctuations in LNG market conditions or the price of crude oil, which can be volatile. Any material or sustained decline in LNG or crude oil prices, or change in buyer preferences, could have a material adverse effect on the Merged Group's results.

Both Woodside's and BHP Petroleum's revenues are primarily derived from sales of LNG, crude oil, condensate, pipeline gas and LPG. Consequently, the results of operations of both businesses are strongly influenced by the prices they receive for these products, which in the case of oil and condensate are primarily determined by prevailing crude oil prices and in the case of pipeline gas, LPG and LNG are primarily determined by prevailing crude oil prices as well as some fixed pricing and other price indexes (such as Henry Hub and the Japan Korea Marker (“JKM”)). For the year ended 31 December 2021, the majority (approximately 81%) of Woodside's production was attributed to natural gas, comprising LNG, LPG and pipeline gas and the remaining portion (approximately 19%) of Woodside's production was attributed to oil and condensate. That production mix differs from BHP Petroleum, which for the year ended 31 December 2021, was approximately 63% natural gas, comprising LNG, LPG and pipeline gas, and 37% oil and condensate (excluding Algeria and Neptune

Table of Contents

production). Overall BHP Petroleum has a lower weighting of LNG in its portfolio compared to Woodside. As a result, BHP Petroleum has a relatively lesser exposure to the value of LNG relative to oil. In this context, the Merger will result in Woodside Shareholders diversifying their exposure from LNG, while Participating BHP Shareholders who continue to hold Woodside Shares or Woodside ADSs following the Merger will increase their exposure to LNG.

LNG market conditions including, but not limited to, supply and demand, are unpredictable and are beyond the Merged Group's control. In particular, supply and demand for, and pricing of, LNG remain sensitive to energy prices, external economic and political factors, weather, climate conditions, natural disasters (including pandemics), timing of FIDs for new operations, construction and start-up and operating costs for new LNG supply, buyer preferences for LNG, coal or crude oil and evolving buyer preferences for different LNG price regimes and the energy transition. Buyers and sellers of LNG are increasingly more flexible with the way they transact, and contracts may involve hybrid pricing that is linked to other indices such as the Intercontinental Exchange (ICE) Brent Crude deliverable futures contract (oil price) ("Brent") or the Japanese Crude Cocktail ("JCC"), which is the average price of customs-cleared crude oil imports into Japan as reported in customs statistics. Typically, only LNG supplied from the U.S. was based on a component linked to movements in the U.S. Henry Hub plus certain fixed and variable components. This type of pricing structure may become a component of the weighted average price into Asia and other markets since LNG supply and trade has globalized, and increasingly the lowest cost supply is setting the floor for long-term average global natural gas prices with transportation costs accounting for regional differences. This marginal supply is predominantly from the United States, indirectly pegging global gas prices and Asian spot LNG prices to the Henry Hub marker which could adversely affect the pricing of new LNG contracts and potential future price reviews of existing LNG contracts. Tenders may also be used by suppliers and buyers, typically for shorter-term contracts. In addition, long-term LNG contracts typically contain price review mechanisms which sometimes need to be resolved by expert determination or arbitration. The use of these independent resolution mechanisms are likely to be more prevalent in volatile commodity markets. Alternatives to fossil fuel-based products for the generation of electricity, for example nuclear power and renewable energy sources, are continually under development and, if these alternatives continue to gain market share, they could also have a material impact on demand for LNG, which in turn may negatively impact the Merged Group's business, results of operations and financial condition in the longer-term.

In early March 2020, oil prices experienced a precipitous decline in response to reduced oil demand due to the economic impacts of COVID-19 lockdowns and a fallout between Russia and Saudi Arabia, two of the 23 nations in the OPEC+, that had been balancing the market through supply management. Oil prices have rallied since the 2020 lows and in February 2022 were at multi-year highs as markets priced in geopolitical risk premiums relating primarily to Russia's invasion of Ukraine, exacerbating market uncertainty and energy market volatility. Oil prices can be very volatile, and periods of sustained low prices could result in changes to the Merged Group's carrying value assumptions and may also reduce the reported net profit for the relevant period.

The price of crude oil may be affected by other factors beyond the Merged Group's control, such as worldwide oil supply and demand. In addition to the recent impacts on oil prices resulting from those summarized above, the price of crude oil is affected by the level of economic activity in the markets Woodside and BHP Petroleum serve, regional political developments and military conflicts (including the ongoing Ukraine conflict), weather conditions and natural disasters, conservation and environmental protection efforts, the level of crude oil inventories, the ability of OPEC and other major oil-producing or oil-consuming nations to influence global production levels and prices, sanctions on the production or export of oil, governmental regulations and actions, including the imposition of taxes, trade restrictions, market uncertainty and speculative activities by those who buy and sell oil and gas on the world markets, commodity futures trading, availability and capacity of infrastructure, supply chain disruptions, processing facilities and necessary transportation, the price and availability of new technology, the availability and cost of alternative sources of energy, and the impact of climate change considerations and actions towards energy transition on the demand for key commodities which the Merged Group produces.

Table of Contents

The transition to lower-carbon sources of energy in many parts of the world (driven by ESG and climate change concerns) may affect demand for the Merged Group's products, including crude oil, natural gas and LNG, which in turn may affect the price received (or expected to be received) for these products. Material adverse price impacts (including as a result of the energy transition) may affect the economic performance (including as to margins and cash flows) of, and longevity of production from, the Merged Group's existing and future production assets, and ultimately the financial performance of the Merged Group.

It is impossible to predict future crude oil, LNG and natural gas price movements with certainty. A low crude oil price environment or declines in the price of crude oil, in LNG and natural gas prices, could adversely affect the Merged Group's business, results of operations and financial condition and liquidity. They could also negatively impact its ability to access sources of capital, including equity and debt markets. Those circumstances may also adversely impact the Merged Group's ability to finance planned capital expenditures, including development projects, and may change the economics of operating certain wells, which could result in a reduction in the volume of the Merged Group's reserves. Declines in crude oil, LNG and natural gas prices, especially sustained declines, may also reduce the amount of oil and gas that it can produce economically, reduce the economic viability of planned projects or of assets that it plans to acquire or has acquired and may reduce the expected value and the potential commerciality of exploration and appraisal assets. Those reductions may result in substantial downward adjustments to the Merged Group's estimated proved reserves and require additional write-downs of the value of its oil and gas properties.

Sales contracts with the National Gas Company of Trinidad and Tobago ("National Gas Company") relating to production from BHP Petroleum's T&T operations are linked to ammonia pricing. Similar to crude oil, LNG and natural gas, it is impossible to predict future ammonia prices with certainty.

The Merged Group's exposure to shorter-term contracts and more volatile spot pricing (which can vary from time to time) could result in lower pricing in periods of LNG market over-supply.

A portion of the Merged Group's production is exposed to shorter-term contracts and more volatile spot pricing, contrasted with long-term or medium-term contracts. In the past decade, there has been an increased prevalence of shorter-term contracts (*i.e.*, spot sales and contracts with a duration of two years or less) and lower quantity contracts across the LNG market, although the share of total trade has tapered off slightly in recent years. It is anticipated that the proportion of such production of the Merged Group will vary from time to time. If the proportion of the Merged Group's production contracted on a shorter-term basis increases at any point in time, this may result in the Merged Group having increased exposure to deterioration in LNG market conditions.

Further, there is a risk that in a lower price environment, buyers are not willing to commit to medium-term or long-term contracts, which may also result in the Merged Group having increased exposure to spot prices and LNG market volatility. Any increase in the Merged Group's percentage of uncommitted production could result in lower average realized prices during periods of LNG over-supply, which could have an adverse effect on the Merged Group's business, results of operations and financial condition.

The Merged Group may be exposed to commodity and currency hedging.

There can be no assurance that the Merged Group will successfully manage its exposure to commodity prices. There is also counterparty risk associated with derivative contracts. If any counterparty to the Merged Group's derivative instruments were to default or seek bankruptcy protection, it could subject a larger percentage of the Merged Group's future oil and gas production to price changes and could have a negative effect on Woodside's financial performance, including its ability to fund future projects. Whether the Merged Group engages in hedging and other oil and gas derivative contracts on a limited basis or otherwise, the Merged Group will remain exposed to fluctuations in crude oil prices.

Table of Contents

The Merged Group has interests in LNG projects in construction which will increase the Merged Group's LNG production and LNG sales and, therefore, its reliance on the prices at which it is able to sell its LNG production to its customers.

Woodside and BHP Petroleum have interests in LNG projects in construction, for example, in the case of Woodside, the Scarborough and Pluto Train 2 development and the North West Shelf and Julimar Brunello upstream supply projects which will, if and when completed, supplement Woodside's LNG production and LNG sales and, therefore, its reliance on the prices at which it is able to sell its LNG production to its customers. Accordingly, negative movements in the LNG market may have a material adverse effect on Woodside's financial performance, including in relation to uncommitted production from existing facilities or from potential future developments.

The Merged Group's profits may be adversely affected by the introduction of new LNG facilities, or increased LNG throughput and expansion of existing LNG facilities (including those owned or operated by the Merged Group) in the LNG market, which could increase the supply of LNG and thereby lower prices. In particular, in both the Atlantic and Asia-Pacific markets, there is increasing LNG supply under construction and potential East African, North American, Qatari and Russian LNG projects, which may increase competition in the Atlantic and Asia-Pacific LNG markets. Such increases in the supply of LNG without a corresponding increase in demand for LNG may lower LNG prices and the prices at which the Merged Group is able to sell its LNG production to its customers. Decreases in LNG prices may materially affect the Merged Group's business, results of operations and financial condition.

The Merged Group has a significant interest in oil projects in construction which will increase the Merged Group's crude oil production and crude oil sales and, therefore, its reliance on crude oil prices at which it is able to sell its production to its customers.

The Merged Group has a significant interest in certain oil projects, including the Sangomar Oil Field Development and Mad Dog Phase 2, which are currently in construction and will, if and when completed, increase the Merged Group's crude oil production and crude oil sales and, therefore, its reliance on the prices at which it is able to sell its crude oil production to its customers. Accordingly, negative movements in the oil market may have a material adverse effect on the Merged Group's financial performance, including in relation to uncommitted production from existing facilities or from potential future developments.

After Implementation of the Merger, the Merged Group will be exposed to further risks which may be greater than they would be on a standalone basis and therefore may adversely affect the financial position or performance of the Merged Group.

After Implementation of the Merger, Woodside Shareholders will be exposed to risks relating to BHP Petroleum and certain additional risks relating to the Merged Group and the integration of the two businesses. Correspondingly, Participating BHP Shareholders who become Woodside Shareholders will be exposed to these additional risks as well as the risks relating to Woodside.

While the operations of Woodside and BHP Petroleum are similar in a number of ways, there may be further risks relating to the operation of a broader suite of assets that arise in relation to the Merged Group. In particular, the asset portfolio, capital structure and size of the Merged Group will be different from that of Woodside and BHP Petroleum on a standalone basis. These risks and the impact on the Merged Group may be greater than they would be on a standalone basis and therefore may adversely impact the Merged Group's business, financial condition and results of operations.

The impacts of an epidemic or outbreaks of an infectious disease, such as COVID-19, could materially adversely affect the Merged Group's business, results of operations and financial condition.

The Merged Group will face risks related to the impacts of epidemics, outbreaks or other public health events that are outside of its control and could significantly disrupt its operations and adversely affect its

Table of Contents

business, results of operation and financial condition. For example, the ongoing COVID-19 pandemic could adversely affect the Merged Group's operations by rendering employees, contractors or vendors unable to work or unable to access its facilities for an indefinite period of time due to illness, quarantine or transportation and travel restrictions. The Merged Group may experience an impact to the timing and availability of key products or services from suppliers, or customer shutdowns to prevent spread of the virus, both of which could negatively impact its business. In addition, the effects of COVID-19 and concerns regarding its global spread could negatively impact the domestic and international demand for crude oil and natural gas. This could contribute to price volatility, increase the Merged Group's counterparty risk, impact the price it receives for oil and natural gas and materially and adversely affect the demand for and marketability of the Merged Group's production. Restrictions on global shipping and limitations of the Merged Group's joint venture partners' ability to lift cargoes from producing facilities may result in maximum storage capacities being reached and a reduction in short-term production.

As the potential ongoing impact from COVID-19 is very difficult to predict, the extent to which it may negatively affect the Merged Group's operating results or the duration of any potential business disruption in the future is uncertain. The impact of current and future COVID-19 outbreaks will depend on future developments and new information that may emerge regarding the severity and duration of COVID-19 and the actions taken by authorities to contain it or treat its impact, all of which are beyond the Merged Group's control. These potential impacts, while uncertain, could adversely affect the Merged Group's business, results of operations and financial condition.

The majority of the Merged Group's major projects and operations will be conducted in joint ventures, and therefore the Merged Group's degree of control, as well as its ability to identify and manage risks, may be reduced.

A significant share of the Merged Group's capital has been or will be invested in joint venture assets and activities with other joint venture participants, including NOCs. Such joint venture participants may have economic or business interests or objectives that are inconsistent with or opposed to the Merged Group's interests and objectives, and may exercise veto rights to block certain key decisions or actions that the Merged Group believes are in its or the joint venture's best interests, or approve those matters without the Merged Group's support. In some instances, joint venture participants or contractual counterparties may be primarily responsible for the adequacy of the human or technical competencies and capabilities which they bring to bear on the joint project which is out of the Merged Group's direct control. Additionally, partners or members of a joint venture may not be able to meet their financial or other obligations to the projects, which may threaten the viability of a given project or cause the Merged Group to incur additional costs associated with a given project. If the Merged Group were to experience misalignment with joint venture participants or other issues with joint decision-making, including in respect of preferred concept selection and funding of current and potential projects, the Merged Group could experience allegations of breach, delays in development of those projects or miss opportunities to pursue development at all.

In cases where the Merged Group is not the operator, it may be unable to control the behavior, performance and cost of operations of joint ventures in which it participates. In these cases, the Merged Group will be dependent on joint venture participants acting as operators and its ability to direct operations or manage the timing and performance of any activity or the costs or risks involved may be reduced.

In addition, joint venture partners may default on their obligations due to insolvency, lack of liquidity, operational failure or other reasons. The inability of any joint venture partner to meet its obligations could have an adverse effect on the Merged Group's business, results of operations and financial condition.

For additional information on Woodside and BHP Petroleum's joint venture interests, see the sections entitled "*Business and Certain Information About Woodside*" and "*Business and Certain Information About BHP Petroleum*."

Table of Contents

Woodside invests, and following Implementation of the Merger the Merged Group is expected to invest, significant amounts of funds in a variety of exploration, development, production, construction, restoration, lower-carbon services and new energy activities across the world, which involve many uncertainties and operating risks that could prevent it from realizing profits or result in total or partial loss of its investment. This in turn may affect the Merged Group's business, results of operations and financial condition.

The Merged Group will invest significant funds over the next several years on the Sangomar Oil Field Development and the Scarborough and Pluto Train 2 development and may invest significant funds over the next several years on other developments including Browse offshore WA, Trion in Mexico, Calypso in T&T, Greater Sunrise located between Australia and Timor-Leste, the Liard Basin in Canada, and additional supply projects to existing producing assets as well as other exploration, development, restoration and new energy activities. These activities may involve many uncertainties and operating risks that could prevent the Merged Group from realizing profits or result in the total or partial loss of its investment, putting pressure on its balance sheet and credit rating. Unforeseen issues, including increasing the required amount of capital expenditure necessary to complete a project, the impact of volatile crude oil, natural gas and LNG prices and the Merged Group's inability to enter into supply contracts with buyers in advance of an FID may cause the Merged Group not to proceed with any one or a combination of these activities.

In addition, even if the Merged Group and its joint venture participants decide that certain projects are economically viable, the Merged Group may not receive the necessary government and regulatory authorizations and permits to proceed with development, even where it may have incurred substantial costs in the evaluation process (for example, North West Shelf and Browse environmental approval processes are ongoing). The Merged Group's projects will often require the use of new and advanced technologies, including in respect of the new energy activities of the Merged Group, which can be expensive to develop, purchase and implement, and may not function as expected. Some of the Merged Group's development projects will be located in deepwater or otherwise challenging environments, for example offshore of Western Australia and in the U.S. GOM, or produced from challenging reservoirs. The Merged Group's projects could experience project implementation schedule slippage, shortages of or delays in the delivery of equipment or purpose-built components from suppliers, escalation in capital cost estimates, possible shortages of construction or other personnel, other labor shortages, environmental occurrences during construction that result in a failure to comply with environmental regulations or conditions on development, or delays and higher-than-expected costs due to the remote location of the projects, the impact of COVID-19 on the relevant workforce or supply chain, other unanticipated natural disasters, accidents, miscalculations, political or other opposition, litigation, acts of terrorism, operational difficulties, climate change related risks or other events associated with that construction that may result in the delay, suspension or termination of the Merged Group's projects. This may result in further costs, the total or partial loss of the Merged Group's investment and a material adverse effect on the Merged Group's business, results of operations and financial condition.

The Merged Group's projects may be delayed, more costly than anticipated or unsuccessful for many reasons, including declines or unexpected volatility in oil and gas prices, misalignment between joint venture participants, cost overruns, changes in regulations, unanticipated financial, operational or political events, mechanical and technical difficulties, increases in operating cost structures, equipment and labor shortages, industrial actions or other circumstances. This may result in the delay, suspension or termination of the Merged Group's capital projects or the total or partial loss of the Merged Group's investment which may have a material adverse effect on the Merged Group's business, results of operations and financial condition.

In order to advance its proposed developments, the Merged Group is reliant on agreements with third parties.

A number of the Merged Group's proposed developments, including optimization of existing Woodside and BHP Petroleum projects, will require commercial agreements to be entered into with third parties, including other joint venture participants. Some examples may include gas processing or infrastructure use agreements. A number of the required agreements may be complicated, have limited precedent and may require significant time

Table of Contents

and resources to negotiate and finalize. In addition, as some of these commercial agreements will need to be agreed by the participants within a joint venture, the risk of misalignment among those participants may impact the likelihood or timing of finalizing those agreements as those joint venture participants may have economic or business interests or objectives that are inconsistent with or opposed to the interests and objectives of its fellow joint venture participants.

The Merged Group may incur losses associated with counterparty exposures.

The Merged Group will assume counterparty risk as it will rely on the ability of its counterparties to discharge their obligations (including financial obligations) on a timely basis. There is also a risk that the Merged Group's rights against counterparties will not be enforceable in certain circumstances. Counterparties may default on their obligations due to insolvency, lack of liquidity, operational failure or other reasons. The inability of any of the Merged Group's counterparties to meet their contractual obligations with the Merged Group, or the inability of the Merged Group to enforce the contractual obligations of counterparties, could have an adverse effect on the Merged Group's business, results of operations and financial condition.

The Merged Group intends to continue to acquire or discover additional hydrocarbon resource volumes and commercialize them into proved reserves or further develop existing, acquired or discovered reserves to supplement its proved reserves and production (subject to satisfying the criteria set out in Woodside's capital allocation framework, energy replacement strategies and the overall energy transition).

The production rate of oil and gas properties declines as producing fields and reserves are depleted. Except to the extent that the Merged Group acquires further properties containing additional proved reserves, conducts successful exploration and development activities or identifies and develops additional proved reserves within its existing permits, the Merged Group's proved reserves will decline as its production continues. In addition, much of the Merged Group's interests are in mature fields with declining production. Although the Merger is intended to reduce this risk, the Merged Group's future oil and gas production will remain dependent upon its level of success in acquiring, finding and/or developing additional proved reserves. Further, revisions to reserves occur from time to time as a result of other factors including completion of reservoir and subsurface studies. By way of example, there were several revisions to Woodside's proved reserves in 2021, including revisions to the Wheatstone proved reserves and the Greater Pluto proved reserves.

While Woodside is starting to progress new energy opportunities for the Merged Group, in the near term, its revenues and profits will continue to be predominantly derived from its oil and gas operations. As its energy portfolio evolves, the sustainability and growth of its operations and financial condition will continue to be underpinned by the success of its exploration, acquisition and development efforts and its ability to replace existing hydrocarbon resources. In addition, Woodside may choose to place a greater focus on growing the Merged Group's new energy portfolio, which may have a negative impact on the replacement of reserves. Failure to acquire or discover and develop new resources, or develop existing or acquired or developed resources in sufficient quantities, to maintain and grow the current level of the Merged Group's proven reserves would likely negatively affect its long-term results of operations and financial condition unless balanced by growth in its new energy portfolio.

Woodside expects to continue to evaluate and, where appropriate, the Merged Group will also pursue acquisition opportunities and the development of projects, including in established, emerging and new regions or markets. However, there is a risk that the Merged Group may not be able to identify suitable acquisition opportunities in the future or may not be able to successfully complete acquisitions, or it may acquire entities or assets that do not perform as expected. Similarly, the Merged Group may not be able to identify further projects that are economically feasible, or it may be unable to generate sufficient operating earnings or raise additional capital to meet the capital expenditure requirements necessary for development.

In conducting exploration and development activities from a particular reservoir or facility and associated wells, the risk of not finding hydrocarbons or experiencing unanticipated adverse outcomes such as irregularities

Table of Contents

in formations, miscalculations or operational issues may render the Merged Group's activities unsuccessful, potentially resulting in the abandonment of the well or development and a loss of its investment. In addition, it may be difficult to accurately predict timing requirements related to regulatory, environmental and community approvals in some regions which may result in construction delays. The Merged Group may not achieve its full growth strategy and potential, as the commercialization of contemplated or planned projects, including with respect to assets it has discovered, acquired or plans to acquire, may deteriorate and require alternative technologies and/or lower cost developments to justify further investment. These factors may adversely affect the timing and/or economic value of new oil and gas opportunities, the expansion of the Merged Group's existing operations and its resulting financial performance and condition.

The Merged Group operates in a high risk industry, and there are risks inherent in the Merged Group's exploration, development, production and restoration activities, including a failure to find resources that can be commercialized successfully or the occurrence of operational or environmental hazards, which could adversely affect the Merged Group's business, results of operations and financial condition.

The Merged Group will have interests in a number of oil and gas exploration assets around the world, including in Australia, Senegal, South Korea, Congo, Egypt, T&T, U.S. GOM, Mexican GOM, Canada, Ireland and Barbados, and it may increase its level of exploration in these and other locations around the world.

Furthermore, the Merged Group's operations can be impacted by operational hazards and environmental hazards. Operational hazards include, among others, the risk of fire, explosions, well blowouts, pipe failure and abnormally pressured formations. Environmental hazards include oil spills, gas leaks, pipeline ruptures or discharge of toxic gas.

Woodside's and BHP Petroleum's operations are often conducted in difficult or environmentally sensitive locations, in which the consequences of a spill, explosion, fire or other incident could be significant. Accordingly, inherent in the Merged Group's operations is the risk that if it fails to manage operational hazards and abide by environmental and safety and protection standards, such failures could lead to damage to the environment and could result in regulatory action, legal liability, material costs and damage to the Merged Group's reputation or license to operate. In certain circumstances, liability could be imposed without regard to the Merged Group's fault in the matter.

The Merged Group has interests in deepwater fields and the Merged Group may attempt to pursue additional operational activity in the future and acquire additional fields and leases, including in the deep waters of the U.S. GOM. Exploration for oil or natural gas in deepwater generally involves significant operational, environmental and financial risks.

Operating or environmental hazards may cause the Merged Group to be unable to provide a safe environment for its workforce and the public, which could lead to injuries or loss of life and could result in regulatory action, legal liability and damage to the Merged Group's reputation.

Material limitations to the Merged Group's access to capital, a failure in financial risk management, government fiscal, monetary and regulatory policy and variability in interest and exchange rates could all adversely affect the Merged Group's business, results of operations and financial condition.

The operating and financial performance of the Merged Group's business is influenced by a variety of general economic and business conditions, including, among other things, access to debt and capital markets, government fiscal, monetary and regulatory policy and variability in interest and exchange rates. Deterioration in general economic conditions, including higher or lower than expected inflation rates or globally significant events, such as the ongoing COVID-19 pandemic, or the conflict in Ukraine, and perceptions towards climate change and ESG matters, could have an adverse impact on the Merged Group's operating and financial performance and financial position.

Table of Contents

The Merged Group may be unable to maintain Woodside's current credit rating due to a number of factors, including as a result of changes in its operating or business performance, a breach of debt covenants, changes in capital structures, changes in market conditions or through strategic decisions. Changes to economic and business conditions, which are beyond the Merged Group's control, may also limit its ability to access debt and capital markets on favorable terms. This may adversely impact the Merged Group's access to and cost of funding and its ability to fund growth and operational plans, which may have a material adverse effect on the Merged Group's business, financial condition and results of operations.

The Merged Group may encounter natural disasters or acts of terrorism (whether physical, cyber or otherwise), that may result in diminished production, additional costs or substantial loss.

Woodside and BHP Petroleum are, and the Merged Group will be, subject to operating hazards associated with the exploration for, and development, production and transportation of, oil and gas. Natural disasters, inclement weather, acts of terrorism, operator error, disruption to supply chain or other occurrences can result in adverse events, including, without limitation, injury or loss of life, damage to or destruction of property (including oil and gas wells, formations and production facilities), diminished production, additional costs, loss of well control or blowouts, vessel collision, loss of containment of hydrocarbons and other hazardous material, pollution and other damage to the environment, labor disruptions, fires, explosions, equipment failure or other incidents. The Merged Group's offshore operations will be subject to marine perils, including severe storms and other adverse weather conditions and vessel collisions, as well as interruptions or termination by governmental authorities based on environmental and other considerations. The occurrence of any of these operating hazards could result in injuries or loss of life, regulatory action, legal liability and damage to the Merged Group's reputation and substantial losses to the Merged Group, all of which may affect its financial position and performance. There can be no assurance regarding the availability of insurance to cover any such losses or liabilities associated with operational hazards, or that any insurance cover will be adequate to compensate for such hazards.

Furthermore, acts of terrorism (whether physical, cyber or otherwise) against the Merged Group's facilities, pipelines, transportation, computer systems or employees could severely disrupt its operations, supply chain, cause loss of life and could have a material adverse effect on the Merged Group's business, financial condition and results of operations.

If an adverse event of this nature were to occur in the North West Shelf area off the northwest coast of Australia or the Gulf of Mexico, the impact on the Merged Group's operations and financial results could be magnified given the geographic concentration of the Merged Group's significant producing assets in these areas.

Woodside's and BHP Petroleum's operations are subject to extensive governmental oversight and regulation, particularly with regard to the environment and occupational health and safety, that may change in ways that adversely affect the Merged Group's business, results of operations and financial condition.

Woodside's and BHP Petroleum's businesses are subject, in each of the countries in which they operate, to various national and local laws, regulations and approvals relating to the development, production, marketing, pricing, transportation and storage of its products as well as the restoration of their properties. Therefore, a change in the laws or regulations (including in respect of their interpretation) that apply to their businesses or in the way in which the Merged Group will be regulated could have a material adverse effect on the Merged Group's business and financial condition. With increasingly heightened government and public sensitivity to environmental sustainability, climate change, and ESG matters, environmental regulation is becoming more stringent. Changes in environmental laws and regulations occur frequently and the Merged Group could be subject to increasing environmental responsibility and liability, including laws and regulations dealing with exploration and drilling, plugging and abandonment of wells, air quality, water and noise pollution and other discharges of materials (including greenhouse gases) into the environment, plant and wildlife protection, the reclamation and restoration of certain of the Merged Group's properties, greenhouse gas emissions, the storage,

Table of Contents

treatment and disposal of wastes and the effects of the Merged Group's business on the water table and groundwater quality. Any changes that impose additional requirements (including in respect of restoration) or restrictions on the Merged Group's operations or more stringent and costly waste management or cleanup requirements could result in substantial costs or impair the Merged Group's ability to operate profitably.

These laws and regulations may require the Merged Group to obtain licenses, permits and approvals before activities commence that restrict the types, quantities and concentrations of various substances that can be released into the environment, limit or prohibit construction or drilling activities in certain sensitive environments, require expanded corporate disclosure about operational impacts and corporate strategy on environmental matters, and impose substantial liabilities for violations of laws and regulations or for pollution resulting from former or current operations. Substantial compliance costs could impact the financial prospects of the Merged Group.

There is existing litigation and may be threats of, or possible future, litigation seeking to challenge approvals (either current or retrospective) that the Merged Group holds in respect of certain development activities, including but not limited to approvals for new, or expansions to existing, projects. Some of these challenges and threats could relate to greenhouse gas emissions, environment, cultural heritage or human rights. There may be litigation in respect of the Merged Group's level of disclosure of climate change risk, including whether that disclosure is in accordance with legislation, or is in some way misleading or deceptive (akin to "greenwashing"), and related proceedings may give rise to claims for the disclosure of board and governance documents. The granting of approvals to the Merged Group under the Environment Protection and Biodiversity Conservation Act 1999 (Cth) may also be subject to challenges, including around whether such approvals breach an existing or future duty of care (such as the novel duty of care to not cause harm to Australian children (as contemplated in "Sharma (by their litigation representative Arthur) and Others v Minister for the Environment (Cth) and Another (2021) 391 ALR 1" judgment, which was overturned on appeal).

If those threats materialize and/or the challenges are successful, new approvals may be required, there is a risk that those approvals will not be granted or, if they are, the Merged Group may be subject to more onerous conditions. There is also a risk of not obtaining relevant approvals, the revocation or modification of approvals that have been granted, or court orders enjoining certain development activities. There is also a risk that the legal action and threats will generate significant adverse publicity for the Merged Group, encourage similar suits to be brought in other jurisdictions or cause delay to the anticipated development schedule.

Revocation, failure to renew or alteration of the terms of the licenses, permits or approvals required for the Merged Group's operations may negatively affect the Merged Group's business or results of operations. Sanctions for non-compliance with these laws and regulations may include administrative, civil and criminal penalties, demand for reimbursement for government or regulatory actions, government orders, revocation of licenses, permits, approvals, and corrective action orders. These laws sometimes apply retroactively. In addition, a party can be liable for environmental damage without regard to that party's negligence or fault. Therefore, the Merged Group could have liability for the conduct of others or for acts that were in compliance with all applicable laws at the time it performed them, including trailing liability for operations undertaken by purchasers of the Merged Group's assets.

In addition, governmental authorities may recommend or impose other measures that could cause significant disruptions to the Merged Group's business operations in the regions most impacted by COVID-19. The Merged Group's operational response to COVID-19, for example the change of crew rosters to ensure quarantine requirements are met, must meet regulatory expectations. Inadequate risk assessment or implementation of revised operating practices may result in regulator notices or the imposition of production limitations.

New regulations and legislation, as well as evolving practices, with respect to environmental, health and safety controls, and increased governmental oversight of operations could increase the Merged Group's costs of regulatory compliance, impact its ability to capitalize on and/or to divest its assets and limit its access to new exploration properties.

Table of Contents

In the United States, the exploration, production, transportation, and sale of oil and natural gas are subject to certain federal, state, and local laws and regulations. Current regulatory requirements may change or past non-compliance with regulations may be discovered. Because such laws and regulations are subject to amendment and reinterpretation over time, the Merged Group will be unable to predict the future cost or impact of complying with such laws.

Moreover, the Merged Group cannot predict whether new legislation to regulate the oil and natural gas industries in the United States might be proposed, what proposals, if any, might actually be enacted by the U.S. Congress, the applicable federal agencies, or the various state legislatures, and what effect, if any, the proposals might have on its operations. The adoption and implementation of new or more stringent federal, state or local legislation, regulations or other regulatory initiatives that result in the imposition of more stringent standards for greenhouse emissions from the oil and natural industry could restrict the areas in which this sector may operate, and could result in increased compliance costs and changes in product pricing, which could impact consumer demand for Woodside's products.

The Merged Group is required to comply with both U.S. reporting and governance requirements and Australian securities regulations, which take different approaches to reserves reporting.

Woodside is a "disclosing entity" in Australia. As a result, the Merged Group's disclosure outside the United States will differ from the disclosure contained in the Merged Group's filings with the SEC. Woodside's reserve estimates disseminated outside the United States are not directly comparable to those made in filings subject to SEC reporting and disclosure requirements, as Woodside generally reports reserves in accordance with Australian practices. These practices are different from the regulations applicable to disclosure of reserve estimates in reports and other materials filed with the SEC. For example, the SEC permits oil and gas companies to disclose only estimated proved, probable and possible reserves that meet the SEC's definitions of such terms. Certain measures in communications filed by Woodside with the ASX in connection with the Merger, including "contingent resources," would generally not be required or, in some cases, permitted in SEC filings. Woodside urges BHP Shareholders to read Woodside's reserves estimates in this prospectus, which are presented in accordance with SEC requirements. Woodside is also subject to regulatory scrutiny and costs associated with complying with securities legislation in Australia.

The Merged Group's operations will be subject to governmental and sovereign risks, including political, legal and other uncertainties in the countries in which Woodside and BHP Petroleum do business, which could adversely affect the Merged Group's business, prospects, financial condition and results of operations.

Woodside's and BHP Petroleum's operations have been, and at times in the future the Merged Group's operations may be, affected by political developments and by national, state and local laws and regulations (including their interpretation or application); for example, restrictions on production, changes in taxes, royalties and other amounts payable to governments or governmental agencies, price or gathering rate controls and environmental protection regulations (including in respect of restoration). Further, the Merged Group's operations and the products it produces are the focus of increasing governmental policy initiatives and sovereign interests. Those initiatives and interests include environmental protection objectives, preservation of natural resources for national and state requirements, promotion of alternative energy uses, promotion of further exploitation of natural resources, local content requirements and other similar objectives. For example, BHP Petroleum's oil and natural gas operations in the United States and Mexico are subject to stringent federal, state and/or local laws and regulations relating to the release or disposal of materials into the environment or otherwise relating to environmental protection. The Merged Group will have exploration activities and potential projects outside Australia and in countries that are subject to various risks inherent in foreign operations in certain emerging markets with less stable legal, regulatory and political systems and where the geopolitical climates are changing. Further, Woodside's development and exploration activities in certain of those countries may be unlike any development and exploration activities that have taken place in those countries previously. In addition, the Glasgow Climate Pact calls upon parties to the United Nations Framework Convention on Climate

Table of Contents

Change to “accelerat[e] efforts towards the phasedown of unabated coal power and phase-out of inefficient fossil fuel subsidies.”

Future government policy objectives in the countries in which the Merged Group may do business could take the form of increased governmental regulations (including in respect of restoration), redirection of product distribution (such as domestic gas reservation policies), changes in taxation regulation or enforcement (including, for example, changes in tax rates on increased focus on audits), taxation subsidies or royalties, nationalization of resource assets, limitations on periods of lease retention, interference with the confidentiality and availability of information, forced renegotiation of contracts, changes in laws and policies governing operations of foreign-based companies, trade sanctions, currency restrictions and exchange rate fluctuations and other governmental steps. For example, there is the potential of trailing liabilities for prior titleholders in respect of decommissioning in the countries in which the Merged Group operates, which could lead to increased decommissioning costs. Such legislation has been introduced in Australia.

The Laminaria and Corallina Decommissioning Cost Recovery Levy has been enacted by the Australian government for the purpose of recovering the Commonwealth of Australia’s costs of decommissioning the Laminaria and Corallina oil fields and associated infrastructure.

Furthermore, risks including war, insurrection, acts of terrorism and other political risks are, or may in the future be, present in some of the countries in which the Merged Group will do business.

The Merged Group may also be exposed to risks relating to bribery and corruption. Refusal to pay facilitation payments could result in disruption or delay to the Merged Group’s operations and restriction on its ability to complete projects and secure further growth opportunities. Further, certain of the Merged Group’s projects will be subject to government approvals from foreign governments, including some of whom will be the Merged Group’s joint venture partners, and there is no assurance that those approvals will be obtained, which could adversely affect the Merged Group’s business.

These potential governmental actions and risks could have a significant adverse effect on the Merged Group’s operating model and could subject the Merged Group’s future operations, developments and exploration assets to delays and increased costs, or prohibitions on certain activities, the occurrence of which could have a material adverse effect on the Merged Group’s business, results of operations and financial condition.

Oversight and review by the ACCC in Australia, and other competition regulatory bodies in the jurisdictions in which the Merged Group will operate, may impact the Merged Group’s investments and businesses.

Australia, the United States and most other countries in which the Merged Group will operate have laws designed to promote competition in business and to protect the interests of consumers. These laws prohibit certain conduct including cartel conduct between competitors, various arrangements/conduct that has the purpose, effect or likely effect of substantially lessening competition including “exclusive” supply or distribution arrangements, misuse of market power, concerted practices and anticompetitive mergers and acquisitions, and misleading or deceptive conduct. In August 2021, the ACCC proposed significant reforms to Australia’s merger control regime, including mandatory notification thresholds and deeming acquisitions which would entrench, materially increase or materially extend the substantial market power of the acquirer as have the effect of substantially lessening competition. The proposed reforms, if adopted by the Federal Government and enacted, and any adverse review, actions or decisions by the ACCC under current or future competition laws may prevent or limit the Merged Group’s ability to pursue certain acquisitions.

If Woodside or BHP Petroleum is found to have contravened, or the Merged Group is found to contravene, applicable competition laws, the Merged Group may be subject to penalties and other court orders which may impact the Merged Group financial performance, business and reputation. For additional information regarding applicable competition laws, see the section entitled “*Regulatory Information About the Merged Group.*”

Table of Contents

The global response to climate change is changing the way the world produces and consumes energy, creating risks for the Merged Group. The complex and pervasive nature of climate change means transition risks are interconnected with and may amplify other risks. Additionally, the inherent uncertainty of potential societal responses to climate change may create a systemic risk to the global economy. If the Merged Group fails to adequately respond and adapt to the global response, its business, results of operations and financial condition could be materially adversely affected.

A recent report of the Intergovernmental Panel on Climate Change (IPCC, Working Group 1 contribution to the Sixth Assessment Report) states that “it is unequivocal that human influence has warmed the atmosphere, ocean and land.” The Merged Group will be a major producer of energy-related products such as LNG, crude oil, condensate, pipeline gas and LPG which result in the generation of greenhouse gas emissions throughout their lifecycle. Additionally, the Merged Group’s operations and properties will generate greenhouse gas emissions, particularly in Australia and the United States.

The complex and pervasive nature of climate change means that climate change risks are interconnected with and may amplify the Merged Group’s other principal risks. Political and legal risks in relation to climate change include the possibility of executive and legislative change (such as the introduction of carbon pricing, modifications to the tax structure, tightening of restrictions on emissions, among others), delays, conditions or suspensions placed on regulatory approvals and litigation. Political and legal risks may result in reduction or modification of certain operations, loss of lawsuits seeking to impose liability, or impairment of the Merged Group’s ability to continue to operate in an economic manner. These may lead to increased costs or decreased opportunities in operations, delay projects, and may adversely change the demand for oil and gas products in the Merged Group’s portfolio, thereby reducing revenues, adversely impacting earnings and the value of its reserves, and accelerating decommissioning obligations. “Green incentives” could help accelerate and de-risk investments in new energy technologies by competitors. Litigation could disrupt or delay regulatory approvals or impose financial costs.

Technology risks include the cost of transition to lower emitting or less carbon-intensive technology in order to meet emission reduction targets and the risk of failure in novel technologies. These could increase the cost of achieving emission reduction targets and increase costs or reduce revenue from new products and services. The timing of technology development and deployment is uncertain which also results in a risk of increased cost or decreased revenue if the Merged Group’s investments in new energy technologies are not timed to meet customer demand.

Market risks include changes to the price level and volatility of products that the Merged Group sells, thereby reducing revenues and adversely impacting earnings and the value of its reserves. Market risks also include changes to the price and availability of goods and services that the Merged Group purchases. These risks could arise due to climate regulation imposed upon customers and suppliers, product substitution as new forms of energy emerge, or other forms of change in final customer demand such as reductions in petroleum product demand due to faster than expected adoption of electric vehicles and other changes in consumer preferences.

Reputation risks include the risk of increased stakeholder concern and of stigmatisation of the broader carbon-intensive energy sector, if emissions reduction and energy transition targets are not achieved and/or do not meet community expectations. This could affect the Merged Group’s ability to attract and retain talent and capital, and may include shareholder activism. The Australian legal regime, where the majority of the Merged Groups’ assets and where its headquarters will be located, is generally conducive to shareholder activism. Shareholders have statutory rights to call shareholders’ meetings, to requisition resolutions and remove directors. The increased public and private focus on climate change and greenhouse gas emissions may cause some investors to take steps to involve themselves in the governance and strategic direction of the Merged Group. Any investor activism could increase costs, divert management’s attention and resources, impact execution of business strategy and initiatives, create adverse volatility in the market price of the Merged Group securities or make it difficult to attract and retain qualified personnel and business partners.

Table of Contents

Financial risks include the risk that investors invested in fossil fuel energy companies become increasingly concerned about the potential effects of climate change and may elect in the future to shift some or all of their investments into other sectors. Institutional lenders which provide financing to fossil fuel energy companies have also become more attentive to sustainable lending practices that favor renewable power sources such as wind and solar photovoltaic, making those sources more attractive, and some of them may elect not to provide funding for fossil fuel energy companies, or may make funding available on less competitive terms. Additionally, there is the possibility that financial institutions will be required to adopt policies that limit funding for fossil fuel energy companies. Limitation of investments in and financing for fossil fuel energy companies could result in the restriction, delay or cancellation of new or expanded development or production activities as well as a reduction in the Merged Group's share price.

Physical risks include the potential exacerbation (frequency or severity) of existing weather conditions (for example cyclones or hurricanes), hot working conditions, rising sea levels and erosion, which matters could have a material adverse effect on the Merged Group's assets and operations as well as the business of third-party vendors who supply necessary products and services in support of those operations.

Woodside's objective to succeed in the energy transition may meet unforeseen challenges, including the pace of technological innovation, supply and safety of new sources of energy, regulatory and legal obstacles, financing limitations, engineering and technical know-how, and unexpected competition.

Woodside believes that the Merger will create a larger, more resilient company with increased scale and technical depth, enabling the Merged Group to better navigate the energy transition than either Woodside or BHP Petroleum would achieve without the Merger. However, there is uncertainty around the pace of required technological innovation and the reliability of technologies that will be needed to transition to a lower-carbon environment. In addition, new sources of energy, such as hydrogen or ammonia, may be more difficult to commercialize than expected or may not be able to be commercialized safely or as efficiently as expected at scale. Woodside may also face unforeseen obstacles in the commercialization of a future carbon capture business and in the implementation of other lower-carbon services and emission reduction efforts.

There may also be regulatory, permitting or legal constraints that adversely affect the ability to capture, acquire, develop or supply new energy sources or reduce carbon emissions at the speed and scope currently anticipated, including constraints that are not yet known. The complex and pervasive nature of climate change means transition risks are interconnected with, and may amplify, other risks. While it is currently expected that sources of funding will be receptive to new energy development, there can be no assurance that this will be the case, and the ability to obtain financing or the cost of funding may adversely impact development of projects necessary to succeed in the energy transition.

Technical and engineering skills needed for development of new energy initiatives may be different from those anticipated and unexpected disruptive technologies may adversely impact efforts by Woodside to implement its energy transition goals or projects commissioned as part of energy transition. Woodside also cannot predict the rate at which other sophisticated parties may enter the same markets for new energy products and lower-carbon services in which the Merged Group is expected to participate.

Increased attention to ESG matters and conservation measures may adversely impact the Merged Group's business.

Increasing attention to climate change, societal expectations on companies to address climate change, as well as attention to matters relating to economic inequality, cultural heritage, energy and environmental justice, human capital management, diversity and corporate culture, has and is increasing investor and societal expectations regarding voluntary ESG practices and disclosures. These expectations and attention may in turn result in increased investor, media, employee and other stakeholder attention to the Merged Group's operations, ESG-related efforts and initiatives, and practices and policies relating to board, management and employee

Table of Contents

considerations, which could increase costs, have a negative impact on the Merged Group's reputation, brand and employee retention, and threaten the Merged Group's social license to operate with customers and suppliers. In addition, consumer demand for alternative forms of energy may result in increased costs, shifts in consumer demand away from oil and natural gas products, reduced profits, increased investigations and litigation, and negative impacts on the ability of the Merged Group to access capital markets.

Moreover, while the Merged Group may create and publish voluntary disclosures regarding ESG matters from time to time, including disclosures regarding climate change risks, many of the statements in those voluntary disclosures are based on hypothetical expectations and assumptions that may or may not be representative of current or actual risks or events or forecasts of expected risks or events, including the costs associated therewith. Such expectations and assumptions are necessarily uncertain, may be dependent on estimates that are highly likely to change over time, and may be prone to error or subject to misinterpretation given the long timelines involved and the lack of an established single approach to identifying, measuring and reporting on many ESG matters. In addition, some of the Merged Group's voluntary disclosures will rely in part on third-party data, and the Merged Group does not intend to independently verify third-party data. Further, it may take time to harmonize the Merged Group's disclosure and reporting regarding climate-related risks in the event that such climate reporting materially differed between Woodside and BHP Petroleum prior to the Merger.

In addition, organizations that provide information to investors on corporate governance and related matters have developed ratings processes for evaluating companies on their approach to ESG matters. Such ratings are used by some investors to inform their investment and voting decisions, and these ratings also may be used by other capital providers in assessing the Merged Group's creditworthiness. Unfavorable ESG ratings and recent activism directed at shifting funding away from companies with energy-related assets could lead to increased negative investor sentiment toward the Merged Group and the oil and gas industry and to the diversion of investment to other industries, which could have a negative impact on the Merged Group's access to and costs of capital. Also, institutional lenders and certain capital providers may decide not to provide funding for fossil fuel energy companies based on climate change related concerns, which could affect the Merged Group's access to capital for potential growth projects.

Estimates of proved reserves and future net cash flows are not precise. The actual quantities and net cash flows of the Merged Group's proved reserves may prove to be lower than estimated.

Numerous uncertainties exist in estimating quantities of proved reserves and future net cash flows therefrom. The estimates of proved reserves and related future net cash flows set forth in this prospectus are based on various assumptions, which may ultimately prove to be inaccurate.

Petroleum engineering is a subjective process of estimating underground accumulations of oil and gas that cannot be measured in an exact manner. Estimates of economically recoverable oil and gas reserves and estimates of future net cash flows depend upon a number of variable factors and assumptions, including the following:

- historical production from the area compared with production from other producing areas;

- the quality and quantity of available data;

- the interpretation of that data;

- the assumed effects of regulations by governmental agencies;

- assumptions concerning future commodity prices; and

- assumptions concerning future development costs, operating costs, severance, ad valorem and excise taxes, gathering, processing, transportation and fractionation costs and workover and remedial costs.

Table of Contents

Because all proved reserve estimates are to some degree subjective, each of the following items may differ materially from those assumed in estimating proved reserves:

- the quantities of oil and gas that are ultimately recovered;
- the production costs incurred to recover the reserves;
- the amount and timing of future development expenditures; and
- future commodity prices.

Furthermore, different reserve engineers may make different estimates of proved reserves and cash flows based on the same available data. The Merged Group's actual production, revenues and expenditures with respect to proved reserves will likely differ from the estimates, and the differences may be material.

As required by the SEC, the estimated discounted future net cash flows from proved reserves are based on average prices preceding the date of the estimate and costs as of the date of the estimate, while actual future prices and costs may be materially higher or lower. Actual future net cash flows also will be affected by factors such as:

- the amount and timing of actual production;
- the level of future capital spending;
- increases or decreases in the supply of or demand for oil, NGL and gas; and
- changes in governmental regulations or taxation.

Standardized measure is a reporting convention that provides a common basis for comparing oil and gas companies subject to the rules and regulations of the SEC. In general, it requires the use of commodity prices that are based upon a historical 12-month unweighted average, as well as operating and development costs being incurred at the end of the reporting period. Consequently, it may not reflect the prices ordinarily received or that will be received for future oil and gas production because of seasonal price fluctuations or other varying market conditions, nor may it reflect the actual costs that will be required to produce or develop the oil and gas properties. Accordingly, estimates included herein of future net cash flows may be materially different from the future net cash flows that are ultimately received. In addition, the 10% discount factor, which is required by the SEC to be used in calculating discounted future net cash flows for reporting purposes, may not be the most appropriate discount factor based on interest rates in effect from time to time and risks associated with the Merged Group or the oil and gas industry in general. Therefore, the estimates of discounted future net cash flows or standardized measure in this prospectus should not be construed as accurate estimates of the current market value of the Merged Group's proved reserves.

The Merged Group may face competition in the exploration, production and marketing of its products.

The exploration, production and marketing of hydrocarbon products is competitive, especially with regard to exploration for, and exploitation and development of, new sources of oil and natural gas. As many of the world's large oil fields approach natural depletion, incremental production is becoming increasingly difficult and therefore expensive. At the same time, new discoveries of conventional hydrocarbons are reducing in number and in size, while also tending to be more difficult to develop because of their location (*e.g.*, remote or deepwater) or complexity. Production disruptions resulting from natural events, for example hurricanes or cyclones (which are prevalent in certain of the areas in which the Merged Group will operate, like Australia and the Gulf of Mexico) or significant health events which may disrupt the labor force (*e.g.*, the ongoing COVID-19 pandemic), or due to social or geopolitical factors including terrorism or civil unrest, add to concerns about the security of oil and natural gas supplies.

The Merged Group will frequently compete for hydrocarbon resources acquisitions, exploration leases, licenses, concessions and marketing agreements with major oil companies, NOCs, independent oil and gas

Table of Contents

companies, individual producers, gas marketers and major pipeline companies, some of which may have larger financial and other resources than the Merged Group. These companies may be able to pay more for exploratory prospects and productive oil and natural gas properties and may be able to define, evaluate, bid for and purchase a greater number of properties and prospects, including operatorships and licenses, than the Merged Group's financial or human resources permit. In addition, the Merged Group's competitors may include entities with greater technical, physical and financial resources that allow them to enjoy technological advantages, which may in the future allow them to implement new technologies before the Merged Group can. The Merged Group may be placed at a competitive disadvantage or may be forced by competitive pressures to implement those new technologies at substantial costs.

If the Merged Group cannot compete successfully for new LNG supply contracts, its business, financial condition and results of operations may be adversely impacted.

Potential changes to the Merged Group's portfolio of assets through acquisitions and divestments may negatively affect its future results and financial condition.

Following Implementation of the Merger, the Merged Group intends to continue to follow Woodside's regular review of the composition of its asset portfolio and from time to time may add assets to its portfolio, including assets in emerging economies, or divest assets from its portfolio. There are a number of risks associated with any acquisitions or divestments, including adverse market reaction to such transactions or the timing or terms on which such transactions are made, the imposition of adverse regulatory conditions and obligations, commercial objectives not being achieved as expected, unforeseen liabilities arising from any changes to the Merged Group's asset portfolio, sales revenues, operational performance and anticipated cost savings, synergies, and other benefits that Woodside expects to achieve from the Merger not meeting the Merged Group's expectations, inability to retain key staff and transaction-related costs being more than anticipated.

As an Australian company, any acquisitions or dispositions by the Merged Group that may substantially lessen competition are subject to review by the ACCC. Adverse review, actions or decisions by the ACCC may prevent or limit the Merged Group's ability to pursue certain acquisitions. The Merged Group may also be subject to additional costs related to compliance with various foreign laws in connection with any acquisitions or divestments in jurisdictions outside Australia. These factors could adversely affect the Merged Group's business, financial condition and results of operations.

The results of operations and financial conditions of the Merged Group will be subject to fluctuations in exchange rates.

Woodside's and BHP Petroleum's functional and presentation currency is U.S. dollars. While substantially all of Woodside's major sales contracts are, and have historically been, denominated in U.S. dollars, Woodside's operating costs and exploration and development expenses are incurred in a mix of currencies, predominantly Australian dollars and U.S. dollars. Those expenses include major construction, drilling and service contracts and shipping agreements. Some expenses, comprised primarily of the salaries of Australian employees, rent and payments to other local contractors are normally paid in Australian dollars. It is intended that the Merged Group will operate on the same basis.

Accordingly, after Implementation of the Merger, movements in the exchange rates of any of these currencies relative to the U.S. dollar could adversely affect the Merged Group's results of operations and financial condition. Depreciation of the U.S. dollar, particularly against the Australian dollar, for prolonged periods, or exchange rate volatility, has in the past negatively affected Woodside's, and could in the future negatively affect the Merged Group's, profitability and financial position, and has increased, and could in the future increase, its effective costs.

Fluctuations in foreign currencies may also make period-on-period comparisons of the Merged Group's financial performance difficult. There can be no assurance that the Merged Group will successfully manage its

Table of Contents

exposure to exchange rate fluctuations or that exchange rate fluctuations will not have a material adverse effect on its future financial position and financial performance.

The Merged Group will be reliant on information technology systems and these may be subject to intentional or unintentional disruption, which could adversely impact the Merged Group's business and operations.

In general, the oil and natural gas industry has become increasingly dependent upon digital technologies to conduct day-to-day operations, including certain exploration, development and production activities. Both Woodside and BHP Petroleum's operations rely on a number of information technology systems, applications and business processes utilized in the delivery of business functions.

This exposes the Merged Group to risks originating from adopting or implementing new technologies, or failing to take appropriate action to position the Merged Group for the digital future, which may impact the capabilities it requires, the effectiveness and efficiency of its operations and its ability to compete effectively. These risks, if realized, could lead to operational events, commercial disruption (such as an inability to process or ship products), corruption or loss of system data, a loss of funds, unintended disclosure of commercial or personal information, enforcement action or litigation. An inability to implement new technology may also adversely affect the Merged Group's license to operate, reputation, results of operations or financial performance.

The Merged Group will use digital technology to estimate quantities of oil, LNG and natural gas reserves, process and record financial data, manage customers and to communicate with employees and third parties. The Merged Group's production facilities and operations are dependent on the reliability and integrity of information technology systems. A breach or failure of information technology systems due to intentional actions, including attacks on cybersecurity, negligence or other reasons, or due to program or system malfunctions, could result in the loss or misuse of data or sensitive information, injury to people, harm to the environment or the Merged Group's assets, legal or regulatory breaches, legal liability, disruption to its operations, interruptions to its services and processes, erroneous processing of third-party instructions or damage to its producing assets. Any intentional or unintentional disruption of the Merged Group's network security, information technology systems and any lack of availability of backup facilities may adversely impact its reputation, business and operations. The nature and timing of any disruptions are unpredictable and largely outside the Merged Group's control.

Additionally, the Merged Group's information and operating technology systems and networks may be subject to, or be the target of, cyber-attacks, computer viruses, malicious code, phishing attacks or information security breaches that could result in the unauthorized release, gathering, monitoring, misuse, loss or destruction of confidential, proprietary and other information, or may otherwise disrupt the Merged Group's, or its customers' or other third parties' business operations or adversely impact safety.

The Merged Group operations will be subject to the risk of litigation or arbitration.

From time to time, the Merged Group may be subject to complaints, litigation or arbitration arising out of its operations. Damages claimed under such proceedings may be material, and the outcome of any litigation or arbitration could materially and adversely affect the Merged Group's reputation, business, results of operations or financial condition. Increasing attention on climate change issues may also lead to an increase in litigation on grounds of contribution to, or failure to mitigate the effects of, climate change. Additionally, there is an increase in the number of class action claims in respect of damages allegedly caused by contraventions of regulatory obligations, in particular claims which are climate, environment or cultural heritage related.

There is existing litigation in relation to the approvals granted to Woodside. For example, in December 2020 the Conservation Council of Western Australia filed applications seeking judicial review of certain decisions in respect of approvals that were granted in relation to the North West Shelf, Pluto and Pluto Train 2 projects (the Supreme Court of Western Australia dismissed the proceedings in March 2022); and in November 2021

Table of Contents

Woodside was served with a further proceeding commenced by the Conservation Council of Western Australia seeking judicial review of a decision by the CEO of the Western Australian Department of Water and Environmental Regulation to grant Woodside a works approval for the Pluto Train 2 project granted in May 2021. It is expected there will be further challenges relating to other regulatory approvals commenced by project opponents.

The Merged Group may also be subject to challenges from litigants arguing breaches of duties of care (including in the nature of novel duties of care not to cause harm to Australian children, as seen in the *Sharma* litigation mentioned above under the heading “*Woodside’s and BHP Petroleum’s operations are subject to extensive governmental oversight and regulation, particularly with regard to the environment and occupational health and safety, that may change in ways that adversely affect the Merged Group’s business, results of operations and financial condition*”). Climate-related litigation risks are also increasing as a number of entities have sought to bring actions against various oil and natural gas companies alleging, among other things, that such companies created public nuisances by producing fuels that contributed to climate change or alleging that the companies had been aware of the adverse effects of climate change but failed to adequately disclose those impacts. There is also a litigation risk as to whether a court would determine that the Merged Group’s disclosure of climate change risk was inadequate.

While the Merged Group will assess the merits of each lawsuit and defend itself accordingly, it may be required to incur significant expenses in defending itself against any litigation or arbitration and there can be no assurance that a court or tribunal will find in its favor. If the Merged Group is unsuccessful in any litigation or arbitration, it may be subject to declaratory or injunctive relief (rather than compensatory damages) that is intended to force behavioral change, including but not limited to:

- requirements to seek approvals (with the risk of not being able to obtain that approval or obtaining the approval on less favourable terms);
- revocation of, or modification to, approvals that have already been granted;
- the imposition of conditions relating to approvals;
- injunctions which prevent the commencement of activities or stop existing activities from proceeding;
- compliance with emissions targets; and
- disclosure of documents, including board papers, relating to the Merged Group’s assessment of climate risk.

Such proceedings, even if successfully defended, could have an adverse effect on the Merged Group’s business, competitive position, prospects and reputation, and may divert the attention of its management team. In addition, proceedings in which the Merged Group is not directly subject may still impact its business and operations.

An inability to attract, retain and motivate skilled workers could adversely affect the Merged Group’s business, operations and financial performance.

The Merged Group’s operations, development and restoration projects and exploration activities will require various types of skilled and semi-skilled workers, drawn from a range of professions, disciplines, trades and vocations. Competition for skilled personnel in the oil and gas industry is high. Constraints on the Merged Group’s ability to attract, retain and motivate workers with appropriate skills and capabilities, including as a result of illness, quarantine, travel restrictions, other impacts of the COVID-19 pandemic or due to changes in the perception of oil and gas companies, could cause a shortage of workers or put increased pressure on wages, which could increase the Merged Group’s capital and operating costs and otherwise adversely impact the Merged Group. Additionally, a considerable period of training and time may be required before new employees and contractors are equipped with the requisite skills to work safely and effectively. Any inability of the Merged

Table of Contents

Group, or of its key contractors, to obtain, motivate and retain workers could cause a labor capacity shortfall within the Merged Group's business, threaten the Merged Group's ability to deliver on its objectives and have an adverse effect on the Merged Group's business and financial condition.

Similarly, interference with the availability of labor due to industrial action could also impact negatively on the Merged Group's business performance. Any unionized part of the Merged Group's workforce could expose the Merged Group to industrial action (including strikes and work bans), the occurrence of which could disrupt the Merged Group's operations and adversely affect its financial condition and operating results.

Failure to meet stakeholder expectations could adversely affect the Merged Group and its future activities.

Stakeholders, such as investors, governments, traditional owners, employees, customers, community groups and suppliers, continue to have higher and evolving expectations of Woodside and oil and gas companies in general. Stakeholder groups are acting with greater levels of organization, funding and sophistication, which has led to increased stakeholder activism with global reach, including increased stakeholder pressure on Woodside to provide transparency and apply ethical decision making. Stakeholders' attitudes and expectations of companies have shifted with respect to social responsibility, climate change, cultural heritage and the environment, which has influenced the regulatory landscape and increased scrutiny of oil and gas companies, including Woodside, and will also increase scrutiny of the Merged Group in the future. Some of the Merged Group's projects and activities will intersect with the interests of traditional owners and indigenous groups, resulting in the Merged Group's relationships with these groups taking on particular significance.

A significant or continuous departure from these stakeholder expectations or the Merged Group's values, code of conduct or internal standards could adversely affect the Merged Group's reputation, relationships, brand, license to operate and existing or future regulatory approvals.

The Merged Group could be materially and adversely affected if new legislation or regulations are adopted to address global climate change, or if the Merged Group is subject to lawsuits for alleged damage to persons or property resulting from greenhouse gas emissions.

The issue of global climate change continues to attract considerable regulatory, public, political and scientific attention. A recent report of the Intergovernmental Panel on Climate Change (IPCC, Working Group 1 contribution to the Sixth Assessment Report) states that "it is unequivocal that human influence has warmed the atmosphere, ocean and land." Over the last several years, Australian lawmakers, the U.S. Congress and other governments have considered and debated several proposals intended to address climate change using different approaches, including but not limited to introducing or increasing direct limits on carbon emissions, emissions trading including in the form of baseline-and-credit or cap-and-trade schemes, a tax on carbon or greenhouse gas emissions, incentives for the development of lower-carbon technology, and renewable portfolio standards.

In the United States, President Biden has highlighted addressing climate change as a priority of his administration, although no comprehensive climate change legislation has been implemented at the federal level to date. Additionally, many U.S. federal and state court cases have been filed in recent years asserting damages claims related to greenhouse gas emissions, and the results in those proceedings could establish adverse precedent that might apply to companies (including the Merged Group) that produce greenhouse gas emissions. Jurisdictions including the European Union have considered proposals to introduce "Border Adjustment Mechanisms" to apply carbon regulation to certain imported goods and services. The Merged Group could be materially and adversely affected if new legislation or regulations are adopted to address global climate change or if the Merged Group is subject to lawsuits for alleged damage to persons or property resulting from greenhouse emissions.

Table of Contents

The availability and cost of emission allowances or carbon offsets could adversely impact the Merged Group's costs of operations and its ability to meet its environmental goals.

The Merged Group will be required to manage its emissions within regulatory limits in the ordinary course of operating its oil and gas wells and LNG facilities. Different regulatory regimes have different methods for setting these limits, such as the setting of baselines, the granting of allowances and the availability of use of different standards of carbon offsets. For example, in Australia, the Merged Group is required to surrender carbon offsets for greenhouse gas emissions resulting from its domestic operations that exceed asset-specific regulatory baselines. If the Merged Group's operational needs require exceedance of its allowed limits, it may have to curtail its operations, install costly new emission controls, or purchase allowances on the open market, which could be costly and may be limited by community or regulatory expectations. As the Merged Group uses the emission allowances or carbon offsets that it has purchased on the open market, costs associated with such purchases will be recognized as an operating expense. If such allowances are available for purchase, but only at significantly higher prices, the purchase of such allowances could materially increase the Merged Group's costs of operations in the affected markets. There is also a risk that baselines could reduce or be removed by governments in the countries in which the Merged Group operates.

There are numerous uncertainties inherent in estimating the quality and quantity of offsets generated by each of these projects, including many factors beyond the Merged Group's control such as rainfall, bushfire and regrowth rates for native reforestation projects. Actual results may vary considerably from estimates, and the variances could be material. Accepted methods for estimating, calculating and certifying carbon offsets may in the future be varied resulting in a reduction in the number of carbon offsets generated or able to be used all of which may materially increase the Merged Group's costs associated with meeting regulatory or emission reduction targets.

In addition, a significant portion of the Merged Group's environmental sustainability plan beyond regulatory compliance will depend on its purchasing carbon offsets. If the prices of carbon offsets are higher than the Merged Group anticipates, the purchase of those offsets could materially increase its cost of operations and could materially limit its ability to meet its sustainability targets. In the future the use of carbon offsets to meet regulatory requirements or voluntary environmental sustainability plans may be limited by community or regulatory expectations requiring the Merged Group to curtail production or install costly new emission controls with adverse effects on the Merged Group's operating results. Alternatively, the change in community expectation on the use of carbon offsets could lead to failure to achieve emissions reductions targets with resulting damage to the Merged Group's reputation. See the section entitled "*Business and Certain Information About Woodside-ESG-Climate Change*" for additional information.

The financial and operating forecasts are based on various assumptions that may not be realized.

The financial and operating estimates set forth in the forecasts included in this prospectus have been prepared by Woodside's management and were based on assumptions of, and information available to, Woodside's management when prepared. These estimates and assumptions are subject to uncertainties, many of which are beyond Woodside's and BHP Petroleum's control and may not be realized. Many factors mentioned in this prospectus, including the risks outlined in this "*Risk Factors*" section, will be important in determining the Merged Group's future results. As a result of these contingencies, actual future results may vary materially from Woodside's estimates. In view of these uncertainties, the inclusion of financial estimates in this prospectus is not and should not be viewed as a representation that the forecasted results will necessarily reflect actual future results.

Woodside's financial and operating estimates were prepared with the primary purpose of describing certain factors considered as part of Woodside's approval of the Merger and such financial estimates were not prepared with a view toward compliance with published guidelines of any regulatory or professional body. Further, any forward-looking statement speaks only as of the date on which it is made, and neither Woodside nor BHP

Table of Contents

Petroleum undertakes any obligation, other than as required by applicable law, to update the financial estimates in this prospectus to reflect events or circumstances after the date those financial estimates were prepared or to reflect the occurrence of anticipated or unanticipated events or circumstances.

Neither Woodside's nor BHP Petroleum's independent auditors, nor any other independent accountants, have compiled, examined or performed any procedures with respect to Woodside's prospective financial or operating information contained in this prospectus, nor have they expressed any opinion or any other form of assurance on such information or achievability thereof, and, accordingly, such independent accountants assume no responsibility for, and disclaim any association with, Woodside's prospective financial and operating information. The report of Woodside's independent accountant included in this prospectus, relates exclusively to the historical financial information of the entities named in that report and does not cover any other information in this prospectus and should not be read to do so. See the section entitled "*The Merger–Unaudited Combined Forecasted Financial and Operating Information.*"

The Merged Group's financial results could be adversely affected by impairments of goodwill or other intangible assets, the application of future accounting policies or interpretations of existing accounting policies including by regulatory direction, and changes in estimates of decommissioning costs.

Woodside may record a significant amount of goodwill attributable to the Purchase Price for BHP Petroleum. On a pro forma basis at 31 December 2021, the amount of that goodwill is \$7.126 billion; this amount will differ from the actual amount recorded in connection with Implementation because of changes in, among other things, the market price of Woodside Shares and the estimates of fair value of BHP Petroleum's assets. Woodside periodically tests goodwill and other intangible assets for impairment and also if factors or indicators become apparent that would require an interim test.

Application of, or changes in, accounting policies and/or revisions in the fair value of one of the Merged Group's business segments could result in impairments of goodwill and non-cash charges. Any charge resulting from the application of accounting rules about impairment of goodwill and intangible assets could have a significant negative effect on the Merged Group's reported net income and its ability to pay dividends in one or more accounting periods if the level of impairment were to exceed profits available for distribution. In addition, the Merged Group's financial results could be negatively affected by the application of existing and future accounting policies or interpretations of existing accounting policies.

ASIC conducts regular reviews on a risk-basis of the financial reports of selected listed Australian companies. As part of its financial reporting surveillance program, ASIC raised concerns about certain infrastructure assets off Australian shores that were not included for full removal in the restoration provision in Woodside's financial report for the year ended 31 December 2020, and the adequacy of related disclosures. In response, in its financial statements as at and for the year ended 31 December 2021, Woodside provided additional disclosure on the inclusions and exclusions from that provision (see note D.5 to Woodside's financial statements included elsewhere in this prospectus). Woodside is continuing to engage with ASIC and other relevant regulators on the appropriateness of Woodside's decommissioning provision and disclosure. Woodside also continues to monitor applicable regulatory developments, and there is a risk that Woodside will need to make further provision in its financial statements (including in respect of the assets of BHP Petroleum once they are brought to account as part of the Merged Group) for removal in the future or give additional disclosures or both.

Table of Contents

Due to Woodside's expansion as a result of the Merger, including the expansion into additional jurisdictions in which the tax laws may not be favorable, Woodside's effective tax rate may increase and tax obligations may become significantly more complex and subject to greater risk of examination by taxing authorities, Woodside may be subject to tax inefficiencies as a result of its integration with BHP Petroleum, and Woodside may be subject to future changes in tax laws, in each case, the impacts of which could adversely affect Woodside's after-tax profitability and financial results.

After the Merger, Woodside will conduct operations, directly and through its subsidiaries, in Australia, the United States and multiple other foreign jurisdictions, and Woodside and its subsidiaries will therefore be subject to income taxes in such jurisdictions. In the future, Woodside may also become subject to income taxes in other jurisdictions. Woodside may be adversely affected by changes in the relevant tax laws and tax rates (including, for example, changes in the U.S. tax laws currently being considered by the U.S. Congress, if enacted), treaties, regulations, administrative practices and principles, judicial decisions, and interpretations thereof, in each case, possibly with retroactive effect in any such jurisdictions. In addition, Woodside's effective income tax rate and results of operations could be adversely affected by a number of factors, including changes in the valuation of deferred tax assets and liabilities, changes in accounting and tax standards or practices, changes in the composition of operating income by tax jurisdiction, changes in Woodside's operating results before taxes, and the outcome of income tax audits in Australia and the United States or other foreign jurisdictions. In addition, Woodside may be subject to tax inefficiencies and other potentially adverse tax consequences as a result of the acquisition of BHP Petroleum, and Woodside may not be able to efficiently integrate and combine the Woodside and BHP Petroleum entity structures.

Due to the complexity of multinational tax obligations and filings, Woodside and its subsidiaries may have a heightened risk related to audits or examinations by federal, state, provincial, and local taxing authorities in the jurisdictions in which it operates. Outcomes from these audits or examinations could have a material adverse effect on Woodside's business, results of operations, or financial condition.

The tax laws of jurisdictions in which Woodside may operate in the future have detailed transfer pricing rules that require that all transactions with related parties satisfy arm's length pricing principles. Although Woodside believes that its transfer pricing policies have been reasonably determined in accordance with arm's length principles, it will need to coordinate and integrate these policies with the historic policies of the entities acquired in the Merger, and the taxation authorities in the jurisdictions where Woodside carries on business could challenge its transfer pricing policies. International transfer pricing is a subjective area of taxation and generally involves a significant degree of judgment. If any of these taxation authorities were to successfully challenge Woodside's transfer pricing policies, Woodside could be subject to additional income tax expenses, including interest and penalties. Any such increase in Woodside's income tax expense and related interest and penalties could have a material adverse effect on its business, results of operations, or financial condition.

Woodside will regularly assess all of these matters to determine the adequacy of its tax liabilities and reserves, and if any of Woodside's assessments are ultimately determined to be incorrect, Woodside's business, results of operations, or financial condition could be materially and adversely affected.

The Merger could result in Woodside being treated as a U.S. corporation for U.S. federal income tax purposes.

Under current U.S. federal income tax law, a corporation generally will be considered to be a U.S. corporation for U.S. federal income tax purposes if it is created or organized in the United States or under the law of the United States or of any State. Accordingly, under generally applicable U.S. federal income tax rules, Woodside, which is incorporated and tax resident in Australia, would generally be classified as a non-U.S. corporation for U.S. federal income tax purposes. Section 7874 of the Code and the U.S. Department of the Treasury (the "U.S. Treasury") regulations promulgated thereunder, however, contain specific rules that may cause a non-U.S. corporation to be treated as a U.S. corporation for U.S. federal income tax purposes. If

Table of Contents

Woodside were to be treated as a U.S. corporation for U.S. federal income tax purposes, this could result in a number of negative tax consequences for Woodside and holders of Woodside Shares or Woodside ADSs. For example, Woodside would be subject to U.S. federal income tax on its worldwide income and, as a result, could be subject to substantial liabilities for additional U.S. income taxes.

Based on the terms of the Merger and certain factual assumptions (including that BHP Petroleum (i) is properly classified as a foreign corporation for U.S. federal income tax purposes at the time of the Merger and (ii) has not acquired assets of a U.S. corporation or partnership in acquisitions related to the transactions contemplated in the Share Sale Agreement), Woodside does not believe that it will be treated as a U.S. corporation for U.S. federal income tax purposes under Section 7874 of the Code after the Merger. However, there can be no assurance that your or Woodside's tax advisers, the Internal Revenue Service ("IRS"), or a court will agree with the position that Woodside is not treated as a U.S. corporation pursuant to Section 7874 of the Code. The rules for determining whether a non-U.S. corporation is treated as a U.S. corporation for U.S. federal income tax purposes are complex, unclear, and the subject of ongoing regulatory change. The position that Woodside is not treated as a U.S. corporation pursuant to Section 7874 of the Code is not free from doubt. Further, the application of such rules must be finally determined after completion of the Merger, by which time there could be adverse changes to the relevant facts, law, and other circumstances. For example, President Biden's Made in America tax plan, if enacted, would increase the risk that Woodside would be treated as a U.S. corporation by expanding the scope of such rules to capture more transactions. Holders of Woodside Shares or Woodside ADSs should consult with, and rely solely upon, their own tax advisers regarding the application of the rules discussed above and any resultant tax consequences.

Risks Relating to the Ownership of Woodside Ordinary Shares

The market price of Woodside Shares may be volatile.

Global stock markets in general, and Woodside Shares in particular are subject to significant price and volume volatility. Woodside Shares historically have been, and Woodside Shares following Implementation of the Merger are expected to be, subject to significant fluctuations due to many factors, including but not limited to:

- the pending Merger (in the case of pre-Implementation volatility of Woodside Shares);

- fluctuations in operating results, announcements regarding new projects, oil and natural gas exploration activities or technological advances by the Merged Group or its competitors;

- changes in earnings estimates by market analysts, and general market conditions or market conditions specific to particular industries; and

- any additional equity offering or future sales of Woodside Shares by Woodside, or the possibility of such offerings or future sales.

These factors may make it more difficult for Woodside Shareholders to sell their Woodside Shares at a time and price which they deem appropriate, and could also impede Woodside's ability to raise capital through the issuance of equity securities.

The price of Woodside Shares may be subject to speculation in the press and the analyst community, changes in recommendations by financial analysts, changes in investors' or analysts' valuation measures, changes in global financial markets and global economies and general market trends unrelated to the performance of the Merged Group. The market price of Woodside Shares could be adversely affected by these factors and fluctuations.

Financial markets have experienced significant price and volume fluctuations in the last several years that have particularly affected the market prices of equity securities of companies and that have, in many cases, been

Table of Contents

unrelated to the operating performance, underlying asset values or prospects of such companies. Accordingly, the market price of the Woodside Shares may decline even if the Merged Group's operating results, underlying asset values or prospects have not changed. Additionally, these factors, as well as other related factors, may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. Also, certain institutional investors may base their investment decisions on consideration of the Merged Group's environmental, governance and social practices and performance against such institutions' respective investment guidelines and criteria, and failure to meet such criteria may result in a limited or no investment in the Woodside Shares by those institutions, which could adversely affect the trading price of the Woodside Shares. There is no assurance that continuing fluctuations in the price and volume of publicly traded equity securities will not occur. If such increased levels of volatility and market turmoil continue, the Merged Group's operations could be adversely impacted and the trading price of the Woodside Shares may be adversely affected.

In addition, Woodside has applied for the Woodside ADSs to be listed on the NYSE. Woodside will apply for the Woodside Shares to be listed on the LSE. Liquidity on those securities exchanges may be significantly lower than on ASX with the result that the market price on one or both of those exchanges may be more volatile and/or less responsive to newsworthy developments in relation to Woodside and the value of its assets. Woodside Shares will be quoted in Australian dollars on ASX and Pounds Sterling on LSE, and Woodside ADSs will be quoted in U.S. dollars on NYSE. Dividends in respect of the Woodside Shares, if any, will be declared in U.S. dollars. Fluctuations in exchange rates will affect, among other matters, the local currency value of the Woodside Shares and of any dividends. Holders, particularly non-Australian holders, may not derive a benefit from franking credits attached to a dividend, if any. These too may cause temporary or more permanent differences in the value of Woodside Shares on different securities exchanges.

Multiple listing of the Woodside Shares (including in the form of Woodside ADSs) will result in differences in liquidity, settlement and clearing systems, trading currencies, prices and transaction costs between the stock exchanges upon which the Woodside Shares will be listed. These and other factors may hinder the ability to trade and transact in the Woodside Shares (or corresponding depositary interests or Woodside ADSs) through one or more exchanges.

The future price of the Woodside Shares on ASX or LSE or the Woodside ADSs on the NYSE is uncertain and past performance is not indicative of future performance. Future share prices may be either above or below current or historical share prices. The trading in and liquidity of the Woodside Shares will be split among these three exchanges. The price of the Woodside Shares and Woodside ADSs may fluctuate and may at any time be different on the ASX, LSE and NYSE. This could adversely affect the trading of the Woodside Shares or Woodside ADSs, as applicable, on these exchanges and increase their price volatility and/or adversely affect the price and liquidity of the Woodside Shares or Woodside ADSs, as applicable, on these exchanges.

The implied value of the Share Consideration will vary over time depending on the prevailing Woodside Share price.

The value of the Share Consideration will fluctuate with the market price of Woodside Shares. If the Merger is Implemented, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Upon Implementation, Existing Woodside Shareholders will own approximately 52% and BHP Shareholders will own approximately 48% of the Merged Group (based on the issue of 914,768,948 New Woodside Shares and the number of Woodside Shares outstanding on 24 March 2022) subject to any BHP Shareholders being Ineligible Foreign BHP Shareholders or Relevant Small Parcel BHP Shareholders. Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of their BHP Shares held on the Distribution Record Date (based on the number of BHP Shares outstanding on 24 March 2022).

Because the exchange ratio is fixed and the market price of Woodside Shares has fluctuated, and will likely continue to fluctuate, the implied value of the Share Consideration will vary over time depending on the

Table of Contents

prevailing Woodside Share price. As a result, the implied value of the Share Consideration is likely to change, including between the date of this prospectus, the date of the Woodside Shareholders Meeting and the date on which the Share Consideration is distributed to Participating BHP Shareholders (and transferred to the Sale Agent in the case of all New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders).

Liquidity in the market for Woodside securities may be adversely affected by Woodside's maintenance of multiple exchange listings.

Application has been made for the listing of the Woodside ADSs on NYSE, and Woodside has also applied for quotation of the Woodside Shares in the United Kingdom on LSE with a standard listing. Following Implementation, at which time Woodside ADSs are expected to be listed and traded on the NYSE, Woodside intends to continue to list the Woodside Shares on the ASX, with a secondary standard listing on the LSE. Woodside cannot accurately predict the effect of having its securities traded or listed on each of these markets. These secondary listings may, however, reduce the liquidity of Woodside's securities in one or more markets.

Sales, or the perception of anticipated sales, of a significant number of Woodside Shares that Participating BHP Shareholders will be entitled to receive in the Merger may depress the market price of such Woodside Shares.

Participating BHP Shareholders receiving New Woodside Shares as Share Consideration may sell a significant number of the Woodside Shares they will be entitled to receive in the Merger, and such sales could be concentrated in the period shortly after Implementation of the Merger. Further, there may be a perception by investors that Participating BHP Shareholders will sell a significant number of Woodside Shares. These sales (and the perception of anticipated sales) could depress the market price of the Woodside Shares after Implementation of the Merger. Sales of Woodside Shares by Woodside Shareholders that are not Participating BHP Shareholders could also depress the market price of the Woodside Shares.

Additionally, it is possible that the sales by the Sale Agent on behalf of Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders may exert downwards pressure on the price of Woodside Shares in the period following the Implementation Date. See the sections entitled “*The Merger–Ineligible Foreign BHP Shareholders*” and “*The Merger–Small Parcel BHP Shareholders*.”

There is no guarantee that dividends will be paid on the Woodside Shares.

Whether any distribution is declared or paid to Woodside Shareholders, and the amounts of any such distributions, are uncertain and depend on a number of factors. The Woodside Board will have discretion to declare or pay a distribution on Woodside Shares, which may be based on a number of considerations, including Woodside's dividend policy, its operating results and its capital management plans. In addition, if goodwill arising from the Merger were to be impaired to a level that exceeded available profits for distribution, there is a risk that dividends may not be payable in one or more financial periods. For a discussion of risks arising from impairment of goodwill, see the risk factor entitled “*The Merged Group's financial results could be adversely affected by impairments of goodwill or other intangible assets, the application of future accounting policies or interpretations of existing accounting policies including by regulatory direction, and changes in estimates of decommissioning costs*” above.

The ability of foreign shareholders to bring actions or enforce judgments against Woodside or the Woodside Directors may be limited.

The ability of a shareholder outside of Australia to bring an action against Woodside may be limited under Australian law. Woodside is a limited company incorporated in Australia and the rights of Woodside Shareholders are governed by Australian law and the Woodside Constitution. These rights may differ from the rights of

Table of Contents

shareholders in other jurisdictions, including the United Kingdom or the United States. Consequently, it may not be possible to effect service of process upon the Woodside Directors within a foreign shareholder's country of residence or to enforce judgments of courts of the foreign shareholder's country of residence, based on civil or commercial liabilities under that country's securities laws, against the Woodside Directors, the majority of whom are residents of Australia. In addition, courts in Australia or other countries may not impose civil liability on the Woodside Directors in any original action based solely on foreign securities laws brought against Woodside or the Woodside Directors in a court of competent jurisdiction in Australia or other countries.

Risks Relating to the Ownership of Woodside ADSs

There has been no prior market for the Woodside ADSs on a U.S. national securities exchange, and an active and liquid market for the Woodside ADSs may fail to develop or be sustained, which could harm the market price of the Woodside ADSs.

The Existing Woodside ADSs currently trade on the over-the-counter market in the United States through Woodside's existing sponsored Level 1 ADR program. However, there has been no public market on a U.S. national securities exchange for the Woodside ADSs or Woodside Shares. Although Woodside has applied to list the Woodside ADSs on the NYSE, an active trading market for the Woodside ADSs may never develop or be sustained following the Merger. The market value of the Woodside ADSs will be based on the market value of the Woodside Shares issued in the Merger on the ASX at Implementation. This price may not be indicative of the market price of the Woodside ADSs or Woodside Shares after the Merger. In the absence of an active trading market for the Woodside ADSs or the Woodside Shares, BHP ADS holders who receive New Woodside ADSs in the Merger may not be able to sell their New Woodside ADSs at or above their initial market value or at the time they would like to sell.

After Implementation of the Merger, the market price of Woodside ADSs on the NYSE may not be identical, in U.S. dollar terms, to the market price of Woodside Shares on the ASX.

While the market price of Woodside ADSs on the NYSE is generally expected to fluctuate in line with fluctuations in the market price of Woodside Shares on the ASX, subject to additional fluctuations resulting from changes in the U.S. dollar and Australian dollar exchange rate, there is no guarantee that these relationships will be observed at all times, or at any time. The market price of Woodside ADSs may differ from the market price of Woodside Shares in U.S. dollar terms for a number of reasons, including the relative liquidity of Woodside ADSs and Woodside Shares.

Holders of Woodside ADSs will not directly hold Woodside Shares.

Holders of Woodside ADSs will not be treated as Woodside Shareholders and will not have shareholder rights. The Woodside Depositary (or its custodian in Australia) will be the holder of the Woodside Shares underlying the Woodside ADSs. Holders of Woodside ADSs will have contractual ADS holder rights. The Woodside Deposit Agreement among Woodside, the Woodside Depositary, holders of New Woodside ADSs, and all other persons directly or indirectly holding Woodside ADSs sets out Woodside ADS holder rights as well as the rights and obligations of the Woodside Depositary. Holders of Woodside ADSs may only exercise voting rights with respect to the Woodside Shares underlying their respective Woodside ADSs in accordance with the provisions of the Woodside Deposit Agreement, which provides that holders of Woodside ADSs may vote the shares underlying the Woodside ADSs either by withdrawing such Woodside Shares or by instructing the Woodside Depositary to vote the shares or other deposited securities underlying the New Woodside ADSs. However, holders of Woodside ADSs may not be informed about the meeting sufficiently in advance to withdraw the Woodside Shares and, even if holders of Woodside ADSs instruct the Woodside Depositary to vote the shares underlying the Woodside ADSs, Woodside cannot guarantee that the Woodside Depositary will vote in accordance with the instructions. See the section entitled "Description of Woodside American Depositary Shares—Voting Rights" for additional information.

Table of Contents

In addition to voting rights, the right of holders of Woodside ADSs to receive any dividends Woodside declares on Woodside Shares differ from the rights of Woodside Shareholders. See the section entitled “*Description of Woodside American Depositary Shares–Manner of Holding Woodside ADSs–Dividends and Distributions.*”

Holders of Woodside ADSs may not receive certain distributions on Woodside Shares represented by Woodside ADSs or any value for such dividends if it is illegal or impractical to make such dividends to holders of Woodside ADSs.

The Woodside Depositary has agreed to pay to holders of Woodside ADSs dividends with respect to cash or other distributions it or the custodian with respect to the Woodside ADSs receives on Woodside Shares held by it on behalf of holders of Woodside ADSs after deducting its agreed fees and expenses. Holders of Woodside ADSs will receive these dividends in proportion to the number of Woodside Shares their Woodside ADSs represent. However, the Woodside Depositary is not responsible if it reasonably determines, to the extent permitted to do so under the Woodside Deposit Agreement, that it is unlawful or impractical to make distributions available to any holders of Woodside ADSs. Woodside has no obligation to take any other action to permit the dividend of its Woodside ADSs, Woodside Shares, rights or anything else to holders of Woodside ADSs. As a result, holders of Woodside ADSs may not receive the distributions made on Woodside Shares or any value from them if it is illegal or impractical for Woodside or the Woodside Depositary to make such dividends available to holders of Woodside ADSs. These restrictions may have a material adverse effect on the value of Woodside ADSs.

The Woodside ADSs may be subject to limitations on transfer and the withdrawal of the underlying Woodside Shares.

Woodside ADSs are transferable on the books of the Woodside Depositary. However, the Woodside Depositary may close its books at any time or from time to time when it deems expedient in connection with the performance of its duties. The Woodside Depositary may refuse to issue and deliver Woodside ADSs or register transfers of Woodside ADSs generally when the register of the Woodside Depositary or the Woodside share transfer books are closed or at any time if the Woodside Depositary or Woodside think it is necessary or advisable to do so because of any requirement of law, government or governmental body, or under any provision of the Woodside Deposit Agreement, or for any other reason subject to the right of Woodside ADS holders to cancel their Woodside ADSs and withdraw the underlying Woodside Shares. Temporary delays in the cancellation of Woodside ADSs and withdrawal of the underlying Woodside Shares may arise because the Woodside Depositary has closed its transfer books or Woodside has closed its transfer books for shares, the transfer of Woodside Shares is blocked to permit voting at a shareholders’ meeting, or Woodside is paying a dividend on the Woodside Shares. In addition, a holder of Woodside ADSs may not be able to cancel their Woodside ADSs and withdraw the underlying Woodside Shares when it owes money for fees, taxes and similar charges and when it is necessary to prohibit withdrawals in order to comply with any laws or governmental regulations that apply to Woodside ADSs or to the withdrawal of Woodside Shares or other deposited securities. See the sections entitled “*Description of Woodside American Depositary Shares–Transfer, Combination and Split Up of Woodside ADSs* and “*Withdrawal of Woodside Shares Upon Cancellation of Woodside ADSs.*”

It may be difficult for holders of Woodside ADSs to bring any action or enforce any judgment obtained in the United States against Woodside or members of the Woodside Board, which may limit the remedies otherwise available to holders of Woodside ADSs.

Woodside is a public limited company incorporated under the laws of Australia, and its corporate headquarters will remain in Australia following Implementation of the Merger. Many of the Woodside Directors are, and following the Merger will be, residents of jurisdictions outside the United States. In addition, although Woodside will, following Implementation of the Merger, have substantial assets in the United States, the majority of Woodside’ s assets and a large proportion of the assets of certain of its directors and officers will be located outside of the United States.

Table of Contents

As a result of the foregoing, Woodside ADS holders resident to the United States may find it difficult in a lawsuit based on the civil liability provisions of the United States federal securities laws:

- to effect service within the United States upon Woodside and Woodside Directors and officers of Woodside that are located outside the United States;
- to enforce in United States courts or outside the United States, judgments obtained against those persons in United States courts;
- to enforce, in United States courts, judgments obtained against those persons in courts in jurisdictions outside the United States; and
- to enforce against those persons in Australia, whether in original actions or in actions for the enforcement of judgments of United States courts, civil liabilities based solely upon the United States federal securities laws.

Holders of Woodside ADSs may not be able to exercise their right to vote the Woodside Shares underlying their Woodside ADSs.

Holders of Woodside ADSs may only exercise voting rights with respect to the Woodside Shares underlying their respective Woodside ADSs in accordance with the provisions of the Woodside Deposit Agreement and not as a direct shareholder of Woodside. In order to vote the Woodside Shares underlying the Woodside ADSs, holders of Woodside ADSs may either withdraw the Woodside Shares underlying their Woodside ADSs or instruct the Woodside Depositary to vote the Woodside Shares underlying such Woodside ADSs. However, holders of Woodside ADSs may not be informed about the meeting far enough in advance to withdraw the underlying Woodside Shares, and after such withdrawal, would no longer hold Woodside ADSs, but would instead hold the underlying Woodside Shares directly.

The Woodside Depositary will try, to the extent practicable, to vote the Woodside Shares underlying the Woodside ADSs as instructed by the holders of Woodside ADSs. The Woodside Depositary, upon timely notice from Woodside, will notify the holders of Woodside ADSs of the upcoming vote and arrange to deliver Woodside voting materials to the holders of Woodside ADSs. Woodside cannot guarantee that the holders of Woodside ADSs will receive the voting materials in time to ensure that they will be able to instruct the Woodside Depositary to vote their Woodside Shares or to withdraw their Woodside Shares so that the holders of Woodside ADSs can vote them themselves. If the Woodside Depositary does not receive timely voting instructions from the holders of Woodside ADSs, or if the Depositary timely receives voting instructions from a holder that fails to specify the manner in which the Woodside Depositary is to vote, such holder's ADSs will not be voted. Voting instructions may be given only in respect of a number of Woodside ADSs representing an integral number of Woodside Shares or other deposited securities. In addition, the Woodside Depositary and its agents are not responsible for failing to carry out voting instructions or for the manner of carrying out voting instructions. This means that the holders of Woodside ADSs may not be able to exercise any right to vote that they may have with respect to the underlying Woodside Shares, and there may be nothing they can do if the Woodside Shares underlying their Woodside ADSs are not voted as requested. In addition, the Woodside Depositary is only required to notify the holders of Woodside ADSs of any particular vote if it receives timely notice from Woodside in advance of the scheduled meeting. See the section entitled "*Description of Woodside American Depositary Shares—Voting Rights.*"

As a foreign private issuer ("FPI") under the rules and regulations of the SEC, Woodside is permitted to, and may, file less or different information with the SEC than a U.S. public company that is not an FPI, and will follow certain home country corporate governance practices in lieu of certain NYSE requirements applicable to U.S. issuers.

Woodside is, and after the Implementation of the Merger the Merged Group will be, an FPI, under the Exchange Act and is therefore exempt from certain rules under the Exchange Act, including the proxy rules,

Table of Contents

which impose certain disclosure and procedural requirements for proxy solicitations for U.S. issuers. Moreover, the Merged Group will not be required to file periodic reports and financial statements with the SEC as frequently or within the same timeframes as U.S. companies with securities registered under the Exchange Act. Woodside currently does not, and is not required to, prepare its financial statements in accordance with U.S. GAAP. Following the Merger, the Merged Group will not be required to prepare its financial statements in accordance with U.S. GAAP, or to reconcile to U.S. GAAP, if it elects to prepare its financial statements in accordance with IFRS. The Merged Group will not be required to comply with Regulation Fair Disclosure, which imposes restrictions on the selective disclosure of material information to shareholders. In addition, the Merged Group's officers, directors and principal shareholders will be exempt from the reporting and short-swing profit recovery provisions of Section 16 of the Exchange Act and the rules under the Exchange Act with respect to their purchases and sales of Woodside's securities. Accordingly, after the Merger, holders of Woodside ADSs may receive less or different information about the Merged Group than they would receive about a U.S. domestic public company.

In addition, as an FPI whose ADSs are intended to be listed on the NYSE, the Merged Group will be permitted, subject to certain exceptions, to follow certain home country rules in lieu of certain NYSE listing requirements. An FPI must disclose in its annual reports filed with the SEC each NYSE requirement with which it does not comply, followed by a description of its applicable home country practice. The Merged Group will have the option to rely on available exemptions under the listing rules of the NYSE (the "NYSE Listing Rules") that would allow it to follow its home country practice, including, among other things, the ability to opt out of (i) the requirement that the Merged Group Board be comprised of a majority independent directors, (ii) the requirement that the Merged Group's independent directors meet regularly in executive sessions, (iii) the requirement that the Merged Group obtain shareholder approval prior to the issuance of securities in connection with certain acquisitions, private placements of securities, or the establishment or amendment of certain stock option, purchase or other compensation plans, and (iv) the requirement that the Merged Group establish independent nominating and corporate governance and compensation committees. Woodside expects that the Merged Group Board will be comprised of a majority independent directors and will establish independent nominating and corporate governance and compensation committees, but has not yet made final determinations on other possible exemptions from the NYSE Listing Rules. See the section entitled "*Board of Directors and Management of the Merged Group After the Merger—NYSE Requirements.*"

The Merged Group could lose its status as an FPI under current SEC rules and regulations if more than 50% of its outstanding voting securities become directly or indirectly held of record by U.S. holders and any one of the following is true: (i) the majority of the Merged Group's directors or executive officers are U.S. citizens or residents; (ii) more than 50% of the Merged Group's assets are located in the United States; or (iii) the Merged Group's business is administered principally in the United States. If the Merged Group loses its status as an FPI in the future, it will no longer be exempt from the rules described above and, among other things, will be required to file periodic reports and annual and quarterly financial statements as if it were a company incorporated in the United States. If this were to happen, the Merged Group would likely incur substantial costs in fulfilling these additional regulatory requirements and members of the Merged Group's management would likely have to divert time and resources from other responsibilities to ensuring these additional regulatory requirements are fulfilled.

As a result of registering the distribution of the New Woodside Shares and New Woodside ADSs in the United States, the Merged Group will become subject to additional regulatory compliance requirements, including Section 404 of the Sarbanes-Oxley Act, and if the Merged Group fails to maintain an effective system of internal controls, the Merged Group may not be able to accurately report its financial results or prevent fraud.

As a company with ADSs listed on the NYSE, the Merged Group will incur legal, accounting and other expenses that it did not previously incur. The Merged Group will be subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, the NYSE Listing Rules and other applicable securities rules and regulations, as well as the U.S. Foreign

Table of Contents

Corrupt Practices Act 1977, as amended. Compliance with these rules and regulations will increase Woodside's legal and financial compliance costs, make some activities more difficult, time consuming or costly and increase demand on its systems and resources, particularly if the Merged Group is no longer an FPI.

Pursuant to Section 404 of the Sarbanes-Oxley Act, the Merged Group's management will be required to assess and attest to the effectiveness of its internal control over financial reporting in connection with issuing the Merged Group's audited consolidated financial statements beginning with its audited consolidated financial statements as of and for the year ending 31 December 2023. As long as the Merged Group is an accelerated filer or a large accelerated filer, Section 404 also requires the Merged Group to include an attestation report on the effectiveness of internal control over financial reporting from the Merged Group's independent registered public accounting firm for any period in which the Merged Group is required to provide a management assessment.

Compliance with Section 404 will increase the Merged Group's compliance costs and management's attention may be diverted from other business concerns, which could adversely affect the Merged Group's results of operations. The Merged Group may need to hire more employees in the future or engage outside consultants to comply with these requirements, which would further increase expenses. If the Merged Group fails to comply with the requirements of Section 404 in the required timeframe, it may be subject to sanctions or investigations by regulatory authorities, including the SEC and the NYSE. Furthermore, if the Merged Group is unable to attest to the effectiveness of its internal control over financial reporting, it could lose investor confidence in the accuracy and completeness of its financial reports, and the market price of Woodside Shares and Woodside ADSs could decline. Failure to implement or maintain effective internal control over financial reporting could also restrict the Merged Group's future access to the capital markets and subject the Merged Group, its directors and its senior management to significant monetary and criminal liability. In addition, changing laws, regulations and standards relating to corporate governance and public disclosure are creating uncertainty for public companies, increasing legal and financial compliance costs and making some activities more time consuming. These laws, regulations and standards are subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. The Merged Group intends to invest resources to comply with evolving laws, regulations and standards, and this investment may result in increased general and administrative expenses and a diversion of management's time and attention from revenue generating activities to compliance activities.

Furthermore, as a public reporting company in the United States, the United Kingdom and Australia with securities listed on the NYSE, LSE and ASX, the Merged Group will have the additional burden of complying with multiple regulatory and disclosure regimes, which may result in further uncertainty regarding compliance matters, additional costs and further diversion of management's time and attention. If the Merged Group's effort to comply with new laws, regulations and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to their application and practice, regulatory authorities may initiate legal proceedings against it and its business, financial condition, results of operations and future growth prospects may be adversely affected.

Information About the Companies

Information about Woodside

Woodside was registered and incorporated under Australian corporate law on 17 August 1971. Woodside was listed on ASX on 18 November 1971. Woodside's registered office, head office and principal place of business is Mia Yellagonga, 11 Mount Street, Perth, Western Australia 6000, Australia. Woodside's telephone number is (61 8) 9348 4000. At the Woodside Shareholders Meeting, Woodside is proposing a resolution to change its name from "Woodside Petroleum Ltd." to "Woodside Energy Group Limited." If approved, this change is expected to take effect shortly after the Woodside Shareholders Meeting. Woodside has also applied to change its ticker symbol on the ASX from "WPL" to "WDS," subject to shareholder approval of the proposed name change.

Information about BHP

BHP is the world's largest diversified natural resources company by market capitalization with over 80,000 employees and contractors, primarily in Australia and the Americas. BHP's products are sold worldwide, and BHP is among the world's top producers of major commodities, including iron ore, copper, nickel and metallurgical coal.

Information about BHP Petroleum

BHP pioneered the development of an oil and gas industry in Australia with the Bass Strait discovery in 1965. The BHP petroleum business now has conventional oil and gas assets in the U.S. GOM, Australia, and T&T, and appraisal and exploration options in Mexico, T&T, western U.S. GOM, Eastern Canada, Barbados and Egypt. BHP Petroleum also includes BHP Petroleum's interests in its Algerian assets, which BHP is in the process of divesting. For further information, see the section entitled "*Business and Certain Information About BHP Petroleum—Producing Assets—Algerian Assets Sale.*"

BHP Petroleum International Pty Ltd, the parent of BHP Petroleum, was incorporated in Australia in 1988 and is a wholly owned subsidiary of BHP. The registered office of BHP Petroleum International Pty Ltd is 125 St Georges Terrace, Perth Western Australia 6000, Australia, telephone (61 3) 1300 55 47 57.

Merger Commitment Deed

On 17 August 2021, Woodside and BHP announced that they had entered into the Merger Commitment Deed to facilitate the combination of their respective oil and gas portfolios through the Merger. The Merger is expected to create a top 10 global independent energy company by hydrocarbon production (Woodside analysis based on the Wood Mackenzie Corporate Benchmarking Tool Q4 2021, 1 December 2021, see the section titled "*Disclaimer and Important Notices—Industry and Market Data*" for clarification of independent energy company) and the largest energy company listed on the ASX. The Merger Commitment Deed outlined a process by which Woodside and BHP intended to progress the Merger.

Share Sale Agreement

On 22 November 2021, Woodside and BHP entered into the binding Share Sale Agreement which sets out each parties' obligations in relation to Implementation of the Merger (together with the ITSA which sets out each parties' obligations in relation to the separation, transition and integration of BHP's oil and gas portfolio with Woodside's oil and gas portfolio).

Implementation of the Merger is subject to satisfaction (or where permitted, waiver) by 30 June 2022 (or an agreed later date) of Conditions including:

- approval by certain regulatory and competition authorities;
- approval by Woodside Shareholders;

Table of Contents

the Independent Expert's Report concluding that the Merger is in the best interests of Existing Woodside Shareholders; and certain registration statements relating to Woodside Shares being declared effective by the SEC.

See the section entitled "*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Conditions*" for further details. If a Condition has not been satisfied or waived, if permitted, by this date, either Woodside or BHP may terminate the Share Sale Agreement.

If all Conditions are satisfied (or waived, if permitted), including the Woodside Shareholder Approval, then:

The Sale Shares, being 100% of the issued share capital of BHP Petroleum International Pty Ltd, will be transferred to Woodside (or a nominee), and BHP Petroleum will become a wholly owned subsidiary of Woodside;

Woodside will pay BHP the Purchase Price, including the Share Consideration of 914,768,948 New Woodside Shares in the aggregate, which will be issued to BHP;

BHP will immediately distribute to BHP Shareholders (or the Sale Agent in the case of all Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) on the Distribution Record Date the Share Consideration, pro rata to their respective ownership of BHP (the "Distribution Entitlement");

Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders will receive a cash payment from proceeds of the sale of New Woodside Shares in lieu of receiving New Woodside Shares, as provided in accordance Section 3.7 of the Share Sale Agreement; and

Each holder of BHP ADSs will receive, in lieu of New Woodside Shares, a number of New Woodside ADSs that corresponds to the New Woodside Shares received on the BHP Shares represented by BHP ADSs (subject to payment of taxes and applicable Woodside Depository and BHP Depository fees and expenses).

Following Implementation, the Merged Group will comprise Woodside and its subsidiaries, including each member of BHP Petroleum.

Fractional Woodside Shares or fractional New Woodside ADSs will not be issued to BHP Shareholders or holders of BHP ADSs, as applicable, pursuant to the Merger. To the extent that the Distribution Entitlement in respect of any Participating BHP Shareholder would create a fractional entitlement to a New Woodside Share, then Distribution Entitlement will be rounded down to the nearest whole number of New Woodside Shares, the fraction of a New Woodside Share will be issued to the Sale Agent and sold, and BHP or its nominee will retain the net proceeds. Any fractional entitlements to New Woodside ADSs will be aggregated and sold by the BHP Depository and the net cash proceeds (after deduction of applicable fees, taxes and expenses) will be distributed to the BHP ADS holders entitled thereto.

From the date of issue, the New Woodside Shares comprising the Share Consideration will be fully paid and rank equally with Woodside Shares currently on issue. Post-Implementation, Woodside will continue to be listed on ASX, with a secondary listing on the LSE in the United Kingdom and a listing of Woodside ADSs on NYSE in the United States. See the section entitled "*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Purchase Price*" for further details.

An "Ineligible Foreign BHP Shareholder," for purposes of the Merger, is (i) a BHP Shareholder whose address is shown in the BHP Register (as determined by BHP) on the Distribution Record Date as being in a jurisdiction other than one of the following jurisdictions: Australia, Canada, Chile, France, Germany, Ireland, Italy, Japan, Jersey, Luxembourg, Malaysia, New Zealand, Netherlands, Norway, Singapore, Spain, Sweden, Switzerland, the United Arab Emirates, the United Kingdom, the United States, or any other jurisdiction in

Table of Contents

respect of which BHP determines (acting reasonably and following consultation with Woodside) that it is not prohibited or unduly onerous or impractical to transfer or distribute New Woodside Shares to the BHP Shareholders in those jurisdictions, or (ii) one of certain South African BHP Shareholders who does not validly elect to receive New Woodside Shares in accordance with arrangements to be outlined by BHP. BHP will transfer the New Woodside Shares that each Ineligible Foreign BHP Shareholder would otherwise be entitled to receive to the Sale Agent to be sold, with the net proceeds distributed to the Ineligible Foreign BHP Shareholder. Please refer to the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Distribution of New Woodside Shares*” for further information regarding the plan of distribution of New Woodside Shares.

Purchase Price

The consideration for the sale of the Sale Shares is the payment by Woodside of the Purchase Price (being the Purchase Price under the Share Sale Agreement), comprising the Share Consideration and the Completion Payment.

Share Consideration

Immediately upon Implementation of the Merger, the New Woodside Shares will be issued by Woodside to BHP and BHP will distribute the Share Consideration to BHP Shareholders (or to the Sale Agent in the case of all Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders).

Woodside will then:

- ensure that each New Woodside Share is unencumbered, fully paid up and ranks equally with Existing Woodside Shares;
- procure that all New Woodside Shares are listed for quotation on ASX (or relevant secondary listing exchange); and
- promptly send holding statements to each Participating BHP Shareholder that has received New Woodside Shares.

The effect of the initial offer and the subsequent Share Sale Agreement is for the Merger to take economic effect from 1 July 2021. As a result, subject to Implementation, Woodside will become entitled to the economic benefit and risks of the BHP Petroleum assets and liabilities that are the subject of the Merger with effect from 1 July 2021, and BHP Shareholders will become entitled to the agreed number of Woodside Shares with adjustment for dividends and certain other activities from that same date. Movements in the value of either BHP Petroleum’s assets or Woodside Shares after 1 July 2021 would not affect the merger ratio and would be to the benefit or risk of each party. Nevertheless, for accounting purposes, the Merger will be treated as if it is effective as of the Implementation Date. The price of Woodside Shares has increased by approximately 50% from 1 July 2021 to 24 March 2022 for a variety of potential reasons, including increases in commodity prices. Accounting standards require the value of Woodside Shares (including the increase in the value of Woodside Shares from 1 July 2021 to the Implementation Date) to be allocated to the BHP Petroleum assets and liabilities acquired at their fair value and any amount above that allocated to goodwill. Following Implementation, Woodside will need to determine the fair value of the BHP Petroleum assets and liabilities as at the Implementation Date and calculate the value of goodwill on acquisition to be recognized. Subsequently, on an ongoing basis, Woodside will need to assess the extent to which the goodwill may be impaired. The pro forma financial information includes an estimate of goodwill arising on acquisition, based on assumptions as to the price of Woodside Shares and other factors. See the section entitled “*Unaudited Pro Forma Condensed Combined Financial Statements*.”

Table of Contents

Completion Payment

To give economic effect to the Effective Time of 11:59 p.m. (AEST) on 30 June 2021, separate to the Share Consideration, on Implementation Woodside or BHP, as applicable, will pay to the other party the “Completion Payment,” which includes:

the “Woodside Dividend Payment”, payable by Woodside, which is defined as:

- the aggregate amount of all dividend payments in respect of all dividends declared by Woodside that have a record date subsequent to the Effective Time but prior to Implementation (the “Woodside Dividends”) (excluding franking credits) where the dividend payment for each Woodside Dividend is the amount equal to:
 - (1) the Equity Ratio (as defined in the Share Sale Agreement) at the time the Woodside Dividend is paid multiplied by the total amount of that Woodside Dividend (in respect of all Woodside Shares); less
 - (2) the value of Woodside Shares issued under Woodside’s dividend reinvestment plan issued after the Effective Time, determined in accordance with the Share Sale Agreement;

the Locked Box Payment, payable by Woodside to BHP or BHP to Woodside, as applicable; and

any other adjustments to the Purchase Price payable in accordance with the Share Sale Agreement.

Further information regarding the Share Sale Agreement and Locked Box Payment is set out in the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Purchase Price.*”

Ineligible Foreign BHP Shareholders

Restrictions in certain foreign countries may make it impractical, unduly onerous or unlawful for New Woodside Shares issued under the Merger to be distributed to BHP Shareholders in those jurisdictions.

Some BHP Shareholders may be Ineligible Foreign BHP Shareholders for the purposes of the Merger, and this prospectus should be read accordingly.

Neither Woodside nor BHP are obliged to issue or transfer (respectively), and will not issue or transfer, any New Woodside Shares to any Ineligible Foreign BHP Shareholder.

Instead, the New Woodside Shares that are otherwise attributable to Ineligible Foreign BHP Shareholders will be transferred to the Sale Agent to be sold, with the net proceeds of such sale to be paid to Ineligible Foreign BHP Shareholders.

Small Parcel BHP Shareholders

A BHP Shareholder (other than an Ineligible Foreign BHP Shareholder) (i) who is registered on the BHP Australian principal share register and holds 1,000 BHP shares or less or on the BHP depository interest register and holds 1,000 BHP depository interests or less, (ii) whose registered address in the BHP Australian principal share register or BHP depository interests register is in any of Australia, Canada, Chile, France, Germany, Ireland, Japan, Jersey, Luxembourg, Malaysia, New Zealand, Norway, Spain, Sweden, Switzerland, the United Arab Emirates and the United Kingdom, and (iii) who is not, and is not acting for the account or benefit of persons, in the United States, is a Small Parcel BHP Shareholder.

A Small Parcel BHP Shareholder may deliver a duly completed opt-in notice in accordance with the relevant instructions before 5:00 p.m. (AEST) on 24 May 2022, in which case that BHP Shareholder will be a Relevant Small Parcel BHP Shareholder. Woodside will issue, or BHP will transfer, the New Woodside Shares

Table of Contents

that each Relevant Small Parcel BHP Shareholder would otherwise be entitled to receive to the Sale Agent to be dealt with in accordance with the procedure set out in the section entitled “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement–Distribution of New Woodside Shares.*”

Relevant Small Parcel BHP Shareholders will not receive New Woodside Shares in connection with the Merger.

Plan of Distribution of Woodside Shares

BHP Shareholders who are Participating BHP Shareholders on the Distribution Record Date will be entitled to have the New Woodside Shares distributed to them.

Background of the Merger

Woodside and BHP have held regular commercial discussions since the beginning of 2019 in light of their mutual participation in various ordinary commercial activities, including co-ownership in LNG and upstream assets, primarily in the North West Shelf Project and Scarborough / Pluto Train 2 Project.

Woodside’s Board of Directors, together with Woodside’s management, regularly reviews Woodside’s strategy and opportunities to maximize shareholder value, including evaluating opportunities within Woodside’s existing portfolio and potential strategic collaborations, divestment and acquisition opportunities.

On 12 April 2021, Mr. Ken MacKenzie, Chairman of the BHP Board, contacted Mr. Richard Goyder, Chairman of Woodside’s Board of Directors. Mr. MacKenzie advised Mr. Goyder that BHP was undertaking a strategic review of its petroleum business, including evaluating opportunities to demerge its petroleum business or divest its petroleum business to one or more buyers in one or a series of transactions. Both chairmen agreed that the merger of Woodside’s petroleum business with BHP’s petroleum business presented a unique opportunity which had the potential to create value for both Woodside Shareholders and BHP Shareholders and merited consideration by their respective teams. Mr. MacKenzie and Mr. Goyder maintained regular contact throughout the negotiation process.

On 15 April 2021, Mr. Goyder advised the Woodside Board of his phone call with Mr. MacKenzie. It was agreed that the opportunity warranted allocating resources, including external advisors, to evaluate it.

On 23 April 2021, Ms. Meg O’ Neill (Acting Chief Executive Officer, Woodside) and Mr. Mike Henry (Chief Executive Officer, BHP) discussed the proposed merger at a high level, including potential value creation, synergies and the strategic fit of the two businesses.

On 26 April 2021, Mr. Goyder, Ms. O’ Neill and Ms. Sherry Duhe (then Executive Vice President and Chief Financial Officer) advised Ms. Rebecca McNicol (Vice President - Commercial), and Woodside’s financial adviser, Charles Graham (Managing Director, Gresham Advisory Partners Limited (“Gresham”)) of the potential merger of Woodside’s petroleum business with BHP’s petroleum business.

On 28 April 2021, Woodside and BHP entered into a confidentiality agreement to govern the provision of information on BHP’s petroleum assets to Woodside to support the evaluation of the opportunity (the “Confidentiality Agreement”). Following execution of the Confidentiality Agreement:

- (A) BHP made available due diligence materials on BHP’s petroleum business to Woodside’s representatives and its advisers via a virtual dataroom; and

Table of Contents

- (B) BHP's management team provided a series of management presentations on BHP's petroleum business to Woodside's representatives and its advisers.

Woodside engaged a number of advisers to assist its evaluation of the potential merger with BHP's petroleum business including:

- (A) Gresham were first contacted on 23 April 2021 and mandated as Woodside's financial adviser (as set out in the Engagement Letter signed on 17 May 2021);
- (B) Morgan Stanley & Co. International plc were first contacted on 21 July 2021 and mandated as Woodside's financial adviser (as set out in the Engagement Letter signed on 17 August 2021);
- (C) King & Wood Mallesons ("KWM") were engaged 14 May 2021 to work on the matter as Woodside's legal counsel (as set out in the Notice of Engagement dated 14 May 2021);
- (D) Vinson & Elkins LLP were first contacted on 6 May 2021 and mandated as Woodside's legal counsel to advise on U.S. aspects of the potential merger (as set out in the Notice of Engagement dated 11 May 2021); and
- (E) Deloitte were first contacted on 17 May 2021 and mandated as Woodside's tax adviser (as set out in the Notice of Engagement dated 27 July 2021).

BHP also engaged a number of advisers to support its evaluation of the potential merger, including J.P. Morgan, Barclays and Goldman Sachs, as its financial advisers, Herbert Smith Freehills, as Australian legal counsel ("HSF"), and Sullivan & Cromwell, as U.S. legal counsel.

On 28 April 2021, Ms. Duhe, Ms. McNicol and other Woodside representatives met with representatives from BHP, J.P. Morgan and Gresham to discuss possible transaction structures, key milestones and next steps. Other meetings involving Woodside's management, BHP's management, Gresham, KWM, Deloitte (Woodside's tax adviser), J.P. Morgan and HSF were held between 28 April 2021 and the submission of the non-binding indicative offer ("NBIO") by Woodside on 17 June 2021 to discuss a variety of matters including (without limitation) development of Woodside's transaction proposal and due diligence, structuring, tax, employment and separation matters.

On 28 May 2021, Ms. O' Neill and Mr. Henry discussed the proposed timing for submission of the NBIO following which Mr. Henry sent Ms. O' Neill BHP's NBIO process letter ("Process Letter").

Woodside's management provided regular updates to Woodside's Board of Directors in the period leading up to submission of the NBIO.

On 18 May 2021, Woodside's Board held a meeting during which Ms. O' Neill, Ms. Duhe, Ms. McNicol and other Woodside representatives provided Woodside's Board with a high-level overview of the opportunity based on publicly available information and proposed timing for the submission of the NBIO. Woodside's Board noted that negotiations on the Scarborough Processing Services Agreement would be progressed in parallel with discussions on the potential merger with BHP's petroleum business.

On 3 June 2021, Woodside's Board held a meeting during which Ms. O' Neill, Ms. Duhe, Ms. McNicol, other Woodside representatives and Gresham discussed the terms of BHP's NBIO Process Letter dated 28 May 2021 and agreed to work towards BHP's proposed timing for submission of the NBIO.

On 14 June 2021, Woodside's Board held a meeting during which Ms. O' Neill, Ms. Duhe, Mr. Shaun Gregory (Executive Vice President Sustainability and Chief Technology Officer, Woodside), Ms. McNicol, other Woodside representatives and Gresham provided Woodside's Board with an overview of the valuation framework and methodology (based on a discounted cash flow analysis) for

Table of Contents

determining the relative net asset valuation of Woodside's and BHP's portfolio using a common suite of assumptions to determine the merger ratio. Material assumptions included: effective and valuation date of 30 June 2021; BHP Petroleum modelled on a cash-free and debt-free basis with a normalized working capital position; a range of Brent oil prices from \$50/bbl to \$65/bbl (2020 real terms); a discount rate of 8% for assets in Australia and the United States with risk premiums for other jurisdictions; and risk factors applied to assets reflecting the stage of development.

On 17 June 2021, Woodside's Board held a meeting during which Ms. O' Neill, Ms. Duhe, Mr. Gregory, Ms. McNicol, other Woodside representatives and Gresham discussed the key terms of the NBIO, key diligence findings and the strategic rationale for the potential merger with BHP's petroleum business. Woodside's Board resolved to submit the NBIO to BHP.

BHP's management provided regular updates to the BHP Board.

Following the meeting of Woodside's Board of Directors on 17 June 2021, Mr. Goyder sent the NBIO to Mr. MacKenzie pursuant to which Woodside offered to merge with BHP's global oil and gas portfolio by acquiring 100% of the issued share capital of BHP Petroleum International Pty Ltd, which would be distributed by BHP in specie to BHP Shareholders immediately at completion with no trading restrictions. The proposed transaction merger ratio would result in BHP Shareholders holding approximately 40% of the combined entity. The NBIO noted that the next stage of the process would involve detailed due diligence on BHP's portfolio, reverse due diligence on Woodside by BHP and preparation of definitive transaction documents for execution on a confidential and exclusive basis. Woodside and BHP both provided the other with a detailed list of further key due diligence information required as part of the next stage.

Parallel communications in relation to the NBIO occurred between Ms. O' Neill and Mr. Henry and between Ms. Duhe and Mr. Johan van Jaarsveld (Chief Development Officer, BHP), including the following:

On 16 June 2021, Ms. Duhe, Mr. van Jaarsveld and Mr. David Lamont (Chief Financial Officer, BHP) discussed the NBIO (with messaging being conveyed as to value expectations).

On 17 June 2021, Ms. O' Neill and Mr. Henry discussed the NBIO. Mr. Henry indicated that the merger ratio implied by the NBIO did not meet BHP's value expectations. Mr. Henry noted that the value implied by the NBIO was inferior to BHP's alternatives for BHP's petroleum business (particularly their demerger option).

On 21 June 2021, Ms. O' Neill and Mr. Henry discussed the material value gaps, risk allocation, broker consensus values and next steps. Ms. O' Neill and Mr. Henry agreed that BHP would provide further information in respect to BHP's petroleum business and that Woodside and BHP would continue to reassess certain elements of its valuation of the proposed transaction and of the allocation of value between Woodside Shareholders and BHP Shareholders. Such meetings involving Woodside management, BHP management, Gresham, Deloitte and J.P. Morgan were held to discuss a variety of specific matters including (without limitation) general and administrative expenses, net operating losses, decommissioning costs and growth opportunities as areas where there was a potential disparity between Woodside's and BHP's view on value as a result of limited information provided.

Woodside management re-engaged with Woodside's Board on 29 June 2021 where Ms. O' Neill, Ms. Duhe, Mr. Gregory, Ms. McNicol, other Woodside representatives and Gresham provided Woodside's Board with an overview of BHP's feedback on the NBIO, an overview of the additional information provided by BHP and a revised valuation of the respective portfolios to reflect the additional information and potential value of the combined company which supported an increased offer where BHP Shareholders would hold 48% of the enlarged Woodside. At the meeting, Woodside's Board delegated authority to Mr. Goyder and Ms. O' Neill to submit a revised NBIO to BHP.

On 29 June 2021, Ms. O' Neill and Mr. Henry discussed a potential revised NBIO and potential acceptable merger ratios.

Table of Contents

On 30 June 2021, Woodside's Board held a meeting where Ms. O' Neill, Ms. Duhe, Mr. Gregory, Ms. McNicol, and other Woodside representatives provided an update on the various discussions between Woodside and BHP, a revised valuation of the respective portfolios and update on the status of negotiations on the Scarborough Processing Services Agreement.

On 1 July 2021, Mr. Goyder and Mr. MacKenzie also discussed a potential revised NBIO and potential acceptable merger ratios.

On 8 July 2021, Woodside and BHP entered into an amended and restated Confidentiality Agreement to extend the existing confidentiality regime to govern the provision of information on Woodside's petroleum assets to BHP to support the evaluation of the opportunity.

On 12 July 2021, BHP's external lawyers provided Woodside's external lawyers the initial draft of the Merger Commitment Deed.

On 13 July 2021, Ms. O' Neill sent Mr. Henry a revised non-binding indicative offer (the "Revised NBIO") pursuant to which Woodside revised its valuation of the BHP petroleum business, representing 48% of the value of the combined portfolio with the result that BHP Shareholders would hold 48% of the enlarged Woodside. The proposed consideration reflected a revised assessment of the relative value contribution of BHP's petroleum business to the combined portfolio based on the additional information provided to Woodside following the NBIO including (without limitation) general and administrative expenses, net operating losses, decommissioning costs and growth opportunities, and further negotiation between the parties. The Revised NBIO noted the following conditions:

- (A) Woodside and BHP will continue in good faith to finalize the Scarborough Processing Services Agreement and associated agreements in July 2021 on the basis of the terms already agreed and certain key value items.
- (B) Woodside will grant to BHP Petroleum (North West Shelf) Pty Ltd (or a Woodside-approved BHP Petroleum assignee entity) an option to require Woodside to purchase BHP's entire undivided Participating Interest in Scarborough, Thebe and Jupiter (the "Put Option"). Woodside proposed that the parties negotiate the terms of a binding option deed to be executed together with an annexed form of sale and purchase agreement.

Following receipt of the Revised NBIO, BHP provided a significant number of additional documents in the virtual data room to facilitate Woodside's further due diligence on BHP's petroleum business. BHP also conducted reverse due diligence on Woodside. In July, representatives of Woodside also gave presentations to representatives of BHP on Pluto, Train 2 and Sangomar and provided BHP with a data book to facilitate BHP's review of Woodside's assets and key growth opportunities other than the overlapping assets and Pluto and Train 2.

On 15 July 2021, Ms. O' Neill and Mr. Henry discussed key matters related to the Revised NBIO (which were then reflected in an email from Mr. Henry to Ms. O' Neill on 16 July 2021). Mr. Henry's email included BHP's reverse due diligence requirements on Woodside's assets, BHP's position on a proposed Scarborough post completion payment of \$150 million, and confirmation that Woodside's proposal would result in BHP Shareholders receiving 48% of the combined entity on a fully-diluted basis.

Other meetings involving Woodside's management, BHP's management, Gresham, KWM, Deloitte (Woodside's tax adviser), J.P. Morgan and HSF were held following receipt of the draft Merger Commitment Deed to discuss a variety of matters including (without limitation) due diligence, structuring, tax, employment, separation, pre-completion restructuring, intra-group funding, key terms for the Share Sale Agreement and key terms for the Integration and Transition Services Agreement, or ITSA. On 13 August, Woodside provided BHP with financial and operating forecasts for the Merged Group to be included in the investor announcement about

[Table of Contents](#)

the Merger Commitment Deed. See “*The Merger–Unaudited Combined Forecasted Financial and Operating Information.*”

Woodside’s management provided regular updates with supporting material to Woodside’s Board of Directors in the period leading up to execution of the Merger Commitment Deed on 17 August 2021.

On 20 July 2021, Woodside’s Board held a meeting where Mr. Gregory, Ms. McNicol, other Woodside representatives and Gresham provided an update on the status of negotiations on the Merger Commitment Deed and the Put Option.

On 26 July 2021, Woodside’s Board held two meetings with Woodside senior management to discuss key findings from Woodside’s technical due diligence and non-technical due diligence of BHP’s petroleum business.

On 27 July 2021, Woodside’s Board held a meeting where Ms. O’Neill, Ms. Duhe, Mr. Gregory, Ms. McNicol, and other Woodside representatives provided an update on the structure of the proposed merger including the requirements under Australian, U.S. and UK securities laws.

On 6 August 2021, a sub-committee of Woodside’s Board comprising Mr. Frank Cooper, AO (Board Member), Mr. Gene Tilbrook (Board Member) and Mr. Ben Wyatt (Board Member) had a meeting with Ms. O’Neill, Ms. Duhe, Ms. McNicol and other Woodside representatives to work through a draft investor presentation to be disclosed in connection with the proposed Merger.

On 9 August 2021, Woodside’s Board held a meeting where Ms. O’Neill, Mr. Gregory, Ms. McNicol and other Woodside representatives provided an update on the proposed Merger, revised valuation of the respective portfolios and status of negotiations on the Merger Commitment Deed and Put Option, together with a draft investor presentation.

On 11 August 2021, Woodside’s Board held a meeting, attended by Ms. O’Neill, Ms. Duhe, Mr. Gregory, Ms. McNicol and other Woodside representatives and Gresham, to discuss matters regarding capital management, pro forma financials, strategic communications and stakeholder engagement related to the proposed merger.

On 17 August 2021, Woodside’s Board held a meeting where Ms. O’Neill, Ms. Duhe, Mr. Gregory, Ms. McNicol and other Woodside representatives and Gresham provided an update on the key terms of the Merger Commitment Deed and Put Option together with the joint ASX announcement with BHP regarding the Merger Commitment Deed and Put Option. Woodside’s Board resolved to execute the Merger Commitment Deed and Scarborough Put Option Deed and release the joint ASX announcement.

On 17 August 2021, Woodside announced that its Board had appointed Ms. O’Neill as Chief Executive Officer and Managing Director.

Following their respective Board meetings on 17 August 2021, Woodside and BHP executed the Merger Commitment Deed and Scarborough Put Option Deed and released a joint ASX announcement in relation to the intention to combine their respective oil and gas portfolios by an all-stock merger based on 52% of the expanded Woodside being held by existing Woodside Shareholders and 48% of the expanded Woodside being held by BHP Shareholders.

The Put Option is summarized in the section entitled “*The Share Sale Agreement and Related Agreements–Related Agreements–Scarborough Put Option.*”

The Merger Commitment Deed committed Woodside and BHP to advance the proposed Merger on the basis of agreed key terms and principles for the Share Sale Agreement and ITSA, and included mutual regimes for exclusivity, reimbursement fees and termination events.

Table of Contents

Following execution of, and as contemplated by, the Merger Commitment Deed, BHP and Woodside (and their respective advisers) undertook additional due diligence investigations in respect of each other's petroleum business.

Up until 12 November 2021, each of BHP and Woodside maintained and updated a virtual data room containing information relevant to their respective due diligence activities, and responded to requests for further information.

On 13 September 2021, HSF provided to KWM the initial draft of the Share Sale Agreement, based on the principles agreed in the Merger Commitment Deed.

On 30 September 2021, Woodside provided BHP the initial draft of the ITSA.

Following exchange of the first draft of the Share Sale Agreement and the ITSA respectively through to the execution of these agreements:

Meetings, video conferences and telephone calls were conducted involving some or all of Woodside's management, BHP's management, KWM and HSF (Negotiation Teams) during which the terms of the Share Sale Agreement and the ITSA were discussed and negotiated;

members of the Negotiation Teams created and exchanged issues lists; and

amended drafts of the Share Sale Agreement and ITSA were prepared by KWM or HSF and provided to BHP or Woodside (as appropriate).

Certain matters from the Share Sale Agreement and ITSA negotiations were escalated to CEO level to resolve. Key CEO meetings included the following:

On 29 October 2021 Ms. O' Neill and Mr. Henry discussed timing with respect to the Share Sale Agreement and ITSA execution.

On 14 November 2021 Ms. O' Neill emailed Mr. Henry with a package of commercial positions on various Share Sale Agreement and ITSA matters.

On 15 November 2021, Ms. O' Neill and Mr. Henry discussed key outstanding Share Sale Agreement and ITSA matters.

On 15 November 2021 Ms. O' Neill and Mr. Henry exchanged emails which confirmed the extension of the Exclusivity Period under the Merger Commitment Deed until 19 November 2021.

On 19 November 2021 Ms. O' Neill and Mr. Henry agreed to extend the Exclusivity Period under the Merger Commitment Deed until 26 November.

Woodside's management provided regular updates to Woodside's Board in the period leading up to execution of the Share Sale Agreement and ITSA on 22 November 2021, during which Woodside's Board was updated on the status of the Merger and negotiations on the Share Sale Agreement and ITSA including outstanding issues. The following is a list of the Woodside Board meetings:

On 14 September 2021, Ms. Duhe, Ms. McNicol and another Woodside representative attended a Woodside Board meeting.

On 5 October 2021, Ms. Duhe and Ms. McNicol attended a meeting with members of the Woodside Board.

On 13 October 2021, Ms. Duhe and Ms. McNicol attended a Woodside Board meeting.

On 1 November 2021, Ms. Duhe, Ms. McNicol and Woodside representatives attended a meeting with members of the Woodside Board. At the meeting, the transaction team provided a summary of the key due diligence findings.

Table of Contents

On 3 November 2021, Ms. Duhe, Ms. McNicol and another Woodside representative attended a Woodside Board meeting.

On 9 November 2021, Ms. Duhe, Ms. McNicol and Woodside representatives attended a meeting with members of the Woodside Board.

On 15 November 2021, Ms. Duhe, Ms. McNicol and Woodside representatives attended a Woodside Board meeting.

On 18 November 2021, Ms. Duhe, Ms. McNicol and Woodside representatives attended a Woodside Board meeting. During the meeting, Woodside's Board delegated authority to the Chairman and CEO to finalize the outstanding issues and execute the Share Sale Agreement and the ITSA.

On 22 November 2021, Woodside and BHP signed the Share Sale Agreement and issued an ASX announcement in relation to the execution of the Share Sale Agreement (together with necessary filings with the SEC).

Unaudited Combined Forecasted Financial and Operating Information

From time to time, Woodside may disclose near-term annual guidance on selected operational metrics through its ongoing reporting but does not, as a matter of course, make public long-term forecasts or internal projections as to future performance, revenues, production, earnings or other results due to, among other reasons, the uncertainty of the underlying assumptions and estimates. However, in connection with its evaluation of the Merger, Woodside's management, prepared certain unaudited internal financial forecasts with respect to the Merged Group, which were provided to the Woodside Board and BHP. Woodside's management based these unaudited internal financial forecasts of the Merged Group on a combination of certain projected production and operating data related to Woodside prepared by Woodside's management and shared with BHP, taking into account information related to BHP Petroleum prepared by BHP's management and shared with Woodside as part of Woodside's due diligence investigation in connection with the sales process. The inclusion of this information should not be regarded as an indication that any of Woodside, its representatives, or any other recipient of this information considered, or now considers, it to be necessarily predictive of actual future performance or events, or that it should be construed as financial guidance, and such summary projections set forth below should not be relied on as such.

This information was prepared with the primary purpose of describing certain factors considered as part of Woodside's approval of the Merger and disclosed initially in the lead up to the joint ASX announcement for execution of the Merger Commitment Deed on 17 August 2021, and it is subjective in many respects. While presented with numeric specificity, the unaudited prospective financial and operating information reflects numerous estimates and assumptions that are inherently uncertain and may be beyond the control of Woodside's management, including, among others, estimates and assumptions about Woodside's and BHP Petroleum's future results, oil and gas industry activity, commodity prices, demand for crude oil, NGL and natural gas, the availability of financing to fund LNG projects and project expansion as well as the exploration and development costs associated with the respective projected drilling programs, restoration costs associated with business activities, general economic and regulatory conditions, and other matters described in the sections entitled "*Cautionary Statement Regarding Forward-Looking Statements*" and "*Risk Factors*." The unaudited prospective financial and operating information reflects both assumptions as to certain business decisions that are subject to change and, in many respects, subjective judgment, and thus is susceptible to multiple interpretations and periodic revisions based on actual experience and business developments. Woodside can give no assurance that the unaudited prospective financial and operating information and the underlying estimates and assumptions will be realized. In addition, since the unaudited prospective financial and operating information covers multiple years, such information by its nature becomes less predictive with each successive year. Actual results may differ materially from those set forth below, and important factors that may affect actual results and cause the unaudited prospective financial information to be inaccurate include, but are not limited to, risks and uncertainties relating

Table of Contents

to its business, industry performance, the regulatory environment, general business and economic conditions, and other matters described in “*Risk Factors*.” Also see the section entitled “*Cautionary Statement Regarding Forward-Looking Statements*.”

The unaudited prospective financial and operating information was prepared with the primary purpose of describing certain factors considered as part of Woodside’s approval of the Merger, and it was not prepared with a view toward compliance with U.S. GAAP or IFRS, published guidelines of the SEC, or the guidelines established by the American Institute of Certified Public Accountants for preparation and presentation of prospective financial information. Neither Woodside’s independent registered public accounting firm, nor any other independent accountants, have compiled, examined, or performed any procedures with respect to the unaudited prospective financial and operating information contained herein, nor have they expressed any opinion or any other form of assurance on such information or its achievability. The report of the independent registered public accounting firm to Woodside contained herein relates to historical financial information of Woodside, and such report does not extend to the projections included below and should not be read to do so.

Furthermore, the unaudited prospective financial and operating information does not take into account any circumstances or events occurring after the date it was prepared. Material circumstances or events which might impact the forecasted information include: new agreements such as for asset sell downs and the associated terms; updates to forecasted production and cost profiles; timing or likelihood of projects; changes in macroeconomic and commodity assumptions and forecasts; updated transaction cost forecasts; and changes in the regulatory environment. As of the date of this prospectus, material circumstances or events which have occurred since the forecasted information was prepared include:

- the sale of a 49% non-operating participating interest in the Pluto Train 2 Joint Venture and the associated terms;
- updated forecasts for asset production and cost profiles, including for the Ruby oil field;
- updated transaction and integration costs assumptions; and
- changes in commodity prices.

Woodside can give no assurance that, had the unaudited prospective financial and operating information been prepared as of the date of this prospectus or any subsequent date, similar estimates and assumptions would be used. Except as required by applicable securities laws, Woodside does not intend to, and disclaims any obligation to, make publicly available any update or other revision to the unaudited prospective financial and operating information to reflect circumstances existing since their preparation or to reflect the occurrence of unanticipated events, even in the event that any or all of the underlying assumptions are shown to be in error, including with respect to the accounting treatment of the Merger under IFRS, or to reflect changes in general economic or industry conditions. The unaudited prospective financial and operating information does not take into account all the possible financial and other effects on Woodside or BHP Petroleum of the Merger, the effect on Woodside or BHP Petroleum of any business or strategic decision or action that has been or will be taken as a result of the Share Sale Agreement having been executed, or the effect of any business or strategic decisions or actions which would likely have been taken if the Merger Commitment Deed or the Share Sale Agreement had not been executed, but which were instead altered, accelerated, postponed, or not taken in anticipation of the Merger. Further, the unaudited prospective financial and operating information does not take into account the effect on Woodside or BHP Petroleum of any possible failure of the Merger to occur. None of Woodside or its affiliates, officers, Directors, advisers, or other representatives has made, makes, or is authorized in the future to make any representation to any Woodside Shareholder or BHP Shareholder or other person regarding Woodside’s or BHP Petroleum’s ultimate performance compared to the information contained in the unaudited prospective financial and operating information or that the forecasted results will be achieved. The inclusion of the unaudited prospective financial and operating information herein should not be deemed an admission or representation by Woodside, its respective advisers or other representatives or any other person that it is viewed as material information of Woodside or the Merged Group, particularly in light of the inherent risks and

Table of Contents

uncertainties associated with such forecasts. The summary of the unaudited prospective financial and operating information included below is being provided because it was made available to the Woodside Board and BHP in connection with the Merger.

In light of the foregoing, and considering that this disclosure is made several months after the unaudited prospective financial and operating information was prepared, as well as the uncertainties inherent in any forecasted information, Woodside Shareholders and BHP Shareholders are cautioned not to place undue reliance on such information, and Woodside urges all Woodside Shareholders and BHP Shareholders to review the historical and pro forma financial information of Woodside and BHP Petroleum included in this document. Please see the sections entitled *“Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum,” “Unaudited Pro Forma Condensed Combined Financial Statements”* and the financial statements of Woodside and BHP Petroleum and notes to the financial statements included herein.

Woodside management prepared the unaudited prospective financial and operating information utilizing the following commodity price assumptions, which are based on a flat oil price deck (\$65/bbl Brent oil price in 2020 real terms, inflated at 2.0% per annum):

| | <u>2022E</u> | <u>2023E</u> | <u>2024E</u> | <u>2025E</u> | <u>2026E</u> | <u>2027E</u> |
|-----------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|
| Brent Oil (\$/bbl) | 67.6 | 69.0 | 70.4 | 71.8 | 73.2 | 74.7 |
| WTI Oil (\$/bbl) | 64.1 | 65.4 | 66.7 | 68.1 | 69.4 | 70.8 |
| Uncontracted LNG Brent Slopes (%) | 12.6 % | 11.5 % | 11.5 % | 11.5 % | 11.5 % | 11.5 % |

The unaudited internal financial forecasts were also prepared utilizing a variety of assumptions, some of which may or may not have been realized since, including:

Then currently sanctioned projects being delivered in accordance with their then current project schedules;

Implementation of unsanctioned Gulf of Mexico (“GOM”) and Western Australia subsea tiebacks;

The Merged Group holding equity interests of 100% of Scarborough, 82% of Sangomar and 51% of Pluto Train 2;

No adjustment for financing costs and proceeds from sales of assets;

Utilization of potential U.S. net operating losses available to the Merged Group;

Transaction costs of approximately \$220 million (for a more recent estimate of transaction costs, see the section entitled *“Unaudited Pro Forma Condensed Combined Financial Statements”*); and

Normalized working capital position post completion of the Merger with no material movements over the forecast period.

Table of Contents

The following table has been prepared by Woodside management and sets forth certain summarized prospective financial and operating information regarding the Merged Group for the years 2022 through 2027, based on the price, cost and other assumptions indicated above. The following unaudited prospective financial and operating information should not be regarded as an indication that Woodside considered, or now considers, it to be necessarily predictive of actual future performance or events, or that it should be construed as financial guidance, and such information does not take into account any circumstances or events occurring after the date it was prepared, including, among other things, Woodside's anticipated or actual capital allocation relating to the assets after Implementation of the Merger.

| | Unaudited financial and operating forecast | | | | | |
|---------------------------------|--|---------|---------|---------|---------|---------|
| | 2022E | 2023E | 2024E | 2025E | 2026E | 2027E |
| | (\$m except production) | | | | | |
| Production (MMboe) | 199 | 212 | 224 | 206 | 208 | 231 |
| Adjusted Operating Cash Flow(1) | \$5,191 | \$6,838 | \$7,343 | \$6,554 | \$6,686 | \$7,101 |
| Unlevered Free Cash Flow(2) | \$33 | \$531 | \$3,343 | \$3,672 | \$4,767 | \$5,883 |

- (1) Adjusted Operating Cash Flow is calculated as net cash from operating activities excluding any financing costs (interest received, dividends received and borrowing costs relating to operating activities), plus payments for restoration and less payments for exploration expenditure. See the sections entitled “*Disclaimer and Important Notices–Non-GAAP Financial Measures*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside–Non-GAAP Financial Measures*.”
- (2) Unlevered Free Cash Flow is calculated as Adjusted Operating Cash Flow minus payments for restoration and minus payments for capital expenditure. See the sections entitled “*Disclaimer and Important Notices–Non-GAAP Financial Measures*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside–Non-GAAP Financial Measures*.”

Woodside’s Reasons for the Merger

The Woodside Board believes that the proposed Merger of Woodside and BHP Petroleum is a highly attractive opportunity that is expected to create a top 10 global independent energy company by hydrocarbon production (Woodside analysis based on the Wood Mackenzie Corporate Benchmarking Tool Q4 2021, 1 December 2021, see the section titled “*Disclaimer and Important Notices–Industry and Market Data*” for clarification of independent energy company) and the largest listed energy company on ASX. In evaluating the Merger and reaching its decision with respect to the Merger and the Share Sale Agreement, the Woodside Board consulted with Woodside management and outside legal and financial advisers, and considered a number of factors, including:

Greater scale and diversity of geographies, products and end markets through an attractive and long-life conventional portfolio

The Merger is expected to deliver benefits for both Woodside Shareholders and Participating BHP Shareholders by creating a long-life conventional portfolio of scale and diversity of geography, product and end markets.

On a combined basis, the Merged Group is expected to consist of:

Conventional asset base estimated to produce around 193 MMboe (2021 net production);

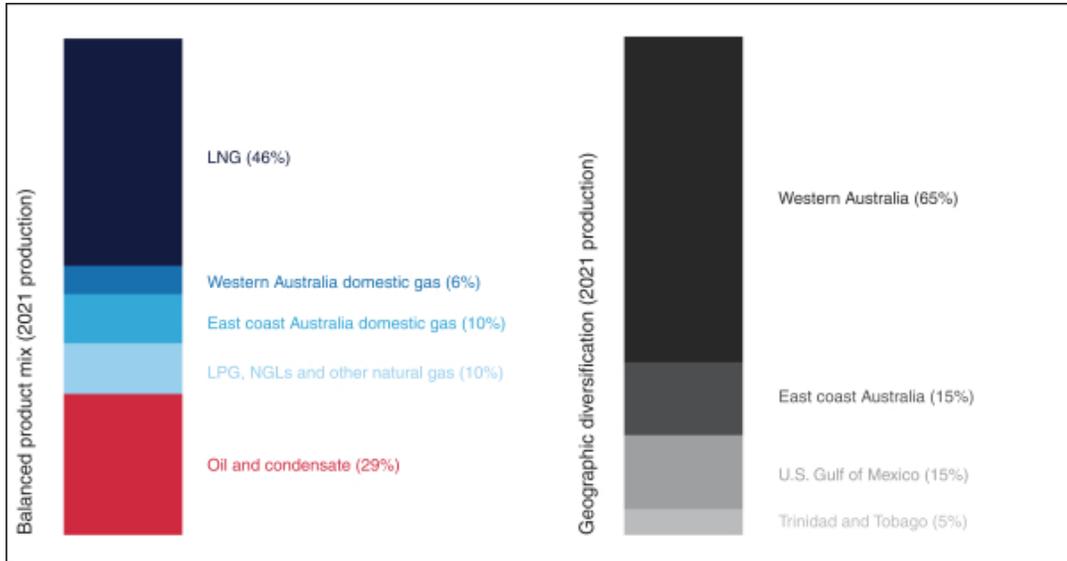

Diversified production mix of 46% LNG, 29% oil and condensate and 25% domestic gas and NGLs (2021 net production);

Wide geographic reach with production from Western Australia, East Coast Australia, U.S. GOM, and T&T with approximately 95% of production (2021 net production) from Organization for Economic Co-operation and Development (“OECD”) nations; and

1P SEC reserves of 2,323 MMboe as at 31 December 2021.

[Table of Contents](#)

Figure 1 - Merged Group production mix by type and region for the 12 months ended 31 December 2021

- (1) Combined Woodside and BHP Petroleum production for the 12 months ended 31 December 2021, excluding Algeria and Neptune production. Totals may not add up due to rounding.

Strong combination of high growth, margins and reserves life

Strong combination of high quality assets which are high-growth, high-margin, and long-life underpin the value proposition of the Merged Group.

Complementary combined portfolio cash flows expected to fund shareholder returns and business evolution during the energy transition

Strong Adjusted Operating Cash Flow at a long term \$65 Brent oil price (real 2022) is expected to support returns to Woodside Shareholders over time. Woodside expects to maintain its focus on disciplined growth investment and continued dividends in line with its stated dividend policy of a minimum of 50% of net profit after tax excluding non-recurring items in dividends. The net profit after tax basis helps preserve cash and protect the balance sheet in periods of low commodity pricing. The Woodside Board's dividend payout ratio target is between 50% to 80% of net profit after tax, excluding non-recurring items, subject to market conditions and investment requirements.

Strong growth profile and capacity to pursue competitive oil and gas projects as well as lower-carbon growth options within the portfolio.

Woodside believes that the proposed Merger will deliver expanded growth optionality with the flexibility to phase and selectively progress near and longer term lower-carbon options and high-return options:

Final investment decisions have been made in relation to the Scarborough and Pluto Train 2 developments, including new domestic gas facilities and modifications to Pluto Train 1.

Table of Contents

The Mad Dog Phase 2 (U.S. GOM), Shenzi North (U.S. GOM) and Sangomar Oil Field Development Phase 1 (Senegal) projects remain on budget and on track, and along with significant expansion options, provide opportunity for near- and medium-term growth.

Longer term embedded options include Wildling (U.S. GOM), Trion (Mexico), Calypso (T&T) and Browse (Western Australia) projects. These options offer significant potential growth coupled with multiple exploration and new energy opportunities and partnerships, including H2Perth, H2TAS, H2OK and Heliogen.

Proven management and technical capability from both companies

The Merged Group will benefit from the joint management and technical petroleum expertise of both companies, led by Meg O' Neill as the Chief Executive Officer and Managing Director.

Woodside believes that the Merged Group will combine leading health, safety, environment and quality ("HSEQ") performance, LNG production and marketing, deep water oil development and production, exploration expertise, and international experience thereby creating a differentiated set of capabilities in the Merged Group. These capabilities are expected to be further supplemented through investments in technology and lower-carbon solutions and strong governance systems.

It is intended that the Woodside Board will select a current BHP director to be appointed to the Woodside Board following Implementation.

Shared values and focus on sustainable operations, carbon management and ESG leadership

Woodside intends to continue to have a strong focus on pursuing safe, sustainable and reliable operations, building on Woodside's and BHP's strong track records.

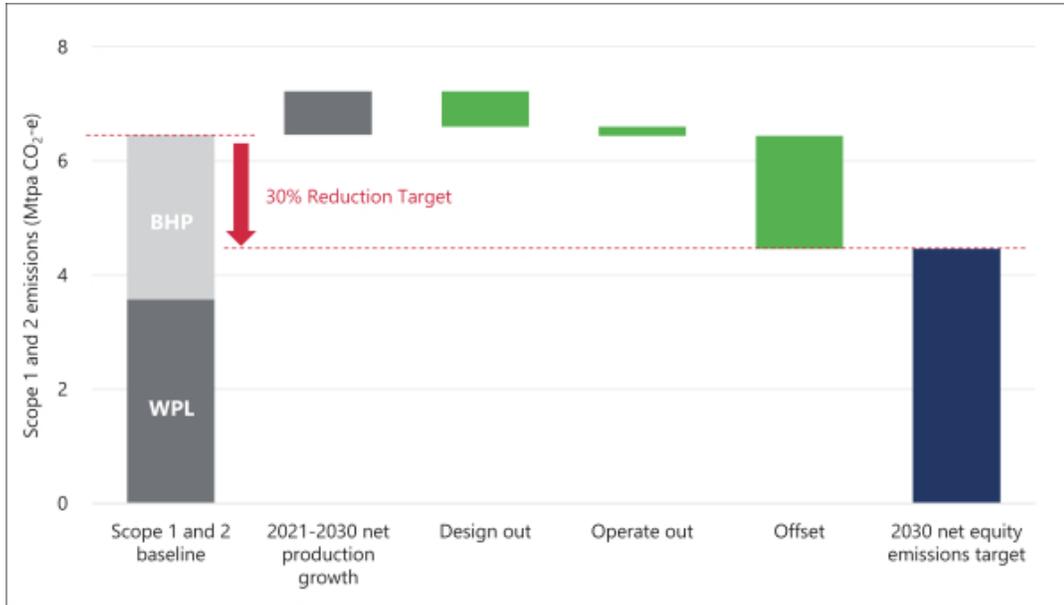

Woodside also plans to build on Woodside's existing targets for the Merged Group to reduce net equity Scope 1 and Scope 2 emissions by 15% and 30% by 2025 and 2030 respectively, as compared against the gross 2016-2020 annual average baseline. Woodside's climate strategy is composed of reducing its net equity Scope 1 and 2 greenhouse gas emissions, and investing in the products and services that are intended to help customers reduce their emissions.

Woodside intends to set emissions reduction targets on an equity basis. This ensures that the scope of emissions reduction targets is aligned with the actual footprint of the Merged Group's investments and its expected use of offsets. Equity emissions reflect the greenhouse gas emissions from operations according to the Merged Group's share of equity in the operation. The equity share reflects economic interest, which is the extent of rights a company has to the risks and rewards flowing from an operation. Woodside intends to set its emissions reduction targets for the Merged Group on a net basis, allowing for both direct emissions reductions from their operations, as well as emissions reductions achieved from the use of offsets.

Woodside will focus on optimizing value and shareholder returns and intends to build and maintain a lower-carbon, resilient and diversified portfolio which includes oil, natural gas and new energy technologies. The Merged Group is expected to generate significant cash flow this decade that could be used in part to support the development of new energy products and lower-carbon solutions including hydrogen, ammonia and carbon capture and storage ("CCS").

[Table of Contents](#)

Figure 2 - Merged Group's net equity scope 1 and 2 greenhouse gas emission reduction targets

- (1) Target is for net equity Scope 1 and 2 greenhouse gas emissions, relative to a starting base of the gross annual average equity Scope 1 and 2 greenhouse gas emissions over 2016-2020, and may be adjusted (up or down) for potential equity changes in producing or sanctioned assets with an FID prior to 2021. Post-Implementation of the Merger (which remains subject to conditions including regulatory approvals), the starting base will be adjusted for the then combined Woodside and BHP Petroleum portfolio.
- (2) This chart shows indicative design out, operate out and offset emissions reductions to achieve Merged Group's net equity Scope 1 and 2 greenhouse gas emissions targets in 2030. The values do not represent cumulative abatement over the period leading up to those years.

See the section entitled "*Business and Certain Information About Woodside-ESG*" for more information on the Merged Group's emission targets.

Synergies and benefits

The combination of highly complementary asset portfolios through the Merger is expected to unlock material synergies.

Woodside has undertaken comprehensive integration planning work and has identified pre-tax synergies that are expected to be in excess of \$400 million per annum (100% basis, pre-tax).

Woodside expects to realise the annual synergies through a combination of corporate, operations, exploration and development activities.

See the sections entitled "*Business and Certain Information About the Merged Group-Potential Synergies and Value Creation*" and "*Cautionary Statement Regarding Forward-Looking Statements.*"

Greater financial resilience

Upon Implementation, the Merged Group's balance sheet is expected to be strengthened by the resilience the merged portfolio delivers through the commodity and investment cycle.

Table of Contents

Based on the pro forma combined financial performance of Woodside and BHP Petroleum for the 12 months to 31 December 2021, the Merged Group is expected to have:

pro forma revenue of approximately \$12.5 billion;

pro forma cash flows from operating activities of approximately \$6.1 billion supported by resilient foundation assets;

pro forma liquidity position of approximately \$7.1 billion, consisting of pro forma cash and cash equivalents of approximately \$4.0 billion and undrawn debt facilities of \$3.1 billion; and

pro forma balance sheet with low Gearing of approximately 8%.

Woodside believes that the Merger will create a larger, more resilient company, better able to navigate the energy transition than either Woodside or BHP Petroleum would achieve without the Merger. The Merger is expected to provide long-term value and unlock synergies in how these assets are managed.

Further detail on the profile of the Merged Group can be found in the section entitled “*Business and Certain Information About the Merged Group.*”

BHP’ s Reasons for the Merger

BHP regularly reviews its portfolio to improve its asset base and optimize capital allocation decisions. In 2021, BHP undertook a strategic review of its petroleum business, including evaluating opportunities to divest its petroleum business to one or more buyers in one or more series of transactions or via a demerger into a newly listed entity. While a demerger would result in a strong and financially viable standalone entity, the BHP Board determined that the Merger was the best alternative for shareholders.

BHP believes that the Merger will deliver substantial value creation for BHP Shareholders. Through the combination of two high-quality asset portfolios, the Merged Group is expected to have a high margin oil portfolio, long life LNG assets and the financial resilience to help supply the energy needed for global growth and development over the energy transition. The combined portfolio is also expected to unlock material synergies for shareholders. It will also enable a greater allocation of capital in the portfolio to be directed towards future facing commodities and enhanced shareholder returns.

The Merger also provides BHP Shareholders choice about how to weight their exposure to the different investment propositions of BHP (excluding BHP Petroleum) and oil and gas through Woodside (including BHP Petroleum).

This discussion of BHP’ s reasons for the Merger is forward looking in nature and should be read in light of the factors discussed in the sections entitled “*Cautionary Statement Regarding Forward-Looking Statements*” and “*Risk Factors.*”

Woodside’ s Board Recommendation

A majority of the Woodside Board must recommend that Existing Woodside Shareholders vote in favor of the Merger subject to the Independent Expert concluding (and continuing to conclude) that the Merger is in the best interests of Existing Woodside Shareholders. Woodside must ensure that half or more of the Woodside Board do not change, withdraw or qualify their recommendation to vote in favor of the Merger, unless:

the Independent Expert concludes (including in any updated report) that the Merger is not in the best interests of Existing Woodside Shareholders; or

the Woodside Board agrees to, or supports, a “Woodside Superior Proposal” (as that term is defined in the Share Sale Agreement).

[Table of Contents](#)

Independent Expert Conclusion

To assist Existing Woodside Shareholders with their assessment of the Merger and their consideration as to whether to vote in favor of the Merger Resolution, Woodside appointed the Independent Expert to prepare the Independent Expert's Report. The Independent Expert's Report was delivered on 8 April 2022.

The Independent Expert's Report has been prepared under applicable Australian laws and has been prepared in accordance with prevailing Australian requirements and standards. These requirements and standards may be materially different than those prevailing in the United States. The Independent Expert's Report does not purport to meet any requirements of any United States law or regulation.

Woodside selected the Independent Expert based on KPMG Financial Advisory Services (Australia) Pty Ltd's qualifications, expertise, reputation and because its professionals have substantial experience in comparable transactions. The Independent Expert did not determine the amount of consideration to be paid in the Merger and did not recommend the amount of consideration to be paid.

The Independent Expert is a global financial services firm engaged in audit, tax, consulting and advisory services. The Independent Expert and its related entities did not have at the date of its report, and have not had within the previous two years, any shareholding in or other relationship with Woodside (and associated entities) that could reasonably be regarded as capable of affecting its ability to provide an unbiased opinion in relation to the Merger. The Independent Expert has no involvement with, or interest in the outcome of the transaction, other than the preparation of the Independent Expert's Report. The Independent Expert will receive a fee based on commercial rates for the preparation of reports of a similar nature. This fee is not contingent on the outcome of the transaction. The Independent Expert's out of pocket expenses in relation to the preparation of the report are also recovered at a fixed rate of total professional fees. The Independent Expert will receive no other benefit for the preparation of this report.

Pursuant to the Independent Expert's Report, and for the reasons and upon the bases stated therein, the Independent Expert has concluded:

that the Merger is in the best interests of Woodside Shareholders, in the absence of a superior offer; and

the aggregate 52% interest that Existing Woodside Shareholders will hold in the Merged Group is fair and reasonable from its perspective based on Woodside's contribution to the Merged Group.

The Independent Expert's Report is not intended as an investment recommendation for BHP Shareholders. The Independent Expert's Report is an important document for Existing Woodside Shareholders. A copy of the Independent Expert's Report and the Independent Technical Specialist Report completed by Gaffney Cline & Associates Limited annexed thereto, is filed as an exhibit to the registration statement of which this prospectus is a part.

Woodside Shareholders Meeting

Pursuant to the Share Sale Agreement, and as a Condition to the Implementation of the Merger, Woodside is required to obtain Woodside Shareholder Approval at the Woodside Shareholders Meeting. Pursuant to the Share Sale Agreement, Woodside is required to prepare and dispatch an explanatory memorandum and notice of meeting to convene the Woodside Shareholders Meeting for the purpose of approving the Merger. Woodside is further required pursuant to the Share Sale Agreement to include in the explanatory memorandum and notice of meeting, a statement by at least the majority of the Board recommending that Existing Woodside Shareholders vote in favor of the Merger Resolution (subject to customary exceptions).

Accounting Treatment

The unaudited pro forma condensed combined statement of profit and loss and the unaudited pro forma condensed combined statement of financial position were prepared in accordance with Article 11 of Regulation

Table of Contents

S- X (“Article 11”). The unaudited pro forma condensed combined statement of cash flows has been prepared based on the historical combined statements of cash flows of Woodside and BHP Petroleum. Certain transaction accounting adjustments have been made in order to show the effects of the Merger on the combined historical financial information of Woodside and BHP Petroleum.

The unaudited pro forma condensed combined financial statements have been prepared using the acquisition method of accounting for business combinations, with Woodside treated as the acquirer. Under the acquisition method of accounting, Woodside will record all assets acquired and liabilities assumed from BHP with respect to BHP Petroleum at their respective fair values as of the Implementation of the Merger. The acquisition method of accounting is dependent upon certain valuations and other studies that have yet to commence or progress to a stage where there is sufficient information for a definitive fair value measure. The sources and amounts of transaction expenses may also differ from those assumed in the following pro forma adjustments. Accordingly, the pro forma adjustments are preliminary, have been made solely for the purpose of providing the pro forma financial statements, and are subject to revision based on a final determination of fair values as of the Implementation of the Merger. Differences between these preliminary estimates and the final acquisition accounting may have a material impact on the accompanying pro forma financial statements and Woodside’s future results of operations and financial position. The unaudited pro forma condensed combined financial statements are provided for illustrative purposes only and are not intended to represent or be indicative of the results of operations or the financial position that would have been recorded had the Merger been Implemented as of the dates presented and should not be taken as representative of Woodside’s future results of operations or the financial position. The unaudited pro forma condensed combined financial statements do not reflect the impacts of any potential operational efficiencies, asset dispositions, cost savings or economies of scale that they may be achieve with respect to the combined operations. See the section entitled “*Unaudited Pro Forma Condensed Combined Financial Statements.*”

Interests of Certain Directors and Executive Officers of the Woodside Board

In considering the recommendation of the Woodside Board to the Existing Woodside Shareholders relating to the vote to approve the Merger, Woodside Shareholders should be aware that aside from their interests as Woodside Shareholders, as applicable, certain Directors and executive officers of Woodside may have interests in the Merger that are different from, or in addition to, those of Existing Woodside Shareholders generally. These interests may present such Directors and executive officers with actual or potential conflicts of interests, and these interests, to the extent they may be substantial, are described below. See the section entitled “*Executive Compensation*” for additional information.

Interests of Woodside’s Directors and other Key Management Personnel

As of the date of this prospectus, Woodside Directors and other KMPs (as defined below), including their personally related entities, do not hold any interests, directly or indirectly, by security holdings or otherwise, that would be considered material in BHP or any interests whatsoever in BHP Petroleum or the subsidiaries of those entities.

Interests of BHP’s Directors and Executive Officers in the Merger

It is intended that the Woodside Board will select a current BHP director to be appointed to the Woodside Board following Implementation. See the section entitled, “*Board of Directors and Management of the Merged Group after the Merger-Members of the Executive Committee of the Merged Group*” for further information.

In addition, if a director or executive officer of BHP owns BHP Shares, such director or executive officer will have the right to participate in the Merger in respect of those BHP Shares on the same terms as other BHP Shareholders.

Table of Contents

Federal Securities Law Consequences; Resale Restriction

New Woodside Shares and New Woodside ADSs issued in the Merger will not be subject to any restrictions on transfer arising under the Securities Act, except for New Woodside Shares and New Woodside ADSs issued to any person who may be deemed to be an “affiliate” of Woodside under the Securities Act.

No Dissenter’s Right of Appraisal or Rights of Appraisal

Under Australian law, neither Woodside Shareholders nor BHP Shareholders are entitled to any appraisal or dissenters’ rights in connection with the Merger.

THE SHARE SALE AGREEMENT AND RELATED AGREEMENTS

The Share Sale Agreement

On 22 November 2021, Woodside and BHP entered into the Share Sale Agreement on the key terms set out below to give effect to the Merger.

Overview

Pursuant to the Share Sale Agreement, BHP agreed to sell and Woodside agreed to buy the entire issued share capital of BHP Petroleum International Pty Ltd in exchange for the Purchase Price, including the Share Consideration consisting of New Woodside Shares, comprising approximately 48% of all Woodside Shares (on a post-issue basis). These New Woodside Shares will be issued by Woodside to BHP to be distributed to BHP Shareholders (or the Sale Agent in the case of all Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders).

The Effective Time of the Merger under the Share Sale Agreement will be 11:59 p.m. AEST on 30 June 2021, with contractual mechanics giving Woodside and BHP economic outcomes as if 100% of the shares in BHP Petroleum International Pty Ltd had been acquired by Woodside at the Effective Time.

Conditions

Under the Share Sale Agreement, Implementation is conditional upon the satisfaction (or, where permitted, the waiver) of certain Conditions by 30 June 2022 (or an agreed later date). The following table summarizes certain Conditions, the party that may waive such Condition and the status of such Condition:

| Condition | Party that may waive | Status |
|--|--|---------------|
| FIRB Approval: BHP obtaining approval from FIRB if BHP determines (acting reasonably) that it will likely be required in connection with the Merger. | BHP (only if BHP determines that approval is not required to implement the transaction) | Waived by BHP |
| ACCC Approval: Woodside being advised by the ACCC that it does not object to, or propose to take any action in relation to, the Merger. | BHP and Woodside (only if both parties agree in writing that the condition is no longer required to implement the transaction) | Satisfied |
| NOPTA Approval: Woodside obtaining approval from NOPTA to Implement the Merger. | Cannot be waived | Outstanding |
| Woodside Shareholder Approval: Woodside Shareholders approving the Merger Resolution. | BHP and Woodside (by written agreement) | Outstanding |
| ASIC, ASX, SARB and JSE: BHP and Woodside obtaining all relief, waivers, confirmations, exemptions, consents or approvals and doing all other acts necessary, or which BHP or Woodside (both acting reasonably) desire, from ASIC, ASX, SARB and JSE to Implement the Merger. | Cannot be waived | Outstanding |

Table of Contents

| <u>Condition</u> | <u>Party that may waive</u> | <u>Status</u> |
|--|--|---------------|
| HSR Act Clearance: Expiration of the waiting period under the HSR Act or earlier termination without challenge by the U.S. Department of Justice or the Federal Trade Commission (“FTC”). | BHP and Woodside (only if both parties agree in writing that the condition is no longer required to implement the transaction) | Satisfied |
| CFIUS Approval: Woodside obtaining certain notices from CFIUS permitting the Merger. | Cannot be waived | Satisfied |
| Official Quotation: Woodside not receiving an indication from the ASX that it will not grant permission for the official quotation of the New Woodside Shares. | Cannot be waived | Outstanding |
| Independent Expert’s Report: Independent Expert issuing an Independent Expert’s Report concluding the Merger is in the best interests of Woodside Shareholders, and such conclusion is not changed or withdrawn before the Woodside Shareholder Approval is obtained. | Woodside | Outstanding |
| Restructure: BHP completing the Restructure, being the transfer, liquidation or removal of certain entities from BHP Petroleum. | BHP and Woodside (by written agreement) | Outstanding |
| U.S. Registration Statements: This registration statement on Form F-4 and the F-6 Registration Statement being filed by Woodside relating to the New Woodside Shares and the New Woodside ADSs, respectively, are declared effective by the SEC, no issuing of a stop order suspending the effectiveness of those registration statements and no commencement by the SEC of proceedings for that purpose. | BHP and Woodside (by written agreement) | Outstanding |
| Other Competition Approvals: Woodside obtaining competition clearance in relation to the Merger from the relevant authorities in T&T, the People’s Republic of China, Japan, Mexico, Barbados and Vietnam. | BHP and Woodside (only if both parties agree in writing that the condition is no longer required to implement the transaction) | Satisfied |
| No Injunction or Order: No court or governmental agency enacting, issuing, promulgating, enforcing or entering any law or governmental order that restrains, enjoins or otherwise prohibits Implementation of the Merger and all regulatory approvals being in full force and effect. | BHP and Woodside (only if both parties agree in writing that the condition is no longer required to implement the transaction) | Outstanding |

Purchase Price

The Purchase Price payable by Woodside for the acquisition of BHP Petroleum includes the issue of the Share Consideration to BHP, such that ultimately the Share Consideration is held by BHP Shareholders (or the Sale Agent in the case of all Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders).

Table of Contents

The Share Consideration will be supplemented by the Woodside Dividend Payment, being in effect the payment to BHP of a cash amount at Implementation representing the cash dividend that would have been received (post Effective Time and pre-Implementation) by holders of the Share Consideration if they had been issued the Share Consideration at the Effective Time.

To give effect to the Effective Time principle, BHP will be required to pay Woodside the Locked Box Payment, being a payment at Implementation representing the net cash flow generated by BHP Petroleum following the Effective Time (or, if that amount were negative, Woodside will be required to make a cash payment to BHP at Implementation).

Distribution of New Woodside Shares

BHP must declare or determine a dividend, initiate a reduction of capital or pursue a combination of the two (as determined by BHP) in order to facilitate the distribution of the New Woodside Shares to BHP Shareholders (or to the Sale Agent on account of Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders). The New Woodside Shares that are otherwise attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders will be transferred to the Sale Agent to be sold, with the net proceeds from that sale of New Woodside Shares to be paid to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders in lieu of the receipt of New Woodside Shares under the Merger. The Share Sale Agreement contains certain mechanical arrangements to facilitate dealing with Ineligible Foreign BHP Shareholders and BHP's ADR program.

For so long as BHP holds the New Woodside Shares (if at all), BHP undertakes not to dispose of (otherwise than in accordance with the Share Sale Agreement) or exercise voting power in respect of the New Woodside Shares.

For additional information see the section entitled "*Description of Woodside Shares.*"

Merger Implementation and Pre-Implementation Conduct Provisions

Woodside and BHP must use reasonable endeavours to comply with and take all necessary steps and exercise all rights necessary to Implement the Merger, in accordance with certain timetable requirements as set out in the Share Sale Agreement. Woodside and BHP may agree to any necessary extension to the timetable to ensure the relevant steps are completed as soon as reasonably practicable.

In circumstances where various specified critical separation activities will not be completed prior to the anticipated date for Implementation, Woodside and BHP must negotiate in good faith and act reasonably to agree actions to enable completion of such activities or determine any necessary transitional arrangements that would otherwise enable Implementation to occur. Failing such agreement, both Woodside and BHP have the right to defer Implementation (to no later than 1 August 2022) as is necessary to allow such activities to complete or to develop transitional arrangements that would otherwise enable Implementation to occur.

Woodside and BHP have agreed to take a variety of steps to assist the other with the Merger, and to generally advance and Implement the Merger and associated matters. Woodside and BHP each give certain commitments in relation to, among other things, engagement with regulatory bodies, provision of information in connection with the preparation of public documents and the facilitation of listings on securities exchanges.

Until Implementation, Woodside must carry on, and BHP must ensure that BHP Petroleum carries on, their respective businesses in the ordinary and normal course, unless otherwise permitted or required under the Share Sale Agreement.

BHP has also undertaken to, among other things, complete the Restructure (as further described in the following section), to eliminate certain intra-group funding arrangements and take all prescribed separation steps, including complying with the ITSA (summarized in the section below entitled "*The Integration and Transition*")

Table of Contents

Services Agreement”). Woodside and BHP have agreed, subject to applicable laws, to work together and plan for Implementation of the Merger.

Woodside and BHP have also agreed to customary wrong pockets provisions, to ensure that Woodside obtains the benefit of assets relating to the BHP Petroleum business and BHP retains the benefit of assets relating to BHP’s other businesses.

Woodside and BHP have identified material contracts, consents and authorizations of BHP Petroleum which contain change of control provisions, unilateral termination rights, notification rights, pre-emptive rights or tag-along rights which may be required by, triggered by or exercised in response to, Implementation of the Merger. Woodside and BHP will take the agreed course of action in connection with the obtaining of consents or confirmations under these identified contracts, consents and authorizations in relation to the Merger. Provided that BHP has complied with its obligations under the Share Sale Agreement in relation to obtaining such consents or confirmations, a failure by BHP to obtain such consents or confirmations (or the exercise of a termination or pre-emptive right by a counterparty) will not result in a claim by Woodside against BHP under the Share Sale Agreement, delay or prevent Implementation, nor result in an adjustment to the Purchase Price.

Prior to Implementation Woodside must take all reasonably necessary actions to allow any bank guarantees, indemnities, guarantees or similar support given by members of BHP (other than BHP Petroleum) to a third party, to the extent that they relate to the existing obligations of BHP Petroleum, to be released by having Woodside provide replacement support. If such arrangements have not been replaced by Implementation, Woodside must indemnify BHP and the relevant members of BHP in respect of such arrangements.

Warranties and Indemnities

BHP has given certain warranties regarding BHP Petroleum’s business in favor of Woodside, including in respect of title and capacity, corporate group structure, accounts, business records, ownership of assets, petroleum titles, material contracts, environmental matters, real property, information technology, intellectual property, litigation and authorizations, anti-bribery and corruption, divested, non-oil and gas operations and relinquished assets, sanctions and export controls, employees, solvency, insurance, taxes and duties and disclosure materials.

Woodside has given certain warranties regarding its business in favor of BHP which are generally consistent with (but more limited than) the warranties given by BHP.

Woodside and BHP have each agreed to indemnify the other against any loss incurred as a result of a breach of warranty. These indemnities are the sole remedy for a breach of warranty under the Share Sale Agreement.

From Implementation, BHP is not liable for any claim relating to certain decommissioning liabilities and environmental liabilities of BHP Petroleum, other than to the extent the relevant loss is or could reasonably otherwise be, subject to a warranty or indemnity claim by Woodside.

Woodside has agreed to indemnify BHP from, among other things:

- decommissioning liabilities and environmental liabilities relating to or arising from BHP Petroleum’s business;
- breaches or contraventions of laws, contracts or authorizations relating to BHP Petroleum; and
- any regulatory action taken in connection with the public documents to be issued by Woodside in relation to the Merger.

BHP has agreed to indemnify Woodside from, among other things:

- any regulatory action taken in connection with the public documents to be issued by BHP in relation to the Merger;

Table of Contents

claims in respect of certain entities and assets (including non-oil and gas operations of BHP Petroleum) that will be restructured out of BHP Petroleum before Implementation (“Excluded / Divested Assets Indemnity”);

claims under certain divestment agreements relating to assets that no longer form part of BHP Petroleum (“Third Party Divestment Claims Indemnity”);

taxes and duties payable or incurred by BHP Petroleum prior to the Effective Time or otherwise in respect of certain assets; and

for the usage as part of the Restructure of U.S. net operating losses of BHP Petroleum, at a rate of \$0.05 per \$1.00 of net operating losses used above \$1.2 billion (“U.S. NOL Indemnity”).

The respective warranties and indemnities arrangements are subject to a customary limitations and qualifications regime, including in respect of time limits, monetary caps, minimum claim thresholds, qualifiers for awareness and disclosed matters, and offsets for other claims and benefits that are available to the party claiming under the warranty or indemnity. The nature and extent of limitations varies depending on the type of claim being made by Woodside against BHP:

claims under the tax indemnity, tax warranties, title and capacity warranties and the U.S. NOL Indemnity must be notified within seven years of Implementation, and are subject to a maximum monetary limit of \$16 billion. All other warranty claims must be notified within 18 months of Implementation and are subject to a maximum monetary limit of \$2.4 billion; and

claims under the Third Party Divestment Claims Indemnity have no notification time limit, while claims under the Excluded / Divested Assets Indemnity must be notified within three years of Implementation. Claims under both of these indemnities are subject to a maximum monetary limit of \$16 billion.

Generally reciprocal arrangements exist in respect of claims made by BHP against Woodside, with the necessary changes.

Exclusivity

Woodside and BHP have agreed to comply with certain exclusivity arrangements from the date of the Share Sale Agreement until Implementation of the Merger (or the earlier termination of the Share Sale Agreement) (the “Exclusivity Period”). During the Exclusivity Period, BHP must not, and must ensure its related persons do not:

solicit, invite, encourage or initiate any inquiry, expression of interest, offer, proposal or discussion by any person in relation to a BHP Competing Proposal;

participate in or continue any negotiations or discussions with respect to any inquiry, expression of interest, offer, proposal or discussion by any person to make a BHP Competing Proposal;

negotiate, accept or enter into, or offer or agree to negotiate, accept or enter into, any agreement, arrangement or understanding regarding a BHP Competing Proposal;

disclose any material non-public information about the business or affairs of BHP Petroleum or its group members to a third party with a view to obtaining, or which would be reasonably expected to encourage, a BHP Competing Proposal; or

communicate to any person an intention of doing any of the above.

The exclusivity commitments (other than the general “no shop” provisions) do not prohibit any action or inaction by BHP or its related persons in relation to a BHP Competing Proposal if compliance with the

Table of Contents

commitments would, in the opinion of the BHP Board, constitute or be reasonably likely to constitute a breach of the duties of the BHP directors provided that:

the BHP Competing Proposal was not brought about by a breach of BHP's exclusivity commitments; and

BHP notifies Woodside of any action or inaction by BHP or its related persons in reliance on this exception.

Woodside has reciprocal exclusivity commitments under the Share Sale Agreement in relation to any actual or potential Woodside Competing Proposal.

Woodside Matching Right

BHP must not enter into any legally binding agreement, arrangement or understanding pursuant to which a third party proposes to undertake or give effect to a BHP Competing Proposal, and must procure that none of the BHP directors change, withdraw or qualify its or their support for the Merger, unless:

the BHP Board acting in good faith and in order to satisfy what the members of the BHP Board consider to be their statutory or fiduciary duties (having received advices from external financial and legal advisers) determines that the BHP Competing Proposal would, or could reasonably be expected to become, a superior proposal for BHP;

BHP has provided Woodside with all terms and conditions of the BHP Competing Proposal (including the price and identity of the third party making the competing proposal);

BHP has given Woodside at least 10 Business Days after the date on which it provided Woodside with the information on the BHP Competing Proposal to provide a matching or superior proposal; and

Woodside has not provided a matching or superior proposal by the expiration of the ten (10) Business Day period.

If Woodside proposes amendments to the Share Sale Agreement that constitute a matching or superior proposal by the expiration of the ten (10) Business Day period and the BHP Board (acting reasonably and in good faith) determines that the Woodside proposal would provide an equivalent or superior outcome for BHP Shareholders as a whole compared with the BHP Competing Proposal, Woodside and BHP must use their best endeavours to agree amendments to the Share Sale Agreement that are reasonably necessary to reflect and implement the revised Woodside proposal as soon as reasonably practicable. BHP must procure that the BHP Board continues to support the Merger (as modified by the revised Woodside proposal).

BHP does not have a right to match a competing proposal made for Woodside.

Reimbursement Fee

Each of Woodside and BHP have agreed to pay the Reimbursement Fee of \$160 million to the other party in certain circumstances.

Woodside must pay the Reimbursement Fee to BHP if:

BHP terminates the Share Sale Agreement as a result of (i) a Woodside Prescribed Occurrence, (ii) a breach of a warranty by Woodside (or a breach of a Woodside warranty would occur at Implementation) and Woodside fails to remedy such breach within ten (10) Business Days, and the loss reasonably expected to follow from the breach would exceed \$500 million, or (iii) a material breach by Woodside of its obligations under the Share Sale Agreement and Woodside fails to remedy such breach;

BHP terminates the Share Sale Agreement as a result of a failure to satisfy a Condition where such failure to satisfy a Condition resulted from a breach of the Share Sale Agreement by Woodside because of a deliberate act or omission by Woodside;

Table of Contents

half or more of the Woodside Board members change, withdraw or qualify their recommendation that Woodside Shareholders vote in favor of the Merger, unless the Independent Expert's Report concludes that the Merger is not in the best interests of Woodside Shareholders (except where that conclusion is due to the existence of a Woodside Competing Proposal), or Woodside is otherwise entitled to terminate the Share Sale Agreement before Implementation; or

a Woodside Competing Proposal is announced before the earlier of the termination of the Share Sale Agreement and 30 June 2022, and within 12 months of the announcement, the third party proponent of the Woodside Competing Proposal enters into an agreement to complete, or completes, certain types of Woodside Competing Proposals.

BHP must pay the Reimbursement Fee to Woodside if:

Woodside terminates the Share Sale Agreement as a result of (i) a "prescribed occurrence" occurring in relation to BHP Petroleum, (ii) BHP breaches a warranty (or a breach of a BHP warranty would occur at Implementation) and fails to remedy such breach, and the loss reasonably expected to follow from the breach would exceed \$500 million, or (iii) BHP materially breaches its obligations under the Share Sale Agreement and fails to remedy such breach;

BHP terminates the Share Sale Agreement as a result of BHP or the majority of the BHP Board announcing an intention, or BHP entering into an agreement, to pursue a superior proposal in relation to BHP Petroleum in circumstances where Woodside has not made a counterproposal, or Woodside has made a counterproposal and the BHP Board (acting reasonably and in good faith) has determined that the counterproposal would not provide an equivalent or superior outcome for BHP Shareholders;

BHP is approached during the Exclusivity Period in respect of a BHP Competing Proposal, and within 12 months of the termination of the Share Sale Agreement, the third-party proponent of the BHP Competing Proposal enters into an agreement to complete, or completes, the BHP Competing Proposal; or

during the Exclusivity Period, BHP announces an intention to effect, or completes, a demerger of BHP Petroleum instead of pursuing the Merger.

The Reimbursement Fee is not payable if the Merger is Implemented.

The Reimbursement Fee is the sole and exclusive remedy available to a party in all circumstances where the Merger is not Implemented.

Termination

The Share Sale Agreement contains customary termination rights for either party, including in relation to the failure of a Condition and for material breach.

In addition:

Woodside has a right to terminate the Share Sale Agreement in the event that there is a reduction of 15% or more of BHP Petroleum's proven and probable reserves calculated in accordance with the Share Sale Agreement (subject to certain exclusions).

BHP has a right to terminate the Share Sale Agreement in the event that a Woodside credit rating on a number of indices is downgraded to Ba1 or BB+ or lower (or a credit rating agency issues an assessment indicating a likely downgrade to those levels after Implementation) or there is a reduction of 15% or more of Woodside's proven and probable reserves calculated in accordance with the Share Sale Agreement (subject to certain exclusions).

Table of Contents

Costs and Expenses

Woodside and BHP have agreed that the costs incurred in connection with the Merger (assuming Implementation) will generally be borne or absorbed by Woodside (either directly or through ownership of BHP Petroleum), other than in respect of the following:

Costs associated with separating BHP Petroleum from the BHP systems, processes and arrangements are to be borne by BHP (without recharge to BHP Petroleum).

Costs and expenses payable to BHP's advisers in respect of advice on the Merger must be borne by BHP.

Any direct costs incurred as a result of, or to give effect to, the Restructure of certain entities outside of BHP Petroleum must be borne by BHP.

As otherwise set out in the ITSA. See the section entitled "*–The Integration and Transition Services Agreement–*" for additional information.

Governing Laws

The Share Sale Agreement is governed by the laws of Victoria, Australia, and Woodside and BHP subject themselves to the exclusive jurisdiction of the courts of Victoria, Australia.

Distribution Entitlement

The value of the Share Consideration will fluctuate with the market price of Existing Woodside Shares. Current share price quotations for Existing Woodside Shares can be obtained from the ASX's website.

Upon Implementation, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022).

Based on the closing price of Woodside Shares on the ASX of A\$22.11 on 19 November 2021, the last trading day before the public announcement of entry into the Share Sale Agreement, and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately A\$4.00 or \$2.91 (converted into dollars based on the exchange rate for such day reported by the RBA of \$0.7274 = A\$1.00) per BHP Share.

Based on the closing price of Woodside Shares on the ASX of A\$21.18 on 16 August 2021, the last trading day before the public announcement of entry into the Merger Commitment Deed, and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately A\$3.83 or \$2.81 (converted into dollars based on the exchange rate for such day reported by the RBA of \$0.7336 = A\$1.00) per BHP Share.

Based on the closing price of Woodside Shares on the ASX of A\$33.20 and the number of BHP Shares outstanding on 24 March 2022, the implied value of the Share Consideration per BHP Share represented approximately A\$6.00, or \$4.48 (converted into dollars based on the exchange rate for such day reported by the RBA of \$0.7473 = A\$1.00).

Distribution of New Woodside ADSs

The Woodside Shares being distributed to holders of BHP ADSs in the Merger will be deposited with the Woodside Custodian. Upon receipt of confirmation of such deposit, the Woodside Depository will issue and deliver the corresponding New Woodside ADSs to the BHP Depository, subject to payment of the applicable Woodside Depository and BHP Depository fees, taxes and expenses. The BHP Depository has confirmed that it will distribute such New Woodside ADSs to holders of BHP ADSs as of the ADS Distribution Record Date.

Table of Contents

pursuant to the terms of the BHP Deposit Agreement. No fractional New Woodside ADSs will be distributed to holders of BHP ADSs. All fractional entitlement to New Woodside ADSs will be aggregated and sold by the BHP Depository and the net cash proceeds (after deduction of applicable fees, taxes and expenses) will be distributed to the BHP ADS holders entitled thereto. The distribution of New Woodside ADSs will be made net of the fees, expenses, taxes and governmental charges payable by holders under the terms of the BHP Deposit Agreement. In order to pay such taxes or governmental charges, the BHP Depository may sell all or a portion of the new Woodside ADSs so distributed.

The BHP Depository will publicly announce the ADS Distribution Record Date for distribution of the New Woodside ADSs to the holders of BHP ADSs. The ADS Distribution Record Date is expected to be 5:00 p.m. (New York City time) on 26 May 2022. This date and time are indicative and subject to change.

Holders of BHP ADSs who wish to hold New Woodside Shares rather than New Woodside ADSs may surrender their BHP ADSs to the BHP Depository for cancellation and withdraw the BHP Shares that their surrendered BHP ADSs represent prior to 5:00 p.m. (New York City time) on 20 May 2022 (such time representing the time at which it is expected that the BHP Depository will restrict cancellations of BHP ADSs and withdrawals of BHP Shares pursuant to the terms of the BHP Deposit Agreement, and subject to payment of taxes and applicable BHP Depository fees and expenses) and hold such BHP Shares at the Distribution Record Date. If so desired, holders of BHP ADSs who hold their BHP ADSs in a brokerage, bank, custodian or other nominee account should promptly contact their broker, bank, custodian or other nominee account to find out what actions are required to instruct their broker, bank or other nominee to cancel the BHP ADSs on their behalf.

For additional information see the section entitled “*Description of Woodside’s American Depositary Shares.*”

Listing of New Woodside ADSs

Woodside has applied to list the Woodside ADSs, including those issued to the Participating BHP Shareholders holding BHP ADSs in connection with the Merger, on the NYSE under the symbol “WDS,” and intends to file the F-6 Registration Statement with the SEC with respect to New Woodside ADSs and to amend and restate the Woodside Deposit Agreement for the Woodside ADR Program to, among other things, reflect Woodside’s status as an SEC reporting company and certain regulatory changes in Australia and in the United States. For additional information see the section entitled “*Description of Woodside American Depositary Shares.*”

Restructure of BHP Petroleum

In connection with the Merger, BHP has undertaken to complete the Restructure involving the transfer of certain entities holding non-oil and gas and/or legacy assets and operations from BHP Petroleum. The entities that will be transferred from BHP Petroleum as part of the Restructure are BHP BK Limited, BHP Billiton Petroleum Great Britain Limited, BHP Mineral Resources Inc., BHP Copper Inc. Resolution Copper Mining LLC, BHP Resolution Holdings LLC, and BHP Capital Inc. The Restructure is required to be completed prior to Implementation in accordance with the Share Sale Agreement

In addition, BHP has undertaken to eliminate certain intra-group funding arrangements, and to take all other prescribed separation steps, prior to Implementation, including complying with the ITSA.

Table of Contents

Letter Agreement with Respect to Certain Matters under the Share Sale Agreement

On 7 April 2022, Woodside and BHP entered into a letter agreement (the “Letter Agreement”) in order to confirm a variety of mechanical matters under the Share Sale Agreement, including in relation to:

the status of the Conditions and the timing of Implementation, to the effect that unless there is a failure of a Condition, the Share Sale Agreement will be deemed unconditional and Implementation will occur on 1 June 2022; and

arrangements for Implementation and the distribution of the Share Consideration, including in relation to the definition of Eligible BHP Shareholder and Small Parcel BHP Shareholders.

The Integration and Transition Services Agreement

Simultaneously with the execution of the Share Sale Agreement, Woodside and BHP entered into the ITSA which provides for the terms under which:

BHP will undertake certain activities to separate BHP Petroleum from BHP prior to Implementation;

Woodside and BHP will undertake activities prior to Implementation to facilitate the integration of BHP Petroleum into Woodside to form the Merged Group on and from Implementation; and

BHP will provide certain transition services to the Merged Group following Implementation of the Merger.

The term of the ITSA shall cease upon the earlier of (i) expiration of the transition period (including any extension) for the transition service with the longest transition period, (ii) completion of the separation of the BHP Petroleum systems from BHP, or (iii) termination of the ITSA in accordance with the early termination provisions of the ITSA (provided that in any case, the term will not continue beyond 12 months post-Implementation). The early termination provisions permit termination of the ITSA (x) by the non-defaulting party (subject to a cure period) in the event of a default with respect to a material condition (which includes obligations with respect to confidential information and intellectual property rights as well as Woodside’s obligation to pay termination service fees) or (y) automatically in the event of termination of the Share Sale Agreement.

The objective of the activities under the ITSA is to, among other things, seek to ensure uninterrupted operations and minimize disruptions of the parties involved, maximize certainty as to operating methodologies in the Merged Group and seek to identify opportunities to improve efficiency and reduce costs of the Merged Group (as compared to the separate cost structures of BHP Petroleum and Woodside prior to Implementation).

BHP is responsible under the ITSA for all activities which are necessary to separate BHP Petroleum from the BHP systems, processes and structures. BHP must use its reasonable endeavours to complete these activities prior to Implementation and complete any carry-over separation activities following Implementation. The ITSA contains a reporting process for monitoring the progress of those separation activities and managing any delays. A specific regime applies in respect of the activities required to separate the systems and data of BHP Petroleum from BHP’s systems and data and integrate such systems and data with Woodside’s systems and data. All costs associated with separation activities shall be borne by BHP (including for any carry-over separation activities), except for costs associated with certain systems and data separation which shall be shared equally by the parties up to \$150 million, following which such costs shall be borne by BHP without contribution by Woodside.

Activities which are required to integrate BHP Petroleum into Woodside on Implementation will be developed, coordinated and undertaken by a team comprised of both Woodside and BHP personnel in accordance with an agreed upon plan and budget.

Table of Contents

Transition services must be developed, scoped and budgeted by the parties as part of the ITSA process. The transition services will then be provided by BHP to the Merged Group following Implementation of the Merger in consideration for the fees payable by Woodside to be agreed upon by the parties in respect of each category of transition service, taking into account, among other things, the prevailing rates of the current BHP services arrangements and on a cost pass-through basis for services performed by third-party contractors. The service term for each transition service must be agreed upon by the parties and extended as may be required and agreed, provided that no transition service shall be performed beyond 12 months post-Implementation.

Scarborough Put Option

On 17 August 2021, Woodside Energy Ltd, Woodside Energy Scarborough Pty Ltd and certain subsidiaries of BHP entered into the Scarborough Put Option Deed relating to the Scarborough, Jupiter and Thebe Projects. Woodside Energy Scarborough Pty Ltd is operator of all three projects. Woodside Energy Scarborough Pty Ltd (“WES”) is the majority stakeholder of the Scarborough Project, with a 73.5% interest, with BHP Petroleum (Australia) Pty Ltd (“BHPP (Australia)”) holding the remaining 26.5% interest. WES and BHPP (Australia) each hold a 50% interest in the Jupiter and Thebe Projects.

Specific terms of the Put Option are as follows:

Woodside grants to BHP an irrevocable option to sell to Woodside its interests in the Scarborough, Jupiter and Thebe Projects, including interests in certain key contracts and petroleum titles.

If BHP exercises the Put Option, Woodside must acquire from BHPP (Australia) its interest in the Scarborough, Jupiter and Thebe Projects in accordance with the terms of the Sale and Purchase Agreement attached to the Scarborough Put Option Deed.

The Put Option must be exercised by BHP after 1 July 2022 and prior to 31 December 2022 and lapses if it is not exercised during this period.

REGULATORY APPROVALS RELATED TO THE MERGER

Overview

To Implement the Merger, Woodside and BHP must make and deliver certain filings, submissions and notices to obtain required authorizations, approvals, consents or expiration of waiting periods from certain governmental antitrust and other regulatory authorities. Under the Share Sale Agreement, Woodside and BHP have agreed to use reasonable endeavors to ensure that the regulatory approvals required under the Share Sale Agreement are satisfied as soon as practicable on or before 30 June 2022 (or an agreed later date), including by responding to each applicable government agency in an appropriate and timely manner. Woodside and BHP are not currently aware of any material governmental filings, authorizations, approvals or consents that are required prior to Implementation other than those described below. All required authorizations, approvals, consents and expiration of waiting periods have occurred or been obtained, as applicable, except for approval by NOPTA in respect of the change of control of various BHP entities as titleholders.

FIRB

BHP has determined that the approval of FIRB is not required to Implement the Merger, and has waived this Condition.

ASIC

BHP has obtained relief from ASIC, conditional on Woodside Shareholders voting in favor of the Merger Resolution, so that the takeover provisions of the Corporations Act will not apply to the New Woodside Shares issued as Share Consideration to BHP and held momentarily by BHP before being distributed to BHP Shareholders (and transferred to the Sale Agent in the case of all New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders). Additionally, BHP has obtained relief from ASIC in connection with the sale facility. ASIC has also granted relief to Woodside, conditional on Woodside Shareholders voting in favor of the Merger Resolution, in relation to the technical application of section 606 of the Corporations Act to Woodside, resulting from the operation of certain contractual rights in the Share Sale Agreement to the Share Consideration.

ASX

ASX Listing Rule 11.1 gives the ASX discretion to require an entity making a significant change to the nature or scale of its activities to obtain shareholder approval in respect of the change, or to meet the requirements in Chapters 1 and 2 of the ASX Listing Rules as if it were applying for admission to the official list of the ASX. ASX has given in-principle advice to Woodside and BHP (as appropriate) that:

ASX Listing Rule 11.1.2 does not require Woodside or BHP to obtain shareholder approval of the Merger;

ASX Listing Rule 11.1.3 does not require Woodside or BHP to meet the requirements in Chapters 1 and 2 of the ASX Listing Rules;

Woodside Shareholders that also hold BHP Shares will not be precluded from voting on the Merger Resolution; and

ASX Listing Rule 10.11 does not preclude any Woodside Director who holds BHP Shares from receiving New Woodside Shares without a separate shareholder approval.

JSE

The approval of the JSE and the South African Reserve Bank (“SARB”) is required in connection with BHP’s distribution of the Share Consideration to BHP Shareholders that hold their BHP Shares through the

Table of Contents

JSE. BHP has obtained the requisite approvals from the JSE and SARB permitting the distribution, including in relation to the treatment of BHP Shareholders holding BHP Shares through JSE as Ineligible Foreign BHP Shareholders.

NOPTA

The *Offshore Petroleum and Greenhouse Gas Storage Act 2006* (Cth) was amended in September 2021 to, among other things, introduce a requirement for approval by NOPTA in respect of a change of control of a titleholder, which became effective on 2 March 2022. Closing of the transaction is conditional on NOPTA's approval being obtained by Woodside (to the extent required) either unconditionally or conditionally (including any undertakings) that are acceptable to Woodside and BHP (acting reasonably). As Implementation will occur after 2 March 2022, the approval of NOPTA is required in respect of the change of control of various BHP entities as titleholders. Woodside submitted the relevant applications and is continuing to engage with NOPTA on this process.

Australia Antitrust Laws

The *Competition and Consumer Act 2010* (Cth) prohibits any acquisition of shares or assets that has the effect or is likely to have the effect of substantially lessening competition in any Australian market. Australia's merger control regime is voluntary. Woodside and BHP made submissions seeking informal clearance from the ACCC on 1 October 2021. Following these submissions, the ACCC commenced a public review of the transaction. On 16 December 2021, the ACCC confirmed that it would not oppose the transaction.

China Antitrust Laws

Under the Anti-Monopoly Law of the People's Republic of China and the Provisions of the State Council on Thresholds for Prior Notification of Concentrations of Undertakings, the Merger requires a mandatory filing with the State Administration of Market Regulation ("SAMR"). Implementation of the Merger is conditional on such filing being completed and SAMR's approval being obtained. On 20 December 2021, the Merger was filed with SAMR. On 28 January 2022, SAMR officially accepted the Merger filing. On 8 February 2022, SAMR issued its decision not to proceed with further review of the Merger, meaning the parties are free to Implement the Merger from SAMR's perspective as of 8 February 2022.

Trinidad and Tobago Antitrust Laws

Pursuant to the Fair Trading Act of Trinidad & Tobago, the Merger requires a mandatory filing with the Trinidad & Tobago Fair Trading Commission ("T&T FTC"). Implementation of the Merger is conditional on such filing being completed and T&T FTC's approval being obtained. On 15 December 2021, an application on the Merger was filed with the T&T FTC. On 29 December 2021, the T&T FTC informed the parties that their application was complete, and the T&T FTC's review period commenced. On 18 February 2022 the T&T FTC approved the transaction without conditions.

Mexico Antitrust Laws

Under the Federal Law on Economic Competition, the Merger requires a mandatory filing with the Federal Economic Competition Commission ("COFECE"). Implementation of the Merger is conditional on such filing being completed and COFECE's approval being obtained. On 7 January 2022, the Merger was filed with COFECE. On 14 March 2022, COFECE granted clearance of the Merger.

Japan Antitrust Laws

Pursuant to the Act on Prohibition of Private Monopolization and Maintenance of Fair Trade, as amended, the Merger requires a mandatory filing with the Fair Trade Commission of Japan ("JFTC"). Implementation of

Table of Contents

the Merger is conditional on such filing being completed and JFTC' s approval being obtained. On 1 February 2022, the Merger was formally filed and accepted by the JFTC. On 16 February 2022, JFTC approval was received when the JFTC determined not to issue a notice provided by Article 50, paragraph 1 of the Anti-Monopoly Act in the Plan of the Share Acquisition submitted pursuant to Article 10, paragraph 2 of that act (including a case to which that provision applies pursuant to paragraph 5 of that article).

Vietnam Antitrust Laws

Pursuant to the Law on Competition of Vietnam and Decree 35 on Detailed Regulations for Implementation of the Law on Competition, the Merger requires a mandatory filing with the Vietnam Ministry of Industry and Trade, Vietnam Competition and Consumer Authority or the Vietnam National Competition Committee (as applicable) (“Vietnam Competition Regulator”). Implementation of the Merger is conditional on such filing being completed and the Vietnam Competition Regulator’ s approval being obtained. On 4 January 2022, the Merger was filed with the Vietnam Competition Regulator. On 13 January 2022, the Vietnam Competition Regulator confirmed that the Merger filing was complete. On 15 February 2022, the Vietnam Competition Regulator provided approval by issuing its decision that the Merger is identified as an acquisition and not subjected to the prohibited cases as prescribed in Article 30 of the Law on Competition No.23/2018/QH14.

United States Antitrust Laws

Under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (“HSR Act”), certain acquisitions may not be completed unless notification has been given and information has been furnished to the Antitrust Division of the U.S. Department of Justice (Antitrust Division), and to the Federal Trade Commission (“FTC”), and applicable waiting period requirements have expired or have been earlier terminated. Implementation of the Merger is conditional on satisfying such requirements.

Woodside and BHP filed their respective Hart-Scott-Rodino Notification and Report Forms regarding the Merger with the FTC and Antitrust Division on 18 January 2022. The applicable waiting period expired on 17 February 2022, meaning the parties have satisfied their obligations under the HSR Act and are free to close the transaction from a competition perspective in the United States.

Antitrust and Competition Requirements in Other Jurisdictions

Woodside and BHP have assets and turnover in numerous jurisdictions throughout the world in addition to those described above. Many of those jurisdictions have antitrust or competition laws that could require that notifications be filed and clearances obtained prior to Implementation. Other jurisdictions may require filings following Implementation of the Merger. Appropriate filings may be made in those jurisdictions where it is deemed that such a filing is required.

CFIUS

Woodside and BHP sought review of the Merger by the Committee on Foreign Investment in the United States (“CFIUS”) pursuant to Section 721 of the Defense Production Act of 1950, as amended, and the regulations promulgated thereunder (the “DPA”). Woodside and BHP have received a written notice issued by CFIUS that CFIUS has determined that there are no unresolved national security concerns with respect to the Merger, and has concluded all action under the DPA.

MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following describes the material U.S. federal income tax considerations for beneficial owners of BHP Shares or BHP ADSs (together, “BHP Securities”) that are U.S. Holders (as defined below) of the receipt of New Woodside ADSs or New Woodside Shares (together, “Woodside Securities”) pursuant to the Special Dividend and the subsequent ownership and disposition of such Woodside Securities. This discussion applies only to Woodside Securities held as a “capital asset” for U.S. federal income tax purposes (generally property held for investment). This summary is based on the provisions of the Internal Revenue Code of 1986, as amended (the “Code”), U.S. Treasury regulations, any tax treaties, administrative rulings, and judicial decisions, all as in effect on the date hereof, and all of which are subject to change and differing interpretations, possibly with retroactive effect. Woodside cannot assure you that any such change or differing interpretation will not significantly alter the tax considerations described in this discussion. Neither Woodside nor BHP has sought or will seek any rulings from the Internal Revenue Service (the “IRS”) with respect to the statements, positions or conclusions described in the following discussion. Such statements, positions and conclusions are not free from doubt, and there can be no assurance that an applicable tax adviser, the IRS, or a court will agree with such statements, positions, and conclusions. In addition, statements contained herein that Woodside “believes,” “expects,” “intends,” “anticipates,” or other similar phrases are not legal conclusions or opinions of Vinson & Elkins L.L.P. Further, to the extent any statements contained herein relate to BHP, BHP Securities or the Special Dividend, such statements are based upon Woodside’s understanding of the manner in which BHP intends to report the Special Dividend for U.S. federal income tax purposes.

The following does not purport to be a complete analysis of all potential tax effects resulting from the ownership or disposition of Woodside Securities after the Merger, and does not address all aspects of U.S. federal income taxation that may be relevant to individual U.S. Holders in light of their particular circumstances. In addition, this summary does not address the Medicare tax on certain investment income, U.S. federal estate or gift tax laws, any state, local, or non-U.S. tax laws, any tax treaties, or any other tax laws. Furthermore, this summary does not address all U.S. federal income tax considerations that may be relevant to certain categories of U.S. Holders that may be subject to special treatment under the U.S. federal income tax laws, including, but not limited to:

- banks, insurance companies, or other financial institutions;
- tax-exempt or governmental organizations;
- dealers in securities or foreign currencies;
- persons whose functional currency is not the U.S. dollar;
- persons that actually or constructively own five percent or more of any class of Woodside’s stock (by vote or by value);
- corporations that accumulate earnings to avoid U.S. federal income tax;
- traders in securities that use the mark-to-market method of accounting for U.S. federal income tax purposes;
- persons subject to the alternative minimum tax;
- entities or arrangements treated as partnerships or other pass-through entities for U.S. federal income tax purposes or holders of interests therein;
- persons deemed to sell Woodside Securities under the constructive sale provisions of the Code;
- real estate investment trusts;
- regulated investment companies;
- persons that hold Woodside Securities as part of a straddle, appreciated financial position, synthetic security, hedge, conversion transaction, or other integrated investment or risk reduction transaction; or
- U.S. Holders of Woodside Securities prior to the Merger.

Table of Contents

THIS DISCUSSION IS NOT TAX ADVICE. U.S. HOLDERS SHOULD CONSULT WITH, AND RELY SOLELY UPON, THEIR TAX ADVISERS WITH RESPECT TO THE APPLICATION OF U.S. FEDERAL INCOME TAX LAWS (INCLUDING ANY POTENTIAL CHANGES THERETO) TO THEIR PARTICULAR SITUATIONS, AS WELL AS ANY TAX CONSEQUENCES ARISING UNDER ANY OTHER TAX LAWS, INCLUDING, BUT NOT LIMITED TO, U.S. FEDERAL ESTATE OR GIFT TAX LAWS, THE LAWS OF ANY STATE, LOCAL OR NON-U.S. TAXING JURISDICTION, OR ANY APPLICABLE INCOME TAX TREATY.

U.S. Holder Defined

For the purposes of this discussion, the term “U.S. Holder” is used to mean, with respect to BHP or Woodside, respectively, a beneficial owner of BHP Securities or Woodside Securities that, for U.S. federal income tax purposes, is:

an individual who is a citizen or resident of the United States;

a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;

an estate the income of which is subject to U.S. federal income tax regardless of its source; or

a trust (A) the administration of which is subject to the primary supervision of a U.S. court and which has one or more “United States persons” (within the meaning of Section 7701(a)(30) of the Code) who have the authority to control all substantial decisions of the trust or (B) that has made a valid election under applicable U.S. Treasury regulations to be treated as a United States person.

If a partnership (including an entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds BHP Securities or Woodside Securities, the tax treatment of a partner in such partnership might depend upon the status of the partner or the partnership, upon the activities of the partnership and upon certain determinations made at the partnership or partner level. Accordingly, Woodside urges partners in partnerships (including entities or arrangements treated as partnerships for U.S. federal income tax purposes) holding BHP Securities or Woodside Securities to consult with, and rely solely upon, their own tax advisers regarding the U.S. federal income and other tax considerations to them of the matters discussed below.

American Depositary Shares

For U.S. federal income tax purposes, U.S. Holders of BHP ADSs or Woodside ADSs generally should be treated as the beneficial owners of the underlying shares represented by the ADSs and an exchange of ADSs for such underlying shares generally will not be subject to U.S. federal income tax. Throughout the remainder of this discussion, any reference to a holder of Woodside Shares or BHP Shares, respectively, is assumed to include holders of Woodside ADSs or BHP ADSs.

Material U.S. Federal Income Tax Considerations for U.S. Holders of BHP Securities with Respect to the Receipt of New Woodside Shares Pursuant to the Special Dividend

U.S. Federal Income Tax Consequences of the Special Dividend. Subject to the discussion of passive foreign investment company (“PFIC”) taxation below, a U.S. Holder of BHP Securities must include in its gross income the gross amount of any dividend paid by BHP to the extent of its current or accumulated earnings and profits (as determined for U.S. federal income tax purposes). Distributions in excess of current and accumulated earnings and profits, as determined for U.S. federal income tax purposes, are treated as a non-taxable return of capital to the extent of the U.S. Holder’s basis in BHP Securities, causing a reduction in the U.S. Holder’s adjusted basis in BHP Securities, and thereafter as capital gain. However, BHP does not calculate earnings and profits in accordance with U.S. federal income tax principles. Accordingly, U.S. Holders should expect to treat the entire amount of the Special Dividend as a taxable dividend for U.S. federal income tax purposes.

Table of Contents

The amount of the dividend distribution that U.S. Holders must include in their income will be the fair market value (expressed in U.S. dollars) of the New Woodside Securities as of the date of the distribution of the Special Dividend. A U.S. Holder must also include any foreign tax withheld from the dividend payment in the gross amount of the dividend even though the shareholder does not in fact receive the amount withheld. The dividend is taxable to a U.S. Holder when the U.S. Holder receives the dividend, actually or constructively.

Dividends paid to a non-corporate U.S. Holder by certain “qualified foreign corporations” that constitute qualified dividend income are taxable to the shareholder at the preferential rates applicable to long-term capital gains provided that the shareholder holds the BHP Securities for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meets other holding period requirements. For this purpose, BHP Securities will be treated as stock of a qualified foreign corporation if BHP is eligible for the benefits of an applicable comprehensive income tax treaty with the United States or if such BHP Securities are readily tradeable on an established securities market in the United States. The BHP ADSs are listed on the NYSE, and it is expected that BHP will be eligible for the benefits of such a treaty. Accordingly, subject to the discussion of PFIC taxation below, it is expected that the dividends BHP pays with respect to the Special Dividend will constitute qualified dividend income to a non-corporate U.S. Holder, assuming the U.S. Holder’s holding period requirements are met. If such requirements are not satisfied, a non-corporate U.S. Holder may be subject to tax on the dividend at regular ordinary income tax rates instead of the preferential rate that applies to qualified dividend income. Dividends paid to a corporate U.S. Holder will not be eligible for the dividends-received deduction.

The Australian withholding tax consequences of the Special Dividend paid to non-Australian resident Participating BHP Shareholders are outlined in the section entitled “*Material Australian Tax Considerations.*” If Australian dividend withholding tax is payable on the Special Dividend, U.S. Holders should seek their own tax advice to determine the Australian and U.S. taxation implications. Subject to certain limitations, any non-U.S. tax withheld and paid over to a non-U.S. taxing authority (including Australian withholding tax) is eligible for credit against a U.S. Holder’s U.S. federal income tax liability except to the extent a refund of the tax withheld is available to the U.S. Holder under non-U.S. tax law or under an applicable tax treaty. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are taxed at the preferential rates applicable to long-term capital gains. The amount allowed to a U.S. Holder as a credit is limited to the amount of the U.S. Holder’s U.S. federal income tax liability that is attributable to income from sources outside the U.S. and is computed separately with respect to different types of income that the U.S. Holder receives from non-U.S. sources. To the extent a reduction or refund of the tax withheld is available to a U.S. Holder under non-U.S. law or under an income tax treaty, the amount of tax withheld that could have been reduced or that is refundable will not be eligible for credit against the holder’s U.S. federal income tax liability. A U.S. Holder that does not elect to claim a U.S. foreign tax credit may instead claim a deduction for non-U.S. income tax withheld, but only for a taxable year in which the U.S. Holder elects to do so with respect to all non-U.S. income taxes paid or accrued in such taxable year. Dividends will be income from sources outside the U.S. and generally will be “passive category” income for the purpose of computing the foreign tax credit allowable to a U.S. Holder. In general, a taxpayer’s ability to use foreign tax credits may be limited and is dependent on the particular circumstances. U.S. Holders should consult their tax advisers with respect to these matters.

BHP PFIC Considerations. It is expected that the BHP Securities will not be stock of a PFIC for U.S. federal income tax purposes, but this conclusion is based on a factual determination made annually and thus is subject to change. With certain exceptions, a U.S. Holder’s BHP Securities would be treated as stock in a PFIC if BHP were a PFIC at any time during such U.S. Holder’s holding period of the BHP Securities.

If BHP Securities were treated as stock of a PFIC with respect to a U.S. Holder, the U.S. Holder would be liable to pay U.S. federal income tax at the highest applicable income tax rates on any dividend income attributable to the Special Dividend and, potentially, interest on all or a portion of such amount as if such dividend had been recognized ratably over the U.S. Holder’s holding period of the BHP Securities.

Table of Contents

Any dividend income resulting from the Special Dividend would not be eligible for the preferential tax rates applicable to qualified dividend income if BHP were treated as a PFIC in the taxable years in which the dividends are paid or in the preceding taxable year (regardless of whether the U.S. Holder held BHP Securities in such year) but instead would be taxable at rates applicable to ordinary income.

Subject to certain exceptions, BHP would be treated as a PFIC in any taxable year in which, after applying certain look-through rules, either:

- i. at least 75% of its gross income for such taxable year, including its pro rata share of the gross income of any corporation in which it is considered to own at least 25% of the shares by value, consists of passive income (which generally includes dividends, interest, rents and royalties (other than rents or royalties derived from the active conduct of a trade or business) and gains from the disposition of passive assets); or
- ii. at least 50% of its assets in such taxable year (ordinarily determined based on fair market value and averaged quarterly over the year), including its pro rata share of the assets of any corporation in which BHP is considered to own at least 25% of the shares by value, produce or are held for the production of passive income.

Because the determination of whether a foreign corporation is a PFIC is primarily factual and there is little administrative or judicial authority on which to rely to make such a determination, the IRS might not agree that BHP is not a PFIC.

If BHP were later determined to be a PFIC, you may be unable to make certain advantageous elections with respect to your ownership of BHP Securities (including a "mark-to-market" election or a "qualified electing fund" election) that would mitigate the adverse consequences of BHP's PFIC status, or making such elections retroactively could have adverse tax consequences to you. The remainder of this discussion assumes that BHP will not be treated as a PFIC in the taxable year of the Merger or any prior taxable year.

THE PFIC RULES ARE COMPLEX AND UNCERTAIN. U.S. HOLDERS SHOULD CONSULT WITH, AND RELY SOLELY UPON, THEIR TAX ADVISERS TO DETERMINE THE APPLICATION OF THE PFIC RULES TO THEM AND ANY RESULTANT TAX CONSEQUENCES.

Cost base of BHP Securities and Woodside Securities. Given the assumption that the Special Dividend will be treated as a dividend for U.S. federal income tax purposes, it is not expected that the receipt of the Special Dividend should impact a U.S. Holder's basis in its BHP Securities. A U.S. Holder will have an initial tax basis in the Woodside Securities it receives pursuant to the Special Dividend equal to the fair market value (expressed in U.S. dollars) of the New Woodside Securities as of the date of the distribution of the Special Dividend.

Material U.S. Federal Income Tax Considerations for U.S. Holders with Respect to the Ownership and Disposition of Woodside Securities

Woodside PFIC Considerations. Adverse and burdensome U.S. federal income tax rules and consequences apply to U.S. Holders that hold stock in a non-U.S. corporation classified as a PFIC for U.S. federal income tax purposes. In general, Woodside would be treated as a PFIC in any taxable year in which, after applying certain look-through rules, either:

- i. at least 75% of its gross income for such taxable year, including its pro rata share of the gross income of any corporation in which it is considered to own at least 25% of the shares by value, consists of passive income (which generally includes dividends, interest, rents and royalties (other than rents or royalties derived from the active conduct of a trade or business) and gains from the disposition of passive assets); or
- ii. at least 50% of its assets in such taxable year (ordinarily determined based on fair market value and averaged quarterly over the year), including its pro rata share of the assets of any corporation in which

Table of Contents

Woodside is considered to own at least 25% of the shares by value, produce or are held for the production of passive income.

While Woodside does not anticipate becoming a PFIC in the current or future taxable years, there can be no assurance that it will not be a PFIC for any taxable year, as PFIC status is tested each taxable year and depends on the composition of its assets and income in such taxable year. If Woodside is classified as a PFIC for any year during which a U.S. Holder holds Woodside Securities, Woodside will generally continue to be treated as a PFIC for all succeeding years during which such U.S. Holder holds Woodside Securities. Because PFIC status is a fact-intensive determination made on an annual basis and depends on the composition of Woodside's assets and income at such time, no assurance can be given that Woodside is not or will not become classified as a PFIC. If Woodside were later determined to be a PFIC, you may be unable to make certain advantageous elections with respect to your ownership of Woodside Securities (including a "mark-to-market" election or a "qualified electing fund" election) that would mitigate the adverse consequences of Woodside's PFIC status, or making such elections retroactively could have adverse tax consequences to you. Woodside has not sought and will not seek any rulings from the IRS or any opinion from any tax adviser as to such tax treatment, and the closing of the Merger is not conditioned upon achieving, or receiving a ruling from any tax authority or opinion from any tax advisers in regards to, any particular tax treatment. Thus, the anticipated reporting position of Woodside described herein is not free from doubt. Woodside is not representing to you that Woodside will not be treated as a PFIC for the taxable year of the Merger or in any future taxable years.

Consistent with Woodside's expectation, the remainder of this discussion assumes that Woodside will not be treated as a PFIC in the taxable year of the Merger or any subsequent taxable year.

THE PFIC RULES ARE COMPLEX AND UNCERTAIN. U.S. HOLDERS SHOULD CONSULT WITH, AND RELY SOLELY UPON, THEIR TAX ADVISERS TO DETERMINE THE APPLICATION OF THE PFIC RULES TO THEM AND ANY RESULTANT TAX CONSEQUENCES.

Tax Characterization of Distributions with Respect to Woodside Securities. If Woodside pays a distribution in cash or other property to U.S. Holders of Woodside Securities, such distribution generally will constitute a dividend for U.S. federal income tax purposes to the extent paid from current or accumulated earnings and profits as determined under U.S. federal income tax principles. Distributions in excess of current and accumulated earnings and profits will constitute a return of capital that will be applied against and reduce (but not below zero) the U.S. Holder's adjusted tax basis in its Woodside Securities. Any remaining excess will be treated as gain realized on the sale of Woodside Securities and will be treated as in the section entitled "*Gain or Loss on Sale or Other Taxable Exchange or Disposition of Woodside Securities.*" However, because Woodside does not expect to determine its earnings and profits on the basis of United States federal income tax principles, U.S. holders should expect that any distribution paid will generally be reported to them as a "dividend" for U.S. federal income tax purposes.

The amount of any distribution paid in a foreign currency will be equal to the U.S. dollar value of such currency, translated at the spot rate of exchange on the date such distribution is received, regardless of whether the payment is in fact converted into U.S. dollars at that time. If the distribution is converted into U.S. dollars on the date of receipt, a U.S. Holder should not be required to recognize foreign currency gain or loss in respect of the income attributable to such distribution. A U.S. Holder may have foreign currency gain or loss if the distribution is converted into U.S. dollars after the date of receipt. In general, foreign currency gain or loss will be treated as U.S.-source ordinary income or loss.

Distributions Treated as Dividends. Dividends paid by Woodside will be taxable to a corporate U.S. Holder at regular rates and will not be eligible for the dividends-received deduction generally allowed to U.S. corporations in respect of dividends received from other U.S. corporations. Dividends Woodside pays to a non-corporate U.S. Holder generally will constitute a "qualified dividend" that will be subject to U.S. federal income tax at the maximum tax rate accorded to long-term capital gains if Woodside Securities are readily

Table of Contents

tradable on an established securities market in the United States or if Woodside is eligible for certain benefits under the tax treaty between the United States and Australia and certain holding period and other requirements are met, including that Woodside is not classified as a PFIC during the taxable year in which the dividend is paid or a preceding taxable year. If such requirements are not satisfied, a non-corporate U.S. Holder may be subject to tax on the dividend at regular ordinary income tax rates instead of the preferential rate that applies to qualified dividend income. U.S. Holders should consult with, and rely solely upon, their tax advisers regarding the availability of the lower preferential rate for qualified dividend income for any dividends paid with respect to Woodside Securities.

Woodside believes that it currently is, and anticipates continuing to be, eligible for benefits under the tax treaty between the United States and Australia. Under a published IRS Notice, common or ordinary shares, or ADSs representing such shares, are considered to be readily tradable on an established securities market in the United States if they are listed on the NYSE, as the Woodside ADSs are expected to be so listed. However, based on existing guidance, it is unclear whether the shares underlying the ADSs will be considered to be readily tradable on an established securities market in the United States, because only the ADSs will be listed on a securities market in the United States. U.S. Holders are urged to consult with, and rely solely upon, their own tax advisers regarding the availability of the favorable rate applicable to qualified dividend income for any dividends Woodside pays with respect to the ADSs.

Dividends paid with respect to Woodside Securities generally will constitute foreign source income for U.S. foreign tax credit limitation purposes. Subject to certain complex conditions and limitations, any Australian taxes withheld on any distributions on Woodside Securities may be eligible for credit against a U.S. Holder's federal income tax liability or, at such holder's election, may be eligible as a deduction in computing such holder's U.S. federal taxable income. If a refund of the tax withheld is available under the laws of Australia or under the tax treaty between the United States and Australia, as amended, the amount of tax withheld that is refundable will not be eligible for such credit against a U.S. Holder's U.S. federal income tax liability (and will not qualify for the deduction against U.S. federal taxable income). If the dividends constitute qualified dividend income as discussed above, the amount of the dividend taken into account for purposes of calculating the foreign tax credit limitation will generally be limited to the gross amount of the dividend, multiplied by the reduced rate applicable to the qualified dividend income, divided by the highest rate of tax normally applicable to dividends. The limitation on foreign taxes eligible for the credit is calculated separately concerning specific classes of income. For this purpose, dividends distributed by the Woodside with respect to Woodside Securities will generally constitute "passive category income." The rules relating to the determination of the U.S. foreign tax credit are complex, and U.S. Holders are urged to consult with, and rely solely upon, their tax advisers regarding the availability of a foreign tax credit in their particular circumstances and the possibility of claiming an itemized deduction (in lieu of the foreign tax credit) for any foreign taxes paid or withheld.

Withholding tax in Australia. The Australian withholding tax consequences of dividends paid to non-Australian resident shareholders are outlined in the section entitled "*Material Australian Tax Considerations*." If Australian dividend withholding tax is payable on dividends from Woodside, U.S. Holders should seek their own tax advice to determine the Australian and U.S. taxation implications.

Gain or Loss on Sale or Other Taxable Exchange or Disposition of Woodside Securities. Upon a sale or other taxable exchange or disposition of Woodside Securities (including any portion of a distribution by Woodside treated as such per the section entitled "*Tax Characterization of Distributions with Respect to Woodside Securities*"), a U.S. Holder generally will recognize capital gain or loss in an amount equal to the difference between (i) the sum of the amount of cash and the fair market value of any property received in such exchange or disposition and (ii) the U.S. Holder's adjusted tax basis in its Woodside Securities so disposed of. A U.S. Holder's adjusted tax basis in its Woodside Securities generally will equal the fair market value (expressed in U.S. dollars) of the New Woodside Securities as of the date of the distribution of the Special Dividend, less, in the case of a Woodside Security, any prior distributions paid to such U.S. Holder that were treated as a return of capital for U.S. federal income tax purposes. Any such capital gain or loss generally will be long-term capital

Table of Contents

gain or loss if the U.S. Holder held the Woodside Securities for more than one year. Long-term capital gains recognized by non-corporate U.S. Holders will be eligible to be taxed at reduced rates. In addition, the deductibility of capital losses is subject to limitations.

Gain or loss, if any, realized by a U.S. Holder on the sale or other disposition of Woodside Securities generally will be treated as U.S. source gain or loss for U.S. foreign tax credit limitation purposes. The use of U.S. foreign tax credits relating to any Australian tax imposed upon the sale or other disposition of Woodside Securities may be unavailable or limited and may depend upon the application of the tax treaty between the United States and Australia to such U.S. Holder. U.S. Holders are urged to consult with, and rely solely upon, their own tax advisers regarding the tax consequences if Australian taxes are imposed on or connected with a sale or other disposition of Woodside Securities and their ability to credit any Australian tax against their U.S. federal income tax liability.

Australian CGT consequences. Australian capital gains tax (“CGT”) consequences of disposals of New Woodside Shares by U.S. holders are outlined in the section entitled “*Material Australian Tax Considerations—Disposals of Woodside Shares.*” If any tax is payable in Australia on a gain accruing on the disposal of New Woodside Shares, U.S. Holders should seek their own tax advice to determine the Australian and U.S. taxation implications.

Information Reporting and Backup Withholding.

The Special Dividend, dividends with respect to Woodside Securities and proceeds from the sale or exchange of Woodside Securities may be subject, under certain circumstances, to information reporting and backup withholding. Backup withholding will not apply, however, to a U.S. Holder that (i) is a corporation or entity that is otherwise exempt from backup withholding (which, when required, certifies as to its exempt status) or (ii) furnishes a correct taxpayer identification number and makes any other required certification on IRS Form W-9. Backup withholding is not an additional tax. Rather, the U.S. federal income tax liability (if any) of persons subject to backup withholding will be reduced by the amount of tax withheld. If backup withholding results in an overpayment of taxes, a refund generally may be obtained, provided that the required information is timely furnished to the IRS.

Additional Information Reporting Requirements.

Certain U.S. Holders may be required to comply with certain reporting requirements relating to the Woodside Securities with respect to the holding of certain foreign financial assets, including stock of foreign issuers (such as Woodside). Penalties can apply if U.S. Holders fail to satisfy such reporting requirements. U.S. Holders are urged to consult with, and rely solely upon, their own tax advisers regarding the application of these rules to their ownership of the Woodside Securities.

THE FOREGOING DISCUSSION IS NOT TAX ADVICE OR A COMPREHENSIVE DISCUSSION OF ALL U.S. FEDERAL INCOME TAX CONSEQUENCES TO U.S. HOLDERS OF WOODSIDE SECURITIES. SUCH HOLDERS SHOULD CONSULT WITH, AND RELY SOLELY UPON, THEIR OWN TAX ADVISERS TO DETERMINE THE SPECIFIC TAX CONSEQUENCES TO THEM OF THE MERGER AND OF OWNING WOODSIDE SECURITIES FOLLOWING THE COMPLETION OF THE MERGER, INCLUDING THE EFFECT OF ANY U.S. FEDERAL, STATE, LOCAL, NON-U.S., OR OTHER TAX LAWS.

MATERIAL AUSTRALIAN TAX CONSIDERATIONS

Introduction

Set out below is a summary of the Australian income tax, GST and stamp duty implications of the Implementation of the Merger and holding Woodside Shares for Participating BHP Shareholders who:

are residents of Australia for Australian income tax purposes or non-residents of Australia for Australian income tax purposes who do not hold BHP Shares, and will not hold Woodside Shares, through a permanent establishment in Australia; and

hold their BHP Shares (and will hold their Woodside Shares) on capital account.

The summary below is not directed at Woodside Shareholders who are not Participating BHP Shareholders. In addition, the summary below does not apply to Woodside Shareholders who are also Participating BHP Shareholders and who:

hold their BHP Shares (or will hold their Woodside Shares) as revenue assets (which will generally be the case for Participating BHP Shareholders who use their BHP Shares (or will use their Woodside Shares) in carrying on a business of share trading, banking or insurance) or as trading stock, or have acquired BHP Shares (or will acquire their Woodside Shares) for the purpose of on-sale at a profit;

acquired their BHP Shares under any employee share scheme or where Woodside Shares will be acquired pursuant to any employee share scheme;

may be subject to special tax rules, including insurance companies, partnerships, tax exempt organizations, trusts (except where expressly stated), superannuation funds (except where expressly stated) or temporary residents; or

are subject to the "taxation of financial arrangements" provisions in Division 230 of the *Income Tax Assessment Act 1997 (Cth)*. It is noted that Division 230 will generally not apply to the financial arrangements of individuals, unless an election has been made for those rules to apply.

This taxation summary is based on the Australian tax law and administrative practice as it applies at 9:00am AEDT on the date of this prospectus. The comments do not take into account or anticipate changes in Australian tax law, administrative practice or future judicial interpretations of Australian tax law after this time. Future amendments to taxation legislation, or its interpretation by the courts or the taxation authorities, may take effect retrospectively and/or affect the conclusions drawn.

This summary also does not take account of any individual circumstances of any Participating BHP Shareholder and does not constitute tax advice. It does not purport to be a complete analysis of the potential tax consequences of the Implementation of the Merger and the holding of Woodside Shares and is intended as a general guide to the Australian tax implications. Participating BHP Shareholders should seek and rely upon specific advice applicable to their own circumstances from their own financial or tax advisers.

Implementation of the Merger and Receipt of New Woodside Shares by Participating BHP Shareholders

Overview of the Merger

BHP intends to distribute the New Woodside Shares by way of an in-specie dividend (the "Special Dividend").

The Merger is not expected to qualify for demerger tax rollover relief in relation to the Special Dividend. BHP intends to fully frank the Special Dividend. Although the quantum of the Special Dividend will not be known until the date of distribution it will be based on the market value of New Woodside Shares at that time.

The following comments in this section entitled "*Implementation of the Merger and Receipt of New Woodside Shares*" set out the expected Australian income tax, GST and stamp duty consequences of receiving

Table of Contents

the Special Dividend for Participating BHP Shareholders as a result of the Implementation of the Merger. The Australian income tax, GST and stamp duty consequences for Participating BHP Shareholders of holding Woodside Shares, including the receipt of dividends on those shares and the disposal of those shares, are set out in the sections entitled “*Dividends on Woodside Shares*,” “*Disposal of Woodside Shares*” and “*Other Australian Taxes*” below.

Class ruling application

BHP has applied to the Commissioner of Taxation (the “Commissioner”) for a class ruling confirming certain income tax implications of the Implementation of the Merger for Australian resident Participating BHP Shareholders. The final class ruling will be published by the Commissioner shortly after the Implementation of the Merger.

The class ruling application is principally concerned with (i) confirming that demerger tax rollover relief will not be available to Participating BHP Shareholders and (ii) confirming the Australian income tax consequences of the Special Dividend for Participating BHP Shareholders.

The information below outlines the implications for Participating BHP Shareholders in circumstances where demerger tax roll-over relief does not apply and the Special Dividend is being distributed by way of a 100% dividend (subject to the Commissioner’s approval).

Special Dividend

Australian resident shareholders

You should include the amount of the Special Dividend in your assessable income in the income year in which you receive the Special Dividend.

BHP intends to fully frank the Special Dividend and, accordingly, the Special Dividend will have accompanying franking credits.

Generally, provided you are a “qualified person” in relation to the Special Dividend and the Australian Taxation Office (the “ATO”) does not make a determination under the dividend streaming rules to deny the benefit of the franking credits attached to the Special Dividend, you should:

also include the amount of the franking credits attached to the Special Dividend in your assessable income in the income year in which you receive the Special Dividend; and

qualify for a tax offset equal to the amount of the franking credits attached to the Special Dividend, which can be applied against your income tax liability for the relevant income year.

You should be a “qualified person” in relation to the Special Dividend if the “holding period rule” and the “related payments rule” are satisfied. Generally:

to satisfy the “holding period rule,” you must have held your BHP Shares “at risk” for at least 45 days (not including the days of acquisition and disposal) within the period beginning on the day after the day on which you acquired them ending 45 days after they become ex-distribution. This means that once you satisfy the “holding period rule” in relation to a distribution on your BHP Shares you do not need to satisfy it again in relation to those BHP Shares for subsequent distributions, unless you make a “related payment” (refer below); and

under the “related payments rule,” if you are obliged to make a “related payment” (essentially a payment passing on the benefit of the Special Dividend) in respect of the Special Dividend, you must hold your BHP Shares “at risk” for at least 45 days (not including the days of acquisition and disposal) within each period beginning 45 days before, and ending 45 days after, they become ex-distribution.

Table of Contents

To be held “at risk,” you must retain 30% or more of the risks and benefits associated with holding your BHP Shares. Where you undertake risk management strategies in relation to your BHP Shares (e.g., by the use of limited recourse loans, entering into put or call options in relation to your BHP Shares or other derivatives), your ability to satisfy the “at risk” requirement and thus to be a “qualified person” may be affected.

If you are an individual you are automatically treated as a “qualified person” for these purposes if the total amount of the tax offsets in respect of all franked amounts to which you are entitled in an income year does not exceed A\$5,000. This is referred to as the “small shareholder rule.” However, you will not be a “qualified person” under the small shareholder rule if “related payments” have been made, or will be made, in respect of these amounts.

If you are an individual or complying superannuation fund you may be able to receive a cash tax refund from the ATO if the tax offset equal to the franking credits attached to the Special Dividend exceeds the tax payable on your total taxable income.

If you are a company the franking credits attached to the Special Dividend will generally give rise to a franking credit in your franking account. You will not be entitled to a tax refund of the excess franking credits. Rather, the surplus franking credits may be converted to a tax loss which can be carried forward to future years (subject to you satisfying certain loss carry forward rules).

Non-Australian resident shareholders

BHP intends to fully frank the Special Dividend. Accordingly, no part of the Special Dividend should be assessable to you in Australia nor subject to dividend withholding tax.

Cost base and date of acquisition of New Woodside Shares

The first element of the cost base and reduced cost base for each New Woodside Share you acquire on Implementation of the Merger will be equal to the market value of the New Woodside Share at the time of the transfer of New Woodside Shares to you.

For CGT purposes (including the CGT discount) the date you acquire the New Woodside Shares should be the date of the distribution.

Further information will be provided by BHP to assist you in determining the amount of your Special Dividend and cost base for each New Woodside Share as soon as practical following Implementation.

Cost base of BHP Shares

On the basis that demerger tax roll-over relief does not apply, the Special Dividend will have no impact on the cost base and reduced cost base of your BHP Shares.

GST and stamp duty

No GST or Australian stamp duty should be payable by you in relation to the acquisition of New Woodside Shares as a result of the Implementation of the Merger.

Dividends on Woodside Shares

This section entitled “*Dividends on Woodside Shares*” applies to dividends that may be payable by Woodside as distinct from the Special Dividend to be received from BHP under which New Woodside Shares will be received by Participating BHP Shareholders if the Merger is Implemented.

Table of Contents

Australian resident shareholders

If you receive a dividend on Woodside Shares you acquire as a consequence of the Implementation of the Merger then the amount of the dividend will be included in your assessable income in the income year in which you receive the dividend.

Generally, provided you are a “qualified person” (as summarized above) in relation to a dividend received on Woodside Shares and the ATO does not make a determination under the dividend streaming rules to deny the benefit of the franking credits attached to any dividend you receive, you should:

also include an amount equal to the franking credits attached to the dividend in your assessable income in the income year in which you receive the dividend; and

qualify for a tax offset equal to the amount of the franking credits attached to the dividend which can be applied against your income tax liability for the relevant income year.

If you are an individual or complying superannuation fund you may be able to receive a cash tax refund from the ATO if the tax offset equal to the franking credits attached to the dividend exceeds the tax payable on your total taxable income.

If you are a company the franking credits attached to the dividend will generally give rise to a franking credit in your franking account. You will not be entitled to a tax refund of the excess franking credits. Rather, the surplus franking credits may be converted to a tax loss which can be carried forward to future years (subject to you satisfying certain loss carry forward rules).

Non-Australian resident shareholders

Dividends will not be subject to withholding tax to the extent the dividends are franked or relate to conduit foreign income.

To the extent an unfranked dividend is paid to you, withholding tax will be payable. The rate of withholding tax is 30%. However, you may be entitled to a reduction in the rate of withholding tax if you are resident in a country which has a double taxation agreement with Australia.

Disposal of Woodside Shares

Australian resident shareholders

The disposal of a Woodside Share will constitute a disposal for CGT purposes.

On disposal of a Woodside Share, you will make a capital gain if the capital proceeds from the disposal exceed the cost base of the Woodside Share. You will make a capital loss if the capital proceeds are less than the reduced cost base of the Woodside Share.

The capital proceeds on disposal of a Woodside Share will generally be the money you received, or that you are entitled to, in respect of the disposal plus the market value of any other property you received, or that you are entitled to, in respect of the disposal.

As set out in the section entitled “–Implementation of the Merger and Receipt of New Woodside Shares–Special Dividend–Cost base and date of acquisition of New Woodside Shares,” the first element of the cost base and reduced cost base for each Woodside Share you acquire on Implementation of the Merger will be equal to the market value of the Woodside Share at the time of the transfer of Woodside Shares to you.

If you are an individual, trustee or complying superannuation entity that has held Woodside Shares for 12 months or more at the time of disposal (not including the date of acquisition and disposal), you should be

Table of Contents

entitled to apply the applicable CGT discount factor to reduce the capital gain (after offsetting available capital losses). The CGT discount factor is 50% for individuals and trustees and 33 $\frac{1}{3}$ % for complying superannuation entities.

As set out in the section entitled “*Implementation of the Merger and Receipt of New Woodside Shares–Special Dividend–Cost base and date of acquisition of New Woodside Shares*,” you will be taken to have acquired Woodside Shares for the purposes of the CGT discount on the date of the distribution. Accordingly, to be eligible for the CGT discount, you must have held Woodside Shares for at least 12 months after the date of the distribution (not including the date of acquisition and disposal).

If you make a capital loss, you can only use that loss to offset other capital gains (*i.e.*, the capital loss cannot be offset against taxable income on revenue account). However, if the capital loss cannot be used in a particular income year, you can carry it forward to use in future income years, providing certain loss utilization tests are satisfied.

Non-Australian resident shareholders

If you are a non-resident of Australia for Australian income tax purposes and do not use your Woodside Shares in carrying on a business through an Australian permanent establishment, the whole of any capital gain or capital loss made upon the disposal of your Woodside Shares will be disregarded unless the Woodside Shares constitute “indirect Australian real property interests.” Your Woodside Shares will constitute indirect Australian real property interests if:

you hold a “non-portfolio interest” in Woodside You will hold a “non-portfolio interest” in Woodside if you (together with your associates) hold 10% or more of the Woodside Shares:

- at the time of disposal; or
 - throughout a 12-month period during the 24 months preceding the disposal; and
- your Woodside Shares pass the “principal asset test.”

If you are subject to tax on disposal of your Woodside Shares, the CGT discount will generally not be available to reduce any capital gain that you make.

Non-Australian resident CGT withholding

Where a non-resident of Australia for Australian income tax purposes disposes of certain taxable Australian property, the purchaser is generally required to pay an amount to the ATO.

A purchaser of your Woodside Shares will generally have an obligation to pay 12.5% of an amount equal to, broadly, the capital proceeds for the disposal of your Woodside Shares (discussed in the section entitled “*Disposal of Woodside Shares–Australian resident shareholders*”) (“CGT Withholding Tax”) to the ATO if your Woodside Shares are “indirect Australian real property interests” (discussed above) and the purchaser:

- knows or reasonably believes that you are a non-resident of Australia; or
- does not reasonably believe that you are an Australian resident, and either:
 - you have an address outside Australia; or
 - the purchaser is authorized to pay the purchase price to a place outside Australia.

However, a purchaser may not be required to pay CGT Withholding Tax if you can make a declaration that:

- as the registered holder of Woodside Shares, you are an Australian tax resident; or
- your Woodside Shares are not indirect Australian real property interests.

Table of Contents

If a purchaser considers that an obligation to pay CGT Withholding Tax arises, the purchaser is generally permitted to withhold an amount equal to the CGT Withholding Tax from any amount payable to you on disposal. In that instance, you will only receive the net proceeds from the disposal, but will be taken to receive the full proceeds. Any CGT Withholding Tax withheld is not a final tax. You will receive a credit for amounts withheld on filing an Australian tax return and you may receive a refund of tax if amounts have been withheld in excess of your actual Australian tax liability.

Provision of TFN and/or ABN

Woodside may be required to withhold tax (currently at the rate of 47%) on payments made to you (including payments of dividends that are not fully franked) and remit the amounts withheld to the ATO, unless you have provided a tax file number (“TFN”), Australian business number (“ABN”) or you have informed Woodside that you are exempt from quoting your TFN or ABN (including because you are a non-Australian resident).

You are not required to provide your TFN or ABN to Woodside, however you may choose to do so.

Other Australian taxes

No GST or stamp duty should be payable by you in relation to the receipt of dividends on Woodside Shares held by you or in respect of the disposal of Woodside Shares.

UNAUDITED PRO FORMA CONDENSED COMBINED FINANCIAL STATEMENTS

The following unaudited pro forma condensed combined financial statements of Woodside Petroleum Ltd. present the combination of the historical financial information of Woodside Petroleum Ltd. and its subsidiaries (“Woodside”) and BHP Petroleum International Pty Ltd and its subsidiaries on a post-Restructure basis (“BHP Petroleum”), adjusted to give effect to the combination of BHP Petroleum with and into Woodside and the other transactions contemplated in the Share Sale Agreement, dated 22 November 2021, relating thereto (collectively, the “Merger”). The unaudited pro forma condensed combined statement of profit and loss and the unaudited pro forma condensed combined statement of cash flows for the twelve months ended 31 December 2021 combine the historical consolidated statements of profit and loss and the historical consolidated statements of cash flows, respectively, of Woodside and BHP Petroleum, giving effect to the Merger as if it had been Implemented on 1 January 2021. The unaudited pro forma condensed combined statement of financial position at 31 December 2021 combines the historical consolidated statements of financial position of Woodside and BHP Petroleum, giving effect to the Merger as if it had been Implemented on 31 December 2021.

The unaudited pro forma condensed combined statement of profit and loss and the unaudited pro forma condensed combined statement of financial position were prepared in accordance with Article 11 of Regulation S-X (“Article 11”). Certain transaction accounting adjustments have been made in order to show the effects of the Merger on the combined historical financial information of Woodside and BHP Petroleum.

The unaudited pro forma condensed combined financial statements have been prepared using the acquisition method of accounting for business combinations, with Woodside treated as the acquirer. Under the acquisition method of accounting, Woodside will record all assets acquired and liabilities assumed from BHP with respect to BHP Petroleum at their respective fair values as of the Implementation of the Merger, which is expected to occur in the second quarter of 2022. These fair values are dependent upon certain valuations and other studies that have yet to commence or progress to a stage where there is sufficient information for a definitive fair value measure. The sources and amounts of transaction expenses may also differ from those assumed in the following pro forma adjustments. Accordingly, the pro forma adjustments are preliminary, have been made solely for the purpose of providing the pro forma financial statements, and are subject to revision based on a final determination of fair values as of the Implementation of the Merger. Differences between these preliminary estimates and the final acquisition accounting may have a material impact on the accompanying pro forma financial statements and Woodside’s future results of operations and financial position.

The unaudited pro forma condensed combined financial statements are provided for illustrative purposes only and are not intended to represent or be indicative of the results of operations or the financial position of the Merged Company that would have been recorded had the Merger been Implemented as of the dates presented and should not be taken as representative of Woodside’s future results of operations or financial position. The unaudited pro forma condensed combined financial statements do not reflect the impacts of any potential operational efficiencies, asset dispositions, cost savings or economies of scale that they may be achieved with respect to the combined operations.

NOTE 1. Basis of Presentation

The accompanying unaudited pro forma financial information was prepared in accordance with Article 11, using the acquisition method of accounting under IFRS 3 *Business Combination* (IFRS 3) and is derived from the historical consolidated and combined financial information of Woodside and BHP Petroleum, respectively. Certain transaction accounting adjustments have been made in order to show the effects of the acquisition on the combined historical financial information of Woodside and BHP Petroleum. The pro forma adjustments are preliminary and based on estimates of the purchase consideration and estimates of fair value and useful lives of the assets acquired and liabilities assumed.

The unaudited pro forma financial information presents the historical financial information of Woodside adjusted on a pro forma basis to reflect the transaction accounting adjustments related to Woodside's acquisition of BHP Petroleum.

The unaudited pro forma financial information has been derived from, and should be read in conjunction with Woodside's audited consolidated financial statements for the year ended 31 December 2021.

As Woodside and BHP Petroleum have different fiscal year ends, in order to meet the SEC's pro forma requirements of combining operating results for an annual period that ends within 93 days of the end of Woodside's latest annual fiscal period, the BHP Petroleum financial results for the year ended 31 December 2021 have been calculated by taking (i) the results for the fiscal year ended 30 June 2021, *minus* (ii) the results for the half year ended 31 December 2020, *plus* (iii) the results for the half year ended 31 December 2021. Set out below is further detail in respect of BHP Petroleum's profit and loss and cash flows for the corresponding periods.

| | (i) BHP Petroleum For the Twelve Months Ended 30 June 2021 | Minus (ii) BHP Petroleum For the Half Year Ended 31 December 2020 | Plus (iii) BHP Petroleum For the Half Year Ended 31 December 2021 | BHP Petroleum For the Twelve Months Ended 31 December 2021 |

The proposed merger has been accounted for as a business combination in accordance with IFRS 3 using the acquisition method of accounting, under which Woodside records the assets acquired and liabilities assumed at their respective fair values as of Implementation of the Merger. Certain of BHP Petroleum' s historical amounts have been reclassified to conform to Woodside' s financial statement presentation.

Table of Contents

The unaudited pro forma financial information reflects the following transaction accounting adjustments, based on available information and certain assumptions that Woodside believes are reasonable:

- i. the Merger has been accounted for as a business combination using the acquisition method of accounting, with Woodside identified as the acquirer, and the issuance of New Woodside Shares as the Purchase Price in exchange for all of the shares in BHP Petroleum;
- ii. the Purchase Price, which consists of:
 - the recognition of estimated equity consideration of \$22,696 million on the issuance of the New Woodside Shares;
 - the recognition of cash consideration of \$830 million on the Woodside Dividend Payment;
 - \$117 million estimated Locked Box Payment payable by Woodside to BHP, which is calculated by reference to the cash held in bank accounts beneficially controlled by BHP Petroleum as at 31 December 2021 of \$992 million and subtracting Woodside's current expectations of net cash flows of BHP Petroleum (adjusted for permitted adjustments) for the period from 1 July 2021 to 31 December 2021 of approximately \$875 million; and
 - any other adjustments made under the Share Sale Agreement to the Purchase Price;
- iii. the assumption of liabilities for merger related expenses; and
- iv. the recognition of the estimated tax impact of the pro forma adjustments.

For the purpose of the unaudited pro forma financial information, the issue of Share Consideration and the Woodside Dividend Payment as at 24 March 2022, and the estimated Locked Box Payment as set forth above, has been used to arrive at the value of the purchase consideration.

Assumptions and estimates underlying the pro forma adjustments are described in the accompanying notes, which should be read in conjunction with the unaudited pro forma financial information. In Woodside's opinion, all adjustments that are necessary to present fairly the unaudited pro forma financial information have been made.

As of the date of this prospectus, Woodside has not completed the detailed valuation study necessary to arrive at the required initial estimates of the fair value of the assets to be acquired and the liabilities to be assumed and the related allocations of Purchase Price, nor has it identified all adjustments necessary to conform BHP Petroleum's accounting policies to Woodside's accounting policies. A final determination of the fair value of BHP Petroleum's assets and liabilities will be based on the actual assets and liabilities of BHP Petroleum that exist as of the Implementation Date and, therefore, cannot be made prior to the Implementation of the Merger. In addition, the value of the consideration to be paid by Woodside upon the Implementation of the merger will be determined based on the closing price of Woodside Shares on the Implementation Date. The pro forma adjustments are preliminary and are subject to change as additional information becomes available and as additional analysis is performed. The final Purchase Price allocation may be materially different than that reflected in the pro forma Purchase Price allocation presented herein.

The unaudited pro forma condensed combined financial statements are provided for illustrative purposes only and are not intended to represent what Woodside's financial position or results of operations would have been had the Merger actually been Implemented on the assumed dates, nor do they purport to project the future operating results or the financial position of the combined company following the Implementation of the Merger. The unaudited pro forma condensed combined financial statements do not reflect future events that may occur after the Implementation of the Merger, including, but not limited to, the anticipated realization of savings from potential operating efficiencies, asset dispositions, cost savings, or economies of scale that the combined company may achieve with respect to the combined operations. Specifically, the unaudited pro forma condensed

Table of Contents

combined statement of profit and loss does not include projected synergies expected to be achieved as a result of the Merger, which are described in the sections entitled “*The Merger–Woodside’s Reasons for the Merger*” and “*The Merger–Woodside’s Board Recommendation*,” and any associated costs that may be incurred to achieve the identified synergies. Additionally, Woodside cannot assure that it will not incur charges in excess of those included in the pro forma total consideration related to the Merger or that Woodside’s efforts to achieve the estimated synergies and integrate the operations of the companies will be successful. The unaudited pro forma condensed combined statement of profit and loss also excludes the costs associated with any restructuring, integration activities, and asset dispositions that may result from the Merger. Further, the unaudited pro forma condensed combined financial statements do not reflect the effect of any regulatory actions that may impact the results of the combined company following the Implementation of the Merger.

The unaudited pro forma condensed combined financial statements do not reflect the following items:

the impact of any potential revenues, benefits or synergies that may be achievable in connection with the Merger or related costs that may be required to achieve such revenues, benefits or synergies;

changes in cost structure or any restructuring activities as such changes, if any, have yet to be determined;

any expenses related to employees and executives who may not be retained in the same roles after the merger, where such agreements with these employees or executives have not been reached at the date of this prospectus. These expenses may include both cash and equity payments, and which amounts could be substantial. These amounts will be reflected once agreements are reached with those employees or executives; and

any expenses related to equity awards with triggers that accelerate vesting upon termination of the relevant employee where contractual arrangements for termination with said employees have not been reached at the date of this prospectus. Such expenses may be incurred in future periods and could be material.

Woodside is currently not aware of any material differences in accounting policies and financial statement classifications that would have a material impact on the pro forma financial information. Following the Merger, Woodside will conduct a review of BHP Petroleum’s accounting policies during its integration in an effort to determine if there are any additional material differences that require reclassification of BHP Petroleum’s revenues, expenses, assets or liabilities to conform to Woodside’s accounting policies and classifications. As a result of that review, Woodside may identify further differences between the accounting policies of the two companies that, when conformed, could have a material impact on the pro forma financial information.

NOTE 2. Estimated Purchase Price Allocation

The Merger has been accounted for using the acquisition method of accounting for business combinations. The allocation of the preliminary estimated Purchase Price is based upon Woodside management’s estimates of and assumptions related to the fair value of assets to be acquired and liabilities to be assumed at 31 December 2021. Because the unaudited pro forma condensed combined financial statements have been prepared based on these preliminary estimates, the final Purchase Price allocation and the resulting effect on Woodside’s financial position and results of operations may materially differ from the pro forma amounts included in this prospectus. Woodside expects to finalize its allocation of the Purchase Price as soon as practicable after Implementation of the Merger.

The acquisition method of accounting uses the fair value concepts defined in IFRS 13 Fair Value Measurement, which is referred to as IFRS 13. Fair value is defined in IFRS 13 as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.” Fair value measurements can be highly subjective and can involve a high degree of estimation.

Table of Contents

The determination of the fair value of the identifiable assets of BHP Petroleum and the allocation of the estimated consideration to these identifiable assets and liabilities is preliminary and is pending finalization of various estimates, inputs and analyses. Certain valuations and assessments, including valuations of inventory, fixed assets, deferred costs, deferred revenues, advance payments from customer, other intangible assets, employee equity awards to be issued, as well as the assessment of the tax positions and rates of the combined business, are in process and will not be completed until after the Implementation of the Merger. Since this pro forma financial information has been prepared based on preliminary estimates of consideration and fair values attributable to the Merger, the actual amounts eventually recorded for the purchase accounting, including the identifiable intangibles and goodwill, may differ materially from the information presented.

At this preliminary stage, goodwill represents the excess of the estimated Purchase Price over the estimated fair value of BHP Petroleum's identifiable assets and liabilities and the application of accounting standards to the transaction. Goodwill will not be amortized, but will be subject to periodic impairment testing. The goodwill balance shown in these unaudited pro forma condensed combined financial statements is preliminary and subject to change as a result of the same factors affecting both the estimated consideration and the estimated fair value of identifiable assets and liabilities acquired.

Upon Implementation of the Merger and the completion of a formal valuation study, the estimated fair value of the employee equity awards replaced, and fair value of the acquired assets and liabilities will be updated, including the estimated fair value and useful lives of the identifiable intangible assets and allocation of the excess Purchase Price, if any, to goodwill. The calculation of goodwill could be materially impacted by changing fair value measurements caused by the volatility in the current market environment. Under IFRS 3, transaction costs related to the Merger are expensed in the period they are incurred. Estimated transaction costs in connection with the Merger are \$410 million (excluding integration costs). This amount is reflected as a liability in the unaudited pro forma condensed combined balance sheet. The total amount is reflected as an expense in the unaudited condensed combined statement of profit and loss for the year ended 31 December 2021. These costs are non-recurring.

The preliminary Purchase Price allocation has been prepared on the basis of the Woodside Share price and the AUD/USD exchange rate as at 24 March 2022, and a fair value based on forward-looking prices as at 24 March 2022. Commodity market forward curves have been utilized for the period from 2022 to 2026 in determining the forward-looking prices. The use of forward curve pricing assumptions reflects current market conditions and the limited availability of independent published pricing forecasts.

The preliminary Purchase Price allocation is subject to change as a result of several factors, including but not limited to:

- changes in the estimated fair value of the New Woodside Shares issued as part of the Purchase Price to BHP, based on the price of Woodside Shares as of the Implementation of the Merger;
- changes in the estimated fair value of BHP Petroleum's assets acquired and liabilities assumed as of the Implementation Date, which could result from changes in future oil, LNG, NGL and gas commodity prices, reserve estimates, asset evaluations, interest rates, discount rates and other factors;
- changes relating to the Woodside Dividend Payment;
- changes relating to the estimated Locked Box Payment, which is calculated based on a 31 December 2021 Implementation Date for the purposes of the pro forma financial information, but which will ultimately be calculated based on the actual Implementation Date;
- the tax basis of BHP Petroleum's assets and liabilities; and
- certain of the risk factors described in the section entitled "*Risk Factors*."

Table of Contents

Based upon the preliminary Purchase Price to be transferred, the fair value of the assets acquired and liabilities assumed is expected to be recorded as follows (shown in millions of U.S. dollars, except New Woodside Shares to be issued, ASX closing price (which is in Australian dollars), and foreign exchange rate (which is in U.S. dollars)):

| | |
|---|---------------|
| Consideration transferred: | |
| New Woodside Shares to be issued (thousands) | 914,769 |
| ASX closing price per share of Woodside Shares on 24 March 2022 | A\$33.20 |
| Foreign exchange rate used on conversion of AUD Woodside Shares to USD | 0.7473 |
| Fair value of New Woodside Shares to be issued as consideration | 22,696 |
| Dividend payment | 830 |
| Estimated Locked Box Payment(1) (which is net of any cash held in bank accounts beneficially controlled by BHP Petroleum) | 117 |
| Total consideration | 23,643 |
| Fair value of assets acquired: | |
| Cash | 992 |
| Receivables | 859 |
| Inventories | 278 |
| Other assets | 554 |
| Current tax assets | 69 |
| Exploration and evaluation assets | 2,905 |
| Oil and gas properties | 19,760 |
| Deferred tax assets | 1,098 |
| Lease assets | 192 |
| Investments accounted for using the equity method | 246 |
| Total assets acquired | 26,953 |
| Fair value of liabilities assumed: | |
| Payables | 914 |
| Lease liabilities | 257 |
| Deferred tax liabilities | 2,398 |
| Other liabilities | 1,200 |
| Tax payable | 381 |
| Provisions | 5,286 |
| Total liabilities assumed | 10,436 |
| Assets acquired and liabilities assumed: | 16,517 |
| Goodwill | 7,126 |

- (1) For the purposes of calculating the estimated Purchase Price, the estimated Locked Box Payment has been calculated by reference to the cash held in bank accounts beneficially controlled by BHP Petroleum as at 31 December 2021 of \$992 million and subtracting Woodside's current expectations of net cash flows of BHP Petroleum (adjusted for permitted adjustments) for the period 1 July 2021 to 31 December 2021 of approximately \$875 million.

From 16 August 2021, the last trading day before the announcement of the Merger Commitment Deed, to 24 March 2022, the preliminary value of BHP Petroleum's Purchase Price increased by approximately \$9,722 million, as a result of the increase in the share price of Woodside Shares from A\$21.18 to A\$33.20 and movement in the foreign exchange rate from AUD to USD from \$0.7336 to \$0.7473, in addition to movements in the expected number of New Woodside Shares to be issued, the Woodside Dividend Payment and the estimated Locked Box Payment. The final value of Woodside's Purchase Price will be determined based on the actual number of New Woodside Shares issued to BHP and issuable in connection with the conversion or settlement of BHP Petroleum's equity awards, and the market price of Woodside Shares on the Implementation Date. A 10% increase or decrease in the closing share price of Woodside Shares, as compared to the 24 March 2022 closing price of A\$33.20, would increase or decrease the Purchase Price by approximately \$2,270 million, assuming all other factors are held constant.

[Table of Contents](#)

NOTE 3. Reclassification and Transaction Accounting Adjustments

Adjustments included in the columns labelled “Reclassification Adjustments” and “Transaction Accounting Adjustments” in the pro forma financial statements are as follows:

- (a) Reflects reclassifications made to BHP Petroleum’s historical presentation to conform to Woodside’s presentation, including:
- reclassification adjustments made to the historical presentation of BHP Petroleum’s other expenses to cost of sales (\$2,482 million) and impairment losses (\$276 million). Costs relating to changes in inventory, freight and transportation, government royalties, depreciation and amortization are classified by Woodside as cost of sales.
 - reclassification adjustments made to the historical presentation of BHP Petroleum’s intangible assets (\$63 million) and oil and gas properties (\$878 million) to conform to the financial statement presentation of Woodside. These balances have been reclassified to ‘exploration and evaluation assets’ (\$941 million).
 - reclassification adjustments made to the historical presentation of BHP Petroleum’s current interest-bearing liabilities (\$38 million) and non-current interest-bearing liabilities (\$219 million) to conform to the financial statement presentation of Woodside. These balances have been reclassified to ‘lease liabilities’.
- (b) Reflects the pro forma Depreciation, Depletion and Amortization (“DD&A”) expense based on the preliminary Purchase Price allocation.

The depreciation of oil and gas properties includes a combination of straight line and units of production (“UOP”) methods. Transferred exploration and evaluation and offshore plant and equipment are depreciated using the UOP basis. Transferred exploration and evaluation and subsurface development expenditure are depreciated over developed proved plus probable reserves. Late-life assets are typically depreciated over proved reserves. Offshore facility assets are depreciated over proved plus a portion of probable reserves. The depreciable amount for the UOP basis for offshore facility assets excludes future development costs necessary to bring probable reserves into production. Onshore plant and equipment is depreciated using a straight-line basis over the lesser of useful life and the life of proved plus probable reserves. DD&A expense for the other property and equipment is based on a straight line method over the estimated useful lives of the asset. BHP Petroleum’s use of the proved reserve (1P) as a reserve base to determine UOP depreciation, when compared to Woodside’s use of proved and probable reserves (2P) as a reserve base in UOP calculation, resulted in higher DD&A expenses recorded historically by BHP Petroleum. An adjustment to conform BHP Petroleum’s accounting policy to Woodside’s accounting policy resulted in a decrease of \$316 million in DD&A expense due to different reserves bases being used in the respective UOP calculations.

The effect on operating results from amortization of purchase adjustments for the five years following the acquisition is as follows (in \$m):

| | <u>2022</u> | <u>2023</u> | <u>2024</u> | <u>2025</u> | <u>2026</u> |
|--|-------------|-------------|-------------|-------------|-------------|
| Amortization of Oil and Gas Properties purchase adjustment | 943 | 859 | 785 | 720 | 661 |

- (c) Represents accruals of (i) estimated cash considerations payable of \$947 million and (ii) estimated non-recurring transaction costs of approximately \$410 million. The cash considerations payable relate to the Woodside Dividend Payment of \$830 million and estimated Locked Box Payment of \$117 million. The non-recurring transaction costs are expected to be incurred by Woodside, including stamp duty, advisory, legal, regulatory, accounting, valuation and other fees that are not capitalized as part of the Merger. These transaction costs are based on preliminary estimates and the final amounts and the resulting effect on Woodside’s financial position and results of operations may differ significantly. The adjustment to payables of \$947 million and \$410 million in note 3(c) is netted off against the

Table of Contents

adjustment of \$38 million in note 3(e) on the unaudited pro forma statement of financial position to show a net adjustment of \$1,319 million.

- (d) Reflects the income tax effect of the transaction accounting adjustments relating to transaction costs, DD&A and other accounting policy differences. Because the tax rates used for these pro forma financial statements are an estimate, the blended rate will likely vary from the actual effective rate in periods subsequent to Implementation.
- (e) Reflects adjustments to receivables (\$572 million) and payables (\$38 million) to conform BHP' s accounting policy for overlift and underlift to Woodside' s accounting policy. Specifically, Woodside' s accounting policy is to not account for the effects of volumetric imbalances. The adjustment to payables of \$38 million in note 3(e) is netted off against the adjustment of \$947 million and \$410 million in note 3(c) on the unaudited pro forma statement of financial position to show a net adjustment of \$1,319 million.

The increase in receivables relating to underlift between 31 December 2020 and 31 December 2021 is \$487 million and the increase in payables relating to overlift is \$15 million. These movements have been adjusted for in the Merged Group Pro Forma Historical Statement of Cash Flows under “(increase)/decrease in trade and other receivables” and “increase/(decrease) in trade and other payables” respectively with a net impact of \$472 million to the P&L.
- (f) Reflects the Merger being on a cash-free debt-free basis where BHP Petroleum will settle all intercompany loan balances with a net impact of \$1,700 million prior to Implementation of the Merger.
- (g) Reflects other fair value adjustments, including:
 - adjustment to other financial assets (\$37 million) and other financial liabilities (\$60 million) in respect of embedded derivatives. The fair value changes (\$90 million) recorded by BHP Petroleum in relation to these derivatives are reversed from cost of sales.
 - adjustment to right-of-use asset (\$68 million) to measure the right-of-use asset at the same amount as the lease liability, adjusted to reflect off-market terms.
 - adjustment to non-current other liabilities in respect of additional liabilities assumed (\$56 million) and unfavorable contracts, primarily relating to the fair value of a long-term fixed price LNG contract (\$1,088 million).
 - adjustment to other assets (\$537 million) in respect of entitlement to additional LNG volumes.
- (h) Reflects a preliminary Purchase Price allocation adjustment resulting in an increase to BHP Petroleum' s oil and gas properties of \$9,536 million and exploration and evaluation assets of \$1,964 million to record the properties at their estimated fair value.

Table of Contents

The estimated fair values and useful lives of the oil and gas properties and exploration and evaluation assets acquired are as follows:

| | Estimated fair value (\$m) | Estimated useful lives (in years) |
|--------------------------------|----------------------------------|---|
| Assets transferred: | | |
| North West Shelf | 3,977 | 16 |
| North West Shelf Oil | 117 | 11 |
| Scarborough | 724 | 32 |
| Bass Strait | 2,043 | 13 |
| Macedon | 339 | 10 |
| Pyrenees | 349 | 15 |
| Other AU | 55 | – |
| Total Australian Assets | 7,604 | – |
| Atlantis | 4,600 | 27 |
| Mad Dog | 4,709 | 24 |
| Shenzi | 4,405 | 18 |
| Other U.S. GoM | 260 | 5 |
| Total U.S. GoM | 13,974 | – |
| Trinidad & Tobago | 446 | 10 |
| Trion | 642 | 44 |
| Total rest of world | 1,088 | – |
| Total | 22,666 | – |

- (i) Represents an adjustment to deferred tax assets to reflect the unused tax losses and unused tax credits only to the extent these losses and credits are expected to be utilized.
- (j) Represents the goodwill arising from the preliminary purchase price allocation adjustments. Assuming no changes in the consideration paid, a 10% increase or decrease in the fair value of identifiable assets and liabilities would affect goodwill identified as follows (in \$m):

| Assume change in fair value | Incremental fair value of identifiable assets and liabilities | Resulting impact on Goodwill |
|-----------------------------|---|---------------------------------|
| 10% increase | 1,652 | (1,652) |
| 10% decrease | (1,652) | 1,652 |

- (k) Primarily reflects a preliminary purchase price allocation adjustment of \$825 million to record the estimated fair value of the assumed BHP Petroleum asset retirement obligations. As part of the preliminary purchase price allocation, Woodside estimated the timing and amount of the closure and rehabilitation cash flows expected to be incurred. As a result, the current provision is decreased by \$16 million, and the non-current provision is increased by \$841 million. To establish the value of the provision for the Merged Group, in respect of the BHP Petroleum assets, Woodside has adopted BHP's cost estimates and schedule, and it has applied Woodside's escalation and discount rate assumptions. Further detailed alignment of scope and cost estimate methodologies across the Merged Group will be made post Implementation.
- (l) Reflects an adjustment to deferred income taxes to record the estimated deferred income tax effects of combining Woodside's and BHP Petroleum's operations as well as changes to the deferred tax amounts as a result of the preliminary purchase price allocation. The deferred tax adjustment assumes a forecasted blended BHP Petroleum statutory tax rate of 25%.
- (m) Reflects an adjustment to reverse BHP Petroleum's gain (\$104 million) which is attributable to its previous divestment of its Scarborough interest to Woodside.

Table of Contents

- (n) Reflects the New Woodside Shares issued as Share Consideration (approximately \$22,696 million), the elimination of BHP Petroleum's historical stockholders' equity and transaction costs. The impact of pro forma Merger adjustments on total equity are summarized below (shown in \$m):

| | Elimination of BHP Petroleum's Historical Equity | Issuance of New Woodside Shares | Transaction costs | Pro Forma Equity Adjustments |
|---|---|--|------------------------------|---|
| Issued and fully paid shares | (15,234) | – | – | (15,234) |
| Additional paid in capital | – | 22,696 | – | 22,696 |
| Total issued and fully paid shares | (15,234) | 22,696 | – | 7,462 * |
| Other reserves | (3,489) | – | – | (3,489) |
| Retained losses | 10,749 | – | (410) | 10,339 |
| Total stockholder's equity | (7,974) | 22,696 | (410) | 14,312 |
| Non-controlling interests | – | – | – | – |
| Total equity | (7,974) | 22,696 | (410) | 14,312 |

* As the Merger is on a cash-free debt-free basis, BHP Petroleum will settle all intercompany loan balances, with a net impact of \$1,700 million by way of a capital contribution prior to Implementation of the Merger. The pro forma equity adjustments of \$7,462 million includes the relevant capital contribution and corresponding elimination with a net nil impact.

- (o) The pro forma Merger adjustments on Woodside Shares and basic earnings per share are summarized below:

| | Year Ended 31 December 2021 |
|---|--|
| Numerator | |
| Basic combined pro forma net income (loss) attributable to Woodside common stockholders (\$M) | 2,178 |
| Denominator | |
| Historical basic weighted average Woodside Shares outstanding | 962,604,811 |
| New Woodside Shares to be issued (i) | <u>914,768,948</u> |
| Pro forma basic weighted average Woodside Shares outstanding | 1,877,373,759 |
| Pro forma basic net income per share attributable to Woodside Shareholders (US cents) | 116 |

- (i) Represents the approximate number of New Woodside Shares that are to be issued as the Purchase Price.

[Table of Contents](#)

NOTE 4. Unaudited Pro Forma Supplemental Oil and Natural Gas Reserves Information

The following tables reflect Woodside's and BHP Petroleum's combined supplemental information regarding oil and natural gas producing activities, giving effect to the Merger as if it had occurred on 31 December 2021, along with a summary of changes in quantities of net remaining proved reserves during the year ended 31 December 2021.

The pro forma information was calculated by adding numbers as prepared by each of Woodside and BHP Petroleum. This includes information for overlapping assets, specifically NWS where reserves and values have been added without any adjustments. BHP Petroleum uses a conversion factor of 6,000 MMscf per MMboe while Woodside uses 5,700 MMscf per MMboe equivalent. BHP Petroleum includes onshore and offshore fuel used in its operation as reserves while Woodside includes only the onshore fuel in their reserves. Pro forma information is derived with these assumptions unchanged for each of the entities.

Woodside's reserves as of 31 December 2021 are based on a reserve report prepared by Netherland, Sewell & Associates, Inc., Woodside's independent reserve engineers. BHP Petroleum's reserve assessments are prepared each year in connection with BHP Petroleum's fiscal year end of June 30. The assessments are reviewed prior to BHP Petroleum's fiscal year end to ensure technical quality, adherence to internally published BHP Petroleum guidelines and compliance with SEC reporting requirements. The December 31 reserves information for BHP Petroleum included below is an estimate of BHP Petroleum's reserves as of such date, is derived from internal records, taking into account, among other factors, production, revenues, and operating and capital expenditures for each asset and project, and has not been reviewed by any independent reserve engineers or on the same basis as BHP Petroleum's reserves are reviewed at BHP Petroleum's fiscal year end. Additional information regarding pro forma proved reserves is included in the section entitled "*Business and Certain Information About the Merged Group—Merged Group Reserves and Future Production Capacity.*" Information regarding Woodside's actual historical reserves is included in the section entitled "*Business and Certain Information About Woodside—Reserves and Resources.*" Information regarding BHP's actual historical reserves is included in the section entitled "*Business and Certain Information About BHP Petroleum—Reserves and Resources.*"

The following estimated pro forma supplemental oil and natural gas reserves information is not necessarily indicative of the results that might have occurred had the Merger been completed on 1 January 2021, and is not intended to be a projection of future results. Future results may vary significantly from the results reflected because of various factors, including those discussed in the section entitled "*Risk Factors*" beginning on page 42 of this prospectus.

Small differences within the following tables may be due to rounding.

Statement regarding BHP Petroleum's reserves

The estimates of BHP Petroleum reserves contained in the accompanying tables are based on, and fairly represent, information and supporting documentation prepared under the supervision of Mr. A. G. Gadgil, who is employed by BHP. Mr. Gadgil is a member of the Society of Petroleum Engineers and has the required qualifications and experience to act as a qualified Petroleum Reserves and Resources evaluator under the ASX Listing Rules. The BHP Petroleum reserves presented herein are issued with the prior written consent of Mr. Gadgil who agrees with the form and context in which the reserves are presented. Reserves are net of royalties owned by others and have been estimated using deterministic methodology.

Aggregates of BHP Petroleum reserves estimates contained in this prospectus have been calculated by arithmetic summation of field/project estimates with the exception of the North West Shelf (NWS) Gas Project in Australia. Probabilistic methodology has been utilized to aggregate the NWS reserves for the reservoirs dedicated to the gas project only and represents an incremental 5 MMboe of proved reserves. The barrel of oil equivalent conversion is based on 6,000 scf of natural gas equals 1 boe. The reserves estimates are inclusive of fuel required for operations (refer to table footnotes). The custody transfer point(s)/point(s) of sale applicable for each field or project are the reference point for reserves. At 31 December 2021, approximately 4.5% of BHP Petroleum proved reserves were attributable to production sharing arrangement where BHP Petroleum has a revenue interest in production. Reserves estimates have not been adjusted for risk.

Table of Contents

PROVED DEVELOPED AND UNDEVELOPED OIL, CONDENSATE, NGL AND NATURAL GAS RESERVES (millions of barrels of oil equivalent)

| | Woodside | BHP Petroleum | Pro Forma |
|---|-----------------|--------------------------|------------------|
| Reserves as of 31 December 2019(1) | 586.1 | 781.5 | 1,367.5 |
| Improved Recovery | – | – | – |
| Extensions/Discoveries | 1.8 | 31.5 | 33.3 |
| Revisions | 13.0 | (9.7) | 3.3 |

(1) Includes gas sold as LNG

(2) BHP Petroleum reserves as of 31 December 2021 include 553 bcf of fuel anticipated to be consumed in operations

2021 proved reserves

Production during 2021 totaled 202.5 MMboe, which was 4.9 MMboe lower than the previous year primarily due to overall natural production decline.

Extension and discoveries

Total extensions amounted to 1,280 MMboe, mostly due to the Scarborough LNG Project in Australia which took FID during 2021, and this contributed 1,197 MMboe of proved reserves. The Sangomar Oil Field Development is in execution phase and accounts for 81 MMboe of proved reserves. Other minor extensions included intersection of previously unpenetrated sands in the Julimar and Goodwyn fields in Australia; and in the Atlantis field in the U.S. GOM due to extension of proved field limit.

Revisions

Revisions during the year resulted in a net addition of 23 MMboe in proved reserves. In Australia, revisions increased proved reserves by 43 MMboe primarily due to improved production performance in the Pluto and Macedon gas fields and the Greater Enfield and NWS oil fields, partially offset by poorer than expected production performance in the Brunello and NWS gas fields.

In the U.S. GOM, revisions decreased reserves by 17 MMboe overall, primarily driven by reductions related to lower than expected well performance in the Atlantis and Mad Dog fields of 19 MMboe and 4 MMboe, respectively. Approval of the Shenzi Subsea Multi Phase Pump Project added 6 MMboe.

Table of Contents

In T&T, revisions decreased reserves by approximately 9 MMboe primarily due to lower-than-expected Ruby drilling results, which were partially offset by increases in the Angostura field.

Standardized measure of discounted future net cash flows relating to proved oil, condensate, NGL and natural gas reserves (Standardized measure)

The following tables present the estimated pro forma discounted future net cash flows at 31 December 2021. The pro forma standardized measure information set forth below gives effect to the Merger as if the merger had been completed on 1 January 2021. The calculations assume the continuation of existing economic, operating and contractual conditions at 31 December 2021. The pro forma standardized measure information includes cost for future decommissioning, dismantlement, abandonment, and rehabilitation obligations.

Therefore, the following estimated pro forma standardized measure is not necessarily indicative of the results that might have occurred had the Merger been completed on 1 January 2021 and is not intended to be a projection of future results. Future results may vary significantly from the results reflected because of various factors, including those discussed in the section entitled “*Risk Factors*” beginning on page 42.

Overview***Woodside Overview***

Woodside operates as an explorer for and producer of energy products.

Woodside's Australian operations are primarily in Western Australia. Domestic gas is sold to customers in Western Australia. LNG, LPG, condensate and oil are sold to customers primarily in Asia. Woodside's operations outside of Australia are not in production.

BHP Petroleum Overview

BHP Petroleum's Australian operations are in the East and West coast of Australia. Domestic gas is sold to Australian customers. Crude oil and gas is sold to customers in Japan, South Korea and China. BHP Petroleum's global operations are in the U.S. GOM and T&T. Crude oil products from BHP Petroleum's U.S. GOM operations are sold into the U.S. domestic and global oil market with gas volumes sold into the U.S. domestic gas market. Similarly, crude oil produced from BHP Petroleum's T&T operation is sold into the global oil market and gas volumes are sold domestically.

Australia Oil & Gas Disclosures

Australia is home to substantial onshore and offshore oil and gas reserves, the development of which has underpinned the nation's position as a leading global LNG exporter.

There are two distinct regional gas markets which service domestic gas consumption, one on each coast of Australia, respectively.

West Coast of Australia Domestic Gas Market***Market overview***

The Western Australian ("WA") domestic gas market primarily services several large industrial consumers and mining firms, the majority of which are supplied directly through the transmission network (such as the Dampier to Bunbury Natural Gas Pipeline and the Goldfields Gas Pipeline). The remaining large customers are supplied by domestic LNG facilities, which convert natural gas to LNG which is then transported by road. According to the Australian Energy Market Operator's ("AEMO") 2020 Western Australia Gas Statement of Opportunities ("AEMO20 Gas Statement"), customers supplied through the retail distribution network account for 6% of WA's total domestic gas consumption. Despite its relatively small population, WA has the highest natural gas consumption of all Australian states. WA consumed 669 PJ of gas in 2018-2019, approximately 42% of Australia's total gas consumption (AEMO20 Gas Statement).

The large majority of gas reserves in WA are from conventional reservoirs located in the Carnarvon and Perth basins. While most of WA's gas reserves are developed as LNG export projects, domestic supply in WA is underpinned by a domestic gas reservation policy ("WA Domestic Gas Policy"). Under the policy, introduced in 2006, gas equivalent to 15% of LNG production from LNG export projects is required to be reserved for domestic use as a condition of LNG project approval. The policy contains flexibility, allowing negotiations to occur on a case-by-case basis regarding the method by which the LNG project proponents fulfil their domestic gas commitments, including from alternative sources.

Key recent trends

In 2021, a number of producers made progress on developing and commercializing domestic gas fields and LNG projects which is likely to contribute to supply in the coming years. Demand for WA's key commodities,

Table of Contents

particularly gold and iron ore, has remained strong throughout the COVID-19 pandemic which has flowed through to increased domestic gas demand for mining operations (AEMO20 Gas Statement).

The WA Government clarified the WA Domestic Gas Policy to state that it would not agree to exports of gas through the WA pipeline network, and that supply of gas to the east coast would be treated as an export for the purposes of the policy.

In the past 18 months there has been an increase in proposed hydrogen projects, with a number of producers, including Woodside, entering into hydrogen development opportunities. As of January 2022, the WA Government was funding seven renewable hydrogen feasibility studies as part of the Renewable Hydrogen Strategy. The studies include examining solar hydrogen for waste collection and light vehicle fleets in Cockburn, a hydrogen refueling hub in Mandurah, and the potential for an electrolysis hydrogen production plant in the Great Southern or Wheatbelt regions of Western Australia.

Market dynamics

The WA domestic gas market is characterized by:

Large gas reserves that are generally located offshore and developed mainly to supply the global LNG market.

A limited number of large suppliers/producers and consumers.

Bilateral, confidential, long-term take-or-pay gas sales contracts.

Residential, commercial, and small industrial consumers comprising a small proportion of total demand.

Small volumes of short-term and spot gas sales.

A small number of pipelines, interconnectors, and limited surplus pipeline capacity.

Information about supply that is available to be contracted, potential buyers, and gas contract pricing is not readily available.

78 PJ of storage capacity (AEMO21 Gas Statement).

Demand outlook

According to the AEMO, gas consumption in WA is expected to be supported by strong demand for the State's commodities through the development of new resources projects. Long-term west-coast gas demand is expected to grow moderately at an average annual rate of 0.8% until 2031, growing from 1,071 TJ/day in 2022 to 1,150 TJ/day in 2031 (AEMO21 Gas Statement). In 2021, large customers accounted for ~85% of gas consumed in WA with a majority of gas consumed in the minerals processing, mining and electricity generation sectors (Gas Bulletin Board WA data).

Supply outlook

Gas supply to the WA domestic market is largely dependent on the sustained development of gas reserves. Overall, potential gas supply is projected to decline at an average annual rate of 1.4% between 2022 and 2031 (AEMO21 Gas Statement). AEMO notes that there is a large volume of undeveloped gas from fields such as Clio-Acme and Equus that could supply the WA domestic market over the next 10 years but are currently too speculative to include in its potential supply forecasts (AEMO20 Gas Statement).

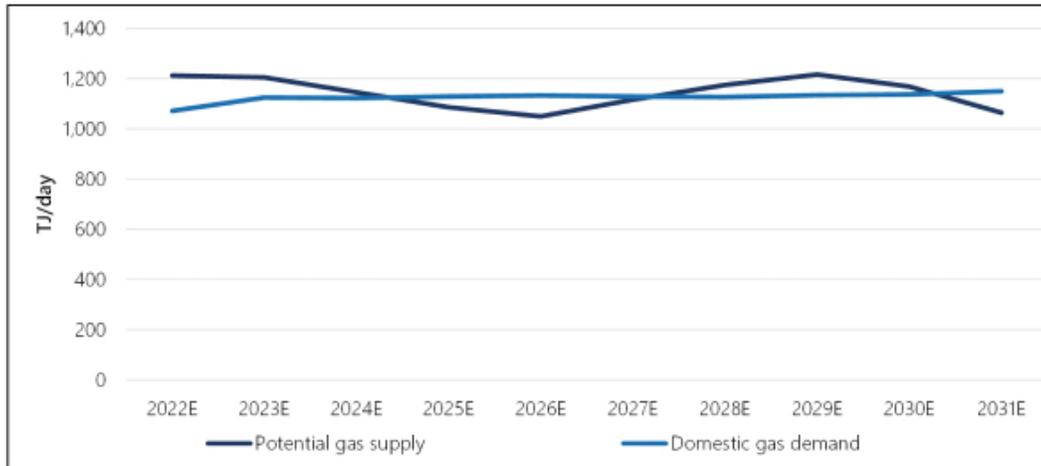

Supply and demand balance

The supply of gas in the Western Australian domestic gas market is expected to be sufficient to meet demand until 2024 (AEMO21 Gas Statement). Between 2025 and 2027, gas demand may exceed supply by 51 PJ

Table of Contents

in total across these years, at rates of up to ~85 TJ/day in 2026 (up to 7% of daily demand) (AEMO21 Gas Statement). From 2027, the Scarborough project is forecast to supply up to 210 TJ/d into the domestic market (AEMO21 Gas Statement). The development of Perdaman Chemical and Fertiliser's proposed urea project would add a large new consumer to the Karratha region; it is expected to start production in 2025 (subject to FID). Post-2030, declining reserves at domestic gas only facilities is expected to cause forecast gas demand to again exceed forecasted supply (AEMO21 Gas Statement).

Figure 3–Domestic gas market balance, base scenario, 2022E to 2031E (AEMO21 Gas Statement)

East Coast of Australia Domestic Gas Market

Market overview

Australia's eastern gas market includes New South Wales, Australian Capital Territory, Queensland, South Australia, Victoria, and Tasmania, and is connected by gas transmission pipelines, and also sources gas supply from the Northern Territory via the Northern Gas Pipeline. This market is characterized by:

Domestic gas demand of 553 PJ (2021) from the industrial, residential and commercial, and gas-fired power generation sectors.

Key supply basins which include the Surat-Bowen Basin (Queensland), the Cooper Basin (South Australia), and Otway, Gippsland, and Bass Basins (Victoria).

Three LNG export projects located in Queensland, which consume about 70% of gas production in Eastern Australia.

Approximately 200 PJ of gas storage capacity.

Key recent trends

The east coast gas market is heavily contract based, with only a small share of production traded on the wholesale (spot) market. This is because long-term contracts provide producers the confidence to invest in new gas supply, and large gas users the confidence to invest in new gas-consuming projects (Understanding the East Coast Gas Market, Reserve Bank of Australia report ("RBA East Coast Gas Market Report")).

Several spot hubs exist for short-term trading, however these volumes account for a relatively small share of the market (approximately 10-20%) and are used for market balancing by gas players.

Table of Contents

Higher marginal costs of supply for new supply sources available in the east coast market may put upward pressure on prices, compared to the pre-2015 levels. There is a forecasted risk of gas shortfalls in the east coast gas market as soon as winter 2023, prompting several developers to propose LNG import terminals to be built on the east coast (AEMO21 Gas Statement).

Demand outlook

The outlook for gas demand in the long term is uncertain, with forecasted scenarios ranging from relatively flat demand to steadily declining demand over time. This uncertainty arises from potential policy changes (e.g., Victoria's proposed Gas Substitution Roadmap), the availability of gas supply that is affordable for more price-sensitive consumers, and the outlook for gas-fired power generation, which is subject to the growth of renewable energy and electricity storage, coal power plants, and electricity transmission connectivity between regions. Gas-fired power generation is increasingly playing a critical balancing role in the power sector, for periods of lower renewable energy and/or coal-fired power generation, making gas-fired power demand subject to short-term events (AEMO21 Gas Statement).

Supply outlook

The east coast market's supply outlook is forecast to be challenged, as reserves located near domestic demand centers in offshore Victorian basins, particularly the Gippsland Basin, are in decline (Australian Energy Market Operator: Gas Statement of Opportunities for Eastern and Southern Australia (March 2021) ("AEMOESA Report")). The proposed introduction of LNG import terminals on the east coast of Australia at various locations (e.g., Victoria, New South Wales and South Australia) could address these supply shortfall risks and provide incremental supply (AEMOESA Report).

In April 2021, BHP announced the successful commissioning of the Gippsland Basin Joint Venture's West Barracouta natural gas field in the Bass Strait offshore Victoria, which will provide new domestic gas supply to Australia's east coast. The West Barracouta field is the largest domestic gas project in Australia in recent years and will help to increase the supply of gas to the east coast of Australia (source: BHP ASX Announcement dated 19 April 2021). In March 2022, ExxonMobil announced it was making incremental investments to deliver an additional 200 PJ of gas over the next five years, through the Gippsland Basin Kipper offshore field and the Turrum field.

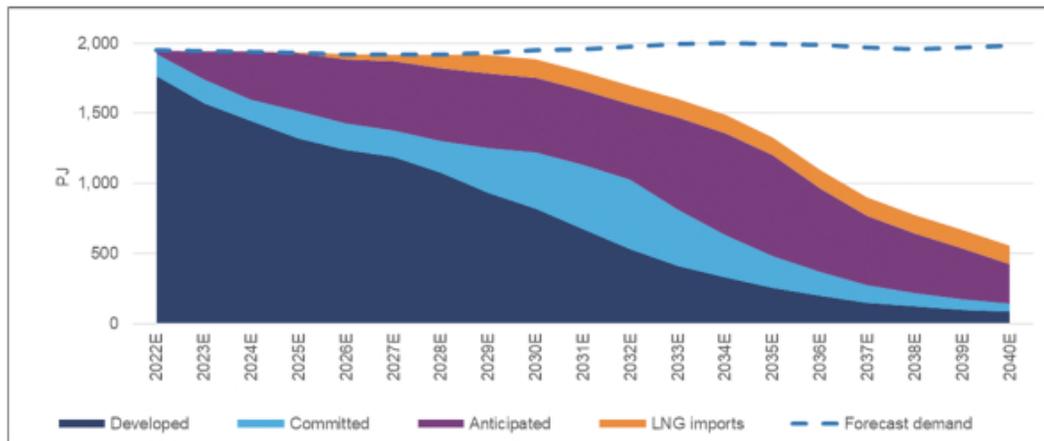

Santos' proposed Narrabri gas project in New South Wales has targeted FID for 2023 and would add a large new supply source if progressed.

Supply and demand balance

The east coast gas market is likely to have future supply shortfalls without the development of further gas resources and/or LNG import terminals. While the northern region of the East Coast (Queensland and the Northern Territory ("NT")) is expected to be self-sufficient in gas until 2030, the southern region (which includes NSW/ACT, Victoria, Tasmania and South Australia) is contending with the decline of legacy basins. Gas supply to meet this shortfall may come from Queensland, the NT, and/or LNG import terminals. However, pipeline capacity limitations and costs may constrain the available gas supply to the most southern states in particular: Victoria and Tasmania.

Figure 4—Projected eastern and south-eastern Australia gas production (including export LNG), Central scenario, existing, committed, and anticipated developments, 2022E-2040E (PJ) (AEMOESA Report)

LNG Market

Market overview

The LNG market is a global export-driven market dominated by larger players, with Australia being the largest LNG exporter by volume in 2021, producing 79.2 Mt compared to Qatar at 78.0 Mt (Wood Mackenzie Commodity Report, Global Gas Supply, January 2022 (“WMGGS Report”)) and the U.S., at 67.5 Mt.

Key recent trends

The global LNG price recovery has accelerated since the lows experienced at the start of the COVID-19 pandemic, supported by a recovery in Chinese LNG demand which was up 20% in the second half of 2021 vs 2020 and European carbon prices and other factors (Wood Mackenzie Global Gas 2021 Outlook to 2050).

Global production in 2021 grew by 20 Mt on 2020 volumes (WMGGS Report). However, much of the “growth” is a result of LNG plants in marginal supply markets such as Egypt and the U.S. which are returning to regular production profiles after operating at reduced levels in 2020 due to depressed LNG prices (WMGGS Report). Supply has not been quick to rebound following the COVID-19 pandemic as a result of lowered investment over 2015-2017 and also because of delays to several projects under construction. Organic supply growth is expected to return in 2022, as new projects in the U.S. and Indonesia come online. Overall capacity additions from under-construction projects during 2023-2025 are expected to be small, with Tortue FLNG Phase 1 (on the border of Senegal and Mauritania) expected in 2023 and Costa Azul Phase 1 (Mexico) in 2025 (WMGGS Report). Woodside’s Scarborough development is targeted to commence production in 2026. The current conflict between Russia and Ukraine is likely to affect Russian projects, such as Arctic LNG-2, which had been expected to become operational in late 2023, and delays are possible.

Market Dynamics

The majority of Australian LNG is sold into the Asia Pacific market under long-term bilateral contract arrangements, with pricing indexed to the price of crude oil. Historically these contracts have had durations of up to 25 years. This provided producers, particularly for greenfield projects, with a level of certainty on the recovery of significant upfront investment and provided purchasers long-term security of energy supply. In recent years, primarily due to the increased liquidity in the global LNG market, producers and purchasers in the Asian region have concluded bilateral contracts over shorter durations of between 5 and 15 years.

Table of Contents

Historically, the exact terms of the oil price linkage in Asian LNG contracts is negotiated confidentially between buyers and sellers, with contracted LNG prices traditionally linked to the price of JCC crude oil. JCC reflects the average price of crude oil imported into Japan and closely correlates to the lagged price of Brent oil. In recent years, Brent oil has been more commonly used as a contract price marker for LNG in the Asian region, particularly in China, Korea, Taiwan, India and SE Asia. This contrasts with the spot market pricing of domestic natural gas in North America, and to a lesser extent Europe, where competing sources of gas (pipeline and LNG) are priced in hubs. LNG exports from the U.S. are commonly indexed to the U.S. natural gas hub, Henry Hub.

In addition, as global markets become increasingly interdependent and physical liquidity rises, there has been an increase in term and spot sales arrangements in the Asia-Pacific region priced off the Platts JKM benchmark price assessment, which is reflective of gas-on-LNG competition and prevailing LNG market supply-demand balances.

Long-term LNG contracts are often subject to periodic price review which may occur through bilateral agreement or be triggered contractually as a result of significant movements in oil price. This is particularly the case with contracts greater than ten years in duration. While most of Australia's LNG production continues to be traded via long-term contracts, there has been an increase in spot sales and short-term contract sales. A key contributing factor is the greater flexibility that short-term contracts can provide in terms of responding to changes in sources of supply and demand for LNG.

Demand outlook

This paragraph includes statistical data and market analysis regarding global gas demand. This information has been taken from information published by Wood Mackenzie, a provider of market overview and analysis, in a report entitled "Commodity Report, Global Gas Demand" dated October 2021 ("WMGGD Report"). This is licenced from Wood Mackenzie by Woodside. According to Wood Mackenzie, global LNG demand is expected to more than double in volume between 2021 and 2050 (Wood Mackenzie Commodity Report, Global Gas Demand, October 2021 ("WMGGD Report")), With indigenous production decline in Europe and parts of Asia, LNG imports are expected to become the preferred supply type for many economies. Europe for example, could see LNG demand increase by 51 Bcm despite overall gas demand declines of 184 Bcm in 2021-2050 (WMGGD Report). Asia represents almost 90% of all the gas demand growth for 2021-2050, and Australian LNG producers benefit from the close proximity to and long-term relationships with customers in Asian markets (WMGGD Report).

While there are challenges posed for natural gas demand due to the energy transition, Wood Mackenzie is forecasting global gas demand to grow between 2021 and 2035 (WMGGD Report). Natural gas's share in global total primary energy demand is expected to peak by the early 2040s, highlighting the role gas is expected to play in supporting the energy transition in the medium to longer-term (WMGGD Report). However, gas demand could see a substantial decline under Wood Mackenzie's Accelerated Energy Transition 1.5-degree scenario (AET-1.5 scenario). Wood Mackenzie's AET-1.5 scenario outlines a view of the world that limits the average rise in global temperatures to 1.5 °C compared with pre-industrial times (WMGGD Report).

Supply outlook

The 2020 COVID-19 pandemic and low oil and gas prices in 2020 resulted in a number of delays to the start dates for new LNG supply projects that are under-construction and to the timelines for projects that were proposed to take final investment decisions. In 2020, only one project took FID, the Energia Costa Azul LNG project in Mexico. In 2021, a few projects took FIDs, including Qatar's North Field East project, the Darwin LNG backfill (Barossa) in Australia, Russia's Baltic LNG (Ust-Luga) and the Scarborough-Pluto Train 2 project in Australia.

More than 96 Mtpa of under-construction LNG capacity is likely to become operational between 2026 and 2030 (Wood Mackenzie Commodity Report-Global Gas LNG Supply). In addition, Wood Mackenzie estimates that up to 80 Mtpa of supply capacity will take FID within the next 36 months.

Table of Contents

In the longer-term, Qatar, Russia and the U.S. were forecast to dominate LNG supply additions into the next decade, based on the large number of current project proposals and substantial and relatively low-cost gas resources. Russia's role in energy markets following the invasion of Ukraine is uncertain.

Oil Market

Market overview and dynamics

The COVID-19 pandemic reduced oil demand in 2020 to well below 2019 levels. After an increase of 5.6MMbbl/d in 2021, the IEA estimates that oil demand will grow by 2.1 MMbbl/d in 2022 to reach 99.7 MMbbl/d, slightly above pre-COVID-19 levels (IEA Monthly Oil Market Report, March 2022 ("IEAMar22 Report")). The forecast reflects new estimates of reduced demand as a result of the Russia-Ukraine conflict.

In the second quarter of 2020, the oil market saw oil supply heavily outpacing world oil demand, leading to an increase in global oil inventories within a short span of a couple of months. In response to this situation, in April 2020, OPEC and non-OPEC oil producing countries participating in the "Declaration of Cooperation," known as "OPEC+", announced voluntary production adjustments commensurate with the material oil stock surplus, to achieve the rebalancing and stabilization of the oil market (OPEC, Monthly Oil Market Report, November 2021).

Since early 2020, OPEC+ has been playing a significant role in balancing the market through production curbs. OPEC+ member countries have the ability to produce over 40% of the world's crude oil. Equally important to global prices, OPEC+'s oil exports can represent more than 60% of the total petroleum traded internationally. Due to this market share, OPEC+'s actions can, and do, influence international oil prices.

The extent to which OPEC+ utilizes available production capacity is often used as an indicator of the tightness of oil markets, as well as an indicator of the extent to which OPEC+ is exerting upward influence on prices. The U.S. Energy Information Administration defines spare capacity as the volume of production that can be brought on within 30 days and sustained for at least 90 days. Saudi Arabia, the largest oil producer within OPEC+ and the world's largest oil exporter, historically has had the greatest spare capacity. Saudi Arabia generally keeps more than 1.5 - 2 MMbbl/d of spare capacity on hand for market management. OPEC+ spare capacity provides an indicator of the world oil market's ability to respond to potential crises that reduce oil supplies. As a result, oil prices tend to incorporate a rising risk premium when OPEC spare capacity reaches low levels.

According to Geoscience Australia, an agency of the Australian Government, Australia holds just 0.3% of the world's oil reserves as of September 2021. Most of Australia's known remaining oil resources are LPG and condensate, associated with offshore gas fields in the Browse, Carnarvon, and Bonaparte basins. Australian oil production has been in decline since 2009 as new reserve developments have failed to match the rate of depletion in existing fields. Oil production in 2019 showed a reversal to this long-term trend following the start-up of the Greater Enfield (Woodside operated), Ichthys and Prelude projects on the North West Shelf.

According to the U.S. Energy Information Administration Gulf of Mexico Fact Sheet, the Gulf of Mexico area, both onshore and offshore, is one of the most important regions for energy resources and infrastructure. In 2021, production from the Gulf of Mexico was affected by hurricane activity which resulted in prolonged outages.

Key recent trends

As at March 2022, oil prices were at decade highs, reflective of markets pricing in a geopolitical risk premium as a result of the conflict between Russia and Ukraine and as a shortage of natural gas, LNG and coal boosted demand for oil as economic growth continues and global mobility improves. Dated Brent was \$127/bbl and WTI was \$115/bbl. Despite increasing global COVID-19 cases in the fourth quarter of 2021, measures taken

Table of Contents

by governments to contain the virus were less severe than during earlier waves and the resulting impact on economic activity and oil demand was relatively subdued. Oil demand exceeded IEA expectations in the fourth quarter of 2021, increasing by 1.1 MMbbl/d to 99 MMbbl/d. (IEA Monthly Oil Market Report, January 2022).

Prior to Russia's invasion of Ukraine, world oil supply was projected to rise sharply in 2022 towards year end as U.S. output bounced back from Hurricane Ida and responded to the higher price environment, and OPEC+ continued to unwind cuts. Canada and Brazil were also expected to achieve record production levels. Additionally, in January 2022 Ecuador, Libya and Nigeria were already ramping up production.

Despite the above supply increases, the current conflict between Russia and Ukraine is also expected to create a supply shock, with the IEA estimating that from April as much as 3 MMbbl/d of Russian oil production could be shut in as a result of sanctions and self sanctions (IEA Mar22 Report).

Long term demand and supply outlook

Demand for crude oil and petroleum products is influenced by many factors and is impossible to predict with certainty. Specifically, factors such as the rate of global economic growth, evolving energy policies and technological trends will have material impacts on the path for long-term oil demand. The policies undertaken by governments to reduce carbon emissions will play a significant role in determining this path.

Wood Mackenzie estimated in November 2021 that global total liquids demand would continue to grow until peaking in 2034 at 108 MMbbl/d, and then gradually decline thereafter. Under this outlook, by 2050 total demand will have retreated to 96 MMbbl/d, approximately 4 MMbbl/d lower than 2019 levels (Wood Mackenzie: Macro Oils long-term 2021 Outlook to 2050 ("WM Outlook to 2050")).

Other forecasters may make different assumptions about the drivers of oil demand and thus may have alternate outlooks. In addition, many forecasters consider the potential impact of global policies that could limit the average rise in global temperatures to 2°C or 1.5°C compared with pre-industrial times. Wood Mackenzie has developed such scenarios. For example, in their AET-1.5 scenario, which assumes that the average rise in global temperatures is limited to 1.5°C compared with pre-industrial times, oil demand peaks earlier and declines more rapidly than in the outlook described above.

Potential sources of supply to meet future oil demand include currently producing fields in the OPEC+ countries, the U.S. and elsewhere, and new oil developments. With Russia being one of the world's largest oil producers, the ongoing conflict between Russia and Ukraine and associated sanctions has created uncertainty over the long-term supply outlook from that region.

BUSINESS AND CERTAIN INFORMATION ABOUT WOODSIDE**Overview**

Woodside is an ASX listed oil and gas company based in Perth, Western Australia. As a leading Australian LNG operator, Woodside operated 5% of global LNG supply in 2021. Woodside operates the majority of its assets and has over 65 years of experience in the oil and gas industry. Woodside's producing portfolio is primarily centered around the production of LNG from conventional offshore projects in Western Australia and also includes oil, condensate, LPG and domestic gas for Western Australian customers.

Woodside's operated LNG projects include two integrated projects, NWS Project (as defined below), Australia's largest LNG project, and Pluto LNG.

Offshore, Woodside operates two floating production storage and offloading ("FPSO") facilities, the Okha FPSO and Ngujima-Yin FPSO. Woodside also has a participating interest in Wheatstone LNG, which started production in 2017 and is the upstream operator of Julimar-Brunello, one of the Wheatstone LNG feeder fields.

In addition to its producing assets, Woodside is progressing the development of the Scarborough gas resource through new offshore facilities to a second LNG train ("Pluto Train 2") at the existing Pluto LNG onshore facility in Western Australia. Woodside is also connecting Pluto LNG with the North West Shelf Project through the Pluto-KGP Interconnector to create an integrated LNG production hub on the Burrup Peninsula. See the sections entitled "*Projects and Growth Options*" and "*Management's Discussion and Analysis of Financial Condition and Results of Operations of Woodside*" for Woodside's recent historic and ongoing principal capital expenditures and divestitures.

Internationally, Woodside is executing the Sangomar Oil Field Development in Senegal, having achieved FID in January 2020. This development is targeting first oil in 2023.

Recent Performance

Woodside benefited from a strong rebound in market conditions in 2021 following the challenges and uncertainty brought on by COVID-19 in 2020. Operating revenue rose 93% year-on-year to \$6,962 million primarily due to higher realized prices and an increase in the number of traded LNG cargoes.

| | | <u>2021</u> | <u>2020</u> | <u>2019</u> |

Overview of Assets

Woodside’s portfolio is centered around large-scale integrated LNG projects which are supplied by conventional offshore Western Australia fields. These projects also supply condensate and LPG to Australian and international markets and domestic gas to Western Australia. Woodside is the operator of all its key producing assets, apart from Wheatstone LNG, where it is operator of Julimar Brunello, one of the Wheatstone LNG feeder fields. Woodside’s key projects in execution are Scarborough and Pluto 2 development, which is a new LNG development through an expansion at Pluto LNG, and the Sangomar Oil Field Development in Senegal. Woodside holds further gas resources as future development opportunities.

| Asset | Description | Operator | Woodside ownership | 2021 Production MMboe(2) |
|---------------------------------|--|----------|--------------------|--------------------------|
| Pluto LNG | LNG facility processing gas from the subsea offshore Pluto, Xena and Pyxis gas fields in Western Australia. Gas is piped from the offshore Pluto-A platform to a 4.9 Mtpa LNG processing train. | Woodside | 90% | 44.3 |
| North West Shelf Project | LNG facility processing gas and condensate from the offshore North Rankin and Goodwyn-A offshore platforms and subsea tie-backs. Onshore facilities include 5 LNG trains with 16.9 Mtpa LNG export capacity, condensate trains and a domestic gas plant. | Woodside | 16.67% | 24.7 |

- (1) On 18 January 2022, Woodside completed the sale of a 49% non-operating participating interest in Pluto Train 2 to Global Infrastructure Partners (“GIP”). The transaction had an effective date of 1 October 2021.
- (2) Woodside’s share.
- (3) Woodside has commenced arrangements to formally exit all Blocks in which it participates in Myanmar, including AD-7, A-7, AD-1, AD-8 and A-6.
- (4) Woodside is retaining an upstream position in the Liard Basin by assuming full equity in 28 non-infrastructure related Liard Basin leases from Chevron Canada alongside 11 leases held on a 50% basis, to study low-cost natural gas, ammonia and hydrogen opportunities in Canada.

Producing Assets

Pluto LNG

Pluto LNG overview and history

Pluto LNG processes gas from six subsea wells on the offshore Pluto, Xena and Pyxis gas fields in Western Australia. Natural gas and condensate are piped through a 180 km trunkline to a single onshore facility, located between the NWS Project and the Dampier Port on the Burrup Peninsula. The offshore infrastructure includes the Pluto-A Offshore Platform, located 180 km north-west of Karratha in 85 meters of water.

The onshore infrastructure currently comprises a single LNG processing train (“Pluto Train 1”) and has an average annualized capacity of 4.9 Mtpa. The facility has been producing above nameplate capacity (~15% higher than the 4.3 Mtpa at start-up in 2012) due to LNG capacity improvements through process optimization and equipment upgrades utilizing new technology. Pluto LNG also produces condensate and domestic gas.

Pluto LNG is one of the world’s most technologically advanced LNG production facilities, with the Pluto gas field discovered by Woodside in 2005 and achieving first production seven years later. The project has delivered more than 500 cargoes.

In order to process Scarborough gas, Woodside is undertaking an expansion of Pluto LNG through the construction of a second gas processing train, Pluto Train 2, which would have a capacity of 5.0 Mtpa. Woodside announced on 22 November 2021 that final investment decisions have been made in relation to the Scarborough and Pluto Train 2 developments. The Scarborough and Pluto Train 2 developments also include the processing of 1.5 - 3.0 Mtpa LNG at Pluto Train 1 as well as utilizing the already built common facilities, which will require modifications to accommodate the Scarborough gas.

Woodside has also constructed the Pluto- KGP Interconnector, a pipeline connecting Pluto LNG and the North West Shelf’s Karratha Gas Plant (“KGP”). The infrastructure will allow the transfer of gas between the plants to optimize production across both facilities and enable future development of additional gas reserves.

Table of Contents

Ownership structure and joint ventures

The Pluto fields lie within permit WA-34-L. Woodside operates and has a 90% participating interest in the Pluto LNG joint venture. The other Pluto joint venture participants are Tokyo Gas Co., Ltd. and Kansai Electric Power Company, Incorporated, who each own 5% of the project and are also the key long-term LNG off-takers in the project. Woodside is the sole holder of exploration permit WA-404-P, and any commercial discoveries made in this permit are intended to be tied back to Pluto LNG.

Growth opportunities

Woodside is developing additional offshore resources and improvements to the onshore Pluto LNG facility. The Pyxis Hub Project comprises the subsea tie-back of the Pyxis, Pluto North and Xena fields to the Pluto offshore platform. Woodside has commenced installation of subsea equipment and is preparing for cold commissioning and start-up for the initial wells.

The Pluto water handling project was successfully installed on the Pluto offshore platform in late-2020. Once commissioned, the module will allow increased wet gas production. Hook-up and commissioning activities are continuing in 2022.

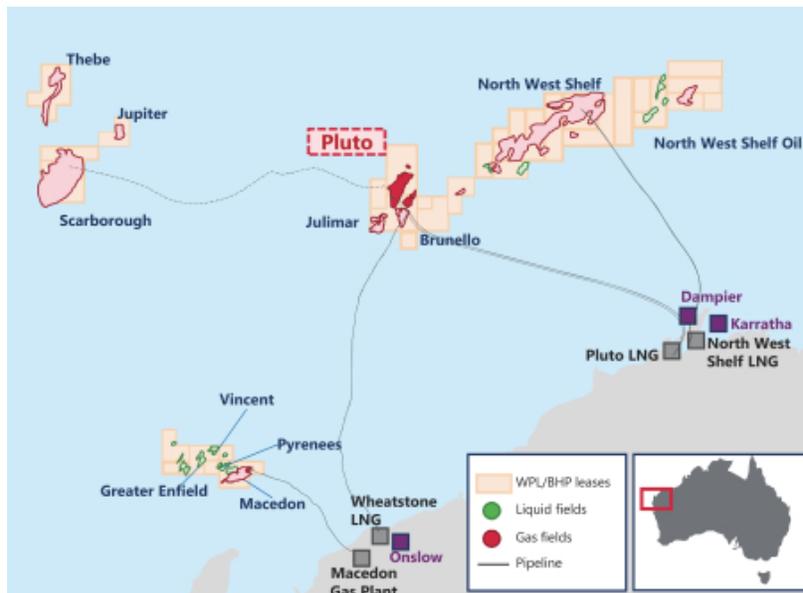

Figure 5–Pluto Project map in relation to Woodside and BHP Petroleum’ s Western Australia projects: Fields, blocks and pipelines shown in maps are stylized and not to scale. These maps are intended to show the general location and proximity of Woodside and BHP Petroleum’ s Carnarvon Basin assets as of the date of this prospectus. This map only shows the key Woodside and BHP Petroleum fields, leases and pipelines, which are referenced in the sections entitled “*Business and Certain Information About Woodside*” and “*Business and Certain Information About BHP Petroleum.*”

North West Shelf Project

North West Shelf Project overview and history

The North West Shelf project (“NWS Project”) consists of several offshore conventional gas and condensate fields in the Carnarvon Basin off the Pilbara coast of Western Australia and associated offshore and onshore infrastructure.

The NWS Project was formed in the 1960s and the first deliveries of gas were made to Perth via the Dampier to Bunbury natural gas pipeline (“DBNGP”) in 1984. The first LNG cargo was delivered to Japan in 1989 and the project has delivered in excess of 5,500 cargoes.

The North West Shelf production infrastructure consists of four offshore platforms; the North Rankin Complex (“NRC”) which comprises the North Rankin A and North Rankin B platforms; Goodwyn A Platform; and the Angel Platform. The offshore infrastructure also includes the subsea tiebacks of Greater West Flank and Perseus over Goodwyn to Goodwyn A and Persephone to NRC. Gas from these platforms is transported from the North Rankin Complex by two 135 km subsea trunklines onshore to the KGP on the Burrup Peninsula.

KGP is an advanced, integrated gas production system, producing LNG, domestic gas, condensate and LPG. The facility is located 1,260 km north of Perth, Western Australia and covers approximately 200 hectares. KGP has an LNG export capacity of 16.9 Mtpa, with five LNG processing trains, two domestic gas trains, five condensate stabilization units and three LPG fractionation units.

The NWS Project infrastructure provides an opportunity for processing third-party gas as the NWS reserves decline. In July 2020, NWS Project participants executed amendments to the joint venture governance documents which enable the processing of third-party gas through the NWS Project facilities.

In further support of processing gas supplied by other resource owners, the NWS Project participants executed fully-termed gas processing agreements (“GPAs”) in December 2020 for processing third-party gas

Table of Contents

through the NWS project facilities. GPAs were signed with Woodside Burrup Pty Ltd, in respect of gas from the Pluto fields, and with subsidiaries of Mitsui & Co Ltd and Beach Energy Limited, in respect of gas from the Waitsia Gas Project Stage 2. Execution of the GPAs is an important milestone in establishing NWS as a tolling facility, and is expected to unlock further value for the NWS Project participants.

In December 2020, the NWS Project participants took FID for the infrastructure required to receive gas from the Pluto-KGP Interconnector. See the section entitled “*Business and Certain Information About Woodside–Projects and Growth Options–Pluto-KGP Interconnector*” for further detail on the Pluto-KGP Interconnector.

The NWS Project participants are currently in the process of planning restoration of the no longer producing Echo-Yodel and Angel subsea wells and associated subsea infrastructure.

Ownership structure and joint ventures

The North West Shelf fields lie within permits WA-1-L, WA-23-L, WA-24-L, WA-3-L, WA-30-L, WA-5-L, WA-6-L, WA-7-R, WA-57-L, WA-58-L, WA-56-L, WA-2-L, WA-28-P, WA-4-L, WA-9-L, WA-16-L, WA-52-L, WA-53-L and WA-11-L. Ownership of the NWS Project and the associated production is split between several joint ventures with different participating interests. Woodside owns a one-sixth participating interest in the original NWS LNG joint venture, which was responsible for all LNG production and sale at the NWS Project. Other NWS LNG joint venture participants, which also own one-sixth participating interest, include BHP Petroleum, BP plc (“BP”), Chevron Corporation (“Chevron”), Royal Dutch Shell plc (“Shell”) and Japan Australia LNG (MIMI) Pty Ltd. CNOOC also has a participating interest in the NWS Project through the joint venture that is responsible for supplying LNG to the Guangdong Dapeng LNG Project in China (“China LNG JV,” Woodside participating interest: 12.5%). There are other joint ventures within the NWS Project, which are responsible for Western Australian domestic gas production (Woodside participating interest: 15.78%) and production of additional “equity lifted LNG” (the proportion of LNG which Woodside is entitled to lift and sell, in its own right, as a result of its participating interest in the relevant project) above joint contract quantities (Woodside participating interest: 15.78%).

Table of Contents

Dedicated LNG facilities, such as the gas treatment and liquefaction trains and LNG storage tanks, are owned on an equal one-sixth basis by six of the seven NWS Project participants (excluding CNOOC). All other assets, which are used in both the domestic gas and LNG processing activities, are owned in varying percentages (excluding CNOOC) based on JVP interests in the above joint ventures. The six NWS Project participants also separately own an equal share in ships that they utilize for the NWS Project.

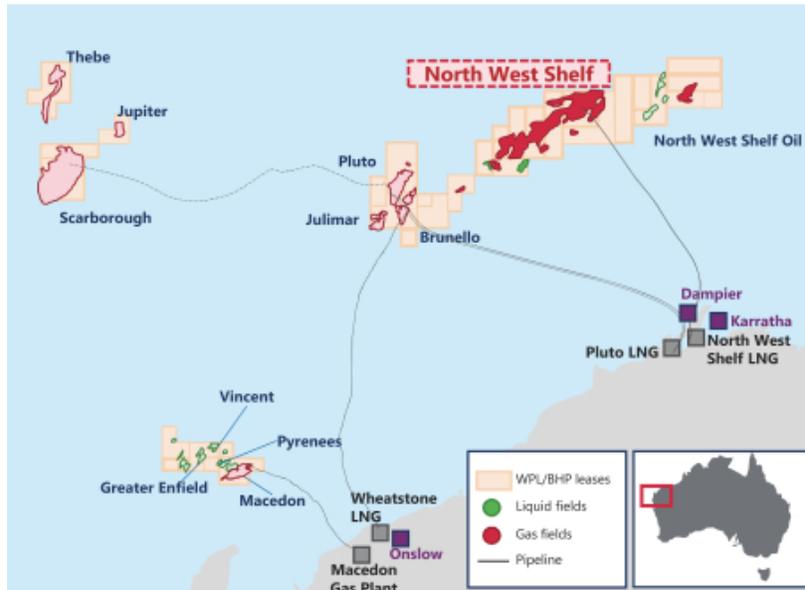

Figure 6–North West Shelf Project map in relation to Woodside and BHP Petroleum’ s Western Australia projects. Fields, blocks and pipelines shown in maps are stylized and not to scale. These maps are intended to show the general location and proximity of Woodside and BHP Petroleum’ s Carnarvon Basin assets as of the date of this prospectus. This map only shows the key Woodside and BHP Petroleum fields, leases and pipelines, which are referenced in the sections entitled “*Business and Certain Information About Woodside*” and “*Business and Certain Information About BHP Petroleum.*”

Principal producing fields

The principal fields in the North West Shelf are Goodwyn, North Rankin, Perseus and fields within the Greater Western Flank area. This group of fields is located approximately 135 km offshore of northwest Australia in water depths ranging between 80m and 130m. These fields are primarily natural gas fields, with the exception of Cossack Wanaea Lambert Hermes, which are predominantly oil fields (described further in the section entitled “*–Australia Oil.*” Total acreage for all permits/license areas covered by the NWS Project is 3,790 km².

Wheatstone

Wheatstone overview and history

Wheatstone is located in the offshore North Carnarvon Basin off the Pilbara coast of Western Australia. The project consists of an offshore platform located 220 km from Onslow, Western Australia, connected by a trunkline to an onshore plant consisting of two LNG trains (8.9 Mtpa capacity), a domestic gas plant (200 TJ/d capacity) and associated infrastructure. Feedgas to the LNG train is supplied by the Chevron-operated Wheatstone and Iago fields and the Woodside-operated Julimar and Brunello fields. The Wheatstone Project also produces condensate and domestic gas.

Production from Train 1 commenced in 2017, Onshore LNG Train 2 successfully commenced production in June 2018 and domestic gas production supply commenced on 5 March 2019. Since production started, over 500 LNG cargoes have been lifted for a total of ~79 million cubic meters of LNG produced, and over 65 condensate cargoes have been lifted for a total of 6.8 million cubic meters of condensate produced as at 31 December 2021.

Table of Contents

Ownership structure and joint venture

Chevron Australia Pty Ltd is the operator of the Wheatstone Project (64.14%). Woodside has a 13.0% participating interest, while the other joint venture participants are Kuwait Foreign Petroleum Exploration Company K.S.C. (“KUFPEC”) (13.4% participating interest), PE Wheatstone Pty. Ltd. (8.0% participating, a Japanese consortium) and Kyushu Electric Wheatstone Pty Ltd (1.46% participating interest). Woodside’s 13.00% interest in the Wheatstone Project includes the offshore platform, the pipeline to shore and the onshore plant, but excludes the Wheatstone and Iago fields and associated subsea infrastructure. Woodside also has a 65% operating interest in the Julimar Brunello Project and associated subsea infrastructure, with the remaining 35% owned by KUFPEC. The Julimar and Brunello fields lie within permit WA-49-L.

Australia Oil

Australia Oil overview and history

Woodside's Australia Oil operations consists of two facilities, Ohka FPSO and Ngujima-Yin FPSO, and their associated fields off the coast of Western Australia and are principally engaged in extracting oil.

Okha's Cossack Wanaea, Lambert and Hermes fields are located approximately 135 km north-west of Karratha, off the north-west coast of Western Australia. All fields lie on the inner continental shelf in water depths of 75 to 135 m. Okha has 13 wells, 10 able to flow and 5 currently flowing. The Wanaea and Cossack fields also pipe a stream of LPG-rich gas via North Rankin to the KGP for processing. Though also located on the North West Shelf, the Okha FPSO is reported as its own entity.

The Ngujima-Yin FPSO processes crude oil from the Vincent and Greater Enfield oil fields. The development consists of 13 Vincent oil wells, 6 Greater Enfield oil wells, 1 gas injector and back producer, 2 Vincent water injection wells and 6 customised water flood wells.

Woodside is currently in the process of planning restoration including the plugging and abandonment of the no longer producing Enfield and Balnaves oil fields. Stybarrow is operated by BHP, and Woodside continues to support the planning for decommissioning in accordance with the joint venture agreement.

Ownership structure and joint ventures

The Ngujima-Yin FPSO fields lie within permits WA-59-L and WA-28-L. The joint venture is owned by Woodside (60.0%, operator) and Mitsui E&P Australia Pty Ltd. (40.0%).

Table of Contents

The Okha FPSO fields lie within permits WA-11-L, WA-9-L and WA-16-L. The joint venture is owned by Woodside (33.33%), with BHP Petroleum, BP, Chevron, and MIMI, each having a one sixth participating interest.

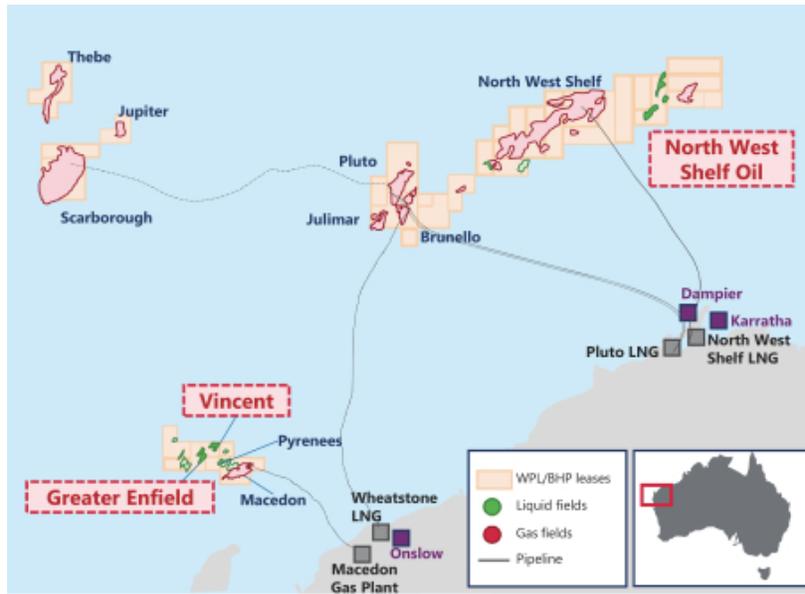

Figure 8–Australia Oil Project map in relation to Woodside and BHP Petroleum’s Western Australia projects. Fields, blocks and pipelines shown in maps are stylized and not to scale. These maps are intended to show the general location and proximity of Woodside and BHP Petroleum’s Carnarvon Basin assets as of the date of this prospectus. This map only shows the key Woodside and BHP Petroleum fields, leases and pipelines, which are referenced in the sections entitled “Business and Certain Information About Woodside” and “Business and Certain Information About BHP Petroleum.”

Projects and Growth Options

Scarborough and Pluto Train 2

Scarborough and Pluto Train 2 Project overview and history

On 22 November 2021 Woodside announced that final investment decisions have been made in relation to the Scarborough and Pluto Train 2 developments, including new domestic gas facilities to Pluto Train 2.

The Scarborough field is located approximately 375 km west-northwest offshore the Burrup Peninsula and contains dry gas. Scarborough is part of the Greater Scarborough resource, including the Jupiter and Thebe fields.

Woodside, as operator of the Scarborough Joint Venture, is developing the Scarborough gas resource through new offshore facilities connected by an approximately 430 km pipeline to the second LNG train ("Pluto Train 2") at the existing Pluto LNG onshore facility.

The Scarborough reservoir contains only around 0.1% CO₂. Scarborough gas processed through Pluto Train 2 is expected to be one of the lowest carbon intensity sources of LNG delivered to customers in north Asia, with first LNG cargo targeted for 2026.

In the second quarter of 2020, the Scarborough Offshore Project Proposal was accepted by the NOPSEMA and in the fourth quarter of 2020, Production Licences were granted for the WA-61-L (Scarborough) and WA-62-L (North Scarborough) titles. Following approval by the Western Australia Minister for Environment of the Scarborough Nearshore Ministerial Statement 1172 in the third quarter of 2021, all key primary environmental approvals were in place to support the final investment decisions.

In April 2022, further key primary approvals were received from the Commonwealth-Western Australian Joint Authority to support execution of the Scarborough Project. The Scarborough Joint Venture has received an offer for the pipeline licence to construct and operate the Scarborough pipeline in Commonwealth waters. Approval has also been granted for the Scarborough Field Development Plan ("FDP"), enabling Woodside to commence petroleum recovery operations from Petroleum Production Licences WA-61-L and WA-62-L. Following approval of the FDP, the Scarborough and Pluto Train 2 processing and services agreement executed in November 2021 is now unconditional. Woodside notes that proceedings have been commenced seeking judicial review of certain approvals. See the section entitled "*Risk Factors—The Merged Group operations will be subject to the risk of litigation or arbitration*" for more information.

The cost estimate for the entire development (including onshore processing) is \$12.0 billion, (100% project, nominal), comprising \$5.7 billion for the offshore component and \$6.3 billion for the onshore component, which includes capital expenditure for the development of Pluto Train 2, modifications to Pluto Train 1 and domestic gas processing facility.

Processing and services agreement

The Scarborough and Pluto Train 2 joint ventures have executed a binding processing and services agreement ("PSA") for the processing of Scarborough gas through the Pluto LNG Facilities. The PSA provides for the Scarborough Joint Venture to access LNG and domestic gas processing services at a rate of up to 8 million tonnes per annum of LNG and up to 225 terajoules per day of domestic gas for an initial period of 20 years, with options to extend.

The PSA is supported by associated processing and services agreements executed with the Pluto Joint Venture in respect of access to the existing Pluto LNG facilities.

About Scarborough

Scarborough lies within permits WA-61-L and WA-62-L. It is owned by Woodside (73.5%, operator) and BHP (26.5%). Woodside acquired its 73.5% participating interest in Scarborough through two acquisitions. Initially, Woodside acquired 25% of Scarborough from BHP in September 2016. This was followed by an

Table of Contents

acquisition of 50% of Scarborough from ExxonMobil in March 2018 after which Woodside assumed operatorship. Following these transactions, in February 2020 Woodside and BHP agreed to unitise participating interests across the Scarborough (WA-1-R) and North Scarborough (WA-62-R) titles, resulting in Woodside's current interest of 73.5% participating interest in each title.

Woodside also owns an equal 50% participating interest with BHP Petroleum in the Thebe (WA-63-R) and Jupiter (WA-61-R) fields, which are part of the Greater Scarborough fields and options for potential future subsea tie-backs to the Scarborough Floating Production Unit ("FPU").

About Pluto LNG and Pluto Train 2

On 15 November 2021, Woodside entered into a sale and purchase agreement with GIP for the sale of a 49% non-operating participating interest in the Pluto Train 2 Joint Venture. The effective date of the transaction is 1 October 2021 and completion occurred on 18 January 2022. Pluto Train 2 is a key component of the proposed Scarborough development and includes a new LNG train and domestic gas facilities to be constructed at the existing Pluto LNG onshore facility. The development of Pluto Train 2 is supported by the PSA entered into between the Pluto Train 2 and Scarborough joint ventures. In addition to its 49% share of capital expenditure, the agreement requires GIP to fund an additional amount of construction capital expenditure of approximately \$822 million. Woodside's joint venture capital contributions will be reduced accordingly. The estimated capital expenditure for the development of Pluto Train 2 from 1 October 2021 is \$5.6 billion (100% project). If the total capital expenditure incurred is less than \$5.6 billion, GIP will pay Woodside an additional amount equal to 49% of the under-spend. In the event of a cost overrun, Woodside will fund its 51% share plus up to approximately \$822 million in respect of the GIP's 49% share of any overrun (after which the cost overruns are borne in accordance with their respective equity share). Delays to the expected start-up of production will result in payments by Woodside to GIP in certain circumstances.

Figure 9—Scarborough Project map in relation to Woodside and BHP Petroleum's Western Australia projects. Fields, blocks and pipelines shown in maps are stylized and not to scale. These maps are intended to show the general location and proximity of Woodside and BHP Petroleum's Carnarvon Basin assets as of the date of this prospectus. This map only shows the key Woodside and BHP Petroleum fields, leases and pipelines, which are referenced in the sections entitled "Business and Certain Information About Woodside" and "Business and Certain Information About BHP Petroleum."

| Targeted first LNG cargo | 2026 |
| Production wells | 8 planned in Phase 1 with 13 total across life of field |
| Subsea pipelines | 430 km trunkline to Pluto LNG |

A sell-down process has been launched with the objective of reducing Woodside's equity interest in Scarborough to approximately 50%, subject to receiving competitive proposals from high-quality counterparties.

Pluto-KGP Interconnector

Pluto-KGP Interconnector overview

The Pluto-KGP Interconnector is a 3.2 km pipeline which connects Pluto with KGP, providing access for other resource owners' gas to be processed at KGP. The Pluto-KGP Interconnector supports the accelerated production of gas from the first phase of Pluto's Pyxis Hub by enabling it to be processed at KGP. Processing of Pluto gas at KGP commenced in March 2022. The design capacity of the pipeline is more than 5 Mtpa.

Sangomar

Sangomar Oil Field Development overview and history

The Sangomar Oil Field Development Phase 1 (the "Sangomar Oil Field Development"), containing both oil and gas, is located 100 km south of Dakar and will be Senegal's first offshore oil development. The project is designed to allow subsequent development phases, including options for potential gas export to shore and future subsea tiebacks from other reservoirs and fields. Phase 1 total cost is estimated to be \$4.6 billion (100% project).

On 9 January 2020, Woodside Energy Finance (UK) Ltd entered into a secured loan agreement with Societe Des Petroles Du Senegal ("Petrosen") (the Senegal National Oil Company), to provide Petrosen with up to \$450 million for the purpose of funding capital construction costs associated with the Sangomar Oil Field Development. The facility has a maximum term of 12 years and semi-annual repayments of the loan are due to

[Table of Contents](#)

commence at the earlier of 12 months after ready for start up or 30 June 2025. The carrying amount of the loan receivable is \$335 million at 31 December 2021 (31 December 2020: \$113 million), which approximates its fair value.

Woodside made a FID on the Sangomar Field Development Phase 1 in January 2020, and the development drilling program commenced in July 2021. First oil production is currently targeted for 2023.

Ownership structure and joint venture

On 4 September 2020 Woodside Energy (Senegal) B.V. executed a sale and purchase agreement to acquire Capricorn Senegal Limited' s entire participating interest in the Rufisque, Sangomar and Sangomar Deep ("RSSD") joint venture. The transaction completed on 22 December 2020.

On 19 January 2021 Woodside Energy (Senegal) B.V. executed a sale and purchase agreement with FAR Limited and FAR Senegal RSSD SA (FAR) to acquire FAR Senegal RSSD SA' s entire participating interest in the RSSD joint venture. The transaction completed on 7 July 2021.

Woodside currently owns an 82% participating interest in the Sangomar Oil Field Development and a 90% participating interest in the remaining RSSD evaluation area. Woodside' s joint-venture partner is Petrosen. The project is operated under Senegal' s Production Sharing Contract regime.

Figure 10–Sangomar Project map. Fields and blocks and pipelines are stylized and not to scale. This map only shows Woodside fields, leases and pipelines which are referenced in the section entitled “*Business and Certain Information About Woodside.*”

Table of Contents

Offshore infrastructure

Sangomar

| | |
|---------------------------------|--|
| Location | 100 km south of Dakar in Senegal |
| Processing facility type | Stand-alone FPSO facility |

| Product | Oil and gas |
| Production capacity | Oil: 100 kbb/d |
| FID | January 2020 |
| Targeted first oil | 2023 |
| Production wells | 23 planned for Phase 1 |

A sell-down process has been launched with the objective of reducing Woodside's equity interest in the RSSD joint venture to a targeted 40-50%, subject to receiving competitive proposals from high-quality counterparties.

Other Development Options

Browse

Browse Project overview and history

The Browse resource is located in the offshore Browse Basin, approximately 425 km north of Broome in Western Australia, comprising of the Brecknock, Calliance and Torosa fields.

Woodside is investigating opportunities to support commercialization of the Browse resource, including the assessment of the technical, commercial and regulatory feasibility of carbon capture and storage.

Woodside is targeting front-end engineering design entry in 2023.

Ownership structure and joint venture

Browse lies within permits WA-28-R, WA-29-R, WA-30-R, WA-31-R and WA-32-R. It is owned by Woodside (30.60%, operator), Shell (27.00%), BP (17.33%), MIMI (14.40%) and China National Petroleum Company (10.67%).

Myanmar

Block A-6 is in the Rakhine Basin, offshore Myanmar. Woodside condemns human rights violations and has watched with growing concern developments in Myanmar since the events of 1 February 2021. Woodside supports the people of Myanmar and hopes for a peaceful journey to democracy. Woodside has commenced arrangements to formally exit all Blocks in which it participates in Myanmar including AD-7, A-7, AD-1, AD-8 and A-6.

Sunrise

Overview

The Sunrise development comprises the Sunrise and Troubadour gas and condensate fields, collectively known as Greater Sunrise. The fields are located approximately 150 km south-east of Timor-Leste and 450 km north-west of Darwin, Australia.

Table of Contents

The Sunrise Joint Venture remains committed to the development of Greater Sunrise provided there is fiscal and regulatory certainty necessary for commercial development to proceed.

Ownership structure and joint venture

Sunrise holds 78.9% in NT/RL2, 1% in NT/RL4, 20% in PSC 03-19 and 0.1% in PSC 03-20. Titleholders are Woodside (33.44%, Operator), Timor GAP, E.P. (56.56%) and Osaka Gas Co., Ltd. (10.00%).

Kitimat

Overview

Woodside announced in May 2021 that it will exit its 50% non-operated participating interest in the proposed Kitimat LNG development, located in British Columbia, Canada. Exit activities progressed as planned with commercial agreement terminations, lease relinquishment and remediation planning well underway. The sale of the Pacific Trail Pipeline route to Enbridge Inc. was completed in December 2021.

Woodside is investigating potential future natural gas, ammonia, and hydrogen opportunities that could utilize the Liard Basin upstream gas assets.

Exploration

Woodside maintains a global exploration and appraisal program designed to enhance future growth. Woodside looks for material positions in world-class assets that are aligned with its capabilities and current portfolio, targeting exploration opportunities close to existing infrastructure and low-cost commercialization. Woodside's active exploration regions are in Australia, Senegal, South Korea and Congo. Woodside's exploration activities in Australia are focused primarily on low cost near field and infill opportunities. Outside Australia, Woodside's exploration efforts are focused around existing hubs in proven or emerging basins.

Woodside has been consolidating global exploration activities as macroeconomic factors evolve, maintaining a strategy of divesting low-value licenses while continuing to assess sustainable growth opportunities.

Description of Property

Woodside's head office building, located in Western Australia at Mia Yellagonga, 11 Mount Street, Perth, is leased.

Table of Contents

The following table sets out the location, capacity and Woodside's ownership interest in the platforms described below.

| Asset | Location | Woodside interest (%) | 100% capacity | Woodside operated |
|----------------------|--|---|---|---|
| Pluto LNG | Offshore and onshore Western Australia | 90% | Pluto Platform: 1,320 MMscf/d raw gas Pluto LNG: 4.9 Mtpa LNG, 25 TJ/d domestic gas, 1,140 tonnes/d condensate | Yes |

Reserves and Resources

Drilling and other exploratory and development activities

The number of crude oil and natural gas wells drilled and completed for each of the last three years was as follows:

| | Net exploratory wells | | Net development wells | | Total | |
|------------------------------------|-----------------------|------|-----------------------|------------|-------|-------|
| | Productive | Dry | Total | Productive | Dry | Total |
| Year ended 31 December 2021 | | | | | | |
| Australia | – | – | – | 0.64 | 0 | 0.64 |
| Other (1) | – | 1.45 | 1.45 | 0.82 | 0 | 0.82 |
| Total | – | 1.45 | 1.45 | 1.46 | 0 | 1.46 |
| Year ended 31 December 2020 | | | | | | |
| Australia | – | – | – | 4.35 | 0.65 | 5 |
| Other | – | – | – | – | – | – |
| Total | – | – | – | 4.35 | 0.65 | 5 |
| Year ended 31 December 2019 | | | | | | |
| Australia | – | 0.16 | 0.16 | 6.3 | – | 6.3 |
| Other (2) | – | 0.65 | 0.65 | – | – | 0.65 |
| Total | – | 0.81 | 0.81 | 6.3 | – | 7.11 |

(1) Other is Senegal and Myanmar

(2) Other is Peru and Bulgaria

As set out in this section, the number of wells drilled refers to the number of wells completed at any time during the respective year, regardless of when drilling was initiated. Completion refers to the installation of permanent equipment for production of oil or gas, or, in the case of a dry well, reporting to the appropriate authority that the well has been abandoned.

An exploratory well is a well drilled to find oil or gas in a new field or to find a new reservoir in a field previously found to be productive of oil or gas in another reservoir. A development well is a well drilled within the limits of a known oil or gas reservoir to the depth of a stratigraphic horizon known to be productive.

A productive well is an exploratory, development or extension well that is not a dry well. Productive wells include wells in which hydrocarbons were encountered and the drilling or completion of which, in the case of exploratory wells, has been suspended pending further drilling or evaluation. A dry well (hole) is an exploratory, development, or extension well that proves to be incapable of producing either oil or gas in sufficient quantities to justify completion as an oil or gas well.

Present development activities continuing as of 31 December 2021

| | Gross development wells | Net development wells | Waterflood in process of being installed | Pressure maintenance operations being installed |
|-----------|-------------------------|-----------------------|--|---|
| Australia | 4 | 0.7 | – | – |
| Other | 1 | 0.8 | – | – |
| Total | 5 | 1.5 | – | – |

Table of Contents

Three GWF3 development wells and a Lambert Deep development well in the North West Shelf were drilled and completed during 2021, with well operations completed in 2022. Subsea installation is continuing with production expected in 2022. One Sangomar well was drilled and completed during 2021, with the remainder of the drilling campaign focusing on batch drilling. The Sangomar drilling campaign will continue during 2022 and 2023 supporting a target production start up in 2023.

The number of wells drilled refers to the number of wells completed at any time during the respective year, regardless of when drilling was initiated. Completion refers to the installation of permanent equipment for production of oil or gas, or, in the case of a dry well, and reporting to the appropriate authority that the well has been abandoned.

An exploratory well is a well drilled to find oil or gas in a new field or to find a new reservoir in a field previously found to be productive of oil or gas in another reservoir. A development well is a well drilled within the limits of a known oil or gas reservoir to the depth of a stratigraphic horizon known to be productive.

A productive well is an exploratory, development or extension well that is not a dry well. Productive wells include wells in which hydrocarbons were encountered and the drilling or completion of which, in the case of exploratory wells, has been suspended pending further drilling or evaluation. A dry well (hole) is an exploratory, development, or extension well that proves to be incapable of producing either oil or gas in sufficient quantities to justify completion as an oil or gas well.

Oil and gas properties, wells, operations, and acreage

The following tables show the number of gross and net productive crude oil and natural gas wells and total gross and net developed and undeveloped oil and natural gas acreage as of 31 December 2021. A gross well or acre is one in which a working interest is owned, while a net well or acre exists when the sum of fractional working interests owned in gross wells or acres equals one. Productive wells are producing wells and wells mechanically capable of production. Developed acreage is comprised of leased acres that are within an area by or assignable to a productive well. Undeveloped acreage is comprised of leased acres on which wells have not been drilled or completed to a point that would permit the production of economic quantities of oil and gas, regardless of whether such acres contain proved reserves.

The number of productive crude oil and natural gas wells in which Woodside held an interest at 31 December 2021 was as follows:

| | <u>Crude oil wells</u> | | <u>Natural gas wells</u> | | <u>Total</u> | |
|-----------|------------------------|-------------|--------------------------|-------------|--------------|-------------|
| | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> |
| Australia | 24 | 13.1 | 68 | 21.2 | 92 | 34.3 |
| Other | - | - | - | - | - | - |
| Total | <u>24</u> | <u>13.1</u> | <u>68</u> | <u>21.2</u> | <u>92</u> | <u>34.3</u> |

Of the productive crude oil and natural gas wells, 8 (net: 2.2) operated developed wells had multiple completions. The number of wells with multiple completions refers to wells that have downhole equipment installed that allows zonal isolation or controlled commingling of production as permitted and approved by the applicable regulator.

Table of Contents

Developed and undeveloped acreage (including both leases and concessions) held at 31 December 2021 was as follows:

| Thousands of acres | Developed acreage | | Undeveloped acreage | |
|--------------------|-------------------|------------|---------------------|--------------|
| | Gross | Net | Gross | Net |
| Australia | 1,050 | 360 | 1,158 | 733 |
| Other (1) | – | – | 1,209 | 526 |
| Total | 1,050 | 360 | 2,367 | 1,259 |

(1) Undeveloped acreage in Other consists of the Sangomar Development in Senegal, Timor-Leste and Canada

It is not expected that any of the acreage will expire in the years ending 31 December 2022, 2023 and 2024, respectively, if Woodside does not establish production or take any other action to extend the terms of the licenses and concessions.

Delivery commitments

Woodside has contracts that require delivery of fixed volumes of crude oil, condensate, natural gas and NGL. Woodside intends to fulfill its short-term and long-term obligations with its production or from purchases of third-party volumes.

As of 31 December 2021, delivery commitments were as follows:

| Year Ending 31 December | Natural Gas (MMBtu) | Crude Oil (MMbbl) | Condensate (MMbbl) | NGL (MMbbl) |
|---|------------------------|----------------------|-----------------------|----------------|
| 2022 to 2026 | 1,698,324,768 | 4.3 | – | – |
| Thereafter | 2,435,917,399 | – | – | – |
| Total oil and gas delivery commitments | 4,134,242,168 | 4.3 | – | – |

Woodside Production

Table of Contents

| | 2021 | 2020 | 2019 |
|--|--------------|--------------|--------------|
| Average sales price | | | |
| Crude oil and condensate (\$ per barrel) | | | |
| NWS | 75.40 | 42.24 | 59.13 |
| Pluto | 74.08 | 36.86 | 62.02 |
| Wheatstone | 71.19 | 40.38 | 60.23 |
| Australia Oil (NY and Okha) | 79.16 | 44.43 | 65.58 |
| Total crude oil and condensate | 76.43 | 42.24 | 62.18 |
| Natural gas (\$ per thousand cubic feet) | | | |
| NWS | 10.31 | 5.14 | 7.74 |
| Pluto | 10.13 | 5.41 | 8.67 |
| Wheatstone | 9.69 | 5.16 | 8.36 |
| Australia Oil (NY and Okha) | – | – | – |
| Total natural gas | 10.12 | 5.28 | 8.27 |
| Average production cost (\$ per boe) | | | |
| NWS | 13.08 | 6.66 | 10.19 |
| Pluto | 4.94 | 4.82 | 6.25 |
| Wheatstone | 5.04 | 5.13 | 4.31 |
| Australia Oil (NY and Okha) | 13.02 | 13.81 | 12.86 |
| Total average production cost (4) | 7.93 | 6.30 | 7.77 |

- (1) Natural gas includes LNG, domestic gas and LPG
- (2) Total barrels of oil equivalent (boe) conversion is based on the following: 5,700 standard cubic feet (scf) of natural gas equals one boe. This conversion ratio is based on the heating value of supplied LNG and domestic pipeline gas. The use of a conversion factor of 6.0 would be more appropriate where the sales product contains more inerts as might be the case with assets that supply pipeline gas with lower heating value requirements. Based on an assessment of past, current and future heating value requirements for gas demand for Woodside's facilities, Woodside believes that a ratio of 5.7 is appropriate.
- (3) The total 2021 production volume of 92.1 MMboe compares to sales production volume of 91.1 MMboe. The sales production volume is the basis for the average realized sales price.
- (4) Average production costs include direct and indirect costs relating to the production of total hydrocarbons and the foreign exchange effect of translating local currency denominated costs into U.S. dollars but excludes cost to transport produced hydrocarbons to the point of sale, ad valorem and severance taxes. The 2021 total average production cost of \$7.93 per boe compares to \$5.30 per boe if royalties, excise and other indirect costs were excluded.

Woodside Petroleum Reserves

All proved undeveloped reserves are associated with projects included in Woodside's corporate plan which is discussed by the Executive Committee annually and approved by the Chief Executive Officer.

2021 proved reserves

Production during 2021 totaled 92.1 MMboe which was 8.7 MMboe lower than the previous year primarily due to overall natural production decline. 10.2 MMboe (11.2%) of production was associated with downstream operations fuel.

Net additions to reserves totaled 931.5 MMboe mostly due to first time reserves classification of the Scarborough development (the "Scarborough LNG Project") and the Sangomar Oil Field Development. As of 31 December 2021, proved reserves totaled 1,431.6 MMboe.

[Table of Contents](#)

Extension and discoveries

The Scarborough LNG Project took FID during 2021 and this contributed to a significant addition of 901.9 MMboe of proved reserves. The Sangomar Oil Field Development is in execution phase and accounts for 81.2 MMboe of proved reserves. Other minor extensions included intersection of previously unpenetrated sands in the Julimar and Goodwyn fields bringing the total extensions to 984.2 MMboe.

Revisions

In Australia, revisions increased proved reserves by 39.5 MMboe primarily due to improved production performance in the Pluto field, Greater Enfield and NWS oil fields partially offset by poorer than expected production performance in the Brunello and NWS gas fields.

Improved Recovery Revisions

There were no improved recovery revisions during the year.

Production

Production during the year totalled 92.1 MMboe, all in Australia.

Table of Contents

- (1) LPG sales quantities are less than 1% of total reserves and are reported as natural gas.
- (2) Barrel oil equivalent conversion based on 5,700 scf of natural gas equals 1 boe.
- (3) Production includes volumes consumed in downstream operations (excludes upstream fuel and flare).
- (4) Proved reserves as of YE2021 include an estimated 141.5 million barrels equivalent expected to be consumed as fuel in downstream operations in Australia and Sangomar.
- (5) Sangomar asset is governed by a Production Sharing Contract arrangement with the Senegal Government and reported proved reserves reflect Woodside's economic interest in this asset.

2021 proved undeveloped reserves

At 31 December 2021, Woodside's proved undeveloped reserves were 1,075.3 MMboe, which is 75.1% of the reported proved reserves of 1,431.6 MMboe. This is an increase in proved undeveloped reserves of 938.5 MMboe from 136.8 MMboe as of 31 December 2020 and is primarily due to first reserves classification for the Scarborough LNG Project (classification year 2021) and the Sangomar Oil Field Development (classification year 2021).

During 2021, a total of 58.6 MMboe proved undeveloped reserves were converted to proved developed reserves after completion of development activities associated with the Pyxis well, Pluto North and Julimar Development Phase 2. These developments incurred a total capital expenditure of \$816 million.

Below is a progress summary as of 31 December 2021 for projects associated with proved undeveloped reserves expected to be converted to developed within five years of initial proved reserves classification. These projects total 1,035.5 MMboe of proved undeveloped reserves, which is 96% of Woodside's total proved undeveloped reserves of 1075.3 MMboe.

Pluto Water Handling (13.9 MMboe) project was 97% complete with an estimated net spend of \$140 million.

Xena-2 well (15.8 MMboe), as part of the Pyxis Hub project, was 80% complete with, two of the total three wells, Pyxis 1 and Pluto North online during 2021.

North West Shelf projects, Greater Western Flank 3 and Lambert Deep subsea tiebacks (10 MMboe) were 87% complete with an estimated net spend of \$93 million.

Pluto well PLA08 (12.6 MMboe), identified as an up dip subsea tie-back gas opportunity following 4D seismic survey and reservoir studies. Funding for develop/FEED phases and long lead items approved and contract awarded for subsea hardware.

Scarborough LNG Project (901.9 MMboe; classification year 2021) which took FID in 2021, was 10% complete with estimated net spend of close to \$440 million relating to subsea, pipeline, FPU and wells. An estimated 2% of the reserves, associated with Phase 2 drill wells, is expected to be developed after five years of classification date.

The Sangomar Oil Field Development in Senegal (81.2 MMboe; classification year 2021) is currently in execution phase and expected to commence production in 2023. The project was 48% complete with FPSO construction and drilling continuing with estimated net spend of \$1,800 million.

Below is a progress summary as of 31 December 2021 for projects associated with proved undeveloped reserves expected to be converted to developed reserves after five years of initial classification date. These projects total 39.8 MMboe of proved undeveloped reserves which is 4% of the reported proved undeveloped reserves of 1,075.3 MMboe.

Julimar Development Phase 3 (total four wells planned with two wells associated with proved undeveloped reserves) and Phase 4 (two wells and a mercury recovery unit planned and associated with proved undeveloped reserves) with net 5.7 and 5.0 MMboe of associated proved reserves, respectively.

Table of Contents

These phases would provide reserves and deliverability to fill available LNG plant capacity and satisfy longer term gas contracts. Planned timing of these projects relates to expectation of ullage based on allocated capacity in the Wheatstone LNG plant.

Wheatstone compression Stages 2 and 3 include booster compression on the Wheatstone platform, at an estimated net cost of \$40 million and developing 12.7 MMboe of proved reserves from the Julimar Brunello wells (first reserves classification year 2021)

Pluto tail gas development involves Pluto offshore and onshore LNG Train 1 modifications to allow minimum field and facilities turnaround rate with an associated 16.4 MMboe proved reserves. Planned timing of this project relates to field performance and ullage in Pluto Train 1.

2020 proved undeveloped reserves

At 31 December 2020, Woodside's proved undeveloped reserves were 136.8 MMboe, which is 27.4% of the reported proved reserves of 500.1 MMboe. This is an increase in proved undeveloped reserves of 1.8 MMboe from 135.0 MMboe as of 31 December 2019.

Below is a progress summary as of 31 December 2020 for projects associated with proved undeveloped reserves expected to be converted to developed within five years of initial booking. These projects total 108 MMboe of proved undeveloped reserves which is 79% of the reported proved undeveloped reserves of 136.8 MMboe.

Pluto Water Handling (PWH) project was 90% complete with a net spend of \$110 million

Pyxis Hub subsea tie-back development comprises three wells, Pyxis, Pluto North and Xena 2, for processing gas via the Pluto LNG Train 1, was progressed during 2020. The project was 50% complete with an estimated net \$300 million spent. Well drilling and completion operations on Pyxis and Pluto North were complete.

The PWH and Pyxis Hub projects are expected to develop net 73 MMboe of 1P reserves.

Julimar Development Phase 2, developing 26 MMboe 1P reserves (subsea tie-back with gas being processed via the Wheatstone LNG facility) was approximately 80% complete with an estimated spend of net \$340 million. Well drilling and completion operations were complete.

Others include North West Shelf projects, Greater Western Flank 3 and Lambert Deep subsea tiebacks developing net 9 MMboe 1P reserves. These were 20% complete with an estimated net spend of \$24 million.

Below is a progress summary as of 31 December 2020 for projects associated with proved undeveloped reserves expected to be converted to developed after five years of initial booking. These projects total 28 MMboe of proved undeveloped reserves which is 21% of the reported proved undeveloped reserves of 136.7 MMboe.

Julimar Development Phase 3 (total four wells planned with two wells associated with proved undeveloped reserves) and Phase 4 (two wells and a mercury recovery unit planned and associated with proved undeveloped reserves) with net 5 and 8 MMboe of associated proved reserves, respectively. These phases would provide reserves and deliverability to fill available LNG plant capacity and satisfy longer term gas contracts. Planned timing of these projects relates to expectation of ullage based on allocated capacity in the Wheatstone LNG plant.

Pluto tail gas development involves Pluto offshore and onshore LNG Train 1 modifications to allow minimum field and facilities turnaround rate with an associated 15 MMboe proved reserves. Planned timing of this project relates to field performance and ullage in Pluto Train 1.

2019 proved undeveloped reserves

At 31 December 2019, Woodside had 135.0 MMboe of proved undeveloped reserves, which represented 23.0% of year-end 2019 proved reserves of 586.1 MMboe. The proved undeveloped reserves at 31 December

Table of Contents

2019 reflect a net decrease of 19.1 MMboe from the 154.1 MMboe reported at 31 December 2018. The reclassification of 25.7 MMboe to developed reserves was due to the Greater Enfield oil and Goodwyn gas wells coming on line.

Qualified Petroleum Evaluator Sign Off

Preparation of Woodside Reserve Estimates

Woodside's reserve estimates as of 31 December 2021, 2020 and 2019 included herein are based on evaluations prepared by the independent petroleum engineering firm Netherland, Sewell & Associates, Inc. in accordance with Standards Pertaining to the Estimation and Auditing of Oil and Gas Reserves Information promulgated by the Society of Petroleum Evaluation Engineers and definitions and guidelines established by the SEC.

Netherland, Sewell & Associates, Inc. provides worldwide petroleum property analysis services for energy clients, financial organizations and government agencies. Netherland, Sewell & Associates, Inc. was founded in 1961 and performs consulting petroleum engineering services under Texas Board of Professional Engineers Registration No. F-2699. The technical persons primarily responsible for preparing the estimates presented herein meet the requirements regarding qualifications, independence, objectivity, and confidentiality set forth in the SPE Standards. Joseph M. Wolfe, a Licensed Professional Engineer in the State of Texas, has been practicing consulting petroleum engineering at Netherland, Sewell & Associates, Inc. since 2013 and has over 5 years of prior industry experience. John G. Hattner, a Licensed Professional Geoscientist in the State of Texas, has been practicing consulting petroleum geoscience at Netherland, Sewell & Associates, Inc. since 1991 and has over 11 years of prior industry experience. They are independent petroleum engineers, geologists, geophysicists, and petrophysicists; who do not own an interest in these properties nor are they employed on a contingent basis.

Reserves assessments have been made using deterministic methods such as decline curve analysis where sufficient historical production and pressure data is available. Probabilistic methodologies, using petrophysical electric logs, 3D and 4D seismic data and 3D static geological and dynamic modelling is also used to complement deterministic analysis and used where there is insufficient or no historical production data.

Woodside's internal staff of petroleum engineers and geoscience professionals work closely with Woodside's independent reserve engineer to ensure the integrity, accuracy and timeliness of data furnished to such independent reserve engineer in their preparation of reserve estimates. The accuracy of any reserve estimate is a function of the quality of available data and of engineering and geological interpretation. As a result, the estimates of different engineers often vary. In addition, the results of drilling, testing and production may justify revisions of such estimates. Accordingly, reserve estimates often differ from the quantities of oil, natural gas and NGL that are ultimately recovered. See "*Risk Factors*" appearing elsewhere in this prospectus.

The Vice President of Reservoir Management, Mr. Jason Greenwald, has provided an oversight of the reserves assessment and reporting processes. Mr. Greenwald is a full-time employee of Woodside and a member of the Society of Petroleum Engineers. Mr. Greenwald's qualifications include a Bachelor of Science (Chemical Engineering) from Rice University, Houston, Texas, and more than 20 years of relevant experience. Mr. Greenwald has the qualifications and experience required to act as a qualified petroleum reserves evaluator under the ASX Listing Rules. No part of the individual compensation is dependent on reported reserves. Reported reserves are internally reviewed by the Woodside Reserves Committee

The Vice President Reservoir Management, Woodside Reserves Coordinator and the Woodside Reserves Committee ("WRC") advise management on the compliance of all new resource bookings and material revisions with respect to Woodside's PRMP. The WRC comprises senior management from relevant business areas and reports to the Executive Vice President Operations. The WRC reviews compliance and recommends new reserve bookings and other material revisions of petroleum resources in which Woodside holds an interest. The WRC, Executive Vice President Operations and the Chief Executive Officer recommend the Annual Reserves and Resource Statement to the Board for approval.

[Table of Contents](#)

Notes to petroleum estimates

Woodside reports its reserves net of the fuel and flare required for production, processing and transportation up to a reference point. For Woodside's offshore oil projects, the reference point is defined as the outlet of the FPSO facility, while for its onshore gas projects the reference point is defined as the inlet to the downstream (onshore) processing facility.

Woodside uses both deterministic and probabilistic methods for estimation of its petroleum resources at the field and project levels. Unless otherwise stated, all Woodside petroleum estimates reported at the company or region level are aggregated by arithmetic summation by category.

ESG

In 2021, Woodside maintained its 'AAA' leader rating in the Morgan Stanley Capital International ESG ratings for the eighth consecutive year.

Environmental

Strong environmental performance is essential to Woodside's success and continued growth, Woodside strives to reduce its environmental footprint across all phases of the operating life cycle with a key emphasis on learning and continuous improvement.

Woodside's approach to environmental management is governed by its Health, Safety and Environment (HSE) Policy and Environmental Management Approach that apply to all activities under Woodside operational control. Woodside's environmental risk management process allows it to consistently address the environmental impacts and risks associated with Woodside's activities across all operating locations and regulatory regimes.

Woodside relies on evidence-based scientific knowledge to support its understanding of the environments where it operates. This informs Woodside's risk evaluations of its potential impacts on biodiversity and the local environment and is critical to making the right environmental decisions.

Woodside regularly reassess environmental impacts and risks of operations across its portfolio at the activity level. This is to ensure emerging scientific understanding and best practices are captured in these assessments, ultimately resulting in more robust environmental outcomes. Woodside's impact and risk assessment methodologies are guided by the principles in the International Standard ISO31000 2018 Risk Management Guideline.

Climate Change

Woodside's climate strategy is composed of reducing its net equity Scope 1 and 2 greenhouse gas emissions, and investing in the products and services that are intended to help customers reduce their emissions.

Emissions Reductions

Woodside sets its Scope 1 and 2 greenhouse gas emissions targets on a net equity basis. This ensures that the scope of emissions reduction targets is aligned with the actual footprint of investments and its expected use of offsets. Equity emissions reflect the greenhouse gas emissions from operations according to Woodside's share of equity in the operation. The equity share reflects economic interest, which is the extent of rights a company has to the risks and rewards flowing from an operation. Woodside also intends to set its emissions reduction targets on a net basis, allowing for both direct emissions reductions from its operations and emissions reductions achieved from the use of offsets.

Table of Contents

Woodside has established near and medium-term targets to reduce its net equity share Scope 1 and 2 greenhouse gas emissions by 15% by 2025 and 30% by 2030 relative to the gross annual average for the period 2016–2020. The baseline is set as the gross average equity Scope 1 and 2 emissions over 2016-2020 and may be adjusted (up or down) for potential equity changes in producing or sanctioned assets with an FID prior to 2021. The baseline will be adjusted for the Merged Group’s portfolio. Woodside plans to meet these targets by:

- Limiting emissions through the design of facilities;
- Reducing emissions through the operation of facilities; and
- Offsetting emissions, by both originating and acquiring quality offsets.

Woodside is the largest Australian LNG operator and in 2021 it operated 5% of global LNG supply. The International Energy Agency expects natural gas to remain an important part of electricity system flexibility and to continue to be used by customers to support decarbonization. Emissions from using natural gas to generate electricity are significantly lower than when using coal to produce the same amount of electricity. Natural gas is also expected to continue to be used in high-temperature industrial processes and for non-energy purposes, such as a chemical feedstock, where substitution with alternatives may not currently be technically or economically viable.

Offsets

Woodside is building a portfolio of offsets and offset origination projects from which to meet a portion of the expected future regulatory requirements and corporate emissions reduction targets. This approach is intended to manage the risk that the costs, availability and regulatory framework for offsets changes in the future, by developing a diverse portfolio differentiated by vintage, methodology and geography.

Woodside recognizes that there are important conditions on the use of offsets, including that the emissions reduction hierarchy should prioritize avoiding and reducing emissions before offsetting them, and that offsets must be verified as additional, scientifically valid and accurately accounted for using robust methodologies.

At present Woodside uses international offsets accredited by two independent non-government organizations: Verra and Gold Standard. These international programs are chosen because they also deliver offset integrity, with similar standards to those required for Australian Carbon Credit Units (“ACCUs”). Verra and Gold Standard offsets are recognized under the Australian Government’s Climate Active Carbon Neutral Standard as genuine carbon reduction that can be used for certification of net carbon neutrality.

Through developing its own projects, Woodside plans to generate its own offsets with a focus on co-benefits delivery such as biodiversity (including the variety of plant and animal life (flora and fauna) within habitats in and surrounding the areas where Woodside is active), regional economic development and indigenous participation.

Woodside has a diverse portfolio of offsets which mitigates the risk of a single event materially impacting the overall portfolio and the ability to meet future obligations. Woodside actively manages the origination projects for which it is the project proponent. For offsets procured from third parties it relies on the governance processes of the certification organization (Verra and Gold Standard). Project performance is monitored across the offset portfolio, and where yields on origination projects are not sufficient to meet overall offset generation expectations portfolio-wide, additional sources of offsets are procured. For procured offsets, the targeted standards have rules and guidelines for the management of underperforming projects, with both Verra and Gold Standard requiring buffers from project proponents to mitigate loss of offsets due to underperformance of the project protecting the buyers of these offsets.

The use of international offsets accredited by independent non-governmental organizations or ACCUs regulated by the Australian Government allows for the validation of actual offset project outcomes against estimates, as offsets units that meet these integrity standards include third-party scientific verification and certification of offset generation.

Table of Contents

Woodside estimates the quantity of offsets required to meet a portion of the expected future regulatory requirements and corporate emissions targets through integrated production and greenhouse gas emissions forecasting and considering risk factors associated with oil and gas businesses, including but not limited to: drilling and production results, reserves estimates, loss of market, physical risks and project delay or advancement, as well as assessment of current and possible future greenhouse gas regulatory requirements and abatement able to be delivered through engineering or operational changes. Estimates are compared to actual results at the asset and divisional level to provide insight on performance against emissions reduction targets as well as to improve the accuracy of future forecasts.

New Energy

Woodside is also focused on maturing its portfolio of new energy opportunities in Australia and internationally and over the course of 2021, progressed studies and commercial discussions with third parties to advance various hydrogen and ammonia opportunities. Woodside also continues to assess CCS opportunities which includes screening for suitable reservoirs, which if pursued, could reduce or offset Woodside's carbon emissions and those of other third-party emitters. See the section entitled "*Business and Certain Information About the Merged Group-Intentions of the Merged Group*" for additional information.

Social and community

Woodside recognizes the importance of its role to manage the impacts of its activities on communities to deliver mutually beneficial and sustainable social outcomes in the areas where it operates. Woodside's interactions with local communities are guided by its Sustainable Communities Policy and the Indigenous Communities Policy.

Woodside regularly engages with key stakeholders and the broader communities where it operates to identify and understand expectations and manage potential impacts related to its activities. This includes Karratha, Roebourne and Exmouth in north-western Australia and Senegal.

Engagement with Traditional Owners and Custodians in Karratha and Roebourne is focused on cultural heritage management for its operations on the Burrup Peninsula, also known as Murujuga, and other matters including Indigenous contracting and employment, and social investment. Comprehensive cultural heritage management plans are in place to monitor and manage environmental impacts on cultural heritage, including rock art. The term "Traditional Owners and Custodians" refers to Aboriginal people who, in accordance with Aboriginal tradition, hold particular knowledge about and can speak for the cultural heritage value of a particular area and have traditional rights, interests and responsibilities in respect of Aboriginal places, objects or ancestral remains located in or reasonably expected to have originated from a particular area. Traditional Owners and Custodians have a social, economic or spiritual affiliation with, and responsibilities for, an Aboriginal site or object.

Woodside maintains active social investment programs where it operates. Partnerships are based on established relationships with stakeholders and host communities, with the aim of increasing long-term community capability. A new five-year approach from 2021 identifies three social outcome focus areas to support community development and long-term outcomes. Woodside engages actively with local businesses and services in Australia and Senegal to support initiatives to help small businesses to effectively engage in the supply chain and build capability.

Governance

See the section entitled "*Board of Directors and Management of the Merged Group After the Merger-Committees of the Merged Group Following the Merger-Woodside Board Committees*" for more information on Woodside's Sustainability Committee and corporate governance initiatives around ESG.

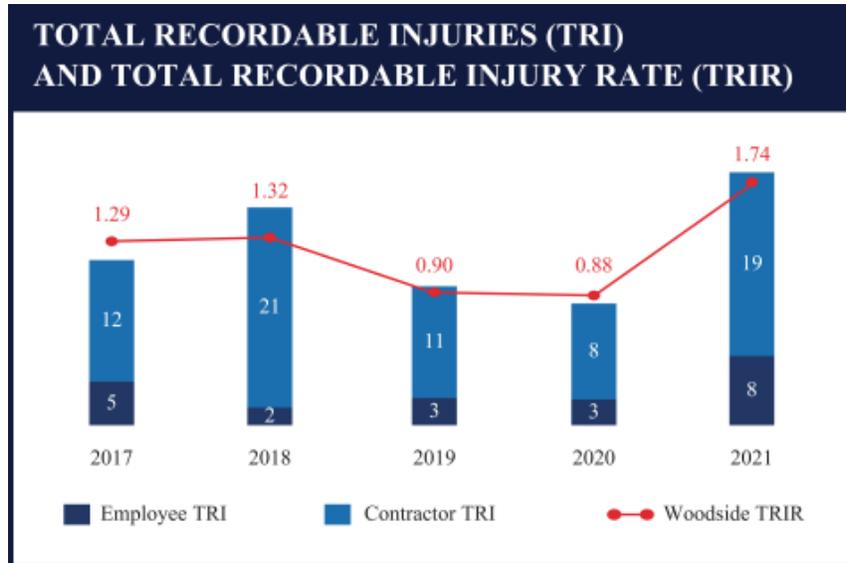

[Table of Contents](#)

Health and Safety

Woodside is committed to providing workplaces where its people and contractors are physically and psychologically safe, healthy and well. Woodside's Safety Culture framework governs behavioral expectations required at all levels of the organization to build and sustain an effective safety culture. Woodside continually seeks to learn and to improve with an emerging focus on leveraging technology to reduce risk. Further, there is a focus on promotion of positive practices and providing support services to enhance employee wellbeing and to effectively manage workplace risks to mental health.

Woodside's total recordable injury rate increased in 2021, in contrast with a downward trend in previous years. Improving this performance is a priority in the year ahead.

Figure 11: Total recorded injury rate

(1) Per million work hours.

Seasonality

Woodside's revenue is exposed to commodity price fluctuations through the sale of hydrocarbons. Commodity pricing can be higher during winter in the Northern hemisphere due to increased demand.

Values and Strategy

Values

The Woodside Compass defines Woodside's fundamental values. The Woodside Compass also provides clear direction on where Woodside is going, and how it will get there. The values of the Woodside Compass are as follows:

Respect—We give everyone a fair go, give and receive feedback and listen with empathy

Ownership—We set goals, hold ourselves accountable and learn, including from mistakes

Sustainability—We keep each other safe, look after the environment and support our community

Working Together—We embrace inclusion, value diversity and build long-term relationships

Table of Contents

Integrity–We are transparent, honest and fair and build trust by doing the right thing

Courage–We speak up, act decisively and embrace change

Strategy

Woodside has developed a strategy to deliver positive stakeholder outcomes by pursuing a portfolio of low-cost and lower-carbon growth opportunities. As outlined below, Woodside’s strategy is underpinned by a robust base business, innovative technology and a prudent approach to capital allocation which provides the foundation to progress key development projects and to navigate the energy transition.

| | |
|--------------------------------|---|
| Woodside’s Foundation | <p>Operations are characterized by strong LNG reliability, cost discipline and strong safety and environmental performance</p> <p>Continue to maintain competitive advantage through sustained operational excellence, resources in close proximity to growth markets, acute cost focus and continued innovation in technology</p> |
| Pursuing Energy Growth | <p>Progressing an attractive portfolio of development projects to unlock value for shareholders and other stakeholders</p> <p>Final investment decisions have been made in relation to the Scarborough and Pluto Train 2 developments with first LNG cargo targeted for 2026</p> <p>Project execution for Sangomar Oil Field Development Phase 1 projects well-advanced and first oil targeted for 2023</p> <p>Disciplined capital allocation will help to build a low cost, lower-carbon portfolio that is profitable, resilient and diversified</p> |
| Energy Transition Goals | <p>Managing energy transition through the development of a diversified and resilient portfolio, broader decarbonization of the business and incremental investment in new energy products and lower-carbon services</p> <p>Woodside’s climate strategy is composed of reducing our net equity Scope 1 and 2 greenhouse gas emissions, and investing in the products and services that are intended to help customers reduce their emissions</p> <p>Developing Woodside’s lower-carbon business, and actively generating sources for carbon offsets of Scope 1 and Scope 2 emissions</p> <p>Pursuing complementary opportunities that offer optionality around traditional assets that may diversify revenue streams</p> <p>Sharing knowledge and building capabilities through partnerships</p> |

Summary of Material Legal Proceedings

Woodside is involved from time to time in legal proceedings and governmental investigations of a character normally incidental to its business, including claims and pending actions against it seeking damages, or clarification or prosecution of legal rights and regulatory inquiries regarding business practices. Insurance or other indemnification protection may offset the financial impact on Woodside of a successful claim.

Table of Contents

Except as set forth below, there are no governmental, legal or arbitral proceedings (including any such proceedings which are pending or threatened and of which Woodside is aware) which may have, or have had during the 12 months prior to the date of this prospectus, a significant effect on Woodside's financial position or profitability:

In March 2016, Armada Balnaves Pte Ltd ("AB") commenced proceedings in the Supreme Court of Western Australia against Woodside claiming damages (\$184.6 million against Woodside) in respect of Woodside's termination of AB's contract. In January 2020, the Court dismissed AB's action. AB appealed, and the appeal was heard in July 2021, and judgement is currently reserved.

In December 2020, the Conservation Council of Western Australia filed applications seeking judicial review of decisions in respect of approvals under section 45C of the Environmental Protection Act (WA) granted for each of the North West Shelf and Pluto Gas Plant. Each approval was granted in July 2019. The Supreme Court of Western Australia dismissed the proceedings in March 2022.

In November 2021, Woodside was served with a further proceeding commenced by the Conservation Council of Western Australia in the Supreme Court of Western Australia seeking judicial review of a decision by the CEO of the Western Australian Department of Water and Environmental Regulation to grant Woodside a works approval for the Pluto Train 2 project granted in May 2021.

BUSINESS AND CERTAIN INFORMATION ABOUT BHP PETROLEUM

Incorporated in 1885, BHP is a leading global resources company with a market capitalization of approximately A\$250 billion as of 24 March 2022 (based on the closing price of BHP Shares of A\$49.30). BHP's operations revolve around the discovery, development, production and marketing of iron ore, metallurgical coal, copper, nickel and uranium. BHP also has substantial interests in potash and, through BHP Petroleum, oil and gas.

BHP is headquartered in Melbourne, Australia, with more than 80,000 employees and contractors, operating in over 90 locations worldwide.

BHP Group Ltd is registered in Australia. Its registered office is 171 Collins Street, Melbourne, Victoria 3000, Australia. BHP's internet address is www.bhp.com. Please note that BHP's internet address is included in this prospectus as an inactive textual reference only. The information contained on BHP's website is not incorporated by reference into this prospectus or any future documents that may be filed with the SEC and should not be considered part of this document.

BHP pioneered the development of an oil and gas industry in Australia with the Bass Strait discovery in 1965. BHP Petroleum International Pty Ltd is a wholly owned subsidiary of BHP. The BHP Petroleum business now has conventional oil and gas assets located in the U.S. GOM, Australia, T&T, Algeria, and Mexico, and appraisal and exploration options in T&T, central and western U.S. GOM, Eastern Canada, Barbados and Egypt. The crude oil and condensate, gas and NGLs produced by the assets of BHP Petroleum are sold on the international spot and domestic markets. The BHP Petroleum assets include BHP Petroleum's effective interest in the Rhourde Ouled Integrated Development, ("Algerian Assets"), which BHP is in the process of divesting.

During FY2021, BHP Petroleum achieved first production at two major development projects, both of which were delivered on or ahead of schedule. The Ruby oil and gas project in T&T achieved first production in May 2021. The Atlantis Phase 3 project achieved first production in the first half of the 2021 fiscal year. Total BHP Petroleum production and unit costs for FY2021 was 103 MMboe and \$10.83/boe respectively. The calculation of BHP Petroleum unit costs is set out in the section entitled "*Management's Discussion and Analysis of Financial Condition of Operations of BHP Petroleum—Business Overview, Strategy and Key Performance Drivers—Business Environment—BHP Petroleum costs.*" BHP Petroleum unit costs are calculated as ratio of net costs of the assets to the equity share of production. BHP Petroleum unit costs exclude freight, exploration and development and evaluation expense and other costs that do not represent underlying cost performance of the business.

[Table of Contents](#)

Recent Financial and Operating Information

The following table provides information on BHP Petroleum's financial and operating performance in its three most recently completed fiscal years. For further information, as well as information relating to BHP Petroleum's financial and operating performance for the half year ended 31 December 2021, see the section entitled, "Management's Discussion and Analysis of Financial Condition of Operations of BHP Petroleum".

| | | <u>FY June 2021</u> | <u>FY June 2020</u> | <u>FY June 2019</u> |

During FY2021, BHP Petroleum acquired an additional 28% working interest in Shenzi for \$0.5 billion, increasing its share from 44% to 72% of the project. In FY2019, BHP Petroleum completed the divestment of its U.S. Onshore Shale business, realizing net proceeds on sale of \$10.4 billion.

Further details of BHP Petroleum's historic capital expenditure and divestments is included in the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum."

Overview of Assets

BHP Petroleum has an international portfolio of assets which includes oil and gas production in the U.S. GOM, Australian LNG, oil and domestic gas assets and T&T oil and domestic gas assets. Key growth in the portfolio is driven by sanctioned and unsanctioned developments to currently producing assets in the U.S. GOM as well as the development of the Scarborough field in Australia.

Producing and Post-FID Assets (as at 31 December 2021) (1)

| Asset | Description | Operator | BHP Petroleum participating interest | 2021 Prod. MMboe (2) |

Producing Assets

Shenzi

Shenzi overview and history

The Shenzi conventional oil and gas field is located approximately 195 km off the coast of Louisiana in the Green Canyon protraction area, Gulf of Mexico. The field has produced ~350 MMboe (100% basis) since production commenced in 2009. Crude oil produced from the field is transported to connecting pipelines for onward sale to Gulf coast customers. Natural gas production is transported via a lateral pipeline that is tied-in into the Cleopatra natural gas pipeline for ultimate transmission onshore to the Neptune processing plant in St. Mary's Parish, Louisiana.

The Shenzi Joint Venture has recently sanctioned two brownfield developments. First, a subsea multiphase pumping project to increase production rates from existing wells, which is targeted to be completed in 2022. The other sanctioned project involves sidetracks of existing M9U production wells to access unswept oil in the M9U reservoir and achieved first oil in the fourth quarter of 2021. There are also additional unsanctioned infill opportunities at Shenzi to increase production with 3 producing and 2 water injection wells tied back to the Shenzi tension leg platform.

In addition to the currently producing Shenzi field, the project also includes the future tie-back developments of Shenzi North and Wildling which will take advantage of existing infrastructure and production capacity in the nearby Shenzi production facility. Shenzi North, the first development phase of the Greater Wildling mini-basin, was discovered in 2017. On 5 August 2021, BHP approved the funding of \$544 million in capital expenditure (100% basis) to execute the Shenzi North oil project in the U.S. GOM. The project is expected to add two wells and subsea equipment to establish a new drill centre north of Shenzi. Production is expected to begin in FY2024.

The Wildling project adds an additional two wells and subsea equipment. The Wildling field, which is also located in the Wildling mini-basin was discovered in 2017 and is expected to be developed as a subsea tie-back to the Shenzi tension leg platform. Potential FID is expected in 2022-2023, which would lead to first production in 2024-2025.

Ownership structure and joint ventures

The Shenzi field covers lease blocks GC609, GC610, GC652, GC653 and GC654. On 6 November 2020, BHP finalized a membership interest purchase and sale agreement with Hess Corporation to acquire an additional 28% working interest in Shenzi, taking its working interest from 44% to 72%. Repsol S.A. is the only other participant in the Shenzi JV, with a 28% working interest.

Table of Contents

Shenzi North lies in lease blocks GC608 and GC609. The ownership is 72% BHP Petroleum and 28% Repsol S.A.

Greater Wildling lies in lease blocks GC520 and GC564. Greater Wildling is 100% BHP Petroleum owned and operated.

BHP Petroleum owns a 25% and 22% interest respectively in the companies that own and operate the Caesar oil pipeline and the Cleopatra natural gas pipeline which connect the Green Canyon area to connecting pipelines that transport the product onshore.

Figure 12–Shenzi Project map in relation to BHP Petroleum’ s U.S. GOM projects. Fields, blocks and pipelines shown in maps are stylized and not to scale. Map only shows BHP Petroleum fields, leases and pipelines which are referenced in this section entitled “*Business and Certain Information About BHP Petroleum*”

Atlantis

Atlantis overview and history

The Atlantis conventional oil and gas field is one of the largest producing fields in the U.S. GOM, located off the coast of Louisiana in the south-eastern Green Canyon protraction area. Oil and gas from the field is transported to existing shelf and onshore interconnections via the Caesar and Cleopatra pipelines.

Atlantis was discovered in 1998 and has produced approximately 460 MMboe (100% basis) since first production was achieved in 2007. The development of Atlantis occurred over several phases:

Phase 1: sanctioned in 2003;

Phase 2: Operator (BP) submitted Development Operations Coordination Document (DOCD) in 2009, targeting Atlantis North flank. Production commenced in 2009; and

Phase 3: sanctioned in 2019 with first production achieved in 2020, including eight subsea wells and associated manifolds and flow lines.

Atlantis possesses multiple unsanctioned projects currently in the planning phase, leveraging existing infrastructure and technology. Future development phases for Atlantis include multiple infill campaigns with a total of twelve additional producing wells and six additional water injection wells utilizing existing infrastructure. In addition, a major facilities expansion is planned to include topsides modification, subsea multiphase pumping, and upgrades to water injection and water handling facilities.

Table of Contents

Ownership structure and joint ventures

Atlantis field lies within lease blocks GC699, GC742, GC743, and GC744. It is owned by BP (56.0%, operator) and BHP Petroleum (44.0%).

Mad Dog

Mad Dog overview and history

The Mad Dog conventional oil and gas field is located off the coast of Louisiana in the Green Canyon protraction area, Gulf of Mexico. Mad Dog was discovered in 1998 and has produced approximately 260 MMboe (100% basis) since first production, which was achieved in 2005.

Phase 1 of the project is processed through a subsea truss spar, Spar A. Oil from the project is transported to Ship Shoal 332B through the Caesar pipeline where it is then transported via the Cameron Highway Oil Pipeline System internally in the United States of America. Gas from the project is exported to Ship Shoal 332A through the Cleopatra pipeline, where it is then transported to the Manta Ray Gathering System and then to the Nautilus Gas Transportation System into Louisiana.

Mad Dog Phase 2, which was sanctioned in 2017 for \$2.2 billion in capital expenditure (BHP Petroleum share), focuses development on the southern flank of the field and is targeting first production in 2022. Mad Dog Phase 2 includes a new semi-submersible FPU platform named Argos. The development plan includes 14 production wells and eight water injectors (nine producers and four water injectors have been drilled to date). The new platform will be moored approximately 10 km southwest of the existing Mad Dog platform.

Beyond the sanctioned projects, there are further brownfield growth opportunities at Mad Dog. There are additional opportunities to increase the Mad Dog Phase 2 production beyond the initial investment scope with 9 new wells tied back to existing facility. Additionally, there is potential for a water injection expansion at the project with two water injector wells providing water from Mad Dog Phase 2 facility to increase production at the existing Spar A facility.

Table of Contents

North West Shelf

Refer to the section entitled “*Business and Certain Information About Woodside–Producing Assets–North West Shelf Project*” for an overview of North West Shelf assets. BHP Petroleum owns equity interest of between 12.5% and 16.67% in the various North West Shelf joint ventures operated by Woodside. This range does not include BHP Petroleum’s interest in the historic “Domestic Gas Joint Venture,” which is 8.33%.

Bass Strait

Bass Strait overview and history

The Bass Strait Project consists of numerous conventional oil and gas fields, in the well-established Gippsland Basin off the south-east coast of Victoria, Australia. The project consists of an integrated network of offshore platforms and subsea tie-backs connected via extensive pipeline infrastructure to onshore processing facilities at Longford and Long Island Point. Bass Strait was Australia’s first major offshore oil and gas development and has sold over 8 Tcf of pipeline gas and over 4 billion bbl of oil since first production in 1969.

Natural gas production from Bass Strait currently supplies approximately 40% of Australian east coast domestic gas demand and is the largest supplier into the Eastern Australian domestic gas market, which spans Queensland, New South Wales, Victoria, Tasmania, Australian Capital Territory, Northern Territory, and South Australia. The asset also produces crude oil and condensate, LPG and ethane which is sold to both domestic and international customers.

The Longford facilities process both crude oil and natural gas to achieve requisite sales specifications. Natural gas is exported directly into the east coast gas network while crude and NGLs are transferred to the Long Island Point facility by pipeline. Crude is stored at Long Island Point prior to transfer to domestic refineries via pipeline or export customers via ship loading. NGLs are processed to produce butane, propane, and ethane products. Butane and propane are stored prior to onward sale via truck loading, pipeline, or export shipping. Ethane is sold via pipeline to a customer in the Altona petrochemical area.

In April 2021, the Gippsland Basin Joint Venture successfully commissioned the West Barracouta natural gas field with a capital investment of approximately A\$400 million (100% share). Bass Strait retains a portfolio of contingent and prospective opportunities, primarily from deeper, acid gas resources with commercialization enabled by the Longford Gas Conditioning Plant commissioned in 2017, which provides acid gas processing capability. Further investments to deliver additional gas between 2023 and 2027, including additional development from the Kipper field and advancing funding decision for the Turrum field, were announced in March 2022.

Table of Contents

Several of the Bass Strait offshore facilities have ceased production following field depletion and an active program of restoration is underway. Near term activities are dominated by well plug and abandonment with planning in progress for longer term facility decommissioning and removal.

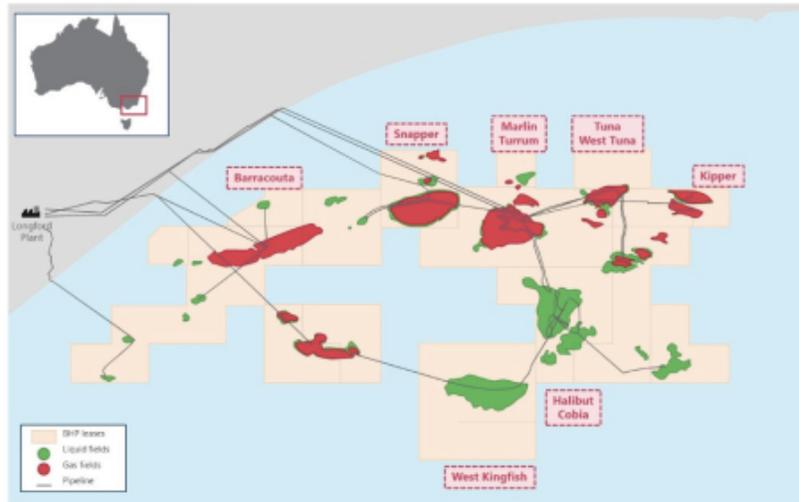

Figure 15–Bass Strait Project map. Fields, blocks and pipelines shown in maps are stylized and not to scale. Map only shows BHP Petroleum fields, leases and pipelines which are referenced in the section entitled “*Business and Certain Information About BHP Petroleum.*”

Ownership structure and joint ventures

Bass Strait production is primarily from the Gippsland Basin Joint Venture owned by ExxonMobil (50%, operator) and BHP Petroleum (50%) and the Kipper Unit Joint Venture owned by ExxonMobil (32.5%, operator), BHP Petroleum (32.5%) and Mitsui (35%). Kipper unit production is processed by the Gippsland Basin Joint Venture under a processing agreement. The Gippsland Basin Joint Venture fields lie in permits Vic/L1-L11 and Vic/L13-19 and the Kipper field lies in permits Vic/L9 and Vic/L25.

Pyrenees

Pyrenees overview and history

The Pyrenees project consists of 6 conventional oil fields located approximately 45 km northwest of Exmouth, Western Australia, in the Carnarvon Basin. Crude oil is offloaded from the FPSO directly to tankers for sale to international markets and attracts a premium to Brent given its low sulphur content. Produced formation water is treated on the facility and reinjected for disposal in four subsea water injection wells. A single well into the Macedon gas field allows for injection or production of natural gas depending on facility requirements.

The Pyrenees Phase 4 project has been sanctioned with infill drilling and well intervention for water shut-off.

Table of Contents

Ownership structure and joint ventures

The Pyrenees development covers two separate production licenses: WA-42-L is owned by BHP Petroleum (71.4%, operator) and Santos Limited (“Santos”) (28.6%). WA-43-L is owned by BHP Petroleum (40%, operator), Santos (31.5%) and Inpex (28.5%).

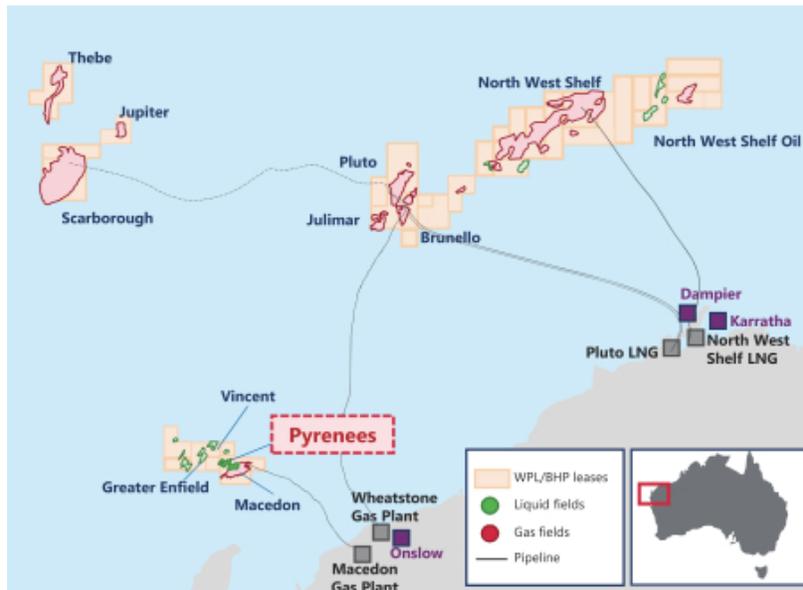

Figure 16–Pyrenees Project map in relation to BHP Petroleum and Woodside’s Western Australia projects. Fields, blocks and pipelines shown in maps are stylized and not to scale with the intent to show the general location and proximity of BHP Petroleum and Woodside’s Carnarvon Basin fields assets. Maps only show the key Woodside and BHP Petroleum fields, leases and pipelines which are referenced in the sections entitled “Business and Certain Information About Woodside” and “Business and Certain Information About BHP Petroleum.”

Table of Contents

Macedon

Macedon overview and history

Macedon is an offshore gas field located in the Exmouth sub-basin around 40 km north of Exmouth, Western Australia. Gas is produced from subsea wells and flows through a pipeline to a gas treatment plant located near Onslow. Sales quality gas is then transported via a dedicated 67 km pipeline into the Dampier to Bunbury Natural Gas Pipeline and thereon for onward sale into the Western Australian domestic gas market.

Ownership structure and joint ventures

Macedon lies within WA-42-L, the same production license as Pyrenees. It is owned by BHP Petroleum (71.4%, operator) and Santos (28.6%).

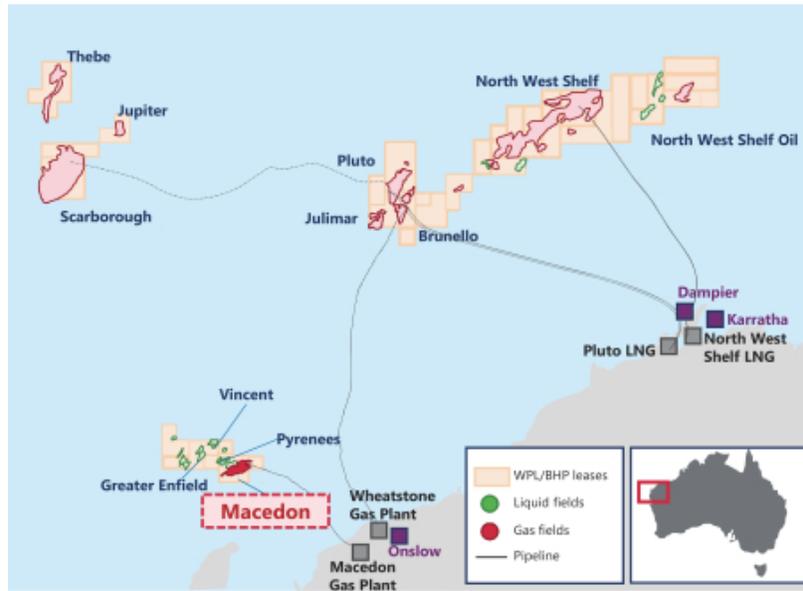

Figure 17–Macedon Project map in relation to BHP Petroleum and Woodside’s Western Australia projects. Fields, blocks and pipelines shown in maps are stylized and not to scale. Map only shows BHP Petroleum fields, leases and pipelines which are referenced in the section entitled “Business and Certain Information About BHP Petroleum.”

Trinidad and Tobago

Angostura and Ruby overview and history

The Greater Angostura field is an offshore conventional oil and gas field located 38 km northeast of Trinidad. The Angostura field was discovered in 1999, with first oil achieved in January 2005 (Phase 1). Phase 2 established gas sales in 2011. First gas for Angostura Phase 3 was established in September 2016. Ruby is a conventional offshore oil and gas field located within the Greater Angostura Fields. First oil was achieved in May 2021.

The current development comprises a main central processing platform (“CPP”), gas export platform (“GEP”), four wellhead protector platforms (“WPP”) and onshore terminal. Flowlines connect the Ruby wellhead platform back to the CPP and GEP for processing.

Crude oil from CPP is transported to the terminal facility located in the south eastern end of Trinidad. Calypso crude from the Angostura and Ruby fields is sold on a spot basis to international markets via the terminal facility while the gas is sold domestically under term contracts via separate pipelines to T&T from the Gas Export platform.

Ownership structure and joint ventures

The Angostura field lies in Block 2c. It is owned by BHP Petroleum (45.0%, operator), National Gas Company (30.0%) and Chaoyang (25.0%).

The Ruby field lies in Block 3a. It is owned by BHP Petroleum (68.46%, operator) and National Gas Company (31.54%).

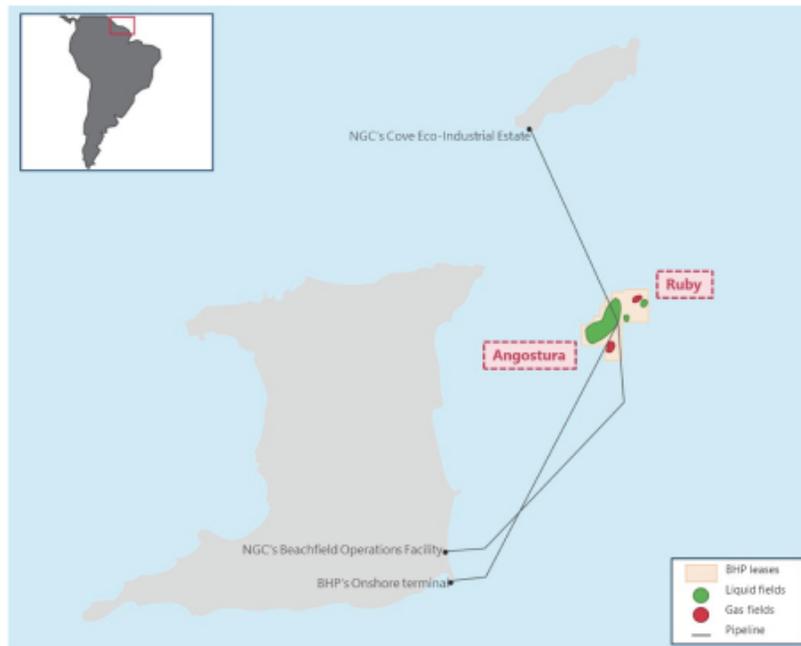

Figure 18–Angostura and Ruby Project map. Fields, blocks and pipelines shown in maps are stylized and not to scale. Map only shows BHP Petroleum fields, leases and pipelines which are referenced in the section entitled “*Business and Certain Information About BHP Petroleum.*”

Other

BHP Petroleum is operator for several Australian fields that are no longer in production including Griffin (45-71.43% Equity) and Stybarrow (50%) offshore oil fields located off North West Cape and the Minerva offshore gas field (Operator 90%) in the Otway basin. A program of restoration activities is underway and is being carried out in close cooperation with environment and safety regulators and other key stakeholders.

Algerian Assets Sale

While BHP Petroleum's reserves and resources as of 30 June 2021 and the combined financial statements of BHP Petroleum are inclusive of BHP Petroleum's 28.85% interest in the Rhourde Ouled Integrated Development, ("Algerian Assets"), these assets are currently classified as non-core and are expected to be divested prior to the Implementation of the Merger.

As part of the Merger, Woodside and BHP have agreed that BHP will retain the economic benefits of the Algerian Assets from the Merger effective date (1 July 2021), including the net proceeds from the divestment. If the divestment of the Algerian Assets has not completed prior to the Implementation of the Merger, Woodside will operate the Algerian Assets on behalf of BHP under an arrangement whereby BHP will retain all economic exposure and indemnify Woodside for any costs and liabilities associated with the Algerian Assets until such time as both parties agree alternative arrangements or the Algerian Assets lapse or terminate (whichever is earlier). As of 30 June 2021, the 1P reserves of the Algerian Assets were approximately 8.9 MMboe and the Algerian Assets contributed revenues of \$164m, \$159m and \$258m for the years ended 30 June 2021, 2020 and 2019, respectively.

Growth Projects

Scarborough

Refer to the section entitled "*Business and Certain Information About Woodside–Projects and Growth Options–Scarborough and Pluto Train 2*" for an overview of the Scarborough asset. BHP Petroleum owns a 26.5% participating interest in the Scarborough Joint Venture.

Table of Contents

Trion

Trion overview and history

The Trion project (Trion) is a BHP Petroleum-operated oil and gas opportunity in Mexico, which was discovered by PEMEX (Mexico's state-owned petroleum company) in 2012, with BHP acquiring operatorship in 2017.

Trion is a greenfield development that would represent the first oil production from Mexico's deepwater, with potential for future discoveries to be tied back to Trion facilities. The Trion field is in the Perdido Foldbelt, Gulf of Mexico, at a water depth of 2,500m approximately 180 km off the Mexican coastline and 30 km south of the U.S./Mexico maritime border.

Ownership structure and joint ventures

BHP Petroleum holds a 60% participating interest in and operatorship of blocks AE-0092 and AE-0093 containing the Trion discovery located in the deep-water Gulf of Mexico offshore Mexico. PEMEX Exploration & Production Mexico holds a 40% interest in the blocks.

Calypso

Calypso overview and history

Calypso is a BHP Petroleum-operated deepwater gas discovery in Trinidad & Tobago. The Calypso opportunity is located 217 km off the coast of Trinidad & Tobago and comprises several discoveries in deepwater Blocks 23(a) and TTDA 14. Calypso is proximate to existing LNG infrastructure and downstream petrochemical facilities.

The Calypso appraisal drilling program (consisting of the Bongos-3, Bongos-3X and Bongos-4 wells) concluded on 20 December 2021. All wells encountered hydrocarbons. Bongos-3 confirmed volumes down dip of prior penetrations and Bongos-4 established volumes in a new segment. The well results are currently under evaluation and will be incorporated into the development plan.

Ownership structure and joint ventures

Calypso sits within the Deepwater Blocks 23(a) and TTDA 14 lease blocks. It is owned by BHP Petroleum (70%, operator) and BP (30%).

Magellan

Magellan overview and history

The Magellan discoveries in the Trinidad South Deepwater license block TTDA 5 includes the LeClerc and Victoria gas fields discovered in 2016 and 2018, respectively. Both fields are approximately 200 km east of the island of Trinidad in water depths of approximately 1,800m.

Ownership structure and joint ventures

BHP Petroleum signed a Production Sharing Contract in 2013 for exploration in the TTDA 5 Block. BHP Petroleum is the operator and has a 65% working interest with Shell as partner.

Seasonality

BHP Petroleum's revenue is exposed to commodity price fluctuations through the sale of hydrocarbons. Commodity pricing can be higher during winter in the Northern hemisphere due to increased demand.

[Table of Contents](#)

Description of Property

The following table sets out the location, capacity and BHP Petroleum's ownership interest in the assets described below.

| Asset | Location | BHP Petroleum interest (%) | 100% capacity | BHP Petroleum operated |
|----------------------------------|---|---|--|------------------------|
| Shenzi (Green Canyon 653) | U.S. GOM | 72.0% | 100 kbb/d oil 50 MMscf/d gas | Yes |
| Atlantis (Green Canyon 743) | U.S. GOM | 44.0% | 200 kbb/d oil 180 MMscf/d gas | No |
| Mad Dog (Green Canyon 782) | U.S. GOM | 23.9% | A-Spar (Phase 1): 100 kbb/d oil 60 MMscf/d gas handling Argos (Phase 2): 140 kbb/d oil 75 MMscf/d gas | No |
| Bass Strait | Offshore and onshore Victoria | Gippsland Basin joint venture: 50.0% Kipper Unit joint venture: 32.5% | 65 kbb/d oil 1,040 TJ/d 5,150 tpd LPG 850 tpd Ethane | No |
| North West Shelf LNG | Refer to the section entitled " <i>Business and Certain Information About Woodside—Description of Property.</i> " BHP Petroleum owns an equivalent participating interest to Woodside but is not operator | | | |
| North West Shelf Oil (Okha FPSO) | Refer to the section entitled " <i>Business and Certain Information About Woodside—Description of Property.</i> " BHP Petroleum owns a non-operated 16.67% participating interest | | | |
| Pyrenees | Offshore Western Australia | WA-42-L permit: BHP Petroleum 71.43% WA-43-L permit: BHP Petroleum 39.999% | Production capacity: 96 kbb/d oil Storage: 920 kbb | Yes |
| Macedon | Offshore and onshore Western Australia | 71.43% | Production capacity: 213 MMscf/d gas 0.02 kbb/d/d condensate | Yes |
| Greater Angostura | Offshore T&T | 45.0% | 100 kbb/d/d oil 340 MMscf/d gas | Yes |
| Ruby | Offshore T&T | 68.46% | 16 kbb/d/d oil 80 MMscf/d gas | Yes |

In addition to the assets described above, BHP Petroleum leases office space in several locations globally, the two largest being Houston, Texas and Port of Spain, Trinidad.

Reserves and Resources

Production

The table below details BHP Petroleum's historical net crude oil and condensate, natural gas and natural gas liquids production, primarily by geographic segment, for each of the three years ended 30 June 2021, 2020 and 2019. The following shows volumes of marketable production after deduction of applicable royalties, fuel and flare. Included in the table are average production costs per unit of production and average sales prices for crude oil and condensate and natural gas for each of those periods.

- (1) Production for onshore assets in the United States is shown through the closing date of the divestment in FY2019. Production for Eagle Ford, Permian and Haynesville assets is shown through 31 October 2018 and production for Fayetteville is shown through 28 September 2018.
- (2) Other comprises Algeria, T&T, and the United Kingdom (divested 30 November 2018).
- (3) LPG and ethane are reported as natural gas liquids (NGL).
- (4) Total barrels of oil equivalent (“boe”) conversion is based on the following: 6,000 standard cubic feet (“scf”) of natural gas equals one boe.
- (5) Average production costs include direct and indirect costs relating to the production of hydrocarbons and the foreign exchange effect of translating local currency denominated costs into U.S. dollars, but excludes ad valorem and severance taxes, and the cost to transport BHP Petroleum’s produced hydrocarbons to the point of sale.

Reserves

Reserves are the estimated quantities of material that can be demonstrated to be able to be economically and legally extracted from BHP Petroleum’s properties. In order to estimate reserves, assumptions are required about a range of technical and economic factors, including quantities, qualities, production techniques, recovery efficiency, production and transport costs, commodity supply and demand, commodity prices and exchange rates.

Estimating the quantity and/or quality of reserves requires the size, shape and depth of oil and gas reservoirs to be determined by analyzing geological data, such as drilling samples and geophysical survey interpretations. Economic assumptions used to estimate reserves change from period to period as additional technical and operational data is generated.

Table of Contents

Petroleum reserves

Estimates of oil and gas reserves involve some degree of uncertainty, are inherently imprecise, require the application of judgement and are subject to future revision. Accordingly, financial and accounting measures (such as the standardized measure of discounted cash flows, depreciation, depletion and amortization charges, the assessment of impairments and the assessment of valuation allowances against deferred tax assets) that are based on reserve estimates are also subject to change.

How BHP Petroleum estimates and reports reserves

BHP Petroleum's reserves are estimated as of 30 June each year. Reported reserves include both conventional petroleum reserves and reserves with respect to onshore assets in the United States for FY2018 and are included in the opening balances in the accompanying tables. Footnotes have been included with the tables to identify the contribution of the discontinued operations (onshore United States) for this period. The sale of BHP Petroleum's interests in onshore U.S. reserves was completed in FY2019. Remaining reserves at the end of FY2019, FY2020 and FY2021 reflect the continuing operations only.

BHP Petroleum's proved reserves are estimated and reported on a net interest basis according to the SEC regulations and have been determined in accordance with SEC Rule 4-10(a) of Regulation S-X.

Proved oil and gas reserves

Proved oil and gas reserves are those quantities of crude oil, natural gas and natural gas liquids (NGL) that, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible from a given date forward from known reservoirs and under existing economic conditions, operating methods, operating contracts and government regulations. Unless evidence indicates that renewal of existing operating contracts is reasonably certain, estimates of economically producible reserves reflect only the period before the contracts expire. The project to extract the hydrocarbons must have commenced or the operator must be reasonably certain that it will commence within a reasonable time. As specified in SEC Rule 4-10(a) of Regulation S-X, oil and gas prices are taken as the unweighted average of the corresponding first day of the month prices for the 12 months prior to the ending date of the period covered.

Proved reserves were estimated by reference to available well and reservoir information, including but not limited to well logs, well test data, core data, production and pressure data, geologic data, seismic data and in some cases, to similar data from analogous, producing reservoirs. A wide range of engineering and geoscience methods, including performance analysis, numerical simulation, well analogues and geologic studies were used to estimate high confidence proved developed and undeveloped reserves in accordance with SEC regulations.

Proved reserve estimates were attributed to future development projects only where there is a significant commitment to project funding and execution and for which applicable government and regulatory approvals have been secured or are reasonably certain to be secured. Furthermore, estimates of proved reserves include only volumes for which access to market is assured with reasonable certainty. All proved reserve estimates are subject to revision (either upward or downward) based on new information, such as from development drilling and production activities or from changes in economic factors, including product prices, contract terms or development plans.

Developed oil and gas reserves

Proved developed oil and gas reserves are reserves that can be expected to be recovered through:

existing wells with existing equipment and operating methods; and

installed extraction equipment and infrastructure operational at the time of the reserve estimate if the extraction is by means not involving a well.

Table of Contents

Performance-derived reserve assessments for producing wells were primarily based on the following manner:

for BHP Petroleum's conventional operations, reserves were estimated using rate and pressure decline methods, including material balance, supplemented by reservoir simulation models where appropriate;

for BHP Petroleum's discontinued operations (onshore U.S.) reported for FY2018, reserves were estimated using rate-transient analysis and decline curve analysis methods; and

for wells that lacked sufficient production history, reserves were estimated using performance-based type curves and offset location analogues with similar geologic and reservoir characteristics.

Proved undeveloped reserves

Proved undeveloped oil and gas reserves are reserves that are expected to be recovered from new wells on undrilled acreage where commitment has been made to commence development within five years from first reporting or from existing wells where a relatively major expenditure is required for recompletion.

A combination of geologic and engineering data and where appropriate, statistical analysis was used to support the assignment of proved undeveloped reserves when assessing planned drilling locations. Performance data along with log and core data was used to delineate consistent, continuous reservoir characteristics in core areas of the development. Proved undeveloped locations were included in core areas between known data and adjacent to productive wells using performance-based type curves and offset location analogues with similar geologic and reservoir characteristics. Locations where a high degree of certainty could not be demonstrated using the above technologies and techniques were not categorized as proved.

Methodology used to estimate reserves

Reserves have been estimated with deterministic methodology, with the exception of the North West Shelf gas operation in Australia, where probabilistic methodology has been used to estimate and aggregate reserves for the reservoirs dedicated to the gas project only. The probabilistic-based portion of these reserves totals 6 million barrels of oil equivalent ("MMboe") in FY2021, 12 MMboe in FY2020 and 16 MMboe in FY2019. These amounts represent approximately 1% of BHP Petroleum's total reported proved reserves in FY2021, and approximately 2% in each of FY2020 and FY2019. Total boe conversion is based on the following: 6,000 standard cubic feet ("scf") of natural gas equals one boe. Aggregation of proved reserves beyond the field/project level has been performed by arithmetic summation. Due to portfolio effects, aggregates of proved reserves may be conservative. The custody transfer point(s) or point(s) of sale applicable for each field or project are the reference point for reserves. The reserves replacement ratio is the change in reserves during the year excluding production, divided by the production during the year and stated as a percentage.

Governance

The Petroleum Reserves Group ("PRG") is a dedicated group that provides oversight of the reserves' assessment and reporting processes. It is independent of the various operation teams directly responsible for development and production activities. The PRG is staffed by individuals averaging more than 30 years' experience in the oil and gas industry. The manager of the PRG, Abhijit Gadgil, is a full-time employee of BHP and is responsible for overseeing the preparation of the reserve estimates and compiling the information with respect to BHP Petroleum for inclusion in this prospectus. He has an advanced degree in engineering and more than 40 years of diversified industry experience in reservoir engineering, reserves assessment, field development and technical management. He is a 40-year member of the Society of Petroleum Engineers ("SPE"). He has also served on the Society of Petroleum Engineers Oil and Gas Reserves Committee. Mr. Gadgil has the qualifications and experience required to act as a qualified petroleum reserves evaluator under the ASX Listing Rules. The estimates of petroleum reserves are based on and fairly represent information and supporting

Table of Contents

documentation prepared under the supervision of Mr. Gadgil. He has reviewed and agrees with the information included in this “–Reserves and Resources” section and has given his prior written consent for its publication. No part of the individual compensation for members of the PRG is dependent on reported reserves.

Reserve assessments for all BHP Petroleum operations were conducted by technical staff within the operating organization. These individuals meet the professional qualifications outlined by the SPE, are trained in the fundamentals of SEC reserves reporting and the reserves processes and are endorsed by the PRG. Each reserve assessment is reviewed annually by the PRG to ensure technical quality, adherence to internally published BHP Petroleum guidelines and compliance with SEC reporting requirements. Once endorsed by the PRG, all reserves receive final endorsement by senior management and the Risk and Audit Committee prior to public reporting. BHP Petroleum’s Internal Audit and Advisory function provides secondary assurance of the oil and gas reserve reporting processes through the testing of the effectiveness of key controls that have been implemented as required by the U.S. Sarbanes-Oxley Act.

FY2021 proved reserves

Production for FY2021 totaled 103 MMboe in sales with an additional 5 MMboe in non-sales production, which was used primarily for fuel consumed in operations. Total production of 108 MMboe was approximately 6 MMboe lower than in FY2020. The decrease was primarily due to natural declines in mature fields.

Net additions to reserves totaled 25 MMboe, driven primarily by the acquisition of additional working interest in the Shenzi field and partially offset by a negative performance revision in the Atlantis field in the U.S. GOM. The net additions replaced 23% of production. As of 30 June 2021, proved reserves totaled 665 MMboe.

Reserves have been calculated using the economic interest method and represent net revenue interest volumes after deduction of applicable royalties owned by others. Reserves of 61 MMboe were in production and risk-sharing arrangements where BHP Petroleum has a revenue interest in production without transfer of ownership of the products. At 30 June 2021, approximately 9% of the proved reserves were attributable to these arrangements.

Extensions and discoveries

In the Atlantis field in the U.S. GOM, Phase 3 development drilling in the south west region of the field added approximately 1 MMboe by extending the previously recognized proved reservoir limit.

Revisions

In Australia, revisions increased proved reserves by 4 MMboe, primarily due to strong performance in the Macedon field. Small increases in the Bass Strait and Pyrenees fields were offset by negative performance revisions in the North West Shelf fields.

In the U.S. GOM, revisions decreased reserves by 11 MMboe overall, primarily driven by reductions related to lower than expected well performance in the Atlantis and Mad Dog fields of 19 MMboe and 4 MMboe respectively. Approval of the Shenzi Subsea Multi Phase Pump Project added 6 MMboe, while strong performance in the eastern area of the Shenzi field increased reserves by a further 5 MMboe.

In T&T, continued strong performance in the Angostura field added 6 MMboe to proved reserves. This addition was partially offset by a price-related reduction of approximately 1 MMboe.

Improved recovery revisions

There were no improved recovery revisions during the year.

Table of Contents

Purchases and sales

In November 2020, BHP Petroleum acquired Hess Corporation's 28% interest in the Shenzi field located in the Gulf of Mexico. The acquisition resulted in the addition of approximately 27 MMboe to proved reserves. BHP Petroleum also divested its 35% interest in the Neptune field in May 2021 which reduced reserves by approximately 1 MMboe. Overall, net additions from Purchases and Sales were 26 MMboe.

FY2020 proved reserves

Production for FY2020 totaled 109 MMboe in sales with an additional 5 MMboe in non-sales production, which was used primarily for fuel consumed in operations. Total production was approximately 13 MMboe lower than conventional production in FY2019. The decrease was due to a number of factors, including natural declines in mature fields, weather events that necessitated precautionary shut ins and lower demand as a consequence of the COVID-19 pandemic. Discoveries, extensions and revisions to reserves added a total of 21 MMboe, which replaced 19% of production. As of 30 June 2020, proved reserves totaled 748 MMboe.

Reserves have been calculated using the economic interest method and represent net interest volumes after deduction of applicable royalty. Reserves of 69 MMboe are in two production and risk-sharing arrangements where BHP Petroleum has a revenue interest in production without transfer of ownership of the products. At 30 June 2020, approximately 9% of the proved reserves were attributable to such arrangements.

Extensions and discoveries

BHP Board approval of the North West Shelf Greater Western Flank Phase 3 project in Australia added 12 MMboe for development of the Goodwyn South and Lambert Deep fields. BHP Board approval of the Ruby development project in T&T during the September 2019 quarter also added 19 MMboe to proved reserves. The Ruby project is comprised of the Ruby oil field and the Delaware gas field.

Revisions

In Australia, reserves decreased by 35 MMboe overall due to downward revisions. This reduction was primarily in the Bass Strait due to poor reservoir performance in the Turrum field and lower overall condensate and natural gas liquids (NGL) recovery from the Bass Strait gas fields totaling 40 MMboe. Included in this reduction was a decrease of 4 MMboe due to lower product prices. Improved reservoir performance in the Pyrenees operated field added 5 MMboe partially offsetting the Bass Strait reduction. In the North West Shelf fields, reserves increased 4 MMboe for better performance and other revisions, however, this increase was offset by product price-related reductions of 4 MMboe. In the U.S. GOM, strong reservoir performance and technical studies in the Atlantis, Shenzi and Mad Dog fields added a total of 25 MMboe to proved reserves.

In the Angostura field in T&T and the Rhourde Ouled Diemma integrated development in Algeria, increases of 1 MMboe were offset by product price-related reductions of approximately 1 MMboe.

During FY2020, net revisions reduced reserves by a total of 10 MMboe overall.

Improved recovery revisions

There were no improved recovery revisions during the year.

Purchases and sales

There were no purchases or sales during the year.

Table of Contents

FY2019 proved reserves

Production for FY2019 totaled 147 MMboe in sales, which was comprised of 121 MMboe for BHP Petroleum's conventional fields and 26 MMboe that was produced from BHP Petroleum's U.S. onshore fields prior to the closure of the divestment agreements. In comparison, BHP Petroleum's conventional fields produced approximately 1 MMboe more than in FY2018. This increase was due to a number of factors, including start-up of the Greater Western Flank Phase B project in the North West Shelf in Australia and higher uptime in several fields, which more than offset natural production declines in more mature fields. There was also an additional 5 MMboe in non-sales production, primarily for fuel consumed in BHP Petroleum's petroleum operations. The combined sales and non-sales production totaled 152 MMboe for FY2019. For BHP Petroleum's conventional fields, additions and revisions to reserves added 57 MMboe, which replaced 45% of the production in FY2019. As of 30 June 2019, BHP Petroleum's proved reserves totaled 841 MMboe.

Reserves have been calculated using the economic interest method and represent net interest volumes after deduction of applicable royalty. Reserves of 64 MMboe are in two production and risk-sharing arrangements where BHP Petroleum has a revenue interest in production without transfer of ownership of the products. At 30 June 2019, approximately 8% of the proved reserves were attributable to such arrangements.

Extensions and discoveries

Extensions added a total of approximately 2 MMboe to proved reserves, of which 1 MMboe was added for the Atlantis field in the U.S. GOM with the balance being added in the Snapper field in the Bass Strait in Australia.

Improved recovery revisions

There were no improved recovery revisions during the year.

Revisions

Revisions for FY2019 added a total of 56 MMboe. The largest addition was in the Atlantis field where 28 MMboe was added for performance and approval of Phase 3 infill drilling. Other revisions, primarily in the Mad Dog field, brought the total revisions for BHP Petroleum's U.S. GOM assets to 29 MMboe. Additions through revisions in Australia totaled 22 MMboe, with the North West Shelf project adding 11 MMboe. The Goodwyn field was the largest component of this change adding 10 MMboe for strong performance. In the Bass Strait, 11 MMboe was added with the largest changes occurring in the Snapper and Turrum fields, which added 5 MMboe and 2 MMboe, respectively. In other geographic areas (comprising Algeria, T&T and the United Kingdom (sold in FY2019)), 4 MMboe was added for better performance in the offshore Angostura project in T&T, while 1 MMboe was added for improved performance in the Rhourde Ouled Djemma integrated development in Algeria.

Purchases and sales

The sale of BHP Petroleum's interests in the U.S. onshore Permian, Eagle Ford, Haynesville and Fayetteville fields accounted for reported sales of approximately 464 MMboe. There were no purchases during FY2019.

Table of Contents

These results are summarized in the following tables, which detail estimated oil, condensate, NGL and natural gas reserves at 30 June 2021, 30 June 2020 and 30 June 2019, with a reconciliation of the changes in each year.

| <u>Millions of barrels</u> | <u>Australia</u> | <u>United States</u> | <u>Other (b)</u> | <u>Total</u> |
|---|------------------|----------------------|------------------|--------------|
| Proved developed and undeveloped oil and condensate reserves (a) | | | | |
| Reserves at 30 June 2018 | 70.5 | 361.8 | (c) | 21.9 |
| Improved recovery | – | – | – | – |
| Revisions of previous estimates | 7.8 | 25.9 | 1.0 | 34.7 |
| Extensions and discoveries | 0.0 | 0.8 | – | 0.9 |

(a) Barrel oil equivalent conversion based on 6,000 scf of natural gas equals one boe.

(b) Small differences are due to rounding to first decimal place.

(c) Production includes volumes consumed by operations.

(d) "Other" comprises Algeria, T&T and the United Kingdom (sold in FY2019).

(e) For FY2018, FY2019, FY2020 and FY2021 amounts include 49, 45, 41 and 34 million barrels equivalent respectively, which are anticipated to be consumed as fuel in operations in Australia.

(f) For FY2018, FY2019, FY2020 and FY2021 amounts include 29, 11, 11 and 11 million barrels equivalent respectively, which are anticipated to be consumed as fuel in operations in the United States.

(g) For FY2018, FY2019, FY2020 and FY2021 amounts include 3, 2, 3 and 2 million barrels equivalent respectively, which are anticipated to be consumed as fuel in operations in other areas (comprising Algeria, T&T and the United Kingdom (sold in FY2019)).

(h) For FY2018, FY2019, FY2020 and FY2021 amounts include 81, 58, 55 and 47 million barrels equivalent respectively, which are anticipated to be consumed as fuel in operations.

(i) For FY2018 amounts include 490 million barrels equivalent attributable to discontinued operations of onshore U.S.

Table of Contents

FY2021 proved undeveloped reserves

At 30 June 2021, BHP Petroleum had 200 MMboe of proved undeveloped reserves, which corresponds to 30% of the reported proved reserves of 665 MMboe. This represents a decrease of 38 MMboe from the 238 MMboe at 30 June 2020.

During FY2021, a total of 44 MMboe proved undeveloped reserves were converted to proved developed reserves through development activities. This was driven by the following three projects: the Barracouta West development in the Bass Strait in Australia (14 MMboe), a gas delivery pressure and compressor re-staging study in the Macedon field in Offshore Western Australia (14 MMboe) and the Atlantis Phase 3 development in the U.S. GOM (14 MMboe).

Start-up of the Ruby development project in offshore T&T also converted 3 MMboe to proved developed with first oil production. Increases to proved undeveloped reserves included approval of the Shenzi Subsurface Multi-Phase Pump project which added 6 MMboe. The effect of commodity prices relative to FY2020 resulted in the addition of 5 MMboe to proved undeveloped reserves while the acquisition of additional interest in the Shenzi field in the U.S. GOM increased proved undeveloped reserves by 3 MMboe. Technical studies, revisions to expected performance and other changes reduced proved undeveloped reserves by 2 MMboe.

Over the past three years, the conversion of proved undeveloped reserves to developed status has totaled 93 MMboe, averaging 31 MMboe per year. At 30 June 2021, a total of 114 MMboe proved undeveloped reserves have been reported for five or more years. Approximately 101 MMboe of this amount is associated with the Mad Dog Phase 2 development which is anticipated to produce first oil in CY2022. The remaining 13 MMboe is in BHP Petroleum's currently producing fields and is expected to be developed and brought on stream in a phased manner to optimize the use of production facilities and to meet sales commitments.

During FY2021, BHP Petroleum spent \$1.1 billion on development activities worldwide. Of this amount:

\$0.9 billion was spent progressing the conversion of proved undeveloped reserves for projects where developed status was achieved in FY2021 or will be achieved when development is completed in the future

\$0.2 billion represented other development expenditures, including compliance and infrastructure improvement

FY2020 proved undeveloped reserves

At 30 June 2020, BHP Petroleum had 238 MMboe of proved undeveloped reserves, which corresponds to 32% of the reported proved reserves of 748 MMboe. This represents an increase of 19 MMboe from the 219 MMboe at 30 June 2019.

The most significant drivers of this increase were the additions of 19 MMboe for the Ruby development project in offshore T&T and 12 MMboe for the Greater Western Flank Phase 3 development project in Australia as extensions and discoveries.

Reclassifications from proved undeveloped to proved developed occurred in Australia in the Macedon field (7 MMboe), the Cobia field in Bass Strait (2 MMboe) and in the offshore U.S. GOM in the Mad Dog Spar A field (3 MMboe). In the Shenzi field, the need to perform a producer redrill resulted in the reclassification of 4 MMboe proved developed into proved undeveloped.

In Australia, in the Bass Strait, 18 MMboe was moved into proved undeveloped for the Turrum field as a result of the reservoir performance reassessment, while in the Kipper field, a reduction of the gas delivery pressure requirements enabled more gas to be delivered prior to the installation of compression. This resulted in

Table of Contents

the movement of 16 MMboe from proved undeveloped to proved developed reserves. Bass Strait proved undeveloped fuel was also increased by 3 MMboe as a result of a fuel utilization study. Performance revisions in the Mad Dog Spar A and the Shenzi fields in the U.S. GOM reduced proved undeveloped by 6 MMboe.

Lower commodity prices resulted in a 4 MMboe reduction to proved undeveloped reserves.

Over the past three years, the conversion of proved undeveloped reserves to developed status has totaled 98 MMboe, averaging 33 MMboe per year. At 30 June 2020, a total of 30 MMboe proved undeveloped reserves have been reported for five or more years. These reserves are in BHP Petroleum's currently producing fields and are expected to be developed and brought on stream in a phased manner to best optimize the use of production facilities and to meet sales commitments. During FY2020, BHP Petroleum spent \$1.0 billion on development activities worldwide. Of this amount:

\$0.8 billion was spent progressing the conversion of proved undeveloped reserves for conventional projects where developed status was achieved in FY2020 or will be achieved when development is completed in the future

\$0.2 billion represented other development expenditures, including compliance and infrastructure improvements

FY2019 proved undeveloped reserves

At 30 June 2019, BHP Petroleum had 219 MMboe of proved undeveloped reserves, which corresponds to 26% of the reported proved reserves of 841 MMboe. This represents a reduction in proved undeveloped reserves of 202 MMboe from the 421 MMboe at 30 June 2018. The largest element of this reduction was 185 MMboe, which occurred with the divestment of unconventional Onshore U.S. assets. A reclassification from proved undeveloped to proved developed status of approximately 40 MMboe that occurred in the North West Shelf, Australia, with the completion of development and the start of production from the Greater Western Flank Phase B project, also contributed to the reduction. An additional 1 MMboe was also reclassified from proved undeveloped to proved developed status with the completion of an infill well (a well drilled for the purpose of increasing production) in the Rhourde Ouled Djemma integrated development in Algeria. Partially offsetting these reductions were revisions for technical studies of 10 MMboe for the Kipper field in the Bass Strait, Australia. Additions following the approval of the Atlantis Phase 3 project in the offshore U.S. GOM added 8 MMboe for development plan changes, 7 MMboe for performance and 1 MMboe as an extension. A performance reduction of 2 MMboe in the Mad Dog field partially offset the Atlantis performance addition.

The changes in proved undeveloped reserves in FY2021, FY2020 and FY2019 are summarized by change category in the table below. Additional information detailing the effect of price, performance, changes in capital development plans and technical studies are also provided for revisions.

Proved Undeveloped Reserves (PUD) Reconciliation (MMboe) (a)

BUSINESS AND CERTAIN INFORMATION ABOUT THE MERGED GROUP

Overview of the Merged Group Assets

The Merged Group will have a global portfolio of currently producing assets and future growth projects and opportunities. The key producing assets are integrated LNG projects in Western Australia, oil fields in the U.S. GOM as well as oil and gas assets in Australia and Trinidad & Tobago. The Merged Group's key growth projects will include the Scarborough and Pluto Train 2 LNG development in Australia, Shenzi North and Mad Dog 2 additions to the currently producing U.S. GOM oil projects and the greenfield Sangomar Oil Field Development Phase 1 project offshore Senegal. The Merged Group will also hold exploration and discovered resource opportunities in Australia, Timor-Leste, Senegal, South Korea, Egypt, Congo, Trinidad & Tobago, central and western U.S. GOM, Mexican GOM, Canada and Barbados.

For a detailed overview of the Merged Group's assets refer to the sections entitled "*Business and Certain Information About Woodside—Overview of Assets*" and "*Business and Certain Information About BHP Petroleum—Overview of Assets*."

Merged Group Reserves and Future Production Capacity

Merged Group reserves

The pro forma information is provided by adding numbers as prepared by each of Woodside and BHP Petroleum. This includes information for overlapping assets, specifically NWS where reserves and values have been added without any adjustments. BHP Petroleum uses a conversion factor of 6,000 MMscf per MMboe while Woodside uses 5,700 MMscf per MMboe equivalent. BHP Petroleum includes onshore and offshore fuel used in its operation as reserves while Woodside includes only the onshore fuel in its reserves. Pro forma information is derived with these assumptions unchanged for each of the entities. Woodside's Senegal assets and BHP Petroleum's T&T assets are subject to a production sharing contract and the reported proved reserves reflect economic interest in these assets. For further information regarding the estimated reserves of the Merged Group, including the basis of preparation of the pro forma reserves information, see the section entitled "*Unaudited Pro Forma Condensed Combined Financial Statements*."

2021 proved reserves

Production during 2021 totaled 202.5 MMboe, which was 4.9 MMboe lower than the previous year primarily due to overall natural production decline.

Extension and discoveries

Total extensions amounted to 1,280 MMboe, mostly due to the Scarborough LNG Project in Australia which took FID during 2021, and this contributed 1,197 MMboe of proved reserves. The Sangomar Oil Field Development is in execution phase and accounts for 81 MMboe of proved reserves. Other minor extensions included intersection of previously unpenetrated sands in the Julimar and Goodwyn fields in Australia; and in the Atlantis field in the U.S. GOM due to extension of proved field limit.

Revisions

Revisions during the year resulted in a net addition of 23 MMboe in proved reserves. In Australia, revisions increased proved reserves by 43 MMboe primarily due to improved production performance in the Pluto and Macedon gas fields and the Greater Enfield and NWS oil fields, partially offset by poorer than expected production performance in the Brunello and NWS gas fields.

In the U.S. GOM, revisions decreased reserves by 17 MMboe overall, primarily driven by reductions related to lower than expected well performance in the Atlantis and Mad Dog fields of 19 MMboe and 4 MMboe, respectively. Approval of the Shenzi Subsea Multi Phase Pump Project added 6 MMboe.

Table of Contents

In T&T, revisions decreased reserves by approximately 9 MMboe primarily due to lower-than-expected Ruby drilling results, which were partially offset by increases in the Angostura field.

Improved Recovery Revisions

There were no improved recovery revisions during the year ended 2021.

Merged Group Production Capacity

Woodside believes the Merger will deliver benefits for both Existing Woodside Shareholders and Participating BHP Shareholders by creating a long-life conventional portfolio of scale and diversity of geography, product and end markets.

On a pro forma basis, the Merged Group is expected to consist of:

Conventional asset base producing around 193 MMboe (2021 net production)

Diversified production mix of 46% LNG, 29% oil and condensate and 25% domestic gas and NGLs (2021 net production)

Wide geographic reach with production from Western Australia, east coast Australia, U.S. GOM, and T&T with approximately 95% of production (2021 net production) from OECD nations.

Table of Contents

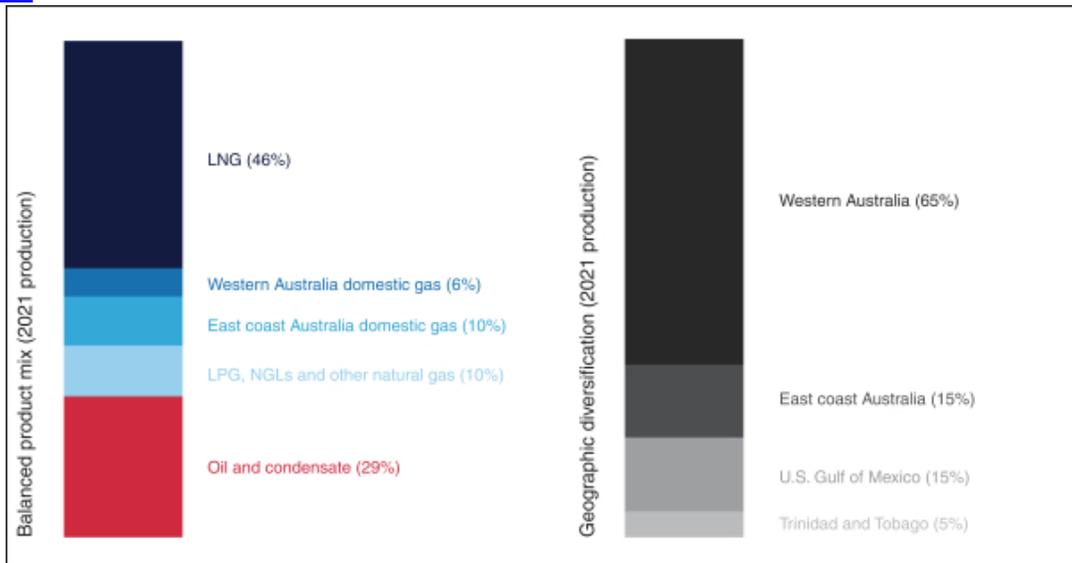

Figure 19 - Merged Group Production Mix by product and region for the 12 months ending 31 December 2021 excluding Algeria and Neptune production. Totals may not add up due to rounding.

Potential Synergies and Value Creation

Overview

Woodside has undertaken a review of costs for the Merged Group (benchmarked against industry peer performance) and produced a comprehensive list of synergy opportunities subject to and following Implementation. These opportunities are expected to realize annual savings in excess of \$400 million per annum (pre-tax 100% basis) comprising approximately \$120 million of corporate savings, \$80 million of cost savings related to operations of the business, \$150 million in exploration expenditure reduction and \$50 million of execution cost savings associated with future growth opportunities. These synergies are expected to be realized progressively and to be fully implemented by early 2024.

The organization structure and operating model for the Merged Group is being designed and will be progressively implemented following Implementation. The new operating model will include structural and sustainable changes which will reflect a more cost-efficient operating model and reflect synergies from the combination of the two businesses. The new organization design will feature a significant reduction in executive level positions, a reduction in management layers and an overall increase in the breadth of each manager's area of responsibility and accountability. In addition to the structural and operating model improvements there will be organizational synergies arising from the removal of duplicative or overlapping staffing levels which exist across corporate areas, support functions, commercial and technical functions, and asset support.

[Table of Contents](#)

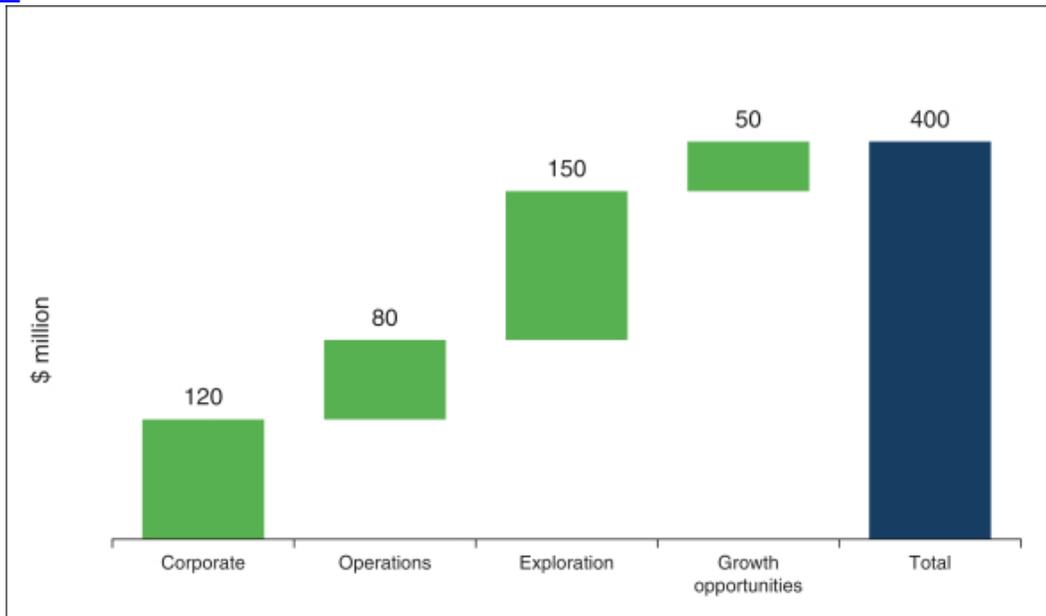

Figure 20—Approximate annual synergies and value creation categories (\$ million real terms 2022)

Key areas of the business where these synergies are expected to be achieved are set out in the following sections. As part of the integration process, Woodside expects to identify further synergies and value creation opportunities.

Corporate

This category refers to those costs incurred in supporting the Operations, Exploration, Development and Growth activities of the Merged Group.

In addition to the savings to be derived from the improvements in organization structure and operating model referred to above, Woodside also expects to be able to reduce costs by consolidating third party spend, by removing processes across corporate functions and overlapping assets and rationalizing information technology applications, licenses and subscriptions.

Examples are outlined below:

- Implementing a consolidated Enterprise Resource Planning System to enable integrated cost reporting and control and reducing the ongoing cost of maintaining duplicate systems.
- Combining or rationalizing legal entities.
- Consolidating corporate consultant costs.
- Consolidating and renegotiating enterprise-wide arrangements with key vendors for software and services.
- Consolidation of Marketing information systems and data providers.
- Rationalizing licenses and subscriptions for various marketing services.
- Consolidation of teams and office space to reduce property costs.

The synergies under this category account for ~30% of the overall synergies estimate of ~\$400 million.

Table of Contents

Operations

Independent of the Merger, Woodside has commenced programs to improve operational efficiency and reduce costs across its assets. Following Implementation, the Merged Group will continue this work and will further consolidate operations and execute efficient practices across the portfolio, which is intended to deliver further cost reductions.

Examples are outlined below:

Operating and maintenance cost:

Leveraging systems and digital solutions to reduce operating and maintenance costs across all assets for sustained cost reduction.

Sequencing maintenance programmes across certain assets to optimize workforce access to reduce cost and execution risk.

Digitizing maintenance strategies across all assets to reduce spend on planning, logistics and materials.

Reducing the cost of production maintenance through volume consolidation of Maintenance Repairs and Operations, chemicals, and other goods to be implemented across the assets progressively.

Supply chain and procurement:

Leveraging long-term relationships with key contractors and improved purchasing power due to economies of scale to secure better service and pricing.

Unifying and streamlining inventory management systems.

Consolidating the Australian logistics and material network; especially ground, air and vessel transportation support for Western Australian assets.

Consolidating supply base operations.

Asset productivity:

the Merged Group will also seek to improve the production performance of its upstream assets, sharing experience and technology solutions to improve uptime and lower unit-production costs.

The synergies under this category account for ~20% of the overall synergies estimate of ~\$400 million.

Exploration

Woodside has identified opportunities to reduce exploration expenditure to be pursued and implemented following Implementation. This saving will be achieved by reducing headcount across the exploration function and technical support function, and high-grading the combined exploration portfolio and focusing on progressing high-quality prospects that have a clear path to commercialization.

Opportunities have also been identified to make the delivery of exploration services more efficient, including:

Rationalizing licenses, data subscriptions and applications; and

Consolidation of Seismic campaigns.

The synergies under this category account for ~40% of the overall synergies estimate of ~\$400 million.

Table of Contents

Growth opportunities

The combined portfolio will allow the Merged Group to high-grade investment opportunities and improve phasing of the enlarged opportunity set. Opportunities have also been identified which have the potential to reduce execution costs. Examples are outlined below:

Inventory optimization by region and for exploration, decommissioning and development programs.

Sharing global inventory and regional backup.

Standardize casing, wellheads and trees and work with suppliers to maintain sufficient inventory to purchase on consignment.

Consolidate rig schedules to provide larger work scope, longer contracts and increased learning curve efficiencies.

Scale up purchasing power with major vendors engaged to deliver key projects.

The synergies under this category account for ~10% of the overall synergies estimate of ~\$400 million.

Marketing

The Merged Group's increased scale and existing LNG shipping capability will help to improve shipping utilization and reduce transportation and delivery unit costs. Woodside expects to determine the magnitude of the synergies in this category post Implementation.

Cost of attainment of synergies

Woodside estimates that the implementation of the potential synergies would give rise to one-off costs of approximately \$500 - 600 million, anticipated to be incurred in the first two years following Implementation. This estimate includes provisions for digital integration and severance costs and consultant and team costs necessary to complete the synergy attainment work. This estimate excludes costs to implement marketing synergies, which Woodside expects to determine post Implementation.

Debt facilities

There are no BHP Petroleum debt facilities associated with the Merger. For information about Woodside's debt facilities, see the section entitled "Description of Certain Indebtedness."

Exploration titles

The table below lists the exploration titles expected to be held by the Merged Group as of the Implementation Date. Following Implementation, the Merged Group will continue to assess the titles and licenses it holds in line with its strategy. Note this table does not include licenses associated with the producing and growth projects previously discussed in this prospectus where exploration activities may also be undertaken.

| Location | Titles and Licenses | | |

- (1) Woodside has commenced arrangements to formally exit all Blocks in which it participates in Myanmar including AD-7, A-7, AD-1, AD-8 and A-6.
- (2) A Market Development Phase (“MDP”) has been requested for this license, but not yet been granted, so this license is still considered to be in the Exploration Phase. Depending on the Ministry response to the MDP request, TTDAA 5 could move to MDP or be relinquished.
- (3) BHP owns all of block GC 679 from 16,048’ to 99,999’ (deep rights).

Corporate governance

The corporate governance principles of the Merged Group are expected to be the same as for Woodside governance. See the section entitled “*Board of Directors and Management of the Merged Group.*”

Table of Contents

Corporate office and listing venues

It is intended that after Implementation of the Merger the head office will remain in Western Australia at Mia Yellagonga, 11 Mount Street, Perth, Western Australia 6000, Australia.

Woodside Shares will have a primary listing on the ASX and are intended to have a secondary listing on the LSE, and the New Woodside ADSs are intended to be listed on the NYSE.

Interests of Woodside Directors and Other Key Management Personnel

See the section entitled “*Beneficial Ownership of Woodside Securities–Interests of Woodside Directors and Other Key Management Personnel*” for more information in relation to the interests that Woodside Directors and other Key Management Personnel hold in Woodside Shares.

Financing arrangements

The Merged Group’s financing arrangements, including its banking facilities, access to capital markets and maintenance of a relationship banking panel, will remain in line with Woodside’s existing financing arrangements. See the section entitled “*Description of Certain Indebtedness.*”

Hedging

The Merged Group’s approach to hedging will remain consistent with the Woodside financial risk management principles. Specifically, commodity price, interest rate and foreign exchange risk management will be undertaken in line with approved Woodside Board mandate parameters. See the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside–Principal Factors That Affect Woodside’s Results–Hedging.*”

Dividends

The Merged Group’s dividend policy is expected to be unchanged compared to Woodside’s current dividend policy.

The Woodside Board has the responsibility for approving dividends. The Woodside Board has determined there is no change to Woodside’s dividend policy of a minimum of 50% of net profit after tax excluding non-recurring items in dividends. The net profit after tax basis helps preserve cash and protect the balance sheet in periods of low commodity pricing. The Woodside Board’s dividend payout ratio target is between 50% to 80% of net profit after tax, excluding non-recurring items, subject to market conditions and investment requirements. Woodside will maintain the flexibility to consider opportunities to provide additional returns to shareholders through special dividends and share buy-backs in periods of excess cash generation.

Generally, Woodside pays dividends to its shareholders semi-annually, once in March or April and again in September or October of each year. Woodside maintains a dividend reinvestment plan that, if utilized by the Woodside Board, provides Woodside Shareholders with the option of reinvesting all or part of their dividends in additional Woodside Shares rather than taking cash dividends.

Table of Contents

On 17 February 2022, the Woodside Board declared a final dividend of \$1,018 million to Woodside Shareholders (\$1.05 per Woodside Share), representing a payout ratio of approximately 80% of net profit after tax excluding non-recurring items. The dividend reinvestment plan remains active, allowing eligible Woodside Shareholders to reinvest their dividends directly into Woodside Shares at a 1.5% discount. Woodside's prior dividends for the years ended 31 December 2015, 2016, 2017, 2018, 2019, 2020 and 2021 are as follows:

| <u>Date Declared</u> | <u>Date Paid</u> | <u>Type of Dividend</u> | <u>Dividend per Share</u> | <u>Total Dividends</u> |
|----------------------|-------------------|-------------------------|---------------------------|------------------------|
| 18 February 2015 | 25 March 2015 | Final | \$ 1.44 | \$1,186 million |
| 19 August 2015 | 23 September 2015 | Interim | \$ 0.66 | \$544 million |
| 17 February 2016 | 8 April 2016 | Final | \$ 0.43 | \$354 million |
| 19 August 2016 | 30 September 2016 | Interim | \$ 0.34 | \$286 million |
| 22 February 2017 | 29 March 2017 | Final | \$ 0.49 | \$413 million |
| 16 August 2017 | 21 September 2017 | Interim | \$ 0.49 | \$413 million |
| 14 February 2018 | 20 March 2018 | Final | \$ 0.49 | \$413 million |
| 15 August 2018 | 20 September 2018 | Interim | \$ 0.53 | \$496 million |
| 14 February 2019 | 20 March 2019 | Final | \$ 0.91 | \$852 million |
| 15 August 2019 | 20 September 2019 | Interim | \$ 0.36 | \$337 million |
| 13 February 2020 | 20 March 2020 | Final | \$ 0.55 | \$518 million |
| 13 August 2020 | 18 September 2020 | Interim | \$ 0.26 | \$248 million |
| 18 February 2021 | 24 March 2021 | Final | \$ 0.12 | \$115 million |
| 18 August 2021 | 24 September 2021 | Interim | \$ 0.30 | \$289 million |
| 17 February 2022 | 23 March 2022 | Final | \$ 1.05 | \$1,018 million |

Please see the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations of Woodside-Dividends" for more information.

Intentions of the Merged Group

Integration Planning and Business Continuity

Woodside and BHP have established a joint integration team that has commenced integration planning activities across key business areas.

The joint integration team is led by a senior executive representative from each of Woodside and BHP.

The objectives of this joint team are to:

develop a detailed integration plan which identifies activities necessary to bring together the operations of the BHP Petroleum business and Woodside business on and from Implementation;

identify the short-term transition services that will be required immediately after Implementation; and

combine the respective oil and gas businesses of Woodside and BHP while minimizing disruption to the business of the Merged Group.

The final integration plan will set out the key activities to achieve integration of Woodside and BHP Petroleum (including organizational design, regulatory management, stakeholder engagement, and systems and operations transfer).

Following Implementation, the integration team will endeavour to ensure that the identified synergies of the Merger are actioned, monitored and realized as planned.

The Woodside Board is confident that separation of BHP Petroleum from BHP and the subsequent integration of Woodside and BHP Petroleum can be achieved with minimal impact in conducting the Merged Group business safely and efficiently.

Table of Contents

Values

The Merged Group values are still being defined but will reflect Woodside' s fundamental values, which are as follows:

Respect - We give everyone a fair go, give and receive feedback and listen with empathy

Ownership - We set goals, hold ourselves accountable and learn, including from mistakes

Sustainability - We keep each other safe, look after the environment and support our community

Working Together - We embrace inclusion, value diversity and build long-term relationships

Integrity - We are transparent, honest and fair and build trust by doing the right thing

Courage - We speak up, act decisively and embrace change

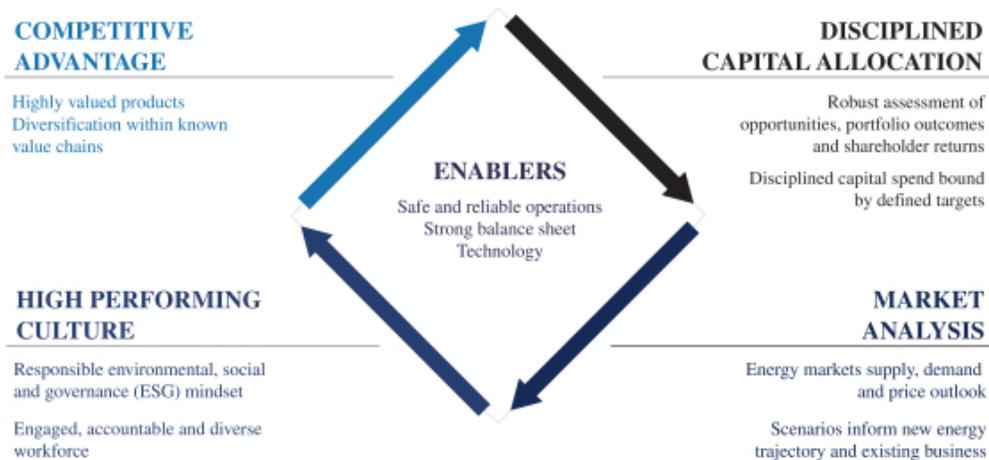

Strategy

Woodside plans to develop a strategy for the Merged Group to optimize value and shareholder returns through the energy transition. The goal is to leverage its base business profitability to build a low-cost, lower-carbon, profitable, financially resilient, and diversified portfolio of growth opportunities to achieve its strategic objectives.

The strategy will see Woodside continuing to develop hydrocarbons while gradually building optionality in new energy products and lower-carbon services such as ammonia, liquid hydrogen and the development of carbon capture and utilization through targeted opportunities with attractive growth potential.

In addition to these new energy opportunities Woodside is assessing opportunities for carbon capture and storage, including an opportunity to develop a large-scale, multi-user project near Karratha, Western Australia.

The strategic planning framework will facilitate delivery of Woodside' s strategy and execution of future investment decisions.

Competitive Advantage

Woodside' s strategy aims to establish a competitive advantage by offering to its customers high-valued products. Woodside operates international assets to deliver low-cost and high-margin products, and is maturing a portfolio of high-quality growth options, including both hydrocarbon and new energy opportunities.

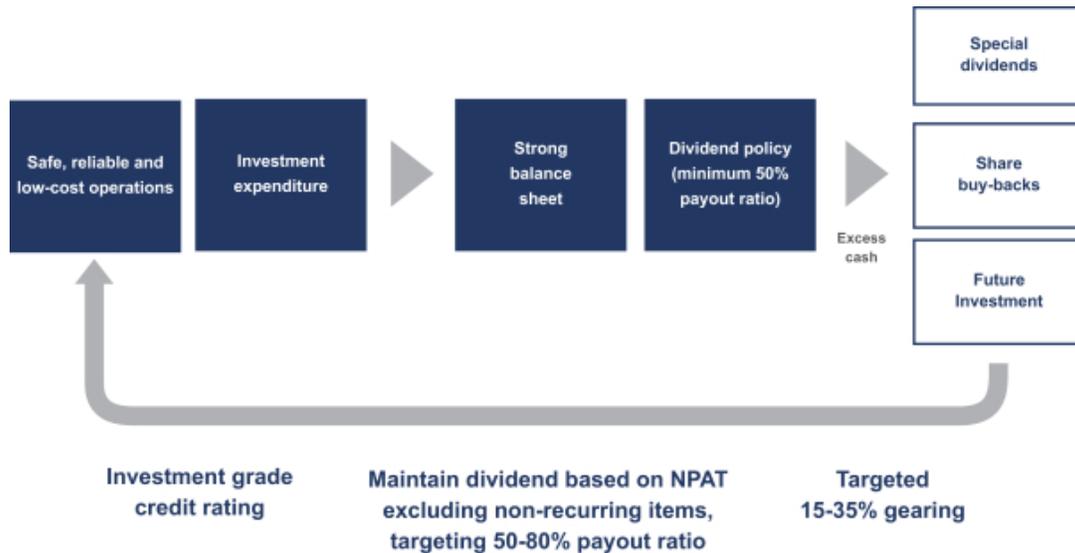

Table of Contents

Understanding the changes in the energy market, combined with diversifying the portfolio into new energy, will help Woodside to identify new areas within known segments of the energy value chain where the Merged Group may gain a competitive advantage.

Woodside's strategy to diversify its portfolio into new energy will be built on Woodside's understanding of the energy value chain and the market evolution, and its capabilities to identify adjacent areas of the energy value chain where it may gain a competitive advantage.

Disciplined Capital Management and Allocation

Woodside's approach to capital management is to deploy its capital within a framework designed to optimise shareholder returns, through investing in growth opportunities or distributions, while maintaining a strong balance sheet.

Woodside has a portfolio of assets providing safe, reliable and low-cost operations which provides the foundation to deliver new growth opportunities.

In respect of investing in growth opportunities, Woodside's disciplined capital allocation approach includes robust assessment of opportunities, portfolio outcomes and shareholder returns, while maintaining focus on safe and reliable operations.

Woodside's capital allocation approach aligns to its strategy and is expected to enable the current portfolio to evolve into the optimal portfolio for the future, incorporating a mix of oil, gas, and new energy opportunities and shareholder returns.

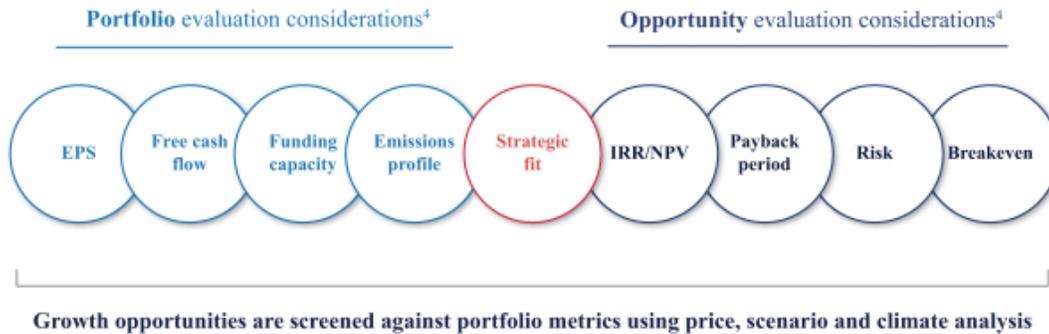

The Merged Group will adopt Woodside's capital allocation approach.

Woodside's capital allocation framework sets target investment criteria for the assessment of oil, gas and new energy opportunities. It comprises investment targets for different business segments, as well as portfolio-level financial and non-financial metrics to evaluate opportunities for their strategic fit and performance under different scenarios. The capital allocation framework is used to create a diversified and flexible portfolio which is responsive to changes in demand and supply for Woodside's products.

| | OIL | GAS | | NEW ENERGY |
|---------------------|---|---|---|--|
| | OFFSHORE | PIPELINE | LNG | DIVERSIFIED |
| Focus | Generate high returns to fund diversified growth, focusing on high quality resources | Leveraging infrastructure to monetise undeveloped gas, including optionality for hydrogen | | New energy products and lower-carbon services to reduce customers' emissions; hydrogen, ammonia, CCUS ¹ |
| Characteristics | High cash generation Shorter payback period Quick to market | Stable long-term cash flow profile Resilient to commodity pricing | Long-term cash flow Strong forecast demand Upside potential | Developing market Lower capital requirement Lower risk profile |
| Opportunity targets | IRR > 15% Payback within 5 years ² | IRR > 12% Payback within 7 years ² | | IRR > 10% Payback within 10 years ² |
| Emissions reduction | 30% net emissions reduction by 2030, net zero aspiration by 2050 or sooner ³ | | | |

When assessing opportunities, Woodside considers a broad range of portfolio evaluation and opportunity evaluation factors relevant to the opportunity. These assessments can apply to acquisitions or divestments, and for evaluating the impact of a new project on the portfolio.

- 1 CCUS refers to carbon capture utilisation and storage.
- 2 Payback refers to ready for start-up+X years.
- 3 Target is for net equity Scope 1 and 2 greenhouse gas emissions, relative to a starting base of the gross annual average equity Scope 1 and 2 greenhouse gas emissions over 2016-2022 and may be adjusted (up or down) for potential equity changes in producing or sanctioned assets with an FID prior to 2021. Post-completion of the Woodside and BHP petroleum merger (which remains subject to conditions including regulatory approvals), the starting base will be adjusted for the then combined Woodside and BHP petroleum portfolio.
- 4 Illustrative of the considerations. Not an exhaustive list.

The Merged Group portfolio is expected to provide optionality across oil, gas and new energy. Each business segment is expected to meet specific investment criteria that reflect different risk-reward profiles.

The allocation approach intends to support continued investment in hydrocarbons where screening criteria are met, as well as building capability and competitive advantage in new energy. In addition, Woodside expects to manage the emissions from all these investments to meet Woodside's targets to reduce net equity Scope 1 and Scope 2 greenhouse gas emissions by 15% by 2025 and 30% by 2030, towards an aspiration of net zero by 2050

Table of Contents

or sooner. Woodside's climate strategy is composed of reducing its net equity Scope 1 and 2 greenhouse gas emissions, and investing in the products and services that are intended to help customers reduce their emissions. The target is for net equity Scope 1 and 2 greenhouse gas emissions, relative to a starting base of the gross annual average equity Scope 1 and 2 greenhouse gas emissions over 2016-2020 and may be adjusted (up or down) for potential equity changes in producing or sanctioned assets with an FID prior to 2021. After Implementation of the Merger, the baseline will be adjusted for the Merged Group portfolio. See the section entitled "*Business and Certain Information About Woodside-ESG-Climate Change*" for additional information on expected management of carbon emissions offsetting.

Capital investment requirements are primarily funded by Woodside's resilient and stable operating cash flows, in conjunction with a number of capital management levers:

Participating interest management, ensuring a balance of capital investment requirements, project execution risk and long-term value; In 2021 Woodside announced the sell-down of a 49% non-operating participating interest in the Pluto Train 2 Joint Venture. This transaction completed in January 2022. In 2022, Woodside will continue the targeted sell-down processes for Sangomar and the Scarborough offshore resource;

Debt management, to ensure that Woodside continues to have access to premium debt markets at a competitive cost to support its growth activities. Woodside seeks to manage average debt maturity on its debt portfolio. Woodside's gearing target is 15-35%. Woodside continues to target maintaining an investment-grade credit rating; and

Focused expenditure management, to ensure prudent and efficient deployment of capital to support delivery of base business and growth opportunities.

Oil

The Merged Group's oil investments will focus on high-quality oil resources that can generate high returns to fund future diversified growth. These opportunities are characterized by quick developments, short payback periods and significant cash generation once operational. Subsea tiebacks to existing oil infrastructure can be particularly attractive.

Woodside plans to target oil opportunities for the Merged Group that deliver rates of return greater than 15% and payback within the first 5 years from ready for start up.

Gas

Woodside believes gas will continue to play a major role in the energy system, as countries switch from coal and look for stable forms of base-load power to support renewables. The Merged Group will invest in LNG and pipeline gas opportunities, focusing on developments through existing infrastructure and opportunities to develop optionality for hydrogen.

Woodside plans to target gas opportunities for the Merged Group that deliver rates of return above 12% and payback within 7 years from ready for start up.

New Energy

Woodside believes the new energy products and services market is developing and could grow quickly as countries and businesses commit to net zero goals and policies to incentivize lower-carbon solutions across the globe strengthen. Woodside has set a target to invest at least \$5 billion on new energy products and lower-carbon services by 2030 to meet this growing demand. This investment target assumes Implementation of the Merger. Individual investment decisions are subject to Woodside's investment hurdles.

Table of Contents

Woodside expects to diversify its product stream by investing in a diversified range of new energy opportunities. These include products and services that are intended to help customers reduce their emissions such as the supply of hydrogen and ammonia, and the provision of Carbon, Capture, Utilization and Storage services to third-parties to support their decarbonization efforts.

These opportunities are expected to be scalable in nature, providing the opportunity for staged investment as the market develops.

Opportunities that deliver rates of return greater than 10% and payback within 10 years from ready for start up will be targeted for the Merged Group. These thresholds reflect that these projects are not exposed to upstream or resource risk in the way a traditional oil or gas development is.

New energy opportunities recently announced by Woodside include H2Perth (an ammonia and hydrogen opportunity located near the Kwinana industrial hub south of Perth, Western Australia), H2TAS (a renewable hydrogen and ammonia opportunity located in the Bell Bay area of northern Tasmania), H2OK (a liquid hydrogen opportunity in Oklahoma) as well as a collaboration with Heliogen on deployment of their concentrated solar technology at a pilot facility in California.

Market Analysis

Woodside's investment decisions are informed by energy market analysis including supply, demand and price outlooks. Through market analysis, Woodside seeks to monitor the global macroeconomic and geopolitical environment and the energy markets outlook to determine how they can impact the organization and how to best respond, including how Woodside allocates capital. This is expected to include third-party scenarios and Woodside's own assessment of product prices and market conditions.

Woodside uses scenario models to test the resilience of the current portfolio to different energy outlooks. The robustness of potential investments are also assessed to inform investment decisions around growth strategy and future portfolio of the Merged Group to ensure that Woodside will remain profitable and resilient through various commodity cycles and climate outcomes, including the energy transition trajectory.

High Performing Culture

Woodside's high performing culture, which includes an engaged, accountable and diverse workforce with a responsible ESG mindset, is critical to ensuring its effectiveness in delivering its vision and strategy.

Enablers

Woodside's ability to successfully navigate the energy transition will be underpinned by three primary enablers. Woodside's safe and reliable operations will aim to keep its people safe and protect its revenues. Woodside's focus on maintaining a strong balance sheet will aim to provide the financial flexibility to support the maturation of growth opportunities. Woodside's technology capability will aim to improve base business efficiency and productivity and will enable expansion into new markets for the Merged Group.

Employees

As of 31 December 2021, after giving effect to the Merger as though it had been Implemented on that date, the Merged Group would have had approximately 5,131 full-time employees, the majority of whom are located in Australia and the United States of America.

As of 31 December 2021, Woodside had 3,764 full-time employees, 3,660 of whom were located in Australia.

Table of Contents

BHP Petroleum's average number of employees and contractors for the calendar year ended 31 December 2021 was 1,367. On average, approximately 75% of the workforce were employees (1,016) and approximately 25% were contractors (351).

Average⁽¹⁾ number of BHP Petroleum employees for CY 2021, 2020 and 2019 by geographical area

| | <u>2021</u> | <u>2020</u> | <u>2019</u> |
|----------------------|-------------|-------------|-------------|
| Australia | 135 | 177 | 178 |
| United States | 719 | 1,031 | 1,103 |
| Rest of World | 162 | 182 | 201 |

- (1) Average employee numbers include 100% of employees of subsidiary companies. Employees of equity accounted investments and joint operations are not included. Part-time employees are included on a full-time equivalent basis. Employees of businesses disposed of during the year are included for the period of ownership. Contractors are not included.

In addition, as a subsidiary of BHP, BHP Petroleum has also historically benefited from corporate and centralized administration services provided by employees within BHP's corporate divisions. These groups are in addition to the employee numbers above and services typically include administration support activities in Human Resources, Procurement, Marketing and Finance.

Table of Contents

For the years ended 31 December 2021, 2020 and 2019, Woodside has employed the numbers of people as detailed in the following table.

Woodside employees for the years ended 31 December:

| PEOPLE | 2021 | 2020 | 2019 |
|--|-------|-------|-------|
| Employment gender (number of staff by gender) | | | |
| Male | 2,525 | 2,546 | 2,676 |

Decommissioning

Cost estimates and scope of work

Decommissioning the site of oil and gas field developments, processing plants and associated infrastructure is a well-established requirement of the oil and gas lifecycle following cessation of production.

Woodside estimates the future remediation and removal costs of offshore oil and gas platforms, production facilities, wells and pipelines at different stages of the development and construction of assets or facilities. In many instances, remediation and removal of assets occurs many years into the future.

Woodside's decommissioning and restoration cost estimates are based on compliance with the requirements of relevant regulations which vary for different jurisdictions and are often non-prescriptive. Australian legislation, for example, requires removal of structures, equipment and property, or alternative arrangements to removal which are satisfactory to the regulator. Woodside maintains technical expertise to ensure that industry learnings, scientific research and local and international guidelines are reviewed in assessing its decommissioning and restoration obligations.

Table of Contents

The decommissioning and restoration cost estimates requires judgemental assumptions regarding removal date, environmental legislation and regulations, the extent of restoration activities required, the engineering methodology for estimating cost and future removal technologies in determining the removal cost. Woodside' s estimates include the following costs:

For onshore assets, costs associated with the removal of production facilities and aboveground pipelines to allow site reuse. Provision is made for groundwater monitoring and remediation.

For offshore assets, costs associated with the plugging and abandonment of wells and the removal of offshore platform topsides, floating production storage offloading (FPSO) and some subsea infrastructure. It is currently Woodside' s assumption that certain pipelines and infrastructure, parts of offshore platform substructures, and certain subsea infrastructure remain in-situ where it can be demonstrated that this will deliver equal or better health, safety and environmental outcomes than full removal and that regulatory approval is obtained where the arrangements are satisfactory to the regulator.

The basis of the cost estimate for assets with approved decommissioning plan or directions issued by a regulator can differ from the estimate that would be produced from the application of the assumptions above. While the costs are based on current knowledge and information, further studies and detailed analysis of the restoration activities for individual assets will be performed near the end of their operational life and/or when detailed decommissioning plans are required to be submitted to the relevant regulatory authorities.

Woodside has assessed that BHP adopts a similar approach in estimating the scope, cost and timing of decommissioning and restoration activities.

Figure 21 below is an indicative profile for decommissioning costs of the Merged Group and is calculated on the following basis:

the assumptions stated above in relation to the full or partial removal of assets;

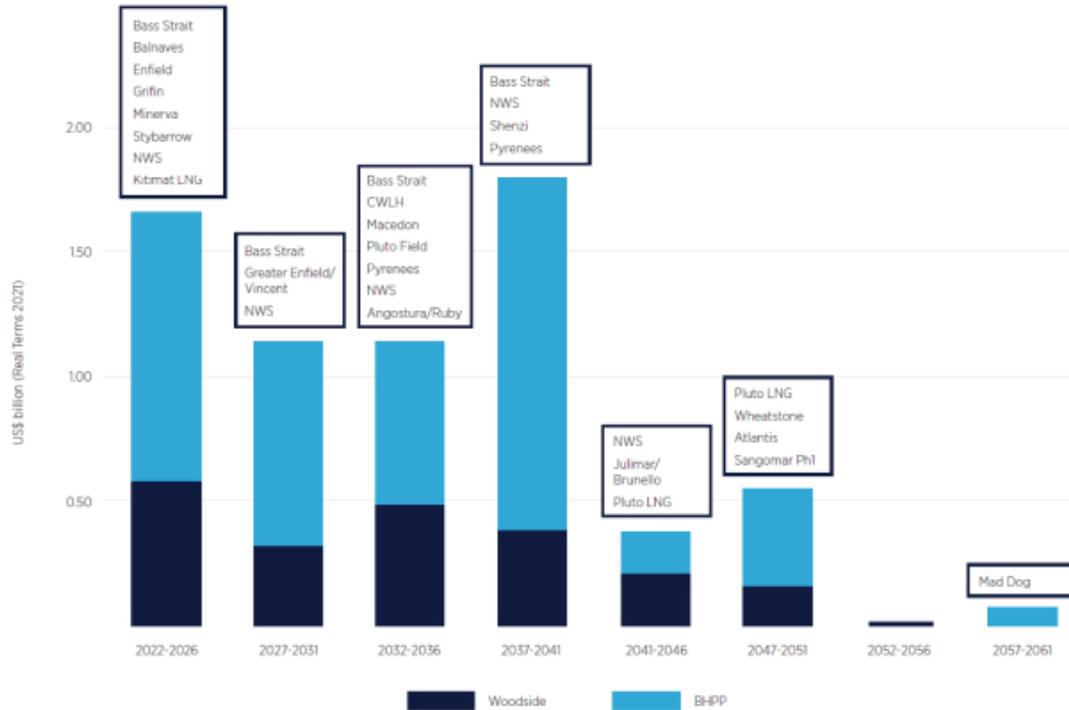

Woodside costs and schedule have been applied to Woodside assets installed as at 31 December 2021; and

BHP Petroleum costs and schedule have been applied to BHP Petroleum assets installed as at 30 June 2021.

Yet to be installed parts of sanctioned development projects including Scarborough, Pluto Train 2, Sangomar Phase 1, Mad Dog Phase 2, Shenzi North and GWF3/LD are not included in the indicative profile. Current estimates indicate that decommissioning of Sangomar Phase 1 (without further development), U.S. GOM hubs and Scarborough and Pluto LNG will occur post 2040.

[Table of Contents](#)

Figure 21: Indicative decommissioning costs (pre-tax) of the Merged Group over 5-year periods (real terms 2021)

- (1) This figure is indicative only, and is intended to provide an overall future decommissioning costs profile for the Merged Group. It is based on the assumptions outlined above. This figure is being provided in advance of Implementation of the Merger and is based, in some respects, on external views of the BHP Petroleum assets. Accordingly, this figure is provided for illustrative purposes only and should not be relied on as definitive guidance of future decommissioning costs of the Merged Group. See the section entitled “*Cautionary Statement Regarding Forward-Looking Statements*” for important cautionary information relating to forward-looking statements.
- (2) Real term costs refer to costs that are not escalated for inflation.

Near Term Activities (2022-2026)

The portfolio of the Merged Group has near term (2022-2026) decommissioning expenditure relating to:

Assets which have ceased production:

- Balnaves, Enfield, Griffin and Stybarrow oil fields in north-west Australia;
- Minerva in Victoria;
- Parts of the North West Shelf Project; and
- Parts of the Bass Strait production system.

Sites related to the exit from Kitimat LNG in Canada;

Exploration and appraisal wells; and

Production wells in the U.S. GOM which are expected to cease production in this period.

Table of Contents

Examples of some of the near-term activities are outlined below:

Balnaves, Enfield, Griffin and Stybarrow: The floating production, storage and offloading (FPSO) facilities associated with each of these oil fields have already been removed. The remaining decommissioning activities relate to the plugging and abandonment of wells and the removal/insitu decommissioning of the flowlines, mooring systems and foundations as well as the Griffin concrete coated steel gas export pipeline.

Minerva: The remaining decommissioning activities relate to removal/insitu decommissioning of the sub-sea pipeline system to shore and the plugging and abandonment of wells.

Parts of the North West Shelf Project: The Echo Yodel and Angel fields have ceased production. The wells associated with the Echo Yodel field were plugged and abandoned in 2021 and the wellheads and pipeline including its plastic coating is planned for removal. The wells associated with the Angel field are also planned to be plugged and abandoned with two subsea Perseus wells which have also ceased production.

Parts of the Bass Strait Development: Certain subsea and platform production wells have already been plugged and abandoned and certain subsea equipment already removed. A number of fields have now ceased production and an active program of plugging and abandonment and care and preservation of facilities to allow future removal is ongoing.

Longer Term Activities (beyond 2026)

The timing for longer term decommissioning expenditure (beyond 2026) relating to other assets within the portfolio of the Merged Group is subject to various factors including, but not limited to:

field performance;

commodity price;

field and infrastructure life extension programmes;

regulatory requirements; and

timing of development of additional assets which enables the life of existing assets/infrastructure to be prolonged.

Figure 21 indicates the current timing expectations for decommissioning expenditure of the production hubs assuming no subsequent additional development.

Bass Strait

As set out in Figure 21 above, of the indicative decommissioning costs (pre-tax) of the Merged Group, costs associated with the Bass Strait production system accounts for approximately 40% for the near term (2022-2026) and approximately 25% for the longer term (from 2027 onwards).

Decommissioning activities are being undertaken by Esso Australia Resources, as operator of the project. The Bass Strait Environmental Plan (dated 26 March 2021) provides an indicative program of offshore decommissioning activities including equipment which is judged to be removed and equipment which is judged to remain in-situ, together with the timing for the proposed decommissioning campaigns. The scope of the equipment which will remain in-situ remains subject to technical investigations and regulator approvals. The indicative costs set out in Figure 21 align with these judgements.

Restoration obligation

From a financial reporting perspective, Woodside and BHP actively manage their restoration provisions for these future activities, which are included in their respective periodic financial statements.

Table of Contents

To establish the value of the accounting provision for the Merged Group, in respect of the BHP Petroleum assets, Woodside has:

- adopted real term costs for BHP Petroleum' s assets; and
- applied Woodside' s escalation and discount rate assumptions.

Note: real term costs refer to costs that are not escalated for inflation; and differences in escalation and discount rate assumptions can have a material impact on the accounting provision.

Normalization of scope and cost estimate methodologies across the Merged Group will be made in subsequent years.

For further detail see Note 3(k) in the section entitled “*Unaudited Pro Forma Condensed Combined Financial Statements.*”

The calculation of restoration provisions is conducted by specialist engineers and requires judgemental assumptions to be made regarding removal date, compliance with environmental legislation and regulations, the extent of restoration activities required (including assets remaining in-situ), the engineering methodology for estimating cost, future removal technologies in determining the removal cost, and liability-specific discount rates to determine the present value of these cash flows. Approval by NOPSEMA, the relevant Australian regulator, for items remaining in-situ will only be provided towards the end of field life and accordingly, at 31 December 2021, there is uncertainty whether NOPSEMA or regulators in other jurisdictions will approve plans for these items to be decommissioned in-situ. These assumptions and estimates are inherently subjective and changes can lead to significant differences in the restoration provision. See the section entitled “*Risk Factors–The Merged Group' s financial results could be adversely affected by impairments of goodwill or other intangible assets, the application of future accounting policies or interpretations of existing accounting policies including by regulatory direction, and changes in estimates of decommissioning costs.*”

REGULATORY INFORMATION ABOUT THE MERGED GROUP

This section sets out a description of the material government regulations that apply to the businesses of each of Woodside and BHP Petroleum, which will correspondingly apply to the Merged Group. This section is divided into the following:

Australia—a summary of the material regulations that apply to Woodside and BHP Petroleum’s operations in Australia, including a summary of the material regulations that apply in the states of Western Australia and Victoria;

United States—a summary of the material regulations that apply to Woodside and BHP Petroleum’s assets and/or operations in the United States; and

Other.

Woodside and BHP Petroleum are subject to a broad range of laws and regulations imposed by governments and regulatory bodies. These regulations touch all aspects of each of Woodside and BHP Petroleum’s assets, including how Woodside and BHP Petroleum extract, process and explore for oil and natural gas and how Woodside and BHP Petroleum conduct their businesses, including regulations governing matters such as environmental protection, land rehabilitation, occupational health and safety, human rights, the rights and interests of Indigenous peoples, competition, foreign investment, export, marketing of oil and natural gas and taxes.

The rights to explore for oil and natural gas are granted to Woodside and BHP Petroleum by the government that owns the natural resources that Woodside or BHP Petroleum wish to explore. Usually, the right to explore carries with it the obligation to spend a defined amount of money on the exploration, or to undertake particular exploration activities.

The ability to extract and process oil and natural gas is fundamental to each of Woodside and BHP Petroleum. In most jurisdictions, the rights to extract petroleum deposits are owned by the government. Woodside or BHP Petroleum obtain the right to access the land and extract the product by entering into licenses or leases with the government that owns the oil or natural gas deposit. Woodside and BHP Petroleum also rely on governments to grant the rights necessary to transport and treat the extracted petroleum to prepare it for sale. The terms of the lease or license, including the time period of the lease or license, vary depending on the laws of the relevant government or terms negotiated with the relevant government.

In certain jurisdictions where Woodside and BHP Petroleum have assets, such as BHP Petroleum’s assets in T&T and Woodside’s assets in Senegal, a production sharing contract (“PSC”) governs the relationship between the government and companies concerning how much of the oil and gas extracted from the country each party will receive. Under PSCs, the government awards rights for the execution of exploration, development and production activities to the companies. The company bears the financial risk of the initiative and explores, develops and ultimately produces the field as required. When successful, the company is permitted to use the money from a certain set percentage of produced oil and gas to recover its capital and operational expenditures, known as “cost oil.” The remaining production is known as “profit oil” and is split between the government and the company at a rate determined by the government and set out in the PSC.

This summary focuses on the Australian and United States regulatory regimes. The summary is not a full summary of the regulatory regimes in those jurisdictions nor is it a complete list of the legislation and regulation that applies to each of Woodside and BHP Petroleum.

Australia

General

In Australia, petroleum exploration and development takes place within a legal framework characterized by a division of responsibilities between the federal and the state or territory governments. Exploration and

Table of Contents

development conducted onshore and within three nautical miles of the territorial sea baseline of the relevant state or territory (“coastal waters”) are the responsibility of the individual state or territory governments.

The Australian federal government has legislative responsibility for Australian offshore petroleum exploration and production beyond the three nautical mile territorial sea, which encompasses the area of most relevance to Woodside’s and BHP Petroleum’s offshore activities.

BHP Petroleum has certain onshore operations in Victoria, Australia, including the Gippsland Basin Joint Venture (referred to as the “Victorian onshore operations”). These onshore operations are subject to various Victorian state legislation and accordingly this section includes a summary of the material Victorian regulations.

In addition, Woodside and BHP Petroleum have certain onshore activities in Western Australia which are subject to various Western Australian state legislation and accordingly this section also includes a summary of the material Western Australian regulations.

Federal Petroleum Legislation and Regulation

Woodside’s and BHP Petroleum’s Australian offshore operations beyond coastal waters are primarily governed by the *Offshore Petroleum and Greenhouse Gas Storage Act 2006* (Cth) (“OPA”) and related legislation.

The OPA establishes a joint authority (“Joint Authority”) whereby relevant Australian state, territory and federal governments cooperate in the administration and supervision of petroleum activities in Australia’s offshore areas beyond coastal waters. Within the coastal waters, petroleum operations are covered by the relevant state or Northern Territory legislation that is substantively similar to the OPA. Other state and territory legislation principally covers the establishment and operation of facilities for the processing, production and delivery of gas, LNG and other petroleum products located onshore. In relation to environmental and native title legislation and regulation, see “*Indigenous and Natural Heritage Legislation and Agreements*” and “*Environmental Regulation*.”

Woodside holds production sharing contracts and retention leases covering its petroleum interests within the Greater Sunrise Special Regime (“GSSR”) under joint Australian/Timor-Leste administrative control. The GSSR was established pursuant to the Maritime Boundaries Treaty, which came into force on 30 August 2019 and the GSSR replaced the Joint Petroleum Development Area (“JPDA”). Woodside and the other Sunrise joint venture participants are required to enter into a new production sharing contract. See “*Arrangements between the Australian Government and the Timor-Leste Government in relation to the GSSR, the JPDA and Greater Sunrise gas fields*.”

A number of Woodside’s and BHP Petroleum’s production licenses and most exploration permits and other petroleum titles that Woodside and BHP Petroleum hold in the North West Shelf and that Woodside holds in the Timor Sea (Australian controlled) regions were issued under the *Petroleum (Submerged Lands) Act 1967* (Cth) (“PSLA”), which has since been repealed and replaced by the OPA. The repeal of the PSLA does not affect titles granted under it, and offshore petroleum titles beyond coastal waters (including those previously issued under the PSLA) are now issued and regulated under the OPA.

An exploration permit granted under the OPA authorizes the holder to explore for, but not to produce commercially, petroleum products (including oil and gas and related products) in the area that is covered by the permit. The Joint Authority selects vacant acreage and makes it available for competitive bidding each year. Exploration permits are awarded based on work program bids (or, on occasion, a cash bid) for an initial period of six years. The holder of an exploration permit granted under the work program bidding system is required to complete a minimum guaranteed work program within the first three years of a permit. The commitments under the work program must be completed on schedule or the permit may be cancelled. In practice, at the end of the

Table of Contents

three years, the holder may either surrender the permit if the work program has been discharged, or alternatively, elect to complete a secondary work program on a year-by-year basis for each of the subsequent three years. Under the cash bidding system, permits are awarded to the highest cash bidder with no minimum work obligation.

Exploration permits with a work program may be renewed for five-year periods. On each renewal, however, the permit holder is obliged to surrender at least half the number of blocks contained in the existing permit subject to certain exceptions as set out in the OPA. In addition, the blocks that are the subject of a discovery and held under a location status are excluded from the halving calculation. Subject to the exceptions set out in the OPA, the holder of a permit is entitled to be granted a renewal, provided the conditions of the permit and the relevant provisions of the OPA and the regulations have been complied with.

The holder of an exploration permit may apply for a production license after a discovery has been made. A production license granted before 30 July 1998 remains in force (subject to compliance with the license conditions, the OPA and the regulations):

for an initial period of 21 years;

in the case of a production license granted by way of first renewal, for a period of 21 years; or

in the case of a production license granted by way of second renewal, indefinitely.

The holder of a production license is entitled to be granted a renewal where the conditions of the license, the OPA and the regulations applicable to the license have been complied with. A production license granted on or after 30 July 1998 remains in force indefinitely (subject to compliance with the license conditions, the OPA and the regulations). However, the Joint Authority has discretion to terminate such a production license where no operations for the recovery of petroleum under the license have been carried on for a continuous period of at least five years.

The *Offshore Petroleum and Greenhouse Gas Storage (Resource Management and Administration) Regulations 2011* (Cth) (“Resources Management Regulations”) contain resource management provisions, including a requirement for the holder of a production license to have in place a FDP approved by the Joint Authority before petroleum production can commence. Under the Resources Management Regulations:

The Joint Authority will reject an FDP if it is not satisfied that it is consistent with good oilfield practice or compatible with optimum long-term recovery of the petroleum.

Once an FDP has been approved, the holder of the production license must apply for a variation of the FDP at least 90 days before it makes a “major change” in relation to the recovery of petroleum, including a change in the development strategy or management strategy, a change in the plan for the development of additional pools in the field, cessation of production permanently or for the long-term before the date proposed in the FDP, or introduction of new methods for petroleum recovery such as enhanced recovery and injection of fluids.

The Joint Authority will also have the discretion to require a variation of an approved FDP.

The holder of a production license will have an obligation to notify the Joint Authority within seven days after becoming aware of a “significant event.” This includes a change in the understanding of the characteristics of the geology or reservoir that may have a significant impact on the optimum recovery of petroleum, a new or increased risk to the recovery of petroleum within the license area or outside the license area caused by the development of pools in the license area, a new or increased risk of activities in the license area causing effects outside the license area, or a change to the proposed option for development of pools in the license area, including any tie-in opportunity with nearby license areas.

The OPA also provides for the grant of pipeline licenses within the areas of the OPA’s jurisdictional operation. Pipelines within the coastal waters of Western Australia are licensed under the *Petroleum (Submerged*

Table of Contents

Lands) Act 1982 (WA) and pipelines within the coastal waters of Victoria are licensed under the *Offshore Petroleum and Greenhouse Gas Storage Act 2010* (Vic). Onshore pipelines in Western Australia are licensed under the *Petroleum Pipelines Act 1969* (WA) and onshore pipelines in Victoria are licensed under the *Pipelines Act 2005* (Vic).

As of the date of this prospectus, Woodside is not a “foreign person” for the purposes of the *Foreign Acquisitions and Takeovers Act 1975* (Cth) (“FATA”), including the regulations promulgated thereunder, and Australia’s Foreign Investment Policy (“Investment Policy”). See “–*Regulation of Foreign Investment in Australia and Takeovers Policy*” below. Accordingly, acquisitions of interests in production licenses and certain other types of petroleum tenure by Woodside do not need to be approved by the Federal Treasurer in accordance with the terms of the FATA and the Investment Policy. Further, Woodside will be considered a “national security business” for the purposes of the FATA due to the gas assets held, which meet the definition of a “critical gas asset” within the *Security of Critical Infrastructure Act 2018* (the “SOCI Act”). As such, acquisitions of interests in Woodside may need to be approved by the Federal Treasurer in accordance with the terms of the FATA. Whether Woodside is a “foreign person” or a “national security business” for the purposes of the FATA may change from time to time based on the identities of the Woodside Shareholders and the business operations and asset holdings of Woodside (as discussed further in the section referred to above).

A person who makes a discovery that is not currently commercially viable, but is likely to become commercially viable within 15 years, may apply for a retention lease under the OPA. This application must be made within two years after a petroleum location has been declared under the exploration permit, although this period can be extended. A retention lease gives the holder an interest over the discovery, so that if the discovery does become commercially viable at some point, the holder could apply for a production license. Retention leases are generally granted subject to conditions that relate to appraisal and, in some cases, marketing activities. A retention lease is granted for a period of five years and is renewable subject to certain requirements being met. As with the original grant of a retention lease, applicants for a renewal must be able to demonstrate that their discovery is not commercially viable at the time of the application, but that the discovery is likely to become commercially viable within 15 years.

Currently, under the OPA, the Joint Authority has the power to require one review during the term of the retention lease to assess a field’s commercial viability in the then-current market environment. If the Joint Authority decides that a field is currently commercially viable, the lessee is given notice of the proposed revocation of the lease and an opportunity to make submissions to the Joint Authority about the proposal to revoke the lease. If, despite any such submission, the Joint Authority decides that the lease should be revoked, the lessee has 12 months to apply for a production license, failing which the revocation of the lease will take effect.

The OPA requires titleholders to maintain financial assurance (which includes insurance, self-insurance, bonds, bank deposits and other instruments) sufficient to give the titleholder capacity to meet costs, expenses and liabilities arising in connection with, or as a result of, carrying out a petroleum activity. This is intended to apply to the extraordinary costs arising in connection with activities undertaken under a title, for example, expenses relating to the clean-up or other remediation of the effects of an escape of petroleum.

On 2 September 2021, the Australian federal parliament passed the *Offshore Petroleum and Greenhouse Gas Storage Amendment (Titles Administration and Other Measures) Act 2021* (Cth) which, among other changes, amends the OPA to impose new trailing liability and change of control provisions. The amendments take effect from 2 March 2022. The changes to the trailing liability regime expand the existing powers of NOPSEMA and the Minister including the ability to recall any former titleholder to undertake decommissioning activities on a title area. These powers are retrospective in their application and apply to titles that are currently in force as well as to titles that ceased to be in force on or after 1 January 2021.

Under the new change in control provisions, any change in control must be pre-approved by the Titles Administrator (NOPTA). A person is said to “control” a titleholder if they hold 20% or more of the voting rights

Table of Contents

or issued securities in that titleholder. A change of control will occur if a person controls the titleholder (“original controller”) and either another person begins to control the titleholder or the original controller ceases to control the titleholder. In addition to the OPA and regulations, NOPTA will have reference to the applicant suitability guidelines published by the Department of Industry, Science, Energy and Resources, dated 2 March 2022, in determining change of control applications.

Competition Regulation

Each of Woodside and BHP Petroleum must conduct its business in accordance with Australia’s competition laws, which are contained in the *Competition and Consumer Act 2010* (Cth) (“CCA”). The CCA prohibits, among other things:

cartel conduct, which prohibits competitors making or giving effect to a contract, arrangement or understanding that involves price fixing, output restrictions, market sharing or bid rigging;

a corporation with a substantial degree of power in a market engaging in conduct with the purpose or effect (or likely effect) of substantially lessening competition (misuse of market power); and

a corporation engaging in a concerted practice, or making or giving effect to a contract, arrangement or understanding that has the purpose or effect (or likely effect) of substantially lessening competition in a market.

The ACCC can specifically authorize certain conduct that might otherwise breach the CCA.

The coordinated marketing activities of pipeline gas by the NWS Project participants received specific authorizations from the ACCC under the CCA, commencing 30 September 2010. Those authorizations expired on 31 December 2015. Since that time, the NWS Project participants have not engaged in coordinated marketing activity and have put in place arrangements to facilitate separate marketing, which does not require ACCC authorization.

On 2 March 2018, the ACCC granted conditional authorization to permit the coordination of the scheduling of planned maintenance for the NWS Project, Gorgon, Wheatstone, Pluto, Prelude and Ichthys LNG facilities. This authorization was granted for a term of five years, and on condition that the relevant producers publicly disclose the scheduled maintenance information that they have shared with each other. There is a risk that the authorization may not be renewed at the end of the five-year period.

Upstream Regulatory Issues

Part IIIA of the CCA establishes the National Access Regime, which provides a frame for regulating third-party access to certain services provided by means of significant infrastructure facilities. There are three paths to access under the National Access Regime:

effective state or territory access regimes (under this path, if a state or territory introduces an access regime and that regime meet certain criteria, it can be certified by the relevant Minister and will then determine the terms and conditions of access);

voluntary undertakings (under this path, a facility owner voluntarily lodges an undertaking with the ACCC which, if accepted by the ACCC, determines the terms and conditions of access); and

declaration/arbitration (under this path a third-party access seeker can apply for an access declaration from the National Competition Council which provides that third party with the right to negotiate access to a particular service provided by means of an infrastructure facility that is subject to a declaration with the infrastructure owner). Under this path, the ACCC retains a role as arbitrator in the event of a failure by the parties to agree on the terms and conditions of access to the applicable service.

Table of Contents

In order for a service provided by means of a facility to be subject to the statutory third-party access regime in Part IIIA of the CCA via a declaration, the CCA contains a series of declaration criteria which must be all satisfied in relation to the applicable service. These cumulative criteria can be summarized as follows:

access to the service on reasonable terms would promote a material increase in competition in at least one market other than the market for supply of the relevant infrastructure service;

the facility by which the service is provided:

- could meet the total foreseeable demand in the market over the period for which access is proposed on a least cost basis (compared to a service provided by two or more facilities);
- is of national significance in Australia, having regard to its size, importance to trade and commerce or the national Australian economy; and
- access to the service on reasonable terms would promote the public interest (including the effect that a declaration would have on the level of investment in infrastructure services or markets that depend on access to the service).

The object of the declaration criteria includes to ensure only economically significant infrastructure facilities that would be “uneconomic to duplicate” may be subject to a declaration under Part IIIA of the CCA.

Under Part IIIA of the CCA, the definition of a service (for the purposes of identifying what may be subject to the National Access Regime, which must be a service) excludes a ‘production process’, unless that process is an ‘integral but subsidiary’ part of the relevant service. The term ‘production process’ is not itself defined in the CCA. In 2008, the High Court of Australia decided that a service provided by means of a mine-to-port railway did not use a ‘production process’. However, the decision of the High Court was closely tied to the circumstances of that case, including the particular service to which access was sought which encompassed a privately-owned and operated rail line for the haulage of iron ore. The application of this decision to a production process that may be carried out via upstream oil and gas facilities has not been conclusively determined.

For completeness, a similar access regime is also contained in the *Queensland Competition Authority Act 1997* (Qld) which may apply to services supplied by way of infrastructure assets located in Queensland. This regime is separately administered by the Queensland Competition Authority.

Secondary Petroleum Taxes

The NWS Project remains subject to a royalty on petroleum production after allowing a deduction for certain prescribed expenditures and allowances (including excise taxes). The royalty rate is between 10% and 12.5% on the wellhead value depending on the type of license that is held. In addition, the NWS Project is also subject to excise on oil/condensate production and the Petroleum Resource Rent Tax (“PRRT”). The current excise rate varies between 0% and 55% depending on the type of oil and production rates. There is a 30 million barrel exemption for each field. A top rate of excise of 30% applies to condensate production.

PRRT is imposed under the *Petroleum Resource Rent Tax Act 1987* (Cth) and assessed under the *Petroleum Resource Rent Tax Assessment Act 1987* (Cth). PRRT is payable on the excess of assessable upstream revenue over deductible upstream expenditure (including a return on development capital and exploration expenditures) derived from Australian petroleum projects. PRRT is assessed before company income tax and is deductible for the purpose of calculating company income tax. The PRRT rate is currently 40%.

With effect from 1 July 2012, PRRT was extended to all Australian onshore and offshore oil and gas projects, including the NWS Project, although existing resources taxes are effectively credited against the PRRT liability for a project.

Table of Contents

In November 2016, the Australian Government requested that the Commonwealth Treasury (“Treasury”) undertake a review into the design and operation of the PRRT, crude oil excise and associated Commonwealth royalties to provide advice on the extent to which they are operating as intended. The Australian Government’s final response to the review was released on 2 November 2018 and announced, among others, the following key changes, which the Australian Government proposes to introduce:

- reductions to the uplift rates for both general and exploration expenditure;
- the removal of onshore projects from the PRRT regime; and
- a secondary review into the Gas Transfer Pricing (“GTP”) methodology used to calculate the price of gas in integrated LNG projects.

The Bill to give effect to these changes, Treasury Laws Amendment (2019 Petroleum Resource Rent Tax Reforms No. 1) Bill 2019, received royal assent on 5 April 2019. From 1 July 2019:

- the uplift rates that apply to certain categories of carried-forward expenditure is reduced; and
- onshore projects are removed from the scope of the PRRT.

Further, on 5 April 2019, Treasury released a consultation paper on their secondary review into the GTP methodology used to calculate the price of gas in integrated LNG projects. The consultation process is now complete, but Treasury has not yet published its review.

The *Offshore Petroleum (Laminaria and Corallina Decommissioning Cost Recovery Levy) Act 2022* (Cth) and *Treasury Laws Amendment (Laminaria and Corallina Decommissioning Cost Recovery Levy) Act 2022* (Cth) (together the “Levy Acts”) became effective on 2 April 2022. The Levy Acts introduce a temporary levy on all registered holders of Commonwealth production licenses. The levy is set at the lesser of \$0.48 per barrel of oil equivalent or the directed levy amount for each levy year determined by the relevant Commonwealth Minister. The levy is designed to cover the Commonwealth’s costs of decommissioning of the Northern Endeavour floating production storage and offtake facility.

Native Title Legislation and Agreements

Since 1992, Australian common law has recognized that, in certain circumstances, Indigenous Australians may have rights and interests over land and waters in accordance with their traditional laws and customs.

The *Native Title Act 1993* (Cth) (“NTA”) recognizes and protects the native title rights and interests of native title holders and registered native title claimants. The NTA and complementary state legislation also operates to validate “past acts” and “intermediate period acts” of governments, such as granting of titles, licenses and leases, etc. in relation to land or waters in Australia and provides a regime for the valid doing of “future acts” (that is, the making of similar grants) over land or waters in Australia where native title may exist. The grant or renewal of a land, petroleum or pipeline title before 1 January 1994 is classified by the NTA as a “past act” and, if invalid due to the existence of native title, is validated by the NTA and complementary state legislation.

The NTA also protects native title from invalid interference by grants or renewals of land, petroleum or pipeline titles made after 1 January 1994. Grants of these titles post-1 January 1994 are valid if they occur in accordance with the “future act” provisions under the NTA.

Where a granted or renewed title is valid in native title terms, whether because it was always valid, has been validated under the NTA, or is a valid “future act,” then that title will prevail over native title, to the extent of any inconsistency, and the title holder may exercise all of its rights and interest under that title. If any granted or renewed title is not in compliance with the NTA, it will be invalid (unless validated pursuant to the NTA), and

Table of Contents

any existing native title rights and interests will continue. If activities (including grants of tenure/title) occur on land or waters without valid authorization under the “future act” provisions of the NTA, native title holders have legal remedies available to them to protect their native title rights and interests. Remedies include injunctions to restrain activities and actions for compensation/damages.

The NTA also establishes a process by which native title holders may apply for compensation in relation to the effect of the creation or resumption of an interest in land on their native title rights and interests. This compensation burden is borne by the federal or applicable state government which granted or took the interest, unless that compensation burden is passed on by legislation or contract, for example, under Section 24A of the *Petroleum and Geothermal Energy Resources Act 1967* (WA).

In Victoria, the *Traditional Owner Settlement Act 2010* (“VTOS Act”) provides for out-of-court settlements of native title. The VTOS Act only applies to Crown Land in Victoria and therefore would only apply where assets, rights or property interests (such as pipeline easements, licenses to occupy, leases or similar) exist in relation to Victorian Crown land.

The VTOS Act allows the Victorian Government to recognize Traditional Owners (as defined therein) and certain rights in Crown Land (though some Crown Land is excluded) by allowing the Victorian Government to enter into a settlement with a traditional owner group. In return for entering into a settlement, Traditional Owners must agree to withdraw any native title claim pursuant to the NTA and not to make any future native title claims including compensation claims (the State’s policy recently changed to allow a traditional owner group to obtain both a native title determination of any native title claims in addition to a settlement under the VTOS Act).

There are various kinds of agreements that make up a settlement that can be reached under the VTOS Act between the Victorian Government and traditional owner groups. These include: Recognition and Settlement Agreements; Land Agreements; Land Use Activity Agreements; Funding Agreements; Natural Resource Agreements; and Indigenous land use agreements under the NTA to ensure the VTOS Act settlement agreements are valid for the purpose of that law.

VTOS Act settlements will not apply to certain classes of Crown land that are expressly excluded, including areas where existing infrastructure is located on the day the settlement commences.

Indigenous and Natural Heritage Legislation and Agreements

Multiple pieces of Australian state and federal government legislation apply to Aboriginal cultural heritage protection and the management and Aboriginal rights and access to land in Australia.

The primary legislation currently governing Indigenous cultural heritage in relation to Western Australia is the *Aboriginal Heritage Act 1972* (WA) (“WA AHA”), which is in the process of being replaced by the *Aboriginal Cultural Heritage Act 2021* (WA) (“ACH Act”). The ACH Act passed Western Australia’s Parliament and received royal assent on 22 December 2021 and has recently commenced in part. The substantive provisions will commence in around 12 to 18 months’ time. The equivalent State legislation governing Indigenous cultural heritage in Victoria is the *Aboriginal Heritage Act 2006* (Vic) (“Victorian AHA”).

The Aboriginal Heritage Act 1972 (WA)

The WA AHA applies to all land in Western Australia and it is an offence under the AHA to alter, excavate, destroy, damage or conceal any “Aboriginal site” (as defined by the WA AHA) without ministerial consent. It is a defense to undertake reasonable inquiries before undertaking works which may affect an Aboriginal site. An Aboriginal site may exist whether or not native title exists in relation to an area and whether or not a site is registered on the register maintained under the WA AHA. The WA AHA sets out a process whereby a landowner may notify the Aboriginal Cultural Material Committee (“ACM Committee”) that the landowner wishes to use

Table of Contents

land in a manner which may affect an Aboriginal site. The ACM Committee considers the request and makes a recommendation to the Minister for Aboriginal Affairs (“Minister”) as to whether the Minister should consent to the use. The Minister may consent to the use, refuse consent, or consent with conditions. Conditions will often involve the formation and implementation of a Cultural Heritage Management Plan. The Ministerial consent is also a defense to the offence.

The Aboriginal Cultural Heritage Act 2021 (WA)

The Aboriginal Cultural Heritage Act 2021 (“ACH Act”) is in force, having passed Western Australia’s Parliament and received royal assent on 22 December 2021. The ACH Act is in a transitional period, during which only some provisions have commenced operation and the Aboriginal Cultural Heritage Act 1972 (“AHA”) (as amended by the ACH Act) remains in force. The ACH Act, once the majority of its provisions commence, will protect a broader definition of heritage, being tangible and intangible elements that are important to Aboriginal people, including an area, an object, cultural landscapes and ancestral remains. New protection is afforded through protected areas, in which activity is limited. The ACH Act creates a more granular approach to regulating activities, and their impact on heritage values, with significant input from traditional owners. Although there is a tiered structure that applies less regulation to some limited activities, for most activities, the ACH Act requires proponents to use best endeavours to reach agreement with traditional owners with fully informed consent on the terms of a Cultural Heritage Management Plan (“CHMP”). If agreement cannot be reached, proponents can request ministerial authorisation of a CHMP. CHMPs must identify the activity, the heritage potentially affected, and how the proponent will undertake the activity to avoid, minimise or mitigate impacts to heritage. The ACH Act also includes mechanisms to amend CHMPs and to stop activities, if new information arises about heritage values.

The Aboriginal Heritage Act (Vic)

The Victorian AHA provides for the protection of Aboriginal cultural heritage and intangible heritage in Victoria. It is an offence under the Victorian AHA to harm Aboriginal cultural heritage, by act or omission. There are different penalties that apply depending on whether the person knew or was reckless or negligent about whether that person’s act or omission was likely to harm Aboriginal cultural heritage. “Harm” includes damaging, defacing, desecrating, destroying, disturbing, injuring or interfering with Aboriginal cultural heritage. The Victorian AHA provides powers to Authorized Officers and Aboriginal Heritage Officers to enforce these offence provisions.

There are exemptions to the general offences for harming Aboriginal cultural heritage, for example where the person is acting in accordance with (or in the course of preparing) an approved cultural heritage management plan, or in accordance with a cultural heritage permit, an Aboriginal cultural heritage land management agreement or an Aboriginal tradition as it relates to the Aboriginal cultural heritage, or in an emergency. Decisions about whether it is appropriate to approve cultural heritage management plans, cultural heritage permits or enter into cultural heritage land management agreements are made in consultation with the Victorian Aboriginal Heritage Council or where there is a Registered Aboriginal Party (“RAP”), the RAP for the relevant geographical area.

Cultural heritage management plans are mandatory in certain circumstances (including if the activity is a high impact activity and is in an area of cultural heritage sensitivity, such as a waterway). The Minister can issue a ‘stop order’ to prevent a person from carrying out an act where there are reasonable grounds for believing the act is harming, or is likely to harm, Aboriginal cultural heritage. Harming Aboriginal cultural heritage contrary to the Victorian AHA may risk a monetary penalty as well as an order for payment of a further amount for repair or restoration of the Aboriginal cultural heritage. The penalty varies depending on the offence but is currently a maximum of A\$1,817,400 for a corporation that knowingly harms Aboriginal cultural heritage.

In June 2020, the Victorian Aboriginal Heritage Council published a discussion paper proposing legislative reform of the Victorian AHA. The discussion paper was subject to community consultation during 2020 and in

Table of Contents

April 2021, the Victorian Heritage Council released a further consultation paper containing 19 proposals for legislative reform of the Victorian AHA. The proposed reforms to the Victorian AHA include expanding the powers and functions of RAPs and the Victorian Aboriginal Heritage Council, amending prosecution powers, introducing civil damages provisions and otherwise strengthening the AHA in relation to the protection of Aboriginal cultural heritage. Public submissions on the proposed reforms are being considered presently and it is possible that the reforms may be incorporated into amending legislation in due course.

Commonwealth heritage protection

Commonwealth of Australia legislation governing Indigenous cultural heritage and natural heritage across Australia includes the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984* (Cth) (“*ATSIHP Act*”) and the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (“*EPBC Act*”). Various government approvals, including state and federal environmental approvals, may regulate the impact of an activity on cultural heritage values, including by placing on approval conditions relating to Indigenous cultural heritage.

The ATSIHP Act protects “significant Aboriginal areas” and “significant Aboriginal objects” as defined in the ATSIHP Act. An Aboriginal person or group may apply for a declaration under Section 9 of the ATSIHP Act to protect a significant Aboriginal area which is “under a serious and immediate threat of injury or desecration.” This is often referred to as an “emergency declaration.” If made, an emergency declaration can last for a maximum of 30 days (which may be extended by up to an additional 30 days). An Aboriginal person or group may make an application under Section 10 of the ATSIHP Act for a declaration to protect a significant Aboriginal area that is “under threat of injury or desecration” (as opposed to under “immediate threat”). A declaration under Section 10 of the ATSIHP Act is for the term stated in the declaration and as such can be permanent in effect. Similar declarations can also be sought and made under Section 12 of the ATSIHP Act in relation to significant Aboriginal objects.

The effect of a declaration is that the significant Aboriginal area and/or the significant Aboriginal object is protected from injury or desecration. It is an offense to engage in conduct contravening a declaration.

The EPBC Act protects matters of national environmental significance, including areas that demonstrate certain heritage properties and heritage values associated with environmental values. The EPBC Act includes provisions to identify places for inclusion on the National Heritage List and the Commonwealth Heritage List and to protect those places and declared World Heritage properties. Areas of land and waters may be included on the National Heritage List under the EPBC Act on the basis that the place has one or more national heritage values. The values recognized are natural heritage, Indigenous heritage and historic heritage. A place has a national heritage value if it meets one of the national heritage criteria, one of which is the “place has outstanding heritage value to the nation because of the place’s importance as part of Indigenous tradition.” A World Heritage property can be declared by the Federal Environment Minister under the EPBC Act if it has been submitted by the Australian Government to the World Heritage Committee under the World Heritage Convention or the Federal Environment Minister is satisfied that the property is likely to have World Heritage values and those values are under threat. It is an offense to take action that has, will have or is likely to have a significant impact on the National Heritage values of a National Heritage place, or the World Heritage values of a World Heritage property without the relevant approvals under the EPBC Act.

The Dampier Archipelago, including the Burrup Peninsula (‘Murujuga’ as it is known by its Traditional Owners and Custodians), was included on the National Heritage List in July 2007. The Murujuga Cultural Landscape was added to Australia’s World Heritage Tentative List, and was formally submitted by the Australian Government to the UNESCO World Heritage Center in January 2020. A tentative listing is the first step required in the World Heritage nomination process. If the submission is accepted, the Murujuga Cultural Landscape will remain on the tentative list for at least 12 months before being granted World Heritage status. If the Murujuga Cultural Landscape is World Heritage-listed it may affect the Merged Group’s business in terms of project expansion approvals.

Table of Contents

Separately, the Federal Parliament Committee on Environment and Communications has undertaken an inquiry into the 'Protection of Aboriginal Rock Art of the Burrup Peninsula'. The inquiry was focused on the adequacy of existing regulatory protections for this art. The Committee's report on its inquiry, which was tabled in Parliament on 21 March 2018, recognized and acknowledged the cultural and historical values of the Rock Art of the Burrup Peninsula and expressed the view that it is critical that the Rock Art should be protected and conserved for current and future generations. It did not contain any unanimous recommendations and, in any event, the Committee's report does not have a binding effect on the Federal Parliament.

Remedies that may be available to Aboriginal people include the right to seek an injunction to prevent any unauthorized effects on Aboriginal heritage sites.

Arrangements between the Australian Government and the Timor-Leste Government in relation to the GSSR, the JPDA and Greater Sunrise gas fields

On 6 March 2018, the Governments of Australia and Timor-Leste signed the *Treaty between Australia and the Democratic Republic of Timor-Leste Establishing their Maritime Boundaries in the Timor Sea* ("Maritime Boundaries Treaty"). The Maritime Boundaries Treaty arose out of compulsory international conciliation proceedings commenced by the Government of Timor-Leste on 11 April 2016. The Maritime Boundaries Treaty came into force once both Governments completed their respective ratification processes. The Australian Government enacted legislation required to implement the Maritime Boundaries Treaty (including to amend a suite of legislation). The Maritime Boundaries Treaty entered into force on 30 August 2019 and replaced the Timor Sea Treaty and IUA.

The key features of the Maritime Boundaries Treaty are as follows:

The Maritime Boundaries Treaty permanently delimits the continental shelf boundary and the exclusive economic zone boundary between Australia and Timor-Leste and allows for future adjustment of the lateral continental shelf boundaries subject to specific conditions being met.

Relevantly, the Maritime Boundaries Treaty establishes the GSSR and the Special Regime Area which extends over the Sunrise and Troubadour gas and condensate fields ("Greater Sunrise Special Regime Area") for the Australian and Timor-Leste Governments' joint development, exploitation and management of the Greater Sunrise gas fields.

The Greater Sunrise Special Regime Area has replaced the JPDA in respect of the Greater Sunrise gas fields and, more generally, the JPDA has been dissolved. All relevant Australian legislative provisions relating to the JPDA have been repealed and replaced with the Greater Sunrise Special Regime Area.

The Maritime Boundaries Treaty did not reach agreement on a development concept for the Greater Sunrise gas fields, but rather established that the Australian and Timor-Leste Governments will share upstream revenue derived from the exploitation of petroleum produced in the Greater Sunrise gas fields:

- in the ratio of 30% to Australia and 70% to Timor-Leste in the event that the Greater Sunrise gas fields are developed by means of a pipeline to Timor-Leste; or
- in the ratio of 20% to Australia and 80% to Timor-Leste in the event that the Greater Sunrise gas fields are developed by means of a pipeline to Australia.

There is a two-tiered regulatory structure for the regulation and administration of the GSSR, consisting of a Designated Authority (being, Timor-Leste's Autoridade Nacional do Petróleo e Minerais, which will act on behalf of Australia and Timor-Leste, carry out the day-to-day regulation and management and report to the Governance Board) and a Governance Board (which is comprised of one representative appointed by Australia and two representatives appointed by Timor-Leste).

The Maritime Boundaries Treaty provides that as soon as practicable, the Designated Authority will enter into the Greater Sunrise Production Sharing Contract under conditions equivalent to those in

Table of Contents

existing Production Sharing Contracts JPDA 03-19 and JPDA 03-20 and to the legal rights held under Retention Leases NT/RL2 and NT/RL4. Negotiations on the new Greater Sunrise Production Sharing Contract commenced in November 2018 and are ongoing.

The production of petroleum from the Greater Sunrise gas fields cannot commence until a development plan has been submitted in accordance with the Greater Sunrise Production Sharing Contract and the process provided for in the GSSR and subsequently approved by the Governance Board.

Environmental Regulation

Woodside's and BHP Petroleum's operations are also subject to federal (which include Australian obligations under international conventions), state and local laws and regulations relating to the environment in each of the jurisdictions in which it conducts its business. For offshore petroleum activities, these laws and regulations generally:

require the acquisition of a permit before activity commences;

require that for any activities, environmental risks are identified and controls put in place to reduce or eliminate the risks. For drilling and seismic activities, this is outlined in a government-approved environment plan; as an operation goes into construction, commissioning and production, a revised environment plan may be required to be submitted for approval;

restrict the type, quantity and concentration of various substances that can be utilized or released into the environment in connection with marine and land-based activities;

limit or prohibit drilling and seismic or production activities in and near certain environmentally sensitive or protected areas; and

impose criminal and civil liabilities for pollution resulting from oil, natural gas and petrochemical operations.

These laws and regulations may also restrict air emissions and water discharges resulting from the operation of drilling equipment, processing facilities, pipelines and transport vessels. Woodside's and BHP Petroleum's operations are subject to laws and regulations relating to the use, management and disposal of hazardous materials and general waste. In addition, onshore and nearshore development activities are typically subject to laws prohibiting the clearing of native vegetation without approval and laws protecting Aboriginal heritage and biodiversity.

The requirements imposed by environmental laws and regulations are subject to change and have tended to become stricter over time. The modification of existing foreign or domestic laws or regulations or the adoption of new laws or regulations curtailing exploratory or development drilling for oil and gas for economic, political, social, environmental or other reasons could have a material adverse effect on Woodside's or BHP Petroleum's business, financial condition or results of operations by limiting drilling opportunities.

Regulations applicable to Woodside's and BHP Petroleum's operations include requirements to monitor or remediate contamination under certain circumstances. For example, Woodside or BHP Petroleum may be liable for damages and costs incurred in connection with oil spills for which it is legally responsible. Certain environmental laws and regulations impose "strict liability," rendering a person liable without regard to negligence or fault on the part of such person.

Federal and State Environment Regulation of the Oil and Gas Industry

Offshore Petroleum and Greenhouse Gas Storage Act (Cth)

Following streamlining of regulatory processes under the OPA in 2014, NOPSEMA is the sole environmental regulator for offshore petroleum activities in Commonwealth waters (subject to limited

Table of Contents

exceptions). Consequently, offshore petroleum activities in Commonwealth waters require approval by NOPSEMA under the OPA and no longer require separate approval by the Minister for the Environment under the EPBC Act.

The *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (“OPGGS Regulations”) apply to all petroleum and greenhouse gas activities in the Commonwealth of Australia’s waters and are designed to ensure that petroleum activities are carried out in an ecologically sustainable manner and in accordance with an environment plan (“EP”).

Under the OPGGS Regulations, an Offshore Project Proposal (“OPP”) is required to be submitted for all offshore projects to the NOPSEMA for authorization. The OPP process involves the proponent’s evaluation and NOPSEMA’s assessment of the potential environmental impacts and risks of petroleum activities conducted over the life of an offshore project. The process includes a public comment period and requires proponents to demonstrate how environmental impacts and risks will be managed to acceptable levels.

An EP is an activity-specific document that contains:

- a description of the activity (or group of activities) that the EP covers;
- a description of the environment and the environmental impacts and risks;
- environmental performance objectives and measurement criteria for determining whether these objectives are met; and
- an implementation strategy that provides operation systems to continuously reduce risks to “as low as reasonably practicable” and ensure that the environmental performance objectives and standards are met, including an up-to-date and regularly tested oil spill contingency plan.

Penalties exist for carrying out an activity without an EP in place and for various defined breaches of the regulations.

A well operations management plan is also required under the *Offshore Petroleum and Greenhouse Gas Storage (Resource Management and Administration) Regulations 2011* (Cth) to manage well design and integrity.

Following an offshore oil and gas blowout in the Montara oil field in August 2009 and an Australian Government inquiry into the incident, there has been increased vigilance by regulators in relation to permitting and compliance.

Western Australian environmental legislation

The Western Australian environmental statutes of particular relevance to Woodside’s and BHP Petroleum’s operations are the *Environmental Protection Act 1986* (WA) (“EP Act”) and the *Pollution of Waters by Oil and Noxious Substances Act 1987* (WA) (“Pollution of Waters Act”). The EP Act requires Western Australian onshore and nearshore operations to be licensed and to be operated according to various environmental standards and regulations. Significant onshore and nearshore developments are authorized by Ministerial approval through the environmental impact assessment processes under the EP Act. Works approvals for construction activities and operational licenses (including native vegetation clearing permits) are required for different aspects of certain developments.

It is an offense to breach a condition of such a license or approval. The EP Act makes provision for serious penalties to be imposed for such breaches, including a maximum fine of A\$1,000,000 (plus further daily penalties for continuing breaches) for a corporation that fails to comply with ministerial approval conditions (after being directed to so comply). The EP Act also makes provision for prevention notices, closure notices, stop

Table of Contents

orders and environmental protection directions and notices. Under the Pollution of Waters Act, owners and masters of ships and occupiers of land-based facilities from which oil or oily mixtures enter Western Australian state waters are liable to a penalty of up to A\$250,000 for a corporation.

The *Contaminated Sites Act 2003* (WA) (“CS Act”) and the associated *Contaminated Sites Regulations 2006* (WA) took effect on 1 December 2006. The CS Act provides a legal framework for the management of contaminated sites in Western Australia, including liability to investigate and remediate contaminated sites. It requires owners, occupiers and polluters to report known or suspected contaminated sites to the Department of Water and Environment Regulation (“DWER”). Other people may also report known or suspected contaminated sites to DWER. DWER, in consultation with the Department of Health, is required to classify reported sites based on the risk the site poses to human health and the environment and has extensive powers to require various parties, including the current owner or occupier, to investigate or remediate contamination.

Victorian environmental legislation

The Victorian environmental statutes of particular relevance to Victorian onshore operations are the *Environment Protection Act 2017* (Vic) (“Victorian EP Act”) and the *Pipelines Act 2006* (Vic) (“Pipelines Act”).

Other Victorian statutes such as the *Water Act 1989* (Vic), the *Radiation Act 2006* (Vic) and the *Occupational Health and Safety Act 2004* (Vic) also impose regulatory requirements under licenses and other authorizations issued under those statutes, but these are less material from an environmental perspective and therefore are not detailed further here.

Victorian EP Act

The Victorian EP Act commenced operation in Victoria on 1 July 2021. It creates a range of new duties, responsibilities and liabilities (including a new general environmental duty (“GED”)), creates a range of new permissions required for certain operations, provides the Environmental Protection Authority of Victoria (“EPA Victoria”) new compliance powers including a range of new remedial notices, gives new civil enforcement powers to third parties and creates new requirements relating to the assessment, reporting and management of contaminated land. The key changes and requirements of the Victorian EP Act for the Victorian onshore operations are outlined below.

The new duties require a proactive approach to environmental management by duty holders (typically, person(s) undertaking an activity and person(s) in management and control of land or waste). For example, the GED imposes a positive obligation on entities conducting activities that pose risks of harm to human health or the environment from pollution or waste, including fines of up to A\$1.82 million for breaches or A\$3.63 million for aggravated breaches. Similarly, breaches of duties to notify contamination and contamination incidents incur fines up to A\$198,000. Contraventions of duties and requirements of the Victorian EP Act are criminal offences and can incur civil liability. Penalties are typically double that under previous environmental legislation in Victoria. The duties and associated penalties are more relevant to an operating entity but could have financial implications on the Merged Group via a participating interest share in the Gippsland Basin joint venture.

The Victorian EP Act requires many of the operations (other than pipelines, which are regulated by the Pipelines Act) associated with the Victorian onshore operations to hold environmental permissions and to be operated according to various environmental standards and legislative requirements. It is an offence to breach a condition of a relevant permission, including a maximum fine of A\$1.82 million for corporations and substantial penalties (up to A\$1.82 million) for operating without a required permission.

The EPA Victoria’s compliance powers include new remedial notices and there are new civil enforcement powers given to third parties and duties relating to the assessment, notification and management of contaminated land. Civil and criminal penalties apply for failing to comply with remedial notices. There are also provisions allowing persons in management or control of land to recover from the original polluter the costs of complying with duties to manage contamination and associated remedial notices.

Table of Contents

The Victorian EP Act also creates liabilities for ‘officers of a body corporate’ when the corporation commits an offence against the Victorian EP Act. This is subject to a due diligence defense. There are powers to redirect obligations of related or associated entities over which a body corporate had control, in relation to remedial notices.

Pipelines Act

The *Pipelines Act 2005* (Vic) (“Pipelines Act” is the primary statute governing the construction and operation of pipelines carrying liquid and gaseous fuels at high pressure in Victoria.

The Pipelines Act requires Licensed Pipelines constructed and operated in accordance with an Australian Standard to implement a range of safety measures to reduce foreseeable risks associated with operating a licensed pipeline. For example, licensees must prepare and implement safety management plans and environmental management plans. Licensees are also required to prepare and comply with a decommissioning plan, including requirements for environmental rehabilitation and clean-up.

Under the Pipelines Act, licensees for pipelines are required to provide bonds for any rehabilitation, clean-up or pollution prevention work that may be necessary as a result of the construction, decommissioning or removal of a pipeline. These requirements may also be imposed by conditions. Conditions can also relate to protection of cultural heritage, protection of the environment, maintenance of land and public safety (among other things).

Other Commonwealth legislation

Other applicable Commonwealth legislation includes the EPBC Act, the Protection of the Sea (Prevention of Pollution from Ships) Act 1983 (Cth) (“PSPPS Act”) and the Protection of the Sea (Civil Liability) Act 1981 (Cth) (“PSCL Act”).

The EPBC Act requires certain actions that have, will have or are likely to have a significant impact on certain aspects of the environment to be referred to the Australian Federal Minister for the Environment for environmental approval. Woodside has a number of actions approved under that Act. The EPBC Act also contains extensive requirements to protect migratory species (such as whales) and endangered species. Significant fines for individuals and bodies corporate exist under the EPBC Act, including up to A\$11.1 million for a body corporate. In relation to some offenses, there is also the possibility of imprisonment; for the most serious of offenses, a term of imprisonment of up to seven years can be imposed. Following the streamlining of regulatory processes in 2014, the EPBC Act process no longer applies to offshore petroleum activities in Commonwealth waters (subject to limited exceptions) but does still apply to nearshore and onshore activities.

An independent review of the operation of the EPBC Act commenced on 29 October 2019, led by an independent reviewer and supported by a panel of experts (“EPBC Review”). The EPBC Review addressed whether changes are required to the EPBC Act to ensure future development is ecologically sustainable. The final report to the Commonwealth Government was published in October 2020 and made a number of recommendations for “fundamental reform” to enable the Commonwealth to, among other things, set clear outcomes for the environment, provide transparency and greater oversight and to restore the environment to accommodate Australia’s future development needs in a sustainable way. The EPBC Review also identified that the current laws that protect Indigenous cultural heritage are well behind community expectations and do not deliver the level of protections that Indigenous Australians deserve and the community expect.

The PSPPS Act applies to pollution from ships and provides that the master, the charterer and the owner of a ship are strictly liable for oil spills and can be liable for a penalty of up to A\$4.2 million. The PSCL Act makes the owner of the ship liable for any pollution damage caused by an oil spill.

Regulation of Greenhouse Gas Emissions

Legislation was passed on 31 October 2014, to implement a climate change policy called Direct Action. Direct Action operates by:

crediting Australian-based greenhouse gas emissions reductions and abatement from eligible offsets projects;

using a government emissions reduction fund (since renamed the “Climate Solutions Fund” or “CSF”) to purchase Australian-based greenhouse gas emissions reductions and abatement at auctions; and

applying a “safeguard” baseline mechanism for large emitters, with penalties for exceedances.

Since 1 July 2016, the “responsible emitter” for a “designated large facility” during all or part of a financial year must register the facility under the *National Greenhouse and Energy Reporting Act 2007* (Cth) (“National Greenhouse and Energy Reporting Act”) (if not already registered). Generally, a facility will be a “designated large facility” if the total amount of covered emissions during a financial year has a carbon dioxide equivalence (“CO₂-e”) in excess of 100 kt CO₂-e.

The responsible emitter must report the total amount of covered emissions for a designated large facility for each “monitoring period.” The responsible emitter must also ensure that the total amount of emissions of greenhouse gases from the operation of the facility during the monitoring period (the “net emissions number”) does not exceed 100 kt CO₂-e or such higher number ascertained under a “baseline determination” in force for the facility (called the “safeguard mechanism”).

The “net emissions number” for a facility may be reduced by the surrender of “prescribed carbon units” in accordance with the procedures under the National Greenhouse and Energy Reporting Act. The only prescribed carbon units currently available under the Direct Action scheme are ACCUs. ACCUs can be purchased by the Clean Energy Regulator on behalf of the Commonwealth of Australia via reverse auctions (which have occurred every year from 2015 to 2021). ACCUs are also traded directly between parties on a voluntary basis for a range of purposes.

In May 2020, the Australian Government agreed to investigate and implement a range of mechanisms to enhance and incentivize participation in the CSF. It also announced on 26 October 2021 it will make it easier for plantation and farm forestry projects to generate carbon credits and access the CSF.

The Australian Government committed to reducing emissions by 26% to 28% of 2005 levels by 2030. The Australian Government indicated it would meet this target through policies built on the Direct Action approach such as the Emissions Reduction Fund (“ERF”) and its Safeguard Mechanism. This target is reflected in Australia’s commitment to parties under the United Nations Framework Convention on Climate Change Paris Agreement (“Paris Agreement”). Under the Paris Agreement, Australia has committed to implement an economy-wide target to reduce greenhouse gas emissions by 26% to 28% below 2005 levels by 2030. The Australian Government has made no formal changes to this target but has stated that according to projection results from 2021, it is on track to exceed it by up to 9 percentage points with an expected reduction in emissions by 30% to 35% by 2030.

On 26 October 2021, the Australian Government released its Long-Term Emissions Reduction Plan which is a whole-of-economy climate change plan to achieve its target of net zero equity Scope 1 and Scope 2 emissions by 2050. As part of the plan, the Australian Government has indicated it will invest more than A\$20 billion in “low emissions technologies” in the next 20 years with the “Technology Investment Roadmap” the cornerstone in outlining how Australia will achieve its targets by using low emissions technologies such as carbon sequestration, carbon capture and storage, production of low-emission steel and other ways to reduce energy use. The 26th United Nations Climate Change Conference of the Parties was held in Glasgow from 31 October 2021 to 12 November 2021. As part of its obligations under the Paris Agreement, the Australian Government

Table of Contents

submitted an updated and enhanced Nationally Determined Contribution (“NDC”) to the UN Framework Convention on Climate Change secretariat (“UNFCCC”) which adopts the target of net zero emissions by 2050. The Australian Government will submit its second NDC to the UNFCCC in 2025. This ties into to the Australian Government’s plans as outlined above.

The Australian Government is also exploring a proposed new Safeguard Crediting Mechanism which aims to unlock below-baseline abatement opportunities not currently being realized under the existing framework of the ERF and Safeguard Mechanism. The proposal is to establish a new credit unit type (“Safeguard Mechanism Credits” or “SMCs”) which can be sold to the Australian Government or purchased by third parties to meet either a mandatory obligation under the Safeguard Mechanism or a voluntary carbon commitment as an alternative to ACCUs. A public submission process closed on 5 October 2021, with enabling legislation intended to be in place by 1 July 2022.

Further, the Australian Government announced an Emissions Reduction Fund method in October 2021 to credit abatement from new carbon capture and storage projects. This involves awarding large-scale carbon capture and storage projects that capture and permanently store carbon underground with tradeable high-integrity units (ACCUs). It is a voluntary scheme that aims to provide incentives for a range of organizations and individuals to adapt new practices and technologies to reduce their emissions. One ACCU is earned for each tonne of carbon dioxide equivalent stored or avoided by a project. The Clean Energy Regulator is also in the process of developing an Australian Carbon Exchange that will make the trading of ACCUs simpler.

There is ongoing and increasing public pressure on the government to accelerate its carbon emissions reduction program. As such, there remains significant uncertainty regarding the future of climate change regulation in Australia and the effect it may have on the Merged Group’s business.

State legislation regulating greenhouse gas emissions

Greenhouse gas emissions are also regulated under State-based environmental legislation in both WA and Victoria.

In WA, the emission of greenhouse gases associated with ‘significant proposals’ is regulated under the *Environmental Protection Act 1986* (WA) (“EP Act”). “Greenhouse-related” obligations under the EP Act include mandatory offset of reservoir CO₂ emissions from the Pluto facility, as part of a ministerial condition imposed during the environmental impact assessment process for Pluto LNG. The Western Australia Government released the *Greenhouse Gas Emissions Policy for Major Projects* in August 2019 which commits the State Government to working with all sectors of the Western Australian economy to achieve net zero greenhouse gas emissions by 2050. The Western Australia Government also released a State Climate Policy in November 2020. In December 2019, the Environmental Protection Agency (“EPA WA”) released its draft greenhouse gas emissions guideline which require proponents of major greenhouse gas emitting projects to show as part of their environmental impact assessment how they can reasonably and practicably avoid, reduce and offset emissions to contribute to the State’s aspiration of net zero emissions by 2050. The final guidelines were published on 16 April 2020 and the EPA WA began a review of the guidance material on 30 June 2021. The EPA WA’s technical review will clarify and investigate a range of issues considered since the guidance was first published. Once the review is complete, the revised draft guideline will be released for public consultation which is expected in the first quarter of 2022.

In Victoria, climate change and greenhouse gas reduction is primarily regulated by both the Victorian EP Act (see above) and the *Climate Change Act 2017* (Vic) (“Victorian Climate Change Act”).

The Victorian EP Act defines greenhouse gas substances as a waste. The GED (described above) also applies and requires that a person engaging in an activity that may give rise to risks of harm to human health or the environment from pollution or waste must minimize those risks so far as reasonably practicable. As

Table of Contents

greenhouse gas emissions may create a risk of harm to human health and the environment by contributing to an increase in climate change risks, they are likely to be regulated by the GED.

The Victorian Climate Change Act establishes a long-term emissions reduction target of net zero by 2050, requires five yearly interim targets, requires the Victorian Government to develop a Climate Change Strategy every five years, requires “Adaption Action Plans” to be prepared, establishes a system of periodic reporting on greenhouse gas emissions.

The Victorian Climate Change Act also imposes duties on a range of environmental decision makers, including EPA Victoria, to consider climate change when making environmental decisions under other Victorian legislation, including environmental licensing and permitting decisions under the Victorian EP Act. The Victorian Climate Change Act also empowers the Minister to issue guidelines to guide the scope and application of the issues that decision-makers must consider when making decisions under other environmental legislation. While guidelines could be issued in the future, no such guidelines have been issued to date.

In May 2021, the Victorian Government released a Climate Change Strategy as required by the Victorian Climate Change Act. The current Strategy includes updated interim targets designed to ensure Victoria’s target of net zero emissions by 2050 is met. These interim targets are to reduce emissions by 28-33% by 2025 and 45-50% by 2030. The Strategy also contains associated policies in relation to clean energy technologies and to support businesses to reduce emissions.

The Victorian Climate Change Act will therefore impose ongoing obligations on the Merged Group in relation to its future Gippsland Basin joint venture operations, including under the GED to take all reasonable and practicable measures to reduce its greenhouse gas emissions and in relation to future environmental license and permitting requirements under the EP Act and other State legislation.

Renewable Energy (Electricity) Act 2000 (Cth)

Under the *Renewable Energy (Electricity) Act 2000* (Cth), which establishes the Renewable Energy Target (“RET”) scheme, wholesale purchasers of electricity (known as “liable entities,” who make a “relevant acquisition” of electricity) are required to purchase a prescribed percentage of their electricity from an “eligible energy source.” The *Renewable Energy (Electricity) Act 2000* (Cth) provides for the creation of Renewable Energy Certificates (“RECs”) by generators of renewable energy. Registered RECs are transferred to liable parties, who then surrender those RECs to the Renewable Energy Regulator to demonstrate their compliance under the scheme and avoid paying the shortfall charge. Participation in the RET scheme is dependent on registration and accreditation under the *Renewable Energy (Electricity) Act 2000* (Cth).

A wholesale acquisition of electricity is not a “relevant acquisition” of electricity, and is therefore exempt from the *Renewable Energy (Electricity) Act 2000* (Cth), if the end-user of the electricity generated the electricity and:

the point at which the electricity is generated is less than one kilometer from the point at which the electricity is used; or

the electricity is transmitted or distributed between the point of generation and the point of use and the line on which the electricity is transmitted or distributed is used solely for the transmission or distribution of electricity between those two points (self-generation).

Although the production of LNG is electricity intensive, for the purposes of its LNG production, Woodside does not purchase its electricity on the wholesale market but instead self-generates its electricity. As such, Woodside is eligible for the self-generation exemption in respect of any such self-generated electricity. Woodside’s electricity generation and usage and wholesale electricity acquisition habits may change in the future and it may become liable to obtain RECs or pay a shortfall charge pursuant to the *Renewable Energy (Electricity) Act 2000* (Cth).

Table of Contents

Woodside has also reported its emissions through its annual Sustainable Development Report as well as its 2021 Climate Report, which are both available on its website and the ASX website.

Regulation of Foreign Investment in Australia and Takeovers Policy

In Australia, foreign investment is regulated by the FATA, regulations under the FATA and the Investment Policy. The Investment Policy is intended to encourage foreign investment in Australia, that is not contrary to the Australian national interest.

The FATA regulates investment in Australia by “foreign persons.” A “foreign person” is generally:

- (a) a natural person not ordinarily resident in Australia;
- (b) a foreign government or foreign government investor (to whom additional requirements apply—see below); or
- (c) any corporation, trustee of a trust or general partner of a limited partnership in which a natural person not ordinarily resident in Australia, or a foreign corporation or foreign government, holds a substantial interest or several such persons hold an aggregate substantial interest.

A person holds a “substantial interest” if they (together with any associates) control 20% or more of the voting power or ownership of a corporation, trust or partnership. An aggregate substantial interest arises where several persons (together with any associates) control 40% or more of the voting power or ownership of a corporation, trust or partnership.

Investment proposals by foreign persons may need to be notified to the Australian Government and may require prior approval from the Australian Treasurer in accordance with the FATA. In general, foreign investors must notify the Australian Government and get approval before acquiring a substantial interest in an Australian entity that is valued above certain monetary thresholds. Notification may also be required in relation to acquisitions of interests in a foreign entity that is a national security business under the FATA or is an Australian land-rich entity, or in respect of a foreign government investor, the acquisition of an interest in a foreign entity that holds a substantial interest in Australian subsidiaries valued above the applicable monetary thresholds.

The FATA and regulations under the FATA provide the relevant monetary thresholds that apply.

Pursuant to various free trade agreements between Australia and other nations, higher monetary thresholds apply to certain types of acquisitions by U.S., Canadian, Chinese, Hong Kong, Chilean, Japanese, Mexican, Singaporean, South Korean, New Zealand, Peruvian and Vietnamese investors (other than foreign government investors—see further below). For these investors, notification is ordinarily generally required for a proposal to acquire a substantial interest in an Australian entity (which is not in certain prescribed sensitive sectors and not if the acquirer is a subsidiary of a free trade agreement country investor incorporated elsewhere, including Australia) valued at over A\$1,250 million (the monetary thresholds are indexed each year on 1 January to the GDP price deflator in the Australian National Accounts for the previous year). For other investors (other than foreign government investors), and for acquisitions by certain free trade agreement country investors in prescribed sensitive sectors, notification of an acquisition of a substantial interest in an Australian entity is ordinarily required where the entity is valued above A\$289 million (indexed each year on 1 January on the same basis as above). Prescribed sensitive sectors are media (although there are specific additional rules relating to acquisitions in media businesses), telecommunications, transport, defense and military-related industries and activities, encryption and securities technologies and communications systems, uranium or plutonium extraction and nuclear facilities. As of the date of this prospectus, higher thresholds have been proposed for private sector investors from additional countries who are signatories to the Trans-Pacific Partnership (“TPP”), to take effect when the TPP comes into effect in respect of the relevant country, subject to certain exceptions for particular

Table of Contents

types of acquisitions. However, from 1 January 2021, a A\$0 monetary threshold applies to acquisitions by foreign investors of interests in national security businesses and national security land. Acquisitions of interests in a “national security business” or “national security land” are referred to as national security actions. A business is a national security business if it is carried on wholly or partly within Australia, whether in anticipation of profit or gain, and (among other things) it is a reporting entity (being a responsible entity or a direct interest holder) in relation to a critical infrastructure asset (within the meaning of the SOCI Act).

As Woodside is considered a reporting entity of a critical gas asset within the meaning of the SOCI Act, it is considered a “national security business” under the FATA. Investments of 10% or more (or less than 10% with an ability to influence, participate in or control the entity/business), by all foreign investors in a national security business must be notified to the Australian Government and require prior approval from the Australian Treasurer in accordance with the FATA. Accordingly, acquisitions of interests of 10% or more (or investments of less than 10% with an ability to influence, participate in or control the entity/business) in Woodside, would require prior approval from the Australian Treasurer.

The Federal Treasurer is able to ‘call-in’ for review an action that is not otherwise notifiable if the Federal Treasurer considers that the action may pose national security concerns. This call-in power can be exercised up to 10 years after the action has been taken. Once called-in, the Federal Treasurer may issue a no objection notification, including with conditions, or prohibit the action or require divestment. However, the Federal Treasurer is not able to call-in an action that has been notified to the Federal Treasurer or for which a no objection notification exists. A foreign person is therefore able to extinguish the Federal Treasurer’s ‘call-in’ power by voluntarily notifying a reviewable national security action. The Federal Treasurer also has a ‘last resort’ power which gives them the opportunity to review actions notified after 1 January 2021 for which a no objection notification has been issued if exceptional circumstances arise.

There are specific rules for acquisitions by private sector foreign persons of interests in Australian agricultural businesses, Australian media businesses and Australian land (including entities with significant Australian land assets), which are ordinarily subject to lower monetary thresholds depending on the nature of the foreign person and the investment proposal. Australian land relevantly includes interests acquired in a potentially broad range of petroleum tenure, including petroleum production licenses (both onshore and offshore) and, accordingly, acquisitions of interests in production licenses and certain other forms of tenure required for petroleum projects may require foreign investment approval by the Merged Group if in future, the Merged Group constitutes a “foreign person” for the purposes of the FATA.

The FATA also imposes additional requirements for investments in Australia by “foreign government investors.” A “foreign government investor” is a foreign government or separate government entity, or a corporation, trustee of a trust or a general partner of a limited partnership in which a foreign government or separate government entity holds a substantial interest of 20% or more or foreign governments or separate government entities of more than one foreign country (or parts of more than one foreign country) hold an aggregate substantial interest of 40% or more. In general, foreign government investors must get approval before acquiring a “direct interest” in an Australian entity/business (generally at least 10% of the entity/business or the ability to influence, participate in or control the entity/business), starting a new Australian business, or acquiring an interest in Australian land regardless of the value of the investment.

The Investment Policy, the FATA and the regulations under the FATA are administered by the Federal Treasurer on the advice of an advisory board, FIRB. The FIRB secretariat in the Commonwealth Treasury examines proposals by foreign persons and consults with relevant Australian Government agencies, including the ATO, the ACCC, and certain security agencies, and makes recommendations to the Federal Treasurer on whether those proposals are suitable for approval under the Investment Policy. FIRB’s functions are advisory only. The FATA empowers the Federal Treasurer to make a wide range of prohibitory and divestiture orders on broad “national interest” or “national security” grounds. In some cases, investment approval has been granted to foreign investment proposals subject to compliance with certain conditions, including conditions relating to the payment of tax to the Australian Government.

Table of Contents

Takeovers of Australian public companies are regulated by the Corporations Act. The takeover provisions in the Corporation Act apply equally to acquisitions made by Australian and foreign entities. Section 606(1) of the Corporations Act contains a general prohibition on the acquisition of a relevant interest in voting shares in an Australian public company if, as a result of the acquisition, a person's voting power in that company increases to more than 20%, or increases from a starting point that is already above 20% but below 90%. Section 606(2) of the Corporations Act also prohibits a person from acquiring a legal or equitable interest in securities of a company if, because of the acquisition, another person acquires a relevant interest in voting shares in an Australian public company and a person's voting power in that public company increases to more than 20%, or increases from a starting point that is already above 20% but below 90%.

For the purposes of the takeover provisions, a person has a "relevant interest" in securities if that person is the holder of the securities or otherwise has the power or control over the voting rights attaching to them or over their disposal, irrespective of how remote the relevant interest is or how it arises. A person can also have a relevant interest if they have an enforceable right, an agreement in relation to, or an option to acquire, the securities. If a company has a relevant interest in securities, a person will be deemed to have a relevant interest in those securities if the person has voting power in the company which exceeds 20% or the person otherwise controls the company. The voting power of a person's associates is counted for the purposes of calculating the voting power of a person under Section 606 of the Corporations Act. "Associate" is defined broadly in the Corporations Act to include certain formal relationships (such as related bodies corporate) and informal relationships (such as where persons are acting in concert).

The general prohibition contained in Section 606 of the Corporations Act is subject to a number of specified exceptions. A person wishing to increase their shareholding beyond the thresholds prescribed by Section 606 of the Corporations Act must do so under one of those permitted exceptions, such as by making a formal takeover bid under the Corporations Act, or with approval of dis-interested shareholders.

The foregoing summary of the regulation of foreign investment and takeovers in Australia does not purport to be complete and is qualified in its entirety by reference to the applicable legislation and to the Woodside Constitution. Advice from legal counsel familiar with the operation of Australia's foreign investment regime should be sought prior to engaging in acquisitions of interests in Australian land or entities, acquisitions of assets of an Australian business, or the starting of an Australian business.

Domestic Gas Policy

In 2006, the Western Australian Government formalized its policy on securing future domestic gas supplies for Western Australia. In 2012, the Government clarified arrangements for the application of the policy in its Strategic Energy Initiative's *Energy2031* final paper ("Domestic Gas Policy"). The State of Western Australia will apply the Domestic Gas Policy flexibly in accordance with the following requirements:

Western Australian LNG producers will commit to make available domestic gas equivalent to 15% of LNG production from each LNG export project by:

- reserving domestic gas equivalent to 15% of LNG production from each Western Australia-based LNG export project;
- developing, or obtaining access to, the necessary infrastructure (including a domestic gas plant, associated facilities and offshore pipelines) to meet their domestic gas commitments as part of the State approvals process; and
- showing diligence and good faith in marketing gas into the Western Australia domestic market.

These efforts may be subject to independent review.

LNG producers should undertake the above actions such that domestic gas is made available to coincide with the start of LNG production. This timing may, however, vary depending on project circumstances.

Table of Contents

Prices and contracts for domestic gas will be determined by the market.

LNG producers may propose to offset their domestic gas commitment by supplying gas or other energy from an alternative source, rather than supplying gas from their LNG projects. Among other conditions, producers will have to demonstrate that the proposed offset represents a net addition to the State's domestic energy supply. The State will consult with industry to develop criteria for domestic gas offsets.

The intention was to review the Domestic Gas Policy in 2015, but it is understood that this review has not yet been completed by the Western Australian Government.

In August 2020 the Domestic Gas Policy was amended to prevent the export of local WA gas, being onshore gas extracted from Western Australia. Under the updated policy, local WA gas cannot be exported to the eastern states of Australia or overseas. Woodside does not currently extract onshore local gas in WA.

Woodside and its joint venture partners have domestic gas supply agreements with the Western Australian State Government for the Pluto LNG and NWS projects (including with BHP Petroleum as a joint venture partner with respect to the NWS Project). In 2015, the NWS State Agreement (*North West Gas Development (Woodside) Agreement 1979*) was amended to include a new domestic gas commitment of 15% (or lesser approved amount) of total LNG quantity approved for use, supply or sale overseas. In 2006, in connection with the Pluto LNG project, Woodside entered into an arrangement with the Western Australian State Government to market and make available for supply a quantity of domestic gas. Woodside is not required to supply domestic gas if it is not commercially viable to do so. In January 2021, Woodside signed a further agreement with the State Government in relation to the Pluto LNG project in which Woodside agreed to make 45.6 PJ available for the domestic market, separate and in addition to the 2015 commitment from the NWS Joint Venture. In November 2021, Woodside and BHP Petroleum signed a further domestic gas agreement with the State Government with respect to the Scarborough and Pluto Train 2 project pursuant to which, consistent with the WA Domestic Gas Policy, the Scarborough Joint Venture will make gas equivalent to 15% of its LNG exports available to the domestic market.

The Australian Domestic Gas Security Mechanism ("ADGSM") came into effect on 1 July 2017, by way of a new Division 6 of the *Customs (Prohibited Exports) Regulations 1958* (Cth) which is supported by the *Customs (Prohibited Exports) (Operation of the Australian Domestic Gas Security Mechanism) Guidelines 2020* (Cth) (replacing the 2017 guidelines) ("ADGSM Guidelines"). The ADGSM applies Australia wide and gives the Australian Government the power to impose restrictions on LNG exports when there is a shortfall of gas supply in the domestic market. The ADGSM is in force until 1 January 2023. The ADGSM Guidelines provide that an unlimited LNG export permission may be granted to an LNG project that is physically unconnected to the parts of the Australian domestic market experiencing a shortfall. The Western Australian domestic gas market is not physically connected to the east coast domestic gas market (where shortfalls are currently expected to occur) and correspondence from the Commonwealth Resources Minister in 2017 to the Western Australia State Government confirmed that WA LNG exporters would receive an unlimited volume exemption if restrictions were imposed. BHP Petroleum exports gas from Victorian operations and consequently the Merged Group will also do so. The unlimited LNG export permission is unlikely to apply as these operations are connected to the east coast domestic market, however an allowable volume permission can be applied for if restrictions are applied.

Occupational Health and Safety Legislation

Work health and safety in Australia is currently governed by a number of legislative instruments, covering both state and federal jurisdictions, with separate onshore and offshore regulation.

The work health and safety ("WHS") laws are based on the national model *Work Health and Safety Act 2011* (Cth) ("WHS Act") which now applies in all Australian States and Territories, except Victoria. In Victoria, earlier occupational health and safety laws still apply, although the basic principles of the legislation is similar.

Table of Contents

In WA, the *Work Health and Safety Act 2020* (WA), which is based on the national model WHS Act, recently came into effect on 31 March 2022. The *Work Health and Safety Act 2020* (WA) is the primary legislation for work health and safety across all industries, and replaced the *Occupational Safety and Health Act 1984* (WA), the *Mines Safety and Inspection Act 1994* (WA) and the *Petroleum and Geothermal Energy Safety Levies Act 2011* (WA). Woodside does not consider the *Work Health and Safety Act 2020* (WA) to impose additional significant burdens on it given the legislation's significant similarity to the previous legislation in approach to health and safety, Woodside's prior discussions with its Directors on the legislative changes and Woodside's current comprehensive health and safety management system and level of compliance. In addition, the *Work Health and Safety Act 2020* (WA) does not apply to, or affect, the offshore petroleum industry in federal waters, which will continue to be separately regulated.

In short, the WHS laws in each jurisdiction aim to protect people's health and safety at work by imposing obligations on all parties who are in a position to contribute to the management of workplace risks, including manufacturers and suppliers of equipment and substances, as well as employers, workers, contractors and others.

Industrial manslaughter laws are also in place in most jurisdictions, excluding New South Wales, South Australia and Tasmania. While the industrial manslaughter laws slightly differ across the various jurisdictions, industrial manslaughter is ultimately a criminal offence which occurs where an employer or person in control of a place, an officer or "senior officer" of an employer negligently causes the death of a worker in their business. Accordingly, any person who is a member of a company's board and / or management team may be found to be liable for industrial manslaughter. In Western Australia, the *Work Health and Safety Act 2020* (WA) introduced an industrial manslaughter offence.

The principal legislation that currently applies onshore in Western Australia and in Western Australian waters in relation to Woodside's operations includes:

Onshore Western Australia–*Work Health and Safety Act 2020* (WA) and the *Dangerous Goods Safety Act 2004* (WA) and associated regulations; and

Offshore Western Australia (state waters)–*Petroleum (Submerged Lands) Act 1982* (WA) and *Petroleum Pipelines Act 1969* (WA) and associated regulations (as discussed above).

The Department of Mines, Industry Regulation and Safety is responsible for the regulation and administration of safety provisions pertaining to Western Australia's resources industry and Major Hazard Facilities. The Karratha Gas Plant is a Major Hazard Facility.

The principal legislation that currently applies to operations onshore in Victoria and in Victorian waters include:

Onshore Victoria–*Occupational Health and Safety Act 2004* (Vic) and the *Pipelines Act 2005* (Vic) and the associated regulations (as discussed above); and

Offshore Victoria (state waters)–*Offshore Petroleum and Greenhouse Gas Storage Act 2010* (Vic) (as discussed above).

The principal legislation that currently applies in the Commonwealth of Australia waters in relation to Woodside's operations offshore of Western Australia is the OPA and associated regulations (as discussed above).

As further discussed above, NOPSEMA is a Commonwealth of Australia Statutory Agency responsible for regulating the health and safety, structural integrity and environmental management of all offshore petroleum facilities in the Commonwealth of Australia's waters, and in coastal waters where regulatory powers and functions have been conferred.

For Woodside's and BHP Petroleum's floating petroleum facilities, the Commonwealth of Australia maritime law, the *Navigation Act 2012* (Cth) and the *Occupational Health and Safety (Maritime Industry)*

Table of Contents

Act 1993 (Cth), may also apply to operations. The Australian Maritime Safety Authority has responsibility for health and safety for personnel on prescribed ships engaged in trade or commerce on international and domestic voyages.

As operator of both onshore and offshore facilities, Woodside and BHP Petroleum are required to develop a comprehensive “safety case” which describes the facility and provides details on the hazards and risks associated with the facility, the risk controls and the safety management system that will be used to minimize the risks. Once accepted by the applicable regulator, the safety case must be complied with.

Workplace Relations

In Australia, an employee’s terms and conditions of employment have several sources, namely:

- the terms of an employee’s individual employment contract;
- minimum terms and conditions prescribed by federal and state legislation; and
- minimum terms and conditions of employment contained in applicable industrial awards or enterprise agreements.

The employment contract is the key source of rights and obligations in an employment relationship. However, it is not possible to contract for employment terms and conditions which are inferior to statutory entitlements as set out in the *Fair Work Act 2009* (Cth) (“FW Act”) and industrial instruments and provide a minimum floor of terms and conditions of employment in Australia.

The FW Act has been in operation since 1 July 2009. It is the key piece of legislation which governs employee and industrial relations in Australia and applies to the vast majority of Australian employers and employees (other than some state and local government employers/employees), including Woodside.

The FW Act sets out minimum entitlements of employment for all employees (known as the ‘National Employment Standards’) which deal with matters such as leave, maximum ordinary hours of work, notice of termination and redundancy payment. It also sets out ‘rules’ relating to management of the employment relationship, including in respect of protections for employees from adverse action and unfair dismissal.

The key industrial instruments created pursuant to the FW Act are industrial awards and enterprise agreements. Both industrial awards and enterprise agreements establish minimum pay and terms and conditions for employees. However, industrial awards apply to employers and employees in a particular occupation or industry while enterprise agreements only apply to employees who are employed by a particular employer, allowing the agreement to set appropriate terms and conditions of employment tailored to the particular enterprise. The terms and conditions of the enterprise agreement must be “better-off-overall” than the conditions set by the otherwise applicable industrial award.

Key potential issues which may arise under the FW Act regime for Woodside and BHP Petroleum include:

- Union right of entry—a union official may enter premises and exercise rights while on the premises, for the purposes set out in the FW Act and subject to certain conditions, if there is an employee who works at that premises who is eligible for membership in that union;
- Good faith bargaining—Woodside and BHP Petroleum (and/or its principal contractors) is/are subject to the principles of good faith bargaining which can be triggered by a union or group of employees indicating to the employer that they wish to bargain for an enterprise agreement, subject to satisfying certain conditions. These principles do not force an employer to enter into any particular agreement, or to agree to any specific terms or conditions of employment, but they do regulate how the parties can and cannot negotiate; and

Table of Contents

Protected industrial action—employees, organized by unions, may take protected industrial action for the purpose of advancing claims during bargaining for enterprise agreements, provided that certain pre-conditions are met. Engaging in protected industrial action is a workplace right and employers are prohibited from taking adverse action against an employee in response to it. Protected industrial action has the potential to constrain Woodside's or BHP Petroleum's ability, or the ability of their contractors, to complete development projects on time and on budget.

The Fair Work Commission is the Australian industrial relations tribunal created by the FW Act and has responsibility for administering the provisions of the FW Act. This includes dealing with unfair dismissal, anti-bullying, sexual harassment and general protection claims, approving enterprise agreements and dealing with disputes brought to the Commission under dispute resolution procedures of modern awards and enterprise agreements. In addition, the Fair Work Ombudsman is an independent statutory agency of the Commonwealth government responsible for promoting and monitoring compliance with workplace laws (including the FW Act), inquiring into and investigating breaches of the FW Act and taking enforcement action.

The *Building and Construction Industry (Improving Productivity) Act 2016* (Cth) commenced on 2 December 2016 and applies to those involved in building work. The Act re-established the Australian Building and Construction Commission ("ABCC") from 1 January 2017, which replaced the Fair Work Building and Construction.

The ABCC's role is to, among other matters, investigate and enforce compliance with workplace laws (including the FW Act and any industrial instrument) in the building industry. The legislation includes *the Code for the Tendering and Performance of Building Work 2016* ("Building Work Code"). The Building Work Code sets minimum standards of conduct for the building industry, requires that enterprise agreements not include particular content and deals with work health and safety matters. Building industry participants who do not comply with the Building Work Code may be excluded from tendering for projects that receive Australian Government funding.

The *Fair Work (Registered Organizations) Amendment Act 2016* (Cth) was introduced on 24 November 2016. The legislation establishes the Registered Organizations Commission, which is an independent regulator of registered organizations, including unions and employer associations. The Act also introduced new offences and provisions relating to whistleblowers and increased penalties and disclosure obligations.

State legislation otherwise regulates matters such as long service leave, workers' compensation, anti-discrimination and equal opportunity and work health and safety (as discussed above).

United States

BHP Petroleum's Operations in the United States

BHP Petroleum's exploration and production operations on federal oil and natural gas leases in the U.S. GOM are subject to regulation by the Bureau of Safety and Environmental Enforcement ("BSEE"), the Bureau of Ocean Energy Management ("BOEM") and the Office of Natural Resources Revenue, all of which are agencies of the U.S. Department of the Interior. These leases are awarded by the BOEM based on competitive bidding and contain relatively standardized terms and require compliance with detailed BSEE and BOEM regulations and orders issued pursuant to various federal laws, including the federal Outer Continental Shelf Lands Acts ("OCSLA"). For offshore operations, lessees must obtain BOEM approval for exploration, development and production plans prior to the commencement of their operations. In addition to permits required from other agencies such as the U.S. Environmental Protection Agency ("EPA"), lessees must obtain a permit from BSEE prior to the commencement of drilling and comply with regulations governing, among other things, engineering and construction specifications for production facilities, safety procedures, plugging and abandonment of wells on the Outer Continental Shelf ("OCS"), calculation of royalty payments and the valuation of production for this purpose, and removal of facilities.

Table of Contents

Laws and regulations are subject to change, and the trend in the United States over the past decade has been for these governmental agencies to continue to evaluate and, as necessary, develop and implement new, more restrictive permitting and performance requirements. For example, a secretarial order issued by the Biden Administration in 2021 served to temporarily suspend delegation of authority to governmental agencies regarding fossil fuel authorizations on the OCS, but that order specifically excluded authorizations associated with existing operations under valid leases. In addition, President Biden issued an executive order on 27 January 2021 pausing new oil and natural gas leases on federal lands and offshore waters pending review and reconsideration of federal oil and gas permitting and leasing practices. In conducting this review, the Secretary of the Interior shall consider whether to adjust royalties associated with oil and gas resources extracted from public lands and offshore waters to account for corresponding climate costs. However, in June 2021 a federal judge issued a nationwide temporary injunction in a lawsuit filed in federal district court in Louisiana that effectively halts the Biden Administration's suspension on new leasing. While the temporary injunction effectively allows for new leasing of oil and gas interests on federal lands and waters to resume, in August 2021, the Biden Administration appealed the Louisiana federal district court's decision to the U.S. Court of Appeals for the Fifth Circuit and the government's appeal remains pending.

In addition, BHP Petroleum has a 25% and 22% ownership interest, respectively, in the companies that own the Caesar oil pipeline and Cleopatra natural gas pipeline located in the GOM (together, the "Offshore Pipelines"). The Offshore Pipelines are subject to regulation by the Federal Energy Regulatory Commission ("FERC") pursuant to OCSLA, which includes, among other things, a duty to provide open and non-discriminatory access on the Offshore Pipeline facilities. Shippers or other entities may file a complaint claiming that the Offshore Pipelines are acting in a manner inconsistent with the open access and non-discrimination requirements of OCSLA. If FERC grants such a protest, the Offshore Pipelines may be required to modify the terms or conditions or otherwise alter their business conduct regarding the transportation services. BSEE has also adopted regulations for offshore pipelines under its jurisdiction.

The Offshore Pipelines are also subject to stringent safety laws and regulations. BHP Petroleum's transportation of crude oil and natural gas involves a risk that hazardous liquids or flammable gases may be released into the environment, potentially causing harm to the public or the environment. In turn, for owned or operated pipelines, such incidents may result in substantial expenditures for response actions, significant government penalties, liability to government agencies for natural resources damages, and significant business interruption. The Pipeline and Hazardous Materials Safety Administration ("PHMSA"), under the U.S. Department of Transportation, has adopted safety regulations with respect to the design, construction, operation, maintenance, inspection and management of onshore and offshore pipelines, including the Offshore Pipelines. These regulations contain requirements for the development and implementation of pipeline integrity management programs, which include the inspection and testing of pipelines and necessary maintenance or repairs, and also require that pipeline operation and maintenance personnel meet certain qualifications and that pipeline operators develop comprehensive spill response plans. BSEE has also adopted regulations for offshore pipelines under its jurisdiction.

Pipeline safety laws and regulations are subject to change over time. Changes in existing laws and regulations could require us to install new or modified safety controls, conduct subsea inspection of active pipelines to detect leaks, pursue additional capital projects, or conduct maintenance programs on an accelerated basis, any or all of which could result in BHP Petroleum incurring increased operating costs. For example, PHMSA issued the Safety of Hazardous Liquids Pipelines final rule on 1 October 2019. This final rule addressed topics such as: inspections of onshore and offshore pipelines following extreme weather events or natural disasters, periodic assessment of pipelines not currently subject to integrity management, expanded use of leak detection systems, increased use of in-line inspection tools, and other requirements. Additional rulemakings related to pipeline safety are expected to be issued in the future as in its reauthorization of PHMSA the U.S. Congress ordered PHMSA to move forward with certain rulemakings.

BHP Petroleum's sales of natural gas in the United States are subject to regulation by FERC. Pursuant to authority delegated to it by the Energy Policy Act of 2005 ("EPAAct 2005"), the FERC promulgated anti-

Table of Contents

manipulation regulations establishing violation enforcement mechanisms that make it unlawful for any entity, directly or indirectly, in connection with the purchase or sale of natural gas or the purchase or sale of transportation services subject to the jurisdiction of FERC to (i) use or employ any device, scheme or artifice to defraud, (ii) make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or (iii) engage in any act, practice or course of business that operates or would operate as a fraud or deceit upon any entity. The EAct 2005 also amended the Natural Gas Act of 1938 and the Natural Gas Policy Act of 1978 to give FERC authority to impose civil penalties for violations of these statutes and regulations, up to \$1,307,164 per violation, per day for 2021 (this amount is adjusted annually for inflation). The FERC may also order disgorgement of profits and corrective action. The anti-market manipulation rule does not apply to activities that relate only to intrastate or other non-jurisdictional sales or gathering, but does apply to activities of natural gas pipelines and storage companies that provide interstate services, as well as otherwise non-jurisdictional entities to the extent the activities are conducted “in connection with” natural gas sales, purchases or transportation subject to FERC jurisdiction, which includes annual reporting requirements for entities that purchase or sell a certain volume of natural gas in a given calendar year.

BHP Petroleum’s sales of crude oil are currently not regulated and are made at negotiated prices. There is always some risk, however, that the U.S. Congress may reenact crude oil, petroleum products and NGL price controls in the future. It cannot be predicted whether new legislation to regulate crude oil, or the prices charged for crude oil might be proposed, what proposals, if any, might actually be enacted by the U.S. Congress or the various state legislatures and what effect, if any, the proposals might have on BHP Petroleum’s operations.

Finally, BHP Petroleum’s sales of oil and natural gas are also subject to market manipulation and anti-disruptive requirements under the Commodity Exchange Act (“CEA”) as amended by the Dodd-Frank Financial Reform Act, and regulations promulgated thereunder by the CFTC. The CFTC prohibits any person from manipulating or attempting to manipulate the price of any commodity in interstate commerce or futures on such commodity. The CEA also prohibits knowingly delivering or causing to be delivered false or misleading or knowingly inaccurate reports concerning market information or conditions that affect or tend to affect the price of a commodity.

Woodside’s Purchase of LNG from Cheniere in the United States

In July 2014, Woodside signed a binding LNG sale and purchase agreement (“SPA”) with a subsidiary of Cheniere Energy, Inc. (“Cheniere”) to purchase 0.85 mtpa of LNG from the Corpus Christi Liquefaction Project (“CCL Project”) on the startup of Train 2 at the LNG export facility being developed near Corpus Christi, Texas. Under the SPA, Woodside agreed to purchase LNG from Cheniere on a free-on-board basis for a term of twenty years commencing upon the date of first commercial delivery for Train 2, with an extension option of up to ten years. Cheniere completed construction of Train 2 of the CCL Project and commenced commercial operating activities in August 2019.

The *Natural Gas Act of 1938*, as amended (“NGA”), regulates, among others, the importation and exportation of LNG. Section 3(a) of the NGA prohibits the importation or exportation of natural gas, including LNG, from or to a foreign country without obtaining prior authorization from the U.S. Department of Energy (“DOE”). Except with respect to countries with which trade is explicitly prohibited by law or policy, DOE is required to issue the authorization unless it finds that the proposed importation or exportation is not consistent with the public interest. For authorizations to export LNG to countries with which the United States has not entered into a Free Trade Agreement (“FTA”) requiring national treatment for trade in natural gas, DOE is able to modify the application and impose such terms and conditions as it may consider necessary or appropriate. An extensive consultation and review process is undertaken by DOE in connection with any application to import or export natural gas, including LNG. Historically, DOE issued two types of authorizations, blanket and long-term authorizations. The blanket authorization enabled the importation or exportation of natural gas, including LNG, on a short-term or spot market basis for a period of up to two years. The long-term authorization was issued

Table of Contents

where the applicant had a signed gas purchase or sales agreement/contract, or tolling agreement, or other agreement resulting in importation or exportation of natural gas, including LNG, for a period of time longer than two years. However, in December 2020, DOE announced a new policy in which it would no longer issue short-term export authorization separately from long-term authorizations.

For exportation of natural gas, including LNG, to a nation with which an FTA requiring national treatment for trade in natural gas is in effect, Section 3(c) of the NGA provides that such exportation will be deemed to be consistent with the public interest and applications for such exportation will be granted without modification or delay. DOE is statutorily required by Section 3(c) of the NGA to approve LNG exports to countries with which the United States has a FTA requiring national treatment for trade in natural gas, but can restrict or limit exports to other countries if it finds the exports are not consistent with the public interest. Countries with an FTA requiring national treatment for trade in natural gas currently recognized by the DOE for exports of LNG include Australia, Bahrain, Canada, Chile, Colombia, Dominican Republic, El Salvador, Guatemala, Honduras, Jordan, Mexico, Morocco, Nicaragua, Oman, Panama, Peru, Republic of Korea and Singapore. FTAs with Israel and Costa Rica do not require national treatment for trade in natural gas.

In addition, the importation and exportation of natural gas from and to the United States is subject to regulation and oversight by the U.S. Customs and Border Protection, the U.S. Coast Guard, the U.S. Department of Transportation, and the Maritime Administration.

Other

Woodside and BHP Petroleum are also subject to environmental and other regulations to varying degrees in each of the jurisdictions in which they each have assets and operations.

Overview

At Implementation of the Merger, the directors and executive officers of the Merged Group are expected to comprise the current Woodside Directors and executive committee of Woodside. It is intended that the Woodside Board will select a current BHP director to be appointed to the Woodside Board following Implementation. Pursuant to the Woodside Constitution, which will be the Constitution of the Merged Group, the Merged Group Board shall be comprised of Non-Executive Directors and one Executive Director, being the Chief Executive Officer and Managing Director, which such Merged Group Board must not have more than 12, nor less than three, directors. Detailed biographies of the Woodside Directors are provided below. References to “Non-Executive Directors” refer to Woodside Directors who are not employees of Woodside and references to “Executive Directors” refer to Woodside Directors who are employees of Woodside. References to “we,” “us,” “our,” the “Woodside Board” and the “Merged Group Board” refer to the Merged Group following the Merger.

Members of the Board of Directors of the Merged Group***Merged Group Board***

The following table and descriptions set forth below state the members of the Merged Group’s Board following Implementation of the Merger, including a brief biography for each individual, including details of his or her functions within the Merged Group and details of the names of companies and partnerships (excluding directorships in the Merged Group) of which the individual is or has been a member of the administrative, management or supervisory bodies or partners at any time in the five years preceding the date of this prospectus.

| Name | Position |
|-----------------------------|---|
| Meg O’ Neill (1) | Chief Executive Officer and Managing Director |
| Richard Goyder, AO (2) | Chairman |
| Larry Archibald (3) | Director |
| Frank Cooper, AO (4) | Director |
| Swee Chen Goh (5) | Director |
| Ian Macfarlane (5) | Director |
| Christopher Haynes, OBE (3) | Director |
| Ann Pickard (6) | Director |
| Gene Tilbrook (7) | Director |
| Sarah Ryan (3) | Director |
| Ben Wyatt (5) | Director |

- (1) Serves as the sole Executive Director on the Merged Group Board pursuant to the Woodside Constitution.
- (2) Serves as the chairperson (the “Chair”) on the Nominations & Governance Committee of the Merged Group Board.
- (3) Serves as a member on the Audit & Risk Committee, Sustainability Committee and the Nominations & Governance Committee of the Merged Group Board.
- (4) Serves as the Chair of the Audit & Risk Committee. Member of the Human Resources & Compensation and Nominations & Governance Committees of the Merged Group Board.
- (5) Serves as a member on the Human Resources & Compensation, Sustainability and Nominations & Governance Committees of the Merged Group Board.
- (6) Serves as the Chair of the Sustainability Committee of the Merged Group Board. Member of the Human Resources & Compensation and Nominations & Governance Committees of the Merged Group Board.
- (7) Serves as the Chair of the Human Resources & Compensation Committee of the Merged Group Board. Member of the Audit & Risk and Nominations & Governance Committees of the Merged Group Board.

Table of Contents

Meg O' Neill was appointed as Woodside's Chief Executive Officer and Managing Director on 17 August 2021. Ms. O' Neill joined Woodside as Chief Operations Officer in May 2018, and served as Woodside's Chief Operations Officer from May 2018 to October 2019, as Executive Vice President Development from October 2019 to August 2021, as Executive Vice President Development and Marketing from August 2020 to April 2021 and as acting Chief Executive Officer from April 2021 to August 2021. Prior to joining Woodside, Ms. O' Neill spent 23 years with ExxonMobil in a variety of technical, operational and leadership roles including senior positions such as Vice President Development Africa, Executive Advisor to the Chairman, Vice President Production Asia / Pacific, and country leadership positions in Canada and Norway. Ms. O' Neill is a graduate of the Massachusetts Institute of Technology, with degrees in Ocean and Chemical Engineering.

Richard Goyder, AO has served as Woodside's Chairman since April 2018. He previously served as a Non-Executive Director of Woodside since August 2017. Mr. Goyder spent 24 years with Wesfarmers Limited, where he served as Managing Director and Chief Executive Officer from 2005 to late 2017. Mr. Goyder served as Chair of the Australian B20 (the key business advisory body to the international economic forum which includes business leaders from all G20 economies) from February 2013 to December 2014. Mr. Goyder currently serves as Chairman of Qantas Airways Limited, Australian Football League Commission, Channel 7 Telethon Trust and the Western Australian Symphony Orchestra, serves as a member of Evans and Partners Investment Committee, and previously served on the board of directors of Wesfarmers Limited from 2002 to 2017.

Larry Archibald has served as a Non-Executive Director since February 2017. Mr. Archibald previously worked at ConocoPhillips, where he spent eight years in senior executive positions including, Senior Vice President, Business Development and Exploration and Senior Vice President, Exploration. Prior to joining ConocoPhillips, Mr. Archibald spent 29 years at Amoco (1980 to 1998) and BP (1998 to 2008) in various positions including leading global exploration programs covering many world regions. Additionally, Mr. Archibald currently serves as the Chair of the University of Arizona Geosciences Advisory Board.

Frank Cooper, AO has served as a Non-Executive Director since February 2013. Mr. Cooper was a Partner at PricewaterhouseCoopers from 2006 until his retirement in 2012. Prior to joining PricewaterhouseCoopers, Mr. Cooper was a partner of Ernst & Young from 2002 to 2005 and managing partner of Arthur Andersen from 1991 to 2002. Mr. Cooper currently serves as the Chairman of the Insurance Commission of Western Australia since 2012. Mr. Cooper additionally serves as a director on the boards of St. John of God Australia Limited since 2015 and South32 Limited since 2015. Mr. Cooper further serves as a member of Pro-Chancellor of Senate of the University of Western Australia, and serves as Trustee of St. John of God Health Care since 2015. Mr. Cooper received his Bachelor of Commerce from the University of Western Australia in 1976, is a Fellow of the Institute of Chartered Accountants in Australia and is Fellow of the Institute of Company Directors.

Swee Chen Goh has served as a Non-Executive Director since January 2020. Ms. Goh serves as Chair of the Singapore Institute for Human Resource Professionals since 2016 and the National Arts Council Singapore since 2019 and serves as President of Global Compact Network Singapore. Prior to joining Woodside, Ms. Goh previously worked at Shell as Chief Information Officer, Oil Product, East, from 2003 until 2004, Vice President of Global IT Services from 2004, and as Chair of Shell Companies in Singapore from October 2014 until her retirement in January 2019. During her tenure at Shell, Ms. Goh served on the boards of a number of Shell joint ventures in China, Korea and Saudi Arabia. Prior to joining Shell, Ms. Goh worked at Procter & Gamble and IBM. Ms. Goh currently serves on the boards of directors of Singapore Airlines Ltd since 2019, Singapore Power Ltd since 2019, Carbon Solutions Holdings Pte Ltd since 2022, Carbon Solutions Platform Pte Ltd since 2022, JTC Corporation since 2022, CapitaLand Investment Ltd since 2017, Resilience Collective Ltd since 2020 and The Centre for Livable Cities since 2021, and previously served on the boards of various Asian Shell Subsidiaries from 2014 until 2018. Additionally, Ms. Goh is a member of the Singapore Legal Services Commission and Trustee of Nanyang Technological University.

Table of Contents

Ian Macfarlane has served as a Non-Executive Director since November 2016. Mr. Macfarlane serves as Chief Executive Officer of Queensland Resources Council since 2016, Chairman of Innovative Manufacturing Co-Operative Research Centre since 2016, director of CSIRO since 2021 and a member of Toowoomba Community Advisory Committee of the University of Queensland Rural Clinical School. Mr. Macfarlane's previous experience includes serving as director of METS Ignited Ltd and formally as Australia's longest-serving Federal Resources and Energy Minister and the Coalition's longest-serving Federal Industry and Innovation Minister, with over 14 years of experience in both Cabinet and shadow ministerial positions. Before entering politics, Mr. Macfarlane's experience included agriculture, and being President of the Queensland Graingrowers Association from 1991 to 1998 and the Grains Council of Australia from 1994 to 1996.

Dr. Christopher Haynes, OBE has served as a Non-Executive Director since June 2011 and currently serves as a director of Worley Limited since 2012. Dr. Haynes had a 38-year career with Shell where he served as Executive Vice President, Upstream Major Projects within Shell's Projects and Technology business, General Manager of Shell's operations in Syria, and a secondment as Managing Director of Nigeri LNG Ltd. From 1999 to 2002, Dr. Haynes was seconded to Woodside as General Manager of the North West Shelf Venture. Dr. Haynes retired from Shell in August 2011. Dr. Haynes is a Chartered Engineer, a Fellow of the Institution of Mechanical Engineers in the United Kingdom, a Fellow of the Institution of Engineers, Australia and a Fellow of the Royal Academy of Engineering in the United Kingdom.

Ann Pickard has served as a Non-Executive Director since February 2016, and currently serves as a director of KBR Inc., since 2015 and of Noble Corporation plc since 2021, in addition to being a member of the Chief Executive Women and University of Wyoming Foundation Board. During her 15-year tenure prior to retiring from Shell in 2016, Ms. Pickard served as Executive Vice President Arctic, Executive Vice President Exploration and Production, Country Chair of Shell, and as Executive Vice President Africa. Ms. Pickard additionally served as Director, Global Business and Strategy and was a member of the Shell Gas & Power Executive Committee. Prior to joining Shell in 2000, Ms. Pickard had an 11-year tenure with Mobil prior to its merger with Exxon in 1998.

Gene Tilbrook has served as a Non-Executive Director since December 2014, and currently serves as a director of Orica Limited since 2013. Mr. Tilbrook served as a senior executive of Wesfarmers Limited between 1985 and 2009, including as Executive Director Finance and Executive Director Business Development. Prior directorships held by Mr. Tilbrook include serving as a director of Aurizon Holdings Limited from 2010 to 2016 and as a director of GPT Group Limited from 2010 to 2021.

Dr. Sarah Ryan has served as a Woodside Director since December 2012. Dr. Ryan has more than 30 years' experience in the oil and gas industry in various technical, operational and senior management positions. Dr. Ryan worked at Schlumberger Ltd for 15 years. Dr. Ryan was also an equity analyst, portfolio manager and energy advisor for Earnest Partners from 2007 to 2017. Dr. Ryan currently serves as a director of Aurizon Holdings since 2019, MPC Kinetic Pty Ltd since 2016, Viva Energy Group Ltd since 2018, OZ Minerals Limited since 2021 and Future Battery Industries Co-operative Research Centre since 2020. Dr. Ryan is a member of Chief Executive Women since 2016, the ASIC Corporate Governance Consultative Panel since 2019 and is a Fellow of the Australian Academy of Technology and Engineering. Dr. Ryan was previously a director of Central Petroleum Limited and Akastor ASA.

Ben Wyatt has served as a Non-Executive Director since June 2021. Mr. Wyatt served in the Western Australian Legislative Assembly for 15 years, including as the Western Australian Treasurer and Minister for Finance, Energy, Aboriginal Affairs and Lands. Mr. Wyatt additionally held various shadow cabinet portfolios including responsibility for Native Title and the Pilbara. Prior to entering Parliament, Mr. Wyatt practiced as a lawyer in both private practice and with the Western Australian Office of the Director of Public Prosecutions. In addition to serving on the Woodside Board, Mr. Wyatt currently serves as a director of Wyatt Martin Pty Ltd since 2021, the West Coast Eagles since 2021, the Perth International Arts Festival since 2021, the Telethon Kids Institute since 2021 and Rio Tinto Ltd since 2021. Mr. Wyatt is also a member of the APM Advisory Board and UWA Business School Advisory Board.

- (1) Please see Ms. O' Neill's full biography under "--Merged Group Board."
- (2) Serves as a Non-Key Management Personnel.
- (3) This individual is currently a member of Woodside's executive committee and is expected to remain on the executive committee even if the Merger is not Implemented.

Graham Tiver commenced with Woodside in February 2022 as Chief Financial Officer and Executive Vice President. Before joining Woodside, Mr. Tiver was previously at BHP, where he held the role of Group Financial Controller with responsibility for BHP's global accounting and reporting function and financial improvement across 10 countries. Mr. Tiver has held significant financial, commercial and leadership roles across a range of business sectors, including minerals and oil and gas. He has extensive international experience, having worked in North and South America as well as a variety of roles around Australia. Mr. Tiver holds a Bachelor of Business in Accounting and Finance from Edith Cowan University in Perth, and is a Fellow of the Australian Society of Certified Practising Accountants.

Fiona Hick currently serves as Woodside's Executive Vice President Operations and has been nominated to lead Australian Operations, based in Perth, following Implementation. Ms. Hick has led Woodside's operations division since 2019. As Executive Vice President Operations, she is responsible for all of Woodside's global health, safety and environment, operations, producing facilities, subsea and pipelines, logistics and reservoir management functions. Ms. Hick has been with Woodside since 2001, holding positions including Vice President Strategy Planning and Analysis and Vice President Health, Safety, Environment and Quality. Prior to joining Woodside, Ms. Hick worked for several years with Rio Tinto living and working in their remote locations. In 2021, Ms. Hick was appointed President of The Chamber of Minerals and Energy of Western Australia, Ms. Hick is also an Associate Fellow of the Australian Institute of Management and a Fellow of the Institute of Engineers. She is also a Non-executive Director of CO2CRC and a member of University of Western Australia's Strategic Resources Committee. Ms. Hick has a Bachelor of Engineering (Hons) and a Bachelor of Applied Science (Energy).

Shiva McMahon has been nominated to lead International Operations, based in Houston. Ms. McMahon is currently General Manager, BHP Petroleum, Australia. Ms. McMahon joined BHP in the role of Vice President Finance for Petroleum in 2020 with over 25 years of energy industry experience across multiple international roles. She also served as a Non-Executive Director and member of the Audit, Remuneration and Nominations

Table of Contents

committees of the Mumbai Stock Exchange-listed Castrol India between 2017 and 2018. Ms. McMahon spent a large part of her career with BP in upstream and downstream leadership roles including serving as the CFO for BP Trinidad and Tobago and BP's global lubricants business—Castrol. She also served as Head of the Upstream Executive Office between 2014 and 2017. Ms. McMahon has a Masters in Business Administration and IT and a Bachelor of Arts in Applied Foreign Languages.

Shaun Gregory has been nominated to lead New Energy, based in Perth. Mr. Gregory has over 25 years industry experience. Mr. Gregory joined Woodside in 1995 and currently holds the role of EVP Sustainability and Chief Technology Officer, overseeing exploration, technology, digital, new energy and carbon management. Mr. Gregory has previously held a range of roles at Woodside across sustainability and exploration. Mr. Gregory is a Board member of Scitech WA. He has a Bachelor of Science (Hons) from the University of Western Australia in Mathematical Geophysics and a Master of Business and Technology from the University of New South Wales.

Mark Abbottsford has been nominated to lead Marketing and Trading, based in Perth. Mr. Abbottsford joined Woodside in 2002, and has 20 years of commercial, marketing, trading and mergers and acquisitions experience across roles based in Australia, Singapore, Japan and the United Kingdom. Mr. Abbottsford has held a number of senior positions at Woodside, including Executive Adviser to the Chief Executive Officer and Managing Director, Vice President Marketing, Trading and Shipping and Group Financial Controller. Mr. Abbottsford's prior experience includes roles at the Western Australian Department of Treasury and BHP Iron Ore. Mr. Abbottsford graduated from the Advanced Management Program at Harvard Business School in 2021. Mr. Abbottsford also holds a Master of Philosophy in Finance from the University of Cambridge, and a Bachelor of Economics (1.Hons) and MBA from the University of Western Australia.

Andy Drummond has been nominated to lead Exploration and Development, based in Houston. Mr. Drummond is currently Vice President of Sustainability and Innovation for BHP's Petroleum business. Since joining BHP in January 2013, he has held several leadership positions including Vice President Business Development. Prior to joining BHP, Mr. Drummond spent 15 years with Marathon Oil Corporation working throughout the value chain at various international locations including Scotland, Norway, Equatorial Guinea and Poland. Mr. Drummond has a Bachelor of Engineering, Chemical and Process Engineering (Hons).

Matthew Ridolfi has been nominated to lead Projects, based in Houston. Matthew has 30 years of experience in the petroleum business, including in Australia, the United Kingdom, and the United States of America. Mr. Ridolfi is currently the Vice President of Major Developments with accountability for Petroleum's worldwide operated and non-operated major development activities and all operated well and seismic delivery activities. Prior to his current position, Mr. Ridolfi has held various senior roles in both the conventional and shale businesses, and was the Vice President Health, Safety, Environment and Community, and the Joint Interest Unit Manager Bass Strait. Mr. Ridolfi began his career with BHP in 1991 when he joined as a graduate engineer. Mr. Ridolfi holds a bachelor's degree in Mechanical Engineering (Hons).

Julie Fallon has been nominated to lead Corporate Services, based in Perth. Ms. Fallon joined Woodside in 1998 and is currently Acting Senior Vice President Corporate and Legal, providing support across the company in a range of areas including corporate affairs, security, legal, property management, risk and compliance and internal audit. She has 29 years of industry experience and has held a number of roles within Woodside including Senior Vice President Engineering, Senior Vice President Pluto Business Unit and Senior Vice President Internal Audit. Ms. Fallon has also worked in a range of production and engineering roles, including several years living and working in Karratha. Prior to joining Woodside, Ms. Fallon worked as an engineer at Shell Refining Australia. Ms. Fallon graduated from the University of Sydney with a Bachelor in Chemical Engineering (1. Hons) and is a fellow of the Institution of Chemical Engineers.

Tony Cudmore has been nominated to lead Strategy and Climate, based in Perth. Mr. Cudmore is currently Group Sustainability and Public Policy Officer for BHP. Mr. Cudmore has had responsibility for BHP's global sustainability and climate change teams as well as being accountable for BHP's global brand, corporate

Table of Contents

communications and public policy advocacy. Mr. Cudmore is also a member of the Board of the BHP Foundation. Mr. Cudmore joined BHP in February 2014 and has held roles including Chief Public Affairs Officer and President Corporate Affairs before assuming his current role in March 2016. Prior to joining BHP, Mr. Cudmore worked with ExxonMobil for 13 years and held a wide range of senior and global Corporate Affairs roles in Australia and the United States. Before joining ExxonMobil, Mr. Cudmore was a Media Relations and Policy Adviser before becoming Principal Adviser to the then Premier of Victoria, Jeff Kennett, followed by his role as Assistant Director of the Australian Institute of Petroleum. Mr. Cudmore holds a Bachelor of Arts and a Graduate Certificate of International Relations.

Daniel Kalms is currently Senior Vice President Merger Integration Planning at Woodside, and he has been nominated to lead Merger Integration activities after completion of the Merger, based in Perth. Mr. Kalms joined Woodside in 2001 and has 20 years' experience in the oil and gas industry. Since joining Woodside in 2001, Daniel gained extensive experience across departments including commercial, development, projects, operations, and business management. Daniel was Pluto Plant Manager based in Karratha from 2011 to 2014, overseeing the start-up of the new LNG production facility. Mr. Kalms graduated from Royal Melbourne Institute of Technology and holds a Bachelor of Engineering (Chemical), Graduate Certificate in Project Management and a Master of Business Administration.

To the best of Woodside' s knowledge, none of the Merged Group directors or Senior Executives of the Merged Group:

has any convictions in relation to fraudulent offences for at least the previous five years;

has been associated with any bankruptcy, receivership or liquidation while acting in the capacity of a member of the administrative, management or supervisory body or of a senior manager of any company for at least the previous five years;

has been subject to any official public incriminations and/or sanctions by any statutory or regulatory authority (including designated professional bodies) for at least the previous five years;

has ever been disqualified by a court from acting as a director of a company, or from acting as a member of the administrative, management or supervisor bodies of a company, or from acting the management or conduct of the affairs of any company for at least the previous five years; or

was selected to act in such capacity pursuant to any arrangement or understanding with any shareholder, customer, supplier or other person having a business connection with the Merged Group.

There are no family relationships between any of the Merged Group directors or Senior Executives of the Merged Group.

There are no potential or actual conflicts of interest between any duties owed by the Woodside Directors or the Senior Executives to Woodside and their respective private interests or other duties, save for their interest as holders of securities of Woodside.

Governance of the Merged Group Following the Merger

The description below provides for the Woodside Board' s oversight of the management of the Merged Group. The Woodside Board is responsible for the overall corporate governance of Woodside, including providing leadership and strategic guidance for Woodside and its related entities. The Woodside Board monitors the operational and financial position and performance of Woodside and oversees the implementation of Woodside' s strategic objectives, including approving operating budgets and significant expenditure. The Woodside Board is committed to maximizing performance, generating appropriate levels of shareholder value and financial return and sustaining the growth and success of Woodside.

The Woodside Board seeks to ensure that Woodside is properly managed to protect and enhance the interests of Woodside Shareholders, and that Woodside and its Directors, officers and personnel operate in an

Table of Contents

environment of appropriate corporate governance. The Woodside Board has created a framework for managing Woodside, including adopting relevant internal controls, risk management processes and corporate governance policies and practices which it believes are appropriate for Woodside's business and which are designed to promote the responsible management and conduct of Woodside.

As an ASX-listed entity, Woodside must comply with the Corporations Act, the ASX Listing Rules, and other applicable Australian and international laws. The ASX Listing Rules require Woodside to report on the extent to which it has followed the Corporate Governance Recommendations contained in the fourth edition of the ASX Corporate Governance Council's Principles and Recommendations ("ASX Recommendations"). This information is set out in a Corporate Governance Statement and reports on Woodside's key governance principles and practices. These principles and practices are reviewed regularly and revised as appropriate to reflect changes in law and developments in corporate governance. A copy of the Corporate Governance Statement is available in the Corporate Governance section of Woodside's website at www.woodside.com.au.

Woodside has complied with all ASX Recommendations and, following Implementation, the Merged Group will continue to pursue a high level of corporate governance and foster a culture that values ethical behavior, integrity and respect.

NYSE Requirements

Upon the listing of the Woodside ADSs on the NYSE, Woodside will become subject to the NYSE Listing Rules. The NYSE Listing Rules include certain accommodations in the corporate governance requirements that allow foreign private issuers, such as Woodside, to follow "home country" corporate governance practices in lieu of the otherwise applicable corporate governance standards of the NYSE. The exemptions include, among other things, the ability to opt out of (i) the requirement that the Merged Group Board be comprised of a majority independent directors, (ii) the requirement that the Merged Group's independent directors meet regularly in executive sessions, (iii) the requirement that the Merged Group obtain shareholder approval prior to the issuance of securities in connection with certain acquisitions, private placements of securities, or the establishment or amendment of certain stock option, purchase or other compensation plans, and (iv) the requirement that the Merged Group establish independent nominating and corporate governance and compensation committees.

The application of such exceptions will require Woodside to disclose any significant ways in which its corporate governance practices differ from the NYSE Listing Rules in its Annual Report on Form 20-F. Woodside expects that the Merged Group Board will be comprised of a majority independent directors and will establish independent nominating and corporate governance and compensation committees. Woodside has elected to comply with home country rules with respect to NYSE quorum standards and certain responsibilities of the audit committee with respect to the appointment of auditors, but has not yet made final determinations on other possible exemptions from the NYSE Listing Rules. See "*Quorum*" and "*Audit Committee and Audit Committee Additional Requirements*." Woodside may in the future decide to use other foreign private issuer exemptions with respect to some of the other NYSE Listing Rules. Following Woodside's home country governance practices, as opposed to the requirements that would otherwise apply to a company listed on the NYSE, may provide less protection than is accorded to investors under the NYSE Listing Rules applicable to U.S. domestic issuers. If, at any time, Woodside ceases to be a foreign private issuer, it will take all action necessary to comply with the SEC and NYSE Listing Rules.

Quorum

The NYSE Listing Rules generally require that a listed company's by-laws provide for a quorum for any meeting of the holders of such company's voting shares that is sufficiently high to ensure a representative vote. Pursuant to the NYSE Listing Rules, Woodside, as a foreign private issuer, has elected to comply with practices that are permitted under Australian securities laws in lieu of the provisions of the NYSE Listing Rules. The Woodside Constitution provides that a quorum for a meeting of Woodside Shareholders is three eligible Woodside Shareholders entitled to vote.

Table of Contents

Majority of Independent Directors

The NYSE Listing Rules require that a majority of the board of directors of a listed company consist of independent directors. Under the NYSE Listing Rules, an independent director is defined as a director who the company's board of directors has affirmatively determined has no material relationship with the company. Except with respect to the independence of the audit committee, foreign private issuers may elect to follow "home country" corporate governance practices in lieu of this requirement. Based on information provided by each Woodside Director concerning his or her background, employment and affiliations, the Woodside Board has determined that of the ten Non-Executive Directors and one Executive Director to serve on the Merged Group Board as at Implementation, one director will not be considered "independent" as that term is defined under the NYSE Listing Rules as a result of their respective relationships with the Merged Group. See the section entitled "*Woodside Board-Independence of the Woodside Board*" for information on independence standards and determinations under the ASX Recommendations.

Executive Sessions

The NYSE Listing Rules further require that independent directors must meet at regularly scheduled executive sessions without a member of Woodside's management present. Foreign private issuers may elect to follow "home country" corporate governance practices in lieu of this requirement. The ASX Listing Rules and ASX Recommendations do not require that independent directors meet at regularly scheduled executive sessions without a member of management present, however, it is expected that following Implementation Woodside's independent directors will meet at appropriate intervals without the presence of management, in accordance with existing corporate governance practices.

Nominating and Corporate Governance Committee and Compensation Committee

The NYSE Listing Rules additionally require that listed companies maintain both a nominating and corporate governance committee and a compensation committee comprising entirely of independent directors and governed by a written charter addressing each committee's required purpose and detailing its required responsibilities. The responsibilities of the nominating and corporate governance committee include, among other matters, identifying and selecting qualified board member nominees and developing a set of applicable corporate governance principles. The responsibilities of the compensation committee, in turn, include, among other things, reviewing corporate goals relevant to the chief executive officer's compensation, evaluating the chief executive officer's performance, approving the chief executive officer's compensation levels and recommending to the board of directors the compensation of other executive officers, incentive compensation and equity-based compensation plans. Foreign private issuers may elect to follow "home country" corporate governance practices in lieu of this requirement. Woodside has established a Nominations & Governance Committee and a Human Resources & Compensation Committee. See the section entitled "*Committees of the Merged Group Board*" for information on Nominations & Governance Committee and Human Resources & Compensation Committee requirements under the ASX Recommendations.

Audit Committee and Audit Committee Additional Requirements

Under Section 303A.06 of the NYSE Listing Rules and the requirements of Rule 10A-3 under the Exchange Act ("Rule 10A-3"), a U.S. listed company is required to have an audit committee of such company's board of directors consisting entirely of independent members that comply with the requirements of Rule 10A-3. In addition, (i) the audit committee must have a written charter which is compliant with the requirements of Section 303A.07(b) of the NYSE Listing Rules, (ii) the listed company must have an internal audit function and (iii) the listed company must fulfill all other requirements of the NYSE Listing Rules and Rule 10A-3. Foreign private issuers must comply with the audit committee standard set forth in Rule 10A-3, subject to limited exemptions, but may elect to follow "home country" practices in lieu of the additional audit committee requirements in the NYSE Listing Rules. Rule 10A-3 requires NYSE-listed companies to ensure their audit committees are directly responsible for the appointment, compensation, retention and oversight of the work of the external auditor unless the company's governing law or documents or other home country legal requirements require or permit shareholders to ultimately

Table of Contents

vote on or approve these matters. While Woodside's Audit & Risk Committee is directly responsible for remuneration and oversight of the external auditor, ultimate responsibility for the appointment of the external auditor rests with Woodside Shareholders, in accordance with Australian law and the Woodside Constitution. However, in accordance with the limited exemptions set forth in Rule 10A-3, the Audit & Risk Committee is responsible for the annual auditor engagement and if there is any proposal to change auditors, the Committee does make recommendations to the Woodside Board on any change of auditor, which are then considered by Woodside Shareholders at the annual meeting of Woodside Shareholders. See the section entitled "*–Committees of the Merged Group Board–Audit & Risk Committee*" for information on Audit and Risk Committee requirements under the ASX Recommendations.

Shareholder Approval of Equity Compensation Plans

The NYSE Listing Rules provide for limited exceptions to the requirement that shareholders be given the opportunity to vote on all equity compensation plans and material revisions to those plans (which may be approved for an undefined period). Foreign private issuers may elect to follow "home country" corporate governance practices in lieu of this requirement. See the section entitled "*Description of Woodside Shares–Director Remuneration*" for information on the approval of Australian equivalent equity compensation plans.

Corporate Governance Guidelines

The NYSE Listing Rules require that listed companies adopt and disclose corporate governance guidelines. Woodside complies with the corporate governance guidelines under applicable Australian law and the ASX Recommendations, and Woodside believes these corporate governance guidelines are consistent with the NYSE Listing Rules.

Internal Audit Function

The NYSE Listing Rules require that listed companies maintain an internal audit function to provide management and the audit committee with ongoing assessments of such company's risk management processes and systems of internal control. Foreign private issuers may elect to follow "home country" corporate governance practices in lieu of this requirement. Woodside has an internal audit function and has established an Audit & Risk Committee, see the section "*–Committees of the Merged Group Board–Audit & Risk Committee*" for information on Audit and Risk Committee requirements under the ASX Recommendations.

Woodside Board

Composition of the Woodside Board

As at Implementation the Woodside Board will be comprised of ten Non-Executive Directors and one Executive Woodside Director, being the Chief Executive Officer and Managing Director. Detailed biographies of the Woodside Directors are provided for under "*–Members of the Board of Directors of the Merged Group*" and "*–Members of the Executive Committee of the Merged Group.*" The Woodside Constitution provides that Woodside must not have more than 12, nor less than three (3), directors on the Woodside Board.

Independence of the Woodside Board

Each Woodside Director must bring an independent view and judgement to the Woodside Board and must declare all actual or potential conflicts of interest on an ongoing basis. Any issue concerning a Woodside Director's ability to properly act as a Woodside Director must be discussed at a Woodside Board meeting as soon as practicable.

The Woodside Board assesses the independence of the Woodside Directors with reference to whether a director is a non-executive, not a member of management and is free of any business or other relationship that

Table of Contents

could materially interfere with, or could reasonably be perceived to materially interfere with, the independent exercise of their judgement. The Woodside Board has adopted a definition of independence that is based on the definition set out in the ASX Recommendations. The Woodside Board reviews the independence of Woodside Directors before they are appointed, on an annual basis and at any other time where the circumstances of a Woodside Director change such as to require reassessment.

The Woodside Board considers that each of the Non-Executive Directors, including Mr. Goyder, Mr. Archibald, Mr. Cooper, Ms. Goh, Mr. Macfarlane, Dr. Haynes, Ms. Pickard, Mr. Tilbrook, Dr. Ryan and Mr. Wyatt, are free from any interest, position, association or relationship that might influence or reasonably be perceived to influence, the independent exercise of the Woodside Director's judgement and that each of them is able to fulfil the role of independent Woodside Director for the purposes of the ASX Recommendations.

Ms. O' Neill is considered by the Woodside Board not to be independent on the basis that she is employed as the Chief Executive Officer and Managing Director of Woodside.

Accordingly, the Woodside Board consists of a majority of independent directors as recommended in ASX Recommendation 2.4.

The Woodside Board will continue to regularly review the independence of each Woodside Director, and any subsequent Woodside Directors appointed, in light of interests disclosed to the Woodside Board and will disclose any change to the ASX, as required by the ASX Listing Rules. The Policy on Independence of Woodside Directors is available in the Corporate Governance section of Woodside's website at www.woodside.com.au.

Woodside Board Charter

The Woodside Board has adopted a written charter ("Charter") to provide a framework for the effective operation of the Woodside Board, which sets out the roles and responsibilities of the Woodside Board, which include but are not limited to:

Culture and responsible decision-making (*e.g.*, setting Woodside's values and standards of conduct, promoting ethical and responsible decision-making and monitoring its compliance with legal and regulatory requirements):

Strategy and performance (*e.g.*, contributing to management's development of the corporate strategy and performance objectives of Woodside and approving major corporate initiatives and Woodside Board policies);

Oversight of management (*e.g.*, monitoring and assessing management's performance in carrying out Woodside strategies, achieving objectives and observing budgets);

Risk management and compliance (*e.g.*, reviewing and ratifying systems of risk management, compliance and control);

Oversight of financial and capital management (*e.g.*, approving budgets, determining the dividend policy of Woodside, and monitoring financial results and audit arrangements);

People and diversity (*e.g.*, establishing and assessing objectives for achieving gender diversity, and maintaining an orderly succession of appointments of Non-Executive Directors); and

Security holders (*e.g.*, promoting effective engagement with security holders in providing them with appropriate information and monitoring Woodside's process for making timely and balanced disclosure of all material information);

The role and responsibilities of the Chairman and company secretary;

The delegations of authority of the Woodside Board to the Woodside Board's committees and the Chief Executive Officer and Managing Director;

Table of Contents

The membership of the Woodside Board, including in relation to the Woodside Board' s composition, the election of Woodside Directors, and conduct of individual Woodside Directors;

Woodside Board processes, including how the Woodside Board meets; and

The Woodside Board' s performance evaluation processes, including in respect of its own performance, and the performance of the Woodside Board' s committees and individual Woodside Directors (including the Chairman and the Chief Executive Officer and Managing Director).

The Woodside Board will review its Charter regularly, and make amendments, as necessary. The Charter is available in the Corporate Governance section of Woodside' s website at www.woodside.com.au.

Committees of the Merged Group Board Following the Merger

Woodside Board Committees

The Woodside Board may from time to time establish standing and ad hoc committees to assist it in carrying out its responsibilities. As set out below, the Woodside Board has established four standing committees to facilitate and assist the Woodside Board in fulfilling its responsibilities:

Audit & Risk Committee;

Nominations & Governance Committee;

Human Resources & Compensation Committee; and

Sustainability Committee.

Each committee is comprised of independent Non-Executive Directors in compliance with ASX Listing Rules and ASX Recommendations. The committees operate principally in a review or advisory capacity, except in cases where powers are specifically conferred on a committee by the Woodside Board.

Each committee has the responsibilities described in the relevant committee charter adopted by Woodside (each of which has been prepared having regard to the ASX Recommendations). In connection with Implementation, certain of the committee charters will be amended to include applicable corporate governance requirements of the NYSE Listing Rules and the LSE listing rules. The descriptions below reflect the provisions of the charters expected to be effective upon Implementation. Each committee' s charter is available in the Corporate Governance section of Woodside' s website at www.woodside.com.au.

Table of Contents

Woodside does not currently expect any change to the composition of these committees following Implementation of the Merger.

| <u>Committee</u> | <u>Roles and responsibilities</u> | <u>Composition</u> |

Table of Contents

Corporate governance policies

Woodside has also adopted the following policies, each of which has been prepared having regard to the ASX Recommendations. In connection with Implementation, certain of these policies will be amended to comply with applicable corporate governance requirements of the NYSE Listing Rules and the LSE listing rules. The descriptions below reflect the provisions of the charters expected to be effective upon Implementation. Each policy is available, and the amended policies will be available when effective, in the Corporate Governance section of Woodside's website at www.woodside.com.au. Woodside's corporate governance policies will continue to be reviewed regularly and will continue to be developed and refined as required to meet the needs of Woodside.

Continuous Disclosure and Market Communications Policy

Woodside is required to comply with the continuous disclosure requirements of the ASX Listing Rules and the Corporations Act. Upon Implementation, Woodside will also be required to comply with the relevant provisions of the NYSE Listing Rules and U.S. securities laws applicable to Woodside as a foreign private issuer, and under the U.K. Market Abuse Regulation. Subject to limited exceptions, Woodside is required to immediately notify the market by announcement to the ASX and LSE of any information concerning Woodside that a reasonable person would expect to have a material or significant effect on the price or value of Woodside Shares or a reasonable investor would be likely to use as part of the basis for making investment decisions. Woodside must also promptly release to the public any news or information that might reasonably be expected to materially affect the market for its securities in compliance with NYSE rules.

The Woodside Board has adopted a Continuous Disclosure and Market Communications Policy which establishes procedures aimed at ensuring that Woodside Directors, management, and other relevant staff are aware of and fulfil their obligations in relation to the timely disclosure of material price sensitive information. Under the Continuous Disclosure and Market Communications Policy, Woodside has established a Disclosure Committee, comprised of senior managers of Woodside including its Chief Executive Officer and Managing Director, Chief Financial Officer, Senior Vice President Corporate & Legal, General Counsel, Vice President Investor Relations, and Vice President Corporate Affairs or their delegate. The Disclosure Committee has authority to decide whether a market announcement needs to be made and to approve the form of any announcement made and is also responsible for the development of guidelines for the release of information and implementing reporting processes and controls.

Securities Dealing Policy

The Woodside Board has adopted a Securities Dealing Policy which explains the prohibited type of conduct in relation to dealings in securities under the Corporations Act and is intended to establish a best-practice procedure in relation to the dealings in Woodside Shares by Executive and Non-Executive Directors, employees (full-time, part-time and casual), contractors, consultants and advisers of Woodside.

The Securities Dealing Policy sets out the restrictions that apply to dealing with Woodside Shares and other Woodside securities (as defined in the policy) including 'black-out periods', during which Woodside Directors and restricted employees are generally prohibited from dealing in Woodside Shares and other Woodside securities, along with a procedure under which a Woodside Director or restricted employee is required to submit a request and obtain written clearance prior to dealing in Woodside Shares and other Woodside securities outside the black-out periods.

The policy further provides that any persons to whom the policy applies must not engage, directly or indirectly, in short-term or speculative dealing in Woodside Shares and other Woodside securities.

Conduct Policies

The Woodside Board recognizes the need to observe the highest standards of corporate practice and business conduct. Accordingly, the Woodside Board has adopted a number of policies which, together, set

Table of Contents

standards of conduct in relation to the operation of Woodside. These policies are to be followed by the Woodside Board along with all employees, officers, contractors, consultants and other persons that act on behalf of Woodside and associates of Woodside. Woodside currently has the following conduct policies in place:

Anti-Bribery and Corruption Policy;
Climate Change Policy;
Code of Conduct;
Health, Safety and Environment Policy;
Human Rights Policy;
Indigenous Communities Policy;
Quality Policy;
Sustainable Communities Policy;
Whistleblower Policy; and
Working Respectfully Policy.

These and other associated policies set out Woodside's approach to various matters including obligations to act honestly, fairly, professionally and respectfully; conflicts of interest; appropriate use of Woodside's property; anti-bribery and giving or acceptance of gifts; prohibition on facilitation payments; dealings with politicians and government officials in the context of the giving or acceptance of gifts; political and charitable donations; confidentiality; privacy; discrimination, bullying, harassment and vilification; health and safety of employees; whistle-blower protections; and compliance with laws and regulations in respect of these matters. All new and existing Woodside staff are trained at induction and annually on the code of conduct and related policies.

Inclusion and Diversity Policy

The Woodside Board has approved an Inclusion and Diversity Policy in order to, among other matters, provide a framework by which Woodside will support and facilitate an environment of diversity and inclusion across the organization.

Woodside's key priority is to drive inclusive leadership and create an inclusive culture for all employees. Woodside is committed to improving the diversity mix of its workforce to reflect the communities in which it operates. Woodside's diversity focus areas are gender, Australian First Nations, gender identity and sexual orientation, cultural background and faith, local people globally and differently abled groups.

Risk Management Policy

Woodside recognizes that risk is inherent in its business and the effective management of risk is vital to deliver its strategic objectives, continued growth and success. Woodside is committed to managing risks in a proactive and effective manner as a source of competitive advantage. The objective of Woodside's risk management framework is to provide a single consolidated view of across the organization to understand its full risk exposure and prioritize risk management and governance.

Woodside's Managing Director is accountable to the Woodside Board for ensuring the effective implementation of the Risk Management Policy.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF WOODSIDE

The following Management's Discussion and Analysis of Financial Condition and Results of Operations of Woodside is intended to provide investors with an understanding of the historical performance of Woodside and its financial condition. This discussion and analysis presents the factors that had a material effect on the results of operations of Woodside for the fiscal years ended 31 December 2021, 2020 and 2019 and material recent events. The following should be read in conjunction with Woodside's audited consolidated financial statements and the notes thereto included elsewhere in this prospectus. The following discussion and analysis contains forward-looking statements. See the sections entitled "Risk Factors" and "Cautionary Statement on Forward-Looking Statements" for a discussion of the uncertainties, risks and assumptions associated with these statements.

Business overview

Woodside led the development of the LNG industry in Australia and is applying this same pioneering spirit to solving future energy challenges. Woodside has a robust hydrocarbon business with a focus on LNG. As a leading Australian LNG operator, Woodside operated 5% of global LNG supply in 2021. Woodside is also one of Australia's largest independent oil and gas exploration and production operators by market capitalization and a major supplier of energy to the Asia-Pacific region. Woodside maintains a strong focus on operational excellence by pursuing safe, reliable, and cost-effective operations.

Woodside's vision is to be a global leader in upstream oil and gas, and its mission is to deliver affordable energy solutions and superior outcomes for stakeholders. To achieve this over the long term, Woodside is focused on maximizing cash generation from its base business and executing a range of development projects over the medium term. Woodside seeks to build its portfolio through disciplined capital allocation, which will seek to prioritize lower capital intensity and faster to market investments that utilize existing infrastructure where possible.

Woodside's Australian operations are in Western Australia and in Commonwealth waters offshore Western Australia. Domestic gas is sold to customers in Western Australia. LNG, LPG, condensate and oil are sold to customers primarily in Asia. Woodside's operated LNG projects include two integrated projects, NWS Project (Australia's largest LNG project) and Pluto LNG. In 2021, Woodside delivered a reported net profit after tax of \$1,983 million. Woodside's strong net profit after tax performance was underpinned by increased oil and gas prices, consistent operational performance and proactive decisions to manage Woodside's sales portfolio.

Offshore, Woodside operates two FPSO facilities, the Okha FPSO and Ngujima-Yin FPSO. Woodside also has a participating interest in Wheatstone LNG, which started production in 2017 and is the upstream operator of Julimar Brunello, one of the Wheatstone LNG feeder fields.

In addition to its producing assets Woodside is developing the Scarborough gas resource through new offshore facilities to a second LNG train, Pluto Train 2, at the existing Pluto LNG onshore facility in Western Australia. Woodside made an FID in November 2021, with the first LNG cargo targeted for 2026. Woodside is also connecting Pluto LNG with the NWS Project through the Pluto-KGP Interconnector to create an integrated LNG production hub on the Burrup Peninsula.

Outside Australia, Woodside is executing the Sangomar Oil Field Development in Senegal, having achieved FID from the Rufisque, Sangomar and Sangomar Deep, or RSSD, joint venture in January 2020. This development is targeting first oil in 2023.

In October and November 2021 respectively, Woodside announced reserves updates at its Wheatstone and Pluto LNG projects. The reserves updates were announced following completion of reservoir studies based on

Table of Contents

4D seismic and well performance results, as well as well drilling results at Wheatstone. At Wheatstone, Woodside announced the estimated Proved (1P) reserves had fallen approximately 27% and the Proved plus Probable (2P) reserves had also fallen. At Pluto the estimated 1P reserves had increased by approximately 10% and the 2P total reserves had decreased. These reserves were classified under the Society of Petroleum Engineers Petroleum Resources Management System.

Profit after tax for the year ended 31 December 2021 increased by \$6,011 million compared to the year ended 31 December 2020, primarily due to higher realized prices and impairment reversals, partially offset by higher cost of sales and higher taxes driven by higher taxable income.

The COVID-19 outbreak was declared a pandemic by the World Health Organization in March 2020. The outbreak and the response of governments in dealing with the pandemic has affected general activity levels within the global community, economy and business operations. The COVID-19 crisis and decline in oil prices in 2020 have impacted Woodside's earnings, cash flow and financial position. Oil prices have rallied since the 2020 lows and in early March 2022 were at multi-year highs as markets priced in geopolitical risk premiums relating primarily to Russia's invasion of Ukraine exacerbating market uncertainty and energy market volatility. The financial statements for the year ended 31 December 2021 have been prepared based on assumptions and conditions prevalent as at those dates. Given ongoing economic uncertainty, these assumptions could change in the future.

Recent business acquisitions and divestments

On 15 November 2021, Woodside entered into a sale and purchase agreement with Global Infrastructure Partners ("GIP") for the sale of a 49% non-operating participating interest in the Pluto Train 2 Joint Venture. Pluto Train 2 is a key component of the proposed Scarborough development and includes a new LNG train and domestic gas facilities to be constructed at the existing Pluto LNG onshore facility. The development of Pluto Train 2 is supported by a long-term Processing and Services Agreement ("PSA") between the Pluto Train 2 and Scarborough joint ventures. The transaction was completed on 18 January 2022, reducing Woodside's participating interest from 100% to 51%. Accordingly, the associated Pluto Train 2 assets within the Development segment have been reclassified to non-current assets held for sale. The arrangements require GIP to fund its 49% share of capital expenditure from 1 October 2021 and an additional amount of capital expenditure of approximately \$822 million. If the total capital expenditure incurred is less than \$5,600 million, GIP will pay Woodside an additional amount equal to 49% of the under-spend. In the event of a cost overrun, Woodside will fund up to approximately \$822 million of GIP's share of the overrun. Delays to the expected start-up of production will result in payments by Woodside to GIP in certain circumstances. The arrangements include provisions for GIP to be compensated for exposure to additional Scope 1 emissions liabilities above agreed baselines, and to sell its 49% interest back to Woodside if the status of key regulatory approvals materially changes.

On 22 November 2021, Woodside and BHP publicly announced that they had entered into the Share Sale Agreement, under which, and subject to the terms and conditions therein, Woodside will acquire all the shares in BHP Petroleum International Pty Ltd, a wholly owned subsidiary of BHP that, following completion of the Restructure, will hold the oil and gas assets of BHP, in exchange for the Share Consideration and the Completion Payment (subject to adjustment). Immediately upon Implementation, the Share Consideration will be issued by Woodside to BHP to be distributed to BHP Shareholders (and transferred to the Sale Agent in the case of all New Woodside Shares attributable to Ineligible Foreign BHP Shareholders and Relevant Small Parcel BHP Shareholders) via an in-specie dividend. Upon Implementation, BHP Shareholders will be entitled to, in aggregate, 914,768,948 New Woodside Shares (assuming that no additional Woodside Shares are issued in connection with a Permitted Equity Raise and no further declaration of Woodside Dividends occurs prior to Implementation). Upon Implementation, Existing Woodside Shareholders will own approximately 52% and BHP Shareholders will own approximately 48% of the Merged Group (based on the issue of 914,768,948 New Woodside Shares and the number of Woodside Shares outstanding on 24 March 2022) subject to any BHP

Table of Contents

Shareholders being Ineligible Foreign BHP Shareholders or Relevant Small Parcel BHP Shareholders. Each Participating BHP Shareholder will be entitled to 0.1807 of a New Woodside Share in respect of each BHP Share that the Participating BHP Shareholder owns (based on the number of BHP Shares outstanding on 24 March 2022). See the sections entitled “*The Merger*” and “*The Share Sale Agreement and Related Agreements–The Share Sale Agreement.*”

On 7 July 2021, Woodside Energy (Senegal) B.V. completed the acquisition of the entire participating interest of FAR Senegal RSSD S.A. (FAR) in the RSSD joint venture. The purchase price was \$45 million plus a working capital adjustment of approximately \$167 million to reflect the acquisition effective date of 1 January 2020. The final completion payment to FAR, after adjustments and remedying of FAR’s defaults under the joint operating agreement, was approximately \$126 million. Additional payments of up to \$55 million are contingent on future commodity prices and timing of first oil. As a result of this acquisition, Woodside’s participating interest in the RSSD joint venture increased to 82% for the Sangomar exploitation area and to 90% for the remaining RSSD evaluation area.

Principal factors that affect Woodside’s results

Woodside’s financial condition, cash flows from operating activities and results of operations are affected by numerous factors. Woodside believes the following factors are of particular importance. However, other factors, including those outlined in the section entitled “*Risk Factors*” may affect Woodside’s financial condition and results of operations.

Oil and gas prices

Substantially all of Woodside’s revenues from operations are derived from sales of LNG, condensate, oil, pipeline gas and LPG. Consequently, Woodside’s results of operations are strongly influenced by the prices it receives for these products, which in general are wholly (in the case of oil and condensate) or partially (in the case of LNG, LPG and pipeline gas) determined by prevailing crude oil prices, which are affected by numerous factors beyond Woodside’s control.

Woodside’s long-term and mid-term LNG sales are generally priced with certain linkages to crude oil prices, primarily indexed to the Brent oil price or the JCC, which represents the average price of crude oil imports into Japan as reported by Japanese Customs and published by the Japanese Ministry of Finance every month.

Woodside’s short-term LNG sales are increasingly being linked to JKM as the price reference. The JKM is an LNG benchmark price assessment for spot physical cargoes published by S&P Global Platts that is intended to reflect the spot market value of LNG cargoes delivered ex-ship (DES) into Japan, South Korea, China and Taiwan.

Table of Contents

Woodside's oil and condensate sales are primarily priced on a Dated Brent marker and referenced to industry recognized oil benchmarks that are reported by Platts Crude Oil Market wire and on the electronic Intercontinental Exchange ("ICE"). The price of crude oil has been extremely volatile both historically and in recent times.

| | Units | 2021 | 2020 | 2019 |
|---------------------------|----------|-------|-------|-------|
| Dated Brent | | | | |
| Average | \$/bbl | 70.91 | 41.84 | 64.21 |
| High | \$/bbl | 86.12 | 69.96 | 74.69 |
| Low | \$/bbl | 50.34 | 13.24 | 53.24 |
| 3-month Lagged JCC | | | | |
| Average | \$/bbl | 59.95 | 51.21 | 69.77 |
| High | \$/bbl | 73.86 | 70.63 | 81.72 |
| Low | \$/bbl | 42.31 | 24.56 | 62.26 |
| JKM | | | | |
| Average | \$/MMbtu | 15.17 | 3.85 | 5.97 |
| High | \$/MMbtu | 56.33 | 7.49 | 9.50 |
| Low | \$/MMbtu | 5.56 | 1.83 | 4.32 |

Currency fluctuations

Woodside's functional and reporting currency is U.S. dollars. As a result, its currency exposure relates to transactions and balances in currencies other than U.S. dollars. While substantially all of Woodside's revenues are denominated in U.S. dollars, its operating costs and exploration and development expenses are incurred in a mix of currencies, predominantly Australian dollars and U.S. dollars.

A large portion of Woodside's operating and capital expenditures is denominated in Australian dollars or other currencies and, consequently, depreciation of the Australian dollar (and such other currencies) against the U.S. dollar generally positively affects Woodside's overall profitability and financial position and decreases its effective costs, while appreciation of the Australian dollar has a generally negative effect on Woodside's overall profitability and financial position and increases its effective costs.

The Australian dollar is a commodity currency, and as such, strength in commodity prices such as iron ore, are likely to cause an appreciation in the Australian dollar, while weakness in commodity prices have the opposite effect. In late 2020 and early 2021, the Australian economy performed better than the U.S. economy because it was more protected from the effects of COVID-19. This, together with an increase in iron ore and coal prices because of high Chinese demand and lower commodity supplies, combined with subdued U.S. bond rates, resulted in an appreciation of the Australian dollar relative to the U.S. dollar. This represents a risk for Woodside's financial position because it increases Woodside's effective costs and therefore reduces net cash flow and profitability.

Woodside reviews its financial position based on movements in the Australian dollar relative to the U.S. dollar. Accordingly, in the ordinary course of business, Woodside may hedge currency requirements when there is a firm business requirement for the currency for operational purposes. In addition, Woodside seeks to minimize foreign exchange risk by incurring debt in U.S. dollars so that its repayment obligations more closely match its revenue streams.

| | 2021 | 2020 | 2019 |
|----------------|--------|--------|--------|
| AUD:USD | | | |
| Average | 0.7512 | 0.6905 | 0.6951 |
| High | 0.7967 | 0.7685 | 0.7275 |
| Low | 0.6995 | 0.5740 | 0.6704 |

Table of Contents

Hedging

Woodside's financial position and performance are affected by changes in crude oil prices and variations in the exchange rates of various currencies (predominately of the Australian dollar to the U.S. dollar) and in U.S. interest rates. Where appropriate, Woodside uses derivative financial instruments such as swaps, options, futures and forward contracts, to hedge its risks associated with commodity prices, interest rates and foreign currency fluctuations.

Currently, Woodside may manage its commodity price risk exposure by hedging up to 50% of oil-linked exposure from produced hydrocarbons to 31 December 2023. In addition, certain derivative financial instruments may be used to hedge pricing risk within Woodside's trading portfolio.

For the year ended 31 December 2021, Woodside:

hedged a percentage of its oil-linked exposure, entering into oil swap derivatives settling between 2021 to 2023 in order to achieve a minimum average sales price per barrel.

entered into separate Henry Hub (HH) commodity swaps to hedge the purchase leg of the Corpus Christi volumes and separate Title Transfer Facility ("TTF") commodity swaps to hedge the sales leg of Corpus Christi volumes, effectively protecting against pricing risk for 2022 and 2023. As a result of hedging and term sales, and as at 24 March 2022, approximately 97% of Corpus Christi volumes in 2022 and 73% in 2023 have hedged pricing risk.

entered into TTF commodity swaps to hedge equity LNG cargoes expected to be exposed to winter 2021/2022 natural gas pricing.

entered into foreign exchange forward contracts to fix the Australian dollar to U.S. dollar exchange rate in relation to a portion of the Australian dollar denominated capital expenditure expected to be incurred under the Scarborough and Pluto Train 2 developments.

In July 2016, Woodside issued CHF175 million in senior unsecured notes under its Global Medium Term Notes Program. Associated with this issuance, Woodside entered into arrangements with a number of counterparties whereby the CHF proceeds were swapped to U.S. dollars, and the CHF fixed interest coupon payments were swapped to floating rate U.S. dollar obligations based on \$ LIBOR.

In January 2020 Woodside entered into a \$600 million fully drawn syndicated term facility. Associated with this facility, Woodside entered into arrangements with a number of counterparties whereby the \$ floating interest rate was swapped to a fixed \$ interest rate over the term of the facility.

In March 2022, Woodside purchased an amount of A\$ under forward exchange contracts to manage short term A\$ FX exposure relating to operating expenditures in 2022.

Current summary of hedge book

Commodity Hedge Book at 24 March 2022

| | |
|------|--------------------------|
| Oil | BBIs Volume (Net Short) |

More details can be found in the notes to the audited consolidated financial statements of Woodside as at 31 December 2021 and 2020 and for the years ended 31 December 2021, 2020 and 2019, included elsewhere in this prospectus.

Capital and exploration expenditure

Woodside's capital expenditures vary from year to year depending on the projects that it is undertaking, their stage of development and Woodside's share of capital expenditures in these projects. However, Woodside's business does not generally require significant sustaining capital in order to maintain production. In addition, Woodside's exploration expenditures vary from year to year depending on its strategic priorities and the exploration projects which it undertakes. See the notes to the audited consolidated financial statements of Woodside for the years ended 31 December 2021 and 2020, included elsewhere in this prospectus.

| | 2021 | 2020 | 2019 |
|---|-------------|-------------|-------------|
| | \$m | \$m | \$m |
| Capital investment expenditure (excludes exploration capitalized) | 2,631 | 1,901 | 1,167 |
| Exploration expenditure (excludes prior period expenditure written off and permit acquisition; includes evaluation expense) | 96 | 112 | 160 |

Impairments

Woodside participates in a capital-intensive industry and from time to time the value of Woodside's oil and gas properties, other plant and equipment, and investments may become impaired when, for example, commodity prices decline significantly for long periods of time, Woodside's reserve estimates are revised downward, or a decision to dispose of an asset leads to a write-down to its fair value. Woodside invests in exploration activities which, if proven to be unsuccessful, could lead to a material impairment of the carrying value of its exploration and evaluation assets.

During 2021, an impairment reversal of \$582 million was recognized net of tax. The impairment reversal was a result of additional value generated by the Scarborough and Pluto Train 2 Cash Generating Unit and updated production profiles and improved short term pricing assumptions related to NWS Gas.

During 2020, impairment losses of \$5,269 million were recognized on oil and gas properties and exploration and evaluation assets driven by a reduction in oil and gas price assumptions, increased longer-term demand uncertainty and other factors, including increased risk of higher carbon pricing.

Table of Contents

Government Regulations

Woodside is exposed to material effects from government regulations. For additional information see the section entitled “*Regulatory Information About the Merged Group.*”

Restoration Provision

The calculation of restoration provisions is conducted by specialist engineers and requires judgmental assumptions to be made regarding removal date, compliance with environmental legislation and regulations, the extent of restoration activities required (including assets remaining in-situ), the engineering methodology for estimating cost, future removal technologies in determining the removal cost, and liability-specific discount rates to determine the present value of these cash flows. Approval by NOPSEMA, the relevant Australian regulator, for items remaining in-situ will only be provided towards the end of field life and accordingly, at 31 December 2021, there is uncertainty whether NOPSEMA will approve plans for these items to be decommissioned in-situ. These assumptions and estimates are inherently subjective and changes can lead to significant differences in the restoration provision. See the sections entitled “*Risk Factors,*” “*Business and Certain Information About the Merged Group–Decommissioning*” and note D.5 to Woodside’s financial statements included elsewhere in this prospectus.

Results of operations

Corporate performance

The following describes Woodside’s financial performance for the years ending 31 December 2021, 2020 and 2019. The table presented below represents an abbreviated summary of Woodside’s Consolidated Income Statement for the years ending 31 December 2021, 2020 and 2019.

| | Units | 2021 | 2020 | 2019 |
|---|--------------|--------------|----------------|--------------|
| Operating revenue | \$m | 6,962 | 3,600 | 4,873 |
| Costs of production | \$m | (713) | (623) | (686) |
| Oil and gas properties depreciation and amortization | \$m | (1,549) | (1,689) | (1,574) |
| Shipping and direct sales costs | \$m | (210) | (111) | (110) |
| Trading costs | \$m | (1,495) | (211) | (249) |
| Other hydrocarbon costs | \$m | (18) | (4) | (108) |
| Movement in onerous contract provision | \$m | 140 | (347) | – |
| Gross profit | \$m | 3,117 | 615 | 2,146 |
| Other income | \$m | 139 | 31 | 100 |
| Exploration and evaluation | \$m | (322) | (81) | (164) |
| Other costs | \$m | 559 | (5,736) | (991) |
| Profit / (loss) before tax and net finance costs | \$m | 3,493 | (5,171) | 1,091 |
| Net finance costs | \$m | (203) | (269) | (229) |
| Petroleum resource rent tax (PRRT) (expense)/benefit | \$m | (297) | 439 | 31 |
| Tax (expense)/benefit | \$m | (957) | 1,026 | (511) |
| Profit / (loss) after tax | \$m | 2,036 | (3,975) | 382 |

Operating revenue

Total operating revenue increased \$3,362 million, or 93%, to \$6,962 million for the year ended 31 December 2021, from \$3,600 million for the year ended 31 December 2020, primarily due to increased trading activity and higher average realized prices as a result of the increase in Brent, JKM and lagged JCC prices (increase of \$3,161 million) as the combined impacts of strengthening demand from the improvement in the trading environment over the course of 2021 led to an increase in price markers from 2020. Woodside generated

Table of Contents

full year production of 91.1 MMboe during the year ended 31 December 2021 and delivered sales volumes of 111.6 MMboe (increase of \$165 million). In addition, shipping and other revenues increased by \$34 million for the year ended 31 December 2021, from \$7 million for the year ended 31 December 2020, primarily due to an increase in external shipping sub-chartering.

Total operating revenue decreased \$1,273 million, or 26%, to \$3,600 million for the year ended 31 December 2020, from \$4,873 million for the year ended 31 December 2019, primarily due to lower averaged realized prices as a result of the decrease in Brent, JKM and lagged JCC prices (decrease of \$1,929 million) as the combined impacts of the COVID-19 pandemic, oversupply and weakened global demand led to a reduction in price markers for 2020. Woodside generated record full year production of 100.3 MMboe during the year ended 31 December 2020 and delivered record sales volumes of 106.8 MMboe (increase of \$573 million), which offset the impact of lower realized prices coupled with higher processing, services, shipping and other revenues (increase of \$15 million).

Cost of production

Cost of production increased \$90 million, or 14%, to \$713 million for the year ended 31 December 2021, from \$623 million for the year ended 31 December 2020, primarily due to higher royalties and excise costs (increase of \$136 million) due to higher pricing and associated revenue. This was offset by lower draw down of Woodside inventories (decrease of \$29 million) due to timing of activities on Woodside's FPSOs.

Cost of production decreased \$63 million, or 9%, to \$623 million for the year ended 31 December 2020, from \$686 million for the year ended 31 December 2019, primarily due to lower royalties and excise costs (decrease of \$111 million) as a result of lower operating revenues and lower production costs (decrease of \$27 million) which reflected a deferral of some maintenance into 2021 as part of Woodside's response to COVID-19 partially offset by unexpected COVID-19 management costs. Lower royalties, excise and production costs were offset by an increase in insurance costs (increase of \$14 million) and an increase in costs associated with draw down of Woodside's inventories (increase of \$61 million).

Oil and gas properties depreciation and amortization

Oil and gas properties depreciation and amortization decreased \$140 million, or 8%, to \$1,549 million for the year ended 31 December 2021, from \$1,689 million for the year ended 31 December 2020, primarily due to a reduction in asset values following the asset impairments recognized in July 2020 and lower oil production volumes as a result of weather events during 2021.

Oil and gas properties depreciation and amortization increased \$115 million, or 7%, to \$1,689 million for the year ended 31 December 2020, from \$1,574 million for the year ended 31 December 2019, primarily due to reduced turnaround activity and a full year of production from the Ngujima-Yin FPSO following the Greater Enfield Project start-up in August 2019, offset by a reduction in asset values following the asset impairments recognized in July 2020.

Shipping and direct sales costs

Shipping and direct sales costs increased \$99 million, or 89%, to \$210 million for the year ended 31 December 2021, from \$111 million for the year ended 31 December 2020, primarily due to repurchase and cancellation costs incurred on revenue optimization, in addition to higher shipping vessel charter and fuel costs in 2021.

Shipping and direct sales costs remained relatively stable with an increase of \$1 million, or 1%, to \$111 million for the year ended 31 December 2020, from \$110 million for the year ended 31 December 2019.

Table of Contents

Trading costs

Trading costs increased \$1,284 million, or 609%, to \$1,495 million for the year ended 31 December 2021, from \$211 million for the year ended 31 December 2020, primarily due to higher average JKM and Dated Brent prices driving higher purchase costs on the LNG cargoes on-sold pursuant to the Pluto Transitional Marketing Arrangements Agreement, an increase in third party trades (2021: 21; 2020: 2) and an increase in Corpus Christi cargoes lifted (2021: 12; 2020: 4).

Trading costs decreased \$38 million, or 15%, to \$211 million for the year ended 31 December 2020, from \$249 million for the year ended 31 December 2019, primarily due to lower trading activity.

Other hydrocarbon costs and other cost of sales

Other hydrocarbon costs and other costs of sales increased \$14 million, or 350%, for the year ended 31 December 2021, from \$4 million for the year ended 31 December 2020, which was primarily due to mitigation costs for contracted volumes.

Other hydrocarbon costs decreased \$104 million, or 96%, to \$4 million for the year ended 31 December 2020, from \$108 million for the year ended 31 December 2019, which was primarily due to purchase of mitigation cargoes resulting from major turnarounds at Pluto LNG and unplanned outages at Wheatstone in 2019.

Onerous contract provision

An onerous contract provision movement of \$140 million was recognized for the year ended 31 December 2021, comprising provisions used of \$45 million for cargoes sold and changes in estimates of \$95 million. An onerous contract is one in which the unavoidable cost of meeting the obligations under the contract exceeds the expected economic benefit. The unavoidable cost of meeting the obligations is the lower of the net costs of fulfilling the contract or the cost of terminating it.

An onerous contract provision of \$447 million was recognized in relation to the Corpus Christi LNG sale and purchase agreement in June 2020. The provision was partially utilized during the period (\$41 million) and was reassessed at 31 December 2020 with a further reduction of \$59 million to \$347 million.

Other income

Other income increased \$108 million, or 348%, to \$139 million for the year ended 31 December 2021, from \$31 million for the year ended 31 December 2020, primarily due to income from Pluto volumes delivered into Wheatstone's sales commitments (increase of \$67 million) and net foreign exchange gains (increase of \$44 million).

Other income decreased \$69 million, or 69%, to \$31 million for the year ended 31 December 2020, from \$100 million for the year ended 31 December 2019, primarily due to a reduction in the liability previously recognized on jointly delivered LNG cargoes into Sales and Purchase Agreements under the Wheatstone Lifting Sales Coordination Agreement in 2019.

Exploration and evaluation expenses

Exploration and evaluation expenses increased \$241 million, or 298%, to \$322 million for the year ended 31 December 2021, from \$81 million for the year ended 31 December 2020, primarily due to capitalized costs written off due to Woodside's decision to withdraw from its interest in Myanmar (increase of \$209 million) and the Myanmar unsuccessful drilling campaign in the first half of 2021 (increase of \$56 million), offset by reduced exploration activity.

Table of Contents

Exploration and evaluation expenses decreased \$83 million, or 51%, to \$81 million for the year ended 31 December 2020, from \$164 million for the year ended 31 December 2019, primarily due to reduced exploration activity.

Other costs

Other costs decreased \$6,295 million, or 110%, to \$(559) million for the year ended 31 December 2021, from \$5,736 million for the year ended 31 December 2020, primarily due to an impairment reversal of \$1,058 million on oil and gas properties compared to an impairment loss of \$5,269 million for the year ended 31 December 2020.

Other costs increased \$4,745 million, or 479%, to \$5,736 million for the year ended 31 December 2020, from \$991 million for the year ended 31 December 2019, primarily due to pre-tax impairment losses of \$5,269 million (\$3,923 million post-tax) which were recognized on oil and gas properties and exploration and evaluation assets driven by a reduction in oil and gas price assumptions, increased longer-term demand uncertainty and other factors including increased risk of higher carbon pricing.

Net finance costs

Net finance costs decreased \$66 million, or 25%, to \$203 million for the year ended 31 December 2021, from \$269 million for the year ended 31 December 2020, which reflected a decrease in finance costs (\$97 million), as a result of the 2021 U.S. unsecured bond for \$700 million being redeemed on 10 February 2021 and interest capitalized against qualifying assets; and a decrease in finance income of \$31 million, or 53%, to \$27 million for the year ended 31 December 2021, from \$58 million for the year ended 31 December 2020, which reflected a reduction in interest from U.S. term deposits driven by lower interest rates and lower balances on deposit.

Net finance costs increased \$40 million, or 17%, to \$269 million for the year ended 31 December 2020, from \$229 million for the year ended 31 December 2019, which reflected an increase in finance costs (\$7 million), as a result of a full year of interest on the 2029 bond issued in March 2019 and the Syndicated Facilities drawn down in January 2020, and lower finance income (\$33 million), which reflected a reduction in U.S. term deposits driven by lower interest rates.

Petroleum resource rent tax

PRRT expense increased \$736 million, or 168%, to \$297 million for the year ended 31 December 2021, from a PRRT benefit of \$439 million for the year ended 31 December 2020, primarily due to the impact of the impairment reversal and the effect of higher operating revenue.

PRRT benefit increased \$408 million, or 1,316%, to \$439 million for the year ended 31 December 2020, from \$31 million for the year ended 31 December 2019, primarily due to the recognition of impairment losses and the effect of lower revenue.

Tax expense

Total tax expense increased \$1,983 million, or 193%, to \$957 million for the year ended 31 December 2021, from a tax benefit of \$1,026 million for the year ended 31 December 2020, primarily due to higher taxable income from the effect of higher revenue and impairment reversals in 2021, compared to lower revenue and the recognition of impairment losses in 2020.

Total tax benefit increased \$1,537 million, or 301%, to \$1,026 million for the year ended 31 December 2020, from \$(511) million for the year ended 31 December 2019, primarily due to the recognition of impairment losses and the effect of lower revenue.

Table of Contents

Volumes, realized prices and operating revenues by product

The following describes movements in Woodside's operating revenues including a discussion of production volumes, sales volumes and realized prices for the years ending 31 December 2021, 2020 and 2019.

| | Units | 2021 | 2020 | 2019 |
|--------------------------------|---------------|--------------|--------------|--------------|
| Production Volumes | | | | |
| LNG | MMboe | 70.8 | 75.0 | 67.7 |
| Domestic gas | MMboe | 2.5 | 5.3 | 6.1 |
| Condensate | MMboe | 8.7 | 9.8 | 9.7 |
| Oil | MMboe | 8.6 | 9.7 | 5.6 |
| LPG | MMboe | 0.5 | 0.5 | 0.5 |
| Total production | MMboe | 91.1 | 100.3 | 89.6 |
| Sales Volumes | | | | |
| LNG | MMboe | 91.2 | 81.2 | 75.3 |
| Domestic gas | MMboe | 2.5 | 5.3 | 6.2 |
| Condensate | MMboe | 8.7 | 10.2 | 9.7 |
| Oil | MMboe | 8.5 | 9.7 | 5.5 |
| LPG | MMboe | 0.7 | 0.4 | 0.7 |
| Total sales volumes | MMboe | 111.6 | 106.8 | 97.4 |
| Average Realized Prices | | | | |
| LNG | \$/boe | 58 | 31 | 50 |
| Domestic gas | \$/boe | 17 | 14 | 14 |
| Condensate | \$/boe | 74 | 40 | 60 |
| Oil | \$/boe | 79 | 44 | 66 |
| LPG | \$/boe | 82 | 44 | 59 |
| Volume-weighted average | \$/boe | 60 | 32 | 48 |
| Operating Revenues | | | | |
| LNG | \$m | 5,359 | 2,519 | 3,664 |
| Domestic gas | \$m | 43 | 73 | 85 |
| Condensate | \$m | 643 | 411 | 586 |
| Oil | \$m | 673 | 432 | 360 |
| LPG | \$m | 60 | 16 | 44 |
| Other Revenue | \$m | 184 | 149 | 134 |
| Operating Revenues | \$m | 6,962 | 3,600 | 4,873 |

LNG

Revenue from sales of LNG increased \$2,840 million, or 113%, to \$5,359 million for the year ended 31 December 2021, from \$2,519 million for the year ended 31 December 2020, primarily due to an increase in Woodside's average realized LNG price to \$58 per boe for the year ended 31 December 2021, from \$31 per boe for the year ended 31 December 2020, an increase of \$27 per boe or 87%, as a result of the continued strong demand for LNG and higher average JKM and JCC on linked sales. This was complemented by Woodside's LNG sales volume increasing by 10 MMboe, or 12%, to 91.2 MMboe for the year ended 31 December 2021, from 81.2 MMboe for the year ended 31 December 2020, primarily driven by an increase in third party trades.

Revenue from sales of LNG decreased \$1,145 million, or 31%, to \$2,519 million for the year ended 31 December 2020, from \$3,664 million for the year ended 31 December 2019, primarily due to a decrease in Woodside's average realized LNG price to \$31 per boe for the year ended 31 December 2020, from \$50 per boe for the year ended 31 December 2019, a decrease of \$19 per boe or 38%, as the COVID-19 pandemic and lower demand for global LNG affected benchmark oil and gas prices. This was partially offset by Woodside's LNG sales volume increasing by 5.9 MMboe, or 7.8%, to 81.2 MMboe for the year ended 31 December 2020, from

Table of Contents

75.3 MMboe for the year ended 31 December 2019, primarily driven by improved production and reliability performance at Pluto LNG following the completion of the planned maintenance shutdown in 2019 and at Wheatstone due to production optimization initiatives implemented successfully in 2020.

Domestic gas

Revenue from sales of domestic gas decreased \$30 million, or 41%, to \$43 million for the year ended 31 December 2021, from \$73 million for the year ended 31 December 2020, due to a reduction in domestic gas sales volume which decreased 2.8 MMboe, or 53%, to 2.5 MMboe for the year ended 31 December 2021, from 5.3 MMboe for the year ended 31 December 2020, primarily driven by the expiration of domestic gas contract obligations in June 2020. Woodside' s average realized domestic gas price of \$17 per boe for the year ended 31 December 2021, remained comparable to the average realized domestic gas price of \$14 per boe for the year ended 31 December 2020.

Revenue from sales of domestic gas decreased \$12 million, or 14%, to \$73 million for the year ended 31 December 2020, from \$85 million for the year ended 31 December 2019, due to a reduction in domestic gas sales volume which decreased 0.9 MMboe, or 14.5%, to 5.3 MMboe for the year ended 31 December 2020, from 6.2 MMboe for the year ended 31 December 2019. primarily driven by the expiration of domestic gas contract obligations. Woodside' s average realized domestic gas price of \$14 per boe for the year ended 31 December 2020, remained stable from \$14 per boe for the year ended 31 December 2019.

Condensate

Revenue from sales of condensate increased \$232 million, or 56%, to \$643 million for the year ended 31 December 2021, from \$411 million for the year ended 31 December 2020, primarily due to an increase in Woodside' s average realized condensate price to \$74 per boe for the year ended 31 December 2021, from \$40 per boe for the year ended 31 December 2020, an increase of \$34 per boe, or 85%, as a result of higher average Dated Brent. This was partially offset by a decrease in Woodside' s condensate sales volume, which decreased by 1.5 MMboe, or 15%, to 8.7 MMboe for the year ended 31 December 2021, from 10.2 MMboe for the year ended 31 December 2020, primarily driven by lower production volumes.

Revenue from sales of condensate decreased \$175 million, or 30%, to \$411 million for the year ended 31 December 2020, from \$586 million for the year ended 31 December 2019, primarily due to a decrease in Woodside' s average realized condensate price to \$40 per boe for the year ended 31 December 2020, from \$60 per boe for the year ended 31 December 2019, a decrease of \$20 per boe or 33%. This was partially offset by an increase in Woodside' s condensate sales volume which increased by 0.5 MMboe, or 5.2%, to 10.2 MMboe for the year ended 31 December 2020, from 9.7 MMboe for the year ended 31 December 2019, primarily driven by improved production and reliability performance at Pluto LNG, following the completion of the planned maintenance shutdown in 2019, and at Wheatstone due to production optimization initiatives implemented successfully in 2020.

Crude oil

Revenue from sales of crude oil increased \$241 million, or 56%, to \$673 million for the year ended 31 December 2021, from \$432 million for the year ended 31 December 2020, due to an increase in average realized crude oil price to \$79 per boe for the year ended 31 December 2021, from \$44 per boe for the year ended 31 December 2020, an increase of \$35 per boe or 80%, as a result of higher Dated Brent prices. This was partially offset by lower sales volume of 1.2 MMboe, or 12%, to 8.5 MMboe for the year ended 31 December 2021, from 9.7 MMboe for the year ended 31 December 2020. The decrease in crude oil sales volume reflected lower production at Ngujima-Yin due to reduced facility reliability and the impact of weather events.

Revenue from sales of crude oil increased \$72 million, or 20%, to \$432 million for the year ended 31 December 2020, from \$360 million for the year ended 31 December 2019, due to an increase in crude oil sales

Table of Contents

volume of 4.2 MMboe, or 76.4%, to 9.7 Mboe for the year ended 31 December 2020, from 5.5 MMboe for the year ended 31 December 2019. This increase in crude oil sales volume reflected a full year of production from the Ngujima-Yin FPSO, after the successful completion of the Greater Enfield Project in 2019, partially offset by lower production at the Okha FPSO due to maintenance activities and natural field decline. The increase in crude oil sales volumes was offset by a reduction in Woodside's average realized crude oil price to \$44 per boe for the year ended 31 December 2020, from \$66 per boe for the year ended 31 December 2019, a decrease of \$22 per boe or 33%.

LPG

Revenue from sales of LPG increased \$44 million, or 275%, to \$60 million for the year ended 31 December 2021, from \$16 million for the year ended 31 December 2020, primarily due to an increase in Woodside's average realized LPG price to \$82 per boe for the year ended 31 December 2021, from \$44 per boe for the year ended 31 December 2020, an increase of \$38 per boe or 86%. In addition, Woodside's LPG sales volume increased 0.3 MMboe, or 75%, to 0.7 MMboe for the year ended 31 December 2021, from 0.4 MMboe for the year ended 31 December 2020.

Revenue from sales of LPG decreased \$28 million, or 64%, to \$16 million for the year ended 31 December 2020, from \$44 million for the year ended 31 December 2019, primarily due to a decrease in Woodside's average realized LPG price to \$44 per boe for the year ended 31 December 2020, from \$59 per boe for the year ended 31 December 2019, a decrease of \$15 or 25%. In addition, Woodside's LPG sales volume decreased 0.3 MMboe, or 42.9%, to 0.4 MMboe for the year ended 31 December 2020, from 0.7 MMboe for the year ended 31 December 2019, primarily driven by a reduction in production at North West Shelf.

Segment performance

The following describes the performance of Woodside's business segments for the years ending 31 December 2021, 2020 and 2019.

Woodside has identified its operating segments based on the internal reports that are reviewed and used by the executive management team in assessing performance and in determining the allocation of resources.

Management monitors the performance of the operating results of the segments separately for the purpose of making decisions about resource allocation and performance assessment. The performance of operating segments is evaluated based on profit before tax and net finance costs and is measured in accordance with Woodside's accounting policies.

Financing requirements, including cash and debt balances, finance income, finance costs and taxes for Woodside and its subsidiaries are managed at a group level.

Operating segments outlined below are identified by management based on the nature and geographical location of the business or venture.

Producing

North West Shelf - Exploration, evaluation, development, production and sale of liquefied natural gas, pipeline natural gas, condensate and liquefied petroleum gas in assigned permit areas.

Pluto LNG - Exploration, evaluation, development, production and sale of liquefied natural gas, pipeline natural gas and condensate in assigned permit areas.

Australia Oil - Exploration, evaluation, development, production and sale of crude oil in assigned permit areas (North West Shelf, Greater Enfield and Vincent).

Table of Contents

Wheatstone - Exploration, evaluation, development, production and sale of liquefied natural gas, pipeline natural gas and condensate in assigned permit areas.

Development

Scarborough - Exploration, evaluation and development of liquefied natural gas, pipeline natural gas and condensate in assigned permit areas.

Sangomar - Exploration, evaluation and development of crude oil in assigned permit areas.

Other Development - This segment comprises exploration, evaluation and development of liquefied natural gas, pipeline natural gas and condensate in the Browse, Kitimat and Sunrise projects.

Other

Other Segments - This segment comprises trading and shipping activities and activities undertaken in other international locations.

Unallocated items - Unallocated items comprise primarily corporate non-segmental items of revenue and expenses and associated assets and liabilities not allocated to operating segments as they are not considered part of the core operations of any segment.

| | Units | 2021 | 2020 | 2019 |
|--|-------|-------|----------|--------|

North West Shelf

North West Shelf delivered full-year production of 24.7 MMboe for the year ended 31 December 2021 which represented a 6.1 MMboe decrease from production of 30.8 MMboe in the year ended 31 December 2020 driven by lower production volumes as a result of the expiration of domestic gas contract obligations in June 2020, cessation of the Angel well in October 2020 and a turnaround in June 2021. The decline in production was partially offset by higher realized prices and an increase in operating revenue of \$554 million, or 57%, to \$1,530 million in the year ended 31 December 2021 from \$976 million in the year ended 31 December 2020. Gross profit increased \$497 million, or 106%, to \$964 million for the year ended 31 December 2021, from \$467 million for the year ended 31 December 2020. This was primarily driven by the increase in operating revenue and lower oil and gas properties depreciation and amortization (decrease of \$49 million) partially offset by higher costs of production (increase of \$118 million). Profit / (loss) before tax and net finance costs increased by \$1,357 million, from \$1 million for the year ended 31 December 2020 to \$1,358 million for the year ended 31 December 2021. This change was primarily driven by an increase in gross profit, impairment reversals of \$376 million resulting from updated cost and production profiles and short-term pricing assumptions, and the impairment losses of \$454 million recognized at North West Shelf's oil and gas properties in 2020.

North West Shelf delivered full-year production of 30.8 MMboe for the year ended 31 December 2020 which represented a 4% decrease from production of 32.0 MMboe in the year ended 31 December 2019 driven by a decline in reservoir performance and planned major maintenance at KGP LNG Train 3, partially offset by improved LNG plant reliability of 98.0% compared to 97.0% in 2019. Lower production coupled with a broad-based decline in global energy prices due to the impacts of the COVID-19 pandemic resulted in lower realized prices and a reduction in operating revenue of \$510 million, or 34%, to \$976 million in the year ended 31 December 2020 from \$1,486 million in the year ended 31 December 2019. Gross profit decreased \$342 million, or 42%, to \$467 million for the year ended 31 December 2020, from \$809 million for the year ended 31 December 2019. This was primarily driven by the decrease in operating revenue and partially offset by improved costs of production (decrease of \$121 million), lower oil and gas properties depreciation and amortization (decrease of \$21 million) and lower other costs of sales (decrease of \$26 million). Profit / (loss) before tax and net finance costs decreased by \$805 million, from \$806 million for the year ended 31 December 2019 to \$1 million for the year ended 31 December 2020, a decrease of nearly 100%. This was primarily driven by a decrease in gross profit in addition to impairment losses of \$454 million recognized at North West Shelf's oil and gas properties.

Pluto

Pluto delivered full-year production of 44.3 MMboe for the year ended 31 December 2021, which remained relatively stable compared to production of 44.6 MMboe in the year ended 31 December 2020. Higher realized prices resulted in an increase in revenue of \$1,207 million to \$2,794 million in the year ended 31 December 2021, a 76% increase from \$1,587 million in the year ended 31 December 2020. Gross profit increased \$1,086 million, or 280%, to \$1,474 million for the year ended 31 December 2021, from \$388 million for the year ended

Table of Contents

31 December 2020. This was primarily driven by the increase in operating revenue, partially offset by higher other costs of sales (increase of \$117 million). Profit / (loss) before tax and net finance costs increased by \$3,122 million, from \$(925) million for the year ended 31 December 2020 to \$2,197 million for the year ended 31 December 2021, an increase of 338%. This change was primarily driven by an increase in gross profit, impairment reversals of \$682 million resulting from additional value generated by the Scarborough-Pluto Cash Generating Unit following the final investment decision for Scarborough and Pluto Train 2 in November 2021, and impairment losses of \$1,291 million recognized in 2020 at Pluto's oil and gas properties.

Pluto delivered record full-year production of 44.6 MMboe for the year ended 31 December 2020 which represented a 20% increase from production of 37.1 MMboe in the year ended 31 December 2019 during which production was impacted by Pluto's first major turnaround. Higher production was offset by a broad-based decline in global energy prices due to the impacts of the COVID-19 pandemic which resulted in lower realized prices and a reduction in revenue of \$477 million to \$1,587 million in the year ended 31 December 2020, a 23% decrease from \$2,064 million in the year ended 31 December 2019. Gross profit decreased \$439 million, or 53%, to \$388 million for the year ended 31 December 2020, from \$827 million for the year ended 31 December 2019. This was primarily driven by the decrease in operating revenue and higher oil and gas properties depreciation and amortization (increase of \$67 million) partially offset by improved costs of production (decrease of \$17 million) and lower other costs of sales (decrease of \$88 million). Profit / (loss) before tax and net finance costs decreased by \$1,722 million, from \$797 million for the year ended 31 December 2019 to \$(925) million for the year ended 31 December 2020, a decrease of 216%. This was primarily driven by a decrease in gross profit in addition to impairment losses of \$1,291 million recognized at Pluto's oil and gas properties in 2020.

Australia Oil

Australia Oil delivered full-year production of 8.6 MMboe for the year ended 31 December 2021, which represented a 11% decrease from production of 9.7 MMboe in the year ended 31 December 2020. This decrease reflected lower production at Ngujima-Yin FPSO due to reduced facility reliability and the impact of weather events, partially offset by an increase in production volumes at Okha FPSO. Higher operating revenues of \$673 million, an increase of \$241 million, or 56%, from \$432 million in the year ended 31 December 2020 were primarily driven by higher realized prices. Gross profit increased \$326 million, or 2,173%, to \$341 million for the year ended 31 December 2021, from \$15 million for the year ended 31 December 2020. This was driven by lower costs of production (decrease of \$22 million) and lower depreciation and amortization (decrease of \$63 million) for the year ended 31 December 2021. Profit / (loss) before tax and net finance costs increased by \$979 million, from \$(735) million for the year ended 31 December 2020 to \$244 million for the year ended 31 December 2021. This change was primarily driven by an increase in gross profit in 2021 and the impairment losses of \$674 million recognized at Ngujima-Yin and Okha's oil and gas properties in 2020.

Australia Oil delivered full-year production of 9.7 MMboe for the year ended 31 December 2020 which represented a 73% increase from production of 5.6 MMboe in the year ended 31 December 2019. This increase reflected a full year of production from the Ngujima-Yin FPSO, after the successful completion of the Greater Enfield Project in 2019, partially offset by lower production at the Okha FPSO due to maintenance activities and natural field decline. Notwithstanding the decline in global oil prices in 2020, the increase in production led to higher operating revenues of \$432 million, an increase of \$72 million, or 20%, from \$360 million in the year ended 31 December 2019. Woodside temporarily shut-in production from the Cimatti field in 2020, reducing the sulphur content of crude produced at the Ngujima-Yin FPSO. This action delivered increased revenue for the year ended 31 December 2020 by enabling Woodside to capitalize on strong market demand for low sulphur fuel oil. Gross profit decreased \$113 million, or 87%, to \$15 million for the year ended 31 December 2020, from \$118 million for the year ended 31 December 2019. This was driven by higher costs of production (increase of \$62 million) in 2020, as re-drilling of a Laverda well to support the Ngujima-Yin FPSO and production optimization and subsea maintenance activities at the Okha FPSO were completed in the third quarter of 2020. In addition, the completion of the Greater Enfield Project in 2019 led to higher oil and gas properties depreciation and amortization (increase of \$113 million) as a result of a full year of depreciation for the year ended

Table of Contents

31 December 2020. Profit / (loss) before tax and net finance costs decreased by \$770 million, from \$35 million for the year ended 31 December 2019 to \$(735) million for the year ended 31 December 2020, a decrease of 2,200%. This was primarily driven by a decrease in gross profit in addition to impairment losses of \$674 million recognized at Ngujima-Yin and Okha' s oil and gas properties in 2020.

Wheatstone

Wheatstone delivered full year production of 13.5 MMboe for the year ended 31 December 2021 which represented a 11% decrease from production of 15.2 MMboe in the year ended 31 December 2020 driven by reliability performance and Train 1 turnaround. Lower production was offset by a broad-based rise in global energy prices which resulted in higher realized prices and an increase in revenue of \$286 million to \$772 million in the year ended 31 December 2021, a 59% increase from \$486 million in the year ended 31 December 2020. Gross profit increased \$334 million, or 458%, to \$407 million for the year ended 31 December 2021, from \$73 million for the year ended 31 December 2020. This was primarily driven by the increase in operating revenue and lower costs of production (decrease of \$10 million), lower depreciation and amortization (decrease of \$28 million) and lower other costs of sales (decrease of \$10 million). Profit / (loss) before tax and net finance costs increased by \$1,679 million, from \$(1,323) million for the year ended 31 December 2020 to \$356 million for the year ended 31 December 2021. This change was primarily driven by an increase in gross profit and a decrease in impairment losses recognized on oil and gas properties of \$1,401 million for the year ended 31 December 2020.

Wheatstone delivered full year production of 15.2 MMboe for the year ended 31 December 2020, which represented a 6% increase from production of 14.4 MMboe in the year ended 31 December 2019, driven by strong reliability performance and production optimization. Higher production was offset by a broad-based decline in global energy prices due to the impacts of the COVID-19 pandemic which resulted in lower realized prices and a reduction in revenue of \$223 million to \$486 million in the year ended 31 December 2020, a 31% decrease from \$709 million in the year ended 31 December 2019. Gross profit decreased \$153 million, or 68%, to \$73 million for the year ended 31 December 2020, from \$226 million for the year ended 31 December 2019. This was primarily driven by the decrease in operating revenue and higher costs of production (increase of \$16 million), as Wheatstone continued its production ramp-up, partially offset by lower oil and gas properties depreciation and amortization (decrease of \$44 million) and lower other costs of sales (decrease of \$42 million). Profit / (loss) before tax and net finance costs decreased by \$1,653 million, from \$330 million for the year ended 31 December 2019 to \$(1,323) million for the year ended 31 December 2020, a decrease of 501%. This was primarily driven by impairment losses of \$1,401 million recognized at Wheatstone' s oil and gas properties in 2020, in addition to a decrease in gross profit.

Scarborough

In 2021, Woodside identified Scarborough as a separate operating segment within development due to the progress and materiality of the project.

Profit / (loss) before tax and net finance costs decreased by \$6 million from \$(6) million for the year ended 31 December 2020 to \$nil for the year ended 31 December 2021. This was primarily driven by \$3 million of redundancy costs and \$3 million of exchange losses recognized in 2020.

Sangomar

In 2021, Woodside identified Sangomar as a separate operating segment within development due to the progress and materiality of the project.

Profit / (loss) before tax and net finance costs increased by \$323 million from \$(321) million for the year ended 31 December 2020 to \$2 million for the year ended 31 December 2021. This was primarily driven by \$321 million of impairment losses recognized in 2020.

Table of Contents

Profit / (loss) before tax and net finance costs increased by \$318 million from \$(3) million for the year ended 31 December 2020 to \$(321) million for the year ended 31 December 2021. This was primarily driven by \$321 million of impairment losses recognized on Sangomar' s oil and gas properties.

Other Development

Woodside' s Other Development segment relates to non-producing exploration, evaluation and development activities which did not generate any operating revenue or gross profit for the year ended 31 December 2021.

Profit / (loss) before tax and net finance costs improved by \$929 million from \$(953) million for the year ended 31 December 2020 to \$(24) million for the year ended 31 December 2021. This was primarily driven by \$977 million of impairment losses recognized for Kitimat and Sunrise in 2020. Additionally, \$33 million was incurred in the Other Developments segment for various costs relating to Woodside' s exit from the Kitimat LNG development.

Profit / (loss) before tax and net finance costs decreased by \$228 million from \$(725) million for the year ended 31 December 2019 to \$(953) million for the year ended 31 December 2020. This was primarily driven by \$977 million of impairment losses in 2020 recognized on Kitimat LNG' s exploration and evaluation assets (impairment loss of \$809 million) and Sunrise' s exploration and evaluation assets (impairment loss of \$168 million).

Other

Woodside' s Other segment is comprised primarily of trading and shipping activities undertaken in various international locations. These activities generated operating revenues of \$1,193 million for the year ended 31 December 2021, which represented an increase of \$1,074 million, or 903%, from \$119 million for the year ended 31 December 2020 which reflected greater market opportunities to trade LNG externally and sub-charter Woodside vessels in 2021. Gross loss decreased \$259 million, or 77%, to \$(78) million for the year ended 31 December 2021, from \$(337) million for the year ended 31 December 2020 which was primarily driven by higher third party trades, increase in Corpus Christi cargoes lifted, positive movement in the onerous contract provision and an increase in external shipping sub-chartering, partially offset by higher trading and shipping costs (increase of \$1,301 million). Loss before tax and net finance costs decreased by \$157 million, from \$(598) million for the year ended 31 December 2020 to \$(441) million for the year ended 31 December 2021. This was primarily driven by a decrease in gross loss offset by capitalized costs written off due to Woodside' s decision to withdraw from its interest in Myanmar and the Myanmar unsuccessful drilling campaign in the first half of 2021.

Woodside' s Other segment generated operating revenues of \$119 million for the year ended 31 December 2020, which represented a decline of \$133 million, or 53%, from \$252 million for the year ended 31 December 2019 which reflected fewer market opportunities to trade LNG externally and sub-charter Woodside vessels in 2020. Gross profit decreased \$495 million, or 313%, to \$(337) million for the year ended 31 December 2020, from \$158 million for the year ended 31 December 2019 which was primarily driven by the recognition of \$347 million of onerous contract provisions in relation to the Corpus Christi LNG sale and purchase agreement and higher trading costs (increase of \$24 million). Profit / (loss) before tax and net finance costs decreased by \$582 million, from \$(16) million for the year ended 31 December 2019 to \$(598) million for the year ended 31 December 2020. This was primarily driven by a decrease in gross profit in addition to impairment losses of \$151 million recognized at two exploration retention leases (WA-93-R and WA94-R) in 2020.

Unallocated Items

Unallocated items are comprised primarily of corporate non-segmental items not allocated to operating segments. Gross profit of \$9 million for the year ended 31 December 2021 is comparable to \$9 million for the

Table of Contents

year ended 31 December 2020. Loss before tax and net finance costs decreased by \$112 million, from \$(311) million for the year ended 31 December 2020 to \$(199) million for the year ended 31 December 2021 which was due to lower general, administrative and other costs, and a fair value gain on a repurchase agreement.

Gross profit of \$9 million for the year ended 31 December 2020, represented an increase of \$1 million, or 13%, from \$8 million for the year ended 31 December 2019. Profit / (loss) before tax and net finance costs decreased by \$178 million, from \$(133) million for the year ended 31 December 2019 to \$(311) million for the year ended 31 December 2020, which was due to higher general, administrative and other costs primarily due to a one-off reconciliation of joint operating costs relating to prior years (increase of \$41 million), redundancy costs (increase of \$20 million), additional costs incurred as a result of COVID-19 (increase of \$17 million), higher foreign exchange losses primarily on Australian dollar denominated lease liabilities (increase of \$48 million) and losses on 2020 commodity hedges (increase of \$47 million).

Capital resources and liquidity

Woodside's primary sources of liquidity are (i) cash and cash equivalents, (ii) net cash provided by operating activities, (iii) unused borrowing capacity under its bilateral facilities and syndicated facility, (iv) issuances of debt or equity securities, and (v) other sources, such as sales of non-strategic assets. Details of Woodside's credit facilities, including total commitments, maturity and interest, and amount outstanding at 31 December 2021, can be found in the section entitled "Description of Certain Indebtedness" and Note C.2 to the audited consolidated financial statements of Woodside as at 31 December 2021 and 2020 and for the years ended 31 December 2021, 2020 and 2019, included elsewhere in this prospectus.

Woodside's principal ongoing uses of cash are to meet working capital requirements to fund debt obligations and to finance Woodside's capital expenditures and acquisitions.

Cash flow analysis

The following section describes movements in Woodside's cash flows for the years ending 31 December 2021, 2020 and 2019.

| | <u>Units</u> | <u>2021</u> | <u>2020</u> | <u>2019</u> |
|--|--------------|--------------|--------------|--------------|
| Net cash from operating activities | \$m | 3,792 | 1,849 | 3,305 |
| Net cash used in investing activities | \$m | (2,941) | (2,112) | (1,238) |
| Net cash used in financing activities | \$m | (1,424) | (203) | 317 |
| Net (decrease)/increase in cash | \$m | (573) | (466) | 2,384 |

Net cash from operating activities

Net cash from operating activities increased \$1,943 million, or 105%, to \$3,792 million for the year ended 31 December 2021, from \$1,849 million for the year ended 31 December 2020, driven by higher cash generated from operations (increase of \$1,875 million), lower borrowing costs relating to operating activities (decrease of \$89 million), lower income taxes paid (decrease of \$60 million) partially offset by lower interest income received (decrease of \$53 million), higher purchases of shares and payments relating to employee share plans (increase of \$15 million), and higher payments for restoration relating to Enfield and Echo Yodel (increase of \$15 million).

Net cash from operating activities decreased \$1,456 million, or 44%, to \$1,849 million for the year ended 31 December 2020, from \$3,305 million for the year ended 31 December 2019, driven by lower cash generated from operations (decrease of \$1,416 million), higher borrowing costs relating to operating activities (increase of \$23 million), lower interest income received (decrease of \$21 million), higher income taxes paid (increase of \$18 million) and higher payments for restoration (increase of \$11 million) partially offset by lower purchases of shares and payments relating to employee share plans (decrease of \$34 million).

Table of Contents

Net cash used in investing activities

Net cash used in investing activities increased \$829 million, or 39%, to \$2,941 million for the year ended 31 December 2021, from \$2,112 million for the year ended 31 December 2020, driven by higher payments for capital and exploration expenditure (increase of \$988 million) for Scarborough (which primarily relate to the contingent payment paid on FID) and Sangomar, and higher advances to Petrosen under the loan facility.

Net cash used in investing activities increased \$874 million, or 71%, to \$2,112 million for the year ended 31 December 2020, from \$1,238 million for the year ended 31 December 2019, driven by payments associated with the completion of the acquisition of Cairn's interest in the RSSD Joint Venture (payment of \$527 million) and higher payments for capital and exploration expenditure (increase of \$205 million) which primarily relate to the Sangomar development, Julimar-Brunello Phase 2 and the Pyxis hub.

Net cash used in financing activities

Net cash used in financing activities increased \$1,221 million, or 601%, to \$(1,424) million for the year ended 31 December 2021, from \$(203) million for the year ended 31 December 2020, primarily due to higher repayment of borrowings (increase of \$701 million), lower proceeds from borrowings raised (decrease of \$600 million), and higher lease repayments due to new drilling leases relating to Sangomar (increase of \$84 million), partially offset by lower net dividends paid (decrease of \$165 million).

Net cash used in financing activities decreased \$520 million, or 164%, to \$(203) million for the year ended 31 December 2020, from \$317 million for the year ended 31 December 2019, primarily due to lower proceeds from borrowings (decrease of \$1,100 million), higher lease repayments (increase of \$30 million) and higher contributions to non-controlling interests (increase of \$34 million) partially offset by lower dividends paid (decrease of \$608 million) and higher net proceeds from share issuance (increase of \$23 million).

Capital expenditures

Woodside's capital expenditures vary from year to year depending on the projects that it is undertaking, their stage of development and Woodside's share of capital expenditures in these projects. In addition, Woodside's exploration expenditures vary from year to year depending on its strategic priorities and the exploration projects which it undertakes.

Woodside's 2022 investment expenditure guidance is \$3,800-\$4,200 million. This excludes the benefit of Global Infrastructure Partners' additional contribution of approximately \$822 million for Pluto Train 2 and excludes any impact from the proposed merger with BHP Petroleum. The key development projects contributing to this expenditure are Scarborough, Pluto Train 2 and Sangomar. The other key expenditure is the base business which includes Pyxis, Pluto LNG, NWS Project, Wheatstone, Australia Oil and Corporate.

Refer to Note B.1 to the audited consolidated financial statements of Woodside as at 31 December 2021 and 2020 and for the years ended 31 December 2021, 2020 and 2019, included elsewhere in this prospectus, for a breakdown of historic capital expenditure. For an overview of principal capital expenditures and divestitures currently in progress, see the section entitled "*Business and Certain Information About Woodside-Projects and Growth Options*." Funding for future capital commitments will be sourced from cash flow from operating activities, existing cash liquidity and external financing.

Off-balance sheet arrangements

Woodside has no off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on the Woodside's financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Table of Contents

Dividends

In 2019, 2020 and 2021, Woodside paid and proposed dividends in the amounts and on the dates set out below:

| | 2021 | 2020 | 2019 |
|--|-------------|-------------|--------------|
| | \$m | \$m | \$m |
| (a) Dividends paid during the financial year | | | |
| Prior year final dividend \$0.12 per share, paid on 24 March 2021 (2020: \$0.55, paid on 20 March 2020; 2019: \$0.91, paid on 20 March 2019) | 115 | 518 | 852 |
| Current year interim dividend \$0.30 per share, paid on 24 September 2021 (\$0.26, paid on 18 September 2020; 2019: \$0.36, paid on 20 September 2019) | 289 | 248 | 337 |
| | 404 | 766 | 1,189 |
| (b) Dividend declared subsequent to the reporting period (not recorded as a liability) | | | |
| Final dividend \$1.05 per share (2020: \$0.12; 2019: \$0.55) | 1,018 | 115 | 518 |
| (c) Other information | | | |
| Current year dividends per share (US cents) | 135 | 38 | 91 |

The final dividend of \$1.05 per share (2020: \$0.12 per share; 2019: \$0.55 per share) is based on the underlying net profit after tax for the reporting year, representing a payout ratio of approximately 80% of underlying net profit after tax. Underlying net profit after tax is the net profit after tax (profit/loss) attributable to equity holders of the parent) adjusted for significant and other non-recurring items.

The Woodside Board has the responsibility for approving dividends. Woodside's dividend policy aims to pay a minimum of 50% of net profit after tax, excluding non-recurring items, in dividends. The net profit after tax basis helps preserve cash and protect the balance sheet in periods of low commodity pricing. The Woodside Board's dividend payout ratio target is between 50% to 80% of net profit after tax, excluding non-recurring items, subject to market conditions and investment requirements. Woodside maintains the flexibility to consider opportunities to provide additional returns to shareholders through special dividends and share buy-backs in periods of excess cash generation.

Generally, Woodside pays dividends to its shareholders semi-annually, once in March or April (final dividend) and again in September or October (interim dividend) of each year. Woodside maintains a dividend reinvestment plan that, if utilized by the Woodside Board, provides Woodside Shareholders with the option of reinvesting all or part of their dividends in additional shares rather than taking cash dividends.

The dividend reinvestment plan remains active, allowing eligible Woodside Shareholders to reinvest their dividends directly into Woodside Shares at a 1.5% discount.

Liquidity

As of 31 December 2021, Woodside ended the period with liquidity of \$6,125 million which consisted of \$3,025 million cash and \$3,100 million in committed undrawn loan facilities.

Non-GAAP Financial Measures

Certain parts of this prospectus contain financial measures that have not been prepared in accordance with IFRS and are not recognized measures of financial performance or liquidity under IFRS. In addition to the financial information contained in this prospectus presented in accordance with IFRS, certain "non-GAAP financial measures" (as defined in Item 10(e) of Regulation S-K under the Securities Act) have been included in this prospectus.

Table of Contents

Woodside believes that the “non-GAAP financial measures” it presents provide a useful means through which to examine the underlying performance of its business. These measures, however, should not be considered to be an indication of, or alternative to, corresponding measures of gross profit, net profit, cash flows from operating activities, interest bearing liabilities, or other figures determined in accordance with IFRS. In addition, such measures may not be comparable to similar measures presented by other companies. These measures include:

EBIT, which is calculated as profit before income tax, Petroleum Resource Rent Tax (“PRRT”) and net finance costs;

Underlying EBITDA, which is calculated as profit before income tax, PRRT, net finance costs, depreciation and amortization and impairment;

Gearing, which is calculated as Net debt (as defined below) divided by the sum of Net debt and equity attributable to equity holders of the relevant entity, expressed as a percentage;

Net debt, which is total debt and lease liabilities less cash and cash equivalents;

Adjusted Operating Cash Flow, which is calculated as net cash from operating activities excluding any financing costs (interest received, dividends received and borrowing costs relating to operating activities), plus payments for restoration and less payments for exploration expenditure; and

Unlevered Free Cash Flow, which is calculated as Adjusted Operating Cash Flow minus payments for restoration and minus payments for capital expenditures.

Undue reliance should not be placed on the non-GAAP financial measures contained in this prospectus, and the non-GAAP financial measures should not be considered in isolation or as a substitute for financial measures computed in accordance with IFRS. Although certain of these data have been extracted or derived from Woodside’s consolidated or combined financial statements (as applicable), these data have not been audited or reviewed by Woodside’s independent auditors. You are urged to read carefully this “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of Woodside*” and Woodside’s consolidated financial statements and related notes thereto.

A reconciliation of EBIT, Underlying EBITDA, Net debt, Gearing, Adjusted Operating Cash Flow and Unlevered Free Cash Flow to Woodside’s financial statements are presented below:

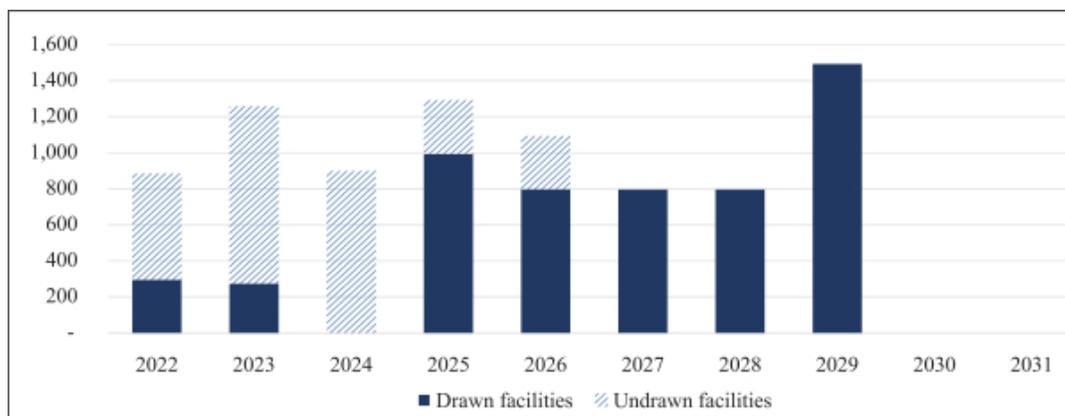

| | 2021 | 2020 | 2019 |
|--|---------|---------|---------|
| EBIT and Underlying EBITDA Reconciliation | | | |
| Profit/(loss) after tax | 2,036 | (3,975) | 382 |
| Add back: Income tax expense/(benefit) | 957 | (1,026) | 511 |
| Add back: Petroleum resource rent tax (PRRT) expense/(benefit) | 297 | (439) | (31) |
| Profit/(loss) before tax | 3,290 | (5,440) | 862 |
| Add back: Finance costs | 230 | 327 | 320 |
| Less: Finance income | (27) | (58) | (91) |
| EBIT | 3,493 | (5,171) | 1,091 |
| Add back: Depreciation & amortization | 1,690 | 1,824 | 1,703 |
| Add back: Impairment | (1,048) | 5,269 | 737 |
| Underlying EBITDA | 4,135 | 1,922 | 3,531 |
| Net Debt | | | |
| Current Interest Bearing Liabilities | 277 | 776 | 77 |
| Current Lease Liabilities | 191 | 94 | 69 |
| Non-Current Interest Bearing Liabilities | 5,153 | 5,438 | 5,602 |
| Non-Current Lease Liabilities | 1,176 | 1,184 | 1,101 |
| Less: Cash and cash equivalents | (3,025) | (3,604) | (4,058) |

Table of Contents

| | <u>2021</u> | <u>2020</u> | <u>2019</u> |
|--|---------------|---------------|---------------|
| Net Debt | 3,772 | 3,888 | 2,791 |

| Less: Payments for restoration | (38) | (23) | (12) |
| Less: Payments for capital expenditure | (2,123) | (1,108) | (752) |
| Unlevered Free Cash Flow | 1,460 | 543 | 2,159 |

Maturity profile of interest-bearing liabilities

Woodside's debt maturity profile as of 31 December 2021 is illustrated below. The debt maturities below are based on contractual agreements as of 31 December 2021. All undrawn facilities are committed facilities. See the section entitled "Description of Certain Indebtedness" for more information regarding Woodside's debt facilities.

Critical accounting estimates and policies

Woodside's discussion and analysis of its financial condition and results of operations are based upon the audited consolidated financial statements of Woodside included elsewhere in this prospectus, which have been prepared in accordance with IFRS. The preparation of these financial statements requires management to make informed estimates and judgments that affect the reported amounts of assets and liabilities as of the date of the financial statements and affect the reported amounts of revenues and expenses during the reporting period. Changes in facts and circumstances may result in revised estimates, and actual results may differ from these estimates.

Table of Contents

The critical accounting policies presented below are of particular importance to the portrayal of Woodside' s financial position and results of operations and require the application of judgment by Woodside' s management. These critical accounting policies are described in more detail in the notes to the audited consolidated financial statements of Woodside.

Revenue from contracts to customers

Judgement is required to determine the point at which the customer obtains control of hydrocarbons and to determine if it is probable that a significant reversal will occur in relation to revenue recognized during open pricing periods in LNG contracts. Progress of performance obligations for LNG processing services revenue recognized over time is estimated using the output method which most accurately measures the progress towards satisfaction of the performance obligation of the services provided.

Deferred tax asset recognition

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realized. The tax rates and laws used to determine the amount are based on those that have been enacted or substantially enacted by the end of the reporting period. Income taxes relating to items recognized directly in equity are recognized in equity.

Deferred tax assets relating to Australian tax losses have been recognized for carry forward unused tax losses and credits. Woodside has determined that it is probable that sufficient future taxable income will be available to utilize those losses and credits.

Deferred tax assets relating to unused foreign tax losses have not been recognized on the basis that it is not probable that the assets will be utilized based on current planned activities in those regions.

The recoverability of PRRT deferred tax assets is primarily assessed with regard to future oil price assumptions. The PRRT deferred tax asset is recognized on the basis that it is probable that future taxable profits will be available to utilize the deductible expenditure.

Area of interest

Expenditure on exploration and evaluation is accounted for in accordance with the area of interest method. Woodside' s application of the accounting policy is closely aligned to the U.S. GAAP-based successful efforts method. Typically, an area of interest (AOI) is defined by Woodside as an individual geographical area whereby the presence of hydrocarbons is considered favorable or proved to exist. Woodside applies judgement to recognize and maintain an Area of interest.

Reserves

The estimation of reserves requires significant management judgement and interpretation of complex geological and geophysical models in order to make an assessment of the size, shape, depth and quality of reservoirs, and their anticipated recoveries.

Estimates of oil and natural gas reserves are used to calculate depreciation and amortization charges for the Woodside' s oil and gas properties. Judgement is used in determining the reserve base applied to each asset. Typically, late life oil assets use proved reserves.

Estimates are reviewed at least annually or when there are changes in the economic circumstances impacting specific assets or asset groups. These changes may impact depreciation, asset carrying values, restoration provisions and deferred tax balances. If reserves estimates are revised downwards, earnings could be affected by higher depreciation expense or an immediate write-down of the asset' s carrying value.

Table of Contents

Impairments

In determining the recoverable amounts of exploration and evaluation assets, the market comparison approach using adjusted market multiples (fair value hierarchy Level 3) has been utilized to determine the fair value less costs to dispose.

In determining the recoverable amount of cash generating units, estimates are made regarding the present value of future cash flows when determining the value in use. These estimates require significant management judgement and are subject to risk and uncertainty, and hence changes in economic conditions can also affect the assumptions used and the rates used to discount future cash flow estimates.

Estimates are made in the following areas:

Resource estimates;

Inflation rate;

Foreign exchange rates;

Discount rates;

Climate risk impacts, including a long-term Australian carbon price applicable to Australian emissions that exceed facility-specific baselines in accordance with Australian regulations;

LNG price; and

Brent oil prices.

Restoration

Woodside estimates the future remediation and removal costs of offshore oil and gas platforms, production facilities, wells and pipelines at different stages of the development and construction of assets or facilities. In many instances, removal of assets occurs many years into the future.

The restoration obligation requires management to make assumptions regarding removal date, environmental legislation and regulations, the extent of restoration activities required, the engineering methodology for estimating cost, future removal technologies in determining the removal cost, and liability-specific discount rates to determine the present value of these cash flows.

Onerous Contracts

The onerous contract provision assessment requires management to make certain estimates regarding the unavoidable costs and the expected economic benefits from the contract. These estimates require significant management judgement and are subject to risk and uncertainty, and hence changes in economic conditions can affect the assumptions. Estimates used to determine the present value of the provisions include discount rates and LNG pricing which is based on oil and gas price markers.

Leases

Judgement is required to:

assess whether a contract is or contains a lease at inception;

assessing the term of the lease and whether to include optional extension and termination periods;

determine Woodside' s rights and obligations for lease contracts within joint operations, to assess; whether lease liabilities are recognized gross (100%) or in proportion to Woodside' s participating interest in the joint operation; and

determine the discount rate.

Table of Contents

Accounting for interests in other entities

Judgement is required to determine the relevant activities of a project and in assessing the level of control obtained in a transaction to acquire an interest in another entity.

Quantitative and qualitative disclosures about market risk

In the normal course of business, Woodside is exposed to commodity price, foreign currency exchange rate and interest rate risks that could impact Woodside's financial position and results of operations. Woodside's risk management strategy with respect to these market risks may include the use of derivative financial instruments. Woodside uses derivative contracts to manage commodity price volatility, foreign exchange rate volatility on capital expenditure plans and interest rate exposure on financing activities.

Actual gains and losses in the future may differ materially from the sensitivity analyses based on changes in the timing and amount of commodity price, foreign currency exchange rate and interest rate movements and Woodside's actual exposures and derivatives in place at the time of the change, as well as the effectiveness of the derivative to hedge the related exposure.

Commodity price risk management

Woodside's revenue is exposed to commodity price fluctuations through the sale of hydrocarbons. Commodity price risks are measured by monitoring and stress testing Woodside's forecasted financial position to sustained periods of low oil and gas prices. This analysis is regularly performed on Woodside's portfolio and, as required, for discrete projects and transactions. For 2022, the expected impact on Profit/(loss) after tax is \$18 million for a \$1 movement in the Brent oil price. See the sections entitled "*Risk Factors—The Merged Group will be exposed to risks resulting from fluctuations in LNG market conditions or the price of crude oil, which can be volatile. Any material or sustained decline in LNG or crude oil prices, or change in buyer preferences, could have a material adverse effect on the Merged Group's results*" and "*Risk Factors—The Merged Group may be exposed to commodity and currency hedging.*"

Foreign exchange rate risk management

Foreign exchange risk arises from future commitments, financial assets and financial liabilities that are not denominated in U.S. dollars. The majority of Woodside's revenue is denominated in U.S. dollars. Woodside is exposed to foreign currency risk arising from operating and capital expenditure incurred in currencies other than U.S. dollars, particularly Australian dollars.

Measuring the exposure to foreign exchange risk is achieved by regularly monitoring and performing sensitivity analysis on Woodside's financial position.

A reasonably possible change in the exchange rate of the U.S. dollar to the Australian dollar (+12%/-12%), with all other variables held constant, would not have a material impact on Woodside's equity or the profit or loss in the current period. Refer to the notes to the audited consolidated financial statements of Woodside included elsewhere in this prospectus, for details of the denominations of cash and cash equivalents, interest-bearing liabilities, receivables, payables and lease liabilities held at 31 December 2020 and 2021.

Interest rate risk

Interest rate risk is the risk that Woodside's financial position will fluctuate due to changes in market interest rates.

Woodside's exposure to the risk of changes in market interest rates relates primarily to financial instruments with floating interest rates including long-term debt obligations, cash and short-term deposits. Woodside

Table of Contents

manages its interest rate risk by maintaining an appropriate mix of fixed and floating rate debt. Woodside holds cross-currency interest rate swaps to hedge the foreign exchange risk, and interest rate risk of the CHF denominated medium term note. Woodside also holds interest rate swaps to hedge the interest rate risk associated with the \$600 million syndicated facility.

Woodside was exposed to various benchmark interest rates that were not designated in cash flow hedges, on cash and cash equivalents (2021: \$2,962 million; 2020: \$3,527 million), on interest-bearing liabilities (2021: \$367 million; 2020: \$450 million) (excluding transaction costs) and on cross-currency interest rate swaps (2021: \$9 million; 2020: \$15 million).

A reasonably possible change in the USD London Interbank Offered Rate (LIBOR) (2021: +1%/-1%; 2020: +0.5%/-0.5%), with all variables held constant, would not have a material impact on Woodside' s equity or the income statement in the current period.

Woodside is closely monitoring the market and the output from the various industry working groups managing the transition to new benchmark interest rates. Woodside is assessing the implications of the Interbank Offered Rates (IBOR) reform across Woodside and will manage and execute the transition from current benchmark rates to alternative benchmark rates.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF BHP PETROLEUM

The following Management's Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum is a review of the operations and current financial position for the half year ended 31 December 2021 and for the fiscal years ended 30 June 2021, 2020 and 2019 which is prepared in accordance with IFRS. The information in this report should be read in conjunction with the audited and unaudited combined carve-out financial statements of the BHP Petroleum assets (referred to in this Management's Discussion and Analysis as "BHP Petroleum") included elsewhere in this prospectus.

Basis of Presentation

In August 2021, BHP and Woodside entered into the Merger Commitment Deed to combine their respective oil and gas portfolios through an all-stock merger. On 22 November 2021, Woodside and BHP publicly announced that they had entered into the Share Sale Agreement under which, and subject to the terms and conditions therein, Woodside (or a nominee) will acquire all of the ordinary shares in BHP Petroleum International Pty Ltd, a wholly owned subsidiary of BHP that will hold the oil and gas assets of BHP in exchange for the issuance of New Woodside Shares and the Completion Payment (subject to adjustment).

The financial information of the BHP Petroleum assets included in this prospectus has been extracted on a "carve-out" basis from the accounting records of BHP for the purposes of presenting the combined financial position, combined results of operations and combined cash flows of BHP Petroleum. The BHP Petroleum assets are hereinafter referred to as "BHP Petroleum" and, unless context otherwise requires, its subsidiaries, after giving effect to the Restructure, exclude the following entities: BHP BK Limited, BHP Billiton Petroleum Great Britain Limited, BHP Mineral Resources Inc., BHP Copper Inc., Resolution Copper Mining LLC, BHP Resolution Holdings LLC and BHP Capital Inc. BHP Petroleum's unaudited combined financial statements as of and for the half year ended 31 December 2021, BHP Petroleum's audited combined financial statements as of 30 June 2021 and 2020 and for the fiscal years ended 30 June 2021 and 2020 and BHP Petroleum's unaudited combined financial statements as of and for the fiscal year ended 30 June 2019, included in this prospectus (collectively, the "BHP Petroleum Combined Financial Statements"), are presented in U.S. dollars. Consistent with applicable reporting rules, the BHP Petroleum non-statutory half-year financial information as of and for the half year ended 31 December 2021 and the BHP Petroleum financial information as of and for the fiscal year ended 30 June 2019 is unaudited.

In September 2018, BHP Petroleum completed the sale of 100% of the issued share capital of BHP Billiton Petroleum (Arkansas) Inc. and 100% of the membership interest in BHP Billiton Petroleum (Fayetteville) LLC, which held the Fayetteville assets. On 31 October 2018, BHP Petroleum completed the sale of 100% of the issued share capital of Petrohawk Energy Corporation, the subsidiary which held the Eagle Ford (being Black Hawk and Hawkville), Haynesville and Permian assets, for a gross cash consideration of \$10.3 billion (net of preliminary customary completion adjustments of \$0.2 billion). As a result, BHP Petroleum has reclassified the Onshore U.S. asset results to discontinued operations for the fiscal year ended 30 June 2019 and recorded a loss of \$335 million in discontinued operations.

BOE Disclosure

A BOE conversion ratio of 6 Mcf: 1 bbl is based on an energy conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Accordingly, disclosures in respect of a BOE should not be read in isolation.

Impact of Coronavirus Disease 2019 (COVID-19) Pandemic

BHP Petroleum continues to actively monitor the impact of the COVID-19 pandemic, including the impact on economic activity and financial reporting. During the period, BHP Petroleum continued to experience lower

Table of Contents

volumes at certain of BHP Petroleum's operated assets and to incur incremental directly attributable costs, including those associated with the increased provision of health and hygiene services, the impacts of maintaining social distancing requirements and demurrage and other standby charges related to delays caused by COVID-19.

As the pandemic continues to evolve, with the extent and timing of impacts varying across BHP Petroleum's key operating locations, it remains difficult to predict the full extent and duration of resulting operational and economic impacts for BHP Petroleum. This uncertainty impacts judgements made by BHP Petroleum, including those relating to assessing the collectability of receivables and determining the recoverable values of BHP Petroleum's non-current assets. Given the uncertainty associated with the pandemic, management assesses the appropriate financial treatment and disclosure of COVID-19 impacts each reporting period.

The ongoing uncertainty has also been considered in BHP Petroleum's assessment of the appropriateness of adopting the going concern basis of preparation of the BHP Petroleum Combined Financial Statements. In assessing the appropriateness of the going concern assumption over the going concern period, management has stress tested BHP Petroleum's most recent financial projections to incorporate a range of potential future outcomes by considering BHP Petroleum's principal risks. BHP Petroleum's financial forecasts, including downside commodity price and production scenarios, demonstrate that BHP Petroleum believes that it has sufficient financial resources to meet its obligations as they fall due throughout the going concern period. As such, the BHP Petroleum Combined Financial Statements continue to be prepared on the going concern basis.

Business Overview, Strategy and Key Performance Drivers

Business Environment

BHP Petroleum's assets comprise of conventional oil and gas assets located in the U.S. GOM, Australia, T&T, Algeria and Mexico, and appraisal and exploration options in T&T, central and western U.S. GOM, Eastern Canada, Barbados and Egypt. The crude oil and condensate, gas and NGLs produced by BHP Petroleum's assets are sold on the international spot market or domestic market.

BHP Petroleum's financial results are significantly influenced by fluctuations in commodity prices, and production volumes.

Half year ended 31 December 2021

The following table depicts BHP Petroleum's average realized prices and total petroleum production for the half years ended 31 December 2021 and 2020:

| | Unaudited 2021 \$M | Unaudited 2020 \$M |
|-------------------------------------|-----------------------------------|-----------------------------------|
| Half year ended 31 December | | |
| Total petroleum production (MMboe) | 53 | 50 |
| <i>Average realized prices</i> | | |
| Oil (crude and condensate) (\$/bbl) | 73.62 | 41.24 |
| Natural gas (\$/Mscf) | 5.78 | 3.83 |
| Liquefied natural gas (\$/Mscf) | 15.10 | 4.45 |

Trends in each of the major markets during the half years ended 31 December 2021 and 2020 are outlined below.

Crude oil

BHP Petroleum's average realized sales price for crude oil for the half year ended 31 December 2021 was \$73.62 per barrel (31 December 2020: \$41.24 per barrel). Crude oil prices traded in an approximate range of \$65-

Table of Contents

85/bbl (Brent) during the half year ended 31 December 2021. BHP Petroleum believes that further gains after the period end are possible given its constructive view of demand tailwinds. However, future developments in price are also expected to rely in large part on the rate at which currently curtailed supply returns, which is highly uncertain. Looking beyond this phase, BHP Petroleum's bottom-up analysis of demand, allied to systematic field decline rates, points to a long run structural supply-demand gap. Considerable investment in conventional oil is going to be required to fill that gap and maintain market balance. If that investment is not forthcoming in a timely way, the impact on oil prices is uncertain, including the possibility of material increases in oil prices.

Liquefied natural gas (LNG)

BHP Petroleum's average realized sales price for LNG for the half year ended 31 December 2021 was \$15.10 per Mcf (31 December 2020: \$4.45 per Mcf). The JKM price for LNG has been extremely elevated, with all-time high spot pricing achieved in the lead-up to the northern hemisphere winter. Longer term, assets advantaged by their proximity to existing infrastructure or customers, or both, in addition to competitive emissions intensities, are expected to be attractive.

Impact of changes to commodity prices

The prices BHP Petroleum obtains for its products are a key driver of value for BHP Petroleum. Fluctuations in these commodity prices affect BHP Petroleum's results, including cash flows and asset values. The estimated impact of changes in commodity prices for the half year ended 31 December 2021 on BHP Petroleum's key financial measures is set out below. The sensitivity calculations are performed independently and show the effect of changing one variable while holding all other variables constant.

| For the half year ended 31 December 2021 (Unaudited) | Impact on profit after taxation (\$M) | Impact on Underlying EBITDA (\$M)(1) |
|---|--|---|
| \$1/bbl on oil price | 14 | 21 |
| US¢0.10/Mcf on natural gas price | 8 | 12 |
| US¢1/Mcf on LNG price | 3 | 5 |
| \$1/bbl on NGL price | 3 | 4 |

- (1) Underlying EBITDA is a non-GAAP financial measure. See "Disclaimer and Important Notices–Non-GAAP Financial Measures" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum–Financial Results–Half year ended 31 December 2021 and 2020–Underlying EBITDA."

Production

Total petroleum production for the half year ended 31 December 2021 increased by 5% to 53 MMboe from the half year ended 31 December 2020.

Crude oil, condensate and NGL production increased by 13% to 25 MMboe, reflecting the additional 28% working interest acquired in Shenzi in November 2020, increased volumes from Ruby following first production in May 2021, and absence of impacts from weather events in the U.S. GOM in comparison to the prior period, partially offset by natural field decline across the portfolio.

Natural gas production decreased by 1% to 169 bcf, reflecting decreased production at North West Shelf and natural field decline across the portfolio, partially offset by increased volumes from Ruby and higher demand for gas at Bass Strait.

[Table of Contents](#)

BHP Petroleum costs

BHP Petroleum unit costs are calculated as a ratio of net costs of the assets to the equity share of production and BHP Petroleum believes they provide a consistent benchmark relative to volumes, that is in line with external market comparisons. This is a calculation based on costs directly associated with production (i.e. production cost base).

BHP Petroleum unit costs exclude:

freight, as BHP Petroleum believes doing so provides a similar basis of comparison to its peer group;

exploration, development and evaluation expense, as these costs do not represent its cost performance in relation to current production and BHP Petroleum believes it provides a similar basis of comparison to its peer group; and

other costs that do not represent underlying cost performance of BHP Petroleum.

BHP Petroleum unit costs for the half year ended 31 December 2021 increased by 2% to \$10.51 per barrel of oil equivalent from the half year ended 31 December 2020 due to increased price-linked costs and increased maintenance and integrity activities in T&T. The calculation of petroleum unit costs for the half year ended 31 December 2021 and 2020 is set out in the table below.

| | Unaudited 2021 \$M | Unaudited 2020 \$M |
|--|-----------------------------------|-----------------------------------|
| For the half year ended 31 December | | |
| Expenses excluding finance costs (1) | 1,761 | 1,816 |
| Less: | | |
| Depreciation and amortization expense | 1,047 | 890 |
| Net impairments | 210 | 61 |
| Exploration and evaluation and expenditure incurred and expensed in the period | 112 | 181 |
| Development and evaluation | 79 | 106 |
| Freight (post-port) | 46 | 22 |
| Other non-producing costs (2) | (290) | 41 |
| Net costs (3) | 557 | 515 |
| Production (MMboe, equity share) | 53 | 50 |
| Cost per BOE (US\$) | 10.51 | 10.30 |

- (1) Expenses excluding finance costs for the half year ended 31 December 2021 and 2020 has been derived from BHP Petroleum's unaudited Combined Financial Statements for the half year ended 31 December 2021.
- (2) Other non-producing costs includes over/underlifts, inventory movements, foreign exchange, third-party costs and the impact from revaluation of embedded derivatives in the T&T gas contract.
- (3) Net costs is a non-GAAP financial measure and is reconciled to the nearest respective IFRS measure, Expenses excluding finance costs. The measure and reconciliation above is for the half year ended 31 December 2021 and the comparative period and derived from BHP Petroleum's unaudited Combined Financial Statements.

Table of Contents

Fiscal years ended 30 June 2021, 2020 and 2019

The following table depicts BHP Petroleum's average realized prices and total petroleum production for the fiscal years ended 30 June 2021, 2020 and 2019:

| | 2021 | 2020 | Unaudited 2019 |
|--|------------|------------|-------------------|
| For the fiscal year ended 30 June | \$M | \$M | \$M |
| Total petroleum production (MMboe) | 103 | 109 | 121 |
| <i>Average realized prices</i> | | | |
| Oil (crude and condensate) (\$/bbl) | 52.56 | 49.53 | 66.59 |
| Natural gas (\$/Mscf) | 4.34 | 4.04 | 4.55 |
| Liquefied natural gas (\$/Mscf) | 5.63 | 7.26 | 9.43 |

Trends in each of the major markets for the fiscal years ended 30 June 2021, 2020 and 2019 are outlined below.

Crude oil

BHP Petroleum's average realized sales price for crude oil for FY2021 was \$52.56 per barrel (FY2020: \$49.53 per barrel). Brent crude oil prices steadily increased through FY2021, rising from around \$40/bbl at the beginning of FY2021 to around \$75/bbl at the close. A recovery in business activity and mobility as economies reduced COVID-19 controls has supported oil demand. Supply side curtailments from OPEC+ and capital restraint from U.S. operators supported oil inventories to rebalance globally.

BHP Petroleum's average realized sales price for crude oil for FY2020 was \$49.53 per barrel (FY2019: \$66.59 per barrel). Crude oil prices dropped significantly in the second half of FY2020 due to a brief OPEC+ price war in March 2020 and COVID-19, with Brent falling below \$20/bbl in April 2020 at the height of the global lockdowns and peak demand destruction. The prices partially recovered in FY2020 mainly due to swift output cuts from OPEC+ and a partial recovery in mobility. Very large storage builds flipped to draws in late May 2020, which allowed benchmark prices to move up to approximately \$40/bbl.

Liquefied natural gas (LNG)

BHP Petroleum's average realized sales price for LNG for FY2021 was \$5.63 per Mcf (FY2020: \$7.26 per Mcf). The JKM price for LNG performed strongly in FY2021, hitting an all-time high in January 2021 supported by cold weather, recovery in China, high European gas prices, unplanned outages and less incremental supply coming online.

BHP Petroleum's average realized sales price for LNG for FY2020 was \$7.26 per Mcf (FY2019: \$9.43 per Mcf). The JKM price for LNG performed poorly in FY2020, reflecting a deepening oversupply situation. JKM hit an all-time low in April 2020 as a slowdown in Asian demand growth due to warm weather and COVID-19 and large increments of new supply coming online weighed on the market.

[Table of Contents](#)

Impact of changes to commodity prices

The estimated impact of changes in commodity prices for the fiscal year ended 30 June 2021 on BHP Petroleum's key financial measures is set out below. The sensitivity calculations are performed independently and show the effect of changing one variable while holding all other variables constant.

| For the fiscal year ended 30 June 2021 | Impact on profit after taxation (\$M) | Impact on Underlying EBITDA (\$M)(1) |
|---|--|---|
| \$1/bbl on oil price | 24 | 35 |
| US\$0.10/Mcf on natural gas price | 15 | 23 |
| US\$1/Mcf on LNG price | 8 | 12 |
| \$1/bbl on NGL price | 4 | 7 |

- (1) Underlying EBITDA is a non-GAAP financial measure. See "Disclaimer and Important Notices–Non-GAAP Financial Measures" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum–Financial Results–Year ended 30 June 2021, 2020 and 2019–Underlying EBITDA."

Production

Total petroleum production for FY2021 decreased by 6% to 103 MMboe from FY2020.

Crude oil, condensate and NGL production decreased by 6% to 46 MMboe due to natural field decline across the portfolio, a highly active hurricane season in the U.S. GOM in the first half of the fiscal year and downtime at Atlantis, with tie-in activity in the first half of the year and unplanned downtime in the March 2021 quarter. These impacts were partially offset by the earlier than scheduled achievement of first production from the Atlantis Phase 3 project in July 2020 and the additional working interest acquired in Shenzi, completed on 6 November 2020.

Natural gas production decreased by 5% to 341 bcf, reflecting planned shutdowns at Angostura related to the Ruby tie-in, lower gas demand at Bass Strait and natural field decline across the portfolio. The decrease was partially offset by improved reliability at Bass Strait and higher domestic gas sales at Macedon.

Total production for FY2020 decreased by 10% to 109 MMboe from FY2019.

Crude oil, condensate and NGL production decreased by 11% to 49 MMboe due to the impacts of Tropical Storm Barry in the U.S. GOM, Tropical Cyclone Damien at BHP Petroleum's North West Shelf operations, maintenance at Atlantis and natural field decline across the portfolio. Weaker market conditions, including impacts from COVID-19, also contributed to lower volumes in the June 2020 quarter. This decline was partially offset by higher uptime at Pyrenees following the 70-day dry dock maintenance program during the prior year.

Natural gas production decreased by 9% to 360 bcf, reflecting a decrease in both production and tax barrels (in accordance with the terms of BHP Petroleum's Production Sharing Contract) due to weaker market conditions in T&T, impacts of maintenance and Tropical Cyclone Damien at North West Shelf and natural field decline across the portfolio.

Table of Contents

BHP Petroleum costs

BHP Petroleum unit costs for FY2021 increased by 11% to \$10.83 per barrel of oil equivalent from FY2020 due to lower volumes and unfavorable exchange rate movements, partially offset by a reduction in price-linked costs. The calculation of petroleum unit costs for the fiscal years ended 30 June 2021, 2020 and 2019 is set out in the table below. For further information regarding the calculation of BHP Petroleum unit costs, see “–Half year ended 31 December 2021 and 2020–BHP Petroleum costs” above.

| | 2021 | 2020 | Unaudited 2019 |
|--|--------------|--------------|-------------------|
| | \$M | \$M | \$M |
| For the fiscal year ended 30 June | | | |
| Expenses excluding finance costs (1) | 3,799 | 3,390 | 3,510 |
| Less: | | | |
| Depreciation and amortization expense | 1,840 | 1,457 | 1,560 |
| Net impairments | 127 | 11 | 21 |
| Exploration and evaluation and expenditure incurred and expensed in the period | 296 | 395 | 388 |
| Development and evaluation | 196 | 166 | 46 |
| Freight (post-port) | 81 | 83 | 118 |
| Other non-producing costs (2) | 144 | 216 | 102 |
| Net costs (3) | 1,115 | 1,062 | 1,275 |
| Production (MMboe, equity share) | 103 | 109 | 121 |
| Cost per Boe (US\$) | 10.83 | 9.74 | 10.54 |

- (1) Expenses excluding finance costs for FY2021 and FY2020 has been derived from BHP Petroleum' s audited Combined Financial Statements for the years ending 30 June 2021 and 2020. Expenses excluding finance costs for FY2019 has been derived from BHP Petroleum' s unaudited Combined Financial Statements for the year ending 30 June 2019.
- (2) Other non-producing costs includes over/underlifts, inventory movements, foreign exchange, provision for onerous lease contracts, third-party costs and the impact from revaluation of embedded derivatives in the T&T gas contract.
- (3) Net costs is a non-GAAP financial measure and is reconciled to the nearest respective IFRS measure, Expenses excluding finance costs. The measure and reconciliation above is for the fiscal year ended 30 June 2021 and comparative periods are unaudited and have been derived from BHP Petroleum' s Combined Financial Statements.

[Table of Contents](#)

Financial results

Half year ended 31 December 2021 and 2020

The following table provides more information on the profit/loss from operations and Underlying EBITDA of BHP Petroleum, including a reconciliation between Underlying EBITDA and the nearest IFRS measure, for the half year ended 31 December 2021 and 2020. The measures and reconciliations below are included in this section for the half year ended 31 December 2021 and comparative period are unaudited and have been derived from the BHP Petroleum Combined Financial Statements.

| | Unaudited 2021 \$M | Unaudited 2020 \$M |
|---------------------------------------|--------------------------|--------------------------|
| Half year ended 31 December | | |
| Profit/(loss) from operations | 1,608 | (199) |
| Depreciation and amortization expense | 1,047 | 890 |
| Net impairments | 210 | 61 |
| Other | 5 | 7 |
| Underlying EBITDA(1) | 2,870 | 759 |

- (1) Underlying EBITDA is a non-GAAP financial measure. See “*Disclaimer and Important Notices–Non-GAAP Financial Measures*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations of BHP Petroleum–Financial Results–Half year ended 31 December 2021 and 2020–Underlying EBITDA.*”

Profit/(loss) from operations

Profit from operations in the half year ended 31 December 2021 increased by \$1,807 million to \$1,608 million from the half year ended 31 December 2020. This is primarily driven by an increase in average realized sales prices of crude oil, natural gas and LNG, coupled with an increase in volumes. This increase is partially offset by an impairment charge of \$210 million against property, plant and equipment, relating to the Ruby operations in offshore T&T, in the half year ended 31 December 2021. The impairment reflects revisions to estimated reserves resulting from technical analysis of well drilling results and performance following project completion in December 2021.

Underlying EBITDA

Underlying EBITDA is used to help assess current operational profitability, excluding the impacts of sunk costs (i.e. depreciation from initial investment). It is a measure that management uses internally to assess the performance of BHP Petroleum. Underlying EBITDA is a non-GAAP financial measure. See the section entitled “*Disclaimer and Important Notices–Non-GAAP Financial Measures.*”

Underlying EBITDA in the half year ended 31 December 2021 increased by \$2,111 million to \$2,870 million, or 278% from the half year ended 31 December 2020. Price impacts, net of price-linked costs, increased Underlying EBITDA by \$1,767 million due to higher average realized crude oil, natural gas and LNG prices. Volume impacts increased underlying EBITDA by \$170 million due to higher gas demand at Bass Strait, increased volumes from Ruby following first production in May 2021 and the absence of impacts from weather events in the U.S. GOM. Additionally, Underlying EBITDA improved due to the recognition of a \$104 million gain attributable to the Final Investment Decision (FID) of the Scarborough LNG Project pursuant to the 2016 divestment of BHP Petroleum’s 25% Scarborough Joint Venture interest to Woodside (payable upon FID which was announced in November 2021). Controllable cash costs had a favorable impact of \$52 million due to increased maintenance and integrity activities in T&T and the impact of expensing the Wasabi-1 well, more than offset by the impact from expensing the Broadside-1 well and seismic costs in the U.S. GOM and T&T in the prior period.

Table of Contents

Fiscal years ended 30 June 2021, 2020 and 2019

The following table provides more information on the revenue and expenses of BHP Petroleum for the fiscal years ended 30 June 2021, 2020 and 2019:

| Fiscal year ended 30 June | 2021 | 2020 | Unaudited 2019 |
|---|--------------|--------------|---------------------------|
| | \$M | \$M | \$M |
| Combined Income Statement | | | |
| <i>Continuing operations</i> | | | |
| Revenue | 3,909 | 3,997 | 5,867 |
| Other income | 130 | 57 | 32 |
| Expenses excluding net finance costs | (3,799) | (3,390) | (3,510) |
| Loss from equity accounted investments | (6) | (4) | (2) |
| Profit from operations | 234 | 660 | 2,387 |
| Financial expenses | (464) | (660) | (1,001) |
| Financial income | 56 | 304 | 364 |
| Net finance costs | (408) | (356) | (637) |
| Profit/(loss) before taxation | (174) | 304 | 1,750 |
| Income tax expense | (211) | (400) | (925) |
| Royalty-related taxation (net of income tax benefit) | 24 | (82) | (164) |
| Total taxation expense | (187) | (482) | (1,089) |
| Profit/(loss) after taxation from Continuing operations | (361) | (178) | 661 |
| <i>Discontinued operations</i> | | | |
| Loss after taxation from Discontinued operations | – | – | (335) |
| Profit/(loss) after taxation from Continuing and Discontinued operations | (361) | (178) | 326 |
| Attributable to non-controlling interests | – | – | 7 |
| Attributable to BHP shareholders | (361) | (178) | 319 |
| Other financial information | | | |
| Underlying EBITDA(1) | 2,238 | 2,164 | 4,061 |

(1) Underlying EBITDA is a non-GAAP financial measure. For calculation methodologies and reconciliations to the nearest GAAP financial measures, see the sections entitled “Disclaimer and Important Notices–Non-GAAP Financial Measures” and “–Underlying EBITDA” below.

Revenue

Revenue of \$3,909 million in FY2021 decreased by \$88 million, or 2%, from FY2020. This decrease was primarily attributable to decreased production due to natural field decline and weather downtime in the U.S. GOM offset by higher average realized prices for crude oil and natural gas.

Revenue of \$3,997 million in FY2020 decreased by \$1,870 million, or 32%, from FY2019. This decrease was primarily attributable to lower average realized prices for crude oil, LNG and natural gas and decreased production volume due to natural field decline, decreased tax barrels at T&T and weaker market conditions.

Other Income

Other income of \$130 million in FY2021 increased by \$73 million, or 128%, from FY2020. This increase was primarily attributable to gain on the divestment of BHP Petroleum’s 35% interest in the U.S. GOM Neptune field in May 2021.

Other income of \$57 million in FY2020 increased by \$25 million, or 78%, from FY2019. This increase was primarily attributable to dividend income.

Table of Contents

Total expenses excluding net finance costs

Total expenses excluding net finance costs of \$3,799 million in FY2021 increased by \$409 million, or 12%, from FY2020. This includes an increase of \$383 million depreciation and amortization expenses following a decrease in estimated remaining reserves at Bass Strait due to underperformance of the reservoir and a \$97 million net impairment relating to write-offs of previously capitalized exploration and evaluations costs.

Total expenses excluding net finance costs of \$3,390 million in FY2020 decreased by \$120 million, or 3%, from FY2019. This includes a decrease of \$103 million depreciation and amortization expenses due to lower production.

Net finance costs

Net finance costs of \$408 million in FY2021 increased by \$52 million, or 15%, from FY2020. This was primarily attributable to decreased finance income related to lower related party loan balances.

Net finance costs of \$356 million in FY2020 decreased by \$281 million, or 44%, from FY2019. This was primarily attributable to the repayment of related party debt and reduced interest rates.

Taxation expense

Total taxation expense of \$187 million in FY2021 decreased by \$295 million, or 61%, from FY2020. The decrease was primarily driven by lower profits.

Total taxation expense of \$482 million in FY2020 decreased by \$607 million, or 56%, from FY2019. The decrease was primarily driven by lower profits.

Underlying EBITDA

Underlying EBITDA is used to help assess current operational profitability, excluding the impacts of sunk costs (i.e. depreciation from initial investment). It is a measure that management uses internally to assess the performance of BHP Petroleum. Underlying EBITDA is a non-GAAP financial measure. See the section entitled “*Disclaimer and Important Notices–Non-GAAP Financial Measures.*”

Underlying EBITDA in FY2021 increased by \$74 million to \$2,238 million, or 3% from FY2020. Price impacts, net of price-linked costs, increased Underlying EBITDA by \$257 million due to higher average realized crude oil and natural gas prices. The increase was partially offset by lower production of \$157 million due to natural field decline, unfavorable impacts from a highly active hurricane season in the U.S. GOM and lower gas demand at Bass Strait, partially offset by the acquisition of the additional 28% working interest in Shenzi.

Underlying EBITDA in FY2020 decreased by \$1,897 million to \$2,164 million, or 47% from FY2019. Price impacts, net of price-linked costs, decreased Underlying EBITDA by \$1,133 million due to lower average realized crude oil and natural gas prices. Lower production volume of \$588 million also unfavorably impacted Underlying EBITDA driven by natural field decline, weaker market conditions due to excess global supply, impacts from Tropical Cyclone Barry and Tropical Cyclone Damien and planned maintenance at Atlantis. Increased controllable cash costs of \$30 million and cessation of operations at Minerva and the sale of BHP Petroleum’s interests in the Bruce and Keith oil and gas fields in the prior period of \$76 million also unfavorably impacted Underlying EBITDA. Exchange rates decreased Underlying EBITDA \$34 million.

Table of Contents

The following table provides a reconciliation between Underlying EBITDA and the nearest respective IFRS measure. The measures and reconciliations below are included in this section for the fiscal year ended 30 June 2021 and comparative periods are unaudited and have been derived from the BHP Petroleum Combined Financial Statements.

| | 2021 | 2020 | Unaudited 2019 |
|---------------------------------------|--------------|--------------|-------------------|
| Fiscal year ended 30 June | \$M | \$M | \$M |
| Profit from operations (1) | 234 | 660 | 2,387 |
| Depreciation and amortization expense | 1,840 | 1,457 | 1,560 |
| Net impairments | 127 | 11 | 21 |
| Other | 37 | 36 | 93 |
| Underlying EBITDA | 2,238 | 2,164 | 4,061 |

- (1) Profit from operations FY2021 and FY2020 has been derived from BHP Petroleum's audited combined financial statements for the fiscal years ending 30 June 2021 and 2020. Profit from operations FY2019 has been derived from BHP Petroleum's unaudited combined financial statements for the fiscal year ending 30 June 2019.

Cash flows

Half year ended 31 December 2021 and 2020

Net operating cash flows of \$1,388 million (31 December 2020: \$106 million) reflects higher revenues due to an increase in average realized sales prices of crude oil, natural gas and LNG, coupled with an increase in volumes, partially offset by unfavorable working capital impacts and increased taxes paid during the period.

Table of Contents

Fiscal years ended 30 June 2021, 2020 and 2019

The following table provides a summary of the Combined Cash Flow Statement for the fiscal years ended 30 June 2021, 2020 and 2019:

| | 2021 | 2020 | Unaudited 2019 |
|--|----------------|----------------|-------------------|
| Fiscal year ended 30 June | \$M | \$M | \$M |
| Net operating cash flows from Continuing operations | 1,060 | 585 | 2,347 |
| Net operating cash flows from Discontinued operations | – | – | 474 |
| Net operating cash flows | 1,060 | 585 | 2,821 |
| Net investing cash flows from Continuing operations | (1,520) | (1,033) | (944) |
| Net investing cash flows from Discontinued operations | – | – | (443) |
| Net investing cash flows | (1,520) | (1,033) | (1,387) |
| Net financing cash flows from Continuing operations | 910 | (607) | (10,544) |
| Net financing cash flows from Discontinued operations | – | – | (13) |
| Net financing cash flows | 910 | (607) | (10,557) |
| Net increase/(decrease) in cash and cash equivalents from Continuing operations | 450 | (1,055) | (9,141) |
| Net increase/(decrease) in cash and cash equivalents from Discontinued operations | – | – | 18 |
| Proceeds from divestment of Onshore US, net of its cash | – | – | 10,427 |
| Cash and cash equivalents, net of overdrafts at the beginning of the financial year | 325 | 1,381 | 77 |
| Foreign currency exchange rate changes on cash and cash equivalents | 1 | (1) | – |
| Cash and cash equivalents, net of overdrafts at the end of the financial year | 776 | 325 | 1,381 |

Net operating cash inflows of \$1,060 million in FY2021 increased by \$475 million from FY2020. This reflects higher revenues due to an increase in prices coupled with a decrease in taxes paid.

Net operating cash inflows of \$585 million in FY2020 decreased by \$2,236 million from FY2019. This is primarily due to the divestment of Onshore U.S. and reduced revenue driven by lower prices and volumes in FY20 from continued operations.

Net investing cash outflows of \$1,520 million in FY2021 increased by \$487 million from FY2020. This reflects the investment in an additional 28% working interest in Shenzi of \$480 million, increasing BHP Petroleum's share from 44% to 72%.

Net investing cash outflows of \$1,033 million in FY2020 decreased by \$354 million from FY2019. This primarily relates to the \$443 million divestment of BHP Petroleum's Onshore U.S. assets in FY2019.

Net financing cash inflows of \$910 million in FY2021 increased by \$1,517 million. This reflects a decrease in intercompany finance receivables used to pay down external debt.

Net financing cash outflows of \$607 million in FY2020 decreased by \$9,950 million from FY2019. This relates to a decrease in finance expenses relating to long-term debt repayment and lower interest rates.

Table of Contents

Other Information

Drilling

The number of wells in the process of drilling and/or completion as of 30 June 2021 was as follows:

| | <u>Exploratory wells</u> | | <u>Development wells</u> | | <u>Total</u> | |
|---------------|--------------------------|----------------|--------------------------|----------------|--------------|----------------|
| | <u>Gross</u> | <u>Net (1)</u> | <u>Gross</u> | <u>Net (1)</u> | <u>Gross</u> | <u>Net (1)</u> |
| Australia | - | - | - | - | - | - |
| United States | - | - | 27 | 9 | 27 | 9 |
| Other (2) | - | - | 5 | 3 | 5 | 3 |
| Total | <u>-</u> | <u>-</u> | <u>32</u> | <u>12</u> | <u>32</u> | <u>12</u> |

(1) Represents BHP Petroleum's share of the gross well count.

(2) Other is comprised of T&T.

Liquidity and capital resources

BHP Petroleum's policies on debt and liquidity management have the following objectives:

a strong balance sheet through the cycle; and

maintain borrowings and excess cash predominantly in U.S. dollars.

Funding Sources

To meet BHP Petroleum's short and long-term liquidity requirements, BHP Petroleum relies primarily on cash generated from operating activities and debt financing from BHP.

At 31 December 2021, BHP Petroleum had cash and cash equivalents of \$992 million (30 June 2021: \$776 million) and long-term debt agreements with BHP of \$10,347 million (30 June 2021: \$10,347 million). The long-term debt agreements balance was recorded as a non-current liability in payables to BHP at 30 June 2021 and was reclassified to a current liability in payables to BHP as it became current at 31 December 2021. At 30 June 2020 and 30 June 2019, BHP Petroleum had cash and cash equivalents of \$325 million and \$1,398 million, respectively, and long-term debt agreements with BHP of \$14,340 million and \$17,340 million, respectively. The non-current portion of the long-term debt agreements as at 30 June 2020 was \$10,347 million (30 June 2019: \$14,340 million).

BHP Petroleum fulfills its cash management and financing needs through cash from operations and borrowings from BHP, including long-term debt agreements to finance its projects. No new debt was issued in the half year ended 31 December 2021 or FY2021. These actions enhanced BHP Petroleum's capital structure and extended BHP Petroleum's average debt maturity.

BHP borrowing facilities are not subject to financial covenants. Certain specific financing facilities in relation to specific assets are the subject of financial covenants that vary from facility to facility, as is considered normal for such facilities.

Management believes cash generated by operating activities, along with available borrowing capacity, will be sufficient to support BHP Petroleum's operations for the foreseeable future, as well as short and long-term liquidity requirements.

At 31 December 2021, BHP Petroleum had net amounts payable to BHP of \$1,700 million. Under the terms of the Share Sale Agreement, intra-group funding arrangements are required to be repaid or otherwise eliminated. BHP Petroleum expects to settle intercompany balances with BHP either as a capital injection or loan forgiveness neither of which will involve an outflow of cash in order to satisfy the terms of the Share Sale Agreement. At 31 December 2021, BHP Petroleum does not have any remaining long-term debt obligations.

Table of Contents

Capital Requirements

BHP Petroleum's net share of capital development expenditure in the half year ended 31 December 2021, which is presented on a cash basis within this section, was \$556 million. While the majority of the expenditure for the half year ended 31 December 2021 was incurred at its operated Australian, U.S. GOM, and T&T assets, capital expenditure was also incurred by its operating partners at BHP Petroleum's U.S. GOM and Australian non-operated assets. BHP Petroleum's commitments for capital expenditure were \$2,064 million as at 31 December 2021.

On 22 November 2021, BHP Petroleum announced the approval of \$1.5 billion in capital expenditure for development of the Scarborough LNG Project located in the North Carnarvon Basin, Western Australia. The approved capital expenditure represents BHP Petroleum's 26.5% participating interest in Phase 1 of the upstream development. Final Investment Decisions have also been made by Woodside and the Scarborough Joint Venture accounted for at the time of FID.

BHP Petroleum's net share of exploration expenditure in the half year ended 31 December 2021, presented on a cash basis within this section, was \$243 million, of which \$131 million was capitalised. The expenditure is primarily made up of drilling activity in T&T and U.S. GOM.

For leases as at 31 December 2021, BHP Petroleum has current and long term obligations of \$257 million.

BHP Petroleum's net share of capital development expenditure in FY2021, which is presented on a cash basis within this section, was \$994 million. While the majority of the expenditure in FY2021 was incurred by operating partners at BHP Petroleum's Australian and U.S. GOM non-operated assets, BHP Petroleum also incurred capital expenditure at its operated Australian, U.S. GOM, and T&T assets.

Contingent Liabilities

A contingent liability is a possible obligation arising from past events and whose existence will be confirmed only by occurrence or non-occurrence of one or more uncertain future events not wholly within the control of BHP Petroleum. A contingent liability may also be a present obligation arising from past events but is not recognized on the basis that an outflow of economic resources to settle the obligation is not viewed as probable, or the amount of the obligation cannot be reliably measured. The timing and resolution of potential economic outflow relating to BHP Petroleum's contingent liabilities is uncertain. BHP Petroleum's total contingent liabilities for subsidiaries and joint operations as at 31 December 2021 is \$774 million.

Uncertain Tax Matters

BHP Petroleum operates across many tax jurisdictions. Application of tax law can be complex and requires judgement to assess risk and estimate outcomes. The evaluation of tax risks considers both amended assessments received and potential sources of challenge from tax authorities. The status of proceedings for these matters will impact the ability to determine the potential exposure and, in some cases, it may not be possible to determine a range of possible outcomes or a reliable estimate of the potential exposure.

Tax and royalty matters with uncertain outcomes arise in the normal course of business and occur due to changes in tax law, changes in interpretation of tax law, periodic challenges and disagreements with tax authorities and legal proceedings.

Delivery commitments

BHP Petroleum has delivery commitments of natural gas and LNG of approximately 1,070 million Mcf through 2031 and Crude commitments of 8 million barrels through 2024. BHP Petroleum has sufficient proven reserves and production capacity to fulfil these delivery commitments.

Table of Contents

BHP Petroleum has obligation commitments of \$33 million for contracted capacity on transportation pipelines and gathering systems through 2025, on which BHP Petroleum is the shipper. The agreements have annual escalation clauses.

Critical Accounting Estimates

The preparation of financial statements in accordance with IFRS requires use of estimates, as well as management's judgments and assumptions regarding matters that are subjective, uncertain or involve a high degree of complexity, all of which affect the results of operations and financial condition for the periods presented. BHP Petroleum believes the following accounting policy is critical to the BHP Petroleum Combined Financial Statements and may involve a higher degree of estimates, judgments and complexity.

Closure and rehabilitation provisions

BHP Petroleum incurs obligations to rehabilitate sites and associated facilities at the end of or, in some cases, during the course of production. BHP Petroleum's largest provisions relate to the cost of removing all unwanted infrastructure associated with an operation and the return of disturbed areas to a safe, stable, productive and self-sustaining condition, consistent with the agreed end land use. The fair value of these obligations are recorded as a liability on a discounted basis. The corresponding cost is capitalized as an asset in the case of operating sites (representing part of the cost of acquiring the future economic benefits of the operation) and reflected as a charge to the income statement for closed sites.

Determining the closure and rehabilitation provision is a complex area requiring significant judgement and estimates, particularly given the timing and long timescale of cash flows, extent of costs associated with future rehabilitation activities, legislative requirements in the applicable jurisdiction, changes to the regulatory environment and the applicable discount rates used.

Reserves

Reserves are estimates of the amount of product that can be demonstrated to be able to be economically and legally extracted from BHP Petroleum's properties. In order to estimate reserves, assumptions are required about a range of technical and economic factors, including quantities, qualities, production techniques, recovery efficiency, production and transport costs, commodity supply and demand, commodity prices and exchange rates.

Estimating the quantity and/or quality of reserves requires the size, shape and depth of oil and gas reservoirs to be determined by analyzing geological data, such as drilling samples and geophysical survey interpretations. Economic assumptions used to estimate reserves change from period to period as additional technical and operational data is generated. This process may require complex and difficult geological judgements to interpret the data.

Reserve impact on financial reporting

Estimates of reserves may change from period to period as the economic assumptions used to estimate reserves change and additional geological data is generated during the course of operations. Changes in reserves may affect BHP Petroleum's financial results and financial position in a number of ways, including:

- asset carrying values may be affected due to changes in estimated future production levels;

- depreciation, depletion and amortization charged in the income statement may change where such charges are determined on the units of production basis or where the useful economic lives of assets change;

- closure and rehabilitation provisions may change where changes in estimated reserves affect expectations about the timing or cost of these activities; and

- the carrying amount of deferred tax assets may change due to changes in estimates of the likely recovery of the tax benefits.

Table of Contents

Property, Plant and Equipment

Depreciation

The depreciation method and rates applied to specific assets reflect the pattern in which the asset's benefits are expected to be used by BHP Petroleum. The proved reserves for petroleum assets are used to determine units of production depreciation unless doing so results in depreciation charges that do not reflect the asset's useful life. Where this occurs, alternative approaches to determining reserves are applied, such as using management's expectations of future oil and gas prices rather than yearly average prices to provide a phasing of periodic depreciation charges that better reflects the asset's expected useful life.

Exploration and evaluation

Exploration and evaluation expenditure results in certain items of expenditure being capitalized for an area of interest where a judgement is made that it is likely to be recoverable by future exploitation or sale, or where the activities are judged not to have reached a stage that permits a reasonable assessment of the existence of reserves.

Management makes certain estimates and assumptions as to future events and circumstances, in particular when making a quantitative assessment of whether an economically viable extraction operation can be established. These estimates and assumptions may change as new information becomes available. If, after having capitalized the expenditure under the policy, new information suggests that recovery of the expenditure is unlikely, the relevant capitalized amount is charged to the income statement.

Impairments

Assessment of indicators of impairment or impairment reversal requires significant management judgement. Indicators of impairment may include changes in BHP Petroleum's operating and economic assumptions, including those arising from changes in reserves, updates to the commodity supply, demand and price forecasts, or the possible additional impacts from emerging risks such as those related to climate change and the transition to a lower-carbon economy and pandemics similar to COVID-19.

The most significant estimates impacting BHP Petroleum's recoverable amount determinations include but are not limited to:

- Commodity prices;
- Future production volumes;
- Operating costs and capital expenditures; and
- Selection of appropriate discount rates.

Deferred Tax

Judgement is required to determine the amount of deferred tax assets that are recognized based on the likely timing and the level of future taxable profits. Judgement is applied in recognizing deferred tax liabilities arising from temporary differences in investments.

BHP Petroleum assesses the recoverability of recognized and unrecognized deferred taxes, on a consistent basis. Estimates and assumptions relating to projected earnings and cash flows as applied in BHP Petroleum's impairment process are used for operating assets.

Future Accounting Pronouncements

A number of accounting standards and interpretations, have been issued and will be applicable in future periods. While these remain subject to ongoing assessment, no significant impacts have been identified to date. These standards have not been applied in the preparation of the BHP Petroleum Combined Financial Statements.

EXECUTIVE COMPENSATION

Woodside' s Key Management Personnel

This section outlines the compensation arrangements in place for Woodside Directors and members of Woodside' s Executive Committee that are "Key Management Personnel" ("KMPs"), under Australian law ("Senior Executives") that will serve as Directors or Senior Executives of the Merged Group after closing of the Merger. Woodside' s KMPs are the people who have the authority to shape and influence Woodside' s strategic direction and performance through their actions, either collectively (in the case of the Woodside Board) or as individuals acting under delegated authorities (in the case of the Senior Executives). The Senior Executives are also executive officers for purposes of U.S. securities regulations. The names and positions of the individuals who will be KMPs after the closing of the Merger are listed below.

Minimum Shareholding Requirements ("MSR") Policy

The MSR policy requires Senior Executives to have acquired and maintained Woodside Shares for a minimum total purchase price of at least 100% of their fixed remuneration after a period of five years and, in the case of the CEO, a minimum of 200% of fixed remuneration.

Non-Executive Directors are required to have acquired shares for a total purchase price of at least 100% of their pre-tax annual fee after five years on the Woodside Board. The Non-Executive Directors may utilize the Non-Executive Directors' Share Plan ("NEDSP") to acquire the Woodside Shares on market at market value. As the Woodside Shares are acquired with net fees the Woodside Shares in the NEDSP are not subject to any forfeiture conditions.

[Table of Contents](#)

Woodside Directors' and Senior Executives' Shares and Equity Incentives

As of 24 March 2022, the Woodside Shares held by the Woodside Directors and Senior Executives (all of which are held beneficially unless otherwise stated) are as follows. This includes Woodside Shares that are awarded to Senior Executives as the deferred component of their short-term award or as a part of their VAR (as defined below) (the "Restricted Shares"), which are set out below. While the Restricted Shares remain subject to forfeiture until vesting, the holder has the right to vote the Restricted Shares from grant.

| Name | Number of Woodside Shares | Percentage of existing total issued share capital of Woodside (%)⁽¹⁾ | Expected percentage of total issued share capital of the Merged Group following Implementation of the Merger (%)⁽¹⁾ |
|-----------------------------------|----------------------------------|--|---|
| Executive Director | | | |
| Meg O' Neill (CEO) ⁽⁴⁾ | 229,652 | * | * |
| Non-Executive Directors | | | |

| Gene Tilbrook | 7,949 | * | * |
| Sarah Ryan | 12,599 | * | * |
| Ben Wyatt | 898 | – | – |
| Other Senior Executives | | | |
| Graham Tiver ⁽²⁾ | – | – | – |
| Fiona Hick ⁽⁵⁾ | 84,080 | * | * |
| Shiva McMahon ⁽³⁾ | – | – | – |

* Less than 0.1%

(1) Based 983,980,823 Existing Woodside Shares outstanding which is the number of issued and fully paid Woodside Shares as of 24 March 2022.

(2) Mr. Tiver was appointed as Chief Financial Officer and Executive Vice President of Woodside and commenced employment on 1 February 2022. Mr. Tiver did not own any Woodside Shares as of 24 March 2022.

(3) Ms. McMahon's appointment as a Senior Executive will only take effect from Implementation. Ms. McMahon did not own any Woodside Shares as of 24 March 2022.

(4) Includes 82,189 Restricted Shares.

(5) Includes 73,086 Restricted Shares.

Details of outstanding incentive awards granted to the CEO and other Senior Executives are set out in the section entitled "*Executive Incentive Scheme*."

Senior Executives' Remuneration

Remuneration Policy

Woodside aims to deliver affordable energy solutions and superior outcomes to stakeholders. To do so, Woodside must be able to attract and retain talented executives in a globally competitive market. The Woodside Board structures remuneration so that it rewards performance, is valued by executives, and is strongly aligned

Table of Contents

with Woodside's corporate governance framework, strategic direction and the creation of value for all stakeholders through efficient and safe operations and the development of new, value-creating projects.

Senior Executives–Service Agreements

Each Senior Executive has entered into a service agreement. The below table summarizes the key contractual provisions of these agreements.

| | Employing Company | Contract date | Contract duration | Termination notice period- Company(1) | Termination notice period executive(2) |
|--------------------------------|--------------------------|----------------------|--------------------------|--|---|
| Executive Director | | | | | |
| Meg O' Neill (CEO) | Woodside Energy Ltd | 1 November 2021 | Unlimited | 6 months | 6 months |
| Other Senior Executives | | | | | |
| Graham Tiver(3) | Woodside Energy Ltd | 14 December 2021 | Unlimited | 6 months | 6 months |
| Fiona Hick | Woodside Energy Ltd | 1 June 2016 | Unlimited | 6 months | 3 months |
| Shiva McMahon(4) | Woodside Energy Ltd | 5 February 2022 | Unlimited | 6 months | 3 months |

- (1) Woodside may choose to terminate the contract immediately by making a payment in lieu of notice equal to the fixed remuneration the Senior Executive would have received during the "Company Notice Period." In the event of termination with cause such as for serious misconduct, a serious or persistent breach of contract by the Senior Executive or conviction of a criminal offense, the Senior Executive is not entitled to this termination payment. Any payments made in the event of a termination of an executive contract will be consistent with the Corporations Act.
- (2) On termination of employment, the Senior Executive will be entitled to the payment of any fixed remuneration calculated up to the termination date, any leave entitlement accrued at the termination date and any payment or award permitted under the EIS (as defined below) and Equity Award Rules (as defined below). The Senior Executives are restrained from certain activities for specified periods after termination of their employment in order to protect Woodside's interests.
- (3) Mr. Tiver was appointed as Chief Financial Officer and Executive Vice President of Woodside, effective as of his commencement of employment with Woodside on 1 February 2022.
- (4) Ms. McMahon's appointment as a Senior Executive will only take effect from Implementation.

Remuneration Policy

Woodside's remuneration structure for the CEO and other Senior Executives is comprised of two components: Fixed Annual Reward ("FAR") and Variable Annual Reward ("VAR").

FAR is an executive's fixed annual base salary paid in cash, which is determined by the Woodside Board with regard to the scope of the executive's role and their level of knowledge, skills and experience.

VAR is comprised of (i) an executive's variable annual award paid in cash, (ii) Restricted Shares and (iii) rights to receive Woodside Shares or, in the Woodside Board's discretion, cash equivalents ("Performance Rights"), each of which is awarded under the Executive Incentive Scheme ("EIS"). VAR is structured to reward the Senior Executives for achieving challenging yet realistic targets set by the Woodside Board which deliver short-term and long-term growth for Woodside. VAR aligns shareholder and executive remuneration outcomes by ensuring a significant portion of executive remuneration is at risk, while rewarding performance.

Table of Contents

Executive remuneration is reviewed annually, having regard to the accountabilities, experience and performance of the individual. FAR and VAR are compared against domestic and international competitors at target, to maintain Woodside's competitive advantage in attracting and retaining talent and to ensure appropriate motivation is provided to executives to deliver on Woodside's strategic objectives. The tables below provide a summary of the key terms and conditions of FAR and VAR.

| Fixed Annual Reward | Variable Annual Reward |
|--|---|

The key VAR features are summarized below:

| | |
|-------------------------------|---|
| Allocation methodology | Restricted Shares and Performance Rights are allocated using a face value allocation methodology. The number of Restricted Shares and Performance Rights is calculated by dividing the value by the volume weighted average price in December each year. |
| Dividends | Executives are entitled to receive dividends on Restricted Shares. No dividends are paid on Performance Rights prior to vesting. For Performance Rights that do vest, a dividend equivalent payment will be paid by Woodside for the period between allocation and vesting. |
| Clawback provisions | The Woodside Board has the discretion to reduce unvested entitlements including where an executive has acted fraudulently or dishonestly or is found to be in material breach of their obligations; there is a material misstatement or omission in the financial statements; or the Woodside Board determines that circumstances have occurred that have resulted in an unfair benefit to the executive. |

Table of Contents

Control event

The Woodside Board has the discretion to determine the treatment of any EIS award on a change of control event. If a change of control occurs during the 12-month performance period, an executive will receive at least a pro rata cash payment in respect of the unallocated cash and Restricted Share components of the EIS award for that year, assessed at target. If a change of control occurs during the vesting period for equity awards, Restricted Shares will vest in full while Performance Rights may, in the discretion of the Woodside Board, vest on an at least pro rata basis.

Cessation of employment

During a performance period, should an executive provide notice of resignation or be terminated for cause, no EIS award will be awarded. In any other case, Woodside will consider performance against targets and the portion of the performance period elapsed prior to termination in determining whether any EIS is awarded for the performance period during which a Senior Executive's employment terminates.

During a vesting period, should an executive provide notice of resignation or be terminated for cause, any EIS award that has already been granted but is not yet vested will be forfeited or lapse. In any other case, any Restricted Shares will vest in full in connection with the termination of the Senior Executive's employment while any Performance Rights will remain outstanding and vest in the ordinary course subject to the satisfaction of the applicable performance conditions. The Woodside Board will have discretion to accelerate the vesting of unvested equity awards, subject to applicable termination benefits laws.

No retesting

There will be no retest applied to EIS awards. Performance Rights will lapse if the required RTSR performance is not achieved at the conclusion of the five-year period.

Executive Incentive Scheme

The EIS was introduced in 2018. The scheme remunerates executives, including the Senior Executives, for delivering results against measurable criteria aimed at safe, efficient operations; delivery of new projects and an effective financial structure. The EIS has been designed to deliver three key objectives: (1) executive engagement, (2) alignment with the shareholder experience and (3) strategic fit. Cash, Restricted Shares and Performance Rights are awarded under the EIS.

The value of each executive's award is based upon two components: individual performance against challenging key performance indicators ("KPIs") (30% weighting) and Woodside's performance against a corporate scorecard of key measures that aligns with Woodside's overall business goals (the "Corporate Scorecard") (70% weighting). This results in an individual performance factor which ranges from 0 to 1.6 for each of the Senior Executives. The Corporate Scorecard targets and individual KPIs are designed to promote short- and long-term shareholder value. Performance against individual KPIs is assessed by the Woodside Board in the case of the CEO, and by the CEO and the Human Resources & Compensation Committee of the Woodside Board in the case of the other Senior Executives. Each Senior Executive is given a target VAR opportunity and a maximum VAR opportunity which are a percentage of the Senior Executive's FAR. Exceeding targets may result in an increased award, whereas under-performance will result in a reduced award. The minimum award that an executive can receive is zero if the performance conditions are not achieved. For the CEO, the target and maximum opportunities for 2021 are 200% and 300% of FAR, respectively. For other Senior Executives, the target and maximum opportunities for 2021 are 160% and 256% of FAR, respectively. The decision to pay or allocate an EIS award is subject to the overriding discretion of the Woodside Board, which may adjust outcomes in order to better reflect shareholder outcomes, and company or management performance.

[Table of Contents](#)

Restricted Shares

Restricted Shares are Existing Woodside Shares that are awarded to executives. No amount is payable by the executive on the grant or vesting of a Restricted Share. An award of Restricted Shares is divided into two tranches. The first tranche is 27.5% of the total VAR award and subject to a three-year deferral period. The second tranche is 30% of the total VAR award and subject to a five-year deferral period. The deferral ensures that awards remain subject to fluctuations in share price across the three and five-year periods, which is intended to ensure the sustainability of performance over the medium- and long-term and support increased alignment between executives and shareholders. There are no further performance conditions attached to these awards from the date of grant. This element of compensation creates a strong retention proposition for executives as vesting is subject to employment not being terminated with cause or by resignation during the deferral period.

Performance Rights

Performance Rights are awarded to executives and are divided into two portions with each portion subject to a separate RTSR performance hurdle tested over a five-year period. Performance is tested after five years as Woodside operates in a capital intensive industry with long investment timelines. For each award of Performance Rights, one-third is tested against a comparator group that comprises the entities within the ASX 50 index. The remaining two-thirds is tested against an international group of oil and gas companies. RTSR outcomes are calculated by an external adviser on or after the fifth anniversary of the allocation of the Performance Rights. The outcome of the test is measured against the schedule below. For EIS awards, any Performance Rights that do not vest will lapse and are not retested. Each Performance Right that vests entitles the holder to one Woodside Share or, in the Woodside Board's discretion, a cash equivalent.

Total Senior Executives' Remuneration and Benefits

The following table details the total remuneration of the Senior Executives for the year ended 31 December 2021, including any contingent or deferred compensation and any benefits in kind, for their services, in all capabilities, to Woodside.

The remuneration and benefits reported are presented in the table in U.S. dollars, unless otherwise stated. This is consistent with the functional and presentation currency of Woodside. Compensation for Australian-based employees is paid in Australian dollars and, for reporting purposes, converted to U.S. dollars based on the applicable exchange rate at the date of payment. Valuation of equity awards is converted at the spot rate applying when the equity award is granted.

Table of Contents

Compensation of CEO and Other Senior Executives for the Year Ended 31 December 2021

| Name | Fixed Annual Reward | | | Variable Annual Reward | | | | Total remuneration(1) | | Performance related(2) |
|--------------------------------|------------------------------------|---|--|------------------------|---------------------|-------------------------|---------------------------|-----------------------|-----------|------------------------|
| | Short term | Post | | Cash | Share-based grants | | | (\$) | (\$) | % |
| | Salaries, fees and allowances (\$) | Benefits and allowances (including nonmonetary) (\$)(3) | Company contributions to superannuation (\$) | Cash (\$)(4) | Share plans (\$)(5) | Long service leave (\$) | Termination benefits (\$) | | | |
| Executive Director | | | | | | | | | | |
| Meg O' Neill (CEO)(6) (7) | 1,431,531 | 52,614 | – | 337,421 | 1,515,992 | 129,123 | – | 3,466,681 | 4,633,501 | 53 |
| Other Senior Executives | | | | | | | | | | |
| Graham Tiver(8) | – | – | – | – | – | – | – | – | – | – |
| Fiona Hick | 540,368 | 29,989 | 22,742 | 128,875 | 390,418 | 11,742 | – | 1,124,134 | 1,503,402 | 46 |
| Shiva McMahon(9) | – | – | – | – | – | – | – | – | – | – |

- (1) Remuneration in Australian dollars is converted from U.S. dollars using the average exchange rate for the period. This information in Australian dollars is included for the purpose of showing the total annual cost of benefits to Woodside for the service period.
- (2) Performance related outcome percentage is calculated as total VAR divided by the total U.S. dollars remuneration figure.
- (3) Reflects the value of allowances and non-monetary benefits (including relocation, travel, car parking and any associated fringe benefit tax).
- (4) The amount represents the cash incentive earned in the respective year, which is actually paid in the following year. Amounts were translated to U.S. dollars using the closing spot rate on 31 December 2021.
- (5) Includes the grant date fair value of all Restricted Shares and Performance Rights, which were granted under the EIS. In accordance with IFRS, 2 Share-based Payment, the fair value of rights as of their date of grant has been determined by applying the Black-Scholes option pricing technique or applying the binomial valuation method combined with a Monte Carlo simulation. The fair value of rights is amortized over the vesting period from the commencement of the service period, such that 'total remuneration' includes a portion of the fair value of unvested equity compensation during the year. The portion of the expense relating to the 2021 EIS has been measured using estimated fair values. The amount included as remuneration is not related to or indicative of the benefit (if any) that individual Senior Executives may ultimately realize should these equity instruments vest. The following table details the number of Restricted Shares and Performance Rights granted (or in the case of the CEO, to be granted subject to shareholder approval at the Woodside Shareholders Meeting) for the 2021 EIS:

| Name | Performance Rights | Restricted Shares |
|---------------|--------------------|-------------------|
| Meg O' Neill | 51,122 | 97,983 |
| Graham Tiver | – | – |
| Shiva McMahon | – | – |
| Fiona Hick | 19,525 | 37,423 |

- (6) Ms. O' Neill's title changed from Executive Vice President Development and Marketing to Acting Chief Executive Officer on 20 April 2021. Ms. O' Neill was appointed Chief Executive Officer and Managing Director on 17 August 2021.
- (7) As a non-resident for Australian tax purposes Ms. O' Neill elected to receive a cash payment in lieu of all superannuation contributions, in accordance with the Superannuation Guarantee (Administration) Act 1992. The cash payment is subject to (PAYG) income tax and paid as part of Ms. O' Neill's normal monthly salary. The amount is included in salaries, fees and allowances.
- (8) Mr. Tiver was appointed as Chief Financial Officer and Executive Vice President of Woodside and commenced employment on 1 February 2022. Mr. Tiver was not paid any remuneration by Woodside in 2021.
- (9) Ms. McMahon's appointment as a Senior Executive will only take effect from Implementation. Ms. McMahon was not paid any remuneration by Woodside in 2021.

[Table of Contents](#)

Total Outstanding Equity Benefits For Senior Executives

As of 24 March 2022, the Restricted Shares, Performance Rights, Equity Rights and Variable Pay Rights (“VPRs”) (rights to receive fully paid Woodside Shares or, in the Woodside Board’s discretion, cash equivalents) held by the CEO and other Senior Executives (all of which are held beneficially unless otherwise stated) are provided in the table below. VPRs were granted under the Executive Incentive Plan (“EIP”) to Senior Executives prior to the implementation of the Executive Incentive Scheme (“EIS”) in 2018. For a further description of the EIS and EIP, please see the section entitled “–Executive Incentive Plan.”

Summary of CEO and Other Senior Executives Equity Incentives (as of 24 March 2022)

| Name | Variable Pay Rights | Performance Rights | Equity Rights (SWEP) | Restricted Shares |
|------------------|----------------------------|---------------------------|-----------------------------|--------------------------|
| Meg O’ Neill | – | 55,366 | – | 82,189 |
| Graham Tiver(1) | – | – | 124,381 | – |
| Fiona Hick | 4,944 | 44,109 | – | 73,086 |
| Shiva McMahan(2) | – | – | – | – |

- (1) Mr. Tiver was appointed as Chief Financial Officer and Executive Vice President of Woodside and commenced employment on 1 February 2022. Mr. Tiver was not paid any remuneration by Woodside in 2021.
- (2) Ms. McMahan’s appointment as a Senior Executive will only take effect from Implementation. Ms. McMahan was not paid any remuneration by Woodside in 2021.

Employee Incentive Arrangements

Woodside provides employees with the opportunity to participate in ownership of shares in the company and uses equity to support a competitive base remuneration position. The section entitled “–Equity Incentive Scheme” sets out the employee equity incentives currently outstanding and the details of equity incentives held by Senior Executives. In addition to the plans set out below, the Woodside Board may approve the discretionary awards of Restricted Shares, Performance Rights or Equity Rights (“ERs”) to executives and other employees.

Woodside may grant Restricted Shares and Performance Rights under the EIS both of which settle in Woodside Shares or, in the Woodside Board’s discretion, a cash equivalent. For a full description of the EIS, please see the section above entitled “–Executive Incentive Scheme.” As of 24 March 2022, Woodside had 1,982,924 Restricted Shares outstanding.

Executive Incentive Plan

The EIP is a legacy plan which operated as Woodside’s executive incentive framework until the end of 2017, after which the Woodside Board introduced the EIS. Eligible executives were granted Restricted Shares and VPRs under the EIP, both of which settle in Woodside Shares on a one-for-one basis or, in the Woodside Board’s discretion, a cash equivalent. Restricted Shares were subject to a three-year deferral period. VPRs were divided into two portions with each portion subject to a separate RTSR performance hurdle tested over a four-year period. One-third of an award is tested against a comparator group that comprises the entities within the ASX 50 index. The remaining two-thirds is tested against an international group of oil and gas companies. RTSR outcomes are calculated by an external adviser on the fourth anniversary of the allocation. For awards granted to Senior Executives from 2017 onwards, any VPRs that do not vest will lapse and are not retested. Plans awarded prior to 2017 are allowed for a retest in the following year. VPRs that do not vest following the retest lapsed. As of 24 March 2022, there were 338,261 VPRs.

Table of Contents

Woodside Equity Plan (“WEP”)

The WEP is available to all permanent employees except EIS participants. The purpose of the WEP is to enable eligible employees to build up a holding of equity in the company as they progress through their career at Woodside.

The number of ERs offered to each eligible employee is determined by the Woodside Board, and based on individual performance as assessed under the performance review process. There are no further ongoing performance conditions from the date of grant. The linking of performance to an allocation allows Woodside to recognize and reward eligible employees for high performance.

For offers prior to 2019, each ER entitled the participant to receive a Woodside Share on the vesting date three years after the effective grant date. For the awards granted since 2019, the Woodside Board amended the terms of the WEP to allow for 75% vesting of the ERs three years after the effective grant date and the remaining 25% of ERs five years after the effective grant date.

ERs lapse if an employee is terminated with cause or resigns prior to the vesting.

As of 24 March 2022, there were 5,587,026 ERs outstanding under the WEP.

Supplementary Woodside Equity Plan (“SWEP”)

In October 2011, the Woodside Board approved a remuneration strategy which includes the use of equity to support a competitive base remuneration position. To this end, the Woodside Board approved the establishment of the SWEP to enable the offering of targeted retention awards of ERs for key capability. The SWEP was designed to be offered to a small number of employees identified as being retention critical. The SWEP awards have service conditions and no performance conditions. Each ER entitles the participant to receive a Woodside Share on the vesting date three years after the effective grant date.

ERs under both the WEP and the SWEP may vest prior to the vesting date on a change of control or on a pro rata basis, in the discretion of the CEO, limited to the following circumstances; redundancy, retirement (after six months’ participation), death, termination due to illness or incapacity or total and permanent disablement of a participating employee. An employee whose employment is terminated by resignation or for cause prior to the vesting date will forfeit all of their ERs.

There were no awards granted under the SWEP in 2021. As of 24 March 2022, there were 124,381 ERs outstanding following an award to Mr. Tiver on 21 February 2022.

Other Equity Awards

In February 2018, the Woodside Board approved rules (the “Equity Award Rules”) which apply to EIS and discretionary executive allocations. This allows the Woodside Board and CEO to award discretionary allocations of Restricted Shares or Performance Rights.

Non-Executive Directors’ Share Plan

Non-Executive Directors are eligible to participate in Woodside’s Non-Executive Directors’ Share Plan. Under the plan a proportion of the director’s after-tax remuneration is applied to the purchase of Woodside Shares. These shares are acquired on market at market value at pre-determined intervals. ASX is notified within five business days of any transactions in Woodside securities by Woodside Directors.

Table of Contents

Hedging by Woodside Directors and Senior Executives is Prohibited

It is a condition of the Securities Dealing Policy that Woodside Directors, and Senior Executives participating in an equity-based incentive plan, are prohibited from entering into any transaction which would have the effect of hedging or otherwise transferring to any person the risk of any fluctuation in the value of any unvested entitlement in Woodside securities. This prohibition is also contained in the terms of the EIS.

Non-Executive Directors' Remuneration

Non-Executive Directors—Letters of Appointment

All new Non-Executive Directors are required to sign a letter of appointment which sets out the key terms and conditions of their appointment, including duties, rights and responsibilities, the time commitment envisaged and the Woodside Board's expectations regarding their involvement with committee work.

Executive directors and other Senior Executives of Woodside enter into employment agreements which govern the terms of their employment. Woodside undertakes extensive background and screening checks prior to appointing Senior Executives.

Induction training is provided to all new Woodside Directors. It includes a comprehensive induction manual, discussions with the CEO and other Senior Executives and the option to visit Woodside's principal operations either upon appointment or with the Woodside Board during its next site tour. The induction materials and discussions include information on Woodside's strategy, culture and values; key corporate and Woodside Board policies; Woodside's financial, operational and risk management position; the rights and responsibilities of Woodside Directors; the role of the Woodside Board and its committees; meeting arrangements; and if required, key accounting matters and Woodside Directors' responsibilities in relation to Woodside's financial statements.

Questionnaires are completed annually to assess each director's skills and knowledge required to discharge their obligations to the company. Woodside considers at least annually the need for new and existing directors to undertake professional development to develop and maintain the skills and knowledge needed to perform their role as directors effectively, and provides directors who require professional development the opportunity to develop and maintain the required skills and knowledge. Woodside Directors attend continuing professional education sessions including industry seminars and approved education courses which are paid for by Woodside, where appropriate. In addition, Woodside provides the Woodside Board with regular educational information papers and presentations on industry related matters and new and emerging developments with the potential to affect Woodside.

Remuneration Policy

Non-Executive Director remuneration consists of base Woodside Board fees and committee fees, plus statutory superannuation contributions or payments in lieu (currently 10%). Other payments may be made for additional services outside the scope of Woodside Board and committee duties. Non-Executive Directors do not earn retirement benefits other than superannuation and are not entitled to any form of performance-linked remuneration, including equity incentives, in order to preserve their independence.

Table of Contents

The below table shows the annual base Woodside Board and committee fees for Non-Executive Directors. The amounts in the table and this section were converted from Australian dollars to U.S. dollars using the applicable exchange rate on 31 December 2021 and rounded up to the nearest dollar. In addition to these fees, Non-Executive Directors are entitled to reimbursement of reasonable travel, accommodation and other expenses incurred attending meetings of the Woodside Board, committees or Woodside Shareholders, or while engaged on Woodside business. Non-Executive Directors are not entitled to compensation on termination of their directorships. An allowance is paid to any Non-Executive Director required to travel internationally to attend Woodside Board commitments, compensating for factors related to long-haul travel. Where travel is between six and ten hours, an allowance of \$3,854 (A\$5,000) gross per trip is paid. Where travel exceeds 10 hours, an allowance of \$7,708 (A\$10,000) gross per trip is paid. Woodside Board fees are not paid to the CEO, as the time spent on Woodside Board work and the responsibilities of Woodside Board membership are considered in determining the remuneration package provided as part of the normal employment conditions.

| Position | Woodside Board(1)(\$) | Audit & Risk Committee (\$) | Human Resources & Compensation Committee (\$) | Sustainability Committee (\$) | Nominations & Governance Committee (\$) |
|------------------------------------|------------------------------|--|--|--------------------------------------|--|
| Chairman of the Woodside Board (2) | 524,827 (4) | | | | |
| Non-Executive Directors (3) | 159,036 (4) | | | | |
| Committee chair | | 43,072 (4) | 37,732 (4) | 34,394 (4) | Nil |
| Committee member | | 23,194 (4) | 19,229 (4) | 17,197 (4) | Nil |

- (1) Non-Executive Directors receive Woodside Board and committee fees plus statutory superannuation (or payments in lieu where statutory superannuation is not required to be paid).
- (2) The fees received by Chairman of the Woodside Board are inclusive of committee work.
- (3) The fees received by Non-Executive Directors mean the fees paid to Non-Executive Directors other than the Chairman of the Woodside Board.
- (4) Amounts were translated to U.S. dollars using the closing spot rate on 31 December 2021.

Compensation of Non-Executive Directors for The Year Ended 31 December 2021

The following table provides a breakdown of the components of the remuneration for each Non-Executive Director for the year ended 31 December 2021, including any contingent or deferred compensation and any benefits in kind, for their services, in all capabilities, to Woodside. The table includes due diligence fees paid to Frank Cooper, Ben Wyatt and Larry Archibald of A\$20,000. As noted above, the table is denominated in U.S. dollars:

| Name | Fees (\$) | Woodside contributions to superannuation (\$) | Total (\$) |
|-------------------------|------------------|--|-------------------|
| Richard Goyder, AO | 578,950 | 16,990 | 595,940 |
| Larry Archibald | 241,462 | - | 241,462 |
| Frank Cooper, AO | 244,013 | 22,327 | 266,340 |
| Swee Chen Goh | 223,680 | - | 223,680 |
| Christopher Haynes, OBE | 226,447 | - | 226,447 |
| Ian Macfarlane | 217,522 | 4,423 | 221,945 |
| Ann Pickard | 241,472 | - | 241,472 |
| Sarah Ryan | 206,330 | 20,117 | 226,447 |
| Gene Tilbrook | 227,575 | 22,189 | 249,764 |
| Ben Wyatt | 129,586 | 16,082 | 145,668 |

Table of Contents

Insurance

Woodside has paid a premium under a contract insuring each Woodside Director, officer, secretary and employee who is concerned with the management of Woodside or its subsidiaries against liability incurred in that capacity. Disclosure of the nature of the liability covered by and the amount of the premium payable for such insurance is subject to a confidentiality clause under the contract of insurance.

DESCRIPTION OF CERTAIN INDEBTEDNESS**Bilateral Facilities**

Woodside had 14 bilateral loan facilities totaling \$1,900 million as of 31 December 2021. Details of the bilateral loan facilities at the reporting date are as follows:

| | As of 31 December 2021 (\$m) | |
|--|------------------------------|---------------------|
| | <u>Facility Amount</u> | <u>Drawn Amount</u> |
| Short-term Maturity (Maturity within 12Mths) | 200 | nil |
| Medium-term Maturity (Maturity >12Mths<36Mths) | 1,100 | nil |
| Longer-term Maturity (Maturity >36Mths) | 600 | nil |

Interest rates are based on \$ LIBOR plus an agreed margin and are fixed at the commencement of the drawdown period. Interest is paid at the end of the drawdown period.

Woodside is closely monitoring the market and the output from the various industry working groups managing the transition to new benchmark interest rates. Woodside is assessing the implications of the Interbank Offered Rates (“IBOR”) reform across Woodside and will manage and execute the transition from current benchmark rates to an alternative benchmark rate.

Syndicated facilities

On 3 July 2015, Woodside executed an unsecured \$1,000 million committed syndicated loan facility, which was increased to \$1,200 million on 22 March 2016 and amended to \$800 million on 15 November 2017. On 14 October 2019, Woodside increased the existing facility to \$1,200 million, with \$400 million expiring on 11 October 2022 and \$800 million expiring on 11 October 2024. Interest rates are based on \$ LIBOR plus an agreed margin and are fixed at the commencement of the drawdown period.

On 17 January 2020, Woodside completed a new \$600 million syndicated term loan facility. The facility is fully drawn with no amortization and bullet repayment at maturity. The interest rate has been fixed as of 17 January 2020.

Details of syndicated loan facilities as of 31 December 2021 are as follows:

| | As of 31 December 2021 (\$ millions) | |
|--------------------------------------|---|---------------------|
| | <u>Facility Amount</u> | <u>Drawn Amount</u> |
| Syndicated Loan Facility | | |
| Tranche A–Maturity 11 October 2022 | 400 | nil |
| Tranche B–Maturity 11 October 2024 | 800 | nil |
| Syndicated Term Loan Facility | | |
| Maturity 17 January 2027 | 600 | 600 |

Japan Bank for International Cooperation (JBIC) Facility

On 24 June 2008, Woodside entered into a two tranche committed loan facility of \$1,000 million and \$500 million, respectively. The \$500 million tranche was repaid in 2013. There is a prepayment option for the remaining balance. Interest rates are based on \$ LIBOR plus an agreed margin. Interest is payable semi-annually in arrears and the principal amortizes on a straight-line basis, with equal instalments of principal due on each interest payment date (every six months). The outstanding balance of the JBIC facility as of 31 December 2021 was \$167 million. The maturity date is 7 July 2023.

Table of Contents

Under this facility, 90% of the receivables from designated Pluto LNG sale and purchase agreements are secured in favor of the lenders through a trust structure, with a required reserve amount of \$30 million. To the extent that this reserve amount remains fully funded and no default notice or acceleration notice has been given, the revenue from Pluto LNG continues to flow directly to Woodside from the trust account.

Medium Term Notes

On 28 August 2015, Woodside established a \$3,000 million Global Medium Term Notes Program listed on the Singapore Stock Exchange. Three notes issued under this program were outstanding as of 31 December 2021.

| <u>Maturity date</u> | <u>Currency</u> | <u>Carrying amount (\$million)</u> | <u>Nominal interest rate</u> |
|----------------------|-----------------|--|------------------------------|
| 15 July 2022 | \$ | 200 | Floating \$ LIBOR + 2.21% |
| 11 December 2023 | CHF | 175 | Fixed 1.00% coupon |
| 29 January 2027 | \$ | 200 | Fixed 3.07% coupon |

Unsecured Bonds

Woodside has four fixed coupon unsecured \$ bonds issued in the U.S. debt capital markets outstanding as of 31 December 2021. Interest on the bonds is payable semi-annually in arrears.

| <u>Maturity date</u> | <u>Carrying amount \$m</u> | <u>Fixed Coupon</u> |
|----------------------|----------------------------|---------------------|
| 5 March 2025 | 1,000 | 3.65% |
| 15 September 2026 | 800 | 3.70% |
| 15 March 2028 | 800 | 3.70% |
| 4 March 2029 | 1,500 | 4.50% |

DESCRIPTION OF WOODSIDE SHARES

The following description of the material terms of the share capital of Woodside includes a summary of the specified terms of the Woodside Constitution, applicable Australian law and the ASX Listing Rules, in each case as in effect on the date of this prospectus. The following description is intended as a summary only and does not constitute legal advice regarding those matters and should not be regarded as such. Unless stated otherwise, this description does not address any proposed provisions of Australian law that have not become effective as per the date of this prospectus. The description is qualified in its entirety by reference to the complete text of the Woodside Constitution, which is attached as Exhibit 3.1 to the registration statement on Form F-4 of which this prospectus forms a part. For details on how to obtain a full copy of the Woodside Constitution, see the section entitled "Where You Can Find Additional Information."

Share Capital of Woodside

As of 24 March 2022, Woodside's issued and outstanding share capital consists of 983,980,823 Woodside Shares, which includes 2,364,596 Woodside Shares reserved for employee share plans.

The liability of each Woodside Shareholder is limited to the amount, if any, unpaid on the Woodside Shares held by that Woodside Shareholder. The Woodside Shares are fully paid and freely transferable.

Rights Attaching to Woodside Shares

Introduction

The rights and liabilities attaching to the New Woodside Shares which will be issued as Share Consideration are set out in the Woodside Constitution, and are also subject to the Corporations Act and ASX Listing Rules, and the listing rules of the NYSE and the LSE.

The following is a summary of the main rights and liabilities attaching to Woodside Shares. This summary does not purport to be exhaustive or to constitute a definitive statement of all of the rights and liabilities attaching to Woodside Shares. Those rights and liabilities involve complex questions of law arising from the interaction of the Woodside Constitution and statutory and common law requirements.

This summary must be read subject to the full text of the Woodside Constitution, attached as Exhibit 3.1 to the registration statement on Form F-4 of which this prospectus forms a part. For details on how to obtain a full copy of the Woodside Constitution, see the section entitled "Where You Can Find Additional Information."

Overview

The New Woodside Shares will be issued fully paid and will rank equally for dividends and other rights with Existing Woodside Shares, with effect from their date of issue.

Under the Corporations Act, the Woodside Constitution has effect as a contract between:

- Woodside and each Woodside Shareholder;
- Woodside and each director and company secretary of Woodside; and
- a Woodside Shareholder and each other Woodside Shareholder.

Accordingly, Participating BHP Shareholders who receive Woodside Shares pursuant to the Merger are taken to receive them subject to the terms of the Woodside Constitution and will be bound by the terms of the Woodside Constitution. The following is a non-exhaustive summary of the provisions of the Woodside Constitution.

Table of Contents

Objects and Purposes

The Woodside Constitution does not contain any limitations on Woodside' s objects and purposes.

Powers of Woodside and Woodside Directors

General Powers

Woodside may exercise in any manner permitted by the Corporations Act, any power which a public company limited by shares may exercise under that legislation. The business of Woodside is managed by or under the direction of the Woodside Directors. The Woodside Directors may exercise all the powers of Woodside except any powers that the Corporations Act or the Woodside Constitution requires Woodside to exercise in a general meeting.

Execution of Documents

Woodside may execute a document with or without the common seal so long as the fixing of the seal is witnessed by, or the document is signed by, either two Woodside Directors or a Woodside Director and a company secretary of Woodside.

Share Capital

Woodside in general meeting may reduce or alter its share capital in any manner allowed or provided for by the Corporations Act and the ASX Listing Rules. The Woodside Board may do anything which is required to give effect to any resolution authorizing reduction or alteration of the share capital of Woodside.

Each Woodside Share is denominated in Australian dollars.

Meetings of Woodside Shareholders and Notices

Woodside Shareholders' rights to attend and vote at shareholder meetings are primarily prescribed by the Corporations Act and the Woodside Constitution. Subject to certain exceptions, each Woodside Shareholder is entitled to receive notice of, attend (whether or not entitled to vote) and vote at general meetings and to receive all notices and other documents required to be sent to Woodside Shareholders under the Woodside Constitution, the Corporations Act and ASX Listing Rules.

A general meeting of Woodside Shareholders must be called by a notice of at least 28 days for a meeting of shareholders in accordance with the Corporations Act. The notice of meeting of Woodside Shareholders must be given to the ASX, each Woodside Shareholder (whether or not such shareholder is entitled to vote at the meeting), each Woodside Director (other than an alternate director) and Woodside' s auditor. The notice must set out the date and time of the meeting (if virtual meeting technology is to be used in holding the meeting, that virtual meeting technology must be reasonable and allow Woodside Shareholders to exercise orally and in writing any rights of Woodside Shareholders to ask questions and make comments), the general nature of the business of the meeting, the date and time at which persons will be taken, for the purpose of the meeting, to hold Woodside Shares and any other information or documents specified by the Corporations Act and the ASX Listing Rules.

Woodside may give a notice of meeting to Woodside Shareholders by serving it personally, sending it by post to, or leaving it at, the address shown in the Woodside Register or any other address, or by sending it by fax or electronically to the address provided by the Woodside Shareholder for the purpose of giving notices.

Woodside must hold an annual general meeting in accordance with the Corporations Act and the ASX Listing Rules. Under the Corporations Act, every public company that has more than one member must hold an annual general meeting at least once in each calendar year, and within five months after the end of its financial year.

Table of Contents

Voting Rights

Subject to any rights or restrictions attached to Woodside Shares, the terms of the Woodside Constitution and voting exclusions under the ASX Listing Rules or the Corporations Act, each outstanding Woodside Share entitles the Woodside Shareholder to one vote on each matter properly submitted to Woodside Shareholders for their vote. At a general meeting of Woodside Shareholders, every Woodside Shareholder entitled to vote in person or by proxy, attorney or representative has:

- one vote on a show of hands; and
- one vote on a poll for every Woodside Share held.

The quorum for a meeting of Woodside Shareholders is three eligible Woodside Shareholders entitled to vote. If more than one joint holder of a Woodside Share is present at a meeting in person or by proxy, attorney or representative, and tenders a vote, the vote of the Woodside Shareholder named first in the Woodside Register will be accepted to the exclusion of the others. Each Woodside Shareholder may vote in person or by proxy. A proxy appointed to attend and vote may exercise the rights of the Woodside Shareholder on the basis and subject to the restrictions provided in the Corporations Act but not otherwise, but may not cast a vote by direct vote (*i.e.*, by casting a vote by sending it to Woodside before the meeting).

A proxy is not revoked by the appointing Woodside Shareholder attending and taking part in the meeting, unless the appointing Woodside Shareholder actually votes at the meeting on the resolution for which the proxy is proposed to be used. A resolution at a general meeting must be decided on a show of hands unless a poll is demanded. A poll may be demanded on any resolution (except a resolution concerning the election of the chairperson of the meeting or, unless the chairperson otherwise determines, the adjournment of a meeting).

If the votes on a proposed resolution are equal, the chairperson of the meeting has a casting vote.

Dividend Rights and Distributions In Kind

Woodside Directors may pay any dividend (including an interim, final or special dividend) that they think the financial position of Woodside justifies, and fix the date for payment.

Woodside Directors may direct payment of a dividend by the distribution of specific assets (including paid-up Woodside Shares or of another body corporate) either generally or to specific Woodside Shareholders.

Woodside Directors may implement a dividend reinvestment plan on any terms as they think fit, under which any dividend due to Woodside Shareholders who participate in the plan may be applied in subscribing for Woodside Shares, subject to the rules of the relevant dividend reinvestment plan.

Redemption and Preferences

Woodside may issue preference shares, but Woodside has not issued and currently has no intention to issue any preference shares.

As of the date of this prospectus, all Woodside Shares have the same rights and preferences. Woodside Shareholders are not entitled to any pre-emptive or preferential rights to acquire additional Woodside Shares.

Issue of Further Woodside Shares

Subject to the Corporations Act, ASX Listing Rules and the Woodside Constitution, Woodside may issue, allot or grant option over or rights in respect of, or otherwise dispose of, shares in Woodside or other securities of Woodside and decide, among others, the terms, rights and restrictions of the securities, as determined by the Woodside Board from time to time.

Table of Contents

Transfer of Woodside Shares

Subject to the Woodside Constitution and the rights attached to Woodside Shares under ASX Listing Rules or the Corporations Act or other applicable legislation, Woodside Shareholders may transfer Woodside Shares by any means permitted by the Corporations Act or by applicable law.

Woodside Directors may refuse to register a transfer of Woodside Shares in circumstances set out in the Woodside Constitution (including but not limited to, those permitted under ASX Listing Rules or ASX Settlement Operating Rules). Where Woodside Directors refuse to register a transfer, Woodside must give written notice of the refusal and the reasons for refusal within the maximum period permitted by the ASX Listing Rules.

Proportional Takeover Provisions

The Woodside Constitution requires Woodside Shareholder approval in relation to any proportional takeover bid. These provisions will cease to apply unless they are renewed by Woodside Shareholders passing a special resolution by the third anniversary of either the date that those rules were adopted or the date those rules were last renewed. These rules were adopted on 2 May 2019 and there is a resolution proposed at the Woodside Shareholders Meeting that Woodside Shareholders approve that these provisions are reinserted for a further 3 years.

Variation of Rights

The Corporations Act provides that the rights attached to a class of shares may be varied or cancelled only:

- with the written consent of members with at least 75% of the votes of the affected class; or
- by special resolution passed at a meeting of the holders of the issued shares of that class.

Number of Woodside Directors

Unless otherwise determined by Woodside Shareholders in general meeting, Woodside must have at least three directors and not more than 12 directors. The Woodside Directors may from time to time determine the number of directors but the maximum applying at any time cannot be reduced except with the approval of Woodside Shareholders in general meeting.

Subject to the Woodside Constitution, the Corporations Act and the number of directors as determined by the Woodside Board (being a number of not more than 12 unless otherwise approved by Woodside Shareholders in general meeting), Woodside Shareholders may by ordinary resolution elect any natural person as a director. Any director appointed by the Woodside Board may hold office only until the next annual general meeting during which, if no election of directors is scheduled to occur, then one Woodside Director must retire from office at the annual general meeting.

Removal and Resignation of Woodside Directors

Woodside Directors may be removed in accordance with Corporations Act and ASX Listing Rules. The Corporations Act provides that Woodside may by ordinary resolution passed at a general meeting remove any Woodside Director, and if thought fit, appoint another person in place of that Woodside Director.

A Woodside Director may resign from office by giving Woodside notice in writing.

Director Remuneration

As remuneration for services, each Non-Executive Director is to be paid or provided with the amount determined by the Woodside Board, which will be payable or provided at the time and in the manner determined by the Woodside Board, but the aggregate remuneration paid or provided to all the Non-Executive Directors in any financial year may not exceed an amount fixed by Woodside in general meeting.

Table of Contents

Any Woodside Director who devotes special attention to the business of Woodside, or who otherwise performs services which in the opinion of the Woodside Board are outside the scope of the ordinary duties of a director, or who at the request of the Woodside Board engages in any journey on the business of Woodside, may be paid extra remuneration as determined by the Woodside Board, subject to the terms of the Woodside Constitution.

The ASX Listing Rules provide limited exceptions to issuing or permitting the issue of equity securities to an executive director made, or taken to have been made, in circumstances without the approval of the holders of the entity's ordinary securities. In addition, the ASX Listing Rules provide that any issuance, or agreement to issue, equity securities under an employee incentive scheme count for the purposes of calculation of the maximum percentage of equity securities that can be issued in any 12-month period without the approval of the holders of the entity's ordinary shares unless the incentive scheme itself has been approved by those holders within the prior three year period.

Disqualification and Retirement of Woodside Directors

A Woodside Director (other than a Woodside Director who is Managing Director) must retire from office at the third annual general meeting after the Woodside Director was elected or most recently re-elected.

An election of Woodside Directors must be held at the annual general meeting each year. If no election of Woodside Directors is scheduled to occur at an annual general meeting then the Woodside Director longest in office since last being elected must retire.

The office of a Woodside Director is vacated on the Woodside Director:

becoming an insolvent under administration, suspending payment generally to creditors or compounding with or assigning such director's estate for the benefit of creditors;

becoming a person of unsound mind or a person who is a patient under laws relating to mental health or whose estate is administered under laws relating to mental health;

being absent from meetings of the Woodside Board during a period of three consecutive calendar months without leave of absence from the Woodside Board where the Woodside Board has not, within 14 days of having been served by the company secretary with a notice giving particulars of the absence, resolved that leave of absence be granted;

resigning office by notice in writing to Woodside;

being removed from office under the Corporations Act;

being prohibited from being a Woodside Director under the Corporations Act; or

themselves, or on any partner, employer or employee of such director, accepting or holding the office of auditor of Woodside.

The office of a Woodside Director who is an employee of Woodside or any of its subsidiaries becomes vacant on the Woodside Director ceasing to be employed but the person concerned is eligible for reappointment or re-election as a Woodside Director in accordance with the Woodside Constitution.

Conflict of Interest

A Woodside Director may:

- (1) hold any office or position (except as auditor) in Woodside, on any terms and at a remuneration as the Woodside Board approves not being a commission on or percentage of turnover; or

Table of Contents

- (2) be or become a director or hold an office or position in any corporation promoted by Woodside, or in which Woodside may be interested, or any other corporation or organization,

and the Woodside Director is not accountable for any benefits received as a shareholder, director or holder of any other office or position in any other corporation or organization.

Each Woodside Director must comply with the Corporations Act in relation to:

- (1) disclosure of matters involving material personal interests and voting on matters involving material personal interests; and
- (2) being present, and voting, at a Woodside Board meeting that considers a matter in which the Woodside Director has a material personal interest.

If a Woodside Director discloses their interest before the transaction is entered into, subject to the Corporations Act:

- (1) a Woodside Director may be counted in a quorum at a Woodside Board meeting that considers, and may vote on, any matter in which that Woodside Director has an interest;
- (2) Woodside may proceed with any transaction that relates to the interest;
- (3) the Woodside Director may participate in the execution of any relevant document by or on behalf of Woodside;
- (4) the Woodside Director may retain benefits under the transaction even though the Woodside Director has the interest; and
- (5) Woodside cannot avoid the transaction merely because of the existence of the Woodside Director's interest.

A Woodside Director must give to Woodside the information which Woodside is required to disclose to the ASX in respect of:

- (1) notifiable interests of the Woodside Director; and
- (2) changes to the notifiable interests of the Woodside Director.

Alternate Woodside Directors

Subject to the Woodside Constitution and with the approval of a majority of the other Woodside Directors, a Woodside Director may appoint a person as an alternate director for a stated period or until the happening of a specified event. The alternate Woodside Director may be removed or suspended from office on receipt at the office of notice from the appointing Woodside Director.

Proceedings of Woodside Directors

The Woodside Board may meet, adjourn and otherwise regulate their meetings as they think fit. The Woodside Board may at any time, and the company secretary on the request of any Woodside Director must, convene a Woodside Board meeting. Unless otherwise determined by the Woodside Board, three Woodside Directors form a quorum. Subject to the Corporations Act, an interested Woodside Director is to be counted in a quorum despite the interest.

A resolution of Woodside Directors is passed if more votes are cast in favor of the resolution than against it. Subject to the Corporations Act, the ASX Settlement Operating Rules, and the ASX Listing Rules the chairperson of that meeting (except when only two Woodside Directors are present or except when only two Woodside Directors are competent to vote on the question then at issue) has a second or casting vote on that resolution.

Table of Contents

A resolution in writing signed by all Woodside Directors or a resolution in writing of which notice has been given to all Woodside Directors and which is signed by a majority of the Woodside Directors entitled to vote on the resolution (not being less than the number required for a quorum at a meeting of the Woodside Board) is as valid as if it had been passed at a meeting of the Woodside Board duly called and constituted and may consist of several documents in the same form each signed by one or more of the Woodside Directors.

Chair

The Woodside Board may elect a Chair or Deputy Chair of its meetings and determine the period for which each is to hold office. If no Chair or Deputy Chair is elected or if at any meeting the Chair and the Deputy Chair are not present at the time specified for holding the meeting, the Woodside Directors present may choose one of their number to be Chair of the meeting.

Meetings by Telephone or Other Means of Communication

The Woodside Board may meet either in person, by telephone, by video conferencing facility or by using any other technology consented to by all the Woodside Directors. A consent may be a standing one. A Woodside Director may only withdraw consent within a reasonable period before the meeting. A meeting conducted by telephone, video conference or other means of communication is deemed to be held at the place agreed on by the Woodside Directors attending the meeting if at least one of the Woodside Directors present at the meeting was at that place for the duration of the meeting.

Woodside Managing Director

The Woodside Board may appoint a person as a Managing Director either for a specified term (but not for life) or without specifying a term. The Woodside Board may delegate any of the powers of the Woodside Board to the Managing Director on the terms and subject to any restrictions the Woodside Board decides, so as to be concurrent with, or to the exclusion of, the powers of the Woodside Board. The Woodside Board can revoke the delegation at any time.

Woodside Company Secretary

The Woodside company secretary is to be appointed by the Woodside Directors.

Officer' s Indemnity

Woodside must, to the extent the person is not otherwise indemnified, indemnify every officer and employee of Woodside and its wholly owned subsidiaries and may indemnify its auditor against a liability incurred as a Woodside officer, employee or auditor to a person (other than Woodside or a related body corporate) including a liability incurred as a result of appointment or nomination by Woodside or subsidiary as a trustee or as an officer of another corporation or body (including a statutory authority), unless the liability arises out of conduct involving a lack of good faith.

Capitalizing Profits

Woodside may capitalize and distribute among Woodside Shareholders undivided profits and other amounts available for distribution. Woodside Shareholders are entitled to participate in that capital distribution if entitled to receive dividends and in the same proportions.

Reduction of Capital

Woodside may reduce or alter its share capital in any manner allowed or provided for by the Corporations Act and the ASX Listing Rules in a general meeting. An equal reduction of capital must be approved by Woodside Shareholders by way of an ordinary resolution. A selective reduction of capital must be approved by Woodside Shareholders by way of a special resolution.

Table of Contents

Winding Up

If Woodside is wound up, a liquidator may divide among all or any of the contributories, as the liquidator thinks fit, in specie or kind, any part of the assets of Woodside, and may vest any part of the assets of Woodside in trustees on any trusts for the benefit of all or any of the contributories as the liquidator thinks fit. Any division may be otherwise than in accordance with the legal rights of the contributories and, in particular, any class may be given preferential or special rights or may be excluded altogether or in part, but if any division otherwise than in accordance with the legal rights of the contributories is determined, any contributory who would be prejudiced by the division has a right to dissent and ancillary rights as if the determination were a special resolution passed under the Corporations Act relating to the sale or transfer of Woodside's assets by a liquidator in a voluntary winding up.

Australian Takeover Provisions

Woodside is incorporated in and has its head office and central place of management in Australia. Accordingly, the following Australian legislation and regulations in relation to takeovers apply to Woodside:

- the Corporations Act, particularly Chapter 6 (the relevant provisions of which are outlined below);
- the Foreign Acquisitions and Takeovers Act 1975 (Cth) ("FATA"); and
- the Competition and Consumer Act 2010 (Cth).

The main Australian regulatory bodies are:

- Australian Securities and Investments Commission ("ASIC"), which is responsible for administering and enforcing the Corporations Act;
- the Australian Takeovers Panel, which is the principal forum for resolving disputes relating to a takeover during the bid period; and
- the ASX.

If a proposed investor is a foreign company for the purposes of FATA, the acquisition may need to be approved by the Treasurer of Australia acting on the advice of the FIRB.

If competition issues are likely to arise, the ACCC may become involved. The ACCC administers the *Competition and Consumer Act 2010* (Cth).

Chapter 6 of the Corporations Act

Takeover Prohibition

Section 606 of the Corporations Act prohibits a person from acquiring a "relevant interest" in voting shares in a listed company or an unlisted company with more than 50 shareholders if, because of the acquisition, that person's or someone else's voting power increases:

- (1) from 20% or below to more than 20%; or
- (2) from a starting point that is above 20% and below 90%.

A person generally has a "relevant interest" in a share if they hold the share, have the power to exercise or control the exercise of the voting power attached to the share, or have the power to dispose of or control the dispose of the share. The term "voting power" is defined in broad terms and captures any relevant interest in shares held by a person's "associates."

These concepts are broad and, for example, a person can have a relevant interest and voting power in a share as a result of an agreement to purchase the share (even a conditional agreement) or a call option to acquire the share.

Table of Contents

The concept of “associates” is complex, and generally includes:

- (1) a person with whom the primary person is acting, or proposing to act, in concert in relation to the company’ s affairs;
- (2) persons with whom the primary person has entered or proposed to enter into an agreement for the purpose of controlling or influencing the composition of the company’ s board or the conduct of the company’ s affairs; and
- (3) companies that the primary person controls, that control the primary person, or that are controlled by an entity that controls the primary person.

Exceptions to the Australian Takeovers Prohibition

If a person wishes to acquire more than 20% of a company, or increase a holding which is already above 20% (but less than 90%), the person must do so under an exception. There are four principal exceptions to the general prohibition under Section 606 of the Corporations Act which are relevant in this context:

- (1) Takeover bids;
- (2) Schemes of arrangement;
- (3) “Creeping” acquisitions; or
- (4) Shareholder approved acquisitions.

Proportional Takeover Provisions

In addition to these takeover offer requirements, the Corporations Act provides that a listed entity may include provisions in its constitution which effectively require disinterested shareholder approval of any proposed takeover bid that is for less than all of the voting securities issued by the entity (other than those held by the bidder). In effect, this mean that a transfer of shares in relation to a proportional takeover bid must not be registered unless shareholders pass a resolution to approve the bid. The Woodside Constitution includes provisions of this type. It provides that where an offer has been made under a proportional takeover bid (meaning an off-market bid for a specified proportion of the securities in the bid class) in respect of shares included in a class of shares in Woodside, registration of a transfer to effect a contract resulting from the acceptance of an offer made under the proportional takeover bid is prohibited unless and until a resolution to approve the proportional takeover bid is passed in accordance with the Woodside Constitution. The Woodside Board must convene a meeting of the persons entitled to vote on a resolution to approve the proportional takeover bid for the purposes of considering and, if thought fit, passing the resolution. Any shareholder that (i) is not the bidder or an associate of the bidder and (ii) at the end of the day on which the first offer under the proportional takeover bid was made, held shares included in that class, is entitled to vote on the resolution. A resolution to approve the proportional takeover bid is taken to have been passed if a majority of votes validly cast in favor of the resolution is greater than 50%. The Woodside Board must ensure that the resolution to approve the proportional takeover bid is convened, and voted on in accordance with the Woodside Constitution, before the approving resolution deadline in relation to the proportional takeover bid. The approving resolution deadline is the 14th day before the last day of the bid period and during which the offers under the proportional takeover bid remain open or a later day allowed by ASIC. The proportional takeover provisions do not apply to full takeover bids and must be refreshed every 3 years by a special resolution of shareholders. The proportional takeover bid provisions in Woodside’ s Constitution were adopted on 2 May 2019. There is a resolution proposed at the Woodside Shareholders Meeting that Woodside Shareholders approve that these provisions are reinserted for a further 3 years.

Foreign Investment

FATA

Foreign investment in, and ownership of, Australian businesses, entities and land is regulated under the FATA. The FATA is administered by the Foreign Investment Review Board Secretariat a division of the

Table of Contents

Treasury Department of the Australian Government. The ultimate responsibility for making decisions on foreign investment proposals rests with the Treasurer of the Australian Government.

Investment proposals by foreign persons may need to be notified to the Australian Government and may require prior approval from the Treasurer in accordance with the FATA. In general, private sector foreign persons investors must notify the Australian Government and get prior approval before acquiring a substantial interest in an Australian entity that is valued above certain monetary thresholds. Notification may also be required in relation to acquisitions of interests in a foreign entity that is a national security business under the FATA or is an Australian land-rich entity, or in respect of a foreign government investor, the acquisition of an interest in a foreign entity that holds a substantial interest in Australian subsidiaries are valued above the applicable monetary thresholds.

The FATA and regulations under the FATA provide the relevant monetary thresholds that apply. From 1 January 2021, a A\$0 monetary threshold applies to acquisitions by foreign investors of interests in national security businesses and national security land. Acquisitions of interests in a “national security business” or “national security land” are referred to as national security actions. A business is a national security business if it is carried on wholly or partly within Australia, whether in anticipation of profit or gain, and it is a reporting entity (responsible entity or a direct interest holder) in relation to a critical infrastructure asset (within the meaning of the SOCI Act, as enacted).

As Woodside is considered a reporting entity of a critical gas asset within the meaning of the SOCI Act, it is considered a “national security business” under the FATA. Investments of a 10% or more (or less than 10% with an ability to influence, participate in or control the entity/business), interest by all foreign investors in a national security business must be notified to the Australian Government and require prior approval from the Australian Treasurer in accordance with the FATA. Accordingly, acquisitions of interests of 10% or more (or investments of less than 10% with an ability to influence, participate in or control the entity/business) in Woodside, would require prior approval from the Australian Treasurer.

CFIUS

To the extent entities are engaged in interstate commerce in the United States, Australian investment in those entities is subject to the review by CFIUS, pursuant to Section 721 of the DPA. CFIUS is an interagency committee in the U.S. Federal Government that is authorized to review certain transactions involving foreign investment in the United States and certain real estate transactions by foreign persons, in order to determine the effect of such transactions on the national security of the United States. Parties to such transactions may affirmatively seek review by CFIUS, or CFIUS may initiate its own review of such transactions.

If CFIUS determines that there are no unresolved national security risks arising as a result of a reviewed transaction or that other provisions of law provide adequate and appropriate authority to address the risks, then CFIUS will advise the parties to the transaction in writing that CFIUS has concluded all action under the DPA with respect to the transaction. If CFIUS determines that a reviewed transaction presents national security risks and that other provisions of law do not provide adequate authority to address the risks, then CFIUS may seek to mitigate such risks by entering into an agreement or imposing conditions on the parties, or if the risks cannot be mitigated, by suspending the transaction. CFIUS may also refer the case to the President of the United States for such a decision.

Minority Shareholders

The Corporations Act also provides protection for minority shareholders where the conduct of a company’s affairs or an act or omission (including a resolution of members or a class or members) by a company is contrary to the interests of the members as a whole, or oppressive to, unfairly prejudicial to, or unfairly discriminatory against a member or a group of members.

Table of Contents

Substantial Holdings

Following Implementation of the Merger, Woodside Shareholders will be subject to certain reporting requirements under the Exchange Act. Woodside Shareholders owning more than 5% of any voting class of equity securities registered pursuant to Section 12 of the Exchange Act must comply with disclosure obligations under Section 13 of the Exchange Act. Sections 13(d) and 13(g) of the Exchange Act require any person or group of persons who directly or indirectly acquires or has beneficial ownership of more than 5% of a voting class of an issuer's equity securities to file beneficial ownership reports electronically with the SEC on either Schedule 13D or on short form Schedule 13G, as appropriate.

Both Schedule 13D and Schedule 13G require background information about the reporting persons, including the name, address, and citizenship or place of organization of each reporting person, the amount of the securities beneficially owned and aggregate beneficial ownership percentage, and whether voting and investment power is held solely by the reporting persons or shared with others.

DESCRIPTION OF WOODSIDE AMERICAN DEPOSITARY SHARES

Each holder of BHP ADSs as of the ADS Distribution Record Date will receive in the Merger, in lieu of New Woodside Shares, American Depositary Shares of Woodside (including the New Woodside ADSs, the “Woodside ADSs”) issued by Citibank, N.A. as the depository bank for the Woodside ADSs (the “Woodside Depository”), with each Woodside ADS representing one Woodside Share. Holders of BHP ADSs will not be able to trade the New Woodside Shares underlying the New Woodside ADSs received as a Share Consideration for the BHP ADSs before such New Woodside Shares are deposited with the Woodside Depository, and the New Woodside ADSs are issued and delivered to the BHP ADS holders through the BHP Depository. A registration statement on Form F-6 (Registration No. 333-201669) was filed with the SEC on 23 January 2015, and declared effective 9 February 2015, with respect to Existing Woodside ADSs. Existing Woodside ADSs currently trade on the U.S. over-the-counter market through a sponsored ADR facility under the symbol “WOPEY.” Woodside has applied to list the Woodside ADSs, including those issued to the Participating BHP Shareholders holding BHP ADSs in connection with the Merger, on the NYSE under the symbol “WDS” and intends to file a registration statement on Form F-6 (the “F-6 Registration Statement”) with the SEC with respect to the New Woodside ADSs.

Citibank, N.A. has agreed to act as the depository bank for the Woodside ADSs. Citibank’s depository offices are located at 388 Greenwich Street, New York, New York 10013. American Depositary Shares are frequently referred to as “ADSs” and represent ownership interests in securities that are on deposit with the Woodside Depository. ADSs may be represented by certificates that are commonly known as “American Depositary Receipts” or “ADRs.” The depository bank typically appoints a custodian to safekeep the securities on deposit. In the case of Woodside ADSs, the custodian is Citicorp Nominees Pty Limited, located at Level 15, 120 Collins Street, Melbourne VIC 3000, Australia (the “Woodside Custodian”).

Woodside has appointed Citibank, N.A. as the Woodside Depository pursuant to the 2015 Deposit Agreement, which will be amended and restated in connection with the Merger to, among other things, reflect Woodside’s status as an SEC reporting company and certain regulatory changes in Australia and in the United States. A copy of the 2015 Woodside Deposit Agreement is on file with the SEC under cover of the registration statement on Form F-6 (Registration No. 333-201669), filed with the SEC on 23 January 2015 and declared effective 9 February 2015, and as an exhibit to the registration statement of which this prospectus forms a part. The form of the Woodside Deposit Agreement Amendment is included as an exhibit to the registration statement of which this prospectus forms a part and will be included as an exhibit to the Form F-6 Registration Statement. Woodside ADS holders may also obtain a copy of the Woodside Deposit Agreement from the SEC’s website at www.sec.gov.

Woodside is providing Woodside ADS holders with a summary description of the material terms of the Woodside Deposit Agreement and of the material rights of holders or beneficial owners of Woodside ADSs. Woodside ADS holders should remember that summaries by their nature lack the precision of the information summarized and that the rights and obligations of a holder or beneficial owner of Woodside ADSs will be determined by reference to the terms of the Woodside Deposit Agreement and not by this summary. Woodside urges holders to review the Woodside Deposit Agreement in its entirety. *The portions of this summary description that are italicized describe matters that may be relevant to the ownership of Woodside ADSs but that may not be contained in the Woodside Deposit Agreement.*

Rights of Holders and Beneficial Owners of Woodside ADSs

Each Woodside ADS represents the right to receive, and to exercise the beneficial ownership interests in, one (1) fully paid Woodside Share that is on deposit with the Woodside Depository and/or the Woodside Custodian. A Woodside ADS also represents the right to receive, and to exercise the beneficial ownership interests in, any other property (such as securities, cash or other property) received by the Woodside Depository or the Woodside Custodian on behalf of the beneficial owner of the Woodside ADS but that has not been distributed to the beneficial owners of Woodside ADSs because of legal restrictions or practical considerations.

Table of Contents

Woodside and the Woodside Depositary may agree to change the ADS-to-share ratio by amending the Woodside Deposit Agreement. This amendment may give rise to, or change, the depositary fees payable by holders and beneficial owners of Woodside ADSs. The Woodside Custodian, the Woodside Depositary and their respective nominees will hold all deposited property for the benefit of the holders and beneficial owners of Woodside ADSs. The deposited property does not constitute the proprietary assets of the Woodside Depositary, the Woodside Custodian or their nominees. Beneficial ownership in the deposited property will, during the term of the Woodside Deposit Agreement, be vested in the beneficial owners of the Woodside ADSs. The Woodside Depositary, the Woodside Custodian and their respective nominees will be the record holders of the deposited property represented by the Woodside ADSs for the benefit of the holders and beneficial owners of the corresponding Woodside ADSs. A beneficial owner of Woodside ADSs may or may not be the holder of Woodside ADSs. Beneficial owners of Woodside ADSs will be able to receive, and to exercise beneficial ownership interests in, the deposited property only through the registered holders of the Woodside ADSs, registered holders of the Woodside ADSs (on behalf of the applicable beneficial owners of Woodside ADSs), only through the Woodside Depositary, and the Woodside Depositary (on behalf of the holders and beneficial owners of the corresponding Woodside ADSs) directly, or indirectly, through the Woodside Custodian or their respective nominees, in each case upon the terms of the Woodside Deposit Agreement.

Holders or beneficial owners of Woodside ADSs will become a party to the Woodside Deposit Agreement and therefore will be bound to its terms and to the terms of any ADR that represents such Woodside ADSs. The Woodside Deposit Agreement and the ADR specify Woodside's rights and obligations as well as rights and obligations as a holder or beneficial owner of Woodside ADSs and those of the Woodside Depositary. Woodside ADS holders appoint the Woodside Depositary to act on their behalf in certain circumstances as an attorney-in-fact.

In addition, applicable laws and regulations may require holders to satisfy reporting requirements and obtain regulatory approvals in certain circumstances. Woodside ADS holders are solely responsible for complying with such reporting requirements and obtaining such approvals. None of the Woodside Depositary, the Woodside Custodian, Woodside or any of their respective agents or affiliates shall be required to take any actions whatsoever on Woodside ADS holders' behalf to satisfy such reporting requirements or obtain such regulatory approvals under applicable laws and regulations.

Woodside will not treat holders or beneficial owners of Woodside ADSs as Woodside Shareholders and they will not have direct shareholder rights. The Woodside Depositary will hold on Woodside ADS holders' behalf the shareholder rights attached to the Woodside Shares underlying such Woodside ADSs. Holders or beneficial owners of Woodside ADSs will be able to exercise the shareholders rights for the Woodside Shares represented by the Woodside ADSs through the Woodside Depositary only to the extent contemplated in the Woodside Deposit Agreement. To exercise any shareholder rights not contemplated in the Woodside Deposit Agreement holders or beneficial owners of Woodside ADSs will need to arrange for the cancellation of such Woodside ADSs in accordance with the Woodside Deposit Agreement and become a direct shareholder.

Manner of Holding Woodside ADSs

The manner in which holders own the Woodside ADSs (e.g., in a brokerage account vs. as registered holder, or as holder of certificated vs. uncertificated Woodside ADSs) may affect such holder's rights and obligations, and the manner in which, and extent to which, the Woodside Depositary's services are made available to such holder. Owners of Woodside ADSs may hold their Woodside ADSs either by means of an ADR registered in such owner's name, through a brokerage or safekeeping account, or through an account established by the Woodside Depositary in such owner's name reflecting the registration of uncertificated Woodside ADSs directly on the books of the Woodside Depositary (commonly referred to as the "direct registration system" or "DRS"). The direct registration system reflects the uncertificated (book-entry) registration of ownership of Woodside ADSs by the Woodside Depositary. Under the direct registration system, ownership of Woodside ADSs is evidenced by periodic statements issued by the Woodside Depositary to the holders of the Woodside ADSs. The

Table of Contents

direct registration system includes automated transfers between the Woodside Depository and The Depository Trust Company (“DTC”), the central book-entry clearing and settlement system for equity securities in the United States. *If a holder decides to hold Woodside ADSs through a brokerage or safekeeping account, such holder must rely on the procedures of the broker or bank to assert the holder’s rights as a beneficial owner of Woodside ADSs. Banks and brokers typically hold securities such as the Woodside ADSs through clearing and settlement systems such as DTC. The procedures of such clearing and settlement systems may limit such holder’s ability to exercise rights as a beneficial owner of Woodside ADSs.* Woodside ADS holders should consult with their broker or bank if they have any questions concerning these limitations and procedures. All Woodside ADSs held through DTC will be registered in the name of a nominee of DTC (currently Cede & Co.). This summary description assumes the holder has opted to own the Woodside ADSs directly by means of a Woodside ADS registered in such holder’s name and, as such, Woodside will refer to Woodside ADS holders as the “holder.”

The registration of the Woodside Shares in the name of the Woodside Depository or the Woodside Custodian will, to the maximum extent permitted by applicable law, vest in the Woodside Depository or the Woodside Custodian the record ownership in the applicable Woodside Shares with the beneficial ownership rights and interests in such Woodside Shares being at all times vested with the beneficial owners of the Woodside ADSs representing the Woodside Shares. The Woodside Depository or the Woodside Custodian will at all times be entitled to exercise the beneficial ownership rights in all deposited property, in each case only on behalf of the holders and beneficial owners of the Woodside ADSs representing the deposited property.

Dividends and Distributions

Holders of Woodside ADSs generally have the right to receive the distributions Woodside makes on the securities deposited with the Woodside Custodian. A holder’s receipt of these distributions may be limited, however, by practical considerations and legal limitations. Holders of Woodside ADSs will receive such distributions under the terms of the Woodside Deposit Agreement in proportion to the number of Woodside ADSs held as of the specified record date, after deduction of the applicable fees, taxes and expenses.

Distributions of Cash

Whenever Woodside makes a cash distribution for the securities on deposit with the Woodside Custodian, Woodside will give prior notice to the Woodside Depository and Woodside will deposit the funds with the Woodside Custodian. Upon receipt of confirmation of the deposit of the requisite funds, the Woodside Depository will arrange for the funds received in a currency other than U.S. dollars to be converted into U.S. dollars and for the distribution of the U.S. dollars to the holders, in accordance with the terms of the Woodside Deposit Agreement.

The conversion into U.S. dollars will take place only if practicable and if the U.S. dollars are transferable to the United States. The Woodside Depository will apply the same method for distributing the proceeds of the sale of any property (such as undistributed rights) held by the Woodside Custodian in respect of securities on deposit.

The distribution of cash will be made in accordance with the record date set by the Woodside Depository (if applicable) and will be net of the fees, expenses and taxes and governmental charges payable by holders under the terms of the Woodside Deposit Agreement. The Woodside Depository will hold any cash amounts it is unable to distribute in a non-interest bearing account for the benefit of the applicable holders and beneficial owners of Woodside ADSs until the distribution can be effected or the funds that the Woodside Depository holds must be escheated as unclaimed property in accordance with the laws of the relevant states of the United States.

Distributions of Shares

Whenever Woodside pays a dividend in or makes a free distribution of Woodside Shares for the securities on deposit with the Woodside Custodian, Woodside will give prior notice to the Woodside Depository and

Table of Contents

Woodside will deposit the applicable number of Woodside Shares with the Woodside Custodian. Upon receipt of confirmation of such deposit, the Woodside Depository will, in accordance with the record date established by the Woodside Depository, either (i) distribute to holders (in proportion to the number of Woodside ADSs held) new Woodside ADSs representing the Woodside Shares deposited by Woodside with the Woodside Custodian or (ii) modify the ADS-to-share ratio, in which case each Woodside ADS held will represent rights and interests in the additional Woodside Shares so deposited. Only whole new Woodside ADSs will be distributed. Fractional entitlements will be sold and the proceeds of such sale will be distributed as in the case of a cash distribution.

The distribution of new Woodside ADSs or the modification of the ADS-to-share ratio upon a distribution of Woodside Shares will be made net of the fees, expenses, taxes and governmental charges payable by holders under the terms of the Woodside Deposit Agreement. In order to pay such taxes or governmental charges, the Woodside Depository may sell all or a portion of the new Woodside Shares so distributed.

No such distribution of new Woodside ADSs will be made if it would violate a law (e.g., the U.S. securities laws). If the Woodside Depository does not distribute new Woodside ADSs as described above, it may sell the Woodside Shares received upon the terms described in the Woodside Deposit Agreement and will distribute the proceeds of the sale as in the case of a distribution of cash.

Distributions of Rights

Whenever Woodside intends to distribute rights to subscribe for additional Woodside Shares, Woodside will give prior notice to the Woodside Depository and Woodside will assist the Woodside Depository in determining whether it is lawful and reasonably practicable to distribute rights to subscribe for additional Woodside ADSs to holders.

The Woodside Depository will establish procedures to distribute rights to subscribe for additional Woodside ADSs to holders in accordance with the record date set by the Woodside Depository and to enable such holders to exercise such rights if it is lawful and reasonably practicable to make the rights available to holders of Woodside ADSs, and if Woodside provides reasonably satisfactory documentation contemplated in the Woodside Deposit Agreement (such as opinions to address the lawfulness of the transaction). Holders of Woodside ADSs may have to pay fees, expenses, taxes and other governmental charges to subscribe for the new Woodside ADSs upon the exercise of their rights. The Woodside Depository is not obligated to establish procedures to facilitate the exercise by holders of rights to subscribe for new Woodside Shares other than in the form of Woodside ADSs.

The Woodside Depository will not distribute the rights to a holder if:

Woodside does not timely request that the rights be distributed to such holder or Woodside requests that the rights not be distributed to such holder; or

Woodside fails to deliver reasonably satisfactory documents to the Woodside Depository; or

The Woodside Depository determines it is not reasonably practicable to distribute the rights.

The Woodside Depository will sell the rights that are not exercised or not distributed if such sale is lawful and reasonably practicable. The proceeds of such sale (net of the fees, expenses and taxes and governmental charges payable by holders under the terms of the Woodside Deposit Agreement) will be distributed to holders as in the case of a cash distribution. If the Woodside Depository is unable to sell the rights, it will allow the rights to lapse.

Elective Distributions

Whenever Woodside intends to distribute a dividend payable at the election of shareholders either in cash or in additional shares, Woodside will give prior notice thereof to the Woodside Depository and will indicate

Table of Contents

whether Woodside wishes the elective distribution to be made available to holders of Woodside ADSs. In such case, Woodside will assist the Woodside Depositary in determining whether such distribution is lawful and reasonably practicable.

The Woodside Depositary will make the election available to Woodside ADS holders only if it is reasonably practicable and if Woodside has provided reasonably satisfactory documentation contemplated in the Woodside Deposit Agreement. In such case, the Woodside Depositary will establish procedures to enable holders to elect to receive either cash or additional Woodside ADSs, in each case as described in the Woodside Deposit Agreement and in accordance with the record date determined by the Woodside Depositary.

If the election is not made available to a Woodside ADS holder, such holder will receive either cash or additional Woodside ADSs, depending on what a shareholder in Australia would receive upon failing to make an election, as more fully described in the Woodside Deposit Agreement.

Other Distributions

Whenever Woodside intends to distribute property other than cash, Woodside Shares or rights to subscribe for additional Woodside Shares, Woodside will notify the Woodside Depositary in advance and will indicate whether Woodside wishes such distribution to be made to holders of Woodside ADSs. If so, Woodside will assist the Woodside Depositary in determining whether such distribution to holders is lawful and reasonably practicable.

If it is reasonably practicable to distribute such property to Woodside ADS holders and if Woodside provides to the Woodside Depositary reasonably satisfactory documentation contemplated in the Woodside Deposit Agreement, the Woodside Depositary will distribute the property to the holders (in proportion to the number of Woodside ADSs held respectively) in a manner it deems practicable and in accordance with the record date determined by the Woodside Depositary.

The distribution will be made net of fees, expenses, taxes and governmental charges payable by holders under the terms of the Woodside Deposit Agreement. In order to pay such taxes and governmental charges, the Woodside Depositary may sell all or a portion of the property received.

The Woodside Depositary will not distribute the property to Woodside ADS holders and will sell the property if:

Woodside does not request that the property be distributed to Woodside ADS holders or if Woodside requests that the property not be distributed to Woodside ADS holders; or

Woodside does not deliver reasonably satisfactory documents to the Woodside Depositary; or

The Woodside Depositary determines that all or a portion of the distribution to Woodside ADS holders is not reasonably practicable.

The proceeds of such a sale will be distributed to holders as in the case of a cash distribution.

Redemption

Whenever Woodside decides to redeem any of the securities on deposit with the Woodside Custodian, Woodside will notify the Woodside Depositary in advance. If it is practicable and if Woodside provides reasonably satisfactory documentation contemplated in the Woodside Deposit Agreement, the Woodside Depositary will provide notice of the intended exercise by Woodside of the redemption rights to the holders.

The Woodside Custodian will be instructed to surrender the Woodside Shares being redeemed against payment of the applicable redemption price. The Woodside Depositary will convert into U.S. dollars upon the

Table of Contents

terms of the Woodside Deposit Agreement any redemption funds received in a currency other than U.S. dollars and will establish procedures to enable holders to receive the net proceeds from the redemption upon surrender of their Woodside ADSs to the Woodside Depository. Woodside ADS holders may have to pay fees, expenses, taxes and other governmental charges upon the redemption of their Woodside ADSs. If less than all Woodside ADSs are being redeemed, the Woodside ADSs to be retired will be selected by lot or on a *pro rata* basis, as the Woodside Depository may determine.

Changes Affecting Woodside Shares

The Woodside Shares held on deposit for Woodside ADSs may change from time to time. For example, there may be a change in nominal or par value, split-up, cancellation, consolidation or any other reclassification of such Woodside Shares or a recapitalization, reorganization, merger, consolidation or sale of assets of Woodside.

If any such change were to occur, the Woodside ADSs would, to the extent permitted by law and the Woodside Deposit Agreement, represent the right to receive the property received or exchanged in respect of the Woodside Shares held on deposit. The Woodside Depository may in such circumstances deliver new Woodside ADSs to holders, amend the Woodside Deposit Agreement, the ADRs and the applicable Registration Statement(s) on Form F-6, call for the exchange of existing Woodside ADSs for new Woodside ADSs and take any other actions that are appropriate to reflect as to the Woodside ADSs the change affecting the Woodside Shares. If the Woodside Depository may not lawfully distribute such property to all holders, the Woodside Depository may sell such property and distribute the net proceeds (net of the fees, expenses and taxes and governmental charges payable by holders under the terms of the Woodside Deposit Agreement) to Woodside ADS holders as in the case of a cash distribution.

Issuance of Woodside ADSs upon Deposit of Woodside Shares

The New Woodside Shares being distributed to holders of BHP ADSs in the Merger will be deposited with the Woodside Custodian. Upon receipt of confirmation of such deposit, the Woodside Depository will issue and deliver the corresponding New Woodside ADSs to the BHP Depository, subject to payment of the applicable Woodside Depository and BHP Depository fees, taxes and expenses. The BHP Depository has confirmed that it will distribute such Woodside ADSs to holders of BHP ADSs as of the ADS Distribution Record Date pursuant to the terms of the BHP Deposit Agreement. No fractional New Woodside ADSs will be distributed to holders of BHP ADSs. All fractional entitlements to New Woodside ADSs will be aggregated and sold by the BHP Depository and the net cash proceeds (after deduction of applicable fees, taxes and expenses) will be distributed to the BHP ADS holders entitled thereto. The BHP Depository will announce the ADS Distribution Record Date for holders of BHP ADSs entitled to receive New Woodside ADSs. The distribution of New Woodside ADSs will be made net of the fees, expenses, taxes and governmental charges payable by holders under the terms of the BHP Deposit Agreement and Woodside Deposit Agreement. In order to pay such taxes or governmental charges, the BHP Depository may sell all or a portion of the New Woodside ADSs so distributed.

The Woodside Depository also may create Woodside ADSs on behalf of Woodside Shareholders who deposit Woodside Shares with the Woodside Custodian. The Woodside Depository will deliver these Woodside ADSs to the person indicated by the depositing shareholder (or broker) only after any applicable issuance fees and any charges and taxes payable for the transfer of the Woodside Shares to the Woodside Custodian have been paid. The ability to deposit Woodside Shares and receive Woodside ADSs may be limited by U.S. and Australia legal considerations applicable at the time of deposit.

The issuance of Woodside ADSs may be delayed until the Woodside Depository or the Woodside Custodian receives confirmation that all required approvals have been given and that the Woodside Shares have been duly transferred to the Woodside Custodian. The Woodside Depository will only issue Woodside ADSs in whole numbers.

Table of Contents

Holders of Woodside Shares making a deposit of Woodside Shares will be responsible for transferring good and valid title of such Woodside Shares to the Woodside Depository. As such, the depositing holder will be deemed to represent and warrant that:

The Woodside Shares are duly authorized, validly issued, fully paid, non-assessable and legally obtained.

All preemptive (and similar) rights, if any, with respect to such Woodside Shares have been validly waived or exercised.

The depositing Woodside Shareholder (or broker) is duly authorized to deposit the Woodside Shares.

The Woodside Shares presented for deposit are free and clear of any lien, encumbrance, security interest, charge, mortgage or adverse claim, and are not, and the Woodside ADSs issuable upon such deposit will not be, "restricted securities" (as defined in the Woodside Deposit Agreement).

The Woodside Shares presented for deposit have not been stripped of any rights or entitlements.

If any of the representations or warranties are false in any way, Woodside and the Woodside Depository may, at the depositing Woodside Shareholder's (or broker's) cost and expense, take any and all actions necessary to correct the consequences of the misrepresentations.

Transfer, Combination and Split Up of Woodside ADRs

Woodside ADR holders will be entitled to transfer, combine or split up Woodside ADRs and the Woodside ADSs evidenced thereby. For transfers of Woodside ADRs, Woodside ADS holders will have to surrender the Woodside ADRs to the Woodside Depository and also must:

ensure that the surrendered Woodside ADR is properly endorsed or otherwise in proper form for transfer;

provide such proof of identity and genuineness of signatures;

provide any transfer stamps required by the State of New York or the United States; and

pay all applicable fees, charges, expenses, taxes and other government charges payable by Woodside ADR holders pursuant to the terms of the Woodside Deposit Agreement, upon the transfer of Woodside ADRs.

To have Woodside ADRs either combined or split up, holders must surrender the Woodside ADRs in question to the Woodside Depository with the request to have them combined or split up, and must pay all applicable fees, charges, expenses, taxes and other government charges payable by Woodside ADR holders, pursuant to the terms of the Woodside Deposit Agreement, upon a combination or split up of Woodside ADRs.

Withdrawal of Woodside Shares Upon Cancellation of Woodside ADSs

Woodside ADS holders will be entitled to present Woodside ADSs to the Woodside Depository for cancellation and then receive the corresponding number of underlying Woodside Shares represented by such Woodside ADSs at the Woodside Custodian's offices. The ability to withdraw the Woodside Shares held in respect of the Woodside ADSs may be limited by U.S. and Australian legal considerations applicable at the time of withdrawal. In order to withdraw the Woodside Shares represented by Woodside ADSs, holders will be required to pay to the Woodside Depository the fees for cancellation of Woodside ADSs and any charges, expenses, taxes and governmental charges payable upon the transfer of the Woodside Shares. Woodside ADS holders assume the risk for delivery of all funds and securities upon withdrawal. Once canceled, the Woodside ADSs will not have any rights under the Woodside Deposit Agreement.

Table of Contents

Woodside ADS holders who hold Woodside ADSs registered in their name may be asked to provide proof of identity and genuineness of any signature and such other documents as the Woodside Depository may deem appropriate before it will cancel such Woodside ADSs. The withdrawal of the Woodside Shares represented by the Woodside ADSs may be delayed until the Woodside Depository receives satisfactory evidence of compliance with all applicable laws and regulations. Woodside ADS holders should keep in mind that the Woodside Depository will only accept Woodside ADSs for cancellation that represent a whole number of securities on deposit.

Woodside ADS holders will have the right to withdraw the securities represented by their Woodside ADSs at any time except for:

Temporary delays that may arise because (i) the transfer books for the Woodside Shares or Woodside ADSs are closed, or (ii) Woodside Shares are immobilized on account of a Woodside shareholders meeting or a payment of dividends.

Obligations to pay fees, taxes and similar charges.

Restrictions imposed because of laws or regulations applicable to Woodside ADSs or the withdrawal of securities on deposit.

The Woodside Deposit Agreement may not be modified to impair the right to withdraw the securities represented by the Woodside ADSs except to comply with mandatory provisions of law.

Voting Rights

Woodside ADS holders generally have the right under the Woodside Deposit Agreement to instruct the Woodside Depository to exercise the voting rights for the Woodside Shares represented by their Woodside ADSs. The voting rights of holders of Woodside Shares are described in Section 4.10 of the Woodside Deposit Agreement.

At Woodside's request, the Woodside Depository will distribute to holders any notice of Woodside shareholders meetings received from Woodside together with information explaining how to instruct the Woodside Depository to exercise the voting rights of the securities represented by Woodside ADSs. In lieu of distributing such materials, the Woodside Depository may distribute to holders of Woodside ADSs instructions on how to retrieve such materials upon request.

If the Woodside Depository timely receives voting instructions from a holder of Woodside ADSs, it will endeavor to vote (or cause the Woodside Custodian to vote) the securities (in person or by proxy) represented by the holder's Woodside ADSs in accordance with such voting instructions.

If the Woodside Depository does not receive a holder's voting instructions in a timely manner, or if the Woodside Depository timely receives voting instructions from a holder that fails to specify the manner in which the Woodside Depository is to vote, such Woodside ADS holder's ADS will not be voted. In the event that voting on any resolution or matter is conducted on a show of hands basis in accordance with the Woodside Constitution, the Woodside Depository will refrain from voting and the voting instructions received by the Woodside Depository from holders of such Woodside ADSs shall lapse.

Please note that the ability of the Woodside Depository to carry out voting instructions may be limited by practical and legal limitations and the terms of the securities on deposit. Woodside cannot assure Woodside ADS holders that they will receive voting materials in time to enable them to return voting instructions to the Woodside Depository in a timely manner.

Table of Contents

Fees and Charges

Woodside ADS holders will be required to pay the following fees under the terms of the Woodside Deposit Agreement:

| <u>Service</u> | <u>Fees</u> |
|--|---|
| Issuance of Woodside ADSs (<i>e.g.</i> , an issuance upon a deposit of Woodside Shares, upon a change in the Woodside ADS to Woodside Share ratio, or for any other reason), excluding issuances as a result of distributions described in the fourth bullet, below. | Up to \$0.05 per Woodside ADS issued. |
| Cancellation of Woodside ADSs (<i>e.g.</i> , a cancellation of Woodside ADSs for delivery of deposited Woodside Shares, upon a change in the Woodside ADS to Woodside Share ratio, or for any other reasons). | Up to \$0.05 per Woodside ADS cancelled. |
| Distribution of cash dividends or other cash distributions (<i>e.g.</i> , sale of rights and other entitlements). | Up to \$0.05 per Woodside ADS held. |
| Distribution of Woodside ADSs pursuant to (i) stock dividends or other free stock distributions, or (ii) exercise of rights to purchase additional Woodside ADSs. | Up to \$0.05 per Woodside ADS held. |
| Distribution of securities other than Woodside ADSs or rights to purchase additional Woodside ADSs (<i>e.g.</i> , upon a spin-off) | Up to \$0.05 per Woodside ADS held. |
| ADS Services. | Up to \$0.05 per Woodside ADS held on the applicable record date(s) established by the Woodside Depository. |
| Registration of Woodside ADS transfers (<i>e.g.</i> , upon a registration of the transfer of registered ownership of Woodside ADSs, upon a transfer of Woodside ADSs into DTC and <i>vice versa</i> , or for any other reason). | Up to \$0.05 per Woodside ADS transferred. |
| Conversion of Woodside ADSs of one series for Woodside ADSs of another series (<i>e.g.</i> , upon conversion of partial entitlement Woodside ADSs for full entitlement Woodside ADSs, or upon conversion of restricted Woodside ADSs into freely transferable Woodside ADSs, and <i>vice versa</i>). | Up to \$0.05 per Woodside ADS converted. |

Woodside ADS holders will also be responsible to pay certain charges such as:

taxes (including applicable interest and penalties) and other governmental charges;

the registration fees as may from time to time be in effect for the registration of Woodside Shares on the share register and applicable to transfers of Woodside Shares to or from the name of the Woodside Custodian, the Woodside Depository or any nominees upon the making of deposits and withdrawals, respectively;

Table of Contents

certain cable, telex and facsimile transmission and delivery expenses;

the fees, expenses, spreads, taxes and other charges of the Woodside Depository and/or service providers (which may be a division, branch or affiliate of the Woodside Depository) in the conversion of foreign currency;

the expenses incurred by the Woodside Depository in connection with compliance with exchange control regulations and other regulatory requirements applicable to Woodside Shares, Woodside ADSs and Woodside ADRs;

the fees and expenses incurred by the Woodside Depository, the Woodside Custodian, or any nominee in connection with the servicing or delivery of deposited property; and

the amounts payable to the Woodside Depository by any party to the Woodside Deposit Agreement pursuant to any ancillary agreement to the Woodside Deposit Agreement in respect of the Woodside ADR Program, the Woodside ADSs and the Woodside ADRs.

The Woodside ADS fees and charges described above are payable upon (i) deposit of Woodside Shares against issuance of Woodside ADSs and (ii) surrender of Woodside ADSs for cancellation and withdrawal of deposited property. Such fees and charges will be payable by the person to whom the Woodside ADSs so issued are delivered by the Woodside Depository (in the case of Woodside ADS issuances) and by the person who delivers the Woodside ADSs for cancellation to the Woodside Depository (in the case of Woodside ADS cancellations). In the case of Woodside ADSs issued by the Woodside Depository into DTC, the Woodside ADS issuance and cancellation fees and charges may be deducted from distributions made through DTC, and may be charged to the DTC participant(s) receiving the Woodside ADSs being issued or the DTC participant(s) surrendering the Woodside ADSs to the Woodside Depository for cancellation, as the case may be, on behalf of the beneficial owner(s) and will be charged by the DTC participant(s) to the account of the applicable beneficial owner(s) in accordance with the procedures and practices of the DTC participants as in effect at the time. Woodside ADS fees and charges in respect of distributions and the Woodside ADS service fee are charged to the holders as of the applicable Woodside ADS record date. In the case of distributions of cash, the amount of the applicable Woodside ADS fees and charges is deducted from the funds being distributed. In the case of (i) distributions other than cash and (ii) the Woodside ADS service fee, holders as of the Woodside ADS record date will be invoiced for the amount of the Woodside ADS fees and charges and such Woodside ADS fees and charges may be deducted from distributions made to holders of Woodside ADSs. For Woodside ADSs held through DTC, the Woodside ADS fees and charges for distributions other than cash and the Woodside ADS service fee may be deducted from distributions made through DTC, and may be charged to the DTC participants in accordance with the procedures and practices prescribed by DTC and the DTC participants in turn charge the amount of such Woodside ADS fees and charges to the beneficial owners for whom they hold Woodside ADSs.

In the event of refusal to pay the Woodside Depository fees, the Woodside Depository may, under the terms of the Woodside Deposit Agreement, refuse the requested service until payment is received or may set off the amount of the Woodside Depository fees from any distribution to be made to the Woodside ADS holder. *Certain depository fees and charges (such as the Woodside ADS services fee) may become payable shortly after the closing of the Merger.* Note that the fees and charges holders may be required to pay may vary over time and may be changed by Woodside and by the Woodside Depository. Woodside ADS holders will receive prior notice of such changes. The Woodside Depository may reimburse Woodside for certain expenses incurred by Woodside in respect of the Woodside ADR Program by making available a portion of the Woodside ADS fees charged in respect of the Woodside ADR Program or otherwise, upon such terms and conditions as Woodside and the Woodside Depository agree from time to time.

Amendments and Termination of Woodside Deposit Agreement

Woodside may agree with the Woodside Depository to modify the Woodside Deposit Agreement at any time without the consent of Woodside ADS holders. Any amendment which imposes or increases any fees or

Table of Contents

charges (other than charges in connection with foreign exchange control regulations, and taxes and other governmental charges) or which otherwise materially prejudices any substantial existing right of Woodside ADS holders will not become effective until thirty days following notice of such amendment to the holders. Woodside will not consider to be materially prejudicial to holders' substantial rights any modifications or supplements that are reasonably necessary for the Woodside ADSs to be registered under the Securities Act or to be eligible for book-entry settlement, in each case without imposing or increasing the fees and charges holders are required to pay. In addition, Woodside may not be able to provide Woodside ADS holders with prior notice of any modifications or supplements that are required to accommodate compliance with applicable provisions of law.

Woodside ADS holders will be bound by the modifications to the Woodside Deposit Agreement if they continue to hold Woodside ADSs after the modifications to the Woodside Deposit Agreement become effective. The Woodside Deposit Agreement cannot be amended to prevent holders from withdrawing the Woodside Shares represented by their Woodside ADSs (except in order to comply with mandatory provisions of applicable law).

Woodside has the right to direct the Woodside Depository to terminate the Woodside Deposit Agreement. Similarly, the Woodside Depository may in certain circumstances on its own initiative terminate the Woodside Deposit Agreement. In either case, the Woodside Depository must give notice to the holders at least 30 days before termination. Until termination, holders' rights under the Woodside Deposit Agreement will be unaffected.

After termination, the Woodside Depository will continue to collect distributions received (but will not distribute any such property until a holder requests the cancellation of its Woodside ADSs) and may sell the securities held on deposit. After the sale, the Woodside Depository will hold the proceeds from such sale and any other funds then held for the holders of Woodside ADSs uninvested. At that point, the Woodside Depository will have no further obligations to holders other than to account for the funds then held for the holders of Woodside ADSs still outstanding (after deduction of applicable fees, taxes and expenses), along with indemnification obligations.

In connection with any termination of the Woodside Deposit Agreement, the Woodside Depository may make available to owners of Woodside ADSs a means to withdraw the Woodside Shares represented by Woodside ADSs and to direct the deposit of such Woodside Shares into an unsecured American Depositary Share program established by the Woodside Depository. The ability to receive unsecured American Depositary Shares upon termination of the Woodside Deposit Agreement would be subject to satisfaction of certain U.S. regulatory requirements applicable to the creation of unsecured American Depositary Shares and the payment of applicable depository fees.

Books of Depository

The Woodside Depository will maintain Woodside ADS holder records at its depository office. Woodside ADS holders may inspect such records at such office during regular business hours but solely for the purpose of communicating with other holders in the interest of business matters relating to the Woodside ADSs and the Woodside Deposit Agreement.

The Woodside Depository will maintain in New York facilities to record and process the issuance, cancellation, combination, split-up and transfer of Woodside ADSs. These facilities may be closed from time to time, to the extent not prohibited by law.

Limitations on Obligations and Liabilities

The Woodside Deposit Agreement limits Woodside's obligations and the Woodside Depository's obligations to holders. Woodside ADS holders should note the following:

Woodside and the Woodside Depository are obligated only to take the actions specifically stated in the Woodside Deposit Agreement without negligence or bad faith.

Table of Contents

The Woodside Depositary disclaims any liability for any failure to carry out voting instructions, for any manner in which a vote is cast or for the effect of any vote, provided it acts in good faith and in accordance with the terms of the Woodside Deposit Agreement.

The Woodside Depositary disclaims any liability for any failure to determine the lawfulness or practicality of any action, for the content of any document forwarded to holders on Woodside's behalf or for the accuracy of any translation of such a document, for the investment risks associated with investing in Woodside Shares, for the validity or worth of the Woodside Shares, for any tax consequences that result from the ownership of Woodside ADSs, for the credit-worthiness of any third party, for allowing any rights to lapse under the terms of the Woodside Deposit Agreement, for the timeliness of any of Woodside's notices or for Woodside's failure to give notice.

Woodside and the Woodside Depositary will not be obligated to perform any act that is inconsistent with the terms of the Woodside Deposit Agreement.

Woodside and the Woodside Depositary disclaim any liability if Woodside or the Woodside Depositary are prevented or forbidden from or subject to any civil or criminal penalty or restraint on account of, or delayed in, doing or performing any act or thing required by the terms of the Woodside Deposit Agreement, by reason of any provision, present or future, of any law or regulation, or by reason of present or future provision of any provision of Woodside's governing documents or any provision of or governing the securities on deposit, or by reason of any act of God or war or other circumstances beyond Woodside's control.

Woodside and the Woodside Depositary disclaim any liability by reason of any exercise of, or failure to exercise, any discretion provided for in the Woodside Deposit Agreement or in Woodside's governing documents or in any provisions of or governing the securities on deposit.

Woodside and the Woodside Depositary further disclaim any liability for any action or inaction in reliance on the advice or information received from legal counsel, accountants, any person presenting Woodside Shares for deposit, any holder of Woodside ADSs or authorized representatives thereof, or any other person believed by either of them in good faith to be competent to give such advice or information.

Woodside and the Woodside Depositary also disclaim liability for the inability by a holder to benefit from any distribution, offering, right or other benefit that is made available to holders of Woodside Shares but is not, under the terms of the Woodside Deposit Agreement, made available to holders of Woodside ADSs.

Woodside and the Woodside Depositary may rely without any liability upon any written notice, request or other document believed to be genuine and to have been signed or presented by the proper parties.

Woodside and the Woodside Depositary also disclaim liability for any consequential or punitive damages for any breach of the terms of the Woodside Deposit Agreement.

No disclaimer of any Securities Act liability is intended by any provision of the Woodside Deposit Agreement.

Nothing in the Woodside Deposit Agreement gives rise to a partnership or joint venture, or establishes a fiduciary relationship, among Woodside, the Woodside Depositary and any Woodside ADS holder.

Nothing in the Woodside Deposit Agreement precludes Citibank (or its affiliates) from engaging in transactions in which parties adverse to Woodside or the Woodside ADS owners have interests, and nothing in the Woodside Deposit Agreement obligates Citibank to disclose those transactions, or any information obtained in the course of those transactions, to Woodside or to the Woodside ADS owners, or to account for any payment received as part of those transactions.

As the above limitations relate to Woodside's obligations and the Woodside Depositary's obligations to holders under the Woodside Deposit Agreement, Woodside believes that, as a matter of construction of the

Table of Contents

clause, such limitations would likely to continue to apply to Woodside ADS holders who withdraw the Woodside Shares from the Woodside ADS facility with respect to obligations or liabilities incurred under the Woodside Deposit Agreement before the cancellation of the Woodside ADSs and the withdrawal of the Woodside Shares, and such limitations would most likely not apply to Woodside ADS holders who withdraw the Woodside Shares from the Woodside ADS facility with respect to obligations or liabilities incurred after the cancellation of the Woodside ADSs and the withdrawal of the Woodside Shares and not under the Woodside Deposit Agreement.

In any event, Woodside ADS holders will not be deemed, by agreeing to the terms of the Woodside Deposit Agreement, to have waived Woodside's or the Woodside Depository's compliance with U.S. federal securities laws and the rules and regulations promulgated thereunder. In fact, Woodside ADS holders cannot waive Woodside's or the Woodside Depository's compliance with U.S. federal securities laws and the rules and regulations promulgated thereunder.

Taxes

Woodside ADS holders will be responsible for the taxes and other governmental charges payable on the Woodside ADSs and the securities represented by the Woodside ADSs. Woodside, the Woodside Depository and the Woodside Custodian may deduct from any distribution the taxes and governmental charges payable by holders and may sell any and all property on deposit to pay the taxes and governmental charges payable by holders. Woodside ADS holders will be liable for any deficiency if the sale proceeds do not cover the taxes that are due.

The Woodside Depository may refuse to issue Woodside ADSs, to deliver, transfer, split and combine Woodside ADRs or to release securities on deposit until all taxes and charges are paid by the applicable holder. The Woodside Depository and the Woodside Custodian may take reasonable administrative actions to obtain tax refunds and reduced tax withholding for any distributions on holders' behalf. However, holders may be required to provide to the Woodside Depository and to the Woodside Custodian proof of taxpayer status and residence and such other information as the Woodside Depository and the Woodside Custodian may require to fulfill legal obligations. Holders are required to indemnify Woodside, the Woodside Depository and the Woodside Custodian for any claims with respect to taxes based on any tax benefit obtained for holders.

Foreign Currency Conversion

The Woodside Depository will arrange for the conversion of all foreign currency received into U.S. dollars if such conversion is practical, and it will distribute the U.S. dollars in accordance with the terms of the Woodside Deposit Agreement. Woodside ADS holders may have to pay fees and expenses incurred in converting foreign currency, such as fees and expenses incurred in complying with currency exchange controls and other governmental requirements.

If the conversion of foreign currency is not practical or lawful, or if any required approvals are denied or not obtainable at a reasonable cost or within a reasonable period, the Woodside Depository may take the following actions in its discretion:

Convert the foreign currency to the extent practical and lawful and distribute the U.S. dollars to the holders for whom the conversion and distribution is lawful and practical.

Distribute the foreign currency to holders for whom the distribution is lawful and practical.

Hold the foreign currency (without liability for interest) for the applicable holders.

Table of Contents

Governing Law

The Woodside Deposit Agreement, the Woodside ADRs and the Woodside ADSs will be interpreted in accordance with the laws of the State of New York. The rights of holders of Woodside Shares (including Woodside Shares represented by Woodside ADSs) are governed by the laws of Australia.

Woodside ADS holders irrevocably agree that any legal action arising out of the Woodside Deposit Agreement, the Woodside ADSs or the Woodside ADRs, involving Woodside or the Woodside Depository, may be instituted in a state or federal court in the city of New York, and Woodside and the Woodside Depository has each irrevocably submitted to the non-exclusive jurisdiction of such courts.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

There are no related party transactions or relationships involving Woodside or the Woodside Directors and Executive Officers.

CHANGE IN REGISTRANT' S CERTIFYING ACCOUNTANT

On 14 October 2021, the Woodside Board selected PricewaterhouseCoopers to be Woodside' s independent registered public accounting firm for the 2022 fiscal year. The selection and change in independent registered public accounting firm was adopted at the recommendation of Woodside' s Audit & Risk Committee following a competitive tender process. This selection must be approved by the Woodside Shareholders at the Woodside Shareholders Meeting to be held on 19 May 2022. Accordingly, Ernst & Young, upon approval by the Woodside Shareholders, will no longer serve as Woodside' s independent registered public accounting firm effective 19 May 2022.

The audit reports of Ernst & Young on Woodside' s consolidated financial statements as of 31 December 2021 and 2020 and for the years ended 31 December 2021, 2020 and 2019 did not contain any adverse opinion or disclaimer of opinion and were not qualified or modified as to uncertainty, audit scope or accounting principles. During the two fiscal years ended 31 December 2021, and through the date of this prospectus, there has not been any disagreement on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreement, if not resolved to the satisfaction of Ernst & Young, would have caused them to make reference to the subject matter of the disagreement in connection with their reports, nor has there been an "reportable event" as described in Item 16F(a)(1)(v) of Form 20-F.

Further, during the two fiscal years ended 31 December 2021, and through the date of this prospectus, neither Woodside, nor anyone on its behalf, consulted with PricewaterhouseCoopers regarding (i) the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered with respect to Woodside' s consolidated financial statements and either a written report was provided to Woodside or oral advice was provided that PricewaterhouseCoopers concluded was an important factor considered by Woodside in reaching a decision as to the accounting, auditing or financial reporting issue; or (ii) any matter that was either the subject of a disagreement, as that term is defined in Item 16F(a)(1)(iv) of Form 20-F and the related instructions, or a "reportable event" as described in Item 16F(a)(1)(v) of Form 20-F.

Woodside has provided a copy of the above statements to Ernst & Young and requested that Ernst & Young furnish it with a letter addressed to the SEC stating whether or not they agree with the above disclosure. A copy of that letter, dated 29 March 2022, is filed as Exhibit 16.1 to the registration statement on Form F-4, of which this prospectus forms a part.

[Table of Contents](#)

BENEFICIAL OWNERSHIP OF WOODSIDE SECURITIES

The following table sets forth certain information regarding the beneficial ownership of Woodside Shares as of 24 March 2022, without giving effect to the Merger, by:

each person known by Woodside to be the beneficial owner of more than 5% of outstanding Woodside Ordinary Shares; and

each person expected to be an officer or director of the Merged Group following Implementation.

As of 24 March 2022, there were a total of 983,980,823 Woodside Shares issued and outstanding. Unless otherwise indicated, all persons named in the table have sole voting and investment power with respect to all Woodside Shares beneficially owned by them.

For each individual, this percentage includes the Woodside Shares of which such individual has the right to acquire beneficial ownership either currently or within sixty days of this prospectus, including, but not limited to, upon the exercise of a stock option; however, such Woodside Shares will not be deemed outstanding for the purpose of computing the percentage owned by any other individual. All shares are a single class with equal rights to dividends, capital, distributions and voting. Woodside does not have authorized capital nor par value in relation to its issued shares. Unless otherwise noted, the business address of each of the following entities or individuals is c/o Woodside Petroleum Ltd., Mia Yellagonga 11 Mount Street, Perth, Western Australia 6000, Australia.

| Names of Beneficial Owner | Number of Woodside Shares | Percentage Owned[†] |
|---|----------------------------------|-------------------------------------|
| 5% Stockholders: | | |

 - (13) Includes 73,086 Restricted Shares.

LEGAL MATTERS

The validity of the New Woodside Shares, including the New Woodside Shares underlying the New Woodside ADSs, to be issued in connection with the Merger will be passed upon for Woodside by King & Wood Mallesons (AU), counsel to Woodside as to Australian law.

Vinson & Elkins L.L.P., U.S. counsel for Woodside, represented Woodside in connection with the Merger and the preparation of this prospectus.

EXPERTS

The audited consolidated financial statements of Woodside Petroleum Ltd. as of 31 December 2021 and 2020 and for the years ended 31 December 2021, 2020 and 2019 appearing in this prospectus and registration statement on Form F-4 have been audited by Ernst & Young, an independent auditor, as set forth in their report thereon appearing elsewhere herein, and are included in reliance upon such report and given on the authority of such firm as experts in accounting and auditing.

The audited combined financial statements of BHP Petroleum as of 30 June 2021 and 2020 and for the years ended 30 June 2021 and 2020 appearing in this prospectus and registration statement on Form F-4 have been audited by Ernst & Young, an independent auditor, as set forth in their report thereon appearing elsewhere herein, and are included in reliance upon such report and given on the authority of such firm as experts in accounting and auditing.

The information included herein regarding estimated quantities of proved reserves of Woodside Petroleum Ltd., as of 31 December 2021, 2020 and 2019, are based on the proved reserves report prepared by Netherland, Sewell & Associates, Inc. These estimates are included herein in reliance upon the authority of such firm as an expert in these matters.

WHERE YOU CAN FIND ADDITIONAL INFORMATION

Woodside has filed a registration statement on Form F-4 (Registration No. 333-) to register with the SEC the New Woodside Shares that Participating BHP Shareholders will receive as Share Consideration in connection with the Merger, including New Woodside Shares underlying the New Woodside ADSs to be issued to holders of BHP ADSs. This prospectus forms a part of such registration statement on Form F-4. The registration statement on Form F-4, including this prospectus and the exhibits attached thereto and incorporated by reference therein, contains additional relevant information about Woodside.

Upon Implementation, Woodside will be subject to certain requirements of the Exchange Act as a “foreign private issuer.” You can read Woodside’ s SEC filings, including the registration statement on Form F-4 of which this prospectus forms a part, by visiting the SEC’ s website at www.sec.gov.

You may also access the SEC filings and obtain other information about Woodside through the website maintained by Woodside, at www.woodside.com.au. Woodside further publishes annual and half-yearly reports, copies of which can be viewed on the ASX’ s website, www2.asx.com.au, and on Woodside’ s website. The information contained on these websites is not incorporated by reference into this prospectus.

BHP files annual and reports of a foreign private issuer and other information with the SEC. This information is available for review free of charge through the SEC’ s website at www.sec.gov. In addition, BHP’ s SEC filings are also available to the public on BHP’ s website, www.bhp.com. Information contained on BHP’ s website is not incorporated by reference into this prospectus, and you should not consider information contained on that website as part of this registration statement.

Table of Contents

Neither Woodside nor BHP has authorized anyone to give any information or make any representation about the Merger that is different from, or in addition to, that contained in this prospectus. Therefore, if anyone does give you information of this sort, you should not rely on it as having been authorized by Woodside or BHP. If you are in a jurisdiction where offers to exchange or sell, or solicitations of offers to exchange or purchase, the securities offered by this prospectus are unlawful, or if you are a person to whom it is unlawful to direct these types of activities, then the offer presented in this prospectus does not extend to you. The information contained in this prospectus speaks only as of the date of this prospectus unless the information specifically indicates that another date applies.

This prospectus contains a description of the representations and warranties that each of Woodside and BHP made to the other in the Share Sale Agreement. Representations and warranties made by Woodside and BHP are also set forth in contracts and other documents (including the Share Sale Agreement) that are attached or filed as appendices or exhibits to this prospectus. These representations and warranties were made as of specific dates, may be subject to important qualifications and limitations agreed to between the parties in connection with negotiating the terms of the Share Sale Agreement, and may have been included in the agreement for the purpose of allocating risk between the parties rather than to establish matters as facts. These materials are included only to provide you with information regarding the terms and conditions of the agreements, and not to provide any other factual information regarding Woodside, BHP or their respective businesses. Accordingly, the representations and warranties and other provisions of the Share Sale Agreement should not be read alone, but instead should be read only in conjunction with the other information provided elsewhere in this prospectus.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Woodside Petroleum Ltd

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial position of Woodside Petroleum Ltd (the Group) as of 31 December 2021 and 2020, the related consolidated statements of comprehensive income, changes in equity and cash flows for each of the three years in the period ended 31 December 2021, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Group at 31 December 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended 31 December 2021, in conformity with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board.

Basis for Opinion

These financial statements are the responsibility of the Group’s management. Our responsibility is to express an opinion on the Group’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Group in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Group is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Group’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

[Table of Contents](#)

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the Audit and Risk Committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Estimation of restoration provisions

Description of the Matter

As disclosed in Note D.5 to the financial statements, the Group has recorded \$2,218 million in restoration provisions as of 31 December 2021.

The calculation of restoration provisions is conducted by specialist engineers and requires judgmental assumptions to be made by the Group regarding removal date, compliance with environmental legislation and regulations, the extent of restoration activities required, including assets remaining in-situ, the engineering methodology for estimating cost and future removal technologies in determining the removal cost.

Australian regulator approval for items remaining in-situ will only be provided towards the end of field life and accordingly, as of December 31, 2021, there is uncertainty whether the Australian regulator will approve plans for these items to be decommissioned in-situ.

Significant assumptions and estimates outlined above are inherently subjective. Changes in these assumptions can lead to significant changes in the restoration provision. In this context, the disclosures in the financial report provide information about the assumptions made in the calculation of the restoration provision and uncertainties as of 31 December 2021. Auditing restoration provisions required complex auditor judgement to assess management' s estimates of the extent, cost and timing of restoration activities.

How We Addressed the Matter in Our Audit

Our procedures included the evaluation of the Group' s process for identifying legal and regulatory obligations for restoration as well as testing the completeness of assets included in the restoration provision.

With the assistance of our environmental specialists, we evaluated the appropriateness of management' s methodology for estimating future costs. For certain restoration provisions for assets within the Group, with the assistance of our environmental specialists, our testing included evaluating, against relevant current legal and regulatory requirements, the extent and cost of restoration activities, including scenario analysis of removal of all or a substantial portion of all assets. We compared the current year cost estimates to those of the prior year and considered management' s explanations where these have changed or deviated. In addition, we compared the timing of future cash outflows against the anticipated completion date for the assets used in the associated reserves estimate and impairment calculation.

We assessed the adequacy of the disclosures within Note D.5 to the consolidated financial statements.

Table of Contents

Carrying value of oil and gas properties

Description of the Matter

As disclosed in Note B.3 and B.4 to the financial statements, the Group had \$18,434 million in oil and gas properties as of 31 December 2021 and recorded an impairment reversal of \$1,058 million related to oil and gas properties during the year then ended. At each reporting period, the Group assesses for each Cash Generating Unit (CGU) whether there are any indicators of impairment or impairment reversal. Where such indicators exist, the Group estimates the recoverable amount of the CGU based on the higher of the value in use (VIU) and fair value less cost to dispose (FVLCD) models for each CGU.

Auditing management's assessment of the estimate of recoverable value of CGUs was complex due to the high degree of estimation uncertainty in assessing forecasted commodity prices, reserves quantities and discount rates, which are significant assumptions to forecasted future cash flows for each CGU, which form the basis of the VIU and FVLCD models.

How We Addressed the Matter in Our Audit

Our testing of management's estimates of the recoverable amount for each CGU included, among others, testing the completeness and accuracy of the underlying data used to develop the significant assumptions. We involved our valuation specialists to assist in assessing the reasonableness of commodity prices by comparing the forecasted price assumptions to contractual arrangements, market prices (where available), broker consensus, analyst views and historical performance. In addition, our valuation specialists assisted in testing the discount rates used, including a comparison to external market data. We compared the projected cash flows against approved budgets and plans and performed a retrospective comparison to actual historical data for the material cashflow forecasts to assess the accuracy of the projections. In addition, we performed sensitivity analyses over the significant assumptions used within the estimate of recoverable amounts.

To test the reserve quantities, we involved our oil and gas reserve engineering specialist to assist in the assessment of the reserve estimation methodology against the relevant industry guidance prepared by the Society of Petroleum Engineers and tested significant revisions to reserves.

We assessed the adequacy of the disclosures within Notes B.3 and B.4 of the consolidated financial statements.

/s/ Ernst & Young

We have served as the Group's auditor since 1954.

Table of Contents

Notes to the Consolidated Financial Statements

About these statements

Woodside Petroleum Ltd. and its controlled entities (Woodside or the Group) is a for-profit entity limited by shares, incorporated and domiciled in Australia. Its shares are publicly traded on the Australian Securities Exchange. The nature of the operations and the principal activities of the Group are described in the main document and in the segment information in Note A.1.

Statement of compliance

The financial statements comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

The accounting policies are consistent with those disclosed in the 2020 Financial Statements, except for the impact of all new or amended standards and interpretations adopted with effect from 1 January 2021. The adoption of these standards and interpretations did not result in any significant changes to the Group's accounting policies, with the exception of International Accounting Standards Board *Interest Rate Benchmark Reform - Phase 2* (refer to Note E.7).

Estimates and judgements reflect current market conditions, including the impact of COVID-19. Estimates used for impairment assessments and the measurement of onerous contracts are disclosed in Notes B.4 and D.5 respectively. Given ongoing economic uncertainty, these assumptions could change in the future.

Currency

The functional and presentation currency of Woodside Petroleum Ltd. and all its subsidiaries is the US dollar.

Transactions in foreign currencies are initially recorded in the functional currency of the transacting entity at the exchange rates ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated at the rates of exchange ruling at that date. Exchange differences in the consolidated financial statements are taken to the income statement.

Rounding of amounts

The amounts contained in these financial statements have been rounded to the nearest million dollars, unless otherwise stated.

Basis of preparation

The financial statements have been prepared on a historical cost basis, except for derivative financial instruments and certain other financial assets and financial liabilities, which have been measured at fair value or amortised cost adjusted for changes in fair value attributable to the risks that are being hedged in effective hedge relationships. Where not carried at fair value, if the carrying value of financial assets and financial liabilities does not approximate their fair value, the fair value has been included in the notes to the financial statements.

The financial statements comprise the financial results of the Group as at 31 December each year (refer to Note E.6).

Subsidiaries are fully consolidated from the date on which control is obtained by the Group and cease to be consolidated from the date at which the Group ceases to have control.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

Basis of preparation (cont.)

The subsidiaries of the Group have the same reporting period and accounting policies as the parent company. All intercompany balances and transactions, including unrealised profits and losses arising from intra-group transactions, have been eliminated in full.

Non-controlling interests are allocated their share of the net profit after tax in the consolidated income statement and their share of other comprehensive income net of tax in the consolidated statement of comprehensive income, and are presented within equity in the consolidated statement of financial position, separately from parent shareholders' equity.

The consolidated financial statements provide comparative information in respect of the previous period. Where required, a reclassification of items in the financial statements of the previous period has been made in accordance with the classification of items in the financial statements of the current period.

Financial and capital risk management

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework, including review and approval of the Group's risk management strategy, policy and key risk parameters. The Board of Directors and the Audit and Risk Committee have oversight of the Group's internal control system and risk management process, including oversight of the internal audit function.

The Group's management of financial and capital risks is aimed at ensuring that available capital, funding and cash flows are sufficient to:

- meet the Group's financial commitments as and when they fall due;
- maintain the capacity to fund its committed project developments;
- pay a reasonable dividend; and
- maintain a long-term credit rating of not less than 'investment grade' .

The Group monitors and tests its forecast financial position against these criteria and, in general, will undertake hedging activity only when necessary to ensure that these objectives are achieved.

Other circumstances that may lead to hedging activities include the management of exposures relating to trading activities and the underpinning of the economics of a new project. It is, and has been throughout the period, the Group Treasury policy that no speculative trading in financial instruments shall be undertaken.

The below risks arise in the normal course of the Group's business. Risk information can be found in the following sections:

| | |
|-----------|-----------------------|
| Section A | Commodity price risk |
| Section A | Foreign exchange risk |
| Section C | Capital risk |
| Section C | Liquidity risk |
| Section C | Interest rate risk |
| Section D | Credit risk |

Key estimates and judgements

In applying the Group's accounting policies, management continually evaluates judgements, estimates and assumptions based on experience and other factors, including expectations of future events that may have an

Table of Contents

Notes to the Consolidated Financial Statements

Key estimates and judgements (cont.)

impact on the Group. All judgements, estimates and assumptions made are believed to be reasonable based on the most current set of circumstances known to management, and actual results may differ. Significant judgements, estimates and assumptions made by management in the preparation of these financial statements are found in the following notes:

| | |
|----------|---|
| Note A.1 | Revenue from contracts with customers |
| Note A.5 | Taxes |
| Note B.2 | Exploration and evaluation |

| Note D.7 | Leases |
| Note E.5 | Joint arrangements |

A. Earnings for the year

This section addresses financial performance of the Group for the reporting period including, where applicable, the accounting policies applied and the key estimates and judgements made. This section also includes the tax position of the Group for and at the end of the reporting period.

Key financial and capital risks in this section

Commodity price risk management

The Group's revenue is exposed to commodity price fluctuations through the sale of hydrocarbons. Commodity price risks are measured by monitoring and stress testing the Group's forecast financial position to sustained periods of low oil and gas prices. This analysis is regularly performed on the Group's portfolio and as required for discrete projects and transactions.

The Group's management of commodity price risk includes the use of commodity swap derivatives to hedge its exposure (refer to Note D.6). The hedged exposure includes LNG revenue related to produced volumes and revenues derived from trading operations. Commodity swap derivatives protect the Group against downside risk within its strategic and trading portfolio.

As at the reporting date, the Group held hedging financial instruments with a net liability carrying value of \$431 million (2020: \$9 million) exposed to commodity price risk. An increase in the relevant commodity price of 10% would have decreased the instruments' carrying value by \$255 million, the effect of which would be recognized within reserves and/or the income statement in accordance with hedge accounting application. A 10% decrease would have the same but opposite effect. The analysis assumes that all other variables remain constant (including the price on underlying physical exposures).

Foreign exchange risk management

Foreign exchange risk arises from future commitments, financial assets and financial liabilities that are not denominated in US dollars. The majority of the Group's revenue is denominated in US dollars. The Group is exposed to foreign currency risk arising from operating and capital expenditure incurred in currencies other than US dollars, particularly Australian dollars.

Table of Contents

Notes to the Consolidated Financial Statements

Foreign exchange risk management (cont.)

The Group's management of foreign exchange risk relating to capital expenditure includes the use of forward exchange contract derivatives to hedge its exposure (refer to Note D.6).

As at the reporting date, the Group held hedging financial instruments with a net asset carrying value of \$10 million (2020: nil) exposed to foreign exchange risk.

Measuring the exposure to foreign exchange risk is achieved by regularly monitoring and performing sensitivity analysis on the Group's financial position.

A reasonably possible change in the exchange rate of the US dollar to the Australian dollar (+12%/-12% (2020: +12%/-12%; 2019: +12%/-12%)), with all other variables held constant, would not have a material impact on the Group's equity or the profit or loss in the current period. Refer to Notes C1, C2, D2, D4 and D7 for details of the denominations of cash and cash equivalents, interest-bearing liabilities, receivables, payables and lease liabilities held at 31 December 2021.

In order to hedge the foreign exchange risk and interest rate risk (refer to Section C) of a Swiss Franc (CHF) denominated medium term note, Woodside holds a number of cross-currency interest rate swaps (refer to Note C.2 and D.6). The aim of this hedge is to convert the fixed interest CHF bond into variable interest US dollar debt. The Group also entered into foreign exchange forward contracts to fix the Australian dollar to US dollar exchange rate in relation to a portion of the Australian dollar denominated capital expenditure expected to be incurred under the Scarborough development (refer to Note D.6).

A.1 Segment revenue and expenses

Operating segment information

The Group has identified its operating segments based on the internal reports that are reviewed and used by the executive management team in assessing performance and in determining the allocation of resources.

The Group has reviewed its operating segments and has identified the Sangomar and Scarborough LNG Development as separate operating segments within Development due to the progress and materiality of the related projects. The 2020 and 2019 amounts have been restated to reflect this change.

Management monitors the performance of the operating results of the segments separately for the purpose of making decisions about resource allocation and performance assessment. The performance of operating segments is evaluated based on profit before tax and net finance costs and is measured in accordance with the Group's accounting policies.

Financing requirements, including cash and debt balances, finance income, finance costs and taxes are managed at a Group level.

Operating segments outlined below are identified by management based on the nature and geographical location of the business or venture.

Producing

North West Shelf Project - Exploration, evaluation, development, production and sale of liquefied natural gas, pipeline natural gas, condensate and liquefied petroleum gas in assigned permit areas.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

A.1 Segment revenue and expenses (cont.)

Pluto LNG - Exploration, evaluation, development, production and sale of liquefied natural gas, pipeline natural gas and condensate in assigned permit areas.

Australia Oil - Exploration, evaluation, development, production and sale of crude oil in assigned permit areas (North West Shelf, Greater Enfield and Vincent).

Wheatstone - Exploration, evaluation, development, production and sale of liquefied natural gas, pipeline natural gas and condensate in assigned permit areas.

Development

Scarborough - Exploration, evaluation and development of liquefied natural gas, pipeline natural gas and condensate in assigned permit areas.

Sangomar - Exploration, evaluation and development of crude oil in assigned permit areas.

Other Development segments - This segment comprises exploration, evaluation and development of liquefied natural gas, pipeline natural gas and condensate in the Browse, Kitimat and Sunrise projects.

Other

Other segments - This segment comprises trading and shipping activities and activities undertaken in other international locations.

Unallocated items - Unallocated items comprise primarily corporate non-segmental items of revenue and expenses and associated assets and liabilities not allocated to operating segments as they are not considered part of the core operations of any segment.

Major customer information

The Group has two major customers which account for 8% and 6% of the Group's external revenue. The sales are generated by the Pluto, North West Shelf and Wheatstone operating segments (2020: two customers; 15% and 13% generated by Pluto and North West Shelf; 2019: three customers; 16%, 15% and 11% generated by Pluto, North West Shelf and Wheatstone).

Geographic information

| | Revenue from external customers(1) | | | Non-current assets(2) | |
|--------------|------------------------------------|-------|-------|-----------------------|--------|
| | 2021 | 2020 | 2019 | 2021 | 2020 |
| | US\$m | US\$m | US\$m | US\$m | US\$m |
| Oceania | 313 | 286 | 202 | 18,386 | 17,559 |
| Asia | 6,029 | 3,076 | 4,435 | – | 229 |
| Canada | – | – | 2 | – | 34 |
| Africa | – | – | – | 2,802 | 1,244 |
| Other | 620 | 238 | 234 | 1 | 1 |
| Consolidated | 6,962 | 3,600 | 4,873 | 21,189 | 19,067 |

(1) Revenue is attributable to geographic region based on the location of the customer.

(2) Non-current assets exclude deferred tax of \$1,007 million (2020: \$1,304 million).

[Table of Contents](#)

Notes to the Consolidated Financial Statements

A.1 Segment revenue and expenses (cont.)

Recognition and measurement

Revenue from contracts with customers

Revenue is recognised when or as the Group transfers control of products or provides services to a customer at the amount to which the Group expects to be entitled. If the consideration includes a variable component, the Group estimates the amount of the expected consideration receivable. Variable consideration is estimated throughout the contract and is constrained until it is highly probable a significant revenue reversal in the amount of cumulative revenue recognised will not occur.

Revenue from sale of hydrocarbons - Revenue from the sale of hydrocarbons is recognised at a point in time when control of the product is transferred to the customer, which is typically on delivery. Revenue from take or pay contracts is recorded as unearned revenue until the product has been drawn by the customer (transfer of control), at which time it is recognised in earnings.

Other operating revenue - Revenue earned from LNG processing and other services is recognised over time as the services are rendered.

Expenses

Royalties, excise and levies - Royalties, excise and levies under existing regimes are considered to be production-based taxes and are therefore accrued on the basis of the Group's entitlement to physical production.

Depreciation and amortisation - Refer to Note B.3.

Impairment and impairment reversal - Refer to Note B.4.

Leases - Refer to Note D.7.

Employee benefits - Refer to Note E.2.

Key estimates and judgements

Revenue from contracts with customers

Judgement is required to determine the point at which the customer obtains control of hydrocarbons. Factors including transfer of legal title, transfer of significant risks and rewards of ownership and the existence of a present right to payment for the hydrocarbons typically result in control transferring on delivery of hydrocarbons at port of loading or port of discharge.

The transaction price at the date control passes for sales made subject to provisional pricing periods in oil and condensate contracts is determined with reference to quoted commodity prices.

Judgement is also used to determine if it is probable that a significant reversal will occur in relation to revenue recognised during open pricing periods in LNG contracts. The Group estimates variable consideration based on reasonably available information from contract negotiations and market indicators.

Progress of performance obligations for LNG processing services revenue recognised over time is measured using the output method which most accurately measures the progress towards satisfaction of the performance obligation of the services provided.

Table of Contents

Notes to the Consolidated Financial Statements

A.1 Segment revenue and expenses (cont.)

Set out below are segment revenue and expenses for the year ended 31 December 2021.

| | Producing | | | | Development | | | Other | | Consolidated US\$m |
|--|---------------------|-----------------|------------------|---------------|-------------|----------|-----------------------|-------------------|----------------------|-----------------------|

- Operating revenue includes revenue from contracts with customers of \$6,923 million and sub-lease income of \$39 million disclosed within shipping and other revenue.
- Includes repurchase and cancellation costs to optimise Group revenues.
- Trading costs within Other segments relate to purchase costs of non-produced volumes (including Corpus Christi) and other volumes purchased to optimise produced LNG revenues.
- Comprises provisions used of \$45 million and changes in estimates \$95 million. Refer to Note D.5 for more details.
- Includes other income of \$67 million relating to Pluto volumes delivered into Wheatstone's sales commitments and net foreign exchange gains of \$44 million.
- \$56 million relates to costs of unsuccessful wells. \$209 million relates to capitalised costs written off due to the Group's decision to withdraw from its interests in Myanmar. Refer to Note B.2.
- Includes net loss on hedging activities of \$91 million and other expenses not associated with the ongoing operations of the business. The Other developments segment also includes \$33 million for various costs relating to Woodside's exit from the Kitimat LNG development.
- Impairment reversals on oil and gas properties. Refer to Note B.4 for more details.

- Includes an adjustment of \$113 million related to price reviews currently under negotiation for multiple contracts across North West Shelf and Pluto, reducing revenue recognised in the current and prior periods and increasing other liabilities.
- Comprised of the recognition of an onerous contract provision \$447 million, offset by changes in estimates of \$54 million, provisions used of \$41 million and a revision of discount rates of \$5 million. Refer to Note D.5 for more details.
- Includes foreign exchange gains and losses, gains and losses on hedging activities, and other expenses not associated with the ongoing operations of the business.
- The impairment losses represent charges on exploration and evaluation of \$1,557 million and oil and gas properties of \$3,712 million.
- The 2020 amounts have been restated to reflect the changes in the Development segment.

1. Trading costs includes trading intersegment adjustments which eliminate to nil in the Group's consolidated results.
2. Other income includes an \$81 million periodic adjustment reflecting the arrangements governing Wheatstone LNG sales. Refer to Note D.6 for further details.
3. Impairment losses represents charges on non-current assets held for sale of \$17 million and exploration and evaluation of \$720 million. Refer to Note B.4 for further details.
4. Other comprises foreign exchange gains and losses and other expenses not associated with the ongoing operations of the business.
5. The 2019 amounts have been restated to reflect the changes in the Development segment.

Notes to the Consolidated Financial Statements

A.3 Dividends paid and proposed

Woodside Petroleum Ltd., the parent entity, paid and proposed dividends set out below:

| | <u>2021</u> | <u>2020</u> | <u>2019</u> |
|--|--------------|--------------|--------------|
| | <u>US\$m</u> | <u>US\$m</u> | <u>US\$m</u> |
| (a) Dividends paid during the financial year | | | |
| Prior year final dividend US\$0.12, paid on 24 March 2021 (2020: US\$0.55, paid on 20 March 2020; 2019: US\$0.91, paid on 20 March 2019) | 115 | 518 | 852 |
| Current year interim dividend US\$0.30, paid on 24 September 2021 (US\$0.26, paid on 18 September 2020; 2019: US\$0.36, paid on 20 September 2019) | 289 | 248 | 337 |
| | <u>404</u> | <u>766</u> | <u>1,189</u> |
| (b) Dividend declared subsequent to the reporting period (not recorded as a liability) | | | |
| Final dividend US\$1.05 (2020: US\$0.12; 2019: US\$0.55) | 1,018 | 115 | 518 |
| (c) Other information | | | |
| Current year dividends per share (US cents) | <u>135</u> | <u>38</u> | <u>91</u> |

The dividend reinvestment plan (DRP) was approved by the shareholders at the Annual General Meeting in 2003 for activation as required to fund future growth. The DRP was reactivated for the 2019 interim dividend and remains in place until further notice.

A.4 Earnings/(losses) per share

| | <u>2021</u> | <u>2020</u> | <u>2019</u> |
|---|-------------|-------------|-------------|
| Profit/(loss) attributable to equity holders of the parent (US\$m) | 1,983 | (4,028) | 343 |
| Weighted average number of shares on issue for basic earnings/(loss) per share | 962,604,811 | 951,113,086 | 935,833,092 |
| Effect of dilution from contingently issuable shares | 9,023,439 | – | – |
| Weighted average number of shares on issue adjusted for the effect of dilution ¹ | 971,628,250 | 951,113,086 | 935,833,092 |
| Basic earnings/(losses) per share (US cents) | 206.0 | (423.5) | 36.7 |
| Diluted earnings/(losses) per share (US cents) | 204.1 | (423.5) | 36.7 |

1. The contingently issuable shares in 2020 have an anti-dilutive impact.

Earnings/(losses) per share is calculated by dividing the profit/(loss) for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares on issue during the year. The weighted average number of shares makes allowance for shares reserved for employee share plans. Diluted earnings per share is calculated by adjusting basic earnings per share by the number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares. At 31 December 2021, 9,023,439 awards granted under the Woodside employee share plans are considered dilutive. Total outstanding share awards as at 31 December 2020 were 9,392,203 and considered anti-dilutive due to the loss position in 2020. Total awards of 10,501,088 in 2019 are considered to be contingently issuable and therefore not dilutive.

On 22 November 2021, Woodside and BHP Group (BHP) signed a binding share sale agreement to combine their respective oil and gas portfolios by an all stock merger (the Transaction). On completion of the Transaction, BHP's oil and gas business would merge with Woodside, and Woodside would issue new shares to be distributed to BHP shareholders. The expanded Woodside would be owned 52% by existing Woodside shareholders and 48% by existing BHP shareholders. This Transaction is not considered dilutive for the current period.

| Current income tax expense | <u>658</u> | <u>275</u> | <u>325</u> |

1. The net \$348 million reduction of the Pluto PRRT deferred tax asset in 2020 includes derecognition of general expenditure of \$627 million (based on expected future utilisation) offset by a reduction in the Pluto asset accounting base of \$279 million (included within 'PRRT projects profit/ (loss) before tax').
2. Includes a \$226 million PRRT expense as a result of the 2021 Pluto-Scarborough impairment reversal increasing the asset accounting base and thereby reducing the deferred tax asset.
3. Includes \$10 million tax expense recognised in other comprehensive income (2020: \$19 million benefit; 2019: nil).
4. The global operations effective income tax rate (ETR) is calculated as the Group's income tax expense divided by profit before income tax. The Australian operations ETR is calculated with reference to all Australian companies and excludes foreign exchange on settlement and revaluation of income tax liabilities.
5. Primarily expenditure in respect of foreign operations, including the impairment of foreign assets and onerous contract provision.
6. Excludes adjustment to prior years.

Recognition and measurement

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised. The tax rates and laws used to determine the amount are based on those that have been enacted or substantially enacted by the end of the reporting period. Income taxes relating to items recognised directly in equity are recognised in equity.

Current taxes

Current tax expense is the expected tax payable on the taxable income for the year and any adjustment to tax payable in respect of previous years.

Deferred taxes

Deferred tax expense represents movements in the temporary differences between the carrying amount of an asset or liability in the statement of financial position and its tax base.

With the exception of those noted below, deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for deductible temporary differences, unused tax losses and tax credits only if it is probable that sufficient future taxable income will be available to utilise those temporary differences and losses.

Deferred tax is not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither accounting profit nor the taxable profit.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

A.5 Taxes (cont.)

In relation to PRRT, the impact of future augmentation on expenditure is included in the determination of future taxable profits when assessing the extent to which a deferred tax asset can be recognised in the statement of financial position.

Offsetting deferred tax balances

Deferred tax assets and liabilities are offset only if there is a legally enforceable right to offset current tax assets and liabilities and when they relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities that the Group intends to settle its current tax assets and liabilities on a net basis.

Key estimates and judgements

(a) Income tax classification

Judgement is required when determining whether a particular tax is an income tax or another type of tax. PRRT is considered, for accounting purposes, to be an income tax. Accounting for deferred tax is applied to income taxes as described above, but is not applied to other types of taxes, e.g. North West Shelf royalties, excise and levies which are recognised in cost of sales in the income statement.

(b) Deferred tax asset recognition

Australian tax losses: A deferred tax asset (DTA) of nil (2020: \$149 million; 2019: nil) has been recognised for carry forward unused tax losses and credits. The 2020 DTA was fully utilized in 2021.

Foreign tax losses: DTAs of \$497 million (2020: \$477 million; 2019: \$471 million) relating to unused foreign tax losses have not been recognised on the basis that it is not probable that the assets will be utilised based on current planned activities in those regions.

PRRT: The recoverability of PRRT DTAs is primarily assessed with regard to future oil price assumptions. As a result of the Pluto impairment reversal (as disclosed in Note B.4) increasing the Pluto PRRT accounting base, the Pluto PRRT DTA has been reduced by \$226 million. The Pluto PRRT DTA of \$785 million continues to be recognised on the basis that it is probable that future taxable profits will be available to utilise the deductible expenditure. In determining the amount of DTA that is considered probable and eligible for recognition, forecast future taxable profits are risk-adjusted where appropriate by a market premium risk rate to reflect uncertainty inherent in long term forecasts. A long-term bond rate of 1.5% (31 December 2020: 1.0%; 31 December 2019: 1.3%) was used for the purposes of augmentation. All other deferred PRRT and income tax movements are a result of the effective income tax rates applicable to each Australian or foreign jurisdiction.

Certain deferred tax assets on deductible temporary differences have not been recognised on the basis that deductions from future augmentation of the deductible temporary difference will be sufficient to offset future taxable profit. \$4,507 million (2020: \$4,167 million; 2019: \$3,831 million) relates to the North West Shelf Project, \$1,432 million (2020: \$1,345 million; 2019: \$654 million) relates to the quarantined exploration spend and unrecognised general spend of Pluto LNG and \$1,071 million (2020: \$1,049 million; 2019: \$856 million) relates to Wheatstone. A long-term bond rate of 1.5% (31 December 2020: 1.0%; 31 December 2019: 1.3%) was used for the purposes of augmentation.

Had an alternative approach been used to assess recovery of the deferred tax assets, whereby future augmentation was not included in the assessment, the additional deferred tax assets would be recognised, with a corresponding benefit to income tax expense. It was determined that the approach adopted provides the most meaningful information on the implications of the PRRT regime, whilst ensuring compliance with IAS 12 *Income Taxes*.

1. \$56 million (2020: \$2 million) relates to costs of unsuccessful wells. \$209 million (2020: nil) relates to capitalised costs written off due to the Group's decision to withdraw from its interests in Myanmar.
2. Refer to Note B.4 for details on impairment.

Recognition and measurement

Expenditure on exploration and evaluation is accounted for in accordance with the area of interest method.

Areas of interest are based on a geographical area for which the rights of tenure are current. All exploration and evaluation expenditure, including general permit activity, geological and geophysical costs and new venture activity costs, is expensed as incurred except for the following:

where the expenditure relates to an exploration discovery for which the assessment of the existence or otherwise of economically recoverable hydrocarbons is not yet complete; or

where the expenditure is expected to be recouped through successful exploitation of the area of interest, or alternatively, by its sale.

The costs of acquiring interests in new exploration and evaluation licences are capitalised. The costs of drilling exploration wells are initially capitalised pending the results of the well.

Costs are expensed where the well does not result in the successful discovery of economically recoverable hydrocarbons and the recognition of an area of interest.

Subsequent to the recognition of an area of interest, all further evaluation costs relating to that area of interest are capitalised.

Upon approval for the commercial development of an area of interest, accumulated expenditure for the area of interest is transferred to oil and gas properties.

In the statement of cash flows, those cash flows associated with capitalised exploration and evaluation expenditure, including unsuccessful wells, are classified as cash flows used in investing activities.

Table of Contents

Notes to the Consolidated Financial Statements

B.2 Exploration and evaluation (cont.)

Exploration commitments

The Group has exploration expenditure obligations which are contracted for, but not provided for in the financial statements. These obligations may be varied from time to time and are expected to be fulfilled in the normal course of the Group's operations.

Impairment

Refer to Note B.4 for details on impairment, including any write-offs.

Key estimates and judgements

(a) Area of interest

Typically, an area of interest (AOI) is defined by the Group as an individual geographical area whereby the presence of hydrocarbons is considered favourable or proved to exist. The Group has established criteria to recognise and maintain an AOI.

(a) Transfer to projects in development

Development activities commence after project sanctioning by the appropriate level of management. Judgement is applied by management in determining when the project is technically feasible and economically viable.

1. Refer to Note B.4 for details on impairment losses and impairment reversal.
2. Refer to Note B.6 for details on non-current assets held for sale.

Recognition and measurement

Oil and gas properties are stated at cost less accumulated depreciation and impairment charges. Oil and gas properties include the costs to acquire, construct, install or complete production and infrastructure facilities such as pipelines and platforms, capitalised borrowing costs, transferred exploration and evaluation assets, development wells and the estimated cost of dismantling and restoration.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.3 Oil and gas properties (cont.)

Subsequent capital costs, including major maintenance, are included in the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be reliably measured.

Depreciation and amortisation

Oil and gas properties and other plant and equipment are depreciated to their estimated residual values at rates based on their expected useful lives.

Transferred exploration and evaluation and offshore plant and equipment are depreciated using the unit of production basis. Transferred exploration and evaluation and subsurface development expenditure are depreciated over developed proved plus probable reserves. Late life assets are typically depreciated over proved reserves. Offshore facility assets are depreciated over proved plus a portion of probable reserves. The depreciable amount for the unit of production basis for offshore facility assets excludes future development costs necessary to bring probable reserves into production. Onshore plant and equipment are depreciated using a straight-line basis over the lesser of useful life and the life of proved plus probable reserves. On a straight-line basis the assets have an estimated useful life of 5-50 years.

All other items of oil and gas properties are depreciated using the straight-line method over their useful life. They are depreciated as follows:

Buildings - 24-40 years;

Marine vessels and carriers - 10-40 years;

Other plant and equipment - 5-15 years; and

Land is not depreciated.

Impairment

Refer to Note B.4 for details on impairment.

Capital commitments

The Group has capital expenditure commitments contracted for, but not provided for in the financial statements, of \$7,875 million (2020: \$1,569 million) as at 31 December 2021. Subsequent to year end, capital commitments contracted for has reduced by approximately \$2,876 million due to the Group's participating interest in the Pluto Train 2 Joint venture reducing from 100% to 51% (refer to Note E.5).

Key estimates and judgements

(a) Reserves

The estimation of reserves requires significant management judgement and interpretation of complex geological and geophysical models in order to make an assessment of the size, shape, depth and quality of reservoirs, and their anticipated recoveries.

Estimates of oil and natural gas reserves are used to calculate depreciation and amortisation charges for the Group's oil and gas properties. Judgement is used in determining the reserve base applied to each asset. Typically, late life oil assets use proved reserves.

Estimates are reviewed at least annually or when there are changes in the economic circumstances impacting specific assets or asset groups. These changes may impact depreciation, asset carrying values, restoration

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.3 Oil and gas properties (cont.)

provisions and deferred tax balances. If proved plus probable (2P) reserves estimates are revised downwards, earnings could be affected by higher depreciation expense or an immediate write-down of the asset's carrying value.

(b) Depreciation and amortisation

Judgement is required to determine when assets are available for use to commence depreciation and amortisation. Depreciation and amortisation generally commences on first production.

(c) Change in useful life

As a result of FID on the Scarborough LNG Development and Pluto Train 2, the Group conducted a review of the expected utilisation of the Pluto LNG onshore assets. Pluto LNG onshore assets were previously intended for use until the cessation of production from Pluto LNG. A number of Pluto LNG onshore assets are now expected to be utilised in the processing of Scarborough reserves and as a result the expected useful lives of these assets have increased by a range of 1-23 years. The change in useful life has been applied prospectively from the month of FID and has resulted in a decrease in depreciation expense of \$60 million for the year ended 31 December 2021.

B.4 Impairment of exploration and evaluation and oil and gas properties

Exploration and evaluation

Impairment testing

The recoverability of the carrying amount of exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective AOI.

Each AOI is reviewed half-yearly to determine whether economic quantities of hydrocarbons have been found or whether further exploration and evaluation work is underway or planned to support continued carry forward of capitalised costs. In cases where continued carry-forward of capitalised costs is supported, but where a potential impairment is indicated for an AOI, an assessment is performed using a fair value less costs to dispose (FVLCD) method to determine its recoverable amount. Upon approval for commercial development, exploration and evaluation assets are also assessed for impairment before they are transferred to oil and gas properties.

Impairment calculations

The recoverable amounts of exploration and evaluation assets are determined using FVLCD as there is no value in use (VIU). Costs to dispose are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

If the carrying amount of an AOI exceeds its recoverable amount, the AOI is written down to its recoverable amount and an impairment loss is recognised in the income statement.

For assets previously impaired, if the recoverable amount exceeds the carrying amount, the impairment is reversed, but only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been recognized if no impairment had occurred.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.4 Impairment of exploration and evaluation and oil and gas properties (cont.)

Oil and gas properties

Impairment testing

The carrying amounts of oil and gas properties are assessed half-yearly to determine whether there is an indication of impairment or impairment reversal for those assets which have previously been impaired. Indicators of impairment and impairment reversals include changes in future selling prices, future costs and reserves.

Oil and gas properties are assessed for impairment indicators and impairments on a cash-generating unit (CGU) basis. CGUs are determined as an FPSO and associated oil fields for an oil asset, and an LNG plant, offshore infrastructure and associated gas fields for a gas asset.

If there is an indicator of impairment or impairment reversal for a CGU then the recoverable amount is calculated.

Impairment calculations

The recoverable amount of an asset or CGU is determined as the higher of its VIU and FVLCD. VIU is determined by estimating future cash flows after taking into account the risks specific to the asset and discounting to present value using an appropriate discount rate.

If the carrying amount of an asset or CGU exceeds its recoverable amount, the asset or CGU is written down and an impairment loss is recognised in the income statement.

For assets previously impaired, if the recoverable amount exceeds the carrying amount, the impairment is reversed. The carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment had been recognised.

Recognised impairment and impairment reversals

31 December 2021

As at 31 December 2021 the Group identified the following indicators for impairment and impairment reversals:

Pluto-Scarborough and Wheatstone CGU - a reduction of 2P total reserves within the Greater Pluto and Wheatstone reserves and resources estimates.

Pluto-Scarborough CGU - additional value generated by Scarborough and Pluto Train 2, which have been combined with Pluto into a new Pluto-Scarborough CGU following the final investment decision for Scarborough and Pluto Train 2 in November 2021.

North West Shelf CGU - updated cost and production profiles, including the impact of third-party processing agreements, and short-term pricing assumptions.

NWS Oil (Okha) CGU - The reclassification to a late life oil asset due to natural reservoir decline and short-term pricing assumptions.

No impairment was recognised for Wheatstone and NWS Oil (Okha) as the recoverable amount exceeds the carrying amount of the CGU.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.4 Impairment of exploration and evaluation and oil and gas properties (cont.)

Impairment reversals were recognised for Pluto-Scarborough and NWS Gas (refer to Note A.1). The results were as follows:

| Segment | CGU | Impairment reversal | | | | | | Total US\$m |
|---------------------------|-------------------|--------------------------------|-----------------------------------|--|---------------------------------|---|-------------------------------------|----------------|
| | | Oil and gas properties | | | | | | |
| | | Recoverable amount US\$m | Land and buildings US\$m | Transferred exploration and evaluation US\$m | Plant and equipment US\$m | Marine vessels and carriers US\$m | Projects in development US\$m | |
| Producing and Development | Pluto-Scarborough | 17,474 | 42 | 53 | 563 | – | 24 | 682 |
| Producing | North West Shelf | 2,425 | 2 | 13 | 348 | – | 13 | 376 |
| | Total | 19,899 | 44 | 66 | 911 | – | 37 | 1,058 |

The recoverable amounts have been determined using the VIU method. The carrying amounts of the CGUs include all assets allocated to the CGU. Refer to key estimates and judgements for further details.

Sensitivity analysis

Changes in the following key assumptions have been estimated to result in a higher or lower carrying amounts¹ than what was determined as at 31 December 2021:

| | | Sensitivity (US\$m) ² | | | | | | |
|------------------------|------------------------------|---|--|---------------------------------------|---------------------------------------|---|---------------------------|-----|
| | | Discount rate: increase of 1% ^{3,4} | Discount rate: decrease of 1% | Brent price: increase of 10% | Brent price: decrease of 10% | FX: increase of 12% ⁵ | FX: decrease of 12% | |
| Oil and gas properties | Producing and Development | Pluto-Scarborough | – | – | – | – | – | – |
| | Producing | North West Shelf | – | – | – | (13) | – | – |
| | | Wheatstone | (159) | 178 | 438 | (438) | (122) | 122 |
| | | NWS Oil (Okha) | (4) | 4 | 39 | (39) | (28) | 28 |

- Increases to carrying amounts are limited to historical impairment losses recognised, net of depreciation and amortisation that would have been incurred had no impairment taken place.
- The sensitivities represent reasonable possible changes to the discount rate, oil price and FX assumptions.
- A change of 1% represents 100 basis points.
- The relationship between the discount rate and carrying amount is non-linear and as such, the sensitivities are unlikely to result in a symmetrical impact. Due to the non-linear relationship, the impact of changing the discount rate is likely to be greater at a lower discount rate than at a higher discount rate.
- FX sensitivity of +12%/-12% was determined based on historical 5-year standard deviation of AU\$/US\$.

Impairment on non-current assets held for sale

The pending sale of a portion of the Wheatstone Construction Village resulted in an impairment loss of \$10 million as the asset's carrying value exceeded its FVLCD, which was determined based on the underlying sale agreements, classified as Level 3 on the fair value hierarchy. An impairment loss of \$10 million was recognised in the Wheatstone operating segment of Note A.1. Refer to note B.6 for more details.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.4 Impairment of exploration and evaluation and oil and gas properties (cont.)

Key estimates and judgements

CGU determination

Identification of a CGU requires management judgement. In determining the new combined Pluto-Scarborough CGU, management has determined that the Scarborough and Train 2 development concept integrates with the existing Pluto onshore assets and is the smallest group of assets that generate significant cash inflows that are independent from other assets or group of assets.

Recoverable amount calculation key assumptions

In determining the recoverable amount of CGUs, estimates are made regarding the present value of future cash flows when determining the VIU. These estimates require significant management judgement and are subject to risk and uncertainty, and hence changes in economic conditions can also affect the assumptions used and the rates used to discount future cash flow estimates.

The basis for the estimates used to determine recoverable amounts as at 31 December 2021 is set out below:

Resource estimates - 2P reserves for oil and gas properties, except for NWS Oil (Okha) which is based on 1P reserves due to the reclassification to a late life asset.

Inflation rate - an inflation rate of 2% has been applied (31 December 2020: 2.0%; 31 December 2019: 2.0%).

Foreign exchange rates - a rate of \$0.75 US\$:AU\$ (31 December 2020: \$0.75; 31 December 2019: \$0.75) is based on management's view of long-term exchange rates.

Discount rates - a range of pre-tax discount rates between 8.9% and 11.6% (2020: 9.3%-14.8%) (post-tax discount rates 7.5%-8.5%; 2020: 7.5%-11.0%; 2019: 7.5%-9.0%) for CGUs has been applied. The discount rate reflects an assessment of the risks specific to the asset.

An evaluation of climate risk is reflected in Woodside's assumptions on carbon cost pricing, including a long-term Australian carbon price of US\$80/tonne of emissions (real terms 2022). This is applicable to Australian emissions that exceed facility-specific baselines in accordance with Australian regulations, as well as global emissions that exceed voluntary corporate net emissions targets. Woodside continues to monitor the uncertainty around climate change risks and will revise carbon pricing assumptions accordingly.

LNG price - the majority of LNG sales contracts are linked to an oil price marker; accordingly the LNG prices used are consistent with oil price assumptions.

Brent Oil prices - derived from long-term views of global supply and demand, building upon past experience of the industry and consistent with external sources. Prices are adjusted for premiums and discounts based on the nature and quality of the product. Brent oil price estimates have considered the risk of climate policies along with other factors such as industry investment and cost trends. There is significant uncertainty around how society will respond to the climate challenge; Woodside's pricing assumptions reflect a 'most-likely' scenario in which global governments pursue decarbonisation as well as other goals such as energy security and economic development. As with carbon pricing, Woodside continues to monitor this uncertainty and will revise its oil pricing assumptions accordingly in its transition to a lower carbon economy. The nominal Brent oil prices (US\$/bbl) used were:

| | <u>2022</u> | <u>2023</u> | <u>2024</u> | <u>2025</u> | <u>2026</u> | <u>2027</u> |
|------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| 31 December 2021 | 73 | 71 | 68 | 69 | 70 | 72 |
| 30 June 2020 | 57 | 62 | 67 | 72 | 73 | 75 |

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.4 Impairment of exploration and evaluation and oil and gas properties (cont.)

1. Based on US\$65/bbl (2022 real terms) from 2024 with prices escalated at 2.0% annually thereafter.
2. Based on US\$65/bbl (2020 real terms) from 2025 with prices escalated at 2.0% annually thereafter.

31 December 2020

For the year ended 31 December 2020, the following impairments were recognized:

As at 30 June 2020, the Group assessed each AOI and CGU and identified the following indicators of impairment for certain AOIs and all CGUs:

AOIs - uncertainties on fiscal conditions and/or development strategies have led to a lack of substantive ongoing and/or planned activity; and

CGUs - the decrease in global oil and gas prices due to the impacts of the COVID-19 pandemic, oversupply and weakened global demand.

Impairment losses before tax were recognised in profit and loss, refer to Note A.1. The results are set out in the following table, which includes the AOIs and CGUs which were subject to impairment testing:

| Segment | AOI/CGU | Recoverable amount ¹ US\$m | Impairment Losses | | | | | | Total US\$m |
|----------------|--|--|-------------------------------------|-----------------------------|---|------------------------------|--------------------------------------|----------------------------------|----------------|
| | | | Exploration and evaluation US\$m | Land and buildings US\$m | Oil and gas properties | | | Projects in development US\$m | |
| | | | | | Transferred exploration and evaluation US\$m | Plant and equipment US\$m | Marine vessels and carriers US\$m | | |
| Producing | Pluto (WA-404-P) ^{2,4} | - | 429 | - | - | - | - | - | - |
| Development | Kitimat LNG ⁵ | - | 809 | - | - | - | - | - | - |
| | Sunrise ⁶ | - | 168 | - | - | - | - | - | - |
| Other segments | (WA-93-R)/ Ragnar (WA-94-R) ^{3,7} | - | 151 | - | - | - | - | - | - |
| Production | North West Shelf | 1,922 | - | 2 | 15 | 387 | 23 | 27 | 454 |
| | Pluto | 9,712 | - | 54 | 59 | 666 | - | 83 | 862 |
| | Australia Oil Vincent (Ngujima-Yin) | 836 | - | - | 64 | 517 | - | 26 | 607 |
| | NWS Oil (Okha) | 102 | - | - | 3 | 61 | - | 3 | 67 |
| | Wheatstone | 3,029 | - | 208 | 58 | 1,005 | - | 130 | 1,401 |
| Development | Sangomar | 415 | - | - | - | - | - | 321 | 321 |
| Total | | 16,016 | 1,557 | 264 | 199 | 2,636 | 23 | 590 | 3,712 |

1. The recoverable amounts for exploration and evaluation assets and oil and gas properties have been determined using the FVLCD and VIU methods, respectively. The carrying amount of the CGUs includes all assets allocated to the CGU. Refer to key estimates and judgements for further details.
2. The impairment of Pluto (WA-404-P) has resulted in a reclassification of Greater Pluto (WA-404-P) Proved (1P) Undeveloped Reserves and Proved plus Probable (2P) Undeveloped Reserves, to Best Estimate (2C) Contingent Resources. These proved reserves were classified under Society of Petroleum Engineers Petroleum Resources Management System.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.4 Impairment of exploration and evaluation and oil and gas properties (cont.)

3. Converted from WA-430-P.

Impairment indicators for exploration and evaluation assets

4. Increased uncertainty of development timing, given the prioritisation of the higher-value Scarborough resource.
5. The revision of long-term oil and Alberta natural gas market spot price assumptions, and a change to the development concept to a standalone LNG facility, de-linked from the upstream resource, with different accounting requirements.
6. Increased uncertainty of regulatory conditions, fiscal terms and development concept.
7. Increased uncertainty of development timing.

Following the impairment recognised at 30 June 2020, the Group assessed each AOI and CGU for indicators of impairment as at 31 December 2020 in accordance with the Group's accounting policy. In assessing whether there was an indicator of impairment or impairment reversal, the Group considered whether there have been any significant changes in the key estimates and judgements and underlying project assumptions used for the 30 June 2020 impairment assessment and determined that there had been none. No indicators of additional impairment or impairment reversal were identified as at 31 December 2020.

Key estimates and judgements

Recoverable amount calculation key assumptions

In determining the recoverable amounts of exploration and evaluation assets, the market comparison approach using adjusted market multiples (fair value hierarchy Level 3) was utilised to determine FVLCD.

In determining the recoverable amount of CGUs, estimates are made regarding the present value of future cash flows when determining the VIU. These estimates require significant management judgement and are subject to risk and uncertainty, and hence changes in economic conditions can also affect the assumptions used and the rates used to discount future cash flow estimates.

The basis for the estimates used to determine recoverable amounts as at 30 June 2020 is set out below:

Resource estimates - 2P reserves for oil and gas properties.

Inflation rate - an inflation rate of 2% has been applied (31 December 2019: 2.0%).

Foreign exchange rates - a rate of \$0.75 US\$:AU\$ (31 December 2019: \$0.75) is based on management's view of long-term exchange rates.

Discount rates - a range of pre-tax discount rates between 9.3%-14.8% (post-tax discount rates 7.5%-11.0%; 2019: 7.5%-9.0%) for CGUs has been applied. The discount rate reflects an assessment of the risks specific to the asset, including country risk.

An evaluation of climate risk impacts, including a long-term Australian carbon price of US\$80/tonne (real terms 2020), applicable to Australian emissions that exceed facility-specific baselines in accordance with Australian regulations.

LNG price - the majority of LNG sales contracts are linked to an oil price marker; accordingly the LNG prices used are consistent with oil price assumptions.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.4 Impairment of exploration and evaluation and oil and gas properties (cont.)

Brent Oil prices - derived from long-term views of global supply and demand, building upon past experience of the industry and consistent with external sources. Prices are adjusted for premiums and discounts based on the nature and quality of the product. The nominal Brent oil prices (US\$/bbl) used were:

| | <u>2020</u> | <u>2021</u> | <u>2022</u> | <u>2022</u> | <u>2024</u> | <u>2025</u> |
|--------------|-------------|-------------|-------------|-------------|-------------|-----------------|
| 30 June 2020 | 35 | 45 | 57 | 62 | 67 | 72 ¹ |

1. Based on US\$65/bbl (2020 real terms) from 2025 and prices are escalated at 2.0% onwards (31 December 2019: US\$72.50/bbl (2020 real terms) and prices are escalated at 2.0% onwards).

B.5 Signification production and growth asset acquisitions

(a) Sangomar - Acquisition from FAR Senegal RSSD SA

On 7 July 2021, Woodside completed the acquisition of FAR Senegal RSSD SA' s interest in the RSSD Joint Venture (13.67% interest in the Sangomar exploitation area and 15% interest in the remaining RSSD evaluation area), for an aggregate purchase price of \$212 million. The transaction was accounted for as an asset acquisition.

Additional payments of up to \$55 million are contingent on future commodity prices and timing of first oil. The contingent payments terminate on the earliest of 31 December 2027, three years from first oil being sold, and a total contingent payment of \$55 million being reached. The contingent payments are accounted for as contingent liabilities in accordance with the Group' s accounting policies.

Woodside' s interest has increased to 82% in the Sangomar exploitation area (31 December 2020: 68.33%) and to 90% in the remaining RSSD evaluation area (31 December 2020: 75%).

Assets acquired and liabilities assumed

The identifiable assets and liabilities acquired as at the date of the acquisition inclusive of transaction costs are:

| | <u>US\$m</u> |
|---|-------------------|
| Oil and gas properties | 205 |
| Exploration and evaluation | 7 |
| Cash acquired | 3 |
| Payables | (13) |
| Net other assets and liabilities assumed | 10 |
| Total identifiable net assets at acquisition | <u>212</u> |

Cash flows on acquisition

| | <u>US\$m</u> |
|---|-------------------|
| Purchase cash consideration | 212 |
| Transaction costs | - |
| Total purchase consideration | <u>212</u> |
| Net cash outflows on acquisition | <u>212</u> |

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.5 Signification production and growth asset acquisitions (cont.)

Key estimates and judgements

Nature of acquisition

Judgement is required to determine if the transaction is the acquisition of an asset or a business combination. The Sangomar project is in the early phase of development and a substantive process that has the ability to convert inputs to outputs is not present and therefore the acquisitions in both 2020 and 2021 are treated as asset acquisitions.

(b) BHP merger commitment deed

On 17 August 2021, Woodside and BHP Group (BHP) entered into a merger commitment deed to combine their respective oil and gas portfolios by an all stock merger (the Transaction). The share sale agreement and the integration and transition services agreement were executed on 22 November 2021.

On completion of the Transaction, BHP's oil and gas business will merge with Woodside, and Woodside will issue new shares to be distributed to BHP shareholders. The expanded Woodside will be owned 52% by existing Woodside shareholders and 48% by existing BHP shareholders. The Transaction is subject to satisfaction of conditions precedent including shareholder, regulatory and other approvals. The completion of the proposed merger is targeted for Q2 2022 following all necessary approvals.

Woodside and BHP have also agreed on an option for BHP to sell its 26.5% interest in the Scarborough Joint Venture and its 50% interest in the Thebe and Jupiter Joint Ventures to Woodside. The option is exercisable by BHP in the second half of 2022 and, if exercised, consideration of \$1,000 million is payable to BHP plus working capital adjustments from 1 July 2021 to completion date. An additional \$100 million is payable contingent upon future FID for a Thebe development.

(c) Sangomar Acquisition from Capricorn Senegal Limited

On 22 December 2020, Woodside completed the acquisition of Capricorn Senegal Limited's (Cairn's) interest in the RSSD Joint Venture (36.44% interest in the Sangomar exploitation area and 40% interest in the remaining RSSD evaluation area) for an aggregate purchase price of \$527 million. The transaction was accounted for as an asset acquisition.

Additional payments of up to \$100 million are contingent on future commodity prices and the timing of first oil. The contingent payments are accounted for as contingent liabilities in accordance with the Group's accounting policies.

Assets acquired and liabilities assumed

The identifiable assets and liabilities acquired as at the date of the acquisition inclusive of transaction costs were:

| | US\$m |
|---|-------------------|
| Oil and gas properties | 540 |
| Exploration and evaluation | 26 |
| Cash acquired | 5 |
| Payables | (51) |
| Net other assets and liabilities assumed | 7 |
| Total identifiable net assets at acquisition | <u>527</u> |

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.5 Signification production and growth asset acquisitions (cont.)

Cash flows on acquisition

| | US\$m |
|---|--------------|
| Purchase cash consideration | 525 |
| Transaction costs | 2 |
| Total purchase consideration | 527 |
| Net cash outflows on acquisition | 527 |

B.6 Non-current assets held for sale

Recognition and measurement

The Group classifies non-current assets and liabilities as held for sale if their carrying amounts will be recovered principally through sale rather than through continuing use. Such non-current assets and liabilities classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the sale, excluding the finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset is available for sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the sale, expected within one year from the date of the classification.

Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale. Assets and liabilities classified as held for sale are presented separately as current items in the statement of financial position.

Transfers to non-current assets held for sale

On 15 November 2021, the Group and Global Infrastructure Partners (GIP) entered into a Sale and Purchase Agreement for GIP to acquire a 49% participating interest in the Pluto Train 2 Joint Venture. The transaction completed on 18 January 2022 (refer to Note E.5), reducing the Group's participating interest from 100% to 51%. Accordingly, the associated Pluto Train 2 assets within the Development segment have been reclassified to non-current assets held for sale. The arrangements require GIP to fund its 49% share of capital expenditure from 1 October 2021 and an additional amount of capital expenditure of approximately \$822 million. If the total capital expenditure incurred is less than \$5,600 million, GIP will pay Woodside an additional amount equal to 49% of the under-spend. In the event of a cost overrun, Woodside will fund up to approximately \$822 million of GIP's share of the overrun. Delays to the expected start-up of production will result in payments by Woodside to GIP in certain circumstances. The arrangements include provisions for GIP to be compensated for exposure to additional Scope 1 emissions liabilities above agreed baselines, and to sell its 49% interest back to Woodside if the status of key regulatory approvals materially changes.

In addition, in December 2021, Woodside committed to sell a portion of the Wheatstone Construction Village and six residential properties. The construction village within the Wheatstone operating segment and the residential properties within the Pluto segment have been reclassified as non-current assets held for sale and both sale transactions are expected to complete in 2022.

Impairment relating to the non-current assets held for sale

Immediately before the classification as non-current assets held for sale, the recoverable amount of the relevant assets were calculated and an impairment of the Wheatstone Construction Village amounting to \$10 million was recognised within oil and gas properties (Note B.4).

[Table of Contents](#)

Notes to the Consolidated Financial Statements

B.6 Non-current assets held for sale (cont.)

Assets and liabilities of the non-current assets held for sale

As at 31 December 2021, the Group has reclassified \$252 million of Pluto Train 2 assets, \$1 million of the Wheatstone Construction Village assets and \$1 million of the Pluto residential housing to non-current assets held for sale. There are no recognised liabilities associated with the assets held for sale.

C. Debt and Capital

This section addresses cash, debt and the capital position of the Group at the end of the reporting period including, where applicable, the accounting policies applied and the key estimates and judgements made.

Key financial and capital risks in this section

Capital risk management

Group Treasury is responsible for the Group's capital management including cash, debt and equity. Capital management is undertaken to ensure that a secure, cost-effective and flexible supply of funds is available to meet the Group's operating and capital expenditure requirements. A stable capital base is maintained from which the Group can pursue its growth aspirations, whilst maintaining a flexible capital structure that allows access to a range of debt and equity markets to both draw upon and repay capital.

The Dividend Reinvestment Plan (DRP) was approved by shareholders at the Annual General Meeting in 2003 for activation as required to fund future growth. The DRP was reactivated for the 2019 interim dividend and will remain in place until further notice.

A range of financial metrics are monitored, including gearing and cash flow leverage, and Treasury policy breaches and exceptions.

Liquidity risk management

Liquidity risk arises from the financial liabilities of the Group and the Group's subsequent ability to meet its obligations to repay financial liabilities as and when they fall due. The liquidity position of the Group is managed to ensure sufficient liquid funds are available to meet its financial commitments in a timely and cost-effective manner.

The Group's liquidity is continually reviewed, including cash flow forecasts to determine the forecast liquidity position and maintain appropriate liquidity levels. At 31 December 2021, the Group had a total of \$6,125 million (2020: \$6,704 million) of available undrawn facilities and cash at its disposal. The maturity profile of interest-bearing liabilities is disclosed in Note C.2, trade and other payables are disclosed in Note D.4 and lease liabilities are disclosed in Note D.7. Financing facilities available to the Group are disclosed in Note C.2.

Interest rate risk management

Interest rate risk is the risk that the Group's financial position will fluctuate due to changes in market interest rates.

The Group's exposure to the risk of changes in market interest rates relates primarily to financial instruments with floating interest rates including long-term debt obligations, cash and short-term deposits. The Group manages its interest rate risk by maintaining an appropriate mix of fixed and floating rate debt. To manage the ratio of fixed rate debt to floating rate debt, the Group may enter into interest rate swaps. The Group holds cross-currency interest rate swaps to hedge the foreign exchange risk (refer to Section A) and interest rate risk of the

[Table of Contents](#)

Notes to the Consolidated Financial Statements

C. Debt and Capital (cont.)

CHF denominated medium term note. The Group also holds interest rate swaps to hedge the interest rate risk associated with the \$600 million syndicated facility. Refer to Notes C.2 and D.6 for further details.

At the reporting date, the Group was exposed to various benchmark interest rates that were not designated in cash flow hedges, primarily \$2,962 million (2020: \$3,527 million) on cash and cash equivalents, \$367 million (2020: \$450 million) on interest-bearing liabilities (excluding transaction costs) and \$9 million (2020: \$15 million) on cross-currency interest rate swaps.

A reasonably possible change in the USD London Interbank Offered Rate (LIBOR) (+1%/-1% (2020: +0.5%/-0.5%)), with all variables held constant, would not have a material impact on the Group's equity or the income statement in the current period.

The Group's Treasury function is closely monitoring the market and the output from the various industry working groups managing the transition to new benchmark interest rates. The Treasury function is assessing the implications of the Interbank Offered Rates (IBOR) reform across the Group and will manage and execute the transition from current benchmark rates to alternative benchmark rates.

C.1 Cash and cash equivalents

| | 2021 | 2020 |
|--|--------------|--------------|
| | US\$m | US\$m |
| Cash and cash equivalents | | |
| Cash at bank | 300 | 367 |
| Term deposits | <u>2,725</u> | <u>3,237</u> |
| Total cash and cash equivalents | <u>3,025</u> | <u>3,604</u> |

Recognition and measurement

Cash and cash equivalents in the statement of financial position comprise cash at bank and short-term deposits with an original maturity of three months or less. Cash and cash equivalents are stated at face value in the statement of financial position.

Foreign exchange risk

The Group held \$108 million of cash and cash equivalents at 31 December 2021 (2020: \$78 million) in currencies other than US dollars.

| Carrying amount at 31 December 2020 | (4) | 593 | 250 | 4,778 | 597 | 6,214 |
| Undrawn balance at 31 December 2020 | 1,900 | 1,200 | – | – | – | 3,100 |

Recognition and measurement

All borrowings are initially recognised at fair value less transaction costs. Borrowings are subsequently carried at amortised cost. Any difference between the proceeds received and the redemption amount is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings designated as a hedged item are measured at amortised cost adjusted to record changes in the fair value of risks that are being hedged in fair value hedges. The changes in the fair value risks of the hedged item resulted in a gain of \$5 million being recorded (2020: loss of \$19 million), and a loss of \$7 million recorded on the hedging instrument (2020: gain of \$18 million).

All bonds, notes and facilities are subject to various covenants and a negative pledge restricting future secured borrowings, subject to a number of permitted lien exceptions. Neither the covenants nor the negative pledges have been breached at any time during the reporting period.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

C.2 Interest-bearing liabilities and financing facilities (cont.)

Fair value

The carrying amount of interest-bearing liabilities approximates their fair value, with the exception of the Group's unsecured bonds and the medium term notes. The unsecured bonds have a carrying amount of \$4,081 million (2020: \$4,778 million) and a fair value of \$4,443 million (2020: \$5,196 million). The medium term notes have a carrying amount of \$592 million (2020: \$597 million) and a fair value of \$604 million (2020: \$617 million). Fair value is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date and classified as Level 1 on the fair value hierarchy. Where these cash flows are in a foreign currency, the present value is converted to US dollars at the foreign exchange spot rate prevailing at the reporting date. The Group's repayment obligations remain unchanged.

Foreign exchange risk

All interest-bearing liabilities are denominated in US dollars, excluding the CHF175 million medium term note.

Maturity profile of interest-bearing liabilities

The table below presents the contractual undiscounted cash flows associated with the Group's interest-bearing liabilities, representing principal and interest. The figures will not necessarily reconcile with the amounts disclosed in the consolidated statement of financial position.

| | <u>2021</u> <u>US\$m</u> | <u>2020</u> <u>US\$m</u> |
|----------------------------|-----------------------------|-----------------------------|
| Due for payment in: | | |
| 1 year or less | 470 | 979 |
| 1-2 years | 462 | 470 |
| 2-3 years | 188 | 462 |
| 3-4 years | 1,169 | 178 |
| 4-5 years | 951 | 1,161 |
| More than 5 years | <u>3,320</u> | <u>4,266</u> |
| | <u>6,560</u> | <u>7,516</u> |

Amounts exclude transaction costs.

Bilateral facilities

The Group has 14 bilateral loan facilities totaling \$1,900 million (2020: 14 bilateral loan facilities totaling \$1,900 million). Details of bilateral loan facilities at the reporting date are as follows:

2021:

| <u>Number of facilities</u> | <u>Term (years)</u> | <u>Currency</u> | <u>Extension option</u> |
|-----------------------------|---------------------|-----------------|-------------------------|
| 5 | 5 | US\$ | Evergreen |
| 2 | 4 | US\$ | Evergreen |
| 7 | 3 | US\$ | Evergreen |

[Table of Contents](#)

Notes to the Consolidated Financial Statements

C.2 Interest-bearing liabilities and financing facilities (cont.)

2020:

| <u>Number of facilities</u> | <u>Term (years)</u> | <u>Currency</u> | <u>Extension option</u> |
|-----------------------------|---------------------|-----------------|-------------------------|
| 6 | 5 | US\$ | Evergreen |
| 2 | 4 | US\$ | Evergreen |
| 6 | 3 | US\$ | Evergreen |

Interest rates are based on USD LIBOR and margins are fixed at the commencement of the drawdown period. Interest is paid at the end of the drawdown period. Evergreen facilities may be extended continually by a year subject to the bank's agreement.

Syndicated facility

On 14 October 2019, Woodside increased the existing facility to \$1,200 million, with \$400 million expiring on 11 October 2022 and \$800 million expiring on 11 October 2024. Interest rates are based on USD LIBOR and margins are fixed at the commencement of the drawdown period.

On 17 January 2020, the Group completed a new \$600 million syndicated facility with a term of seven years. Interest is based on the USD London Interbank Offered Rate (LIBOR) plus 1.2%. Interest is paid on a quarterly basis.

Japan Bank for International Cooperation (JBIC) facility

On 24 June 2008, the Group entered into a two tranche committed loan facility of \$1,000 million and \$500 million respectively. The \$500 million tranche was repaid in 2013. There is a prepayment option for the remaining balance. Interest rates are based on LIBOR. Interest is payable semi-annually in arrears and the principal amortises on a straight-line basis, with equal instalments of principal due on each interest payment date (every six months).

Under this facility, 90% of the receivables from designated Pluto LNG sale and purchase agreements are secured in favour of the lenders through a trust structure, with a required reserve amount of \$30 million.

To the extent that this reserve amount remains fully funded and no default notice or acceleration notice has been given, the revenue from Pluto LNG continues to flow directly to the Group from the trust account.

Medium term notes

On 28 August 2015, the Group established a \$3,000 million Global Medium Term Notes Programme listed on the Singapore Stock Exchange. Three notes have been issued under this programme as set out below:

| <u>Issue date</u> | <u>Maturity date</u> | <u>Currency</u> | <u>Carrying amount (million)</u> | <u>Nominal interest rate</u> |
|-------------------|----------------------|-----------------|--------------------------------------|---------------------------------|
| 15 July 2016 | 15 July 2022 | US\$ | 200 | Floating three month US\$ LIBOR |
| 11 July 2016 | 11 December 2023 | CHF | 175 | 1 % |
| 29 November 2019 | 29 January 2027 | US\$ | 200 | 3 % |

The unutilised program is not considered to be an unused facility.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

C.2 Interest-bearing liabilities and financing facilities (cont.)

US bonds

The Group has four unsecured bonds issued in the United States of America as defined in Rule 144A of the *US Securities Act of 1933* as set out below:

| <u>Issue date</u> | <u>Maturity date</u> | <u>Carrying amount US\$m</u> | <u>Nominal interest rate</u> |
|-------------------|----------------------|------------------------------|------------------------------|
| 5 March 2015 | 5 March 2025 | 1,000 | 3.65 % |
| 15 September 2016 | 15 September 2026 | 800 | 3.70 % |
| 13 September 2017 | 15 March 2028 | 800 | 3.70 % |
| 4 March 2019 | 4 March 2029 | 1,500 | 4.50 % |

Interest on the bonds is payable semi-annually in arrears.

During the period, the Group redeemed the \$700 million 2021 US bond and repaid \$84 million on the JBIC facility.

C.3 Contributed equity

Recognition and measurement

Issued capital

Ordinary shares are classified as equity and recorded at the value of consideration received. The cost of issuing shares is shown in share capital as a deduction, net of tax, from the proceeds.

Reserved shares

The Group's own equity instruments, which are reacquired for later use in employee share-based payment arrangements (reserved shares), are deducted from equity. No gain or loss is recognised in the income statement on the purchase, sale, issue or cancellation of the Group's own equity instruments.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

| Distributable profits reserve | 58 | 462 | - |
| | 683 | 1,403 | 992 |

Nature and purpose

Employee benefits reserve

Used to record share-based payments associated with the employee share plans and remeasurement adjustments relating to the defined benefit plan.

Foreign currency translation reserve

Used to record foreign exchange differences arising from the translation of the financial statements of foreign entities from their functional currency to the Group's presentation currency.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

C.4 Other reserves (cont.)

Hedging reserve

Used to record gains and losses on hedges designated as cash flow hedges, and foreign currency basis spread arising from the designation of a financial instrument as a hedging instrument. Gains and losses accumulated in the cash flow hedge reserve are taken to the income statement in the same period during which the hedged expected cash flows affect the income statement.

Distributable profits reserve

Used to record distributable profits generated by the Parent entity, Woodside Petroleum Ltd.

D. Other Assets and Liabilities

This section addresses the other assets and liabilities position at the end of the reporting period including, where applicable, the accounting policies applied and the key estimates and judgements made.

Key financial and capital risks in this section

Credit risk management

Credit risk is the risk that a counterparty will not meet its obligation under a financial instrument or customer contract, leading to a financial loss to the Group. Credit risk arises from the financial assets of the Group, which comprise trade and other receivables, loans receivables and deposits with banks and financial institutions.

The Group manages its credit risk on trade receivables and financial instruments by predominantly dealing with counterparties with an investment grade credit rating. Sufficient collateral is obtained to mitigate the risk of financial loss when transacting with counterparties with below investment grade credit ratings. Customers who wish to trade on unsecured credit terms are subject to credit verification procedures. Receivable balances are monitored on an ongoing basis. As a result, the Group's exposure to bad debts is not significant. The Group's maximum credit risk is limited to the carrying amount of its financial assets.

Customer credit risk is managed by the Treasury function subject to the Group's established policy, procedures and controls relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored. At 31 December 2021, the Group had four customers (2020: four customers) that owed the Group more than \$10 million each and accounted for approximately 88% (2020: 82%) of all trade receivables. Payment terms are typically 14 to 30 days providing only a short credit exposure.

The Group considers the probability of default upon initial recognition of the asset and whether there has been a significant depreciation in credit quality on an ongoing basis. A significant decrease in credit quality is defined as a debtor being greater than 30 days past due in making a contractual payment. Credit losses for trade receivables (including lease receivables) and contract assets are determined by applying the simplified approach and are measured at an amount equal to lifetime expected loss. Under the simplified approach, determination of the loss allowance provision and expected loss rate incorporates past experience and forward-looking information, including the outlook for market demand and forward-looking interest rates. A default on other financial assets is considered to be when the counterparty fails to make contractual payments within 60 days of when they fall due.

At 31 December 2021, the Group had a provision for credit losses of nil (2020: nil). Subsequent to 31 December 2021, 100% (2020: 100%) of the trade receivables balance of \$152 million (2020: \$164 million) has been received.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D. Other Assets and Liabilities (cont.)

Credit risk from balances with banks is managed by the Treasury function in accordance with the Group's policy. The Group's main funds are placed as short-term deposits with reputable financial institutions with strong investment grade credit ratings. At 31 December 2021 and 31 December 2020, there were no significant concentrations of credit risk within the Group and financial instruments are spread amongst a number of financial institutions to minimise the risk of counterparty default. The maximum exposure to financial institution credit risk is represented by the sum of all cash deposits plus accrued interest, bank account balances and fair value of derivative assets. The Group's counterparty credit policy limits this exposure to commercial and investment banks, according to approved credit limits based on the counterparty's credit rating.

D.1 Segment assets and liabilities

| | 2021 | 2020 |
|--------------------------------|---------------|---------------|
| | US\$m | US\$m |
| (a) Segment assets | | |

Notes to the Consolidated Financial Statements

D.2 Receivables

| | 2021 | 2020 |
|--------------------------------------|--------------|--------------|
| | US\$m | US\$m |
| (a) Receivables (current) | | |
| Trade receivables ¹ | 152 | 164 |
| Other receivables ¹ | 123 | 75 |
| Loans receivable | 75 | 59 |
| Lease receivables | 18 | 3 |
| Interest receivable | – | 1 |
| Dividend receivable | – | 1 |
| | <u>368</u> | <u>303</u> |
| (b) Receivables (non-current) | | |
| Loans receivable | 627 | 394 |
| Lease receivables | 26 | 10 |
| Defined benefit plan asset | 33 | 19 |
| | <u>686</u> | <u>423</u> |

1. Interest-free and settlement terms are usually between 14 and 30 days.

Recognition and measurement

Trade receivables are initially recognised at the transaction price determined under IFRS 15 *Revenue from Contracts with Customers*. Other receivables are initially recognised at fair value. Receivables that satisfy the contractual cash flow and business model tests are subsequently measured at amortised cost less an allowance for uncollectable amounts. Uncollectable amounts are determined using the expected loss impairment model. Collectability and impairment are assessed on a regular basis.

Subsequent recoveries of amounts previously written off are credited against other expenses in the income statement. Certain receivables that do not satisfy the contractual cash flow and business model tests are subsequently measured at fair value (refer to Note D.6).

The Group's customers are required to pay in accordance with agreed payment terms. Depending on the product, settlement terms are 14 to 30 days from the date of invoice or bill of lading and customers regularly pay on time. There are no significant overdue trade receivables as at the end of the reporting period (2020: nil).

Fair value

The carrying amount of trade and other receivables approximates their fair value.

Foreign exchange risk

The Group held \$121 million of receivables at 31 December 2021 (2020: \$68 million) in currencies other than US dollars (predominantly Australian dollars).

Loans receivable

On 9 January 2020, Woodside Energy Finance (UK) Ltd entered into a secured loan agreement with Petrosen (the Senegal National Oil Company), to provide up to \$450 million for the purpose of funding Sangomar project

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.2 Receivables (cont.)

costs. The facility has a maximum term of 12 years and semi-annual repayments of the loan are due to commence at the earlier of 12 months after RFSU or 30 June 2025. The carrying amount of the loan receivable is \$335 million at 31 December 2021 (2020: \$113 million), which approximates its fair value. The remaining balance of loans receivable is due from non-controlling interests.

D.3 Inventories

| | 2021 | 2020 |
|--------------------------------------|--------------|--------------|
| | US\$m | US\$m |
| (a) Inventories (current) | | |
| Petroleum products | | |
| Goods in transit | 35 | 18 |
| Finished stocks | 34 | 33 |
| Warehouse stores and materials | <u>133</u> | <u>74</u> |
| | <u>202</u> | <u>125</u> |
| (b) Inventories (non-current) | | |
| Warehouse stores and materials | <u>19</u> | <u>40</u> |
| | <u>19</u> | <u>40</u> |

Recognition and measurement

Inventories include hydrocarbon stocks, consumable supplies and maintenance spares. Inventories are valued at the lower of cost and net realisable value. Cost is determined on a weighted average basis and includes direct costs and an appropriate portion of fixed and variable production overheads where applicable. Inventories determined to be obsolete or damaged are written down to net realisable value, being the estimated selling price less selling costs.

D.4 Payables

The following table shows the Group's payables balances and maturity analysis.

| | < 30 days | 30-60 days | > 60 days | Total |
|------------------------------------|---------------------|-------------------|---------------------|--------------|
| | US\$m | US\$m | US\$m | US\$m |
| Year ended 31 December 2021 | | | | |
| Trade payables ¹ | 191 | – | – | 191 |
| Other payables ¹ | 390 | – | – | 390 |
| Interest payable ² | <u>7</u> | <u>–</u> | <u>51</u> | <u>58</u> |
| Total payables | <u>588</u> | <u>–</u> | <u>51</u> | <u>639</u> |
| Year ended 31 December 2020 | | | | |
| Trade payables ¹ | 100 | – | – | 100 |
| Other payables ¹ | 342 | – | – | 342 |
| Interest payable ² | <u>7</u> | <u>5</u> | <u>51</u> | <u>63</u> |
| Total payables | <u>449</u> | <u>5</u> | <u>51</u> | <u>505</u> |

1 Interest-free and normally settled on 30 day terms.

2 Details regarding interest-bearing liabilities are contained in Note C.2.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.4 Payables (cont.)

Recognition and measurement

Trade and other payables are carried at amortised cost and are recognised when goods and services are received, whether or not billed to the Group, prior to the end of the reporting period.

Fair value

The carrying amount of payables approximates their fair value.

Foreign exchange risk

The Group held \$311 million of payables at 31 December 2021 (2020: \$210 million) in currencies other than US dollars (predominantly Australian dollars).

D.5 Provisions

| | Restoration¹ | Employee | Onerous | Other | Total |
|--|--------------------------------|-----------------|------------------------------|--------------|--------------|
| | US\$m | benefits | contracts² | US\$m | US\$m |
| | | US\$m | US\$m | | |
| Year ended 31 December 2021 | | | | | |
| At 1 January 2021 | 2,134 | 295 | 349 | 129 | 2,907 |
| Change in provision | 60 | (9) | (140) | (23) | (112) |
| Unwinding of present value discount | 24 | – | 5 | – | 29 |
| Carrying amount at 31 December 2021 | 2,218 | 286 | 214 | 106 | 2,824 |
| Current | 235 | 269 | – | 101 | 605 |
| Non-current | 1,983 | 17 | 214 | 5 | 2,219 |
| Net carrying amount | 2,218 | 286 | 214 | 106 | 2,824 |
| Year ended 31 December 2020 | | | | | |
| At 1 January 2020 | 1,869 | 189 | – | 70 | 2,128 |
| Change in provision | 237 | 106 | 347 | 59 | 749 |
| Unwinding of present value discount | 28 | – | 2 | – | 30 |
| Carrying amount at 31 December 2020 | 2,134 | 295 | 349 | 129 | 2,907 |
| Current | 54 | 272 | 46 | 128 | 500 |
| Non-current | 2,080 | 23 | 303 | 1 | 2,407 |
| Net carrying amount | 2,134 | 295 | 349 | 129 | 2,907 |

- 2021 change in provision is due to changes in estimates of \$239 million (primarily due to the inclusion of costs for the removal of rigid plastic-coated pipelines, reflecting an update to Woodside's assumptions based on decommissioning planning activities in 2021), offset by a revision of discount rates of \$134 million and provisions used of \$45 million.
- 2021 change in provision is due to provisions used of \$45 million and changes in estimates of \$95 million.

Recognition and measurement

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.5 Provisions (cont.)

Restoration

The restoration provision is first recognised in the period in which the obligation arises. The nature of restoration activities includes the removal of facilities, abandonment of wells and restoration of affected areas. Restoration provisions are updated annually, with the corresponding movement recognised against the related exploration and evaluation assets or oil and gas properties.

Over time, the liability is increased for the change in the present value based on a pre-tax discount rate appropriate to the risks inherent in the liability. The unwinding of the discount is recorded as an accretion charge within finance costs. The carrying amount capitalised in oil and gas properties is depreciated over the useful life of the related asset (refer to Note B.3).

Costs incurred that relate to an existing condition caused by past operations, and which do not have a future economic benefit, are expensed.

Employee benefits

Provision is made for employee benefits accumulated as a result of employees rendering services up to the end of the reporting period. These benefits include wages, salaries, annual leave and long service leave.

Liabilities in respect of employees' services rendered that are not expected to be wholly settled within one year after the end of the period in which the employees render the related services are recognised as long-term employee benefits.

These liabilities are measured at the present value of the estimated future cash outflow to the employees using the projected unit credit method. Liabilities expected to be wholly settled within one year after the end of the period in which the employees render the related services are classified as short-term benefits and are measured at the amount due to be paid.

Onerous contract provision

Provision is made for loss-making contracts at the present value of the lower of the net cost of fulfilling and the cost arising from failure to fulfill each contract. Long term expectations of reduced spreads between North American and European/Asian LNG or gas markets has given rise to a loss-making contract.

Key estimates and judgements

(a) Restoration obligations

The Group estimates the future remediation and removal costs of offshore oil and gas platforms, production facilities, wells and pipelines at different stages of the development and construction of assets or facilities. In many instances, removal of assets occurs many years into the future.

The Group's restoration obligations are based on compliance with the requirements of relevant regulations which vary for different jurisdictions and are often non-prescriptive. Australian legislation requires removal of structures, equipment and property, or alternative arrangements to removal which are satisfactory to the regulator. The Group maintains technical expertise to ensure that industry learnings, scientific research and local and international guidelines are reviewed in assessing its restoration obligations.

The restoration obligation requires judgemental assumptions regarding removal date, environmental legislation and regulations, the extent of restoration activities required, the engineering methodology for estimating cost,

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.5 Provisions (cont.)

future removal technologies in determining the removal cost, and liability-specific discount rates to determine the present value of these cash flows. The Group's provision includes the following costs:

for onshore assets, provision has been made for the full removal of production facilities and aboveground pipelines.

for offshore assets, provision has been made for the plug and abandonment of wells and the removal of offshore platform topsides, floating production storage offloading (FPSO) and some subsea infrastructure. It is currently the Group's assumption that certain pipelines and infrastructure, parts of offshore platform substructures, and certain subsea infrastructure remain in-situ where it can be demonstrated that this will deliver equal or better health, safety and environmental outcomes than full removal and that regulatory approval is obtained where arrangements are satisfactory to the regulator.

Elements composed of steel, or steel and concrete, with hydrocarbons removed have previously been accepted by the Australian regulator to be decommissioned in-situ where it has been demonstrated there is an acceptable impact to the environment and to current and future marine users (i.e. fishing, shipping and other activities).

The basis of the restoration obligation provision for assets with approved decommissioning plans or general directions issued by the regulator can differ from the assumptions disclosed above. Whilst the provisions reflect the Group's best estimate based on current knowledge and information, further studies and detailed analysis of the restoration activities for individual assets will be performed near the end of their operational life and/or when detailed decommissioning plans are required to be submitted to the relevant regulatory authorities. Actual costs and cash outflows can materially differ from the current estimate as a result of changes in regulations and their application, prices, analysis of site conditions, further studies, timing of restoration and changes in removal technology. These uncertainties may result in actual expenditure differing from amounts included in the provision recognised as at 31 December 2021.

A range of pre-tax discount rates between 0.4% and 2.4% (2020: 0.1% to 2%) has been applied. If the discount rates were decreased by 0.5% then the provision would be \$134 million higher. If the cost estimates were increased by 10% then the provision would be \$225 million higher. The proportion of the non-current balance not expected to be settled within 10 years is 65% (2020: 73%).

In the event that the removal of all, or a substantial portion of, the elements was required, Woodside estimates the additional cost would lead to an increase to the provision of approximately \$300 - \$500 million. This excludes costs related to large diameter trunklines between the offshore platforms and onshore plants as further assessment is required for these pipelines which are buried below the seabed or heavily stabilised by rock or concrete due to their location and metocean conditions.

(b) Long service leave

Long service leave is measured at the present value of benefits accumulated up to the end of the reporting period. The liability is discounted using an appropriate discount rate. Management uses judgement to determine key assumptions used in the calculation including future increases in salaries and wages, future on-cost rates and future settlement dates of employees' departures.

(c) Legal case outcomes

Provisions for legal cases are measured at the present value of the amount expected to settle the claim. Management is required to use judgement when assessing the likely outcome of legal cases, estimating the risked amount and whether a provision or contingent liability should be recognised.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.5 Provisions (cont.)

(d) Onerous contracts

The onerous contract provision assessment requires management to make certain estimates regarding the unavoidable costs and the expected economic benefits from the contract. These estimates require significant management judgement and are subject to risk and uncertainty, and hence changes in economic conditions can affect the assumptions. The present value of the provision was estimated using the assumptions set out below:

Contract term - 19 years; the provision is released as contract deliveries are made up to 2040.

Discount rate - a pre-tax, risk free US government bond rate of 1.855% (2020: 1.390%) has been applied.

LNG pricing - forecast sales and purchase prices are subject to a number of price markers. Price assumptions are based on the best information on the market available at measurement date and derived from short- and long-term views of global supply and demand, building upon past experience of the industry and consistent with external sources. The forecasted sales are linked to gas hub prices (Title Transfer Facility (TTF)) at which physical sales are expected to occur and incorporates known pricing information related to sales¹. The long-term gas sales price is estimated on the basis of the Group's Brent price forecast. The estimated purchase price is linked to US hub prices (Henry Hub (HH)) at which physical purchases are expected to occur. The nominal TTF, Brent oil prices and HH gas prices used at 31 December 2021 were:

| | <u>2022</u> | <u>2023</u> | <u>2024</u> | <u>2025</u> | <u>2026</u> |
|-------------------------|-------------|-------------|-------------|-------------|-------------|
| TTF (US\$/MMBtu) | 15.0 | 8.2 | 6.9 | 7.0 | 7.2 |
| Brent (US\$/bbl) | 73 | 71 | 68 | 69 | 70 |
| Henry Hub (US\$/ MMBtu) | 4.0 | 3.6 | 3.1 | 3.2 | 3.3 |

The nominal impacts of the effects of changes to discount rate and long-term oil price assumptions are estimated as follows:

| <u>Change in assumption⁵</u> | <u>US\$m</u> |
|--|--------------|
| LNG sales price ¹ : increase of 10% | 500 |
| LNG sales price ¹ : decrease of 10% | (509) |
| US hub gas price (HH) ³ : increase of 10% | (282) |
| US hub gas price (HH) ³ : decrease of 10% | 282 |
| Discount rate: increase of 1% ⁵ | 19 |
| Discount rate: decrease of 1% ⁵ | (20) |

1. For committed volumes, contracted pricing information has been applied. For hedge accounted volumes, the relevant hedged prices have been applied.
2. Long-term oil prices are based on US\$65/bbl (2022 real terms) from 2024 and prices are escalated at 2.0% onwards.
3. Long-term gas prices are based on US\$3.0/MMBtu (2022 real terms) from 2025 to 2029 and thereafter US\$3.5/MMBtu (2022 real terms). All long term prices are escalated at 2.0%.
4. Amounts shown represent the change of the present value of the contract keeping all other variables constant. Any reduction in the onerous provision recognised would not exceed the balance of the provision itself.
5. A change of 1% represents 100 basis points.

| Other financial liabilities | | |
| Financial instruments at fair value through profit and loss | | |
| Derivative financial instruments designated as hedges | 563 | 68 |
| Other financial liabilities | 9 | 3 |
| Total other financial liabilities | <u>572</u> | <u>71</u> |
| Current | 411 | 37 |
| Non-current | 161 | 34 |
| Net carrying amount | <u>572</u> | <u>71</u> |

Recognition and measurement

Other financial assets and liabilities

Receivables subject to provisional pricing adjustments are initially recognised at the transaction price and subsequently measured at fair value with movements recognised in the income statement.

Derivative financial instruments

Derivative financial instruments that are designated within qualifying hedge relationships are initially recognised at fair value on the date the contract is entered into. For relationships designated as fair value hedges, subsequent fair value movements of the derivative are recognised in the income statement. For relationships designated as cash flow hedges, subsequent fair value movements of the derivative for the effective portion of the hedge are recognised in other comprehensive income and accumulated in reserves in equity; fair value movements for the ineffective portion are recognised immediately in the income statement. Costs of hedging have been separated from the hedging arrangements and deferred to other comprehensive income and accumulated in reserves in equity. Amounts accumulated in equity are reclassified to the income statement in the periods when the hedged item affects profit or loss.

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments to ensure that an economic relationship exists between the hedged exposure and the hedging instrument. The Group assesses whether the derivative designated in each hedging relationship has been, and is expected to be, effective in offsetting changes in cash flows of the hedged exposure using the hypothetical derivative method.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.6 Other financial assets and liabilities (cont.)

Ineffectiveness is recognised where the cumulative change in the designated component value of the hedging instrument on an absolute basis exceeds the change in value of the hedged exposure attributable to the hedged risk.

Ineffectiveness may arise where the timing of the transaction changes from what was originally estimated such as delayed shipments or changes in timing of forecast sales. This may also arise where the commodity swap pricing terms do not perfectly match the pricing terms of the LNG revenue contracts.

Fair value

Except for the other financial assets and other financial liabilities set out in this note, there are no material financial assets or financial liabilities carried at fair value.

The fair value of commodity derivative financial instruments is determined based on observable quoted forward pricing and swap rates and is classified as Level 2 on the fair value hierarchy. The most frequently applied valuation techniques include forward pricing and swap models that use present value calculations. The models incorporate various inputs including the credit quality of counterparties and forward rate curves of the underlying commodity.

The fair value of interest rate swaps is calculated by discounting estimated future cash flows based on the terms of maturity of each contract, using market interest rates for a similar instrument at the reporting date and is classified as Level 2 on the fair value hierarchy.

The fair value of foreign exchange forward contracts is determined using quoted forward exchange rates at the reporting date and present value calculations based on high credit quality yield curves in the respective currencies and is classified as Level 2 on the fair value hierarchy.

The fair values of other financial assets and other financial liabilities are predominantly determined based on observable quoted forward pricing and are predominantly classified as Level 2 on the fair value hierarchy.

Foreign exchange

The derivative financial instruments include foreign exchange forward contracts that are denominated in Australian dollars. The Group had no material other financial assets and liabilities denominated in currencies other than US dollars.

Hedging activities

During the period, the following hedging activities were undertaken:

The Group hedged a percentage of its oil-linked exposure, entering into oil swap derivatives settling between 2021 to 2023 in order to achieve a minimum average sales price per barrel.

The Group also entered into separate HH commodity swaps to hedge the purchase leg of the Corpus Christi volumes and separate TTF commodity swaps to hedge the sales leg of Corpus Christi volumes effectively protecting against pricing risk for 2022 and 2023. As a result of hedging and term sales, approximately 97% of Corpus Christi volumes in 2022 and 70% in 2023 have hedged pricing risk.

The Group entered into TTF commodity swaps to hedge equity LNG cargoes expected to be exposed to winter 2021/22 natural gas pricing.

Table of Contents

Notes to the Consolidated Financial Statements

D.6 Other financial assets and liabilities (cont.)

The Group entered into foreign exchange forward contracts to fix the Australian dollar to US dollar exchange rate in relation to a portion of the Australian dollar denominated capital expenditure expected to be incurred under the Scarborough development.

For the year ended 31 December 2020 the following main hedging activities were undertaken:

The Group hedged a percentage of its exposure to commodity price risk, entering into 13.4 million barrels of oil swap derivatives to achieve a minimum average sales price of \$33 per barrel. The Group also entered into 7.9 million barrels of oil call options, to take advantage of increases in oil prices above \$40 per barrel, for a premium of \$37 million. Most of the derivatives settled between April 2020 and December 2020, with swaps and options for 1.3 million barrels settling in 2021. The swaps and call options were designated as cash flow hedges.

| Weighted average hedged rate (AUD:USD) | 0.71 | – |

Hedge ineffectiveness of \$38 million (2020: \$1 million) has been recognised in the profit and loss.

Other financial assets

Other financial assets measured at fair value include receivables subject to provisional pricing adjustments of \$163 million (2020: \$144 million) and repurchase agreements entered into for the purposes of net settlement rather than for physical delivery of \$69 million (2020: nil).

Interest Rate Benchmark Reform

A fundamental reform of major interest rate benchmarks is being undertaken globally, including the replacement of some interbank offered rates (IBORs) with alternative nearly risk-free rates (referred to as 'IBOR reform'). The Group has exposures to IBORs on its financial instruments that will be impacted as part of these market-wide initiatives. The Group's main IBOR exposure at the reporting date is USD LIBOR. In 2020, the Federal Reserve announced that LIBOR will be phased out and eventually replaced by June 2023.

The Group anticipates that IBOR reform will impact its operational and risk management processes and hedge accounting. The main risks to which the Group is exposed as a result of IBOR reform are operational, for example renegotiating borrowing contracts through bilateral negotiation with counterparties, implementing new fallback clauses with its derivative counterparties, updating contractual terms and revising operational controls related to the reform. Financial risk is predominantly limited to interest rate risk. Hedging relationships may experience ineffectiveness due to uncertainty about when and how replacement may occur with respect to the relevant hedged item and hedging instrument or the difference in the timing of a replacement.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.6 Other financial assets and liabilities (cont.)

The Group's financial instruments have not yet transitioned to an alternative interest rate benchmark. The Group has financial liabilities and financial assets with a total carrying value of \$957 million and \$367 million respectively, with reference to USD LIBOR.

The Group has the following hedging relationships which are exposed to interest rate benchmarks impacted by IBOR Reform:

Interest rate swaps to hedge the LIBOR interest rate risk associated with the \$600 million syndicated facility (refer to Note C.2). The interest rate swaps are designated as cash flow hedges, converting the variable interest into fixed interest US dollar debt, and mature in 2027.

A fixed rate 175 million Swiss Franc (CHF) denominated medium term note, which it hedges with cross-currency interest rate swaps designated in both fair value and cash flow hedge relationships. The cross-currency interest rate swaps are referenced to LIBOR (refer to Note C.2).

The Group's Treasury function continues to assess the implications of the IBOR reform across the Group and will manage and execute the transition from current benchmark rates to alternative benchmark rates.

Key estimates and judgements

Fair value of other financial assets and liabilities

Estimates have been applied in the measurement of other financial assets and liabilities and, where required, judgement is applied in the settlement of any financial assets or liabilities. In the current period, this included a \$56 million periodic adjustment which increased other financial liabilities, reflecting the arrangements governing Wheatstone LNG sales (2020: \$12 million decrease).

D.7 Leases

Recognition and measurement

When a contract is entered into, the Group assesses whether the contract contains a lease. A lease arises when the Group has the right to direct the use of an identified asset which is not substitutable and to obtain substantially all economic benefits from the use of the asset throughout the period of use. The leases recognised by the Group predominantly relate to LNG vessels, property and drilling rigs.

The Group separates the lease and non-lease components of the contract and accounts for these separately. The Group allocates the consideration in the contract to each component on the basis of their relative stand-alone prices.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.7 Leases (cont.)

Leases as a lessee

Lease assets and lease liabilities are recognised at the lease commencement date, which is when the assets are available for use. The assets are initially measured at cost, which is the present value of future lease payments adjusted for any lease payments made at or before the commencement date, plus any make-good obligations and initial direct costs incurred.

Lease assets are depreciated using the straight-line method over the shorter of their useful life and the lease term. Refer to Note B.3 for the useful lives of assets. Periodic adjustments are made for any re-measurements of the lease assets and for impairment losses, assessed in accordance with the Group's impairment policies.

Lease liabilities are initially measured at the present value of future minimum lease payments, discounted using the Group's incremental borrowing rate if the rate implicit in the lease cannot be readily determined, and are subsequently measured at amortised cost using the effective interest rate. Minimum lease payments are fixed payments or index-based variable payments incorporating the Group's expectations of extension options and do not include non-lease components of a contract. A portfolio approach was taken when determining the implicit discount rate for LNG vessels with similar terms and conditions on transition.

The lease liability is remeasured when there are changes in future lease payments arising from a change in rates, index or lease terms from exercising an extension or termination option. A corresponding adjustment is made to the carrying amount of the lease assets, with any excess recognised in the consolidated income statement.

There are no restrictions placed upon the lessee by entering into these leases.

Short-term leases and leases of low value

Short-term leases (lease term of 12 months or less) and leases of low value assets are recognised as incurred as an expense in the consolidated income statement. Low value assets comprise plant and equipment.

Foreign exchange risk

The Group held \$476 million of lease liabilities at 31 December 2021 (2020: \$518 million; 2019: \$461 million) in currencies other than the US dollar (predominantly Australian dollars).

Maturity profile of lease liabilities

The table below presents the contractual undiscounted cash flows associated with the Group's lease liabilities, representing principal and interest. The figures will not necessarily reconcile with the amounts disclosed in the consolidated statement of financial position.

| | 2021 | 2020 |
|----------------------------|--------------|--------------|
| | US\$m | US\$m |
| Due for payment in: | | |
| 1 year or less | 283 | 184 |
| 1-2 years | 283 | 181 |
| 2-3 years | 191 | 180 |
| 3-4 years | 171 | 174 |
| 4-5 years | 161 | 174 |
| More than 5 years | 789 | 994 |
| | <u>1,878</u> | <u>1,887</u> |

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.7 Leases (cont.)

Lease commitments

The table below presents the contractual undiscounted cash flows associated with the Group's future lease commitments for non-cancellable leases not yet commenced, representing principal and interest.

| | 2021 | 2020 |
|---|--------------|--------------|
| | US\$m | US\$m |
| Due for payment: | | |
| Within one year | 80 | 90 |
| After one year but not more than five years | 159 | 365 |
| Later than five years | 49 | 45 |
| | <u>288</u> | <u>500</u> |

Subsequent to year end, contractual undiscounted future lease commitments for non-cancellable leases not yet commenced increased by \$634 million. The leases commence from 2025 and relate to facilities, marine vessels and carriers (refer to Note E.5).

Payments of \$68 million (2020: \$101 million) for short-term leases (lease term of 12 months or less) and payments of \$18 million (2020: \$17 million) for leases of low value assets were expensed in the consolidated income statement. Total payments for leases in the statement of cash flows are \$330 million (2020: \$275 million), with \$244 million (2020: \$157 million) included in financing activities.

The Group has short-term and low value lease commitments for marine vessels and carriers, property, drill rigs and plant and equipment contracted for, but not provided for in the financial statements, of \$53 million (2020: \$94 million).

Key estimates and judgements

(a) Control

Judgement is required to assess whether a contract is or contains a lease at inception by assessing whether the Group has the right to direct the use of the identified asset and obtain substantially all the economic benefits from the use of that asset.

(b) Lease term

Judgement is required when assessing the term of the lease and whether to include optional extension and termination periods. Option periods are only included in determining the lease term at inception when they are reasonably certain to be exercised.

Lease terms are reassessed when a significant change in circumstances occurs. On this basis, possible additional lease payments amounting to \$1,654 million (2020: \$1,670 million) were not included in the measurement of lease liabilities.

(c) Interest in joint arrangements

Judgement is required to determine the Group's rights and obligations for lease contracts within joint operations, to assess whether lease liabilities are recognised gross (100%) or in proportion to the Group's participating interest in the joint operation. This includes an evaluation of whether the lease arrangement contains a sublease with the joint operation.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

D.7 Leases (cont.)

(d) Discount rates

Judgement is required to determine the discount rate, where the discount rate is the Group's incremental borrowing rate if the rate implicit in the lease cannot be readily determined. The incremental borrowing rate is determined with reference to the Group's borrowing portfolio at the inception of the arrangement or the time of the modification.

E. Other Items

This section includes Group structure information and other disclosures.

E.1 Contingent liabilities and assets

| | 2021 | 2020¹ |
|---|--------------|-------------------------|
| | US\$m | US\$m |
| Contingent liabilities at reporting date | | |
| Contingent liabilities | 195 | 587 |
| Guarantees | 7 | 10 |
| | <u>202</u> | <u>597</u> |

1. Contingent payments of \$450 million were paid in 2021 due to a positive FID to develop the Scarborough field and capitalised to oil and gas properties.

Contingent liabilities relate predominantly to possible obligations whose existence will only be confirmed by the occurrence or non-occurrence of uncertain future events, and therefore the Group has not provided for such amounts in these financial statements. Additionally, there are a number of other claims and possible claims that have arisen in the course of business against entities in the Group, the outcome of which cannot be estimated at present and for which no amounts have been included in the table above.

The above table includes contingent payments of \$155 million (2020: \$100 million) relating to the Sangomar development, dependent on commodity prices and the timing of first oil.

Additionally, the Group has issued guarantees relating to workers' compensation liabilities.

There were no contingent assets as at 31 December 2021 or 31 December 2020.

E.2 Employee benefits

(a) Employee benefits

Employee benefits for the reporting period are as follows:

| | 2021 | 2020 | 2019 |
|---------------------------------|--------------|--------------|--------------|
| | US\$m | US\$m | US\$m |
| Employee benefits | 217 | 252 | 246 |
| Share-based payments | 12 | 19 | 21 |
| Defined contribution plan costs | 26 | 27 | 28 |
| Defined benefit plan expense | 1 | 2 | 1 |
| | <u>256</u> | <u>300</u> | <u>296</u> |

[Table of Contents](#)

Notes to the Consolidated Financial Statements

E.2 Employee benefits (cont.)

Recognition and measurement

The Group's accounting policy for employee benefits other than superannuation is set out in Note D.5. The policy relating to share-based payments is set out in Note E.2(c).

All employees of the Group are entitled to benefits on retirement, disability or death from the Group's superannuation plan. The majority of employees are party to a defined contribution scheme and receive fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions. Contributions to defined contribution funds are recognised as an expense as they become payable. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payment is available. The Group also operates a defined benefit superannuation scheme, the membership of which is now closed. The net defined benefit plan asset at 31 December 2021 was \$33 million (2020: \$19 million; 2019: \$18 million).

(b) Compensation of key management personnel

Key management personnel (KMP) compensation for the financial year was as follows:

| | 2021 | 2020 | 2019 |
|------------------------------|-------------------|-------------------|-------------------|
| | US\$ | US\$ | US\$ |
| Short-term employee benefits | 6,599,678 | 5,868,476 | 6,416,430 |
| Post-employment benefits | 77,515 | 63,805 | 71,137 |
| Share-based payments | 5,609,022 | 7,201,653 | 7,253,672 |
| Long-term employee benefits | 717,223 | 515,585 | 281,882 |
| Termination benefits | 2,447,525 | 390,087 | – |
| | <u>15,450,963</u> | <u>14,039,606</u> | <u>14,023,121</u> |

(c) Share plans

The Group provides benefits to its employees (including KMP) in the form of share-based payments whereby employees render services for shares (equity-settled transactions).

Woodside equity plan (WEP) and supplementary Woodside equity plan (SWEP)

The WEP is available to all permanent employees, but since 1 January 2018 has excluded EIS participants. The number of Equity Rights (ERs) offered to each eligible employee is calculated with reference to salary and performance. The linking of performance to an allocation allows the Group to recognise and reward eligible employees for high performance. The ERs have no further ongoing performance conditions after allocation, and do not require participants to make any payment in respect of the ERs at grant or at vesting.

Each ER relating to the WEP for 2018 and prior years entitles the participant to receive a Woodside share on a vesting date three years after the grant date. From the 2019 WEP onwards, 75% of the ERs offered to each participant will vest three years after the grant date, with the remaining 25% vesting five years after the grant date.

The SWEP award is available to employees identified as being retention critical. Each ER entitles the participant to receive a Woodside share on the vesting date three years after the effective grant date. Participants do not make any payment in respect of the ERs at grant or at vesting.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

E.2 Employee benefits (cont.)

Executive incentive plans (EIP)

The EIP operated as Woodside's Executive incentive framework until the end of 2017, after which the Board introduced the EIS. The EIP was used to deliver short-term award (STA) and long-term award (LTA) to Senior Executives.

Short-term awards (STA)

STAs were delivered in the form of restricted shares to Executives, including all Executive KMP. There are no further performance conditions for vesting of deferred STA. Participants are not required to make any payments in respect of STA awards at grant or at vesting. Restricted shares entitle their holders to receive dividends.

Long-term awards (LTA)

LTAs were granted in the form of Performance Rights (PRs) to Executives, including all Executive KMP. Vesting of LTA is subject to achievement of relative total shareholder return (RTSR) targets, with 33% measured against the ASX 50 and the remaining 67% tested against an international group of oil and gas companies.

Participants are not entitled to receive dividends and are not required to make any payments in respect of LTA awards at grant or at vesting.

Executive incentive scheme (EIS)

The EIS was introduced for the 2018 performance year for all Executives including Executive KMP. The EIS is delivered in the form of a cash incentive, Restricted Shares and Performance Rights. The grant date of the Restricted Shares and Performance Rights has been determined to be subsequent to the performance year, being the date of the Board of Directors' approval. Accordingly, the 2020 Restricted Shares and Performance Rights for executives were granted on 17 February 2021, while the Performance Rights for the outgoing CEO were granted on 15 April 2021 and have been included in the table below. The expense estimated as at 31 December 2021 in relation to the 2021 performance year was updated to the fair value on grant date during the period.

The 2021 Restricted Shares and Performance Rights have not been included in the table below as they have not been approved as at 31 December 2021. An expense related to the 2021 performance year has been estimated for Restricted Shares and Performance Rights, using fair value estimates based on inputs at 31 December 2021.

The Restricted Shares and Performance Rights relating to the 2019 performance year were granted on 12 February 2020 and have been included in the table below. The expense estimated as at 31 December 2019 in relation to the 2019 performance year was updated to the fair value on grant date during the period.

The Restricted Shares and Performance Rights relating to the 2018 performance year were granted on 13 February 2019 and have been included in the table below. The expense estimated as at 31 December 2018 in relation to the 2018 performance year was updated to the fair value on grant date during the period.

Recognition and measurement

All compensation under WEP, SWEP and executive share plans is accounted for as share-based payments to employees for services provided. The cost of equity-settled transactions with employees is measured by reference to the fair values of the equity instruments at the date at which they are granted. The fair value of share-based

[Table of Contents](#)

Notes to the Consolidated Financial Statements

E.2 Employee benefits (cont.)

payments is recognised, together with the corresponding increase in equity, over the period in which the vesting conditions are fulfilled, ending on the date on which the relevant employee becomes fully entitled to the shares. At each balance sheet date, the Group reassesses the number of awards that are expected to vest based on service conditions. The expense recognised each year takes into account the most recent estimate.

The fair value of the benefit provided for the WEP and SWEP is estimated using the Black-Scholes option pricing technique. The fair value of the restricted shares is estimated as the closing share price at grant date. The fair value of the benefit provided for the RTSR VPRs was estimated using the Binomial or Black-Scholes option pricing technique combined with a Monte Carlo simulation methodology, where relevant, using historical volatility to estimate the volatility of the share price in the future.

The number of awards and movements for all share plans are summarised as follows:

| | Number of performance awards | | | |
|--|-------------------------------------|--------------|--------------------------------------|-------------------------------------|
| | Employee plans | | Executive plans | |
| | WEP | SWEP | Short-term awards³ | Long-term awards³ |

1. For the purpose of valuation, the share price on grant date for the 2021 WEP allocations was \$15.17 (2020: \$12.57; 2019: \$21.72).
2. For the purpose of valuation, the share price on grant date for Restricted Shares was \$20.18 (2020: \$22.76; 2019: \$24.71) and the Performance Rights were \$11.66 and \$14.44 (2020: \$15.81; 2019: \$16.87).
3. Includes awards issued under EIP and EIS.

E.3 Related party transactions

Transactions with directors

There were no transactions with directors during the year. Key management personnel compensation is disclosed in Note E.2(b).

E.4 Events after the end of the reporting period

On 15 November 2021, the Group and Global Infrastructure Partners (GIP) entered into a Sale and Purchase Agreement for GIP to acquire a 49% participating interest in the Pluto Train 2 Joint Venture. The transaction completed on 18 January 2022, reducing the Group's participating interest from 100% to 51% and reducing the Group's future capital commitments by approximately \$2,876 million. The full financial effect of the transaction is still being assessed.

Subsequent to year end, the Group entered into new lease arrangements (refer to Note D.7).

Table of Contents

Notes to the Consolidated Financial Statements

E.5 Joint arrangements (cont.)

1. FID taken on permits WA-1-L and WA-62-L announced on 22 November 2021.
2. Following the completion of the sale of FAR' s interest in the RSSD joint venture during the year, Woodside' s participating interest increased to 82% in the exploitation area and 90% in the exploration area (refer to Note B.5 more details).
3. Woodside is retaining an upstream position in the Liard Basin by taking on full equity in 28 non-infrastructure related Liard Basin leases from Chevron Canada.
4. The Group completed the relinquishment of permits AD-2, AD-5 and A-4 in 2021 and is in the process of withdrawing from AD-6, AD-7 and A-7. In 2022, the Group will also commence arrangements to formally exit AD-1, AD-8, the A-6 Joint Venture and the A-6 production sharing contract.
5. Licence surrendered in 2021.

The principal activities of the joint operations above are exploration, development and production of hydrocarbons.

Key estimates and judgements

Accounting for interests in other entities

Judgement is required in assessing the level of control obtained in a transaction to acquire an interest in another entity; depending upon the facts and circumstances in each case, Woodside may obtain control, joint control or significant influence over the entity or arrangement. Judgement is applied when determining the relevant activities of a project and if joint control is held over it.

Relevant activities include, but are not limited to, work program and budget approval, investment decision approval, voting rights in joint operating committees, amendments to permits and changes to joint arrangement participant holdings. Transactions which give Woodside control of a business are business combinations. If Woodside obtains joint control of an arrangement, judgement is also required to assess whether the arrangement is a joint operation or a joint venture.

If Woodside has neither control nor joint control, it may be in a position to exercise significant influence over the entity, which is then accounted for as an associate.

Recognition and measurement

Joint arrangements are arrangements in which two or more parties have joint control. Joint control is the contractual agreed sharing of control of the arrangement which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. Joint arrangements are classified as either a joint operation or joint venture, based on the rights and obligations arising from the contractual obligations between the parties to the arrangement.

To the extent the joint arrangement provides the Group with rights to the individual assets and obligations arising from the joint arrangement, the arrangement is classified as a joint operation, and as such the Group recognises its:

- assets, including its share of any assets held jointly;
- liabilities, including its share of any liabilities incurred jointly;
- revenue from the sale of its share of the output arising from the joint operation;
- share of revenue from the sale of the output by the joint operation; and
- expenses, including its share of any expenses incurred jointly.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

E.5 Joint arrangements (cont.)

To the extent the joint arrangement provides the Group with rights to the net assets of the arrangement, the investment is classified as a joint venture and accounted for using the equity method.

Joint arrangements acquired which are deemed to be carrying on a business are accounted for applying the principles of IFRS 3 *Business Combinations*. Joint arrangements which are not deemed to be carrying on a business are treated as asset acquisitions.

Classification

Subsidiaries are all the entities over which the Group has the power over the investee such that the Group is able to direct the relevant activities, has exposure, or rights, to variable returns from its involvement with the investee and has the ability to use its power over the investee to affect the amount of the investor's returns.

(b) Subsidiaries with material non-controlling interests

The Group has two Australian subsidiaries with material non-controlling interests (NCI).

| <u>Name of entity</u> | <u>Principal place of business</u> | <u>% held by NCI</u> | |
|-----------------------------------|------------------------------------|----------------------|---|
| Burrup Facilities Company Pty Ltd | Australia | 10 | % |
| Burrup train 1 Pty Ltd | Australia | 10 | % |

The NCI in both subsidiaries is 10% held by the same parties (refer to Note E.6(a) footnote 3 for details).

[Table of Contents](#)

Notes to the Consolidated Financial Statements

E.6 Subsidiaries (cont.)

The summarised financial information (including consolidation adjustments but before intercompany eliminations) of subsidiaries with material NCI is as follows:

| | 2021 | 2020 | 2019 |
|---|--------------|--------------|--------------|
| | US\$m | US\$m | US\$m |
| Burrup Facilities Company Pty Ltd | | | |
| Current assets | 518 | 425 | 423 |

E.7 Other accounting policies

(a) New and amended accounting standards and interpretations issued but not yet effective

A number of new standards, amendments of standards and interpretations have recently been issued but are not yet effective and have not been adopted by the Group as at the financial reporting date.

[Table of Contents](#)

Notes to the Consolidated Financial Statements

E.7 Other accounting policies (cont.)

The Group has reviewed these standards and interpretations and has determined that none of the new or amended standards will significantly affect the Group's accounting policies, financial position or performance.

(b) New and amended accounting standards and interpretations adopted

The Group adopted International Financial Reporting Standard *Interest Rate Benchmark Reform (Amendments to IFRS 9, IAS 39 and IFRS 7)* as of 1 January 2021.

The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). The amendments include the following practical expedients:

- practical expedients when accounting for changes in the basis for determining the contractual cash flows of financial assets and liabilities;
- reliefs from discontinuing hedge relationships;
- temporary relief from having to meet the separately identifiable requirement when a RFR instrument is designated as a hedge of a risk component; and
- additional IFRS 7 *Financial Instruments: Disclosures*.

These amendments did not impact the financial statements of the Group other than additional required disclosures (refer to Note D.6). The Group intends to use the practical expedients in future periods when existing IBORs are replaced by RFRs.

A number of other new standards are also effective from 1 January 2021 but they do not have a material effect on the Group's financial statements.

Supplementary Oil and Gas Information - Unaudited

SUPPLEMENTARY OIL AND GAS INFORMATION - UNAUDITED

In accordance with the requirements of the Financial Accounting Standards Board (FASB) Accounting Standard Codification 'Extractive Activities-Oil and Gas' (Topic 932) and SEC requirements set out in Subpart 1200 of Regulation S-K, the Group is presenting certain disclosures about its oil and gas activities. These disclosures are presented below as supplementary oil and gas information, in addition to information relating to the reserves and production of Woodside disclosed in the registration statement to which these financial statements are attached.

The information set out in this section is referred to as unaudited as it is not included in the scope of the audit opinion of the independent auditor on Woodside's combined financial statements.

Reserves

Proved oil and gas reserves information for Woodside is included in the registration statement to which these financial statements are attached.

Capitalised costs relating to oil and gas production activities

The following table shows the aggregate capitalised costs relating to oil and gas exploration and production activities and related accumulated depreciation, depletion, amortisation and valuation provisions.

| | <u>Australia US\$m</u> | <u>United States US\$m</u> | <u>Other US\$m</u> | <u>Total US\$m</u> |
|--|----------------------------|------------------------------------|------------------------|------------------------|
| Capitalised cost | | | | |
| 2021 | | | | |
| Unproved properties | 1,172 | – | 1,703 | 2,875 |
| Proved properties | 38,352 | – | 2,517 | 40,869 |
| Total costs | 39,524 | – | 4,220 | 43,744 |
| Less: Accumulated depreciation, depletion, amortisation and valuation provisions | (22,738) | – | (1,958) | (24,696) |
| Net capitalised costs | <u>16,786</u> | <u>–</u> | <u>2,262</u> | <u>19,048</u> |
| Capitalised cost | | | | |
| 2020 | | | | |
| Unproved properties | 2,709 | – | 1,750 | 4,459 |
| Proved properties | 35,892 | – | 1,377 | 37,269 |

| Royalty-related taxes(4) | - | - | - | - |
| Results of oil and gas producing activities(5) | 1,524 | - | (819) | 705 |

(1) Includes valuation provision of US\$(1,048) million (2020: US\$5,269 million; 2019: US\$720 million).

(2) Includes royalties and excise duty.

(3) Represents the unwinding of the discount on the closure and rehabilitation provision.

(4) Includes petroleum resource rent tax and petroleum revenue tax where applicable.

(5) Amounts shown exclude financial income, financial expenses and general corporate overheads and, accordingly, do not represent all of the operations attributable to the Petroleum segment presented in note A.1 'Segment reporting' in these financial statements.

Supplementary Oil and Gas Information - Unaudited

Standardized measure of discounted future net cash flows relating to proved oil and gas reserves (Standardized measure)

The following tables set out the standardized measure of discounted future net cash flows, and changes therein, related to the Woodside' s estimated proved reserves and should be read in conjunction with that related disclosure.

The analysis is prepared in compliance with FASB Oil and Gas Disclosure requirements, applying certain prescribed assumptions under Topic 932 including the use of unweighted average first-day-of-the-month market prices for the previous 12-months, year-end cost factors, currently enacted tax rates and an annual discount factor of 10 per cent to year-end quantities of net proved reserves.

Certain key assumptions prescribed under Topic 932 are arbitrary in nature and may not prove to be accurate. The reserve estimates on which the Standard measure is based are subject to revision as further technical information becomes available or economic conditions change.

Discounted future net cash flows like those shown below are not intended to represent estimates of fair value. An estimate of fair value would also consider, among other things, the expected recovery of reserves in excess of proved reserves, anticipated future changes in commodity prices, exchange rates, development and production costs as well as alternative discount factors representing the time value of money and adjustments for risk inherent in producing oil and gas.

Woodside standardized measure year ended December 31

- (1) Woodside have entered multiple term contracts relating to LNG volumes from our producing and sanctioned assets. Under a 2P reserves outcome, we produce a sufficient quantity of LNG to satisfy these contracts within expected timeframes. Therefore, we have not included the revenue and cost impact of LNG shortfalls under a SEC 1P reserves outcome.
- (2) Future development costs include decommissioning

Changes in the Standardized measure are presented in the following table.

| | 2021 US\$m | 2020 US\$m | 2019 US\$m |
|---|---------------|---------------|---------------|
| Changes in the Standardized measure | | | |
| Standardized measure at the beginning of the year | 5,084 | 10,324 | 13,554 |
| Revisions: | | | |
| Prices, net of production costs | 7,741 | (5,801) | (2,586) |
| Changes in future development costs | 20 | (29) | (101) |
| Revisions of reserves quantity estimates | 2,109 | 269 | 132 |
| Accretion of discount | 430 | 1,038 | 1,453 |
| Changes in production timing and other | 3,485 | (1,180) | (839) |
| Sales of oil and gas, net of production costs | (5,698) | (2,666) | (3,441) |
| Acquisitions of reserves-in-place | - | - | - |
| Sales of reserves-in-place | - | - | - |
| Previously estimated development costs incurred | 565 | 702 | 738 |
| Extensions, discoveries, and improved recoveries, net of future costs | 8,346 | 44 | 124 |
| Changes in future income taxes | (6,345) | 2,382 | 1,289 |
| Standardized measure at the end of the year | 15,737 | 5,084 | 10,324 |

- (1) Changes in reserves quantities are shown in the Petroleum reserves tables included in the registration statement to which these financial statements are attached.

Supplementary Oil and Gas Information - Unaudited

Accounting for suspended exploratory well costs

Expenditure on exploration and evaluation is accounted for in accordance with the area of interest method. The Group's application of the accounting policy is closely aligned to the US GAAP-based successful efforts method. Areas of interest are based on a geographical area for which the rights of tenure are current. All exploration and evaluation expenditure, including general permit activity, geological and geophysical costs and new venture activity costs, is expensed as incurred except for the following:

where the expenditure relates to an exploration discovery for which the assessment of the existence or otherwise of economically recoverable hydrocarbons is not yet complete; or

where the expenditure is expected to be recouped through successful exploitation of the area of interest, or alternatively, by its sale.

The costs of acquiring interests in new exploration and evaluation licences are capitalised. The costs of drilling exploration wells are initially capitalised pending the results of the well.

Costs are expensed where the well does not result in the successful discovery of economically recoverable hydrocarbons and the recognition of an area of interest.

Subsequent to the recognition of an area of interest, all further evaluation costs relating to that area of interest are capitalised.

Upon approval for the commercial development of an area of interest, accumulated expenditure for the area of interest is transferred to oil and gas properties.

In the statement of cash flows, those cash flows associated with capitalised exploration and evaluation expenditure, including unsuccessful wells, are classified as cash flows used in investing activities.

The following table provides the changes to capitalised exploratory well costs that were pending the determination of proved reserves for the three years ended 31 December 2021, 31 December 2020 and 31 December 2019.

| | 2021 | 2020 | 2019 |
|---|--------------|--------------|--------------|
| | US\$m | US\$m | US\$m |
| Movement in capitalised exploratory well costs | | | |
| At the beginning of the year | 2,045 | 3,809 | 4,180 |
| Additions to capitalised exploratory well costs pending the determination of proved reserves | 501 | 399 | 479 |
| Capitalised exploratory well costs charged to expense | (265) | (2) | (46) |
| Capitalised exploratory well costs reclassified to wells, equipment, and facilities based on the determination of proved reserves | (1,664) | (592) | (69) |
| Sale of suspended wells | | | |
| Impairment | – | (1,557) | (720) |
| Amortisation of licence acquisition | (3) | (12) | (15) |
| At the end of the year | <u>614</u> | <u>2,045</u> | <u>3,809</u> |

The following table provides an ageing of capitalised exploratory well costs, based on the date the drilling was completed, and the number of projects for which exploratory well costs has been capitalised for a period greater than one year since the completion of drilling.

Table of Contents

Supplementary Oil and Gas Information - Unaudited

Exploration activity typically involves drilling multiple wells, over a number of years, to fully evaluate and appraise a project. The term 'project' as used in this disclosure refers primarily to individual wells and associated exploratory activities.

| | 2021 | 2020 | 2019 |
|--|--------------|--------------|--------------|
| | US\$m | US\$m | US\$m |
| Ageing of capitalised exploratory well costs | | | |
| Exploratory well costs capitalised for a period of one year or less | 19 | 330 | 395 |
| Exploratory well costs capitalised for a period greater than one year | <u>595</u> | <u>1,715</u> | <u>3,414</u> |
| At the end of the year | <u>614</u> | <u>2,045</u> | <u>3,809</u> |
| | | | |
| | 2021 | 2020 | 2019 |
| | 25 | 13 | 10 |
| Number of projects that have been capitalised for a period greater than one year | <u>25</u> | <u>13</u> | <u>10</u> |

Report of Independent Auditors to the Shareholder and the Board of Directors of BHP Petroleum International Pty Ltd

We have audited the accompanying combined financial statements of BHP Petroleum Assets, which comprise the combined statement of financial position as of 30 June 2021 and 2020, and the related combined statements of profit or loss and other comprehensive income, cash flows and changes in equity for the years then ended, and the related notes to the combined financial statements (collectively referred to as the “financial statements”).

Management’s responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor’s responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the combined financial position of BHP Petroleum Assets at June 30, 2020 and 2021, and the combined results of their operations and their cash flows for the years then ended in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Report on comparative information

We have not audited, reviewed or compiled the comparative combined information presented herein as of and for the year ended June 30, 2019, and, accordingly, we express no opinion on it.

BHP Petroleum Assets

Notes to the Financial Statements

1. Organisation and summary of significant accounting policies

Organisation

BHP Petroleum Assets are a subset of entities wholly owned by BHP Group Limited. The subset of entities primarily represents BHP Group Limited's interests in its petroleum businesses, whose principal activities are the exploration, development and production of oil and gas. These petroleum businesses comprise of oil and gas assets located in the United States (US) Gulf of Mexico, Australia, Trinidad and Tobago, Algeria and Mexico and appraisal and exploration options in Trinidad and Tobago, central and western US Gulf of Mexico, eastern Canada and Barbados. The purpose of these non-statutory combined financial statements is to provide general purpose historical financial information of the BHP Petroleum Assets for inclusion in listing documents to be issued by Woodside Petroleum Limited, which has entered into a share sale agreement to combine with BHP Petroleum Assets (Proposed Transaction).

These combined financial statements include financial information that is limited to the legal entities carved out (BHP Petroleum) from BHP Group Limited, in connection with the Proposed Transaction. BHP Petroleum consists of BHP Petroleum International Pty Ltd and the entities it controls, except for the following entities:

BHP BK Limited

BHP Billiton Petroleum Great Britain Limited

BHP Mineral Resources Inc.

BHP Copper Inc. and its subsidiaries

BHP Capital Inc.

A list of the subsidiaries included within BHP Petroleum's combined financial statements is included in Note 23 'Significant entities of BHP Petroleum'.

BHP Petroleum International Pty Ltd, the Parent of BHP Petroleum, is a proprietary limited company domiciled in Western Australia, Australia. The registered office of BHP Petroleum International Pty Ltd is 125 St Georges Terrace, Perth WA 6000.

Ultimate group company

BHP Group Limited, a company incorporated in the state of Victoria, Australia, is the ultimate Parent company. Copies of the ultimate Parent company's financial statements are available from BHP Centre, 171 Collins Street, Melbourne Victoria 3000, Australia.

Basis of presentation

These combined financial statements present the results of BHP Petroleum, as at and for the years ended 30 June 2021, 2020 and 2019 (the reporting periods) and comprise of:

the combined statement of profit or loss and other comprehensive income for the years then ended;

the combined statement of financial position as at the years ended;

the combined statement of cash flows for the years then ended;

the combined statement of changes in equity for the years then ended and

notes comprising a summary of significant accounting policies and other explanatory information.

Table of Contents

BHP Petroleum Assets

Notes to the Financial Statements

The financial information of BHP Petroleum has been extracted on a “carve-out” basis from the accounting records of BHP Group for the purposes of presenting the combined financial position, combined results of operations and combined cash flows of BHP Petroleum. The combined financial statements reflect assets, liabilities, revenues and expenses directly attributable to BHP Petroleum identified above. BHP Petroleum has adopted the same accounting policies as BHP Group, unless otherwise stated.

The combined financial statements as at and for the reporting periods:

are a combined general purpose financial report

have been prepared in accordance with the requirements of the Australian Corporations Act 2001 and UK Companies Act 2006

were prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB)

are prepared on a going concern basis

measure items on the basis of historical cost principles, except for the following items:

- derivative financial instruments and certain other financial assets and liabilities, which are carried at fair value

include significant accounting policies in the notes to the financial statements that summarise the recognition and measurement basis used and are relevant to an understanding of the combined financial statements

apply a presentation currency of US dollars, consistent with the predominant functional currency of BHP Petroleum’s operations. However, some subsidiaries and joint arrangements have functional currencies other than US dollars

round amounts presented to the nearest million dollars, unless otherwise stated

adopt all new and amended standards and interpretations under IFRS issued by the relevant bodies (listed above) (refer to Note 25 ‘New and amended accounting standards and interpretations’), that are mandatory for application in periods beginning on 1 July 2019. Those new and amended standards and interpretations did not require restatement of prior period financial information

early adopt amendments to IFRS 9 ‘Financial Instruments’ (IFRS 9); IAS 39 ‘Financial Instruments: Recognition and Measurement’ (IAS 39); IFRS 7 ‘Financial Instruments: Disclosures’ (IFRS 7) and IFRS 16 ‘Leases’ (IFRS 16) in relation to Interest Rate Benchmark Reform (refer to Note 25 ‘New and amended accounting standards and interpretations’)

have not early adopted any other standards and interpretations that have been issued or amended but are not yet effective

The accounting policies are consistently applied by all entities included in BHP Petroleum.

Principles of combination

In preparing the combined financial statements, the effects of all intragroup balances and transactions have been eliminated in accordance with the consolidation requirements of IFRS 10 ‘Consolidated Financial Statements’.

The combined financial statements of BHP Petroleum include the combination of entities controlled by BHP Petroleum International Pty Ltd, except for certain controlled entities as identified above, which are excluded on the basis that they are outside the Proposed Transaction.

Table of Contents

BHP Petroleum Assets

Notes to the Financial Statements

Control exists where BHP Petroleum:

is exposed to, or has rights to, variable returns from its involvement with the entity.

has the ability to affect those returns through its power to direct the activities of the entity.

has the ability to approve the operating and capital budget of an entity and the ability to appoint key management personnel, which are decisions that demonstrate that BHP Petroleum has the existing rights to direct the relevant activities of an entity.

Joint arrangements

BHP Petroleum undertakes a number of business activities through joint arrangements, which exist when two or more parties have joint control. All of BHP Petroleum's joint arrangements are classified as joint operations. A joint operation is an arrangement in which BHP Petroleum shares joint control, primarily via contractual arrangements with other parties. In a joint operation, BHP Petroleum has rights to the assets and obligations for the liabilities relating to the arrangement. This includes situations where the parties benefit from the joint activity through a share of the output, rather than by receiving a share of the results of trading. In relation to BHP Petroleum's interest in a joint operation, BHP Petroleum recognises: its assets and liabilities, including its share of any assets and liabilities held or incurred jointly; revenue from the sale of its share of the output and its share of any revenue generated from the sale of the output by the joint operation; and its expenses including its share of expenses incurred jointly. All such amounts are measured in accordance with the terms of the arrangement, which is usually in proportion to BHP Petroleum's interest in the joint operation.

Associates

BHP Petroleum accounts for investments in associates using the equity accounting method. An entity is considered an associate where we are deemed to have significant influence but not control or joint control.

Significant influence is presumed to exist where BHP Petroleum:

has over 20 per cent but less than 50 per cent of the voting rights of an entity, unless it can be clearly demonstrated that this is not the case or

holds less than 20 per cent of the voting rights of an entity; however, has the power to participate in the financial and operating policy decisions affecting the entity.

Foreign currencies

Transactions related to BHP Petroleum's worldwide operations are conducted in a number of foreign currencies. The majority of the subsidiaries, joint arrangements and associates within each of the operations have assessed US dollars as the functional currency, however, some subsidiaries and joint arrangements have functional currencies other than US dollars.

Transactions and monetary items denominated in foreign currencies are translated into US dollars as follows:

| <u>Foreign currency item</u> | <u>Applicable exchange rate</u> |
|-------------------------------------|--|
| Transactions | Date of underlying transaction |
| Monetary assets and liabilities | Period-end rate |

BHP Petroleum Assets

Notes to the Financial Statements

Foreign exchange gains and losses resulting from translation are recognised in the income statement, except for foreign exchange gains or losses on foreign currency provisions for site closure and rehabilitation costs (which are capitalised in property, plant and equipment for operating sites).

On combination, the assets, liabilities, income and expenses of non-US dollar denominated functional currency entities are translated into US dollars using the following applicable exchange rates:

Foreign currency amount

Income and expenses
Assets and liabilities
Equity
Reserves

Applicable exchange rate

Date of underlying transaction
Period-end rate
Historical rate
Historical rate

Foreign exchange differences resulting from translation are initially recognised in the foreign currency translation reserve and subsequently transferred to the income statement on disposal of a foreign operation.

Significant accounting policies, judgements and estimates

BHP Petroleum has identified a number of accounting policies under which significant judgements, estimates and assumptions are made. All judgements, estimates and assumptions are based on the most current facts and circumstances and are reassessed on an ongoing basis. Actual results in future reporting periods may differ for these estimates under different assumptions and conditions. Significant judgements and key estimates and assumptions made in applying these accounting policies are embedded within Note 5 'Income Tax', Note 8 'Property, plant and equipment', Note 11 'Intangible assets', Note 12 'Impairment of non-current assets' and Note 14 'Closure and rehabilitation provisions'.

Reserve estimates

Reserves are estimates of the amount of product that can be demonstrated to be able to be economically and legally extracted from BHP Petroleum's properties. In order to estimate reserves, assumptions are required about a range of technical and economic factors, including quantities, qualities, production techniques, recovery efficiency, production and transport costs, commodity supply and demand, commodity prices and exchange rates.

Estimating the quantity and/or quality of reserves requires the size, shape and depth of oil and gas reservoirs to be determined by analysing geological data, such as drilling samples and geophysical survey interpretations. Economic assumptions used to estimate reserves change from period-to-period as additional technical and operational data is generated. This process may require complex and difficult geological judgements to interpret the data.

Reserve impact on financial reporting

Estimates of reserves may change from period-to-period as the economic assumptions used to estimate reserves change and additional geological data is generated during the course of operations. Changes in reserves may affect BHP Petroleum's financial results and financial position in a number of ways, including:

asset carrying values may be affected due to changes in estimated future production levels

depreciation, depletion and amortisation charged in the income statement may change where such charges are determined on the units of production basis, or where the useful economic lives of assets change

Table of Contents

BHP Petroleum Assets

Notes to the Financial Statements

closure and rehabilitation provisions may change where changes in estimated reserves affect expectations about the timing or cost of these activities

the carrying amount of deferred tax assets may change due to changes in estimates of the likely recovery of the tax benefits

Impact of Coronavirus Disease 2019 (COVID-19) Pandemic

BHP Petroleum continues to actively monitor the impact of the COVID-19 pandemic, including the impact on economic activity and financial reporting. During FY2021, BHP Petroleum experienced lower commodity prices and market demand driven by travel restrictions and lockdowns. As the pandemic continues to progress and evolve, it is difficult to predict the full extent and duration of resulting operational and economic impacts for BHP Petroleum, which are expected to impact a number of reporting periods. The ongoing uncertainty has also been considered in BHP Petroleum's assessment of the appropriateness of applying the going concern basis of preparation of the financial statements. BHP Petroleum has made an assessment of its ability to continue as a going concern over the period to 30 November 2022 (the going concern period) and believes that it has sufficient financial resources to meet its obligations as they fall due throughout the going concern period. As such, the financial statements continue to be prepared on a going concern basis.

2. First time adoption of IFRS

Management has given due consideration to the requirements of IFRS 1 'First-time Adoption of International Financial Reporting Standards' in preparing these combined financial statements. The combined financial statements of BHP Petroleum are the first combined financial statements presented by BHP Petroleum. Entities included within the combined financial statements, for all periods presented, have applied the recognition and measurement requirements of IFRS, in accordance with BHP Group accounting policies. As such, the preparation of these combined financial statements has not required the transition to IFRS recognition and measurement requirements.

For this purpose, the date of BHP Petroleum's first presentation of IFRS financial statements is determined to be 1 July 2018, being the beginning of the earliest period for which BHP Petroleum presents full comparative information in these combined financial statements. BHP Petroleum has measured its assets and liabilities at the carrying amounts that are included in BHP Group's consolidated financial statements, based on BHP Group's date of transition to IFRSs. With due regard to BHP Group's accounting policies and the requirements of IFRS 1, management has concluded that no adjustments were required to comply with IFRS as issued by the IASB.

3. Revenue

The following table provides a summary of BHP Petroleum's revenue by geographic location:

| | 2021 | 2020 | Unaudited 2019 |
|----------------------|--------------|--------------|-------------------|
| | US\$M | US\$M | US\$M |
| Australia | 1,133 | 1,080 | 1,340 |
| North America | 1,285 | 1,108 | 1,903 |
| United Kingdom | 28 | 40 | 77 |
| Rest of Europe | 161 | 149 | 260 |
| Japan | 407 | 567 | 887 |
| South Korea | 16 | – | 28 |
| China | 74 | 73 | 95 |
| Other Asia | 638 | 808 | 1,016 |
| Rest of World | 167 | 172 | 261 |
| Total revenue | 3,909 | 3,997 | 5,867 |

The following table provides a summary of BHP Petroleum's revenue by asset:

| | 2021 | 2020 | Unaudited 2019 |
|-------------------------------|--------------|--------------|-------------------|
| | US\$M | US\$M | US\$M |
| Australia Production Unit (1) | 327 | 361 | 507 |
| Bass Strait | 1,066 | 1,102 | 1,237 |
| North West Shelf | 893 | 1,076 | 1,657 |
| Atlantis | 560 | 561 | 979 |
| Shenzi | 417 | 277 | 540 |
| Mad Dog | 231 | 216 | 319 |
| Trinidad and Tobago | 204 | 191 | 287 |
| Algeria | 164 | 159 | 258 |
| Third-party products | 12 | 5 | 10 |
| Other | 35 | 49 | 73 |
| Total revenue | 3,909 | 3,997 | 5,867 |

(1) Australia Production Unit includes Macedon, Pyrenees and Minerva (divested in December 2019).

The following table provides a summary of BHP Petroleum's revenue by product:

| | 2021 | 2020 | Unaudited 2019 |
|----------------------|--------------|--------------|-------------------|
| | US\$M | US\$M | US\$M |
| Crude oil | 2,013 | 2,033 | 3,173 |
| Gas | 1,659 | 1,754 | 2,399 |
| Natural gas liquids | 212 | 198 | 252 |
| Other | 25 | 12 | 43 |
| Total revenue | 3,909 | 3,997 | 5,867 |

Revenue consists of revenue from contracts with customers of US\$3,859 million (2020: US\$3,952 million, 2019: US\$5,817 million) and other revenue of US\$50 million (2020: US\$45 million, 2019: US\$50million).

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Recognition and measurement

BHP Petroleum generates revenue primarily from the production and sale of crude oil, natural gas and natural gas liquids (NGLs). Revenue is recognised when or as control of the promised goods or services passes to the customer. In most instances, control passes when the goods are delivered to a destination specified by the customer, typically on board the customer's appointed vessel or at another contractually agreed delivery point such as an outlet to storage facilities. Where applicable, revenue from the provision of services is recognised over time but does not represent a significant proportion of total revenue and is aggregated with the respective asset and product revenue for disclosure purposes. The amount of revenue recognised reflects the consideration to which BHP Petroleum expects to be entitled in exchange for the goods or services. As at 30 June 2021, 2020 and 2019, no significant estimates are required to determine revenue from contracts with customers.

Major customers

BHP Petroleum has two major customers which account for 18 per cent and 10 per cent of external revenue (2020: one customer, 13 per cent, 2019: one customer, 15 per cent). BHP Petroleum does not believe the loss of either of these customers would have a material adverse effect on BHP Petroleum because the markets in which BHP Petroleum sells its production volumes are significant liquid markets with alternative customers readily available for its production volumes.

Contract balances and asset recognition

Where BHP Petroleum's sales are provisionally priced, the final price is generally known within the month of sale due to the typical pricing terms of BHP Petroleum's contracts with customers. The period between provisional pricing and final invoicing is typically less than 30 days.

BHP Petroleum applies the practical expedient to not adjust the expected consideration for the effects of the time value of money if the period between the delivery and when the customer pays for the promised good or service is one year or less.

Performance obligations

For commodity sales contracts, each metric unit is a separate performance obligation. Where BHP Petroleum has contracts with unfulfilled performance obligations at period-end, it is required to disclose the transaction price allocated to these performance obligations. BHP Petroleum applies the practical expedient to not disclose this information for contracts with an expected duration of one year or less. Most of BHP Petroleum's long-term contracts are priced on variable terms, based on quoted index prices near the time of delivery and at times include fixed pricing components. Long-term contracts that include fixed pricing components, such as premiums and other charges, do not represent a significant portion of the total price. Any estimate of the future transaction price would exclude estimated amounts of variable consideration. The amount of future consideration from fixed pricing components has not been disclosed, as it is not considered to be relevant or useful information.

| Total other income | 130 | 57 | 32 |

(1) Refer to Note 12 'Impairment of non-current assets' .

(2) Relates to the divestiture of our interest in Neptune, Gulf of Mexico. Refer to Note 8 'Property, plant and equipment' and Note 14 'Closure and rehabilitation provisions' .

(3) Other income is generally income earned from transactions outside the course of BHP Petroleum' s ordinary activities and may include boat charter and tariff revenue.

Recognition and measurement

Income is recognised when it is probable that the economic benefits associated with a transaction will flow to BHP Petroleum and can be reliably measured. Dividends are recognised upon declaration.

BHP Petroleum Assets

Notes to the Financial Statements

Income tax recognised in other comprehensive income is as follows:

| | 2021 | 2020 | <i>Unaudited</i> 2019 |
|--|--------------|--------------|--------------------------|
| | <u>US\$M</u> | <u>US\$M</u> | <u>US\$M</u> |
| Income tax effect of: | | | |
| <i>Items that may be reclassified to the income statement:</i> | | | |
| Income tax (charge)/credit relating to items that may be reclassified subsequently to the income statement | – | – | – |
| <i>Items that will not be reclassified to the income statement:</i> | | | |
| Remeasurement gains/(losses) on pension and medical schemes | – | 3 | 2 |
| Others | – | – | – |
| Income tax (charge)/credit relating to items that will not be reclassified to the income statement | – | 3 | 2 |
| Total income tax (charge)/credit relating to components of other comprehensive income (1) | <u>–</u> | <u>3</u> | <u>2</u> |

- (1) Included within total income tax relating to components of other comprehensive income is US\$ nil relating to deferred taxes and US\$ nil relating to current taxes (2020: US\$3 million and US\$ nil; 2019: US\$2 million and US\$ nil).

Recognition and measurement

Income taxes have been prepared on a separate return basis for the net income/(loss) from operations of BHP Petroleum based upon the estimated applicable income tax rates for the jurisdictions in which BHP Petroleum is taxable, while also reflecting that, in historically filed returns, BHP Petroleum in Australia is part of the income tax consolidated group return parented by BHP Group Limited.

Current tax payables and receivables are the amounts of tax payable or refundable on the basis of hypothetical, current year separate returns, adjusted to reflect actual historical transactions undertaken in relation to the income tax consolidated group return parented by BHP Group Limited.

As such, the benefit of tax losses generated by certain entities has not been recognised in BHP Petroleum's Combined statement of profit or loss and comprehensive income or loss as these losses were transferred to BHP Group Limited in the year in which they were generated. These losses, amounting to US\$83 million (2020:US\$143 million, 2019:US\$205 million) would have been utilised by BHP Petroleum, and recognised as a credit in profit and loss, had BHP Petroleum operated as a hypothetical tax consolidated group.

Deferred taxes are provided on temporary differences and on any carry forward losses or unused credits that could be claimed on hypothetical returns and the recoverability of recognised and unrecognised deferred taxes is assessed on the basis of projected separate-return results.

Taxation on the profit/(loss) for the year comprises of current and deferred tax. Taxation is recognised in the income statement except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case the tax effect is also recognised in equity or other comprehensive income.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Current tax

Current tax is the expected tax on the taxable income for the year, using tax rates and laws enacted or substantively enacted at the reporting date and any adjustments to tax payable in respect of previous years.

Deferred tax

Deferred tax is provided in full, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

Deferred tax is not recognised for temporary differences relating to:

- initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit

- investment in subsidiaries, associates and jointly controlled entities where BHP Petroleum is able to control the timing of the reversal of the temporary difference and it is probable that they will not reverse in the foreseeable future.

Deferred tax is measured at the tax rates that are expected to be applied when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted at the reporting date.

Current and deferred tax assets and liabilities are offset when BHP Petroleum has a legally enforceable right to offset and when the tax balances are related to taxes levied by the same tax authority and BHP Petroleum intends to settle on a net basis or realise the asset and settle the liability simultaneously.

Royalty-related taxation

Royalties and resource rent taxes are treated as taxation arrangements (impacting income tax expense/(benefit)) when they are imposed under government authority and the amount payable is calculated by reference to revenue derived (net of any allowable deductions) after adjustment for temporary differences. Obligations arising from royalty arrangements that do not satisfy these criteria are recognised as current liabilities and included in expenses.

Uncertain tax and royalty matters

BHP Petroleum operates across many tax jurisdictions. Application of tax law can be complex and requires judgement to assess risk and estimate outcomes. The evaluation of tax risks considers both amended assessments received and potential sources of challenge from tax authorities. The status of proceedings for these matters will impact the ability to determine the potential exposure and in some cases, it may not be possible to determine a range of possible outcomes or a reliable estimate of the potential exposure.

BHP Petroleum has unresolved tax and royalty matters for which the timing of resolution and potential economic outflow are uncertain. Tax and royalty matters with uncertain outcomes arise in the normal course of business and occur due to changes in tax law, changes in interpretation of tax law, periodic challenges and disagreements with tax authorities and legal proceedings.

Tax and royalty obligations assessed as having probable future economic outflows capable of reliable measurement are provided for in the balance sheet. Matters with possible economic outflow and/or presently incapable of being measured reliably are contingent liabilities and disclosed in Note 16 'Contingent liabilities'.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Key judgements and estimates

Income tax classification

Judgements: BHP Petroleum's accounting policy for taxation, including royalty-related taxation, requires management's judgement as to the types of arrangements considered to be a tax on income in contrast to an operating cost.

Deferred tax

Judgements: Judgement is required to determine the amount of deferred tax assets that are recognised based on the likely timing and the level of future taxable profits.

Estimates: BHP Petroleum assesses the recoverability of recognised and unrecognised deferred taxes, on a consistent basis. Estimates and assumptions relating to projected earnings and cash flows as applied in BHP Petroleum's impairment process are used for operating assets.

Uncertain tax matters

Judgements: Management applies judgements about the application of income tax legislation and its interaction with income tax accounting principles. These judgements are subject to risk and uncertainty, hence there is a possibility that changes in circumstances will alter expectations, which may impact the amount of tax assets and tax liabilities, including deferred tax, recognised on the balance sheet and the amount of other tax losses and temporary differences not yet recognised.

Where the final tax outcomes are different from the amounts that were initially recorded, these differences impact the current and deferred tax provisions in the period in which the determination is made.

Measurement of uncertain tax and royalty matters considers a range of possible outcomes, including assessments received from tax authorities. Where management is of the view that potential liabilities have a low probability of crystallising, or it is not possible to quantify them reliably, they are disclosed as contingent liabilities (refer to Note 16 'Contingent liabilities').

The movement for the year in BHP Petroleum's net deferred tax positions is as follows:

| | 2021 | 2020 | Unaudited 2019 |
|--|--------------|--------------|-------------------|
| | US\$M | US\$M | US\$M |
| Net deferred tax (liability/asset) | | | |
| At the beginning of the financial year | 1,013 | 796 | 736 |
| Income tax credit recorded in the income statement | 556 | 214 | 58 |
| Income tax credit recorded directly in equity | 3 | 3 | 2 |
| At the end of the financial year | 1,572 | 1,013 | 796 |

Table of Contents

BHP Petroleum Assets Notes to the Financial Statements

The composition of BHP Petroleum's net deferred tax assets and liabilities recognised in the balance sheet and the deferred tax expense charged/(credited) to the income statement is as follows:

| Type of temporary difference | Deferred tax assets | | | Deferred tax liabilities | | | Charged/(credited) to the income statement | | |
|-----------------------------------|---------------------|---------------|---------------|--------------------------|----------------|-----------------|--|---------------|--------------|
| | 2021 US\$M | 2020 US\$M | Unaudited | 2021 US\$M | 2020 US\$M | Unaudited | 2021 US\$M | 2020 US\$M | Unaudited |
| | | | 2019 US\$M | | | 2019 US\$M | | | |
| Depreciation | (1,024) | (1,054) | (629) | (66) | (105) | (119) | (69) | 411 | (11) |

| Resource rent tax | 292 | 363 | 431 | (526) | (922) | (1,123) | (322) | (133) | (168) |
| Other provisions | 65 | 55 | 49 | - | - | - | (10) | (6) | (20) |
| Deferred income | 7 | 8 | 9 | - | - | - | 1 | 1 | (6) |
| Foreign exchange gains and losses | 3 | 1 | 1 | - | - | - | (2) | - | (1) |
| Tax losses | 1,667 | 1,541 | 1,421 | - | - | - | (126) | (120) | 156 |
| Lease liability | 55 | 79 | - | - | - | - | 24 | (79) | - |
| Other | (14) | (19) | 52 | - | (1) | (3) | (6) | 69 | 62 |
| Total | 2,182 | 2,041 | 2,040 | (610) | (1,028) | (1,244) | (556) | (214) | (58) |

The amount of deferred tax assets dependent on future taxable profits not arising from the reversal of existing deferred tax liabilities and which relate to tax jurisdictions where the taxable entity has suffered a loss in the current or preceding year, was US\$ nil at 30 June 2021 (2020: US\$ nil, 2019: US\$1,250 million). For operating assets, BHP Petroleum assesses the recoverability of these deferred tax assets using estimates and assumptions relating to projected earnings and cash flows as applied in BHP Petroleum impairment process for associated operations.

The composition of BHP Petroleum's unrecognised deferred tax assets and liabilities is as follows:

| | 2021 US\$M | 2020 US\$M | Unaudited 2019 US\$M |
|---|---------------|---------------|----------------------------|
| Unrecognised deferred tax assets | | | |
| Tax losses and tax credits (1) | 1,078 | 1,219 | 1,145 |
| Deductible temporary differences relating to PRRT (2) | 2,402 | 2,079 | 2,197 |
| Petroleum rights (3) | 566 | 552 | 545 |
| Other deductible temporary differences (4) | 419 | 315 | 398 |
| Total unrecognised deferred tax assets | 4,465 | 4,165 | 4,285 |
| Unrecognised deferred tax liabilities | | | |
| Future taxable temporary differences relating to unrecognised deferred tax asset for PRRT (2) | 720 | 624 | 659 |
| Total unrecognised deferred tax liabilities | 720 | 624 | 659 |

- (1) At 30 June 2021, BHP Petroleum had income and capital tax losses with a tax benefit of US\$768 million (2020: US\$890 million, 2019: US\$823 million) and tax credits of US\$310 million (2020: US\$329 million,

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

2019: US\$321 million), which are not recognised as deferred tax assets, because it is not probable that future taxable profits or capital gains will be available against which BHP Petroleum can utilise the benefits.

- (2) BHP Group had unrecognised deferred tax assets relating to Australian Petroleum Resource Rent Tax (PRRT). Recognition of a deferred tax asset for PRRT depends on benefits expected to be obtained from the deduction against PRRT liabilities. As PRRT payments are deductible for income tax purposes, to the extent these PRRT deferred tax assets are recognised this would give rise to a corresponding deferred tax liability for income tax (presented as the future taxable temporary differences relating to the unrecognised PRRT deferred tax assets).
- (3) BHP Petroleum had deductible temporary differences relating to mineral rights for which deferred tax assets had not been recognised because it is not probable that future capital.
- (4) BHP Petroleum had other deductible temporary differences for which deferred tax assets had not been recognised because it is not probable that future tax profits will be available against which BHP Petroleum can utilise the benefits. The deductible temporary differences do not expire under current tax legislation.

| Year of Expiry | 2021 | 2020 | Unaudited 2019 |
|--|--------------|--------------|-------------------|
| | US\$M | US\$M | US\$M |
| Income tax losses | | | |
| Not later than one year | 12 | 474 | 359 |

| Total capital tax losses | 1 | - | - |
| Gross amount of tax losses not recognised | <u>4,012</u> | <u>6,918</u> | <u>6,889</u> |
| Tax effect of total losses not recognised | <u>768</u> | <u>892</u> | <u>823</u> |

6. Trade and other receivables

| | 2021 | 2020 | Unaudited 2019 |
|---|--------------|------------|-------------------|
| | US\$M | US\$M | US\$M |
| Trade receivables | 358 | 185 | 392 |
| Joint operations partner receivables (1) | 384 | 257 | 240 |
| Value-added tax (VAT) and other tax related receivables | 262 | 282 | 238 |
| Other receivables | 61 | 61 | 3 |
| Total trade and other receivables | <u>1,065</u> | <u>785</u> | <u>873</u> |
| Comprising: | | | |
| Current | 908 | 673 | 835 |
| Non-current | 157 | 112 | 38 |

- (1) Joint operations partner receivables include production underlift positions and receivables for joint operations cash float arrangements.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Recognition and measurement

Trade receivables are recognised initially at their transaction price or, for those receivables containing a significant financing component, at fair value. Trade receivables are subsequently measured at amortised cost using the effective interest method, less an allowance for impairment, except for provisionally priced receivables (where applicable) which are subsequently measured at fair value through the income statement under IFRS 9 'Financial Instruments'.

The collectability of trade receivables is assessed on an ongoing basis. At the reporting date, specific allowances are made for any expected credit losses based on a review of all outstanding amounts at reporting period-end. Individual receivables are written off when management deems them unrecoverable. The net carrying amount of trade and other receivables approximates their fair values.

Credit risk

Trade receivables generally have terms of less than 30 days. BHP Petroleum has no material concentration of credit risk with any single counterparty and are not dominantly exposed to any individual industry.

Credit risk can arise from the non-performance by counterparties of their contractual financial obligations towards BHP Petroleum. To manage credit risk, BHP Petroleum maintains procedures covering the application for credit approvals, granting and renewal of counterparty limits, proactive monitoring of exposures against these limits and requirements triggering secured payment terms. As part of these processes, the credit exposures with all counterparties are regularly monitored and assessed on a timely basis. The credit quality of customers is reviewed and the solvency of each debtor and their ability to pay the receivable is considered in assessing receivables for impairment.

The ten largest customers represented 66 per cent (2020: 59 per cent, 2019: 51 per cent) of total credit risk exposures managed by BHP Petroleum.

Receivables are deemed to be past due or impaired in accordance with our terms and conditions. These terms and conditions are determined on a case-by-case basis with reference to the customer's credit quality, payment performance and prevailing market conditions. As at 30 June 2021, 30 June 2020 and 30 June 2019 no trade receivables were past due.

The assessment of recoverability of trade receivables at 30 June 2021 has considered the impacts of COVID-19 and no material recoverability issues have been identified. As COVID-19 continues to impact key markets in Australia, United States, Europe and Asia, BHP Petroleum continues to perform enhanced credit monitoring of commercial counterparties.

At 30 June 2021 and 2020, provisions for expected credit losses were not significant.

7. Inventories

| | 2021 | 2020 | <i>Unaudited</i> | |
|-------------------------------|--------------|-------|------------------|--|
| | US\$M | US\$M | 2019 | Definitions |
| | | | US\$M | |
| Raw materials and consumables | 271 | 226 | 206 | Spares, consumables and other supplies yet to be utilised in the production process or in the rendering of services. |
| Finished goods | 36 | 24 | 45 | Commodities ready for sale and not requiring further processing. |
| Total inventories | 307 | 250 | 251 | |

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Recognition and measurement

Finished goods inventories primarily represent crude oil in storage. Regardless of the type of inventory and its stage in the production process, inventories are valued at the lower of cost and net realisable value. Cost is determined primarily on the basis of average costs. For processed inventories, cost is derived on an absorption costing basis. Cost comprises costs of purchasing raw materials and costs of production, including attributable manufacturing overheads taking into consideration normal operating capacity. Inventory quantities are derived through flow rate or tank volume measurement and the composition is derived via sample analysis.

Table of Contents

BHP Petroleum Assets

Notes to the Financial Statements

- (1) Includes change in estimates, impact of discount rate change and net foreign exchange gains/(losses) related to the closure and rehabilitation provisions for operating sites. Refer to Note 14 'Closure and rehabilitation provisions' .
- (2) Relates to the acquisition of an additional 28 per cent working interest in Shenzi. Refer to Note 20 'Interest in joint operations' .
- (3) Refer to Note 12 'Impairment of non-current assets' for information on impairments.
- (4) Relates to the divestment of our 35 per cent interest in the Gulf of Mexico Neptune field, which closed in May 2021. The transfer resulted in a book gain on disposal of US\$56 million. The book gain was largely the result of transferring the Neptune closure obligation liability to the acquirer.
- (5) Includes the carrying value of BHP Petroleum's right-of-use assets relating to land and buildings and plant and equipment of US\$131 million (2020: US\$263 million, 2019: US\$ nil). Refer to Note 9 'Interest bearing liabilities' for the movement of the right-of-use assets.
- (6) US\$65 million relates to the divestment of BHP Petroleum's 50 per cent interest in the Murphy Oil operated Samurai field in the Gulf of Mexico; which closed in November 2019.
- (7) Refer to Note 25 'New and amended accounting standards and interpretations' .

Recognition and measurement

Property, plant and equipment is recorded at cost less accumulated depreciation and impairment charges. Cost is the fair value of consideration given to acquire the asset at the time of its acquisition or construction and includes the direct costs of bringing the asset to the location and the condition necessary for operation and the estimated future costs of closure and rehabilitation of the facility.

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities.

Exploration and evaluation

Exploration costs are incurred to discover petroleum resources. Evaluation costs are incurred to assess the technical feasibility and commercial viability of resources found.

Exploration and evaluation expenditure is charged to the income statement as incurred, except in the following circumstances in which case the expenditure may be capitalised:

the exploration and evaluation activity is within an area of interest for which it is expected that the expenditure will be recouped by future exploitation or sale, or

the exploration and evaluation activity has not reached a stage that permits a reasonable assessment of the existence of commercially recoverable reserves.

A regular review of each area of interest is undertaken to determine the appropriateness of continuing to carry forward costs in relation to that area. Capitalised costs are only carried forward to the extent that they are expected to be recovered through the successful exploitation of the area of interest or alternatively by its sale. To the extent that capitalised expenditure is no longer expected to be recovered, it is charged to the income statement.

Key judgements and estimates

Judgements: Exploration and evaluation expenditure results in certain items of expenditure being capitalised for an area of interest where a judgement is made that it is likely to be recoverable by future exploitation or sale, or where the activities are judged not to have reached a stage that permits a reasonable assessment of the existence of reserves.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Estimates: Management makes certain estimates and assumptions as to future events and circumstances, in particular when making a quantitative assessment of whether an economically viable extraction operation can be established. These estimates and assumptions may change as new information becomes available. If, after having capitalised the expenditure under the policy, new information suggests that recovery of the expenditure is unlikely, the relevant capitalised amount is charged to the income statement.

Development expenditure

When proven reserves are determined and development is sanctioned, capitalised exploration and evaluation expenditure is reclassified as assets under construction within property, plant and equipment. All subsequent development expenditure is capitalised and classified as assets under construction, provided commercial viability conditions continue to be satisfied.

BHP Petroleum may use borrowed funds to finance the acquisition and development of assets and operations. Finance costs are expensed as incurred, except where they relate to the financing of construction or development of qualifying assets. Borrowing costs directly attributable to acquiring or constructing a qualifying asset are capitalised during the development phase. Development expenditure is net of proceeds from the saleable material extracted during the development phase. On completion of development, all assets included in assets under construction are reclassified as either plant and equipment or other mineral assets and depreciation commences.

Key judgements and estimates

Judgements: Development activities commence after project sanctioning by the appropriate level of management. Judgement is applied by management in determining when a project is economically viable.

Estimates: In determining whether a project is economically viable, management is required to make certain estimates and assumptions as to future events and circumstances, including reserve estimates, existence of an accessible market and forecast prices and cash flows. Estimates and assumptions may change as new information becomes available. If, after having commenced the development activity, new information suggests that a development asset is impaired, the appropriate amount is charged to the income statement.

Depreciation

Depreciation of assets, other than land, assets under construction and capitalised exploration and evaluation that are not depreciated, is calculated using either the straight-line (SL) method or units of production (UoP) method, net of residual values, over the estimated useful lives of specific assets. The depreciation method and rates applied to specific assets reflect the pattern in which the asset's benefits are expected to be used by BHP Petroleum. The proved reserves for petroleum assets are used to determine UoP depreciation unless doing so results in depreciation charges that do not reflect the asset's useful life. Where this occurs, alternative approaches to determining reserves are applied, such as using management's expectations of future oil and gas prices rather than yearly average prices, to provide a phasing of periodic depreciation charges that better reflects the asset's expected useful life.

Where assets are dedicated to a petroleum lease, the useful lives below are subject to the lesser of the asset category's useful life and the life of the petroleum lease, unless those assets are readily transferable to another lease.

[Table of Contents](#)

BHP Petroleum Assets Notes to the Financial Statements

Key judgements and estimates

The determination of useful lives, residual values and depreciation methods involves estimates and assumptions and is reviewed annually. Any changes to useful lives or any other estimates or assumptions may affect prospective depreciation rates and asset carrying values. The table below summarises the principal depreciation methods and rates applied to major asset categories by BHP Petroleum.

| Category | Buildings | Plant and equipment | Petroleum interests | Capitalised exploration, evaluation and development expenditure |
|----------------------------------|------------------|--|--|--|
| Typical depreciation methodology | SL | UoP | UoP | UoP |
| Depreciation rate | 15 - 50 years | Based on the rate of depletion of reserves | Based on the rate of depletion of reserves | Based on the rate of depletion of reserves |

Commitments

BHP Petroleum's commitments for capital expenditure were US\$754 million at 30 June 2021 (2020: US\$971 million, 2019: US\$1,201 million). BHP Petroleum's commitments related to leases are included in Note 10 'Leases'.

9. Interest bearing liabilities

| | Current | | | Non-current | | |
|---|----------------|--------------|------------------|--------------------|--------------|------------------|
| | 2021 | 2020 | <i>Unaudited</i> | 2021 | 2020 | <i>Unaudited</i> |

| Bank overdrafts | – | – | 17 | – | – | – |
| Total interest bearing liabilities | 35 | 61 | 17 | 234 | 322 | – |

Further information on BHP Petroleum's leases is provided in Note 10 'Leases'.

Cash is disclosed in the cash flow statement net of bank overdrafts and interest bearing liabilities at call.

| | 2021 | 2020 | <i>Unaudited</i> |
|---|--------------|--------------|------------------|
| | US\$M | US\$M | 2019 |
| | | | US\$M |
| Total cash and cash equivalents | 776 | 325 | 1,398 |
| Bank overdrafts | – | – | (17) |
| Total cash and cash equivalents, net of overdrafts | 776 | 325 | 1,381 |

10. Leases

BHP Petroleum applied IFRS 16 'Leases' from 1 July 2019. Details on the transition to IFRS 16 are included in Note 25 'New and amended accounting standards and interpretations'.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Movements in BHP Petroleum's lease liabilities during the year are as follows:

| | 2021 | 2020 |
|---|-------------------|-------------------|
| | <u>US\$M</u> | <u>US\$M</u> |
| At the beginning of the financial year | 383 | – |
| IFRS 16 transition (1) | – | 438 |
| Additions | 2 | 13 |
| Lease payments | (45) | (46) |
| Foreign exchange movement | – | 1 |
| Amortisation of discounting | 7 | 8 |
| Derecognition due to lease modification | (62) | – |
| Transfers and other movements | (16) | (31) |
| At the end of the financial year | <u>269</u> | <u>383</u> |
| Comprising: | | |
| Current liabilities | 35 | 61 |
| Non-current liabilities | <u>234</u> | <u>322</u> |

(1) Refer to Note 25 'New and amended accounting standards and interpretations'.

A significant proportion by value of BHP Petroleum's lease contracts relate to building leases, drill rig and equipment leases. These lease contracts contain a wide variety of different terms and considerations including extension and termination options and variable lease payments. BHP Petroleum's lease obligations are included in the interest-bearing liabilities.

The maturity profile of lease liabilities based on the undiscounted contractual amounts is as follows:

| | 2021 | 2020 |
|---|-------------------|-------------------|
| | <u>US\$M</u> | <u>US\$M</u> |
| Due for payment: | | |
| In one year or less or on demand | 41 | 70 |
| In more than one year but not more than two years | 37 | 70 |
| In more than two years but not more than five years | 91 | 130 |
| In more than five years (1) | 133 | 156 |
| Total | <u>302</u> | <u>426</u> |
| Less amount representing interest | 33 | 43 |
| Present value of net minimum lease payments | <u>269</u> | <u>383</u> |

(1) Includes US\$9 million (2020: US\$35 million) due for payment in more than ten years.

At 30 June 2021, commitments for leases not yet commenced based on undiscounted contractual amounts were US\$36 million (2020: US\$14 million). At 30 June 2021, commitments relating to short-term leases were US\$8 million (2020: US\$2 million).

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

BHP Petroleum's aggregate amounts of minimum lease payments under non-cancellable operating leases at 30 June 2019 under IAS 17 were as follows:

| | <i>Unaudited</i> 2019 US\$M |
|---|-----------------------------------|
| Commitments under operating leases | |
| Due not later than one year | 58 |
| Due later than one year and not later than five years | 155 |
| Due later than five years | 189 |
| Total | 402 |

As at 30 June 2019, BHP Petroleum did not recognise any finance lease liabilities under IAS 17 'Leases'.

Movements in BHP Petroleum's right-of-use assets during the year are as follows:

| | Land and buildings US\$M | 2021 Plant and equipment US\$M | Total US\$M | Land and buildings US\$M | 2020 Plant and equipment US\$M | Total US\$M |
|--|---|---|------------------------|---|---|------------------------|
| Net book value | | | | | | |
| At the beginning of the financial year | 167 | 96 | 263 | – | – | – |
| Assets recognised on adoption of IFRS 16 | – | – | – | 233 | 128 | 361 |
| Additions | 1 | – | 1 | 4 | 9 | 13 |
| Depreciation for the period | (18) | (26) | (44) | (23) | (41) | (64) |
| Impairments for the year | (27) | – | (27) | – | – | – |
| Derecognition due to lease modification | – | (62) | (62) | – | – | – |
| Transfers and other movements (1) | – | – | – | (47) | – | (47) |
| At the end of the financial year | 123 | 8 | 131 | 167 | 96 | 263 |
| - Cost | 190 | 29 | 219 | 189 | 106 | 295 |
| - Accumulated depreciation and impairments | (67) | (21) | (88) | (22) | (10) | (32) |

(1) Transfer to net investment in sublease receivable, on commencement of sublease.

Right-of-use assets are included within the underlying asset classes in property, plant and equipment. Refer to Note 8 'Property, plant and equipment'.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Amounts recorded in the income statement and the cash flow statement for the year were:

| | 2021 | 2020 | |
|--|-------|-------|--------------------------------------|
| | US\$M | US\$M | Included within |
| Income statement | | | |
| Depreciation of right-of-use assets | 37 | 46 | Profit from operations |
| Short-term, low-value and variable lease costs (1) | 52 | 37 | Profit from operations |
| Interest on lease liabilities | 7 | 8 | Financial expenses |
| Cash flow statement | | | |
| Principal lease payments | 38 | 39 | Cash flows from financing activities |
| Lease interest payments | 7 | 7 | Cash flows from operating activities |

- (1) Relates to US\$36 million of variable lease costs (2020: US\$22 million), US\$13 million of short-term lease costs (2020: US\$10 million) and US\$3 million of low-value lease costs (2020: US\$5 million). Variable lease costs include contracts for building leases, drill rig and equipment leases. These contracts contain variable lease payments based on usage and asset performance.

Recognition and measurement (following adoption of IFRS 16)

All leases with the exception of short-term (under 12 months) and low-value leases are recognised on the balance sheet, as a right-of-use asset and a corresponding interest-bearing liability. Lease liabilities are initially measured at the present value of the future lease payments from the lease commencement date and are subsequently adjusted to reflect the interest on lease liabilities, lease payments and any remeasurements due to, for example, lease modifications or changes to future lease payments linked to a rate. Lease payments are discounted using the interest rate implicit in the lease, where it is readily determinable. Where the implicit interest rate is not readily determinable, the interest payments are discounted at BHP Group's incremental borrowing rate, adjusted to reflect factors specific to the lease, including where relevant the currency, tenor and location of the lease.

In addition to containing a lease, the contractual arrangements may include non-lease components (for example, the maintenance and service costs associated with building leases). BHP Petroleum has elected to separate these non-lease components from the lease components in measuring lease liabilities.

Low-value and short-term leases are expensed to the income statement. Variable lease payments not dependent on an index or rate are excluded from lease liabilities and expensed to the income statement.

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses and adjusted for any remeasurement of lease liabilities. The cost will initially correspond to the lease liability, adjusted for initial direct costs, lease payments made prior to lease commencement, capitalised provisions for closure and rehabilitation and any lease incentives.

Lease costs are recognised in the income statement over the lease term in the form of depreciation on the right-of-use asset and finance charges representing the unwind of the discount on the lease liability, replacing certain operating lease expenses previously reported under IAS 17.

Where BHP Petroleum is the operator of an unincorporated joint operation and all investors are parties to a lease, BHP Petroleum recognises its proportionate share of the lease liability and associated right-of-use asset. In the event BHP Petroleum is the sole signatory to a lease and therefore has the sole legal obligation to make lease payments, the lease liability is recognised in full. Where the associated right-of-use asset is sub-leased (under a

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

finance sub-lease) to a joint operation, for instance where it is dedicated to a single operation and the joint operation has the right to direct the use of the asset, BHP Petroleum recognises its proportionate share of the right-of-use asset and a net investment in the lease, representing amounts to be recovered from the other parties to the joint operation. If BHP Petroleum is not party to the lease contract but sub-leases the associated right-of-use asset, the proportionate share of the right-of-use asset and a lease liability which is payable to the operator is recognised.

Key judgements and estimates

Where BHP Petroleum cannot readily determine the interest rate implicit in the lease, estimation is involved in the determination of the weighted average incremental borrowing rate to measure lease liabilities. The incremental borrowing rate reflects the rates of interest a lessee would have to pay to borrow over a similar term, with similar security, the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment. Under BHP Group's portfolio approach to debt management, it does not specifically borrow for asset purchases. Therefore, the incremental borrowing rate is estimated with reference to BHP Group's corporate borrowing portfolio, adjusted to reflect the terms and conditions of the lease (including the impact of currency, credit rating of subsidiary entering into the lease and the term of the lease), at the commencement of the lease arrangement or the time of lease modification.

BHP Petroleum estimates stand-alone prices, where such prices are not readily observable, in order to allocate the contractual payments between lease and non-lease components.

IAS 17 Leases replaced by IFRS 16

BHP Petroleum applied accounting standard IAS 17 prior to adoption of IFRS 16 from 1 July 2019. Pre 1 July 2019, BHP Petroleum had no leases classified as finance leases under IAS17, however had a number of leases classified as operating leases as at 30 June 2019. Operating leases under IAS 17 are not capitalised and rental payments are included in the income statement on a straight-line basis over the lease term. Minimum lease payments under non-cancellable operating leases as at 30 June 2019 are disclosed above.

The effect of applying IFRS 16 has been disclosed in Note 25 'New and amended accounting standards'.

11. Intangible assets

| | 2021 | 2020 | <i>Unaudited</i> 2019 |
|--|--------------|--------------|--------------------------|
| | <u>US\$M</u> | <u>US\$M</u> | <u>US\$M</u> |
| Net book value | | | |

| Additions | 19 | 44 | 6 |
| Amortisation for the year (1) | (32) | (38) | (37) |
| Impairment for the year (2) | (19) | - | (14) |
| At the end of the financial year | <u>78</u> | <u>110</u> | <u>104</u> |
| - Cost | 248 | 305 | 298 |
| - Accumulated depreciation and impairments | (170) | (195) | (194) |

(1) Included in income statement line item 'Expenses excluding net finance costs'.

(2) Refer to Note 12 'Impairment of non-current assets' for information on impairments.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Recognition and measurement

Where applicable, BHP Petroleum capitalises amounts paid for initial payments for the acquisition of identifiable intangible assets, such as software, licenses and initial payments for the acquisition of petroleum lease assets, where it is considered that they will contribute to future periods through revenue generation or reductions in cost. These assets, classified as finite life intangible assets, are carried in the balance sheet at the fair value of consideration paid less accumulated amortisation and impairment charges. Intangible assets with finite useful lives are amortised on a straight-line basis over their useful lives. The estimated useful lives are generally no greater than ten years.

Intangible assets primarily represent payments made for exploration leases, which have finite useful lives. Initial payments for the acquisition of intangible exploration lease assets are capitalised and amortised over the term of the permit. A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area. Capitalised costs are only carried forward to the extent that they are expected to be recovered through the successful exploitation of the area of interest or alternatively by its sale. To the extent that capitalised expenditure is no longer expected to be recovered, it is charged to the income statement.

Key judgements and estimates

Assessment of impairment indicators requires management's judgement. If a judgement is made that recovery of previously capitalised intangible petroleum lease assets is unlikely, the relevant amount will be charged to the income statement.

Determining the recoverable amount requires management to make certain estimates and assumptions as to future events and circumstances, in particular whether an economically viable extraction operation can be established.

Where indications of impairment exist for intangible assets, in the absence of quoted market prices, estimates are made regarding the present value of future post-tax cash flows. These estimates require management's judgement and assumptions and are subject to risk and uncertainty that may be beyond the control of BHP Petroleum; hence there is a possibility that changes in circumstances will materially alter projections, which may impact the recoverable amount of assets at each reporting date. The estimates are made from the perspective of a market participant and includes prices, future production volumes operating costs, tax attributes and discount rates.

| Abandoned/relinquished exploration leases (2) | – | 1 | 1 |
| Total impairment of non-current assets | 7 | 14 | 21 |

- (1) Write-off of previously capitalised exploration and evaluation cost, following technical analysis of exploration results for various areas of interest.
- (2) Write-off of capitalised exploration costs, where no further exploration and evaluation work was planned, following technical review of exploration portfolio.
- (3) Write-off of leasehold fit out and fittings following restructuring, which resulted in a reduction in required office space.

For all impairments recognised in FY2021, FY2020 and FY2019, the recoverable amount of individual assets impaired was determined to be US\$ nil following impairment review.

Recognition and measurement

Impairment tests for all assets are performed when there is an indication of impairment. If the carrying amount of the asset exceeds its recoverable amount, the asset is impaired, and an impairment loss is charged to the income statement so as to reduce the carrying amount in the balance sheet to its recoverable amount.

Where applicable, previously impaired assets are reviewed for possible reversal of previous impairment at each reporting date. Impairment reversal cannot exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognised for the asset. There were no reversals of impairment in the current or prior periods presented.

How recoverable amount is calculated

The recoverable amount is the higher of an asset's fair value less cost of disposal and its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Valuation methods

Fair value less cost of disposal (FVLCD)

FVLCD is an estimate of the amount that a market participant would pay for an asset, less the cost of disposal. FVLCD is generally determined using independent market assumptions to calculate the present value of the estimated future post-tax cash flows expected to arise from the continued use of the asset, including the anticipated cash flow effects of any capital expenditure to enhance production or reduce cost and its eventual disposal where a market participant may take a consistent view. Cash flows are discounted using an appropriate post tax market discount rate to arrive at a net present value of the asset, which is compared against the asset's carrying value. FVLCD may also take into consideration other market-based indicators of fair value.

Value in Use (VIU)

VIU is determined as the present value of the estimated future cash flows expected to arise from the continued use of the asset in its present form and its eventual disposal or closure. VIU is determined by applying assumptions specific to our continued use and cannot take into account future development. These assumptions are different to those used in calculating FVLCD and consequently the VIU calculation is likely to give a different result (usually lower) to a FVLCD calculation.

Key judgements and estimates

Judgements: Assessment of indicators of impairment or impairment reversal require significant management judgement. Indicators of impairment may include changes in BHP Petroleum's operating and economic assumptions, including those arising from changes in reserves, updates to the commodity supply, demand and price forecasts, or the possible additional impacts from emerging risks such as those related to climate change and the transition to a low carbon economy and pandemics similar to COVID-19.

Climate Change

BHP Petroleum operated for all periods presented as part of BHP Group. As such, BHP Petroleum does not have a stand-alone climate change strategy. Future changes to BHP Group's climate change strategy, global decarbonisation signposts or physical risks to BHP Petroleum's assets may impact BHP Petroleum significant judgements and key estimates and result in material changes to financial results and the carrying values of certain assets and liabilities in future reporting periods.

When considering asset impairment assessment of BHP Petroleum, future impacts related to climate change and the transition to a lower carbon economy may include:

demand for BHP Petroleum's commodities decreasing, due to policy, regulatory (including carbon pricing mechanisms), legal, technological, market or societal responses to climate change, resulting in a proportion of reserves becoming incapable of extraction in an economically viable fashion

physical impacts related to acute risks resulting from increased severity of extreme weather events and those related to chronic risks resulting from longer-term changes in climate patterns.

Where sufficiently developed, the potential financial impacts on BHP Petroleum of climate change and the transition to a low carbon economy have been considered in the assessment of indicators of impairment, including:

BHP Group's current assumptions relating to demand for commodities and carbon pricing, including their impact on BHP Group's long-term price forecasts applied by BHP Petroleum

BHP Group's operational emissions reduction strategy

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

COVID-19

The macroeconomic disruptions relating to COVID-19 and mitigating actions enforced by health authorities create uncertainty in BHP Petroleum's operating and economic assumptions, including commodity prices, demand and supply volumes, operating costs and applied discount rates. However, given the long-lived nature of the majority of BHP Petroleum's assets, COVID-19 did not, in isolation, result in the identification of indicators of impairment for BHP Petroleum's asset values at 30 June 2021. Due to ongoing uncertainty as to the extent and duration of COVID-19 restrictions and the overall impact on economic activity, actual experience may materially differ from internal forecasts and may result in the reassessment of indicators of impairment for BHP Petroleum's assets in future reporting periods.

Estimates: BHP Petroleum performs a recoverable amount determination for an asset when there is an indication of impairment or impairment reversal.

When the recoverable amount is measured by reference to FVLCD, in the absence of quoted market prices or binding sale agreement, estimates are made regarding the present value of future post-tax cash flows. These estimates are made from the perspective of a market participant and include prices, future production volumes, operating costs, capital expenditure, closure and rehabilitation costs, tax attributes, risk factors applied to cash flows and discount rates. Reserves and resources are included in the assessment of FVLCD to the extent that it is considered probable that a market participant would attribute value to them.

When recoverable amount is measured using VIU, estimates are made regarding the present value of future cash flows based on internal budgets and forecasts and life of asset plans. Key estimates are similar to those identified for FVLCD, although some assumptions and values may differ as they reflect the perspective of management rather than a market participant.

All estimates require management judgements and assumptions and are subject to risk and uncertainty that may be beyond the control of BHP Petroleum; hence, there is a possibility that changes in circumstances will materially alter projections, which may impact the recoverable amount of assets at each reporting date.

The most significant estimates impacting BHP Petroleum's recoverable amount determinations include:

Commodity prices

Commodity prices were based on BHP Petroleum's latest internal forecasts which assume that short-term market prices will revert to BHP Petroleum's assessment of long-term prices. These price forecasts reflect management's long-term views of global supply and demand, built upon past experience of the commodity markets and are benchmarked with external sources of information such as analyst forecasts. Prices are adjusted based upon premiums or discounts applied to global price markers based on the location, nature and quality produced, or to take into account contracted prices.

Future production volumes

Estimated production volumes were based on detailed data and took into account development plans established by management as part of BHP Petroleum's long-term planning process. When estimating FVLCD, assumptions reflect all reserves and resources that a market participant would consider when valuing assets, which in some cases are broader in scope than the reserves that would be used in a VIU test. In determining FVLCD, risk factors may be applied to reserves and resources which do not meet the criteria to be treated as proved.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Operating costs and capital expenditures

Operating costs and capital expenditures are generally based on internal budgets and forecasts and life of asset plans. Cost assumptions reflect management's experience and expectations. In the case of FVLCD, cash flow projections include the anticipated cash flow effects of any capital expenditure to enhance production or reduce cost where a market participant may take a consistent view. VIU does not take into account future development.

Discount rates

BHP Petroleum uses real post-tax discount rates applied to real post-tax cash flows. The discount rates are derived using BHP Group's weighted average cost of capital methodology. Adjustments to the rates are made for any risks that are not reflected in the underlying cash flows.

13. Trade and other payables

| | 2021 | 2020 | Unaudited 2019 |
|---------------------------------------|------------|------------|-------------------|
| | US\$M | US\$M | US\$M |
| Trade payables external | 641 | 491 | 625 |
| Other payables | 278 | 280 | 304 |
| Total trade and other payables | 919 | 771 | 929 |

14. Closure and rehabilitation provisions

A reconciliation of the changes in the closure and rehabilitation provisions is shown in the following table:

| | 2021 | 2020 | Unaudited 2019 |
|--|-------|-------|-------------------|
| | US\$M | US\$M | US\$M |
| At the beginning of the financial year | 3,595 | 2,300 | 1,980 |

| Comprising: | | | |
| Current | 141 | 162 | 205 |
| Non-current | 3,816 | 3,433 | 2,095 |
| Operating sites | 3,623 | 3,292 | 2,043 |
| Closed sites | 334 | 303 | 257 |

BHP Petroleum is required to rehabilitate sites and associated facilities at the end of, or in some cases, during the course of production, to a condition acceptable to the relevant authorities, as specified in license requirements and BHP Group's environmental performance requirements as set out within the BHP Group Charter.

The key components of closure and rehabilitation activities are:

- the removal of all unwanted infrastructure associated with an operation
- the return of disturbed areas to a safe, stable, productive and self-sustaining condition, consistent with agreed end use

Recognition and measurement

Provisions for closure and rehabilitation are recognised by BHP Petroleum when:

- it has a present legal or constructive obligation as a result of past events;
- it is more likely than not that an outflow of resources will be required to settle the obligation;
- the amount can be reliably estimated.

Initial recognition

Closure and rehabilitation provisions are initially recognised when an environmental disturbance first occurs. The individual site provisions are an estimate of the expected value of future cash flows required to rehabilitate the relevant site using current restoration standards and techniques and taking into account risks and uncertainties. Individual site provisions are discounted to their present value using currency specific discount rates aligned to the estimated timing of cash outflows.

When provisions for closure and rehabilitation are initially recognised, the corresponding cost is capitalised as an asset, representing part of the cost of acquiring the future economic benefits of the operation.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Subsequent measurement

The closure and rehabilitation asset, recognised within property, plant and equipment, is depreciated over the life of the operations. The value of the provision is progressively increased over time as the effect of discounting unwinds, resulting in an expense recognised in net finance costs.

The closure and rehabilitation provision is reviewed at each reporting date to assess if the estimate continues to reflect the best estimate of the obligation. If necessary, the provision is remeasured to account for factors, including:

- revisions to estimated reserves, resources and lives of operations;
- developments in technology;
- regulatory requirements and environmental management strategies;
- changes in the estimated extent and costs of anticipated activities, including the effects of inflation and movements in foreign exchange rates, where applicable;
- movements in interest rates affecting the discount rate applied.

Changes to the closure and rehabilitation estimate for operating sites are added to, or deducted from, the related asset and amortised on a prospective basis accordingly over the remaining life of the operation, generally applying the UoP method.

Costs arising from unforeseen circumstances, such as the contamination caused by unplanned discharges, are recognised as an expense and liability when incurred.

Closed sites

Where future economic benefits are no longer expected to be derived through operations, changes to the associated closure and remediation costs are charged to the income statement in the period identified.

Key estimates

The recognition and measurement of closure and rehabilitation provisions requires the use of significant estimates and assumptions, including, but not limited to:

- the extent (due to legal or constructive obligations) of potential activities required for the removal of infrastructure and rehabilitation activities;
- costs associated with future rehabilitation activities;
- applicable discount rates;
- the timing of cash flows and ultimate closure of operations.

The extent and cost of future rehabilitation activities may also be impacted by the potential physical impacts of climate change. In estimating the potential cost of closure activities, BHP Petroleum considers factors such as long-term weather outlooks, for example forecast changes in rainfall patterns and the cost of performing rehabilitation activities.

While progressive closure is performed across a number of operations, significant rehabilitation activities are generally undertaken at the end of the production life at the individual sites, the estimated timing of which is

Table of Contents

BHP Petroleum Assets

Notes to the Financial Statements

informed by BHP Petroleum's current assumptions relating to demand for commodities and their impact on BHP Petroleum's long-term price forecasts. Remaining production lives range from 1-36 years with an average for all sites, weighted by current closure provision, of approximately 17 years. The discount rates applied to BHP Petroleum's closure and rehabilitation provisions are determined by reference to the currency of the closure cash flows, the period over which the cash flows will be incurred and prevailing market interest rates (where available). The effect of prior year (FY2020) changes to discount rates was an increase of approximately US\$797 million in the closure and rehabilitation provision. There were no changes to the discount in the current year or FY2019.

While the closure and rehabilitation provisions reflect management's best estimates based on current knowledge and information, further studies and detailed analysis of the closure activities for individual assets will be performed as the assets near the end of their operational life and/or detailed closure plans are required to be submitted to relevant regulatory authorities. Such studies and analysis can impact the estimated costs of closure activities. Estimates can also be impacted by the emergence of new restoration techniques, changes in regulatory requirements for rehabilitation, risks relating to climate change and the transition to a low carbon economy and experience at other operations. These uncertainties may result in future actual expenditure differing from the amounts currently provided for in the balance sheet.

Sensitivity

A further 0.5 per cent decrease in the discount rates applied at 30 June 2021 would result in an increase to the closure and rehabilitation provision of approximately US\$245 million, an increase in property, plant and equipment of approximately US\$241 million in relation to operating sites and an income statement charge of approximately US\$4 million in respect of closed sites. In addition, the change would result in an increase of approximately US\$46 million in depreciation expense and a US\$13 million reduction in net finance costs for the year ending 30 June 2022.

Given the long-lived nature of the majority of BHP Petroleum's assets, closure activities are generally not expected to occur for a significant period of time. A one-year acceleration in forecast cash flows of BHP Petroleum's closure and rehabilitation provisions, in isolation, would result in an increase to the provision of approximately US\$53 million, an increase in property, plant and equipment of US\$46 million in relation to operating sites and an income statement charge of US\$7 million in respect of closed sites.

15. Other provisions

The disclosure below excludes closure and rehabilitation provisions (refer to Note 14 'Closure and rehabilitation provisions'), employee benefits, restructuring and post-retirement employee benefits provisions (refer to Note 18 'Employee benefits, restructuring and post-retirement employee benefits provisions').

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

A reconciliation of changes in other provisions for other liabilities is shown in the following table:

| | 2021 | 2020 | Unaudited 2019 |
|---|------------|------------|-------------------|
| | US\$M | US\$M | US\$M |
| At the beginning of the financial year | 168 | 259 | 229 |
| Charge/(credit) for the year: | | | |
| Disposals | (1) | – | 30 |
| Underlying | 122 | 94 | 193 |
| Discounting | 1 | 3 | 10 |
| Exchange variations | 6 | – | – |
| Released during the year | (7) | (43) | (69) |
| Utilisation | (57) | (85) | (138) |
| Transfers and other movements | 1 | (60) | 4 |
| At the end of the financial year | 233 | 168 | 259 |
| Comprising: | | | |
| Current | 137 | 145 | 137 |
| Non-current | 96 | 23 | 122 |

16. Contingent liabilities

BHP Petroleum's total contingent liabilities for subsidiaries and joint operations as at 30 June 2021 is US\$759 million (2020: US\$687 million, 2019: US\$713 million).

A contingent liability is a possible obligation arising from past events and whose existence will be confirmed only by occurrence or non-occurrence of one or more uncertain future events not wholly within the control of BHP Petroleum. A contingent liability may also be a present obligation arising from past events but is not recognised on the basis that an outflow of economic resources to settle the obligation is not viewed as probable, or the amount of the obligation cannot be reliably measured.

When BHP Petroleum has a present obligation, an outflow of economic resources is assessed as probable and the obligation can be reliably measured, a provision is recognised. BHP Petroleum's contingent liabilities primarily include possible obligations for litigation, uncertain tax and royalty matters, open regulatory audits and various other claims, for which the timing of resolution and potential economic outflow is uncertain. Obligations assessed as having probable future economic outflows capable of reliable measurement are provided at reporting date and matters assessed as having possible future economic outflows capable of reliable measurement are included in the total amount of contingent liabilities above.

| | |
|--|---|
| Uncertain tax and royalty matters | <p>BHP Petroleum is subject to a range of taxes and royalties across many jurisdictions, the application of which is uncertain in some regards. Changes in tax law, changes in interpretation of tax law, periodic challenges and disagreements with tax authorities and legal proceedings result in uncertainty of the outcome of the application of taxes and royalties to BHP Petroleum's business. Areas of uncertainty at reporting date include the application of taxes and royalties to BHP Petroleum's cross-border operations and transactions.</p> <p>To the extent uncertain tax and royalty matters give rise to a contingent liability, an estimate of the potential liability is included within the above total, where it is capable of reliable measurement.</p> |
|--|---|

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

| | |
|-------------------------------|---|
| Open regulatory audits | <p>Under contractual terms, BHP Petroleum is subject to regulatory and joint venture partner audit activity on a routine basis.</p> <p>BHP Petroleum has included contingent liabilities for various periods remaining under audit with regulatory bodies; primarily related to cost recovery claimed by BHP Petroleum, as operator, under contractual terms.</p> <p>To the extent that outcomes of audits remain uncertain, these may give rise to a contingent liability. An estimate of the potential outflow is included within the above total, where it is capable of reliable measurement.</p> |
|-------------------------------|---|

BHP Petroleum has entered into various counterindemnities of bank and performance guarantees related to its own future performance, which are entered into in the normal course of business. The likelihood of these guarantees being called upon is considered remote.

17. Financial risk management

Capital Management

BHP Petroleum has operated for all periods presented as part of BHP Group, with capital of BHP Petroleum managed in accordance with BHP Group capital management strategies and priorities. BHP Group defines capital as the total equity of BHP Group. BHP Group seeks to maintain a strong balance sheet and deploys its capital with reference to BHP Group Capital Allocation Framework. BHP Group monitors capital using BHP Group's net debt balance and BHP Group's gearing ratio, being the ratio of net debt to net debt plus net assets. Capital is managed with the goal of maintaining levels of gearing designed to optimise the cost of capital and return on capital employed, while also growing the business consistently through project developments and acquisitions across BHP Group portfolio of assets.

BHP Petroleum's strategy, as part of BHP Group, is to focus on upstream, large, long life, low cost and expandable assets. BHP Group and BHP Petroleum continually review its portfolio to identify assets that do not fit this strategy. BHP Group, together with BHP Petroleum, will invest capital in assets that fit its strategy.

Financial risks

BHP Petroleum has operated for all periods presented as part of BHP Group; with BHP Petroleum's financial risks considered and managed by the BHP Group Financial Risk Management Committee (FRMC) under authority delegated by the BHP Group Chief Executive Officer.

Financial risk management strategy

The financial risks arising from BHP Petroleum's operations are market risk, including risks associated with movements in interest rates, currency exchange rates and commodity prices, liquidity risk and credit risk. These risks arise in the normal course of business and BHP Petroleum manages its exposure to them in accordance with the BHP Group Portfolio Risk Management Strategy.

Primary responsibility for identification and control of financial risks rests with the BHP Group's FRMC under authority delegated by the BHP Group Chief Executive Officer.

The FRMC reviews the effectiveness of internal controls related to commodity price risk, counterparty credit risk, financing risk, interest rate risk and insurance. The FRMC monitors the financial risk management policies and exposures and approves financial transactions within the scope of its authority.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

BHP Petroleum's risk exposure and responses

BHP Petroleum's operations expose it to a variety of financial risks that include commodity price risk, liquidity risk, credit risk, currency risk and interest rate risk.

The individual risks along with the responses of BHP Petroleum are set out below.

Credit risk

Trade receivables generally have terms of less than 30 days. BHP Petroleum has no material concentration of credit risk with any single counterparty.

Refer to Note 6 'Trade and other receivables' for details on BHP Petroleum's credit risk.

Commodity price risk

BHP Petroleum is exposed to movements in the prices of the products that are sold as commodities on the market. While fluctuations occur in the market, it would take significant decreases over an extended period of time to have a material effect on results of operations.

Interest rate risk

BHP Petroleum is exposed to interest rate risk on its outstanding borrowings and short-term cash deposits from the possibility that changes in interest rate will affect future cash flows. BHP Petroleum does not have exposure to external facing debt—with all current debt funding provided by BHP Group entities.

The majority of BHP Petroleum's debt is issued at London Interbank Offered Rate (LIBOR) interest rates. Based on the net debt position as at 30 June 2021, it is estimated that a one percentage point increase in the US LIBOR interest rate will decrease BHP Petroleum's equity and profit after taxation by US\$67 million (2020: decrease of US\$98 million, 2019: decrease of US\$112 million). This assumes the change in interest rates is effective from the beginning of the financial year and the net debt balances are constant over the year.

Interest rate benchmark reform

LIBOR and other benchmark interest rates are expected to be replaced by alternative risk-free rates (ARR) by the end of CY2021 as part of inter-bank offer rate (IBOR) reform. BHP Group has established a project to assess the implications of IBOR reform across BHP Group and to manage and execute the transition from current discontinuing IBORs rates to ARR, including updating policies, systems and processes.

BHP Petroleum has early adopted amendments to IFRS 9 'Financial Instruments', IFRS 7 'Financial Instruments: Disclosures' and IFRS 16 'Leases' in relation to IBOR reform.

Currency risk

The US dollar is the predominant functional currency within BHP Petroleum and as a result, currency exposures arise from transactions and balances in currencies other than the US dollar. BHP Petroleum's potential currency exposures comprise:

translational exposure in respect of non-functional currency monetary items

transactional exposure in respect of non-functional currency expenditure and revenues.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

The following table shows the foreign currency risk arising from financial assets and liabilities, which are denominated in currencies other than the US dollar:

| Net financial (liabilities)/assets—by currency of denomination | 2021 | 2020 | <i>Unaudited</i> 2019 |
|---|--------------|--------------|---------------------------------|
| | US\$M | US\$M | US\$M |
| Australian dollars | (95) | 68 | 101 |
| Other | 37 | 6 | 15 |
| Total | (58) | 74 | 116 |

The principal non-functional currency exposure for BHP Petroleum is the Australian dollar. Based on BHP Petroleum's net financial assets and liabilities as at 30 June 2021, a weakening of the US dollar against this currency (one cent strengthening in the Australian dollar), with all other variables held constant, would decrease BHP Petroleum's equity and profit after taxation by US\$1 million (2020: increase of US\$1 million, 2019: increase of US\$1 million).

Liquidity risk

BHP Petroleum's liquidity risk arises from the possibility that it may not be able to settle or meet its obligations as they fall due. The risk is managed as part of BHP Group's Portfolio Risk Management Strategy and within BHP Group's overall Cash Flow at Risk (CFaR) limit.

The tables below summarise the timing of cash outflows relating to payables, including those to BHP Group entities and leases:

| 2021 | Trade and other | Payables to | | |
|-------------------------|------------------------|--------------------|---------------|---------------|
| US\$M | payables | BHP Group | Leases | Total |
| Due for payment: | | | | |
| Within 1 year | 919 | 2,001 | 41 | 2,961 |

Fair value measurement

All financial assets and financial liabilities are initially recognised at the fair value of consideration paid or received, net of transaction costs as appropriate and subsequently carried at fair value or amortised cost. The financial assets and liabilities are presented by class in the tables below at their carrying values, which generally approximate to fair values.

| | IFRS 13 Fair value hierarchy Level | IFRS 9 Classification | 2021 US\$M | 2020 US\$M | Unaudited 2019 US\$M |
|------------------------------------|--|--------------------------------------|---------------|---------------|-------------------------|
| Cash and cash equivalents | | Amortised cost | 776 | 325 | 1,398 |
| Trade and other receivables | | Amortised cost | 1,065 | 785 | 873 |
| Receivables from BHP Group | | Amortised cost | 5,526 | 12,424 | 15,871 |
| Other financial assets (1)(2) | 2,3 | Fair value through profit or loss | 51 | 93 | 70 |
| Total financial assets | | | 7,418 | 13,627 | 18,212 |
| Trade and other payables | | Amortised cost | 919 | 771 | 929 |
| Payables to BHP Group | | Amortised cost | 12,348 | 16,880 | 20,860 |
| Other financial liabilities | 3 | Fair value through profit or loss | 9 | 6 | 2 |
| Interest bearing liabilities | | Amortised cost | 269 | 383 | 17 |
| Total financial liabilities | | | 13,545 | 18,040 | 21,808 |

(1) Includes financial assets of US\$51 million (2020: US\$78 million, 2019: US\$70 million) categorised as Level 3. Significant items are derivatives embedded in physical commodity purchase and sales contract and contingent consideration receivable.

(2) Includes investment in debt security of \$0 (2020: US\$15 million, 2019: \$0) categorised as Level 2.

BHP Petroleum uses fair value to measure certain of its assets and liabilities in the combined financial statements. Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, that is, an exit price from the perspective of a market participant that holds the asset or owes the liability.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

For financial assets and liabilities carried at fair value, BHP Petroleum uses the following to categorise the method used based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Based on quoted process (unadjusted) in active markets for identical financial assets and liabilities

Level 2 - Based on inputs other than quoted prices included within Level 1 that are observable for financial asset or liability

Level 3 - Based on inputs not observable in the market using appropriate valuation models, including discounted cash flow modelling

If, at inception of a contract, the valuation cannot be supported by observable market data, any gain or loss determined by the valuation methodology is not recognised in the income statement but deferred on the balance sheet and is commonly known as 'day-one gain or loss'. This deferred gain or loss is recognised in the income statement over the life of the contract until substantially all the remaining contract term can be valued using observable market data at which point any remaining deferred gain or loss is recognised in the income statement. Changes in valuation subsequent to the initial valuation at inception of a contract are recognised immediately in the income statement.

The carrying value of Other financial assets and Other financial liabilities includes an embedded derivative resulting from a physical commodity (gas) purchase and sale contract in Trinidad and Tobago. The carrying value of the embedded derivative at 30 June 2021 was a net liability of US\$4 million (2020: net asset of US\$26 million, 2019: net asset of US\$23 million).

Within Other financial assets, BHP Petroleum has also recognised a receivable for contingent consideration of US\$46 million for each reporting period. The contingent consideration asset was recognised on sale of an interest in the Scarborough gas project to Woodside Petroleum Limited in 2016. Where a positive final investment decision is made, a contingent payment of US\$150 million will be payable to BHP Petroleum.

The valuation techniques used by BHP Petroleum to measure fair value include the use of internally developed methodologies and models that result in management's best estimate of fair value. Inputs used in the valuation include, but are not limited to, future commodity prices, market discount rates and consideration of risks specific to the asset or liability being fair valued.

The following table presents the impact of activity for financial instruments classified as Level 3 in the fair value hierarchy as at 30 June 2021, 2020 and 2019:

| | 2021 | 2020 | <i>Unaudited</i> 2019 |
|--|--------------|-------|--------------------------|
| | US\$M | US\$M | US\$M |
| Fair value at beginning of year | 72 | 68 | 61 |
| Gains/(losses) recognised in income statement: | (10) | 29 | 22 |
| Settlements | (20) | (25) | (15) |
| Net fair value at end of year | 42 | 72 | 68 |

- (1) The expenditure associated with total employee benefits will occur in a pattern consistent with when employees choose to exercise their entitlement to benefits.
- (2) Total restructuring provisions include provisions for terminations.

Recognition and measurement

Provisions are recognised by BHP Petroleum when:

there is a present legal or constructive obligation as a result of past events

it is more likely than not that a permanent outflow of resources will be required to settle the obligation

the amount can be reliably estimated and measured at the present value of management's best estimate of the cash outflow required to settle the obligation at reporting date.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

| Provision | Description |
|----------------------|--|
| Employee benefits | <p>Liabilities for annual leave and any accumulating sick leave accrued up until the reporting date that are expected to be settled within 12 months are measured at the amounts expected to be paid when the liabilities are settled. To the extent uncertain tax and royalty matters give rise to a contingent liability, an estimate of the potential liability is included within the above total, where it is capable of reliable measurement.</p> <p>Liabilities for long service leave are measured as the present value of estimated future payments for the services provided by employees up to the reporting date and disclosed within employee benefits.</p> <p>Liabilities that are not expected to be settled within 12 months are discounted at the reporting date using market yields of high-quality corporate bonds or government bonds for countries where there is no deep market for corporate bonds. The rates used reflect the terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.</p> <p>In relation to industry-based long service leave funds, BHP Petroleum's liability, including obligations for funding shortfalls, is determined after deducting the fair value of dedicated assets of such funds.</p> <p>Liabilities for unpaid wages and salaries are recognised in other creditors.</p> |
| Restructuring | <p>Restructuring provisions are recognised when:</p> <ul style="list-style-type: none">BHP Petroleum has a detailed formal plan identifying the business or part of the business concerned, the location and approximate number of employees affected, a detailed estimate of the associated costs and an appropriate timelinethe restructuring has either commenced or been publicly announced and can no longer be withdrawn. <p>Payments falling due greater than 12 months after the reporting date are discounted to present value.</p> |

Post-retirement employee benefits

BHP Petroleum operates or participates in a number of pension (including superannuation) schemes throughout the world. The funding of the schemes complies with local regulations. The assets of the schemes are generally held separately from those of BHP Petroleum and are administered by trustees or management boards.

| Schemes/Obligations | Description |
|--|--|
| Defined contribution pension schemes and multi-employer pension schemes | <p>For defined contribution schemes or schemes operated on an industry-wide basis where it is not possible to identify assets attributable to the participation by our employees, the pension charge is calculated on the basis of contributions payable. BHP Petroleum contributed US\$42 million during the financial year (2020: US\$37 million, 2019: US\$68 million) to defined contribution plans and multi-employer defined contribution plans. These contributions are expensed as incurred.</p> |

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

| | |
|--|--|
| Defined benefit pension schemes | <p>For defined benefit pension schemes, the cost of providing pensions is charged to the income statement so as to recognise current and past service costs, net interest cost on the net defined benefit obligations/plan assets and the effect of any curtailments or settlements. Remeasurement gains and losses are recognised directly in equity. An asset or liability is consequently recognised in the balance sheet based on the present value of defined benefit obligations less the fair value of plan assets, except that any such asset cannot exceed the present value of expected refunds from and reductions in future contributions to the plan.</p> <p>Defined benefit obligations are estimated by discounting expected future payments using market yields at the reporting date on high-quality corporate bonds in countries that have developed corporate bond markets. However, where developed corporate bond markets do not exist, the discount rates are selected by reference to national government bonds. In both instances, the bonds are selected with terms to maturity and currency that match, as closely as possible, the estimated future cash flows. BHP Petroleum has closed all defined benefit pension schemes to new entrants. Defined benefit pension schemes remain operating in Australia and the United States for existing members. Full actuarial valuations are prepared and updated annually to 30 June by local actuaries for all schemes. BHP Petroleum operates final salary schemes (that provide final salary benefits only), non-salary related schemes (that provide flat dollar benefits) and mixed benefit schemes (that consist of a final salary defined benefit portion and a defined contribution portion).</p> |
| Defined benefit post-retirement medical schemes | <p>BHP Petroleum operates a number of post-retirement medical schemes in the United States and certain BHP Group companies provide post-retirement medical benefits to qualifying retirees. In some cases, the benefits are provided through medical care schemes to which BHP Group, the employees, the retirees and covered family members contribute. Full actuarial valuations are prepared by local actuaries for all schemes. These schemes are recognised on the same basis as described for defined benefit pension schemes. All of the post-retirement medical schemes are unfunded.</p> |

Risk

BHP Petroleum defined benefit schemes/obligations expose BHP Petroleum to a number of risks, including asset value volatility, interest rate variations, inflation, longevity and medical expense inflation risk.

Recognising this, BHP Petroleum has adopted an approach of moving away from providing defined benefit pensions. The majority of BHP Petroleum's sponsored defined benefit pension schemes have been closed to new entrants for many years. Existing benefit schemes and the terms of employee participation in these schemes are reviewed on a regular basis.

Actuarial assumptions

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

The material financial assumptions used to estimate the benefit obligations of the various plans are set out below. The assumptions are reviewed by management at the end of each year and are used to evaluate the accrued benefit obligation at 30 June and pension expense for the following year.

| | Defined benefit pension schemes | | | Defined benefit post-retirement medical schemes | | |
|--|---------------------------------|-------|-----------|---|-------|-----------|
| | 2021 | 2020 | Unaudited | 2021 | 2020 | Unaudited |
| | | | 2019 | | | 2019 |
| Key assumptions used to determine benefit obligation: | | | | | | |
| Discount rate | 3.09% | 2.51% | 3.47% | 2.56% | 2.40% | 3.27% |
| Post-retirement health care trend rate–initial | – | – | – | 4.22% | 4.41% | 4.52% |
| Post-retirement health care trend rate–ultimate | – | – | – | 4.03% | 4.06% | 4.08% |
| Key assumptions used to determine benefit expense: | | | | | | |
| Discount rate | 2.51% | 3.48% | 4.11% | 2.40% | 3.27% | 4.00% |
| Post-retirement health care trend rate–initial | – | – | – | 4.41% | 4.52% | 4.84% |
| Post-retirement health care trend rate–ultimate | – | – | – | 4.06% | 4.08% | 4.11% |

In addition to the financial assumptions, we regularly review the demographic and mortality assumptions. The mortality assumptions reflect best practice in the countries in which we provide pensions and have been chosen with regard to applicable published tables adjusted where appropriate to reflect the experience of BHP Petroleum and an extrapolation of past longevity improvements into the future.

BHP Petroleum's most substantial pension liabilities are in the US where mortality assumptions applied are as follows:

| | 2021 | 2020 | Unaudited |
|---|--------|--------|-----------|
| | 2021 | 2020 | 2019 |
| Life Expectancy of a Male aged 65 now | 21.561 | 21.451 | 21.386 |
| Life Expectancy of a Male aged 65 in 15 years | 22.458 | 22.358 | 22.303 |
| Life Expectancy of a Female aged 65 now | 23.285 | 23.197 | 23.137 |
| Life Expectancy of a Female aged 65 in 15 years | 24.116 | 23.379 | 23.984 |

Fund assets

BHP Petroleum follows a coordinated strategy for the funding and investment of its defined benefit pension schemes (subject to meeting all local requirements). BHP Petroleum aims for the value of defined benefit pension scheme assets to be maintained at close to the value of the corresponding benefit obligations, allowing for some short-term volatility. Scheme assets are invested in a diversified range of asset classes, predominantly comprising bonds and equities.

BHP Petroleum aims to progressively shift defined benefit pension scheme assets towards investments that match the anticipated profile of the benefit obligations, as funding levels improve, and benefit obligations mature. Over time, this is expected to result in a further reduction in the total exposure of pension scheme assets to equity markets. For pension schemes that pay lifetime benefits, BHP Petroleum may consider and support the purchase of annuities to back these benefit obligations if it is commercially sensible to do so.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Net liability recognised in the Consolidated Balance Sheet

The net liability recognised in the Consolidated Balance Sheet is as follows:

| | Defined benefit pension schemes/post-employment obligations | | | Post-retirement medical schemes | | |
|---|---|-----------|--------------------------|---------------------------------|------------|--------------------------|
| | 2021 | 2020 | <i>Unaudited</i> 2019 | 2021 | 2020 | <i>Unaudited</i> 2019 |
| | US\$M | US\$M | US\$M | US\$M | US\$M | US\$M |
| Present value of funded defined benefit obligation | 163 | 172 | 172 | – | – | – |
| Present value of unfunded defined benefit obligation | 111 | 97 | 104 | 154 | 166 | 154 |
| Fair value of defined benefit scheme assets | (180) | (182) | (184) | – | – | – |
| Scheme deficit | 94 | 87 | 92 | 154 | 166 | 154 |
| Unrecognised surplus | – | – | – | – | – | – |
| Unrecognised past service credits | – | – | – | – | – | – |
| Adjustment for employer contributions tax | – | – | – | – | – | – |
| Net liability recognised in the Consolidated Balance Sheet | 94 | 87 | 92 | 154 | 166 | 154 |

BHP Petroleum has no legal obligation to settle these liabilities with any immediate contributions or additional one-off contributions. BHP Petroleum intends to continue to contribute to each defined benefit pension and post-retirement medical scheme in accordance with the latest recommendations of each scheme actuary.

Employee share ownership plans

Awards, in the form of the right to receive ordinary shares in either BHP Group Limited or BHP Group Plc, have been granted under the following employee share ownership plans: Cash and Deferred Plan (CDP), Short-Term Incentive Plan (STIP), Long-Term Incentive Plan (LTIP), Management Award Plan (MAP), Transitional and Commencement Key Management Personnel awards and the all-employee share plan, Shareplus.

Some awards are eligible to receive a cash payment, or the equivalent value in shares, equal to the dividend amount that would have been earned on the underlying shares awarded to those participants (the Dividend Equivalent Payment, or DEP). The DEP is provided to the participants once the underlying shares are allocated or transferred to them. Awards under the plans do not confer any rights to participate in a share issue; however, there is discretion under each of the plans to adjust the awards in response to a variation in the share capital of BHP Group Limited or BHP Group Plc.

Employee share awards pre-tax expense is US\$36 million (2020: US\$39 million, 2019: US\$45 million).

BHP Petroleum Assets Notes to the Financial Statements

Fair value and assumptions in the calculation of fair value for awards issued

| 2021 | Closing number of shares at the end of the financial year | Weighted average fair value of awards granted during the year US\$ | Risk-free interest rate | Estimated life of awards | Share price at grant date | Estimated volatility of share price | Dividend yield |
|--------------------------|---|--|-------------------------|--------------------------|-------------------------------------|-------------------------------------|----------------|
| BHP Group Limited | | | | | | | |
| CDP awards | 50,980 | 25.28 | n/a | 2 and 5 years | A\$35.90 | n/a | n/a |
| STIP awards | 6,628 | 25.28 | n/a | 2 years | A\$35.90 | n/a | n/a |
| LTIP awards (1) | 328,709 | 14.68 | 0.25 % | 5 years | A\$35.90/A\$33.81/A\$38.56 | 28.0 % | n/a |
| MAP awards (2) | 3,867,213 | 22.88 | n/a | 1-5 years | A\$38.36/A\$36.91/A\$35.90/A\$45.88 | n/a | 4.90 % |
| Shareplus | 333,738 | 28.35 | 0.21 % | 3 years | A\$30.19 | n/a | 5.59 % |
| BHP Group Plc | | | | | | | |
| Shareplus | 481 | 15.32 | 0.12 % | 3 years | £12.11 | n/a | 6.40 % |

(1) Includes LTIP awards granted on 20 October 2020, 2 November 2020 and 1 December 2020.

(2) Includes MAP awards granted on 21 August 2020, 24 September 2020, 20 October 2020 and 7 April 2021.

Recognition and measurement

The fair value at grant date of equity-settled share awards is charged to the income statement over the period for which the benefits of employee services are expected to be derived. The fair values of awards granted were estimated using a Monte Carlo simulation methodology and Black-Scholes option pricing technique and consider the following factors:

exercise price

expected life of the award

current market price of the underlying shares

expected volatility using an analysis of historic volatility over different rolling periods. For the LTIP, it is calculated for all sector comparators and the published MSCI World index

expected dividends

risk-free interest rate, which is an applicable government bond rate

market-based performance hurdles

non-vesting conditions

Where awards are forfeited because non-market-based vesting conditions are not satisfied, the expense previously recognised is proportionately reversed.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

The tax effect of awards granted is recognised in income tax expense, except to the extent that the total tax deductions are expected to exceed the cumulative remuneration expense. In this situation, the excess of the associated current or deferred tax is recognised in equity and forms part of the employee share awards reserve. The fair value of awards as presented in the tables above represents the fair value at grant date.

In respect of employee share awards, BHP Group utilises the Billiton Employee Share Ownership Trust and the BHP Billiton Limited Employee Equity Trust. The trustees of these trusts are independent companies, resident in Jersey. The trusts use funds provided by BHP Group to acquire ordinary shares to enable awards to be made or satisfied. The ordinary shares may be acquired by purchase in the market or by subscription at not less than nominal value. These entities are outside BHP Petroleum boundary and are not included as part of BHP Petroleum's combined financial statements.

19. Subsidiaries

BHP Petroleum's financial statements include the combination of subsidiaries as described in Note 1 'Organisation and summary of significant accounting policies'.

Significant subsidiaries are those with the most significant contribution to BHP Petroleum's net profit or net assets. BHP Petroleum's interest in significant subsidiaries' results is listed in the table below:

| Significant subsidiaries | Country of incorporation |
|---|---------------------------------|
| BHP (Trinidad-3A) Ltd | Trinidad and Tobago |
| BHP Billiton (Trinidad-2C) Ltd. | Canada |
| BHP Petroleum (Australia) Pty Ltd | Australia |
| BHP Billiton Petroleum (Deepwater) Inc. | US |
| BHP Petroleum (International Exploration) Pty Ltd | Australia |
| BHP Petroleum (Bass Strait) Pty Ltd | Australia |
| BHP Petroleum (North West Shelf) Pty Ltd | Australia |

BHP Petroleum's interest in these significant subsidiaries in FY2021, FY2020 and FY2019 was 100 per cent and the principal activity of each significant subsidiary was primarily hydrocarbon exploration and production.

20. Interests in joint operations

Significant joint operations of BHP Petroleum are those with the most significant contributions to its net profit or net assets. BHP Petroleum's interest in the significant joint operations, whose principal activities are primarily hydrocarbon production, results are listed in the table below.

| Significant joint operations | Country of operation | Principal activity | 2021 % | 2020 % | 2019 % |
|-------------------------------------|-----------------------------|---------------------------|-------------------|-------------------|-------------------|
| Atlantis | US | Hydrocarbon production | 44 | 44 | 44 |
| Bass Strait | Australia | Hydrocarbon production | 50 | 50 | 50 |
| Macedon (1) | Australia | Hydrocarbon production | 71 | 71 | 71 |
| Mad Dog | US | Hydrocarbon production | 24 | 24 | 24 |
| North West Shelf | Australia | Hydrocarbon production | 12.5-16.67 | 12.5-16.67 | 12.5-16.67 |
| Pyrenees (1) | Australia | Hydrocarbon production | 40-71.43 | 40-71.43 | 40-71.43 |
| ROD Integrated Development (2) | Algeria | Hydrocarbon production | 29 | 30 | 30 |
| Shenzi (3) | US | Hydrocarbon production | 72 | 44 | 44 |
| Trinidad and Tobago (1)(4) | Trinidad and Tobago | Hydrocarbon production | 45-68.46 | 45-68.46 | 45-68.46 |

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

- (1) While BHP Petroleum may hold a greater than 50 per cent interest in these joint operations, all the participants in these joint operations approve the operating and capital budgets and therefore Carve-Out Entity has joint control over the relevant activities of these arrangements.
- (2) BHP Petroleum's interest reflects the working interest and may vary year-on-year based on BHP Petroleum's effective interest in producing wells.
- (3) Relates to BHP Petroleum's acquisition of an additional 28 per cent working interest in Shenzi.
- (4) Trinidad and Tobago joint operations include Greater Angostura and Ruby.

Shenzi Acquisition

In November 2020, BHP Petroleum finalised a membership interest purchase and sale agreement to acquire an additional 28 per cent working interest in Shenzi. The transaction was completed on 6 November 2020 for a purchase price of US\$480 million after customary post-closing adjustments. Shenzi continues to be accounted for as a joint operation because BHP Petroleum continues to have joint decision-making rights with the other joint venture partner.

The assets and liabilities related to the acquired interests have been accounted for in line with the principles of IFRS 3 'Business Combinations' with no remeasurement of BHP Petroleum's previous interest. The acquisition resulted in increases to property, plant and equipment of US\$642 million, inventory of US\$17 million and closure and rehabilitation liabilities of US\$179 million. Fair value of the identifiable assets and liabilities approximate the consideration paid and therefore no goodwill or bargain purchase gain has been recognised for the acquisition. The acquisition of an additional 28 per cent working interest in Shenzi since November 2020 contributed US\$136 million of revenue and US\$48 million to profit before tax of BHP Petroleum in FY2021. If the acquisition had taken place at the beginning of the financial year, revenue for BHP Petroleum would have been US\$3,952 million and loss before tax for BHP Petroleum would have been US\$183 million.

BHP Petroleum's share of assets held in joint operations subject to significant restrictions are as follows:

| | 2021 | 2020 | Unaudited 2019 |
|-------------------------|---------------|---------------|-------------------|
| | US\$M | US\$M | US\$M |
| Current assets | 866 | 804 | 751 |
| Non-current assets | 12,255 | 11,516 | 10,943 |
| Total assets (1) | 13,121 | 12,320 | 11,694 |

- (1) While BHP Petroleum is unrestricted in its ability to sell a share of its interest in these joint operations, it does not have the right to sell individual assets that are used in these joint operations without the unanimous consent of the other participants. The assets in these joint operations are also restricted to the extent that they are only available to be used by the joint operation itself and not by other operations of BHP Petroleum.

Table of Contents**BHP Petroleum Assets****Notes to the Financial Statements****21. Investments in associates**

Ownership interest for BHP Petroleum' s investments in associates, which are operated in the US, are listed in the table below:

| <u>Associates</u> | <u>Principal activity</u> | <u>Reporting date</u> | <u>Ownership interest % (1)</u> |
|--|-----------------------------|-----------------------|---------------------------------|
| Caesar Oil Pipeline Company LLC (COP) | Hydrocarbons transportation | 31 December | 25 |
| Cleopatra Gas Gathering Company LLC (CGG) | Hydrocarbons transportation | 31 December | 22 |
| Marine Well Containment Company LLC (MWCC) | Oil spill services | 31 December | 10 |

(1) Reflects BHP Petroleum' s ownership interest at 30 June 2021, 2020 and 2019.

BHP Petroleum is restricted in its ability to make dividend payments from its investments in associates as any such payments require the approval of all investors in the associates. There has been no change in BHP Petroleum' s ownership interest in the associates for any of the reporting periods covered by these combined financial statements. When the annual financial reporting date is different to BHP Petroleum' s, financial information is obtained as at 30 June in order to report on an annual basis consistent with BHP Petroleum' s reporting date.

The movement for the year in BHP Petroleum' s net investments in associates is as follows:

| | 2021 | 2020 | <i>Unaudited</i> |
|---|--------------|-------|------------------|
| | US\$M | US\$M | 2019 |
| | | | US\$M |
| At the beginning of the financial year | 245 | 239 | 249 |
| Loss from investments in associates | (6) | (4) | (2) |
| Investment in associates | 25 | 22 | 6 |
| Dividends received from associates | (11) | (12) | (14) |
| At the end of the financial year | 253 | 245 | 239 |

Transactions with equity accounted investments

The following transactions took place during the year with equity accounted investments:

| | 2021 | 2020 | <i>Unaudited</i> 2019 |
|-----------------------------|--------------|-------|--------------------------|
| | US\$M | US\$M | US\$M |
| Purchases of goods/services | 16 | 20 | 23 |
| Dividends received | 11 | 12 | 14 |

Outstanding balances with related parties

| | <u>Equity Accounted Investments</u> | | | <u>BHP Group Entities</u> | | |
|--|-------------------------------------|-------|--------------------------|---------------------------|--------|--------|
| | 2021 | 2020 | <i>Unaudited</i> 2019 | 2021 | 2020 | 2019 |
| | US\$M | US\$M | US\$M | US\$M | US\$M | US\$M |
| Amounts payable to BHP Group | – | – | – | 12,348 | 16,880 | 20,860 |
| Trade amounts owing from related parties | 2 | 1 | 2 | – | – | – |
| Amounts receivable from BHP Group | – | – | – | 5,526 | 12,424 | 15,871 |

BHP Petroleum has a financing arrangement with BHP Group for short-term cash management. As at 30 June 2021 amount receivable from BHP Group related to these financing arrangements was US\$5,526 million (2020: US\$12,424 million, 2019: US\$ 15,871 million). These amounts are included in receivables from BHP Group on the balance sheet. As at 30 June 2021 amounts payable to BHP Group related to this was US\$2,001 million (2020: US\$2,540 million, 2019: US\$3,520 million).

BHP Petroleum also entered into long-term debt agreements with BHP Group to finance its projects. The current portion of the long-term debt is recorded on the balance sheet under current liabilities in Payables to BHP Group. The current portion of long-term debt as at 30 June 2021 was \$0 (2020: US\$3,993 million, 2019: US\$3,000 million). The non-current portion of the long-term debt is recorded on the balance sheet under non-current liabilities in Payables to BHP Group. The non-current portion of long-term debt as at 30 June 2021 was US\$ 10,347 million (2020: US\$ 10,347 million, 2019: US\$ 14,340 million). Interest expense related to the long-term debt is recorded in Finance expense in the income statement. Interest expense related to the long-term debt for the year ended 30 June 2021 was US\$267 million (2020:US\$622 million, 2019:US\$822 million). The long-term debt agreements with BHP Group are entered at 3-month USD LIBOR plus margin. The margin ranges between 1.3 per cent and 1.8 per cent. The long-term debt agreements have a maturity date between November 2022 and December 2022.

There are no expected credit losses related to balances from related parties at 30 June 2021, 2020 and 2019.

BHP Petroleum has entered various performance and corporate guarantees with certain BHP Group entities in the normal course of business. At 30 June 2021, BHP Petroleum had outstanding guarantees as follows:

Guarantees provided by BHP Petroleum:

corporate guarantee given to financial institutions that manage future trades in order to hedge oil and gas production with maximum exposure of US\$1 million

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

Guarantees received by BHP Petroleum:

corporate guarantee received for regulatory requirements for drilling in the amount of US\$20 million

corporate guarantee received for exploration licenses in the amount of US\$232 million

corporate guarantee received for Outer Continental Shelf Right of Way Grant Bond in the amount of US\$3.3 million

corporate guarantee received for plugging and abandonment of well in the amount of US\$12 million

The likelihood of these performance and corporate guarantees being called upon is considered remote.

23. Significant entities of BHP Petroleum

As disclosed in Note 1 'Organisation and summary of significant accounting policies' the combined financial statements include financial information that is limited to the legal entities carved out from BHP Group Limited. A listing of subsidiaries of BHP Petroleum, included as part of the Proposed Transaction boundary are detailed below. For subsidiaries and joint operations that most significantly contribute to BHP Petroleum's net profit and net assets refer to Note 19 'Subsidiaries', Note 20 'Interest in joint operations'.

BHP Petroleum Assets

Notes to the Financial Statements

24. Discontinued operations (Onshore US assets)

On 28 September 2018, BHP Petroleum completed the sale of 100 per cent of the issued share capital of BHP Billiton Petroleum (Arkansas) Inc. and 100 per cent of the membership interests in BHP Billiton Petroleum (Fayetteville) LLC, which held the Fayetteville assets, for a gross cash consideration of US\$0.3 billion.

On 31 October 2018, BHP Petroleum completed the sale of 100 per cent of the issued share capital of Petrohawk Energy Corporation, the subsidiary which held the Eagle Ford (being Black Hawk and Hawkville), Haynesville and Permian assets, for a gross cash consideration of US\$10.3 billion (net of preliminary customary completion adjustments of US\$0.2 billion). Results from the Onshore US assets are disclosed as Discontinued operations.

While the effective date at which the right to economic profits transferred to the purchasers was 1 July 2018, BHP Petroleum continued to control the Onshore US assets until the completion dates of their respective transactions. As such BHP Petroleum continued to recognise its share of revenue, expenses, net finance costs and associated income tax expense related to the operation until the completion date. In addition, BHP Petroleum provided transitional services to the buyer, which ceased in July 2019.

The completion adjustments included a reduction in sale proceeds, based on the operating cash generated and retained by BHP Petroleum in the period prior to completion, in order to transfer the economic profits from 1 July 2018 to completion date to the buyers. Therefore, the pre-tax profit from operating the assets is largely offset by a pre-tax loss on disposal. Accordingly, the net loss from discontinued operations predominantly relates to incremental costs arising as a consequence of the divestment, including restructuring costs and provisions for surplus office accommodation and tax expenses largely triggered by the completion of the transactions.

The contribution of Discontinued operations included within BHP Petroleum's profit and cash flows are detailed below:

Income statement - Discontinued operations

| | <i>Unaudited</i> 2019 US\$M |
|---|-----------------------------------|
| Revenue | 851 |
| Other income | 94 |
| Expenses excluding net finance costs | (729) |
| Profit/(loss) from operations | 216 |
| Financial expenses | (8) |
| Net finance costs | (8) |
| Profit/(loss) before taxation | 208 |
| Income tax (expense)/benefit | (33) |
| Profit/(loss) after taxation from operating activities | 175 |
| Net loss on disposal | (510) |
| Loss after taxation | (335) |
| Attributable to non-controlling interests | 7 |
| Attributable to BHP Petroleum | (342) |

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

The total comprehensive income attributable to BHP Petroleum from Discontinued operations was a loss of US\$342 million in 2019.

Cash flows from Discontinued operations

| | <i>Unaudited</i> 2019 US\$M |
|--|-----------------------------------|
| Net operating cash flows | 474 |
| Net investing cash flows (1) | (443) |
| Net financing cash flows (2) | (13) |
| Net increase/(decrease) in cash and cash equivalents from Discontinued operations | 18 |
| Net proceeds received from the sale of Onshore US | 10,531 |
| Less Cash and cash equivalents | (104) |
| Proceeds from divestment of Onshore US, net of its cash | 10,427 |
| Total cash impact | 10,445 |

(1) Includes purchases of property, plant and equipment of US\$443 million.

(2) Includes net repayment of interest bearing liabilities of US\$6 million and dividends paid to non-controlling interests of US\$7 million.

Net loss on disposal of Discontinued operations

Details of the net loss on disposal is presented below:

| | <i>Unaudited</i> 2019 US\$M |
|--|-----------------------------------|
| Assets | |
| Cash and cash equivalents | 104 |
| Trade and other receivables | 562 |
| Other financial assets | 31 |
| Inventories | 34 |
| Property, plant and equipment | 10,998 |
| Intangible assets | 667 |
| Total assets | <u>12,396</u> |
| Liabilities | |
| Trade and other payables | 794 |
| Provisions | 491 |
| Total liabilities | <u>1,285</u> |
| Net assets | <u>11,111</u> |
| Less non-controlling interest share of net assets disposed | (168) |
| BHP Petroleum' s of net assets disposed | <u>10,943</u> |
| Gross consideration | 10,555 |
| Less transaction costs | (54) |
| Income tax expense | (68) |
| Net loss on disposal | <u>(510)</u> |

25. New and amended accounting standards and interpretations

BHP Petroleum adopted IFRS 16 'Leases' (IFRS 16) in BHP Petroleum' s Financial Statements from 1 July 2019. The adoption of other new or amended accounting standards or interpretations applicable from 1 July 2019, including IFRIC 23 'Uncertainty over Income Tax Treatment' , did not have a significant impact on BHP Petroleum' s Financial Statements.

BHP Petroleum has also early adopted amendments to IFRS 9 'Financial Instruments' (IFRS 9) and IFRS 7 'Financial Instruments: Disclosures' (IFRS 7) in relation to Interest Rate Benchmark Reform.

IFRS 16 Leases

IFRS 16 replaces IAS 17 'Leases' (IAS 17) including associated interpretative guidance and covers the recognition, measurement, presentation and disclosures of leases in the Financial Statements of both lessees and lessors.

Transition impact

IFRS 16 became effective for BHP Petroleum from 1 July 2019 and BHP Petroleum elected to apply the modified retrospective transition approach, with no restatement of comparative financial information. For existing finance leases, the right-of-use asset and lease liability on transition was the IAS 17 carrying amounts as at 30 June 2019. BHP Petroleum did not recognise any finance leases as at 30 June 2019.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Financial Statements

As allowed by IFRS 16, BHP Petroleum has elected:

except for existing finance leases, to measure the right-of-use asset on transition at an amount equal to the lease liability (as adjusted for prepaid or accrued lease payments);

not to recognise low-value or short-term leases on the balance sheet;

to only recognise, within the lease liability, the lease component of contracts that include non-lease components and other services;

to adjust the carrying amount of right-of-use assets on transition for related onerous lease provisions that were recognised on BHP Petroleum balance sheet as at 30 June 2019.

Adoption of IFRS 16 resulted in an increase in interest bearing liabilities of US\$438 million, right-of-use assets of US\$361 million and net adjustments to other assets and liabilities of US\$36 million at 1 July 2019. The weighted average incremental borrowing rate applied to BHP Petroleum's additional lease liabilities at 1 July 2019 was 2.3 per cent taking into account the currency, tenor and location of each lease.

The following table provides a reconciliation of the operating lease commitments disclosed as at 30 June 2019 the total lease liability recognised at 1 July 2019:

| | <i>Unaudited</i> US\$M |
|---|---------------------------|
| Operating lease commitments as at 30 June 2019 | 402 |
| Add: Leases which did not meet the definition of a lease under IAS 17 | 1 |
| Add: Cost of reasonably certain extension options (discounted) | 91 |
| Less: Components excluded from lease liability (undiscounted) | (5) |
| Less: Effect of discounting | (51) |
| Total additional lease liabilities recognised at 1 July 2019 | 438 |

BHP Petroleum's activities as a lessor are not material and hence there is no significant impact on the Financial Statements on adoption of IFRS 16.

26. Subsequent events

In November 2021, BHP Group Limited (BHP) and Woodside Petroleum Ltd (Woodside) signed a binding share sale agreement for the merger of BHP's oil and gas portfolio with Woodside. Woodside will acquire the entire share capital of BHP Petroleum International Pty Ltd in exchange for new Woodside shares. The merger is expected to be completed during the first half of calendar year 2022.

In November 2021, the BHP Group approved US\$1.5 billion in capital expenditure for development of the Scarborough upstream project located in the North Carnarvon Basin, Western Australia. A final investment decision has also been made by Woodside which has triggered a US\$150 million payment to BHP Petroleum (North West Shelf) Pty Ltd (a wholly owned subsidiary of BHP Petroleum) by Woodside, in accordance with the terms of the 2016 divestment of BHP's 25 per cent Scarborough Joint Venture interest to Woodside.

The approved capital expenditure represents BHP's 26.5 per cent participating interest in Phase 1 of the upstream development. Woodside holds the remaining 73.5 per cent interest and is the operator of the project.

Other than the matters outlined above, no matters or circumstances have arisen since the end of the financial year that have significantly affected, or may significantly affect, the operations, results of operations or state of affairs in subsequent accounting periods of BHP Petroleum.

[Table of Contents](#)

Supplementary oil and gas information - unaudited

In accordance with the requirements of the Financial Accounting Standards Board (FASB) Accounting Standard Codification 'Extractive Activities-Oil and Gas' (Topic 932) and SEC requirements set out in Subpart 1200 of Regulation S-K, BHP Petroleum (as defined in the BHP Petroleum Assets combined financial statements as of and for the years ended 30 June 2021, 2020 and 2019) is presenting certain disclosures about its oil and gas activities. These disclosures are presented below as supplementary oil and gas information, in addition to information relating to the reserves and production of BHP Petroleum disclosed in the registration statement to which these financial statements are attached.

The information set out in this section is referred to as unaudited as it is not included in the scope of the audit opinion of the independent auditor on BHP Petroleum combined financial statements.

Reserves and production

Proved oil and gas reserves and net crude oil and condensate, natural gas, LNG and NGL production information for BHP Petroleum is included in the registration statement to which these financial statements are attached.

Capitalised costs relating to oil and gas production activities

The following table shows the aggregate capitalised costs relating to oil and gas exploration and production activities and related accumulated depreciation, depletion, amortisation and valuation provisions.

| | <u>Australia US\$M</u> | <u>United States US\$M</u> | <u>Other(1) US\$M</u> | <u>Total US\$M</u> |
|--|----------------------------|--------------------------------|---------------------------|------------------------|
| Capitalised cost | | | | |
| 2021 | | | | |
| Unproved properties | – | 754 | 580 | 1,334 |

(1) Includes sales to affiliated companies of US\$51 million (2020: US\$62 million; 2019: US\$75 million).

(2) Includes valuation provision of US\$101 million (2020: US\$12 million; 2019: US\$21 million).

(3) Includes royalties and excise duty.

(4) Represents the unwinding of the discount on the closure and rehabilitation provision.

(5) Includes petroleum resource rent tax and petroleum revenue tax where applicable.

(6) Amounts shown exclude financial income, financial expenses and general corporate overheads and, accordingly, do not represent all of the operations attributable to the Petroleum segment presented in note 1 'Segment reporting' in section 3.1.

(7) Results of oil and gas producing activities includes Onshore US assets of US\$ nil (2020: US\$ nil; 2019: US\$431 million).

(8) Other is primarily comprised of Algeria, Canada, Mexico, and Trinidad and Tobago.

[Table of Contents](#)

Standardised measure of discounted future net cash flows relating to proved oil and gas reserves (Standardised measure)

The following tables set out the standardised measure of discounted future net cash flows, and changes therein, related to BHP Petroleum's estimated proved reserves and should be read in conjunction with that related disclosure.

The analysis is prepared in compliance with FASB Oil and Gas Disclosure requirements, applying certain prescribed assumptions under Topic 932 including the use of unweighted average first-day-of-the-month market prices for the previous 12-months, year-end cost factors, currently enacted tax rates and an annual discount factor of 10 per cent to year-end quantities of net proved reserves.

The standardized measure includes cost for future dismantlement, abandonment, and rehabilitation obligations.

Certain key assumptions prescribed under Topic 932 are arbitrary in nature and may not prove to be accurate. The reserve estimates on which the Standard measure is based are subject to revision as further technical information becomes available or economic conditions change.

Discounted future net cash flows like those shown below are not intended to represent estimates of fair value. An estimate of fair value would also take into account, among other things, the expected recovery of reserves in excess of proved reserves, anticipated future changes in commodity prices, exchange rates, development and production costs as well as alternative discount factors representing the time value of money and adjustments for risk inherent in producing oil and gas.

| Standardised measure at the end of the year | <u>4,851</u> | <u>5,058</u> | <u>9,152</u> |

(1) Changes in reserves quantities are shown in the Petroleum reserves tables in section 4.6.1.

(2) Onshore US assets disposal in 2019.

Accounting for suspended exploratory well costs

Refer to note 8 'Property, plant and equipment' in the financial statements for BHP Petroleum for a discussion of the accounting policy applied to the cost of exploratory wells. Suspended wells are also reviewed in this context.

The following table provides the changes to capitalised exploratory well costs that were pending the determination of proved reserves for the three years ended 30 June 2021, 30 June 2020 and 30 June 2019.

| | 2021 US\$M | 2020 US\$M | 2019 US\$M |
|---|---------------|---------------|---------------|
| Movement in capitalised exploratory well costs | | | |
| At the beginning of the year | 1,089 | 1,040 | 794 |
| Additions to capitalised exploratory well costs pending the determination of proved reserves | 7 | 120 | 297 |
| Capitalised exploratory well costs charged to expense | (66) | - | (9) |
| Capitalised exploratory well costs reclassified to wells, equipment, and facilities based on the determination of proved reserves | - | (6) | (42) |
| Sale of suspended wells | - | (65) | - |
| At the end of the year | <u>1,030</u> | <u>1,089</u> | <u>1,040</u> |

The following table provides an ageing of capitalised exploratory well costs, based on the date the drilling was completed, and the number of projects for which exploratory well costs has been capitalised for a period greater than one year since the completion of drilling.

Table of Contents

Exploration activity typically involves drilling multiple wells, over a number of years, to fully evaluate and appraise a project. The term 'project' as used in this disclosure refers primarily to individual wells and associated exploratory activities.

| | 2021 | 2020 | 2019 |
|---|--------------|-------|-------|
| | US\$M | US\$M | US\$M |
| Ageing of capitalised exploratory well costs | | | |
| Exploratory well costs capitalised for a period of one year or less | 7 | 120 | 210 |
| Exploratory well costs capitalised for a period greater than one year | 1,023 | 969 | 830 |
| At the end of the year | 1,030 | 1,089 | 1,040 |
| | 2021 | 2020 | 2019 |
| Number of projects that have been capitalised for a period greater than one year | 15 | 14 | 13 |

Drilling and other exploratory and development activities

The number of crude oil and natural gas wells drilled and completed for each of the last three years was as follows:

| | <u>Net exploratory wells</u> | | | <u>Net development wells</u> | | | <u>Total</u> |
|--------------------------------|------------------------------|------------|--------------|------------------------------|------------|--------------|--------------|
| | <u>Productive</u> | <u>Dry</u> | <u>Total</u> | <u>Productive</u> | <u>Dry</u> | <u>Total</u> | |
| Year ended 30 June 2021 | | | | | | | |

| Other(2) | 4 | 2 | 6 | - | - | - | 6 |
| Total | 5 | 2 | 7 | 34 | - | 34 | 41 |

(1) Includes Onshore US assets net productive development wells of nil (2020: nil; 2019: 33). Includes Onshore US assets net exploratory wells of nil for 2021, 2020 and 2019.

(2) Other is primarily comprised of Algeria, Mexico and Trinidad and Tobago.

The number of wells drilled refers to the number of wells completed at any time during the respective year, regardless of when drilling was initiated. Completion refers to the installation of permanent equipment for production of oil or gas, or, in the case of a dry well, to reporting to the appropriate authority that the well has been abandoned.

Table of Contents

An exploratory well is a well drilled to find oil or gas in a new field or to find a new reservoir in a field previously found to be productive of oil or gas in another reservoir. A development well is a well drilled within the limits of a known oil or gas reservoir to the depth of a stratigraphic horizon known to be productive.

A productive well is an exploratory, development or extension well that is not a dry well. Productive wells include wells in which hydrocarbons were encountered and the drilling or completion of which, in the case of exploratory wells, has been suspended pending further drilling or evaluation. A dry well (hole) is an exploratory, development, or extension well that proves to be incapable of producing either oil or gas in sufficient quantities to justify completion as an oil or gas well.

The number of wells in the process of drilling and/or completion as of 30 June 2021 was as follows:

| | <u>Exploratory wells</u> | | <u>Development wells</u> | | <u>Total</u> | |
|---------------|--------------------------|---------------|--------------------------|---------------|--------------|---------------|
| | <u>Gross</u> | <u>Net(1)</u> | <u>Gross</u> | <u>Net(1)</u> | <u>Gross</u> | <u>Net(1)</u> |
| Australia | - | - | - | - | - | - |
| United States | - | - | 27 | 9 | 27 | 9 |
| Other(2) | - | - | 5 | 3 | 5 | 3 |
| Total | - | - | 32 | 12 | 32 | 12 |

(1) Represents BHP Petroleum's share of the gross well count.

(2) Other is comprised of T&T.

Oil and gas properties, wells, operations, and acreage

The following tables show the number of gross and net productive crude oil and natural gas wells and total gross and net developed and undeveloped oil and natural gas acreage as at 30 June 2021, 2020 and 2019. A gross well or acre is one in which a working interest is owned, while a net well or acre exists when the sum of fractional working interests owned in gross wells or acres equals one. Productive wells are producing wells and wells mechanically capable of production. Developed acreage is comprised of leased acres that are within an area by or assignable to a productive well. Undeveloped acreage is comprised of leased acres on which wells have not been drilled or completed to a point that would permit the production of economic quantities of oil and gas, regardless of whether such acres contain proved reserves.

The number of productive crude oil and natural gas wells in which BHP Petroleum held an interest at 30 June 2021 was as follows:

| | <u>Crude oil wells</u> | | <u>Natural gas wells</u> | | <u>Total</u> | |
|---------------|------------------------|------------|--------------------------|------------|--------------|------------|
| | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> |
| Australia | 334 | 166 | 176 | 66 | 510 | 232 |
| United States | 55 | 27 | - | - | 55 | 27 |
| Other(1) | 61 | 23 | 8 | 4 | 69 | 27 |
| Total | 450 | 216 | 184 | 70 | 634 | 286 |

(1) Other is primarily comprised of Algeria and Trinidad and Tobago.

Of the productive crude oil and natural gas wells, 131 (net: 60) operated wells had multiple completions.

[Table of Contents](#)

Developed and undeveloped acreage (including both leases and concessions) held at 30 June 2021 was as follows:

| <u>Thousands of acres</u> | <u>Developed acreage</u> | | <u>Undeveloped acreage</u> | |
|---------------------------|--------------------------|--------------|----------------------------|--------------|
| | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> |
| Australia | 2,423 | 897 | 391 | 148 |
| United States | 92 | 41 | 403 | 339 |
| Other(1)(2) | 160 | 67 | 3,394 | 3,104 |
| Total | 2,675 | 1,005 | 4,188 | 3,591 |

- (1) Developed acreage in Other primarily consists of Algeria and Trinidad and Tobago.
- (2) Undeveloped acreage in Other primarily consists of Barbados, Canada, Mexico and Trinidad and Tobago.

Approximately 139 thousand gross acres (22 thousand net acres), 386 thousand gross acres (241 thousand net acres) and 121 thousand gross acres (103 thousand net acres) of undeveloped acreage will expire in the years ending 30 June 2022, 2023 and 2024 respectively, if BHP Petroleum does not establish production or take any other action to extend the terms of the licences and concessions.

The number of productive crude oil and natural gas wells in which BHP Petroleum held an interest at 30 June 2020 was as follows:

| | <u>Crude oil wells</u> | | <u>Natural gas wells</u> | | <u>Total</u> | |
|---------------|------------------------|------------|--------------------------|------------|--------------|------------|
| | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> |
| Australia | 353 | 176 | 162 | 54 | 515 | 230 |
| United States | 61 | 24 | – | – | 61 | 24 |
| Other(1) | 59 | 22 | 8 | 4 | 67 | 26 |
| Total | 473 | 222 | 170 | 58 | 643 | 280 |

- (2) Other is primarily comprised of Algeria and Trinidad and Tobago.

Of the productive crude oil and natural gas wells, 133 (net: 62) operated wells had multiple completions.

Developed and undeveloped acreage (including both leases and concessions) held at 30 June 2020 was as follows:

| <u>Thousands of acres</u> | <u>Developed acreage</u> | | <u>Undeveloped acreage</u> | |
|---------------------------|--------------------------|------------|----------------------------|--------------|
| | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> |
| Australia | 2,152 | 823 | 766 | 279 |
| United States | 98 | 36 | 844 | 800 |
| Other(1)(2) | 146 | 57 | 3,926 | 3,445 |
| Total | 2,396 | 916 | 5,536 | 4,524 |

- (3) Developed acreage in Other primarily consists of Algeria and Trinidad and Tobago.
- (4) Undeveloped acreage in Other primarily consists of Barbados, Canada, Mexico and Trinidad and Tobago.

Approximately 833 thousand gross acres (411 thousand net acres), 1,089 thousand gross acres (655 thousand net acres) and 264 thousand gross acres (256 thousand net acres) of undeveloped acreage will expire in the years ending 30 June 2021, 2022 and 2023 respectively, if BHP Petroleum does not establish production or take any other action to extend the terms of the licences and concessions.

Table of Contents

The number of productive crude oil and natural gas wells in which BHP Petroleum held an interest at 30 June 2019 was as follows:

| | <u>Crude oil wells</u> | | <u>Natural gas wells</u> | | <u>Total</u> | |
|---------------|------------------------|------------|--------------------------|------------|--------------|------------|
| | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> |
| Australia | 352 | 176 | 153 | 53 | 505 | 229 |
| United States | 60 | 25 | – | – | 60 | 25 |
| Other(1) | 57 | 21 | 8 | 4 | 65 | 25 |
| Total | 469 | 222 | 161 | 57 | 630 | 279 |

(3) Other is primarily comprised of Algeria, Mexico and Trinidad and Tobago.

Of the productive crude oil and natural gas wells, 43 (net: 18) operated wells had multiple completions.

Developed and undeveloped acreage (including both leases and concessions) held at 30 June 2019 was as follows:

| <u>Thousands of acres</u> | <u>Developed acreage</u> | | <u>Undeveloped acreage</u> | |
|---------------------------|--------------------------|------------|----------------------------|--------------|
| | <u>Gross</u> | <u>Net</u> | <u>Gross</u> | <u>Net</u> |
| Australia | 2,152 | 823 | 963 | 393 |
| United States | 105 | 39 | 828 | 776 |
| Other(1)(2) | 146 | 57 | 3,526 | 2,869 |
| Total | 2,403 | 919 | 5,317 | 4,038 |

(5) Developed acreage in Other primarily consists of Algeria and Trinidad and Tobago.

(6) Undeveloped acreage in Other primarily consists of Canada, Mexico and Trinidad and Tobago.

Approximately 126 thousand gross acres (59 thousand net acres), 1,612 thousand gross acres (932 thousand net acres) and 1,257 thousand gross acres (889 thousand net acres) of undeveloped acreage will expire in the years ending 30 June 2020, 2021 and 2022 respectively, if BHP Petroleum does not establish production or take any other action to extend the terms of the licences and concessions.

Table of Contents

Review Report of Independent Auditors to the Shareholder and the Board of Directors of BHP Petroleum International Pty Ltd

We have reviewed the condensed combined financial information of BHP Petroleum Assets, which comprise the combined statement of financial position as of 31 December 2021, and the related combined statements of profit or loss and comprehensive income or loss, statement of cash flows and statement of changes in equity for the half year ended 31 December 2021.

Management' s Responsibility for the Financial Information

Management is responsible for the preparation and fair presentation of the condensed combined financial information in conformity with IAS 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB); this includes the design, implementation and maintenance of internal control sufficient to provide a reasonable basis for the preparation and fair presentation of interim financial information in conformity with IAS 34 *Interim Financial Reporting*.

Auditor' s Responsibility

Our responsibility is to conduct our review in accordance with auditing standards generally accepted in the United States of America applicable to reviews of interim financial information. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial information. Accordingly, we do not express such an opinion.

Conclusion

Based on our review, we are not aware of any material modifications that should be made to the condensed combined financial information referred to above for it to be in conformity with IAS 34 *Interim Financial Reporting* as issued by IASB.

Report on combined statement of financial position as of 30 June 2021

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the combined statement of financial position of BHP Petroleum Assets as of 30 June 2021, and the related combined statements of profit or loss and comprehensive income or loss, statement of cash flows and statement of changes in equity for the year then ended; and we expressed an unmodified audit opinion on those audited combined financial statements in our report dated 17 December 2021. In our opinion, the accompanying combined statement of financial position of BHP Petroleum Assets as of 30 June 2021, is consistent, in all material respects, with the combined statement of financial position from which it has been derived.

BHP Petroleum Assets

Combined statement of changes in equity for the half year ended 31 December 2021

| | Share capital (1) US\$M | Retained earnings US\$M | Foreign currency translation reserve US\$M | Total equity US\$M |
|---------------------------------------|-------------------------------|-------------------------------|--|--------------------------|
| Balance as at 1 July 2021 | 15,234 | (15,610) | 3,488 | 3,112 |
| Total comprehensive income/(loss) | – | 583 | 1 | 584 |
| Deemed contributions from BHP Group | – | 4,278 | – | 4,278 |
| Balance as at 31 December 2021 | 15,234 | (10,749) | 3,489 | 7,974 |
| Balance as at 1 July 2020 | 15,234 | (13,997) | 3,487 | 4,724 |
| Total comprehensive loss | – | (387) | – | (387) |
| Deemed distributions to BHP Group | – | (1,252) | – | (1,252) |
| Balance as at 31 December 2020 | 15,234 | (15,636) | 3,487 | 3,085 |

- (1) Number of shares outstanding of BHP Petroleum International Pty Ltd (Parent of BHP Petroleum) for the reporting periods ended 31 December 2021 and 2020 were 18,876,136,568.

The accompanying notes form part of these half year financial statements.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Combined Financial Statements

1. Organisation and summary of significant accounting policies

Organisation

BHP Petroleum Assets are a subset of certain entities wholly owned by BHP Group Limited. The subset of entities primarily represents BHP Group Limited's interests in its petroleum businesses, whose principal activities are the exploration, development and production of oil and gas. These petroleum businesses comprise of oil and gas assets located in the United States (US), Gulf of Mexico, Australia, Trinidad and Tobago, Algeria and Mexico and appraisal and exploration options in Trinidad and Tobago, central and western US Gulf of Mexico, eastern Canada, Egypt and Barbados. The purpose of these non-statutory half year combined financial statements is to provide general purpose historical financial information of the BHP Petroleum Assets for inclusion in listing documents to be issued by Woodside Petroleum Limited, which has entered into a share sale agreement to combine with BHP Petroleum Assets (Proposed Transaction).

These half year combined financial statements include financial information that is limited to the legal entities carved out (BHP Petroleum) from BHP Group Limited (BHP Group), in connection with the Proposed Transaction. BHP Petroleum consists of BHP Petroleum International Pty Ltd and the entities it controls, except for the following entities:

BHP BK Limited

BHP Billiton Petroleum Great Britain Limited

BHP Mineral Resources Inc.

BHP Copper Inc. and its subsidiaries

BHP Capital Inc.

BHP Petroleum International Pty Ltd, the Parent of BHP Petroleum, is a proprietary limited company domiciled in Western Australia, Australia. The registered office of BHP Petroleum International Pty Ltd is 125 St Georges Terrace, Perth WA 6000.

Ultimate group company

BHP Group Limited, a company incorporated in the state of Victoria, Australia, is the ultimate Parent company. Copies of the ultimate Parent company's financial statements are available from BHP Centre, 171 Collins Street, Melbourne Victoria 3000, Australia.

Basis of presentation

The combined financial statements for the half year ended 31 December 2021 are unaudited and have been prepared in accordance with IAS 34 'Interim Financial Reporting' as issued by the International Accounting Standards Board (IASB). The half year combined financial statements represent a 'condensed set of financial statements' and do not include all of the information required for a full annual report and are to be read in conjunction with the most recent audited fiscal year BHP Petroleum financial statements.

The same accounting policies and methods of computation are followed in the interim financial statements as compared with the most recent audited annual financial statements.

All amounts are expressed in US dollars unless otherwise stated. BHP Petroleum's presentation currency and the functional currency of the majority of its operations is US dollars as this is the principal currency of the economic environment in which it operates. Amounts in this half year financial report have, unless otherwise indicated, been rounded to the nearest million dollars.

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Combined Financial Statements

At 31 December 2021 BHP Petroleum had net amounts payable to BHP Group of US\$1,700 million. Under the terms of the Share Sale Agreement, between BHP Group and Woodside Petroleum Limited, intra-group funding arrangements are required to be repaid or otherwise eliminated. BHP Petroleum expects to settle intercompany balances with BHP Group either as a capital injection or loan forgiveness neither of which will involve an outflow of cash in order to satisfy the terms of the Share Sale Agreement. BHP Petroleum has made an assessment of its ability to continue as a going concern over the period to 4 March 2023 (the going concern period) and believes that it has sufficient financial resources to meet its obligations as they fall due throughout the going concern period. As such, the financial statements continue to be prepared on a going concern basis.

2. Revenue

The following table provides a summary of BHP Petroleum's revenue by geographic location:

| | Half year ended 31 Dec 2021 US\$M | Half year ended 31 Dec 2020 US\$M |
|----------------------|--|--|
| Australia | 761 | 501 |
| North America | 1,025 | 454 |
| United Kingdom | – | 15 |
| Rest of Europe | 113 | 79 |
| Japan | 270 | 167 |
| South Korea | 38 | 16 |
| China | 35 | 38 |
| Other Asia | 763 | 265 |
| Rest of World | 193 | 67 |
| Total revenue | 3,198 | 1,602 |

The following table provides a summary of BHP Petroleum's revenue by asset:

| | Half year ended 31 Dec 2021 US\$M | Half year ended 31 Dec 2020 US\$M |
|-------------------------------|--|--|
| Australia Production Unit (1) | 225 | 123 |
| Bass Strait | 775 | 478 |
| North West Shelf | 865 | 402 |
| Atlantis | 517 | 212 |
| Shenzi | 326 | 137 |
| Mad Dog | 157 | 88 |
| Trinidad and Tobago | 206 | 68 |
| Algeria | 108 | 75 |
| Third-party products | 6 | 3 |
| Other | 13 | 16 |
| Total revenue | 3,198 | 1,602 |

(1) Australia Production Unit includes Macedon and Pyrenees.

BHP Petroleum Assets

Notes to the Combined Financial Statements

The following table provides a summary of BHP Petroleum's revenue by product:

| | Half year ended 31 Dec 2021 US\$M | Half year ended 31 Dec 2020 US\$M |
|----------------------|--|--|
| Crude oil | 1,656 | 772 |
| Gas | 1,334 | 712 |
| Natural gas liquids | 183 | 93 |
| Other | 25 | 25 |
| Total revenue | 3,198 | 1,602 |

Revenue consists of revenue from contracts with customers of US\$3,187 million (31 December 2020: US\$1,583 million) and other revenue of US\$11 million (31 December 2020: US\$19 million).

3. Expenses and other income

| | Half year ended 31 Dec 2021 US\$M | Half year ended 31 Dec 2020 US\$M |
|---|--|--|
| Employee benefits expense: | | |
| Wages, salaries and redundancies | 147 | 183 |
| Employee share awards | 11 | 17 |
| Pension and other post-retirement obligations | 30 | 32 |
| Less employee benefits expense classified as exploration and evaluation expenditure | (31) | (48) |
| Changes in inventories of finished goods | 12 | (9) |
| Raw materials and consumables used | 57 | 45 |
| Freight and transportation | 62 | 40 |
| External services | 274 | 302 |
| Third-party commodity purchases | 7 | 3 |
| Net foreign exchange losses | (5) | 32 |
| Government royalties paid and payable | 119 | 44 |
| Exploration and evaluation and expenditure incurred and expensed in the period | 112 | 181 |
| Depreciation and amortisation expense | 1,047 | 890 |
| Fair value change on derivatives | 32 | 1 |
| Net impairments: | | |
| Property, plant and equipment (1) | 210 | 57 |
| Intangible assets | - | 4 |
| Other expenses (2) | (323) | 42 |
| Total expenses | 1,761 | 1,816 |
| Dividend income | 1 | 5 |
| Gain from sell-down of Scarborough interest (3) | 104 | - |
| Other income (4) | 67 | 15 |
| Total other income | 172 | 20 |

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Combined Financial Statements

- (1) At 31 December 2021, the overall recoverable amount of the Ruby operations in offshore Trinidad and Tobago was determined to be US\$107 million, resulting in an impairment charge of US\$210 million against property, plant and equipment. The valuation of Ruby is most sensitive to changes in reserves, with the impairment driven by revisions to estimated reserves resulting from technical analysis of well drilling results and performance following project completion in December 2021. Recoverable amount for the impairment assessment was determined based on Ruby's value in use.
- (2) Half year ended 31 December 2021 includes US\$355 million LNG underlift valuation movement.
- (3) Gain attributable to Final Investment Decision (FID) of the Scarborough project pursuant to the 2016 divestment of BHP Petroleum's 25 per cent Scarborough Joint Venture interest to Woodside.
- (4) Other income includes boat charter, tax barrel income, tariff revenue, income from licensing agreements and sublease income.

4. Income tax

| | Half year ended 31 Dec 2021 US\$M | Half year ended 31 Dec 2020 US\$M |
|--|--|--|
| Total taxation expense/(income) comprises: | | |
| Current tax expense | 822 | 228 |
| Deferred tax expense/(benefit) | 85 | (278) |
| | <u>907</u> | <u>(50)</u> |
| | | |
| | Half year ended 31 Dec 2021 US\$M | Half year ended 31 Dec 2020 US\$M |
| Factors affecting income tax expense/(income) for the half year | | |
| Income tax expense differs to the standard rate of corporation tax as follows: | | |
| Profit/(loss) before taxation | 1,490 | (437) |
| Tax expense/(benefit) at Australian prima facie tax rate of 30 per cent | 447 | (131) |
| Non-tax effected operating losses and capital gains | 188 | 156 |
| Tax effect of loss from equity accounted investments, related impairments and expenses | - | 1 |
| Amounts under provided in prior periods | 55 | 65 |
| Recognition of previously unrecognised tax assets | 1 | - |
| Foreign exchange adjustments | 33 | (87) |
| Impact of tax rates applicable outside of Australia | (3) | 5 |
| Other (1) | 149 | (43) |
| Income tax expense/(income) | <u>870</u> | <u>(34)</u> |
| Royalty-related taxation (net of income tax benefit) | <u>37</u> | <u>(16)</u> |
| Total taxation expense/(income) | <u>907</u> | <u>(50)</u> |

- (1) Includes US\$163 million tax expense related to the taxable gain on the disposal of Hamilton Oil Company Inc's interest in BHP Billiton Petroleum Great Britain Limited, refer to Note 12 'Related party transactions'

5. Trade and other receivables

| | 31 Dec 2021 | 30 June 2021 |
|---|--------------|--------------|
| | US\$M | US\$M |
| Trade receivables | 319 | 358 |
| Joint operations partner receivables (1) | 764 | 384 |
| Value-added tax (VAT) and other tax related receivables | 288 | 262 |
| Other receivables | 60 | 61 |
| Total trade and other receivables | 1,431 | 1,065 |
| Comprising: | | |
| Current | 1,230 | 908 |
| Non-current | 201 | 157 |

(1) Joint operations partner receivables include production underlift positions and receivables for joint operations cash float arrangements.

6. Trade and other payables

| | 31 Dec 2021 | 30 June 2021 |
|---------------------------------------|-------------|--------------|
| | US\$M | US\$M |
| Trade payables external | 638 | 641 |
| Other payables | 314 | 278 |
| Total trade and other payables | 952 | 919 |

7. Closure and rehabilitation provisions

A reconciliation of the changes in the closure and rehabilitation provisions is shown in the following table:

| | 31 Dec 2021 | 30 June 2021 |
|--|--------------|--------------|
| | US\$M | US\$M |
| At the beginning of the period | 3,957 | 3,595 |
| Capitalised amounts for operating sites: | | |
| Change in estimate | 13 | 131 |
| Exchange translation | (71) | 162 |
| Adjustments charged/(credited) to the income statement for closed sites: | | |
| Change in estimate | (1) | 17 |
| Exchange translation | (6) | 10 |
| Other adjustments to the provision: | | |
| Amortisation of discounting impacting net finance costs | 58 | 94 |
| Acquisition of subsidiaries and operations | - | 179 |
| Divestment and demerger of subsidiaries and operations | - | (81) |
| Expenditure on closure and rehabilitation activities | (43) | (152) |
| Exchange variations impacting foreign currency translation reserve | (3) | 2 |
| At the end of the period | 3,904 | 3,957 |
| Comprising: | | |
| Current | 144 | 141 |
| Non-current | 3,760 | 3,816 |
| Operating sites | 3,580 | 3,623 |
| Closed sites | 324 | 334 |

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Combined Financial Statements

BHP Petroleum is required to rehabilitate sites and associated facilities at the end of, or in some cases, during the course of production, to a condition acceptable to the relevant authorities, at the time rehabilitation occurs, and in accordance with BHP Group's environmental performance requirements as set out within the BHP Group Charter. The requirements of the relevant authorities vary by jurisdiction and are often non-prescriptive.

The key components of closure and rehabilitation activities are:

- the removal of certain infrastructure associated with an operation
- the return of disturbed areas to a safe, stable, productive and self-sustaining condition, consistent with agreed end use.

The recognition and measurement of closure and rehabilitation provisions requires the use of significant estimates and assumptions, including, but not limited to:

- the extent (due to legal or constructive obligations) of potential activities required for the removal of infrastructure and rehabilitation activities
- costs associated with future rehabilitation activities
- applicable discount rates
- the timing of cash flows and ultimate closure of operations.

Many rehabilitation activities are expected to occur a number of years in the future and the precise requirements that will have to be met when the rehabilitation occurs is currently uncertain. Decommissioning technologies and costs are constantly changing, as are political, environmental, safety and public expectations.

Management determines the best estimate of future closure and rehabilitation cash flows by weighting a range of possible scenarios, including only partial removal of offshore infrastructure where BHP Petroleum believes it will be able demonstrate to the relevant regulators, that such an approach will result in better environmental, safety and asset integrity outcomes.

While the closure and rehabilitation provisions reflect management's best estimates based on current knowledge and information, further studies and detailed analysis of the closure activities for individual assets will be performed as the assets near the end of their operational life and/or detailed closure plans are required to be submitted to, and agreed with, relevant regulatory authorities. Such studies and analysis can impact the estimated costs of closure activities. Estimates can also be impacted by the emergence of new restoration techniques, changes in regulatory requirements for rehabilitation, risks relating to climate change and the transition to a low carbon economy and experience at other operations. These uncertainties may result in future actual expenditure differing from the amounts currently provided for in the balance sheet.

8. Other provisions

The disclosure below excludes closure and rehabilitation provisions (refer to Note 7 'Closure and rehabilitation provisions'), employee benefits, restructuring and post-retirement employee benefits provisions (refer to Note 10 'Employee benefits, restructuring and post-retirement employee benefits provisions').

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Combined Financial Statements

A reconciliation of changes in other provisions for other liabilities is shown in the following table:

| | 31 Dec 2021 US\$M | 30 June 2021 US\$M |
|---------------------------------|----------------------|-----------------------|
| At the beginning of the period | 233 | 168 |
| Charge/(credit) for the year: | | |
| Disposals | – | (1) |
| Underlying | 9 | 122 |
| Discounting | – | 1 |
| Exchange variations | (3) | 6 |
| Released during the period | (14) | (7) |
| Utilisation | (10) | (57) |
| Transfers and other movements | (2) | 1 |
| At the end of the period | 213 | 233 |
| Comprising: | | |
| Current | 131 | 137 |
| Non-current | 82 | 96 |

9. Fair value measurement

All financial assets and financial liabilities are initially recognised at the fair value of consideration paid or received, net of transaction costs as appropriate and subsequently carried at fair value or amortised cost. The financial assets and liabilities are presented by class in the tables below at their carrying values, which generally approximate to fair values.

The carrying amount of financial assets and liabilities measured at fair value is principally calculated based on inputs other than quoted prices that are observable for these financial assets or liabilities, either directly (i.e. as unquoted prices) or indirectly (i.e. derived from prices). Where no price information is available from a quoted market source, alternative market mechanisms or recent comparable transactions, fair value is estimated based on BHP Petroleum's views on relevant future prices, net of valuation allowances to accommodate liquidity, modelling and other risks implicit in such estimates.

The valuation techniques used by BHP Petroleum to measure fair value include the use of internally developed methodologies and models that result in management's best estimate of fair value. Inputs used in the valuation include, but are not limited to, future commodity prices, market discount rates and consideration of risks specific to the asset or liability being fair valued.

If, at inception of a contract, the valuation cannot be supported by observable market data, any gain or loss determined by the valuation methodology is not recognised in the income statement but deferred on the balance sheet and is commonly known as 'day-one gain or loss'. This deferred gain or loss is recognised in the income statement over the life of the contract until substantially all the remaining contract term can be valued using observable market data at which point any remaining deferred gain or loss is recognised in the income statement. Changes in valuation subsequent to the initial valuation at inception of a contract are recognised immediately in the income statement.

For financial assets and liabilities carried at fair value, BHP Petroleum uses the following to categorise the method used based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Based on quoted process (unadjusted) in active markets for identical financial assets and liabilities

Level 2 - Based on inputs other than quoted prices included within Level 1 that are observable for the financial asset or liability

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Combined Financial Statements

Level 3 - Based on inputs not observable in the market using appropriate valuation models, including discounted cash flow modelling

For financial instruments that are carried at fair value on a recurring basis, BHP Petroleum determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation at the end of each reporting period. There were no transfers between categories during the period.

| | IFRS 13 Fair value hierarchy Level | IFRS 9 Classification | 31 Dec 2021 US\$M | 30 June 2021 US\$M |
|------------------------------------|---|--------------------------------------|------------------------------|-------------------------------|
| Cash and cash equivalents | | Amortised cost | 992 | 776 |
| Trade and other receivables | | Amortised cost | 1,431 | 1,065 |
| Receivables from BHP Group | | Amortised cost | 10,852 | 5,526 |
| Other financial assets (1) | 3 | Fair value through profit or loss | 37 | 51 |
| Total financial assets | | | 13,312 | 7,418 |
| Trade and other payables | | Amortised cost | 952 | 919 |
| Payables to BHP Group | | Amortised cost | 12,552 | 12,348 |
| Other financial liabilities | 3 | Fair value through profit or loss | 60 | 9 |
| Interest bearing liabilities | | Amortised cost | 257 | 269 |
| Total financial liabilities | | | 13,821 | 13,545 |

(1) Includes US\$ nil (30 June 2021: US\$46 million) contingent consideration receivable and US\$37 million (30 June 2021: US\$5 million) derivatives embedded in physical commodity purchase contract.

The carrying value of Other financial assets and Other financial liabilities includes an embedded derivative resulting from a physical commodity (gas) purchase and sale contract in Trinidad and Tobago. The carrying value of the embedded derivative at 31 December 2021 was a net liability of US\$23 million (30 June 2021: net liability of US\$4 million).

The following table presents the impact of activity for financial instruments classified as Level 3 in the fair value hierarchy:

| | 31 Dec 2021 US\$M | 30 June 2021 US\$M |
|--|------------------------------|-------------------------------|
| Fair value at the beginning of the period | 42 | 72 |
| Losses recognised in income statement | (10) | (10) |
| Settlements | (55) | (20) |
| Net fair value at the end of the period | (23) | 42 |

| Net interest expense | - | - | (2) | (2) |
| Exchange variations | (1) | - | - | (1) |
| Released during the year | (1) | - | (10) | (11) |
| Utilisation | (114) | (25) | 5 | (134) |
| As at 31 December 2021 | 78 | 7 | 259 | 344 |

- (1) The expenditure associated with total employee benefits will occur in a pattern consistent with when employees choose to exercise their entitlement to benefits.
- (2) Total restructuring provisions include provisions for terminations.

BHP Petroleum contributed US\$18 million during the half year ended 31 December 2021 (31 December 2020: US\$19 million) to defined contribution plans and multi-employer defined contribution plans.

11. Investments in associates

Ownership interest for BHP Petroleum's investments in associates, which are operated in the US, are listed in the table below:

| <u>Associates</u> | <u>Principal activity</u> | <u>Reporting date</u> | <u>Ownership interest % (1)</u> |
|-------------------------------------|-----------------------------|-----------------------|---------------------------------|
| Caesar Oil Pipeline Company LLC | Hydrocarbons transportation | 31 December | 25 |
| Cleopatra Gas Gathering Company LLC | Hydrocarbons transportation | 31 December | 22 |
| Marine Well Containment Company LLC | Oil spill services | 31 December | 10 |

- (1) Reflects BHP Petroleum's ownership interest as at 31 December 2021 and 31 December 2020.

BHP Petroleum Assets

Notes to the Combined Financial Statements

The following table summarises the financial information relating to each of BHP Petroleum's significant equity accounted investments:

| | Half year ended 31 Dec 2021 US\$' 000 | Half year ended 31 Dec 2020 US\$' 000 |
|---|--|--|
| Share of profit/(loss) of equity accounted investments: | | |
| Caesar Oil Pipeline Company LLC | 3,694 | 2,325 |
| Cleopatra Gas Gathering Company LLC | 1,511 | 559 |
| Marine Well Containment Company LLC | (6,523) | (7,412) |
| Share of loss of equity accounted investments | (1,318) | (4,528) |
| Dividends received | 6,909 | 4,993 |
| Contributions | (1,500) | (1,260) |

12. Related party transactions

Transactions with equity accounted investments

The following transactions took place during the half year with equity accounted investments:

| | Half year ended 31 Dec 2021 US\$M | Half year ended 31 Dec 2020 US\$M |
|-----------------------------|--|--|
| Purchases of goods/services | 10 | 7 |
| Dividends received | 7 | 5 |

Outstanding balances with related parties

| | Equity Accounted Investments | | BHP Group Entities | |
|---------------------------------------|---------------------------------|-----------------------|----------------------|-----------------------|
| | 31 Dec 2021 US\$M | 30 June 2021 US\$M | 31 Dec 2021 US\$M | 30 June 2021 US\$M |
| Amounts receivable from BHP Group | – | – | 10,852 | 5,526 |
| Trade amounts owed to related parties | 1 | 2 | – | – |
| Amounts payable to BHP Group | – | – | 12,552 | 12,348 |

BHP Petroleum has financing arrangements with BHP Group for short-term cash management. As at 31 December 2021 current amounts receivable from BHP Group related to these financing arrangements was US\$10,852 million (30 June 2021: US\$5,526 million). These amounts are included in Receivables from BHP Group on the balance sheet. During the half year ended 31 December 2021, BHP Petroleum entities Hamilton Oil Company Inc. and BHP Petroleum Investments (Great Britain) Pty Ltd sold their respective shareholdings in BHP Billiton Petroleum Great Britain Limited and BHP BK Limited for US\$4.3 billion to BHP Group companies outside the Proposed Transaction boundary. As the disposed entities are outside of the Proposed Transaction boundary and excluded from the BHP Petroleum Assets financial statements, the proceeds from the sale were recorded as an equity transaction between BHP Petroleum and BHP Group with no gain or loss recognised in earnings. As at 31 December 2021 the amounts receivable from BHP Group related to the divestment was US\$4.3 billion, included in Receivables from BHP Group on the balance sheet. For tax purposes,

[Table of Contents](#)

BHP Petroleum Assets

Notes to the Combined Financial Statements

the sale generated a taxable gain which did not result in current taxes payable as it was offset by a reduction of BHP Petroleum's net operating loss deferred tax asset. Tax expense of US\$163 million related to the taxable gain has been recognized in BHP Petroleum's financial statements.

BHP Petroleum also entered into long-term debt agreements with BHP Group to finance its projects. As at 31 December 2021 and 30 June 2021, the outstanding balance relating to these agreements was US\$10,347 million. This balance was recorded as a non-current liability in Payables to BHP Group at 30 June 2021 and was reclassified to a current liability in Payables to BHP Group as it became current at 31 December 2021. As at 31 December 2021 current amounts payable to BHP Group related to financing arrangements outside the long-term debt agreements were US\$2,205 million (30 June 2021: US\$2,001 million). These amounts are included in Payables to BHP Group on the balance sheet.

Interest expense related to the long-term debt, recorded in Finance expense in the income statement, for the half year ended 31 December 2021 was US\$101 million (31 December 2020: US\$148 million). The long-term debt agreements with BHP Group are entered at 3-month USD LIBOR plus margin. The margin ranges between 1.3 per cent and 1.8 per cent. The long-term debt agreements have a maturity date between November 2022 and December 2022.

There are no expected credit losses related to balances from related parties at 31 December 2021 and 30 June 2021.

BHP Petroleum has entered into various performance and corporate guarantees with certain BHP Group entities in the normal course of business. As at 31 December 2021, BHP Petroleum had outstanding guarantees as follows:

Guarantees provided by BHP Petroleum:

corporate guarantee given to financial institutions that manage future trades in order to hedge oil and gas production with maximum exposure of US\$1 million

Guarantees received by BHP Petroleum:

corporate guarantee received for regulatory requirements for drilling in the amount of US\$24 million

corporate guarantee received for exploration licenses in the amount of US\$249 million

corporate guarantee received for Outer Continental Shelf Right of Way Grant Bond in the amount of US\$3 million

corporate guarantee received for plugging and abandonment of wells in the amount of US\$12 million

The likelihood of these performance and corporate guarantees being called upon is considered remote.

13. Subsequent events

No matters or circumstances have arisen since the end of the half year, 31 December 2021, that have significantly affected, or may significantly affect, the operations, results of operations or state of affairs of BHP Petroleum in subsequent accounting periods.

SPECIFIC TERMS IN THIS EXHIBIT HAVE BEEN REDACTED. THESE REDACTED TERMS HAVE BEEN MARKED IN THIS EXHIBIT WITH THREE ASTERISKS [*].**

Seller

BHP Group Limited

(ACN 004 028 077) of Level 18, 171 Collins Street, Melbourne, Victoria, 3000

Woodside

Woodside Petroleum Ltd

(ACN 004 898 962) of 'Mia Yellagonga', 11 Mount Street, Perth, Western Australia, 6000

Recitals

- 1 The Seller owns the Sale Shares.
- 2 The Seller has agreed to sell and Woodside has agreed to buy the Sale Shares on the terms and conditions of this agreement.
- 3 The parties have agreed to implement the Transaction on the terms and conditions of this agreement.

The parties agree as follows:

1 Definitions and interpretation

1.1 Definitions

The meanings of the terms used in this agreement are set out below.

| <u>Term</u> | <u>Meaning</u> |
|---------------------------------------|---|
| ACCC | the Australian Competition and Consumer Commission. |
| Accounting Standards | International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board. |
| Acquired Shares | Seller Shares that participants may purchase (up to a maximum value) under Shareplus. |
| Additional Share Consideration | the aggregate of all Woodside Dividend Shares in relation to all Woodside Dividends (if any). |
| Adjustment Amount | the amount (if any) by which the Amended Locked Box Payment differs from the estimate of the Locked Box Payment provided by the Seller in the Completion Notice, expressed as a positive number. |
| ADS Deposit Agreement | amended and restated deposit agreement dated 11 February 2015 between Woodside and Citibank N.A as depositary (as such agreement has been amended from time to time), or in the event that Woodside engages another party to act as ADS Depositary Bank, such other deposit agreement between Woodside and the ADS Depositary Bank. |

A-1

| Term | Meaning |
|--|---|
| ADS Depository Bank | Citibank, N.A., as depository under the amended and restated deposit agreement dated 11 February 2015 between Woodside and Citibank N.A (as such agreement has been amended from time to time), or such other depository as Woodside may engage in connection with the Transaction provided that any other depository shall be a reputable national bank in the United States. |
| Aggregate Balancing Shares | the aggregate of all Balancing Shares in relation to each Permitted Equity Raise prior to Completion. |
| Amended Locked Box Payment | an amount equal to the final Locked Box Payment determined pursuant to Part 2 of Schedule 6. |
| Anticipated Completion Date | the estimated date for Completion, as agreed by the Parties (acting reasonably and in good faith, and taking into account the status of Conditions and the Timetable) from time to time. |
| Anticipated Project Expenditure and Timing | <p>in respect of the:</p> <ol style="list-style-type: none">1 Woodside Group, the document with Doc ID reference 09.01.03.03 in the Woodside Data Room (Document 09.01.03.03: Anticipated Project Expenditure November 2021); and / or2 Target Group, the document with Doc ID reference 17.1.1.9 in the Target Data Room (Document 17.1.1.9: Aurora Business Plan Update (SSA_Final)), <p>as appropriate.</p> |
| Anticipated Shareholder Approval Date | the estimated date for the Woodside Shareholder vote on the Transaction, as set out in the Timetable (as amended from time to time). |
| Anti-competitive Behavior | any conduct (including entering into, or giving effect to, a contract, arrangement or understanding or any other form of coordination or cooperation), whether past, present or potential, that is unlawful or otherwise restricted or prohibited under any applicable competition law. |
| Applicable Anti-Bribery and Corruption Laws | the <i>Criminal Code Act 1995</i> (Cth), the <i>Anti-Money Laundering and Counter-Terrorism Financing Act 2006</i> (Cth), the <i>UK Bribery Act 2010</i> , the <i>U.S. Foreign Corrupt Practices Act of 1977</i> , the OECD Convention on Combating Bribery of Foreign Public Officials in International Business Transactions (which entered into force on 15 February 1999) and the Convention's commentaries, and other such Conventions including the United Nations against Corruption (which entered into force on 14 December 2005), or any other applicable legislation or regulation relating to anti-bribery or anti-corruption (governmental or commercial). |
| Applicable Securities Regulations | the Corporations Act, the ASX Listing Rules, US Securities Act, US Exchange Act, NYSE Listing Standards the UK Prospectus Regulation, the Prospectus Regulation Rules, Market Abuse Regulation, the UK Listing Rules or any other regulations or legislation governing the issue, offer, registration or admission to trading of Woodside Shares (including through, or in the form of, depository interests or depository receipts) in a relevant jurisdiction. |

| Term | Meaning |
|---------------------------------------|---|
| Applicable Trade Controls Laws | any sanctions, export control, or import laws, or other regulations, orders, directives, designations, licenses, or decisions relating to the trade of goods, technology, software and services which are imposed, administered or enforced from time to time by Australia, the United States, the United Kingdom, the EU, EU Member States, Switzerland, the United Nations or United Nations Security Council and also includes U.S. anti-boycott laws and regulations. |
| ASIC | the Australian Securities and Investments Commission. |
| Assets | <ol style="list-style-type: none">1 the Projects described in Attachment 3 of the Seller Disclosure Letter;2 the interests of the Target Group in Petroleum Titles and Joint Operating Agreements described in Attachment 3 of the Seller Disclosure Letter and the corresponding rights, title and interest arising from such Petroleum Titles and JV Contracts;3 the Minority Interests;4 all direct and indirect interests in plant and equipment comprising processing facilities, pipelines or other petroleum-related infrastructure forming part of the Projects described in Attachment 3 of the Seller Disclosure Letter; and5 any pipelines, plant, machinery, wells, facilities and any other offshore and onshore installations and structures forming part of the Projects described in Attachment 3 of the Seller Disclosure Letter, <p>provided that items 4 and 5 above will only apply to assets described therein if the asset has a value of not less than US\$50 million.</p> |
| Associate | has the meaning set out in section 12 of the Corporations Act, as if subsection 12(1) of the Corporations Act included a reference to this agreement. |
| ASX | ASX Limited (ABN 98 008 624 691) and, where the context requires, the financial market that it operates. |
| ASX Listing Rules | the official listing rules of ASX. |
| Authorisation | any approval, licence, consent, authority or permit. |
| Balance Sheet Negative Impact | the aggregate amount (if any) by which the operating cash flows attributable to the Target Group received between the Effective Time and Completion included in the calculation of the Locked Box Payment is lower solely as a result of using the Locked Box Accounts as opposed to the Unaudited Balance Sheet (for avoidance of doubt any differences in the tax accounts in the Locked Box Accounts and Unaudited Balance Sheet will be excluded for the purposes of this calculation). For the purposes of this definition all negative impacts in accordance with the definition are to be aggregated, without aggregating any positive impacts (the latter being aggregated in the Balance Sheet Positive Impact). |
| Balance Sheet Positive Impact | the aggregate amount (if any) by which the operating cash flows attributable to the Target Group received between the Effective Time and Completion otherwise included in the calculation of the Locked Box Payment is greater solely as a result of using the Locked Box Accounts as opposed to the Unaudited Balance Sheet (for avoidance of doubt any |

| <u>Term</u> | <u>Meaning</u> |
|--------------------------------------|--|
| | differences in the tax accounts in the Locked Box Accounts and Unaudited Balance Sheet will be excluded for the purposes of this calculation). For the purposes of this definition all positive impacts in accordance with the definition are to be aggregated, without aggregating any negative impacts (the latter being aggregated in the Balance Sheet Negative Impact). |
| Balancing Shares | <p>in relation to a Permitted Equity Raise undertaken by Woodside after 17 August 2021 and prior to Completion:</p> $A = \frac{B \times (C - D)}{D}$ <p>where:</p> <p>A is the Balancing Shares for that Permitted Equity Raise.</p> <p>B is the Equity Ratio (immediately prior to the Permitted Equity Raise) multiplied by the Outstanding Woodside Shares (immediately prior to the Permitted Equity Raise).</p> <p>C is the closing price of the Woodside Shares on ASX on the trading day immediately prior to the announcement of the Permitted Equity Raise.</p> <p>D is the Theoretical Discounted Price for that Permitted Equity Raise.</p> |
| BHP | <p>if:</p> <ol style="list-style-type: none">1 Unification has not occurred, each of the Seller and BHP Group Plc; or2 Unification has occurred, the Seller. |
| BHP Board | <p>the board of directors of the Seller and, for as long as Unification has not been implemented, of BHP Group Plc and a ‘BHP Board Member’ means any director of the Seller or, for as long as Unification has not occurred, of BHP Group Plc, comprising part of the BHP Board.</p> |
| BHP Captive | <p>means a Seller Group Member licensed to operate as an insurer and/or reinsurer and as at the Effective Time includes BHP Marine & General Insurances Pty Ltd and Stein Insurance Company Ltd.</p> |
| BHP Component | <p>has the meaning given in clause 15.5(b)(1).</p> |
| BHP Distribution Announcement | <p>the announcement to be made by BHP on ASX (and for the purposes of satisfying any other Applicable Securities Regulations) on or about the date that the Woodside EM and NoM is announced on ASX, describing (among other things) the impact of the Transaction on BHP and BHP Shareholders.</p> |
| BHP Group Insurance Policies | <p>means:</p> <ol style="list-style-type: none">1 any current or expired Insurance Contracts that have been taken out in the name of an Other Seller Entity or which name an Other Seller Entity as the policyholder;2 any Captive Insurance Policies; and3 any direct or reinsurance contract (including fronting insurance and reinsurance) which is reinsured by a BHP Captive (as reinsurer), <p>that insure a Target Group Member or the Target Petroleum Business including against loss, destruction, damage, liability, cost or expense.</p> |

| <u>Term</u> | <u>Meaning</u> |
|---------------------------------------|--|
| BHP Information | information regarding the Target Group provided by (or on behalf of, provided it is clearly expressed to have been authorised by the Seller and provided as BHP Information) the Seller to Woodside in writing for inclusion in the Woodside Disclosure Documents, being: <ol style="list-style-type: none">1 information about the Target Group and the businesses of the Target Group (including, for the avoidance of doubt, any such information provided by (or on behalf of) the Seller to Woodside for inclusion in, and to the extent that such information relates solely to the Seller or the Target Group and is expressed in, the Combined Group section of the Woodside Disclosure Documents); and2 any other information required under Applicable Securities Regulations to enable the relevant Woodside Disclosure Documents to be prepared that the Parties agree (acting reasonably) is BHP Information and is identified in the relevant Woodside Disclosure Document as such. |
| BHP Register | the register of members of BHP maintained in accordance with section 169 of the Corporations Act and, if Unification has not been implemented, in accordance with section 113 of the Companies Act 2006 (UK). |
| BHP Shareholder | a person who is identified on the BHP Register. |
| BHP Shares | a fully paid ordinary share in the capital of the Seller, and if Unification has not occurred BHP Group Plc, including shares held by the custodian in respect of which Limited ADSs or Plc ADSs (if applicable) have been issued. |
| Business Day | a day that is not a Saturday, Sunday or a public holiday or bank holiday in Melbourne, Australia, Perth, Australia, London, United Kingdom or New York, United States of America. |
| Business Intellectual Property | has the meaning given in warranty 6 of Schedule 2. |
| Business Records | all original and certified copies of the books, records, documents, information, accounts and data (whether machine readable or in printed form) owned by, or the property of, a Target Group Member or which specifically relate to either the corporate management, governance or operation of a Target Group Member or to the Target Petroleum Business, but excluding any Excluded Records. |
| Capital Expenditure | expenditure incurred after the Effective Time in respect of property, plant and equipment, development of oil and gas properties and capitalised exploration in accordance with current Target Group accounting policies but excluding any capitalised interest. |
| Captive Insurance Policies | means an Insurance Contract or Reinsurance Contract which is issued or underwritten by a BHP Captive (as insurer, coinsurer or reinsurer). |
| CFIUS | the Committee on Foreign Investment in the United States. |

| Term | Meaning |
|---|---|
| Claim | any claim, demand, legal proceedings or cause of action, including any claim, demand, legal proceedings or cause of action under common law, in equity or under statute in any way relating to this agreement or the Transaction and includes a claim, demand, legal proceedings or cause of action arising from a breach of Warranty, or under an indemnity in this agreement, including the US NOL Indemnity, or under any Transaction Agreement. |

|---------------------------------------|--|
| | economic, political or business conditions, commodity prices, including material adverse changes or major disruptions to, or fluctuations in, domestic or international financial markets); |
| | 10 arise from any act of terrorism, outbreak or escalation of war (whether or not declared), major hostilities, civil unrest or outbreak or escalation of any disease epidemic or pandemic (including the outbreak, escalation or any impact of, or recovery from, the Coronavirus or COVID-19 pandemic); or |
| | 11 are Fairly Disclosed by Woodside in an announcement made by Woodside to ASX, or in a publicly available document lodged by it with ASIC, in the 12 month period prior to the date of this agreement. |
| Woodside Nominee | has the meaning given in clause 1.1(b) of Schedule 6. |
| Woodside Petroleum Titles | each petroleum title listed in Attachment 1 of the Woodside Disclosure Letter. |
| Woodside Prescribed Occurrence | other than as: <ol style="list-style-type: none">1 required or permitted by this agreement, other Transaction Agreements, or the transactions contemplated by either;2 agreed to in writing by the Seller; or3 arising out of or relating to a transaction contemplated in the Anticipated Project Expenditure and Timing, the occurrence of any of the following: <ol style="list-style-type: none">4 Woodside converting all or any of its shares into a larger or smaller number of shares;5 Woodside resolving to reduce its share capital in any way;6 Woodside:<ul style="list-style-type: none">entering into a buy-back agreement; orresolving to approve the terms of a buy-back agreement under the Corporations Act;7 a Woodside Group Member issuing shares, or granting an option over its shares, or agreeing to make such an issue or grant such an option, other than:<ul style="list-style-type: none">to Woodside or a directly or indirectly wholly-owned Subsidiary of Woodside;the issue of shares on the vesting of any rights or entitlements to shares on issue under Woodside' s executive incentive plan;the grant of new rights or entitlements to shares to employees in the ordinary course and consistent with past practice under Woodside' s current incentive arrangements and the issue of shares upon the vesting of those rights;the issue of shares under the Woodside DRP; or |

| <u>Term</u> | <u>Meaning</u> |
|--------------------------------------|--|
| | the issue of shares under a Permitted Equity Raise; |
| 8 | a Woodside Group Member issuing or agreeing to issue securities or other instruments convertible into shares other than: to Woodside or a directly or indirectly wholly-owned Subsidiary of Woodside; the grant of new rights or entitlements to shares to employees in the ordinary course and consistent with past practice under Woodside's current incentive arrangements; or the issue of shares under a Permitted Equity Raise; |
| 9 | a Woodside Group Member disposing, or agreeing to dispose, of the whole, or a material part, of the Woodside Group's business or property, except any transaction the Woodside Group is permitted to conduct under clause 5.5 (applied for these purposes as if clause 5.5(b) is deemed not to apply); |
| 10 | a Woodside Group Member granting a security interest, or agreeing to grant a security interest, (including granting or agreeing to grant any guarantee) in the whole or a material part of the Woodside Group's business or property, except any transaction the Woodside Group is permitted to conduct under clause 5.5 (applied for these purposes as if clause 5.5(b) is deemed not to apply) and other than in the usual and ordinary course of business (including in connection with the financing of any project development, the refinancing of any existing Woodside finance facility or liquidity management); |
| 11 | an Insolvency Event occurs in relation to a Woodside Group Member; |
| 12 | Woodside reclassifying, combining, splitting or redeeming or repurchasing directly or indirectly any of its shares, other than an on-market purchase of shares for the purposes of satisfying entitlements under a Woodside employee incentive plan; or |
| 13 | Woodside making any change to its constitution. |
| Woodside Projects | the projects described in Attachment 1 of the Woodside Disclosure Letter. |
| Woodside Register | the register of members of Woodside maintained in accordance with section 169 of the Corporations Act. |
| Woodside's Consolidated Group | the Consolidated Group of which Woodside is a member. |
| Woodside's HR Lead | Vice President People & Global Capability and General Manager, Global Remuneration and Benefits (or their delegates to the extent required under the Protocol). |
| Woodside Share | a fully paid ordinary share in the capital of Woodside. |
| Woodside Shareholder | a person who is identified on the register of members maintained by, or on behalf of, Woodside. |

| Term | Meaning |
|---|---|
| Woodside Shareholder Approval | the approval described in clause 2.1(d). |
| Woodside Shareholders Meeting | a meeting of the Woodside Shareholders for the purposes of seeking the Woodside Shareholder Approval. |
| Woodside Specified Executives | Meg O' Neil, Sherry Duhe, Rebecca McNicol, Shaun Gregory and Michael Robinson. |
| Woodside Superior Proposal | <p>a bona fide Woodside Competing Proposal (and not resulting from a breach by Woodside or Woodside of any of its obligations under clause 20.7 (it being understood that any actions by the Related Persons of Woodside in breach of clause 20.7 shall be deemed to be a breach by Woodside for the purposes hereof)) which the Woodside Board, acting in good faith, and after receiving written legal advice from its legal advisor and written advice from its financial advisor, determines:</p> <ol style="list-style-type: none">1 is reasonably capable of being valued and completed in a reasonable timeframe and substantially in accordance with its terms; and2 would, if completed substantially in accordance with its terms, be reasonably likely to be more favourable to Woodside Shareholders (as a whole) than the Transaction, <p>in each case taking into account all terms and conditions and other aspects of the Woodside Competing Proposal (including any timing considerations, any conditions precedent, the identity, expertise, reputation and technical and financial capacity of the proponent or other matters affecting the probability of the Woodside Competing Proposal being completed) and of the Transaction.</p> |
| Woodside Title and Capacity Warranties | Woodside Warranty 1 of Schedule 3. |
| Woodside Warranties | the representations and warranties in Schedule 3. |

1.2 Interpretation

In this agreement:

- (a) Headings and bold type are for convenience only and do not affect the interpretation of this agreement.
- (b) The singular includes the plural and the plural includes the singular.
- (c) Words of any gender include all genders.
- (d) Other parts of speech and grammatical forms of a word or phrase defined in this agreement have a corresponding meaning

- (e) An expression importing a person includes any company, partnership, joint venture, association, corporation, limited liability company or other body corporate and any Governmental Agency as well as an individual.
- (f) A reference to a clause, party, schedule, attachment or exhibit is a reference to a clause of, and a party, schedule, attachment or exhibit to, this agreement.
- (g) A reference to any legislation includes all delegated legislation made under it and amendments, consolidations, replacements or re-enactments of any of them.
- (h) A reference to a document includes all amendments or supplements to, or replacements or novations of, that document.
- (i) A reference to a party to a document includes that party's successors and permitted assignees.
- (j) A promise on the part of 2 or more persons binds them jointly and severally.
- (k) A reference to an agreement other than this agreement includes a deed and any legally enforceable undertaking, agreement, arrangement or understanding, whether or not in writing.
- (l) No provision of this agreement will be construed adversely to a party because that party was responsible for the preparation of this agreement or that provision.
- (m) A reference to a body, other than a party to this agreement (including an institute, association or authority), whether statutory or not:
 - (1) which ceases to exist; or
 - (2) whose powers or functions are transferred to another body,is a reference to the body which replaces it or which substantially succeeds to its powers or functions.
- (n) A reference to 'A\$' or 'Australian dollar' is to the lawful currency of Australia and a reference to 'US\$' or 'US dollar' is to the lawful currency of the United States of America.
- (o) A reference to any time, unless otherwise indicated, is to the time in Melbourne, Australia.
- (p) If a period of time is specified and dates from a given day or the day of an act or event, it is to be calculated exclusive of that day.
- (q) A reference to a day is to be interpreted as the period of time commencing at midnight and ending 24 hours later.
- (r) If an act prescribed under this agreement is to be done by a party on or by a given day is done after 5.00pm on that day, it is taken to be done on the next day.
- (s) A term defined in or for the purposes of the Corporations Act, and which is not defined in clause 1.1, has the same meaning when used in this agreement.
- (t) A reference to the Applicable Securities Regulations, or any listing rules, market rules or securities regulations included therein, includes any variation, consolidation or replacement of these rules or regulations and is to be taken to be subject to any waiver or exemption granted to the compliance of those rules or regulations by a party.

1.3 Business Day

Where the day on or by which any thing is to be done is not a Business Day, that thing must be done on or by the next Business Day.

1.4 Inclusive expressions

Specifying anything in this agreement after the words 'include' or 'for example' or similar expressions does not limit what else is included.

1.5 Agreement components

This agreement includes any schedule.

2 Conditions for Completion

2.1 Conditions

Clauses 3 and 7 do not become binding on the Parties and are of no force or effect unless and until each of the following Conditions has been satisfied or, where permitted, waived in accordance with clause 2.4:

- (a) **(FIRB Approval):** if the Seller determines (acting reasonably) that any of the following are likely to be required in connection with the Transaction, any one of the following occurring:
 - (1) the Seller has received a written notice under the *Foreign Acquisitions and Takeovers Act 1975* (Cth), by or on behalf of the Treasurer of the Commonwealth of Australia stating or to the effect that the Commonwealth Government does not object to the Transaction contemplated by this agreement, either unconditionally or subject to:
 - (A) the 'standard' tax-related conditions which are in the form, or substantially in the form, of those set out in Section D of FIRB's Guidance Note 12 on 'Tax Conditions' (in the form released on 9 July 2021); and/or
 - (B) such other conditions that are acceptable to the Seller (acting reasonably);
 - (2) the Treasurer of the Commonwealth of Australia becomes precluded from making an order in relation to the subject matter of this agreement and the Transaction contemplated by it under the *Foreign Acquisitions and Takeovers Act 1975* (Cth); or
 - (3) if an interim order is made under the *Foreign Acquisitions and Takeovers Act 1975* (Cth) in respect of the Transaction contemplated by this agreement, the subsequent period for making a final order prohibiting the Transaction contemplated by this agreement elapses without a final order being made.
- (b) **(ACCC Approval):** Woodside has received written advice from ACCC stating or to the effect that it has no objection to, or does not propose to take any action in respect of, the Transaction under section 50 of the *Competition and Consumer Act 2010* (Cth), either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).

- (c) **(NOPTA Approval):** Woodside has received written approval from NOPTA that is necessary under Chapter 5A of the OPGGSA to implement the Transaction, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (d) **(Woodside Shareholder Approval):** The Woodside Shareholders approve by ordinary resolution the Transaction for the purposes of ASX Listing Rule 7.1 and for all other purposes.
- (e) **(ASIC, ASX, SARB and JSE):** Each of ASIC, ASX, SARB and JSE (the latter two Governmental Agencies for the purposes of enabling the Distribution to occur, rather than to prevent BHP Shareholders who are residents of South Africa being Ineligible Foreign Shareholders) issue or provide all relief, waivers, confirmations, exemptions, consents or approvals, and do all other acts, necessary, or which Woodside and the Seller agree (each acting reasonably) are desirable, to implement the Transaction, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (f) **(US HSR Act Clearance):** The statutory waiting period (and any extension thereof) applicable to the consummation of the Transaction under the HSR Act and if applicable, any contractual waiting periods under any timing agreements with the US Department of Justice or the Federal Trade Commission applicable to the consummation of the Transaction shall have expired or been earlier terminated without the US Department of Justice or the Federal Trade Commission challenging the Transaction or requiring conditions that are not acceptable to Woodside or the Seller (each acting reasonably).
- (g) **(CFIUS Approval):** Any one of the following has occurred:
 - (1) the Parties have received a written notice issued by CFIUS stating that CFIUS has concluded that the Transaction is not a “covered transaction” and not subject to review under applicable law;
 - (2) the Parties have received a written notice issued by CFIUS that it has determined that there are no unresolved national security concerns with respect to the Transaction, and has concluded all action under the DPA; or
 - (3) either:
 - (A) the President of the United States shall have notified the Parties of his determination not to use his powers pursuant to the DPA to unwind, suspend, condition or prohibit the consummation of the Transaction; or
 - (B) the period allotted for presidential action under the DPA shall have passed without any determination by the President.
- (h) **(Official Quotation):** In response to a request from Woodside, ASX has not indicated to Woodside prior to the date on which all other Conditions have been satisfied or waived in accordance with clause 2.4 that it will not grant permission for the official quotation of the new Woodside Shares to be issued as Share Consideration.
- (i) **(Woodside Independent Expert' s Report):** The Woodside Independent Expert appointed by Woodside:
 - (1) issues a Woodside Independent Expert' s Report which concludes that the Transaction is in the best interests of the Woodside Shareholders; and

- (2) does not change its conclusion or withdraw its Woodside Independent Expert's Report before Woodside Shareholder Approval.
- (j) **(Restructure)**: The Seller completes the Restructure.
- (k) **(US Registration Statements)**: Each US Registration Statement has been declared effective by the SEC in accordance with the provisions of the US Securities Act and the US Exchange Act, as applicable. No stop order suspending the effectiveness of any US Registration Statement shall have been issued, and no proceedings for that purpose have commenced or, so far as Woodside is aware, been threatened by the SEC.
- (l) **(Trinidad and Tobago Approval)**: Woodside has received clearance by the Trinidad and Tobago Fair Trade Commission in respect of the Transaction, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (m) **(PRC Approval)**: Woodside has received clearance by the State Administration for Market Regulation of the People's Republic of China in respect of the Transaction, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (n) **(Japan Approval)**: Woodside and, if applicable, the Seller and/or BHP Group Plc, have received clearance by the Japan Fair Trade Commission in respect of the Transaction, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (o) **(Mexico Approval)**: Woodside has received clearance by the Federal Economic Competition Commission of Mexico in respect of the Transaction, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (p) **(Vietnam Approval)**: Woodside, the Seller and the Target have received approval from the Vietnam Ministry of Industry and Trade, the Vietnam Competition and Consumer Agency, or the Vietnam National Competition Commission, in respect of the Transaction, or have otherwise confirmed the Transaction will not be opposed in Vietnam, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (q) **(Barbados Approval)**: Woodside has received (i) confirmation from the Barbados Fair Trade Commission that the Transaction does not require notification to, and clearance by, it, or (ii) clearance by the Barbados Fair Trade Commission in respect of the Transaction, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside and the Seller (each acting reasonably).
- (r) **(No Injunction or Order)**: No court or other Governmental Agency of competent jurisdiction shall have enacted, issued, promulgated, enforced or entered any law or governmental order (whether temporary, preliminary or permanent) that is in effect and restrains, enjoins or otherwise prohibits consummation of the Transaction and all Regulatory Approvals shall be in full force and effect.

2.2 Notice

Each Party must advise the other by notice in writing, as soon as possible (and in any event within 2 Business Days) if it becomes aware:

- (a) that any Condition in clause 2.1 has been satisfied; or
- (b) of the happening of an event or occurrence that would, does, will, or would reasonably be likely to:
 - (1) prevent a Condition in clause 2.1 being satisfied; or
 - (2) mean that any Condition will not otherwise be satisfied, before the Cut Off Date; or
- (c) if the Condition has been satisfied, it is unlikely to remain satisfied in all respects up to and including Completion.

2.3 Satisfaction of Conditions

- (a) The Seller must use reasonable endeavours to ensure that the Condition relating to the Restructure described in clause 2.1(j) is satisfied as soon as practicable on or before the Cut Off Date.
- (b) Woodside must use reasonable endeavours to ensure that the following Conditions are satisfied as soon as practicable on or before the Cut Off Date:
 - (1) Woodside Shareholder Approval described in clause 2.1(d);
 - (2) Official Quotation described in clause 2.1(h); and
 - (3) Woodside Independent Expert's Report described in clause 2.1(i).
- (c) The Seller and Woodside must use reasonable endeavours to ensure that the Conditions comprising of the Regulatory Approvals are satisfied as soon as practicable on or before the Cut Off Date including by responding to each Governmental Agency in an appropriate and timely manner.
- (d) The Seller may determine (acting reasonably, after good faith consultation with Woodside) whether or not the FIRB Approval described in clause 2.1(a) is likely to be required in order for the Transaction contemplated by this agreement to be implemented, provided that the Seller must:
 - (1) consult with Woodside in good faith in respect of whether or not FIRB Approval described in clause 2.1(a) is likely to be required;
 - (2) promptly inform Woodside upon having made such a determination;
 - (3) have applied for the FIRB Approval and paid the relevant fee in respect of the application for FIRB Approval as soon as reasonably practicable and in any case by no later than 1 December 2021, unless the Seller (i) has determined (acting reasonably) prior to that date that the FIRB Approval described in clause 2.1(a) is not required in order for the Transaction contemplated by this agreement to be implemented and (ii) has waived the Condition in clause 2.1(a) (FIRB Approval);
 - (4) promptly respond to all requests for further information in respect of the application for FIRB Approval and not withdraw the application for FIRB Approval without Woodside's written consent unless the Seller has determined that the FIRB Approval is not required in order for the Transaction contemplated by this agreement to be implemented; and

- (5) if the Seller determines to pursue the FIRB Approval described in clause 2.1(a), use reasonable endeavours to ensure the FIRB Approval Condition is satisfied as soon as practicable on or before the Cut Off Date.
- (e) Without prejudice to clauses 2.3(a) to 2.3(d), each Party must:
- (1) keep the other Party informed in a timely manner of the status and progress towards satisfaction of the Conditions;
 - (2) provide all reasonable assistance to the other as is necessary to satisfy the Conditions;
 - (3) to the extent it is within its power to do so, use reasonable endeavours to procure that there is no occurrence within its control or the control of any of its Subsidiaries that would prevent any of the Conditions being satisfied or remaining satisfied up to and including Completion;
 - (4) exclusively pay and incur the filing or lodgement fees associated with the filings or lodgements it makes in connection with its endeavours to satisfy the Conditions, except that for the filings made in respect of the Condition in clause 2.1(g) (CFIUS Approval), Woodside will pay the fees; and
 - (5) otherwise bear its own costs in connection with providing reasonable assistance and otherwise discharging its obligations under this clause 2.3,
- and, for the avoidance of doubt, where a fee or cost is to be borne by the Seller under this clause 2.3(e) that fee or cost shall not be borne by the Target Group.
- (f) In respect of Regulatory Approvals, without limiting this clause 2.3 and except to the extent prohibited by a Governmental Agency:
- (1) the Parties agree that the ACCC Approval and NOPTA Approval as described in clauses 2.1(b) and 2.1(c), respectively, will be pursued jointly by the Parties (for which the Parties will develop a joint work plan as soon as practicable after, if not before, the date of this agreement), with the Parties developing the plan, preparing the submissions and dedicating the resources necessary to satisfy these Conditions in good faith (the Parties acknowledging that in respect of the NOPTA Approval, the requirement for approval under the OPGGSA is not expected to come into effect until March 2022, and the Parties will agree in good faith an engagement strategy with the intention to not cause a delay to the Timetable as a result of this timing);
 - (2) to the extent there is any disagreement between the Parties in respect of the content of any submissions proposed to be made to a Governmental Agency:
 - (A) both Woodside and the Seller must approve the submissions to ACCC, NOPTA, CFIUS, ASIC, SARB, ASX, JSE and the Governmental Agencies referenced in clauses 2.1(f), 2.1(l), 2.1(m), 2.1(n), 2.1(o), 2.1(p), 2.1(q);
 - (B) the Seller will have final determination for submissions to FIRB; and
 - (C) the Parties will act reasonably in each case;
 - (3) the Parties agree that each of Woodside and the Seller, as applicable, shall use its reasonable endeavours to obtain CFIUS Approval. Such reasonable endeavours shall include filing of a joint declaration in accordance with the DPA as soon as reasonably practicable, but in no event later than 10 business days after the date of this agreement. Further, if Woodside and the

Seller do not receive CFIUS Approval based on the joint declaration by 31 December 2021, either unconditionally or on conditions (including any undertakings) that are acceptable to Woodside (acting reasonably), Woodside and the Seller will (i) submit a draft joint voluntary notice to CFIUS no later than 15 January 2022, (ii) promptly after resolving any comments from CFIUS on the draft joint voluntary notice, submit a final joint voluntary notice to CFIUS, and (iii) provide any information requested by CFIUS or any other agency or branch of the U.S. government in connection with the CFIUS review or investigation of the transactions contemplated by this agreement within the timeframes set forth in the DPA; and

- (4) each Party must:
- (A) provide copies of their draft submissions reasonably in advance (and in any event no later than 3 Business Days prior to, the proposed lodgement with the relevant Governmental Agency) to the other Party, unless there is a shorter deadline for such submission in which case a draft submission shall be provided reasonably in advance of such shorter deadline, and consult in good faith in respect of the content;
 - (B) keep the other Party informed of progress in relation to each Regulatory Approval (including in relation to any material matters raised by, enquiries or requests for information from, or conditions or other arrangements proposed by, or to, any Governmental Agency in relation to a Regulatory Approval) and provide the other Party with all information reasonably requested in connection with preparing the applications for, or progress of, the Regulatory Approvals (including any evidence of financial or technical expertise following Completion as reasonably requested by a Third Party);
 - (C) without limiting clause 2.3(f)(4)(A), consult in good faith with the other Parties in advance in relation to the progress of obtaining and all material communications with Governmental Agencies regarding any of, the Regulatory Approvals; and
 - (D) if practicable, provide each other reasonable advance notice of meetings and telephone calls with a Governmental Agency in relation to a Regulatory Approval, and, to the extent reasonably practicable and permitted by the Governmental Agency, provide the other Party or its external counsel with the opportunity to participate in such meetings or telephone calls,

provided that:

- (E) the Party applying for a Regulatory Approval may withhold or redact information or documents from the other Parties (i) to the extent that they are reasonably determined to be either confidential to a Third Party or commercially sensitive, confidential or privileged to the applicant; and (ii) as necessary to comply with contractual arrangements or applicable laws, including competition laws, in which cases such Party shall provide unredacted versions of the relevant documents to the other Parties' outside counsel only, as applicable;
- (F) no Party is required to disclose to the other Parties information that it has determined (acting reasonably) is confidential and commercially sensitive information, in which case it shall provide unredacted versions of the relevant documents to the other Parties' outside counsel only, as applicable, if such information is included in, or forms the basis of, a submission to a Governmental Agency; and

- (G) the Party applying for a Regulatory Approval is not prevented from taking any step (including communicating with a Governmental Agency) in respect of a Regulatory Approval if the other Parties have not promptly responded under clause 2.3(f)(4)(A) or clause 2.3(f)(4)(C).
- (g) The Seller is permitted to engage with and make submissions to all Tax and Duty authorities in connection with the Transaction that affect either the Seller Group or the BHP Shareholders.
- (h) Woodside is permitted to engage with and make submissions to all Tax and Duty authorities in connection with the Transaction that affect either the Woodside Group (before or after Completion) or the Woodside Shareholders.

2.4 Waiver

- (a) Subject to clauses 2.3(d) and 2.4(b), the following Conditions cannot be waived:
 - (1) clause 2.1(a) (FIRB Approval), unless the Seller determines in accordance with clause 2.3(d) that the approval is not required to implement the Transaction (in which case the Seller can waive the Condition);
 - (2) clause 2.1(c) (NOPTA Approval), clause 2.1(e) (ASIC, ASX, SARB and JSE), clause 2.1(g) (CFIUS Approval), and clause 2.1(h) (Official Quotation); and
 - (3) clause 2.1(b) (ACCC Approval), clause 2.1(f) (US HSR Act Clearance), clause 2.1(l) (Trinidad and Tobago Approval), clause 2.1(m) (PRC Approval), clause 2.1(n) (Japan Approval), clause 2.1(o) (Mexico Approval); clause 2.1(p) (Vietnam Approval), clause 2.1(q) (Barbados Approval) and clause 2.1(r) (No Injunction or Order),
- (b) If the Parties agree in writing that a Condition referred to in clause 2.4(a)(3) is no longer required in order to implement the Transaction, the Parties together can waive that Condition.
- (c) The Condition in clause 2.1(i) (Woodside Independent Expert' s Report):
 - (1) is for the sole benefit of Woodside and may only be waived, in whole or in part, in writing by Woodside (in its absolute discretion); and
 - (2) must be waived if the Condition in clause 2.1(d) (Woodside Shareholder Approval) is waived.
- (d) The Conditions in clause 2.1(d) (Woodside Shareholder Approval), clause 2.1(j) (Restructure) and clause 2.1(k) (US Registration Statements) are for the benefit of both the Seller and Woodside and may only be waived, in whole or in part, by written agreement between the Seller and Woodside (in each case in their respective absolute discretion).
- (e) Waiver of a breach or non-satisfaction of one Condition does not constitute:
 - (1) a waiver of a breach or non-satisfaction of any other Condition resulting from the same event; or
 - (2) a waiver of a breach or non-satisfaction of that Condition resulting from any other event.

2.5 Cut Off Date

The Cut Off Date:

- (a) may be extended at any time by written agreement between the Seller and Woodside; and

- (b) will be automatically extended (as applicable):
 - (1) by the same number of days that the deadline for Completion is extended in the Timetable in accordance with clause 4.1(d); or
 - (2) if an extension of the Timetable pursuant to clause 4.1(e) or clause 7.2(c) has been effected, to a date that is 1 Business Day after the date for Completion under the Timetable as so extended (but, to avoid doubt, this clause will not operate to bring forward the Cut Off Date to a date that is earlier than 30 June 2022).

2.6 Termination on failure of Condition

- (a) On receipt of notice under clause 2.2(b) or clause 2.2(c), the Parties must promptly consult in good faith to:
 - (1) consider and, if agreed, determine whether the Transaction may proceed by way of alternative means or methods or in the case of a breach, whether the breach or the effects of the breach is or are able to be remedied; and
 - (2) consider and, if agreed, extend the Cut Off Date.
- (b) If the Parties are unable to reach agreement under clause 2.6(a) within 10 Business Days of the earlier of:
 - (1) a Party giving the other Parties written notice of the relevant event or occurrence under clause 2.2(b) or clause 2.2(c); and
 - (2) the Cut Off Date,or if any Condition (i) has not been satisfied by the Cut Off Date, or (ii) has been satisfied by the Cut Off Date, but does not remain satisfied in all respects up to Completion then, unless that Condition has been waived, in whole or in part, in accordance with clauses 2.4(a), 2.4(c) or 2.4(d) (as applicable), either the Seller or Woodside may terminate this agreement by written notice to the other Party. However, a Party may not terminate this agreement pursuant to this clause 2.6 if the relevant occurrence or event or the failure of the Condition to be satisfied arises out of a breach of clause 2.3 by that Party, although in such circumstances the other Party may still terminate this agreement.

2.7 No binding agreement for transfer

For the avoidance of doubt, nothing in this agreement will cause a binding agreement for the transfer of Sale Shares or issue of Share Consideration to arise unless and until all the Conditions in clause 2.1:

- (a) have been satisfied and remain satisfied in all respects up to and including Completion, including where a relief, waiver, confirmation, exemption, consent, approval or other act (as the case may be) has been given by a Governmental Agency, it must remain in full force and effect in all respects and have not been withdrawn, revoked, suspended, restricted or amended (or become subject to any notice, intimation or indication of intention to do any such thing); and/or
- (b) waived in accordance with clause 2.4,

and no person will obtain beneficial ownership, a beneficial interest or any other rights in relation to the Sale Shares as a result of this agreement unless and until all those Conditions have been satisfied or waived on the terms and conditions of this agreement.

3 Transaction steps

3.1 Sale Shares

On the day for Completion determined under clause 7.1, the Seller must sell, and Woodside must buy, the Sale Shares for the Purchase Price free and clear of all Encumbrances.

3.2 Associated rights

The Seller must sell the Sale Shares to Woodside together with all rights attached to them as at Completion. For the avoidance of doubt, this agreement does not entitle Woodside to any beneficial ownership, beneficial interest or beneficial right in the Sale Shares until and unless all of the Conditions have been satisfied or waived in accordance with clause 2.4.

3.3 Purchase Price

- (a) The consideration for the sale of the Sale Shares is the payment by Woodside of the Purchase Price.
- (b) The Purchase Price must be paid as follows:
 - (1) the issue of the Share Consideration by Woodside pursuant to clause 3.5 on Completion;
 - (2) the Woodside Dividend Payment, payable by Woodside to the Seller pursuant to clause 3.6(c)(1) on Completion;
 - (3) the Locked Box Payment, if any, payable by Woodside to the Seller or the Seller to Woodside (as required) pursuant to clause 3.6(c)(2) on Completion; and
 - (4) any other adjustments to the Purchase Price payable in accordance with this agreement.

3.4 Title and risk

Title to and risk, and beneficial ownership, in the Sale Shares passes to Woodside (or if applicable, the Woodside Nominee) on Completion.

3.5 Share Consideration

- (a) The Seller must issue to Woodside:
 - (1) an indicative written notice not less than 10 Business Days prior to the first lodgement or filing with a Governmental Agency; and
 - (2) a confirmatory written notice not less than 10 Business Days prior to publishing, the Woodside EM and NoM, stating that the Seller directs Woodside to issue the Share Consideration:
 - (3) to the Seller;
 - (4) to the Seller and BHP Group Plc, in proportions to each specified by the Seller in the notice; or
 - (5) directly to the BHP Shareholders.

- (b) In respect of the Share Consideration, Woodside must:
 - (1) no later than 5 Business Days prior to Completion, deliver a notice to the Seller setting out the number of Woodside Shares to be issued as Share Consideration;
 - (2) ensure that each new Woodside Share is unencumbered, fully paid up and ranks equally with existing Woodside Shares;
 - (3) procure that all new Woodside Shares are listed for quotation on the ASX; and
 - (4) procure the delivery of holding statements to each BHP Shareholder that has received new Woodside Shares promptly after completion of the Distribution.

3.6 Cash consideration

- (a) Woodside must deliver to the Seller no later than 5 Business Days before Completion a notice (which may form part of the notice delivered pursuant to clause 3.5(b)(1)) setting out the Woodside Dividend Payment, which must include all workings in the constituent amounts of the calculation of the Woodside Dividend Payment.
- (b) The Seller must deliver to Woodside no later than 7 Business Days before Completion a notice (**Completion Notice**) setting out the Seller's good faith estimate of the Locked Box Payment calculated in accordance with Schedule 6, which must include all workings in the constituent amounts of the calculation of the Locked Box Payment.
- (c) On Completion:
 - (1) Woodside must pay (or procure the payment of) the Woodside Dividend Payment to the Seller; and
 - (2) if the Locked Box Payment is:
 - (A) greater than zero, the Seller must pay the Locked Box Payment to Woodside;
 - (B) less than zero, Woodside must pay the Locked Box Payment to the Seller; or
 - (C) equal to zero, neither Party is liable to make a payment to the other in respect of this clause 3.6(c)(2).
- (d) Subject to clause 3.6(e) and clause 3.6(f), all payments payable pursuant to clause 3.6(c) must be paid in Immediately Available Funds (without counter-claim, set-off or deduction, unless expressly contemplated by this agreement) into an account nominated by the Party to whom it is payable (such account to be notified to the paying Party no later than 5 Business Days prior to Completion).
- (e) If the Seller owes the Locked Box Payment to Woodside pursuant to clause 3.6(c)(2)(A), Woodside and the Seller agree that the Woodside Dividend Payment and Locked Box Payment will be set-off against one another, such that the net amount (**Net Amount**) will be payable by:
 - (1) the Seller to Woodside, if the Locked Box Payment exceeds the Woodside Dividend Payment; or
 - (2) Woodside to the Seller, if the Woodside Dividend Payment exceeds the Locked Box Payment.
- (f) If the Seller owes the Net Amount to Woodside pursuant to clause 3.6(e):
 - (1) Woodside may request by written notice given no later than 5 Business Days before Completion that the Seller leave the Net Amount in one or more accounts in the name of a

Target Group Member immediately prior to Completion, rather than being effected as a payment from the Seller to Woodside; and

- (2) if the Seller determines that:
- (A) the Seller Group will not be adversely impacted by doing so, upon receiving a notice pursuant to clause 3.6(f)(1), the Seller may leave the Net Amount in one or more accounts in the name of a Target Group Member immediately prior to Completion (having informed Woodside by notice in writing delivered no later than 2 Business Day prior to Completion of its intention to do so); or
 - (B) the Seller Group will be adversely impacted by doing so, pay the Net Amount to Woodside in accordance with clause 3.6(d) (having informed Woodside by notice in writing delivered no later than 2 Business Day prior to Completion of its intention to do so).

For the avoidance of doubt, other than pursuant to this clause 3.6(f) the Seller may leave behind at Completion any amount as cash in bank accounts held beneficially by any Target Group Members, which will be included in the Locked Box Payment calculation pursuant to clause 1.2(g) of Part 1 of Schedule 6.

- (g) Woodside must not amend, and must procure that the Woodside Board does not exercise any right to suspend, vary or terminate pursuant to rule 12.1 of, the Woodside Dividend Reinvestment Rules dated August 2019 in a manner that would materially adversely impact the Seller.
- (h) The Seller must deliver to Woodside the Locked Box Accounts prior to the date on which Woodside first submits the Form F-4 Registration Statement to the SEC for review (18 December 2021 being acknowledged by the Parties as the expected date for submission).

3.7 Distribution

- (a) The Parties must ensure that Completion occurs on the same day as Distribution Implementation, and must not allow Completion to occur in circumstances where it is uncertain if Distribution Implementation will occur.
- (b) The Seller must, and, if the Distribution is to occur before Unification has occurred, must procure that BHP Group Plc, declare or determine a dividend, a reduction of capital (pursuant to Chapter 2J of the Corporations Act) or a combination of the two (as determined by the Seller) in order to facilitate the Distribution.
- (c) Where the written notice issued pursuant to clause 3.5(a)(2) requests:
 - (1) an Indirect Distribution, at Completion the Seller must procure that the new Woodside Shares issued as Share Consideration are distributed to the Participating BHP Shareholders and to the Sale Agent (as applicable) in satisfaction of the dividend and/or return of capital declared pursuant to clause 3.7(b); or
 - (2) a Direct Distribution, at Completion Woodside must issue the Share Consideration to the Participating BHP Shareholders and to the Sale Agent (as applicable) in satisfaction of the dividend and/or return of capital (if applicable) declared by the Seller in favour of the BHP Shareholders.

- (d) For as long as the Seller holds the Share Consideration, the Seller undertakes not to exercise any voting power in respect of any of those Woodside Shares, nor to dispose of those Woodside Shares, other than in accordance with clause 3.7(c)(1).
- (e) Woodside and the Seller must provide all reasonably necessary assistance to one another to enable the Distribution of the new Woodside Shares issued as Share Consideration to the Participating BHP Shareholders and to the Sale Agent (as applicable) on Completion including, in the case of the Seller, procuring the delivery to Woodside or Woodside's registry of the BHP Register as at the Distribution Record Date (including details of the Selling Shareholders) in sufficient time prior to Completion to allow Woodside to discharge its obligations under clause 3.7(c)(2).
- (f) On Distribution Implementation, each Participating BHP Shareholder will be entitled to their Distribution Entitlement, and Woodside must procure that each Participating BHP Shareholder's Distribution Entitlement and the issue or transfer (as the case may be) of Woodside Shares to the Sale Agent in accordance with the terms of this agreement is recorded in the Woodside Register as soon as practicable.
- (g) The Seller may determine (acting reasonably), and Woodside must take all actions to give effect to, the treatment of an entitlement by any BHP Shareholder to a fraction of a Woodside Share as part of that BHP Shareholder's Distribution Entitlement, including the Seller determining that each BHP Shareholder entitled to a fraction of a Woodside Share will have:
 - (1) the fraction of a Woodside Share to which they are entitled as part of their Distribution Entitlement issued to or transferred to (as the case may be) the Sale Agent to be sold on their behalf, with the BHP Shareholder to receive cash in respect of that fraction of a Woodside Share substantively in the same way as Selling Shareholders; or
 - (2) their Distribution Entitlement rounded down to the nearest whole number of Woodside Shares and the fraction of a Woodside Share to which they would otherwise have been are entitled to as part of their Distribution Entitlement issued to or transferred (as the case may be) to the Sale Agent to be sold and the sale proceeds transferred to the Seller or to any party that the Seller may direct,

and the Parties will consult one another prior to Completion to determine if it would be more beneficial to both Parties, and whether they can agree (in their respective sole discretions), an alternative treatment of entitlements of BHP Shareholders to a fraction of a Woodside Share, including for example a cash payment to be made by Woodside instead of issuing Woodside Shares in respect of such fractional entitlements.

- (h) At Distribution Implementation, Woodside shall have deposited, or shall have caused to be deposited with or provided to Citibank N.A. (in its capacity as the depositary under the Limited ADS Deposit Agreement) and, if Unification has not occurred prior to Distribution Implementation, to Citibank N.A. (in its capacity as the depositary under the PLC ADS Deposit Agreement, as applicable), or a nominee thereof, a number of Woodside ADSs to be issued as Share Consideration in respect of the Limited ADSs and, if Unification has not occurred at Distribution Implementation, Plc ADSs on issue as at the Distribution Implementation, and Woodside and BHP must provide all reasonably necessary assistance, and use reasonable endeavours, to effect the immediate distribution of the Woodside ADSs to the holders of Limited ADSs and, if Unification has not occurred at Distribution Implementation, Plc ADSs. The Parties must consult in good faith and use reasonable endeavours to determine the actions required to give effect to this clause.

- (i) In respect of Ineligible Foreign Shareholders, on Distribution Implementation:
 - (1) if the Distribution is an Indirect Distribution, BHP must transfer; and
 - (2) if the Distribution is a Direct Distribution, Woodside must issue, the Woodside Shares which would otherwise be required to be issued or transferred (as applicable) to the Ineligible Foreign Shareholders under the Distribution to the Sale Agent.
- (j) The Seller may offer Selling Shareholders a voluntary sale facility, whereby BHP Shareholders with less than a certain number of BHP Shares at the Distribution Record Date may elect for all but, subject to clause 3.7(g), not some of the Distribution Entitlement to be sold and the Sale Proceeds Amount to which that Selling Shareholder is entitled remitted to that Selling Shareholder. The Parties will investigate and discuss in good faith the possibility of the sale facility being compulsory (with an “opt out” mechanism) rather than voluntary.
- (k) In respect of the Woodside Shares issued or transferred to the Sale Agent pursuant to the arrangements described in clauses 3.7(i) and 3.7(j) (if applicable), BHP must:
 - (1) procure that as soon as reasonably practicable (and in any event not more than 15 Business Days after Distribution Implementation), the Sale Agent sells on market all the Woodside Shares issued or transferred (as applicable) to the Sale Agent;
 - (2) account to each Ineligible Foreign Shareholder or Selling Shareholder (as applicable) for the proceeds of the sale of all of the Woodside Shares (after deduction of any applicable brokerage, stamp duty and other costs, taxes and charges) (**Proceeds**); and
 - (3) as soon as reasonably practicable, remit to each Ineligible Foreign Shareholder or Selling Shareholder the Sale Proceeds Amount to which that Ineligible Foreign Shareholder or Selling Shareholder is entitled.

3.8 Locked Box Payment adjustment

- (a) Following Completion, the Seller must prepare and provide to Woodside the Locked Box Payment Statement in accordance with Part 2 of Schedule 6.
- (b) The Parties agree that Part 2 of Schedule 6 will apply in respect of finalising the Locked Box Payment Statement.
- (c) If the Amended Locked Box Payment:
 - (1) is greater than the Locked Box Payment, the Seller must pay the Adjustment Amount to Woodside, as an adjustment to the Purchase Price in favour of Woodside;
 - (2) is less than the Locked Box Payment, Woodside must pay the Adjustment Amount to the Seller, as an adjustment to the Purchase Price in favour of the Seller; or
 - (3) is equal to the Locked Box Payment, no adjustment to the Purchase Price will be made under this clause 3.8.
- (d) A Party required to make a payment to another Party under this clause 3.8 must make the payment in Immediately Available Funds without counter-claim, deduction or set-off within 10 Business Days after the finalisation of the Locked Box Payment Statement.

3.9 Detailed Matters Letter

Each Party agrees to comply with their obligations, and agrees to comply with the rights granted to the other Party, under the Detailed Matters Letter.

3.10 Payments relating to Scarborough

- (a) If a Target Group Member receives any payment from a Woodside Group Member on completion of the exercise of the Put Option by the relevant Target Group Member, then:
 - (1) any and all such payments will be held in a separate interest-bearing bank account held by an escrow agent for the benefit of a Target Group Member;
 - (2) no such payment nor any amount standing to the credit of the separate interest-bearing bank account (**Put Option Amounts**) will be the subject of any transaction under the Seller Group Intra-group Funding Arrangements;
 - (3) the Put Option Amounts will not be taken into account in determining the value of the Locked Box Payment or the Amended Locked Box Payment; and
 - (4) the Put Option Amounts will be available for release to the Target Group on the earlier of Completion and termination of this agreement.
- (b) If the Put Option is exercised and Completion occurs under this agreement any Tax liability arising as a result of the exercise of the Put Option and completion of the sale under the Put Option will be to the account and expense of the Seller.

3.11 Woodside Nominee

If Woodside issues a direction pursuant to clause 1.1(b) of Schedule 5:

- (a) Woodside will remain liable for all obligations;
 - (b) Woodside must procure the Woodside Nominee complies with and undertakes to give effect to all obligations of Woodside; and
 - (c) the Seller retains all rights against Woodside,
- agreed to pursuant to this agreement irrespective of the transfer of (or direction to transfer) the Sale Shares to the Woodside Nominee.

4 Implementation

4.1 Timetable

- (a) Subject to clause 4.1(b), the Parties must each use reasonable endeavours to:
 - (1) comply with their respective obligations under this clause 4; and
 - (2) take all necessary steps and exercise all rights necessary to implement the Transaction,in accordance with the Timetable.
- (b) Failure by a Party to meet any timeframe or deadline set out in the Timetable will not constitute a breach of clause 4.1(a) to the extent that such failure is due to circumstances and matters outside the

Party's reasonable control or due to the Seller or Woodside taking or omitting to take any action in response to a Seller Competing Proposal or Woodside Competing Proposal (as applicable) as permitted or contemplated by this agreement.

- (c) Each Party must keep the other informed about their progress against the Timetable and notify each other if it believes that any of the dates in the Timetable are or may not be achievable.
- (d) To the extent that any of the timeframes or deadlines set out in the Timetable are reasonably likely to become delayed or not achievable, the Parties will promptly consult in good faith and may agree to any necessary extension to the Timetable to ensure the relevant steps are completed as soon as reasonably practicable.
- (e) The Seller may require that the date for Completion in the Timetable be delayed by one or more reasonable periods that must not in aggregate result in a delay to Completion that is in excess of [***], provided that:
 - (1) the Seller must use reasonable endeavours to keep this delay as short as practicable; and
 - (2) in any event, the Seller must not use this clause 4.1(e) to delay a timeframe or deadline if the effect, or likely effect, is to cause Completion to occur later than [***].

4.2 London Stock Exchange and NYSE listings

- (a) Subject to clause 4.2(e) and to the Seller complying with its obligations in clause 4.4, Woodside must use reasonable endeavours to procure that prior to Completion each of the following has occurred:
 - (1) the UK Prospectus (including any supplementary prospectus) is approved by the FCA in accordance with the Prospectus Regulation Rules;
 - (2) the FCA has confirmed that the application for admission of the Woodside Shares to the standard segment of the UK Official List is approved and (after satisfaction of any conditions to which approval is expressed to be subject) will become effective as soon as a dealing notice has been issued by the FCA and any listing conditions have been satisfied;
 - (3) the London Stock Exchange has confirmed (and such confirmation is not withdrawn) that the Woodside Shares will be admitted to trading on the London Stock Exchange's Main Market for listed securities; and
 - (4) Woodside Shares represented by Woodside ADSs to be issued as Share Consideration have been approved for listing on the NYSE subject to official notice of issuance.
- (b) For the purposes of clause 4.2(a), Woodside acknowledges and agrees that "reasonable endeavours" require Woodside to do each of the following (without limiting the meaning of the phrase "reasonable endeavours"):
 - (1) incur all costs and dedicate all Woodside director, officer, employee and adviser time;
 - (2) commission third party experts (such as technical and accounting experts) to produce such information or reports as are required under Applicable Securities Regulations; and
 - (3) make all submissions, lodge all Regulator's Drafts and file all applicable forms on a timely basis having regard to the Timetable,

as would reasonably be expected for the satisfaction of the undertakings in clause 4.2(a).

- (c) Subject to clause 4.2(d), in respect of the undertakings in clause 4.2(a) and without prejudice to clause 4.3, Woodside must:
 - (1) keep the Seller reasonably informed of the status and progress towards satisfaction of the undertakings (including in relation to any material matters raised by, enquiries or requests for information from, or conditions or other arrangements proposed by, or to, any Governmental Agency in relation to such undertaking);
 - (2) if practicable, provide the Seller reasonable advance notice of meetings with a Governmental Agency in connection with satisfaction of each undertaking, and, to the extent reasonably practicable and permitted by the Governmental Agency, provide the Seller and/or its external advisers with the opportunity to participate in such meetings; and
 - (3) provide copies of all draft submissions (including responses to comments made by the FCA and revised Regulator's Drafts and any appendices) to the FCA reasonably in advance to the Seller.
- (d) Woodside may at any time prior to the Regulator's Draft of the Woodside EM and NoM being first submitted to the ASX for review and in its absolute discretion issue a written notice to the Seller notifying the Seller that Woodside will no longer pursue one or more outcomes in clause 4.2(a)(1) to 4.2(a)(3), provided Woodside:
 - (1) has first consulted with the Seller for a reasonable period of time in connection with ceasing to pursue the outcomes and has taken account of the Seller's views in relation to the same; and
 - (2) reasonably determines that pursuit of the listing is not in the interests of Woodside (as determined by Woodside in its discretion).
- (e) Upon Woodside issuing a notice pursuant to clause 4.2(d):
 - (1) Woodside will no longer be bound by the obligations in clauses 4.3(c), 4.3(g) (in respect of the UK Prospectus), 4.3(i) (in respect of the UK Prospectus) and 4.3(j) (as applicable); and
 - (2) if the relevant undertaking relates to the outcomes described in clauses 4.2(a)(1) to 4.2(a)(3), the Seller is not required to fulfil any obligation in clause 4.4 in respect of the BHP Information for the purposes of the UK Prospectus.

4.3 Woodside obligations

Woodside must take all necessary steps to implement the Transaction as soon as is reasonably practicable and, without limiting anything else in this clause 4, must do each of the following:

- (a) **(Woodside EM and NoM):** prepare and despatch the Woodside EM and NoM and convene the Woodside Shareholders Meeting;
- (b) **(US Registration Statements):** use reasonable endeavours to (i) prepare and submit non-publicly the Form F-4 Registration Statement with the SEC; (ii) respond promptly to comments on the Form F-4 Registration Statement from the SEC; (iii) after resolution of all comments on the Form F-4 Registration Statement, prepare and file the Form F-4 Registration Statement and the Form 8-A Registration Statement publicly with the SEC, (iv) have the Form F-4 Registration Statement and the Form 8-A Registration Statement declared effective under the US Securities Act and the US

- Exchange Act, as applicable as promptly as practicable after their filing (or in the case of the Form 8-A Registration Statement, no later than Completion); (v) cause the Form F-6 Registration Statement to be prepared and filed by the ADS Depository Bank with the SEC and declared effective under the US Securities Act, (vi) maintain, or cause to be maintained, the effectiveness of the US Registration Statements for as long as necessary to consummate the Transaction; and (vii) cause the US Registration Statements to comply as to form in all material respects with the applicable provisions of the US Securities Act and the US Exchange Act, as applicable;
- (c) **(UK Prospectus)**: subject to the Seller complying with its obligations in clause 4.4, use reasonable endeavours to (i) procure that the Woodside Board accept responsibility for the Prospectus in accordance with the Prospectus Regulation Rules; (ii) prepare and finalise the UK Prospectus in accordance with applicable laws and obtain approval for the UK Prospectus from the FCA; (iii) subject to the UK Prospectus being finalised and approved by the FCA in accordance with the Prospectus Regulation Rules, as soon as possible following such approval publish the UK Prospectus in accordance with the Prospectus Regulation Rules;
- (d) **(Woodside Board recommendation)**: the Woodside EM and NoM must include a statement by at least a majority of the Woodside Board:
- (1) recommending that Woodside Shareholders vote in favour of the Transaction, subject to the Woodside Independent Expert concluding and continuing to conclude that the Transaction is in the best interests of Woodside Shareholders; and
 - (2) that each Woodside Board Member providing the recommendation in clause 4.3(d)(1) will (subject to the same qualification as set out in clause 4.3(d)(1)) vote, or procure the voting of, all Woodside Shares held by them or on their behalf at the time of the meeting in favour of the Transaction, unless there has been a change of recommendation permitted by clause 4.6(b);
- (e) **(Woodside Independent Expert' s Report)**: promptly appoint the Woodside Independent Expert and provide any assistance or information reasonably requested by the Woodside Independent Expert in connection with the preparation of the Woodside Independent Expert' s Report;
- (f) **(Woodside investigating accountant)**: promptly appoint an investigating accountant in connection with the preparation of the Woodside EM and NoM and provide all assistance or information reasonably requested by the appointed investigating accountant for that purpose;
- (g) **(Consultation with the Seller)**: consult with the Seller in respect of the contents of the Woodside Disclosure Documents, including:
- (1) providing to the Seller drafts of the Woodside EM and NoM (including the Woodside Independent Expert' s Report) and the other Woodside Disclosure Documents for the purpose of enabling the Seller to review and comment on those draft documents and any responses or submissions resulting from comments or requests from the Governmental Agency to whom a Woodside Disclosure Document has been submitted. In relation to the Woodside Independent Expert' s Report, the Seller' s review is to be limited to a factual accuracy review;
 - (2) taking all comments made by the Seller into account in good faith when producing a revised draft of the documents described in clause 4.3(g)(1);
 - (3) providing to the Seller revised drafts of each of the documents described in clause 4.3(g)(1) within a reasonable time before the Regulator' s Draft is finalised and to enable the Seller to review and comment on the Regulator' s Draft before the date of its submission;

- (4) without prejudice to clause 4.3(i), notifying the Seller if Woodside becomes aware of any significant new factor, material mistake or material inaccuracy relating to the information included in the UK Prospectus and such would or could reasonably be expected to result in a requirement for Woodside to publish a supplementary prospectus, and consult with the Seller as per this clause 4.3(g);
- (5) in connection with describing the tax implications of the Distribution for BHP Shareholders in the Woodside Disclosure Documents, adopting all amendments reasonably requested by the Seller; and
- (6) obtaining written consent from the Seller for the form and content in which the BHP Information appears in the Woodside Disclosure Documents;
- (h) **(Woodside Information):** as soon as reasonably practicable:
 - (1) prepare and provide to the Seller such Woodside Information, including (with the Seller's reasonable cooperation) all information regarding the Combined Group following Completion, as may be reasonably requested by the Seller for inclusion in the BHP Distribution Announcement for the purposes of BHP complying with all applicable laws in relation to the BHP Distribution Announcement; and
 - (2) provide to the Seller any information as may be reasonably requested by the Seller to undertake due diligence in connection with the preparation of the US Registration Statements;
- (i) **(Accuracy of disclosure):** confirm in writing to the Seller that:
 - (1) the Woodside Information and Woodside Disclosure Documents (other than the BHP Information contained therein) does not contain any material statement that is false or misleading in a material respect including because of any material omission from that statement;
 - (2) the UK Prospectus (other than the BHP Information contained therein, or used in the preparation thereof) contains all information that would be material to an investor for the purposes of making an informed assessment of: (i) the assets and liabilities, profits and losses, financial position, and prospects of Woodside; (ii) the rights attaching to the Woodside Shares; and (iii) the reasons for the Transaction and its impact on Woodside and does not include any information (other than BHP Information contained therein or information on the Combined Group to the extent it comprises the BHP Information) that is false, misleading or deceptive, or omit material information that results in the UK Prospectus being false, misleading or deceptive;
 - (3) each of the Form F-4 Registration Statement and the Form 8-A Registration Statement (other than in respect of the BHP Information contained therein) does not contain any untrue statement of a material fact, or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading; and
 - (4) Woodside shall reasonably cooperate, and it shall use its reasonable best efforts to cause representatives of Woodside and its subsidiaries to reasonably cooperate, in connection with the due diligence investigations of the Seller concerning the US Registration Statements, including by (i) subject to applicable law, giving access to documentation that would be reasonably requested by persons in connection with capital markets transactions in the United

States; (ii) using commercially reasonable efforts to provide direct contact between the Seller and the Woodside management team and other appropriate officers of Woodside and its subsidiaries; and (iii) assisting the Seller in securing the cooperation of the independent accountants of Woodside. The information contained in the US Registration Statements (other than in respect of the BHP Information contained therein or information on the Combined Group to the extent it comprises the BHP Information) will comply as to form in all material respects with the provisions of the US Securities Act, the US Exchange Act and the rules and regulations promulgated thereunder, as applicable;

- (j) **(Update information):** after consulting with the Seller pursuant to clause 4.3(g):
 - (1) until the date of the Woodside Shareholders Meeting, update the Woodside Disclosure Documents once published (other than the US Registration Statements and the UK Prospectus) to ensure they do not contain statements that are false or misleading in any material respect or any material omission;
 - (2) until Completion, update the US Registration Statements to ensure that no US Registration Statement contains an untrue statement of a material fact, or omits to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading; and
 - (3) in addition to its obligations under clauses 4.2, 4.3(g), 4.3(i), and 4.3(m), following publication of the UK Prospectus until the date of the admission of the Woodside Shares to the UK Official List and to trading on the London Stock Exchange, promptly prepare and finalise any supplementary prospectus following any significant new factor, material mistake or material inaccuracy relating to the information included in the UK Prospectus (and use all reasonable endeavours to obtain approval of such supplementary prospectus from the FCA and to publish the supplementary prospectus in accordance with the Prospectus Regulation Rules);
- (k) **(Compliance with laws):** do everything reasonably within its power to ensure the Transaction is effected in accordance with applicable laws and regulations;
- (l) **(Tax):** provide the Seller with such assistance and information as may reasonably be requested by the Seller for the purposes of obtaining any Tax or Duty rulings or similar in a form reasonably acceptable to the Seller;
- (m) **(Regulator engagement):** keep the Seller reasonably informed of any matters raised by ASIC, ASX, the SEC, the FCA, the NYSE, the London Stock Exchange or any other Governmental Agency (including by promptly providing copies of any material correspondence received) in connection with Transaction and consult in good faith with the Seller to take into consideration the Seller's views in resolving such matters;
- (n) **(Promotion):** participate in efforts reasonably requested by the Seller to promote the merits of the Transaction and to collaborate in good faith with respect to any announcement in respect of the Transaction;
- (o) **(New Woodside Shares):**
 - (1) not do anything that would cause Woodside Shares to cease to be quoted on the ASX;
 - (2) take all reasonable actions as necessary to ensure the new Woodside Shares are quoted on ASX and, for so long as Woodside has not given a notice pursuant to clause 4.2(d), the UK Official List and to trading on the London Stock Exchange's Main Market;

- (3) give to the ASX a notice of the proposed issue of new Woodside Shares by lodging an Appendix 2A under the ASX Listing Rules promptly and without delay upon Completion; and
 - (4) subject to clause 7.5(d), take all actions reasonably necessary to ensure that the Share Consideration can be issued to the Participating BHP Shareholders and the Sale Agent and can thereafter be immediately traded on ASX by the Participating BHP Shareholders and the Sale Agent, including, giving to ASX a notice under section 708A(5)(e)(i) of the Corporations Act which complies with section 708A(6) of the Corporations Act in relation to the new Woodside Shares;
- (p) **(ADR Facility; NYSE Listing):**
- (1) cause a sponsored American depositary receipt (ADR) facility (the **Woodside ADR Facility**) to be established or amended, as the case may be, with the ADS Depository Bank, for the purpose of issuing the Woodside ADSs, including entering into a deposit agreement with the ADS Depository Bank establishing the Woodside ADR Facility, or amending the ADS Deposit Agreement as necessary or desirable, with such amendments to be effective as of the Effective Time. Woodside shall consider in good faith the comments of BHP on the ADS Deposit Agreement, and the ADS Deposit Agreement shall be subject to the approval of BHP, such approval not to be unreasonably withheld. At or prior to the Effective Time, Woodside shall cause the ADS Depository Bank to issue a number of Woodside ADSs sufficient to constitute the Share Consideration to holders of Limited ADSs and Plc ADSs (if applicable), and any other BHP Shareholders that elect to receive their Share Consideration in the form of Woodside ADSs. Woodside shall use reasonable endeavours to cause the Woodside ADSs to be eligible for settlement through the Depository Trust Corporation; and
 - (2) use reasonable endeavours to cause the Woodside ADSs issuable pursuant to this agreement to be approved for listing on the NYSE, subject to official notice of issuance, as promptly as practicable after the establishment of the Woodside ADR Facility, and in any event prior to the Completion Date; and
- (q) **(Woodside credit rating):**
- (1) if the Seller so requires, following reasonable consultation between the Parties [***], seek from Moody's a Rating Assessment Service and from S&P Global Ratings a Rating Evaluation Service in respect of the impact of the Transaction on Woodside's rating and in doing so:
 - (A) consult with the Seller in good faith in respect of any, and prior to, such engagement, communication or provision of information to the ratings agencies;
 - (B) give the Seller reasonable notice of any meetings with the relevant rating agency; and
 - (C) keep the Seller reasonably informed of the content of any engagement, communication or meeting with the ratings agency, including providing copies of the relevant communication (subject to redaction of information that is reasonably determined to be commercially sensitive) and
 - (2) if, following the date of this agreement, there is a significant change to the expected profile of the Combined Group that is reasonably likely to result in a credit rating for Woodside following Completion that is lower than BBB or Baa2 the Parties must consult in good faith to determine whether to seek a credit rating assessment from ratings agencies.

4.4 Seller obligations

The Seller must take all necessary steps to implement the Transaction as soon as is reasonably practicable and, without limiting anything else in this clause 4, must do each of the following:

- (a) **(Distribution)**: take all actions reasonably required to give effect to the Distribution;
- (b) **(Consultation with Woodside)**: consult with Woodside in respect of the information relating to the Seller to be included in the US Registration Statements and UK Prospectus to be filed by Woodside, including without prejudice to clause 4.4(d), notify Woodside if the Seller becomes aware of any significant new factor, material mistake or material inaccuracy relating to BHP Information included in the UK Prospectus and such would or could reasonably be expected to result in a requirement for Woodside to publish a supplementary prospectus, and consult with Woodside as per this clause 4.4(b).
- (c) **(BHP Information)**: promptly prepare and provide to Woodside the BHP Information required by all applicable laws for inclusion in the Woodside Disclosure Documents, and any other information as may be reasonably requested by Woodside or that is determined to be reasonable after good faith consultation between the Parties in each case to respond promptly to any comments of the SEC or its staff, or any other relevant Governmental Agency;
- (d) **(Accuracy of disclosure)**: confirm in writing to Woodside that the BHP Information does not contain any material statement that is false or misleading in a material respect including because of any material omission from that statement and, in respect of the BHP Information included in the US Registration Statements or the UK Prospectus, such information does not contain any untrue statement of a material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading. The BHP Information contained in the US Registration Statements and the UK Prospectus will comply as to form in all material respects with the provisions of the Applicable Securities Regulations, as applicable;
- (e) **(Update information)**: after consulting with Woodside, update the BHP Information to ensure it does not contain statements that are false or misleading in any material respect or any material omission;
- (f) **(Compliance with laws)**: do everything reasonably within its power to ensure the Transaction is effected in accordance with applicable laws and regulations;
- (g) **(Regulator engagement)**: keep Woodside reasonably informed of any matters raised by ASIC, ASX, SARB or JSE (including by providing copies of any material correspondence received) in connection with the Transaction and consult in good faith with Woodside to take into consideration Woodside's views in resolving such matters;
- (h) **(Promotion)**: participate in efforts reasonably requested by Woodside to promote the merits of the Transaction and to collaborate in good faith with respect to any announcement in respect of the Transaction;
- (i) **(Information regarding BHP Shareholders)**: at a time that is reasonable (based on consultation between the Parties) to facilitate the Distribution in accordance with the Timetable, provide all necessary information, and procure that the Seller share registry provides all necessary information, in each case in a form requested by Woodside (acting reasonably), which Woodside reasonably requires in order to facilitate the issue of the new Woodside Shares to Participating BHP Shareholders (in the form of new Woodside Shares or new Woodside ADRs) and the Sale Agent; and

- (j) **(Tax):** provide Woodside with such assistance and information as may reasonably be requested by Woodside for the purposes of obtaining any Tax or Duty rulings or similar in a form reasonably acceptable to Woodside.

4.5 Responsibility for disclosure

- (a) Woodside will be responsible for the Woodside Information and the Woodside Disclosure Documents, except for the BHP Information.
- (b) The Seller will be responsible for the BHP Information.
- (c) The Parties agree that responsibility statements will be included in the Woodside Disclosure Documents reflecting the allocation of responsibility set out in clauses 4.5(a) and 4.5(b), subject to, in the case of the US Registration Statements and the UK Prospectus, applicable law. For the avoidance of doubt, under no circumstances (other than where a BHP Board Member is a Woodside Board Member or a proposed Woodside Board Member, in which case that individual will only be included in a responsibility statement to the same extent as the other non-executive Woodside Board Members) shall any such responsibility statement name any BHP Board Member as taking responsibility for all or part of any Woodside Disclosure Document or the BHP Information.

4.6 Woodside Board recommendation

- (a) Woodside must procure that a majority of the Woodside Board recommend that Woodside Shareholders vote in favour of the Transaction subject to the Woodside Independent Expert concluding (and continuing to conclude) that the Transaction is in the best interests of Woodside Shareholders and, subject to the same qualifications, that a majority of the Woodside Board Members vote (or procure the voting of) all Woodside Shares held by them or on their behalf at the time of the Woodside Shareholders Meeting in favour of the Transaction at the Woodside Shareholders Meeting.
- (b) Woodside must procure that half or more of the Woodside Board Members do not change, withdraw or qualify their recommendation to vote in favour of the Transaction, unless:
 - (1) the Woodside Independent Expert concludes (including in any updated report) that the Transaction is not in the best interests of Woodside Shareholders; or
 - (2) Woodside agrees to, or supports, a Woodside Superior Proposal.

5 Period before Completion

5.1 Sale perimeter and Restructure

- (a) Prior to Completion, the Seller must:
 - (1) undertake and complete the Restructure;
 - (2) take all reasonable steps to complete the separation of the Target Group from the systems and processes of the broader Seller Group;
 - (3) comply with the ITSA and discharge all obligations in the ITSA that fall due for performance at or prior to Completion; and

- (4) use reasonable endeavours to finalise the liquidation and/or deregistration of each Dormant Entity.
- (b) The Seller agrees that in respect of the Restructure:
 - (1) once the steps to be taken to effect the Restructure have been determined by the Seller, those steps will be described to Woodside (including responding to any reasonable requests for further information made by Woodside);
 - (2) at any time during the Exclusivity Period, if the Seller believes (acting reasonably) that the Restructure is likely to result in the use of US NOLs in excess of US\$1 billion, the Seller must consult with Woodside on the proposed steps to effect the Restructure and consider any reasonable steps that could be adopted to mitigate the use of US NOLs; and
 - (3) the Restructure must not result in the use of US NOLs in excess of US\$1.2 billion, and the Seller shall indemnify Woodside at the rate of US\$0.05 for every US\$1.00 of US NOLs used in the Restructure above US\$1.2 billion (such obligation to indemnify being the **US NOL Indemnity**).
- (c) Woodside acknowledges and agrees that:
 - (1) the US NOL Indemnity is the sole and exclusive remedy available to Woodside (or any Woodside Group Member) in connection with the use of US NOLs in connection with the Restructure; and
 - (2) any Tax Attributes that are attached to the Restructure Entities that will remain as Other Seller Entities on or after Completion will not be treated as constituting the use of US NOLs as a result of the Restructure for the purpose of the US NOL Indemnity.
- (d) The Parties:
 - (1) acknowledge and agree that prior to signing this agreement the Seller has become aware that one or more Target Group Members own or have the right to use or access information technology systems or assets (including hardware and data centre assets) in the Data Centres that are used to support, store data from and/or allow access to the information technology systems of the Seller or Other Seller Entities and the Target Group Members (**IT Assets**); and
 - (2) must agree, and give effect to (acting reasonably and in good faith) prior to Completion, the means by which these IT Assets will be apportioned between an Other Seller Entity and a Target Group Member (as applicable) in accordance with the following principles:
 - (A) the access to or use of the Other Seller Entities and the Target Group Members to the IT Assets must not be disturbed, to the extent reasonably practicable taking into account the nature of the arrangements or the IT Assets;
 - (B) the Parties will work together in good faith as soon as reasonably practicable after the date of this agreement and by Completion to identify IT Assets comprising hardware that are used exclusively for the purposes of the Target Petroleum Business and such IT Assets will either be retained by the Target Group Members on and from Completion or transferred to a Target Group Member on and from Completion (for no or nominal consideration payable to the Seller or any Other Seller Entity) if owned by Seller or any Other Seller Entity;

- (C) IT Assets comprising hardware that is used by an Other Seller Entity and is also reasonably necessary for the conduct of the Target Petroleum Business will be (i) retained by or transferred to an Other Seller Entity (for no or nominal consideration payable to Woodside or any Target Group Member), or (ii) to the extent such IT Assets cannot be transferred, the subject of alternative arrangements to allow the Seller or an Other Seller Entity to have secure and segregated access to such IT Assets, provided that the Parties must arrange for either transitional access to, or replacement of, the hardware for the Target Group (with any costs of such access or replacement being a separation cost for the purposes of Schedule 7);
- (D) IT Assets comprising a data centre lease or colocation agreement (or analogous arrangement) in respect of the Data Centres and office space in the name of a Target Group Member must be transferred (for no or nominal consideration payable to Woodside or any Target Group Member) to the Seller or an Other Seller Entity subject to the Seller granting a sublease or arranging a partial novation or new contract for Woodside Group and the Target Group for continued access to and use of separate secure areas of the Data Centres on, to the extent possible after the Seller or Other Seller Entity has used its reasonable endeavours to procure them, the same or substantially similar terms and conditions, including in accordance with clause 5.1(d)(2)(H);
- (E) IT Assets comprising IT support, managed service, outsourcing or other IT or telecommunications services contracts to which a Target Group Member is a party and used exclusively by any one or more Target Group Members must be retained by the Target Group Members as at Completion and the Seller must provide all reasonable assistance required for the Target Group Members to amend or vary those contracts to enable the contracts to be retained and used by the Target Group Members on and from Completion;
- (F) IT Assets comprising IT support, managed service, outsourcing or other IT or telecommunications services contracts to which a Target Group Member is a party and which are provided for the benefit of Other Seller Entities must be transferred (for no or nominal consideration payable to Woodside or any Target Group member) to the Seller or an Other Seller Entity with effect on and from Completion;
- (G) the Seller must procure that the Target Group Members continue to have access to and use and enjoyment of (at no additional cost) the IT Assets transferred to the Seller or any Other Seller Entity and required to operate the Target Petroleum Business in substantially the same manner as the Target Group Members had access to and use and enjoyment of the IT Assets as at the date of this agreement for the period specified or to be agreed under the ITSA for that access; and
- (H) the Seller will have the right to renegotiate and amend any data centre leases or colocation agreements (or analogous arrangements) in respect of the Data Centres or IT support, managed service, outsourcing or other IT or telecommunications services contracts comprising part of the IT Assets, subject to prior consultation and agreement with Woodside and provided that the Seller has used all reasonable endeavours to ensure (including consulting with Woodside on any such terms) the amended terms will not be materially detrimental to any Target Group Member, materially impact or delay the completion of the Separation Activities under the ITSA (unless a reasonable solution to

such impact or delay can be implemented to mitigate or avoid the cause of the impact or delay) or cause any of the Target Group Members to incur material additional costs, in order to enable the apportionment of the IT Assets or to enable the Other Seller Entities or Target Group Members (as applicable) to continue to have access to the IT Assets used in connection with the business of the Other Seller Entities or Target Group Members (as applicable),

and, following Completion, if all the IT Assets have not been apportioned between the Seller or an Other Seller Entity and a Target Group Member, then the Parties must continue to pursue the apportionment of the IT Assets or, to the extent the IT Assets cannot be apportioned in accordance with the principles in this clause 5.1(d), use reasonable endeavours to agree alternative arrangements to be put in place to allow the Seller or an Other Seller Entity and the Target Group Members (as applicable) to have access to the IT Assets, in each case in accordance with the principles set out in this clause 5.1(d).

5.2 Intra-group Funding Arrangements

- (a) Prior to or at Completion, the Intra-group Funding Arrangements will be eliminated, including:
 - (1) all Intra-group Funding Arrangements will be repaid or otherwise eliminated, which may include transactions required to allow this elimination to be conducted efficiently (for example, funding balances within the Target Group may need to be adjusted to the extent necessary to give effect to the elimination of intragroup funding consolidated balances as part of separation of the Target Group from the Seller Group); and
 - (2) the Seller Group will be entitled to remove any cash received by the Target Group Members in relation to the repayment of Intra-group Funding Arrangements that are intra-group receivables held by the Target Group.
- (b) Woodside may request reasonable further information or detail regarding how the Intra-group Funding Arrangements will be restructured, but only to the extent it is relevant to the Target Group following Completion, in which case the Seller will respond within a reasonable period of the request.
- (c) Woodside agrees that Woodside will procure (from a Woodside Group Member) the replacement of any letter of support given by the Seller or an Other Seller Entity in favour of a Target Group Member or as between Target Group Members that Woodside (acting reasonably) believes is required for the purposes of ensuring that the relevant entity meets the solvency requirements in the relevant jurisdiction in which the relevant Target Group Member has been incorporated, and any such support provided by the Seller or an Other Seller Entity will be terminated with effect at or prior to Completion. For the avoidance of doubt, Woodside's obligations under this clause 5.2(c) are limited to letters of support given by the Seller or an Other Seller Entity in favour of a Target Group Member exclusively to support the solvency of such Target Group Member and do not extend to any indemnities, guarantees or similar support given by Other Seller Entities to a Third Party (which shall be dealt with in accordance with clause 5.11) or that otherwise go beyond solvency support for the purposes of Intra-group Funding Arrangements or financial reporting.

5.3 Integration planning

- (a) In the period between the date of this agreement and the earlier of Completion and termination of this agreement, and subject always to the implementation of any measures reasonably required for

compliance with applicable laws, including competition laws, the Parties will work together and plan for the implementation of the Transaction and prepare an Integration Plan of the Target Group and Target Petroleum Business into the Woodside Group which will take effect following Completion in accordance with the ITSA.

- (b) Subject to the operation of clauses 5.3(c) and 19, the Confidentiality Deed, the Protocols and all applicable laws (including competition laws), during the Exclusivity Period the Seller must:
- (1) ensure the Seller Data Room remains open and available to Woodside and its representatives;
 - (2) provide a verbal and/or written report on the operations and financial performance of the Target Petroleum Business within 10 Business Days of the end of each calendar month, provided:
 - (A) Woodside may request specific information to be included in the report, which the Parties can discuss; and
 - (B) any written report is to contain no more information than is readily accessible by the Seller and the Target Group has been regularly producing on a monthly basis in the 12 months prior to the date of this agreement and may omit any information that relates to the intra-group arrangements of the Seller Group or that is unlikely to be relevant to the Target Petroleum Business following Completion;
 - (3) discuss such other reasonable arrangements to be adopted during the Exclusivity Period for the Seller to report to Woodside on the performance of the Target Petroleum Business; and
 - (4) provide such information regarding the Target Petroleum Business and its performance as Woodside may reasonably request from time to time and for a proper purpose.
- (c) Nothing in clause 5.3(b) requires the Seller to provide information:
- (1) relating to the Transaction or any Target Competing Proposal, or the Seller or Target Group' s consideration of the same;
 - (2) to the extent it would result in unreasonable disruptions to the Seller' s business, is commercially sensitive, is subject to existing confidentiality obligation to a Third party (in respect of which the consent of the Third Party is required and such consent is not reasonably capable of being obtained), would require the Seller to make further disclosures to any other entity or to a Governmental Agency or require the Seller to make any disclosure that would compromise legal professional privilege,

but the Seller must use reasonable endeavours to obtain any necessary consent from a Third Party for the disclosure of information which is subject to a consent right in favour of that Third Party.

5.4 Seller conduct of business

Subject to clause 5.7, in the period between the date of this agreement and the earlier of Completion and termination of this agreement, the Seller must:

- (a) use reasonable endeavours to ensure, to the extent it is within the Seller' s power to do so, that the business of the Target Group is conducted in a manner not inconsistent with the Anticipated Project Expenditure and Timing, and otherwise in the ordinary course of business and in accordance with the usual commercial and operational practice of the Target Group in all material respects;

- (b) ensure, to the extent it is within the Seller' s power to do so, that a Target Prescribed Occurrence does not occur;
- (c) use reasonable endeavours to ensure that a Target Material Adverse Change does not occur;
- (d) keep Woodside reasonably informed of any material development in respect of the Target Group that may have a material adverse impact on the operations, financial performance or financial position (including as to Tax attributes) of the Target Group, except where the information is the subject of the Protocols;
- (e) use reasonable efforts to:
 - (1) preserve and maintain the value of the businesses and assets of the Target Group;
 - (2) keep available the services of required employees of each Target Group Member; and
 - (3) maintain and preserve each Target Group Member' s relationships with Governmental Agencies, customers, joint venture partners, suppliers and others having business dealings with any Target Group Member;
- (f) procure that each Target Group Member prepares its Tax filings in a manner which is materially consistent with the past practice of that Target Group Member, except as required by a Tax Law or if, after the Effective Time, there is a change in interpretation of a Governmental Agency;
- (g) other than as expressly set out in the Anticipated Project Expenditure and Timing (including as to timing), or approved by Woodside, procure that no Target Group Member engages in or commits to any of the following conduct:
 - (1) intentionally relinquishes or allows material petroleum titles or authorisations to lapse without renewal, agrees to any materially adverse amendments to the terms of any petroleum titles or authorisations or intentionally resigns as operator (or assumes operatorship) of any operating arrangements to which it is a party at the date of this agreement;
 - (2) either:
 - (A) incurs any capital expenditure;
 - (B) makes any acquisition, divestment, asset swap or exercises any pre-emptive right; or
 - (C) makes a binding and enforceable investment commitment (including a final investment decision), that is not contemplated in the Anticipated Project Expenditure and Timing (including as to timing), where:
 - (D) the individual commitment for capital expenditure or investment exceeds, or the final investment decision contemplates future capital expenditure in excess of, US\$[***]; and
 - (E) for acquisitions, divestments, asset swaps or the exercise of pre-emptive rights, the consideration is in excess of US\$[***];
 - (3) incurs any expenditure that is in excess of its working interest share (as it exists at the date of this agreement) of expenditure under any operating agreement other than:
 - (A) to the extent the amount of expenditure is less than US\$[***] in each instance; or

- (B) in respect of Shenzi North Project to the extent announced by BHP to the ASX on 5 August 2021;
- (4) makes an acquisition, or commences a business undertaking, in a country other than a country in which it undertakes a petroleum exploration or exploitation business as at the date of this agreement;
- (5) undertakes any action that has, and the Target Group Member should reasonably have been aware that it would have, the effect, or likely effect, of a Target Group Member being in default or material breach of
 - (A) a petroleum title, authorisation, or operating agreement; or
 - (B) a contract or consent that is material to the operation of the Target Petroleum Business;
- (6) enters into any guarantee or indemnity for the obligations of any person other than a Target Group Member, unless required pursuant to a law or contractual obligation that has been Fairly Disclosed in the Target Disclosure Material;
- (7) enters into a transaction with any member of the Seller Group (other than a Target Group Member) other than: (i) where it is consistent with the basis on which amounts have been charged for inter-group services or support in the 12 months prior to 17 August 2021 or (ii) permitted by this agreement;
- (8) enters into any new contract, agreement or arrangement which contains, or varies or amends an existing contract, agreement or arrangement to introduce, a change of control provision (including a consent right, uplift or transfer fee or unilateral termination right exercisable specifically on a change of control) or pre-emptive right, which (in respect of a right for the benefit of a Third Party) will be triggered by, or is enlivened as a result of, implementation of the Transaction where:
 - (A) the contract is reasonably likely to give rise to additional total revenue or expenses for a Target Group Member in excess of US\$[***];
 - (B) if clause 5.4(g)(8)(A) does not apply and the contract is a seismic licence, the contract is reasonably likely to give rise to additional total expenses for a Target Group Member in excess of US\$[***]; or
 - (C) if neither of clauses 5.4(g)(8)(A) nor 5.4(g)(8)(B) apply and the impact of the rights under the change of control provision or pre-emptive right being exercised is that it would have a material adverse effect on or negatively impact business continuity of the Target Petroleum Business (for example because the arrangements the subject of the contract are unique and are not capable of being replaced with reasonably similar arrangements), the contract is reasonably likely to give rise to additional total revenues or expenses for a Target Group Member in excess of US\$[***];
- (9) enters into any contract, agreement or arrangement which requires the Seller or any Other Seller Entity to provide a bank guarantee, indemnity or guarantee or similar support to a Third Party to support the obligations of the Target Group and which would become the subject of clause 5.11 other than (i) any rollover of a bank guarantee, indemnity or guarantee already in place at the date of this agreement, on the same terms and conditions, or (ii) a bank guarantee, indemnity or guarantee for which the financial liability does not exceed US\$[***]; and

- (10) except in respect of the Seller or an Other Seller Entity undertaking any upgrade or maintenance or any Separation Activities, Transition Services, Systems Separation Activities or Systems Services (as each of those terms is defined in the ITSA) in accordance with the obligations under the ITSA, not make any material changes, to any IT systems, software or operations used or owned by the Seller or a Seller Group Member (including to data held on those systems or software relating to the Target Petroleum Business) which are used by or in relation to the Target Petroleum Business, which such change would have a material adverse impact on:
- (A) the safe and lawful operation of the Target Petroleum Business; or
 - (B) the timeline for the completion of the Separation Activities, Systems Separation Activities or Systems Services, which BHP is unable to remediate or rectify by implementing another solution (having used reasonable endeavours to do so), provided that nothing in this clause 5.4(g)(10) prevents the Seller or an Other Seller Entity from carrying out system changes with at least 4 weeks prior notice for the following purposes (or as much prior notice as is reasonably practicable to provide if paragraph (C) below applies):
 - (C) if promptly required to rectify malfunctions or guarantee the safe operation of the business of any one or more Seller Group Member or in order to comply with law;
 - (D) to perform upgrades to or perform maintenance of Seller Group' s IT Systems which are used by or in relation to the Target Petroleum Business to the extent consistent with Seller Group' s ordinary business practices and/or with upgrades and maintenance otherwise undertaken for Seller Group' s IT Systems used by other Seller Group Members; and
 - (E) to perform upgrades to Seller Group IT Systems (excluding the ring-fenced or cloned part of the Seller Group' s IT Systems used solely for the conduct and operation of the Target Petroleum Business) consistent with Seller Group' s Technology roadmap after notifying Woodside if the ERP Solution has not been delivered by Seller Group or has not been accepted by Woodside by 1 October 2022; and
- (h) comply with the additional employment-related requirements set out in clause 2(a) of Schedule 4.

5.5 Woodside conduct of business

Subject to clause 5.7, in the period between the date of this agreement and the earlier of Completion and termination of this agreement, Woodside must:

- (a) use reasonable endeavours to ensure, to the extent it is within Woodside' s power to do so, that the business of the Woodside Group is conducted in a manner not inconsistent with the Anticipated Project Expenditure and Timing, and otherwise in the ordinary course of business and in accordance with the usual commercial and operational practice of the Woodside Group in all material respects;
- (b) ensure, to the extent it is within Woodside' s power to do so, that a Woodside Prescribed Occurrence does not occur;
- (c) use reasonable endeavours to ensure that a Woodside Material Adverse Change does not occur;

- (d) keep BHP reasonably informed of any material development in respect of the Woodside Group that may have a material adverse impact on the operations, financial performance or financial position of the Woodside Group, except where the information is the subject of the Protocols;
- (e) use reasonable efforts to:
 - (1) preserve and maintain the value of the businesses and assets of the Woodside Group;
 - (2) keep available the services of required employees of each Woodside Group Member; and
 - (3) maintain and preserve each Woodside Group Member's relationships with Governmental Agencies, customers, joint venture partners, suppliers and others having business dealings with any Woodside Group Member; and
- (f) other than as expressly set out in the Anticipated Project Expenditure and Timing (including as to timing), or approved by BHP, procure that no Woodside Group Member engages in or commits to any of the following conduct:
 - (1) intentionally relinquishes or allows material petroleum titles or authorisations to lapse without renewal, agrees to any materially adverse amendments to the terms of any petroleum titles or authorisations or intentionally resigns as operator (or assumes operatorship) of any operating arrangements to which it is a party at signing;
 - (2) either:
 - (A) incurs any capital expenditure;
 - (B) makes any acquisition, divestment, asset swap or exercises any pre-emptive right; or
 - (C) makes a binding and enforceable investment commitment (including a final investment decision), that is not contemplated in the Anticipated Project Expenditure and Timing (including as to timing), where:
 - (D) the individual commitment for capital expenditure or investment exceeds US\$100 million; and
 - (E) for acquisitions, divestments, asset swaps or the exercise of pre-emptive rights, the consideration is in excess of US\$100 million;
 - (3) incurs any expenditure that is in excess of its working interest share (as it exists at the date of this agreement) of expenditure under any operating agreement to the extent the amount of expenditure is in excess of its share for more than US\$25 million in each instance this clause applies;
 - (4) makes an acquisition, or commences a business undertaking, in a country other than a country in which it currently undertakes a petroleum exploration or exploitation business;
 - (5) undertakes any action that has, and the Woodside Group Member should reasonably have been aware that it would have, the effect, or likely effect, of a Woodside Group Member being in default or material breach of:
 - (A) a petroleum title, authorisation, or operating agreement;
 - (B) a contract or consent that is material to the operation of the Woodside Group's business;

- (6) enters into any guarantee or indemnity for the obligations of any person other than a Woodside Group Member, unless required pursuant to a law or contractual obligation that has been Fairly Disclosed in the Woodside Disclosure Material;
- (7) not make at any time a choice under section 125-65(5) of the Tax Act that the Seller or any Seller Group Member will not be a member of a demerger group that includes Woodside; or
- (8) enters into any new contract, agreement or arrangement which contains a change of control provision (including a consent right, uplift or transfer fee or unilateral termination right exercisable specifically on a change of control) or pre-emptive right which (in respect of a right for the benefit of a Third Party) will be triggered by, or is enlivened in favour of a Third Party as a result of, implementation of the Transaction where:
 - (A) the contract is reasonably likely to give rise to additional total revenue or expenses for a Woodside Group Member in excess of \$50 million;
 - (B) if clause 5.5(f)(8)(A) does not apply and the contract is a seismic licence, the contract is reasonably likely to give rise to additional total expenses for a Woodside Group Member in excess of US\$10 million; or
 - (C) if neither of clauses 5.5(f)(8)(A) nor 5.5(f)(8)(B) apply and the impact of the rights under the change of control provision or pre-emptive right being exercised is that it would have a material adverse effect on or negatively impact business continuity of the Woodside Group Business (for example because the arrangements the subject of the contract are unique and are not capable of being replaced with reasonably similar arrangements), the contract is reasonably likely to give rise to additional total revenues or expenses for a Woodside Group Member in excess of US\$20 million.

5.6 Other obligations

- (a) During the period between the date of this agreement and the earlier of Completion and termination of this agreement, each Party will promptly notify the other orally and in writing of anything of which a Seller Specified Executive or Woodside Specified Executive becomes aware that:
 - (1) causes any material information publicly filed by BHP in respect of the Target Group or which causes any material information publicly filed by Woodside (either on its own account or in respect of any other Woodside Group Member) to be, or reasonably likely to be, incomplete, incorrect, untrue or misleading in any material respect;
 - (2) makes any information provided in the Target Disclosure Materials or the Woodside Disclosure Materials (as the case may be) incomplete, incorrect, untrue or misleading in any material respect; or
 - (3) would constitute or be likely to constitute a Target Prescribed Occurrence, Woodside Prescribed Occurrence, Target Material Adverse Change or Woodside Material Adverse Change.
- (b) Each Party must consult in good faith with the other prior to taking, agreeing to take, or voting on the following matters (and if the Parties cannot reach agreement, the matter will be escalated to the Parties' respective CEOs and/or Chairpersons to negotiate in good faith):
 - (1) in respect of the Target Group, making new commitments in respect of (i) decommissioning plans or obligations, (ii) frontier exploration (including drilling in the Canadian Orphan

Basin), (iii) (if Completion has not occurred by the time the Trion Project minimum work obligations have been completed) next steps for the development of the Trion Project, or (iv) exercising any pre-emptive rights in respect of the North West Shelf Project; and

- (2) in respect of the Woodside Group, (i) making new commitments in respect of decommissioning plans or obligations or (ii) exercising any pre-emptive rights in respect of the North West Shelf Project.

5.7 Permitted acts

- (a) Except in respect of the restrictions in clauses 5.4(b) and 5.5(b) (to which this clause 5.7 will not apply), nothing in clauses 5.4, 5.5 or 5.6 restricts the ability of a Party to take any action or inaction:
- (1) to the extent required to give effect to any of the Transaction Agreements or the good faith implementation of activities approved by the Integration Steering Committee;
 - (2) in accordance with or in furtherance of any approved work program and budget or approved authority for expenditure under any joint operating or joint venture agreement or similar which approved work program and budget or approved authority for expenditure (as applicable) has been Fairly Disclosed in the Target Disclosure Materials or the Woodside Disclosure Materials prior to the date of this agreement;
 - (3) provided it is not inconsistent with the Anticipated Project Expenditure and Timing, as being an action that the Party intends or is required to be carried out during the Exclusivity Period;
 - (4) which is required by any applicable law, regulation, contract (provided the contract has been Fairly Disclosed in the Target Disclosure Materials or Woodside Disclosure Materials, as the case may be), Authorisation or by a Governmental Agency, in any case that operates upon the relevant Party;
 - (5) to the extent required to reasonably and prudently respond to an emergency or disaster (including a situation giving rise to a risk of personal injury or damage to property or to respond to environmental, health and safety regulations, or a disease epidemic or pandemic, including the outbreak, escalation or any impact of, or recovery from, the Coronavirus or COVID-19 pandemic);
 - (6) that is reasonable and prudent action which is taken in response to the presence of, or increase in cases of, Coronavirus or COVID-19, including in accordance with the direction or recommendation of a Governmental Agency;
 - (7) to the extent approved in writing by the other Party, such approval not to be unreasonably withheld or delayed (but may be withheld or delayed if the matter relates to a change in the Anticipated Project Expenditure and Timing or a Capital Expenditure, acquisition or divestment, in any case that would give rise to a commitment in excess of US\$500 million individually or US\$1 billion in aggregate); or
 - (8) in respect of the following:
 - (A) the Seller continuing to conduct its Intra-group Funding Arrangements or funding arrangements between members of the Target Group (including the payment of any dividend or distribution by a Target Group Member paid in accordance with applicable law), in a manner that is not inconsistent with the terms of this agreement;

- (B) transactions contemplated in the Anticipated Project Expenditure and Timing;
 - (C) the Seller progressing through the 'Define Phase' or proceeding with the 'Declaration of Commerciality' and progressing to execute against the work program and budget in respect of the Trion Project as described in the Anticipated Project Expenditure and Timing; or
 - (D) good faith implementation of activities included in the Anticipated Project Expenditure and Timing or otherwise approved by the Integration Steering Committee.
- (b) Woodside acknowledges and agrees that prior to Completion:
- (1) the Seller or another Seller Group Member may advance or charge amounts to, or pay or collect amounts from or on behalf of, a Target Group Member;
 - (2) any Target Group Member may advance or charge amounts to, or pay or collect amounts from or on behalf of, a Seller Group Member; and
 - (3) a Seller Group Member or any Target Group Member may pay dividends or other distributions (including capital returns) to the Other Seller Entities in accordance with applicable law;
- in each case, in a manner not inconsistent with clause 5.4(g)(7) of this agreement; and
- (4) in respect of a Project that is not wholly owned by a Target Group Member, the Seller will not be in breach of any of its obligations under clause 5.4 that are applicable to the relevant Project provided that the Seller consults with Woodside in advance (through the Integration Steering Committee) and exercises its voting rights under any relevant JV Contract on any matter in a manner that is consistent with compliance with its obligations under clause 5.4.
- (c) The Seller acknowledges and agrees that prior to Completion in respect of a Woodside Group Asset that is not wholly owned by a Woodside Group Member, Woodside will not be in breach of any of its obligations under clause 5.5 that are applicable to the relevant Woodside Group Asset provided that the Woodside Group Member exercises its voting rights under any relevant joint operating agreement or joint venture contract on any matter in a manner that is consistent with compliance with its obligations under clause 5.5.

5.8 Notification of breaches

If on or before Completion, a Party becomes aware of any material breach or potential material breach of clause 5.4, 5.5, 5.6 or 5.7, it must:

- (a) notify the other Party of the material breach or potential material breach and provide the other Party with reasonable details of the alleged material breach or potential material breach; and
- (b) without prejudice to clause 22, consult with the other Party as to the effect of the alleged material breach or potential material breach.

5.9 Access to Target Group

- (a) Subject to applicable competition laws, and any measures implemented by the Seller which are reasonably necessary to comply with applicable competition laws, the Protocols and clause 5.9(b), during the period between signing and the earlier of Completion and termination of this agreement,

the Seller must ensure that Woodside and a reasonable number of persons authorised by Woodside are given reasonable, non-disruptive access during normal business hours and on reasonable notice, access to the Target Group, to inspect the premises, books and records of the Target Group Members for the sole purpose of planning the integration of the Target Group Members with the Woodside Group following Completion and to understand and stay up to date with the affairs of the Target Group prior to Completion.

- (b) The Seller is not required to give Woodside or persons authorised by Woodside the access described in clause 5.9(a) to the extent that despite Woodside's compliance with clause 5.9(d) such access might reasonably be expected to:
- (1) breach the relevant Target Group Member's obligations under the relevant joint operating agreements or joint venture contracts;
 - (2) pose a risk to the safety of persons or property;
 - (3) put a Seller Group Member or a Target Group Member in breach of any duty of confidence or any duty or obligation under the *Privacy Act 1988* (Cth) and any other legislation in any other jurisdiction affecting privacy, personal information or the collection, handling, storage, processing, use or disclosure of data; or
 - (4) result in a loss of any legal professional privilege,
- and to the extent that such access is not granted by the relevant Operator.
- (c) To the extent that a Target Group Member does not have the power to grant Woodside access to premises, books and records of the Target Group, the Seller must request, and use all reasonable endeavours to procure, (at Woodside's reasonable cost) access for Woodside to such, premises, books and records from the relevant Operator for the sole purpose of planning the integration of the Target Group Members with the Woodside Group following Completion and to understand and stay up to date with the affairs of the Target Group prior to Completion.
- (d) Woodside:
- (1) must not direct, manage or control the conduct of any Target Group Member or of any employee of a Target Group Member, or otherwise impede the conduct of the Target Petroleum Business, at any time before Completion; and
 - (2) must ensure that any persons provided with the access referred to in clause 5.9(a) comply with the reasonable requirements of the Target Group Members or any relevant Third Party in respect of the access and do not interfere with the business or operations of the Target Group Members.
- (e) Nothing in this clause 5.9 gives Woodside any rights as to the decision making of any Target Group Member or its business.

5.10 Consents and other actions
