DREYFUS GLOBAL INVESTING  
(A PREMIER FUND)

-----

The following information replaces the last sentence of the first paragraph under "Description of the Fund \_\_ Management Policies":

The Fund may invest without restriction in companies in, or governments of, developing countries. Developing countries have economic structures that are generally less diverse and mature, and political systems that are less stable, than those of developed countries. The markets of developing countries may be more volatile than the markets of more mature economies; however, such markets may provide higher rates of return to investors. See "Risk Factors \_\_ Investing in Foreign Securities."

-----

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus captioned "Description of the Fund \_\_ Investment Techniques."

OPTIONS ON SWAPS \_\_ The Fund may purchase cash-settled options on interest rate swaps, interest rate swaps denominated in foreign currency and equity index swaps in pursuit of its investment objective. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (for example, an exchange of floating-rate payments for fixed-rate payments) denominated in U.S. dollars or foreign currency. Equity index swaps involve the exchange by the Fund with another party of cash flows based upon the performance of an index or a portion of an index of securities which usually include dividends. A cash-settled option on a swap gives the purchaser the right, but not the obligation, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms.
