PACIFIC SELECT FUND

Summary Prospectus May 1, 2012

Class I and P Shares

Small-Cap Growth Portfolio

This summary prospectus is intended for use in connection with variable life insurance policies and variable annuity contracts issued by Pacific Life Insurance Company (Pacific Life) and Pacific Life & Annuity Company (PL&A) and is not intended for use by other investors.

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund, and the portfolio and its risks. You can find the Fund's prospectus, statement of additional information and other information about the Fund online at www.pacificlife.com/PacificSelectFund.htm. You can also obtain this information at no cost by sending an email request to PSFdocumentrequest@pacificlife.com or by calling:

Pacific Life Annuity Contract Owners:	1-800-722-4448	(6 a.m. - 5 p.m. Pacific time)
Pacific Life Annuity Financial Professionals:	1-800-722-2333	(6 a.m. - 5 p.m. Pacific time)
Pacific Life Insurance Policy Owners:	1-800-347-7787	(5 a.m. - 5 p.m. Pacific time)
PL&A Annuity Contract Owners:	1-800-748-6907	(6 a.m. - 5 p.m. Pacific time)
PL&A Life Insurance Policy Owners:	1-888-595-6997	(5 a.m. - 5 p.m. Pacific time)

The current Fund prospectus and statement of additional information, both dated May 1, 2012, are incorporated by reference into this summary prospectus.

Investment goal

This portfolio seeks capital appreciation; no consideration is given to income.

Fees and expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the portfolio. The table below does not reflect expenses and charges that are, or may be, imposed under your variable annuity contract or variable life insurance policy. For information on these charges, please refer to the applicable contract or policy prospectus.

Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class I	Class P
Management fee	0.60	0.60
Service fee	0.20	0.00
Other expenses	0.08	0.08
Total annual operating expenses	0.88	0.68

Examples

The examples below are intended to help you compare the cost of investing in the portfolio with the cost of investing in other portfolios of the Fund or other mutual funds. Each example assumes that you invest \$10,000 for the time periods indicated, that your investment has an average annual return of 5%, that all dividends and distributions are reinvested, and that the portfolio's annual operating expenses remain as stated in the previous table throughout the 10-year period. Although your actual costs may be higher or lower, the examples show what your costs would be based on these assumptions.

higher if they did. Keep in mind that this is only an estimate; actual expenses and performance may vary.

Your expenses (in dollars) if you sell/redeem or hold all of your shares at the end of each period

	Class I	Class P
1 year	\$ 90	\$ 69
3 years	\$ 281	\$ 218
5 years	\$ 488	\$ 379
10 years	\$ 1,084	\$ 847

Portfolio turnover

The portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in Annual fund operating expenses or in the Examples, affect the portfolio's performance. During the most recent fiscal year, the portfolio's turnover rate was 56.66% of the average value of the portfolio.

Principal investment strategies

This portfolio invests at least 80% of its assets in small-capitalization equity securities. The portfolio invests mainly in equity securities that have a total market capitalization within the range of companies included in the Russell 2000 Growth Index and/or the S&P SmallCap 600 Index. As of December 31, 2011, the market capitalization of the companies in these indexes ranged from approximately \$23.41 million to \$3.70 billion. The portfolio invests primarily in "growth" stocks.

These examples do not reflect fees and expenses of any variable annuity contract or variable life insurance policy, and would be

The manager will look for companies that have high unit volume growth or a positive life cycle change.

The manager may sell a holding when it reaches a target price, fails to perform as expected or when other opportunities appear more attractive.

Principal risks

As with any mutual fund, the value of the portfolio's investments, and therefore the value of your shares, may go up or down. Accordingly, you could lose money. The portfolio may be affected by the following principal risks, among other non-principal risks:

Active Management Risk: There is no guarantee that the manager's principal investment strategies and techniques, as well as particular investment decisions, will achieve the portfolio's investment goal, which could have an adverse impact on the portfolio's performance generally, relative to other portfolios with similar investment goals or relative to its benchmark.

Equity Securities Risk: Stock markets are volatile. The price of equity securities tend to go up or down in value, sometimes rapidly and unpredictably, in response to many factors, which may be due to the particular issuer, its industry or broader economic or market events.

Growth Companies Risk: Growth companies have the potential for above average or rapid growth but may give the portfolio a higher risk of price volatility than investments in "undervalued" companies.

Issuer Risk: The value of a security or instrument may decline for reasons directly related to the issuer, such as management, performance, financial leverage and reduced demand for the issuer's goods or services.

Liquidity Risk: Liquidity is the ability to sell securities or other investments within a reasonable amount of time at approximately the price at which the portfolio has valued the securities or other investments, which relies on the willingness of market participants to buy and sell securities. Certain investments may be difficult to purchase and sell, particularly during adverse market conditions, because there is a limited market for the investment or there are restrictions on resale. If the portfolio holds illiquid securities, it may be unable to take advantage of market opportunities or it may be forced to sell other, more desirable, liquid securities or sell illiquid securities at a loss if it is required to raise cash to conduct its operations.

Market and Regulatory Risk: Events in the financial markets and in the economy may cause volatility and uncertainty and may affect performance. Events in one market may adversely impact other markets. Future events may impact the portfolio in unforeseen ways. Traditionally liquid investments may experience periods of diminished liquidity. Governmental and regulatory actions may impair portfolio management and have unexpected consequences on particular markets, strategies, or investments.

Price Volatility Risk: The market value of the portfolio's investments will go up or down, sometimes rapidly or

Redemption Risk: Because the portfolio may serve as an Underlying Portfolio of the Portfolio Optimization Portfolios and thus a significant percentage of its outstanding shares may be held by the Portfolio Optimization Portfolios, a change in asset allocation by a Portfolio Optimization Portfolio could result in large redemptions out of the portfolio, causing potential increases in expenses to the portfolio and sale of securities in a short timeframe, which could negatively impact performance.

Small-Capitalization Companies Risk: Small-capitalization companies may be riskier and more susceptible to price swings than larger companies. Small-capitalization companies, particularly those in their developmental stages, may have a shorter history of operations, a more limited ability to raise capital, may have inexperienced management and limited product lines, and more speculative prospects for future growth or sustained earnings or market share than larger more established companies.

Portfolio performance

The bar chart and table below provide some indication of the risk of investing in the portfolio by showing changes in the performance of the portfolio's Class I shares from year to year and showing how the portfolio's Class I returns compare to a broad-based market index. Class P shares do not have a full calendar year of performance and thus, their performance is not included in the table below. Returns do not reflect fees and expenses of any variable annuity contract or variable life insurance policy, and would be lower if they did. Past performance is not a guarantee of future results.

Year by year total return (%)
as of December 31 each year

Best and worst quarterly performance during this period:
2nd quarter 2009: 21.14%; 4th quarter 2008: (28.65%)

Average annual total return

as of December 31, 2011	1 year	5 years	10 years
Small-Cap Growth Portfolio - Class I	(3.10%)	1.85%	3.44%
Russell 2000 Growth Index (reflects no deductions for fees, expenses or taxes)	(2.91%)	2.09%	4.48%

unpredictably, or may fail to rise, as a result of market conditions or for reasons specific to a particular issuer.

Portfolio management

Investment Adviser - Pacific Life Fund Advisors LLC

Management Firm - Fred Alger Management, Inc. The primary person responsible for day-to-day management of the portfolio is:

Portfolio Manager and Primary Title with Management Firm	Experience with Portfolio
Jill Greenwald, Executive Vice President and Portfolio Manager	Since 2007

Purchase and sale of shares

Class I shares of the portfolio are offered at NAV and are available only as underlying investment options for variable life insurance and variable annuity products (variable products) issued by Pacific Life and PL&A. You do not buy, sell or exchange shares of the portfolios - you choose investment options through your variable product. The insurance companies then invest in the portfolios if you choose them as investment options, and redeem shares of the portfolios if you choose to decrease those investment options. Any minimum initial or subsequent investment requirements and procedures for purchase or redemption of shares of the portfolios that apply to your variable product should be described in the prospectus for the variable product. Class P shares of the portfolio are only available to the Pacific Dynamix Portfolios and Portfolio Optimization Portfolios.

Tax information

Because the only shareholders of the portfolios are the insurance companies offering the variable products or the Pacific Dynamix and Portfolio Optimization Portfolios, no discussion is included here about the federal income tax consequences at the shareholder level. The federal income tax consequences for purchasers of a variable product are described in the prospectus for the variable product.

Payments to broker-dealers and other financial intermediaries

Pacific Select Distributors, Inc. (PSD), the Distributor for the portfolios and for the variable products, pays commissions and related compensation to the broker-dealers or other financial intermediaries that sell the variable products. Class I shares of the portfolios pay a service fee to PSD that can be used for a part of these payments. These payments may create a conflict of interest by influencing the financial intermediary and your salesperson to recommend the variable contract and the portfolios over another investment. Ask your salesperson for more information. Class P shares, which are only available to the Pacific Dynamix Portfolios and Portfolio Optimization Portfolios, do not pay a service fee to PSD.
