Fund Summaries

Eaton Vance Atlanta Capital Focused Growth Fund

Investment Objective

The Fund's investment objective is to seek long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for a reduced sales charge if you invest, or agree to invest over a 13-month period, at least \$50,000 in Eaton Vance Funds. More information about these and other discounts is available from your financial intermediary and in Sales Charges beginning on page 28 of this Prospectus and page 22 of the Fund's Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)	Class A	Class C	Class I
Maximum Sales Charge (Load) (as a percentage of offering price)	5.75%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of net asset value at purchase or redemption)	None	1.00%	None

Annual Fund Operating Expenses (expenses you pay each year as a percentage of the value of your investment)	Class A	Class C	Class I
Management Fees	0.65%	0.65%	0.65%
Distribution and Service (12b-1) Fees	0.25%	1.00%	n/a
Other Expenses	0.27%	0.26%	0.27%
Total Annual Fund Operating Expenses	1.17%	1.91%	0.92%

? Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Expenses with Redemption				Expenses without Redemption			
	1 Year	3 Years	5 Years	10 Years	1 Year	3 Years	5 Years	10 Years
Class A shares	\$ 687	\$ 925	\$ 1,182	\$ 1,914	\$ 687	\$ 925	\$ 1,182	\$ 1,914
Class C shares	\$ 294	\$ 600	\$ 1,032	\$ 2,233	\$ 194	\$ 600	\$ 1,032	\$ 2,233
Class I shares	\$ 94	\$ 293	\$ 509	\$ 1,131	\$ 94	\$ 293	\$ 509	\$ 1,131

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" the portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 17% (for the period from July 23, 2012 through September 30, 2012) and the Portfolio's portfolio turnover rate was 60% (for the period from October 1, 2011 through July 22, 2012, when the Fund was investing in Focused Growth Portfolio) of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests in common stocks of approximately 20 to 35 companies, primarily with large market capitalizations. The Fund will normally invest in common stocks of companies having market capitalizations that rank among the top 1,000 U.S. companies. The Fund may invest in dollar-denominated securities of foreign companies that trade on U.S. exchanges or in the over-the-counter market (including depositary receipts which evidence ownership in underlying foreign stocks). The Fund may also lend its securities.

The portfolio managers seek to invest in quality growth companies with a demonstrated history of consistent growth and stability in earnings that management believes are attractively valued relative to earnings and cash flow per share. Financial quality is determined by analysis of a company's financial statements and is measured by a company's demonstrated ability to consistently grow earnings. The portfolio managers typically favor companies that they believe have sustainable above-average earnings growth potential and whose underlying financial prospects are exceeding

consensus expectations .. Sustainable earnings growth potential is determined by rigorous fundamental analysis of a company' s financial trends ; products and services ; industry conditions ; and other factors. The portfolio managers may utilize “financial quality rankings” provided by nationally recognized rating services as part of their investment analysis but do not rely solely upon such rankings in making investment decisions. The portfolio managers seek to manage individual security risk through analysis of each security' s risk/reward characteristics.

Portfolio securities are selected by the portfolio managers in consultation with a team of investment analysts in the investment sub-adviser' s equity research group. Each analyst maintains research responsibility for investments in his or her area of coverage. Stocks are added to the portfolio based on factors which may include: the relative attractiveness of the risk/reward profile; earnings consistency; expected rate of sustainable earnings growth; and prospects for near-term accelerating earnings growth. The portfolio managers may sell a security when its fundamentals deteriorate , when its valuation is no longer attractive relative to its long-term growth rate or when other securities are identified to displace a current holding ..

Principal Risks

Equity Investing Risk. The Fund' s shares are sensitive to stock market volatility and the stocks in which the Fund invests may be more volatile than the stock market as a whole. The prices of stocks may decline in response to conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations, as well as issuer or sector specific events. Market conditions may affect certain types of stocks (such as large-cap or growth stocks) to a greater extent than other types of stocks. If the stock market declines, the value of Fund shares will also likely decline and, although stock values can rebound, there is no assurance that values will return to previous levels. Depository receipts are subject to many of the risks associated with investing in foreign securities including political and economic risks.

Issuer Diversification Risk. The Fund is “non-diversified” which means it may invest a greater percentage of its assets in the securities of a single issuer than funds that are “diversified.” Non-diversified funds face the risk of focusing investments in a small number of issuers, making them more susceptible to risks affecting such issuers than a more diversified fund might be.

Securities Lending Risk. Securities lending involves possible delay in recovery of the securities or possible loss of rights in the collateral should the borrower fail financially. As a result, the value of Fund shares may fall and there may be a delay in recovering the loaned securities. The value of Fund shares could also fall if a loan is called and the Fund is required to liquidate reinvested collateral at a loss or if the investment adviser is unable to reinvest cash collateral at rates that exceed the costs involved.

Risks Associated with Active Management. The Fund is an actively managed portfolio and its success depends upon the investment skills and analytical abilities of the sub- adviser to develop and effectively implement strategies to achieve the Fund' s investment objective. Subjective decisions made by the sub- adviser may cause the Fund to incur losses or to miss profit opportunities on which it may otherwise have capitalized.

General Fund Investing Risks. The Fund is not a complete investment program and you may lose money by investing in the Fund. All investments carry a certain amount of risk and there is no guarantee that the Fund will be able to achieve its investment objective. Annual Fund Operating Expenses expressed as a percentage of the Fund' s average daily net assets may change as Fund assets increase and decrease, and Annual Fund Operating Expenses may differ in the future. Purchase and redemption activities by Fund shareholders may impact the management of the Fund and its ability to achieve its investment objective. In addition, the redemption by one or more large shareholders or groups of shareholders of their holdings in the Fund could have an adverse impact on the remaining shareholders in the Fund. Investors in the Fund should have a long-term investment perspective and be able to tolerate potentially sharp declines in value. An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, entity or person. Mutual funds, investment advisers, other market participants

and many securities markets are subject to rules and regulations and the jurisdiction of one or more regulators. Changes to applicable rules and regulations could have an adverse affect on securities markets and market participants, as well as on the Fund' s ability to execute its investment strategy.

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund by showing changes in the Fund' s performance from year to year and how the Fund' s average annual returns over time compare with those of a broad-based securities market index. The returns in the bar chart are for Class I shares and do not reflect a sales charge. Past performance (both before and after taxes) is no guarantee of future results. The Fund' s performance reflects the effects of expense reductions for certain periods. Absent these reductions, performance would have been lower. Updated Fund performance information can be obtained by visiting www.eatonvance.com.

During the ten years ended December 31, 2012, the highest quarterly total return for Class I was 21.57% for the quarter ended March 31, 2012, and the lowest quarterly return was -23.90% for the quarter ended December 31, 2008.

Average Annual Total Return as of December 31, 2012	One Year	Five Years	Ten Years
Class A Return Before Taxes	10.83%	-0.58%	5.53%
Class C Return Before Taxes	15.93%	1.56%	6.03%
Class I Return Before Taxes	18.00%	2.04%	6.39%
Class I Return After Taxes on Distributions	17.99%	1.77%	5.96%
Class I Return After Taxes on Distributions and the Sale of Class I Shares	11.72%	1.64%	5.54%
Russell 1000 Growth Index (reflects no deduction for fees, expenses or taxes)	15.26%	3.12%	7.51%

These returns reflect the maximum sales charge for Class A (5.75%). The Class A performance shown above for the period prior to November 28, 2003 (commencement of operations) is the performance of Class I shares, adjusted for the sales charge that applies to Class A shares (but not adjusted for any other differences in expenses of the two classes). The Class C performance shown above for the period prior to May 2, 2011 (commencement of operations) is the performance of Class A shares, adjusted for the sales charge that applies to Class C shares (but not adjusted for any other differences in the expenses of the two classes) and the Class C performance shown above for the period prior to November 28, 2003 is the performance of Class I shares, adjusted for the sales charge that applies to Class C shares (but not adjusted for any other differences in expenses of the two classes). If adjusted for other expenses, returns would be different. Investors cannot invest directly in an Index.

After-tax returns are calculated using the highest historical individual federal income tax rates and do not reflect the impact of state and local taxes.

Actual after-tax returns depend on a shareholder's tax situation and the actual characterization of distributions, and may differ from those shown.

After-tax returns are not relevant to shareholders who hold shares in tax-deferred accounts or to shares held by non-taxable entities. After-tax returns for other Classes of shares will vary from the after-tax returns presented for Class I shares. Return After Taxes on Distributions for a period may be the same as Return Before Taxes for that period because no taxable distributions were made during that period. Also, Return After Taxes on Distributions and the Sale of Fund Shares for a period may be greater than or equal to Return After Taxes on Distributions for the same period because of losses realized on the sale of Fund shares.

Investment Adviser. Boston Management and Research ("BMR").

Investment Sub-Adviser. Atlanta Capital Management Company, LLC ("Atlanta Capital").

Portfolio Managers

Richard B. England, Managing Director and Principal of Atlanta Capital, has managed the Fund and the Focused Growth Portfolio (the portfolio the Fund previously invested in) since 2008.

Paul J. Marshall, Vice President and Principal of Atlanta Capital, has managed the Fund and Focused Growth Portfolio (the portfolio the Fund previously invested in) since 2003.

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange Fund shares on any business day, which is any day the New York Stock Exchange is open for business. You may purchase, redeem or exchange Fund shares either through your financial intermediary or directly from the Fund either by writing to Eaton Vance Funds, P.O. Box 9653, Providence, RI 02940-9653, or by calling 1-800-262-1122. The minimum initial purchase or exchange into the Fund is \$1,000 for each Class (with the exception of Class I) and \$250,000 for Class I (waived in certain circumstances). There is no minimum for subsequent investments.

For important information about taxes and financial intermediary compensation, please turn to "Important Information Regarding Fund Shares" on page 18 of this Prospectus.

Eaton Vance Atlanta Capital Horizon Growth Fund

Investment Objective

The Fund's investment objective is to seek total return.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for a reduced sales charge if you invest, or agree to invest over a 13-month period, at least \$50,000 in Eaton Vance Funds. More information about these and other discounts is available from your financial intermediary and in Sales Charges beginning on page 28 of this Prospectus and page 22 of the Fund's Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)	Class A	Class B	Class C	Class I
Maximum Sales Charge (Load) (as a percentage of offering price)	5.75%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of net asset value at time of purchase or redemption)	None	5.00%	1.00%	None
Annual Fund Operating Expenses (expenses you pay each year as a percentage of the value of your investment) ⁽¹⁾	Class A	Class B	Class C	Class I
Management Fees	0.95%	0.95%	0.95%	0.95%
Distribution and Service (12b-1) Fees	0.25%	1.00%	1.00%	n/a
Other Expenses	0.52%	0.52%	0.52%	0.52%
Total Annual Fund Operating Expenses	1.72%	2.47%	2.47%	1.47%
Expense Reimbursement ⁽¹⁾	(0.32)%	(0.32)%	(0.32)%	(0.32)%
Total Annual Fund Operating Expenses After Expense Reimbursement	1.40%	2.15%	2.15%	1.15%

- (1) The administrator and the sub-adviser have agreed to reimburse the Fund's expenses to the extent that Total Annual Fund Operating Expenses exceed 1.40% for Class A shares, 2.15% for Class B and Class C shares and 1.15% for Class I shares. This expense reimbursement will continue through January 31, 2014. Any amendment to or a termination of this reimbursement would require written approval of the Board of Trustees. The expense reimbursement relates to ordinary operating expenses only and does not include expenses such as: brokerage commissions, acquired fund fees and expenses, interest expense, taxes or litigation expenses. Amounts reimbursed may be recouped by the administrator and sub-adviser during the Fund's current fiscal year to the extent actual expenses are less than the contractual expense cap during such year.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Expenses with Redemption				Expenses without Redemption			
	1 Year	3 Years	5 Years	10 Years	1 Year	3 Years	5 Years	10 Years
Class A shares	\$ 709	\$ 1,056	\$ 1,426	\$ 2,463	\$ 709	\$ 1,056	\$ 1,426	\$ 2,463
Class B shares	\$ 718	\$ 1,139	\$ 1,487	\$ 2,597	\$ 218	\$ 739	\$ 1,287	\$ 2,597
Class C shares	\$ 318	\$ 739	\$ 1,287	\$ 2,782	\$ 218	\$ 739	\$ 1,287	\$ 2,782
Class I shares	\$ 117	\$ 433	\$ 772	\$ 1,730	\$ 117	\$ 433	\$ 772	\$ 1,730

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" the portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 50 % of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund invests primarily in equity securities. Although the Fund can invest in equity securities of any size, it intends to focus its investments on mid-cap companies. Mid-Cap companies are companies with market capitalizations within the range of capitalizations of companies included in the Russell Midcap Growth Index. Although it invests primarily in U.S. traded securities (including depositary receipts evidencing ownership in underlying foreign stocks), the

Fund may invest up to 25% of its total assets in foreign securities , including those trading in developed and emerging international markets. The Fund may invest no more than 5% of its net assets in real estate investment trusts. The Fund may also lend its securities.

The Fund may engage in derivative transactions to seek return, to hedge against fluctuations in securities prices, interest rates or currency exchange rates, or as a substitute for the purchase or sale of securities or currencies.

The Fund expects to use derivatives principally by writing covered call options to generate income or to use as a hedging technique. Permitted derivatives include: the purchase or sale of forward or futures contracts; options on futures contracts; exchange-traded and over-the-counter options; equity collars and equity swap agreements.

There is no stated limit on the Fund' s use of derivatives. The Fund may also engage in covered short sales (on individual securities held or on an index or basket of securities whose constituents are held in whole or in part or for which liquid assets have been segregated).

The portfolio managers seek to invest in quality growth companies with a demonstrated history of consistent growth and stability in earnings that management believes are attractively valued relative to earnings and cash flow per share. Financial quality is determined by analysis of a company' s financial statements and is measured by a company' s demonstrated ability to consistently grow earnings. The portfolio managers typically favor companies that they believe have sustainable above-average earnings growth potential and whose underlying financial prospects are exceeding consensus expectations. Sustainable earnings growth potential is determined by rigorous fundamental analysis of a company' s financial trends; products and services; industry conditions; and other factors. The portfolio managers may utilize "financial quality rankings" provided by nationally recognized rating services as part of their investment analysis but do not rely solely upon such rankings in making investment decisions .. The portfolio managers seek to manage individual security risk through analysis of each security' s risk/reward characteristics.

Portfolio securities are selected by the portfolio managers in consultation with a team of investment analysts in the investment sub- adviser' s equity research group .. Each analyst maintains research responsibility for investments in his or her area of coverage. Allocations among market sectors are determined by the portfolio managers in consultation with the analysts, using the market sector weights of the Russell Midcap Growth Index as a benchmark. Stocks are added to the portfolio based on factors which may include: the relative attractiveness of the risk/reward profile; earnings consistency; expected rate of sustainable earnings growth; and prospects for near-term accelerating earnings growth. The portfolio managers may sell a security when its fundamentals deteriorate, when its valuation is no longer attractive relative to its long-term growth rate or when other securities are indentified to displace a current holding ..

Principal Risks

Equity Investing Risk. The Fund' s shares are sensitive to stock market volatility and the stocks in which the Fund invests may be more volatile than the stock market as a whole. The prices of stocks may decline in response to conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations, as well as issuer or sector specific events. Market conditions may affect certain types of stocks (such as mid-cap or growth stocks) to a greater extent than other types of stocks. If the stock market declines, the value of Fund shares will also likely decline and, although stock values can rebound, there is no assurance that values will return to previous levels.

Smaller Company Equity Risk. The stocks of smaller, less seasoned companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk. Smaller companies may have limited product lines, markets or financial resources, may be dependent on a limited management group, and may lack substantial capital reserves or an established performance record. There may be generally less publicly available information about such companies than for larger, more established companies.

Foreign and Emerging Market Investment Risk. Because the Fund can invest a portion of its assets in foreign instruments, the value of Fund shares can be adversely affected by changes in currency exchange rates and political, economic and market developments abroad. In emerging or less developed countries, these risks can be more significant. Investment markets in emerging market countries are typically substantially smaller, less liquid and more volatile than the major markets in developed countries. As a result, Fund share values may be more volatile than if the Fund invested only in developed markets. Emerging market countries may have relatively unstable governments and economies. Emerging market investments often are subject to speculative trading, which typically contributes to volatility. Trading in foreign and emerging markets typically involves higher expense than trading in the United States. The Fund may have difficulties enforcing its legal or contractual rights in a foreign country. The value of investments denominated in foreign currencies can be adversely affected by changes in foreign currency exchange rates. Depositary receipts are subject to many of the risks associated with investing in foreign securities including political, economic and market risks.

Derivatives Risk. The use of derivatives can lead to losses because of adverse movements in the price or value of the asset, index, rate or instrument underlying a derivative, due to failure of a counterparty or due to tax or regulatory constraints. Derivatives may create economic leverage in the Fund, which magnifies the Fund's exposure to the underlying investment. Derivatives risk may be more significant when derivatives are used to enhance return or as a substitute for a cash investment position, rather than solely to hedge the risk of a position held by the Fund. When derivatives are used to gain or limit exposure to a particular market or market segment, their performance may not correlate as expected to the performance of such market thereby causing the Fund to fail to achieve its original purpose for using such derivatives. A decision as to whether, when and how to use derivatives involves the exercise of specialized skill and judgment, and a transaction may be unsuccessful in whole or in part because of market behavior or unexpected events. Derivative instruments may be difficult to value, may be illiquid, and may be subject to wide swings in valuation caused by changes in the value of the underlying instrument. If a derivative's counterparty is unable to honor its commitments, the value of Fund shares may decline and the Fund could experience delays in the return of collateral or other assets held by the counterparty. The loss on derivative transactions may substantially exceed the initial investment.

Securities Lending Risk. Securities lending involves possible delay in recovery of the securities or possible loss of rights in the collateral should the borrower fail financially. As a result, the value of Fund shares may fall and there may be a delay in recovering the loaned securities. The value of Fund shares could also fall if a loan is called and the Fund is required to liquidate reinvested collateral at a loss or if the investment adviser is unable to reinvest cash collateral at rates that exceed the costs involved.

Risks Associated with Active Management. The Fund is an actively managed portfolio and its success depends upon the investment skills and analytical abilities of the sub- adviser to develop and effectively implement strategies to achieve the Fund's investment objective. Subjective decisions made by the sub- adviser may cause the Fund to incur losses or to miss profit opportunities on which it may otherwise have capitalized.

General Fund Investing Risks. The Fund is not a complete investment program and you may lose money by investing in the Fund. All investments carry a certain amount of risk and there is no guarantee that the Fund will be able to achieve its investment objective. Annual Fund Operating Expenses expressed as a percentage of the Fund's average daily net assets may change as Fund assets increase and decrease, and Annual Fund Operating Expenses may differ in the future. Purchase and redemption activities by Fund shareholders may impact the management of the Fund and its ability to achieve its investment objective. In addition, the redemption by one or more large shareholders or groups of shareholders of their holdings in the Fund could have an adverse impact on the remaining shareholders in the Fund. Investors in the Fund should have a long-term investment perspective and be able to tolerate potentially sharp declines in value. An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, entity or person. Mutual funds, investment advisers, other market participants and many securities markets are subject to rules and regulations and the jurisdiction of one or more regulators. Changes to applicable rules and regulations could have an adverse affect on securities markets and market participants, as well as on the Fund's ability to execute its investment strategy.

Performance

The following bar chart and table provide some indication of risks of investing in the Fund by showing changes in the Fund's performance from year to year and how the Fund's average annual returns over time compare with those of a broad-based securities market index .. The returns in the bar chart are for Class A shares and do not reflect a sales charge. If the sales charge was reflected, the returns would be lower. Past performance (both before and after taxes) is no guarantee of future results. The Fund's performance reflects the effects of expense reductions. Absent these reductions, performance would have been lower. Updated Fund performance information can be obtained by visiting www.eatonvance.com.

During the ten years ended December 31, 2012, the highest quarterly total return for Class A was 19.47% for the quarter ended March 31, 2012, and the lowest quarterly return was -22.14% for the quarter ended December 31, 2008.

Average Annual Total Return as of December 31, 2012	One Year	Five Years	Ten Years
Class A Return Before Taxes	4.90%	2.22%	7.38%
Class A Return After Taxes on Distributions	4.52%	1.40%	6.75%
Class A Return After Taxes on Distributions and the Sale of Class A Shares	3.69%	1.83%	6.46%
Class B Return Before Taxes	5.49%	2.36%	7.20%
Class C Return Before Taxes	9.50%	2.65%	7.20%
Class I Return Before Taxes	11.64%	3.52%	8.07%
Russell Midcap Growth Index (reflects no deduction for fees, expenses or taxes)	15.81%	3.23%	10.31%

These returns reflect the maximum sales charge for Class A (5.75%) and any applicable contingent deferred sales charge (“CDSC”) for Class B and Class C. The Class I performance shown above for the period prior to May 2, 2011 (commencement of operations) is the performance of Class A shares at net asset value without adjustment for any differences in the expenses of the two classes. If adjusted for other expenses, returns would be different. Investors cannot invest directly in an Index.

After-tax returns are calculated using the highest historical individual federal income tax rates and do not reflect the impact of state and local taxes.

Actual after-tax returns depend on a shareholder’s tax situation and the actual characterization of distributions, and may differ from those shown.

After-tax returns are not relevant to shareholders who hold shares in tax-deferred accounts or to shares held by non-taxable entities. After-tax returns for other Classes of shares will vary from the after-tax returns presented for Class A shares. Return After Taxes on Distributions for a period may be the same as Return Before Taxes for that period because no taxable distributions were made during that period. Also, Return After Taxes on Distributions and the Sale of Fund Shares for a period may be greater than or equal to Return After Taxes on Distributions for the same period because of losses realized on the sale of Fund shares.

Investment Adviser. Boston Management and Research (“BMR”).

Investment Sub-Adviser. Atlanta Capital Management Company, LLC (“Atlanta Capital”).

Portfolio Managers

Richard B. England, Managing Director and Principal of Atlanta Capital, has managed the Fund since 2011.

Brian P. Mansfield, Vice President and Principal of Atlanta Capital, has managed the Fund since 2011.

Glenn H. Shaw, Vice President and Principal of Atlanta Capital, has managed the Fund since 2011.

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange Fund shares on any business day, which is any day the New York Stock Exchange is open for business. Class B shares are only available for purchase upon exchange from another Eaton Vance fund or through reinvestment of distributions. You may purchase, redeem or exchange Fund shares either through your financial intermediary or directly from the Fund either by writing to Eaton Vance Funds, P.O. Box 9653, Providence, RI 02940-9653, or by calling 1-800-262-1122. The minimum initial purchase or exchange into the Fund is \$1,000 for each Class (with the exception of Class I) and \$250,000 for Class I (waived in certain circumstances). There is no minimum for subsequent investments.

For important information about taxes and financial intermediary compensation, please turn to “Important Information Regarding Fund Shares” on page 18 of this Prospectus.

Eaton Vance Atlanta Capital Select Equity Fund

Investment Objective

The Fund's investment objective is to seek long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for a reduced sales charge if you invest, or agree to invest over a 13-month period, at least \$50,000 in Eaton Vance Funds. More information about these and other discounts is available from your financial intermediary and in Sales Charges beginning on page 28 of this Prospectus and page 22 of the Fund's Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)	Class A	Class I
Maximum Sales Charge (Load) (as a percentage of offering price)	5.75%	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of net asset value at purchase or redemption)	None	None
Annual Fund Operating Expenses (expenses you pay each year as a percentage of the value of your investment)	Class A	Class I
Management Fees	0.80%	0.80%
Distribution and Service (12b-1) Fees	0.25%	n/a
Other Expenses	<u>1.52</u> %	<u>1.52</u> %
Total Annual Fund Operating Expenses	2.57%	2.32%
Expense Reimbursement ⁽¹⁾	<u>(1.37)</u> %	<u>(1.37)</u> %
Total Annual Fund Operating Expenses After Expense Reimbursement	1.20%	0.95%

(1) The investment adviser and administrator and sub-adviser have agreed to reimburse the Fund's expenses to the extent that Total Annual Fund Operating Expenses exceed 1.20% for Class A shares and 0.95% for Class I shares. This expense reimbursement will continue through January 31, 2014. Any amendment to or a termination of this reimbursement would require written approval of the Board of Trustees. The expense reimbursement relates to ordinary operating expenses only and does not include expenses such as: brokerage commissions, acquired fund fees and expenses, interest expense, taxes or litigation expenses. Amounts reimbursed may be recouped by the investment adviser and administrator and sub-adviser during the Fund's current fiscal year to the extent actual expenses are less than the contractual expense cap during such year.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A shares	\$ 690	\$ 1,205	\$ 1,746	\$ 3,216
Class I shares	\$ 97	\$ 593	\$ 1,115	\$ 2,550

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" the portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the period from January 3, 2012 (commencement of operations) to September 30, 2012, the Fund's portfolio turnover rate was 12% (not annualized) of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets in equity securities (the "80% Policy"). The Fund normally invests in the common stocks of approximately 25 to 40 companies. The Fund may invest in companies across a broad capitalization range, but primarily invests in mid-to large-cap companies with capitalizations comparable to those companies included in the Russell 1000 Index. Although it invests primarily in U.S. traded securities (including depositary receipts evidencing ownership in underlying foreign stocks), the Fund may invest up to 25% of its total assets in foreign

securities, including those trading in developed and emerging international markets. The Fund may invest in real estate investment trusts and may lend its securities.

The portfolio managers seek to invest in quality companies with a demonstrated history of consistent growth and stability in earnings that they believe are attractively valued relative to earnings and cash flow per share. Financial quality is measured by a company's demonstrated ability to consistently grow earnings. Other characteristics of quality companies include a history of sustained growth in earnings and operating cash flow; high returns on capital; attractive profit margins; and leading industry positions. The portfolio managers seek to purchase stocks of companies capable of sustaining consistent earnings growth while maintaining a strong financial condition. Investments are determined based primarily on fundamental analysis of a company's financial trends, products and services and other factors. The portfolio managers may utilize "financial quality rankings" provided by nationally recognized rating services as part of its investment analysis but does not rely solely upon such rankings in making investment decisions. The portfolio managers may sell a security when its fundamentals deteriorate or when it is no longer attractively valued in relation to the market as a whole or other potential investments. The portfolio managers seek to manage portfolio risk by constructing a portfolio of undervalued companies and favoring companies with a history of consistent sustained growth and stability in earnings and operating cash flow.

Principal Risks

Equity Investing Risk. The Fund's shares are sensitive to stock market volatility and the stocks in which the Fund invests may be more volatile than the stock market as a whole. The prices of stocks may decline in response to conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations, as well as issuer or sector specific events. Market conditions may affect certain types of stocks to a greater extent than other types of stocks. If the stock market declines, the value of Fund shares will also likely decline and, although stock values can rebound, there is no assurance that values will return to previous levels.

Issuer Diversification Risk. The Fund is "non-diversified" which means it may invest a greater percentage of its assets in the securities of a single issuer than funds that are "diversified." Non-diversified funds face the risk of focusing investments in a small number of issuers, making them more susceptible to risks affecting such issuers than a more diversified fund might be.

Smaller Company Equity Risk. The stocks of smaller, less seasoned companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk. Smaller companies may have limited product lines, markets or financial resources, may be dependent on a limited management group, and may lack substantial capital reserves or an established performance record. There may be generally less publicly available information about such companies than for larger, more established companies.

Foreign and Emerging Market Investment Risk. Because the Fund may invest a portion of its assets in foreign instruments, the value of Fund shares can be adversely affected by changes in currency exchange rates and political, economic and market developments abroad. In emerging or less developed countries, these risks can be more significant. Investment markets in emerging market countries are typically substantially smaller, less liquid and more volatile than the major markets in developed countries. As a result, Fund share values may be more volatile than if the Fund invested only in developed markets. Emerging market countries may have relatively unstable governments and economies. Emerging market investments often are subject to speculative trading, which typically contributes to volatility. Trading in foreign and emerging markets typically involves higher expense than trading in the United States. The Fund may have difficulties enforcing its legal or contractual rights in a foreign country. The value of investments denominated in foreign currencies can be adversely affected by changes in foreign currency exchange rates. Depositary receipts are subject to many of the risks associated with investing in foreign securities including political, economic and market risks.

Real Estate Investment Trust Risk. Real estate investment trusts ("REITs") are subject to special risks associated with real estate. Securities of companies in the real estate industry are sensitive to factors such as changes in real estate values, property taxes, interest rates, cash flow of underlying real estate assets, occupancy rates, government regulations affecting zoning, land use, and rents, and the management skill and

creditworthiness of the issuer. Companies in the real estate industry may also be subject to liabilities under environmental and hazardous waste laws, among others. Changes in underlying real estate values may have an exaggerated effect to the extent that REITs concentrate investments in particular geographic regions or property types.

Securities Lending Risk. Securities lending involves possible delay in recovery of the securities or possible loss of rights in the collateral should the borrower fail financially. As a result, the value of Fund shares may fall and there may be a delay in recovering the loaned securities. The value of Fund shares could also fall if a loan is called and the Fund is required to liquidate reinvested collateral at a loss or if the investment adviser is unable to reinvest cash collateral at rates that exceed the costs involved.

Risks Associated with Active Management. The Fund is an actively managed portfolio and its success depends upon the investment skills and analytical abilities of the sub-adviser to develop and effectively implement strategies to achieve the Fund's investment objective. Subjective decisions made by the sub-adviser may cause the Fund to incur losses or to miss profit opportunities on which it may otherwise have capitalized.

General Fund Investing Risks. The Fund is not a complete investment program and you may lose money by investing in the Fund. All investments carry a certain amount of risk and there is no guarantee that the Fund will be able to achieve its investment objective. Annual Fund Operating Expenses expressed as a percentage of the Fund's average daily net assets may change as Fund assets increase and decrease, and Annual Fund Operating Expenses may differ in the future. Purchase and redemption activities by Fund shareholders may impact the management of the Fund and its ability to achieve its investment objective. In addition, the redemption by one or more large shareholders or groups of shareholders of their holdings in the Fund could have an adverse impact on the remaining shareholders in the Fund. Investors in the Fund should have a long-term investment perspective and be able to tolerate potentially sharp declines in value. An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, entity or person. Mutual funds, investment advisers, other market participants and many securities markets are subject to rules and regulations and the jurisdiction of one or more regulators. Changes to applicable rules and regulations could have an adverse affect on securities markets and market participants, as well as on the Fund's ability to execute its investment strategy.

Performance

Performance history will be available for the Fund after the Fund has been in operation for one full calendar year.

Management

Investment Adviser. Eaton Vance Management ("Eaton Vance").

Investment Sub-Adviser. Atlanta Capital Management Company, LLC ("Atlanta Capital").

Portfolio Managers

William O. Bell, IV, Vice President and Principal of Atlanta Capital, has co-managed the Fund since its inception in 2012.

W. Matthew Hereford, Vice President and Principal of Atlanta Capital, has co-managed the Fund since its inception in 2012.

Charles B. Reed, Managing Director and Principal of Atlanta Capital, has co-managed the Fund since its inception in 2012.

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange Fund shares on any business day, which is any day the New York Stock Exchange is open for business. You may purchase, redeem or exchange Fund shares either through your financial intermediary or directly from the Fund either by writing to Eaton Vance Funds, P.O. Box 9653, Providence, RI 02940-9653, or by calling 1-800-262-1122. The minimum initial purchase or exchange into the Fund is \$1,000 for Class A and \$250,000 for Class I (waived in certain circumstances). There is no minimum for subsequent investments.

For important information about taxes and financial intermediary compensation, please turn to "Important Information Regarding Fund Shares" on page 18 of this Prospectus.

Eaton Vance Atlanta Capital SMID-Cap Fund

On January 15, 2013, the Fund discontinued all sales of its shares, except shares purchased by: (1) existing shareholders (including shares acquired through the reinvestment of dividends and distributions); (2) qualified retirement plans; or (3) fee-based programs (a) sponsored by financial intermediaries for which investment decisions are made on a centralized basis at the discretion of the firm (e.g., model portfolios managed by a firm or its investment committee) and (b) that have selected the Fund prior to the close of business on January 15, 2013. Sales of Fund shares may be further restricted or reopened in the future.

Investment Objective

The Fund's investment objective is to seek long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for a reduced sales charge if you invest, or agree to invest over a 13-month period, at least \$50,000 in Eaton Vance Funds. More information about these and other discounts is available from your financial intermediary and in Sales Charges beginning on page 28 of this Prospectus and page 22 of the Fund's Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)	Class A	Class C	Class I	Class R
Maximum Sales Charge (Load) (as a percentage of offering price)	5.75%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of net asset value at purchase or redemption)	None	1.00%	None	None
Annual Fund Operating Expenses (expenses you pay each year as a percentage of the value of your investment) ⁽¹⁾	Class A	Class C	Class I	Class R
Management Fees	0.91%	0.91%	0.91%	0.91%
Distribution and Service (12b-1) Fees	0.25%	1.00%	n/a	0.50%
Other Expenses	<u>0.16</u> %	<u>0.16</u> %	<u>0.16</u> %	<u>0.16</u> %
Total Annual Fund Operating Expenses	1.32%	2.07%	1.07%	1.57%
Expense Reimbursement ⁽²⁾	<u>(0.07)</u> %	<u>(0.07)</u> %	<u>(0.07)</u> %	<u>(0.07)</u> %
Total Annual Fund Operating Expenses After Expense Reimbursement	1.25%	2.00%	1.00%	1.50%

(1) Expenses in the table above and the Example below reflect the expenses of the Fund and the Portfolio.

(2) The sub-adviser has agreed to reimburse the Fund's expenses to the extent that Total Annual Fund Operating Expenses exceed 1.25% for Class A shares, 2.00% for Class C shares, 1.00% for Class I shares and 1.50% for Class R shares. This expense reimbursement will continue through January 31, 2014. Any amendment to or a termination of this reimbursement would require written approval of the Board of Trustees. The expense reimbursement relates to ordinary operating expenses only and does not include expenses such as: brokerage commissions, acquired fund fees and expenses, interest expense, taxes or litigation expenses. Amounts reimbursed may be recouped by the sub-adviser during the Fund's current fiscal year to the extent actual expenses are less than the contractual expense cap during such year.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Expenses with Redemption				Expenses without Redemption			
	1 Year	3 Years	5 Years	10 Years	1 Year	3 Years	5 Years	10 Years
Class A shares	\$ 695	\$ 963	\$ 1,251	\$ 2,068	\$ 695	\$ 963	\$ 1,251	\$ 2,068
Class C shares	\$ 303	\$ 642	\$ 1,107	\$ 2,394	\$ 203	\$ 642	\$ 1,107	\$ 2,394
Class I shares	\$ 102	\$ 333	\$ 583	\$ 1,299	\$ 102	\$ 333	\$ 583	\$ 1,299
Class R shares	\$ 153	\$ 489	\$ 849	\$ 1,861	\$ 153	\$ 489	\$ 849	\$ 1,861

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” the portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 6 % of the average value of its portfolio.

Principal Investment Strategies

The Fund invests primarily in common stocks of companies with small to mid-sized market capitalizations (“small- to mid-cap stocks”). The Fund will normally invest in common stocks of companies having market capitalizations within the range of companies comprising the Russell 2500 Index. Under normal circumstances, the Fund invests at least 80% of its net assets in small- to mid-cap stocks (the “80% Policy”). The Fund may also invest in larger companies and in dollar-denominated securities of foreign companies that trade on U.S. exchanges or in the over-the-counter market (including depositary receipts which evidence ownership in underlying foreign stocks). The Fund may also lend its securities

The portfolio managers seek to invest in quality companies with a demonstrated history of consistent growth and stability in earnings that they believe are attractively valued relative to earnings and cash flow per share. Financial quality is measured by a company’s demonstrated ability to consistently grow earnings. Other characteristics of quality companies include a history of sustained growth in earnings and operating cash flow; high returns on capital; attractive profit margins; and leading industry positions. The portfolio managers seek to purchase stocks of companies capable of sustaining consistent earnings growth while maintaining a strong financial condition. Investments are determined based primarily on fundamental analysis of a company’s financial trends, products and services and other factors. The portfolio managers may utilize “financial quality rankings” provided by nationally recognized rating services as part of their investment analysis but do not rely solely upon such rankings in making investment decisions. The portfolio managers may sell a security when its fundamentals deteriorate or when it is no longer attractively valued in relation to the market as a whole or other potential investments. The portfolio managers seek to manage portfolio risk by constructing a diversified portfolio of undervalued companies and favoring companies with a history of consistent sustained growth and stability in earnings and operating cash flow ..

The Fund currently invests its assets in SMID-Cap Portfolio (the “Portfolio”), a separate registered investment company with the same objective and policies as the Fund.

Principal Risks

Equity Investing Risk. The Fund’s shares are sensitive to stock market volatility and the stocks in which the Fund invests may be more volatile than the stock market as a whole. The prices of stocks may decline in response to conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations, as well as issuer or sector specific events. Market conditions may affect certain types of stocks (such as small-cap or mid-cap stocks) to a greater extent than other types of stocks. If the stock market declines, the value of Fund shares will also likely decline and, although stock values can rebound, there is no assurance that values will return to previous levels. Depositary receipts are subject to many of the risks associated with investing in foreign securities including political and economic risks.

Smaller Company Equity Risk. The stocks of smaller, less seasoned companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk. Smaller companies may have limited product lines, markets or financial resources, may be dependent on a limited management group, and may lack substantial capital reserves or an established performance record. There may be generally less publicly available information about such companies than for larger, more established companies.

Securities Lending Risk. Securities lending involves possible delay in recovery of the securities or possible loss of rights in the collateral should the borrower fail financially. As a result, the value of Fund shares may fall and there may be a delay in recovering the loaned securities. The value of Fund shares could also fall if a loan is called and the Fund is required to liquidate reinvested collateral at a loss or if the investment adviser is unable to reinvest cash collateral at rates that exceed the costs involved.

Risks Associated with Active Management. The Fund is an actively managed portfolio and its success depends upon the investment skills and analytical abilities of the sub- adviser to develop and effectively implement

strategies to achieve the Fund' s investment objective. Subjective decisions made by the sub- adviser may cause the Fund to incur losses or to miss profit opportunities on which it may otherwise have capitalized.

General Fund Investing Risks. The Fund is not a complete investment program and you may lose money by investing in the Fund. All investments carry a certain amount of risk and there is no guarantee that the Fund will be able to achieve its investment objective. Annual Fund Operating Expenses expressed as a percentage of the Fund' s average daily net assets may change as Fund assets increase and decrease, and Annual Fund Operating Expenses may differ in the future. Purchase and redemption activities by Fund shareholders may impact the management of the Fund and its ability to achieve its investment objective. In addition, the redemption by one or more large shareholders or groups of shareholders of their holdings in the Fund could have an adverse impact on the remaining shareholders in the Fund. Investors in the Fund should have a long-term investment perspective and be able to tolerate potentially sharp declines in value. An investment in the Fund is not a deposit in a

bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, entity or person. Mutual funds, investment advisers, other market participants and many securities markets are subject to rules and regulations and the jurisdiction of one or more regulators. Changes to applicable rules and regulations could have an adverse affect on securities markets and market participants, as well as on the Fund’ s ability to execute its investment strategy.

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund by showing changes in the Fund’ s performance from year to year and how the Fund’ s average annual returns over time compare with those of two broad-based securities market indices. The returns in the bar chart are for Class I shares and do not reflect a sales charge. Past performance (both before and after taxes) is no guarantee of future results. The Fund’ s performance reflects the effects of expense reductions. Absent these reductions, performance would have been lower. Updated Fund performance information can be obtained by visiting www.eatonvance.com.

During the ten years ended December 31, 2012, the highest quarterly total return for Class I was 17.67% for the quarter ended June 30, 2009, and the lowest quarterly return was -19.66% for the quarter ended December 31, 2008.

Average Annual Total Return as of December 31, 2012	One Year	Five Years	Ten Years
Class A Return Before Taxes	7.32%	7.18%	11.00%
Class C Return Before Taxes	12.07%	7.92%	11.39%
Class I Return Before Taxes	14.26%	8.72%	11.92%
Class I Return After Taxes on Distributions	14.21%	8.57%	11.33%
Class I Return After Taxes on Distributions and the Sale of Class I Shares	9.34%	7.53%	10.47%
Class R Return Before Taxes	13.66%	8.28%	11.51%
Russell 2500 Index (reflects no deduction for fees, expenses or taxes)	17.88%	4.34%	10.48%
Russell 2000 Index (reflects no deduction for fees, expenses or taxes)	16.35%	3.55%	9.71%

These returns reflect the maximum sales charge for Class A (5.75%) and any applicable contingent deferred sales charge (“CDSC”) for Class C. The Class A performance shown above for the period prior to November 28, 2003 (commencement of operations) is the performance of Class I shares, adjusted for the sales charge that applies to Class A shares (but not adjusted for any other differences in expenses of the two classes). The Class C performance shown above for the period prior to October 1, 2009 (commencement of operations) is the performance of Class A shares, adjusted for the sales charge that applies to Class C shares (but not adjusted for any other differences in expenses of the two classes) and the Class C performance shown above for the period prior to November 28, 2003 is the performance of Class I shares, adjusted for the sales charge that applies to Class C shares (but not adjusted for any other differences in expenses of the two classes). The Class R performance shown above for the period between August 3, 2009 (re-commencement of operations) and September 11, 2004 (date of closing of Class R) is the performance of Class A shares, adjusted for the sales charge that applies to Class R shares (but not adjusted for any other differences in expenses of the two classes). Class R returns between December 31, 2002 and September 11, 2004 reflect actual total return of the Class R shares. If adjusted for other expenses, returns would be different. Investors cannot invest directly in an Index.

After-tax returns are calculated using the highest historical individual federal income tax rates and do not reflect the impact of state and local taxes.

Actual after-tax returns depend on a shareholder’ s tax situation and the actual characterization of distributions, and may differ from those shown.

After-tax returns are not relevant to shareholders who hold shares in tax-deferred accounts or to shares held by non-taxable entities. After-tax returns for other Classes of shares will vary from the after-tax returns presented for Class I shares. Return After Taxes on Distributions for a period may be the same as Return Before Taxes for that period because no taxable distributions were made during that period. Also, Return After Taxes on Distributions and the Sale of Fund Shares for a period may be greater than or equal to Return After Taxes on Distributions for the same period because of losses realized on the sale of Fund shares.

Investment Adviser. Boston Management and Research (“BMR”).

Investment Sub-Adviser. Atlanta Capital Management Company, LLC (“Atlanta Capital”).

Portfolio Managers

William O. Bell, IV, Vice President and Principal of Atlanta Capital, has managed the Portfolio since 2004 .
W. Matthew Hereford, Vice President and Principal of Atlanta Capital, has managed the Portfolio since 2004 .

Charles B. Reed, Managing Director and Principal of Atlanta Capital , has managed the Portfolio since it commenced operations in 2002.

Purchase and Sale of Fund Shares

Shares of the Fund are currently not available for sale to new investors. Existing Fund investors may purchase, redeem or exchange Fund shares on any business day, which is any day the New York Stock Exchange is open for business. Existing Fund investors may purchase, redeem or exchange Fund shares either through your financial intermediary or directly from the Fund either by writing to Eaton Vance Funds, P.O. Box 9653, Providence, RI 02940-9653, or by calling 1-800-262-1122. The minimum initial purchase or exchange into the Fund is \$1,000 for each Class (with the exception of Class I) and \$250,000 for Class I (waived in certain circumstances). There is no minimum for subsequent investments.

For important information about taxes and financial intermediary compensation, please turn to “Important Information Regarding Fund Shares” on page 18 of this Prospectus.

Important Information Regarding Fund Shares

Tax Information

Each Fund’ s distributions are expected to be taxed as ordinary income and/or capital gains, unless you are exempt from taxation.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank) (collectively, “financial intermediaries”), a Fund, its principal underwriter and its affiliates may pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the financial intermediary and your salesperson to recommend a Fund over another investment. Ask your salesperson or visit your financial intermediary’ s website for more information.

Investment Objectives & Principal Policies and Risks

Each Fund and SMID-Cap Portfolio *are* permitted to engage in the following investment practices to the extent set forth in “Fund Summaries” above. References to the “Fund” below are to each Fund and SMID-Cap Portfolio, as applicable.

A statement of the investment objective and principal investment policies and risks of the Fund is set forth above in Fund Summaries .. As noted in the Fund Summaries , SMID-Cap Fund seeks to achieve its investment objective by investing in the Portfolio named therein, which has the same investment objective and policies as the Fund. Set forth below is additional information about such policies and risks of the Fund described in Fund Summaries above. Information also is included about other types of investments and practices that the Fund may engage in from time to time.

Foreign and Emerging Market Investments. Investments in foreign issuers could be affected by factors not present in the United States, including expropriation, armed conflict, confiscatory taxation, lack of uniform accounting and auditing standards, less publicly available financial and other information, and potential difficulties in enforcing contractual obligations. Because foreign issuers may not be subject to uniform accounting, auditing and financial reporting standard practices and requirements and regulatory measures comparable to those in the United States, there may be less publicly available information about such foreign issuers. Settlements of securities transactions in foreign countries are subject to risk of loss, may be delayed and are generally less frequent than in the United States, which could affect the liquidity of the Fund’ s assets.

As an alternative to holding foreign-traded investments, the Fund may invest in dollar-denominated investments of foreign companies that trade on U.S. exchanges or in the U.S. over-the-counter market (including depository receipts that evidence ownership in underlying foreign investments); unless otherwise stated in Fund Summaries, such investments are not subject to any stated limitation on investing in foreign investments.

The foregoing risks of foreign investing can be more significant in less developed countries characterized as emerging market countries, which may offer higher potential for gains and losses than investments in the developed markets of the world. Political and economic structures in emerging market countries generally lack the social, political and economic stability of developed countries, which may affect the value of the Fund’ s investments in these countries and also the ability of the Fund to access markets in such countries.

Governmental actions can have a significant effect on the economic conditions in emerging market countries, which also may adversely affect the value and liquidity of the Fund’ s investments. The laws of emerging market countries relating to the limited liability of corporate shareholders, fiduciary duties of officers and directors, and bankruptcy of state enterprises are generally less well developed than or different from such laws in the United States. It may be more difficult to obtain a judgment in the courts of these countries than it is in the United States. Disruptions due to work stoppages and trading improprieties in foreign securities markets have caused such markets to close. If extended closings were to occur in stock markets where the Fund is heavily invested, the Fund’ s ability to redeem Fund shares could become impaired. In such circumstances, the Fund may have to sell more liquid securities than it would otherwise choose to sell. Emerging market securities are also subject to speculative trading, which contributes to their volatility.

Foreign Currencies. The value of foreign assets and currencies as measured in U.S. dollars may be affected favorably or unfavorably by changes in foreign currency rates and exchange control regulations, application of foreign tax laws (including withholding tax), governmental administration of economic or monetary policies (in this country or abroad), and relations between nations and trading. Foreign currencies also are subject to settlement, custodial and other operational risks. Currency exchange rates can be affected unpredictably by intervention by U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad. Costs are incurred in connection with conversions between currencies. The Fund may engage in spot transactions and forward foreign currency exchange contracts, purchase and sell options on currencies and purchase and sell currency futures contracts and related options thereon (collectively, “Currency Instruments”) to seek to hedge against the decline in the value of

currencies in which its portfolio holdings are denominated against the U.S. dollar. Use of Currency Instruments may involve substantial currency risk and may also involve counterparty, leverage or liquidity risk.

Derivatives. The Fund may enter into derivatives transactions with respect to any security or other instrument in which it is permitted to invest or any related security, instrument, index or economic indicator (“reference instruments”). The Fund may engage in derivative transactions to seek return, to hedge against fluctuations in securities prices, interest rates or currency exchange rates, or as a substitute for the purchase or sale of securities or currencies. Derivatives are financial instruments the value of which is derived from the underlying reference instrument. Derivatives transactions can involve substantial risk. Derivatives typically allow the Fund to increase or decrease the level of risk to which the Fund is exposed more quickly and efficiently than transactions in other types of instruments. The Fund incurs costs in connection with opening and closing derivatives positions. The Fund may engage in the derivative transactions set forth below, as well as in other derivative transactions with substantially similar characteristics and risks.

Certain derivative transactions may give rise to a form of leverage. The Fund is required to segregate or “ earmark ” liquid assets or otherwise cover the Fund ’ s obligation created by a transaction that may give rise to leverage. The use of leverage may cause the Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its obligations or to meet segregation requirements. Leverage may cause the Fund to be more volatile than if it had not been leveraged, as certain types of leverage may exaggerate the effect of any increase or decrease in the value of the Fund ’ s portfolio securities. The loss on leverage transactions may substantially exceed the initial investment.

The use of derivatives can lead to losses because of adverse movements in the price or value of the asset, index, rate or instrument underlying a derivative, due to failure of a counterparty or due to tax or regulatory constraints. Derivatives risk may be more significant when derivatives are used to enhance return or as a substitute for a cash investment position, rather than solely to hedge the risk of a position held by the Fund.

When derivatives are used to gain or limit exposure to a particular market or market segment, their performance may not correlate as expected to the performance of such market thereby causing the Fund to fail to achieve its original purpose for using such derivatives. A decision as to whether, when and how to use derivatives involves the exercise of specialized skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. Derivative instruments may be difficult to value, may be illiquid, and may be subject to wide swings in valuation caused by changes in the value of the underlying instrument. If a derivative ’ s counterparty is unable to honor its commitments, the value of Fund shares may decline and the Fund could experience delays in the return of collateral or other assets held by the counterparty. The loss on derivative transactions may substantially exceed the initial investment.

Options on Securities, Indices and Currencies. The Fund may engage in transactions in exchange-traded and over-the-counter (“OTC”) options. There are several risks associated with transactions in options such as imperfect correlation, counterparty risk and an insufficient liquid secondary market for particular options.

By buying a put option, the Fund acquires a right to sell the underlying instrument at the exercise price, thus limiting the Fund's risk of loss through a decline in the market value of the instrument until the put option expires. The Fund will pay a premium to the seller of the option for the right to receive payments of cash to the extent that the value of the applicable instrument declines below the exercise price as of the option valuation date. If the price of the instrument is above the exercise price of the option as of the option valuation date, the option expires worthless and the Fund will not be able to recover the option premium paid to the seller. The Fund may purchase uncovered put options. The Fund also has authority to write (i.e., sell) put options. The Fund will receive a premium for writing a put option, which increases the Fund's return. In writing a put option, the Fund has the obligation to buy the underlying instrument at an agreed upon price if the price of such instrument decreases below the exercise price. If the value of the instrument on the option expiration date is above the exercise price, the option will generally expire worthless and the Fund, as option seller, will have no obligation to the option holder.

A purchased call option gives the Fund the right to buy, and obligates the seller to sell, the underlying instrument at the exercise price at any time during the option period. The Fund also is authorized to write (i.e., sell) call options on instruments in which it may invest and to enter into closing purchase transactions with respect to such options. A covered call option is an option in which the Fund, in return for a premium, gives another party a right to buy specified instruments owned by the Fund at a specified future date and price set at the time of the contract. The Fund's ability to sell the instrument underlying a call option may be limited while the option is in effect unless the Fund enters into a closing purchase transaction. Uncovered call options have speculative characteristics and are riskier than covered call options because there is no underlying instrument held by the Fund that can act as a partial hedge. As the writer of a covered call option or an index call option, the Fund forgoes, during the option ’ s life, the opportunity to profit from increases in the market value of the security or the index covering the call option above the sum of the option premium received and the exercise price of the call, but has retained the risk of loss, minus the option premium received, should the price of the underlying security or index decline.

OTC options involve risk that the issuer or counterparty will fail to perform its contractual obligations. Participants in these markets are typically not subject to the same credit evaluation and regulatory oversight as are members of “exchange-based” markets. By engaging in option transactions in these markets, the Fund may take a credit risk with regard to parties with which it trades and also may bear the risk of settlement default.

Covered Calls and Equity Collars. While the Fund generally will write only covered call options, it may sell the instrument underlying a call option prior to entering into a closing purchase transaction on up to 5% of the Fund’s net assets, provided that such sale will not occur more than three days prior to the option buy back. In an equity collar, the Fund simultaneously writes a call option and purchases a put option on the same instrument.

Forward Foreign Currency Exchange Contracts. Forward foreign currency exchange contracts are individually negotiated and privately traded so they are dependent upon the creditworthiness of the counterparty. They are subject to the risk of political and economic factors applicable to the countries issuing the underlying currencies. Furthermore, unlike trading in most other types of instruments, there is no systematic reporting of last sale information with respect to the foreign currencies underlying forwards. As a result, available information may not be complete.

Futures Contracts. The Fund may engage in transactions in futures contracts and options on futures contracts. Futures are standardized, exchange-traded contracts that obligate a purchaser to take delivery, and a seller to make delivery, of a specific amount of an asset at a specified future date at a specified price. The Fund also is authorized to purchase or sell call and put options on futures contracts. The primary risks associated with the use of futures contracts and options are imperfect correlation, liquidity, unanticipated market movement and counterparty risk.

Equity Swaps. Equity swaps involve the exchange by the Fund with another party of their respective returns as calculated on a notional amount of an equity index (such as the S&P 500 Index), basket of equity securities, or individual equity security. The success of swap agreements is dependent on the investment adviser's ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments. Other risks include liquidity and counterparty risk.

Short Sales. The Fund may engage in covered short sales (on individual securities held or on an index or basket of securities whose constituents are held in whole or in part or for which liquid assets have been segregated). A short sale on an individual security typically involves the sale of a security that is borrowed from a broker or other institution to complete the sale. Short sales expose the seller to the risk that it will be required to acquire securities to replace the borrowed securities (also known as "covering" the short position) at a time when the securities sold short have appreciated in value, thus resulting in a loss. When making a short sale, the Fund must segregate liquid assets equal to (or otherwise cover) its obligations under the short sale. The seller of a short position generally realizes a profit on the transaction if the price it receives on the short sale exceeds the cost of closing out the position by purchasing securities in the market, but generally realizes a loss if the cost of closing out the short position exceeds the proceeds of the short sale.

Smaller Companies. Securities of smaller, less seasoned companies, which may include legally restricted securities, are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk. Because of the absence of any public trading market for some of these investments (such as those which are legally restricted) it may take longer to liquidate these positions at fair value than would be the case for publicly traded securities.

Real Estate Investment Trusts. Real estate investment trusts ("REITs") are subject to the special risks associated with real estate. Securities of companies in the real estate industry are sensitive to factors such as changes in real estate values, property taxes, interest rates, cash flow of underlying real estate assets, occupancy rates, government regulations affecting zoning, land use, and rents, and the management skill and creditworthiness of the issuer. Companies in the real estate industry may also be subject to liabilities under environmental and hazardous waste laws, among others. Changes in underlying real estate values may have an exaggerated effect to the extent that REITs concentrate investments in particular geographic regions or property types.

Pooled Investment Vehicles. Subject to applicable limitations, the Fund may invest in pooled investment vehicles, including open- and closed-end investment companies affiliated or unaffiliated with the investment adviser, and exchange-traded funds. The market for common shares of closed-end investment companies and exchange-traded funds, which are generally traded on an exchange, is affected by the demand for those securities, regardless of the value of the fund's underlying portfolio assets. The Fund will indirectly bear its proportionate share of any management fees and expenses paid by unaffiliated and certain affiliated pooled investment vehicles in which it invests, except that management fees of affiliated funds may be waived. To the extent they exceed 0.01%, the costs associated with such investments will be reflected in Acquired Fund Fees and Expenses in the Annual Fund Operating Expenses in Fund Summaries.

Illiquid Securities. The Fund may not invest more than 15% of its net assets in illiquid securities, which may be difficult to value properly and may involve greater risks than liquid securities. Illiquid securities include those legally restricted as to resale (such as those issued in private placements), and may include securities eligible for resale pursuant to Rule 144A thereunder. Certain Rule 144A securities may be treated as liquid securities if the

investment adviser determines that such treatment is warranted. Even if determined to be liquid, holdings of these securities may increase the level of Fund illiquidity if eligible buyers become uninterested in purchasing them.

Borrowing. The Fund is authorized to borrow in accordance with applicable regulations, but currently intends to borrow only for temporary purposes (such as to satisfy redemption requests, to remain fully invested in anticipation of expected cash inflows and to settle transactions). The Fund will not purchase additional investment securities while outstanding borrowings exceed 5% of the value of its total assets.

Securities Lending. The Fund may seek to earn income by lending portfolio securities to broker-dealers or other institutional borrowers. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the securities loaned if the borrower of the securities fails financially. Loans will only be made to firms that have been approved by the investment adviser and the investment adviser or the securities lending agent will periodically monitor the financial condition of such organizations while any loans are outstanding. In addition, loans will only be made when the investment adviser believes the expected returns, net of expenses, justify the attendant risk. Securities loans currently are required to be secured continuously by

collateral in cash, cash equivalents (such as money market instruments) or other liquid securities held by the custodian and maintained in an amount at least equal to the market value of the securities loaned. The Fund may lend up to one-third of the value of its total assets (including borrowings) or such other amount as is permitted under relevant law.

Cash and Cash Equivalents. The Fund may invest in cash or cash equivalents, including high quality short-term instruments or an affiliated investment company that invests in such instruments.

General .. Focused Growth Fund's and SMID-Cap Fund's investment objective may not be changed without shareholder approval. Certain other policies may be changed without shareholder approval. The Horizon Growth Fund's and Select Equity Fund's investment objective and certain other policies may be changed without shareholder approval. During unusual market conditions, the Fund may invest up to 100% of its assets in cash or cash equivalents temporarily, which may be inconsistent with its investment objective(s) and other policies. The Fund might not use all of the strategies and techniques or invest in all of the types of securities described in this Prospectus or the Statement of Additional Information. While at times the Fund may use alternative investment strategies in an effort to limit its losses, it may choose not to do so.

The Fund's 80% Policy will not be changed unless shareholders are given at least 60 days' advance written notice of the change and, for the purpose of such policy, net assets include any assets purchased with borrowings for investment purposes.

Focused Growth Fund's, Horizon Growth Fund's and Select Equity Fund's investment policies include a provision allowing the Fund to invest (i) all of its investable assets in an open-end management investment company with substantially the same investment objective, policies and restrictions as the Fund; or (ii) in more than one open-end management investment company sponsored by Eaton Vance or its affiliates, provided any such companies have investment objectives, policies and restrictions that are consistent with those of the Fund. Any such company or companies would be advised by the Fund's investment adviser (or an affiliate) and the Fund would not pay directly any advisory fee with respect to the assets so invested. Focused Growth Fund, Horizon Growth Fund and Select Equity Fund may initiate investments in one or more such investment companies at any time without shareholder approval.

Management and Organization

Management .. The investment adviser of Select Equity Fund is Eaton Vance Management ("Eaton Vance") and the investment adviser of SMID-Cap Portfolio, Focused Growth Fund and Horizon Growth Fund is Boston Management and Research ("BMR"), a subsidiary of Eaton Vance, with offices at Two International Place, Boston, MA 02110. Eaton Vance has been managing assets since 1924 and managing mutual funds since 1931. Eaton Vance and its affiliates currently manage over \$ 230 billion on behalf of mutual funds, institutional clients and individuals.

Pursuant to an investment sub-advisory agreement, Eaton Vance or BMR have delegated the investment management of SMID-Cap Portfolio, Focused Growth Fund, Horizon Growth Fund and Select Equity Fund to Atlanta Capital Management Company, LLC ("Atlanta Capital"), with offices at 1075 Peachtree Street NE, Suite 2100, Atlanta, GA 30309. Atlanta Capital is a majority-owned affiliate of Eaton Vance Corp. BMR pays Atlanta Capital a portion of each advisory fee for sub-advisory services provided to the Portfolio and each Fund.

The day-to-day management of SMID-Cap Portfolio, Focused Growth Fund, Horizon Growth Fund and Select Equity Fund is the responsibility of a team of Atlanta Capital investment professionals. Each team meets to discuss investment holdings, prospective investments and portfolio composition and manages and provides research. The fees paid to Eaton Vance or BMR and the identities of the members of each team are described below:

Focused Growth Fund. Prior to July 23, 2012, the Fund invested its assets in Focused Growth Portfolio, a separate registered investment company with the same objective and policies as the Fund (the "Portfolio"). The

Portfolio paid advisory fees to BMR on the same schedule as that of the Fund . Under its investment advisory agreement with Focused Growth Fund , BMR receives a monthly advisory fee as follows:

Average Daily Net Assets for the Month	Annual Fee Rate (for each level)
Up to \$500 million	0.650%
\$500 million but less than \$1 billion	0.625%
\$1 billion but less than \$2.5 billion	0.600%
\$2.5 billion and over	0.575%

For the fiscal year ended September 30, 2012 , the effective annual rate of investment advisory fee paid to BMR, based on average daily net assets (and including the adviser fee allocated from the Portfolio) was 0.65 % of the Fund' s average daily net assets.

Richard B. England and Paul J. Marshall co-manage the Focused Growth Fund .. Mr. England is a Managing Director and Principal and a member of the Management Committee of Atlanta Capital. He has been employed by Atlanta Capital for more than five years and served as portfolio manager of Focused Growth Portfolio since 2008. Mr. Marshall is a Vice President and Principal of Atlanta Capital and has served as portfolio manager of Focused Growth Portfolio since 2003.

Horizon Growth Fund. Under the Fund' s investment advisory agreement, BMR receives a monthly advisory fee as follows:

Average Daily Net Assets for the Month	Annual Fee Rate (for each level)
up to \$500 million	0.800%
\$500 million but less than \$1 billion	0.750%
\$1 billion but less than \$1.5 billion	0.725%
\$1.5 billion but less than \$2.5 billion	0.700%
\$2.5 billion and over	0.675%

For the fiscal year ended September 30, 2012 , the effective annual rate of investment advisory fee paid to BMR, based on average daily net assets of the Fund , was 0.80 %.

Richard B. England, Brian P. Mansfield and Glenn H. Shaw serve as the co-portfolio managers of the Fund. Messrs. England, Mansfield and Shaw have served as portfolio managers of the Fund since May 2011. For information on Mr. England, please see above. Mr. Mansfield and Mr. Shaw are both Vice Presidents and Principals of Atlanta Capital and have been employed by Atlanta Capital for more than five years.

Select Equity Fund. Under its investment advisory and administrative agreement with the Fund, Eaton Vance receives a monthly fee as follows:

Average Daily Net Assets for the Month	Annual Fee Rate (for each level)
Up to \$500 million	0.800%
\$500 million but less than \$1 billion	0.775%
\$1 billion but less than \$2.5 billion	0.750%
\$2.5 billion but less than \$5 billion	0.730%
\$5 billion and over	0.715%

For the fiscal period ended September 30, 2012, the effective annualized rate of investment advisory fee paid to Eaton Vance, based on average daily net assets of the Fund, was 0.80%.

William O. Bell, IV, W. Matthew Hereford and Charles B. Reed comprise the management team for the Fund. Mr. Bell and Mr. Hereford, Vice Presidents and Principals of Atlanta Capital, and Mr. Reed, a Managing Director and Principal of Atlanta Capital, have managed the Fund since its inception in 2012. All have been employed by Atlanta Capital for more than five years.

SMID-Cap Portfolio. Under its investment advisory agreement with SMID-Cap Portfolio, BMR receives a monthly advisory fee as follows:

Average Daily Net Assets for the Month	Annual Fee Rate (for each level)
Up to \$500 million	1.0000%
\$500 million but less than \$1 billion	0.9375%
\$1 billion but less than \$2.5 billion	0.8750%
\$2.5 billion but less than \$5 billion	0.8125%
\$5 billion and over	0.7500%

For the fiscal year ended September 30, 2012 , the effective annualized rate of investment advisory fee paid to BMR, based on average daily net assets of the Portfolio, was 0. 91 %.

William O. Bell, IV, W. Matthew Hereford and Charles B. Reed comprise the team of investment professionals for the SMID-Cap Portfolio. Mr. Bell and Mr. Hereford, Vice Presidents and Principals of Atlanta Capital have managed the Portfolio since

2004. Mr. Reed, a Managing Director and Principal of Atlanta Capital, has managed the Portfolio since operations commenced in 2002. All have been employed by Atlanta Capital for more than five years.

The Funds' annual reports provide information regarding the basis for the Trustees' approval of SMID-Cap Portfolio's, Focused Growth Fund's and Horizon Growth Fund's investment advisory agreements, Select Equity Fund's investment advisory and administrative agreement and the Portfolio's and Funds' investment sub-advisory agreements.

The Statement of Additional Information provides additional information about the investment management teams, including information about compensation, other accounts managed by team members, and the team members' ownership of Fund shares with respect to which that team member has management responsibilities.

Eaton Vance serves as the administrator of each Fund, providing each Fund with administrative services and related office facilities. Eaton Vance does not currently receive a fee for serving as administrator to Focused Growth Fund and SMID-Cap Fund. Horizon Growth Fund is authorized to pay Eaton Vance an annual fee of 0.15% of average daily net assets. For the fiscal year ended September 30, 2012, Horizon Growth Fund paid Eaton Vance administration fees of 0.15% of average daily net assets.

Eaton Vance also serves as the sub-transfer agent for each Fund. For the sub-transfer agency services it provides, Eaton Vance receives an aggregate fee based upon the actual expenses it incurs for its sub-transfer agency services. This fee is paid to Eaton Vance by a Fund's transfer agent from the fees the transfer agent receives from the Eaton Vance funds.

Organization. Each Fund except Horizon Growth Fund is a series of Eaton Vance Growth Trust and Horizon Growth Fund is a series of Eaton Vance Mutual Funds Trust. Eaton Vance Growth Trust and Eaton Vance Mutual Funds Trust are Massachusetts business trusts. Each Fund offers multiple classes of shares. Each Class represents a pro rata interest in a Fund but is subject to different expenses and rights. The Funds do not hold annual shareholder meetings but may hold special meetings for matters that require shareholder approval (such as electing or removing trustees, approving management or advisory contracts or changing investment policies that may only be changed with shareholder approval).

As a Portfolio investor, SMID-Cap Fund may be asked to vote on certain Portfolio matters (such as changes in certain Portfolio investment restrictions). When necessary, SMID-Cap Fund will hold a meeting of its shareholders to consider Portfolio matters and then vote its interest in the Portfolio in proportion to the votes cast by its shareholders. There may be other Portfolio investors in addition to SMID-Cap Fund. Purchase and redemption activities by other Portfolio investors may impact the management of SMID-Cap Portfolio and its ability to achieve its objective. SMID-Cap Fund can withdraw its Portfolio investment at any time without shareholder approval.

Because the Funds use this combined Prospectus, a Fund could be held liable for a misstatement or omission made about another Fund.

Related Performance Information for Select Equity Fund

Select Equity Fund has substantially the same investment objective, policies and strategies as other managed accounts that are managed by Atlanta Capital. Listed below is "composite performance" for Atlanta Capital with regard to all of these similarly managed accounts. The managed accounts included in the composite are not all mutual funds registered under the 1940 Act, and therefore certain of the accounts are not subject to investment limitations, diversification requirements and other restrictions imposed by the 1940 Act and the Internal Revenue Code. If such requirements were applicable to all of the managed accounts, the performance shown may have been lower.

This composite data is provided to illustrate the past performance of Atlanta Capital in managing the strategy employed by the Fund and should not be considered as an indication of future performance of the Fund or Atlanta Capital. The performance figures shown below reflect the deduction of the highest fee on the current

standard institutional fee schedule for the investment style. The fees and expenses of the Fund are higher than those of an institutional account. If all of the managed accounts had been subject to the same fees and expenses as the Fund, the performance shown for the composite would have been lower. The performance figures were calculated in accordance with the industry standards for preparing and presenting investment adviser performance. This methodology differs from the Securities and Exchange Commission's standardized method that the Fund uses to calculate its own performance.

The performance of the composite is shown in the table below for the stated periods ended December 31, 2012. Also shown is the performance of the broad-based securities index used as the composite's benchmark.

Average Annual Total Return	1 Year	3 Years	5 Years	Since Inception*
High Quality Select Equity Composite	20.42%	13.98%	5.17%	6.95%
Russell 1000 Index (reflects no deduction for fees, expenses or taxes)	16.42%	11.12%	1.92%	3.55%

* Inception date for the Composite was October 1, 2006. Assets in the composite as of December 31, 2012 were approximately \$30 million. Investors cannot invest directly in an Index.

Valuing Shares

Each Fund values its shares once each day only when the New York Stock Exchange (the "Exchange") is open for trading (typically Monday through Friday), as of the close of regular trading on the Exchange (normally 4:00 p.m. eastern time). The purchase price of Fund shares is their net asset value (plus a sales charge for Class A shares), which is derived from the value of Fund or Portfolio holdings. When purchasing or redeeming Fund shares through a financial intermediary, your financial intermediary must receive your order by the close of regular trading on the Exchange in order for the purchase price or the redemption price to be based on that day's net asset value per share. It is the financial intermediary's responsibility to transmit orders promptly. Each Fund may accept purchase and redemption orders as of the time of their receipt by certain financial intermediaries (or their designated intermediaries).

The Trustees have adopted procedures for valuing investments and have delegated to the investment adviser the daily valuation of such investments. The investment advisers have delegated daily valuation of the Portfolio and the Funds to the sub-adviser. Pursuant to the procedures, exchange-listed securities normally are valued at closing sale prices. The investment adviser or sub-adviser may use the fair value of a security if market prices are unavailable or deemed unreliable, or if events occur after the close of a securities market (usually a foreign market) and before portfolio assets are valued which would materially affect net asset value. In addition, for foreign equity securities that meet certain criteria, the Trustees have approved the use of a fair value service that values such securities to reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or other instruments that have a strong correlation to the fair-valued securities. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities trade on days when Fund shares are not priced, the value of securities held by a Fund can change on days when Fund shares cannot be redeemed. The investment adviser and sub-adviser expect to fair value domestic securities in limited circumstances, such as when the securities are subject to restrictions on resale. Eaton Vance has established a Valuation Committee that oversees the valuation of investments.

Purchasing Shares

You may purchase shares through your financial intermediary or by mailing an account application form to the transfer agent (see back cover for address). Purchase orders will be executed at the net asset value (plus any applicable sales charge) next determined after their receipt in proper form (meaning that they are complete and contain all necessary information) by a Fund's transfer agent. A Fund's transfer agent or your financial intermediary must receive your purchase in proper form no later than the close of regular trading on the Exchange (normally 4:00 p.m. eastern time) for your purchase to be effected at that day's net asset value. If you purchase shares through a financial intermediary, that intermediary may charge you a fee for executing the purchase for you. Each Fund may suspend the sale of its shares at any time and any purchase order may be refused for any reason. The Funds do not issue share certificates.

Class A, Class B, Class C and Class R Shares

Your initial investment must be at least \$1,000. After your initial investment, additional investments may be made in any amount at any time by sending a check payable to the order of the Fund or the transfer agent directly to the transfer agent (see back cover for address). Please include your name and account number and the name of the Fund and Class of shares with each investment. You also may make additional investments by

accessing your account via the Eaton Vance website at www.eatonvance.com. Purchases made through the Internet from a pre-designated bank account will have a trade date that is the first business day after the purchase is requested. For more information about purchasing shares through the Internet, please call 1-800-262-1122 Monday through Friday, 8:00 a.m. to 6:00 p.m. (eastern time).

You may make automatic investments of \$50 or more each month or each quarter from your bank account. You can establish bank automated investing on the account application or by providing written instructions. Please call 1-800-262-1122 Monday through Friday, 8:00 a.m. to 6:00 p.m. (eastern time) for further information. The minimum initial investment amount and Fund policy of redeeming accounts with low account balances are waived for bank automated investing accounts (other than for Class I), certain group purchase plans (including tax-deferred retirement and other pension plans and proprietary fee-based

programs sponsored by financial intermediaries) and for persons affiliated with Eaton Vance, its affiliates and certain Fund service providers (as described in the Statement of Additional Information).

Class I Shares

Class I shares are offered to clients of financial intermediaries who (i) charge such clients an ongoing fee for advisory, investment, consulting or similar services, or (ii) have entered into an agreement with the principal underwriter to offer Class I shares through a no-load network or platform. Such clients may include individuals, corporations, endowments, foundations and qualified plans (including tax-deferred retirement plans and profit sharing plans). Class I shares also are offered to investment and institutional clients of Eaton Vance and its affiliates and certain persons affiliated with Eaton Vance and certain Fund service providers. Your initial investment must be at least \$250,000. Subsequent investments of any amount may be made at any time, including through automatic investment each month or quarter from your bank account. You may make automatic investments of \$50 or more each month or each quarter from your bank account. You can establish bank automated investing on the account application or by providing written instructions. Please call 1-800-262-1122 Monday through Friday, 8:00 a.m. to 6:00 p.m. (eastern time) for further information.

The minimum initial investment is waived for persons affiliated with Eaton Vance, its affiliates and certain Fund service providers (as described in the Statement of Additional Information). The minimum initial investment also is waived for individual accounts of a financial intermediary that charges an ongoing fee for its services or offers Class I shares through a no-load network or platform (in each case, as described above), provided the aggregate value of such accounts invested in Class I shares is at least \$250,000 (or is anticipated by the principal underwriter to reach \$250,000) and for corporations, endowments, foundations and qualified plans with assets of at least \$100 million.

Class I shares may be purchased through a financial intermediary or by requesting your bank to transmit immediately available funds (Federal Funds) by wire. To make an initial investment by wire, you must complete an account application and telephone Eaton Vance Shareholder Services at 1-800-262-1122 to be assigned an account number. You may request an account application by calling 1-800-262-1122 Monday through Friday, 8:00 a.m. to 6:00 p.m. (eastern time). Shareholder Services must be advised by telephone of each additional investment by wire.

Restrictions on Excessive Trading and Market Timing. The Funds are not intended for excessive trading or market timing. Market timers seek to profit by rapidly switching money into a fund when they expect the share price of the fund to rise and taking money out of the fund when they expect those prices to fall. By realizing profits through short-term trading, shareholders that engage in rapid purchases and sales (including exchanges, if permitted) of a fund's shares may dilute the value of shares held by long-term shareholders. Volatility resulting from excessive purchases and sales of fund shares, especially involving large dollar amounts, may disrupt efficient portfolio management. In particular, excessive purchases and sales of a fund's shares may cause a fund to have difficulty implementing its investment strategies, may force the fund to sell portfolio securities at inopportune times to raise cash or may cause increased expenses (such as increased brokerage costs, realization of taxable capital gains without attaining any investment advantage or increased administrative costs).

A fund that invests all or a portion of its assets in foreign securities may be susceptible to a time zone arbitrage strategy in which shareholders attempt to take advantage of fund share prices that may not reflect developments in a foreign securities market that occur after the close of such market but prior to the pricing of fund shares. In addition, a fund that invests in securities that are, among other things, thinly traded, traded infrequently or relatively illiquid (including restricted securities and certain small- and mid-cap companies) is susceptible to the risk that the current market price for such securities may not accurately reflect current market values. A shareholder may seek to engage in short-term trading to take advantage of these pricing differences (commonly referred to as "price arbitrage"). The investment adviser and sub-adviser are authorized to use the fair value of a security if prices are unavailable or are deemed unreliable (see "Valuing Shares"). The use of fair value

pricing and the restrictions on excessive trading and market timing described below are intended to reduce a shareholder's ability to engage in price or time zone arbitrage to the detriment of the Funds.

The Boards of the Eaton Vance funds have adopted policies to discourage short-term trading and market timing and to seek to minimize their potentially detrimental effects. Pursuant to these policies, if an investor (through one or more accounts) makes more than one round-trip (being a purchase, including an exchange purchase, followed or preceded by a redemption, including an exchange redemption, followed or preceded by a purchase, including an exchange purchase) within 90 days, it generally will be deemed to constitute market timing or excessive trading. Under the policies, each Fund or its principal underwriter will reject or cancel a purchase order, suspend or terminate an exchange privilege or terminate the ability of an investor to invest in the Eaton Vance funds if the Fund or the principal underwriter determines that a proposed transaction involves market timing or excessive trading that it believes is likely to be detrimental to the Fund. Each Fund and its principal underwriter use reasonable efforts to detect market timing and excessive trading activity, but they cannot ensure that they will be able to identify all cases of market timing and excessive trading. Each Fund or its principal underwriter may also reject or cancel any purchase order (including an exchange) from an investor or group of investors for any other reason. Decisions to reject or cancel purchase

orders (including exchanges) in a Fund are inherently subjective and will be made in a manner believed to be in the best interest of a Fund's shareholders. No Eaton Vance fund has any arrangement to permit market timing.

The following fund share transactions (to the extent permitted by a fund's prospectus) generally are exempt from the market timing and excessive trading policy described above because they generally do not raise market timing or excessive trading concerns:

- transactions made pursuant to a systematic purchase plan or as the result of automatic reinvestment of dividends or distributions, or initiated by a Fund (e.g., for failure to meet applicable account minimums);
- transactions made by participants in employer sponsored retirement plans involving participant payroll or employer contributions or loan repayments, redemptions as part of plan terminations or at the direction of the plan, mandatory retirement distributions, or rollovers;
- transactions made by model-based discretionary advisory accounts; or
 - transactions made by an Eaton Vance fund that is structured as a "fund-of-funds", provided the transactions are in response to fund inflows and outflows or are part of a reallocation of fund assets in accordance with its investment policies ..

It may be difficult for a Fund or the principal underwriter to identify market timing or excessive trading in omnibus accounts traded through financial intermediaries. The Funds and the principal underwriter have provided guidance to financial intermediaries (such as banks, broker-dealers, insurance companies and retirement administrators) concerning the application of the Eaton Vance funds' market timing and excessive trading policies to Fund shares held in omnibus accounts maintained and administered by such intermediaries, including guidance concerning situations where market timing or excessive trading is considered to be detrimental to a Fund. Each Fund or its principal underwriter may rely on a financial intermediary's policy to restrict market timing and excessive trading if it believes that policy is likely to prevent market timing that is likely to be detrimental to the Fund. Such policy may be more or less restrictive than a Fund's policy.

Although each Fund or the principal underwriter reviews trading activity at the omnibus account level for activity that indicates potential market timing or excessive trading activity, the Funds and the principal underwriter typically will not request or receive individual account data unless suspicious trading activity is identified. Each Fund and the principal underwriter generally rely on financial intermediaries to monitor trading activity in omnibus accounts in good faith in accordance with their own or Fund policies. Each Fund and the principal underwriter cannot ensure that these financial intermediaries will in all cases apply the policies of the Fund or their own policies, as the case may be, to accounts under their control.

Choosing a Share Class. Each Fund offers different classes of shares. The different classes of shares represent investments in the same portfolio of securities, but the classes are subject to different sales charges and expenses and will likely have different share prices due to differences in class expenses. In choosing the class of shares that suits your investment needs, you should consider:

- how long you expect to own your shares;
- how much you intend to invest;
- the sales charge and total operating expenses associated with owning each class; and
- whether you qualify for a reduction or waiver of any applicable sales charges (see "Reducing or Eliminating Class A Sales Charges" under "Sales Charges" below).

Each investor's considerations are different. You should speak with your financial intermediary to help you decide which class of shares is best for you. Set forth below is a brief description of each class of shares offered by the Funds.

Class A shares are offered at net asset value plus a front-end sales charge of up to 5.75%. This charge is deducted from the amount you invest. The Class A sales charge is reduced for purchases of \$50,000 or more. The sales charge applicable to your purchase may be reduced under the right of accumulation or a statement of intention, which are described in "Reducing or Eliminating Class A Sales Charges" under

“Sales Charges” below. Some investors may be eligible to purchase Class A shares at net asset value under certain circumstances, which are also described below. Class A shares pay distribution and service fees equal to 0.25% annually of average daily net assets.

Class B shares are offered at net asset value with no front-end sales charge, but are only available for purchase upon exchange from another Eaton Vance fund or through reinvestment of distributions. If you sell your Class B shares within six years of purchase, you generally will be subject to a contingent deferred sales charge or “CDSC”. The amount of the CDSC applicable to a redemption of Class B shares decreases over six years, as described in the CDSC schedule in “Contingent Deferred Sales Charge” under “Sales Charges” below. The CDSC is deducted from your redemption proceeds. Under certain circumstances, the Class B CDSC may be waived (such as in the case of the death of the shareholder). See “CDSC Waivers” under “Sales Charges” below. Class B shares pay distribution and service fees equal to 1.00% annually of average daily net

assets. Class B shares automatically convert to Class A shares eight years after purchase. Orders for Class B shares of one or more Eaton Vance funds will be refused when the total value of the purchase (including the aggregate value of all Eaton Vance fund shares held within the purchasing shareholder's account) is \$100,000 or more. Investors considering cumulative purchases of \$100,000 or more, or who, after a purchase of shares, would own shares of Eaton Vance funds with a current market value of \$100,000 or more, should consider whether Class A shares would be more advantageous and consult their financial intermediary.

Class C shares are offered at net asset value with no front-end sales charge. If you sell your Class C shares within one year of purchase, you generally will be subject to a CDSC. The CDSC is deducted from your redemption proceeds. Under certain circumstances, the Class C CDSC may be waived (such as certain redemptions from tax-deferred retirement plan accounts). See "CDSC Waivers" under "Sales Charges" below. Class C shares pay distribution and service fees equal to 1.00% annually of average daily net assets.

Orders for Class C shares of one or more Eaton Vance funds will be refused when the total value of the purchase (including the aggregate value of all Eaton Vance fund shares held within the purchasing shareholder's account) is \$1,000,000 or more. Investors considering cumulative purchases of \$1,000,000 or more, or who, after a purchase of shares, would own shares of Eaton Vance funds with a current market value of \$1,000,000 or more, should consider whether Class A shares would be more advantageous and consult their financial intermediary.

Class I shares are offered to clients of financial intermediaries who (i) charge such clients an ongoing fee for advisory, investment, consulting or similar services, or (ii) have entered into an agreement with the principal underwriter to offer Class I shares through a no-load network or platform. Such clients may include individuals, corporations, endowments, foundations and qualified plans (as described above). Class I shares are also offered to investment and institutional clients of Eaton Vance and its affiliates and certain persons affiliated with Eaton Vance and certain Fund service providers. Class I shares do not pay distribution or service fees.

Class R shares are offered at net asset value with no front-end sales charge to retirement plan clients of financial intermediaries who charge such clients an ongoing fee for advisory, investment, consulting or similar services. Retirement plan clients include pension plans (including tax-deferred retirement plans and profit-sharing plans), Individual Retirement Account rollovers and non-qualified deferred compensation programs. Class R shares pay distribution and service fees equal to 0.50% annually of average daily net assets.

Payments to Financial Intermediaries. In addition to payments disclosed under "Sales Charges" below, the principal underwriter, out of its own resources, may make cash payments to certain financial intermediaries who provide marketing support, transaction processing and/or administrative services and, in some cases, include some or all Eaton Vance funds in preferred or specialized selling programs. Payments made by the principal underwriter to a financial intermediary may be significant and are typically in the form of fees based on Fund sales, assets, transactions processed and/or accounts attributable to that financial intermediary. Financial intermediaries also may receive amounts from the principal underwriter in connection with educational or due diligence meetings that include information concerning Eaton Vance funds. The principal underwriter may pay or allow other promotional incentives or payments to financial intermediaries to the extent permitted by applicable laws and regulations.

Certain financial intermediaries that maintain fund accounts for the benefit of their customers provide sub-accounting, recordkeeping and/or administrative services to the Eaton Vance funds and are compensated for such services by the funds. As used in this Prospectus, the term "financial intermediary" includes any broker, dealer, bank (including bank trust departments), registered investment adviser, financial planner, a retirement plan and/or its administrator, their designated intermediaries and any other firm having a selling, administration or similar agreement with the principal underwriter or its affiliates.

Sales Charges

Class A Front-End Sales Charge. Class A shares are offered at net asset value per share plus a sales charge that is determined by the amount of your investment. The current sales charge schedule is:

Amount of Purchase	Sales Charge* as Percentage of Offering Price	Sales Charge* as Percentage of Net Amount Invested	Dealer Commission as a Percentage of Offering Price
Less than \$50,000	5.75%	6.10%	5.00%
\$50,000 but less than \$100,000	4.75%	4.99%	4.00%
\$100,000 but less than \$250,000	3.75%	3.90%	3.00%
\$250,000 but less than \$500,000	3.00%	3.09%	2.50%
\$500,000 but less than \$1,000,000	2.00%	2.04%	1.75%
\$1,000,000 or more	0.00**	0.00**	1.00%

* Because the offering price per share is rounded to two decimal places, the actual sales charge you pay on a purchase of Class A shares may be more or less than your total purchase amount multiplied by the applicable sales charge percentage.

** No sales charge is payable at the time of purchase on investments of \$1 million or more. A CDSC of 1.00% will be imposed on such investments (as described below) in the event of redemptions within 18 months of purchase.

The principal underwriter may also pay commissions of up to 1.00% on sales of Class A shares made at net asset value to certain tax-deferred retirement plans.

Reducing or Eliminating Class A Sales Charges. Front-end sales charges on purchases of Class A shares may be reduced under the right of accumulation or under a statement of intention. To receive a reduced sales charge, you must inform your financial intermediary or a Fund at the time you purchase shares that you qualify for such a reduction. If you do not let your financial intermediary or the Fund know you are eligible for a reduced sales charge at the time of purchase, you will not receive the discount to which you may otherwise be entitled.

Right of Accumulation. Under the right of accumulation, the sales charge you pay is reduced if the current market value of your holdings in a Fund or any other Eaton Vance fund (based on the current maximum public offering price) plus your new purchase total \$50,000 or more. Class A shares of Eaton Vance U.S. Government Money Market Fund cannot be included under the right of accumulation. Shares owned by you, your spouse and children under age twenty-one may be combined for purposes of the right of accumulation, including shares held for the benefit of any of you in omnibus or “street name” accounts. In addition, shares held in a trust or fiduciary account of which any of the foregoing persons is the sole beneficiary (including retirement accounts) may be combined for purposes of the right of accumulation. Shares purchased and/or owned in a SEP, SARSEP and SIMPLE IRA plan also may be combined for purposes of the right of accumulation for the plan and its participants. You may be required to provide documentation to establish your ownership of shares included under the right of accumulation (such as account statements for you, your spouse and children or marriage certificates, birth certificates and/or trust or other fiduciary-related documents).

Statement of Intention. Under a statement of intention, purchases of \$50,000 or more made over a 13-month period are eligible for reduced sales charges. Shares eligible under the right of accumulation (other than those included in employer-sponsored retirement plans) may be included to satisfy the amount to be purchased under a statement of intention. Under a statement of intention, the principal underwriter may hold 5% of the dollar amount to be purchased in escrow in the form of shares registered in your name until you satisfy the statement or the 13-month period expires. A statement of intention does not obligate you to purchase (or a Fund to sell) the full amount indicated in the statement.

Class A shares are offered at net asset value (without a sales charge) to tax-deferred retirement plans and deferred compensation plans, and to clients of financial intermediaries who (i) charge an ongoing fee for advisory, investment, consulting or similar services, or (ii) have entered into an agreement with the principal underwriter to offer Class A shares through a no-load network or platform, or self-directed brokerage accounts that may or may not charge transaction fees to customers. Such clients may include individuals, corporations,

endowments, foundations and pension plans (including tax-deferred retirement plans and profit sharing plans). Class A shares also are offered at net asset value to investment and institutional clients of Eaton Vance and its affiliates; certain persons affiliated with Eaton Vance; and to certain fund service providers as described in the Statement of Additional Information. Class A shares may also be purchased at net asset value pursuant to the reinvestment privilege and exchange privilege and when distributions are reinvested. See “Shareholder Account Features” for details.

Contingent Deferred Sales Charge. Class A, Class B and Class C shares are subject to a CDSC on certain redemptions. Class A shares purchased at net asset value in amounts of \$1 million or more are subject to a 1.00% CDSC if redeemed within 18 months of purchase. Class C shares are subject to a 1.00% CDSC if redeemed within one year of purchase. Class B shares are subject to the following CDSC schedule:

Year of Redemption After Purchase	CDSC
First or Second	5%
Third	4%
Fourth	3%
Fifth	2%
Sixth	1%
Seventh or following	0%

CDSCs are based on the lower of the net asset value at the time of purchase or at the time of redemption. Shares acquired through the reinvestment of distributions are exempt from the CDSC. Redemptions are made first from shares that are not subject to a CDSC.

The sales commission payable to financial intermediaries in connection with sales of Class B and Class C shares is described under “Distribution and Service Fees” below.

CDSC Waivers. CDSCs are waived for certain redemptions pursuant to a Withdrawal Plan (see “Shareholder Account Features”) and, for Class B and Class C shares, in connection with certain redemptions from tax-deferred retirement plans. The CDSC is also waived following the death of a beneficial owner of shares (a death certificate and other applicable documents may be required).

Conversion Feature. After eight years, Class B shares automatically convert to Class A shares. Class B shares acquired through the reinvestment of distributions convert in proportion to shares not so acquired.

Distribution and Service Fees. Class A, Class B, Class C and Class R shares have in effect plans under Rule 12b-1 that allow each Fund to pay distribution fees for the sale and distribution of shares (so-called “12b-1 fees”) and service fees for personal and/or shareholder account services. Class B and Class C shares pay distribution fees to the principal underwriter of 0.75% of average daily net assets annually. Class R shares pay distribution fees of 0.25% annually of average daily net assets. Although there is no present intention to do so, Class R shares could pay distribution fees of up to 0.50% annually upon Trustee approval. Because these fees are paid from Fund assets on an ongoing basis, they will increase your cost over time and may cost you more than paying other types of sales charges. The principal underwriter compensates financial intermediaries on sales of Class B and Class C shares (except exchange transactions and reinvestments) in an amount equal to 4% and 1%, respectively, of the purchase price of the shares. After the first year, financial intermediaries also receive 0.75% of the value of Class C shares in annual distribution fees. Class B, Class C and Class R shares also pay service fees to the principal underwriter equal to 0.25% of average daily net assets annually. Class A shares pay distribution and service fees equal to 0.25% of average daily net assets annually. After the sale of shares, the principal underwriter receives the Class A distribution and service fees and the Class B and Class C service fees for one year and thereafter financial intermediaries generally receive 0.25% annually of average daily net assets based on the value of shares sold by such intermediaries for shareholder servicing performed by such financial intermediaries. After the sale of Class R shares, the principal underwriter generally pays service fees to financial intermediaries based on the value of shares sold by such intermediaries. Distribution and service fees are subject to the limitations contained in the sales charge rule of the Financial Industry Regulatory Authority.

More information about sales charges is available free of charge on the Eaton Vance website at www.eatonvance.com and in the Statement of Additional Information. Please consult the Eaton Vance website for any updates to sales charge information before making a purchase of Fund shares.

Redeeming Shares

You can redeem shares in any of the following ways:

By Mail	Send your request to the transfer agent. The request must be signed exactly as your account is registered (for instance, a joint account must be signed by all registered owners to be accepted) and a Medallion signature guarantee may be required. You can obtain a Medallion signature guarantee at banks, savings and loan institutions, credit unions, securities dealers, securities exchanges, clearing agencies and registered securities associations that participate in The Securities Transfer Agents Medallion Program, Inc. (STAMP, Inc.). Only Medallion signature guarantees issued in accordance with STAMP, Inc. will be accepted. You may be asked to provide additional documents if your shares are registered in the name of a corporation, partnership or fiduciary.
By Telephone	Certain shareholders can redeem by calling 1-800-262-1122 Monday through Friday, 8:00 a.m. to 6:00 p.m. (eastern time). Proceeds of a telephone redemption are generally limited to \$100,000 per account (which may include shares of one or more Eaton Vance funds) and can be sent only to the account address or to a bank pursuant to prior instructions.
By Internet	Certain shareholders can redeem by logging on to the Eaton Vance website at www.eatonvance.com . Proceeds of internet redemptions are generally limited to \$100,000 per account (which may include shares of one or more Eaton Vance funds) and can be sent only to the account address or to a bank pursuant to prior instructions.
For Additional Information	Please call 1-800-262-1122 Monday through Friday, 8:00 a.m. to 6:00 p.m. (eastern time).
Through a Financial Intermediary	Your financial intermediary is responsible for transmitting the order promptly. A financial intermediary may charge a fee for this service.

If you redeem shares, your redemption price will be based on the net asset value per share next computed after the redemption request is received in proper form (meaning that it is complete and contains all necessary information) by a Fund's transfer agent or your financial intermediary. Your redemption proceeds normally will be paid in cash within seven days, reduced by the amount of any applicable CDSC and any federal income and state tax required to be withheld. Payments will be sent by regular mail. However, if you have given complete written authorization in advance, you may request that the redemption proceeds be wired directly to your bank account. The bank designated may be any bank in the United States. The request may be made by calling 1-800-262-1122 or by sending a Medallion signature guaranteed letter of instruction to the transfer agent (see back cover for address). Certain redemption requests including those involving shares held by certain corporations, trusts or certain other entities and shares that are subject to certain fiduciary arrangements may require additional documentation and may be redeemed only by mail. You may be required to pay the costs of such transaction by a Fund or your bank. No costs are currently charged by a Fund. However, charges may apply for expedited mail delivery services. Each Fund may suspend or terminate the expedited payment procedure upon at least 30 days' notice.

If you recently purchased shares, the proceeds of a redemption will not be sent until the purchase check (including a certified or cashier's check) has cleared. If the purchase check has not cleared, redemption proceeds may be delayed up to 15 days from the purchase date. If your account value falls below \$750 (other than due to market decline), you may be asked either to add to your account or redeem it within 60 days. If you take no action, your account will be redeemed and the proceeds sent to you.

While redemption proceeds are normally paid in cash, redemptions may be paid by distributing marketable securities. If you receive securities, you could incur brokerage or other charges in converting the securities to cash.

Shareholder Account Features

Distributions. You may have your Fund distributions paid in one of the following ways:

Full Reinvest Option	Distributions are reinvested in additional shares. <i>This option will be assigned if you do not specify an option.</i>
Partial Reinvest Option	Dividends are paid in cash and capital gains are reinvested in additional shares.
Cash Option	Distributions are paid in cash.
Exchange Option	Distributions are reinvested in additional shares of any class of another Eaton Vance fund chosen by you, subject to the terms of that fund's prospectus. Before selecting this option, you must obtain a prospectus of the other fund and consider its objectives, risks, and charges and expenses carefully.

Information about the Funds. From time to time, you may receive the following:

- Semiannual and annual reports containing a list of portfolio holdings as of the end of the second and fourth fiscal quarters, respectively, performance information and financial statements.
- Periodic account statements, showing recent activity and total share balance.
- Tax information needed to prepare your income tax returns.
- Proxy materials, in the event a shareholder vote is required.
- Special notices about significant events affecting your Fund.

Most fund information (including semiannual and annual reports, prospectuses and proxy statements) as well as your periodic account statements can be delivered electronically. For more information please go to www.eatonvance.com/edelivery.

The Eaton Vance funds have established policies and procedures with respect to the disclosure of portfolio holdings and other information concerning Fund characteristics. A description of these policies and procedures is provided below and additionally in the Statement of Additional Information. Such policies and procedures regarding disclosure of portfolio holdings are designed to prevent the misuse of material, non-public information about the funds.

Each Fund will file with the Securities and Exchange Commission ("SEC") a list of its portfolio holdings as of the end of the first and third fiscal quarters on Form N-Q. Each Fund's annual and semiannual reports (as filed on Form N-CSR) and each Form N-Q may be viewed on the SEC's website (www.sec.gov). The most recent fiscal quarter - end holdings may also be viewed on the Eaton Vance website (www.eatonvance.com). Portfolio holdings information that is filed with the SEC is posted on the Eaton Vance website approximately 60 days after the end of the quarter to which it relates. Portfolio holdings information as of each month end is posted to the website approximately one month after such month end (calendar quarter-end holdings are posted approximately two months after such quarter end for SMID-Cap Fund and SMID-Cap Portfolio). Each Fund also posts information about certain portfolio characteristics (such as top ten holdings and asset allocation) at least quarterly on the Eaton Vance website approximately ten business days after the period and each Fund may also post performance attribution as of a month end or more frequently if deemed appropriate.

Withdrawal Plan. You may redeem shares on a regular periodic basis by establishing a systematic withdrawal plan. Withdrawals will not be subject to any applicable CDSC if they are, in the aggregate, less than or equal to 12% annually of the greater of either the initial account balance or the current account balance. Because purchases of Class A shares are generally subject to an initial sales charge, Class A shareholders should not make withdrawals from their accounts while also making purchases.

Tax-Deferred Retirement Plans. Distributions will be invested in additional shares for all tax-deferred retirement plans.

Exchange Privilege. You may exchange your Fund shares for shares of the same Class of another Eaton Vance fund. Exchanges are made at net asset value. If your shares are subject to a CDSC, the CDSC will continue to apply to your new shares at the same CDSC rate. For purposes of the CDSC, your shares will continue to age from the date of your original purchase of Fund shares. Any class of shares of a fund may be exchanged for any other class of shares of that fund, provided that the shares being exchanged are no longer subject to a CDSC and the conditions for investing in the other class of shares described in the applicable prospectus are satisfied.

Before exchanging, you should read the prospectus of the new fund carefully. Exchanges are subject to the terms applicable to purchases of the new fund's shares as set forth in its prospectus. If you wish to exchange shares, write to the transfer agent (see

back cover for address), log on to your account at www.eatonvance.com or call 1-800-262-1122. Periodic automatic exchanges are also available. The exchange privilege may be changed or discontinued at any time. You will receive at least 60 days' notice of any material change to the privilege. This privilege may not be used for "market timing" and may be terminated for market timing accounts or for any other reason. For additional information, see "Restrictions on Excessive Trading and Market Timing" under "Purchasing Shares". Ordinarily exchanges between different funds are taxable transactions for federal tax purposes, while permitted exchanges of one class for shares of another class of the same fund are not. Shareholders should consult their tax advisors regarding the applicability of federal, state, local and other taxes to transactions in Fund shares.

Reinvestment Privilege. If you redeem shares, you may reinvest at net asset value all or any portion of the redemption proceeds in the same class of shares of the Fund you redeemed from, provided that the reinvestment occurs within 60 days of the redemption, and the privilege has not been used more than once in the prior 12 months. Under these circumstances your account will be credited with any CDSC paid in connection with the redemption. Any CDSC period applicable to the shares you acquire upon reinvestment will run from the date of your original share purchase. Reinvestment requests must be in writing. At the time of a reinvestment, you or your financial intermediary must notify the Fund or the transfer agent that you are reinvesting redemption proceeds in accordance with this privilege. If you reinvest, your purchase will be at the next determined net asset value following receipt of your request.

Telephone and Electronic Transactions. You can redeem or (if permitted) exchange shares by telephone as described in this Prospectus. In addition, certain transactions may be conducted through the Eaton Vance website. The transfer agent and the principal underwriter have procedures in place to authenticate telephone and electronic instructions (such as using security codes or verifying personal account information). As long as the transfer agent and principal underwriter follow reasonable procedures, they will not be responsible for unauthorized telephone or electronic transactions and you bear the risk of possible loss resulting from these transactions. You may decline the telephone redemption option on the account application. Telephone instructions are recorded.

"Street Name" Accounts. If your shares are held in a "street name" account at a financial intermediary, that intermediary (and not the Fund or its transfer agent) will perform all recordkeeping, transaction processing and distribution payments. Because the Fund does not maintain an account for you, you should contact your financial intermediary to make transactions in shares, make changes in your account, or obtain account information. You will not be able to utilize a number of shareholder features, such as telephone or internet transactions, directly with a Fund and certain features, such as the Statement of Intention, may be subject to different requirements. If you transfer shares in a "street name" account to an account with another financial intermediary or to an account directly with a Fund, you should obtain historical information about your shares prior to the transfer.

Procedures for Opening New Accounts. To help the government fight the funding of terrorism and money laundering activities, federal law requires financial institutions to obtain, verify and record information that identifies each new customer who opens a Fund account and to determine whether such person's name appears on government lists of known or suspected terrorists or terrorist organizations. When you open an account, the transfer agent or your financial intermediary will ask you for your name, address, date of birth (for individuals), residential or business street address (although post office boxes are still permitted for mailing) and social security number, taxpayer identification number, or other government-issued identifying number. You also may be asked to produce a copy of your driver's license, passport or other identifying documents in order to verify your identity. In addition, it may be necessary to verify your identity by cross-referencing your identification information with a consumer report or other electronic databases. Other information or documents may be required to open accounts for corporations and other entities. Federal law prohibits a Fund and other financial institutions from opening a new account unless they receive the minimum identifying information described above. If a person fails to provide the information requested, any application by that person to open a new

account will be rejected. Moreover, if the transfer agent or the financial intermediary is unable to verify the identity of a person based on information provided by that person, it may take additional steps including, but not limited to, requesting additional information or documents from the person, closing the person's account or reporting the matter to the appropriate federal authorities. If your account is closed for this reason, your shares may be automatically redeemed at the net asset value next determined. If a Fund's net asset value has decreased since your purchase, you will lose money as a result of this redemption. Each Fund has also designated an anti-money laundering compliance officer.

Account Questions. If you have any questions about your account or the services available, please call Eaton Vance Shareholder Services at 1-800-262-1122 Monday through Friday, 8:00 a.m. to 6:00 p.m. (eastern time), or write to the transfer agent (see back cover for address).

Additional Tax Information

Each Fund makes distributions (if any) annually. Dividends may not be paid if Fund expenses exceed Fund income for the period. Distributions of income and net short-term capital gains will be taxable as ordinary income. Distributions of any long-term capital gains are taxable as long-term capital gains. Over time, distributions by each Fund can generally be expected to

include both dividends taxable as ordinary income and capital gain distributions taxable as long-term gains. Taxes on distributions of capital gains are determined by how long the Portfolio or Fund owned the investment that generated them, rather than how long a shareholder has owned his or her shares in a Fund. Distributions of investment income reported by a Fund as derived from “qualified dividend income” (as further described in the Statement of Additional Information) are taxed in the hands of individual shareholders at the rates applicable to long-term capital gains provided holding period and other requirements are met at both the shareholder and Fund level. A Fund’s distributions will be taxable as described above whether they are paid in cash or reinvested in additional shares. A portion of each Fund’s income distributions may be eligible for the dividends-received deduction for corporations.

The unearned income of certain U.S. individuals, estates and trusts is subject to a 3.8% Medicare contribution tax. For individuals, the tax is on the lesser of the “net investment income” and the excess of modified adjusted gross income over \$200,000 (or \$250,000 if married filing jointly). Net investment income includes interest, dividends, and gross income and capital gains derived from passive activities and trading in securities or commodities. Net investment income is reduced by deductions “properly allocable” to this income.

Investors who purchase shares at a time when a Fund’s net asset value reflects gains that are either unrealized or realized but not distributed will pay the full price for the shares and then may receive some portion of the purchase price back as a taxable distribution. Certain distributions paid in January may be taxable to shareholders as if received on December 31 of the prior year. A redemption of Fund shares, including an exchange for shares of another fund, is a taxable transaction.

Investments in foreign securities may be subject to foreign withholding taxes, which would decrease a Fund’s return on such securities. Shareholders generally will not be entitled to claim a credit or deduction with respect to foreign taxes paid by a Fund. In addition, investments in foreign securities or foreign currencies may increase or accelerate a Fund’s recognition of ordinary income and may affect the timing or amount of the Fund’s distributions.

Certain foreign entities may be subject to a 30% withholding on dividend income paid after December 31, 2013 and on redemption proceeds paid after December 31, 2016 under the Foreign Account Tax Compliance Act (“FATCA”). To avoid withholding, foreign financial institutions entities subject to FATCA must agree to disclose to the relevant revenue authorities certain information regarding their direct and indirect U.S. owners and other foreign entities must certify certain information regarding their direct and indirect U.S. owners to the Fund. For more detailed information regarding FATCA withholding and compliance, please refer to the Statement of Additional Information.

Shareholders should consult with their advisers concerning the applicability of federal, state, local and other taxes to an investment.

Financial Highlights

The financial highlights are intended to help you understand a Fund's financial performance for the period(s) indicated. Certain information in the table reflects the financial results for a single Fund share. The total returns in the table represent the rate an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of all distributions at net asset value). This information has been audited by Deloitte & Touche LLP, an independent registered public accounting firm. The reports of Deloitte & Touche LLP and each Fund's financial statements are incorporated herein by reference and included in the Fund's annual report, which is available upon request.

	Eaton Vance Atlanta Capital Focused Growth Fund

Portfolio Turnover of the Portfolio	20%	20%	20%	20%	33%	33%	33% ⁽¹⁸⁾	42%	42%	

(1) Computed using average shares outstanding.

(2) Returns are historical and are calculated by determining the percentage change in net asset value with all distributions reinvested and do not reflect the effect of sales charges.

(3) For Focused Growth Fund and Horizon Growth Fund: Includes the Fund' s share of the Portfolio' s allocated expenses for the period while the Fund was investing in the Portfolio. For SMID-Cap Fund: Includes the Fund' s share of the Portfolio' s allocated expenses.

(4) Excludes the effect of custody fee credits, if any, of less than 0.005%.

(5) For Focused Growth Fund Class A and Class I, the investment adviser of the Portfolio waived a portion of its investment adviser fee and/or the administrator of the Fund subsidized certain operating expenses (equal to 0.11%, 0.43%, 0.50 % and 0.19 % of average daily net assets for the years ended September 30, 2011, 2010, 2009 and 2008 , respectively). For Focused Growth Fund Class C the administrator of the Fund subsidized certain operating expenses (equal to 0.11% of average daily net assets for the period ended September 30, 2011). A portion of the waiver and /or subsidy was borne by the sub-adviser of the Portfolio. Absent this waiver and /or subsidy, total return would be lower. For Horizon Growth Fund Class A, Class B and Class C, the investment adviser of the Portfolio waived a portion of its investment adviser fee and/or the administrator of the Fund subsidized certain operating expenses (equal to 0.32, 0.21%, 0.09%, 0.31%, 0.06 % and 0.07 %, respectively). For Horizon Growth Fund Class I, the administrator of the Fund subsidized certain operating expenses (equal to 0.32% and 0.38% of average daily net assets for the year ended September 30, 2012 and the period ended September 30, 2011 , respectively). A portion of this waiver and /or subsidy was borne by the sub-adviser. Absent this waiver and/or subsidy, total return would be lower. For Select Equity Fund the investment adviser , sub- adviser and administrator subsidized certain operating expenses (equal to 1.37 % of average daily net assets for the period from the start of business, January 3, 2012, to September 30, 2012). Absent this subsidy, total return would have been lower. For SMID-Cap Fund Class A and Class I , the investment adviser of the Portfolio waived a portion of its investment adviser fee and/or subsidized certain operating expenses and the administrator of the Fund subsidized certain operating expenses (equal to 0.08%, 0.18%, 0.32%, 0.52% and 0.52% of average daily net assets for the years ending September 30, 2012, 2011, 2010, 2009 and 2008, respectively). For SMID-Cap Fund Class C the investment adviser of the Portfolio waived a portion of its investment adviser fee and/or subsidized certain operating expenses and the administrator of the Fund subsidized certain operating expenses (equal to 0.08%, 0.18% and 0.32% of average daily net assets for the years ending September 30, 2012, 2011 and 2010, respectively). For SMID-Cap Class R, the investment adviser of the Portfolio waived a portion of its investment adviser fee and/or subsidized certain operating expenses and the administrator of the Fund subsidized certain operating expenses (equal to 0.08%, 0.18%, 0.32% and 0.56% of average daily net assets for the years ended September 30, 2012, 2011 and 2010 and the period ended September 30, 2009, respectively). A portion of the waiver and /or subsidy was borne by the sub-adviser of the Portfolio. Absent this waiver and/or subsidy, total return would be lower.

(6) Portfolio turnover represents the rate of portfolio activity for the period while the Fund was investing in the Portfolio.

(7) Not annualized.

(8) For the period from July 23, 2012 through September 30, 2012 when the Fund was making investments directly in securities.

(9) For the period from the commencement of operations, May 2, 2011, to September 30, 2011.

(10) Annualized.

(11) For the Portfolio' s year ended September 30, 2011.

- (12) For the eleven months ended September 30, 2011. The Fund changed its fiscal year-end from October 31 to September 30.
- (13) Net investment loss per share reflects special dividends allocated from the Portfolio, which amounted to \$0.015, \$0.014 and \$0.013 per share for Class A, Class B and Class C, respectively, for the period while the Fund was making investments directly in the Portfolio. Excluding special dividends, the ratio of net investment loss to average daily net assets would have been (0.69)%, (1.49)% and (1.51)% for Class A, Class B and Class C, respectively.
- (14) For the period from April 22, 2011 through September 30, 2011 when the Fund was making investments directly in securities.
- (15) For the period from the start of business, January 3, 2012, to September 30, 2012.
- (16) The per share amount is not in accord with the net realized and unrealized gain (loss) on investments for the period because of the timing of sales of Fund shares and the amount of the per share realized and unrealized gains and losses at such time.
- (17) For the period from the commencement of operations, August 3, 2009, to September 30, 2009.
- (18) For the Portfolio' s year ended September 30, 2009.

More Information

About the Funds: More information is available in the Statement of Additional Information. The Statement of Additional Information is incorporated by reference into this Prospectus. Additional information about each Fund's and the Portfolio's investments is available in the annual and semiannual reports to shareholders. In the annual report, you will find a discussion of the market conditions and investment strategies that significantly affected each Fund's performance during the past fiscal year. You may obtain free copies of the Statement of Additional Information and the shareholder reports on Eaton Vance's website at www.eatonvance.com or by contacting the principal underwriter:

Eaton Vance Distributors, Inc.
Two International Place
Boston, MA 02110
1-800-262-1122
website: www.eatonvance.com

You will find and may copy information about each Fund (including the Statement of Additional Information and shareholder reports): at the SEC's public reference room in Washington, DC (call 1-800-732-0330 for information on the operation of the public reference room); on the EDGAR Database on the SEC's website (www.sec.gov); or, upon payment of copying fees, by writing to the SEC's Public Reference Section, 100 F Street, NE, Washington, DC 20549-0102, or by electronic mail at publicinfo@sec.gov.

Shareholder Inquiries: You can obtain more information from Eaton Vance Shareholder Services or the Fund transfer agent, BNY Mellon Investment Servicing (US) Inc. If you own shares and would like to add to, redeem or change your account, please write or call below:

Although each Fund offers only its shares of beneficial interest, it is possible that a Fund (or Class) might become liable for a misstatement or omission in this SAI regarding another Fund (or Class) because the Funds use this combined SAI.

This SAI is NOT a prospectus and is authorized for distribution to prospective investors only if preceded or accompanied by the Fund Prospectus dated February 1, 2013 , as supplemented from time to time, which is incorporated herein by reference. This SAI should be read in conjunction with the Prospectus, which may be obtained by calling 1-800-262-1122.

Definitions

The following terms that may be used in this SAI have the meaning set forth below:

“1940 Act” means the Investment Company Act of 1940, as amended;

“1933 Act” means the Securities Act of 1933, as amended;

“Board” means Board of Trustees or Board of Directors, as applicable;

“CEA” means Commodity Exchange Act;

“CFTC” means the Commodities Futures Trading Commission;

“Code” means the Internal Revenue Code of 1986, as amended;

“Exchange” means the New York Stock Exchange;

“FINRA” means the Financial Industry Regulatory Authority;

“Fund” means the Fund or Funds listed on the cover of this SAI unless stated otherwise;

“investment adviser” means the investment adviser identified in the prospectus and, with respect to the implementation of the Fund’ s investment strategies (including as described under “Taxes”) and portfolio securities transactions, any sub-adviser identified in the prospectus;

“IRS” means the Internal Revenue Service;

“Portfolio” means a registered investment company (other than the Fund) sponsored by the Eaton Vance organization in which one or more Funds and other investors may invest substantially all or any portion of their assets;

“Subsidiary” means a wholly-owned subsidiary of the Fund or the Portfolio as described in the prospectus, if applicable;

“SEC” means the U.S. Securities and Exchange Commission; and

“Trust” means Eaton Vance Growth Trust and Eaton Vance Mutual Funds Trust.

STRATEGIES AND RISKS

The Fund prospectus identifies the types of investments in which the Fund will principally invest in seeking its investment objective (s) and the principal risks associated therewith. The categories checked in the table below are all of the investments the Fund is permitted to make, including its principal investments and the investment practices the Fund (either directly or through one or more Portfolios as may be described in the prospectus) is permitted to engage in. To the extent that an investment type or practice listed below is not identified in the Fund prospectus as a principal investment, the Fund generally expects to invest less than 5% of its total assets in such investment type. If a particular investment type that is checked and listed below but not referred to in the prospectus becomes a more significant part of the Fund’ s strategy, the prospectus may be amended to disclose that investment. If applicable, “ Fund ” as used herein and under “ Additional Information About Investment Strategies ” refers to each Fund and Portfolio listed in the table below. Information about the various investment types and practices and the associated risks checked below is included in alphabetical order in this SAI under “Additional Information about Investment Strategies ..”

(1) For purposes of establishing the market capitalizations of companies included in an Index or top 1,000 companies for a particular month, the Fund or Portfolio, as applicable, will refer to the market capitalizations of the companies as of the first business day of that month.

INVESTMENT RESTRICTIONS

The following investment restrictions of each Fund are designated as fundamental policies and as such cannot be changed without the approval of the holders of a majority of a Fund's outstanding voting securities, which as used in this SAI means the lesser of: (a) 67% of the shares of a Fund present or represented by proxy at a meeting if the holders of more than 50% of the outstanding shares are present or represented at the meeting; or (b) more than 50% of the outstanding shares of a Fund. Accordingly, each Fund may not:

- (1) Borrow money or issue senior securities except as permitted by the 1940 Act;
- (2) Purchase or sell real estate, although it may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate;
- (3) Make loans to any person, except by (a) the acquisition of debt securities and making portfolio investments, (b) entering into repurchase agreements, (c) lending portfolio securities, and (d) lending cash consistent with applicable law.

Additionally, each Fund with the exception of Select Equity Fund may not:

- (4) Engage in the underwriting of securities;
- (5) Concentrate its investments in any particular industry, but, if deemed appropriate for the Fund's objective, up to (but less than) 25% of the value of its assets may be invested in any one industry;
- (6) Purchase or sell commodities or commodity contracts for the purchase or sale of physical commodities;

Additionally, each Fund with the exception of Horizon Growth Fund and Select Equity Fund may not:

- (7) Purchase securities on margin (but the Fund may obtain such short-term credits as may be necessary for the clearance of purchase and sales of securities);

Horizon Growth Fund may not:

- (8) Purchase any securities or evidences of interest therein on "margin," that is to say in a transaction in which it has borrowed all or a portion of the purchase price and pledged the purchased securities or evidences of interest therein as collateral for the amount so borrowed;

Select Equity Fund may not:

- (9) Purchase securities on margin (but the Fund may obtain such short-term credits as may be necessary for the clearance of purchases and sales of securities). The deposit or payment by the Fund of initial, maintenance or variation margin in connection with all types of options and futures contract transactions is not considered the purchase of a security on margin;
- (10) Concentrate its investments in any particular industry, but, if deemed appropriate for the Fund's objective, up to (but less than) 25% of the value of its assets may be invested in securities of companies in any one industry (although more than 25% may be invested in securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities);
- (11) Underwrite or participate in the marketing of securities of others, except insofar as it may technically be deemed to be an underwriter in selling a portfolio security under circumstances which may require the registration of the same under the 1933 Act;

Horizon Growth Fund and SMID-Cap Fund may not:

- (12) With respect to 75% of its total assets, invest more than 5% of its total assets (taken at current value) in the securities of any one issuer, or invest in more than 10% of the outstanding voting securities of any one issuer, except obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities and except securities of other investment companies.

In addition, Select Equity Fund may:

- (13) Purchase and sell commodities and commodities contracts of all types and kinds (including without limitation futures contracts, options on futures contracts and other commodities-related investments) to the extent permitted by law.

Notwithstanding its investment policies and restrictions, each Fund may, in compliance with the requirements of the 1940 Act, invest : (i) all of its investable assets in an open-end management investment company with substantially the same investment objective(s), policies and restrictions as the Fund; or (ii) in more than one open-end management investment company sponsored by Eaton Vance or its affiliates, provided any such company has investment objective(s), policies and restrictions that are consistent with those of the Fund.

The Portfolio has adopted substantially the same fundamental investment restrictions as the foregoing investment restrictions adopted by the Fund; such restrictions cannot be changed without the approval of a "majority of the outstanding voting securities" of the Portfolio.

In addition, to the extent a registered open-end investment company acquires securities of a portfolio in reliance on Section 12(d)(1)(G) under the 1940 Act, such portfolio shall not acquire any securities of a registered open-end investment company in reliance on Section 12(d)(1)(G) under the 1940 Act.

The Fund's borrowing policy is consistent with Section 18(f) of the 1940 Act, which states that it shall be unlawful for any registered open-end company to issue any class of senior security or to sell any senior security of which it is the issuer, except that any such registered company shall be permitted to borrow from any bank; provided, that immediately after any such borrowing there is an asset coverage of at least 300% for all borrowings of such registered company; and provided further, that in the event that such asset coverage shall at any time fall below 300% such registered company shall, within three days thereafter (not including Sundays and holidays) or such longer period as the SEC may prescribe by rules and regulations, reduce the amount of its borrowings to an extent that the asset coverage of such borrowings shall be at least 300%.

The following nonfundamental investment policies have been adopted by each Fund and the Portfolio. A nonfundamental investment policy may be changed by the Board with respect to a Fund without approval by the Fund's shareholders or, with respect to the Portfolio, without approval of the Fund or its other investors. Each Fund and the Portfolio will not:

- make short sales of securities or maintain a short position, unless at all times when a short position is open (i) it owns an equal amount of such securities or securities convertible into or exchangeable,

without payment of any further consideration, for securities of the same issue as, and equal in amount to, the securities sold short or (ii) it holds in a segregated account cash or other liquid securities (to the extent required under the 1940 Act) in an amount equal to the current market value of the securities sold short, and unless not more than 25% of its net assets (taken at current value) is held as collateral for such sales at any one time; or

- invest more than 15% of net assets in investments which are not readily marketable, including restricted securities and repurchase agreements maturing in more than seven days. Restricted securities for the purposes of this limitation do not include securities eligible for resale pursuant to Rule 144A under the 1933 Act and commercial paper issued pursuant to Section 4(2) of said Act that the members of the Board, or their delegate, determines to be liquid. Any such determination by a delegate will be made pursuant to procedures adopted by the Board. When investing in Rule 144A securities, the level of portfolio illiquidity may be increased to the extent that eligible buyers become uninterested in purchasing such securities.

Whenever an investment policy or investment restriction set forth in the Prospectus or this SAI states a maximum percentage of assets that may be invested in any security or other asset, or describes a policy regarding quality standards, such percentage limitation or standard shall be determined immediately after and as a result of the acquisition by a Fund or the Portfolio of such security or asset. Accordingly, unless otherwise noted, any later increase or decrease resulting from a change in values, assets or other circumstances or any subsequent rating change made by a rating service (or as determined by the investment adviser if the security is not rated by a rating agency), will not compel a Fund or the Portfolio to dispose of such security or other asset. However, a Fund and the Portfolio must always be in compliance with the borrowing policy and limitation on investing in illiquid securities set forth above. If a sale of securities is required to comply with the 15% limit on illiquid securities, such sales will be made in an orderly manner with consideration of the best interests of shareholders.

MANAGEMENT AND ORGANIZATION

Fund Management. The Trustees of the Trust are responsible for the overall management and supervision of the affairs of the Trust. The Trustees of the Portfolio are responsible for the overall management and supervision of the Portfolio. The Trustees and officers of the Trust and the Portfolio are listed below. Except as indicated, each individual has held the office shown or other offices in the same company for the last five years. Trustees and officers of the Trust and the Portfolio hold indefinite terms of office. The “noninterested Trustees” consist of those Trustees who are not “interested persons” of the Trust and the Portfolio, as that term is defined under the 1940 Act. The business address of each Trustee and officer is Two International Place, Boston, Massachusetts 02110. As used in this SAI, “EVC” refers to Eaton Vance Corp., “EV” refers to Eaton Vance, Inc., “Eaton Vance” refers to Eaton Vance Management and “EVD” refers to Eaton Vance Distributors, Inc. (see “Principal Underwriter” under “Other Service Providers”). EVC and EV are the corporate parent and trustee, respectively, of Eaton Vance and BMR. Each officer affiliated with Eaton Vance may hold a position with other Eaton Vance affiliates that is comparable to his or her position with Eaton Vance listed below.

Name and Year of Birth	Trust/ Portfolio Position(s)	Term of Office and Length of Service	Principal Occupation(s) During Past Five Years and Other Relevant Experience	Number of Portfolios in Fund Complex Overseen By Trustee ⁽¹⁾	Other Directorships Held During Last Five Years ⁽²⁾
Interested Trustee					
THOMAS E. FAUST JR. 1958	Trustee	Since 2007	Chairman, Chief Executive Officer and President of EVC, Director and President of EV, Chief Executive Officer and President of Eaton Vance and BMR, and Director of EVD. Trustee and/or officer of 191 registered investment companies. Mr. Faust is an interested person because of his positions with BMR, Eaton Vance, EVC, EVD and EV, which are affiliates of the Trust and Portfolio.	191	Director of EVC and Hexavest Inc.

BARBARA E. CAMPBELL 1957	Treasurer	Of the Trust since 2005 and of the Portfolio since 2008	Vice President of Eaton Vance and BMR. Officer of 191 registered investment companies managed by Eaton Vance or BMR.
MAUREEN A. GEMMA 1960	Vice President, Secretary and Chief Legal Officer	Vice President since 2011, Secretary since 2007 and Chief Legal Officer since 2008	Vice President of Eaton Vance and BMR. Officer of 191 registered investment companies managed by Eaton Vance or BMR.
PAUL M. O' NEIL 1953	Chief Compliance Officer	Since 2004	Vice President of Eaton Vance and BMR. Officer of 191 registered investment companies managed by Eaton Vance or BMR.

The Board has general oversight responsibility with respect to the business and affairs of the Trust and each Fund. The Board has engaged an investment adviser and (if applicable) a sub-adviser (collectively the “adviser”) to manage each Fund and an administrator to administer each Fund and is responsible for overseeing such adviser and administrator and other service providers to the Trust and the Fund. The Board is currently composed of ten Trustees, including nine Trustees who are not “interested persons” of a Fund, as that term is defined in the 1940 Act (each a “noninterested Trustee”). In addition to eight regularly scheduled meetings per year, the Board holds special meetings or informal conference calls to discuss specific matters that may require action prior to the next regular meeting. As discussed below, the Board has established five committees to assist the Board in performing its oversight responsibilities.

The Board has appointed a noninterested Trustee to serve in the role of Chairman. The Chairman’s primary role is to participate in the preparation of the agenda for meetings of the Board and the identification of information to be presented to the Board with respect to matters to be acted upon by the Board. The Chairman also presides at all meetings of the Board and acts as a liaison with service providers, officers, attorneys, and other Board members generally between meetings. The Chairman may perform such other functions as may be requested by the Board from time to time. Except for any duties specified herein or pursuant to the Trust’s Declaration of Trust or By-laws, the designation of Chairman does not impose on such noninterested Trustee any duties, obligations or liability that is greater than the duties, obligations or liability imposed on such person as a member of the Board, generally. The Portfolio has the same leadership structure as the Trust.

Each Fund and the Trust are subject to a number of risks, including, among others, investment, compliance, operational, and valuation risks. Risk oversight is part of the Board’s general oversight of each Fund and the Trust and is addressed as part of various activities of the Board and its Committees. As part of its oversight of each Fund and Trust, the Board directly, or through a Committee, relies on and reviews reports from, among others, Fund management, the adviser, the administrator, the principal underwriter, the Chief Compliance Officer (the “CCO”), and other Fund service providers responsible for day-to-day oversight of Fund investments, operations and compliance to assist the Board in identifying and understanding the nature and extent of risks and determining whether, and to what extent, such risks can be mitigated. The Board also interacts with the CCO and with senior personnel of the adviser, administrator, principal underwriter and other Fund service providers and provides input on risk management issues during meetings of the Board and its

Committees. Each of the adviser, administrator, principal underwriter and the other Fund service providers has its own, independent interest and responsibilities in risk management, and its policies and methods for carrying out risk management functions will depend, in part, on its individual priorities, resources and controls. It is not possible to identify all of the risks that may affect a Fund or to develop processes and controls to eliminate or mitigate their occurrence or effects. Moreover, it is necessary to bear certain risks (such as investment-related risks) to achieve each Fund' s goals.

The Board, with the assistance of management and with input from the Board's various committees, reviews investment policies and risks in connection with its review of Fund performance. The Board has appointed a Fund Chief Compliance Officer who oversees the implementation and testing of the Fund compliance program and reports to the Board regarding compliance matters for the Funds and their principal service providers. In addition, as part of the Board's periodic review of the advisory, subadvisory (if applicable), distribution and other service provider agreements, the Board may consider risk management aspects of their operations and the functions for which they are responsible. With respect to valuation, the Board approves and periodically reviews valuation policies and procedures applicable to valuing each Fund's shares. The administrator, the investment adviser and the sub-adviser (if applicable) are responsible for the implementation and day-to-day administration of these valuation policies and procedures and provides reports periodically to the Board regarding these and related matters. In addition, the Board or the Audit Committee of the Board receives reports periodically from the independent public accounting firm for the Funds regarding tests performed by such firm on the valuation of all securities, as well as with respect to other risks associated with mutual funds. Reports received from service providers, legal counsel and the independent public accounting firm assist the Board in performing its oversight function. The Portfolio has the same risk oversight approach as the Fund and the Trust.

The Trust's Declaration of Trust does not set forth any specific qualifications to serve as a Trustee. The Charter of the Governance Committee also does not set forth any specific qualifications, but does set forth certain factors that the Committee may take into account in considering noninterested Trustee candidates. In general, no one factor is decisive in the selection of an individual to join the Board. Among the factors the Board considers when concluding that an individual should serve on the Board are the following: (i) knowledge in matters relating to the mutual fund industry; (ii) experience as a director or senior officer of public companies; (iii) educational background; (iv) reputation for high ethical standards and professional integrity; (v) specific financial, technical or other expertise, and the extent to which such expertise would complement the Board members' existing mix of skills, core competencies and qualifications; (vi) perceived ability to contribute to the ongoing functions of the Board, including the ability and commitment to attend meetings regularly and work collaboratively with other members of the Board; (vii) the ability to qualify as a noninterested Trustee for purposes of the 1940 Act and any other actual or potential conflicts of interest involving the individual and the Fund; and (viii) such other factors as the Board determines to be relevant in light of the existing composition of the Board ..

Among the attributes or skills common to all Board members are their ability to review critically, evaluate, question and discuss information provided to them, to interact effectively with the other members of the Board, management, sub-advisers, other service providers, counsel and independent registered public accounting firms, and to exercise effective and independent business judgment in the performance of their duties as members of the Board. Each Board member's ability to perform his or her duties effectively has been attained through the Board member's business, consulting, public service and/or academic positions and through experience from service as a Board member in the Eaton Vance Group of Funds (and/or in other capacities, including for any predecessor funds), public companies, or non-profit entities or other organizations as set forth below. Each Board member's ability to perform his or her duties effectively also has been enhanced by his or her educational background, professional training, and/or other life experiences.

In respect of each current member of the Board, the individual's substantial professional accomplishments and experience, including in fields related to the operations of the Eaton Vance Group of Funds, were a significant factor in the determination that the individual should serve as a member of the Board. The following is a summary of each Board member's particular professional experience and additional considerations that contributed to the Board's conclusion that he or she should serve as a member of the Board :

Scott E. Eston. Mr. Eston has served as a Board member in the Eaton Vance Group of Funds since 2011. He currently serves on the investment and advisory board of the BAC Seed Fund, a real estate investment firm .. From 1997 through 2009, Mr. Eston served in several capacities at Grantham, Mayo, Van Otterloo and Co. ("GMO"), including as Chairman of the Executive Committee and Chief Operating and Chief Financial Officer,

and also as the President and Principal Executive officer of GMO Trust, an affiliated open-end registered investment company. From 1978 through 1997, Mr. Eston was employed at Coopers & Lybrand L.L.P. (now PricewaterhouseCoopers) (since 1987 as a Partner).

Benjamin C. Esty. Mr. Esty has served as a Board member in the Eaton Vance Group of Funds since 2005 and is the Chairperson of the Portfolio Management Committee. He is the Roy and Elizabeth Simmons Professor of Business Administration and Finance Unit Head at the Harvard University Graduate School of Business Administration.

Thomas E. Faust Jr. Mr. Faust has served as a Board member in the Eaton Vance Group of Funds since 2007. He is currently Chairman, Chief Executive Officer and President of EVC, Director and President of EV, Chief Executive Officer and President of Eaton Vance and BMR, and Director of EVD. Mr. Faust has served as a Director of Hexavest Inc. since 2012. Mr. Faust previously served as an equity analyst, portfolio manager, Director of Equity Research and Management and Chief

Investment Officer of Eaton Vance (1985-2007). He holds B.S. degrees in Mechanical Engineering and Economics from the Massachusetts Institute of Technology and an MBA from Harvard Business School. Mr. Faust has been a Chartered Financial Analyst since 1988.

Allen R. Freedman. Mr. Freedman has served as a Board member in the Eaton Vance Group of Funds since 2007. Mr. Freedman also serves as a Director of Stonemor Partners L.P. where he also serves as the Chair of the Audit Committee and a member of the Trust and Compliance Committee. Mr. Freedman was previously a Director of Assurant, Inc. from 1979-2011, a Director of Systems & Computer Technology Corp. from 1983-2004 and Chairman from 2002-2004, a Director of Loring Ward International from 2005-2007 and Chairman and a Director of Indus International, Inc. from 2005-2007. Mr. Freedman was formerly the Chairman and Chief Executive Officer of Fortis, Inc. (predecessor to Assurant, Inc.), a specialty insurance company from which he retired in 2000. Mr. Freedman also served as a Director of the Fortis Mutual Funds and First Fortis Life Insurance Company. Mr. Freedman is a founding director of the Association of Audit Committee Members, Inc.

William H. Park. Mr. Park has served as a Board member in the Eaton Vance Group of Funds since 2003 and is the Chairperson of the Audit Committee. Mr. Park was formerly the Chief Financial Officer of Aveon Group, L.P. from 2010-2011. Mr. Park also served as Vice Chairman of Commercial Industrial Finance Corp. from 2006-2010, as President and Chief Executive Officer of Prizm Capital Management, LLC from 2002-2005, as Executive Vice President and Chief Financial Officer of United Asset Management Corporation from 1982-2001 and as Senior Manager of Price Waterhouse (now PricewaterhouseCoopers) from 1972-1981.

Ronald A. Pearlman. Mr. Pearlman has served as a Board member in the Eaton Vance Group of Funds since 2003 and is the Chairperson of the Compliance Reports and Regulatory Matters Committee. He is a Professor of Law at Georgetown University Law Center. Previously, Mr. Pearlman was Deputy Assistant Secretary (Tax Policy) and Assistant Secretary (Tax Policy), U.S. Department of the Treasury from 1983-1985 and served as Chief of Staff, Joint Committee on Taxation, U.S. Congress from 1988-1990. Mr. Pearlman was engaged in the private practice of law from 1969-2000, with the exception of the periods of government service. He represented large domestic and multinational businesses in connection with the tax aspects of complex transactions and high net worth individuals in connection with tax and business planning.

Helen Frame Peters. Ms. Peters has served as a Board member in the Eaton Vance Group of Funds since 2008. She is currently a Professor of Finance at Carroll School of Management, Boston College and was formerly Dean of Carroll School of Management from 2000-2002. Ms. Peters was previously a Director of BJ's Wholesale Club, Inc. from 2004-2011. In addition, Ms. Peters was the Chief Investment Officer, Fixed Income at Scudder Kemper Investments from 1998-1999 and Chief Investment Officer, Equity and Fixed Income at Colonial Management Associates from 1991-1998. Ms. Peters also served as a Trustee of SPDR Index Shares Funds and SPDR Series Trust from 2000-2009 and as a Director of the Federal Home Loan Bank of Boston from 2007-2009.

Lynn A. Stout. Ms. Stout has served as a Board member in the Eaton Vance Group of Funds since 1998 and is the Chairperson of the Governance Committee. She has been a Distinguished Professor of Corporate and Business Law at the Cornell University Law School since 2012. Previously, Ms. Stout was the Paul Hastings Professor of Corporate and Securities Law from 2006-2012 and Professor of Law from 2001-2006 at the University of California at Los Angeles School of Law ..

Harriett Tee Taggart. Ms. Taggart has served as a Board member in the Eaton Vance Group of Funds since 2011. She currently manages a professional practice, Taggart Associates. Since 2007, Ms. Taggart has been a Director of Albemarle Corporation, a specialty chemical company where she serves as a member of the Audit Committee and member of the Nomination and Governance Committee. Since 2009 she has served as a Director of the Hanover Insurance Group, Inc. where she also serves as member of the Audit Committee. Ms. Taggart is also a trustee or member of several major non-profit boards, advisory committees and endowment investment companies. From 1983 through 2006, Ms. Taggart served in several capacities at Wellington

Management Company, LLP, an investment management firm, including as a Partner, Senior Vice President and chemical industry sector portfolio manager. Ms. Taggart also served as a Director of the Lubrizol Corporation, a specialty chemicals manufacturer from 2007-2011.

Ralph F. Verni. Mr. Verni has served as a Board member in the Eaton Vance Group of Funds since 2005 and is the Independent Chairperson of the Board and the Chairperson of the Contract Review Committee. Mr. Verni was formerly the Chief Investment Officer (from 1982-1992), Chief Financial Officer (from 1988-1990) and Director (from 1982-1992) of New England Life. Mr. Verni was also the Chairperson of the New England Mutual Funds from 1982-1992; President and Chief Executive Officer of State Street Management & Research from 1992-2000; Chairperson of the State Street Research Mutual Funds from 1992-2000; Director of W.P. Carey, LLC from 1998-2004; and Director of First Pioneer Farm Credit Corp. from 2002-2006. Mr. Verni has been a Chartered Financial Analyst since 1977.

The Board of the Trust and the Portfolio has several standing Committees, including the Governance Committee, the Audit Committee, the Portfolio Management Committee, the Compliance Reports and Regulatory Matters Committee and the Contract Review Committee. Each of the Committees are comprised of only noninterested Trustees.

Mmes. Stout (Chair), Peters and Taggart, and Messrs. Eston, Esty, Freedman, Park, Pearlman and Verni are members of the Governance Committee. The purpose of the Governance Committee is to consider, evaluate and make recommendations to the Board with respect to the structure, membership and operation of the Board and the Committees thereof, including the nomination and selection of noninterested Trustees and a Chairperson of the Board and the compensation of such persons. During the fiscal year ended September 30, 2012, the Governance Committee convened six times.

The Governance Committee will, when a vacancy exists or is anticipated, consider any nominee for noninterested Trustee recommended by a shareholder if such recommendation is submitted in writing to the Governance Committee, contains sufficient background information concerning the candidate, including evidence the candidate is willing to serve as a noninterested Trustee if selected for the position, and is received in a sufficiently timely manner.

Messrs. Park (Chair), Eston and Verni, and Mmes. Peters and Stout are members of the Audit Committee. The Board has designated Mr. Park, a noninterested Trustee, as audit committee financial expert. The Audit Committee's purposes are to (i) oversee each Fund and the Portfolio's accounting and financial reporting processes, its internal control over financial reporting, and, as appropriate, the internal control over financial reporting of certain service providers; (ii) oversee or, as appropriate, assist Board oversight of the quality and integrity of each Fund and the Portfolio's financial statements and the independent audit thereof; (iii) oversee, or, as appropriate, assist Board oversight of, each Fund and the Portfolio's compliance with legal and regulatory requirements that relate to each Fund and the Portfolio's accounting and financial reporting, internal control over financial reporting and independent audits; (iv) approve prior to appointment the engagement and, when appropriate, replacement of the independent registered public accounting firm, and, if applicable, nominate the independent registered public accounting firm to be proposed for shareholder ratification in any proxy statement of a Fund; (v) evaluate the qualifications, independence and performance of the independent registered public accounting firm and the audit partner in charge of leading the audit; and (vi) prepare, as necessary, audit committee reports consistent with the requirements of applicable SEC and stock exchange rules for inclusion in the proxy statement of a Fund. During the fiscal year ended September 30, 2012, the Audit Committee convened twenty times.

Messrs. Verni (Chair), Esty, Freedman, Park and Pearlman, and Mmes. Peters and Taggart are currently members of the Contract Review Committee. The purposes of the Contract Review Committee are to consider, evaluate and make recommendations to the Board concerning the following matters: (i) contractual arrangements with each service provider to the Funds and the Portfolio, including advisory, sub-advisory, transfer agency, custodial and fund accounting, distribution services and administrative services; (ii) any and all other matters in which any service provider (including Eaton Vance or any affiliated entity thereof) has an actual or potential conflict of interest with the interests of the Funds, Portfolio or investors therein; and (iii) any other matter appropriate for review by the noninterested Trustees, unless the matter is within the responsibilities of the other Committees of the Board. During the fiscal year ended September 30, 2012, the Contract Review Committee convened eleven times.

Messrs. Esty (Chair) and Freedman, and Mmes. Peters and Taggart are currently members of the Portfolio Management Committee. The purposes of the Portfolio Management Committee are to: (i) assist the Board in its oversight of the portfolio management process employed by the Funds and the Portfolio and their investment adviser and sub-adviser(s), if applicable, relative to the Funds' and Portfolio's stated objective(s), strategies and restrictions; (ii) assist the Board in its oversight of the trading policies and procedures and risk management techniques applicable to the Funds and the Portfolio; and (iii) assist the Board in its monitoring of the

performance results of all funds and portfolios, giving special attention to the performance of certain funds and portfolios that it or the Board identifies from time to time. During the fiscal year ended September 30, 2012 , the Portfolio Management Committee convened nine times.

Messrs. Pearlman (Chair) and Eston, and Ms. Stout are currently members of the Compliance Reports and Regulatory Matters Committee. The purposes of the Compliance Reports and Regulatory Matters Committee are to: (i) assist the Board in its oversight role with respect to compliance issues and certain other regulatory matters affecting the Funds and the Portfolio ; (ii) serve as a liaison between the Board and the Funds' and Portfolio's CCO; and (iii) serve as a “qualified legal compliance committee” within the rules promulgated by the SEC. During the fiscal year ended September 30, 2012 , the Compliance Reports and Regulatory Matters Committee convened fifteen times.

Share Ownership. The following table shows the dollar range of equity securities beneficially owned by each Trustee in the Fund and in all Eaton Vance Funds overseen by the Trustee as of December 31, 2012 . Interests in a Portfolio cannot be purchased by a Trustee.

Fund Name	Dollar Range of Equity Securities Owned by									
	Scott E. Eston ⁽²⁾	Benjamin C. Esty ⁽²⁾	Thomas E. Faust Jr ⁽¹⁾	Allen R. Freedman ⁽²⁾	William H. Park ⁽²⁾	Ronald A. Pearlman ⁽²⁾	Helen Frame Peters ⁽²⁾	Lynn A. Stout ⁽²⁾	Helen Tee Taggart ⁽²⁾	Ralph F. Verni ⁽²⁾
Focused Growth Fund	None	None	None	None	None	None	None	None	None	None
Horizon Growth Fund	None	None	None	None	None	None	None	None	None	None
Select Equity Fund	None	None	None	None	None	None	\$50,001 - \$100,000	None	None	None
SMID-Cap Fund	None	None	None	None	None	None	\$50,001 - \$100,000	None	None	None
Aggregate Dollar Range of Equity Securities Owned in all Registered Funds Overseen by Trustee in the Eaton Vance Family of Funds	over \$100,000 ⁽³⁾	over \$100,000	over \$100,000	over \$100,000	over \$100,000	over \$100,000	over \$100,000	over \$100,000 ⁽³⁾	over \$100,000	over \$100,000 ⁽³⁾

(1) Interested Trustee.

(2) Noninterested Trustees.

(3) Includes shares which may be deemed to be beneficially owned through the Trustee Deferred Compensation Plan.

As of Δεχέμβερ 31, 2012 , no noninterested Trustee or any of their immediate family members owned beneficially or of record any class of securities of EVC, EVD or any person controlling, controlled by or under common control with EVC or EVD.

During the calendar years ended December 31, 2011 and December 31, 2012 , no noninterested Trustee (or their immediate family members) had:

- (1) Any direct or indirect interest in Eaton Vance, EVC, EVD or any person controlling, controlled by or under common control with EVC or EVD;
- (2) Any direct or indirect material interest in any transaction or series of similar transactions with (i) the Trust or any Fund; (ii) another fund managed by EVC, distributed by EVD or a person controlling, controlled by or under common control with EVC or EVD; (iii) EVC or EVD; (iv) a person controlling, controlled by or under common control with EVC or EVD; or (v) an officer of any of the above; or
- (3) Any direct or indirect relationship with (i) the Trust or any Fund; (ii) another fund managed by EVC, distributed by EVD or a person controlling, controlled by or under common control with EVC or EVD; (iii) EVC or EVD; (iv) a person controlling, controlled by or under common control with EVC or EVD; or (v) an officer of any of the above.

During the calendar years ended December 31, 2011 and December 31, 2012 , no officer of EVC, EVD or any person controlling, controlled by or under common control with EVC or EVD served on the Board of Directors of a company where a noninterested Trustee of the Trust or the Portfolio or any of their immediate family members served as an officer.

Noninterested Trustees may elect to defer receipt of all or a percentage of their annual fees in accordance with the terms of a Trustees Deferred Compensation Plan (the “ Deferred Compensation Plan”). Under the Deferred

Compensation Plan, an eligible Board member may elect to have his or her deferred fees invested in the shares of one or more funds in the Eaton Vance Family of Funds, and the amount paid to the Board members under the Deferred Compensation Plan will be determined based upon the performance of such investments. Deferral of Board members' fees in accordance with the

Deferred Compensation Plan will have a negligible effect on the assets, liabilities, and net income of a participating fund or portfolio, and do not require that a participating Board member be retained. There is no retirement plan for Board members .

The fees and expenses of the Trustees of the Trust and the Portfolio are paid by the Funds (and other series of the Trust) and the Portfolio , respectively. (A Board member who is a member of the Eaton Vance organization receives no compensation from the Trust and the Portfolio.) During the fiscal year ended September 30, 2012 , the Trustees of the Trust and the Portfolio earned the following compensation in their capacities as Board members from the Trust and the Portfolio. For the year ended December 31, 2012 , the Board members earned the following compensation in their capacities as members of the Board of the funds in the Eaton Vance fund complex⁽¹⁾:

Source of Compensation	Scott E. Eston	Benjamin C. Esty	Allen R. Freedman	William H. Park	Ronald A. Pearlman	Helen Frame Peters	Lynn A. Stout	Harriet Tee Taggart	Ralph F. Verni
Growth Trust ⁽²⁾	\$ 2,194	\$ 2,376	\$ 2,241	\$ 2,376	\$ 2,376	\$ 2,194	\$ 2,376	\$ 2,194	\$ 3,290
Mutual Funds Trust ⁽²⁾	\$ 15,991	\$ 17,324	\$ 16,326	\$ 17,324	\$ 17,324	\$ 15,991	\$ 17,324	\$ 15,991	\$ 23,987
SMID-Cap Portfolio	6,901 ⁽³⁾	\$ 7,476	\$ 7,044	\$ 7,476	\$ 7,476	\$ 6,901	\$ 7,476 ⁽⁴⁾	\$ 6,901	\$ 10,351 ⁽⁵⁾
Trust and Fund Complex ⁽¹⁾	\$ 240,000 ⁽⁶⁾	\$ 260,000	\$ 245,000	\$ 260,000	\$ 260,000	\$ 240,000	\$ 260,000 ⁽⁷⁾	\$ 240,000	\$ 360,000 ⁽⁸⁾

(1) As of February 1, 2013 , the Eaton Vance fund complex consists of 191 registered investment companies or series thereof.

(2) Growth Trust consisted of 16 Funds and Mutual Funds Trust consisted of 33 Funds as of September 30, 2012 ..

(3) Includes deferred compensation as follows: SMID-Cap Portfolio - \$6,901.

(4) Includes deferred compensation as follows: SMID-Cap Portfolio - \$ 1,358 ..

(5) Includes deferred compensation as follows: SMID-Cap Portfolio - \$ 5,168 ..

(6) Includes \$228,679 of deferred compensation.

(7) Includes \$45,000 of deferred compensation.

(8) Includes \$171,250 of deferred compensation.

Organization. Focused Growth Fund , Select Equity Fund and SMID-Cap Fund are each series of Eaton Vance Growth Trust, which was organized under Massachusetts law on May 25, 1989 and Horizon Growth Fund is a series of Eaton Vance Mutual Funds Trust, which was organized under Massachusetts law on May 7, 1984. Both Trusts are operated as open-end management investment companies. As of July 23, 2012, the Focused Growth Fund invests directly in securities. Prior to that date, the Fund invested all of its investable assets in interests in Focused Growth Portfolio, a Massachusetts business trust having the same investment objective and policies as the Fund. The Trust may issue an unlimited number of shares of beneficial interest (no par value per share) in one or more series (such as a Fund). The Trustees of the Trust have divided the shares of each Fund into multiple classes. Each class represents an interest in a Fund, but is subject to different expenses, rights and privileges. The Trustees have the authority under the Declaration of Trust to create additional classes of shares with differing rights and privileges. When issued and outstanding, shares are fully paid and nonassessable by the Trust. Shareholders are entitled to one vote for each full share held. Fractional shares may be voted proportionately. Shares of a Fund will be voted together except that only shareholders of a particular class may vote on matters affecting only that class. Shares have no preemptive or conversion rights and are freely transferable. In the event of the liquidation of a Fund, shareholders of each class are entitled to share pro rata in the net assets attributable to that class available for distribution to shareholders.

As permitted by Massachusetts law, there will normally be no meetings of shareholders for the purpose of electing Trustees unless and until such time as less than a majority of the Trustees of the Trust holding office have been elected by shareholders. In such an event the Trustees then in office will call a shareholders' meeting for the election of Trustees. Except for the foregoing circumstances and unless removed by action of the shareholders in accordance with the Trust' s By-laws, the Trustees shall continue to hold office and may

appoint successor Trustees. The Trust's By-laws provide that no person shall serve as a Trustee if shareholders holding two-thirds of the outstanding shares have removed him or her from that office either by a written declaration filed with the Trust's custodian or by votes cast at a meeting called for that purpose. The By-laws further provide that under certain circumstances the shareholders may call a meeting to remove a Trustee and that the Trust is required to provide assistance in communication with shareholders about such a meeting.

The Trust's Declaration of Trust may be amended by the Trustees when authorized by vote of a majority of the outstanding voting securities of the Trust, the financial interests of which are affected by the amendment. The Trustees may also amend the Declaration of Trust without the vote or consent of shareholders to change the name of the Trust or any series or to make such other changes (such as reclassifying series or classes of shares or restructuring the Trust) as do not have a materially adverse effect on the financial interests of shareholders or if they deem it necessary to conform it to applicable federal or state laws or regulations. The Trust's By-laws provide that the Trust will indemnify its Trustees and officers against liabilities and expenses incurred in connection with any litigation or proceeding in which they may be involved because of their offices with the Trust. However, no indemnification will be provided to any Trustee or officer for any liability to the Trust or shareholders by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

The Trust or any series or class thereof may be terminated by: (1) the affirmative vote of the holders of not less than two-thirds of the shares outstanding and entitled to vote at any meeting of shareholders of the Trust or the appropriate series or class thereof, or by an instrument or instruments in writing without a meeting, consented to by the holders of two-thirds of the shares of the Trust or a series or class thereof, provided, however, that, if such termination is recommended by the Trustees, the vote of a majority of the outstanding voting securities of the Trust or a series or class thereof entitled to vote thereon shall be sufficient authorization; or (2) by the approval of a majority of the Trustees then in office, to be followed by a written notice to shareholders.

Under Massachusetts law, if certain conditions prevail, shareholders of a Massachusetts business trust (such as the Trust) could be deemed to have personal liability for the obligations of the Trust. Numerous investment companies registered under the 1940 Act have been formed as Massachusetts business trusts, and management is not aware of an instance where such liability has been imposed. The Trust's Declaration of Trust contains an express disclaimer of liability on the part of Fund shareholders and the Trust's By-laws provide that the Trust shall assume the defense on behalf of any Fund shareholders. The Declaration of Trust also contains provisions limiting the liability of a series or class to that series or class. Moreover, the Trust's By-laws also provide for indemnification out of Fund property of any shareholder held personally liable solely by reason of being or having been a shareholder for all loss or expense arising from such liability. The assets of each Fund are readily marketable and will ordinarily substantially exceed its liabilities. In light of the nature of each Fund's business and the nature of its assets, management believes that the possibility of the Fund's liability exceeding its assets, and therefore the shareholder's risk of personal liability, is remote.

The Portfolio was organized as a business trust under the laws of the Commonwealth of Massachusetts on December 14, 2009 and intends to be treated as a partnership for federal tax purposes. Prior to that date, the Portfolio was organized as a New York trust on December 10, 2001. In accordance with the Declaration of Trust of the Portfolio, there will normally be no meetings of the investors for the purpose of electing Trustees unless and until such time as less than a majority of the Trustees of the Portfolio holding office have been elected by investors. In such an event the Trustees of the Portfolio then in office will call an investors' meeting for the election of Trustees. Except for the foregoing circumstances and unless removed by action of the investors in accordance with the Portfolio's Declaration of Trust, the Trustees shall continue to hold office and may appoint successor Trustees.

The Declaration of Trust of the Portfolio provides that no person shall serve as a Trustee if investors holding two-thirds of the outstanding interests have removed him from that office either by a written declaration filed with the Portfolio's custodian or by votes cast at a meeting called for that purpose. The Declaration of Trust further provides that under certain circumstances the investors may call a meeting to remove a Trustee and that the Portfolio is required to provide assistance in communicating with investors about such a meeting. The Portfolio's By-laws provide that the Portfolio will indemnify its Trustees and officers against liabilities and expenses incurred in connection with any litigation or proceeding in which they may be involved because of their offices with the Portfolio. However, no indemnification will be provided to any Trustee or officer for any

liability to the Portfolio or interestholders by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

Under Massachusetts law, if certain conditions prevail, shareholders of a Massachusetts business trust (such as the Portfolio) could be deemed to have personal liability for the obligations of the Portfolio. Numerous investment companies registered under the 1940 Act have been formed as Massachusetts business trusts, and management is not aware of an instance where such liability has been imposed. Each Portfolio's Declaration of Trust contains an express disclaimer of liability on the part of Portfolio interestholders and the By-laws provide that the Portfolio shall assume the defense on behalf of any Portfolio interestholders. Moreover, the By-laws also provide for indemnification out of Portfolio property of any interestholder held personally liable solely by reason of being or having been an interestholder for all loss or expense arising from such liability. The assets of the Portfolio are readily marketable and will ordinarily substantially exceed its liabilities. In light of the nature of

the Portfolio's business and the nature of its assets, management believes that the possibility of the Portfolio's liability exceeding its assets, and therefore the interestholder's risk of personal liability, is remote.

SMID-Cap Fund may be required to vote on matters pertaining to the Portfolio. When required by law to do so, the Fund will hold a meeting of Fund shareholders and will vote its interest in the Portfolio for or against such matters proportionately to the instructions to vote for or against such matters received from Fund shareholders. SMID-Cap Fund shall vote shares for which it receives no voting instructions in the same proportion as the shares for which it receives voting instructions. Other investors in the Portfolio may alone or collectively acquire sufficient voting interests in the Portfolio to control matters relating to the operation of the Portfolio, which may require the Fund to withdraw its investment in the Portfolio or take other appropriate action. Any such withdrawal could result in a distribution "in kind" of portfolio securities (as opposed to a cash distribution from the Portfolio). If securities are distributed, SMID-Cap Fund could incur brokerage, tax or other charges in converting the securities to cash. In addition, the distribution in kind may result in a less diversified portfolio of investments or adversely affect the liquidity of SMID-Cap Fund. Notwithstanding the above, there are other means for meeting shareholder redemption requests, such as borrowing.

Proxy Voting Policy. The Board adopted a proxy voting policy and procedures (the "Fund Policy"), pursuant to which the Board has delegated proxy voting responsibility to the investment sub-adviser and adopted the proxy voting policies and procedures of the investment sub-adviser (the "Policies"). An independent proxy voting service has been retained to assist in the voting of Fund proxies through the provision of vote analysis, implementation and recordkeeping and disclosure services. The members of the Board will review each Fund's and the Portfolio's proxy voting records from time to time and will annually consider approving the Policies for the upcoming year. For a copy of the Fund Policy and investment sub-adviser Policies, see Appendix G and Appendix H, respectively. Pursuant to certain provisions of the 1940 Act and certain exemptive orders relating to funds investing in other funds, a Fund or Portfolio may be required or may elect to vote its interest in another fund in the same proportion as the holders of all other shares of that fund. Information on how each Fund and the Portfolio voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling 1-800-262-1122, and (2) on the SEC's website at <http://www.sec.gov>.

INVESTMENT ADVISORY AND ADMINISTRATIVE SERVICES

Investment Advisory Services. The investment adviser is responsible for managing the investments and affairs of the Trust and the Portfolio and providing related office facilities and personnel subject to the supervision of the Trust, in the case of a Fund, or a Portfolio's Board of Trustees. The investment sub-adviser furnishes investment research, advice and supervision, furnishes an investment program and determines what securities will be purchased, held or sold by the Portfolio or each Fund and what portion, if any, of the SMID-Cap Portfolio and Focused Growth Fund, Horizon Growth Fund and Select Equity Fund's assets will be held uninvested. Each Investment Advisory Agreement, Investment Advisory and Administrative Agreement and Investment Sub-Advisory Agreement requires the investment adviser or sub-adviser, as the case may be, to pay the salaries and fees of all officers and Trustees of SMID-Cap Portfolio and Focused Growth Fund, Horizon Growth Fund and Select Equity Fund who are members of the investment adviser's or sub-adviser's organization and all personnel of the investment adviser or sub-adviser performing services relating to research and investment activities.

For a description of the compensation that each Fund or the Portfolio pays the investment adviser pursuant to the applicable Investment Advisory Agreement or Investment Advisory and Administrative Agreement, see the Prospectus. The following table sets forth the net assets of Focused Growth Fund, Horizon Growth Fund, Select Equity Fund and SMID-Cap Portfolio and the advisory fees for Focused Growth Fund, Horizon Growth Fund, Select Equity Fund and SMID-Cap Portfolio for the three fiscal years ended September 30, 2012, unless otherwise noted below. See note regarding the information shown for Horizon Growth Fund.

	Net Assets at 9/30/12	Advisory Fee		
		9/30/12	9/30/11	9/30/10
Focused Growth Fund ⁽¹⁾	\$ 178,062,592	\$ 230,658	\$ 403,286	\$ 156,776
Horizon Growth Fund ⁽²⁾	\$ 39,627,686	\$ 360,536	\$ 180,663	\$ 607,269
Select Equity Fund	\$ 25,712,723	\$ 61,357(3)	N/A	N/A
SMID-Cap Portfolio ⁽⁴⁾	\$ 3,071,369,944	\$ 20,820,569	\$ 10,425,626	\$ 3,685,354

- (1) For the fiscal year ended September 30, 2010, BMR made a reduction of its advisory fee in the amount of \$3,098, equal to that portion of commissions paid to broker-dealers in execution of security transactions that was consideration for Third Party Research Services ..
- (2) Data shown for 2011 is for the eleven month period ended September 30, 2011. Prior to April 22, 2011 the Fund's assets were invested in the Tax-Managed Mid-Cap Core Portfolio and the Fund was allocated \$199,510 of the Portfolio's adviser fee. Amount shown for 2010 are for the fiscal year ended October 31, 2010 and is the amount attributed to the Portfolio. For the fiscal year ended October 31, 2010, BMR made a reduction of its advisory fee in the amount of \$3,240, equal to that portion of commissions paid to broker-dealers in execution of security transactions that was consideration for Third Party Research Services (as described in "Portfolio Securities Transactions" below).
- (3) Data shown for 2012 is for the period from January 3, 2012, to September 30, 2012.
- (4) For the fiscal year ended September 30, 2010, BMR made a reduction of its advisory fee in the amount of \$29,445, equal to that portion of commissions paid to broker-dealers in execution of security transactions that was consideration for Third Party Research Services (as described in "Portfolio Securities Transactions" below).

Each Investment Advisory Agreement, Investment Advisory and Administrative Agreement and Investment Sub-Advisory Agreement with the investment adviser or sub-adviser continues in effect from year to year so long as such continuance is approved at least annually (i) by the vote of a majority of the noninterested Trustees of the Trust, in the case of a Fund, or the Portfolio, in the case of the Portfolio, cast in person at a meeting specifically called for the purpose of voting on such approval and (ii) by the Board of Trustees of the Trust, in the case of a Fund, or the Portfolio, in the case of the Portfolio, or by vote of a majority of the outstanding voting securities of the Fund or Portfolio .. Each Agreement may be terminated at any time without penalty on sixty (60) days' written notice by the Board of either party, or by vote of the majority of the outstanding voting securities of the Fund or Portfolio, and each Agreement will terminate automatically in the event of its assignment. Each Agreement provides that the investment adviser or sub-adviser may render services to others. Each Agreement also provides that the investment adviser or sub-adviser shall not be liable for any loss incurred in connection with the performance of its duties, or action taken or omitted under the Agreement, in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations and duties thereunder, or for any losses sustained in the acquisition, holding or disposition of any security or other investment.

Information About BMR and Eaton Vance. BMR and Eaton Vance are business trusts organized under the laws of The Commonwealth of Massachusetts. EV serves as trustee of BMR and Eaton Vance. EV and Eaton Vance are wholly-owned subsidiaries of EVC, a Maryland corporation and publicly-held holding company. BMR is an indirect subsidiary of EVC. EVC through its subsidiaries and affiliates engages primarily in investment management, administration and marketing activities. The Directors of EVC are Thomas E. Faust Jr., Ann E. Berman, Leo I. Higdon, Jr., Dorothy E. Puhy, Duncan W. Richardson, Winthrop H. Smith, Jr. and Richard A. Spillane, Jr. All shares of the outstanding Voting Common Stock of EVC are deposited in a Voting Trust, the Voting Trustees of which are Mr. Faust, Jeffrey P. Beale, Daniel C. Cataldo, Cynthia J. Clemson, Maureen A. Gemma, Laurie G. Hylton, Brian D. Langstraat, Michael R. Mach, Frederick S. Marius, David C. McCabe, Thomas M. Metzold, Scott H. Page, Mr. Richardson, Walter A. Row, III, Judith A. Saryan, David M. Stein, Payson F. Swaffield, Michael W. Weilheimer and Matthew J. Witkos (all of whom are officers of Eaton Vance or its affiliates). The Voting Trustees have unrestricted voting rights for the election of Directors of EVC. All of the outstanding voting trust receipts issued under said Voting Trust are owned by certain of the officers of BMR and Eaton Vance who may also be officers, or officers and Directors of EVC and EV. As indicated under

“Management and Organization,” all of the officers of the Trust (as well as Mr. Faust who is also a Trustee) hold positions in the Eaton Vance organization.

Code of Ethics. The investment adviser, sub-adviser, principal underwriter, and each Fund and the Portfolio have adopted Codes of Ethics governing personal securities transactions. Under the Codes, employees of the investment adviser, the sub-adviser and the principal underwriter may purchase and sell securities (including securities held or eligible for purchase by the Fund or the Portfolio) subject to the provisions of the Codes and certain employees are also subject to pre-clearance, reporting requirements and other procedures.

Information About Atlanta Capital. Atlanta Capital, a majority-owned affiliate of EVC, is an Atlanta, Georgia based equity and fixed income manager with a primary focus on separate account management for institutional clients. At September 30, 2012, Atlanta Capital's assets under management totaled approximately \$ 14.2 billion. Atlanta Capital was founded in 1969 as a registered investment adviser.

Portfolio Managers. The members of the portfolio management team (each referred to as a "portfolio manager") of SMID-Cap Portfolio and Focused Growth Fund, Horizon Growth Fund and Select Equity Fund are listed below. Each portfolio manager may manage other investment companies and/or investment accounts in addition to each Fund or the Portfolio. The following table shows, as of the Funds' and Portfolio's most recent fiscal year end, the number of accounts each portfolio manager managed in each of the listed categories and the total assets (in millions of dollars) in the accounts managed within each category. The table also shows the number of accounts with respect to which the advisory fee is based on the performance of the account, if any, and the total assets (in millions of dollars) in those accounts.

(1) For "Other Accounts" that are part of a wrap account program, the number of accounts cited includes the number of sponsors for which the portfolio manager provides management services rather than the number of individual accounts within each wrap account program.

The following table shows the dollar range of shares of a Fund beneficially owned by its portfolio manager(s) as of the Funds' most recent fiscal year or period ended September 30, 2012 and in the Eaton Vance Family of Funds as of December 31, 2012 .. Interests in the Portfolio cannot be purchased by a portfolio manager.

Fund Name and Portfolio Managers	Dollar Range of Equity Securities Owned in the Fund	Aggregate Dollar Range of Equity Securities Owned in all Registered Funds in the Eaton Vance Family of Funds
Focused Growth Fund		
Richard B. England	\$100,001 - \$500,000	\$500,001 - \$1,000,000
Paul J. Marshall	\$100,001 - \$500,000	\$500,001 - \$1,000,000
Horizon Growth Fund		
Richard B. England	\$50,001 - \$100,000	\$500,001 - \$1,000,000
Brian P. Mansfield		\$100,001 - \$500,000
Glenn H. Shaw		\$100,001 - \$500,000
Select Equity Fund		
William O. Bell, IV	\$500,001 - \$1,000,000	Over \$1,000,000
W. Matthew Hereford	\$500,001 - \$1,000,000	\$500,001 - \$1,000,000
Charles B. Reed	\$500,001 - \$1,000,000	Over \$1,000,000
SMID-Cap Fund		
William O. Bell, IV	\$500,001 - \$1,000,000	Over \$1,000,000
W. Matthew Hereford	\$100,001 - \$500,000	\$500,001 - \$1,000,000
Charles B. Reed	\$500,001 - \$1,000,000	Over \$1,000,000

It is possible that conflicts of interest may arise in connection with a portfolio manager's management of SMID-Cap Portfolio's or Focused Growth, Horizon Growth or Select Equity Funds' investments on the one hand and the investments of other accounts for which the portfolio manager is responsible on the other. For

example, a portfolio manager may have conflicts of interest in allocating management time, resources and investment opportunities among the Portfolio , Focused Growth Fund, Horizon Growth Fund or Select Equity Fund and other accounts he advises. In addition, due to differences in the investment strategies or restrictions between the Portfolio and Focused Growth Fund, Horizon Growth Fund or Select Equity Fund and the other accounts, a portfolio manager may take action with respect to another account that differs from the action taken with respect to the Portfolio , Focused Growth Fund, Horizon Growth Fund or Select Equity Fund .. In some cases, another account managed by a portfolio manager may compensate the investment adviser based on the performance of the securities held by that account. The existence of such a performance based fee may create additional conflicts of interest for the portfolio manager in the allocation of management time, resources and investment opportunities. Whenever conflicts of interest arise, the portfolio manager will endeavor to exercise his discretion in a manner that he believes is equitable to all interested

persons. The investment adviser and sub-adviser have adopted several policies and procedures designed to address these potential conflicts including a code of ethics and policies that govern the investment adviser' s and sub-adviser' s trading practices, including among other things the aggregation and allocation of trades among clients, brokerage allocation, cross trades and best execution.

Compensation Structure for Atlanta Capital. Compensation of Atlanta Capital portfolio managers and other investment professionals has three primary components: (1) a base salary, (2) an annual cash bonus, and (3) annual stock-based compensation consisting of options to purchase shares of EVC' s nonvoting common stock, restricted shares of EVC' s nonvoting common stock, and grants of profit participation interests in Atlanta Capital. Investment professionals also receive certain retirement, insurance and other benefits that are broadly available to Atlanta Capital employees. Compensation of Atlanta Capital investment professionals is reviewed primarily on an annual basis. Cash bonuses, stock-based compensation awards, and adjustments in base salary are typically paid or put into effect at or shortly after the October 31st fiscal year end of EVC.

Method to Determine Compensation. Atlanta Capital compensates its portfolio managers based primarily on the scale and complexity of their portfolio responsibilities and the performance of managed funds and accounts. Each portfolio manager is evaluated based on the composite performance of funds and accounts in each product for which the individual serves on the portfolio management team. Performance is normally based on periods ending on the June 30th preceding fiscal year end. The primary measures of management team performance are one-year, three-year, and five-year total return investment performance against product-specific benchmarks and peer groups. These factors are evaluated on an equal weighted basis. Fund performance is evaluated primarily against a peer group of funds as determined by Lipper, Inc. and/or Morningstar, Inc. For managers responsible for multiple funds and accounts or serving on multiple portfolio management teams, investment performance is evaluated on an aggregate basis, based on averages or weighted averages among the managed funds and accounts. The performance of accounts for which Atlanta Capital is paid a performance-based incentive fee is not considered separately or accorded disproportionate weightings in determining portfolio manager incentive compensation.

The compensation of portfolio managers with other job responsibilities (such as heading an investment group or providing analytical support to other portfolios) includes consideration of the scope of such responsibilities and the managers' performance in meeting them.

Atlanta Capital seeks to compensate portfolio managers commensurate with their responsibilities and performance, and competitive with other firms within the investment management industry. Atlanta Capital utilizes industry survey data as a factor in determining salary, bonus and stock-based compensation levels for portfolio managers and other investment professionals. Salaries, bonuses and stock-based compensation are also influenced by the operating performance of Atlanta Capital and its parent company. The size of the overall incentive compensation pool is determined each year by Atlanta Capital' s management team in consultation with EVC and depends primarily on Atlanta Capital' s profitability for the year. While the salaries of Atlanta Capital portfolio managers are comparatively fixed, cash bonuses and stock-based compensation may fluctuate substantially from year to year, based on changes in manager performance and other factors as described herein.

Administrative Services. As indicated in the Prospectus for each Fund, except Select Equity Fund, under an Administrative Services Agreement, Eaton Vance serves as administrator of each such Fund but currently receives no compensation from Focused Growth Fund or SMID-Cap Fund for providing administrative services to the Fund. Horizon Growth Fund is authorized to pay Eaton Vance an annual fee in the amount of 0.15% of average daily net assets for providing administrative services to the Fund. For the fiscal year ended September 30, 2012, the eleven-month fiscal period ended September 30, 2011, and the fiscal year ended October 31, 2010, Horizon Growth Fund paid or accrued administration fees of \$ 67,601, \$ 71,015 and \$59,777, respectively. Eaton Vance also provides administrative services to the Select Equity Fund under its Investment Advisory and Administrative Agreement. Under the applicable Agreement, Eaton Vance has been engaged to administer each

Fund' s affairs, subject to the supervision of the Board , and shall furnish office space and all necessary office facilities, equipment and personnel for administering the affairs of each Fund.

Pursuant to expense reimbursement agreements, for the fiscal years ended September 30, 2011 and 2010 , Eaton Vance was allocated \$25,543 and \$38,380 , respectively, and Atlanta Capital was allocated \$40,869 and \$61,408 , respectively, of the operating expenses of Focused Growth Fund .. Eaton Vance and Atlanta Capital did not reimburse expenses for the year ended September 30, 2012 ..

Pursuant to expense reimbursement agreements, for the fiscal year ended September 30, 2012, Eaton Vance and Atlanta Capital were allocated \$144,430 in total of the operating expenses of Horizon Growth Fund. For the eleven-month fiscal period ended September 30, 2011 and the fiscal year ended October 31, 2010, Eaton Vance was allocated \$31,689 and, \$10,641, respectively and Atlanta Capital was allocated \$69,717 and \$23,409, respectively, of the operating expenses of the Fund.

Pursuant to expense reimbursement agreements, for the period from the commencement of operations, January 3, 2012, to September 30, 2012, Eaton Vance and Atlanta Capital were allocated \$105,609 in total of the operating expenses of Select Equity Fund.

Pursuant to expense reimbursement agreements, for the fiscal year ended September 30, 2012, Eaton Vance and Atlanta Capital were allocated \$1,905,939 in total of the operating expenses of SMID-Cap Fund. For the fiscal years ended September 30, 2011 and 2010, Eaton Vance was allocated \$385,295 and \$179,919, respectively, and Atlanta Capital was allocated \$1,155,885 and \$539,755, respectively, of the operating expenses of SMID-Cap Fund. In addition, for the fiscal years ended September 30, 2011 and 2010, BMR was allocated \$101,784 and \$101,197, respectively, and Atlanta Capital was allocated \$305,351 and \$303,590, respectively, of the operating expenses of SMID-Cap Portfolio.

Sub-Transfer Agency Services. Eaton Vance also serves as sub-transfer agent for each Fund. As sub-transfer agent, Eaton Vance performs the following services directly on behalf of a Fund: (1) provides call center services to financial intermediaries and shareholders; (2) answers written inquiries related to shareholder accounts (matters relating to portfolio management, distribution of shares and other management policy questions will be referred to a Fund); (3) furnishes an SAI to any shareholder who requests one in writing or by telephone from a Fund; and (4) processes transaction requests received via telephone. For the sub-transfer agency services it provides, Eaton Vance receives an aggregate annual fee equal to the lesser of \$2.5 million or the actual expenses incurred by Eaton Vance in the performance of those services. This fee is paid to Eaton Vance by a Fund's transfer agent from fees it receives from the Eaton Vance funds. Each Fund pays a pro rata share of such fee. For the fiscal year ended September 30, 2012, the transfer agent accrued for or paid the following to Eaton Vance for sub-transfer agency services performed on behalf of each Fund:

Focused Growth Fund	Horizon Growth Fund	Select Equity Fund ⁽¹⁾	SMID-Cap Fund
\$8,510	\$3,457	\$321	\$93,329

(1) For the period from the commencement of operations, January 3, 2012 to September 30, 2012.

Expenses. Each Fund and the Portfolio are responsible for all expenses not expressly stated to be payable by another party (such as expenses required to be paid pursuant to an agreement with the investment adviser, the sub-adviser, the principal underwriter or the administrator). In the case of expenses incurred by the Trust, each Fund is responsible for its pro rata share of those expenses. The only expenses of a Fund allocated to a particular class are those incurred under the Distribution Plan applicable to that class (if any) and certain other class-specific expenses.

OTHER SERVICE PROVIDERS

Principal Underwriter. Eaton Vance Distributors, Inc. ("EVD"), Two International Place, Boston, MA 02110 is the principal underwriter of each Fund. The principal underwriter acts as principal in selling shares under a Distribution Agreement with the Trust. The expenses of printing copies of prospectuses used to offer shares and other selling literature and of advertising are borne by the principal underwriter. The fees and expenses of qualifying and registering and maintaining qualifications and registrations of a Fund and its shares under federal and state securities laws are borne by the Fund. The Distribution Agreement is renewable annually by the members of the Board (including a majority of the noninterested Trustees who have no direct or indirect financial interest in the operation of the Distribution Agreement or any applicable Distribution Plan), may be terminated on sixty days' notice either by such Trustees or by vote of a majority of the outstanding Fund shares or on six months' notice by the principal underwriter and is automatically terminated upon assignment. The principal underwriter distributes shares on a "best efforts" basis under which it is required to take and pay for only such shares as may be sold. EVD is a direct, wholly-owned subsidiary of EVC. Mr. Faust is a Director of EVD. EVD also serves as placement agent for the Portfolio.

Custodian. State Street Bank and Trust Company ("State Street"), 200 Clarendon Street, Boston, MA 02116, serves as custodian to each Fund and the Portfolio. State Street has custody of all cash and securities representing SMID-Cap Fund's interest in the Portfolio, has custody of the Portfolio's and each Fund's assets, maintains the general ledger of the Portfolio and each Fund and computes the daily net asset value of interests

in the Portfolio and the net asset value of shares of each Fund. In such capacity it attends to details in connection with the sale, exchange, substitution, transfer or other dealings with each Fund's assets and the Portfolio's investments, receives and disburses all funds and performs various other ministerial duties upon receipt of proper instructions from the Trust and the Portfolio. State Street also provides services in connection with the preparation of shareholder reports and the electronic filing of such reports with the SEC. EVC and its affiliates and their officers and employees from time to time have transactions with various banks, including State Street. It is Eaton Vance's opinion that the terms and conditions of such transactions were not and will not be influenced by existing or potential custodial or other relationships between each Fund or the Portfolio and such banks.

Independent Registered Public Accounting Firm. Deloitte & Touche LLP, 200 Berkeley Street, Boston, MA 02116, is the independent registered public accounting firm of each Fund and the Portfolio, providing audit and related services, assistance and consultation with respect to the preparation of filings with the SEC.

Transfer Agent. BNY Mellon Investment Servicing (US) Inc., P.O. Box 9653, Providence, RI 02940-9653, serves as transfer and dividend disbursing agent for each Fund.

CALCULATION OF NET ASSET VALUE

The net asset value of the Fund is determined by State Street (as agent and custodian) by subtracting the liabilities of the Fund from the value of its total assets. The Fund is closed for business and will not issue a net asset value on the following business holidays and any other business day that the New York Stock Exchange (the "Exchange") is closed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Each Portfolio investor may add to or reduce its investment in the Portfolio on each day the Exchange is open for trading ("Portfolio Business Day") as of the close of regular trading on the Exchange (the "Portfolio Valuation Time"). The value of each investor's interest in the Portfolio will be determined by multiplying the net asset value of the Portfolio by the percentage, determined on the prior Portfolio Business Day, which represented that investor's share of the aggregate interests in the Portfolio on such prior day. Any additions or withdrawals for the current Portfolio Business Day will then be recorded. Each investor's percentage of the aggregate interest in the Portfolio will then be recomputed as a percentage equal to a fraction (i) the numerator of which is the value of such investor's investment in the Portfolio as of the Portfolio Valuation Time on the prior Portfolio Business Day plus or minus, as the case may be, the amount of any additions to or withdrawals from the investor's investment in the Portfolio on the current Portfolio Business Day and (ii) the denominator of which is the aggregate net asset value of the Portfolio as of the Portfolio Valuation Time on the prior Portfolio Business Day plus or minus, as the case may be, the amount of the net additions to or withdrawals from the aggregate investment in the Portfolio on the current Portfolio Business Day by all investors in the Portfolio. The percentage so determined will then be applied to determine the value of the investor's interest in the Portfolio for the current Portfolio Business Day.

The Board has approved procedures pursuant to which investments are valued for purposes of determining the Fund's net asset value. Listed below is a summary of the methods generally used to value investments (some or all of which may be held by the Fund) under the procedures.

- Equity securities (including common stock, exchange traded funds, closed end funds, preferred equity securities, exchange traded notes and other instruments that trade on recognized stock exchanges) are valued at the last sale, official close or if there are no reported sales at the mean between the bid and asked price on the primary exchange on which they are traded.
- Most debt obligations are valued on the basis of market valuations furnished by a pricing service or at the mean of the bid and asked prices provided by recognized broker/dealers of such securities. The pricing service may use a pricing matrix to determine valuation.
- Short-term obligations and money market securities maturing in sixty days or less typically are valued at amortized cost which approximates value.
- Foreign securities and currencies are valued in U.S. dollars based on foreign currency exchange quotations supplied by a pricing service.
- Senior and Junior Loans are valued on the basis of prices furnished by a pricing service. The pricing service uses transactions and market quotations from brokers in determining values.
- Most seasoned fixed-rate 30 year MBS are valued by Eaton Vance using a matrix pricing system, which takes into account bond prices, yield differentials, anticipated prepayments and interest rates provided by dealers.
-

Futures contracts are valued at the settlement or closing price on the primary exchange or board of trade on which they are traded.

- Exchange-traded options are valued at the mean of the bid and asked prices. Over-the-counter options are valued based on quotations obtained from a pricing service or from a broker (typically the counterparty to the option).

- Non-exchange traded derivatives (including swap agreements, forward contracts and equity participation notes) are generally valued on the basis of valuations provided by a pricing service or using quotes provided by a broker/dealer (typically the counterparty).
- Precious metals are valued at the New York Composite mean quotation.
- Liabilities with a payment or maturity date of 364 days or less are stated at their principal value and longer dated liabilities generally will be carried at their fair value.
- Valuations of foreign equity securities may be adjusted from prices in effect at the close of trading on foreign exchanges to more accurately reflect their fair value as of the close of regular trading on the Exchange. Such fair valuations may be based on information provided by a pricing service.

Investments which are unable to be valued in accordance with the foregoing methodologies are valued at fair value using methods determined in good faith by or at the direction of the members of the Board. Such methods may include consideration of relevant factors, including but not limited to (i) the type of security, the existence of any contractual restrictions on the security's disposition, (ii) the price and extent of public trading in similar securities of the issuer or of comparable companies or entities, (iii) quotations or relevant information obtained from broker-dealers or other market participants, (iv) information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange-traded securities), (v) an analysis of the company's or entity's financial condition, (vi) an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold (vii) an analysis of the terms of any transaction involving the issuer of such securities; and (viii) any other factors deemed relevant by the investment adviser. The portfolio managers of one Eaton Vance fund that invests in Senior and Junior Loans may not possess the same information about a Senior or Junior Loan as the portfolio managers of another Eaton Vance fund. As such, at times the fair value of a Loan determined by certain Eaton Vance portfolio managers may vary from the fair value of the same Loan determined by other portfolio managers.

PURCHASING AND REDEEMING SHARES

Additional Information About Purchases. Fund shares are offered for sale only in states where they are registered. Fund shares are continuously offered through financial intermediaries which have entered into agreements with the principal underwriter. Shares of a Fund are sold at the offering price, which is the net asset value plus the initial sales charge, if any. The Fund receives the net asset value. The principal underwriter receives the sales charge, all or a portion of which may be reallocated to the financial intermediaries responsible for selling Fund shares. The sales charge table in the Prospectus is applicable to purchases of a Fund alone or in combination with purchases of certain other funds offered by the principal underwriter, made at a single time by (i) an individual, or an individual, his or her spouse and their children under the age of twenty-one, purchasing shares for his or their own account, and (ii) a trustee or other fiduciary purchasing shares for a single trust estate or a single fiduciary account. The table is also presently applicable to (1) purchases of Class A shares pursuant to a written Statement of Intention; or (2) purchases of Class A shares pursuant to the Right of Accumulation and declared as such at the time of purchase. See "Sales Charges .."

In connection with employee benefit or other continuous group purchase plans, a Fund may accept initial investments of less than the minimum investment amount on the part of an individual participant. In the event a shareholder who is a participant of such a plan terminates participation in the plan, his or her shares will be transferred to a regular individual account. However, such account will be subject to the right of redemption by a Fund as described below.

Class I Share Purchases. Class I shares are available for purchase by clients of financial intermediaries who (i) charge such clients an ongoing fee for advisory, investment, consulting or similar services, or (ii) have entered into an agreement with the principal underwriter to offer Class I shares through a no-load network or platform. Such clients may include individuals, corporations, endowments, foundations and qualified plans (including tax-deferred retirement plans and profit sharing plans). Class I shares also are offered to investment and institutional clients of Eaton Vance and its affiliates; certain persons affiliated with Eaton Vance and certain

Fund service providers; current and retired Directors and Trustees of Eaton Vance funds; employees of Eaton Vance and its affiliates and such persons' spouses, parents, siblings and lineal descendants and their beneficial accounts.

Class R Share Purchases. Class R shares are available for purchase by clients of financial intermediaries who charge an advisory, management or consulting or similar fee for their services; accounts affiliated with those financial intermediaries; and in connection with certain tax-deferred retirement plans and Individual Retirement Account rollover accounts. Detailed information concerning tax-deferred plans eligible to purchase Class R shares, including certain exceptions to minimum investment requirements, and copies of the plans are available from the principal underwriter. This information should be read carefully and consulting with an attorney or tax adviser may be advisable. The information sets forth the service fee charged for retirement

plans and describes the federal income tax consequences of establishing a plan. Participant accounting services (including trust fund reconciliation services) will be offered only through third party recordkeepers and not by the principal underwriter. Under all plans, dividends and distributions will be automatically reinvested in additional shares.

Suspension of Sales. The Trust may, in its absolute discretion, suspend, discontinue or limit the offering of one or more of its classes of shares at any time. In determining whether any such action should be taken, the Trust's management intends to consider all relevant factors, including (without limitation) the size of a Fund or class, the investment climate and market conditions, the volume of sales and redemptions of shares, and (if applicable) the amount of uncovered distribution charges of the principal underwriter. The Class A, Class B, Class C and Class R Distribution Plans may continue in effect and payments may be made under the Plans following any such suspension, discontinuance or limitation of the offering of shares; however, there is no contractual obligation to continue any Plan for any particular period of time. Suspension of the offering of shares would not, of course, affect a shareholder's ability to redeem shares.

Additional Information About Redemptions. The right to redeem shares of a Fund can be suspended and the payment of the redemption price deferred when the Exchange is closed (other than for customary weekend and holiday closings), during periods when trading on the Exchange is restricted as determined by the SEC, or during any emergency as determined by the SEC which makes it impracticable for a Fund or the Portfolio to dispose of its securities or value its assets, or during any other period permitted by order of the SEC for the protection of investors.

Due to the high cost of maintaining small accounts, the Trust reserves the right to redeem accounts with balances of less than \$750. Prior to such a redemption, shareholders will be given 60 days' written notice to make an additional purchase. However, no such redemption would be required by the Trust if the cause of the low account balance was a reduction in the net asset value of shares. No CDSC or redemption fees, if applicable, will be imposed with respect to such involuntary redemptions.

While normally payments will be made in cash for redeemed shares, the Trust, subject to compliance with applicable regulations, has reserved the right to pay the redemption price of shares of a Fund, either totally or partially, by a distribution in kind of readily marketable securities. The securities so distributed would be valued pursuant to the valuation procedures described in this SAI. If a shareholder received a distribution in kind, the shareholder could incur brokerage or other charges in converting the securities to cash.

Systematic Withdrawal Plan. The transfer agent will send to the shareholder regular monthly or quarterly payments of any permitted amount designated by the shareholder based upon the value of the shares held. The checks will be drawn from share redemptions and hence, may require the recognition of taxable gain or loss. Income dividends and capital gains distributions in connection with withdrawal plan accounts will be credited at net asset value as of the record date for each distribution. Continued withdrawals in excess of current income will eventually use up principal, particularly in a period of declining market prices. A shareholder may not have a withdrawal plan in effect at the same time he or she has authorized Bank Automated Investing or is otherwise making regular purchases of Fund shares. The shareholder, the transfer agent or the principal underwriter may terminate the withdrawal plan at any time without penalty.

Other Information. A Fund's net asset value per share is normally rounded to two decimal places. In certain situations (such as a merger, share split or a purchase or sale of shares that represents a significant portion of a share class), the administrator may determine to extend the calculation of the net asset value per share to additional decimal places to ensure that neither the value of the Fund nor a shareholder's shares is diluted materially as the result of a purchase or sale or other transaction.

SALES CHARGES

Dealer Commissions. The principal underwriter may, from time to time, at its own expense, provide additional incentives to financial intermediaries which employ registered representatives who sell Fund shares and/or

shares of other funds distributed by the principal underwriter. In some instances, such additional incentives may be offered only to certain financial intermediaries whose representatives sell or are expected to sell significant amounts of shares. In addition, the principal underwriter may from time to time increase or decrease the sales commissions payable to financial intermediaries. The principal underwriter may allow, upon notice to all financial intermediaries with whom it has agreements, discounts up to the full sales charge during the periods specified in the notice. During periods when the discount includes the full sales charge, such financial intermediaries may be deemed to be underwriters as that term is defined in the 1933 Act.

Purchases at Net Asset Value. Class A shares may be sold at net asset value to current and retired Directors and Trustees of Eaton Vance funds and portfolios; to clients (including custodial, agency, advisory and trust accounts) and current and retired officers and employees of Eaton Vance, its affiliates and other investment advisers and sub-advisers of Eaton Vance sponsored

funds; and to such persons' spouses, parents, siblings and lineal descendants and their beneficial accounts.

Such shares may also be issued at net asset value (1) in connection with the merger (or similar transaction) of an investment company (or series or class thereof) or personal holding company with a Fund (or class thereof), (2) to investors making an investment as part of a fixed fee program whereby an entity unaffiliated with the investment adviser provides investment services, such as management, brokerage and custody, (3) to investment advisors, financial planners or other intermediaries who place trades for their own accounts or the accounts of their clients and who charge a management, consulting or similar ongoing fee for their services; clients of such investment advisors, financial planners or other intermediaries who place trades for their own accounts if the accounts are linked to the master account of such investment advisor, financial planner or other intermediary on the books and records of the broker or agent; financial intermediaries who have entered into an agreement with the principal underwriter to offer Class A shares on a no-load basis as described in the Prospectus; to HSAs (Health Savings Accounts); and to retirement and deferred compensation plans and trusts used to fund those plans, including, but not limited to, those defined in Section 401(a), 403(b) or 457 of the Code and "rabbi trusts", (4) to officers and employees of a Fund' s custodian and transfer agent and (5) in connection with the ReFlow liquidity program. Class A shares may also be sold at net asset value to registered representatives and employees of financial intermediaries. Sales charges generally are waived because either (i) there is no sales effort involved in the sale of shares or (ii) the investor is paying a fee (other than the sales charge) to the financial intermediary involved in the sale. Any new or revised sales charge or CDSC waiver will be prospective only.

CDSC Waiver. The CDSC applicable to Class B and Class C shares will be waived in connection with minimum required distributions from tax-sheltered retirement plans by applying the rate required to be withdrawn under the applicable rules and regulations of the Internal Revenue Service to the balance of Class B and Class C shares in your account. Any new or revised sales charge or CDSC waiver will be prospective only.

Waiver of Investment Minimums. In addition to waivers described in the Prospectus, minimum investment amounts are waived for current and retired Directors and Trustees of Eaton Vance funds and portfolios, clients (including custodial, agency, advisory and trust accounts), current and retired officers and employees of Eaton Vance, its affiliates and other investment advisers and sub-advisers of Eaton Vance sponsored funds, and for such persons' spouses, parents, siblings and lineal descendants and their beneficial accounts. The minimum initial investment amount is also waived for officers and employees of a Fund' s custodian and transfer agent. Investments in a Fund by ReFlow in connection with the ReFlow liquidity program are also not subject to the minimum investment amount.

Statement of Intention. If it is anticipated that \$50,000 or more of Class A shares and shares of other funds exchangeable for Class A shares of another Eaton Vance fund will be purchased within a 13-month period, the Statement of Intention section of the account application should be completed so that shares may be obtained at the same reduced sales charge as though the total quantity were invested in one lump sum. Shares eligible for the right of accumulation (see below) as of the date of the Statement and purchased during the 13-month period will be included toward the completion of the Statement. If you make a Statement of Intention, the transfer agent is authorized to hold in escrow sufficient shares (5% of the dollar amount specified in the Statement) which can be redeemed to make up any difference in sales charge on the amount intended to be invested and the amount actually invested. A Statement of Intention does not obligate the shareholder to purchase or the Fund to sell the full amount indicated in the Statement.

If the amount actually purchased during the 13-month period is less than that indicated in the Statement, the shareholder will be requested to pay the difference between the sales charge applicable to the shares purchased and the sales charge paid under the Statement of Intention. If the payment is not received in 20 days, the appropriate number of escrowed shares will be redeemed in order to realize such difference. If the total purchases during the 13-month period are large enough to qualify for a lower sales charge than that applicable to the amount specified in the Statement, the shareholder must notify the transfer agent or, if shares are held in a street name account, the financial intermediary prior to the expiration date of the Agreement in order for such

lower sales charge to apply to purchases under the Statement .. Any difference will be refunded to the shareholder in cash or applied to the purchase of additional shares, as specified by the shareholder. This refund will be made by the financial intermediary and the principal underwriter. If at the time of the recomputation, the financial intermediary for the account has changed, the adjustment will be made only on those shares purchased through the current financial intermediary for the account. If the sales charge rate changes during the 13-month period, all shares purchased or charges assessed after the date of such change will be subject to the then applicable sales charge.

Right of Accumulation. Under the right of accumulation, the applicable sales charge level is calculated by aggregating the dollar amount of the current purchase and the value (calculated at the maximum current offering price) of shares owned by the shareholder. Class A shares of Eaton Vance U.S. Government Money Market Fund cannot be accumulated for purposes of this privilege. The sales charge on the shares being purchased will then be applied at the rate applicable to the aggregate. Share purchases eligible for the right of accumulation are described under “Sales Charges” in the Prospectus. For any such discount to

be made available at the time of purchase a purchaser or his or her financial intermediary must provide the principal underwriter (in the case of a purchase made through a financial intermediary) or the transfer agent (in the case of an investment made by mail) with sufficient information to permit verification that the purchase order qualifies for the accumulation privilege. Confirmation of the order is subject to such verification. The right of accumulation privilege may be amended or terminated at any time as to purchases occurring thereafter.

Conversion Feature. Class B shares held for eight years will automatically convert to Class A shares. For purposes of this conversion, all distributions paid on Class B shares which the shareholder elects to reinvest in Class B shares will be considered to be held in a separate sub-account. Upon the conversion of Class B shares not acquired through the reinvestment of distributions, a pro rata portion of the Class B shares held in the sub-account will also convert to Class A shares. This portion will be determined by the ratio that the Class B shares being converted bears to the total of Class B shares (excluding shares acquired through reinvestment) in the account. This conversion feature is subject to the continuing availability of a ruling from the Internal Revenue Service or an opinion of counsel that the conversion is not taxable for federal income tax purposes.

Tax-Deferred Retirement Plans. Shares may be available for purchase in connection with certain tax-deferred retirement plans. Detailed information concerning these plans, including certain exceptions to minimum investment requirements, and copies of the plans are available from the principal underwriter. This information should be read carefully and consulting with an attorney or tax adviser may be advisable. The information sets forth the service fee charged for retirement plans and describes the federal income tax consequences of establishing a plan. Participant accounting services (including trust fund reconciliation services) will be offered only through third party recordkeepers and not by the principal underwriter. Under all plans, dividends and distributions will be automatically reinvested in additional shares.

Distribution Plans

The Trust has in effect a compensation-type Distribution Plan for Class A shares (the “Class A Plan”) pursuant to Rule 12b-1 under the 1940 Act. The Class A Plan is designed to (i) finance activities which are primarily intended to result in the distribution and sales of Class A shares and to make payments in connection with the distribution of such shares and (ii) pay service fees for personal services and/or the maintenance of shareholder accounts to the principal underwriter, financial intermediaries and other persons. The distribution and service fees payable under the Class A Plan shall not exceed 0.25% of the average daily net assets attributable to Class A shares for any fiscal year. Class A distribution and service fees are paid monthly in arrears. For the distribution and service fees paid by Class A shares, see Appendix A.

The Trust also has in effect a compensation-type Distribution Plan pursuant to Rule 12b-1 under the 1940 Act for Horizon Growth Fund's Class B and Class C shares and SMID-Cap Fund's Class C shares (the “Horizon Growth and SMID-Cap Plans”). On each sale of shares (excluding reinvestment of distributions) a Class will pay the principal underwriter amounts representing (i) sales commissions equal to 6.25% of the amount received by a Fund for each Class share sold and (ii) interest at the rate of 1% over the prime rate then reported in The Wall Street Journal applied to the outstanding amounts owed to the principal underwriter, so-called “uncovered distribution charges”. Each Class pays the principal underwriter a distribution fee, accrued daily and paid monthly, at an annual rate not exceeding 0.75% of its average daily net assets to finance the distribution of its shares. Such fees compensate the principal underwriter for the sales commissions paid by it to financial intermediaries on the sale of shares, for other distribution expenses (such as personnel, overhead, travel, printing and postage) and for interest expenses. The principal underwriter currently pays an up-front sales commission (except on exchange transactions and reinvestments) of 4% of the purchase price of Class B shares and 0.75% of the purchase price of Class C shares, and an up-front service fee of 0.25% on Class C shares. Distribution fees paid by a Class and CDSCs paid to the Fund by redeeming Class shareholders reduce the outstanding uncovered distribution charges of the Class. Whenever there are no outstanding uncovered distribution charges of a Class, the Class discontinues payment of distribution fees.

The Trust also has in effect a compensation-type Distribution Plan for Class C shares of Focused Growth Fund (the “ Focused Growth Plan”) (together with the Horizon Growth and SMID-Cap Plans, the “Class B and Class C Plans”) pursuant to Rule 12b-1 under the 1940 Act. Class C pays the principal underwriter a distribution fee, accrued daily and paid monthly, at an annual rate not exceeding 0.75% of its average daily net assets to finance the distribution of its shares. Such fees compensate the principal underwriter for the sales commissions paid by it to financial intermediaries on the sale of shares, for other distribution expenses (such as personnel, overhead, travel, printing and postage) and for interest expenses. The principal underwriter shall be entitled to receive all CDSCs paid or payable with respect to Class C shares, provided that no such sales charge which would cause the Class C to exceed the maximum applicable cap imposed hereon by Rule 2830 of the FINRA Rules shall be imposed.

The Trust also has in effect a compensation-type Distribution Plan (the “Class R Plan”) pursuant to Rule 12b-1 under the 1940 Act for the SMID-Cap Fund’ s Class R shares. The Class R Plan provides for the payment of a monthly distribution fee to the principal underwriter of up to an annual rate of 0.50% of average daily net assets attributable to Class R shares. The Trustees of the Trust have currently limited Class R distribution payments to 0.25% of average daily net assets attributable to Class R shares. The Class R Plan also provides that Class R shares will pay a service fee to the principal underwriter in an amount equal on an annual basis of up to 0.25% of that portion of average daily net assets attributable to Class R shares for personal services and/or the maintenance of shareholder accounts. Service fees are paid monthly in arrears. For the distribution and service fees paid by Class R shares, see Appendix E.

The Class B and Class C Plans also authorize the payment of service fees to the principal underwriter, financial intermediaries and other persons in amounts not exceeding an annual rate of 0.25% of its average daily net assets for personal services, and/or the maintenance of shareholder accounts. For Class B, this fee is paid monthly in arrears based on the value of shares sold by such persons. For Class C, financial intermediaries currently receive (a) a service fee (except on exchange transactions and reinvestments) at the time of sale equal to 0.25% of the purchase price of Class C shares sold by such dealer, and (b) monthly service fees approximately equivalent to 1/12 of 0.25% of the value of Class C shares sold by such dealer. During the first year after a purchase of Class C shares, the principal underwriter will retain the service fee as reimbursement for the service fee payment made to financial intermediaries at the time of sale. For the service fees paid, see Appendix B and Appendix C.

The Trustees of the Trust believe that each Plan will be a significant factor in the expected growth of each Fund’ s assets, and will result in increased investment flexibility and advantages which have benefitted and will continue to benefit the Fund and its shareholders. The Eaton Vance organization may profit by reason of the operation of a Plan through an increase in Fund assets and if at any point in time the aggregate amounts received by the principal underwriter pursuant to a Plan exceeds the total expenses incurred in distributing Fund shares. Because payments to the principal underwriter under a Plan are limited, uncovered distribution charges, if applicable, (sales expenses of the principal underwriter plus interest, less the above fees and CDSCs received by it) may exist indefinitely. For sales commissions, CDSCs and uncovered distribution charges, if applicable, see Appendix A, Appendix B and Appendix C.

A Plan continues in effect from year to year so long as such continuance is approved at least annually by the vote of both a majority of (i) the noninterested Trustees of the Trust who have no direct or indirect financial interest in the operation of the Plan or any agreements related to the Plan (the “Plan Trustees”) and (ii) all of the Trustees then in office. A Plan may be terminated at any time by vote of a majority of the Plan Trustees or by a vote of a majority of the outstanding voting securities of the applicable Class. Quarterly Trustee review of a written report of the amount expended under the Plan and the purposes for which such expenditures were made is required. A Plan may not be amended to increase materially the payments described therein without approval of the shareholders of the affected Class and the Trustees. So long as a Plan is in effect, the selection and nomination of the noninterested Trustees shall be committed to the discretion of such Trustees. The Trustees, including the Plan Trustees, initially approved the current Plan(s) on December 10, 2001, for Horizon Growth Fund Class A, Class B and Class C shares, October 20, 2003 for Focused Growth Fund and SMID-Cap Fund Class A shares , June 16, 2009 for SMID-Cap Fund Class R shares , August 10, 2009 for SMID-Cap Fund Class C shares, April 25, 2011 for Focused Growth Fund Class C shares and December 12, 2011 for Select Equity Fund Class A shares .. Any Trustee of the Trust who is an “interested” person of the Trust has an indirect financial interest in a Plan because his or her employer (or affiliates thereof) receives distribution and/or service fees under the Plan or agreements related thereto.

PERFORMANCE

Performance Calculations. Average annual total return before deduction of taxes (“pre-tax return”) is determined by multiplying a hypothetical initial purchase order of \$1,000 by the average annual compound rate

of return (including capital appreciation/depreciation, and distributions paid and reinvested) for the stated period and annualizing the result. The calculation assumes (i) that all distributions are reinvested at net asset value on the reinvestment dates during the period, (ii) the deduction of the maximum of any initial sales charge from the initial \$1,000 purchase, (iii) a complete redemption of the investment at the end of the period, and (iv) the deduction of any applicable CDSC at the end of the period.

Average annual total return after the deduction of taxes on distributions is calculated in the same manner as pre-tax return except the calculation assumes that any federal income taxes due on distributions are deducted from the distributions before they are reinvested. Average annual total return after the deduction of taxes on distributions and taxes on redemption also is calculated in the same manner as pre-tax return except the calculation assumes that (i) any federal income taxes due on distributions are deducted from the distributions before they are reinvested and (ii) any federal income taxes due upon redemption are deducted at the end of the period. After-tax returns are based on the highest federal income tax rates in effect for individual taxpayers as of the time of each assumed distribution and redemption (taking into account their tax character), and do not reflect the impact of

state and local taxes. In calculating after-tax returns, the net value of any federal income tax credits available to shareholders is applied to reduce federal income taxes payable on distributions at or near year-end and, to the extent the net value of such credits exceeds such distributions, is then assumed to be reinvested in additional Fund shares at net asset value on the last day of the fiscal year in which the credit was generated or, in the case of certain tax credits, on the date on which the year-end distribution is paid. For pre-tax and after-tax total return information, see Appendix A, Appendix B, Appendix C, Appendix D and Appendix E.

In addition to the foregoing total return figures, each Fund may provide pre-tax and after-tax annual and cumulative total return, as well as the ending redeemable cash value of a hypothetical investment. If shares are subject to a sales charge, total return figures may be calculated based on reduced sales charges or at net asset value. These returns would be lower if the full sales charge was imposed. After-tax returns may also be calculated using different tax rate assumptions and taking into account state and local income taxes as well as federal taxes.

Yield is computed pursuant to a standardized formula by dividing the net investment income per share earned during a recent thirty-day period by the maximum offering price (including the maximum of any initial sales charge) per share on the last day of the period and annualizing the resulting figure. Yield figures do not reflect the deduction of any applicable CDSC, but assume the maximum of any initial sales charge. Actual yield may be affected by variations in sales charges on investments.

Disclosure of Portfolio Holdings and Related Information. The Board has adopted policies and procedures (the "Policies") with respect to the disclosure of information about portfolio holdings of each Fund. See each Fund's Prospectus for information on disclosure made in filings with the SEC and/or posted on the Eaton Vance website (www.eatonvance.com) and disclosure of certain portfolio characteristics. Pursuant to the Policies, information about portfolio holdings of a Fund may also be disclosed as follows:

- *Confidential disclosure for a legitimate Fund purpose:* Portfolio holdings may be disclosed, from time to time as necessary, for a legitimate business purpose of a Fund, believed to be in the best interests of the Fund and its shareholders, provided there is a duty or an agreement that the information be kept confidential. Any such confidentiality agreement includes provisions intended to impose a duty not to trade on the non-public information. The Policies permit disclosure of portfolio holdings information to the following: 1) affiliated and unaffiliated service providers that have a legal or contractual duty to keep such information confidential, such as employees of the investment adviser (including portfolio managers and, in the case of a Portfolio, the portfolio manager of any account that invests in the Portfolio), the administrator, custodian, transfer agent, principal underwriter, etc. described herein and in the Prospectus; 2) other persons who owe a fiduciary or other duty of trust or confidence to the Fund (such as Fund legal counsel and independent registered public accounting firm); or 3) persons to whom the disclosure is made in advancement of a legitimate business purpose of a Fund and who have expressly agreed in writing to maintain the disclosed information in confidence and to use it only in connection with the legitimate business purpose underlying the arrangement. To the extent applicable to an Eaton Vance fund, such persons may include securities lending agents which may receive information from time to time regarding selected holdings which may be loaned by a Fund, in the event a Fund is rated, credit rating agencies (Moody's Investor Services, Inc. and Standard & Poor's Ratings Group), analytical service providers engaged by the investment adviser (Advent, Bloomberg L.P., Evare, Factset, McMunn Associates, Inc., MSCI/Barras and The Yield Book, Inc.), proxy evaluation vendors (Institutional Shareholder Servicing Inc.), pricing services (TRPS Mark-to-Market Pricing Service, WM Company Reuters Information Services and Non-Deliverable Forward Rates Service, Pricing Direct, FT Interactive Data Corp., Standard & Poor's Securities Evaluation Service, Inc., SuperDerivatives and Stat Pro.), which receive information as needed to price a particular holding, translation services, third-party reconciliation services, lenders under Fund credit facilities (Citibank, N.A. and its affiliates), consultants and other product evaluators (Morgan Stanley Smith Barney LLC) and, for purposes of facilitating portfolio transactions, financial intermediaries and other intermediaries (national and

regional municipal bond dealers and mortgage-backed securities dealers). These entities receive portfolio information on an as needed basis in order to perform the service for which they are being engaged. If required in order to perform their duties, this information will be provided in real time or as soon as practical thereafter. Additional categories of disclosure involving a legitimate business purpose may be added to this list upon the authorization of a Fund' s Board .. In addition, in connection with a redemption in kind, the redeeming shareholder may be required to agree to keep the information about the securities to be so distributed confidential, except to the extent necessary to dispose of the securities.

- *Historical portfolio holdings information:* From time to time, each Fund may be requested to provide historic portfolio holdings information or certain characteristics of portfolio holdings that have not been made public previously. In such case, the requested information may be provided if: the information is requested for due diligence or another legitimate purpose; the requested portfolio holdings or portfolio characteristics are for a period that is no more recent than the date

of the portfolio holdings or portfolio characteristics posted to the Eaton Vance website; and the dissemination of the requested information is reviewed and approved in accordance with the Policies.

The Funds, the investment adviser, sub-adviser and principal underwriter will not receive any monetary or other consideration in connection with the disclosure of information concerning a Fund' s portfolio holdings.

The Policies may not be waived, or exception made, without the consent of the Chief Compliance Officer (“CCO”) of the Funds. The CCO may not waive or make exception to the Policies unless such waiver or exception is consistent with the intent of the Policies, which is to ensure that disclosure of portfolio information is in the best interest of Fund shareholders. In determining whether to permit a waiver of or exception to the Policies, the CCO will consider whether the proposed disclosure serves a legitimate purpose of a Fund, whether it could provide the recipient with an advantage over Fund shareholders or whether the proposed disclosure gives rise to a conflict of interest between a Fund' s shareholders and its investment adviser, principal underwriter or other affiliated person. The CCO will report all waivers of or exceptions to the Policies to the Board at their next meeting. The Board may impose additional restrictions on the disclosure of portfolio holdings information at any time.

The Policies are designed to provide useful information concerning a Fund to existing and prospective Fund shareholders while at the same time inhibiting the improper use of portfolio holdings information in trading Fund shares and/or portfolio securities held by the Portfolio or Fund. However, there can be no assurance that the provision of any portfolio holdings information is not susceptible to inappropriate uses (such as the development of “market timing” models), particularly in the hands of highly sophisticated investors, or that it will not in fact be used in such ways beyond the control of the Funds.

TAXES

The following is a summary of some of the tax consequences affecting the Fund and its shareholders. The summary does not address all of the special tax rules applicable to certain classes of investors, such as IRAs and other retirement plans, tax-exempt entities, foreign investors, insurance companies and financial institutions. Shareholders should consult their own tax advisors with respect to special tax rules that may apply in their particular situations, as well as the federal, state, local, and, where applicable, foreign tax consequences of investing in the Fund.

Taxation of the Fund. The Fund, as a series of the Trust, is treated as a separate entity for federal income tax purposes. The Fund has elected to be treated and intends to qualify each year as a regulated investment company (“RIC”) under Subchapter M of the Code. Accordingly, the Fund intends to satisfy certain requirements relating to sources of its income and diversification of its assets and to distribute substantially all of its net investment income (including tax-exempt income, if any) and net short-term and long-term capital gains (after reduction by any available capital loss carryforwards) in accordance with the timing requirements imposed by the Code, so as to maintain its RIC status and to avoid paying any federal income tax. If the Fund qualifies for treatment as a RIC and satisfies the above-mentioned distribution requirements, it will not be subject to federal income tax on income paid to its shareholders in the form of dividends or capital gain distributions. The Fund qualified as a RIC for its most recent fiscal year .

The Fund also seeks to avoid payment of federal excise tax. However, if the Fund fails to distribute in a calendar year substantially all of its ordinary income for such year and substantially all of its capital gain net income for the one-year period ending October 31 (or later if the Fund is permitted to so elect and so elects), plus any retained amount from the prior year, the Fund will be subject to a 4% excise tax on the undistributed amounts. In order to avoid incurring a federal excise tax obligation, the Code requires that the Fund distribute (or be deemed to have distributed) by December 31 of each calendar year (i) at least 98% of its ordinary income (excluding tax-exempt income, if any) for such year, (ii) at least 98.2% of its capital gain net income (which is the excess of its realized capital gains over its realized capital losses), generally computed on the basis of the one-year period ending on October 31 of such year, after reduction by any available capital loss carryforwards, and (iii) 100% of any income and capital gains from the prior year (as previously computed) that was not paid

out during such year and on which the Fund paid no federal income tax. If the Fund fails to meet these requirements it will be subject to a nondeductible 4% excise tax on the undistributed amounts. Under current law, provided that the Fund qualifies as a RIC (and, where applicable, the Portfolio is treated as a partnership for Massachusetts and federal tax purposes), the Fund should not be liable for any income, corporate excise or franchise tax in the Commonwealth of Massachusetts.

If the Fund does not qualify as a RIC for any taxable year, the Fund's taxable income will be subject to corporate income taxes, and all distributions from earnings and profits, including distributions of tax-exempt income and net capital gain (if any), will be taxable to the shareholder as dividend income. However, such distributions may be eligible (i) to be treated as qualified dividend income in the case of shareholders taxed as individuals when paid before January 1, 2013 and (ii) for the dividends-

received deduction in the case of corporate shareholders. In addition, in order to re-qualify for taxation as a RIC, the Fund may be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions.

In certain situations, the Fund may, for a taxable year, elect to defer all or a portion of its capital losses realized after October and net ordinary losses incurred after December until the next taxable year in computing its investment company taxable income and net capital gain, which will defer the recognition of such realized losses. Such deferrals and other rules regarding gains and losses realized after October may affect the tax character of shareholder distributions.

The Code contains a provision codifying the judicial economic substance doctrine, which has traditionally been used by courts to deny tax benefits for transactions that lack economic substance; a strict liability penalty is imposed for an understatement of tax liability due to a transaction's lack of economic substance.

Taxation of the Portfolio. If the Fund invests its assets in the Portfolio, the Portfolio normally must satisfy the applicable source of income and diversification requirements in order for the Fund to also satisfy these requirements. For federal income tax purposes, the Portfolio intends to be treated as a partnership that is not a "publicly traded partnership" and, as a result, will not be subject to federal income tax. The Fund, as an investor in the Portfolio, will be required to take into account in determining its federal income tax liability its share of such Portfolio's income, gains, losses, deductions and credits, without regard to whether it has received any distributions from such Portfolio. The Portfolio will allocate at least annually among its investors, including the Fund, the Portfolio's net investment income, net realized capital gains, and any other items of income, gain, loss, deduction or credit. For purposes of applying the requirements of the Code regarding qualification as a RIC, the Fund (i) will be deemed to own its proportionate share of each of the assets of the Portfolio and (ii) will be entitled to the gross income of the Portfolio attributable to such share. Under current law, provided that the Portfolio is treated as a partnership for Massachusetts and federal tax purposes, the Portfolio should not be liable for any income, corporate excise or franchise tax in the Commonwealth of Massachusetts.

Taxation of the Subsidiary. To the extent described in the prospectus, a Fund or the Portfolio may invest in the Subsidiary. The Subsidiary is classified as a corporation for U.S. federal income tax purposes. As described in the prospectus, the Fund has either applied for or received from the IRS a private ruling relating to the treatment of the income allocated to the Fund from the Subsidiary for purposes of the Fund's status as a "RIC" under the Code. Foreign corporations, such as the Subsidiary, will generally not be subject to U.S. federal income taxation unless they are deemed to be engaged in a U.S. trade or business. It is expected that the Subsidiary will conduct its activities in a manner so as to meet the requirements of a safe harbor under Section 864(b)(2) of the Code under which the Subsidiary may engage in trading in stocks or securities or certain commodities without being deemed to be engaged in a U.S. trade or business. However, if certain of the Subsidiary's activities were determined not to be of the type described in the safe harbor (which is not expected), then the activities of the Subsidiary may constitute a U.S. trade or business, and would be taxed as such.

The Subsidiary is treated as a controlled foreign corporation ("CFC") for tax purposes and the Fund is treated as a "U.S. shareholder" of the Subsidiary. As a result, the Fund is required to include in gross income for U.S. federal income tax purposes all of the Subsidiary's "subpart F income," whether or not such income is distributed by the Subsidiary. It is expected that all of the Subsidiary's income will be "subpart F income." The Fund's recognition of the Subsidiary's "subpart F income" will increase the Fund's tax basis in the Subsidiary. Distributions by the Subsidiary to the Fund will be tax-free, to the extent of its previously undistributed "subpart F income," and will correspondingly reduce the Fund's tax basis in the Subsidiary. "Subpart F income" is generally treated as ordinary income, regardless of the character of the Subsidiary's underlying income. If a net loss is realized by the Subsidiary, such loss is not generally available to offset the income earned by the Fund.

Tax Consequences of Certain Investments. The following summary of the tax consequences of certain types of investments applies to the Fund and the Portfolio, as appropriate. References in the following summary to "the

Fund” are to any Fund or Portfolio that can engage in the particular practice as described in the prospectus or SAI.

Securities Acquired at Market Discount or with Original Issue Discount. Investment in securities acquired at a market discount, or in zero coupon, deferred interest, payment-in-kind and certain other securities with original issue discount, generally may cause the Fund to realize income prior to the receipt of cash payments with respect to these securities. Such income will be accrued daily by the Fund and, in order to avoid a tax payable by the Fund, the Fund may be required to liquidate securities that it might otherwise have continued to hold in order to generate cash so that the Fund may make required distributions to its shareholders. The Fund may elect to accrue market discount income on a daily basis.

Lower Rated or Defaulted Securities. Investments in securities that are at risk of, or are in, default present special tax issues for the Fund. Tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities and how payments received on obligations in default should be allocated between principal and income.

Municipal Obligations. Any recognized gain or income attributable to market discount on long-term tax-exempt municipal obligations (i.e., obligations with a term of more than one year) purchased after April 30, 1993 (except to the extent of a portion of the discount attributable to original issue discount), is taxable as ordinary income. A long-term debt obligation is generally treated as acquired at a market discount if purchased after its original issue at a price less than (i) the stated principal amount payable at maturity, in the case of an obligation that does not have original issue discount or (ii) in the case of an obligation that does have original issue discount, the sum of the issue price and any original issue discount that accrued before the obligation was purchased, subject to a *de minimis* exclusion.

From time to time proposals have been introduced before Congress for the purpose of restricting or eliminating the federal income tax exemption for interest on certain types of municipal obligations, and it can be expected that similar proposals may be introduced in the future. As a result of any such future legislation, the availability of municipal obligations for investment by the Fund and the value of the securities held by it may be affected. It is possible that events occurring after the date of issuance of municipal obligations, or after the Fund's acquisition of such an obligation, may result in a determination that the interest paid on that obligation is taxable, even retroactively.

If the Fund seeks income exempt from state and/or local taxes, information about such taxes is contained in an appendix to this SAI (see the Table of Contents).

Tax Credit Bonds. If the Fund holds, directly or indirectly, one or more tax credit bonds (including Build America Bonds, clean renewable energy bonds and other qualified tax credit bonds) on one or more applicable dates during a taxable year and the Fund satisfies the minimum distribution requirement, the Fund may elect to permit its shareholders to claim a tax credit on their income tax returns equal to each shareholder's proportionate share of tax credits from the applicable bonds that otherwise would be allowed to the Fund. In such a case, shareholders must include in gross income (as interest) their proportionate share of the income attributable to their proportionate share of those offsetting tax credits. A shareholder's ability to claim a tax credit associated with one or more tax credit bonds may be subject to certain limitations imposed by the Code. Even if the Fund is eligible to pass through tax credits to shareholders, the Fund may choose not to do so.

Derivatives. The Fund's investments in options, futures contracts, hedging transactions, forward contracts (to the extent permitted) and certain other transactions may be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale, short sale and other rules), the effect of which may be to accelerate income to the Fund, defer Fund losses, cause adjustments in the holding periods of Fund securities, convert capital gain into ordinary income and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of Fund distributions.

Investments in so-called "section 1256 contracts," such as regulated futures contracts, most foreign currency forward contracts traded in the interbank market and options on most stock indices, are subject to special tax rules. All section 1256 contracts held by the Fund at the end of its taxable year are required to be marked to their market value, and any unrealized gain or loss on those positions will be included in the Fund's income as if each position had been sold for its fair market value at the end of the taxable year. The resulting gain or loss will be combined with any gain or loss realized by the Fund from positions in section 1256 contracts closed during the taxable year. Provided such positions were held as capital assets and were not part of a "hedging transaction" nor part of a "straddle," 60% of the resulting net gain or loss will be treated as long-term capital gain or loss, and 40% of such net gain or loss will be treated as short-term capital gain or loss, regardless of the period of time the positions were actually held by the Fund.

Fund positions in index options that do not qualify as “section 1256 contracts” under the Code generally will be treated as equity options governed by Code Section 1234. Pursuant to Code Section 1234, if a written option expires unexercised, the premium received is short-term capital gain to the Fund. If the Fund enters into a closing transaction with respect to a written option, the difference between the premium received and the amount paid to close out its position is short-term capital gain or loss. If an option written by the Fund that is not a “section 1256 contract” is cash settled, any resulting gain or loss will be short-term capital gain. For an option purchased by the Fund that is not a “section 1256 contract” any gain or loss resulting from sale of the option will be a capital gain or loss, and will be short-term or long-term, depending upon the holding period for the option. If the option expires, the resulting loss is a capital loss and is short-term or long-term, depending upon the holding period for the option. If a put option written by the Fund is exercised and physically settled, the premium received is treated as a reduction in

the amount paid to acquire the underlying securities, increasing the gain or decreasing the loss to be realized by the Fund upon sale of the securities. If a call option written by the Fund is exercised and physically settled, the premium received is included in the sale proceeds, increasing the gain or decreasing the loss realized by the Fund at the time of option exercise.

As a result of entering into swap contracts, the Fund may make or receive periodic net payments. The Fund may also make or receive a payment when a swap is terminated prior to maturity through an assignment of the swap or other closing transaction. Periodic net payments will generally constitute ordinary income or deductions, while termination of a swap will generally result in capital gain or loss (which will be a long-term capital gain or loss if the Fund has been a party to a swap for more than one year). With respect to certain types of swaps, the Fund may be required to currently recognize income or loss with respect to future payments on such swaps or may elect under certain circumstances to mark such swaps to market annually for tax purposes as ordinary income or loss.

Short Sales. In general, gain or loss on a short sale is recognized when the Fund closes the sale by delivering the borrowed property to the lender, not when the borrowed property is sold. Gain or loss from a short sale is generally considered to be capital gain or loss to the extent that the property used to close the short sale constitutes a capital asset in the Fund's hands. Except with respect to certain situations where the property used to close a short sale has a long-term holding period on the date of the short sale, special rules generally treat the gains on short sales as short-term capital gains. These rules may also terminate the running of the holding period of "substantially identical property" held by the Fund. Moreover, a loss on a short sale will be treated as a long-term capital loss if, on the date of the short sale, "substantially identical property" has been held by the Fund for more than one year. In general, the Fund will not be permitted to deduct payments made to reimburse the lender of securities for dividends paid on borrowed stock if the short sale is closed on or before the 45th day after the short sale is entered.

Constructive Sales. The Fund may recognize gain (but not loss) from a constructive sale of certain "appreciated financial positions" if the Fund enters into a short sale, offsetting notional principal contract, or forward contract transaction with respect to the appreciated position or substantially identical property. Appreciated financial positions subject to this constructive sale treatment include interests (including options and forward contracts and short sales) in stock and certain other instruments. Constructive sale treatment does not apply if the transaction is closed out not later than thirty days after the end of the taxable year in which the transaction was initiated, and the underlying appreciated securities position is held unhedged for at least the next sixty days after the hedging transaction is closed.

Gain or loss on a short sale will generally not be realized until such time as the short sale is closed. However, as described above in the discussion of constructive sales, if the Fund holds a short sale position with respect to securities that have appreciated in value, and it then acquires property that is the same as or substantially identical to the property sold short, the Fund generally will recognize gain on the date it acquires such property as if the short sale were closed on such date with such property. Similarly, if the Fund holds an appreciated financial position with respect to securities and then enters into a short sale with respect to the same or substantially identical property, the Fund generally will recognize gain as if the appreciated financial position were sold at its fair market value on the date it enters into the short sale. The subsequent holding period for any appreciated financial position that is subject to these constructive sale rules will be determined as if such position were acquired on the date of the constructive sale.

Foreign Investments and Currencies. The Fund's investments in foreign securities may be subject to foreign withholding taxes or other foreign taxes with respect to income (possibly including, in some cases, capital gains), which would decrease the Fund's income on such securities. These taxes may be reduced or eliminated under the terms of an applicable U.S. income tax treaty. If more than 50% of Fund assets at year end consists of the debt and equity securities of foreign corporations, the Fund may elect to permit shareholders to claim a credit or deduction on their income tax returns for their pro rata portion of qualified taxes paid by the Fund to

foreign countries. If the election is made, shareholders will include in gross income from foreign sources their pro rata share of such taxes. A shareholder's ability to claim a foreign tax credit or deduction in respect of foreign taxes paid by the Fund may be subject to certain limitations imposed by the Code (including a holding period requirement applied at both the Fund and shareholder level), as a result of which a shareholder may not get a full credit or deduction for the amount of such taxes. In particular, the Fund must own the dividend-paying stock for more than 15 days during the 31-day period beginning 15 days prior to the ex-dividend date. Likewise, shareholders must hold their Fund shares (without protection from risk or loss) on the ex-dividend date and for at least 15 additional days during the 31-day period beginning 15 days prior to the ex-dividend date to be eligible to claim the foreign tax with respect to a given dividend. Shareholders who do not itemize deductions on their federal income tax returns may claim a credit (but no deduction) for such taxes. Individual shareholders subject to the alternative minimum tax ("AMT") may not deduct such taxes for AMT purposes.

Transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts, forward contracts and similar instruments (to the extent permitted) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency. Under Section 988 of the Code, gains or losses attributable to fluctuations in exchange rates between the time the Fund accrues income or receivables or expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such income or pays such liabilities are generally treated as ordinary income or ordinary loss.

Investments in “passive foreign investment companies” (“PFICs”) could subject the Fund to U.S. federal income tax or other charges on certain distributions from such companies and on disposition of investments in such companies; however, the tax effects of such investments may be mitigated by making an election to mark such investments to market annually or treat the PFIC as a “qualified electing fund”. If the Fund were to invest in a PFIC and elect to treat the PFIC as a “qualified electing fund” under the Code, the Fund might be required to include in income each year a portion of the ordinary earnings and net capital gains of the qualified electing fund, even if not distributed to the Fund, and such amounts would be subject to the distribution requirements described above. In order to make this election, the Fund would be required to obtain certain annual information from the PFICs in which it invests, which may be difficult or impossible to obtain. Alternatively, if the Fund were to make a mark-to-market election with respect to a PFIC, the Fund would be treated as if it had sold and repurchased the PFIC stock at the end of each year. In such case, the Fund would report any such gains as ordinary income and would deduct any such losses as ordinary losses to the extent of previously recognized gains. This election must be made separately for each PFIC, and once made, would be effective for all subsequent taxable years unless revoked with the consent of the IRS. The Fund may be required to recognize income in excess of the distributions it receives from PFICs and its proceeds from dispositions of PFIC stock in any particular year. As a result, the Fund may have to distribute this “phantom” income and gain to satisfy the distribution requirement and to avoid imposition of the 4% excise tax.

U.S. Government Securities. Distributions paid by the Fund that are derived from interest on obligations of the U.S. Government and certain of its agencies and instrumentalities (but generally not distributions of capital gains realized upon the disposition of such obligations) may be exempt from state and local income taxes. The Fund generally intends to advise shareholders of the extent, if any, to which its distributions consist of such interest. Shareholders are urged to consult their tax advisers regarding the possible exclusion of such portion of their dividends for state and local income tax purposes.

Real Estate Investment Trusts (“REITs”). Any investment by the Fund in equity securities of a REIT qualifying as such under Subchapter M of the Code may result in the Fund’s receipt of cash in excess of the REIT’s earnings; if the Fund distributes these amounts, these distributions could constitute a return of capital to Fund shareholders for U.S. federal income tax purposes. Investments in REIT equity securities also may require the Fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. Dividends received by the Fund from a REIT will not qualify for the corporate dividends-received deduction and generally will not constitute qualified dividend income.

Inflation-Indexed Bonds. Periodic adjustments for inflation to the principal amount of an inflation-indexed bond may give rise to original issue discount, which will be includable in the Fund’s gross income (see “Securities Acquired at Market Discount or with Original Issue Discount” above). Also, if the principal value of an inflation-indexed bond is adjusted downward due to inflation, amounts previously distributed in the taxable year may be characterized in some circumstances as a return of capital (see “Taxation of Fund Shareholders” below).

Taxation of Fund Shareholders. Subject to the discussion of distributions of tax-exempt income below, Fund distributions of investment income and net gains from investments held for one year or less will be taxable as

ordinary income. Fund distributions of any net gains from investments held for more than one year are taxable as long-term capital gains. Taxes on distributions of capital gains are determined by how long the Fund owned the investments that generated the gains, rather than how long a shareholder has owned his or her shares in the Fund. Dividends and distributions on the Fund's shares are generally subject to federal income tax as described herein to the extent they are made out of the Fund's earnings and profits, even though such dividends and distributions may economically represent a return of a particular shareholder's investment. Such distributions are likely to occur in respect of shares purchased at a time when the Fund's net asset value reflects gains that are either unrealized, or realized but not distributed. Such realized gains may be required to be distributed even when the Fund's net asset value also reflects unrealized losses.

Distributions paid by the Fund during any period may be more or less than the amount of net investment income and capital gains actually earned during the period. If the Fund makes a distribution to a shareholder in excess of the Fund's current and accumulated earnings and profits in any taxable year, the excess distribution will be treated as a return of capital to the extent of

such shareholder's tax basis in its shares, and thereafter as capital gain. A return of capital is not taxable, but it reduces a shareholder's tax basis in its shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of its shares.

Ordinarily, shareholders are required to take taxable distributions by the Fund into account in the year in which the distributions are made. However, for federal income tax purposes, dividends that are declared by the Fund in October, November or December as of a record date in such month and actually paid in January of the following year will be treated as if they were paid on December 31 of the year declared. Therefore, such dividends will generally be taxable to a shareholder in the year declared rather than in the year paid.

The amount of distributions payable by the Fund may vary depending on general economic and market conditions, the composition of investments, current management strategy and Fund operating expenses. The Fund will inform shareholders of the tax character of all distributions annually as required by applicable rules and regulations.

The Fund may elect to retain its net capital gain, in which case the Fund will be taxed thereon (except to the extent of any available capital loss carryovers) at the 35% corporate tax rate. In such a case, it is expected that the Fund also will elect to have shareholders of record on the last day of its taxable year treated as if each received a distribution of its pro rata share of such gain, with the result that each shareholder will be required to report its pro rata share of such gain on its tax return as long-term capital gain, will receive a refundable tax credit for its pro rata share of tax paid by the Fund on the gain, and will increase the tax basis for its shares by an amount equal to the deemed distribution less the tax credit.

Any Fund distribution, other than dividends that are declared by the Fund on a daily basis, will have the effect of reducing the per share net asset value of Fund shares by the amount of the distribution. If a shareholder buys shares when the Fund has unrealized or realized but not yet distributed ordinary income or capital gains, the shareholder will pay full price for the shares and then may receive a portion back as a taxable distribution even though such distribution may economically represent a return of the shareholder's investment.

Tax-Exempt Income. Distributions by the Fund of net tax-exempt interest income that are properly reported as "exempt-interest dividends" may be treated by shareholders as interest excludable from gross income for federal income tax purposes under Section 103(a) of the Code. In order for the Fund to be entitled to pay the tax-exempt interest income as exempt-interest dividends to its shareholders, the Fund must satisfy certain requirements, including the requirement that, at the close of each quarter of its taxable year, at least 50% of the value of its total assets consists of obligations the interest on which is exempt from regular federal income tax under Code Section 103(a). Interest on certain municipal obligations may be taxable for purposes of the federal AMT and for state and local purposes. In addition, corporate shareholders must include the full amount of exempt-interest dividends in computing the preference items for the purposes of the AMT. Fund shareholders are required to report tax-exempt interest on their federal income tax returns.

Tax-exempt distributions received from the Fund are taken into account in determining, and may increase, the portion of social security and certain railroad retirement benefits that may be subject to federal income tax.

Interest on indebtedness incurred by a shareholder to purchase or carry Fund shares that distributes exempt-interest dividends will not be deductible for U.S. federal income tax purposes. If a shareholder receives exempt interest dividends with respect to any Fund share and if the share is held by the shareholder for six months or less, then any loss on the sale or exchange of the share may, to the extent of the exempt-interest dividends, be disallowed. Furthermore, a portion of any exempt-interest dividend paid by the Fund that represents income derived from certain revenue or private activity bonds held by the Fund may not retain its tax-exempt status in the hands of a shareholder who is a "substantial user" of a facility financed by such bonds, or a "related person" thereof. In addition, the receipt of dividends and distributions from the Fund may affect a foreign corporate shareholder's federal "branch profits" tax liability and the federal "excess net passive income" tax liability of a shareholder of a Subchapter S corporation. Shareholders should consult their own tax advisors as to whether they are (i) "substantial users" with respect to a facility or "related" to such users within the meaning of the

Code or (ii) subject to a federal alternative minimum tax, the federal “branch profits” tax, or the federal “excess net passive income” tax.

Qualified Dividend Income. “Qualified dividend income” received by an individual is taxed at the rates applicable to long-term capital gain (at a maximum rate of 20 %). In order for some portion of the dividends received by Fund shareholders to be qualified dividend income, the Fund must meet holding period and other requirements with respect to some portion of the dividend-paying stocks in its portfolio and the shareholder must meet holding period and other requirements with respect to the Fund’ s shares. A dividend will not be treated as qualified dividend income (1) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning at the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during

the 181-day period beginning 90 days before such date), (2) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (3) if the recipient elects to have the dividend income treated as investment interest, or (4) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the U.S. (with the exception of dividends paid on stock of such a foreign corporation readily tradable on an established securities market in the U.S.) or (b) treated as a passive foreign investment company. In general, distributions of investment income reported by the Fund as derived from qualified dividend income will be treated as qualified dividend income by a shareholder taxed as an individual provided the shareholder meets the holding period and other requirements described above with respect to the Fund's shares. In any event, if the aggregate qualified dividends received by the Fund during any taxable year are 95% or more of its gross income, then 100% of the Fund's dividends (other than properly reported capital gain dividends) will be eligible to be treated as qualified dividend income. For this purpose, the only gain with respect to the sale of stocks and securities included in the term "gross income" is the excess of net short-term capital gain over net long-term capital loss.

Dividends Received Deduction for Corporations. A portion of distributions made by the Fund which are derived from dividends from U.S. corporations may qualify for the dividends-received deduction ("DRD") for corporations. The DRD is reduced to the extent the Fund shares with respect to which the dividends are received are treated as debt-financed under the Code and is eliminated if the shares are deemed to have been held for less than a minimum period, generally more than 45 days during the 91-day period beginning 45 days before the ex-dividend date or if the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property. Receipt of certain distributions qualifying for the DRD may result in reduction of the tax basis of the corporate shareholder's shares. Distributions eligible for the DRD may give rise to or increase the alternative minimum tax for certain corporations.

Recognition of Unrelated Business Taxable Income by Tax-Exempt Shareholders. Under current law, tax-exempt investors generally will not recognize unrelated business taxable income ("UBTI") from distributions from the Fund. Notwithstanding the foregoing, a tax-exempt shareholder could recognize UBTI if shares in the Fund constitute debt-financed property in the hands of a tax-exempt shareholder within the meaning of Code section 514(b). In addition, certain types of income received by the Fund from REITs, real estate mortgage investment conduits ("REMICs"), taxable mortgage pools or other investments may cause the Fund to designate some or all of its distributions as "excess inclusion income." To Fund shareholders such excess inclusion income may: (1) constitute taxable income as UBTI for those shareholders who would otherwise be tax-exempt such as individual retirement accounts, 401(k) accounts, Keogh plans, pension plans and certain charitable entities; (2) not be offset by otherwise allowable deductions for tax purposes; (3) not be eligible for reduced U.S. withholding for non-U.S. shareholders even from tax treaty countries; and (4) cause the Fund to be subject to tax if certain "disqualified organizations" as defined by the Code are Fund shareholders.

Redemption or Exchange of Fund Shares. Generally, upon sale or exchange of Fund shares, a shareholder will realize a taxable gain or loss equal to the difference between the amount realized and the basis in shares. Such gain or loss will be treated as capital gain or loss if the shares are capital assets in the shareholder's hands, and will be long-term capital gain or loss if the shares are held for more than one year, and short-term capital gain or loss if the shares are held for one year or less.

Any loss realized upon the sale or exchange of Fund shares with a tax holding period of six months or less will be treated as a long-term capital loss to the extent of any distributions treated as long-term capital gain with respect to such shares. In addition, all or a portion of a loss realized on a redemption or other disposition of Fund shares may be disallowed under "wash sale" rules to the extent the shareholder acquired other shares of the same Fund (whether through the reinvestment of distributions or otherwise) within the period beginning 30 days before the redemption of the loss shares and ending 30 days after such date. Any disallowed loss will result in an adjustment to the shareholder's tax basis in some or all of the other shares acquired.

Sales charges paid upon a purchase of shares subject to a front-end sales charge cannot be taken into account for purposes of determining gain or loss on a redemption or exchange of the shares before the 91st day after their purchase to the extent a sales charge is reduced or eliminated in a subsequent acquisition of Fund shares (or shares of another fund) on or before January 31 of the following calendar year pursuant to the reinvestment or exchange privilege. Any disregarded amounts will result in an adjustment to the shareholder's tax basis in some or all of any other shares acquired.

Applicability of Medicare Contribution Tax. The Code imposes a 3.8% Medicare contribution tax on unearned income of certain U.S. individuals, estates and trusts. For individuals, the tax is on the lesser of the "net investment income" and the excess of modified adjusted gross income over \$200,000 (or \$250,000 if married filing jointly). Net investment income includes interest, dividends, and gross income and capital gains derived from passive activities and trading in securities or commodities. Net investment income is reduced by deductions "properly allocable" to this income. This tax is effective with respect to amounts received, and taxable years beginning, after December 31, 2012.

Back-Up Withholding for U.S. Shareholders. Amounts paid by the Fund to individuals and certain other shareholders who have not provided the Fund with their correct taxpayer identification number (“TIN”) and certain certifications required by the IRS as well as shareholders with respect to whom the Fund has received certain information from the IRS or a broker, may be subject to “backup” withholding of federal income tax arising from the Fund’s taxable dividends and other distributions as well as the proceeds of redemption transactions (including repurchases and exchanges), at a rate of 28 %. An individual’s TIN is generally his or her social security number. Backup withholding is not an additional tax and any amount withheld may be credited against a shareholder’s U.S. federal income tax liability.

Taxation of Foreign Shareholders. In general, dividends (other than capital gain dividends and exempt-interest dividends) paid to a shareholder that is not a “U.S. person” within the meaning of the Code (a “foreign person” or “foreign shareholder”) are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate). The withholding tax does not apply to regular dividends paid to a foreign person who provides a Form W-8ECI, certifying that the dividends are effectively connected with the foreign person’s conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the foreign person were a U.S. shareholder. A non-U.S. corporation receiving effectively connected dividends may also be subject to additional “branch profits tax” imposed at a rate of 30% (or lower treaty rate). A foreign person who fails to provide an IRS Form W-8BEN or other applicable form may be subject to backup withholding at the appropriate rate. A foreign shareholder would generally be exempt from U.S. federal income tax, including withholding tax, on gains realized on the sale of shares of the Fund, net capital gain dividends, exempt interest dividends, and amounts retained by the Fund that are reported as undistributed capital gains.

For taxable years beginning before January 1, 2014, properly report dividends are generally exempt from U.S. federal withholding tax where they (i) are paid in respect of the Fund’s “qualified net interest income” (generally, the Fund’s U.S. source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which the Fund is at least a 10% shareholder, reduced by expenses that are allocable to such income) or (ii) are paid in respect of the Fund’s “qualified short-term capital gains” (generally, the excess of the Fund’s net short-term capital gain over the Fund’s long-term capital loss for such taxable year). However, depending on its circumstances, the Fund may report all, some or none of its potentially eligible dividends as such qualified net interest income or as qualified short-term capital gains and/or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. In order to qualify for this exemption from withholding, a non-U.S. shareholder would need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or substitute Form). In the case of shares held through an intermediary, the intermediary could withhold even if the Fund designates the payment as qualified net interest income or qualified short-term capital gain. Non-U.S. shareholders should contact their intermediaries with respect to the application of these rules to their accounts.

For taxable years beginning before January 1, 2014, distributions that the Fund reports as “short-term capital gain dividends” or “long-term capital gain dividends” will not be treated as such to a recipient foreign shareholder if the distribution is attributable to gain from the sale or exchange of U.S. real property or an interest in a U.S. real property holding corporation and the Fund’s direct or indirect interests in U.S. real property exceeded certain levels. Instead, if the foreign shareholder has not owned more than 5% of the outstanding shares of the Fund at any time during the one year period ending on the date of distribution, such distributions will be subject to 30% withholding by the Fund and will be treated as ordinary dividends to the foreign shareholder; if the foreign shareholder owned more than 5% of the outstanding shares of the Fund at any time during the one year period ending on the date of the distribution, such distribution will be treated as real property gain subject to 35% withholding tax and could subject the foreign shareholder to U.S. filing requirements. The rules described in this paragraph, other than the withholding rules, will apply notwithstanding the Fund’s participation or a foreign shareholder’s participation in a wash sale transaction or the payment of a substitute dividend.

Additionally, if the Fund' s direct or indirect interests in U.S. real property were to exceed certain levels, a foreign shareholder realizing gains upon redemption from the Fund could be subject to the 35% withholding tax and U.S. filing requirements unless the foreign person had not held more than 5% of the Fund' s outstanding shares throughout either such person' s holding period for the redeemed shares or, if shorter, the previous five years , or for sales occurring on or before December 31, 2013, 50% or more of the value of the Fund' s shares were held by U.S. entities.

The same rules apply with respect to distributions to a foreign shareholder from the Fund and redemptions of a foreign shareholder' s interest in the Fund attributable to a REIT' s distribution to the Fund of gain from the sale or exchange of U.S. real property or an interest in a U.S. real property holding corporation, if the Fund' s direct or indirect interests in U.S. real property were to exceed certain levels. The rule with respect to distributions and redemptions attributable to a REIT' s distribution to the Fund will not expire for taxable years beginning on or after January 1, 2014.

In the case of foreign non-corporate shareholders, the Fund may be required to backup withhold U.S. federal income tax on distributions that are otherwise exempt from withholding tax unless such shareholders furnish the Fund with proper notification of their foreign status.

Compliance with the HIRE Act. A 30% withholding tax will be imposed on dividends paid after December 31, 2013, and redemption proceeds paid after December 31, 2016, to (i) foreign financial institutions including non-U.S. investment funds unless they agree to collect and disclose to the IRS information regarding their direct and indirect U.S. account holders and (ii) certain other foreign entities, unless they certify certain information regarding their direct and indirect U.S. owners. To avoid withholding, foreign financial institutions will need to either enter into agreements with the IRS that state that they will provide the IRS information, including the name, address and taxpayer identification number of direct and indirect U.S. account holders, comply with due diligence procedures with respect to the identification of U.S. accounts, report to the IRS certain information with respect to U.S. accounts maintained, agree to withhold tax on certain payments made to non-compliant foreign financial institutions or to account holders who fail to provide the required information, and determine certain other information as to their account holders or agree to provide certain information to other revenue authorities for transmittal to the IRS. Other foreign entities will need to either provide the name, address, and taxpayer identification number of each substantial U.S. owner or certifications of no substantial U.S. ownership unless certain exceptions apply or agree to provide certain information to other revenue authorities for transmittal to the IRS. Non-U.S. shareholders should consult their own tax advisors regarding the possible implications of these requirements on their investment in the Fund.

Requirements of Form 8886. Under Treasury regulations, if a shareholder realizes a loss on disposition of the Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances. Under certain circumstances, certain tax-exempt entities and their managers may be subject to excise tax if they are parties to certain reportable transactions.

Other Taxes. Dividends, distributions and redemption proceeds may also be subject to additional state, local and foreign taxes depending on each shareholder's particular situation.

Changes in Taxation. The taxation of the Fund, the Portfolio, the Subsidiary and shareholders may be adversely affected by future legislation, Treasury regulations, IRS revenue procedures and/or guidance issued by the IRS.

PORTFOLIO SECURITIES TRANSACTIONS

Decisions concerning the execution of portfolio security transactions, including the selection of the market and the broker-dealer firm, are made by the investment adviser of SMID-Cap Portfolio and Focused Growth Fund, Horizon Growth Fund and Select Equity Fund, as applicable. Each Fund or the Portfolio is responsible for the expenses associated with its portfolio transactions. The investment adviser is also responsible for the execution of transactions for all other accounts managed by it. The investment adviser places the portfolio security transactions for execution with one or more broker-dealer firms. The investment adviser uses its best efforts to obtain execution of portfolio security transactions at prices which in the investment adviser's judgment are advantageous to the client and at a reasonably competitive spread or (when a disclosed commission is being charged) at reasonably competitive commission rates. In seeking such execution, the investment adviser will use its best judgment in evaluating the terms of a transaction, and will give consideration to various relevant factors, including without limitation the full range and quality of the broker-dealer firm's services, the value of the brokerage and research provided, the responsiveness of the firm to the investment adviser, the size and type of the transaction, the nature and character of the market for the security, the confidentiality, speed and certainty of effective execution required for the transaction, the general execution and operational capabilities of the

broker-dealer firm, the reputation, reliability, experience and financial condition of the firm, the value and quality of the services rendered by the firm in this and other transactions, and the amount of the spread or commission, if any.

Transactions on stock exchanges and other agency transactions involve the payment of negotiated brokerage commissions. Such commissions vary among different broker-dealer firms, and a particular broker-dealer may charge different commissions according to such factors as the difficulty and size of the transaction and the volume of business done with such broker-dealer. Transactions in foreign securities often involve the payment of brokerage commissions, which may be higher than those in the United States. There is generally no stated commission in the case of securities traded in the over-the-counter markets including transactions in fixed-income securities which are generally purchased and sold on a net basis (i.e., without commission) through

broker-dealers and banks acting for their own account rather than as brokers. Such firms attempt to profit from such transactions by buying at the bid price and selling at the higher asked price of the market for such obligations, and the difference between the bid and asked price is customarily referred to as the spread. Fixed-income transactions may also be transactions directly with the issuer of the obligations. In an underwritten offering the price paid often includes a disclosed fixed commission or discount retained by the underwriter or dealer. Although spreads or commissions paid on portfolio security transactions will, in the judgment of the investment adviser, be reasonable in relation to the value of the services provided, commissions exceeding those which another firm might charge may be paid to broker-dealers who were selected to execute transactions on behalf of the investment adviser's clients in part for providing brokerage and research services to the investment adviser.

Pursuant to the safe harbor provided in Section 28(e) of the Securities Exchange Act of 1934, as amended ("Section 28(e)"), a broker or dealer who executes a portfolio transaction may receive a commission that is in excess of the amount of commission another broker or dealer would have charged for effecting that transaction if the investment adviser determines in good faith that such compensation was reasonable in relation to the value of the brokerage and research services provided. This determination may be made on the basis of either that particular transaction or on the basis of the overall responsibility which the investment adviser and its affiliates have for accounts over which they exercise investment discretion. "Research Services" as used herein includes any and all brokerage and research services to the extent permitted by Section 28(e). Generally, Research Services may include, but are not limited to, such matters as research, analytical and quotation services, data, information and other services products and materials which assist the investment adviser in the performance of its investment responsibilities. More specifically, Research Services may include general economic, political, business and market information, industry and company reviews, evaluations of securities and portfolio strategies and transactions, technical analysis of various aspects of the securities markets, recommendations as to the purchase and sale of securities and other portfolio transactions, certain financial, industry and trade publications, certain news and information services, and certain research oriented computer software, data bases and services. Any particular Research Service obtained through a broker-dealer may be used by the investment adviser in connection with client accounts other than those accounts which pay commissions to such broker-dealer. Any such Research Service may be broadly useful and of value to the investment adviser in rendering investment advisory services to all or a significant portion of its clients, or may be relevant and useful for the management of only one client's account or of a few clients' accounts, or may be useful for the management of merely a segment of certain clients' accounts, regardless of whether any such account or accounts paid commissions to the broker-dealer through which such Research Service was obtained. The investment adviser evaluates the nature and quality of the various Research Services obtained through broker-dealer firms and may attempt to allocate sufficient portfolio security transactions to such firms to ensure the continued receipt of Research Services which the investment adviser believes are useful or of value to it in rendering investment advisory services to its clients. The investment adviser may also receive brokerage and Research Services from underwriters and dealers in fixed-price offerings.

Research Services provided by (and produced by) broker-dealers that execute portfolio transactions or from affiliates of executing broker-dealers are referred to as "Proprietary Research .." The investment adviser may and does consider the receipt of Proprietary Research Services as a factor in selecting broker dealers to execute client portfolio transactions, provided it does not compromise the investment adviser's obligation to seek best overall execution. The investment adviser also may consider the receipt of Research Services under so called "client commission arrangements" or "commission sharing arrangements" (both referred to as "CCAs") as a factor in selecting broker dealers to execute transactions, provided it does not compromise the investment adviser's obligation to seek best overall execution. Under a CCA arrangement, the investment adviser may cause client accounts to effect transactions through a broker-dealer and request that the broker-dealer allocate a portion of the commissions paid on those transactions to a pool of commission credits that are paid to other firms that provide Research Services to the investment adviser. Under a CCA, the broker-dealer that provides

the Research Services need not execute the trade. Participating in CCAs may enable the investment adviser to consolidate payments for research using accumulated client commission credits from transactions executed through a particular broker-dealer to periodically pay for Research Services obtained from and provided by other firms, including other broker-dealers that supply Research Services. The investment adviser believes that CCAs offer the potential to optimize the execution of trades and the acquisition of a variety of high quality Research Services that the investment adviser might not be provided access to absent CCAs. The investment adviser will only enter into and utilize CCAs to the extent permitted by Section 28(e).

The investment companies sponsored by the investment adviser or its affiliates also may allocate brokerage commissions to acquire information relating to the performance, fees and expenses of such companies and other investment companies, which information is used by the members of the Board of such companies to fulfill their responsibility to oversee the quality of the services provided to various entities, including the investment adviser, to such companies. Such companies may also pay cash for such information.

Securities considered as investments for Focused Growth Fund, Horizon Growth Fund , Select Equity Fund or the Portfolio may also be appropriate for other investment accounts managed by the investment adviser or its affiliates. Whenever decisions are made to buy or sell securities by Focused Growth Fund, Horizon Growth Fund , Select Equity Fund or the Portfolio and one or more of such other accounts simultaneously, the investment adviser will allocate the security transactions (including “new” issues) in a manner which it believes to be equitable under the circumstances. As a result of such allocations, there may be instances where Focused Growth Fund, Horizon Growth Fund , Select Equity Fund or the Portfolio will not participate in a transaction that is allocated among other accounts. If an aggregated order cannot be filled completely, allocations will generally be made on a pro rata basis. An order may not be allocated on a pro rata basis where, for example: (i) consideration is given to portfolio managers who have been instrumental in developing or negotiating a particular investment; (ii) consideration is given to an account with specialized investment policies that coincide with the particulars of a specific investment; (iii) pro rata allocation would result in odd-lot or de minimis amounts being allocated to a portfolio or other client; or (iv) where the investment adviser reasonably determines that departure from a pro rata allocation is advisable. While these aggregation and allocation policies could have a detrimental effect on the price or amount of the securities available to Focused Growth Fund, Horizon Growth Fund , Select Equity Fund or the Portfolio from time to time, it is the opinion of the members of the Board that the benefits from the investment adviser organization outweigh any disadvantage that may arise from exposure to simultaneous transactions.

The following table shows brokerage commissions paid during the three fiscal years (or period) ended September 30, 2012, 2011 and 2010 , as well as the amount of Portfolio or each Fund security transactions for the most recent fiscal year (if any) that were directed to firms that provided some Research Services to the investment adviser or its affiliates (see above), and the commissions paid in connection therewith.

Fund/Portfolio	Brokerage Commissions Paid for the Fiscal Year Ended			Amount of Transactions Directed to Firms Providing Research	Commissions Paid on Transactions Directed to Firms Providing Research
	9/30/12	9/30/11	9/30/10	9/30/12	9/30/12
Focused Growth Fund ⁽¹⁾⁽²⁾	\$ 141,645	\$ 82,287	\$ 46,111	\$ 245,599,843	\$ 126,600
Horizon Growth Fund ⁽²⁾⁽³⁾	\$ 27,452	\$ 94,188	\$ 52,298	\$ 50,332,033	\$ 24,796
Select Equity Fund ⁽⁴⁾	\$ 10,043	N/A	N/A	\$ 24,265,731	\$ 9,908
SMID-Cap Portfolio ⁽²⁾	\$ 845,475	\$ 1,007,873	\$ 443,661	\$ 1,038,233,250	\$ 665,210

- (1) Data for the period October 1, 2011 through July 20, 2012 and the fiscal years ended September 30, 2011 and 2010 for the Focused Growth Portfolio, a Massachusetts business trust having the same investment objective and policies as the Fund.
- (2) The increase/decrease in brokerage commissions paid by the Portfolio or Fund is related to an increase/decrease in the number and dollar amount of portfolio transactions.
- (3) Data for 2011 was for the fiscal period of November 1, 2010 through September 30, 2011, and for 2010 was for the fiscal year ended October 31st.
- (4) For the period of January 3, 2012 (commencement of operations) through September 30, 2012

During the fiscal year ended September 30, 2012, Focused Growth Fund, Horizon Growth Fund, Select Equity Fund or SMID-Cap Portfolio held securities of its or its corresponding Fund’ s “regular brokers or dealers”, as that term is defined in Rule 10b-1 of the 1940 Act, and the value of such securities, as of each Fund’ s fiscal year end was as follows:

Fund and/or Portfolio	Regular Broker or Dealer (or Parent)	Aggregate Value
Focused Growth Fund	JP Morgan	\$ 0

FINANCIAL STATEMENTS

The audited financial statements of, and the report of the independent registered public accounting firm for each Fund appear in its annual report to shareholders and are incorporated by reference into this SAI. A copy of each annual report accompanies this SAI.

Householding. Consistent with applicable law, duplicate mailings of shareholder reports and certain other Fund information to shareholders residing at the same address may be eliminated.

Registrant incorporates by reference the audited financial information and the reports of the independent registered public accounting firm for the Funds listed below for the fiscal year ended September 30, 2012, as previously filed electronically with the SEC:

Eaton Vance Atlanta Capital Focused Growth Fund
 Eaton Vance Atlanta Capital Select Equity Fund
 Eaton Vance Atlanta Capital SMID-Cap Fund
 (Accession No. 0001193125-12-481513)
 Eaton Vance Atlanta Capital Horizon Growth Fund
 (Accession No. 0001193125-12-483909)

ADDITIONAL INFORMATION ABOUT INVESTMENT STRATEGIES

Asset Coverage	To the extent required by SEC guidelines, if a transaction exposes the Fund to an obligation of another party it will either: (1) enter an offsetting (“covered”) position for the same type of financial asset; or (2) segregate cash or liquid securities on the books of either the custodian or the investment adviser with a value sufficient at all times to cover its potential obligations not covered. Assets used as cover or segregated cannot be sold while the position(s) requiring cover is open unless replaced with other appropriate assets. As a result, if a large portion of assets is segregated or committed as cover, it could impede portfolio management or the ability to meet redemption requests or other current obligations. The types of transactions that may require asset coverage include (but are not limited to) reverse repurchase agreements, repurchase agreements, short sales, securities lending, forward contracts, options, forward commitments, futures contracts, when-issued securities, swap agreements, residual interest bonds and participation in revolving credit facilities.
Asset-Backed Securities (“ABS”)	ABS are collateralized by pools of automobile loans, educational loans, home equity loans, credit card receivables, equipment or automobile leases, commercial mortgage-backed securities (“MBS”), utilities receivables and secured or unsecured bonds issued by corporate or sovereign obligors, unsecured loans made to a variety of corporate commercial and industrial loan customers of one or more lending banks, or a combination of these bonds and loans. ABS are “pass through” securities, meaning that principal and interest payments made by the borrower on the underlying assets are passed through to the ABS holder. ABS are issued through special purpose vehicles that are bankruptcy remote from the issuer of the collateral. ABS are subject to interest rate risk and prepayment risk. Some ABS may receive prepayments that can change their effective maturities. Issuers of ABS may have limited ability to enforce the security interest in the underlying assets or may have no security in the underlying assets, and credit enhancements provided to support the securities, if any, may be inadequate to protect investors in the event of default. In addition, ABS may experience losses on the underlying assets as a result of certain rights provided to consumer debtors under federal and state law. The value of ABS may be affected by the factors described above and other factors, such as the availability of information concerning the pool and its structure, the creditworthiness of the servicing agent for the pool, the originator of the underlying assets or the entities providing credit enhancements and the ability of the servicer to service the underlying collateral. The value of ABS representing interests in a pool of utilities receivables may be adversely affected by changes in government regulations. While certain ABS may be insured as to the payment of principal and interest, this insurance does not protect the market value of such obligations or the Fund’s net asset value. The value of an insured security will be affected by the credit standing of its insurer.

<p>Auction Rate Securities</p>	<p>Auction rate securities, such as auction preferred shares of closed-end investment companies, are preferred securities and debt securities with dividends/coupons based on a rate set at auction. The auction is usually held weekly for each series of a security, but may be held less frequently. The auction sets the rate, and securities may be bought and sold at the auction. Provided that the auction mechanism is successful, auction rate securities usually normally permit the holder to sell the securities in an auction at par value at specified intervals. The dividend is reset by a “Dutch” auction in which bids are made by broker-dealers and other institutions for a certain amount of securities at a specified minimum yield. The dividend rate set by the auction is the lowest interest or dividend rate that covers all securities offered for sale. While this process is designed to permit auction rate securities to be traded at par value, there is the risk that an auction will fail due to insufficient demand for the securities. Security holders that submit sell orders in a failed auction may not be able to sell any or all of the shares for which they have submitted sell orders. Security holders may sell their shares at the next scheduled auction, subject to the same risk that the subsequent auction will not attract sufficient demand for a successful auction to occur. Broker-dealers may also try to facilitate secondary trading in the auction rate securities, although such secondary trading may be limited and may only be available for shareholders willing to sell at a discount. Since mid-February 2008, existing markets for certain auction rate securities have become generally illiquid and investors have not been able to sell their securities through the regular auction process. It is uncertain, particularly in the near term, when or whether there will be a revival of investor interest in purchasing securities sold through auctions. In addition, there may be no active secondary markets for many auction rate securities. Moreover, auction rate securities that do trade in a secondary market may trade at a significant discount from the underlying liquidation or principle amount of the securities. Finally, there recently have been a number of governmental investigations and regulatory settlements involving certain broker-dealers with respect to their prior activities involving auction rate securities.</p> <p>Valuations of such securities is highly speculative, however, dividends on auction rate preferred securities issued by a closed-end fund may be reported, generally on Form 1099, as exempt from federal income tax to the extent they are attributable to tax-exempt interest income earned by the Fund on the securities and distributed to holders of the preferred securities, provided that the preferred securities are treated as equity securities for federal income tax purposes, and the closed-end fund complies with certain requirements under the Code. Investments in auction rate preferred securities of closed-end funds are subject to limitations on investments in other US registered investment companies, which limitations are prescribed by the 1940 Act.</p>
<p>Average Effective Maturity</p>	<p>Average effective maturity is a weighted average of all the maturities of bonds owned by the Fund. Average effective maturity takes into consideration all mortgage payments, puts and adjustable coupons. In the event the Fund invests in multiple Portfolios, its average weighted maturity is the sum of its allocable share of the average weighted maturity of each of the Portfolios in which it invests, which is determined by multiplying the Portfolio’ s average weighted maturity by the Fund’ s percentage ownership of that Portfolio.</p>
<p>Borrowing for Investment Purposes</p>	<p>Successful use of a borrowing strategy depends on the investment adviser’ s ability to predict correctly interest rates and market movements. There is no assurance that a borrowing strategy will be successful. Upon the expiration of the term of the Fund’ s existing credit arrangement, the lender may not be willing to extend further credit to the Fund or may only be willing to do so at an increased cost to the Fund. If the Fund is not able to extend its credit arrangement, it may be required to liquidate holdings to repay amounts borrowed from the lender. Borrowing to increase investments generally will exaggerate the effect on the Fund’ s net asset value of any increase or decrease in the value of the security purchased with the borrowings. Successful use of a borrowing strategy depends on the investment adviser’ s ability to predict correctly interest rates and market movements. There can be no assurance that the use of borrowings will be successful. In connection with its borrowings, the Fund will be required to maintain specified asset coverage with respect to such borrowings by both the 1940 Act and the terms of its credit facility with the lender. The Fund may be required to dispose of portfolio investments on unfavorable terms if market fluctuations or other factors reduce the required asset coverage to less than the prescribed amount. Borrowings involve additional expense to the Fund.</p>

Borrowing for Temporary Purposes	<p>The Fund may borrow for temporary purposes (such as to satisfy redemption requests, to remain fully invested in advance of the settlement of share purchases and settle transactions). The Fund typically makes any such borrowings pursuant to an umbrella credit facility to which most of the Eaton Vance mutual funds have access. The Fund's ability to borrow under the credit facility is subject to its terms and conditions, which in some cases may limit the Fund's ability to borrow under the facility. The credit facility is subject to an annual renewal, which cannot be assured. If the Fund does not have the ability to borrow for temporary purposes, it may be required to sell securities at inopportune times to meet short-term liquidity needs. Borrowings involve additional expense to the Fund.</p>
Build America Bonds	<p>Build America Bonds are taxable municipal obligations issued pursuant to the American Recovery and Reinvestment Act of 2009 (the "Act") or other legislation providing for the issuance of taxable municipal debt on which the issuer receives federal support. Enacted in February 2009, the Act authorizes state and local governments to issue taxable bonds on which, assuming certain specified conditions are satisfied, issuers may either (i) receive reimbursement from the U.S. Treasury with respect to its interest payments on the bonds ("direct pay" Build America Bonds) or (ii) provide tax credits to investors in the bonds ("tax credit" Build America Bonds). Unlike most other municipal obligations, interest received on Build America Bonds is subject to federal income tax and may be subject to state income tax. Under the terms of the Act, issuers of direct pay Build America Bonds are entitled to receive reimbursement from the U.S. Treasury currently equal to 35% (or 45% in the case of Recovery Zone Economic Development Bonds) of the interest paid. Holders of tax credit Build America Bonds can receive a federal tax credit currently equal to 35% of the coupon interest received. The Fund may invest in "principal only" strips of tax credit Build America Bonds, which entitle the holder to receive par value of such bonds if held to maturity. The Fund does not expect to receive (or pass through to shareholders) tax credits as a result of its investments. The federal interest subsidy or tax credit continues for the life of the bonds. Build America Bonds are an alternative form of financing to state and local governments whose primary means for accessing the capital markets has been through issuance of tax-free municipal bonds. Build America Bonds can appeal to a broader array of investors than the high income U.S. taxpayers that have traditionally provided the market for municipal bonds. Build America Bonds may provide a lower net cost of funds to issuers. Pursuant to the terms of the Act, the issuance of Build America Bonds ceased on December 31, 2010. As a result, the availability of such bonds is limited and the market for the bonds and/or their liquidity may be affected.</p>
Call and Put Features on Obligations	<p>Issuers of obligations may reserve the right to call (redeem) the obligation. If an issuer redeems an obligation with a call right during a time of declining interest rates, the holder of the obligation may not be able to reinvest the proceeds in securities providing the same investment return as provided by the securities redeemed. Some obligations may have "put" or "demand" features that allow early redemption by the holder. Longer term fixed-rate bonds may give the holder a right to request redemption at certain times (often annually after the lapse of an intermediate term). This "put" or "demand" feature enhances an obligation's liquidity by shortening its effective maturity and enables the security to trade at a price equal to or very close to par. If a demand feature terminates prior to being exercised, the holder of the obligation would be subject to the longer maturity of the obligation, which could experience substantially more volatility. Obligations with a "put" or "demand" feature are more defensive than conventional long term bonds (protecting to some degree against a rise in interest rates) while providing greater opportunity than comparable intermediate term bonds, because they can be retained if interest rates decline.</p>
Cash Equivalents	<p>Cash equivalents include short term, high quality, U.S. dollar denominated instruments such as commercial paper, certificates of deposit and bankers' acceptances issued by U.S. or foreign banks, and Treasury bills and other obligations with a maturity of one year or less, including those issued or guaranteed by U.S. Government agencies and instrumentalities. See "U.S. Government Securities" below. Certificates of deposit are certificates issued against funds deposited in a commercial bank, are for a definite period of time, earn a specified rate of return, and are normally negotiable. Bankers' acceptances are short-term credit instruments used to finance the import, export, transfer or storage of goods. They are termed "accepted" when a bank guarantees their payment at maturity.</p>

	<p>The obligations of foreign branches of U.S. banks may be general obligations of the parent bank in addition to the issuing branch, or may be limited by the terms of a specific obligation and by governmental regulation. Payment of interest and principal upon these obligations may also be affected by governmental action in the country of domicile of the branch (generally referred to as sovereign risk). In addition, evidence of ownership of portfolio securities may be held outside of the U.S. and generally will be subject to the risks associated with the holding of such property overseas. Various provisions of U.S. law governing the establishment and operation of domestic branches do not apply to foreign branches of domestic banks. The obligations of U.S. branches of foreign banks may be general obligations of the parent bank in addition to the issuing branch, or may be limited by the terms of a specific obligation and by federal and state regulation as well as by governmental action in the country in which the foreign bank has its head office.</p> <p>Cash equivalents are often acquired directly from the issuers thereof or otherwise are normally traded on a net basis (without commission) through broker-dealers and banks acting for their own account. Such firms attempt to profit from such transactions by buying at the bid price and selling at the higher asked price of the market, and the difference is customarily referred to as the spread. Cash equivalents may be adversely affected by market and economic events, such as a sharp rise in prevailing short-term interest rates; adverse developments in the banking industry, which issues or guarantees many money market securities; adverse economic, political or other developments affecting domestic issuers of money market securities; changes in the credit quality of issuers; and default by a counterparty. These securities may be subject to federal income, state income and/or other taxes. Instead of investing in cash equivalents directly, the Fund may invest in an affiliated money market fund (such as Eaton Vance Cash Reserves Fund, LLC which is managed by Eaton Vance) or unaffiliated money market fund.</p>
<p>Collateralized Mortgage Obligations (“CMOs”)</p>	<p>CMOs are backed by a pool of mortgages or mortgage loans. The key feature of the CMO structure is the prioritization of the cash flows from the pool of mortgages among the several classes, or tranches, of the CMO, thereby creating a series of obligations with varying rates and maturities. Senior CMO classes will typically have priority over residual CMOs as to the receipt of principal and or interest payments on the underlying mortgages. CMOs also issue sequential and parallel pay classes, including planned amortization class and target amortization classes and fixed and floating rate CMO tranches. CMOs issued by U.S. government agencies are backed by agency mortgages, while privately issued CMOs may be backed by either government agency mortgages or private mortgages. Payments of principal and interest are passed through to each CMO tranche at varying schedules resulting in bonds with different coupons, effective maturities and sensitivities to interest rates. Parallel pay CMOs are structured to provide payments of principal on each payment date to more than one class, concurrently on a proportionate or disproportionate basis. Sequential pay CMOs generally pay principal to only one class at a time while paying interest to several classes. CMOs generally are secured by an assignment to a trustee under the indenture pursuant to which the bonds are issued as collateral consisting of a pool of mortgages. Payments with respect to the underlying mortgages generally are made to the trustee under the indenture. CMOs are designed to be retired as the underlying mortgages are repaid. In the event of sufficient early prepayments on such mortgages, the class or series of CMO first to mature generally will be retired prior to maturity. Therefore, although in most cases the issuer of CMOs will not supply additional collateral in the event of such prepayments, there will be sufficient collateral to secure CMOs that remain outstanding. Floating rate CMO tranches carry interest rates that are tied in a fixed relationship to an index subject to an upper limit, or “cap,” and sometimes to a lower limit, or “floor.” CMOs may be less liquid and may exhibit greater price volatility than other types of mortgage- or asset-backed securities.</p>
<p>Commercial Mortgage-Backed Securities (“CMBS”)</p>	<p>CMBS include securities that reflect an interest in, and are secured by, mortgage loans on commercial real property, such as hotels, office buildings, retail stores, hospitals and other commercial buildings. CMBS may have a lower repayment uncertainty than other mortgage-related securities because commercial mortgage loans generally prohibit or impose penalties on prepayment of principal. The risks of investing in CMBS reflect the risks of investing in the real estate securing the underlying mortgage loans, including the effects of local and other economic conditions on real estate markets, the ability of tenants to make loan payment, and the ability of a property to attract and retain tenants. CMBS may be less liquid and may exhibit greater price volatility than other types of mortgage- or asset-backed securities.</p>

Commodity-Related Investments	<p>The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, which may include weather, embargoes, tariffs, and health, political, international and regulatory developments. Economic and other events (whether real or perceived) can reduce the demand for commodities, which may reduce market prices and cause the value of Fund shares to fall. The frequency and magnitude of such changes cannot be predicted. Exposure to commodities and commodities markets may subject the Fund to greater volatility than investments in traditional securities. No active trading market may exist for certain commodities investments, which may impair the ability of the Fund to sell or to realize the full value of such investments in the event of the need to liquidate such investments. In addition, adverse market conditions may impair the liquidity of actively traded commodities investments. Certain types of commodities instruments (such as total return swaps and commodity-linked notes) are subject to the risk that the counterparty to the instrument will not perform or will be unable to perform in accordance with the terms of the instrument. To the extent commodity-related investments are held through the Subsidiary, the Subsidiary is not subject to U.S. laws (including securities laws) and their protections. The Subsidiary is subject to the laws of the Cayman Islands, a foreign jurisdiction, and can be affected by developments in that jurisdiction.</p> <p>Certain commodities are subject to limited pricing flexibility because of supply and demand factors. Others are subject to broad price fluctuations as a result of the volatility of the prices for certain raw materials and the instability of supplies of other materials. These additional variables may create additional investment risks and result in greater volatility than investments in traditional securities. The commodities which underlie commodity futures contracts and commodity swaps may be subject to additional economic and non-economic variables, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. Unlike the financial futures markets, in the commodity futures markets there are costs of physical storage associated with purchasing the underlying commodity. The price of the commodity futures contract will reflect the storage costs of purchasing the physical commodity, including the time value of money invested in the physical commodity. To the extent that the storage costs for an underlying commodity change while the Fund is invested in futures contracts on that commodity, the value of the futures contract may change proportionately.</p> <p>In the commodity futures markets, producers of the underlying commodity may decide to hedge the price risk of selling the commodity by selling futures contracts today to lock in the price of the commodity at delivery tomorrow. In order to induce speculators to purchase the other side of the same futures contract, the commodity producer generally must sell the futures contract at a lower price than the expected future spot price. Conversely, if most hedgers in the futures market are purchasing futures contracts to hedge against a rise in prices, then speculators will only sell the other side of the futures contract at a higher futures price than the expected future spot price of the commodity. The changing nature of the hedgers and speculators in the commodity markets will influence whether futures prices are above or below the expected future spot price, which can have significant implications for the Fund. If the nature of hedgers and speculators in futures markets has shifted when it is time for the Fund to reinvest the proceeds of a maturing contract in a new futures contract, the Fund might reinvest at higher or lower futures prices, or choose to pursue other investments.</p>
Common Stocks	<p>Common stock represents an equity ownership interest in the issuing corporation. Holders of common stock generally have voting rights in the issuer and are entitled to receive common stock dividends when, as and if declared by the corporation's board of directors. Common stock normally occupies the most subordinated position in an issuer's capital structure. Returns on common stock investments consist of any dividends received plus the amount of appreciation or depreciation in the value of the stock.</p>

Although common stocks have historically generated higher average returns than fixed-income securities over the long term and particularly during periods of high or rising concerns about inflation, common stocks also have experienced significantly more volatility in returns and may not maintain their real value during inflationary periods. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock. Also, the prices of common stocks are sensitive to general movements in the stock market and a drop in the stock market may depress the price of common stocks. Common stock prices fluctuate for many reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, or when political or economic events affecting the issuer occur. In addition, common stock prices may be sensitive to rising interest rates as the costs of capital rise and borrowing costs increase.

Convertible Securities

A convertible security is a bond, debenture, note, preferred security, or other security that entitles the holder to acquire common stock or other equity securities of the same or a different issuer. A convertible security entitles the holder to receive interest paid or accrued on debt or the dividend paid on preferred securities until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities have characteristics similar to nonconvertible income securities in that they ordinarily provide a stable stream of income with generally higher yields than those of common stocks of the same or similar issuers, but lower yields than comparable nonconvertible securities. The value of a convertible security is influenced by changes in interest rates, with investment value declining as interest rates increase and increasing as interest rates decline. The credit standing of the issuer and other factors also may have an effect on the convertible security's investment value. A convertible security ranks senior to common stock in a corporation's capital structure but are usually subordinated to comparable nonconvertible securities. Convertible securities may be purchased for their appreciation potential when they yield more than the underlying securities at the time of purchase or when they are considered to present less risk of principal loss than the underlying securities. Generally speaking, the interest or dividend yield of a convertible security is somewhat less than that of a non-convertible security of similar quality issued by the same company. A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument.

Convertible securities are issued and traded in a number of securities markets. Even in cases where a substantial portion of the convertible securities held by the Fund are denominated in U.S. dollars, the underlying equity securities may be quoted in the currency of the country where the issuer is domiciled. As a result, fluctuations in the exchange rate between the currency in which the debt security is denominated and the currency in which the share price is quoted will affect the value of the convertible security. With respect to convertible securities denominated in a currency different from that of the underlying equity securities, the conversion price may be based on a fixed exchange rate established at the time the securities are issued, which may increase the effects of currency risk.

Holders of convertible securities generally have a claim on the assets of the issuer prior to the common stockholders but may be subordinated to other debt securities of the same issuer. Certain convertible debt securities may provide a put option to the holder, which entitles the holder to cause the securities to be redeemed by the issuer at a premium over the stated principal amount of the debt securities under certain circumstances.

Synthetic convertible securities may include either cash-settled convertibles or manufactured convertibles. Cash-settled convertibles are instruments that are created by the issuer and have the economic characteristics of traditional convertible securities but may not actually permit conversion into the underlying equity securities in all circumstances. As an example, a private company may issue a cash-settled convertible that is convertible into common stock only if the company successfully completes a public offering of its common stock prior to maturity and otherwise pays a cash amount to reflect any equity appreciation. Manufactured convertibles are created by the investment adviser or another party by combining separate securities that possess one of the two principal characteristics of a convertible security, *i.e.*, fixed-income (“fixed-income component”) or a right to acquire equity securities (“convertibility component”). The fixed-income component is achieved by investing in nonconvertible fixed-income securities, such as nonconvertible bonds, preferred securities and money market instruments. The convertibility component is achieved by investing in call options, warrants, or other securities with equity conversion features (“equity features”) granting the holder the right to purchase a specified quantity of the underlying stocks within a specified period of time at a specified price or, in the case of a stock index option, the right to receive a cash payment based on the value of the underlying stock index. A manufactured convertible differs from traditional convertible securities in several respects. Unlike a traditional convertible security, which is a single security that has a unitary market value, a manufactured convertible is comprised of two or more separate securities, each with its own market value. Therefore, the total “market value” of such a manufactured convertible is the sum of the values of its fixed-income component and its convertibility component. More flexibility is possible in the creation of a manufactured convertible than in the purchase of a traditional convertible security. Because many corporations have not issued convertible securities, the investment adviser may combine a fixed-income instrument and an equity feature with respect to the stock of the issuer of the fixed-income instrument to create a synthetic convertible security otherwise unavailable in the market. The investment adviser may also combine a fixed-income instrument of an issuer with an equity feature with respect to the stock of a different issuer when the investment adviser believes such a manufactured convertible would better promote the Fund’s objective than alternative investments. For example, the investment adviser may combine an equity feature with respect to an issuer’s stock with a fixed-income security of a different issuer in the same industry to diversify the Fund’s credit exposure, or with a U.S. Treasury instrument to create a manufactured convertible with a higher credit profile than a traditional convertible security issued by that issuer. A manufactured convertible also is a more flexible investment in that its two components may be purchased separately and, upon purchasing the separate securities, “combined” to create a manufactured convertible. For example, the Fund may purchase a warrant for eventual inclusion in a manufactured convertible while postponing the purchase of a suitable bond to pair with the warrant pending development of more favorable market conditions. The value of a manufactured convertible may respond to certain market fluctuations differently from a traditional convertible security with similar characteristics. For example, in the event the Fund created a manufactured convertible by combining a short-term U.S. Treasury instrument and a call option on a stock, the manufactured convertible would be expected to outperform a traditional convertible of similar maturity that is convertible into that stock during periods when Treasury instruments outperform corporate fixed-income securities and underperform during periods when corporate fixed-income securities outperform Treasury instruments.

Credit Linked Securities	<p>See also “Derivative Instruments and Related Risks” herein. Credit linked securities are issued by a limited purpose trust or other vehicle that, in turn, invests in a derivative instrument or basket of derivative instruments, such as credit default swaps, interest rate swaps, and other securities in order to provide exposure to certain fixed-income markets. Credit linked securities may be used as a cash management tool in order to gain exposure to a certain market and to remain fully invested when more traditional income producing securities are not available. Like an investment in a bond, investments in credit linked securities represent the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the security. However, these payments are conditioned on the issuer’s receipt of payments from, and the issuer’s potential obligations to, the counterparties to the derivative instruments and other securities in which the issuer invests. An issuer may sell one or more credit default swaps, under which the issuer would receive a stream of payments over the term of the swap agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par (or other agreed upon value) of the referenced debt obligation. This, in turn, would reduce the amount of income and principal that the holder of the credit linked security would receive. Credit linked securities generally will be exempt from registration under the 1933 Act. Accordingly, there may be no established trading market for the securities and they may constitute illiquid investments.</p>
Derivative Instruments and Related Risks	<p>Generally, derivatives can be characterized as financial instruments whose performance is derived at least in part from the performance of an underlying reference instrument. Derivative instruments may be acquired in the United States or abroad and include the various types of exchange-traded and over-the-counter (“OTC”) instruments described herein and other instruments with substantially similar characteristics and risks. Derivative instruments may be based on securities, indices, currencies, commodities, economic indicators and events (referred to as “reference instruments”). Fund obligations created pursuant to derivative instruments may be subject to the requirements described under “Asset Coverage” herein.</p> <p>Derivative instruments are subject to a number of risks, including adverse or unexpected movements in the price of the reference instrument, and counterparty, liquidity, tax, correlation and leverage risks. Use of derivative instruments may cause the realization of higher amounts of short-term capital gains (generally taxed at ordinary income tax rates) than if such instruments had not been used. Success in using derivative instruments to hedge portfolio assets depends on the degree of price correlation between the derivative instruments and the hedged asset. Imperfect correlation may be caused by several factors, including temporary price disparities among the trading markets for the derivative instrument, the reference instrument and the Fund’s assets. To the extent that a derivative instrument is intended to hedge against an event that does not occur, the Fund may realize losses.</p> <p>OTC derivative instruments involve an additional risk in that the issuer or counterparty may fail to perform its contractual obligations. Some derivative instruments are not readily marketable or may become illiquid under adverse market conditions. In addition, during periods of market volatility, a commodity exchange may suspend or limit trading in an exchange-traded derivative instrument, which may make the contract temporarily illiquid and difficult to price. Commodity exchanges may also establish daily limits on the amount that the price of a futures contract or futures option can vary from the previous day’s settlement price. Once the daily limit is reached, no trades may be made that day at a price beyond the limit. This may prevent the closing out of positions to limit losses. The staff of the SEC takes the position that certain purchased OTC options, and assets used as cover for written OTC options, are illiquid. The ability to terminate OTC derivative instruments may depend on the cooperation of the counterparties to such contracts. For thinly traded derivative instruments, the only source of price quotations may be the selling dealer or counterparty. In addition, certain provisions of the Code limit the use of derivative instruments. Derivatives permit the Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. There can be no assurance that the use of derivative instruments will benefit the Fund.</p>

Direct Investments	Direct investments include (i) the private purchase from an enterprise of an equity interest in the enterprise in the form of shares of common stock or equity interests in trusts, partnerships, joint ventures or similar enterprises, and (ii) the purchase of such an equity interest in an enterprise from a principal investor in the enterprise. At the time of making a direct investment, the Fund will enter into a shareholder or similar agreement with the enterprise and one or more other holders of equity interests in the enterprise. These agreements may, in appropriate circumstances, provide the ability to appoint a representative to the board of directors or similar body of the enterprise and for eventual disposition of the investment in the enterprise. Such a representative would be expected to monitor the investment and protect the Fund's rights in the investment and would not be appointed for the purpose of exercising management or control of the enterprise.
Diversified Status	With respect to 75% of its total assets, an investment company that is registered with the SEC as a "diversified" fund: (1) may not invest more than 5% of its total assets in the securities of any one issuer (except obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities and securities of other investment companies); and (2) may not own more than 10% of the outstanding voting securities of any one issuer.
Dividend Capture Trading	In a dividend capture trade, the Fund sells a stock that has gone ex-dividend to purchase another stock paying a dividend before the next dividend of the stock being sold. The use of a dividend capture trading strategy exposes the Fund to higher portfolio turnover, increased trading costs and potential for capital loss or gain, particularly in the event of significant short-term price movements of stocks subject to dividend capture trading.
Duration	Duration measures the time-weighted expected cash flows of a fixed-income security, which can determine its sensitivity to changes in the general level of interest rates. Securities with longer durations generally tend to be more sensitive to interest rate changes than securities with shorter durations. A mutual fund with a longer dollar-weighted average duration generally can be expected to be more sensitive to interest rate changes than a fund with a shorter dollar-weighted average duration. Duration differs from maturity in that it considers a security's coupon payments in addition to the amount of time until the security matures. Various techniques may be used to shorten or lengthen Fund duration. As the value of a security changes over time, so will its duration. The duration of a Fund that invests in multiple Portfolios is the sum of its allocable share of the duration of each of the Portfolios in which it invests, which is determined by multiplying the Portfolio's duration by the Fund's percentage ownership of that Portfolio.
Emerging Market Investments	<p>The risks described under "Foreign Investments" herein generally are heightened in connection with investments in emerging markets. Also, investments in securities of issuers domiciled in countries with emerging capital markets may involve certain additional risks that do not generally apply to investments in securities of issuers in more developed capital markets, such as (i) low or non-existent trading volume, resulting in a lack of liquidity and increased volatility in prices for such securities, as compared to securities of comparable issuers in more developed capital markets; (ii) uncertain national policies and social, political and economic instability, increasing the potential for expropriation of assets, confiscatory taxation, high rates of inflation or unfavorable diplomatic developments; (iii) possible fluctuations in exchange rates, differing legal systems and the existence or possible imposition of exchange controls, custodial restrictions or other foreign or U.S. governmental laws or restrictions applicable to such investments; (iv) national policies that may limit investment opportunities, such as restrictions on investment in issuers or industries deemed sensitive to national interests; and (v) the lack or relatively early development of legal structures governing private and foreign investments and private property. Trading practices in emerging markets also may be less developed, resulting in inefficiencies relative to trading in more developed markets, which may result in increased transaction costs.</p> <p>Repatriation of investment income, capital and proceeds of sales by foreign investors may require governmental registration and/or approval in emerging market countries. There can be no assurance that repatriation of income, gain or initial capital from these countries will occur. In addition to withholding taxes on investment income, some countries with emerging markets may impose differential capital gains taxes on foreign investors.</p>

	<p>Political and economic structures in emerging market countries may undergo significant evolution and rapid development, and these countries may lack the social, political and economic stability characteristic of more developed countries. In such a dynamic environment, there can be no assurance that any or all of these capital markets will continue to present viable investment opportunities. In the past, governments of such nations have expropriated substantial amounts of private property, and most claims of the property owners have never been fully settled. There is no assurance that such expropriations will not reoccur. In such an event, it is possible that the entire value of an investment in the affected market could be lost. In addition, unanticipated political or social developments may affect the value of investments in these countries and the availability of additional investments. The small size and inexperience of the securities markets in certain of these countries and the limited volume of trading in securities in these countries may make investments in the countries illiquid and more volatile than investments in developed markets.</p> <p>Also, there may be less publicly available information about issuers in emerging markets than would be available about issuers in more developed capital markets, and such issuers may not be subject to accounting, auditing and financial reporting standards and requirements comparable to those to which U.S. companies are subject. In certain countries with emerging capital markets, reporting standards vary widely. As a result, traditional investment measurements used in the United States, such as price/earnings ratios, may not be applicable. Certain emerging market securities may be held by a limited number of persons. This may adversely affect the timing and pricing of the acquisition or disposal of securities. The prices at which investments may be acquired may be affected by trading by persons with material non-public information and by securities transactions by brokers in anticipation of transactions in particular securities.</p> <p>Practices in relation to settlement of securities transactions in emerging markets involve higher risks than those in developed markets, in part because brokers and counterparties in such markets may be less well capitalized, and custody and registration of assets in some countries may be unreliable. The possibility of fraud, negligence, undue influence being exerted by the issuer or refusal to recognize ownership exists in some emerging markets. As an alternative to investing directly in emerging markets, exposure may be obtained through derivative investments.</p>
Equity Investments	Equity investments include common and preferred stocks (see “Preferred Securities”); depositary receipts; equity interests in trusts, partnerships, joint ventures and other unincorporated entities or enterprises; convertible preferred securities and other convertible debt instruments; and warrants.
Equity Linked Securities	See also “Derivative Instruments and Related Risks” herein. Equity linked securities are privately issued securities whose investment results are designed to correspond generally to the performance of a specified stock index or “basket” of securities, or sometimes a single stock. These securities are used for many of the same purposes as derivative instruments and share many of the same risks. Equity linked securities may be considered illiquid and thus subject to the Fund’ s restrictions on investments in illiquid securities.

<p>Events Regarding FNMA and FHLMC</p>	<p>The value of FNMA and FHLMC securities fell sharply in 2008 due to concerns that these agencies did not have sufficient capital to offset losses. In mid-2008, the U.S. Treasury Department was authorized to increase the size of home loans that FNMA and FHLMC could purchase in certain residential areas and, until 2009, to lend FNMA and FHLMC emergency funds and to purchase the companies' stock. In September 2008, the U.S. Treasury Department announced that FNMA and FHLMC had been placed in conservatorship by the Federal Housing Finance Agency ("FHFA"), a newly created independent regulator. In connection with the conservatorship, the U.S. Treasury Department entered into Senior Preferred Stock Purchase Agreements ("PSPAs") under which, if the FHFA determines that the liabilities of FNMA and FHLMC have exceeded their assets under generally accepted accounting principles, the U.S. Treasury Department will contribute cash capital to the company in an amount equal to the difference between liabilities and assets. The PSPAs are designed to provide protection to the senior and subordinated debt and the MBS issued by FNMA and FHLMC. On February 18, 2009, the U.S. Treasury Department announced that it was doubling the size of its commitment to each of FNMA and FHLMC under the Senior Preferred Stock Program to \$200 billion. The U.S. Treasury Department's obligations under the Senior Preferred Stock Program are for an indefinite period of time for a maximum amount of \$200 billion per entity. FNMA and FHLMC are continuing to operate as going concerns while in conservatorship, and each remains liable for all of its obligations, including its guaranty obligations, associated with its mortgage-backed securities. The Senior Preferred Stock Purchase Agreement is intended to enhance each of FNMA and FHLMC's ability to meet its obligations. FHFA has indicated that the conservatorship of each entity will end when the director of FHFA determines that FHFA's plan to restore the entity to a safe and solvent condition has been completed. No assurance can be given that the U.S. Treasury Department initiatives discussed above with respect to the debt and mortgage-backed securities issued by FNMA and FHLMC will be successful.</p>
<p>Exchange-Traded Funds ("ETFs")</p>	<p>ETFs are pooled investment vehicles that are designed to provide investment results corresponding to an index. These indexes may be either broad-based, sector or international. ETFs usually are units of beneficial interest in an investment trust or represent undivided ownership interests in a portfolio of securities (or commodities), in each case with respect to a portfolio of all or substantially all of the component securities of, and in substantially the same weighting as, the relevant benchmark index. ETFs are designed to provide investment results that generally correspond to the price and yield performance of the component securities (or commodities) of the benchmark index. ETFs are listed on an exchange and trade in the secondary market on a per-share basis. The values of ETFs are subject to change as the values of their respective component securities (or commodities) fluctuate according to market volatility. Investments in ETFs may not exactly match the performance of a direct investment in the respective indices to which they are intended to correspond due to the temporary unavailability of certain index securities in the secondary market or other extraordinary circumstances, such as discrepancies with respect to the weighting of securities. Typically, the ETF bears its own operational expenses, which are deducted from its assets. To the extent that the Fund invests in ETFs, the Fund must bear these expenses in addition to the expenses of its own operation.</p>
<p>Exchange-Traded Notes ("ETNs")</p>	<p>ETNs are senior, unsecured, unsubordinated debt securities whose returns are linked to the performance of a particular market benchmark or strategy minus applicable fees. ETNs are traded on an exchange during normal trading hours. However, investors can also hold the ETN until maturity. At maturity, the issuer pays to the investor a cash amount equal to the principal amount, subject to the day's market benchmark or strategy factor.</p> <p>ETNs do not make periodic coupon payments or provide principal protection. ETNs are subject to credit risk and the value of the ETN may drop due to a downgrade in the issuer's credit rating, despite the underlying market benchmark or strategy remaining unchanged. The value of an ETN may also be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying assets, changes in the applicable interest rates, changes in the issuer's credit rating, and economic, legal, political, or geographic events that affect the referenced underlying asset. When the Fund invests in ETNs it will bear its proportionate share of any fees and expenses borne by the ETN. The Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market. In addition, although an ETN may be listed on an exchange, the issuer may not be required to maintain the listing and there can be no assurance that a secondary market will exist for an ETN.</p>

	<p>ETNs are subject to tax risk. No assurance can be given that the IRS will accept, or a court will uphold, how the Fund characterizes and treats ETNs for tax purposes. Further, the IRS and Congress are considering proposals that would change the timing and character of income and gains from ETNs.</p> <p>An ETN that is tied to a specific market benchmark or strategy may not be able to replicate and maintain exactly the composition and relative weighting of securities, commodities or other components in the applicable market benchmark or strategy. Some ETNs that use leverage can, at times, be relatively illiquid and, thus, they may be difficult to purchase or sell at a fair price. Leveraged ETNs are subject to the same risk as other instruments that use leverage in any form.</p> <p>The market value of ETN shares may differ from that of their market benchmark or strategy. This difference in price may be due to the fact that the supply and demand in the market for ETN shares at any point in time is not always identical to the supply and demand in the market for the securities, commodities or other components underlying the market benchmark or strategy that the ETN seeks to track. As a result, there may be times when an ETN share trades at a premium or discount to its market benchmark or strategy.</p>
Fixed-Income Securities	<p>Fixed-income securities are used by issuers to borrow money. Fixed-income securities include bonds, preferred, preference and convertible securities, notes, debentures, asset-backed securities (including those backed by mortgages), loan participations and assignments, equipment lease certificates, equipment trust certificates and conditional sales contracts. Generally, issuers of fixed-income securities pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Some fixed-income securities, such as zero coupon bonds, do not pay current interest, but are purchased at a discount from their face values, and values accumulate over time to face value at maturity. The market prices of fixed-income securities fluctuate depending on such factors as interest rates, credit quality and maturity. In general, market prices of fixed-income securities decline when interest rates rise and increase when interest rates fall. Fixed-income securities are subject to risk factors such as sensitivity to interest rate and real or perceived changes in economic conditions, payment expectations, liquidity and valuation. Fixed-income securities with longer maturities (for example, over ten years) are more affected by changes in interest rates and provide less price stability than securities with short-term maturities (for example, one to ten years). Fixed-income securities bear the risk of principal and interest default by the issuer, which will be greater with higher yielding, lower grade securities. During an economic downturn, the ability of issuers to service their debt may be impaired. The rating assigned to a fixed-income security by a rating agency does not reflect assessment of the volatility of the security's market value or of the liquidity of an investment in the securities. Credit ratings are based largely on the issuer's historical financial condition and a rating agency's investment analysis at the time of rating, and the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition. Credit quality can change from time to time, and recently issued credit ratings may not fully reflect the actual risks posed by a particular high yield security. If relevant to the Fund(s) in this SAI, corporate bond ratings are described in an appendix to the SAI (see the table of contents). While typically paying a fixed rate of income, preferred securities may be considered to be equity securities for purposes of the Fund's investment restrictions.</p>
Foreign Currency Transactions	<p>As measured in U.S. dollars, the value of assets denominated in foreign currencies may be affected favorably or unfavorably by changes in foreign currency rates and exchange control regulations. Currency exchange rates can also be affected unpredictably by intervention by U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad. Foreign currency exchange transactions may be conducted on a spot (<i>i.e.</i>, cash) basis at the spot rate prevailing in the foreign currency exchange market or through entering into derivative currency transactions (see "Forward Foreign Currency Exchange Contracts," "Option Contracts," "Futures Contracts" and "Swap Agreements - Currency Swaps" herein). Currency transactions are subject to the risk of a number of complex political and economic factors applicable to the countries issuing the underlying currencies. Furthermore, unlike trading in most other types of instruments, there is no systematic reporting of last sale information with respect to the foreign currencies underlying the derivative currency transactions. As a result, available information may not be complete. In an over-the-counter trading environment, there are no daily price fluctuation limits.</p>

Foreign Investments

Investing in securities issued by companies whose principal business activities are outside the United States may involve significant risks not present in domestic investments. For example, because foreign companies may not be subject to uniform accounting, auditing and financial reporting standards, practices and requirements and regulatory measures comparable to those applicable to U.S. companies, there may be less publicly available information about a foreign company than about a domestic company. Volume and liquidity in most foreign debt markets is less than in the United States and securities of some foreign companies are less liquid and more volatile than securities of comparable U.S. companies. There is generally less government supervision and regulation of securities exchanges, broker-dealers and listed companies than in the United States. In addition, with respect to certain foreign countries, there is the possibility of nationalization, expropriation or confiscatory taxation, currency blockage, political or social instability, or diplomatic developments, which could affect investments in those countries. Any of these actions could adversely affect securities prices, impair the Fund's ability to purchase or sell foreign securities, or transfer the Fund's assets or income back to the United States, or otherwise adversely affect Fund operations. In the event of nationalization, expropriation or confiscation, the Fund could lose its entire investment in that country.

Other potential foreign market risks include exchange controls, difficulties in valuing securities, defaults on foreign government securities, and difficulties of enforcing favorable legal judgments in foreign courts. Moreover, individual foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, reinvestment of capital, rate of inflation, capital reinvestment, resource self-sufficiency, and balance of payments position. Certain economies may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. Foreign securities markets, while growing in volume and sophistication, are generally not as developed as those in the United States. Foreign countries may not have the infrastructure or resources to respond to natural and other disasters that interfere with economic activities, which may adversely affect issuers located in such countries.

Settlement and clearance procedures in certain foreign markets differ significantly from those in the United States. Payment for securities before delivery may be required and in some countries delayed settlements are customary, which increases the Fund's risk of loss. The Fund generally holds its foreign securities and related cash in foreign banks and securities depositories. Some foreign banks and securities depositories may be recently organized or new to the foreign custody business. In addition, there may be limited or no regulatory oversight over their operations. Also, the laws of certain countries may put limits on the Fund's ability to recover its assets if a foreign bank, depository or issuer of a security or any of their agents goes bankrupt. Certain countries may require withholding on dividends paid on portfolio securities and on realized capital gains.

In addition, it is often more expensive to buy, sell and hold securities in certain foreign markets than in the United States. Foreign brokerage commissions are generally higher than commissions on securities traded in the United States and may be non-negotiable. The fees paid to foreign banks and securities depositories generally are higher than those charged by U.S. banks and depositories. The increased expense of investing in foreign markets reduces the amount earned on investments and typically results in a higher operating expense ratio for the Fund as compared to investment companies that invest only in the United States.

Depository receipts (including American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs")) are certificates evidencing ownership of shares of a foreign issuer and are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, they continue to be subject to many of the risks associated with investing directly in foreign securities. These risks include the political and economic risks of the underlying issuer's country, as well as in the case of depository receipts traded on foreign markets, exchange risk. Depository receipts may be sponsored or unsponsored. Unsponsored depository receipts are established without the participation of the issuer. As a result, available information concerning the issuer of an unsponsored depository receipt may not be as current as for sponsored depository receipts, and the prices of unsponsored depository receipts may be more volatile than if such instruments were sponsored by the issuer. Unsponsored depository receipts may involve higher expenses, may not pass through voting or other shareholder rights and they may be less liquid.

	<p>Unless other wise provided in the Fund’ s prospectus, in determining the domicile of an issuer, the investment adviser may consider the domicile determination of the Fund’ s benchmark index or a leading provider of global indexes and may take into account such factors as where the company’ s securities are listed, and where the company is legally organized, maintains principal corporate offices and/or conducts its principal operations.</p>
Forward Foreign Currency Exchange Contracts	<p>See also “Derivative Instruments and Related Risks” herein. A forward foreign currency exchange contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts may be bought or sold to protect against an adverse change in the relationship between currencies or to increase exposure to a particular foreign currency. Cross-hedging may be done by using forward contracts in one currency (or basket of currencies) to hedge against fluctuations in the value of instruments denominated in a different currency (or the basket of currencies and the underlying currency). Use of a different foreign currency (for hedging or non-hedging purposes) magnifies exposure to foreign currency exchange rate fluctuations. Forward foreign currency exchange contracts are individually negotiated and privately traded so they are dependent upon the creditworthiness of the counterparty. The precise matching of the forward contract amounts and the value of the instruments denominated in the corresponding currencies will not generally be possible. In addition, it may not be possible to hedge against long-term currency changes.</p> <p>When a currency is difficult to hedge or to hedge against the dollar, the Fund may enter into a forward contract to sell a currency whose changes in value are generally considered to be linked to such currency. Currency transactions can result in losses if the currency being hedged fluctuates in value to a degree or in a direction that is not anticipated. In addition, there is the risk that the perceived linkage between various currencies may not be present or may not be present during the particular time the hedge is in place. If the Fund purchases a bond denominated in a foreign currency with a higher interest rate than is available on U.S. bonds of a similar maturity, the additional yield on the foreign bond could be substantially reduced or lost if the Fund were to enter into a direct hedge by selling the foreign currency and purchasing the U.S. dollar.</p> <p>Some of the forward foreign currency exchange contracts may be classified as non-deliverable forwards (“NDFs”). NDFs are cash-settled, forward contracts that may be thinly traded. NDFs are commonly quoted for time periods of one month up to two years, and are normally quoted and settled in U.S. dollars, but may be settled in other currencies. They are often used to gain exposure to or hedge exposure to foreign currencies that are not internationally traded. NDFs may also be used to gain or hedge exposure to gold.</p>
Forward Rate Agreements	<p>See also “Derivative Instruments and Related Risks” herein. Under a forward rate agreement, the buyer locks in an interest rate at a future settlement date. If the interest rate on the settlement date exceeds the lock rate, the buyer pays the seller the difference between the two rates. If the lock rate exceeds the interest rate on the settlement date, the seller pays the buyer the difference between the two rates. Any such gain received by the Fund would be taxable. These instruments are traded in the OTC market.</p>
Fund Investing in a Portfolio	<p>The Board may discontinue the Fund’ s investment in one or more Portfolios if it determines that it is in the best interest of the Fund and its shareholders to do so. In such an event, the Board would consider what action might be taken, including investing Fund assets in another pooled investment entity or retaining an investment adviser to manage Fund assets in accordance with its investment objective(s). The Fund’ s investment performance and expense ratio may be affected if its investment structure is changed or if another Portfolio investor withdraws all or a portion of its investment in the Portfolio.</p>

Futures Contracts	<p>See also “Derivative Instruments and Related Risks” herein. Future contracts are standardized contracts that obligate a purchaser to take delivery, and a seller to make delivery, of a specific amount of the underlying reference instrument at a specified future date at a specified price. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the underlying asset. Upon purchasing or selling a futures contract, a purchaser or seller is required to deposit collateral (initial margin). Each day thereafter until the futures position is closed, the purchaser or seller will pay additional margin (variation margin) representing any loss experienced as a result of the futures position the prior day or be entitled to a payment representing any profit experienced as a result of the futures position the prior day. A public market exists in futures contracts covering a number of indexes as well as financial instruments and foreign currencies. It is expected that other futures contracts will be developed and traded in the future. In computing daily net asset value, the Fund will mark to market its open futures positions. The Fund is also required to deposit and maintain margin with respect to put and call options on futures contracts written by it. Futures contracts are traded on exchanges or boards of trade that are licensed by the CFTC and must be executed through a futures commission merchant or brokerage firm that is a member of the relevant exchange or board.</p> <p>Although some futures contracts call for making or taking delivery of the underlying reference instrument, generally these obligations are closed out prior to delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument or commodity with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss.</p>
Global Natural Resources Companies	To the extent described in the Prospectus, the Fund may concentrate its investments in global natural resources companies.
Health Sciences Companies	To the extent described in the Prospectus, the Fund may concentrate its investments in health sciences companies.
High Yield Securities	<p>High yield securities (commonly referred to as “junk bonds”) are considered to be of below investment grade quality and generally provide greater income potential and/or increased opportunity for capital appreciation than investments in higher quality debt securities but they also typically entail greater potential price volatility and principal and income risk. High yield securities may be subject to higher risk and include certain corporate debt obligations, higher yielding preferred securities and mortgage-related securities, and securities convertible into the foregoing. They are regarded as predominantly speculative with respect to the entity’s continuing ability to meet principal and interest payments. Also, their yields and market values may fluctuate more than higher rated securities. Fluctuations in value do not affect the cash income from the securities, but are reflected in the Fund’s net asset value. The greater risks and fluctuations in yield and value occur, in part, because investors generally perceive issuers of lower rated and unrated securities to be less creditworthy. The secondary market on which high yield securities are traded may be less liquid than the market for higher grade securities.</p>
Hybrid Instruments	<p>A hybrid instrument is a type of potentially high-risk derivative that combines a traditional stock, bond, or commodity with an option or forward contract. Generally, the principal amount, amount payable upon maturity or redemption, or interest rate of a hybrid is tied (positively or negatively) to the price of some commodity, currency or securities index or another interest rate or some other economic factor (each a “benchmark”). The interest rate or (unlike most fixed-income securities) the principal amount payable at maturity of a hybrid security may be increased or decreased, depending on changes in the value of the benchmark. An example of a hybrid instrument is a bond issued by an oil company that pays a small base level of interest with additional interest that accrues in correlation to the extent to which oil prices exceed a certain predetermined level. Such a hybrid instrument would be a combination of a bond and a call option on oil.</p>

The risks of investing in hybrid instruments reflect a combination of the risks of investing in securities, options, futures and currencies. An investment in a hybrid instrument may entail significant risks that are not associated with a similar investment in a traditional debt instrument that has a fixed principal amount, is denominated in U.S. dollars or bears interest either at a fixed rate or a floating rate determined by reference to a common, nationally published benchmark. The risks of a particular hybrid instrument will depend upon the terms of the instrument, but may include the possibility of significant changes in the benchmark(s) or the prices of the underlying assets to which the instrument is linked. Such risks generally depend upon factors unrelated to the operations or credit quality of the issuer of the hybrid instrument, which may not be foreseen by the purchaser, such as economic and political events, the supply and demand of the underlying assets and interest rate movements. Hybrid instruments may be highly volatile and their use by the Fund may not be successful. Hybrid instruments may also carry liquidity risk since the instruments are often “customized” to meet the portfolio needs of a particular investor, and therefore, the number of investors that are willing and able to buy such instruments in the secondary market may be smaller than that for more traditional debt securities.

Hybrid instruments may bear interest or pay preferred dividends at below market (or even relatively nominal) rates. Alternatively, hybrid instruments may bear interest at above market rates but bear an increased risk of principal loss (or gain). The latter scenario may result if “leverage” is used to structure the hybrid instrument. Leverage risk occurs when the hybrid instrument is structured so that a given change in a benchmark or underlying asset is multiplied to produce a greater value change in the hybrid instrument, thereby magnifying the risk of loss as well as the potential for gain.

Hybrid instruments are potentially more volatile and carry greater market risks than traditional debt instruments. Depending on the structure of the particular hybrid instrument, changes in a benchmark may be magnified by the terms of the hybrid instrument and have an even more dramatic and substantial effect upon the value of the hybrid instrument. Also, the prices of the hybrid instrument and the benchmark or underlying asset may not move in the same direction or at the same time.

Hybrids can be used as an efficient means of pursuing a variety of investment goals, including currency hedging, duration management, and increased total return and creating exposure to a particular market or segment of that market. The value of a hybrid or its interest rate may be a multiple of a benchmark and, as a result, may be leveraged and move (up or down) more steeply and rapidly than the benchmark. These benchmarks may be sensitive to economic and political events, such as commodity shortages and currency devaluations, which cannot be readily foreseen by the purchaser of a hybrid. Under certain conditions, the redemption value of a hybrid could be zero. The purchase of hybrids also exposes the Fund to the credit risk of the issuer of the hybrids. These risks may cause significant fluctuations in the net asset value of the Fund.

Certain hybrid instruments may provide exposure to the commodities markets. These are derivative securities with one or more commodity-linked components that have payment features similar to commodity futures contracts, commodity options, or similar instruments. Commodity-linked hybrid instruments may be either equity or debt securities, leveraged or unleveraged, and are considered hybrid instruments because they have both security and commodity-like characteristics. A portion of the value of these instruments may be derived from the value of a commodity, futures contract, index or other economic variable. The Fund will only invest in commodity-linked hybrid instruments that qualify under applicable rules of the CFTC for an exemption from the provisions of the CEA. Certain issuers of structured products such as hybrid instruments may be deemed to be investment companies as defined in the 1940 Act. As a result, the Fund’s investments in these products may be subject to limits applicable to investments in investment companies and may be subject to restrictions contained in the 1940 Act.

Illiquid Securities

Illiquid securities include securities legally restricted as to resale, and may include commercial paper issued pursuant to Section 4(2) of the 1933 Act and securities eligible for resale pursuant to Rule 144A thereunder. Section 4(2) and Rule 144A securities may, however, be treated as liquid by the investment adviser pursuant to procedures adopted by the Board, which require consideration of factors such as trading activity, availability of market quotations and number of dealers willing to purchase the security. Even if determined to be liquid, Rule 144A securities may increase the level of portfolio illiquidity if eligible buyers become uninterested in purchasing such securities.

	<p>It may be difficult to sell illiquid securities at a price representing fair value until such time as the securities may be sold publicly. It also may be more difficult to determine the fair value of such securities for purposes of computing the Fund's net asset value. Where registration is required, a considerable period of time may elapse between a decision to sell the securities and the time when it would be permitted to sell. Thus, the Fund may not be able to obtain as favorable a price as that prevailing at the time of the decision to sell. The Fund may incur additional expense when disposing of illiquid securities, including all or a portion of the cost to register the securities. The Fund also may acquire securities through private placements under which it may agree to contractual restrictions on the resale of such securities that are in addition to applicable legal restrictions. Such restrictions might prevent the sale of such securities at a time when such sale would otherwise be desirable.</p> <p>At times, a portion of the Fund's assets may be invested in securities as to which the Fund, by itself or together with other accounts managed by the investment adviser and its affiliates, holds a major portion or all of such securities. Under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, the Fund could find it more difficult to sell such securities when the investment adviser believes it advisable to do so or may be able to sell such securities only at prices lower than if such securities were more widely held. It may also be more difficult to determine the fair value of such securities for purposes of computing the Fund's net asset value.</p>
Indexed Securities	<p>See also "Derivative Instruments and Related Risks" herein. Indexed securities are securities that fluctuate in value with an index. The interest rate or, in some cases, the principal payable at the maturity of an indexed security may change positively or inversely in relation to one or more interest rates, financial indices, securities prices or other financial indicators ("reference prices"). An indexed security may be leveraged to the extent that the magnitude of any change in the interest rate or principal payable on an indexed security is a multiple of the change in the reference price. Thus, indexed securities may decline in value due to adverse market changes in reference prices. Because indexed securities derive their value from another instrument, security or index, they are considered derivative debt securities, and are subject to different combinations of prepayment, extension, interest rate and/or other market risks. Indexed securities may include interest only ("IO") and principal only ("PO") securities, floating rate securities linked to the Cost of Funds Index ("COFI floaters"), other "lagging rate" floating securities, floating rate securities that are subject to a maximum interest rate ("capped floaters"), leveraged floating rate securities ("super floaters"), leveraged inverse floating rate securities ("inverse floaters"), dual index floaters, range floaters, index amortizing notes and various currency indexed notes. Indexed securities may be issued by the U.S. Government or one of its agencies or instrumentalities or, if privately issued, collateralized by mortgages that are insured, guaranteed or otherwise backed by the U.S. Government, its agencies or instrumentalities.</p>
Inflation-Indexed (or Inflation-Linked) Bonds	<p>Inflation-indexed bonds are fixed-income securities the principal value of which is periodically adjusted according to the rate of inflation. Inflation-indexed bonds are issued by governments, their agencies or instrumentalities and corporations. Two structures are common: The U.S. Treasury and some other issuers use a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the inflation accruals as part of a semiannual coupon. The principal amount of an inflation-indexed bond is adjusted in response to changes in the level of inflation. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds, and therefore, the principal amount of such bonds cannot be reduced below par even during a period of deflation. However, the current market value of these bonds is not guaranteed and will fluctuate, reflecting the risk of changes in their yields. In certain jurisdictions outside the United States, the repayment of the original bond principal upon the maturity of an inflation-indexed bond is not guaranteed, allowing for the amount of the bond repaid at maturity to be less than par. The interest rate for inflation-indexed bonds is fixed at issuance as a percentage of this adjustable principal. Accordingly, the actual interest income may both rise and fall as the principal amount of the bonds adjusts in response to movements in the Consumer Price Index.</p>

	<p>The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds. While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.</p>
<p>Investments in the Subsidiary</p>	<p>The Subsidiary is organized under the laws of the Cayman Islands, and is overseen by a sole director affiliated with Eaton Vance. The Fund is the sole shareholder of the Subsidiary, and it is not currently expected that shares of the Subsidiary will be sold or offered to other investors. The Subsidiary expects to invest primarily in commodity-linked derivative instruments, including swap agreements, commodity options, futures and options on futures, backed by a portfolio of inflation-indexed securities and other fixed-income securities and is also permitted to invest in any other investments permitted by the Fund. To the extent that the Fund invests in the Subsidiary, the Fund will be subject to the risks associated with those derivative instruments and other securities, which are discussed elsewhere in the Prospectus and this SAI.</p> <p>While the Subsidiary may be operated similarly to the Fund, it is not registered under the 1940 Act and, unless otherwise noted in the Prospectus and this SAI, is not subject to the investor protections of the 1940 Act and other U.S. regulations. Changes in the laws of the U.S. and/or the Cayman Islands could result in the inability of the Fund and/or the Subsidiary to operate as described in the Prospectus and this SAI and could negatively affect the Fund and its shareholders.</p>
<p>Junior Loans</p>	<p>Secured and unsecured subordinated loans, second lien loans and subordinated bridge loans (“Junior Loans”) are generally second in line in terms of repayment priority. A second lien loan may have a claim on the same collateral pool as the first lien or it may be secured by a separate set of assets. Second lien loans generally give investors priority over general unsecured creditors in the event of an asset sale.</p> <p>Bridge loans or bridge facilities are short-term loan arrangements (e.g., 12 to 18 months) typically made by a borrower in anticipation of intermediate-term or long-term permanent financing. Most bridge loans are structured as floating-rate debt with step-up provisions under which the interest rate on the bridge loan rises the longer the loan remains outstanding and may be converted into senior exchange notes if the loan has not been prepaid in full on or prior to its maturity date. Bridge loans may be subordinate to other debt and may be secured or unsecured. Bridge loans are generally made with the expectation that the borrower will be able to obtain permanent financing in the near future. Any delay in obtaining permanent financing subjects the bridge loan investor to increased risk. A borrower with an outstanding bridge loan may be unable to locate permanent financing to replace the bridge loan, which may impair the borrower's perceived creditworthiness. From time to time, the Fund may make a commitment to participate in a bridge loan facility, obligating itself to participate in the facility if it funds. In return for this commitment, the Fund receives a fee.</p> <p>Junior Loans, which may be purchased either in the form of an assignment or a loan participation are subject to the same general risks inherent to any loan investment. Due to their lower place in the borrower's capital structure and possible unsecured status, Junior Loans involve a higher degree of overall risk than Senior Loans of the same borrower.</p>
<p>Liquidity or Protective Put Agreements</p>	<p>See also “Derivative Instruments and Related Risks” herein. The Fund may enter into a separate agreement with the seller of an instrument or some other person granting the Fund the right to put the instrument to the seller thereof or the other person at an agreed upon price. Interest income generated by certain municipal bonds with put or demand features may be taxable.</p>

Loan Facility	<p>Senior Debt Portfolio may employ borrowings and leverage as described in the prospectus. The Portfolio has entered into a commercial paper program and liquidity facility subject to the terms of an Order of the SEC (Release No. 26320) granting an exemption from Section 18(f)(1) of the 1940 Act. The program, administered by Citicorp North America, Inc., is with certain conduit lenders who issue commercial paper, in an amount up to \$640 million through which the Portfolio employs leverage pursuant to its investment guidelines and subject to the risks described in the Prospectus. Under the terms of the program, the Portfolio pays an annual fee equal to 0.65% on its outstanding borrowings for the administration of the program and an annual fee of either 0.35% or 0.45% on the total commitment amount depending on the amount of outstanding borrowings, as well as interest on advances under the program.</p>
Master Limited Partnerships (“MLPs”)	<p>MLPs are publicly-traded limited partnership interests or units. An MLP that invests in a particular industry (e.g., oil and gas) will be harmed by detrimental economic events within that industry. As partnerships, MLPs may be subject to less regulation (and less protection for investors) under state laws than corporations. In addition, MLPs may be subject to state taxation in certain jurisdictions, which may reduce the amount of income paid by an MLP to its investors.</p>
Mortgage-Backed Securities (“MBS”)	<p>MBS are “pass through” securities, meaning that a pro rata share of regular interest and principal payments, as well as unscheduled early prepayments, on the underlying mortgage pool is passed through monthly to the holder. MBS may include conventional mortgage pass through securities, participation interests in pools of adjustable and fixed rate mortgage loans, stripped mortgage-backed securities (described herein), floating rate mortgage-backed securities and certain classes of multiple class CMOs. MBS pay principal to the holder over their term, which differs from other forms of debt securities that normally provide for principal payment at maturity or specified call dates. MBS are subject to the general risks associated with investing in real estate securities; that is, they may lose value if the value of the underlying real estate to which a pool of mortgages relates declines. In addition, investments in MBS involve certain specific risks, including the failure of a party to meet its commitments under the related operative documents, adverse interest rate changes and the effects of prepayments on mortgage cash flows. Certain MBS may be purchased on a when-issued basis subject to certain limitations and requirements.</p> <p>There are currently three types of MBS: (1) those issued by the U.S. Government or one of its agencies or instrumentalities, such as the Government National Mortgage Association (“GNMA”), the Federal National Mortgage Association (“FNMA”) and the Federal Home Loan Mortgage Corporation (“FHLMC”); (2) those issued by private issuers that represent an interest in or are collateralized by pass through securities issued or guaranteed by the U.S. Government or one of its agencies or instrumentalities; and (3) those issued by private issuers that represent an interest in or are collateralized by whole mortgage loans or pass through securities without a government guarantee but that usually have some form of private credit enhancement. Privately issued MBS are structured similar to GNMA, FNMA and FHLMC MBS, and are issued by originators or and investors in mortgage loans, including depository institutions mortgage banks and special purpose subsidiaries of the foregoing.</p> <p>GNMA Certificates and FNMA Mortgage-Backed Certificates are MBS representing part ownership of a pool of mortgage loans. GNMA loans (issued by lenders such as mortgage bankers, commercial banks and savings and loan associations) are either insured by the Federal Housing Administration or guaranteed by the Veterans Administration. A pool of such mortgages is assembled and, after being approved by GNMA, is offered to investors through securities dealers. Once such pool is approved by GNMA, the timely payment of interest and principal on the Certificates issued representing such pool is guaranteed by the full faith and credit of the U.S. Government. GNMA is a wholly owned U.S. Government corporation within the Department of Housing and Urban Development. FNMA, a federally chartered corporation owned entirely by private stockholders, purchases both conventional and federally insured or guaranteed residential mortgages from various entities, including savings and loan associations, savings banks, commercial banks, credit unions and mortgage bankers, and packages pools of such mortgages in the form of pass-through securities generally called FNMA Mortgage-Backed Certificates, which are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the U.S. Government; however, they are supported by the right of FNMA to borrow from the U.S. Treasury Department.</p>

	<p>FHLMC, a corporate instrumentality of the U.S. Government created by Congress for the purposes of increasing the availability of mortgage credit for residential housing, issues participation certificates (“PCs”) representing undivided interest in FHLMC’s mortgage portfolio. While FHLMC guarantees the timely payment of interest and ultimate collection of the principal of its PCs, its PCs are not backed by the full faith and credit of the U.S. Government. FHLMC PCs differ from GNMA Certificates in that the mortgages underlying the PCs are monthly “conventional” mortgages rather than mortgages insured or guaranteed by a federal agency or instrumentality. However, in several other respects, such as the monthly pass-through of interest and principal (including unscheduled prepayments) and the unpredictability of future unscheduled prepayments on the underlying mortgage pools, FHLMC PCs are similar to GNMA Certificates. See also “Events Regarding FNMA and FHLMC” herein.</p> <p>While it is not possible to accurately predict the life of a particular issue of MBS, the actual life of any such security is likely to be substantially less than the final maturities of the mortgage loans underlying the security. This is because unscheduled early prepayments of principal on MBS will result from the prepayment, refinancings or foreclosure of the underlying mortgage loans in the mortgage pool. Prepayments of MBS may not be able to be reinvested at the same interest rate. Because of the regular scheduled payments of principal and the early unscheduled prepayments of principal, MBS is less effective than other types of obligations as a means of “locking-in” attractive long-term interest rates. As a result, this type of security may have less potential for capital appreciation during periods of declining interest rates than other U.S. Government securities of comparable maturities, although many issues of MBS may have a comparable risk of decline in market value during periods of rising interest rates. If MBS is purchased at a premium above its par value, a scheduled payment of principal and an unscheduled prepayment of principal, which would be made at par, will accelerate the realization of a loss equal to that portion of the premium applicable to the payment or prepayment. If MBS has been purchased at a discount from its par value, both a scheduled payment of principal and an unscheduled prepayment of principal will increase current returns and will accelerate the recognition of income, which, when distributed to Fund shareholders, will be taxable as ordinary income.</p>
Mortgage Dollar Rolls	<p>In a mortgage dollar roll, the Fund sells MBS for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type, coupon and maturity) MBS on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the MBS. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the “drop”) as well as by the interest earned on the cash proceeds of the initial sales. A “covered roll” is a specific type of dollar roll for which there is an offsetting cash position or a cash equivalent security position which matures on or before the forward settlement date of the dollar roll transaction. The Fund will only enter into covered rolls. Covered rolls are not treated as a borrowing or other senior security and will be excluded from the calculation of the Fund’s borrowings and other senior securities.</p>
Municipal Lease Obligations (“MLOs”)	<p>MLOs are obligations in the form of a lease, installment purchase or conditional sales contract (which typically provide for the title to the leased asset to pass to the governmental issuer) that is issued by state or local governments to acquire equipment and facilities. Interest income from MLOs is generally exempt from local and state taxes in the state of issuance. MLOs, like other municipal debt obligations, are subject to the risk of non-payment. Although MLOs do not constitute general obligations of the issuer for which the issuer’s unlimited taxing power is pledged, a lease obligation is frequently backed by the issuer’s covenant to budget for, appropriate and make the payments due under the lease obligation. However, certain lease obligations contain “non-appropriation” clauses, which provide that the issuer has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. Although “non-appropriation” lease obligations may be secured by the leased property, disposition of the property in the event of foreclosure might prove difficult. Participations in municipal leases are undivided interests in a portion of the total obligation. Participations entitle their holders to receive a pro rata share of all payments under the lease.</p>

MLOs and participations therein represent a type of financing that may not have the depth of marketability associated with more conventional securities and, as such, they may be less liquid than conventional securities. Certain MLOs may be deemed illiquid for the purpose of the Fund's limitation on investments in illiquid securities, unless determined by the investment adviser, pursuant to guidelines adopted by the Board, to be liquid securities. The investment adviser will consider a MLO to be liquid if it is rated investment grade (being an MLO rated BBB or Baa or higher) by a nationally recognized statistical ratings organization or is insured by an insurer rated investment grade. If an MLO or participation does not meet the foregoing criteria, then the investment adviser will consider the MLO to be illiquid unless it conducts an analysis of relevant factors and concludes that the MLO is liquid. In conducting such an analysis, the investment adviser will consider the factors it believes are relevant to the marketability of the obligation, to the extent that information regarding such factor is available to the investment adviser and pertinent to the liquidity determination, which may include: (1) the willingness of dealers to bid for the obligation; (2) the number of dealers willing to purchase or sell the obligation and the number of other potential buyers; (3) the frequency of trades and quotes for the obligation; (4) the nature of the marketplace trades, including the time needed to dispose of the obligation, the method of soliciting offers, and the mechanics of transfer; (5) the willingness of the governmental issuer to continue to appropriate funds for the payment of the obligation; (6) how likely or remote an event of non-appropriation may be, which depends in varying degrees on a variety of factors, including those relating to the general creditworthiness of the governmental issuer, its dependence on its continuing access to the credit markets, and the importance to the issuer of the equipment, property or facility covered by the lease or contract; (7) an assessment of the likelihood that the lease may or may not be cancelled; and (8) other factors and information unique to the obligation in determining its liquidity.

The ability of issuers of MLOs to make timely lease payments may be adversely impacted in general economic downturns and as relative governmental cost burdens are allocated and reallocated among federal, state and local governmental units. Such non-payment would result in a reduction of income from and value of the obligation. Issuers of MLOs might seek protection under the bankruptcy laws. In the event of bankruptcy of such an issuer, holders of MLOs could experience delays and limitations with respect to the collection of principal and interest on such MLOs and may not, in all circumstances, be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in lease payments, the Fund might take possession of and manage the assets securing the issuer's obligations on such securities or otherwise incur costs to protect its right, which may increase the Fund's operating expenses and adversely affect the net asset value of the Fund. When the lease contains a non-appropriation clause, however, the failure to pay would not be a default and the Fund would not have the right to take possession of the assets. Any income derived from the Fund's ownership or operation of such assets may not be tax-exempt.

Municipal Obligations

Municipal obligations include debt obligations issued to obtain funds for various public purposes, including the construction of a wide range of public facilities, refunding of outstanding obligations and obtaining funds for general operating expenses and loans to other public institutions and facilities. Certain types of bonds are issued by or on behalf of public authorities to finance various privately owned or operated facilities, including certain facilities for the local furnishing of electric energy or gas, sewage facilities, solid waste disposal facilities and other specialized facilities. Municipal obligations include bonds as well as tax-exempt commercial paper, project notes and municipal notes such as tax, revenue and bond anticipation notes of short maturity, generally less than three years. While most municipal bonds pay a fixed rate of interest semiannually in cash, there are exceptions. Some bonds pay no periodic cash interest, but rather make a single payment at maturity representing both principal and interest. Some bonds may pay interest at a variable or floating rate. Bonds may be issued or subsequently offered with interest coupons materially greater or less than those then prevailing, with price adjustments reflecting such deviation. Municipal obligations also include trust certificates representing interests in municipal securities held by a trustee. The trust certificates may evidence ownership of future interest payments, principal payments or both on the underlying securities.

In general, there are three categories of municipal obligations, the interest on which is exempt from federal income tax and is not a tax preference item for purposes of the alternative minimum tax ("AMT"): (i) certain "public purpose" obligations (whenever issued), which include obligations issued directly by state and local governments or their agencies to fulfill essential governmental functions; (ii) certain obligations issued before August 8, 1986 for the benefit of non-governmental persons or entities; and (iii) certain "private activity bonds" issued after August 7, 1986 which include "qualified Section 501(c)(3) bonds" or refundings of certain obligations included in the second category. Opinions relating to the validity of municipal bonds, exclusion of municipal bond interest from an investor's gross income for federal income tax purposes and, where applicable, state and local income tax, are rendered by bond counsel to the issuing authorities at the time of issuance.

Interest on certain "private activity bonds" issued after August 7, 1986 is exempt from regular federal income tax, but such interest (including a distribution by the Fund derived from such interest) is treated as a tax preference item which could subject the recipient to or increase the recipient's liability for the AMT. For corporate shareholders, the Fund's distributions derived from interest on all municipal obligations (whenever issued) are included in "adjusted current earnings" for purposes of the AMT as applied to corporations (to the extent not already included in alternative minimum taxable income as income attributable to private activity bonds).

The two principal classifications of municipal bonds are "general obligation" and "revenue" bonds. Issuers of general obligation bonds include states, counties, cities, towns and regional districts. The proceeds of these obligations are used to fund a wide range of public projects, including the construction or improvement of schools, highways and roads, water and sewer systems and a variety of other public purposes. The basic security of general obligation bonds is the issuer's pledge of its faith, credit, and taxing power for the payment of principal and interest. The taxes that can be levied for the payment of debt service may be limited or unlimited as to rate and amount.

Typically, the only security for a limited obligation or revenue bond is the net revenue derived from a particular facility or class of facilities financed thereby or, in some cases, from the proceeds of a special tax or other special revenues. Revenue bonds have been issued to fund a wide variety of revenue-producing public capital projects including: electric, gas, water and sewer systems; highways, bridges and tunnels; port and airport facilities; colleges and universities; hospitals; and convention, recreational, tribal gaming and housing facilities. Although the security behind these bonds varies widely, many lower rated bonds provide additional security in the form of a debt service reserve fund that may also be used to make principal and interest payments on the issuer's obligations. In addition, some revenue obligations (as well as general obligations) are insured by a bond insurance company or backed by a letter of credit issued by a banking institution. Revenue bonds also include, for example, pollution control, health care and housing bonds, which, although nominally issued by municipal authorities, are generally not secured by the taxing power of the municipality but by the revenues of the authority derived from payments by the private entity which owns or operates the facility financed with the proceeds of the bonds. Obligations of housing finance authorities have a wide range of security features, including reserve funds and insured or subsidized mortgages, as well as the net revenues from housing or other public projects. Many of these bonds do not generally constitute the pledge of the credit of the issuer of such bonds. The credit quality of such revenue bonds is usually directly related to the credit standing of the user of the facility being financed or of an institution which provides a guarantee, letter of credit or other credit enhancement for the bond issue. The Fund may on occasion acquire revenue bonds which carry warrants or similar rights covering equity securities. Such warrants or rights may be held indefinitely, but if exercised, the Fund anticipates that it would, under normal circumstances, dispose of any equity securities so acquired within a reasonable period of time. Investing in revenue bonds may involve (without limitation) the following risks.

Hospital bond ratings are often based on feasibility studies that contain projections of expenses, revenues and occupancy levels. A hospital's income available to service its debt may be influenced by demand for hospital services, management capabilities, the service area economy, efforts by insurers and government agencies to limit rates and expenses, competition, availability and expense of malpractice insurance, and Medicaid and Medicare funding.

Education-related bonds are comprised of two types: (i) those issued to finance projects for public and private colleges and universities, charter schools and private schools, and (ii) those representing pooled interests in student loans. Bonds issued to supply educational institutions with funding are subject to many risks, including the risks of unanticipated revenue decline, primarily the result of decreasing student enrollment, decreasing state and federal funding, or changes in general economic conditions. Additionally, higher than anticipated costs associated with salaries, utilities, insurance or other general expenses could impair the ability of a borrower to make annual debt service payments. Student loan revenue bonds are generally offered by state (or sub-state) authorities or commissions and are backed by pools of student loans. Underlying student loans may be guaranteed by state guarantee agencies and may be subject to reimbursement by the United States Department of Education through its guaranteed student loan program. Others may be private, uninsured loans made to parents or students which may be supported by reserves or other forms of credit enhancement. Cash flows supporting student loan revenue bonds are impacted by numerous factors, including the rate of student loan defaults, seasoning of the loan portfolio, and student repayment deferral periods of forbearance. Other risks associated with student loan revenue bonds include potential changes in federal legislation regarding student loan revenue bonds, state guarantee agency reimbursement and continued federal interest and other program subsidies currently in effect.

Transportation debt may be issued to finance the construction of airports, toll roads, highways, or other transit facilities. Airport bonds are dependent on the economic conditions of the airport's service area and may be affected by the business strategies and fortunes of specific airlines. They may also be subject to competition from other airports and modes of transportation. Air traffic generally follows broader economic trends and is also affected by the price and availability of fuel. Toll road bonds are also affected by the cost and availability of fuel as well as toll levels, the presence of competing roads and the general economic health of an area. Fuel costs, transportation taxes and fees, and availability of fuel also affect other transportation-related securities, as do the presence of alternate forms of transportation, such as public transportation.

Industrial development bonds are normally secured only by the revenues from the project and not by state or local government tax payments, they are subject to a wide variety of risks, many of which relate to the nature of the specific project. Generally, IDBs are sensitive to the risk of a slowdown in the economy.

Electric utilities face problems in financing large construction programs in an inflationary period, cost increases and delay occasioned by safety and environmental considerations (particularly with respect to nuclear facilities), difficulty in obtaining fuel at reasonable prices, and in achieving timely and adequate rate relief from regulatory commissions, effects of energy conservation and limitations on the capacity of the capital market to absorb utility debt.

Water and sewer revenue bonds are generally secured by the fees charged to each user of the service. The issuers of water and sewer revenue bonds generally enjoy a monopoly status and latitude in their ability to raise rates. However, lack of water supply due to insufficient rain, run-off, or snow pack can be a concern and has led to past defaults. Further, public resistance to rate increases, declining numbers of customers in a particular locale, costly environmental litigation, and Federal environmental mandates are challenges faced by issuers of water and sewer bonds.

The obligations of any person or entity to pay the principal of and interest on a municipal obligation are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors, such as the Federal Bankruptcy Act, and laws, if any, that may be enacted by Congress or state legislatures extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations. Certain bond structures may be subject to the risk that a taxing authority may issue an adverse ruling regarding tax-exempt status. There is also the possibility that as a result of adverse economic conditions (including unforeseen financial events, natural disasters and other conditions that may affect an issuer's ability to pay its obligations), litigation or other conditions, the power or ability of any person or entity to pay when due principal of and interest on a municipal obligation may be materially affected or interest and principal previously paid may be required to be refunded. There have been instances of defaults and bankruptcies involving municipal obligations which were not foreseen by the financial and investment communities. The Fund will take whatever action it considers appropriate in the event of anticipated financial difficulties, default or bankruptcy of either the issuer of any municipal obligation or of the underlying source of funds for debt service. Such action may include: (i) retaining the services of various persons or firms (including affiliates of the investment adviser) to evaluate or protect any real estate, facilities or other assets securing any such obligation or acquired by the Fund as a result of any such event; (ii) managing (or engaging other persons to manage) or otherwise dealing with any real estate, facilities or other assets so acquired; and (iii) taking such other actions as the adviser (including, but not limited to, payment of operating or similar expenses of the underlying project) may deem appropriate to reduce the likelihood or severity of loss on the fund's investment. The Fund will incur additional expenditures in taking protective action with respect to portfolio obligations in (or anticipated to be in) default and assets securing such obligations.

Historically, municipal bankruptcies have been rare and certain provisions of the U.S. Bankruptcy Code governing such bankruptcy are unclear. Further, the application of state law to municipal obligation issuers could produce varying results among the states or among municipal obligation issuers within a state. These uncertainties could have a significant impact on the prices of the municipal obligations in which the Fund invests. There could be economic, business or political developments or court decisions that adversely affect all municipal obligations in the same sector. Developments such as changes in healthcare regulations, environmental considerations related to construction, construction cost increases and labor problems, failure of healthcare facilities to maintain adequate occupancy levels, and inflation can affect municipal obligations in the same sector. As the similarity in issuers of municipal obligations held by the Fund increases, the potential for fluctuations in the Fund's share price also may increase.

The secondary market for some municipal obligations issued within a state (including issues that are privately placed with the Fund) is less liquid than that for taxable debt obligations or other more widely traded municipal obligations. No established resale market exists for certain of the municipal obligations in which the Fund may invest. The market for obligations rated below investment grade is also likely to be less liquid than the market for higher rated obligations. As a result, the Fund may be unable to dispose of these municipal obligations at times when it would otherwise wish to do so at the prices at which they are valued.

Municipal obligations that are rated below investment grade but that, subsequent to the assignment of such rating, are backed by escrow accounts containing U.S. Government obligations may be determined by the investment adviser to be of investment grade quality for purposes of the Fund's investment policies. In the case of a defaulted obligation, the Fund may incur additional expense seeking recovery of its investment. Defaulted obligations are denoted in the "Portfolio of Investments" in the "Financial Statements" included in the Fund's reports to shareholders.

The yields on municipal obligations depend on a variety of factors, including purposes of the issue and source of funds for repayment, general money market conditions, general conditions of the municipal bond market, size of a particular offering, maturity of the obligation and rating of the issue. The ratings of Moody's, S&P and Fitch represent their opinions as to the quality of the municipal obligations which they undertake to rate, and in the case of insurers, other factors including the claims-paying ability of such insurer. It should be emphasized, however, that ratings are based on judgment and are not absolute standards of quality. Consequently, municipal obligations with the same maturity, coupon and rating may have different yields while obligations of the same maturity and coupon with different ratings may have the same yield. In addition, the market price of such obligations will normally fluctuate with changes in interest rates, and therefore the net asset value of the Fund will be affected by such changes.

Option Contracts

See also "Derivative Instruments and Related Risks" herein. An option contract is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the reference instrument underlying the option (or the cash value of the index) at a specified exercise price at any time during the term of the option. The writer of an option on a security has the obligation upon exercise of the option to deliver the reference instrument (or the cash) upon payment of the exercise price or to pay the exercise price upon delivery of the reference instrument (or the cash). Upon exercise of an index option, the writer of an option on an index is obligated to pay the difference between the cash value of the index and the exercise price multiplied by the specified multiplier for the index option. Options may be "covered" meaning that party required to deliver the reference instrument if the option is exercised owns that instrument (or has set aside sufficient assets to meet its obligation to deliver the instrument). Options may be listed on an exchange or traded in the OTC market. In general, exchange-traded options have standardized exercise prices and expiration dates and may require the parties to post margin against their obligations, and the performance of the parties' obligations in connection with such options is guaranteed by the exchange or a related clearing corporation. OTC options have more flexible terms negotiated between the buyer and the seller, but generally do not require the parties to post margin and are subject to greater credit risk. OTC options also involve greater liquidity risk. The staff of the SEC takes the position that certain purchased OTC options, and assets used as cover for written OTC options, are illiquid. Derivatives on economic indicators generally are offered in an auction format and are booked and settled as OTC options. Options on futures contracts are discussed herein under "Futures Contracts."

If a written option expires unexercised, the Fund realizes a capital gain equal to the premium received at the time the option was written. If a purchased option expires unexercised, the Fund realizes a capital loss equal to the premium paid. Prior to the earlier of exercise or expiration, an exchange traded option may be closed out by an offsetting purchase or sale of an option of the same series (type, exchange, reference instrument, exercise price, and expiration). A capital gain will be realized from a closing purchase transaction if the cost of the closing option is less than the premium received from writing the option, or, if it is more, a capital loss will be realized. If the premium received from a closing sale transaction is more than the premium paid to purchase the option, the Fund will realize a capital gain or, if it is less, the Fund will realize a capital loss. The principal factors affecting the market value of a put or a call option include supply and demand, the current market price of the reference instrument in relation to the exercise price of the option, the volatility of the reference instrument, and the time

remaining until the expiration date. There can be no assurance that a closing purchase or sale transaction can be consummated when desired.

	<p>Straddles are a combination of a call and a put written on the same reference instrument. A straddle is deemed to be covered when sufficient assets are deposited to meet the Fund’s immediate obligations. The same liquid assets may be used to cover both the call and put options where the exercise price of the call and put are the same, or the exercise price of the call is higher than that of the put. The Fund may also buy and write call options on the same reference instrument to cover its obligations. Because such combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open or close. In an equity collar, the Fund simultaneously writes a call option and purchases a put option on the same instrument.</p> <p>To the extent that the Fund writes a call option on an instrument it holds and intends to use such instrument as the sole means of “covering” its obligation under the call option, the Fund has, in return for the premium on the option, given up the opportunity to profit from a price increase in the instrument above the exercise price during the option period, but, as long as its obligation under such call option continues, has retained the risk of loss should the value of the reference instrument decline. If the Fund were unable to close out such a call option, it would not be able to sell the instrument unless the option expired without exercise. Uncovered calls have speculative characteristics and are riskier than covered calls because there is no instrument or cover held by the Fund that can act as a partial hedge.</p> <p>The writer of an option has no control over the time when it may be required to fulfill its obligation under the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying reference instrument at the exercise price. If a put or call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or greater than the exercise price (in the case of a put), or remains less than or equal to the exercise price (in the case of a call), the Fund will lose the premium it paid for the option. Furthermore, if trading restrictions or suspensions are imposed on options markets, the Fund may be unable to close out a position.</p>
Option Strategy	To the extent described in the Prospectus, the Fund may utilize the Option Strategy.
Participation in the ReFlow Liquidity Program	<p>The Fund may participate in the ReFlow liquidity program, which is designed to provide an alternative liquidity source for mutual funds experiencing net redemptions of their shares. Pursuant to the program, ReFlow Fund, LLC (“ReFlow”) provides participating mutual funds with a source of cash to meet net shareholder redemptions by standing ready each business day to purchase fund shares up to the value of the net shares redeemed by other shareholders that are to settle the next business day. Following purchases of fund shares, ReFlow then generally redeems those shares when the fund experiences net sales, at the end of a maximum holding period determined by ReFlow (currently 28 days) or at other times at ReFlow’s discretion. While ReFlow holds fund shares, it will have the same rights and privileges with respect to those shares as any other shareholder. For use of the ReFlow service, a fund pays a fee to ReFlow each time it purchases fund shares, calculated by applying to the purchase amount a fee rate determined through an automated daily auction among participating mutual funds. The current minimum fee rate is 0.15% of the value of the fund shares purchased by ReFlow although the fund may submit a bid at a higher fee rate if it determines that doing so is in the best interest of fund shareholders. Such fee is allocated among a fund’s share classes based on relative net assets. ReFlow’s purchases of fund shares through the liquidity program are made on an investment-blind basis without regard to the fund’s objective, policies or anticipated performance. In accordance with federal securities laws, ReFlow is prohibited from acquiring more than 3% of the outstanding voting securities of a fund. ReFlow will purchase Class I shares (or, if applicable Class A shares) at net asset value and will not be subject to any sales charge (in the case of Class A shares), investment minimum or redemption fee applicable to such shares. ReFlow will periodically redeem its entire share position in the Fund and request that such redemption be met in kind in accordance with the Fund’s redemption-in-kind policies described under “Redeeming Shares” in the Prospectus .. Investments in a fund by ReFlow in connection with the ReFlow liquidity program are not subject to the round trip limitation described in “Restrictions on Excessive Trading and Market Timing” under “Purchasing Shares” in the Prospectus. The investment adviser believes that the program assists in stabilizing the Fund’s net assets to the benefit of the Fund and its shareholders. To the extent the Fund’s net assets do not decline, the investment adviser may also benefit.</p>

Pooled Investment Vehicles	The Fund may invest in pooled investment vehicles including other open-end or closed-end investment companies affiliated or unaffiliated with the investment adviser, exchange-traded funds (described herein) and other collective investment pools in accordance with the requirements of the 1940 Act. Closed-end investment company securities are usually traded on an exchange. The demand for the closed-end fund securities is independent of the demand for the underlying portfolio assets, and accordingly, such securities can trade at a discount from their net asset values. The Fund generally will indirectly bear its proportionate share of any management fees paid by a pooled investment vehicle in which it invests in addition to the investment advisory fee paid by the Fund.
Portfolio Turnover	A change in the securities held by the Fund is known as “portfolio turnover” and generally involves expense to the Fund, including brokerage commissions or dealer markups and other transaction costs on both the sale of securities and the reinvestment of the proceeds in other securities. If sales of portfolio securities cause the Fund to realize net short-term capital gains, such gains will be taxable as ordinary income to taxable shareholders. Portfolio turnover rate for a fiscal year is the ratio of the lesser of purchases or sales of portfolio securities to the monthly average of the value of portfolio securities – excluding securities whose maturities at acquisition were one year or less. The Fund's portfolio turnover rate is not a limiting factor when the investment adviser considers a change in the Fund's portfolio holdings. The portfolio turnover rate(s) of the Fund for recent fiscal periods is included in the Financial Highlights in the prospectus.
Preferred Securities	Preferred securities represent an equity ownership interest in the issuing corporation that has a higher claim on the assets and earnings than common stock. Preferred securities generally have a dividend that must be paid out before dividends to common stockholders and the shares usually do not have voting rights. Preferred securities involve credit risk, which is the risk that a preferred security will decline in price, or fail to pay dividends when expected, because the issuer experiences a decline in its financial status. While a part of an issuer’s equity structure, preferred securities may be considered to be fixed-income securities for purposes of the Fund’s investment restrictions.
Real Estate Investment Trusts (“REITs”)	Securities of companies in the real estate industry, such as REITs, are sensitive to factors, such as changes in: real estate values, property taxes, interest rates, cash flow of underlying real estate assets, occupancy rates, government regulations affecting zoning, land use, and rents, and the management skill and creditworthiness of the issuer. Companies in the real estate industry may also be subject to liabilities under environmental and hazardous waste laws, among others. Changes in underlying real estate values may have an exaggerated effect to the extent that REITs concentrate investments in particular geographic regions or property types. Investments in REITs may also be adversely affected by rising interest rates. By investing in REITs, the Fund will bear REIT expenses in addition to its own expenses.
Repurchase Agreements	Repurchase agreements involve the purchase of a security coupled with an agreement to resell at a specified date and price. In the event of the bankruptcy of the counterparty to a repurchase agreement, recovery of cash may be delayed. To the extent that, in the meantime, the value of the purchased securities may have decreased, a loss could result. Repurchase agreements that mature in more than seven days will be treated as illiquid. Unless the prospectus states otherwise, the terms of a repurchase agreement will provide that the value of the collateral underlying the repurchase agreement will always be at least equal to the repurchase price, including any accrued interest earned on the agreement, and will be marked to market daily.

Residual Interest Bonds	<p>The Fund may invest in residual interest bonds in a trust that holds municipal securities. The interest rate payable on a residual interest bond bears an inverse relationship to the interest rate on another security issued by the trust. Because changes in the interest rate on the other security inversely affect the interest paid on the residual interest bond, the value and income of a residual interest bond is generally more volatile than that of a fixed rate bond. Residual interest bonds have interest rate adjustment formulas which generally reduce or, in the extreme, eliminate the interest paid to the Fund when short-term interest rates rise, and increase the interest paid to the Fund when short-term interest rates fall. Residual interest bonds have varying degrees of liquidity, and the market for these securities is relatively volatile. These securities tend to underperform the market for fixed rate bonds in a rising long-term interest rate environment, but tend to outperform the market for fixed rate bonds when long-term interest rates decline. Although volatile, residual interest bonds typically offer the potential for yields exceeding the yields available on fixed rate bonds with comparable credit quality and maturity. These securities usually permit the investor to convert the floating rate to a fixed rate (normally adjusted downward), and this optional conversion feature may provide a partial hedge against rising rates if exercised at an opportune time. While residual interest bonds expose the Fund to leverage risk because they provide two or more dollars of bond market exposure for every dollar invested, they are not subject to the Fund's restrictions on borrowings.</p> <p>Under certain circumstances, the Fund may enter into a so-called shortfall and forbearance agreement with the sponsor of a residual interest bond held by the Fund. Such agreements commit the Fund to reimburse the sponsor of such residual interest bond, upon the termination of the trust issuing the residual interest bond, the difference between the liquidation value of the underlying security (which is the basis of the residual interest bond) and the principal amount due to the holders of the floating rate security issued in conjunction with the residual interest bond. Absent a shortfall and forbearance agreement, the Fund would not be required to make such a reimbursement. If the Fund chooses not to enter into such an agreement, the residual interest bond could be terminated and the Fund could incur a loss. The Fund's investments in residual interest bonds and similar securities described in the Prospectus and this SAI will not be considered borrowing for purposes of the Fund's restrictions on borrowing described herein and in the Prospectus</p>
Reverse Repurchase Agreements	<p>Under a reverse repurchase agreement, the Fund temporarily transfers possession of a portfolio instrument to another party, such as a bank or broker-dealer, in return for cash. At the same time, the Fund agrees to repurchase the instrument at an agreed upon time (normally within seven days) and price, which reflects an interest payment. The Fund may enter into a reverse repurchase agreement for various purposes, including, but not limited to, when it is able to invest the cash acquired at a rate higher than the cost of the agreement or as a means of raising cash to satisfy redemption requests without the necessity of selling portfolio assets. In a reverse repurchase agreement, any fluctuations in the market value of either the securities transferred to another party or the securities in which the proceeds may be invested would affect the market value of the Fund's assets. As a result, such transactions may increase fluctuations in the value of the Fund. Because reverse repurchase agreements may be considered to be the practical equivalent of borrowing funds, they constitute a form of leverage. Such agreements will be treated as subject to investment restrictions regarding "borrowings." If the Fund reinvests the proceeds of a reverse repurchase agreement at a rate lower than the cost of the agreement, entering into the agreement will lower the Fund's yield.</p>
Royalty Bonds	<p>To the extent described in the Prospectus, the Fund may invest in royalty bonds.</p>
Securities Lending	<p>The Fund may lend its portfolio securities to major banks, broker-dealers and other financial institutions in compliance with the 1940 Act. No lending may be made with any companies affiliated with the investment adviser. These loans earn income and are collateralized by cash, securities or letters of credit. The Fund may realize a loss if it is not able to invest cash collateral at rates higher than the costs to enter into the loan. When the loan is closed, the lender is obligated to return the collateral to the borrower. The lender could suffer a loss if the value of the collateral is below the market value of the borrowed securities or if the borrower defaults on the loan. The lender may pay reasonable finder's, lending agent, administrative and custodial fees in connection with its loans. The investment adviser may instruct the securities lending agent to terminate loans and recall securities with voting rights so that the securities may be voted in accordance with the Fund's proxy voting policy and procedures if deemed appropriate to do so.</p>

	<p>Cash collateral received by the Fund in respect of loaned securities is invested in Eaton Vance Cash Collateral Fund, LLC (“Cash Collateral Fund”), a privately offered investment company holding high quality, U.S. dollar-denominated money market instruments. The investment objective of Cash Collateral Fund is to provide as high a rate of income as may be consistent with preservation of capital and maintenance of liquidity. Although not a registered money market mutual fund, Cash Collateral Fund conducts all of its investment activities in accordance with the requirements of Rule 2a-7 under the 1940 Act. There can be no assurance that Cash Collateral Fund will be able to maintain a stable net asset value and the Fund could experience a loss of its invested collateral. Cash Collateral Fund invests in high quality, U.S. dollar-denominated money market instruments of domestic and foreign issuers, including U.S. Government securities and prime commercial paper. When appropriate, Cash Collateral Fund may also invest in other high-grade, short-term obligations, including certificates of deposit, bankers’ acceptances and other short-term securities issued by domestic or foreign banks or their subsidiaries or branches. Cash Collateral Fund may purchase securities on a when-issued basis and for future delivery by means of “forward commitments.” Cash Collateral Fund may enter into repurchase agreements. Cash Collateral Fund may invest without limit in U.S. dollar-denominated obligations of foreign issuers, including foreign banks. Cash Collateral Fund does not limit the amount of its assets that can be invested in one type of instrument or in any foreign country. Information about the portfolio holdings of Cash Collateral Fund is available on request. As compensation for its services as manager, Eaton Vance is paid a fee at a rate of 0.08% annually of the average daily net assets of Cash Collateral Fund. Eaton Vance pays all of Cash Collateral Fund’s custody, audit and other ordinary operating expenses, excluding extraordinary, non-recurring items such as expenses incurred in connection with litigation, proceedings, claims and reorganization expenses. Payments to Eaton Vance for managing Cash Collateral Fund are in addition to the investment advisory fee paid by the Fund.</p>
<p>Securities with Equity and Debt Characteristics</p>	<p>Securities may have a combination of equity and debt characteristics. These securities may at times behave more like equity than debt or vice versa. Some types of convertible bonds, preferred stocks or other preferred securities automatically convert into common stocks or other securities at a stated conversion ratio and some may be subject to redemption at the option of the issuer at a predetermined price. These securities, prior to conversion, may pay a fixed rate of interest or a dividend. Because convertible securities have both debt and equity characteristics, their values vary in response to many factors, including the values of the securities into which they are convertible, general market and economic conditions, and convertible market valuations, as well as changes in interest rates, credit spreads and the credit quality of the issuer. The prices and yields of nonconvertible preferred securities or preferred stocks generally move with changes in interest rates and the issuer’s credit quality, similar to the factors affecting debt securities. If these securities are ranked at the bottom of an issuer’s debt capital structure, they may be more sensitive to economic changes than more senior debt securities. These securities may also be viewed as more equity-like by the market when the issuer or its parent company experience financial problems.</p>
<p>Senior Loans</p>	<p>Senior Loans primarily include senior floating rate loans and secondarily senior floating rate debt obligations (including those issued by an asset-backed pool), and interests therein. Senior Loans are floating rate senior loans of borrowers with interest rates that float, adjust or vary periodically based on benchmark indicators, specified adjustment schedules or prevailing interest rates. Senior Loans are often secured by specific assets or “collateral,” although they may not be secured by collateral. A Senior Loan is typically originated, negotiated and structured by a U.S. or foreign commercial bank, insurance company, finance company or other financial institution (the “Agent”) for a group of loan investors (“Loan Investors”), generally referred to as a “syndicate”. The Agent typically administers and enforces the Senior Loan on behalf of the Loan Investors in the syndicate. In addition, an institution, typically but not always the Agent, holds any collateral on behalf of the Loan Investors. Loan interests primarily take the form of assignments purchased in the primary or secondary market. Loan interests may also take the form of participation interests in, or novations of, a Senior Loan.</p>

The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement of the assigning Loan Investor and becomes a Loan Investor under the loan agreement with the same rights and obligations as the assigning Loan Investor. Participations in a Loan Investor's portion of a Senior Loan typically result in a contractual relationship only with such Loan Investor, not with the borrower. As a result, the purchaser may have the right to receive payments of principal, interest and any fees to which it is entitled only from the Loan Investor selling the participation and only upon receipt by such Loan Investor of such payments from the borrower. The purchaser generally will have no right to enforce compliance by the borrower with the terms of the loan agreement or any set-off rights against the borrower with respect to any funds acquired by other Loan Investors and the purchaser may not directly benefit from the collateral supporting the Senior Loan. As a result, the purchaser assumes the credit risk of both the borrower and the Loan Investor selling the participation. In the event of the insolvency of the Loan Investor selling the participation, the Fund may be treated as a general creditor of such Loan Investor.

The Fund will take whatever action it considers appropriate in the event of anticipated financial difficulties, default or bankruptcy of the borrower. Such action may include: (i) retaining the services of various persons or firms (including affiliates of the investment adviser) to evaluate or protect any collateral or other assets securing any Senior Loan or acquired as a result of any such event; (ii) managing (or engaging other persons to manage) or otherwise dealing with any collateral or other assets so acquired; and (iii) taking such other actions (including, but not limited to, payment of operating or similar expenses relating to the collateral) as the investment adviser may deem appropriate to reduce the likelihood or severity of loss on the Fund's investment and/or maximize the return on such investment. The Fund will incur additional expenditures in taking protective action with respect to Senior Loans in (or anticipated to be in) default and assets securing such Loans. In certain circumstances, the Fund may receive equity or equity-like securities from a borrower to settle the Loan or may acquire an equity interest in the borrower. Representatives of the Fund also may join creditor or similar committees relating to Loans.

The Fund will only acquire participations if the Loan Investor selling the participation, and any other persons interpositioned between the Fund and the Loan Investor (an "Interposed Person"), at the time of investment, has outstanding debt or deposit obligations rated investment grade (BBB or A-3 or higher by Standard & Poor's or Baa or P-3 or higher by Moody's or comparably rated by another nationally recognized rating agency) or determined by the investment adviser to be of comparable quality. Similarly, the Fund will only purchase an assignment or participation or act as a Loan Investor with respect to a syndicated Senior Loan only where the Agent with respect to such Senior Loan at the time of investment has outstanding debt or deposit obligations rated investment grade or determined by the investment adviser to be of comparable quality. Notwithstanding the foregoing, the Fund may enter into a transaction to acquire an assignment or participation with an Interposed Person where such Interposed Person does not have outstanding debt or deposit obligations rated investment grade if the Fund does so in compliance with applicable written procedures governing such transactions.

Loan Collateral. Borrowers generally will, for the term of the Senior Loan, pledge collateral to secure their obligation. In addition Senior Loans may be guaranteed by or secured by assets of the borrower's owners or affiliates. During the term of the Senior Loan, the value of collateral securing the Loan may decline in value causing the Loan to be under collateralized. Collateral may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets would satisfy fully a borrower's obligations under a Senior Loan. In addition, if a Senior Loan is foreclosed, the Fund could become part owner of the collateral and would bear the costs and liabilities associated with owning and disposing of such collateral.

Fees. The Fund may receive a facility fee when it buys a Senior Loan, and pay a facility when it sells a Senior Loan. On an ongoing basis, the Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a Senior Loan. In certain circumstances, the Fund may receive a prepayment penalty fee upon the prepayment of a Senior Loan by a borrower or an amendment fee.

Loan Administration. In a typical Senior Loan the Agent administers the terms of the loan agreement and is responsible for the collection of principal, and interest payments from the borrower and the apportionment of these payments to the Loan Investors. Failure by the Agent to fulfill its obligations may delay or adversely affect receipt of payment by the Fund. Furthermore, unless under the terms of a loan agreement or participation (as applicable) the Fund has direct recourse against the borrower, the Fund must rely on the Agent and the other Loan Investors to use appropriate remedies against the borrower. The Agent is typically responsible for monitoring compliance with covenants contained in the loan agreement based upon reports prepared by the borrower. The typical practice of an Agent or a Loan Investor in relying exclusively or primarily on reports from the borrower may involve the risk of fraud by the borrower. It is unclear whether an investment in a Senior Loan offers the securities law protections against fraud and misrepresentation.

A financial institution's appointment as Agent may usually be terminated in the event that it fails to observe the requisite standard of care or becomes insolvent. A successor Agent would generally be appointed to replace the terminated Agent, and assets held by the Agent under the Loan Agreement should remain available to holders of Senior Loans. However, if assets held by the Agent for the benefit of the Fund were determined to be subject to the claims of the Agent's general creditors, the Fund might incur certain costs and delays in realizing payment on a Senior Loan, or suffer a loss of principal and/or interest. In situations involving other Interposed Persons similar risks may arise.

Regulatory Changes. To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of Senior Loans for investment may be adversely affected. Further, such legislation or regulation could depress the market value of Senior Loans.

Additional Information. Interests in Senior Loans generally are not listed on any national securities exchange or automated quotation system and no active market may exist for many of certain Senior Loans. A secondary market exists for Senior Loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods.

From time to time the investment adviser and its affiliates may borrow money from various banks in connection with their business activities. Such banks may also sell interests in Senior Loans to or acquire them from the Fund or may be intermediate participants with respect to Senior Loans in which the Fund owns interests. Such banks may also act as Agents for Senior Loans held by the Fund.

The Fund may purchase and retain in its portfolio a Senior Loan where the borrower has experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy reorganization proceedings or other forms of debt restructuring. While such investments may provide opportunities for enhanced income as well as capital appreciation, they generally involve greater risk and may be considered speculative. The Fund may from time to time participate on ad-hoc committees formed by creditors to negotiate with the management of financially troubled borrowers. The Fund may incur legal fees as a result of such participation. In addition, such participation may restrict the Fund's ability to trade in or acquire additional positions in a particular security when it might otherwise desire to do so. Participation by the Fund also may expose the Fund to potential liabilities under bankruptcy or other laws governing the rights of creditors and debtors. The Fund will participate on such committees only when the investment adviser believes that such participation is necessary or desirable to enforce the Fund's rights as a creditor or to protect the value of a Senior Loan held by the Fund.

Lenders can be sued by other creditors and the debtor and its shareholders. Losses could be greater than the original loan amount and occur years after the loan's recovery. If a borrower becomes involved in bankruptcy proceedings, a court may invalidate the Fund's security interest in the loan collateral or subordinate the Fund's rights under the loan agreement to the interests of the borrower's unsecured creditors or cause interest previously paid to be refunded to the borrower. There are also other events, such as the failure to perfect a security interest due to faulty documentation or faulty official filings, which could lead to the invalidation of the Fund's security interest in loan collateral. If any of these events occur, the Fund's performance could be negatively affected.

	<p>In some instances, other accounts managed by the investment adviser may hold other securities issued by borrowers the Senior Loans of which may be held by the Fund. These other securities may include, for example, debt securities that are subordinate to the Senior Loans held by the Fund, convertible debt or common or preferred equity securities. In certain circumstances, such as if the credit quality of the borrower deteriorates, the interests of holders of these other securities may conflict with the interests of the holders of the borrower's Senior Loans. In such cases, the investment adviser may owe conflicting fiduciary duties to the Fund and other client accounts. The investment adviser will endeavor to carry out its obligations to all of its clients to the fullest extent possible, recognizing that in some cases certain clients may achieve a lower economic return, as a result of these conflicting client interests, than if the investment adviser's client accounts collectively held only a single category of the issuer's securities.</p> <p>The Fund may acquire warrants and other equity securities as part of a unit combining a Senior Loan and equity securities of a borrower or its affiliates. The Fund may also acquire equity securities or debt securities (including non-dollar denominated debt securities) issued in exchange for a Senior Loan or issued in connection with the debt restructuring or reorganization of a borrower, or if such acquisition, in the judgment of the investment adviser, may enhance the value of a Senior Loan or would otherwise be consistent with the Fund's investment policies.</p>
Short Sales	<p>Short sales are transactions in which a party sells a security it does not own in anticipation of a decline in the market value of that security. To complete such a transaction, the party must borrow the security to make delivery to the buyer. When the party is required to return the borrowed security, it typically will purchase the security in the open market. The price at such time may be more or less than the price at which the party sold the security. Until the security is replaced, the party is required to repay the lender any dividends or interest, which accrues during the period of the loan. To borrow the security, it also may be required to pay a premium, which would increase the cost of the security sold. The net proceeds of the short sale will be retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed out. Transaction costs are incurred in effecting short sales. A short seller will incur a loss as a result of a short sale if the price of the security increases between the date of the short sale and the date on which it replaces the borrowed security. A gain will be realized if the price of the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends or interest the short seller may be required to pay, if any, in connection with a short sale. Short sales may be "against the box" or uncovered. In a short sale "against the box," at the time of the sale, the short seller owns or has the immediate and unconditional right to acquire the identical security at no additional cost. In an uncovered short sale, the short seller does not own the underlying security and, as such, losses from uncovered short sales may be significant. The Fund may sell short securities representing an index or basket of securities whose constituents the Fund holds in whole or in part. A short sale of an index or basket of securities will be a covered short sale if the underlying index or basket of securities is the same or substantially identical to securities held by the Fund. Use of short sales is limited by the Fund's non-fundamental restriction relating thereto.</p>
Short-Term Trading	<p>Fixed-income securities may be sold in anticipation of market decline (a rise in interest rates) or purchased in anticipation of a market rise (a decline in interest rates) and later sold. In addition, such a security may be sold and another purchased at approximately the same time to take advantage of what is believed to be a temporary disparity in the normal yield relationship between the two securities. Yield disparities may occur for reasons not directly related to the investment quality of particular issues or the general movement of interest rates, such as changes in the overall demand for or supply of various types of fixed-income securities or changes in the investment objectives of investors.</p>
Smaller Companies	<p>The investment risk associated with smaller companies is higher than that normally associated with larger, more established companies due to the greater business risks associated with small size, the relative age of the company, limited product lines, distribution channels and financial and managerial resources. Further, there is typically less publicly available information concerning smaller companies than for larger companies. The securities of small companies are often traded only over-the-counter and may not be traded in the volumes typical of trading on a national securities exchange. As a result, stocks of smaller companies are often more volatile than those of larger companies, which are often traded on a national securities exchange.</p>

Stripped Mortgage-Backed Securities (“SMBS”)	<p>SMBS are multiclass mortgage securities. SMBS commonly involve two classes of securities that receive different proportions of the interest and principal distributions on a pool of mortgage assets. A common type of SMBS will have one class receiving most of the interest from the mortgages, while the other class will receive most of the principal. In the most extreme case, the interest only class receives all of the interest while the principal only class receives the entire principal. The yield to maturity on an interest only class is extremely sensitive to the rate of principal payments (including pre-payments) on the related underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on the yield to maturity from these securities. If the underlying mortgages experience greater than anticipated prepayments of principal, the initial investment in these securities may not be recouped. Although the market for such securities is increasingly liquid, certain SMBS may not be readily marketable and will be considered illiquid. The market value of the class consisting entirely of principal payments generally is unusually volatile in response to changes in interest rates. The yields on a class of SMBS that receives all or most of the interest from mortgages are generally higher than prevailing market yields on other MBS because their cash flow patterns are more volatile and there is a greater risk that the initial investment will not be fully recouped.</p>
Structured Notes	<p>See also “Derivative Instruments and Related Risks” herein. Structured notes are derivative debt instruments, the interest rate or principal of which is determined by an unrelated indicator (for example, a currency, security, commodity or index thereof). The terms of the instrument may be “structured” by the purchaser and the borrower issuing the note. Indexed securities may include structured notes as well as securities other than debt securities, the interest rate or principal of which is determined by an unrelated indicator. Indexed securities may include a multiplier that multiplies the indexed element by a specified factor and, therefore, the value of such securities may be very volatile. The terms of structured notes and indexed securities may provide that in certain circumstances no principal is due at maturity, which may result in a loss of invested capital. Structured notes and indexed securities may be positively or negatively indexed, so that appreciation of the unrelated indicator may produce an increase or a decrease in the interest rate or the value of the structured note or indexed security at maturity may be calculated as a specified multiple of the change in the value of the unrelated indicator. Structured notes and indexed securities may entail a greater degree of market risk than other types of investments because the investor bears the risk of the unrelated indicator. Structured notes or indexed securities also may be more volatile, less liquid, and more difficult to accurately price than less complex securities and instruments or more traditional debt securities.</p>
Swap Agreements	<p>See also “Derivative Instruments and Related Risks” herein. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on a particular predetermined reference instrument or instruments, which can be adjusted for an interest rate factor. The gross returns to be exchanged or “swapped” between the parties are generally calculated with respect to a “notional amount” (<i>i.e.</i>, the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a “basket” of securities representing a particular index). Other types of swap agreements may calculate the obligations of the parties to the agreement on a “net basis.” Consequently, a party’s current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the “net amount”).</p> <p>Whether the use of swap agreements will be successful will depend on the investment adviser's ability to predict correctly whether certain types of reference instruments are likely to produce greater returns than other instruments. Swap agreements may be subject to contractual restrictions on transferability and termination and they may have terms of greater than seven days. The Fund’s obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund under the swap). Developments in the swaps market, including potential government regulation, could adversely affect the Fund’s ability to terminate existing swap agreements or to realize amounts to be received under such agreements, as well as to participate in swap agreements in the future. If there is a default by the counterparty to a swap, the Fund will have contractual remedies pursuant to the swap agreement, but any recovery may be delayed depending on the circumstances of the default. Swap agreements include (but are not limited to):</p>

Currency Swaps. Currency swaps involve the exchange of the rights of the parties to make or receive payments in specified currencies. Because currency swaps usually involve the delivery of the entire principal value of one designated currency in exchange for the other designated currency, the entire principal value of a currency swap is subject to the risk that the other party to the swap will default on its contractual delivery obligations. If the investment adviser is incorrect in its forecasts of market value and currency exchange rates, performance may be adversely affected.

Equity Swaps. An equity swap is an agreement in which at least one party's payments are based on the rate of return of an equity security or equity index, such as the S&P 500. The other party's payments can be based on a fixed rate, a non-equity variable rate, or even a different equity index. The Fund may enter into equity index swaps on a net basis pursuant to which the future cash flows from two reference instruments are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two.

Credit Default Swaps. Under a credit default swap agreement, the protection "buyer" in a credit default contract is generally obligated to pay the protection "seller" an upfront or a periodic stream of payments over the term of the contract provided that no credit event, such as a default, on a reference instrument has occurred. If a credit event occurs, the seller generally must pay the buyer the "par value" (full notional value) of the reference instrument in exchange for an equal face amount of the reference instrument described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. If the Fund is a buyer and no credit event occurs, the Fund may recover nothing if the swap is held through its termination date. As a seller, the Fund generally receives an upfront payment or a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. The determination of a credit event under the swap agreement will depend on the terms of the agreement and may rely on the decision of persons that are not a party to the agreement. The Fund's obligations under a credit default swap agreement will be accrued daily (offset against any amounts owed to the Fund).

Inflation Swaps. Inflation swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest, e.g., an exchange of fixed rate payments for floating rate payments or an exchange of floating rate payments based on two different reference indices. By design, one of the reference indices is an inflation index, such as the Consumer Price Index. Inflation swaps can be designated as zero coupon, where both sides of the swap compound interest over the life of the swap and then the accrued interest is paid out only at the swap's maturity.

Total Return Swaps. Total return swap agreements are contracts in which one party agrees to make periodic payments to another party based on the change in market value of the assets underlying the contract, which may include a specified security, basket of securities or securities indices during the specified period, in return for periodic payments based on a fixed or variable interest rate or the total return from other underlying assets. Total return swap agreements may be used to obtain exposure to a security or market without owning or taking physical custody of such security or investing directly in such market. Total return swap agreements may effectively add leverage to the Fund's portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. Generally, the Fund will enter into total return swaps on a net basis (i.e., the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments). The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each total return swap will be accrued on a daily basis. If the total return swap transaction is entered into on other than a net basis, the full amount of the Fund's obligations will be accrued on a daily basis, and the full amount of the Fund's obligations will be segregated by the Fund in an amount equal to or greater than the market value of the liabilities under the total return swap or the amount it would have cost the Fund initially to make an equivalent direct investment, plus or minus any amount the Fund is obligated to pay or is to receive under the total return swap agreement.

	<p><i>Interest Rate Swaps, Caps and Floors.</i> Interest rate swaps are OTC contracts in which each party agrees to make a periodic interest payment based on an index or the value of an asset in return for a periodic payment from the other party based on a different index or asset. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index rises above a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. The Fund usually will enter into interest rate swap transactions on a net basis (i.e., the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments). The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each interest rate swap will be accrued on a daily basis. If the interest rate swap transaction is entered into on other than a net basis, the full amount of the Fund's obligations will be accrued on a daily basis. Certain federal income tax requirements may limit the Fund's ability to engage in certain interest rate transactions.</p>
Swaptions	<p>See also "Derivative Instruments and Related Risks" herein. A swaption is a contract that gives a counterparty the right (but not the obligation) in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. The Fund may write (sell) and purchase put and call swaptions. Depending on the terms of the particular option agreement, the Fund will generally incur a greater degree of risk when it writes a swaption than it will incur when it purchases a swaption. When the Fund purchases a swaption, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when the Fund writes a swaption, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.</p>
Tax-Managed Investing	<p>Taxes are a major influence on the net returns that investors receive on their taxable investments. There are four components of the returns of a mutual fund that invests in equities which are treated differently for federal income tax purposes : price appreciation, distributions of qualified dividend income, distributions of other investment income and distributions of realized short-term and long-term capital gains .. Distributions of income other than qualified dividend income and distributions of net realized short-term gains (on stocks held for one year or less) are taxed as ordinary income. Distributions of qualified dividend income and net realized long-term gains (on stocks held for more than one year) are currently taxed at rates up to 20%. The Fund's investment program and the tax treatment of Fund distributions may be affected by IRS interpretations of the Code and future changes in tax laws and regulations. Returns derived from price appreciation are untaxed until the shareholder disposes of his or her shares. Upon disposition, a capital gain (short-term, if the shareholder has held his or her shares for one year or less, otherwise long-term) equal to the difference between the net proceeds of the disposition and the shareholder's adjusted tax basis is realized.</p>
Trust Certificates	<p>Trust certificates are investments in a limited purpose trust or other vehicle formed under state law. Trust certificates in turn invest in instruments, such as credit default swaps, interest rate swaps, preferred securities and other securities, in order to customize the risk/return profile of a particular security. Like an investment in a bond, investments in trust certificates represent the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the certificate. However, these payments are conditioned on the trust's receipt of payments from, and the trust's potential obligations to, the counterparties to the derivative instruments and other securities in which the trust invests. Investments in these instruments are indirectly subject to the risks associated with derivative instruments, including, among others, credit risk, default or similar event risk, counterparty risk, interest rate risk, leverage risk and management risk. It is expected that the trusts that issue credit-linked trust certificates will constitute "private" investment companies, exempt from registration under the 1940 Act. Although the trusts are typically private investment companies, they are generally not actively managed. It is also expected that the certificates will be exempt from registration under the 1933 Act. Accordingly, there may be no established trading market for the certificates and they may constitute illiquid investments.</p>

U.S. Government Securities	<p>U.S. Government securities include: (1) U.S. Treasury obligations, which differ in their interest rates, maturities and times of issuance, including: U.S. Treasury bills (maturities of one year or less); U.S. Treasury notes (maturities of one year to ten years); and U.S. Treasury bonds (generally maturities of greater than ten years); and (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities which are supported by any of the following: (a) the full faith and credit of the U.S. Treasury; (b) the right of the issuer to borrow an amount limited to a specific line of credit from the U.S. Treasury; (c) discretionary authority of the U.S. Government to purchase certain obligations of the U.S. Government agency or instrumentality; or (d) the credit of the agency or instrumentality. U.S. Government securities also include any other security or agreement collateralized or otherwise secured by U.S. Government securities. Agencies and instrumentalities of the U.S. Government include but are not limited to: Farmers Home Administration, Export-Import Bank of the United States, Federal Housing Administration, Federal Land Banks, Federal Financing Bank, Central Bank for Cooperatives, Federal Intermediate Credit Banks, Farm Credit Bank System, Federal Home Loan Banks, Federal Home Loan Mortgage Corporation, Federal National Mortgage Association, General Services Administration, Government National Mortgage Association, Student Loan Marketing Association, United States Postal Service, Maritime Administration, Small Business Administration, Tennessee Valley Authority, Washington D.C. Armory Board and any other enterprise established or sponsored by the U.S. Government. The U.S. Government generally is not obligated to provide support to its instrumentalities. The principal of and/or interest on certain U.S. Government securities could be (a) payable in foreign currencies rather than U.S. dollars or (b) increased or diminished as a result of changes in the value of the U.S. dollar relative to the value of foreign currencies. The value of such portfolio securities denominated in foreign currencies may be affected favorably by changes in the exchange rate between foreign currencies and the U.S. dollar. For additional information about Federal Home Loan Mortgage Corporation and Federal National Mortgage Association, see “Events Regarding FNMA and FHLMC” herein.</p>
Unlisted Securities	<p>Unlisted securities are neither listed on a stock exchange nor traded over-the-counter. Unlisted securities may include investments in new and early stage companies, which may involve a high degree of business and financial risk that can result in substantial losses and may be considered speculative. Such securities will generally be deemed to be illiquid. Because of the absence of any public trading market for these investments, it may take longer to liquidate these positions than would be the case for publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices realized from these sales could be less than those originally paid or less than what may be considered the fair value of such securities. Furthermore, issuers whose securities are not publicly traded may not be subject to public disclosure and other investor protection requirements applicable to publicly traded securities. If such securities are required to be registered under the securities laws of one or more jurisdictions before being resold, the Fund may be required to bear the expenses of registration. In addition, in foreign jurisdictions any capital gains realized on the sale of such securities may be subject to higher rates of foreign taxation than taxes payable on the sale of listed securities.</p>
Utility and Financial Service Companies	<p>To the extent described in the Prospectus, the Fund may concentrate its investments in utility and/or financial services companies.</p>
Variable Rate Obligations	<p>Variable rate instruments provide for adjustments in the interest rate at specified intervals (daily, weekly, monthly, semiannually, etc.) based on market conditions, credit ratings or interest rates and the investor may have the right to “put” the security back to the issuer or its agent. Variable rate obligations normally provide that the holder can demand payment of the obligation on short notice at par with accrued interest and which are frequently secured by letters of credit or other support arrangements provided by banks. To the extent that such letters of credit or other arrangements constitute an unconditional guarantee of the issuer’s obligations, a bank may be treated as the issuer of a security for the purposes of complying with the diversification requirements set forth in Section 5(b) of the 1940 Act and Rule 5b-2 thereunder. The Fund would anticipate using these bonds as cash equivalents pending longer term investment of its funds. The rate adjustment features tend to limit the extent to which the market value of the obligations will fluctuate.</p>

Warrants	<p>See also “Derivative Instruments and Related Risks” herein. Warrants are an option, but not the obligation, to purchase an instrument at a fixed price valid for a specific period of time. Warrants typically are issued by the issuer of the underlying reference instrument. Warrants do not represent ownership of the instrument, but only the right to buy it. The prices of warrants do not necessarily move parallel to the prices of the underlying reference instruments. Warrants may become valueless if not sold or exercised prior to their expiration. Warrants have no voting rights, pay no dividends and have no rights with respect to the assets of the corporation issuing them. These factors can make warrants more speculative than other types of investments. (Canadian special warrants issued in private placements prior to a public offering are not considered warrants.)</p>
When-Issued Securities, Delayed Delivery and Forward Commitments	<p>Securities may be purchased on a “forward commitment,” “when-issued” or “delayed delivery” basis (meaning securities are purchased or sold with payment and delivery taking place in the future) in order to secure what is considered to be an advantageous price and yield at the time of entering into the transaction. When the Fund agrees to purchase such securities, it assumes the risk of any decline in value of the security from the date of the agreement to purchase. The Fund does not earn interest on the securities it has committed to purchase until they are paid for and delivered on the settlement date.</p> <p>From the time of entering into the transaction until delivery and payment is made at a later date, the securities that are the subject of the transaction are subject to market fluctuations. In forward commitment, when-issued or delayed delivery transactions, if the seller or buyer, as the case may be, fails to consummate the transaction the counterparty may miss the opportunity of obtaining a price or yield considered to be advantageous. However, no payment or delivery is made until payment is received or delivery is made from the other party to the transaction.</p>
Zero Coupon Bonds	<p>Zero coupon bonds are debt obligations that do not require the periodic payment of interest and are issued at a significant discount from face value. The discount approximates the total amount of interest the bonds will accrue and compound over the period until maturity at a rate of interest reflecting the market rate of the security at the time of purchase. The effect of owning debt obligations that do not make current interest payments is that a fixed yield is earned not only on the original investment but also, in effect, on all discount accretion during the life of the debt obligation. This implicit reinvestment of earnings at a fixed rate eliminates the risk of being unable to invest distributions at a rate as high as the implicit yield on the zero coupon bond, but at the same time eliminates the holder’s ability to reinvest at higher rates in the future. For this reason, zero coupon bonds may be subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities that pay interest currently. The Fund is required to accrue income from zero coupon bonds on a current basis, even though it does not receive that income currently in cash, and the Fund is required to distribute that income for each taxable year. Thus, the Fund may have to sell other investments to obtain cash needed to make income distributions.</p>

Class A Fees, Performance and Ownership

Sales Charges and Distribution and Service Fees. For the fiscal year or period ended September 30, 2012,, the following table shows (1) total sales charges paid by each Fund, (2) sales charges paid to financial intermediaries, (3) sales charges paid to the principal underwriter, (4) approximate CDSC payments to the principal underwriter, (5) total distribution and service fees paid by each Fund, and (6) distribution and service fees paid to financial intermediaries. Distribution and service fees that were not paid to financial intermediaries were retained by the principal underwriter.

Fund	Total Sales Charges Paid	Sales Charges to Financial Intermediaries	Sales Charges to Principal Underwriter	CDSC Paid to Principal Underwriter	Total Distribution and Service Fees Paid	Distribution and Service Fees Paid to Financial Intermediaries
Focused Growth Fund	\$ 150,046	\$ 127,589	\$ 22,457	\$ 100	\$ 158,841	\$ 59,936
Horizon Growth Fund	41,178	35,147	6,031	1,000	74,866	50,764
Select Equity Fund*	993	859	134	None	6,373	1,475
SMID-Cap Fund	1,737,477	1,527,321	210,156	2,000	2,006,699	1,187,243

* For the period from January 3, 2012 through September 30, 2012

For the fiscal years ended September 30, 2011 and September 30, 2010 the following total sales charges were paid on sales on Class A, of which the principal underwriter received the following amounts. The balance of such amounts were paid to financial intermediaries.

Fund	September 30, 2011 Total Sales Charges Paid	September 30, 2011 Sales Charges to Principal Underwriter	September 30, 2010 Total Sales Charges Paid	September 30, 2010 Sales Charges to Principal Underwriter
Focused Growth Fund	\$ 183,438	\$ 21,998	\$ 7,085	\$ 815
Horizon Growth Fund*	108,102	14,754	46,595	8,026
Select Equity Fund	N/A	N/A	N/A	N/A
SMID-Cap Fund	1,741,308	236,932	845,790	106,208

* For the period from November 1, 2010 through September 30, 2011 and the fiscal year ended October 31, 2010

Performance Information. The table below indicates the average annual total return (both before and after taxes) on a hypothetical investment of \$1,000 in this Class of shares for the periods shown in each table. Any performance presented with an asterisk (*) includes the effect of subsidizing expenses. Performance would have been lower without subsidies.

Total returns are historical and are calculated by determining the percentage change in net asset value or public offering price with all distributions reinvested. Each Fund's past performance (both before and after taxes) is no guarantee of future results. Investment return and principal value of Fund shares will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, a Fund's current performance may be lower or higher than the quoted return. For the Fund's performance as of the most recent month-end, please refer to www.eatonvance.com.

About Returns After Taxes. After-tax returns are calculated using certain assumptions. After-tax returns are calculated using the highest historical individual federal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder's tax situation and the actual characterization of distributions, and may differ from those shown. After-tax returns are not relevant to shareholders who hold shares in tax-deferred accounts or to shares held by non-taxable entities. Return After Taxes on Distributions for a period may be the same as Return Before Taxes for that period because no taxable distributions were made

during that period. Also, Return After Taxes on Distributions and the sale of Fund Shares for a period may be greater than or equal to Return After Taxes on Distributions for the same period because of losses realized on the sale of Fund shares.

Focused Growth Fund	Length of Period Ended September 30, 2012		
	Average Annual Total Return:	One Year	Five Years*
Before Taxes and Excluding Maximum Sales Charge	22.82%	2.00%	7.13%
Before Taxes and Including Maximum Sales Charge	15.72%	0.80%	6.50%
After Taxes on Distributions and Excluding Maximum Sales Charge	22.82%	1.53%	6.74%
After Taxes on Distributions and Including Maximum Sales Charge	15.72%	0.33%	6.11%
After Taxes on Distributions and Redemption and Excluding Maximum Sales Charge	14.84%	1.61%	6.22%
After Taxes on Distributions and Redemption and Including Maximum Sales Charge	10.22%	0.58%	5.64%

Class A commenced operations November 28, 2003. Performance shown above for periods prior to November 28, 2003 is the performance of Class I, adjusted for the sales charge that applies to Class A shares (but not adjusted for any other differences in expenses of the two classes).

Horizon Growth Fund	Length of Period Ended September 30, 2012		
	Average Annual Total Return:	One Year*	Five Years*
Before Taxes and Excluding Maximum Sales Charge	15.35%	3.23%	8.51%
Before Taxes and Including Maximum Sales Charge	8.72%	2.02%	7.87%
After Taxes on Distributions and Excluding Maximum Sales Charge	11.26%	2.27%	7.91%
After Taxes on Distributions and Including Maximum Sales Charge	4.87%	1.07%	7.28%
After Taxes on Distributions and Redemption and Excluding Maximum Sales Charge	14.66%	2.69%	7.46%
After Taxes on Distributions and Redemption and Including Maximum Sales Charge	10.08%	1.65%	6.87%

Select Equity Fund	Length of Period Ended September 30, 2012	
	Cumulative Total Return:	Life of Fund*
Before Taxes and Excluding Maximum Sales Charge		17.70%
Before Taxes and Including Maximum Sales Charge		10.93%

Class A commenced operations January 3, 2012.

SMID-Cap Fund	Length of Period Ended September 30, 2012			
	Average Annual Total Return:	One Year*	Five Years*	Ten Years*
Before Taxes and Excluding Maximum Sales Charge	29.12%	8.05%	12.01%	
Before Taxes and Including Maximum Sales Charge	21.65%	6.78%	11.36%	
After Taxes on Distributions and Excluding Maximum Sales Charge	29.00%	7.36%	11.40%	
After Taxes on Distributions and Including Maximum Sales Charge	21.54%	6.10%	10.75%	
After Taxes on Distributions and Redemption and Excluding Maximum Sales Charge	19.05%		6.70%	10.56%
After Taxes on Distributions and Redemption Including Maximum Sales Charge	14.19%	5.59%	9.95%	

Class A commenced operations November 28, 2003. Performance shown above for periods prior to November 28, 2003 is the performance of Class I, adjusted for the sales charge that applies to Class A shares (but not adjusted for any other differences in expenses of the two classes).

Control Persons and Principal Holders of Securities. At January 1, 2013, the Trustees and officers of the Trust, as a group, owned in the aggregate less than 1% of the outstanding shares of this Class of each Fund. In addition, as of the same date, the following person(s) held the share percentage indicated below, which was owned either (i) beneficially by such person(s) or (ii) of record by such person(s) on behalf of customers who are the beneficial owners of such shares and as to which such record owner(s) may exercise voting rights under certain limited circumstances:

Focused Growth Fund	American Enterprise Investment SVC FBO #41999970	Minneapolis, MN	9.3%

Beneficial owners of 25% or more of this Class of each Fund are presumed to be in control of the Class for purposes of voting on certain matters submitted to shareholders.

To the knowledge of the Trust, no other person owned of record or beneficially 5% or more of the outstanding shares of this Class of each Fund as of such date.

Class B Fees, Performance and Ownership

Distribution and Service Fees. For the fiscal year ended September 30, 2012, the following table shows (1) sales commissions paid by the principal underwriter to financial intermediaries on sales of Class B shares, (2) distribution fees paid to the principal underwriter under the Distribution Plan, (3) approximate CDSC payments to the principal underwriter, (4) uncovered distribution charges under the Distribution Plan (dollar amount and as a percentage of net assets attributable to Class B), (5) service fees paid under the Distribution Plan, and (6) service fees paid to financial intermediaries. The service fees paid by the Funds that were not paid to financial intermediaries were retained by the principal underwriter.

	Sales Commission	Distribution Fee Paid to Principal Underwriter	CDSC Paid to Principal Underwriter	Uncovered Distribution Charges	Service Fees	Service Fees Paid to Financial Intermediaries
Horizon Growth Fund	\$ 10,154	\$ 27,372	\$ 8,000	\$ 139,000(5.2%)	\$ 9,124	\$ 5,948

Performance Information. The table below indicates the average annual total return (both before and after taxes) on a hypothetical investment of \$1,000 in this Class of shares for the periods shown in the table. Any performance presented with an asterisk (*) includes the effect of subsidizing expenses. Performance would have been lower without subsidies.

Total returns are historical and are calculated by determining the percentage change in net asset value or public offering price with all distributions reinvested. The Fund's past performance (both before and after taxes) is no guarantee of future results. Investment return and principal value of Fund shares will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than the quoted return. For the Fund's performance as of the most recent month-end, please refer to www.eatonvance.com.

About Returns After Taxes. After-tax returns are calculated using certain assumptions. After-tax returns are calculated using the highest historical individual federal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder's tax situation and the actual characterization of distributions, and may differ from those shown. After-tax returns are not relevant to shareholders who hold shares in tax-deferred accounts or to shares held by non-taxable entities. Return After Taxes on Distributions for a period may be the same as Return Before Taxes for that period because no taxable distributions were made during that period. Also, Return After Taxes on Distributions and the sale of Fund Shares for a period may be greater than or equal to Return After Taxes on Distributions for the same period because of losses realized on the sale of Fund shares.

Horizon Growth Fund	Length of Period Ended September 30, 2012			
	Average Annual Total Return:	One Year*	Five Years*	Ten Years*
Before Taxes and Excluding Maximum Sales Charge		14.49%	2.47%	7.70%
Before Taxes and Including Maximum Sales Charge		10.23%	2.18%	7.70%
After Taxes on Distributions and Excluding Maximum Sales Charge		10.10%	1.44%	7.07%
After Taxes on Distributions and Including Maximum Sales Charge		5.84%	1.15%	7.07%
After Taxes on Distributions and Redemptions and Excluding Maximum Sales Charge		14.49%	2.03%	6.72%
After Taxes on Distributions and Redemptions and Including Maximum Sales Charge		11.72%	1.79%	6.72%

Control Persons and Principal Holders of Securities. At January 1, 2013, the Trustees and officers of the Trust, as a group, owned in the aggregate less than 1% of the outstanding shares of this Class of the Fund. In addition, as of the same date, the following person(s) held the share percentage indicated below, which was owned either (i) beneficially by such person(s) or (ii) of record by such person(s) on behalf of customers who are the beneficial owners of such shares and as to which such record owner(s) may exercise voting rights under certain limited circumstances:

Horizon Growth Fund	First Clearing LLC	St. Louis, MO	26.5%
	American Enterprise Investment SVC FBO 41999970	Minneapolis, MN	15.0%

Beneficial owners of 25% or more of this Class of each Fund are presumed to be in control of the Class for purposes of voting on certain matters submitted to shareholders.

To the knowledge of the Trust, no other person owned of record or beneficially 5% or more of the outstanding shares of this Class of each Fund as of such date.

Class R Fees, Performance & Ownership

Distribution, Service and Repurchase Transaction Fees. For the fiscal year ended September 30, 2012, the following table shows (1) distribution fees paid to the principal underwriter under the Distribution Plan, (2) total service fees paid and (3) service fees paid to financial intermediaries. The service fees paid by the Funds that were not paid to financial intermediaries were retained by the principal underwriter.

	Distribution Fee Paid to Principal Underwriter	Total Service Fees Paid	Service Fees Paid to Financial Intermediaries
SMID-Cap Fund	\$20,920	\$20,920	\$39,602

Performance Information. The table below indicates the average annual total return (both before and after taxes) on a hypothetical investment of \$1,000 in this Class of shares for the periods shown in the table. Any performance presented with an asterisk (*) includes the effect of subsidizing expenses. Performance would have been lower without subsidies.

Total returns are historical and are calculated by determining the percentage change in net asset value or public offering price with all distributions reinvested. The Fund's past performance (both before and after taxes) is no guarantee of future results. Investment return and principal value of Fund shares will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than the quoted return. For the Fund's performance as of the most recent month-end, please refer to www.eatonvance.com.

About Returns After Taxes. After-tax returns are calculated using certain assumptions. After-tax returns are calculated using the highest historical individual federal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder's tax situation and the actual characterization of distributions, and may differ from those shown. After-tax returns are not relevant to shareholders who hold shares in tax-deferred accounts or to shares held by non-taxable entities. Return After Taxes on Distributions for a period may be the same as Return Before Taxes for that period because no taxable distributions were made during that period. Also, Return After Taxes on Distributions and the sale of Fund Shares for a period may be greater than or equal to Return After Taxes on Distributions for the same period because of losses realized on the sale of Fund shares.

SMID-Cap Fund	Length of Period Ended September 30, 2012			
	Average Annual Total Return:	One Year*	Five Years*	Ten Years*
Before Taxes		28.78%	7.89%	11.84%
After Taxes		28.67%	7.20%	11.23%
After Taxes on Distributions and Redemption		18.84%	6.57%	10.41%

Total return for the period between the date this Class re-commenced operations (August 3, 2009) and September 11, 2004 (date of closing of Class) is the performance of Class A shares adjusted to reflect any applicable sales charges (but not adjusted for any other differences in the expenses of the two classes). Returns between April 30, 2002 and September 11, 2004 reflect the actual total return of Class R shares. If adjusted for other expenses, returns would be different.

Control Persons and Principal Holders of Securities. At January 1, 2013, the Trustees and officers of the Trust, as a group, owned in the aggregate less than 1% of the outstanding shares of this Class of the Fund. In addition, as of the same date, the following person(s) held the share percentage indicated below, which was owned either (i) beneficially by such person(s) or (ii) of record by such person(s) on behalf of customers who are the beneficial owners of such shares and as to which such record owner(s) may exercise voting rights under certain limited circumstances:

	Merrill Lynch Pierce Fenner & Smith	Jacksonville, FL	9.3%
	Hartford Life Insurance Company Separate Account	Windsor, CT	6.5%
	Great-West Trust Co LLC FBO Putnam	Greenwood Village, OH	5.5%

Beneficial owners of 25% or more of this Class of the Fund are presumed to be in control of the Class for purposes of voting on certain matters submitted to shareholders.

To the knowledge of the Trust, no other person owned of record or beneficially 5% or more of the outstanding shares of this Class of the Fund as of such date.

EQUITY RANKINGS

Value Line' s Financial Strength Ranking

A company' s Financial Strength is the estimated financial strength of a company relative to all others followed in the Value Line Composite Index. It is derived by Value Line' s Analysts after taking into consideration five main factors in varying weights; Earnings Coverage, Debt to Equity, Market Capitalization, Quick Ratio, and Fixed Charge Coverage. The Value Line analysis focuses on net income, cash flow, the amount of debt outstanding, and the outlook for profits. Other factors also enter into the equation.

Standard and Poor' s Quality Ranking System

Standard and Poor' s Quality Ranking System captures the growth and stability of a company' s earnings and dividends history in a single symbol. In assessing Quality Rankings, Standard and Poor' s recognized that earnings and dividend performance is the end result of the interplay of various factors such as products and industry position, corporate resources, and financial policy. Standard and Poor' s Quality Ranking System rankings are generated by a computerized ranking system based on per-share earnings and dividend records of the most recent 10 years. Basic scores are computed for earnings and dividends, and then adjusted as indicated by a set of predetermined modifiers for change in the rate of growth, stability within long-term trend, and cyclicity. Adjusted scores for earnings and dividends are then combined to yield a final ranking.

Eaton Vance Funds
Proxy Voting Policy and Procedures

I .. Overview

The Boards of Trustees (the “ Board ”) of the Eaton Vance Funds have determined that it is in the interests of the Funds’ shareholders to adopt these written proxy voting policy and procedures (the “Policy”). For purposes of this Policy :

- “Fund” means each registered investment company sponsored by the Eaton Vance organization; and
- “Adviser” means the adviser or sub-adviser responsible for the day-to-day management of all or a portion of the Fund’s assets.

II .. Delegation of Proxy Voting Responsibilities

The Board hereby delegates to the Adviser responsibility for voting the Fund’ s proxies as described in this Policy. In this connection , the Adviser is required to provide the Board with a copy of its proxy voting policies and procedures (“Adviser Procedures”) and all Fund proxies will be voted in accordance with the Adviser Procedures, provided that in the event a material conflict of interest arises with respect to a proxy to be voted for the Fund (as described in Section IV below) the Adviser shall follow the process for voting such proxy as described in Section IV below.

The Adviser is required to report any material change to the Adviser Procedures to the Board in the manner set forth in Section V below. In addition, the Board will review the Adviser Procedures annually ..

III .. Delegation of Proxy Voting Disclosure Responsibilities

Pursuant to Rule 30b1-4 promulgated under the Investment Company Act of 1940, as amended (the “1940 Act”), the Fund is required to file Form N-PX no later than August 31st of each year .. On Form N-PX, the Fund is required to disclose, among other things, information concerning proxies relating to the Fund’ s portfolio investments, whether or not the Fund (or its Adviser) voted the proxies relating to securities held by the Fund and how it voted on the matter and whether it voted for or against management.

To facilitate the filing of Form N-PX for the Fund:

- The Adviser is required to record, compile and transmit in a timely manner all data required to be filed on Form N-PX for the Fund that it manages. Such data shall be transmitted to Eaton Vance Management, which acts as administrator to the Fund (the “Administrator ”) or the third party service provider designated by the Administrator; and
- the Administrator is required to file Form N-PX on behalf of the Fund with the Securities and Exchange Commission (“Commission”) as required by the 1940 Act. The Administrator may delegate the filing to a third party service party provided each such filing is reviewed and approved by the Administrator.

IV .. Conflicts of Interest

The Board expects the Adviser, as a fiduciary to the Fund it manages, to put the interests of the Fund and its shareholders above those of the Adviser. When required to vote a proxy for the Fund, the Adviser may have material business relationships with the issuer soliciting the proxy that could give rise to a potential material conflict of interest for the Adviser. ¹ In the event such a material conflict of interest arises , the Adviser, to the extent it is aware or reasonably should have been aware of the material conflict, will refrain from voting any proxies related to companies giving rise to such material conflict until it notifies and consults with the appropriate Board , or any committee, sub-committee or group of Independent Trustees identified by the Board (as long as such committee, sub-committee or group contains at least two or more Independent Trustees) (the “Board Members”), concerning the material conflict. ² For ease of communicating with the Board Members, the Adviser is required to provide the foregoing notice to the Fund’ s Chief Legal Officer who will then notify and facilitate a consultation with the Board Members.

Once the Board Members have been notified of the material conflict :

- They shall convene a meeting to review and consider all relevant materials related to the proxies involved. This meeting shall be convened within 3 business days, provided that it an effort will be made to convene the meeting sooner if the proxy must be voted in less than 3 business days;
- In considering such proxies, the Adviser shall make available all materials requested by the Board Members and make reasonably available appropriate personnel to discuss the matter upon request.
- The Board Members will then instruct the Adviser on the appropriate course of action with respect to the proxy at issue.

If the Board Members are unable to meet and the failure to vote a proxy would have a material adverse impact on the Fund(s) involved, the Adviser will have the right to vote such proxy, provided that it discloses the existence of the material conflict to the Chairman of the Board as soon as practicable and to the Board at its next meeting. Any determination regarding the voting of proxies of the Fund that is made by the Board Members shall be deemed to be a good faith determination regarding the voting of proxies by the full Board.

V .. Reports and Review

The Administrator shall make copies of each Form N-PX filed on behalf of the Fund available for the Boards' review upon the Board' ' request. The Administrator (with input from the Adviser for the Fund) shall also provide any reports reasonably requested by the Board regarding the proxy voting records of the Fund.

The Adviser shall report any material changes to the Adviser Procedures to the Board as soon as practicable and the Boards will review the Adviser Procedures annually.

The Adviser also shall report any changes to the Adviser Procedures to the Fund Chief Legal Officer prior to implementing such changes in order to enable the Administrator to effectively coordinate the Fund' s disclosure relating to the Adviser Procedures.

To the extent requested by the Commission, the Policy and the Adviser Procedures shall be appended to the Fund' s statement of additional information included in its registration statement.

- 1 An Adviser is expected to maintain a process for identifying a potential material conflict of interest. As an example only, such potential conflicts may arise when the issuer is a client of the Adviser and generates a significant amount of fees to the Adviser or the issuer is a distributor of the Adviser' s products.
- 2 If a material conflict of interest exists with respect to a particular proxy and the proxy voting procedures of the relevant Adviser require that proxies are to be voted in accordance with the recommendation of a third party proxy voting vendor, the requirements of this Section IV shall only apply if the Adviser intends to vote such proxy in a manner inconsistent with such third party recommendation.

ATLANTA CAPITAL MANAGEMENT COMPANY, LLC
PROXY VOTING POLICIES

I .. Introduction

Atlanta Capital Management Company, LLC (“ACM”) has adopted and implemented policies (and the procedures into which they are incorporated) that ACM believes are reasonably designed to ensure that proxies are voted in the best interest of clients, in accordance with its fiduciary duties and Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended. ACM’s authority to vote the proxies of its clients is established by their advisory contracts or similar documentation. Voting authority may be reserved explicitly by a client or assigned to another party by the governing account documents. These proxy policies (and the procedures into which they are incorporated) reflect the Securities and Exchange Commission (“SEC”) requirements governing advisers and the long-standing fiduciary standards and responsibilities for ERISA accounts set out in the Department of Labor Bulletin 94-2 C.F.R. 2509.94-2 (July 29, 1994).

II .. Overview

ACM manages its clients’ assets with the overriding goal of seeking to provide the greatest possible return to such clients consistent with governing laws and the investment policies of each client. In pursuing that goal, ACM seeks to exercise its clients’ rights as shareholders of voting securities to support sound corporate governance of the companies issuing those securities with the principle aim of maintaining or enhancing the companies’ economic value.

The exercise of shareholder rights is generally performed by casting votes by proxy at shareholder meetings on matters submitted to shareholders for approval (for example, the election of directors or the approval of a company’s stock option plans for directors, officers or employees). ACM is adopting the formal written guidelines described in detail below and will utilize such guidelines in voting proxies on behalf of its clients.

These guidelines are designed to promote accountability of a company’s management and Board of Directors to its shareholders and to align the interests of management with those of shareholders.

In seeking to ensure a level of consistency and rationality in the proxy voting process, the guidelines contained in these policies are designed to address the manner in which certain matters that arise regularly in proxies will generally be voted. No set of guidelines can anticipate all situations that may arise. In special cases, the Proxy Administrator (the person specifically charged with the responsibility to review and vote proxies on behalf of ACM’s clients) may seek insight from ACM’s analysts, portfolio managers and/or Executive Committee on how a particular proxy proposal will impact the financial prospects of a company, and vote accordingly. The guidelines are just that: guidelines, rather than hard and fast rules, simply because corporate governance issues are so varied.

III .. ISS (formerly Risk Metrics Group)

In order to facilitate the proxy voting process, ACM has retained ISS, an advisor that specializes in providing a variety of fiduciary-level services related to proxy voting. ISS provides the firm with in-depth proxy research, tracks and receives proxies on which clients are entitled to vote, compiles and provides client voting records, and performs other recordkeeping necessary for the appropriate management of a client account. Effective February 2012, ACM has delegated to ISS the authority to vote proxies for client accounts pursuant to guidelines adopted by ACM (or pursuant to special instruction by ACM).

IV. Proxy Voting Guidelines

The following guidelines relate to the types of proposals that are most frequently presented in proxy statements to shareholders. Absent unusual circumstances, ACM will utilize these guidelines when voting proxies on behalf of its clients.

A. Election of Board of Directors

ACM believes that a Board of Directors should primarily be independent, not have significant ties to management and consist of members who are all elected annually. In addition, ACM believes that important Board committees (e.g., audit, nominating and compensation committees) should be entirely independent.

In general,

- ACM will support the election of directors that result in a Board made up of a majority of independent directors.
- ACM will support the election of independent directors to serve on the audit, compensation, and/or nominating committees of a Board of Directors.

- ACM will hold all directors accountable for the actions of the Board's committees. For example, ACM will consider withholding votes for nominees who have recently approved compensation arrangements that ACM deems excessive or proposed equity-based compensation plans that unduly dilute the ownership interests of shareholders.
- ACM will support efforts to declassify existing Boards, and will vote against efforts by companies to adopt classified Board structures.
- ACM will vote against proposals for cumulative voting, confidential stockholder voting and the granting of pre-emptive rights.
- ACM will vote for proposals to require a majority for election of directors.

B. Approval of Independent Auditors

ACM believes that the relationship between the company and its auditors should be limited primarily to the audit engagement and closely allied audit-related and tax services, although non-audit services may be provided so long as they are consistent with the requirements of the Sarbanes-Oxley Act and, if required, have been approved by an independent audit committee. ACM will also consider the reputation of the auditor and any problems that may have arisen in the auditor's performance of services.

C. Executive Compensation

ACM believes that appropriately designed equity-based compensation plans, approved by shareholders, can be an effective way to align the interests of shareholders and the interests of management, employees, and directors. However, ACM is opposed to plans that substantially dilute shareholders' ownership interests in the company or have objectionable structural features.

- ACM will generally vote against plans where total potential dilution (including all equity-based plans) seems likely to exceed 15% of shares outstanding over ten years and extends longer than ten years.
- ACM will generally vote against plans if annual option grants exceed 2% of shares outstanding.
- ACM will vote for annual (1 year) "say on pay" cycles.
- ACM will support lock-ups for non-cash compensation as long as it does not extend post employment.

ACM will support proposals to require shareholder approval of golden parachutes. These total and annual dilution thresholds are guidelines, not ceilings, and when assessing a plan's impact on client shareholdings ACM considers other factors such as specific industry practices, company and stock performance and management credibility. The Proxy Administrator may consult with the relevant analyst(s) or portfolio manager(s) or, if appropriate, members of senior management, to determine when or if it may be appropriate to exceed these guidelines.

- ACM will typically vote against plans that have any of the following structural features:
 - Ability to re-price underwater options without shareholder approval.
 - The unrestricted ability to issue options with an exercise price below the stock's current market price.
 - Automatic share replenishment ("evergreen") feature.
- ACM is supportive of measures intended to increase long-term stock ownership by executives. These may include:
 - Requiring senior executives to hold a minimum amount of stock in the company (frequently expressed as a certain multiple of the executive's salary).
 - Using restricted stock grants instead of options.
 - Utilizing phased vesting periods or vesting tied to company specific milestones or stock performance.
 - ACM will generally support the use of employee stock purchase plans to increase company stock ownership by employees, provided that shares purchased under the plan are acquired for no less than 85% of their market value.

In assessing a company's executive compensation plan, ACM will weigh all components of the plan. For example, the grant of stock options to executives of a company in a particular year may appear excessive if that grant goes above 2% of the shares outstanding of the company. However, such grants may be appropriate if the senior management of the company has accepted significantly reduced cash compensation for the year in lieu of receiving a greater number of options.

D. Corporate Structure Matters/Anti-Takeover Defenses

As a general matter, ACM opposes anti-takeover measures and other proposals designed to limit the ability of shareholders to act on possible transactions. In general,

- Because a classified board structure prevents shareholders from electing a full slate of directors annually, ACM will typically vote against proposals to create classified boards and vote in favor of shareholder proposals to declassify a board.
- ACM will vote for proposals to subject shareholder rights plans (“poison pills”) to a shareholder vote.
- ACM will vote for shareholder proposals that seek to eliminate supermajority voting requirements and oppose proposals seeking to implement supermajority voting requirements.
- ACM will generally vote against proposals to authorize preferred stock whose voting, conversion, dividend and other rights are determined at the discretion of the Board of Directors when the stock is issued when used as an anti-takeover device. However, such “blank check” preferred stock may be issued for legitimate financing needs and ACM can vote for proposals to issue such preferred stock in those circumstances.
- ACM will vote for proposals to lower barriers to shareholder action (for example, limiting rights to call special meetings or act by written consent). ACM will support resolutions to call special meetings at >25% threshold.
- ACM will vote against proposals for a separate class of stock with disparate voting rights.
- ACM will consider on a case-by-case basis board-approved proposals regarding changes to a company’s capitalization, however ACM will generally vote in favor of proposals authorizing the issuance of additional common stock (except in the case of a merger, restructuring or other significant corporate event which will be handled on a case-by-case basis).

E. State of Incorporation/Offshore Presence

Under ordinary circumstances, ACM will not interfere with a choice to reincorporate or reorganize a company in a different jurisdiction, provided that management’s decision has been approved by a Board of Directors. ACM recognizes that there may be benefits to reincorporation (such as tax benefits and more developed business laws in the jurisdiction of reincorporation). Each proposal to reincorporate in offshore tax havens will be reviewed on a case-by-case basis to determine whether such actions are in the best interests of the shareholders of the company including ACM’s clients.

F. Environmental/Social Policy Issues

ACM believes that “ordinary business matters” are primarily the responsibility of management and should be approved solely by the company’s Board of Directors. ACM recognizes that certain social and environmental issues raised in shareholder proposals are the subjects of vigorous public debate and many are the subject of legal statutes or regulation by federal and/or state agencies. ACM generally supports management on these types of proposals, though exceptions may be made in certain instances where ACM believes a proposal has substantial economic implications. ACM expects that the companies in which clients’ assets are invested will act as responsible corporate citizens.

G. Circumstances Under Which ACM Will Abstain From Voting

ACM will seek to vote all proxies for clients who have delegated the responsibility to vote such proxies to ACM. Under certain circumstances, the costs to clients associated with voting such proxies would far outweigh the benefit derived from exercising the right to vote. In those circumstances, ACM will make a case-by-case determination on whether or not to vote such proxies. In the case of countries that require so-called “share blocking,” ACM may also abstain from voting. Additionally, where clients have implemented securities lending arrangements with outside parties to generate additional revenues. ACM will not be able to vote securities that are on loan .. Finally, ACM may be required to abstain from voting on a particular proxy in a situation where a conflict exists between ACM and its client. The policy for resolution of such conflicts is described below in Section VII.

V. Recordkeeping

ACM will maintain records relating to the proxies voted on behalf of its clients in accordance with Section 204-2 of the Investment Advisers Act of 1940, as amended. Those records will include:

- A copy of ACM's proxy voting policies and procedures;
- Proxy statements received regarding client securities (if such proxies are available on the SEC's EDGAR system or a third party undertakes to promptly provide a copy of such documents to ACM, ACM does not need to retain a separate copy of the proxy statement);

- A record of each vote cast;
- A copy of any document created by ACM that was material to making a decision on how to vote a proxy for a client or that details the basis for such a decision; and
- Each written client request for proxy voting records and ACM' s written response to any client request (whether written or oral) for such records.

All records described above will be maintained in an easily accessible place for six years and will be maintained in the offices of ACM for two years after they are created.

VI. Identification and Resolution of Conflicts with Clients

As fiduciary to its clients, ACM puts the interests of its clients ahead of its own. In order to ensure that relevant personnel of ACM are able to identify potential conflicts of interest, ACM will take the following steps:

- Quarterly, the Compliance Officer will seek information from the supervisor of each functional unit of ACM (marketing, operations, etc.) Each supervisor will be asked to provide a list of significant clients or prospective clients of ACM. For example, a supervisor would report the fact that ACM was in discussions with a corporate client considering management of the corporation' s pension plan assets.
- The Compliance Officer will compile a list of the companies identified (the "Conflicted Companies") and provide that list to the Proxy Administrator.
- The Proxy Administrator will compare the list of Conflicted Companies with the names of companies for which he expects to receive or has received proxy statements (the "Proxy Companies"). If a Conflicted Company is also a Proxy Company, the Proxy Administrator will report that fact to the Compliance Officer and members of senior management of ACM.

The Compliance Officer and designated members of senior management will then determine if a conflict of interest exists between ACM and its client. If they determine that a conflict exists, they will take the following steps to seek to resolve such conflict prior to voting any proxies relating to these Conflicted Companies.

- If the Proxy Administrator expects to vote the proxy of the Conflicted Company strictly according to the guidelines contained in these Proxy Voting Policies (the "Policies"), he will (i) inform the Compliance Officer and designated members of senior management of that fact, (ii) vote the proxies and (iii) record the existence of the conflict and the resolution of the matter.
- If the Proxy Administrator intends to vote in a manner inconsistent with the guidelines contained herein or, if the issues raised by the proxy are not contemplated by these Policies, and the matters involved in such proxy could have a material economic impact on the client(s) involved, the Proxy Administrator will seek instruction on how the proxy should be voted from:
 - The client, in the case of an individual or corporate client;
 - The Board of Directors, or any committee thereof identified by the Board, in the case of a Fund; or
 - The adviser, in situations where the Adviser acts as a sub-adviser to such adviser.

ACM will provide all reasonable assistance to each party to enable such party to make an informed decision.

If the client or Board of Directors, as the case may be, fails to instruct the Proxy Administrator on how to vote the proxy, the Proxy Administrator will generally abstain from voting in order to avoid the appearance of impropriety. If however, the failure of ACM to vote its clients' proxies would have a material adverse economic impact on ACM' s clients' securities holdings in the Conflicted Company, ACM may vote such proxies in order to protect its clients' interests. In either case, the Proxy Administrator will record the existence of the conflict and the resolution of the matter.

Adopted as of June 6, 2003

Last revised: June 4, 2012

Item 29. Persons Controlled by or Under Common Control

Not applicable

Item 30. Indemnification

Article IV of the Registrant's Declaration of Trust permits Trustee and officer indemnification by By-Law, contract and vote. Article XI of the By-Laws contains indemnification provisions. Registrant's Trustees and officers are insured under a standard mutual fund errors and omissions insurance policy covering loss incurred by reason of negligent errors and omissions committed in their capacities as such.

The distribution agreement of the Registrant also provides for reciprocal indemnity of the principal underwriter, on the one hand, and the Trustees and officers, on the other.

Item 31. Business and other Connections of Investment Advisers

Reference is made to: (i) the information set forth under the caption “Management and Organization” in the Statement of Additional Information; (ii) the Eaton Vance Corp. Form 10-K filed under the Securities Exchange Act of 1934 (File No. 1-8100); and (iii) the Form ADV of Eaton Vance Management (File No. 801-15930), Boston Management and Research (File No. 801-43127) and Atlanta Capital Management Company, LLC (File No. 801-52179) filed with the Commission, all of which are incorporated herein by reference.

Item 32. Principal Underwriters

(a) Registrant’s principal underwriter, Eaton Vance Distributors, Inc., a wholly-owned subsidiary of Eaton Vance Corp., is the principal underwriter for each of the registered investment companies named below:

Eaton Vance Growth Trust	Eaton Vance Mutual Funds Trust
Eaton Vance Investment Trust	Eaton Vance Series Fund, Inc.
Eaton Vance Managed Income Term Trust	Eaton Vance Series Trust II
Eaton Vance Municipals Trust	Eaton Vance Special Investment Trust
Eaton Vance Municipals Trust II	Eaton Vance Variable Trust

EXHIBIT INDEX

The following exhibits are filed as part of this amendment to the Registration Statement pursuant to Rule 483 of Regulation C.

Exhibit No.	Description
(a) (6)	Amended and Restated Establishment and Designation of Series of Shares of Beneficial Interest, Without Par Value, as amended and restated August 6, 2012
(i) (2)	Consent of Internal Counsel dated January 28, 2013
(j) (1)	Consent of Independent Registered Public Accounting Firm for Eaton Vance Atlanta Capital Focused Growth Fund, Eaton Vance Atlanta Capital Select Equity Fund and Eaton Vance Atlanta Capital SMID-Cap Fund dated January 28, 2013
(2)	Consent of Independent Registered Public Accounting Firm dated January 28, 2013 for a series of Eaton Vance Mutual Funds Trust which is included in this Post-Effective Amendment

EATON VANCE GROWTH TRUST

Amended and Restated
Establishment and Designation of Series of Shares
of Beneficial Interest, Without Par Value

The undersigned, being a duly authorized officer of Eaton Vance Growth Trust (the "Trust"), hereby certifies that a majority of the Trustees of the Trust have approved this amendment to the Trust's Declaration of Trust to establish and designate the following four additional series of the Trust and classes thereof effective August 29, 2012, in accordance with the provisions of the Trust's Declaration of Trust dated May 25, 1989, as amended:

Eaton Vance Hexavest Emerging Markets Equity Fund - Classes A, C and I
Eaton Vance Hexavest Global Equity Fund - Classes A, C and I
Eaton Vance Hexavest International Equity Fund - Classes A, C and I
Eaton Vance Hexavest U.S. Equity Fund - Classes A, C and I

The foregoing series shall be in addition to the currently existing series of the Trust and classes thereof listed in Appendix A (all such series, the "Funds"). The relative rights and preferences of each of the Funds and each class thereof are as follows:

1. The rights and preferences of each Fund and designated class thereof shall be as set forth in the Declaration of Trust. In addition, investment objective, investment policies, purchase price, right of redemption, dividend rights and conversion rights of each Fund and any class thereof shall be as set forth in its registration statement, as amended, filed with the Securities and Exchange Commission.
2. The Trustees (including any successor Trustees) shall have the right at any time and from time to time to reallocate assets and expenses or to change the designation of any Fund or class now or hereafter created, or to otherwise change the special and relative rights of any such Fund or class, and to terminate or add a Fund or class as provided in the Declaration of Trust.
3. Any Fund may merge or consolidate with any other corporation, association, trust or other organization or may sell, lease or exchange all or substantially all of its property, including its good will, upon such terms and conditions and for such consideration when and as authorized by the Trustees; and any such merger, consolidation, sale, lease or exchange shall be deemed for all purposes to have been accomplished under and pursuant to the statutes of the Commonwealth of Massachusetts. The Trustees may also at any time sell and convert into money all the assets of any Fund. Upon making provision for the payment of all outstanding obligations, taxes and other liabilities, accrued or contingent, of such Fund, the Trustees shall distribute the remaining assets of such Fund ratably among the holders of the outstanding shares. Upon completion of the distribution of the remaining proceeds or the remaining assets as provided herein, the Fund shall terminate and the Trustees shall be discharged of any and all further liabilities and duties hereunder with respect to such Fund and the right, title and interest of all parties with respect to such Fund shall be canceled and discharged.

IN WITNESS WHEREOF and in accordance with the provisions of Section 7 of Article XIV of the Declaration of Trust, the undersigned has executed this instrument on January 25, 2013.

/s/ Maureen A. Gemma
Maureen A. Gemma
Secretary to the Trust
