^ Generally, the interest rate on floating interest rate investments is at benchmark rate plus spread. The borrower has an option to choose the benchmark rate, such as the London Interbank Offered Rate ("LIBOR"), Secured Overnight Financing Rate including adjustment, if any ("SOFR") or the U.S. Prime rate. The spread may change based on the type of rate used. The terms in the Consolidated Schedule of Investments disclose the actual interest rate in effect as of the reporting period. LIBOR and SOFR loans are typically indexed to 30-day, 60-day, 90-day or 180-day rates (1M, 3M or 6M, respectively) at the borrower's option. LIBOR and SOFR loans may be subject to interest floors. As of September 30, 2023, rates for weekly 1M L, 3M L 6M L, 1M S, 3M S and 6M S are 5.43%, 5.66%, 5.90%, 5.32%, 5.40% and 5.47%, respectively. AB Private Credit Investors Corporation (the “Fund,” “we,” “our,” and “us”), an externally managed, non-diversified, closed-end, management investment company that elected to be regulated as a business development company (“BDC”) under the Investment Company Act of 1940, as amended (the “1940 Act”), was incorporated under the laws of the state of Maryland on February 6, 2015. The Fund was formed to invest in primary-issue middle-market credit opportunities that are directly sourced and privately negotiated. AB Private Credit Investors LLC serves as the Fund’s external investment adviser (the “Adviser”).

The Fund is conducting private offerings (each a “Private Offering”) of its common stock to investors in reliance on an exemption from the registration requirements of the Securities Act of 1933, as amended (the “Securities Act”). At the closing of any Private Offering, each investor will make a capital commitment (a “Capital Commitment”) to purchase Shares pursuant to a subscription agreement entered into with the Fund. All investors will be committed to the Fund for at least three years from the date of their initial Capital Commitment, subject to the terms described in the Fund’s Private Placement Memorandum. Investors will be required to fund drawdowns to purchase Shares up to the amount of their respective Capital Commitment on an as-needed basis each time the Fund delivers a capital draw-down notice to its investors.

On September 29, 2017, the Fund completed the initial closing (“Initial Closing”) of its Private Offering after entering into subscription agreements (collectively, the “Subscription Agreements”) with several investors, providing for the private placement of Shares. As of September 30, 2023, the Fund had total Capital Commitments of \$629,019,653, of which 14% or \$90,663,743 is unfunded. Capital Commitments may be drawn down by the Fund on a pro rata basis, as needed (including follow-on investments), for paying the Fund’s expenses, including fees under the Amended and Restated Advisory Agreement (as defined below), and/or maintaining a reserve account for the payment of future expenses or liabilities.

The Fund’s fiscal year ends on December 31.

On June 14, 2019, the Adviser established ABPCI Direct Lending Fund CLO VI Ltd (“CLO VI”), an exempted company incorporated with limited liability under the laws of the Cayman Islands. CLO VI is 100% owned by the Fund and is consolidated in the Fund’s consolidated financial statements. CLO VI issued Class B-R Notes, Class C-R Notes and Subordinated Notes to the Fund through AB PCI Direct Lending Fund CLO VI Depositor LLC, a wholly-owned subsidiary of the Fund established on June 28, 2019.

On February 7, 2020, the Fund and an affiliate of Abbott Capital Management, LLC (“Abbott”) became members of, ABPCIC Equity Holdings, LLC (“ABPCICE”), a Delaware limited liability company and a special purpose vehicle designed to invest in private equity investments sourced by Abbott. The Fund is the managing member and owns 100% of the Class L Units and 93% of the Class A Units of ABPCICE. As a result, the Fund consolidates ABPCICE in its consolidated financial statements and records a non-controlling interest of the equity interests in ABPCICE not held by the Fund.

On July 30, 2020, February 11, 2021 and January 13, 2023, the Adviser established ABPCIC Funding II LLC (“ABPCIC Funding II”), ABPCIC Funding III LLC (“ABPCIC Funding III”) and ABPCIC Funding IV LLC (“ABPCIC Funding IV”), respectively, Delaware limited liability companies. ABPCIC Funding II, ABPCIC Funding III and ABPCIC Funding IV are 100% owned by the Fund and are consolidated in the Fund’s consolidated financial statements commencing from the date of their formation.

On January 5, 2023, the Adviser established ABPCI Direct Lending Fund CLO XIII LTD (“CLO XIII”), a private company limited by shares incorporated under the laws of Jersey. CLO XIII is 100% owned by the Fund and is consolidated in the Fund’s consolidated financial statements commencing from the date of its formation. CLO XIII issued Class D Notes and Subordinated Notes to the Fund through ABPCI Direct Lending Fund CLO XIII Depositor LLC, a wholly-owned subsidiary of the Fund established on April 3, 2023.

The Adviser has established certain additional consolidated subsidiaries that are subject to U.S. federal and state corporate level income taxes to hold certain equity or equity-like investments in portfolio companies.

2. Significant Accounting Policies

The Fund is an investment company under accounting principles generally accepted in the United States of America (“GAAP”) and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 946, *Financial Services – Investment Companies*. The Fund has prepared the consolidated financial statements and related financial information pursuant to the requirements for reporting on Form 10-Q and Articles 6 and 10 of Regulation S-X. Accordingly, we have not included in this quarterly report all of the information and notes required by GAAP for annual financial statements. In the opinion of management, the unaudited financial information for the interim period presented in this report reflects all normal and recurring adjustments necessary for a fair statement of financial position and results from operations. Operating results for interim periods are not necessarily indicative of operating results for an entire year.

[Table of Contents](#)

The functional currency of the Fund is U.S. dollars and these consolidated financial statements have been prepared in that currency.

Consolidation

The Fund will generally consolidate any wholly or substantially owned subsidiary when the design and purpose of the subsidiary is to act as an extension of the Fund's investment operations and to facilitate the execution of the Fund's investment strategy. Accordingly, the Fund consolidated the results of its wholly or substantially owned subsidiaries in its consolidated financial statements. The portion of net assets that is attributable to non-controlling interest in ABPCICE is presented as "Non-Controlling Interest in ABPCIC Equity Holdings, LLC", a component of total equity, on the Fund's consolidated statements of assets and liabilities. All intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Certain previously disclosed industry classifications have been expanded to add additional sub-industries. Investments fitting into the new sub-industries have been reclassified accordingly.

Valuation of Investment Companies

Investments in investment companies are valued at fair value. Fair values are generally determined utilizing the net asset value ("NAV") supplied by, or on behalf of, management of each investment company, which is net of management and incentive fees or allocations charged by the investment company and is in accordance with the "practical expedient", as defined by ASC 820. NAVs received by, or on behalf of, management of each investment company are based on the fair value of the investment company's underlying investments in accordance with policies established by management of each investment company, as described in each of their financial statements and offering memorandum.

Cash and Cash Equivalents

Cash consists of demand deposits and money market accounts. Cash is carried at cost, which approximates fair value. The Fund maintains deposits of its cash with financial institutions, and, at times, cash held in bank accounts may exceed the Federal Deposit Insurance Corporation insured limit. The Fund considers all highly liquid investments, with original maturities of less than ninety days and money market mutual funds as cash equivalents.

Revenue Recognition

Investment transactions are recorded on a trade-date basis. Interest income is recognized on an accrual basis. Interest income on debt instruments is accrued and recognized for those issuers who are currently paying in full or expected to pay in full. For those issuers who are in default or expected to default, interest is not accrued and is only recognized when received. Generally, when interest and/or principal payments on a loan become past due, or if the Fund otherwise does not expect the borrower to be able to service its debt and other obligations, the Fund will place the loan on non-accrual status and will cease recognizing interest income on that loan for financial reporting purposes until all principal and interest have been brought current through payment or due to restructuring such that the interest income is deemed to be collectible. The Fund generally restores non-accrual loans to accrual status when past due principal and interest is paid and, in the management's judgment, is likely to remain current. Interest income and expense include discounts accreted and premiums amortized on certain debt instruments as determined in good faith by the Adviser and calculated using the effective interest method. Loan origination fees, original issue discounts and market discounts or premiums are capitalized as part of the underlying cost of the investments and accreted or amortized over the life of the investment as interest income.

Realized gains and losses on investment transactions are determined on the specific identification method.

Certain investments in debt securities may contain a contractual payment-in-kind ("PIK") interest provision. The PIK provisions generally feature the obligation, or the option, at each interest payment date of making interest payments in (i) cash, (ii) additional debt or (iii) a combination of cash and additional debt. PIK interest, computed at the contractual rate specified in the investment's credit agreement, is accrued as interest income and recorded as interest receivable up to the interest payment date. On the

[Table of Contents](#)

interest payment date, the accrued interest receivable attributable to PIK is added to the principal balance of the investment. When additional debt is received on the interest payment date, it typically has the same terms, including maturity dates and interest rates, as the original loan. PIK interest generally becomes due on the investment's maturity date or call date.

The Fund may earn various fees during the life of the loans. Such fees include, but are not limited to, syndication, commitment, administration, prepayment and amendment fees, some of which are paid to the Fund on an ongoing basis. These fees and any other income are recognized as earned. Upon prepayment of a loan or debt security, any prepayment premiums, unamortized upfront loan origination fees and unamortized discounts are recorded as interest income.

Costs associated with entering into an investment are included in the cost of the investment, and any costs incurred relating to an unconsummated investment are expensed.

Distributions received from an equity interest, limited liability company or a limited partnership investment are evaluated to determine if the distribution should be recorded as dividend income or a return of capital.

Investment Transactions

Investment transactions are accounted for on trade date. Realized gains (losses) on investments sold are recorded on the basis of specific identification method for both consolidated financial statement and U.S. federal income tax purposes. Payable for investments purchased and receivable for investments sold on the Consolidated Statements of Assets and Liabilities, if any, represents the cost of purchases and proceeds from sales of investment securities, respectively, for trades that have been executed but not yet settled.

Non-Accrual Investments

Investments are placed on non-accrual status when it is probable that principal, interest or dividends will not be collected according to the contractual terms. Accrued interest or dividends generally are reversed when an investment is placed on non-accrual status. Interest or dividend payments received on non-accrual investments may be recognized as income or applied to principal depending upon management's judgment. Non-accrual investments are restored to accrual status when past due principal and interest or dividends are paid and, in management's judgment, principal and interest or dividend payments are likely to remain current. The Fund may make exceptions to this treatment if an investment has sufficient collateral value and is in the process of collection. As of September 30, 2023, the Fund had certain investments held in four portfolio companies on non-accrual status, which represented 1.79% and 0.27% of the total investments (excluding investments in cash equivalents, if any) at amortized cost and at fair value. As of December 31, 2022, the Fund had certain investments held in three portfolio companies on non-accrual status, which represented 0.96% and 0.26% of the total investments (excluding investments in cash equivalents, if any) at amortized cost and at fair value.

Credit Facility Related Costs, Expenses and Deferred Financing Costs

The Revolving Credit Facilities (as defined in Note 4) are recorded at carrying value, which approximates fair value. Interest expense and unused commitment fees on the Revolving Credit Facilities are recorded on an accrual basis. Unused commitment fees are included in interest and borrowing expenses in the consolidated statements of operations. Deferred financing costs include capitalized expenses related to the closing of the Revolving Credit Facilities. Amortization of deferred financing costs is computed on the straight-line basis over the contractual term. The amortization of such costs is included in interest and borrowing expenses in the consolidated statements of operations, with any unamortized amounts included in deferred financing costs on the consolidated statements of assets and liabilities.

Notes Payable Related Costs, Expenses and Unamortized Debt Issuance Costs

The Notes (as defined in Note 4) are recorded at carrying value. Interest expense on notes payable is recorded on an accrual basis. Debt issuance costs relating to notes payable are amortized on a straight-line basis over the contractual term and included in interest and borrowing expenses in the consolidated statements of operations. The unamortized debt issuance costs are included as a direct reduction of the carrying value of the notes payable (i.e. a contra liability).

Upon early termination or partial principal pay down of the Notes, the unamortized costs related to the Notes are accelerated into interest and borrowing expenses on the Fund's consolidated statements of operations.

[Table of Contents](#)

Secured Borrowings

The Fund may finance the purchase of certain investments through sale/buy-back agreements. In a sale/buy-back agreement, the Fund enters into a trade to sell an investment and contemporaneously enters into a trade to buy the same investment back on a specified date in the future with the same counterparty. The Fund uses sale/buy-back agreements as a short-term financing alternative to its existing Revolving Credit Facilities. The Fund accounts for its sale/buy-back agreements (the “Secured Borrowings”) as secured borrowings and continues to present the investment as an asset and the obligation to return the cash received as a liability within secured borrowings on the consolidated statements of assets and liabilities. Interest income earned on investments pledged under sale/buy-back agreements and financing charges associated with the sale/buy-back agreements are included within interest income and interest and borrowing expenses, respectively, on the consolidated statements of operations. Accrued interest receivable on investments and accrued financing charges on the sale/buy-back agreements are included within interest receivable and interest and borrowing expenses payable, respectively, on the consolidated statements of assets and liabilities.

Income Taxes

ASC 740, “Accounting for Uncertainty in Income Taxes” (“ASC 740”) provides guidance on the accounting for and disclosure of uncertainty in tax positions. ASC 740 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund’s tax returns to determine whether the tax positions are “more-likely-than-not” of being sustained by the applicable tax authority. Tax positions deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. Based on its analysis of its tax position for all open tax years (the current and prior two years), the Fund has concluded that it does not have any uncertain tax positions that met the recognition or measurement criteria of ASC 740. Such open tax years remain subject to examination and adjustment by tax authorities.

The Fund has elected to be treated and intends to continue to be treated for federal income tax purposes as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). So long as the Fund is able to maintain its status as a RIC, it intends not to be subject to U.S. federal income tax on the portion of its taxable income and gains distributed to stockholders, if any. To qualify for RIC tax treatment, the Fund is required to distribute at least 90% of its investment company taxable income annually, meet diversification and income requirements quarterly, meet gross income requirements annually and file Form 1120-RIC, as provided by the Code. In order for the Fund not to be subject to U.S. federal excise taxes, it must distribute annually an amount at least equal to the sum of (i) 98% of its net ordinary income (taking into account certain deferrals and elections) for the calendar year, (ii) 98.2% of its capital gains in excess of capital losses for the one-year period ending on October 31 of the calendar year and (iii) any net ordinary income and capital gains in excess of capital losses for preceding years that were not distributed during such years. The Fund, at its discretion, may carry forward taxable income in excess of calendar year dividends and pay a 4% nondeductible U.S. federal excise tax on this income. The Fund will accrue excise tax on estimated undistributed taxable income as required. As of September 30, 2023, and December 31, 2022, \$0 and \$0, respectively, of accrued excise taxes remained payable. For the three and nine months ended September 30, 2023, the Fund accrued income taxes of \$96,092 and \$374,118, respectively. For the three and nine months ended September 30, 2022, the Fund accrued income taxes of \$382,072 and \$949,155, respectively. As of September 30, 2023 and December 31, 2022, \$185,657 and \$1,303,918, respectively, of accrued income taxes remained payable.

The Fund may be subject to taxes imposed by countries in which the Fund invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized gain (loss) as such income and/or gains are earned.

The Fund remains subject to examination by U.S. federal and state jurisdictions, as well as international jurisdictions, and upon completion of these examinations (if undertaken by the taxing jurisdiction) tax adjustments may be necessary and retroactive to all open tax years.

Certain of the Fund’s consolidated subsidiaries are subject to U.S. federal and state corporate-level income taxes.

Use of Estimates

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities, if any, at the date of the consolidated financial statements, and the reported amounts of revenues and expenses recorded during the reporting period. Actual results could differ from those estimates and such differences could be material.

[Table of Contents](#)

Distributions

Distributions from net investment income and net realized capital gains are determined in accordance with U.S. federal income tax regulations, which may differ from those amounts determined in accordance with GAAP. The Fund may pay distributions in excess of its taxable net investment income. This excess would be a tax-free return of capital in the period and reduce the stockholder's tax basis in its Shares. These book/tax differences are either temporary or permanent in nature. To the extent these differences are permanent they are charged or credited to paid-in capital in excess of par or distributable earnings, as appropriate, in the period that the differences arise. Temporary and permanent differences are primarily attributable to differences in the tax treatment of certain loans and the tax characterization of income and non-deductible expenses. These differences are generally determined in conjunction with the preparation of the Fund's annual RIC tax return. Distributions to common stockholders are recorded on the ex-dividend date. The amount to be paid out as a distribution is determined by the Board each quarter and is generally based upon the earnings estimated by the Adviser. The Fund may pay distributions to its stockholders in a year in excess of its net ordinary income and capital gains for that year and, accordingly, a portion of such distributions may constitute a return of capital for U.S. federal income tax purposes. The Fund intends to timely distribute to its stockholders substantially all of its annual taxable income for each year, except that the Fund may retain certain net capital gains for reinvestment and, depending upon the level of the Fund's taxable income earned in a year, the Fund may choose to carry forward taxable income for distribution in the following year and pay any applicable U.S. federal excise tax. The specific tax characteristics of the Fund's distributions will be reported to stockholders after the end of the calendar year. All distributions will be subject to available funds, and no assurance can be given that the Fund will be able to declare such distributions in future periods.

The Fund has adopted a dividend reinvestment plan that provides for stockholders to receive dividends or other distributions declared by the Board in cash unless a stockholder elects to "opt in" to the dividend reinvestment plan. As a result, if the Board declares a cash distribution, then the stockholders who have "opted in" to the dividend reinvestment plan will have their cash distributions automatically reinvested in additional Shares, rather than receiving the cash distribution.

3. Related Party Transactions

Advisory Agreement

On November 13, 2019, the Fund entered into the amended and restated advisory agreement (the "Amended and Restated Advisory Agreement"), replacing the advisory agreement the Fund entered into with the Adviser on July 27, 2017 (the "Advisory Agreement"), pursuant to which the Fund will pay the Adviser, quarterly in arrears, a base management fee calculated at an annual rate of 1.50%. The base management fee is calculated based on a percentage of the average outstanding assets of the Fund (which equals the gross value of equity and debt instruments, including investments made utilizing leverage), excluding cash and cash equivalents, during such fiscal quarter. The average outstanding assets is calculated by taking the average of the amount of assets of the Fund at the beginning and end of each month that occurs during the calculation period. The base management fee is calculated and paid quarterly in arrears but will be accrued monthly by the Fund over the fiscal quarter for which such base management fee is paid.

On March 24, 2022, the Fund entered into the second amended and restated investment advisory agreement (the "Second Amended and Restated Advisory Agreement"), replacing the Amended and Restated Advisory Agreement pursuant to which effective March 24, 2022 the base management fee shall be calculated at an annual rate of 1.375%. On March 24, 2022, the Fund and the Adviser also entered into a fee waiver letter pursuant to which the Adviser has agreed to waive a portion of the management fee in excess of the base management fee calculated at the reduced annual rate of 1.375% for the period January 1, 2022 through March 24, 2022.

For the three and nine months ended September 30, 2023, the Fund incurred a management fee of \$4,276,488 and \$12,419,430, respectively. For the three and nine months ended September 30, 2022, the Fund incurred a management fee of \$3,644,259 and \$10,438,278, respectively, of which \$0 and \$283,566, respectively, were voluntarily waived by the Adviser. As of September 30, 2023 and December 31, 2022, \$4,276,488 and \$3,778,123, respectively, of accrued management fee remained payable.

The Fund will also pay the Adviser an incentive fee that provides the Adviser with a share of the income that the Adviser generates for the Fund. The incentive fee will consist of an income-based incentive fee component and a capital-gains component, which are largely independent of each other, with the result that one component may be payable even if the other is not.

Income-Based Incentive Fee: The income-based incentive fee is calculated and payable quarterly in arrears based on the Fund's net investment income prior to any deductions with respect to such income-based incentive fees and capital gains incentive fees ("Pre-Incentive Fee Net Investment Income" or "PIFNII") for the quarter, as further described below. PIFNII means interest income, dividend income and any other income (including any other fees, such as commitment, origination, structuring, diligence, managerial and consulting fees or other fees the Fund receives from portfolio companies) that the Fund accrues during the fiscal quarter, minus the Fund's operating expenses for the quarter (including the base management fee, expenses payable under the administration agreement (the "Administration Agreement") the Fund has entered into with State Street Bank and Trust (the "Administrator"), and any interest expense and dividends paid on any issued and outstanding indebtedness or preferred stock, respectively, but excluding, for avoidance of doubt, the income-based incentive fee, as well as the capital gains incentive fee

[Table of Contents](#)

(described below), accrued under GAAP). PIFNII also includes, in the case of investments with a deferred interest feature (such as original issue discount, debt instruments with pay-in-kind interest and zero-coupon securities), accrued income that the Fund has not yet received in cash. The Adviser is not under any obligation to reimburse the Fund for any part of the income-based incentive fees it received that was based on accrued interest that the Fund never actually received.

PIFNII does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Because of the structure of the income-based incentive fee, it is possible that the Fund may accrue such income-based incentive fee in a quarter where the Fund incurs a net loss. For example, if the Fund receives PIFNII in excess of a hurdle rate (as defined below) for a quarter, the Fund will accrue the applicable income-based incentive fee even if the Fund has incurred a realized and/or unrealized capital loss in that quarter. However, cash payment of the income-based incentive fee may be deferred in this situation, subject to the restrictions detailed at the end of this section.

PIFNII, expressed as a rate of return on the average value of the Fund's net assets (defined as total assets, less indebtedness and before taking into account any incentive fees payable during the period) as of the first day of each month during the course of the immediately preceding calendar quarter, will be compared to various "hurdle rates," with the income-based incentive fee rate of return increasing at each hurdle rate.

Description of Quarterly Incentive Fee Calculations

The Fund pays the Adviser an income-based incentive fee with respect to PIFNII in each calendar quarter as follows:

- No income-based incentive fee in any calendar quarter in which PIFNII does not exceed 1.5% per quarter (6% per annum), the "6% Hurdle Rate";
- 100% of PIFNII with respect to that portion of such PIFNII, if any, that exceeds the 6% Hurdle Rate but is less than 1.67% in any calendar quarter (the "6% Catch-up Cap"), approximately 6.67% per annum. This portion of PIFNII (which exceeds the 6% Hurdle Rate but is less than the 6% Catch-up Cap) is referred to as the "6% Catch-up." The 6% Catch-up is meant to provide the Adviser with 10.0% of the PIFNII as if hurdle rate did not apply if this net investment income exceeded 1.67% but was less than 1.94% in any calendar quarter; and
- 10.0% of the amount of PIFNII, if any, that exceeds the 6% Catch-up Cap, but is less than 1.94% (the "7% Hurdle Rate"), approximately 7.78% per annum. The 7% Hurdle Rate is meant to limit the Adviser to 10% of the PIFNII until the amount of PIFNII exceeds 1.94%, approximately 7.78% per annum; and
- 100% of PIFNII with respect to that portion of such PIFNII, if any, that exceeds the 7% Hurdle Rate but is less than 2.06% in any calendar quarter (the "7% Catch-up Cap"), approximately 8.24% per annum. This portion of PIFNII (which exceeds the 7% Hurdle Rate but is less than the 7% Catch-up Cap) is referred to as the "7% Catch-up." The 7% Catch-up is meant to provide the Adviser with 15.0% of the PIFNII as if a hurdle rate did not apply if this net investment income exceeded 2.06% but was less than 2.35% in any calendar quarter; and
- 15.0% of the amount of PIFNII, if any, that exceeds the 7% Catch-up Cap, but is less than 2.35% (the "8% Hurdle Rate", approximately 9.41% per annum). The 8% Hurdle Rate is meant to limit the Adviser to 15% of the PIFNII until the amount of PIFNII exceeds 2.35%, approximately 9.41% per annum; and
- 100% of PIFNII with respect to that portion of such PIFNII, if any, that exceeds the 8% Hurdle Rate but is less than 2.50% in any calendar quarter (the "8% Catch-up Cap"), approximately 10% per annum. This portion of PIFNII (which exceeds the 8% Hurdle Rate but is less than the 8% Catch-up cap) is referred to as the "8% Catch-up". The 8% Catch-up is meant to provide the Adviser with 20.0% of the PIFNII as if a hurdle rate did not apply if this net investment income exceeded 2.50% in any calendar quarter; and
- 20.0% of the amount of PIFNII, if any, that exceeds 2.50% in any calendar quarter.

For the three and nine months ended September 30, 2023, the Fund incurred income-based incentive fees of \$3,125,822 and \$8,480,899, respectively. For the three and nine months ended September 30, 2022, the Fund incurred income-based incentive fees of \$1,275,176 and \$4,158,321, respectively. As of September 30, 2023 and December 31, 2022, \$5,726,295 and \$2,534,935, respectively, of accrued income-based incentive fees remained payable.

[Table of Contents](#)

The capital gains fee shall be determined and payable in arrears as of the end of each calendar year (or upon termination of this Agreement as set forth below), and will equal 20.0% of the Fund's aggregate cumulative realized capital gains, if any, from the date of the Fund's election to be regulated as a BDC through the end of each calendar year, computed net of all aggregate cumulative realized capital losses and aggregate cumulative unrealized capital depreciation, less the aggregate amount of any previously paid capital gain incentive fees, with respect to each of the investments in the Fund's portfolio. The Fund's "aggregate cumulative realized capital gains" will not include any unrealized appreciation. The capital gains fee is not subject to any minimum return to stockholders. If such amount is negative, then no capital gains fee will be payable for such year. In the event that this Agreement shall terminate as of a date that is not a calendar year end, the termination date shall be treated as though it were a calendar year end for purposes of calculating and paying a capital gains fee.

While the capital gains fee to be paid is determined above, GAAP requires such fee to be accrued as if the Fund were to be terminated and liquidated at period end hypothetical liquidation. There was no capital gains incentive fee under GAAP recognized for the three and nine months ended September 30, 2023. For the three and nine months ended September 30, 2022, the Fund reduced the previously recognized capital gains incentive fee under GAAP by \$(499,007) and \$(1,283,044), which was not realized. As of September 30, 2023 and December 31, 2022, \$0 and \$0, respectively, of capital gains incentive fee remained payable.

The amount of capital gains incentive fee expense related to a hypothetical liquidation of the portfolio (and assuming no other changes in realized or unrealized gains and losses) would only become payable to the Adviser in the event of a complete liquidation of the Fund's portfolio as of period end and the termination of the Amended and Restated Advisory Agreement on such date. Also, it should be noted that the capital gains incentive fee expense fluctuates with the Fund's overall investment results.

The Fund will defer cash payment of any income-based incentive fee and/or any capital gains incentive fee otherwise earned by the Adviser if during the most recent four full fiscal quarter periods ending on or prior to the date such payment is to be made, the sum of (a) the PIFNII, and (b) the realized capital gain / loss and (c) unrealized capital appreciation/ depreciation expressed as a rate of return on the value of our net assets, is less than 6.0%. Any such deferred fees are carried over for payment in subsequent calculation periods to the extent such payment is payable under the Amended and Restated Advisory Agreement.

Administration Agreement and Expense Reimbursement Agreement

The Fund has entered into the Administration Agreement with the Administrator and a separate expense reimbursement agreement with the Adviser (the "Expense Reimbursement Agreement") under which any allocable portion of the cost of its Chief Compliance Officer and Chief Financial Officer and their respective staffs will be reimbursed by the Fund. Under the Administration Agreement, the Administrator will be responsible for providing the Fund with clerical, bookkeeping, recordkeeping and other administrative services. The Fund will reimburse the Adviser an amount equal to the Fund's allocable portion (subject to the review of its Board) of its overhead resulting from its obligations under the Expense Reimbursement Agreement, including the allocable portion of the cost of its Chief Compliance Officer and Chief Financial Officer and their respective staffs.

Expense Support and Conditional Reimbursement Agreement

On September 29, 2017, the Fund and the Adviser entered into an agreement (the "Expense Support and Conditional Reimbursement Agreement") to limit certain of the Fund's Operating Expenses, as defined below, to no more than 1.5% of the Fund's average quarterly gross assets. To achieve this percentage limitation, the Adviser has agreed to reimburse the Fund for certain Operating Expenses on a quarterly basis (any such payment by the Adviser, an "Expense Payment") and the Fund has agreed to later repay such amounts (any such payment by the Fund, a "Reimbursement Payment"), pursuant to the terms of the Expense Support and Conditional Reimbursement Agreement. The actual percentage of Operating Expenses paid by the Fund in any quarter after deducting any Expense Payment, as a percentage of the Fund's average quarterly gross assets, is referred to as the "Percentage Limit."

Any Expense Payment by the Adviser pursuant to the Expense Support and Conditional Reimbursement Agreement will be subject to repayment by the Fund on a quarterly basis within the three years following the fiscal quarter of the Fund in which the Operating Expenses were paid or absorbed, if the total Operating Expenses for the current quarter, including Reimbursement Payments, expressed as a percentage of the Fund's average gross assets during such quarter is less than the then-current Percentage Limit, if any, and the Percentage Limit that was in effect at the time when the Adviser reimbursed the Operating Expenses that are the subject of the repayment, subject to certain provisions of the Expense Support and Conditional Reimbursement Agreement, as described below. For purposes of the Expense Support and Conditional Reimbursement Agreement, "Operating Expenses" means the Fund's Total Operating Expenses (as defined below), excluding base management fees, incentive fees, distribution and stockholder servicing fees, financing fees and costs, interest expense, brokerage commissions and extraordinary expenses and "Total Operating Expenses" means all of the Fund's operating costs and expenses incurred, as determined in accordance with generally accepted accounting principles for investment companies.

However, no Reimbursement Payment for any quarter will be made if: (1) the Effective Rate of Distributions Per Share (as defined below) declared by the Fund at the time of such Reimbursement Payment is less than or equal to the Effective Rate of Distributions Per Share at the time the Expense Payment was made to which such Reimbursement Payment relates, or (2) the Fund's Operating Expense Ratio at the time of such Reimbursement Payment is greater than or equal to the Operating Expense Ratio (as defined below) at the time the Expense Payment was made to which such Reimbursement Payment relates. For purposes of the Expense Support and Conditional Reimbursement Agreement, "Effective Rate of Distributions Per Share" means the annualized rate (based on a 365-day year) of regular cash distributions per Share exclusive of returns of capital, distribution rate reductions due to distribution and stockholder fees, and declared special dividends or special distributions, if any. The "Operating Expense Ratio" is calculated by dividing Operating Expenses in any quarter by the Fund's average net assets in such quarter.

The specific amount of expenses paid by the Adviser, if any, will be determined at the end of each quarter. The Fund or the Adviser may terminate the Expense Support and Conditional Reimbursement Agreement at any time, with or without notice. The Expense Support and Conditional Reimbursement Agreement will automatically terminate in the event of (a) the termination of the Amended and Restated Advisory Agreement, or (b) the Board of the Fund making a determination to dissolve or liquidate the Fund. Upon termination of the Expense Support and Conditional Reimbursement Agreement, the Fund will be required to fund any Expense Payments, subject to the aforementioned requirements per the Expense Support and Conditional Reimbursement Agreement, that have not been reimbursed by the Fund to the Adviser.

Transfer Agency Agreement

On September 26, 2017, the Fund and Alliance Bernstein Investor Services, Inc. ("ABIS"), an affiliate of the Fund, entered into an agreement pursuant to which ABIS will provide transfer agent services to the Fund. The Fund bears the expenses related to the agreement with ABIS.

For the three and nine months ended September 30, 2023, the Fund accrued \$36,929 and \$108,416, respectively, in transfer agent fees. For the three and nine months ended September 30, 2022, the Fund accrued \$32,503 and \$88,020, respectively, in transfer agent fees. As of September 30, 2023 and December 31, 2022, \$36,929 and \$34,224, respectively, of accrued transfer agent fees remained payable.

Co-investment Activity

The Fund may be prohibited under the 1940 Act from participating in certain transactions with its affiliates without prior approval of the directors who are not interested persons, and in some cases, the prior approval of the SEC. The Fund, the Adviser and certain of their affiliates have been granted exemptive relief by the SEC for the Fund to co-invest with other funds managed by the Adviser or its affiliates in a manner consistent with the Fund's investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors. Pursuant to such exemptive relief, the Fund generally is permitted to co-invest with certain of its affiliates if a "required majority" (as defined in Section 57(o) of the 1940 Act) of the Board make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transaction, including the consideration to be paid, are reasonable and fair to the Fund and its shareholders and do not involve overreaching of the Fund or its shareholders on the part of any person concerned, (2) the transaction is consistent with the interests of the Fund's shareholders and is consistent with its investment objective and strategies, (3) the investment by its affiliates would not disadvantage the Fund, and the Fund's participation would not be on a basis different from or less advantageous than that on which its affiliates are investing and (4) the proposed investment by the Fund would not benefit the Adviser or its affiliates or any affiliated person of any of them (other than the parties to the transaction), except to the extent permitted by the exemptive relief and applicable law, including the limitations set forth in Section 57(k) of the 1940 Act. As a result of exemptive relief, there could be significant overlap in the Fund's investment portfolio and the investment portfolio of other funds managed by the Adviser or its affiliates that could avail themselves of the exemptive relief and that have an investment objective similar to the Fund's.

Affiliates

As defined in the Investment Company Act, the investment is deemed to be a "controlled affiliated person" of the Fund because the Fund owns, either directly or indirectly, 25% or more of the portfolio company's outstanding voting securities or has the power to exercise control over management or policies of such portfolio company. The table below presents the Fund's affiliated investments:

The CLO XIII indenture provides that the holders of the XIII Notes are to receive quarterly interest payments, in arrears, on the 27th day in January, April, July and October of each year, commencing in October 2023. The XIII Notes will mature on April 27, 2035.

The XIII Notes are the secured obligations of the XIII Issuer Entities, and the indenture governing the XIII Notes includes customary covenants and events of default. The XIII Notes have not been, and will not be, registered under the Securities Act or any state securities or “blue sky” laws and may not be offered or sold in the United States absent registration with the Securities and Exchange Commission or an applicable exemption from registration.

The Adviser serves as collateral manager to the XIII Issuer pursuant to a collateral management agreement between the Adviser and the XIII Issuer (the “CLO XIII Collateral Management Agreement”). For so long as the Adviser serves as collateral manager to the XIII Issuer, a collateral management fee shall not be charged.

Secured Borrowings

From time to time, the Fund may engage in sale/buy-back agreements, with Macquarie US Trading LLC (the “Macquarie Sale/Buy Back”), which are a type of secured borrowing. The amount, interest rate and terms of these agreements will be individually negotiated on a transaction-by-transaction basis. Each borrowing is secured by an interest in an underlying asset which is participated or assigned to the sale/buy-back counterparty for the duration of the agreement.

There were no Secured Borrowings outstanding as of September 30, 2023.

Secured Borrowings outstanding as of December 31, 2022, were as follows:

| Loan Name | Trade Date | Maturity Date | bps Daily Rate | Amount |
|---------------|------------|---------------------------------|----------------|--------------------|
| Saviynt, Inc. | 12/22/2022 | 90 days or less from trade date | 2.27 | \$5,917,275 |

As of September 30, 2023 and December 31, 2022 total outstanding borrowings, net of unamortized discount and debt issuance costs, under the Revolving Credit Facilities, Notes, and Secured Borrowings were \$825,709,941 and \$699,022,842, respectively.

5. Fair Value Measurement

In accordance with ASC 820, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also establishes a framework for measuring fair value and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability as of the reporting date.

Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund’s own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation.

[Table of Contents](#)

The three-tier hierarchy of inputs is summarized below:

- Level 1 – Quoted prices in active markets for identical investments.
- Level 2 – Other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 – Significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments at the reporting date).

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. If a fair value measurement uses price data vendors or observable market price quotations, that measurement is usually a Level 2 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes “observable” requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

For certain investments, the Fund uses the net asset value of these investments as a practical expedient to determine their fair value. Due to the uncertainty inherent in valuing such positions, their estimated values could differ significantly from the values that could have been used had a ready market for such positions existed.

Valuation of Investments

Pursuant to the amended SEC Rule 2a-5 of the 1940 Act, the Board designated the Adviser as the Fund’s “valuation designee.” In this capacity, the Adviser is responsible, among other things, for making all fair value determinations relating to the Fund’s portfolio investments, subject to the Board’s oversight. Investments are valued at fair value as determined in good faith by our Adviser, as valuation designee, based on input of management, the audit committee and independent valuation firms that have been engaged to assist in the valuation of each portfolio investment without a readily available market quotation under a valuation policy. The Adviser principally carries out its fair value responsibilities through its Valuation Sub-Committee. This valuation process is conducted at the end of each fiscal quarter.

The fair values of loan investments based upon pricing data vendors or observable market price quotations are generally categorized as Level 2; however, those priced using models with significant unobservable inputs are categorized as Level 3.

In determining the fair value of the Fund’s Level 3 debt and equity positions, the Adviser and the independent valuation firms use the following factors where relevant: loan to value (“LTV”) based on an enterprise value determined using the original purchase price, public equity comparable, recent M&A transaction, and a discounted cash flow (“DCF”) analysis, and yields from comparable loans, comparable high yield bonds, high yield indexes and loan indexes (“comparable yields”).

Due to the inherent uncertainty of valuations, however, estimated fair values may differ from the values that would have been used had a readily available market for the securities existed and the differences could be material.

The following table summarizes the valuation of the Fund’s investments as of September 30, 2023:

For the year ended December 31, 2022, amounts of \$426,294 of Common Stock were transferred into Level 3 from Investments valued at net asset value as a practical expedient due to the decreased transparency of the price inputs used in the valuation of these positions. Further, amounts of \$802,902 of Common Stock were transferred out of Level 3 as these positions are now valued using their net asset values as a practical expedient and therefore are excluded from levels 1, 2 or 3.

The following tables present the ranges of significant unobservable inputs used to value the Fund's Level 3 investments as of September 30, 2023 and December 31, 2022, respectively. These ranges represent the significant unobservable inputs that were used in the valuation of each type of investment. These inputs are not representative of the inputs that could have been used in the valuation of any one investment. Accordingly, the ranges of inputs presented below do not represent uncertainty in, or possible ranges of, fair value measurements of the Fund's Level 3 investments.

6. Commitments & Contingencies

Commitments

The Fund may enter into commitments to fund investments. As of September 30, 2023 and December 31, 2022 the Adviser believed that the Fund had adequate financial resources to satisfy its unfunded commitments. The amounts associated with unfunded commitments to provide funds to portfolio companies are not recorded in the Fund's consolidated statements of assets and liabilities. Since these commitments and the associated amounts may expire without being drawn upon, the total commitment amount does not necessarily represent a future cash requirement. The Fund had the following unfunded commitments by investment types as of September 30, 2023 and December 31, 2022:

- (1) Commitments are generally subject to borrowers meeting certain criteria such as compliance with covenants and certain operational metrics. These amounts may remain outstanding until the commitment period of an applicable loan expires, which may be shorter than its maturity.
- (2) Net of capitalized fees, expenses and original issue discount ("OID").
- (3) A negative fair value was reflected as investments, at fair value in the consolidated statements of assets and liabilities. The negative fair value is the result of the capitalized discount on the loan.

Contingencies

In the normal course of business, the Fund enters into contracts that provide a variety of general indemnifications. Any exposure to the Fund under these arrangements could involve future claims that may be made against the Fund. Currently, no such claims exist or are expected to arise and, accordingly, the Fund has not accrued any liability in connection with such indemnifications.

7. Net Assets

Equity Issuance

In connection with its formation, the Fund has the authority to issue 200,000,000 Shares.

On September 29, 2017, the Fund completed its Initial Closing after entering into Subscription Agreements with several investors, including the Adviser, providing for the private placement of Shares. Under the terms of the Subscription Agreements, investors are required to fund drawdowns to purchase Shares up to the amount of their respective Capital Commitments on an as-needed basis upon the issuance of a capital draw-down notice. At September 30, 2023 the Fund had total Capital Commitments of \$629,019,653, of which 14% or \$90,663,743 is unfunded. At December 31, 2022, the Fund had total Capital Commitments of \$572,772,226, of which 14% or \$77,483,361 was unfunded. The minimum Capital Commitment of an investor is \$50,000. The Adviser, however, may waive the minimum Capital Commitment at its discretion.

Capital Commitments may be drawn down by the Fund on a pro rata basis, as needed (including for follow-on investments), for paying the Fund's expenses, including fees under the Amended and Restated Advisory Agreement, and/or maintaining a reserve account for the payment of future expenses or liabilities.

The following table summarizes the total Shares issued and amount received related to capital drawdowns delivered pursuant to the Subscription Agreements during the nine months ended September 30, 2023 and September 30, 2022:

Dividend Reinvestment Plan

On September 26, 2017, the Fund adopted a dividend reinvestment plan, which was amended and restated on November 11, 2021 (the “DRIP”). Pursuant to the DRIP (both before and after it was amended), stockholders receive dividends or other distributions in cash unless a stockholder elects to reinvest his or her dividends and other distributions. As a result of adopting the DRIP, if the Board authorizes, and the Fund declares, a cash dividend or distribution, stockholders who have opted into the DRIP will have their cash dividends or distributions automatically reinvested in additional Shares, rather than receiving cash.

The following tables summarize Shares distributed pursuant to the DRIP during the nine months ended September 30, 2023 and September 30, 2022 to stockholders who opted into the DRIP:

General Tender Program

Beginning with the quarter ended March 31, 2021, the Fund began to conduct quarterly general tender offers (each, a “General Tender,” and collectively, the “General Tender Program”), at the Board’s discretion, in accordance with the requirements of Rule 13e-4 under the Exchange Act and the 1940 Act, to allow each of its stockholders to tender Shares at a specific per Share price (the “Purchase Price”) based on the Fund’s net asset value as of the last date of the quarter in which the General Tender is conducted. The Fund intends to conduct each General Tender to repurchase up to a certain percentage of the weighted average of the number of Shares outstanding during the three-month period prior to the quarter in which the General Tender is conducted. The General Tender Program includes numerous restrictions that limit stockholders’ ability to sell their Shares.

The following table summarizes share repurchases completed during the nine months ended September 30, 2023:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**Forward-Looking Statements**

This Quarterly Report on Form 10-Q (this "Quarterly Report") contains forward-looking statements that involve substantial risks and uncertainties. Such statements involve known and unknown risks, uncertainties and other factors, and undue reliance should not be placed thereon. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about the Fund, its current and prospective portfolio investments, its industry, its beliefs and opinions, and its assumptions. Words such as "anticipates," "expects," "intends," "plans," "will," "may," "continue," "believes," "seeks," "estimates," "would," "could," "should," "targets," "projects," "outlook," "potential," "predicts" and variations of these words and similar expressions are intended to identify forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond the Fund's control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:

- an economic downturn could impair the Fund's portfolio companies' ability to continue to operate, which could lead to the loss of some or all of the Fund's investments in such portfolio companies;
- such an economic downturn could disproportionately impact the companies that the Fund intends to target for investment, potentially causing the Fund to experience a decrease in investment opportunities and diminished demand for capital from these companies;
- a contraction of available credit and/or an inability to access the equity markets could impair the Fund's lending and investment activities;
- interest rate volatility could adversely affect the Fund's results, particularly if the Fund elects to use leverage as part of its investment strategy;
- the Fund's future operating results;
- the Fund's business prospects and the prospects of the Fund's portfolio companies;
- the Fund's contractual arrangements and relationships with third parties;
- the ability of the Fund's portfolio companies to achieve their objectives;
- competition with other entities and the Fund's affiliates for investment opportunities;
- the speculative and illiquid nature of the Fund's investments;
- the use of borrowed money to finance a portion of the Fund's investments;
- the adequacy of the Fund's financing sources and working capital;
- the loss of key personnel;
- the timing of cash flows, if any, from the operations of the Fund's portfolio companies;
- the ability of the Adviser to locate suitable investments for the Fund and to monitor and administer the Fund's investments;
- the ability of the Adviser to attract and retain highly talented professionals;
- the Fund's ability to qualify and maintain its qualification as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and as a business development company ("BDC");
- the effect of legal, tax and regulatory changes; and
- the other risks, uncertainties and other factors the Fund identifies under "Risk Factors" of its Annual Report on Form 10-K for the fiscal year ended December 31, 2022.

Although the Fund believes that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this report should not be regarded as a representation by the Fund that the Fund's plans and objectives will be achieved. These risks and uncertainties include those described or identified in the section entitled "Item 1A. Risk Factors" of the Annual Report on Form 10-K for the fiscal year ended December 31, 2022, and elsewhere in this report. These forward-looking statements apply only as of the date of this report. Moreover, the Fund assumes no duty and does not undertake to update the forward-looking statements. The forward-looking statements and projections contained in this Quarterly Report are excluded from the safe harbor protection provided by Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") because the Fund is an investment company.

The following analysis of the Fund's financial condition and results of operations should be read in conjunction with the Fund's financial statements and the related notes thereto contained elsewhere in this Quarterly Report.

Overview

The Fund was formed on February 6, 2015 as a corporation under the laws of the State of Maryland. The Fund is structured as an externally managed, non-diversified, closed-end management investment company. The Fund was formed to invest primarily in primary-issue middle-market credit opportunities that are directly sourced and privately negotiated. The Fund commenced investment operations on November 15, 2017 (“Commencement”). The Fund is advised by AB Private Credit Investors LLC (the “Adviser”), which is registered with the Securities and Exchange Commission (“SEC”) under the Investment Advisers Act of 1940, as amended (the “Advisers Act”). The Adviser is responsible for sourcing potential investments, conducting due diligence on prospective investments, analyzing investment opportunities, structuring investments and monitoring the Fund’s portfolio on an ongoing basis. State Street Bank and Trust Company (the “Administrator”) provides the administrative services necessary for the Fund to operate.

The Fund has elected to be treated as a BDC under the 1940 Act. The Fund has also elected to be treated and intends to qualify annually as a RIC under Subchapter M of the Code for U.S. federal income tax purposes. As a BDC and a RIC, respectively, the Fund is and will be required to comply with various regulatory requirements, such as the requirement to invest at least 70% of its assets in “qualifying assets,” source of income limitations, asset diversification requirements, and the requirement to distribute annually at least 90% of its taxable income and tax exempt interest.

The Fund is an “emerging growth company,” as defined in the Jumpstart Our Business Startups Act of 2012 (the “JOBS Act”). The Fund will remain an emerging growth company for up to five years following its initial public offering, if any, although if the market value of its common stock that is held by non-affiliates exceeds \$700 million as of any September 30 before that time, the Fund would cease to be an emerging growth company as of the following December 31. For so long as the Fund remains an emerging growth company under the JOBS Act, it will be subject to reduced public company reporting requirements.

The Private Offering

The Fund enters into separate subscription agreements (each, a “Subscription Agreement,” and collectively, the “Subscription Agreements”) with investors providing for the private placement of its common stock (the “Shares”) in reliance on exemptions from the registration requirements of the Securities Act (such offering, the “Private Offering”). Each investor makes a capital commitment (a “Capital Commitment”) to purchase Shares pursuant to a Subscription Agreement. Investors are required to make capital contributions (“Capital Contributions”) to purchase Shares each time the Fund delivers a capital call notice, which is issued based on the Fund’s anticipated investment activities and capital needs, delivered at least 10 business days prior to the required funding date, provided that investors may fund such requirements sooner than the deadline as agreed between the Fund and the investor. Generally, purchases of Shares are made pro rata in accordance with each investor’s Capital Commitment, in an amount not to exceed each investor’s remaining capital commitment (“Remaining Commitment”), at a per Share price equal to the net asset value per Share subject to any adjustments. Pursuant to the Private Offering, the Fund’s initial closing occurred on September 29, 2017.

The Fund may accept additional Capital Commitments quarterly (“Subsequent Closings”) from new investors as well as existing investors that wish to increase their commitment and shareholding in the Fund. These Subsequent Closings are expected to occur on a calendar-quarter end based on investor interest as well as the state of the market and the Fund’s capacity to invest the additional capital within a reasonable period. Each Capital Commitment is for the life of the Fund or for a shorter period based on the investor’s liquidation election, subject to the Fund’s receipt of exemptive relief that would permit stockholders to liquidate their investments pursuant to transactions that are currently prohibited by the 1940 Act and would require an SEC order in order to be established.

Revenues

The Fund’s investment objective is to generate current income and prioritize capital preservation through a portfolio that primarily invests in directly-sourced, privately-negotiated, secured, middle market loans. The Fund intends to primarily invest in middle market businesses based in the United States. The Fund expects that the primary use of proceeds by the companies in which the Fund invests will be for leveraged buyouts, recapitalizations, mergers and acquisitions and growth capital.

The Fund will seek to build its portfolio in a defensive manner that minimizes cyclical and correlated risks across individual names and sector verticals by targeting companies with strong underlying business models and durable intrinsic value.

The Fund will primarily hold secured loans, which encompass traditional first lien, unitranche and second lien loans, but may also invest in mezzanine, structured preferred stock and non-control equity co-investment opportunities. The Fund will seek to deliver attractive risk adjusted returns with lower volatility and low correlation relative to the public credit markets. The Adviser believes the Fund’s flexibility to invest across the capital structure and liquidity spectrum will allow the Fund to optimize investor risk-adjusted returns.

Expenses

Under the Second Amended and Restated Advisory Agreement, the Fund's primary operating expenses will include the payment of fees to the Adviser, the Fund's allocable portion of overhead expenses under the Expense Reimbursement Agreement and other operating costs described below. The Fund bears all other out-of-pocket costs and expenses of the Fund's operations and transactions, including those relating to:

Generally, when interest and/or principal payments on a loan become past due, or if the Fund otherwise does not expect the borrower to be able to service its debt and other obligations, the Fund will place the loan on non-accrual status and will cease recognizing interest income on that loan for financial reporting purposes until all principal and interest have been brought current through payment or due to restructuring such that the interest income is deemed to be collectible. The Fund generally restores non-accrual loans to accrual status when past due principal and interest is paid and, in the management's judgment, is likely to remain current. As of September 30, 2023 the Fund had fourteen investments, across four issuers, that were on non-accrual status. As of December 31, 2022, the Fund had seven investments, with three issuers that were on non-accrual status.

- comparisons to the Fund's other portfolio companies in the industry, if any;
- attendance at and participation in board meetings or presentations by portfolio companies; and
- review of monthly and quarterly consolidated financial statements and financial projections of portfolio companies.

The federal income tax characterization of distributions declared and paid for the fiscal year will be determined at fiscal year-end based upon the Fund's investment company taxable income for the full fiscal year and distributions paid during the full year. For the nine months ended September 30, 2023, all of the Fund's distributions to stockholders were attributable to ordinary income. The character of distributions for federal income tax purposes are determined in accordance with income tax regulations which may differ from GAAP. Stockholders should read any written disclosure accompanying a distribution payment carefully and should not assume that the source of any distribution is only ordinary income or gains.

To the extent the Fund's taxable earnings fall below the total amount of its distributions paid for that fiscal year, a portion of those distributions may be deemed a return of capital to the Fund's stockholders for U.S. federal income tax purposes. Thus, the source of a distribution to stockholders may be the original capital invested by the stockholder rather than the Fund's income or gains.

Asset Coverage

In accordance with the 1940 Act, the Fund has historically only been allowed to borrow amounts such that its “asset coverage,” as defined in the 1940 Act, is at least 200% after such borrowing, permitting the Fund to borrow up to one dollar for investment purposes for every one dollar of investor equity. “Asset coverage” generally refers to a company’s total assets, less all liabilities and indebtedness not represented by “senior securities,” as defined in the 1940 Act, divided by total senior securities representing indebtedness and, if applicable, preferred stock. “Senior securities” for this purpose includes borrowings from banks or other lenders, debt securities and preferred stock.

On March 23, 2018, the SBCAA was signed into law. The SBCAA, among other things, modifies the applicable provisions of the 1940 Act to reduce the required asset coverage ratio applicable to BDCs from 200% to 150% subject to certain approval, time and disclosure requirements (including either stockholder approval or approval of a majority of the directors who are not interested persons of the BDC and who have no financial interest in the proposal). On July 5, 2018, the Board voted to approve the adoption of the reduced asset coverage ratio and separately recommended that Investors approve the reduced asset coverage requirements at the 2018 annual meeting of stockholders. On September 26, 2018, at the Fund’s 2018 annual meeting of stockholders, the Fund’s stockholders approved the reduction of the required minimum asset coverage ratio applicable to the Fund from 200% to 150%, which took effect on September 27, 2018. This reduction in the required minimum asset coverage ratio increases the amount of debt that the Fund is permitted to incur, permitting the Fund to borrow up to two dollars for investment purposes for every one dollar of investor equity.

As of September 30, 2023, and December 31, 2022, the Fund had total senior securities of \$830,150,000 and \$700,313,290, respectively, consisting of borrowings under the Revolving Credit Facilities, secured borrowings and the Notes, and had asset coverage ratios of 161% and 165%, respectively.

Critical Accounting Policies

Valuation of Investments

The Fund measures the value of its investments at fair value accordance with *Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosure*, or “ASC Topic 820,” issued by the Financial Accounting Standards Board, or “FASB.” Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Pursuant to the amended SEC Rule 2a-5 of the 1940 Act, the Board designated the Adviser as the Fund’s “valuation designee.” In this capacity, the Adviser is responsible, among other things, for making all fair value determinations relating to the Fund’s portfolio investments, subject to the Board’s oversight. Investments are valued at fair value as determined in good faith by our Adviser, as valuation designee, based on input of management, the audit committee and independent valuation firms that have been engaged to assist in the valuation of each portfolio investment without a readily available market quotation under a valuation policy. The Adviser principally carries out its fair value responsibilities through its Valuation Sub-Committee. This valuation process is conducted at the end of each fiscal quarter.

The audit committee of the Board (the “Audit Committee”) is also responsible for assisting the Adviser, as valuation designee in valuing investments that are not publicly traded or for which current market values are not readily available. Investments for which market quotations are readily available are valued using market quotations, which are generally obtained from independent pricing services, broker-dealers or market makers. With respect to portfolio investments for which market quotations are not readily available, the Adviser, as valuation designee and its senior investment team and independent valuation firms, is responsible for determining in good faith the fair value in accordance with the valuation policy approved by the Board. If more than one valuation method is used to measure fair value, the results are evaluated and weighted, as appropriate, considering the reasonableness of the range indicated by those results. The Fund considers a range of fair values based upon the valuation techniques utilized and selects the value within that range that was most representative of fair value based on current market conditions as well as other factors the Adviser’s senior investment team considers relevant.

ASC Topic 820 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. ASC Topic 820 also provides guidance regarding a fair value hierarchy, which prioritizes information used to measure fair value and the effect of fair value measurements on earnings and provides for enhanced disclosures determined by the level within the hierarchy of information used in the valuation. In accordance with ASC Topic 820, these inputs are summarized in the three levels listed below:

- Level 1 – Quoted prices in active markets for identical investments.
- Level 2 – Other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 – Significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments at the reporting date).

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. If a fair value measurement uses price data vendors or observable market price quotations, that measurement is a Level 2 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes “observable” requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Because of the inherent uncertainty of valuation for all fair value investments and interests, the Board’s determination of fair value may differ from the values that would have been used had a ready market existed, or that could have been (or will be) realized in an actual sale, and such differences could be material.

The value of any investment on any valuation date is intended to represent the fair value of such investment on such date based upon the amount at which the investment could be exchanged between willing parties, other than in a forced liquidation sale, and reflects the Board’s determination of fair value using the methodology described herein. Any valuation of an investment may not reflect the actual amount received by the Fund upon the liquidation of such investment.

The Fund’s investments will be primarily loans made to middle-market companies. These investments are mostly considered Level 3 assets under ASC Topic 820 because there is not usually a known or accessible market or market indices for these types of debt instruments and, thus, the Adviser’s senior investment team must estimate the fair value of these investment securities based on models utilizing unobservable inputs.

Management and Incentive Fees

The Fund will accrue for the base management fee and incentive fee. The accrual for the incentive fee includes the recognition of the incentive fee on unrealized capital gains, even though such incentive fee is neither earned nor payable to the Adviser until the gains are both realized and in excess of unrealized depreciation on investments. The amount of capital gains incentive fee expense related to the hypothetical liquidation of the portfolio (and assuming no other changes in realized or unrealized gains and losses) would only become payable to the Adviser in the event of a complete liquidation of the Fund’s portfolio as of period end and the termination of the Amended and Restated Advisory Agreement on such date. Also, it should be noted that the capital gains incentive fee expense fluctuates with the Fund’s overall investment results.

Federal Income Taxes

The Fund has elected to be treated, and to qualify annually, as a RIC under Subchapter M of the Code. Generally, a RIC is not subject to federal income taxes on distributed income and gains if it distributes at least 90% of its net ordinary income and net short-term capital gains in excess of its net long-term capital losses, if any, to its stockholders. The Fund intends to distribute sufficient dividends to maintain its RIC status each year and the Fund does not anticipate paying any material federal income taxes in the future.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Fund is subject to financial market risks, including changes in interest rates. To the extent that the Fund borrows money to make investments, the Fund’s net investment income is dependent upon the difference between the rate at which the Fund borrows funds and the rate at which the Fund invests these funds. In periods of rising interest rates, the Fund’s cost of funds would increase, which may reduce the Fund’s net investment income. Because the Fund expects that most of its investments will bear interest at floating rates, the Fund anticipates that an increase in interest rates would have a corresponding increase in the Fund’s interest income that would likely eventually offset any increase in the Fund’s cost of funds and, thus, net investment income would not be reduced significantly. The timing of interest rate resets on the Fund’s investments and the Fund’s debt may differ leading to a temporary increase or decrease in net investment income. However, there can be no assurance that a significant change in market interest rates will not have an adverse effect on the Fund’s net investment income. In addition, U.S. and global capital markets and credit markets have experienced a higher level of stress due to the global COVID-19 pandemic and rising inflation, which has resulted in an increase in the level of volatility across such markets and a general decline in the value of the securities held by the Fund.

The Fund will generally invest in illiquid loans and securities including debt and equity securities of middle-market companies. Because the Fund expects that there will not be a readily available market for many of the investments in the Fund's portfolio, the Fund expects to value many of its portfolio investments at fair value as determined in good faith by the Board using a documented valuation policy and a consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Fund's investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the differences could be material.

In connection with the COVID-19 pandemic and rising inflation, the U.S. Federal Reserve and other central banks have increased interest rates. A prolonged increase in interest rates could result in an increase in the Fund's non-performing assets and a decrease in the value of its portfolio because the portfolio companies paying interest at such increasing floating rates may be unable to meet higher payment obligations. In periods of rising interest rates, the Fund's cost of funds would increase, which, if not matched with the rising interest rates of its performing floating-rate assets, could result in a decrease in its net investment income. Incurring additional leverage will magnify the impact of an increase to the Fund's cost of funds. A decrease in interest rates may reduce net income, because new investments may be made at lower rates despite the increased demand for the Fund's capital that the decrease in interest rates may produce.

Assuming that the consolidated statement of assets and liabilities as of September 30, 2023, were to remain constant and that the Fund took no actions to alter its existing interest rate sensitivity, the following table shows the annualized impact of hypothetical base rate changes in interest rates.

| <u>Change in Interest Rates</u> | <u>Increase (Decrease) in Interest Income</u> | <u>Increase (Decrease) in Interest Expense</u> | <u>Net Increase (Decrease) in Net Investment Income</u> |
|---------------------------------|---------------------------------------------------|----------------------------------------------------|-------------------------------------------------------------|
| Down 25 basis points | \$ (3,106,918) | \$ (1,962,875) | \$ (1,144,043) |
| Up 100 basis points | 12,427,673 | 5,610,331 | 6,817,342 |
| Up 200 basis points | 24,855,345 | 15,703,000 | 9,152,345 |
| Up 300 basis points | 37,283,018 | 23,554,500 | 13,728,518 |

The above outcomes are estimates based on models that use assumptions, and such assumptions may not hold true should any of the listed scenarios occur. The table should be read in conjunction with the "Forward-Looking Statements" section to this quarterly report.

In addition, although the Fund does not currently intend to make investments that are denominated in a foreign currency, to the extent it does, the Fund will be subject to risks associated with changes in currency exchange rates. These risks include the possibility of significant fluctuations in the foreign currency markets, the imposition or modification of foreign exchange controls and potential illiquidity in the secondary market. These risks will vary depending upon the currency or currencies involved.

The Fund may hedge against interest rate and currency exchange rate fluctuations by using standard hedging instruments such as futures, options and forward contracts subject to the requirements of the 1940 Act. While hedging activities may insulate the Fund against adverse changes in interest rates, they may also limit the Fund's ability to participate in benefits of lower interest rates with respect to the Fund's portfolio of investments with fixed interest rates.

Item 4. Controls and Procedures

As of the end of the period covered by this report, the Fund carried out an evaluation, under the supervision and with the participation of the Fund's management, including the Fund's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Fund's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act). Based on that evaluation, the Fund's Chief Executive Officer and Chief Financial Officer have concluded that the Fund's current disclosure controls and procedures are effective in timely alerting them to material information relating to the Fund that is required to be disclosed by the Fund in the reports it files or submits under the Exchange Act.

There have been no changes in the Fund's internal control over financial reporting that occurred during the Fund's most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Fund's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Fund is not currently subject to any material legal proceedings, nor, to the Fund's knowledge, is any material legal proceeding threatened against the Fund. From time to time, the Fund may be a party to certain legal proceedings in the ordinary course of business, including proceedings relating to the enforcement of the Fund's rights under contracts with its portfolio companies. The Fund's business is also subject to extensive regulation, which may result in regulatory proceedings against the Fund. While the outcome of these legal proceedings cannot be predicted with certainty, the Fund does not expect that these proceedings will have a material effect upon its financial condition or results of operations.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in the Fund's Annual Report on Form 10-K for the fiscal year ended December 31, 2022, which could materially affect the Fund's business, financial condition and/or operating results. The risks described in the Fund's Annual Report on Form 10-K are not the only risks the Fund faces. Additional risks and uncertainties that are not currently known to the Fund or that the Fund currently deems to be immaterial also may materially adversely affect the Fund's business, financial condition and/or operating results. During the nine months ended September 30, 2023, there have been no material changes from the risk factors set forth in the Fund's Annual Report on Form 10-K for the year ended December 31, 2022, except for the following.

The Small Business Credit Availability Act allows the Fund to incur additional leverage, which may increase the risk of investing with the Fund.

On March 23, 2018, the SBCAA was signed into law. The SBCAA, among other things, modifies the applicable provisions of the 1940 Act to reduce the required asset coverage ratio applicable to BDCs from 200% to 150% subject to certain approval, time and disclosure requirements (including either stockholder approval or approval of a majority of the directors who are not interested persons of the BDC and who have no financial interest in the proposal). On July 5, 2018, the Board voted to approve the adoption of the reduced asset coverage ratio and separately recommended that Investors approve the reduced asset coverage requirements at the 2018 annual meeting of stockholders. On September 26, 2018, the Fund's stockholders voted to approve the adoption of the reduced asset coverage ratio, effective September 27, 2018.

Increased leverage could increase the risks associated with investing in the Fund. For example, if the value of the Fund's assets decreases, although the asset base and expected revenues would be larger because increased leverage would permit the Fund to acquire additional assets, leverage will cause the Fund's net asset value to decline more sharply than it otherwise would have without leverage or with lower leverage. Similarly, any decrease in the Fund's revenue would cause its net income to decline more sharply, on a relative basis, than it would have if the Fund had not borrowed or had borrowed less (although, as noted above, the Fund's asset base and expected revenues would likely be larger). However, since the Fund already uses leverage in optimizing its investment portfolio, there are no material new risks associated with increased leverage other than the amount of the leverage.

If the Fund's asset coverage ratio falls below the required limit, the Fund will not be able to incur additional debt until it is able to comply with the asset coverage ratio. This could have a material adverse effect on the Fund's operations, and the Fund may not be able to make distributions to stockholders. The actual amount of leverage that the Fund employs will depend on the Board's and the Adviser's assessment of market and other factors at the time of any proposed borrowing. The Fund currently anticipates being able to obtain sufficient credit on acceptable terms, although the Fund can make no assurance that this will be the case or that it will remain such in the future.

The following table illustrates the effect of leverage on returns from an investment in the Shares assuming that the Fund employs leverage such that the Fund's asset coverage equals (1) the Fund's actual asset coverage as of September 30, 2023 and (2) 150%, each at various annual returns, net of expenses and as of September 30, 2023.

The calculations in the tables below are hypothetical, and are provided for illustrative purposes only. Actual returns may be higher or lower than those appearing below.

| Assumed Return on the Fund's Portfolio (net of expenses) | (10.00)% | (5.00)% | 0.00 % | 5.00% | 10.00% |
|----------------------------------------------------------------------------------------------------------------------------|----------|---------|---------|--------|--------|
| Corresponding net return to holders of common stock assuming actual asset coverage as of September 30, 2023 ⁽¹⁾ | (40.8)% | (27.1)% | (13.5)% | 0.2 % | 13.8 % |
| Corresponding net return to holders of common stock assuming 150% asset coverage ⁽²⁾ | (45.6)% | (30.6)% | (15.6)% | (0.6)% | 14.4 % |

(1) Assumes \$1,374 million in total portfolio assets, \$871 million in debt outstanding, \$503 million in net assets, and an average cost of funds of 7.79%. Actual interest payments may be different.

(2) Assumes \$1,374 million in total portfolio assets, \$916 million in debt outstanding, \$458 million in net assets, and an average cost of funds of 7.79%. Actual interest payments may be different.

- [1] As of September 30, 2023, qualifying assets represented 97.48% of total assets. Under the 1940 Act we may not acquire any non-qualifying assets unless, at the time the acquisition is made, qualifying assets represent at least 70% of our total assets.

The spread may change based on the type of rate used. The terms in the Consolidated Schedule of Investments disclose the actual interest rate in effect as of the reporting period. LIBOR and SOFR loans are typically indexed to 30-day, 60-day, 90-day or 180-day rates (1M, 3M or 6M, respectively) at the borrower’s option. LIBOR and SOFR loans may be subject to interest floors. - [1] As of September 30, 2023, qualifying assets represented 97.48% of total assets. Under the 1940 Act we may not acquire any non-qualifying assets unless, at the time the acquisition is made, qualifying assets represent at least 70% of our total assets.
- [2] Categorized as Level 1 assets under the definition of ASC 820 fair value hierarchy.
- [3] Generally, the interest rate on floating interest rate investments is at benchmark rate plus spread. The borrower has an option to choose the benchmark rate, such as the London Interbank Offered Rate (“LIBOR”), Secured Overnight Financing Rate including adjustment, if any (“SOFR”) or the U.S. Prime rate. The spread may change based on the type of rate used. The terms in the Consolidated Schedule of Investments disclose the actual interest rate in effect as of the reporting period. LIBOR and SOFR loans are typically indexed to 30-day, 60-day, 90-day or 180-day rates (1M, 3M or 6M, respectively) at the borrower’s option. LIBOR and SOFR loans may be subject to interest floors. As of September 30, 2023, rates for weekly 1M L, 3M L 6M L, 1M S, 3M S and 6M S are 5.43%, 5.66%, 5.90%, 5.32%, 5.40% and 5.47%, respectively. As of September 30, 2023, the U.S. Prime rate was 8.50%.
