CALVERT VP SMALL CAP GROWTH PORTFOLIO

Before you invest, you may want to review the Portfolio's Prospectus, which contains more information about the Portfolio and its risks. The Portfolio's Prospectus and Statement of Additional Information (the "SAI"), both dated April 30, 2012, are incorporated by reference into this Summary Prospectus. You can find the Portfolio's Prospectus, the SAI, and other information about the Portfolio online at www.calvert.com/variable. You can also get this information at no cost by calling 1-800-368-2745 or by sending an e-mail request to Prospectusrequest@calvert.com, or by asking a financial professional who offers shares of the Portfolio.

INVESTMENT OBJECTIVE

The Portfolio seeks long-term capital appreciation. This objective may be changed by the Portfolio's Board of Directors without shareholder approval.

FEES AND EXPENSES OF THE PORTFOLIO

This table describes the fees and expenses that you may pay if you invest in shares of the Portfolio.

The table and the following example do not reflect fees and charges imposed under the variable annuity contracts and life insurance policies (each a "Policy") through which an investment may be made. If those fees and charges were included, costs would be higher. Please consult the prospectus for your Policy for information regarding those fees and charges.

Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) on purchases	None
Maximum deferred sales charge (load)	None

Annual Fund Operating Expenses (expenses that you pay each year as a % of the value of your investment)

Management fees	0.90	%
Other expenses	0.26	%
Total annual fund operating expenses	1.16	%
Less fee waiver and/or expense reimbursement ¹	(0.12)	(%)
Net expenses	1.04	%

¹ The investment advisor has agreed to contractually limit direct net annual fund operating expenses to 1.04% through April 30, 2013. Only the Board of Directors of the Portfolio may terminate the Portfolio's expense cap before the contractual period expires.

Example

This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The example assumes that:

- you invest \$10,000 in the Portfolio for the time periods indicated;
- your investment has a 5% return each year;
- the Portfolio's operating expenses remain the same; and
- any Calvert expense limitation is in effect for the period indicated in the fee table above.

Although your actual costs may be higher or lower, under these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$106	\$357	\$627	\$1,398

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities ("turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual fund operating expenses or in the "Example", affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 39% of its portfolio's average value.

INVESTMENTS, RISKS AND PERFORMANCE

Principal Investment Strategies

The Portfolio focuses on small, rapidly growing and under-researched companies whose securities, in the Subadvisor's opinion, are trading at reasonable prices. The Portfolio normally invests at least 80% of its net assets (including borrowings for investment purposes) in the equity securities, such as common or preferred stocks, of small capitalization companies listed on U.S. exchanges or in the U.S. over-the-counter market. The Portfolio will provide shareholders with at least 60 days' notice before changing this 80% policy. The Portfolio considers a small capitalization company to have a market capitalization within the range of companies in the Russell 2000 Growth Index. The market capitalization range for the Russell 2000 Growth Index was \$23.4 million to \$3.7 billion as of December 31, 2011.

Principal Risks

You could lose money on your investment in the Portfolio, or the Portfolio could underperform, because of the risks described below. An investment in the Portfolio is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Management Risk. Individual investments of the Portfolio may not perform as expected, and the portfolio management practices may not achieve the desired result.

Stock Market Risk. The stock market may fall in value, causing prices of stocks held by the Portfolio to fall.

Common Stock Risk. Although common stocks have a history of long-term growth in value, their prices fluctuate based on changes in a company's financial condition, on overall market and economic conditions, and on investors' perception of a company's well-being.

SUMMARY PROSPECTUS APRIL 30, 2012 **1**

Preferred Stock Risk. The market value of preferred stock generally decreases when interest rates rise and is affected by the issuer's ability to make payments on the preferred stock.

Small-Cap Company Risk. Prices of small-cap stocks can be more volatile than those of larger, more established companies. Small-cap companies are more likely to have more limited product lines, fewer capital resources and less depth of management than larger companies.

Growth Company Risk. Prices of growth company securities may fall more than the overall equity markets due to changing economic, political or market conditions or disappointing growth company earnings results. Growth stocks also generally lack the dividends of some value stocks that can cushion stock prices in a falling market.

Performance

The following bar chart and table show the Portfolio's annual returns and its long-term performance, which give some indication of the risks of investing in the Portfolio. The bar chart shows how the performance has varied from year to year. The table compares the Portfolio's performance over time with that of an index and an average.

The Portfolio's past performance does not necessarily indicate how the Portfolio will perform in the future. For updated performance information, visit www.calvert.com.

The returns shown do not reflect fees and charges imposed under the variable annuity contracts and life insurance policies through which an investment may be made. If those fees and charges were included, they would reduce these returns.

Calendar Year Total Returns

	Quarter Ended	Total Return	
Best Quarter (of periods shown)	6/30/03	21.20	%
Worst Quarter (of periods shown)	12/31/08	-27.51	%

Average Annual Total Returns (as of 12/31/11)

	1 year	5 years	10 years
Calvert VP Small Cap Growth Portfolio	-2.02 %	5.04 %	3.83 %
Russell 2000 Growth Index (reflects no deduction for fees or expenses)	-2.91 %	2.09 %	4.48 %
Lipper VA Small-Cap Growth Funds Average	-2.82 %	1.82 %	3.88 %

PORTFOLIO MANAGEMENT

Investment Advisor. Calvert Investment Management, Inc. (“Calvert” or the “Advisor”)

Investment Subadvisor. Eagle Asset Management, Inc. (“Eagle”)

Portfolio Manager

Name	Title	Length of Time Managing Portfolio
Bert L. Boksen, CFA	Senior Vice President and Managing Director, Eagle	Since January 2005
Eric Mintz, CFA	Assistant Portfolio Manager, Eagle	Since April 2008

PURCHASE AND REDEMPTION OF SHARES

Shares of the Portfolio currently are sold only to participating insurance companies (the “Insurance Companies”) for allocation to their separate accounts to fund benefits under Policies issued by the Insurance Companies. The Insurance Companies redeem shares of the Portfolio to make benefit and surrender payments under the terms of the Policies. Shares in the Portfolio are offered to the Insurance Companies, without sales charge, and redemptions are processed, on any day that the New York Stock Exchange is open. The share price is based on the Portfolio’s net asset value, determined after an Insurance Company receives the premium payment or a surrender request in acceptable form. The Portfolio does not have minimum initial or subsequent investment requirements.

A Policy owner’s interest in the shares of the Portfolio is subject to the terms of the particular Policy described in the prospectus for that Policy. If you are considering purchasing a Policy, you should carefully review the prospectus for that Policy.

TAX INFORMATION

As a regulated investment company under the Internal Revenue Code, the Portfolio is not subject to federal income tax, or to federal excise tax, to the extent that it distributes its net investment income and realized capital gains to the separate accounts of the Insurance Companies. The Portfolio intends to distribute its net investment income and realized capital gains to the extent necessary to remain qualified as a regulated investment company.

Since the only shareholders of the Portfolio are the Insurance

SUMMARY PROSPECTUS APRIL 30, 2012 **2**

Companies, no discussion is included here regarding the federal income tax consequences at the Policy owner level. For information concerning the federal tax consequences to you as a purchaser of a Policy, see the prospectus for your Policy.

PAYMENTS TO INSURANCE COMPANIES AND THEIR AFFILIATES

The Portfolio is not sold directly to the general public but instead is offered as an underlying investment option for the Policies. The Portfolio and its related companies may make payments to a sponsoring Insurance Company (or its affiliates) for distribution and/or other services. These payments may be a factor that the Insurance Company considers in including the Portfolio as an underlying investment option in the Policy and may create a conflict of interest. The prospectus (or other offering document) for your Policy may contain additional information about these payments.
