ACCOUNTING PRONOUNCEMENTS

In September 2006, the Financial Accounting Standards Board ("FASB") released Statement of Financial Accounting Standards ("SFAS") No. 157, which provides enhanced guidance for using fair value to measure assets and liabilities. The Portfolio Company adopted SFAS No. 157 on April 1, 2008. SFAS No. 157 establishes a fair value hierarchy and specifies that a valuation technique used to measure fair value shall maximize the use of observable inputs and minimize the use of unobservable inputs. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Accordingly, the fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under SFAS No. 157 are described below:

- Level 1 -- Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 -- Quoted prices which are not active, or inputs that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and
- Level 3 -- Prices, inputs or exotic modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no market activity).

ACCOUNTING PRONOUNCEMENTS (CONTINUED)

As required by SFAS No.157, investments are classified within the level of the lowest significant input considered in determining fair value. Investments classified within Level 3 consider several inputs and may include Level 1 or Level 2 inputs as components of the overall fair value measurement. The table below sets forth information about the level within the fair value hierarchy at which the Portfolio Company investments are measured at June 30, 2008:

<TABLE>

TOTAL	\$ --	\$ 532,220	\$163,544,087	\$164,076,307
	=====	=====	=====	=====

</TABLE>

* Other financial instruments are derivative instruments not reflective in the Schedule of Investments, such as short sales, futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

The following is a reconciliation of the investments in which significant unobservable inputs (Level 3) were used in determining value:
