SPARTAN(Registered trademark) MARYLAND MUNICIPAL INCOME FUND
 SUPPLEMENT TO THE STATEMENT OF ADDITIONAL INFORMATION
 DATED OCTOBER 18, 1993

The following information updates that found in the section entitled "Performance" beginning on page 11. The following table shows the effect of a shareholder's tax status on effective yield under federal, state, and county income tax laws for 1994. They show the approximate yield a taxable security must provide at various income brackets to produce after-tax yields equivalent to those of hypothetical tax-exempt obligations yielding from 2.0% to 7.0%. Of course, no assurance can be given that the fund will achieve any specific tax-exempt yield. While the fund invests principally in obligations whose interest is exempt from federal and state income tax, other income received by the fund may be taxable. The tables do not take into account local taxes, if any, payable on the fund's distributions.

1994 TAX RATES AND TAX EQUIVALENT YIELDS

</TABLE>

* Combined Maryland and federal effective tax brackets take into account the highest combined Maryland state and county income tax rate of 8.00% (applicable to residents of Allegany, Prince George's, Montgomery, and Talbot counties.)

** Combined Maryland and federal effective tax bracket takes into account the combined highest Maryland state and county income tax rate of 9.00% (applicable to residents of all counties except Worcester county.) For Prince George's, Montgomery, and Talbot counties, the county income tax rate is equal to 60% of Maryland state taxes. For Baltimore county, the county income tax rate is 55% of the state tax. For Worcester county, the county income tax rate is 30% of the state tax. The county income tax rate for the remaining counties of the State of Maryland is 50% of the state tax. According to Maryland tax laws, the highest county tax rate that can be assessed to residents taxed at the 6.00% marginal state rate is 50% of the state tax. Figures are tax-effected to reflect the federal tax benefit for persons who itemize deductions.

Having determined your effective tax bracket above, use the following table to determine the tax equivalent yield for a given tax-free yield.

If your combined effective federal, state and county personal income tax rate in 1994 is:

33.76% 36.52% 37.21% 41.12% 41.76% 45.04%

<TABLE>
