Footnote Legend:

- A balance indicated with a "0", reflects either a zero balance or an amount that rounds to less than 1.
- (a) Non-income producing.
- (b) Security is held by a consolidated wholly-owned subsidiary of Blackstone Alternative Multi-Strategy Fund.
- (c) Security (or a portion thereof) has been pledged to cover collateral requirements on open derivative contracts and/or securities sold short.
- (d) Security is valued using significant unobservable inputs.
- (e) Variable/Floating interest rate security. Certain variable/floating interest rate securities are not based on a published reference rate and spread but are determined by the issuer or agent and are based on current market conditions. These securities may not indicate a reference rate and spread in their description above. Rate presented is as of December 31, 2022.
- (f) Security is exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. Security may only be sold to qualified institutional buyers unless registered under the Securities Act of 1933, as amended, or otherwise exempt from registration.
- (g) Security is an Interest Only (IO) bond, which represents the "interest only" portion of payments on a pool of underlying mortgages or mortgage-backed securities. IO securities are subject to prepayment risk of the pool of underlying mortgages.
- (h) Represents a step-up bond. Coupon rate increases in increments to maturity. Rate presented is as of December 31, 2022. Maturity date presented is the ultimate maturity.
- (i) All or a portion of the security represents an unsettled loan commitment at December 31, 2022 where the rate will be determined at time of settlement.
- (j) Security is exempt from registration pursuant to Regulation S under the Securities Act of 1933, as amended. Security may only be offered or sold outside of the Unites States unless registered under the Securities Act of 1933, as amended, or otherwise exempt from registration.
- (k) Security is currently in default due to bankruptcy or failure to make payment of principal or interest.
- All or a portion of this security is pledged as collateral in connection with reverse repurchase agreements.
- (m) When issued or delayed delivery security included.
- (n) Non-interest bearing bond.
- (o) Security is restricted per Rule 12-12.8 of Regulation S-X. First acquisition dates of Aeolus Property Catastrophe Keystone PF Fund LP, PIMCO ILS Fund SP II, Atreides Co., Asgard Fixed Income Risk Premia Fund, Rokos Global Macro Fund Ltd., Class S, Centiva Offshore Fund LLP, Qube Torus and Statar Capital Class A, are 1/2/2019, 12/30/2019, 7/1/2021, 8/2/2021, 9/1/2021, 6/1/2022, 7/1/2022 and 7/1/2022. Amounts to \$500,067,814 and represents 11.8% of Net Assets.
- (p) Repurchase agreements may additionally have cash collateral held to meet collateral requirements of 102%.
- (q) Open repurchase agreement with no specific maturity date. Either party may terminate the agreement upon demand.
- (r) Assets, other than investments in securities, less liabilities other than securities sold short.

Blackstone Alternative Multi-Strategy Fund and Subsidiaries Notes to Consolidated Schedule of Investments For the Period Ended December 31, 2022 (Unaudited)

1. Organization

Blackstone Alternative Investment Funds (the "Trust") is a Massachusetts business trust authorized to issue an unlimited number of shares of beneficial interest, which may be divided into different series and classes. The Trust is registered as an open-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). During the period ended December 31, 2022, the Trust consisted of a single series, Blackstone Alternative Multi-Strategy Fund (the "Fund"). The Fund commenced operations offering Class I Shares on June 16, 2014. The Fund also offers Class D Shares, Class Y Shares and Class R Shares. Class D Shares and Class Y Shares commenced operations on November 17, 2014 and January 28, 2015, respectively. As of December 31, 2022, the Fund had not issued any Class R Shares. The Fund operates as a diversified open-end investment company as defined in the 1940 Act.

The investment adviser of the Fund is Blackstone Alternative Investment Advisors LLC ("BAIA" or the "Investment Advisor"), a registered investment adviser under the Investment Advisers Act of 1940, as amended. The Board of Trustees (the "Board" and each member a "Trustee") of the Trust supervises the conduct of the Fund's affairs and has engaged BAIA to manage the Fund's day-to-day investment activities pursuant to an investment management agreement. The Fund's investment objective is to seek capital appreciation. In pursuing the Fund's investment objective, the Investment Adviser seeks to maintain an investment portfolio with, on average, lower volatility relative to the broader equity markets. The Investment Adviser seeks to achieve the Fund's objective by allocating the Fund's assets among a variety of non-traditional, or "alternative," investment strategies. The Investment Adviser determines the allocations of the Fund's assets and allocates a majority of the Fund's assets among the sub-advisers (the "Sub-Advisers") with experience managing alternative investment strategies and among investment funds. The Investment Adviser also manages a portion of the Fund's assets directly and, from time to time, may instruct Sub-Advisers with respect to particular investments. The Investment Adviser may allocate the Fund's assets among discretionary and non-discretionary Sub-Advisers. Each discretionary Sub-Adviser is responsible for the day-to-day management of the portion of the Fund's assets that the Investment Adviser allocates to it. Each non-discretionary Sub-Adviser is responsible for providing the Investment Adviser with a model portfolio for the assets allocated to it to be implemented by the Investment Adviser in its discretion. The Investment Adviser has the responsibility to oversee each Sub-Adviser (subject to the ultimate oversight of the Board). The Investment Adviser also is responsible for recommending the hiring, termination, and replacement of Sub-Advisers.

The Fund's assets may be invested in three wholly-owned and controlled subsidiaries of the Fund (collectively, the "Subsidiaries"), each of which has the same investment objective as the Fund. One of the Fund's Subsidiaries, Blackstone Alternative Multi-Strategy Sub Fund II Ltd. (the "Cayman Subsidiary"), is a Cayman Islands exempted company. Both of the other Subsidiaries, Blackstone Alternative Multi-Strategy Sub Fund III L.L.C. (the "Domestic Subsidiary III") and Blackstone Alternative Multi-Strategy Sub Fund IV L.L.C. (the "Domestic Subsidiary IV"), are Delaware limited liability companies. The Cayman Subsidiary invests, directly or indirectly through the use of derivatives, in securities and commodity interests. The Domestic Subsidiary III and the Domestic Subsidiary IV invest, directly or indirectly through the use of derivatives, almost entirely in securities (with only de minimis exposure to commodity interests). The Consolidated Schedule of Investments includes the Schedule of Investments of the Fund and the three Subsidiaries. Except where context otherwise requires, the term "Fund" refers to the Fund together with the applicable Subsidiaries.

The Fund and the Cayman Subsidiary are each a commodity pool under the Commodity Exchange Act ("CEA") and are subject to regulation by the Commodity Futures Trading Commission ("CFTC"). BAIA, the commodity pool operator of the Fund and the Cayman Subsidiary, is registered as such with the CFTC, but has claimed relief under Rules 4.12(c)(3) and 4.7 under the CEA, respectively, from certain disclosure, reporting, and recordkeeping requirements otherwise applicable to commodity pools. Neither the Domestic Subsidiary III nor the Domestic Subsidiary IV intends to invest more than a de minimis level of its net assets in "commodity interests" (as defined under the CEA). Accordingly, BAIA is relying on CFTC No-Action Letter 12-38 with respect to the Domestic Subsidiary III and has claimed an exemption under Rule 4.13(a)(3) from registration as a commodity pool operator with respect to the Domestic Subsidiary IV.

Capitalized terms used, but not defined herein, shall have the meaning assigned to them in the Prospectus of the Fund.

2. Basis of Presentation

The Fund's Consolidated Schedule of Investments is prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") and is stated in U.S. dollars, except as otherwise noted. The preparation of Consolidated Schedule of Investments in accordance with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amount of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported amounts of income and expenses during the period. Actual results could differ from these estimates and these differences could be material.

The Fund is an investment company in accordance with Accounting Standards Codification 946, *Financial Services–Investment Companies* ("ASC 946"), which defines investment companies and prescribes specialized accounting and reporting requirements for investment companies.

Blackstone Alternative Multi-Strategy Fund and Subsidiaries Notes to Consolidated Schedule of Investments (Continued) For the Period Ended December 31, 2022 (Unaudited)

Consolidation

The Fund consolidates its investment in the Subsidiaries. All material intercompany balances and transactions have been eliminated.

3. Significant Accounting Policies

Valuation Policy

The net asset values ("NAV") of the Fund's shares are calculated as of the close of regular trading on the New York Stock Exchange ("NYSE") (generally 4:00 pm Eastern Time) on each day that the NYSE is open for business (a "Business Day").

For purposes of calculating the NAV for each class of shares, the Fund values its investments in securities, securities sold short, derivative financial instruments and other investments at market value if market quotations are readily available, and otherwise at fair value. The Board has established procedures for determining the fair value of securities, including securities sold short, derivative financial instruments and other investments (together, the "investments") (the "Valuation Procedures"). The Board has delegated to the Investment Adviser day-to-day responsibility for implementing the Valuation Procedures. The Investment Adviser's management has formed the Fair Value Committee (the "FVC"), to which the Board has delegated responsibility for providing oversight of the day-to-day operational implementation of the valuation and pricing function of the Fund for all investments. Effective August 4, 2022, and in accordance with Rule 2a-5 under the 1940 Act, the Board designated the Investment Adviser as the "valuation designee" of the Fund. Pursuant to the Valuation Procedures, if market quotations are not readily available (or are otherwise not reliable for a particular investment), the fair value will be determined by the Investment Adviser, as the valuation designee, in good faith, and such determinations will be subject to oversight by the Board. Due to the inherent uncertainty, estimates of fair value may differ from the values that would have been used had a ready market for these investments existed and the differences could be material.

A market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the Fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable. As such, market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/ask information, or broker-dealer quotations), including where events occur after the close of the relevant market, but prior to the close of the NYSE, that materially affect the value of the Fund's investments. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which securities trade do not open for trading for the entire day and no other market prices are available. The Board has delegated to the FVC and the Investment Adviser the responsibility for monitoring significant events that may materially affect the values of the Fund's investments and for determining whether the value of the applicable investments should be re-evaluated in light of such significant events. There were two instances of such determination made during the period ended December 31, 2022.

Fair Value Measurements

Fair value guidance defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. U.S. GAAP defines fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for investments categorized in Level 3. The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

Investments measured and reported at fair value are classified and disclosed in one of the following levels within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement:

Level 1 - quoted prices are available in active markets for identical investments as of the measurement date. The Fund does not adjust the quoted price for these investments.

The types of investments categorized within Level 1 generally include actively traded domestic and certain foreign equity securities, short-term investments and derivative financial instruments actively traded on recognized exchanges.

Level 2 - quoted prices are available in markets that are not active or model inputs are based on inputs that are either directly or indirectly observable as of the measurement date.

Blackstone Alternative Multi-Strategy Fund and Subsidiaries Notes to Consolidated Schedule of Investments (Continued) For the Period Ended December 31, 2022 (Unaudited)

The types of investments categorized within Level 2 generally include certain foreign equities; fixed income securities including corporate and convertible bonds, loans, trade claims, sovereign debt obligations, U.S. Treasury obligations, and asset-backed and mortgage-backed securities; over-the-counter ("OTC") derivative financial instruments such as total return swaps, interest rate swaps, credit default swaps, OTC options; and forward foreign currency exchange contracts ("Forwards").

Level 3 - pricing inputs are unobservable and include instances where there is little, if any, market activity for the investment. Inputs reflect the best estimate of what market participants would use in determining fair value of investments as of the measurement date.

Changes in valuation techniques may result in transfers in or out of an investment's assigned level within the fair value hierarchy.

Level 3 investments are valued by broker quotes, fair value models, or pricing services that may employ valuation techniques with unobservable inputs. At December 31, 2022, the total fair value of Level 3 investments was \$54,498,109. The appropriateness of fair values for these securities are monitored on an ongoing basis, including through backtesting, pricing due diligence, unchanged price review, use of specialists, and consideration of macro security specific events.

The significant inputs and assumptions required to determine the change in fair value of the investments of the Fund are discussed in more detail below.

A description of the valuation techniques applied to the Fund's major categories of investments measured at fair value on a recurring basis are as follows:

Exchange-Traded Securities

Equity securities, including common stock, listed preferred stock, exchange-traded funds, special purpose acquisition companies, and derivative financial instruments, such as futures contracts and option contracts, that are traded on a recognized securities exchange or on the NASDAQ Global Market System ("NASDAQ") are valued at the last reported sales price (or the official closing price of certain foreign exchanges) or the NASDAQ official closing price, as applicable. For securities traded on more than one exchange, the last reported sales price on the exchange where the security is primarily traded is used. To the extent these securities and derivative financial instruments are actively traded and adjustments are not applied, they are categorized as Level 1 within the fair value hierarchy.

The Fund may use a third-party fair valuation service provider to value foreign equity securities that are primarily traded outside of North America and South America. The third-party fair valuation service provider calculates a factor ("Fair Value Factor") that is applied to adjust the last price of each such security in the event that there is movement in excess of a specified trigger, as measured by the movement between the prior close and the current close of the U.S. market. Foreign equities for which the last price has been adjusted by such factor will generally be categorized as Level 2 within the fair value hierarchy. As of December 31, 2022, no Fair Value Factor was applied.

Short-Term Investments

The Fund considers short-term, highly liquid investments with original maturities of 90 days or less when acquired to be short-term investments. At December 31, 2022, the Fund did not have any investment in short-term investments.

Derivative Financial Instruments

OTC derivative financial instruments, such as Forwards, OTC options contracts, or swap agreements, derive their value from underlying referenced instruments or obligations, indices, reference rates, and other inputs or a combination thereof. These contracts are normally valued by pricing service providers or based on broker-dealer quotations. Depending on the nature of the instruments and the terms of the transaction, the value of OTC derivative financial instruments can be estimated by a pricing service provider using a series of techniques, including industry standard pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, yield curves, dividends and exchange rates. Derivative financial instruments that use similar valuation techniques and inputs as described above are categorized as Level 2 within the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the clearing exchange. For centrally cleared credit default swaps, the clearing facility requires its members to provide actionable levels across complete term structures. These levels along with external third-party prices are used to produce daily settlement prices. Centrally cleared interest rate swaps are valued using a pricing model that references the underlying rates to produce the daily settlement price. These securities are categorized as Level 2 within the fair value hierarchy.

Fixed Income Securities

Fixed income securities, including corporate and convertible bonds, U.S. government sponsored agency securities, municipal bonds, U.S. Treasury obligations, foreign debt obligations, and bank debt are normally valued by pricing service providers on the basis of last available bid price. In determining the value of a particular investment, pricing service providers may use broker-dealer quotations, reported trades, or valuation estimates from their internal pricing models to determine the reported price that consider observable inputs. The pricing service providers' internal models use observable inputs such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 within the fair value hierarchy.

Blackstone Alternative Multi-Strategy Fund and Subsidiaries Notes to Consolidated Schedule of Investments (Continued) For the Period Ended December 31, 2022 (Unaudited)

Mortgage-related securities ("MBS") and asset-backed securities ("ABS") are usually issued as separate tranches, or classes, of securities within each deal. These securities are also generally valued by pricing service providers that use broker-dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, current market data, estimated cash flows and market-based yield spreads for each tranche, and in corporate deal collateral performance, as available. MBS and ABS that use similar valuation techniques and inputs as described above are categorized as Level 2 within the fair value hierarchy.

Investments in Investee Funds

The fair value of investments in unaffiliated hedge funds (collectively, the "Investee Funds") is generally determined using the reported NAV per share of the Investee Fund, or its equivalent, as a practical expedient for fair value, unless the investment in the Investee Fund is traded on a recognized securities exchange and a quoted price is available as of the measurement date. If the Investee Fund is not traded on an exchange, the Fund may, as a practical expedient, estimate the fair value of an Investee Fund based on the reported NAV per share or its equivalent of the Investee Fund is calculated in a manner consistent with the measurement principles applied to investment companies, in accordance with ASC 946. If the Investee Fund does not provide a reported NAV per share or its equivalent on a Business Day, the Investment Adviser shall estimate fair value in good faith and in a manner consistent with the Valuation Procedures.

Securities and Other Investments

Bank Debt

The Fund may invest in bank debt including, for example, corporate loans, trade claims, loan participations, direct debt, revolvers, bank loans, and bridge loans. The Fund invests in loans through novations, assignments, and participation interests. In a novation, the Fund typically assumes all of the rights of a lending institution, including the right to receive payments of principal and interest and other amounts directly from the borrower and to enforce its rights as a lender directly against the borrower. When the Fund takes an assignment of a loan, the Fund acquires some or all of the interest of another lender (or assignee) in the loan. In such cases, the Fund may be required generally to rely upon the assignor to demand payment and enforce rights under the loan. If the Fund acquires a participation in the loan, the Fund purchases an indirect interest in a loan held by a third-party and the Fund typically will have a contractual relationship only with the third-party loan investor, not with the borrower. As a result, the Fund may have the right to receive payments of principal, interest, and any fees to which it is entitled only from the loan investor selling the participation and only upon receipt by such loan investor of such payments from the borrower. In such cases, the Fund assumes the credit risk of both the borrower and the loan investor selling the participation, and the Fund may be unable to realize some or all of the value of its interest in the loan in the event of the insolvency of the third-party. Changes in the financial condition of the borrower or economic conditions or other circumstances may reduce the capacity of the borrower to make principal and interest payments on such instruments and may lead to defaults. Certain types of bank debt may have an associated partially funded or unfunded commitment. The unfunded commitments may or may not be funded by the Fund. At December 31, 2022, the Fund had no outstanding commitments.

Mortgage-Related and Other Asset-Backed Securities

The Fund may invest in MBS (residential and commercial) and other ABS. These securities include mortgage pass-through securities, collateralized mortgage obligations, commercial mortgage-backed securities, residential mortgage-backed securities, collateralized debt obligations, collateralized loan obligations, and other securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. MBS and other ABS represent interests in pools of mortgages, loans or other assets. MBS are created from pools of residential or commercial mortgage loans, including loans made by savings and loans institutions, mortgage bankers, commercial banks and others. These securities typically provide a monthly payment that consists of principal and/or interest payments. Interest payments may be determined by fixed or adjustable rates. MBS and ABS are subject to credit, interest rate, valuation liquidity, prepayment and extension risks.

Securities Sold Short

The Fund may sell securities short (a "Short Sale"). A Short Sale is a transaction whereby the Fund sells securities it does not own in anticipation of a decline in the market price of those securities, whereby the Fund's broker will execute a borrow transaction to deliver the securities resulting from the Fund's Short Sale. The Fund is obligated to repurchase the securities at the market price at the time of replacement. The Fund's obligations to replace the securities in connection with a Short Sale are secured by collateral.

Upon entering into a Short Sale, the Fund establishes a liability which is recorded as securities sold short on the Consolidated Schedule of Investments to represent securities due under the Short Sale agreement. The Fund is liable to pay any dividends declared and/or

| |

interest income earned during the period the Short Sale is open. These dividends and interest are recorded as dividend and interest

expense on securities sold short.

Commodities

The Fund is permitted to invest in California Carbon Allowances ("CCAs") or futures on CCAs, which are generally treated as commodity interests. CCA and other allowances (collectively, "Allowances") are valued according to their vintage based on market price or the number of Allowances delivered during the valuation month. ICE futures U.S., Inc. ("ICE") will serve as the primary pricing source. When early vintage Allowances no longer have readily observable market prices from ICE, they will be valued using prices for later vintage Allowances. ICE lists widely-traded futures contracts for the Allowance market. These contracts result in the delivery of an Allowance at expiry. The ICE CCA contracts permits delivery of Allowances issued by California or any linked program (at this time Quebec and Ontario). Trading in these futures contracts are subject to ICE's market rules. ICE lists separate CCAs by vintage (e.g. 2017 Vintage, 2020 Vintage, 2022 Vintage and 2023 Vintage). The most traded ICE CCA contracts allow delivery of the indicated vintage or an earlier vintage; hence a 2022 Vintage Allowance can be delivered against the 2023 Vintage Contract. This flexibility means futures contracts on earlier vintages are usually more liquid than, and worth at least as much as, later vintages.

Repurchase Agreements

The Fund may invest in repurchase agreements, which are short term investments whereby the Fund acquires ownership of a debt security and the seller agrees to repurchase the security at a future date at a specified price. When entering into repurchase agreements, it is the Fund's policy that it's custodian take possession of the underlying collateral securities, the market value of which, at all times, equals at least 102% of the principal amount of the repurchase transaction. To the extent that any repurchase transaction exceeds one Business Day, the value of the collateral is marked-to-market to ensure the adequacy of the collateral. If the seller defaults and the market value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited. The information required to be disclosed by FASB Accounting Standards Update No. 2011-11 for the Fund's investments in repurchase agreements at December 31, 2022, including the fair value of the repurchase agreement and the amount of collateral, can be found in the Fund's Consolidated Schedule of Investments.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements. In a reverse repurchase agreement, the Fund sells a security in exchange for cash to a financial institution, the counterparty, with a simultaneous agreement to repurchase the same or substantially the same security at an agreed upon price and date, under the terms of a Master Repurchase Agreement ("MRA"). The Fund is entitled to receive principal and interest payments, if any, made on the security delivered to the counterparty during the term of the agreement. Cash received in exchange for securities delivered plus accrued interest payments to be made by the Fund to counterparties is reflected as a liability. Reverse repurchase agreements involve the risk that the market value of the securities purchased with the proceeds from the sale of securities received by the Fund may decline below the price of the securities the Fund is obligated to repurchase. Reverse repurchase agreements also involve credit risk with the counterparty to the extent that the value of securities subject to repurchase exceeds the Fund's liability under the reverse repurchase agreement. Securities subject to repurchase under reverse repurchase agreements, if any, are designated as such in the Consolidated Schedule of Investments. Due to the short term nature of the reverse repurchase agreements, face value approximates fair value. As of December 31, 2022, the face value of open reverse repurchase agreements for the Fund was \$56,063,284.

An MRA contains provisions for, among other things, initiation, income payments, events of default and maintenance of securities for repurchase agreements. An MRA also permits offsetting with collateral to create one single net payment in the event of default or similar events, including the bankruptcy or insolvency of a counterparty. The Fund may not use reverse repurchase agreements and related collateral governed by an MRA to offset derivatives contracts and related collateral governed by an ISDA (see Note 4) or securities lending agreements and related collateral governed by a securities lending agreement ("SLA") consistent with Rule 19b-1 under the 1940 Act. Dividends and capital gain distributions paid by the Fund will be reinvested in additional Shares (see Note 6) of the Fund or, if elected by the Shareholder, paid in cash. Segregation and Collateralization In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission ("SEC") and its staff require that the Fund either delivers collateral or segregates assets in connection with certain investments.

Securities Lending

The Fund may lend securities, through its agent, to certain qualified financial institutions. The loans are collateralized by cash in an amount at least equal to the market value of the securities loaned. The market value of securities loaned is determined daily and any additional required collateral is allocated to the Fund on the next Business Day. The initial collateral received by the Fund should have a value of at least 102% of the current value of loaned securities for U.S. securities and at least 105% for all other securities. The Fund will bear the risk of loss with respect to the investment of the cash collateral, as well as the possible loss of right to the collateral should

the borrower fail financially. The advantage of such loans is that the Fund continues to receive income on loaned securities while earning returns on the cash amounts, which may be reinvested for the purchase of investments in securities. As of December 31, 2022, there were no securities on loan.

The SLA entered into by the Fund provides the right, in the event of default, for the non-defaulting party to liquidate the collateral and calculate a net exposure to the defaulting party or request additional collateral. Under the agreement, the Fund can reinvest cash collateral.

When-Issued and Delayed-Delivery Transactions

The Fund may engage in when-issued or delayed-delivery transactions. The Fund records when-issued or delayed-delivery securities on the trade date and maintains security positions such that sufficient liquid assets will be available to make payment for the securities purchased. Securities purchased on a when-issued or delayed-delivery basis are marked-to-market daily and begin earning interest on the settlement date. Losses may occur on these transactions due to changes in market conditions or the failure of counterparties to perform under the contract.

The Fund may transact in To Be Announced Securities ("TBAs"). As with other delayed-delivery transactions, a seller agrees to issue TBAs at a future date. However, the seller does not specify the particular securities to be delivered. Instead, the Fund agrees to accept any security that meets specified terms such as issuer, interest rate and terms of underlying mortgages. The Fund records TBAs on the trade date utilizing information associated with the specified terms of the transaction as opposed to the specific mortgages. TBAs are marked-to-market daily and begin earning interest on the settlement date. Losses may occur due to the fact that the actual underlying mortgages received may be less favorable than those anticipated by the Fund.

Restricted Securities

The Fund may purchase securities which are considered restricted. Restricted securities are securities that cannot be offered for public sale without first being registered under the Securities Act of 1933, as amended, or are subject to contractual restrictions on public sales. Many such restricted securities may be resold in the secondary market in transactions exempt from registration. The Fund will not incur any registration costs upon such resales. The Fund cannot demand registration of restricted securities. The Fund's restricted securities, like other securities, are priced in accordance with the Valuation Procedures. Restricted securities are identified in the Consolidated Schedule of Investments.

Interbank Offered Rates Transition

Certain jurisdictions are currently reforming or phasing out their benchmark interest rates, most notably the London Interbank Offered Rates ("LIBOR") across multiple currencies. Many such reforms and phase outs became effective at the end of calendar year 2021 with select U.S. dollar LIBOR tenors persisting through June 2023. The Fund has taken steps to prepare for and mitigate the impact of changing base rates and continues to manage transition efforts and evaluate the impact of prospective changes on existing transactions and contractual arrangements.

4. Derivative Financial Instruments

In the normal course of business, the Fund enters into derivative financial instrument contracts for trading and/or economic hedging purposes to increase the returns of the Fund or to protect against exposure to certain risks such as credit risk, equity risk, interest rate risk, foreign currency exchange risk or other risk (e.g., inflation risk). These contracts may be transacted on a recognized exchange or OTC. The following disclosures contain information on how the Fund uses derivative financial instruments. The derivative financial instruments outstanding as of period end are disclosed in the Consolidated Schedule of Investments.

Forward Foreign Currency Exchange Contracts

The Fund may enter into Forwards to obtain investment exposure, seek to enhance return or hedge or protect its portfolio holdings against the risk of future movements in certain foreign currency exchange rates. Forwards are agreements between two parties to receive or deliver a fixed quantity of foreign currency for an agreed-upon price on an agreed upon future date. The market value of a Forward fluctuates with the changes in foreign currency exchange rates. These contracts are valued daily and the change in market value is recorded as an unrealized gain or loss on Forwards. When a contract is closed, the Fund recognizes a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of Forwards does not eliminate fluctuations in the underlying prices of the securities of the Fund, but it does establish a rate of exchange that can be achieved in the future. Although Forwards may limit the risk of loss due to a decline in the value of the currency holdings, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to losses if the counterparties to the contracts are unable to meet the terms of the contracts. The Fund's maximum potential loss from such contracts is the aggregate face value in U.S. dollars at the time the contract was opened.

Futures Contracts

The Fund may enter into futures contracts to maintain investment exposure to a target asset class or to seek to enhance return. The Fund may be subject to fluctuations in equity prices, interest rates, commodity prices and foreign currency exchange rates in the normal

course of pursuing its investment objective. Futures contracts are standardized agreements to buy or sell a security or deliver a final cash settlement price in connection with an index, interest rate, currency, or other asset. The Fund must deposit an amount ("initial margin") equal to a certain percentage of the face value of the futures contract. The initial margin may be in the form of cash or securities which is returned when the Fund's obligations under the contract have been satisfied. If cash is deposited as the initial margin, it is shown as segregated cash balance with broker for futures contracts. Futures contracts are marked-to-market daily and subsequent payments ("variation margin") are made or received by the Fund depending on whether unrealized gains or losses are incurred. When

the contract is closed or expires, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The potential risk to the Fund is that the change in value of futures contracts may not correspond to the change in the value of the hedge investments. In addition, losses may arise from changes in the value of the underlying instrument, if interest or exchange rates move unexpectedly or if the counterparty is unable to perform. With futures, there is minimal counterparty credit risk to the Fund since futures are exchange traded and the exchanges' clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

Options Contracts

The Fund may purchase and write call and put options. An option contract purchased by the Fund gives the Fund the right, but not the obligation, to buy (call) or sell (put) an underlying instrument at a fixed exercise price during a specified period. Call options written by the Fund give the holder the right to buy the underlying instrument from the Fund at a fixed exercise price; put options written by the Fund give the holder the right to sell the underlying instrument to the Fund at a fixed exercise price. The Fund may use options to hedge against changes in values of securities or currencies it owns or expects to own, to gain or to maintain exposure to interest rates, currencies or broad equity markets, to generate additional income or to enhance returns.

Options trading involve certain additional risks. Specific market movements of the option and the instruments underlying the option cannot be predicted. No assurance can be given that a liquid secondary market will exist for any particular option or at any particular time. The Fund might not be able to enter into a closing transaction for the option as a result of an illiquid market for the option. To realize any profit in the case of an option, therefore, the option holder would need to exercise the option and comply with margin requirements for the underlying instrument. A writer could not terminate the obligation until the option expired or the writer was assigned an exercise notice. The purchaser of an option is subject to the risk of losing the entire purchase price of the option. The writer of an option is subject to the risk of loss resulting from the difference between the premium received for the option and the price of the futures contract underlying the option that the writer must purchase or deliver upon exercise of the option. The writer of a naked option may have to purchase the underlying contract in the market for substantially more than the exercise price of the option in order to satisfy his delivery obligations. This could result in a large net loss.

Equity, foreign currency or index options that may be purchased or sold by the Fund may include options not traded on a securities exchange. The risk of nonperformance by the counterparty on such option may be greater and the ability of the Fund to enter into a closing transaction with respect to such option may be less than in the case of an exchange traded option.

The Fund may purchase or write interest rate swaption agreements, which are options to enter into a predefined swap agreement by some specific date in the future. The writer of the swaption becomes the counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed-rate receiver or a fixed-rate payer upon exercise.

Purchases of put and call options are recorded as investments, the value of which are marked-to-market daily. When a purchased option expires without being exercised, the Fund will realize a loss equal to the premium paid. When the Fund enters into a closing sale transaction, the Fund will realize a gain or loss depending on whether the sales proceeds from the closing sale transaction are greater or less than the premium initially paid for the option. When the Fund exercises a put option, it will realize a gain or loss from the sale of the underlying instrument and the proceeds from such sale will be decreased by the premium originally paid for the put option. When the Fund exercises a call option, the cost of the security which the Fund purchases upon exercise will be increased by the premium originally paid for the call option. Realized gains and losses on purchased options are included in realized gains and losses on investments.

The premium received for a written option is recorded as an asset and an equivalent liability. The liability is marked-to-market daily in accordance with the option's valuation policy. When a written option expires without being exercised or the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of the closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealized gain or loss on the underlying instrument and the liability related to such option is eliminated. When a written call option is exercised, the Fund realizes a gain or loss, as adjusted for the premium received, from the sale of the underlying instrument. When a written put option is exercised, the premium received is offset against the amount paid for the purchase of the underlying instrument.

Swap Agreements

The Fund may enter into total return, interest rate, and credit default swap agreements ("Swaps"). Swaps are bilaterally negotiated agreements between the Fund and a counterparty in which the Fund and counterparty agree to make either periodic net payments on a specified notional amount or a net payment upon termination. Swaps are privately negotiated in the OTC market or may be executed in

a multilateral or other trade facility platform, such as a registered exchange or swap execution facility ("centrally cleared swaps"). The Fund may enter into Swaps for the purposes of managing exposure to interest rate, credit or market risk, or for other purposes. In connection with these agreements, securities or cash ("segregated cash" or "collateral") may be paid or received, as applicable, by the Fund as collateral or margin in accordance with the terms of the respective Swaps to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Securities posted by the Fund as collateral for swaps are identified in the Consolidated Schedule of Investments.

Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform, or that there may be unfavorable changes in market conditions or interest rates. In addition, entering into Swaps involves documentation risk resulting from the possibility that the parties to a Swap may disagree as to the meaning of contractual terms in the agreement. The Fund's maximum risk of loss from counterparty credit risk is the discounted value of the net cash flows to be received from the counterparty over the contract's remaining life, to the extent that amount is positive, or the fair value of the contract. The risk may be mitigated by having an MNA between the Fund and the counterparty and by the posting of collateral by the counterparty to cover the Fund's exposure to the counterparty.

Interest Rate Swaps: The Fund may enter into OTC and/or centrally cleared interest rate swap contracts to hedge interest rate risk, to gain exposure on interest rates and to hedge prepayment risk. The Fund is subject to interest rate risk exposure in the normal course of pursuing their investment objectives. The Fund may hold fixed rate bonds, and the value of these bonds may decrease if interest rates rise. Interest rate swaps are agreements in which one party pays a stream of interest payments, either fixed or floating rate, for another party's stream of interest payments, either fixed or floating, on the same notional amount for a specified period of time. The Fund's maximum risk of loss from counterparty credit risk, as opposed to investment and other types of risk, in respect of interest rate swaps is typically the discounted net value of the cash flows to be received from the counterparty over the contracts remaining life, to the extent that amount is positive.

Interest rate swaps can be purchased or sold with an upfront premium. An upfront payment received by the Fund is recorded as a liability and an upfront payment made by the Fund is recorded as an asset. Interest rate swaps are marked-to-market daily and any change is recorded as an unrealized gain or loss on swaps. Daily fluctuations in the value of centrally cleared interest rate swaps are recorded as a receivable or payable for variation margin. Payments, including upfront premiums, received or made are recorded as realized gains or losses at the closing of the contract.

Total Return Swaps: The Fund may enter into total return Swaps to obtain exposure to a security, index, market or other basket of securities without owning such security or investing directly in that security, index, market or other basket of securities or to transfer the risk/return of one market (e.g., fixed income) to another market (e.g., equity) (equity risk and/or interest rate risk). Total return swaps are agreements in which one party agrees to make periodic payments to another party based on the change in market value of the underlying instrument, which may include a specified security, index, basket of securities or securities indices during the specific period, in return for periodic payments based on a fixed or floating rate or the total return from other underlying assets. To the extent the total return of the instrument underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty. Total return swaps can also be structured without an interest payment, so that one party pays the other party if the value of the underlying instrument increases and receives payment from the other party if the value of the underlying asset decreases.

The Fund may utilize total return swaps on baskets of securities ("Basket Swaps") to a significant extent in order to obtain synthetic exposure to investment strategies. For a Basket Swap, the Fund or a Subsidiary makes payments to a counterparty (at either a fixed or variable rate) in exchange for receiving from the counterparty payments that reflect the return of a "basket" of securities, derivatives, and/or commodity interests identified by the Sub-Adviser (or the Investment Adviser). The Fund may also utilize structured notes ("Basket Notes") in which the Fund or a Subsidiary purchases a note from an issuer in exchange for receiving from the issuer payments that reflect the return of an account through which the Sub-Adviser (or the Investment Adviser) manages a portfolio reflecting a basket of securities, derivatives, and/or commodity interests. The Sub-Adviser (or the Investment Adviser) will select and manage the securities, derivatives, and/or commodity interests underlying the Basket Swap or the Basket Note in a manner consistent with the Fund's strategies. The Fund's investment returns on Basket Swaps or Basket Notes generally will correspond to the Fund's returns had the Sub-Adviser managed the notional equivalent of the Fund's assets directly (although returns on Basket Swaps or Basket Notes will be reduced by financing charges and trading costs incurred by the Basket Swap counterparty or Basket Note issuer). The Fund may obtain a significant portion of its investment exposure through Basket Swaps and/or Basket Notes.

Credit Default Swaps: The Fund may enter into OTC and/or centrally cleared credit default swap contracts to hedge credit risk, to hedge market risk, or to gain exposure on single-name issuers and/or baskets of securities.

In a credit default swap contract, the protection buyer typically makes an upfront payment and a periodic stream of payments to a counterparty, the protection seller, in exchange for the right to receive a contingent payment upon the occurrence of a credit event on the reference obligation or all other equally ranked obligations of the reference entity. Credit events are contract specific but may include bankruptcy, failure to pay, restructurings and obligation acceleration. An upfront payment received by the Fund or made by the Fund is recorded as a liability or asset, respectively, in the Consolidated Statement of Assets and Liabilities. Periodic payments received or paid

by the Fund are recorded as realized gains or losses. Credit default swap contracts are marked-to-market daily and the change is recorded as an unrealized gain or loss on swaps. Upon the occurrence of a credit event, the difference between the par value and the market value of the reference obligation, net of any proportional amount of upfront payment, is recorded as a realized gain or loss on swaps.

Interest rate swaps, total return swaps and credit default swaps outstanding at period end are listed at the end of the Fund's Consolidated Schedule of Investments.

5. Fair Value Measurements

The following table presents information about the classification of the Fund's investments measured at fair value within the fair value hierarchy as of December 31, 2022:

| Assets: | Level 1 | Level 2 | Level 3 | Total |
|--|------------------|-------------------|------------------|------------------|
| Investments in Securities: | | | | |
| Common Stock | \$920,575,999 | \$ - | \$1,079,853 | \$921,655,852 |

Investments in Investee Funds that are measured at fair value using NAV as a practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Consolidated Schedule of Investments.

Investments in Investee Funds that are non-redeemable or subject to other restrictions such as a lockup at the measurement date or have the ability to limit the individual amount of investor redemptions shall be classified as having a redemption restriction.

The following table summarizes investments in Investee Funds, by investment strategy, the unfunded commitment of each strategy (if applicable), and the amount of the investment in Investee Fund that cannot be redeemed because of redemption restrictions put in place by the Investee Fund.

| Investments in Unfunded | | Non-Redeema | ble Investments (A) | Other Restricted | d Investments (B) | Investments Subject to No Restrictions | Total |
|-------------------------------|------------------|--------------|---|------------------|-----------------------------------|--|-------------|
| Investee Funds by Strategy | Commitment \$ | Amount \$ | Redemption Restriction Commencement Date | Amount \$ | Redemption Restriction Term | Amount \$ | 8 \$ |
| Event-Driven (1) | 26,675,900 | 2,133,824 | N/A | 77,936,641 | Semi-Annual | _ | 80,070,465 |
| Macro Strategies (2) | N/A | _ | N/A | 110,523,414 | 90 Days | _ | 110,523,414 |
| Macro Strategies (2) | N/A | ı | N/A | 208,619,348 | 6 Days | - | 208,619,348 |
| Macro Strategies (2) | N/A | ı | N/A | 74,454,731 | 2 Years | - | 74,454,731 |
| Macro Strategies (2) | N/A | ı | _ | 26,399,856 | Monthly | - | 26,399,856 |
| Equity Hedge (3) | N/A | _ | N/A | 27,411,126 | Monthly | _ | 27,411,126 |

- (1) The Event-Driven strategy generally includes Investee Funds that seek returns by investing in strategies including catalyst events, share class arbitrage, share buybacks, post re-organization equity, recapitalizations, spin-offs and stub trades.
- The Macro Strategies strategy generally includes Investee Funds with a focus on opportunistic and strategic allocations across asset classes including but not limited to bonds, rates, currencies and commodities.
- (3) The Equity Hedge strategy generally includes equity-focused Investee Funds with a bottom-up analysis that do not actively trade exposures, with trading strategies focusing on shorter-term dynamics and appreciation for market technicals, top-down thematic/macro views, and technically driven statistical arbitrage with fundamental quantitative long/short strategies.
- (A) Investments in Investee Funds cannot currently be redeemed and the remaining redemption restriction period is not known. The date the redemption restriction commenced is disclosed.
- (B) Investments subject to other restrictions include investments in Investee Funds that are subject to a lockup at the measurement date and/or have the ability to limit the individual amount of investor redemptions. The redemption restriction term is based on the restriction period (or range of restriction periods) for Investee Funds as defined in each respective Investee Fund's governing legal agreement without consideration of the length of time elapsed from the date of investments in Investee Funds. The Fund's investment in a particular Investee Fund classified within the strategies above may be comprised of investments with differing liquidity terms or investments that were made at differing points in time.

The Fund recognizes transfers within the fair value hierarchy as of the beginning of the period. Transfers into and out of Level 3 were primarily related to the availability of broker quotations in accordance with valuation methodology.

The changes in investments measured at fair value for which the Fund used Level 3 inputs to determine fair value are as follows:

| | | | | Corporate | | | Common | Unfunded | |
|--|-------------|-------------|-------------------|-----------|---------------|-------------|-------------|-----------------|---------------|
| Assets: | Common | Preferred | Bank | Bonds & | | | Stocks Sold | Loan | |
