MERRILL LYNCH SENIOR FLOATING RATE FUND II, INC., FEBRUARY 28, 2005

A Letter From the President

Dear Shareholder

Financial markets broadly posted positive returns over the most recent reporting period, with international equities providing some of the most impressive results.

<TABLE>  
<CAPTION>

Total Returns as of February 28, 2005	6-month	12-month
<S>	<C>	<C>
U.S. equities (Standard & Poor's 500 Index)	+ 9.99%	+ 6.98%
International equities (MSCI Europe Australasia Far East Index)	+21.18	+18.68
Fixed income (Lehman Brothers Aggregate Bond Index)	+ 1.26	+ 2.43
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+ 2.40	+ 2.96
High yield bonds (Credit Suisse First Boston High Yield Index)	+ 7.53	+11.21

The U.S. economy has continued to show resilience in the face of the

Federal Reserve Board's (the Fed) continued interest rate hikes and, more recently, higher oil prices. The Fed's measured tightening program recently brought the federal funds rate to 2.75% en route to a more "neutral" short-term interest rate target (relative to inflation). Since the U.S. presidential election, progress has been monitored on many fronts in Washington, although concerns remain about the structural problems of debt and deficits, as reflected by a significant decline in the U.S. dollar.

U.S. equities ended 2004 in a strong rally, but remained in a fairly narrow trading range for the first two months of 2005. Divergences were notable among sectors, with energy emerging as a clear leader. On the positive side, corporations have accelerated their hiring plans, capital spending remains reasonably robust and merger-and-acquisition activity has increased. Offsetting the positives are slowing corporate earnings growth, renewed energy price concerns and the potential for an economic slowdown. International equities, particularly in Asia, have benefited from higher economic growth rates (China recorded growth of 9.3% in 2004), stronger currencies and relatively reasonable valuations.

The major action in the bond market has been a flattening of the yield curve. As short-term interest rates continued to rise, yields on the long end of the curve remained relatively stable - even declining at certain points since the Fed's monetary tightening program began in June 2004. This phenomenon has been largely attributed to continued foreign interest in U.S. bonds, which has served to absorb much of the excess supply. By period-end, many believed long-term yields were long overdue for a rise.

Looking ahead, the environment is likely to be a challenging one for investors, with diversification and selectivity becoming increasingly important themes. With this in mind, we encourage you to meet with your financial advisor to review your goals and asset allocation and to rebalance your portfolio, as necessary, to ensure it remains aligned with your objectives and risk tolerance. As always, we thank you for trusting Merrill Lynch Investment Managers with your investment assets, and we look forward to serving you in the months and years ahead.

Sincerely,

(Robert C. Doll, Jr.)  
Robert C. Doll, Jr.  
President and Director/Trustee

MERRILL LYNCH SENIOR FLOATING RATE FUND II, INC., FEBRUARY 28, 2005

#### A Discussion With Your Fund's Portfolio Manager

The Fund slightly outperformed its benchmark for the period, as security selection in the chemical, U.S. cable and services sectors had a positive effect on the relative return.

Describe market conditions during the past six months.

Throughout the period, the leverage loan market continued to benefit from the significant demand that it experienced since the beginning of 2004. This created an excess cash imbalance that was left virtually intact through the end of February 2005, as new inflows have continued to match the value of new issues. Demand in the marketplace has led to higher secondary-market loan prices and new issues with generally lower interest spreads versus London InterBank Offering Rate (LIBOR), and average new-issue allocation amounts per investor that are lower than their historical levels.

A significant rise in LIBOR more than offset declines in the interest rate spreads on BB-rated and B-rated new issues during the period. Another positive development in the leveraged loan sector has been the improving default rate. As of the end of February 2005, the lagging 12-month institutional loan default rate stood at 1.36% by number of loans and 1.37% of principal amount, according to

Standard & Poor's Leveraged Commentary & Data. Although this is a 12-month high due to the recent default of Tower Automotive Inc., the default rates are still well below the recent historical averages (since 1998) of 3.87% by number of loans and 4.18% by principal amount.

How did the Fund perform during the period in light of the existing market conditions?

For the six-month period ended February 28, 2005, the Common Stock of Merrill Lynch Senior Floating Rate Fund II, Inc. had a net annualized yield of 3.80%, based on a period-end per share net asset value of \$9.80 and \$.185 per share income dividends. For the same period, the total investment return on the Fund's Common Stock was +3.18%, based on a change in per share net asset value from \$9.67 to \$9.80, and assuming reinvestment of all distributions. For the same period, the Fund's unmanaged benchmark index, the Credit Suisse First Boston (CSFB) Leveraged Loan Index, recorded a total return of +3.01%.

Security selection in chemicals, U.S. cable and services benefited the Fund's performance during the period. However, the portfolio's holdings in the energy-other, transportation and steel sectors had a negative effect on the return.

The Fund's strong performance in the chemical sector resulted primarily from our positions in Pioneer Cos., Inc. and GEO Specialty Chemicals, Inc. The value of Pioneer Companies, a security we acquired during a corporate restructuring, rose during the period on the strength of the chlor-alkali industry. GEO Specialty Chemical experienced improved operating performance and reduced leverage, leading to a rally in the company's bond and stock prices.

Our positions in the U.S. cable sector benefited from the strong returns of Century Cable Holdings LLC (an Adelphia company) and Charter Communications Operating LLC. The prices of securities of Century Cable, as well as other Adelphia companies in the portfolio, rallied as Adelphia nears the completion of its auction. Charter Communications' bank loan issue rallied on the company's recent refinancing to improve liquidity.

The Fund's positive return in the service sector was due mainly to the robust performances of our holdings in Anthony Crane Rental LP and The Shaw Group, Inc. The former company's term loan security rallied as the company prepared to exit bankruptcy with a more favorable capital structure and the commercial construction industry showed signs of renewed vigor. Shaw Group, an engineering and consulting firm, announced better-than-expected earnings, thereby boosting the price of the company's stock, which we received as part of the restructuring of IT Group. Shaw Group acquired all of the assets and some liabilities of IT Group in 2002.

The Fund's weak performances in the energy-other and transportation sectors resulted primarily from several companies calling at par value loans that had been priced above par in the market. At the end of the period, none of the Fund's holdings in the energy-other sector were priced below par value.

MERRILL LYNCH SENIOR FLOATING RATE FUND II, INC., FEBRUARY 28, 2005

Finally, the main contributor to the Fund's poor performance in the steel sector was our position in Acme Package Corp. stock. The shares of this distressed company declined in value as the Fund received cash payments, which were classified for accounting purposes as the return of principal.

What changes were made to the portfolio during the period?

During the period, Master Senior Floating Rate Trust, of which the Fund invests all of its assets, purchased assets of approximately \$282 million in par amount (face value), and experienced \$226 million in repayments from issuers. In addition, we sold roughly \$16 million in assets during the period because of the Trust's relatively high cash position. We normally seek to

maintain a cash weighting of less than 5% of net assets; however, issuer repayments and the robust demand for paper in the leveraged loan market made this an increasingly difficult task.

How would you characterize the portfolio's position at the close of the period?

At the end of the period, the portfolio was composed of 156 issuers spread among 26 industries. The Trust was underweight versus its composite benchmark in securities rated Ba or better and credits rated Caa or below, and was overweight in B-rated and unrated securities.

Looking forward, we anticipate that many of the same factors that had an impact on leveraged loan securities in the past six months will continue to influence the fundamentals in the market. We believe the trend of small allocation amounts for issuances of new loans, lower interest rate spreads and above-par secondary market prices will continue, especially given the benign credit environment we expect over the next six months. A further benefit to the market during the period would be an increase in LIBOR. Therefore, we plan to continue to purchase assets predominately in the primary market, while selectively participating in the secondary market.

Joseph P. Matteo  
Vice President and Portfolio Manager

March 21, 2005

MERRILL LYNCH SENIOR FLOATING RATE FUND II, INC., FEBRUARY 28, 2005

#### Disclosure of Expenses

Shareholders of this Fund may incur the following charges:  
(a) expenses related to transactions, including sales charges, redemption fees and exchange fees; and (b) operating expenses, including advisory fees, distribution fees including 12(b)-1 fees, and other Fund expenses. The following example (which is based on a hypothetical investment of \$1,000 invested on September 1, 2004 and held through February 28, 2005) is intended to assist shareholders both in calculating expenses based on an investment in the Fund and in comparing these expenses with similar costs of investing in other mutual funds.

The first table below provides information about actual account values and actual expenses. In order to estimate the expenses a shareholder paid during the period covered by this report, shareholders can divide their account value by \$1,000 and then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

The second table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses. In order to assist shareholders in comparing the ongoing expenses of investing in this Fund and other funds, compare the 5% hypothetical example with the 5% hypothetical examples that appear in other funds' shareholder reports.

The expenses shown in the table are intended to highlight shareholders ongoing costs only and do not reflect any transactional expenses, such as sales charges, redemption fees or exchange fees. Therefore, the second table is useful in comparing ongoing expenses only, and will not help shareholders determine the relative total expenses of owning different funds. If these transactional expenses were included, shareholder expenses would have been higher.

<TABLE>  
<CAPTION>

	Beginning	Ending	Expenses Paid
	Account Value	Account Value	During the Period*
			September 1, 2004

	September 1, 2004	February 28, 2005	to February 28, 2005
<S> Actual	<C>	<C>	<C>
Merrill Lynch Senior Floating Rate Fund II, Inc.	\$1,000	\$1,031.80	\$7.86
Hypothetical (5% annual return before expenses)**			
Merrill Lynch Senior Floating Rate Fund II, Inc.	\$1,000	\$1,017.06	\$7.80

\* Expenses are equal to the annualized expense ratio of 1.56%, multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year period shown). Because the Fund is a feeder fund, the expense table example reflects the expenses of both the feeder fund and the master fund in which it invests.

\*\* Hypothetical 5% annual return before expenses is calculated by pro-rating the number of days in the most recent fiscal half-year divided by 365.

MERRILL LYNCH SENIOR FLOATING RATE FUND II, INC., FEBRUARY 28, 2005

Notes to Financial Statements

Merrill Lynch Senior Floating Rate Fund II, Inc.

1. Significant Accounting Policies:

Merrill Lynch Senior Floating Rate Fund II, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a continuously offered, non-diversified, closed-end management investment company. The Fund seeks to achieve its investment objective by investing all of its assets in the Master Senior Floating Rate Trust (the "Trust"), which has the same investment objective and strategies as the Fund. The value of the Fund's investment in the Trust reflects the Fund's proportionate interest in the net assets of the Trust. The performance of the Fund is directly affected by the performance of the Trust. The financial statements of the Trust, including the Schedule of Investments, are included elsewhere in this report and should be read in conjunction with the Fund's financial statements. The Fund's financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The percentage of the Trust owned by the Fund at February 28, 2005 was 32.0%. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments--The Fund records its investment in the Trust at fair value. Valuation of securities held by the Trust is discussed in Note 1b of the Trust's Notes to Financial Statements, which are included elsewhere in this report.

(b) Investment income and expenses--The Fund records daily its proportionate share of the Trust's income, expenses and realized and unrealized gains and losses. In addition, the Fund accrues its own expenses.

(c) Income taxes--It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to shareholders. Therefore, no federal income tax provision is required.

(d) Prepaid registration fees--Prepaid registration fees are charged to expense as the related shares are issued.

(e) Dividends and distributions--Dividends from net investment income are declared daily and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(f) Investment transactions--Investment transactions in the Trust are accounted for on a trade date basis.

2. Transactions with Affiliates:

The Fund has entered into an Administration Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner. The Fund pays a monthly fee at an annual rate of .40% of the Fund's average daily net assets for the performance of administrative services (other than investment advice and related portfolio activities) necessary for the operation of the Fund.

Financial Data Services, Inc. ("FDS"), a wholly-owned subsidiary of ML & Co., is the Fund's transfer agent.

For the six months ended February 28, 2005, FAM Distributors, Inc. ("FAMD"), a wholly-owned subsidiary of Merrill Lynch Group, Inc., earned early withdrawal charges of \$24,205 relating to the tender of

the Fund's shares.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, FAMD, FDS, and/or ML & Co.

3. Capital Share Transactions:

Transactions in capital shares were as follows:

For the Six Months Ended February 28, 2005	Shares	Dollar Amount
Shares sold	5,264,329	\$ 51,309,761
Shares issued to shareholders in reinvestment of dividends	331,025	3,228,888

			=====

- (a) Floating rate note.
- (b) The security may be offered and sold to "qualified institutional buyers" under Rule 144A of the Securities Act of 1933.
- (c) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date.
- (d) Non-income producing security; issuer filed for bankruptcy or is in default of interest payments.
- (e) Other Interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (f) Investments in companies considered to be an affiliate of the Trust (such companies are defined as "Affiliated Companies" in Section 2(a)(3) of the Investment Company Act of 1940) were as follows:

Affiliate	Net Activity	Interest Income
Merrill Lynch Liquidity Series, LLC Cash Sweep Series I	\$ (41,581,561)	\$ 1,107,171

- (g) Non-income producing security.
- (h) Convertible security.

\* Senior secured floating rate loan interests in which the Trust invests generally pay interest at rates that are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally (i) the lending rate offered by one or more major European banks, such as LIBOR (London InterBank Offered Rate), (ii) the prime rate offered by one or more major U.S. banks or (iii) the certificate of deposit rate.

++ For Trust compliance purposes, "Industry" means any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine industry sub-classifications for reporting ease.

+++ The cost and unrealized appreciation (depreciation) of investments as of February 28, 2005, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 1,074,023,067
Gross unrealized appreciation	\$ 13,592,985
Gross unrealized depreciation	(42,748,676)
Net unrealized depreciation	\$ (29,155,691)

See Notes to Financial Statements.

Notes to Financial Statements

Master Senior Floating Rate Trust

1. Significant Accounting Policies:

Master Senior Floating Rate Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, and is organized as a Delaware statutory trust. The Declaration of Trust permits the Trustees to issue nontransferable interests in the Trust, subject to certain limitations. The Trust's financial statements are

prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The following is a summary of significant accounting policies followed by the Trust.

(a) Loan participation interests--The Trust primarily invests in senior secured floating rate loan interests ("Loan Interests") with collateral having a market value, at the time of acquisition by the Trust, which Trust management believes equals or exceeds the principal amount of the Corporate Loan. The Trust may invest up to 20% of its total assets in loans made on an unsecured basis. Because agents, banks and intermediate participants from whom the Trust purchases the loan interest are primarily financial institutions, the Trust's investment in Corporate Loans at February 28, 2005 could be considered to be concentrated in the industry group consisting of financial institutions.

(b) Valuation of investments--Loan Interests are valued in accordance with guidelines established by the Board of Trustees. Loan Interests are valued at the mean between the last available bid and asked prices from one or more brokers or dealers as obtained from Loan Pricing Corporation. For the limited number of Loan Interests for which no reliable price quotes are available, such Loan Interests will be valued by Loan Pricing Corporation through the use of pricing matrixes to determine valuations. If the pricing service does not provide a value for the loan interests, the Investment Adviser will value the Loan Interests at fair value, which is intended to approximate market value.

Securities that are held by the Trust that are traded on stock exchanges or the Nasdaq National Market are valued at the last sale price or official close price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price for long positions, and at the last available ask price for short positions. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by or under the authority of the Board of Trustees of the Trust. Long positions in securities traded in the over-the-counter ("OTC") market, Nasdaq Small Cap or Bulletin Board are valued at the last available bid price or yield equivalent obtained from one or more dealers or pricing services approved by the Board of Trustees of the Trust. Short positions in securities traded in the OTC market are valued at the last available ask price. Portfolio securities that are traded both in the OTC market and on a stock exchange are valued according to the broadest and most representative market. When the Trust writes an option, the amount of the premium received is recorded on the books of the Trust as an asset and an equivalent liability. The amount of the liability is subsequently valued to reflect the current market value of the option written, based on the last sale price in the case of exchange-traded options or, in the case of options traded in the OTC market, the last ask price. Options purchased by the Trust are valued at their last sale price in the case of exchange-traded options or, in the case of options traded in the OTC market, the last bid price. The value of swaps, including interest rate swaps, caps and floors, will be determined by obtaining dealer quotations. Other investments, including futures contracts and related options, are stated at market value. Obligations with remaining maturities of 60 days or less are valued at amortized cost unless the Investment Adviser believes that this method no longer produces fair valuations. Repurchase agreements will be valued at cost plus accrued interest. The Trust employs certain pricing services to provide securities prices for the Trust. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Trustees of the Trust, including valuations furnished by the pricing services retained by the Trust, which may use a matrix system for valuations. The procedures of a pricing service and its valuations are reviewed by the officers of the Trust under the general supervision of the Board of Trustees. Such valuations and procedures will be reviewed periodically by the Trustees.

Generally, trading in foreign securities, as well as U.S. government securities and money market instruments, is substantially completed each day at various times prior to the close of business on the New York Stock Exchange ("NYSE"). The values of such securities used in computing the net assets of the Trust are determined as of such times. Foreign currency exchange rates also are generally determined prior to the close of business on the NYSE. Occasionally, events affecting the values of such securities and such exchange rates may occur between the times at which they are determined and the close of business on the NYSE that may not be reflected in the computation of the Trust's net assets. If events (for example, a company announcement, market volatility or a natural disaster) occur during such periods that are expected to materially affect the value of such securities, those securities may be valued at their fair value as determined in good faith by the Board of Trustees or by the Investment Adviser using a pricing service and/or procedures approved by the Board of Trustees.

(c) Derivative financial instruments--The Trust may engage in various portfolio investment strategies both to increase the return of the Trust and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

\* Swaps--The Trust may enter into swap agreements, which are over-the-counter contracts in which the Trust and counterparty agree to make periodic net payments on a specified notional amount. The net payments can be made for a set period of time or may be triggered by a predetermined credit event. The net periodic payments may be based on a fixed or variable interest rate; the change in market value of a specified security, basket of securities, or index; or the return generated by a security. These periodic payments received or made by the Fund are recorded in the accompanying Statement of Operations as realized gains or losses, respectively. Gains or losses are also realized upon termination of the swap agreements. Swaps are marked-to-market daily based on dealer-supplied valuations and changes in value are recorded as unrealized appreciation (depreciation). Risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms and the possible lack of liquidity with respect to the swap agreements.

(d) Income taxes--The Trust is classified as a partnership for federal income tax purposes. As such, each investor in the Trust is treated as owner of its proportionate share of the net assets, income, expenses and realized and unrealized gains and losses of the Trust. Therefore, no federal income tax provision is required. It is intended that the Trust's assets will be managed so an investor in the Trust can satisfy the requirements of subchapter M of the Internal Revenue Code.

(e) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Trust amortizes all premiums and discounts on debt securities.

(f) Securities lending--The Trust may lend securities to financial institutions that provide cash or securities issued or guaranteed by the U.S. government as collateral, which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Trust and any additional required collateral is delivered to the Trust on the next business day. Where the Trust receives securities as collateral for the loaned securities, it receives a fee from the borrower. The Trust typically receives the income on the loaned securities, but does not receive the income on the collateral. Where the Trust receives cash collateral, it may invest such collateral and retain the amount earned on such investment, net of any amount rebated to

the borrower. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within five business days. The Trust may pay reasonable finder's, lending agent, administrative and custodial fees in connection with its loans. In the event that the borrower defaults on its obligation to return borrowed securities because of insolvency or for any other reason, the Trust could experience delays and costs in gaining access to the collateral. The Trust also could suffer a loss where the value of the collateral falls below the market value of the borrowed securities, in the event of borrower default or in the event of losses on investments made with cash collateral.

MERRILL LYNCH SENIOR FLOATING RATE FUND II, INC., FEBRUARY 28, 2005

Notes to Financial Statements (concluded)  
Master Senior Floating Rate Trust

2. Investment Advisory Agreement and Transactions with Affiliates:  
The Trust has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Trust's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Trust. For such services, the Trust pays a monthly fee at an annual rate of .95% of the average daily value of the Trust's net assets.

The Trust has received an exemptive order from the Securities and Exchange Commission permitting it to lend portfolio securities to Merrill Lynch, Pierce, Fenner & Smith Incorporated, an affiliate of FAM, or its affiliates. Pursuant to that order, the Trust also has retained Merrill Lynch Investment Managers, LLC ("MLIM, LLC"), an affiliate of FAM, as the securities lending agent for a fee based on a share of the returns on investment of cash collateral. MLIM, LLC may, on behalf of the Trust, invest cash collateral received by the Trust for such loans, among other things, in a private investment company managed by MLIM, LLC or in registered money market funds advised by FAM or its affiliates.

For the six months ended February 28, 2005, the Trust reimbursed FAM \$12,592 for certain accounting services.

Certain officers and/or trustees of the Trust are officers and/or directors of FAM, PSI and/or ML & Co.

### 3. Investments:

Purchases and sales (including paydowns) of investments, excluding short-term securities, for the six months ended February 28, 2005 were \$311,153,670 and \$225,306,906, respectively.

### 4. Unfunded Loan Interests:

As of February 28, 2005, the Trust had unfunded loan commitments of approximately \$31,102,000 which would be extended at the option of the borrower, pursuant to the following loan agreement:

Borrower	Unfunded Commitment (In Thousands)
Advanced Medical	\$1,000
Celanese Holdings TLC	\$1,916
Pinnacle Entertainment, Inc.	\$4,594
NFIL Holdings Corp.	\$5,000
Saguaro Utility Group	\$7,500
Texas Genco	\$4,092
Vanguard Health Systems, Inc.	\$1,000
Vought Aircraft Industries, Inc.	\$6,000

#### 5. Short-Term Borrowings:

The Trust, along with certain other funds managed by FAM and its affiliates, is a party to a \$500,000,000 credit agreement with a group of lenders. The Trust may borrow under the credit agreement to fund shareholder redemptions and for other lawful purposes other than for leverage. The Trust may borrow up to the maximum amount allowable under the Trust's current prospectus and statement of additional information, subject to various other legal, regulatory or contractual limits. The Trust pays a commitment fee of .07% per annum based on the Trust's pro rata share of the unused portion of the credit agreement. Amounts borrowed under the credit agreement bear interest at a rate equal to, at each Trust's election, the federal funds rate plus .50% or a base rate as defined in the credit agreement. The Trust did not borrow under the credit agreement during the six months ended February 28, 2005. On November 26, 2004, the credit agreement was renewed for one year under substantially the same terms.

MERRILL LYNCH SENIOR FLOATING RATE FUND II, INC., FEBRUARY 28, 2005

#### Portfolio Information Master Senior Floating Rate Trust

As of February 28, 2005

#### Availability of Quarterly Schedule of Investments

The Fund files its complete schedule of portfolio holdings with the Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Fund's Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

#### Electronic Delivery

The Fund offers electronic delivery of communications to its shareholders. In order to receive this service, you must register your account and provide us with e-mail information. To sign up for this service, simply access this Web site at <http://www.icsdelivery.com/live> and follow the instructions. When you visit this site, you will obtain a personal identification number (PIN). You will need this PIN should you wish to update your e-mail address, choose to discontinue this service and/or make any other changes to the service. This service is not available for certain retirement accounts at this time.

CERTIFICATION PURSUANT TO SECTION 302  
OF THE SARBANES-OXLEY ACT OF 2002

I, Robert C. Doll, Jr., Chief Executive Officer of Merrill Lynch Senior Floating Rate Fund II, Inc. and Master Senior Floating Rate Trust, certify that:

1. I have reviewed this report on Form N-CSR of Merrill Lynch Senior Floating Rate Fund II, Inc. and Master Senior Floating Rate Trust;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, changes in net assets, and cash flows (if the financial statements are required to include a statement of cash flows) of the registrants as of, and for, the periods presented in this report;

4. The registrants' other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) and internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) for the registrants and have:

a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) evaluated the effectiveness of the registrants' disclosure

controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of a date within 90 days prior to the filing date of this report based on such evaluation; and

d) disclosed in this report any change in the registrants' internal control over financial reporting that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrants' internal control over financial reporting; and

5. The registrants' other certifying officer(s) and I have disclosed to the registrants' auditors and the audit committees of the registrants' boards of directors (or persons performing the equivalent functions):

a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrants' internal control over financial reporting.
