## Matthews India Fund

### SUMMARY PROSPECTUS—INVESTOR CLASS

April 27, 2012

#### TICKER: MINDX

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund online at [matthewsasiasia.com/prospectus](http://matthewsasiasia.com/prospectus). You may also obtain this information at no additional cost by calling 800.789.ASIA (2742) or by sending an e-mail request to [prospectus@matthewsasiasia.com](mailto:prospectus@matthewsasiasia.com). The Fund's Prospectus and Statement of Additional Information, both dated April 27, 2012, are incorporated by reference into this Summary Prospectus.

#### *Investment Objective*

Long-term capital appreciation

#### *Fees and Expenses of the Fund*

This table describes the fees and expenses that you may pay if you buy and hold shares of this Fund.

#### SHAREHOLDER FEES

*(fees paid directly from your investment)*

Redemption Fee (as a percentage of amount redeemed on shares held fewer than 90 days)	2.00%
--	-------

#### ANNUAL OPERATING EXPENSES

*(expenses that you pay each year as a percentage of the value of your investment)*

Management Fees		0.67%
Distribution (12b-1) Fees		None
Other Expenses		0.51%
Administration and Shareholder Servicing Fees	0.15%	
<b>Total Annual Fund Operating Expenses</b>		<b>1.18%</b>

#### EXAMPLE OF FUND EXPENSES

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One year: \$120

Three years: \$375

Five years: \$649

Ten years: \$1,432

## **PORTFOLIO TURNOVER**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example of fund expenses, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 4% of the average value of its portfolio.

### *Principal Investment Strategy*

Under normal market conditions, the Matthews India Fund seeks to achieve its investment objective by investing at least 80% of its total net assets, which include borrowings for investment purposes, in publicly traded common stocks, preferred stocks and convertible securities of companies located in India. A company is considered to be “located” in a country if it (i) is organized under the laws of that country; (ii) derives at least 50% of its revenues or profits from goods produced or sold, investments made, services performed, or has at least 50% of its assets located within that country; (iii) has the primary trading markets for its securities in that country; or (iv) is a governmental entity or an agency, instrumentality or a political subdivision of that country. The Fund seeks to invest in companies capable of sustainable growth based on the fundamental characteristics of those companies, including balance sheet information; number of employees; size and stability of cash flow; management’s depth, adaptability and integrity; product lines; marketing strategies; corporate governance; and financial health.

### *Principal Risks of Investment*

**Political, Social and Economic Risks:** The value of the Fund’s assets may be adversely affected by political, economic, social and religious instability; inadequate investor protection; changes in laws or regulations of countries within the Asian (including countries in which the Fund invests, as well as the broader region); international relations with other nations; natural disasters; corruption and military activity. Furthermore, the economies of many Asian countries differ from the economies of more developed countries in many respects, such as rate of growth, inflation, capital reinvestment, resource self-sufficiency, financial system stability, the national balance of payments position and sensitivity to changes in global trade.

**Currency Risks:** When the Fund conducts securities transactions in a foreign currency, there is the risk of the value of the foreign currency increasing or decreasing against the value of the U.S. dollar. The value of an investment denominated in a foreign currency will decline in dollar terms if that currency weakens against the dollar. While the Fund is permitted to hedge currency risks, Matthews does not anticipate doing so at this time. Additionally, India may utilize formal or informal currency-exchange controls or “capital controls.” Capital controls may impose restrictions on the Fund’s ability to repatriate investments or income. Such controls may also affect the value of the Fund’s holdings.

**Risks Associated with Emerging and Frontier Markets:** Many Asian countries are considered emerging or frontier markets. Such markets are often less stable politically and economically than developed markets such as the United States, and investing in these markets involves different and greater risks. There may be less publicly available information about companies in emerging and frontier markets. Their stock exchanges and brokerage industries typically do not have the level of government oversight as do those in the United States. Securities markets of such countries are substantially smaller, less liquid and more volatile than securities markets in the United States.

**Trading Markets and Depositary Receipts:** Asian securities may trade in the form of depositary receipts, including American, European and Global Depositary Receipts. Although depositary receipts have risks similar to the securities that they represent, they may also involve higher expenses and may trade at a discount (or premium) to the underlying security. In addition, depositary receipts may not pass through voting and other shareholder rights, and may be less liquid than the underlying securities listed on an exchange.

**Volatility:** The smaller size and lower levels of liquidity in emerging markets, as well as other factors, may result in changes in the prices of Asian securities that are more volatile than those of companies in more developed regions. This volatility can cause the price of the Fund’s shares (NAV) to go up or down dramatically. Because of this volatility, it is recommended that you invest in the Fund only for the long term (at least five years).

**Non-diversified:** The Fund is a “non-diversified” investment company, which means that it may invest a larger portion of its assets in the securities of a single issuer compared with a diversified fund. An investment in the Fund therefore will entail greater risk than an investment in a diversified fund.

**Convertible Securities:** The Fund may invest in convertible preferred stocks, and convertible bonds and debentures. The risks of convertible bonds and debentures include repayment risk and interest rate risk. Many Asian convertible securities are not rated by rating agencies like Moody’s, S&P or Fitch, or, if they are rated, they may be rated below investment grade (“junk bonds”), which may have a greater risk of default. Investing in a convertible security denominated in a currency different from that of the security into which it is convertible may expose the Fund to currency risk as well as risks associated with the level and volatility of the foreign exchange rate between the security’s currency and the underlying stock’s currency. Convertible securities may trade less frequently and in lower

volumes, or have periods of less frequent trading. Lower trading volume may also make it more difficult for the Funds to value such securities.

**Risks Associated with India:** Government actions, bureaucratic obstacles and inconsistent economic reform within the Indian government have had a significant effect on the economy and could adversely affect market conditions, deter economic growth and the profitability of private enterprises. Global factors and foreign actions may inhibit the flow of foreign capital on which India is dependent to sustain its growth. Large portions of many Indian companies remain in the hands of their founders (including members of their families). Corporate governance standards of family-controlled companies may be weaker and less transparent, which increases the potential for loss and unequal treatment of investors. India experiences many of the risks associated with developing economies, including relatively low levels of liquidity, which may result in extreme volatility in the prices of Indian securities.

Religious, cultural and military disputes persist in India, and between India and Pakistan (as well as sectarian groups within each country). Both India and Pakistan have tested nuclear arms, and the threat of deployment of such weapons could hinder development of the Indian economy, and escalating tensions could impact the broader region, including China.

## 2 MATTHEWS INDIA FUND

---

### Past Performance

The bar chart below shows the Fund's performance for each full calendar year since its inception and how it has varied from year to year, reflective of the Fund's volatility. Also shown are the best and worst quarters for this time period. The table below shows the Fund's performance over certain periods of time, along with performance of its benchmark index. The index performance does not take into consideration fees, expenses or taxes. The information presented below is past performance, before and after taxes, and is not a prediction of future results. Both the bar chart and performance table assume reinvestment of all dividends and distributions. For the Fund's most recent month-end performance, please visit [matthewsasia.com](http://matthewsasia.com) or call 800.789.2742.

#### ANNUAL RETURNS FOR YEARS ENDED 12/31

#### AVERAGE ANNUAL TOTAL RETURNS FOR PERIODS ENDED DECEMBER 31, 2011

	1 year	5 years	Since Inception (10/31/05)
<b>Matthews India Fund</b>			
Return before taxes	-36.48%	0.54%	7.77%
Return after taxes on distributions <sup>1</sup>	-36.52%	0.04%	7.34%
Return after taxes on distributions and sale of Fund shares <sup>1</sup>	-23.64%	0.38%	6.71%
<b>Bombay Stock Exchange 100 Index</b>	-36.66%	0.12%	9.47%

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

#### Investment Advisor

Matthews International Capital Management, LLC ("Matthews")

#### Portfolio Managers

**Lead Manager:** Sharat Shroff, CFA, has been a Portfolio Manager of the India Fund since 2006.

**Co-Manager:** Sunil Asnani has been a Portfolio Manager of the India Fund since 2010.

### *Purchase and Sale of Fund Shares*

You may purchase and sell shares directly through the Fund's transfer agent, by calling 800.789.ASIA (2742) or online at [matthewsasia.com](http://matthewsasia.com). Shares of the Funds may also be purchased and sold through various securities brokers and benefit plan administrators or their sub-agents ("Third-Party Intermediaries"). You may purchase and redeem shares by electronic bank transfer, check, or wire. A 2.00% redemption fee will be assessed on the sale or exchange of Fund shares within 90 days of purchase. Please see page 68 in the statutory prospectus for more details. The minimum initial and subsequent investment amounts for various types of accounts offered by the Fund are shown below.

<b>Type of Account</b>	<b>Minimum Initial Investment</b>	<b>Subsequent Investments</b>
Non-retirement	\$ 2,500	\$ 100
Retirement and Coverdell	\$ 500	\$ 50

### *Tax Information*

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Tax-deferred arrangements may be taxed later upon withdrawal from those accounts.

### *Payments to Broker-Dealers and Other Financial Intermediaries*

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), Matthews may pay the intermediary for the sale of Fund shares and related services. Shareholders who purchase or hold shares through an intermediary may inquire about such payments from that intermediary. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
