## VIRGINIA MINES AND YUKON RESOURCES SIGN BINDING AGREEMENT ON SAGAR URANIUM/ GOLD PROPERTY

Virginia Mines Inc. ("Virginia") and Yukon Resources Corporation ("Yukon") are pleased to announce the signing of a binding agreement whereas Yukon has the option to acquire an undivided 75% participating interest in 200 claims constituting the Sagar property, located in the Labrador Trough in Northern Quebec.

Under the terms of the agreement, Yukon has the option to earn a 75% interest in the property by issuing to Virginia 2,000,000 shares and 2,000,000 purchase warrants of Yukon, exercisable at US\$1.00 for a 3-year period, and by incurring total exploration expenditures of \$2,000,000 on the property by August 2008. Furthermore Virginia has the option at anytime to sell its remaining 25% participating interest into the Sagar property in consideration of 1,000,000 shares and 1,000,000 purchase warrants of Yukon. The share purchase warrants shall be exercisable at a price equal to the 20-trading day weighted average closing price preceding the selling date and shall be valid for a 2-year period from the date of issuance.

Once Yukon will have earned a 100% interest in the property, Virginia shall retain a 1.5% royalty (NSR). Virginia also keeps a 51% back-in right in any gold discovery with a 43-101 indicated resource of no less than 500,000 ounces by issuing a cash payment or a share certificate equivalent to an amount equal to 2.5 times the expenditures incurred by Yukon at such date. Virginia would then become the operator.

The Sagar property is the host to a very unusual boulder field which contains 150 boulders that have an average grade of 0.3% U and 50.7 g/t Au. Several other uranium-gold showings have been defined on the property, the most significant being the Viking (grab samples as high as 223 g/t Au and 0.1% U) and the Eagle (grab sample as high as 5.4 g/t Au and 1% U) showings. That information is confirmed by Paul Archer, Geological Engineer and qualified person (as defined by National Instrument 43-101). M. Archer has more than 25 years of experience in exploration.

## SIGNING OF A CA\$6.5 MILLION AGREEMENT WITH BREAKWATER RESOURCES

Virginia Mines Inc. ("Virginia") is pleased to announce the signing of an agreement with Breakwater Resources Ltd. ("Breakwater") on the Coulon project, located in the James Bay region of the Province of Quebec.

In accordance with the agreement, Breakwater has the option to acquire a 50% interest in the Coulon property in return for CA\$6.5 million in exploration expenditures and cash payments totalling CA\$180,000 over an 8-year period. Virginia will be the operator until the completion of a positive pre-feasibility study.

The Coulon project is the host to polymetallic, massive-sulphide lenses, which returned values of up to 15.39% Zn, 3.12% Pb, 117 g/t Ag and 0.46% Cu over 10.5 m on the Dom zone and of up to 1.31% Cu, 12.63 g/t Ag, 0.59% Zn over 38.13 m on the Nord Dom zone. The Coulon project located 15 km from the Fontanges airport, lies in an unexplored volcanic belt and is characterized by a geological assemblage typical of belts hosting volcanogenic, massive-sulphide deposits that have made north-western Quebec and north-eastern Ontario one of the world's richest regions of polymetallic deposits. A budget of nearly CA\$500,000 is foreseen for the second half of 2006 on the property.
