KEMPER DEFINED FUNDS SERIES 30

(CORPORATE INCOME SERIES AND TAX-EXEMPT PORTFOLIO)

Corporate Income Series 3 (the "Corporate Income Series") was formed for the purpose of providing a high level of current income through investment in a fixed portfolio consisting primarily of high yield, high risk corporate debt obligations issued after July 18, 1984. THE SECURITIES INCLUDED IN THE CORPORATE INCOME SERIES ARE COMMONLY KNOWN AS "JUNK BONDS" AND ARE SUBJECT TO GREATER MARKET FLUCTUATIONS AND POTENTIAL RISK OF LOSS OF INCOME AND PRINCIPAL

THAN ARE INVESTMENTS IN LOWER-YIELDING, HIGHER RATED FIXED INCOME SECURITIES. THE SECURITIES INCLUDED IN THE CORPORATE INCOME SERIES SHOULD BE VIEWED AS SPECULATIVE AND AN INVESTOR SHOULD REVIEW HIS ABILITY TO ASSUME THE RISKS ASSOCIATED WITH SPECULATIVE CORPORATE BONDS. THE PAYMENT OF INCOME IS DEPENDENT UPON THE CONTINUING ABILITY OF THE ISSUERS AND/OR OBLIGORS TO MEET THEIR RESPECTIVE OBLIGATIONS. SEE "CORPORATE INCOME SERIES--RISK FACTORS." For foreign investors who are not United States citizens or residents, interest income from the Corporate Income Series may not be subject to federal withholding taxes if certain conditions are met. See "Corporate Income Series--Federal Tax Status."

Insured National Series 14 (a "Tax-Exempt Portfolio" or the "Insured National Trust") was formed for the purpose of gaining interest income exempt from Federal income taxes while conserving capital and diversifying risks by investing in an insured, fixed portfolio consisting of obligations issued by or on behalf of states of the United States or counties, municipalities, authorities or political subdivisions thereof.

Insured California Series 14 and Insured Michigan Series 10 (each a "Tax-Exempt Portfolio" or an "Insured State Trust") were formed for the purpose of gaining interest income free from Federal and State income taxes and, where applicable, local income taxes and/or property taxes while conserving capital and diversifying risks by investing in an insured, fixed portfolio consisting of obligations issued by or on behalf of the State for which such Trust Fund is named or counties, municipalities, authorities or political subdivisions thereof.

Units of the Trusts are not deposits or obligations of, or guaranteed by, any bank, and Units are not federally insured or otherwise protected by the Federal Deposit Insurance Corporation and involve investment risk including loss of principal.

Insurance guaranteeing the scheduled payment of principal and interest on all of the Bonds in the portfolio of each Insured Trust has been obtained directly by the issuer or the Sponsor from Municipal Bond Investors Assurance Corporation or other insurers. See "Insurance on the Bonds" for each Insured Trust. Insurance obtained by a Bond issuer is effective so long as such Bonds are outstanding. THE INSURANCE DOES NOT RELATE TO THE UNITS OF THE INSURED TRUSTS OFFERED HEREBY OR TO THEIR MARKET VALUE. As a result of such insurance, the Units of the Insured Trusts have received a rating of "Aaa" by Moody's Investors Service, Inc. See "Insurance on the Bonds" for each Insured Trust. No representation is made as to any insurer's ability to meet its commitments.

SPONSOR: KEMPER UNIT INVESTMENT TRUSTS
a service of Kemper Securities, Inc.

THESE SECURITIES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE SECURITIES AND EXCHANGE COMMISSION OR ANY STATE SECURITIES COMMISSION NOR HAS THE SECURITIES AND EXCHANGE COMMISSION OR ANY STATE SECURITIES COMMISSION PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The investor is advised to read and retain this Prospectus for future reference.

THE DATE OF THIS PROSPECTUS IS FEBRUARY 22, 1995.

SUMMARY

PUBLIC OFFERING PRICE. The Public Offering Price per Unit of a Trust Fund during the initial offering period is equal to a pro rata share of the offering prices of the Securities in such Trust Fund plus or minus a pro rata share of cash, if any, in the Principal Account held or owned by such Trust Fund, plus accrued interest plus that sales charge indicated under "Essential Information." The secondary market Public Offering Price per Unit will be based upon a pro rata share of the bid prices of the Securities in each Trust Fund plus or minus a pro rata share of cash, if any, in the Principal Account held or owned by such Trust Fund, plus accrued interest plus the applicable sales charge. For sales charges in the secondary market, see "Public Offering of Units--Public Offering Price." The sales charge is reduced on a graduated

scale for sales involving at least \$100,000 or 10,000 Units and will be applied on whichever basis is more favorable to the investor. The minimum purchase for each Trust is \$1,000.

INTEREST AND PRINCIPAL DISTRIBUTIONS. Distributions of the estimated annual interest income to be received by each Trust Fund, after deduction of estimated expenses, will be made monthly. See "Essential Information." Distributions of funds, if any, in the Principal Account will be made as provided in "General Information--Unitholders--Distributions to Unitholders."

REINVESTMENT. Each Unitholder of a Trust Fund offered herein may elect to have distributions of principal or interest or both automatically invested without charge in shares of certain mutual funds sponsored by Kemper Financial Services, Inc. See "General Information--Distribution Reinvestment."

ESTIMATED LONG-TERM RETURN AND ESTIMATED CURRENT RETURN. As of the opening of business on the Initial Date of Deposit, the Estimated Long-Term Return and the Estimated Current Return, if applicable, for each Trust were as set forth in "Essential Information." The Estimated Current Return is calculated by dividing the estimated net annual interest income per Unit by the Public Offering Price. The estimated net annual interest income per Unit will vary with changes in fees and expenses of the Trustee, the Sponsor and Evaluator and with the principal prepayment, redemption, maturity, exchange or sale of Securities while the Public Offering Price will vary with changes in the offering price of the underlying Securities and with changes in the accrued interest; therefore, there is no assurance that the present Estimated Current Return will be realized in the future. Estimated Long-Term Return is calculated using a formula which (1) takes into consideration, and determines and factors in the relative weightings of, the market values, yields (which takes into account the amortization of premiums and the accretion of discounts) and estimated retirement dates of all of the Securities in the applicable Trust and (2) takes into account the expenses and sales charge associated with each Trust Unit. Since the market values and estimated retirement dates of the Securities and the expenses of a Trust will change, there is no assurance that the present Estimated Long-Term Return will be realized in the future. Estimated Current Return and Estimated Long-Term Return are expected to differ because the calculation of Estimated Long-Term Return reflects the estimated date and amount of principal returned while Estimated Current Return calculations include only net annual interest income and Public Offering Price.

MARKET FOR UNITS. After the initial offering period, while under no obligation to do so, the Sponsor intends to, and certain of the other Underwriters may, maintain a market for the Units and to offer to repurchase such Units at prices subject to change at any time which are based on the aggregate bid side evaluation of the Securities in a Trust plus accrued interest.

2

RISK FACTORS. An investment in the Trusts should be made with an understanding of the risks associated therewith, including, among other factors, the inability of the issuer or an insurer to pay the principal of or interest on a bond when due, volatile interest rates, early call provisions, and changes to the tax status of the Securities. The Corporate Income Series is comprised primarily of Securities rated below investment grade by Standard & Poor's Ratings Group, Moody's Investors Service, Inc. or Duff & Phelps Credit Rating Co., which securities are commonly referred to as "junk bonds." See "The Corporate Income Series--Risk Factors" and "The Tax-Exempt Portfolios--Municipal Bond Risk Factors."

3

KEMPER DEFINED FUNDS SERIES 30

ESSENTIAL INFORMATION

AS OF THE OPENING OF BUSINESS ON THE INITIAL DATE OF DEPOSIT
SPONSOR AND EVALUATOR: KEMPER UNIT INVESTMENT TRUSTS, A SERVICE OF
KEMPER SECURITIES, INC.
TRUSTEE: INVESTORS FIDUCIARY TRUST COMPANY

The income, expense and distribution data set forth below has been calculated for Unitholders purchasing less than 10,000 Units. Unitholders purchasing more

than 10,000 units will receive a slightly higher return because of the reduced sales charge for larger purchases.

Sponsor's Annual Surveillance Fee--Corporate Income Series.....	Maximum of \$0.25 per \$1,000 Principal Amount of Securities
Sponsor's Annual Surveillance Fee--Tax-Exempt Portfolios.....	Maximum of \$0.002 per Unit
</TABLE>	

-
- (1) Anyone ordering Units for settlement after the First Settlement Date will pay accrued interest from such date to the date of settlement (normally five business days after order) less distributions from the Interest Account subsequent to the First Settlement Date. For purchases settling on the First Settlement Date, no accrued interest will be added to the Public Offering Price.
 - (2) Many unit investment trusts issue a number of units such that each unit represents approximately \$1,000 principal amount of underlying securities. The Sponsor, on the other hand, in determining the number of Units for each Trust has elected not to follow this format but rather to provide that number of Units which will establish as close as possible as of the Initial Date of Deposit a Principal Amount of Securities per Unit of \$10.
 - (3) The Estimated Current Return and Estimated Long-Term Return are increased for transactions entitled to a reduced sales charge. See "Public Offering of Units--Public Offering Price."
 - (4) The Estimated Current Returns are calculated by dividing the estimated net annual interest income per Unit by the Public Offering Price. The estimated net annual interest income per Unit will vary with changes in fees and expenses of the Trustee, the Sponsor and the Evaluator and with the principal prepayment, redemption, maturity, exchange or sale of Securities while the Public Offering Price will vary with changes in the offering price of the underlying Securities and with changes in the accrued interest; therefore, there is no assurance that the present Estimated Current Returns indicated above will be realized in the future. The Estimated Long-Term Returns are calculated using a formula which (1) takes into consideration, and determines and factors in the relative weightings of, the market values, yields (which takes into account the amortization of premiums and the accretion of discounts) and estimated retirement dates of all of the Securities in the applicable Trust and (2) takes into account the expenses and sales charge associated with each Trust Unit. Since the market values and estimated retirement dates of the Securities and expenses of each Trust will change, there is no assurance that the present Estimated Long-Term Returns as indicated above will be realized in the future. The Estimated Current Returns and Estimated Long-Term Returns are expected to differ because the calculation of the Estimated Long-Term Returns reflects the estimated date and amount of principal returned while the Estimated Current Return calculations include only net annual interest income and Public Offering Price.

- (5) This figure is based on estimated per Unit cash flows. Estimated cash flows will vary with changes in fees and expenses, with changes in current interest rates and with the principal prepayment, redemption, maturity, call, exchange or sale of the underlying Securities. The estimated cash flows to Unitholders for the Trusts are either set forth under "Estimated Cash Flows to Unitholders" for each Trust or are available upon request at no charge from the Sponsor.
- (6) During the first year, the Trustee has agreed to reduce its fee (and to the extent necessary pay expenses of the Trust Funds) in the amounts stated above. The Trustee has agreed to the foregoing to cover all or a portion of the interest on any Securities accruing prior to their expected dates of delivery, since interest will not accrue to the benefit of Unitholders of a Trust Fund until such Securities are actually delivered to the Trust Fund. The estimated net annual interest income per Unit will remain as indicated. See "The Trust Funds" and "General Information--Interest, Estimated Long-Term Return and Estimated Current Return."
- (7) The sales charge as a percentage of the net amount invested in earning assets will increase as accrued interest increases. Transactions subject to quantity discounts (see "Public Offering of Units--Public Offering Price") will have reduced sales charges, thereby reducing all percentages in the table.
- (8) See "General Information--Expenses of the Trusts."
- (9) Unitholders will receive interest distributions monthly. The Record Date is the first day of the month, commencing April 1, 1995, and the distribution date is the fifteenth day of the month, commencing April 15, 1995.

5

THE TRUST FUNDS

Kemper Defined Funds Series 30 includes the following separate unit investment trusts created by the Sponsor under the name Kemper Defined Funds: "Corporate Income Series 3" (the "Corporate Income Series"), "Insured National Series 14" (the "Insured National Trust"), "Insured California Series 14" and "Insured Michigan Series 10" (the "Insured State Trusts") (hereinafter collectively called the "Trusts" or "Trust Funds"). The Insured National Trust and the Insured State Trusts are also referred to as the "Tax-Exempt Portfolios" and "Insured Trusts." Each of the Trust Funds is separate and is designated by a different series number. Each of the Trust Funds was created under the laws of the State of Missouri pursuant to a trust indenture dated the Initial Date of Deposit (the "Trust Agreements") between Kemper Unit Investment Trusts, a service of Kemper Securities, Inc. (the "Sponsor") and Investors Fiduciary Trust Company (the "Trustee").*

The Corporate Income Series was formed for the purpose of providing a high level of current income through investment in a fixed portfolio consisting primarily of high yield, high risk corporate debt obligations issued after July 18, 1984. The Corporate Income Series may be an appropriate investment vehicle for investors who desire to participate in a portfolio of intermediate term taxable fixed income securities issued by corporate obligors with greater diversification than investors might be able to acquire individually. Diversification of the Trust assets will not eliminate the risk of loss always inherent in the ownership of securities.

The Insured National Trust was formed for the purpose of gaining interest income free from Federal income taxes while conserving capital and diversifying risks by investing in an insured, fixed portfolio consisting of obligations issued by or on behalf of states of the United States or counties, municipalities, authorities or political subdivisions thereof.

The Insured State Trusts were formed for the purpose of gaining interest income free from Federal and State income taxes and, where applicable, local income and/or property taxes while conserving capital and diversifying risks by investing in an insured, fixed portfolio consisting of obligations issued by or on behalf of the State for which such Trust Fund is named or counties, municipalities, authorities or political subdivisions thereof.

There is, of course, no guarantee that the Trust Funds' objectives will be achieved. Offerees in the states of Illinois, Indiana, Virginia and Washington may purchase Units of Corporate Income Series 3 and Insured National Series 14 only.

As used herein, the terms "Securities" and "Bonds" mean the obligations initially deposited in the Trusts described under "Portfolio" for each Trust (including all contracts to purchase such obligations accompanied by an irrevocable letter of credit sufficient to perform such contracts initially deposited in the Trusts) and any additional obligations deposited in the Trusts following the Initial Date of Deposit. As used herein, the terms "Municipal Bonds" and "Municipal Obligations" mean the obligations (and contracts for the purchase thereof) included in the Tax-Exempt Portfolios.

On the Initial Date of Deposit, the Sponsor delivered to the Trustee that aggregate principal amount of Securities or contracts for the purchase thereof for deposit in the Trust Funds as set forth under "Essential Information." Of such principal amount, the amount specified in "Essential Information" was deposited in each Trust. In exchange for the Securities so deposited, the Trustee delivered to the Sponsor documentation evidencing the ownership of that number of Units for each Trust Fund as indicated under "Essential Information." Each Trust Fund initially consists of delivery statements (i.e., contracts) to

- -----

* Reference is made to the Trust Agreements, and any statements contained herein are qualified in their entirety by the provisions of the Trust Agreements.

6

purchase obligations. The Sponsor has a limited right of substitution for such Securities in the event of a failed contract. See "General Information--Trust Information."

Additional Units of each Trust may be issued from time to time following the Initial Date of Deposit by depositing in the Trust additional Securities or contracts to purchase thereof together with irrevocable letters of credit or cash. As additional Units are issued by a Trust as a result of the deposit of additional Securities by the Sponsor, the aggregate value of the Securities in the Trust will be increased and the fractional undivided interest in the Trust represented by each Unit will be decreased. The Sponsor may continue to make additional deposits of Securities into a Trust following the Initial Date of Deposit, provided that such additional deposits will be in principal amounts which will maintain the same original percentage relationship among the principal amounts of the Securities in such Trust established by the initial deposit of the Securities. Thus, although additional Units will be issued, each Unit will continue to represent the same principal amount of each Security, and the percentage relationship among the principal amount of each Security in the related Trust will remain the same.

Each Unit initially offered represents that undivided interest in the appropriate Trust indicated under "Essential Information." To the extent that any Units are redeemed by the Trustee or additional Units are issued as a result of additional Securities being deposited by the Sponsor, the fractional undivided interest in a Trust represented by each unredeemed Unit will increase or decrease accordingly, although the actual interest in such Trust represented by such fraction will remain unchanged. Units will remain outstanding until redeemed upon tender to the Trustee by Unitholders, which may include the Sponsor, or until the termination of the Trust Agreement.

An investment in Units of a Trust Fund should be made with an understanding of the risks which an investment in fixed rate debt obligations may entail, including the risk that the value of the portfolio and hence of the Units will decline with increases in interest rates. The value of the underlying Securities will fluctuate inversely with changes in interest rates. The uncertain economic conditions of recent years, together with the fiscal measures adopted to attempt to deal with them, have resulted in wide fluctuations in interest rates and, thus, in the value of fixed rate debt obligations generally and long-term obligations in particular. The Sponsor cannot predict the degree to which such fluctuations will continue in the future.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

UNITHOLDERS

KEMPER DEFINED FUNDS SERIES 30

We have audited the accompanying statements of condition and the related portfolios of Kemper Defined Funds Series 30 (Corporate Income Series 3, Insured National Series 14, Insured California Series 14 and Insured Michigan Series 10) as of February 22, 1995. The statements of condition and portfolios are the responsibility of the Sponsor. Our responsibility is to express an opinion on such financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of Securities owned at February 22, 1995 and a letter of credit deposited to purchase Securities by correspondence with the Trustee. An audit also includes assessing the accounting principles used and significant estimates made by the Sponsor, as well as evaluating the overall financial statement presentation. We believe our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Kemper Defined Funds Series 30 (Corporate Income Series 3, Insured National Series 14, Insured California Series 14 and Insured Michigan Series 10) as of February 22, 1995, in conformity with generally accepted accounting principles.

NOTES:

- (1) The aggregate value of the Securities listed in each "Portfolio" and their cost to the Trust are the same. The value of the Securities is determined by Muller Data Corporation on the bases set forth under "Public Offering of Units--Public Offering Price". The contracts to purchase Securities are collateralized by an irrevocable letter of credit of \$16,183,214 which has been deposited with the Trustee. Of this amount, \$15,964,769 relates to the offering price of Securities to be purchased and \$218,445 relates to accrued interest on such Securities to the expected dates of delivery.
- (2) The Trustee will advance to each Trust the amount of net interest accrued to the First Settlement Date for distribution to the Sponsor as the Unitholder of Record.
- (3) The aggregate public offering price includes a sales charge for the Trust as set forth under "Essential Information", assuming all single transactions involve less than 10,000 Units. For single transactions involving 10,000 or more Units, the sales charge is reduced (see "Public Offering of Units--Public Offering Price") resulting in an equal reduction in both the Cost to investors and the Gross underwriting commission while the Net interest to Unitholders remains unchanged.
- (4) Insurance coverage providing for the timely payment of principal and interest on the Securities in the Insured Trusts has been obtained directly by the issuer of such Securities or by the Sponsor from Municipal Bond Investors Assurance Corporation or other insurers.

PUBLIC OFFERING OF UNITS

PUBLIC OFFERING PRICE. Units of a Trust are offered at the Public Offering Price thereof. During the initial offering period, the Public Offering Price per Unit is equal to the aggregate of the offering side evaluations of the Securities in such Trust (as determined, pursuant to the terms of a contract with the Evaluator, by Muller Data Corporation, a non-affiliated firm regularly engaged in the business of evaluating, quoting or appraising comparable securities), plus or minus a pro rata share of cash, if any, in the Principal account held or owned by such Trust plus accrued interest plus the applicable sales charge referred to in the tables below divided by the number of outstanding Units of such Trust. The Public Offering Price for secondary market transactions, on the other hand, is based on the aggregate bid side evaluations of the Securities in a Trust (also, currently, as determined by Muller Data Corporation), plus or minus cash, if any, in the Principal Account held or owned by such Trust, plus accrued interest plus a sales charge based upon the dollar weighted average maturity of such Trust. Investors who purchase Units through brokers or dealers pursuant to a current management agreement which by contract or operation of law does not allow such broker or dealer to earn an additional commission (other than any fee or commission paid for maintenance of such investor's account under the management agreement) on such transactions may purchase such Units at the current Public Offering Price net of the applicable broker or dealer concession. See "Public Offering of Units--Public Distribution of Units" below.

For the Corporate Income Series, the sales charge per Unit will be reduced during the initial offering period pursuant to the following graduated scale:

<TABLE>
<CAPTION>

NUMBER OF UNITS	WEIGHTED AVERAGE YEARS TO MATURITY

</TABLE>

As indicated above, in connection with secondary market transactions the sales charge is based upon the dollar weighted average maturity of a Trust and is determined in accordance with the tables set forth below. For purposes of this computation, Securities will be deemed to mature on their expressed maturity

10

dates unless: (a) the Securities have been called for redemption or funds or securities have been placed in escrow to redeem them on an earlier call date, in which case such call date will be deemed to be the date upon which they mature; or (b) such Securities are subject to a "mandatory tender," in which case such mandatory tender will be deemed to be the date upon which they mature. The effect of this method of sales charge computation will be that different sales charge rates will be applied to a Trust based upon the dollar weighted average maturity of such Trust's portfolio, in accordance with the following schedules:

For the Corporate Income Series, in connection with secondary market transactions the sales charge per Unit will be reduced as set forth below:

<TABLE>
<CAPTION>

DOLLAR AMOUNT OF TRADE	SECONDARY		
	DOLLAR WEIGHTED AVERAGE YEARS TO MATURITY*		
	2 TO 3.99	4 TO 9.99	10 OR MORE
<S>	<C>	<C>	<C>
\$1,000 to \$99,999.....	3.50%	4.50%	5.50%
\$100,000 to \$499,999.....	3.25	4.25	5.00
\$500,000 to \$999,999.....	3.00	4.00	4.50
\$1,000,000 or more.....	2.75	3.75	4.00

</TABLE>

* If the dollar weighted average maturity of a Trust Fund is from 1 to 1.99 years, the sales charge is 2% and 1.5% of the Public Offering Price for purchases of \$1,000 to \$249,999 and \$250,000 or more, respectively.

For the Tax-Exempt Portfolios, in connection with secondary market transactions the sales charge per Unit will be reduced as set forth below:

<TABLE>
<CAPTION>

DOLLAR AMOUNT OF TRADE	SECONDARY		
	YEARS TO MATURITY*		

4 TO 7.99 8 TO 14.99 15 OR MORE

SALES CHARGE (% OF PUBLIC OFFERING PRICE)

AMOUNT OF INVESTMENT

<S>	<C>	<C>	<C>
\$1,000 to \$99,999.....	3.50%	4.50%	5.50%
\$100,000 to \$499,999.....	3.25	4.25	5.00
\$500,000 to \$999,999.....	3.00	4.00	4.50
\$1,000,000 or more.....	2.75	3.75	4.00

</TABLE>

* If the dollar weighted average maturity of the Trust Fund is from 1 to 3.99 years the sales charge is 2% and 1.5% of the Public Offering Price for purchases of \$1,000 to \$249,999 and \$250,000 or more, respectively.

The reduced sales charges resulting from quantity discounts as shown on the tables above will apply to all purchases of Units on any one day by the same purchaser from the same Underwriter or dealer and for this purpose purchases of Units of a Trust Fund will be aggregated with concurrent purchases of Units of any other unit investment trust that may be offered by the Sponsor. Additionally, Units purchased in the name of a spouse or child (under 21) of such purchaser will be deemed to be additional purchases by such purchaser.

The reduced sales charges will also be applicable to a trust or other fiduciary purchasing for a single trust estate or single fiduciary account.

Unitholders of the various series of Kemper Insured Corporate Trust and Kemper Defined Funds Insured Corporate Series who meet the conditions in the next succeeding sentence may, during the primary offering period of the Corporate Income Series only, acquire Units of the Corporate Income Series at the reduced sales charge equivalent to purchases during the initial offering period of 100,000 or more Units. First, the special sales charge discount only applies to purchases acquired with funds received from distributions of unscheduled principal payments in connection with units issued in such series and, second, the minimum purchase must be at least \$1,000.

The Sponsor intends to permit officers, directors and employees of the Sponsor and Evaluator and at the discussion the Sponsor registered representatives of selling firms to purchase Units of a Trust without a sales charge, although a transaction processing fee may be imposed on such trades.

Had Units of a Trust been available for sale at the opening of business on the Initial Date of Deposit, the Public Offering Price would have been as shown under "Essential Information." The Public Offering Price per Unit of a Trust on the date of this Prospectus or on any subsequent date will vary from the amount stated under "Essential Information" in accordance with fluctuations in the prices of the underlying Securities and the amount of accrued interest on the Units. On the Initial Date of Deposit, pursuant to an exemptive order from the Securities and Exchange Commission, the Public Offering Price at which Units will be sold will not exceed the price determined as of the opening of business on the Initial Date of Deposit as shown under "Essential Information"; however, should the value of the underlying Securities decline, purchasers will, of course, be given the benefit of such lower price. The aggregate bid and offering side evaluations of the Securities shall be determined (a) on the basis of current bid or offering prices of the Securities, (b) if bid or offering prices are not available for any particular Security, on the basis of current bid or offering prices for comparable bonds, (c) by determining the value of Securities on the bid or offer side of the market by appraisal, or (d) by any combination of the above.

The foregoing evaluations and computations shall be made as of the evaluation time stated under "Essential Information," on each business day commencing with the Initial Date of Deposit of the Securities, effective for all sales made during the preceding 24-hour period.

The interest on the Securities deposited in a Trust, less the related estimated fees and expenses, is estimated to accrue in the annual amounts per Unit set forth under "Essential Information." The amount of net interest income which accrues per Unit may change as Securities mature or are redeemed, exchanged or sold, or as the expenses of a Trust change or the number of

outstanding Units of a Trust changes.

Although payment is normally made five business days following the order for purchase, payments may be made prior thereto. A person will become the owner of Units on the First Settlement Date or any date of settlement thereafter provided payment has been received. Cash, if any, made available to the Sponsor prior to the date of settlement for the purchase of Units may be used on the Sponsor's business and may be deemed to be a benefit to the Sponsor, subject to the limitations of the Securities Exchange Act of 1934. If a Unitholder desires to have certificates representing Units purchased, such certificates will be delivered as soon as possible following his written request therefor. For information with respect to redemption of Units purchased, but as to which certificates requested have not been received, see "General Information--Redemption" below.

ACCRUED INTEREST. Accrued interest is the accumulation of unpaid interest on a security from the last day on which interest thereon was paid. Interest on Securities generally is paid semi-annually (monthly in the case of Ginnie Maes, if any) although a Trust accrues such interest daily. Because of this, a Trust always

12

has an amount of interest earned but not yet collected by the Trustee. For this reason, with respect to sales settling subsequent to the First Settlement Date, the Public Offering Price of Units will have added to it the proportionate share of accrued interest to the date of settlement. Unitholders will receive on the next distribution date of a Trust the amount, if any, of accrued interest paid on their Units.

In an effort to reduce the amount of accrued interest which would otherwise have to be paid in addition to the Public Offering Price in the sale of Units to the public, the Trustee will advance the amount of accrued interest as of the First Settlement Date and the same will be distributed to the Sponsor as the Unitholder of record as of the First Settlement Date. Consequently, the amount of accrued interest to be added to the Public Offering Price of Units will include only accrued interest from the First Settlement Date to the date of settlement, less any distributions from the Interest Account subsequent to the First Settlement Date.

Because of the varying interest payment dates of the Securities, accrued interest at any point in time will be greater than the amount of interest actually received by the Trusts and distributed to Unitholders. Therefore, there will always remain an item of accrued interest that is added to the value of the Units. If a Unitholder sells or redeems all or a portion of his Units, he will be entitled to receive his proportionate share of the accrued interest from the purchaser of his Units. Since the Trustee has the use of the funds held in the Interest Account for distributions to Unitholders and since such Account is non-interest-bearing to Unitholders, the Trustee benefits thereby.

COMPARISON OF PUBLIC OFFERING PRICE AND REDEMPTION PRICE. While the Initial Public Offering Price of Units will be determined on the basis of the current offering prices of the Securities in a Trust, the redemption price per Unit (as well as the secondary market price per Unit) at which Units may be redeemed (see "General Information--Redemption") will be determined on the basis of the current bid prices of the Securities. As of the opening of business on the Initial Date of Deposit, the Public Offering Price per Unit (based on the offering prices of the Securities in a Trust and including the sales charge) exceeded the redemption price at which Units could have been redeemed (based upon the current bid prices of the Securities in a Trust) by the amount shown under "Essential Information." In the past, bid prices on securities similar to those in the Trust Funds have been lower than the offering prices thereof by as much as 5% or more of principal amount in the case of inactively traded bonds or as little as 1/2 of 1% in the case of actively traded bonds, but the difference between such offering and bid prices may be expected to average 3% to 4% of principal amount. For this reason, among others (including fluctuations in the market prices of the Securities and the fact that the Public Offering Price includes a sales charge), the amount realized by a Unitholder upon any redemption of Units may be less than the price paid for such Units.

PUBLIC DISTRIBUTION OF UNITS. The Sponsor intends to qualify the Units for

sale in a number of states (except for an Insured State Trust or uninsured State Trust which will be qualified for sale only in the state for which such Trust is named). Units will be sold through dealers who are members of the National Association of Securities Dealers, Inc. and through others. Sales may be made to or through dealers at prices which represent discounts from the Public Offering Price as set forth below. Certain commercial banks are making Units of the Trust Funds available to their customers on an agency basis. A portion of the sales charge paid by their customers is retained by or remitted to the banks in the amount shown in the tables below. Under the Glass-Steagall Act, banks are prohibited from underwriting Trust Fund Units; however, the Glass-Steagall Act does permit certain agency transactions and the banking regulators have indicated that these particular agency transactions are permitted under such Act. In addition, state

securities laws on this issue may differ from the interpretations of federal law expressed herein and banks and financial institutions may be required to register as dealers pursuant to state law. The Sponsor reserves the right to change the discounts set forth below from time to time. In addition to such discounts, the Sponsor may, from time to time, pay or allow an additional discount, in the form of cash or other compensation, to dealers employing registered representatives who sell, during a specified time period, a minimum dollar amount of Units of a Trust and other unit investment trusts created by the Sponsor. The difference between the discount and the sales charge will be retained by the Sponsor.

For the Corporate Income Series, the primary market concessions or agency commissions are as follows:

<TABLE>
<CAPTION>

100,000 or more Units...	1.10	1.20	1.20	2.10	1.20	2.10	1.20	2.10

* Volume concessions of up to the amount shown can be earned as a marketing allowance at the discretion of the Sponsor during the initial one month period after the Initial Date of Deposit by firms who reach cumulative firm sales or sales arrangement levels of at least \$250,000. After a firm has met the minimum \$250,000 volume level, volume concessions may be given on all trades originated from or by that firm, including those placed prior to reaching the \$250,000 level, and may continue to be given during the entire initial offering period. Firm sales of any Corporate Income Series issued simultaneously can be combined for the purposes of achieving the volume discount. Only sales through Kemper qualify for volume discounts and secondary purchases do not apply. The Sponsor reserves the right to modify or change those parameters at any time and make the determination of which firms qualify for the marketing allowance and the amount paid.

For the Tax-Exempt Portfolios, the primary market concessions or agency commissions are as follows:

* If the dollar weighted average maturity of a Trust Fund is from 1 to 3.99 years, the concession or agency commission is 1.00% of the Public Offering Price.

The Sponsor reserves the right to reject, in whole or in part, any order for the purchase of Units.

PROFITS OF SPONSOR AND UNDERWRITERS. In connection with the Corporate Income

Series, the Sponsor will receive gross sales charges equal to the percentage of the Public Offering Price of the Units of such Trust stated under "Public Offering Price" and will pay a fixed portion of such sales charges to dealers and agents. As set forth under "The Tax-Exempt Portfolios--Underwriting," the Underwriters of each Tax-Exempt Portfolio will receive gross sales charges equal to the percentage of the Public Offering Price of the Units of such Trust Fund stated under "Public Offering Price" and the Sponsor will receive a fixed portion of such sales charges. In addition, the Sponsor may realize a profit or a loss resulting from the difference between the purchase prices of the Securities to the Sponsor and the cost of such Securities to a Trust Fund, which is based on the offering side evaluation of the Securities. See "Portfolio" for each Trust. The Sponsor or Underwriters may also realize profits or losses with respect to Securities deposited in a Trust which were acquired from underwriting syndicates of which the Sponsor or any Underwriter was a member. An underwriter or underwriting syndicate purchases securities from the issuer on a negotiated or competitive bid basis, as principal, with the motive of marketing such securities to investors at a profit. The Sponsor and the Underwriters may realize additional profits or losses during the initial offering period on unsold Units as a result of changes in the daily evaluation of the Securities in a Trust.

THE CORPORATE INCOME SERIES

THE TRUST PORTFOLIO

The Corporate Income Series was formed for the purpose of providing a high level of current income through investment in a fixed portfolio consisting primarily of high yield, high risk corporate debt obligations issued after July 18, 1984. There is, of course, no guarantee that the Trust Fund's objective will be achieved.

The Trust Fund may be an appropriate investment vehicle for investors who desire to participate in a portfolio of intermediate term taxable fixed income securities issued by corporate obligors with greater diversification than investors might be able to acquire individually. Diversification of the Trust assets will not eliminate the risk of loss always inherent in the ownership of securities. In addition, Bonds of the type deposited in the Trust Fund often are not available in small amounts.

The selection of Bonds for the Trust Fund was based largely upon the experience and judgment of the Sponsor. In making such selections the Sponsor considered the following factors: (a) the price of the Bonds relative to other issues of similar quality and maturity; (b) the present rating and credit quality of the issuers of the Bonds and the potential improvement in the credit quality of such issuers; (c) the diversification of the Bonds as to

location of issuer; (d) the income to the Unitholders of the Trust; (e) whether the Bonds were issued after July 18, 1984; and (f) the stated maturity of the Bonds.

As of the Initial Date of Deposit, all of the Bonds in the Trust are rated "Ba" or better by Moody's Investors Service, Inc. or "BB" or better by Standard & Poor's Ratings Group or Duff & Phelps Credit Rating Co. See "Appendix: Description of Ratings" and "Portfolio" below. Subsequent to the Initial Date of Deposit, a Bond may cease to be so rated. If this should occur, the Trust would not be required to eliminate the Bond from the Trust, but such event may be considered in the Sponsor's determination to direct the Trustee to dispose of such investment. See "General Information--Investment Supervision." The Trust consists of that number of Bonds divided by type (and percentage of principal amount of the Trust) as set forth in the following table.

SERIES INFORMATION

<TABLE>		
<S>	<C>	<C>
Number of Bonds.....		24
Debt Obligations(1):		
U.S. Corporate.....		24
Average life of the Bonds in the Trust(2).....	7.8 years	
Percentage of "when, as and if issued" or "delayed delivery"		
Bonds purchased by the Trust.....		None
Syndication(3).....		None
</TABLE>		

- - - - -

- (1) The portfolio percentage in parenthesis represents the principal amount of such Bonds to the total principal amount of Bonds in the Trust. For a discussion of the risks associated with investments in the bonds of such issuers, see "Risk Factors" below.
- (2) The average life of the Bonds in the Trust is calculated based upon the stated maturities of the Bonds in the Trust (or, with respect to Bonds for which funds or securities have been placed in escrow to redeem such Bonds on a stated call date, based upon such call date). The average life of the Bonds in the Trust may increase or decrease from time to time as Bonds mature or are called or sold.
- (3) The Sponsor and its affiliates have participated as either the sole underwriter or manager or a member of underwriting syndicates from which approximately that percentage listed above of the aggregate principal amount of the Bonds in the Trust were acquired.

CORPORATE INCOME SERIES

NOTES TO PORTFOLIO:

* These Bonds are "when, as and if issued" or "delayed delivery" and have expected settlement dates after the "First Settlement Date."

(1) Contracts to acquire Bonds were entered into by the Sponsor between October 21, 1994 and February 21, 1995. All Bonds are represented by

regular way contracts, unless otherwise indicated, for the performance of which an irrevocable letter of credit has been deposited with the Trustee.

- (2) A brief description of the applicable Standard & Poor's Ratings Group, Moody's Investors Service, Inc. and Duff & Phelps Credit Rating Co. rating symbols and their meanings is set forth under "Appendix: Description of Ratings." "N.R." indicates that the issue has not been rated by that rating agency.
- (3) There is shown under this heading the year in which each issue of Bonds is initially or currently redeemable and the redemption price for that year; unless otherwise indicated, each issue continues to be redeemable at declining prices thereafter, but not below par value. The prices at which the Bonds may be redeemed or called prior to maturity may or may not include a premium and, in certain cases, may be less than the cost of the Bonds to the Trust. In addition, certain Bonds in the portfolio may be redeemed in whole or in part other than by operation of the stated redemption provisions under certain unusual or extraordinary circumstances specified in the instruments setting forth the terms and provisions of such Bonds. "S.F." indicates that a sinking fund is established with respect to that issue of Bonds.
- (4) During the initial offering period, evaluations of Bonds are made on the basis of current offering side evaluations of the Bonds. The aggregate offering price is greater than the aggregate bid price of the Bonds, which is the basis on which the Redemption Price will be determined for purposes of redemption of Units after the initial offering period.
- (5) Other information regarding the Bonds in the Trust, at the opening of business on the Initial Date of Deposit, is as follows:

<TABLE>
<CAPTION>

	COST OF BONDS TO SPONSOR	PROFIT OR (LOSS) TO SPONSOR	ANNUAL INTEREST INCOME TO TRUST	BID SIDE VALUE OF BONDS
<S> Corporate Income Series 3.....	<C> \$1,988,125	<C> \$10,157	<C> \$187,744	<C> \$1,987,781

</TABLE>

The Cost of Bonds to Sponsor and Profit or (Loss) to Sponsor reflect portfolio hedging transaction costs, hedging gains or losses, and certain other carrying costs.

- (6) This Bond was issued at an original issue discount. The tax effect of Bonds issued at an original issue discount is described in "Federal Tax Status". This Bond has been purchased at a deep discount from the par value because there is little or no stated interest income thereon. Bonds which pay no interest are normally described as "zero coupon" bonds. Over the life of bonds purchased at a deep discount the value of such bonds will increase such that upon maturity the holders of such bonds will receive 100% of the principal amount thereof. Approximately 4% of the aggregate principal amount of the Bonds in the Trust were issued at an original issue discount.

C-3

CORPORATE INCOME SERIES

RISK FACTORS

General. An investment in Units of the Trust should be made with an understanding of the risks that an investment in "high yield", high risk, fixed rate, corporate debt obligations or "junk bonds" may entail, including increased credit risks and the risk that the value of the Units will decline, and may decline precipitously, with increases in interest rates. In recent years there have been wide fluctuations in interest rates and thus in the value of fixed-rate, debt obligations generally, Securities such as those included in the Trust are, under most circumstances, subject to greater market fluctuations and risk of loss of income and principal than are investments in lower-yielding, higher rated securities, and their value may decline precipitously because of increases in interest rates not only because the increases in rates generally decrease values but also because increased rates

may indicate a slowdown in the economy and a decrease in the value of assets generally that may adversely affect the credit of issuers of high yield, high risk securities resulting in a higher incidence of defaults among high yield, high risk securities. A slowdown in the economy, or a development adversely affecting an issuer's creditworthiness, may result in the issuer being unable to maintain earnings or sell assets at the rate and at the prices, respectively, that are required to produce sufficient cash flow to meet its interest and principal requirements. For an issuer that has outstanding both senior commercial bank debt and subordinated high yield, high risk securities, an increase in interest rates will increase that issuer's interest expense insofar as the interest rate on the bank debt is fluctuating. However, many leveraged issuers enter into interest rate protection agreements to fix or cap the interest on a large portion of their bank debt. This reduces exposure to increasing interest rates but reduces the benefit to the issuer of declining rates. The Sponsor cannot predict future economic policies or their consequences or, therefore, the course or extent of any similar market fluctuations in the future. The portfolio consists of Bonds that, in many cases, do not have the benefit of covenants that would prevent the issuer from engaging in capital restructurings or borrowing transactions in connection with corporate acquisitions, leveraged buy outs or restructurings that could have the effect of reducing the ability of the issuer to meet its obligations and might result in the ratings of the Bonds and the value of the underlying portfolio being reduced.

The Bonds in the Trust consist of "high yield, high risk" corporate bonds. "High yield" or "junk" bonds, the generic names for corporate bonds rated below BBB by Standard & Poor's Ratings Group or Duff & Phelps Credit Rating Co. or below Baa by Moody's Investor Service, Inc., are frequently issued by corporations in the growth stage of their development, by established companies whose operations or industries are depressed or by highly leveraged companies purchased in leveraged buyout transactions. The market for high yield bonds is very specialized and investors in it have been predominantly financial institutions. High yield bonds are generally not listed on a national securities exchange. Trading of high yield bonds, therefore, takes place primarily in over-the-counter markets which consist of groups of dealer firms that are typically major securities firms. Because the high yield bond market is a dealer market, rather than an auction market, no single obtainable price for a given bond prevails at any given time. Prices are determined by negotiation between traders. The existence of a liquid trading market for the Bonds may depend on whether dealers will make a market in the Bonds. There can be no assurance that a market will be made for any of the Bonds, that any market for the Bonds will be maintained or of the liquidity of the Bonds in any markets made. Not all dealers maintain markets in all high yield bonds. Therefore, since there are fewer traders in these bonds than there are in "investment grade" bonds, the bid-offer spread is usually greater for high yield bonds than it is for investment grade bonds. The price at which the Securities may be sold to meet redemptions and the value of the Trust will be adversely affected if trading markets for the Bonds are limited or absent. If the rate of redemptions is great, the value of the Trust may decline to a level that requires liquidation (see "General Information--Administration of the Trusts--Amendment and Termination").

C-4

CORPORATE INCOME SERIES

Lower-rated securities tend to offer higher yields than higher-rated securities with the same maturities because the creditworthiness of the issuers of lower-rated securities may not be as strong as that of other issuers. Moreover, if a Bond is recharacterized as equity by the Internal Revenue Service for Federal income tax purposes, the issuer's interest deduction with respect to the Bond will be disallowed and this disallowance may adversely affect the issuer's credit rating. Because investors generally perceive that there are greater risks associated with the lower-rated securities in the Trust, the yields and prices of these securities tend to fluctuate more than higher-rated securities with changes in the perceived quality of the credit of their issuers. In addition, the market value of high yield, high risk, fixed-income securities may fluctuate more than the market value of higher-rated securities since high yield, high risk, fixed-income securities tend to reflect short-term credit development to a greater extent than higher-rated securities. Lower-rated securities generally involve greater risks of loss of income and principal than higher-rated securities. Issuers of lower-rated securities may possess less creditworthiness characteristics than issuers of higher-rated securities and, especially in the case of issuers whose obligations or credit standing have recently been downgraded, may be

subject to claims by debtholders, owners of property leased to the issuer or others which, if sustained, would make it more difficult for the issuers to meet their payment obligations. High yield, high risk bonds are also affected by variables such as interest rates, inflation rates and real growth in the economy. Therefore, investors should consider carefully the relative risks associated with investment in securities which carry lower ratings.

The value of the Units reflects the value of the portfolio securities, including the value (if any) of securities in default. Should the issuer of any Bond default in the payment of principal or interest, the Trust may incur additional expenses seeking payment on the defaulted Bond. Because amounts (if any) recovered by the Trust in payment under the defaulted Bond may not be reflected in the value of the Units until actually received by the Trust, and depending upon when a Unitholder purchases or sells his Units, it is possible that a Unitholder would bear a portion of the cost of recovery without receiving any portion of the payment recovered.

High yield, high risk bonds are generally subordinated bonds. The payment of principal (and premium, if any), interest and sinking fund requirements with respect to subordinated bonds of an issuer is subordinated in right of payment to the payment of senior bonds of the issuer. Senior bonds generally include most, if not all, significant debt bonds of an issuer, whether existing at the time of issuance of subordinated debt or created thereafter. Upon any distribution of the assets of an issuer with subordinated bonds upon dissolution, total or partial liquidation or reorganization of or similar proceeding relating to the issuer, the holders of senior indebtedness will be entitled to receive payment in full before holders of subordinated indebtedness will be entitled to receive any payment. Moreover, generally no payment with respect to subordinated indebtedness may be made while there exists a default with respect to any senior indebtedness. Thus, in the event of insolvency, holders of senior indebtedness of an issuer generally will recover more, ratably, than holders of subordinated indebtedness of that issuer.

Bonds that are rated lower than BBB by Standard & Poor's or Duff & Phelps or Baa by Moody's, respectively, should be considered speculative as such ratings indicate a quality of less than investment grade. Investors should carefully review the objective of the Trust and consider their ability to assume the risks involved before making an investment in the Trust. See "Appendix: Description of Ratings" for a description of speculative ratings issued by Standard & Poor's, Duff & Phelps and Moody's.

C-5

CORPORATE INCOME SERIES

FEDERAL TAX STATUS

In the opinion of Chapman and Cutler, special counsel for the Sponsor, under existing law:

1. The Trust is not an association taxable as a corporation for Federal income tax purposes.
2. Each Unitholder will be considered the owner of a pro rata portion of each of the Trust assets for Federal income tax purposes under Subpart E, Subchapter J of Chapter 1 of the Internal Revenue Code of 1986 (the "Code"). Each Unitholder will be considered to have received his pro rata share of income derived from each Trust asset when such income is received by the Trust. Each Unitholder will also be required to include in taxable income for Federal income tax purposes, original issue discount with respect to his interest in any Bonds held by the Trust at the same time and in the same manner as though the Unitholder were the direct owner of such interest.
3. Each Unitholder will have a taxable event when a Bond is disposed of (whether by sale, exchange, redemption, or payment at maturity) or when the Unitholder redeems or sells his Units. The cost of the Units to a Unitholder on the date such Units are purchased is allocated among the Bonds held in the Trust (in accordance with the proportion of the fair market values of such Bonds) in order to determine his tax basis for his pro rata portion in each Bond. Unitholders must reduce the tax basis of their Units for their share of accrued interest received, if any, on Bonds delivered after the date the Unitholders pay for their Units and, consequently, such Unitholders may have an increase in taxable gain or

reduction in capital loss upon the disposition of such Units. Gain or loss upon the sale or redemption of Units is measured by comparing the proceeds of such sale or redemption with the adjusted basis of the Units. If the Trustee disposes of Bonds, gain or loss is recognized to the Unitholder. The amount of any such gain or loss is measured by comparing the Unitholder's pro rata share of the total proceeds from such disposition with his basis for his fractional interest in the asset disposed of. The basis of each Unit and of each Bond which was issued with original issue discount must be increased by the amount of accrued original issue discount and the basis of each Unit and of each Bond which was purchased by the Trust at a premium must be reduced by the annual amortization of bond premium which the Unitholder has properly elected to amortize under Section 171 of the Code. The tax cost reduction requirements of the Code relating to amortization of bond premium may, under some circumstances, result in the Unitholder realizing a taxable gain when his Units are sold or redeemed for an amount equal to or less than his original cost. In general, original issue discount accrues daily under a constant interest rate method which takes into account the semi-annual compounding of accrued interest.

Limitations on Deductibility of Trust Expenses by Unitholders. Each Unitholder's pro rata share of each expense paid by the Trust is deductible by the Unitholder to the same extent as though the expense had been paid directly by him, subject to the following limitation. It should be noted that as a result of the Tax Reform Act of 1986 (the "Act"), certain miscellaneous itemized deductions, such as investment expenses, tax return preparation fees and employee business expenses will be deductible by an individual only to the extent they exceed 2% of such individual's adjusted gross income. Temporary regulations have been issued which require Unitholders to treat certain expenses of the Trust as miscellaneous itemized deductions subject to this limitation.

Acquisition Premium. If a Unitholder's tax basis of his pro rata portion in any Bonds held by the Trust exceeds the amount payable by the issuer of the Bond with respect to such pro rata interest upon the maturity of the Bond, such excess would be considered "acquisition premium" which may be amortized by the Unitholder at the Unitholder's election as provided in Section 171 of the Code. Unitholders should consult their tax advisors regarding whether such election should be made and the manner of amortizing acquisition premium.

C-6

CORPORATE INCOME SERIES

Original Issue Discount. Certain of the Bonds in the Trust may have been acquired with "original issue discount." In the case of any Bonds in the Trust acquired with "original issue discount" that exceeds a "de minimis" amount as specified in the Code, such discount is includable in taxable income of the Unitholders on an accrual basis computed daily, without regard to when payments of interest on such Bonds are received. The Code provides a complex set of rules regarding the accrual of original issue discount. These rules provide that original issue discount generally accrues on the basis of a constant compound interest rate over the term of the Bonds. Unitholders should consult their tax advisers as to the amount of original issue discount which accrues.

Special original issue discount rules apply if the purchase price of the Bond by the Trust exceeds its original issue price plus the amount of original issue discount which would have previously accrued based upon its issue price (its "adjusted issue price"). Similarly these special rules would apply to a Unitholder if the tax basis of his pro rata portion of a Bond issued with original issue discount exceeds his pro rata portion of its adjusted issue price. Unitholders should also consult their tax advisers regarding these special rules.

It is possible that a corporate Bond that has been issued at an original issue discount may be characterized as a "high-yield discount obligation" within the meaning of Section 163(e)(5) of the Code. To the extent that such an obligation is issued at a yield in excess of six percentage points over the applicable Federal rate, a portion of the original issue discount on such obligation will be characterized as a distribution on stock (e.g. dividends) for purposes of the dividends received deduction which is available to certain corporations with respect to certain dividends received by such corporation.

Market Discount. If a Unitholder's tax basis in his pro rata portion of Bonds is less than the allocable portion of such Bond's stated redemption price at

maturity (or, if issued with original issue discount, the allocable portion of its "revised issue price"), such difference will constitute market discount unless the amount of market discount is "de minimis" as specified in the Code. Market discount accrues daily computed on a straight line basis, unless the Unitholder elects to calculate accrued market discount under a constant yield method. Unitholders should consult their tax advisors as to the amount of market discount which accrues.

Accrued market discount is generally includable in taxable income to the Unitholders as ordinary income for Federal tax purposes upon the receipt of serial principal payments on the Bonds, on the sale, maturity or disposition of such Bonds by the Trust, and on the sale by a Unitholder of Units, unless a Unitholder elects to include the accrued market discount in taxable income as such discount accrues. If a Unitholder does not elect to annually include accrued market discount in taxable income as it accrues, deductions for any interest expense incurred by the Unitholder which is incurred to purchase or carry his Units will be reduced by such accrued market discount. In general, the portion of any interest expense which was not currently deductible would ultimately be deductible when the accrued market discount is included in income. Unitholders should consult their tax advisers regarding whether an election should be made to include market discount in income as it accrues and as to the amount of interest expense which may not be currently deductible.

Computation of the Unitholder's Tax Basis. The tax basis of a Unitholder with respect to his interest in a Bond is increased by the amount of original issue discount (and market discount, if the Unitholder elects to include market discount, if any, on the Bonds held by the Trust in income as it accrues) thereon properly included in the Unitholder's gross income as determined for Federal income tax purposes and reduced by the amount of any amortized acquisition premium which the Unitholder has properly elected

C-7

CORPORATE INCOME SERIES

to amortize under Section 171 of the Code. A Unitholder's tax basis in his Units will equal his tax basis in his pro rata portion of all of the assets of the Trust.

Recognition of Taxable Gain or Loss Upon Disposition of Obligations by the Trust or Disposition of Units. A Unitholder will recognize taxable capital gain (or loss) when all or part of his pro rata interest in a Bond is disposed of in a taxable transaction for an amount greater (or less) than his tax basis therefor. Any gain recognized on a sale or exchange and not constituting a realization of accrued "market discount," and any loss will, under current law, generally be capital gain or loss except in the case of a dealer or financial institution. As previously discussed, gain realized on the disposition of the interest of a Unitholder in any Bond deemed to have been acquired with market discount will be treated as ordinary income to the extent the gain does not exceed the amount of accrued market discount not previously taken into income. Any capital gain or loss arising from the disposition of a Bond by the Trust or the disposition of Units by a Unitholder will be short-term capital gain or loss unless the Unitholder has held his Units for more than one year in which case such capital gain or loss will be long-term. For taxpayers other than corporations, net capital gains are subject to a maximum marginal stated tax rate of 28 percent. However, it should be noted that legislative proposals are introduced from time to time that affect tax rates and could affect relative differences at which ordinary income and capital gains are taxed. The tax cost reduction requirements of the Code relating to amortization of bond premium may under some circumstances, result in the Unitholder realizing taxable gain when his Units are sold or redeemed for an amount equal to or less than his original cost.

If the Unitholder disposes of a Unit, he is deemed thereby to have disposed of his entire pro rata interest in all Trust assets including his pro rata portion of all of the Bonds represented by the Unit. This may result in a portion of the gain, if any, on such sale being taxable as ordinary income under the market discount rules (assuming no election was made by the Unitholder to include market discount in income as it accrues) as previously discussed.

"The Revenue Reconciliation Act of 1993" (the "Tax Act") raised tax rates on ordinary income while capital gains remain subject to a 28 percent maximum stated rate for taxpayers other than corporations. Because some or all capital gains are taxed at a comparatively lower rate under the Tax Act, the Tax Act

includes a provision that recharacterizes capital gains as ordinary income in the case of certain financial transactions that are "conversion transactions" effective for transactions entered into after April 30, 1993. Unitholders and prospective investors should consult with their tax advisers regarding the potential effect of this provision on their investment in Units.

Foreign Investors. A Unitholder who is a foreign investor (i.e., an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust) will not be subject to United States federal income taxes, including withholding taxes, on interest income (including any original issue discount) on, or any gain from the sale or other disposition of, his pro rata interest in any Bond or the sale of his Units provided that all of the following conditions are met: (i) the interest income or gain is not effectively connected with the conduct by the foreign investor of a trade or business within the United States, (ii) either (a) the interest is United States source income (which is the case for most securities issued by United States issuers), the Bond is issued after July 18, 1984 (which is the case for each Bond held by the Trust), the foreign investor does not own, directly or indirectly, 10% or more of the total combined voting power of all classes of voting stock of the issuer of the Bond and the foreign investor is not a controlled foreign corporation related (within the meaning of Section 864(d)(4) of the Code) to the issuer of the Bond, or (b) the interest income is not from sources within the United States (iii) with respect to any gain, the foreign investor (if an individual) is not present in the United States for 183 days or more during

C-8

CORPORATE INCOME SERIES

his or her taxable year and (iv) the foreign investor provides all certification which may be required of his status (foreign investors may contact the Sponsor to obtain a Form W-8 which must be filed with the Trustee and refiled every three calendar years thereafter). Foreign investors should consult their tax advisers with respect to United States tax consequences of ownership of Units.

It should be noted that the Tax Act includes a provision which eliminates the exemption from United States taxation, including withholding taxes, for certain "contingent interest." The provision applies to interest received after December 31, 1993. No opinion is expressed herein regarding the potential applicability of this provision and whether United States taxation or withholding taxes could be imposed with respect to income derived from the Units as a result thereof. Unitholders and prospective investors should consult with their tax advisers regarding the potential effect of this provision on their investment in Units.

General. Each Unitholder (other than a foreign investor who has properly provided the certifications described above) will be requested to provide the Unitholder's taxpayer identification number to the Trustee and to certify that the Unitholder has not been notified that payments to the Unitholder are subject to back-up withholding. If the proper taxpayer identification number and appropriate certification are not provided when requested, distributions by the Trust to such Unitholder will be subject to back-up withholding.

The foregoing discussion relates only to United States Federal income taxes; Unitholders may be subject to state and local taxation in other jurisdictions (including a foreign investor's country of residence). Unitholders should consult their tax advisers regarding potential state, local, or foreign taxation with respect to the Units.

ESTIMATED CASH FLOWS TO UNITHOLDERS

The table below sets forth the estimated distributions of interest and principal to Unitholders on a per 100 Units basis. The table assumes no changes in expenses, no changes in the current interest rates, no exchanges, redemptions, sales or prepayments of the underlying Bonds prior to maturity or expected retirement date and the receipt of principal upon maturity or expected retirement date. To the extent the foregoing assumptions change actual distributions will vary.

THE TAX-EXEMPT PORTFOLIOS

THE TRUST PORTFOLIO

The Tax-Exempt Portfolios may be appropriate investment vehicles for investors who desire to participate in a portfolio of tax-exempt fixed income securities with greater diversification than they might be able to acquire individually. In addition, Municipal Bonds of the type deposited in the Tax-Exempt Portfolios are often not available in small amounts.

The selection of Municipal Bonds for each Trust was based largely upon the experience and judgment of the Sponsor. In making such selections the Sponsor considered the following factors: (a) Standard & Poor's or Moody's ratings of the Municipal Bonds; (b) the price of the Municipal Bonds relative to other issues of similar quality and maturity; (c) the diversification of the Municipal Bonds as to purpose of issue; (d) the income to the Unitholders of the Trust; (e) in the case of Insured Trust Funds whether such Bonds were insured or the availability and cost of insurance for the scheduled payment of principal and interest on the Municipal Bonds; and (f) the dates of maturity of the Bonds.

All of the Municipal Bonds in each Trust Fund's portfolio are rated in the category "BBB" or better (including provisional or conditional ratings) by Standard & Poor's or "Baa" or better by Moody's. See "Appendix: Description of Ratings" and "Portfolio" for each Tax-Exempt Portfolio.

All Municipal Bonds deposited in the Trust Funds on the Initial Date of Deposit were represented by purchase contracts assigned to the Trustee together with cash, cash equivalents or irrevocable letters of credit issued by a major commercial bank in the amounts necessary to complete the purchase thereof. Each Trust consists of that number of Municipal Bonds divided by purpose of issues (and percentage of principal amount of such Trust) as set forth in the following table.

TE-1

TAX-EXEMPT PORTFOLIOS

-
- (1) Municipal Bonds issued by Territories of the United States (which term includes the Commonwealth of Puerto Rico and the District of Columbia) generally receive the same tax exempt treatment for both state and Federal tax purposes as Municipal Bonds issued by political entities in the named State Trust. See "State Risk Factors and State Tax Status" for each Trust.
 - (2) General obligation bonds are general obligations of governmental entities and are backed by the taxing powers of such entities.
 - (3) Revenue bonds are payable from the income of a specific project or authority and are not supported by an issuer's power to levy taxes.
 - (4) The portfolio percentage in parenthesis represents the principal amount of such Bonds to the total principal amount of Bonds in the Trust. For a discussion of the risk associated with investments in the bonds of such issuers, see "Municipal Bond Risk Factors" below.
 - (5) The average life of the Bonds in a Trust is calculated based upon the stated maturities of the Bonds in such Trust (or, with respect to Bonds for which funds or securities have been placed in escrow to redeem such Bonds on a stated call date, based upon such call date). The average life of the Bonds in a Trust may increase or decrease from time to time as Bonds mature or are called or sold.
 - (6) The Sponsor and/or affiliated Underwriters have participated as either the sole underwriter or manager or a member of underwriting syndicates from which approximately that percentage listed above of the aggregate principal amount of the Bonds in such Trust were acquired.

TAXABLE EQUIVALENT ESTIMATED CURRENT RETURN TABLES

As of the date of this Prospectus, the following tables show the approximate taxable estimated current returns for individuals that are equivalent to tax-exempt estimated current returns under combined Federal and State taxes (where applicable) using the published Federal and State tax rates (where applicable) scheduled to be in effect in 1995. They incorporate increased tax rates for higher income taxpayers that were included in the Revenue Reconciliation Act of 1993. These tables illustrate approximately what you would have to earn on taxable investments to equal the tax-exempt estimated current return in your income tax bracket. For cases in which more than one State bracket falls within a Federal bracket the highest State bracket is combined with the Federal bracket. The combined State and Federal tax rates shown reflect the fact that State tax payments are currently deductible for Federal tax purposes, and have been rounded to the nearest 1/10 of 1%. The tables do not show the approximate taxable estimated current returns for individuals that are subject to the alternative minimum tax. The taxable equivalent estimated current returns may be somewhat higher than the equivalent returns indicated in the following tables for those individuals who have adjusted gross incomes in excess of \$114,700. The tables do not reflect the effect of limitations on itemized deductions and the deduction for personal exemptions. They were designed to phase out certain benefits of these deductions for higher income taxpayers. These limitations, in effect, raise the marginal Federal tax rate to approximately 44 percent for taxpayers filing a joint return and entitled to four personal exemptions and to approximately 41 percent for taxpayers filing a single return entitled to only one personal exemption. These limitations are subject to certain maximums, which depend on the number of exemptions claimed and the total amount of the taxpayer's itemized deductions. For example, the limitation on itemized deductions will not cause a taxpayer to lose more than 80% of his allowable itemized deductions, with certain exceptions. See "Federal Tax Status" for a more detailed discussion of recent Federal tax legislation, including a discussion of provisions affecting corporations.

*The State tax rates assumed take into account recent adjustments of tax brackets based on changes in the Consumer Price Index. The table reflects California income tax laws that increase State income tax rates for high income taxpayers. However, the table does not reflect the limitation on itemized deductions and the phase out of the benefit of the personal exemption credit and the dependent exemption credit that are imposed by the California income tax laws in a manner similar to Federal tax law.

256.50		Over	256.50	44.4	8.99	9.89	10.79	11.69	12.59	13.49	14.39

</TABLE>

*The combined State and Federal tax brackets reflect Federal and State income and State intangibles taxes but do not reflect the effect of the exemption from local income taxes; accordingly, Michigan residents subject to such local income taxes would need a somewhat higher taxable estimated current return than those shown to equal the tax-exempt estimated current return of the Trust.

TAX-EXEMPT PORTFOLIOS

NOTES TO PORTFOLIOS:

All insured Bonds in the Trust Funds are insured only by the insurer indicated in the description. The insurance was obtained directly by the issuer of the Bonds or by the Sponsor.

(P) This Bond was issued at an original issue discount. The tax effect of Bonds issued at an original issue discount is described in "Federal Tax Status."

(S) These Municipal Bonds are "when, as and if issued" or "delayed delivery" and have expected settlement dates after the "First Settlement Date."

Interest on these Bonds begins accruing to the benefit of Unitholders on the date of delivery.

- (C) This Bond is of the same issue as another Bond in the Trust.
 - (D) This issue of Bonds is secured by, and payable from, escrowed U.S. Government securities.
- (1) Contracts to acquire Municipal Bonds were entered into by the Sponsor between February 2, 1995 and February 21, 1995. All Bonds are represented by regular way contracts, unless otherwise indicated, for the performance of which an irrevocable letter of credit has been deposited with the Trustee.
 - (2) The ratings have been provided by Muller Data Corporation as reported to Muller Data Corporation by the respective rating agencies. All ratings represent Standard & Poor's Ratings Group ratings unless marked with the symbol "*" in which case the rating represents a Moody's Investors Service, Inc. rating. A brief description of the applicable Standard & Poor's and Moody's rating symbols and their meanings is set forth under "Appendix: Description of Ratings." A rating marked by "[_]" is contingent upon Standard & Poor's Ratings Group receiving final documentation from the insurer.
 - (3) There is shown under this heading the year in which each issue of Municipal Bonds is initially redeemable and the redemption price for that year; unless otherwise indicated, each issue continues to be redeemable at declining prices thereafter, but not below par value. The prices at which the Bonds may be redeemed or called prior to maturity may or may not include a premium and, in certain cases, may be less than the cost of the Bonds to the Trust. In addition, certain Bonds in the portfolio may be redeemed in whole or in part other than by operation of the stated redemption or sinking fund provisions under certain unusual or extraordinary circumstances specified in the instruments setting forth the terms and provisions of such Bonds. "S.F." indicates that a sinking fund is established with respect to an issue of Municipal Bonds.
 - (4) During the initial offering period, evaluations of Municipal Bonds are made on the basis of current offering side evaluations of the Municipal Bonds. The aggregate offering price is greater than the aggregate bid price of the Municipal Bonds, which is the basis on which Redemption Prices will be determined for purposes of redemption of Units after the initial offering period.
 - (5) Other information regarding the Municipal Bonds in the Trust Funds, at the opening of business on the Initial Date of Deposit, is as follows:

<TABLE>
<CAPTION>

TRUST FUND	PROFIT OR ANNUAL INTEREST			
	COST OF BONDS TO SPONSOR	(LOSS) TO SPONSOR	INCOME TO TRUST	BID SIDE VALUE OF BONDS
<S>	<C>	<C>	<C>	<C>
Insured National Series 14.....	\$7,766,983	\$79,199	\$494,338	\$7,755,383
Insured California Series 14.....	\$2,856,684	\$33,331	\$179,385	\$2,860,704
Insured Michigan Series 10.....	\$3,210,090	\$20,200	\$178,390	\$3,197,062

</TABLE>

Neither Cost of Bonds to Sponsor nor Profit or (Loss) to Sponsor reflects underwriting profits or losses received or incurred by the Sponsor through its participation in underwriting syndicates but such amounts reflect portfolio hedging transaction costs, hedging gains or losses, certain other carrying costs and the cost of insurance obtained by the Sponsor, if any, prior to the Initial Date of Deposit for individual Bonds.

TE-7

TAX-EXEMPT PORTFOLIOS

MUNICIPAL BOND RISK FACTORS

Certain of the Bonds in the Trust Funds may be general obligations of a governmental entity that are backed by the taxing power of such entity. All other Bonds in the Trusts are revenue bonds payable from the income of a specific project or authority and are not supported by the issuer's power to levy taxes. General obligation bonds are secured by the issuer's pledge of its faith, credit and taxing power for the payment of principal and interest.

Revenue bonds, on the other hand, are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. There are, of course, variations in the security of the different Bonds in the Trust Funds, both within a particular classification and between classifications, depending on numerous factors.

Certain of the Bonds in the Trust Funds may be obligations of issuers whose revenues are derived from services provided by hospitals and other health care facilities, including nursing homes. Ratings of bonds issued for health care facilities are often based on feasibility studies that contain projections of occupancy levels, revenues and expenses. A facility's gross receipts and net income available for debt service will be affected by future events and conditions including, among other things, demand for services and the ability of the facility to provide the services required, physicians' confidence in the facility, management's capabilities, economic developments in the service area, competition, efforts by insurers and governmental agencies to limit rates, legislation establishing state rate-setting agencies, expenses, the cost and possible unavailability of malpractice insurance, the funding of Medicare, Medicaid and other similar third party payor programs, and government regulation. Federal legislation has been enacted which implements a system of prospective Medicare reimbursement which may restrict the flow of revenues to hospitals and other facilities which are reimbursed for services provided under the Medicare program. Future legislation or changes in the areas noted above, among other things, would affect all hospitals to varying degrees and, accordingly, any adverse changes in these areas may affect the ability of such issuers to make payments of principal and interest on Municipal Bonds held in the portfolios of the Trust Funds. Such adverse changes also may affect the ratings of the Municipal Bonds held in the portfolios of the Trust Funds.

Certain of the Bonds in the Trust Funds may be single family mortgage revenue bonds, which are issued for the purpose of acquiring from originating financial institutions notes secured by mortgages on residences located within the issuer's boundaries and owned by persons of low or moderate income. Mortgage loans are generally partially or completely prepaid prior to their final maturities as a result of events such as sale of the mortgaged premises, default, condemnation or casualty loss. Because these Bonds are subject to extraordinary mandatory redemption in whole or in part from such prepayments of mortgage loans, a substantial portion of such Bonds will probably be redeemed prior to their scheduled maturities or even prior to their ordinary call dates. The redemption price of such issues may be more or less than the offering price of such Bonds. Extraordinary mandatory redemption without premium could also result from the failure of the originating financial institutions to make mortgage loans in sufficient amounts within a specified time period or, in some cases, from the sale by the Bond issuer of the mortgage loans. Failure of the originating financial institutions to make mortgage loans would be due principally to the interest rates on mortgage loans funded from other sources becoming competitive with the interest rates on the mortgage loans funded with the proceeds of the single family mortgage revenue bonds. Additionally, unusually high rates of default on the underlying mortgage loans may reduce revenues available for the payment of principal of or interest on such mortgage revenue bonds. Single family mortgage revenue bonds issued after December 31, 1980 were issued under Section 103A of the Internal Revenue Code of 1954, which Section contains certain ongoing requirements relating to the use

TE-8

TAX-EXEMPT PORTFOLIOS

of the proceeds of such Bonds in order for the interest on such Bonds to retain its tax-exempt status. In each case, the issuer of the Bonds has covenanted to comply with applicable ongoing requirements and bond counsel to such issuer has issued an opinion that the interest on the Bonds is exempt from Federal income tax under existing laws and regulations. There can be no assurances that the ongoing requirements will be met. The failure to meet these requirements could cause the interest on the Bonds to become taxable, possibly retroactively from the date of issuance.

Certain of the Bonds in the Trust Funds may be obligations of issuers whose revenues are primarily derived from mortgage loans to housing projects for low to moderate income families. The ability of such issuers to make debt service payments will be affected by events and conditions affecting financed projects, including, among other things, the achievement and maintenance of

sufficient occupancy levels and adequate rental income, increases in taxes, employment and income conditions prevailing in local labor markets, utility costs and other operating expenses, the managerial ability of project managers, changes in laws and governmental regulations, the appropriation of subsidies and social and economic trends affecting the localities in which the projects are located. The occupancy of housing projects may be adversely affected by high rent levels and income limitations imposed under Federal and state programs. Like single family mortgage revenue bonds, multi-family mortgage revenue bonds are subject to redemption and call features, including extraordinary mandatory redemption features, upon prepayment, sale or non-origination of mortgage loans as well as upon the occurrence of other events. Certain issuers of single or multi-family housing bonds have considered various ways to redeem bonds they have issued prior to the stated first redemption dates for such bonds. In connection with the housing Bonds held by the Trust Funds, the Sponsor has not had any direct communications with any of the issuers thereof, but at the Initial Date of Deposit it is not aware that any of the respective issuers of such Bonds are actively considering the redemption of such Bonds prior to their respective stated initial call dates. However, there can be no assurance that an issuer of a Bond in the Trusts will not attempt to so redeem a Bond in the Trust Funds.

Certain of the Bonds in the Trust Funds may be obligations of issuers whose revenues are derived from the sale of water and/or sewerage services. Water and sewerage bonds are generally payable from user fees. Problems faced by such issuers include the ability to obtain timely and adequate rate increases, a decline in population resulting in decreased user fees, the difficulty of financing large construction programs, the limitations on operations and increased costs and delays attributable to environmental considerations, the increasing difficulty of obtaining or discovering new supplies of fresh water, the effect of conservation programs and the impact of "no-growth" zoning ordinances. Issuers may have experienced these problems in varying degrees.

Certain of the Bonds in the Trust Funds may be obligations of issuers whose revenues are primarily derived from the sale of electric energy or natural gas. Utilities are generally subject to extensive regulation by state utility commissions which, among other things, establish the rates which may be charged and the appropriate rate of return on an approved asset base. The problems faced by such issuers include the difficulty in obtaining approval for timely and adequate rate increases from the governing public utility commission, the difficulty in financing large construction programs, the limitations on operations and increased costs and delays attributable to environmental considerations, increased competition, recent reductions in estimates of future demand for electricity in certain areas of the country, the difficulty of the capital market in absorbing utility debt, the difficulty in obtaining fuel at reasonable prices and the effect of energy conservation. Issuers may have experienced these problems in varying degrees. In addition, Federal, state and municipal governmental authorities may from time to time review existing and impose additional regulations governing the licensing, construction and operation of nuclear power plants, which may adversely affect the ability of the issuers of such Bonds to make payments of principal and/or interest on such Bonds.

TE-9

TAX-EXEMPT PORTFOLIOS

Certain of the Bonds in the Trust Funds may be industrial revenue bonds ("IRBs"), including pollution control revenue bonds, which are tax-exempt securities issued by states, municipalities, public authorities or similar entities to finance the cost of acquiring, constructing or improving various industrial projects. These projects are usually operated by corporate entities. Issuers are obligated only to pay amounts due on the IRBs to the extent that funds are available from the unexpended proceeds of the IRBs or receipts or revenues of the issuer under an arrangement between the issuer and the corporate operator of a project. The arrangement may be in the form of a lease, installment sale agreement, conditional sale agreement or loan agreement, but in each case the payments to the issuer are designed to be sufficient to meet the payments of amounts due on the IRBs. Regardless of the structure, payment of IRBs is solely dependent upon the creditworthiness of the corporate operator of the project or corporate guarantor. Corporate operators or guarantors may be affected by many factors which may have an adverse impact on the credit quality of the particular company or industry. These include cyclicity of revenues and earnings, regulatory and environmental restrictions, litigation resulting from accidents or environmentally-caused illnesses, extensive competition and financial

deterioration resulting from leveraged buy-outs or takeovers. The IRBs in the Trust Funds may be subject to special or extraordinary redemption provisions which may provide for redemption at par or, with respect to original issue discount bonds, at issue price plus the amount of original issue discount accreted to the redemption date plus, if applicable, a premium. The Sponsor cannot predict the causes or likelihood of the redemption date plus, if applicable, a premium. The Sponsor cannot predict the causes or likelihood of the redemption of IRBs or other Bonds in the Trust Funds prior to the stated maturity of such Bonds.

Certain of the Bonds in the Trust Funds may be obligations which are payable from and secured by revenues derived from the ownership and operation of facilities such as airports, bridges, turnpikes, port authorities, convention centers and arenas. The major portion of an airport's gross operating income is generally derived from fees received from signatory airlines pursuant to use agreements which consist of annual payments for leases, occupancy of certain terminal space and service fees. Airport operating income may therefore be affected by the ability of the airlines to meet their obligations under the use agreements. The air transport industry is experiencing significant variations in earnings and traffic, due to increased competition, excess capacity, increased costs, deregulation, traffic constraints and other factors, and several airlines are experiencing severe financial difficulties. The Sponsor cannot predict what effect these industry conditions may have on airport revenues which are dependent for payment on the financial condition of the airlines and their usage of the particular airport facility. Similarly, payment on Bonds related to other facilities is dependent on revenues from the projects, such as user fees from ports, tolls on turnpikes and bridges and rents from buildings. Therefore, payment may be adversely affected by reduction in revenues due to such factors as increased cost of maintenance, decreased use of a facility, lower cost of alternative modes of transportation, scarcity of fuel and reduction or loss of rents.

Certain of the Bonds in the Trust Funds may be obligations of issuers which are, or which govern the operation of, schools, colleges and universities and whose revenues are derived mainly from ad valorem taxes, or for higher education systems, from tuition, dormitory revenues, grants and endowments. General problems relating to school bonds include litigation contesting the state constitutionality of financing public education in part from ad valorem taxes, thereby creating a disparity in educational funds available to schools in wealthy areas and schools in poor areas. Litigation or legislation on this issue may affect the sources of funds available for the payment of school bonds in the Trusts. General problems relating to college and university obligations would include the prospect of a declining percentage of the population consisting of "college" age individuals, possible inability to raise tuition and fees sufficiently

TE-10

TAX-EXEMPT PORTFOLIOS

to cover increased operating costs, the uncertainty of continued receipt of Federal grants and state funding and new government legislation or regulations which may adversely affect the revenues or costs of such issuers. All of such issuers have been experiencing certain of these problems in varying degrees.

Certain of the Bonds in the Trust Funds may be Urban Redevelopment Bonds ("URBs"). URBs have generally been issued under bond resolutions pursuant to which the revenues and receipts payable under the arrangements with the operator of a particular project have been assigned and pledged to purchasers. In some cases, a mortgage on the underlying project may have been granted as security for the URBs. Regardless of the structure, payment of the URBs is solely dependent upon the creditworthiness of the operator of the project.

Certain of the Bonds in the Trust Funds may be lease revenue bonds whose revenues are derived from lease payments made by a municipality or other political subdivision which is leasing equipment or property for use in its operation. The risks associated with owning Bonds of this nature include the possibility that appropriation of funds for a particular project or equipment may be discontinued. The Sponsor cannot predict the likelihood of nonappropriation of funds for these types of lease revenue Bonds.

Certain of the Bonds in the Trust Funds may be sales and/or use tax revenue bonds whose revenues are derived from the proceeds of a special sales or use tax. Such taxes are generally subject to continuing Legislature approval. Payments may be adversely affected by reduction of revenues due to decreased

use of a facility or decreased sales.

Investors should be aware that many of the Bonds in the Trust Funds are subject to continuing requirements such as the actual use of Bond proceeds or manner of operation of the project financed from Bond proceeds that may affect the exemption of interest on such Bonds from Federal income taxation. Although at the time of issuance of each of the Bonds in the Trusts an opinion of bond counsel was rendered as to the exemption of interest on such obligations from Federal income taxation, there can be no assurance that the respective issuers or other obligors on such obligations will fulfill the various continuing requirements established upon issuance of the Bonds. A failure to comply with such requirements may cause a determination that interest on such obligations is subject to Federal income taxation, perhaps even retroactively from the date of issuance of such Bonds, thereby reducing the value of the Bonds and subjecting Unitholders to unanticipated tax liabilities.

Federal bankruptcy statutes relating to the adjustment of debts of political subdivisions or authorities of states of the United States provide that, in certain circumstances, such subdivisions or authorities may be authorized to initiate bankruptcy proceedings without prior notice to or consent of creditors, which proceedings could result in material and adverse modification or alteration of the rights of holders of obligations issued by such subdivisions or authorities.

Certain of the Bonds in the Trust Funds may represent "moral obligations" of a governmental entity other than the issuer. In the event that the issue of a Municipal Bond defaults in the repayment thereof, the governmental entity lawfully may, but is not obligated to, discharge the obligation of the issuer to repay such Municipal Bond.

STATE RISK FACTORS AND STATE TAX STATUS

None of the special counsel to the various Trust Funds has expressed any opinion regarding the completeness or materiality of any matters contained in this Prospectus other than the tax opinions set forth under "Federal Tax Status." For risks specific to the individual Trusts, see "Risk Factors" for each Trust.

TE-11

TAX-EXEMPT PORTFOLIOS

INSURED CALIFORNIA SERIES 14

Risk Factors

As described above, the Fund will invest substantially all of its assets in California Municipal Obligations. The Fund is therefore susceptible to political, economic or regulatory factors affecting issuers of California Municipal Obligations. These include the possible adverse effects of certain California constitutional amendments, legislative measures, voter initiatives and other matters that are described below. The following information provides only a brief summary of the complex factors affecting the financial situation in California (the "State") and is derived from sources that are generally available to investors and are believed to be accurate. No independent verification has been made of the accuracy or completeness of any of the following information. It is based in part on information obtained from various State and local agencies in California or contained in Official Statements for various California Municipal Obligations.

There can be no assurance that future statewide or regional economic difficulties, and the resulting impact on State or local governmental finances generally, will not adversely affect the market value of California Municipal Obligations held in the portfolio of the Fund or the ability of particular obligors to make timely payments of debt service on (or relating to) those obligations.

Economic Overview. California's economy is the largest among the 50 states and one of the largest in the world. The State's population of over 30 million represents 12% of the total United States population and grew by 27% in the 1980s. Total personal income in the State, at an estimated \$662 billion in 1992, accounts for 13% of all personal income in the nation. Total employment is almost 14 million, the majority of which is in the service, trade and manufacturing sectors.

Reports issued by the State Department of Finance and other sources indicate that the State's economy is suffering its worst recession since the 1930s, with prospects for recovery slower than for the nation as a whole. The State has lost over 800,000 jobs since the start of the recession in mid 1990 and additional job losses are expected before an upturn begins. The largest job losses have been in Southern California, led by declines in the aerospace and construction industries. Weaknesses statewide occurred in manufacturing, construction, services and trade and will be hurt in the next few years by continued cuts in federal defense spending and base closures. Unemployment is expected to remain well above the national average in 1994. The State's economy is only expected to pull out of the recession slowly, following the national recovery which has begun. Delay in recovery will exacerbate shortfalls in State revenues.

Certain California Municipal Obligations may be obligations of issuers which rely in whole or in part, directly or indirectly, on ad valorem property taxes as a source of revenue. The taxing powers of California local governments and districts are limited by Article XIII A of the California Constitution, enacted by the voters in 1978 and commonly known as "Proposition 13." Briefly, Article XIII A limits to 1% of full cash value the rate of ad valorem property taxes on real property and generally restricts the reassessment of property to 2% per year, except upon new construction or change of ownership (subject to a number of exemptions). Taxing entities may, however, raise ad valorem taxes above the 1% limit to pay debt service on voter-approved bonded indebtedness.

Under Article XIII A, the basic 1% ad valorem tax levy is applied against the assessed value of property as of the owner's date of acquisition (or as of March 1, 1975, if acquired earlier), subject to certain adjustments. This system has resulted in widely varying amounts of tax on similarly situated properties.

TE-12

TAX-EXEMPT PORTFOLIOS

Several lawsuits have been filed challenging the acquisition-based assessment system of Proposition 13 and on June 18, 1992 the U.S. Supreme Court announced a decision upholding Proposition 13.

Article XIII A prohibits local governments from raising revenues through ad valorem property taxes above the 1% limit; it also requires voters of any governmental unit to give two-thirds approval to levy any "special tax." Court decisions, however, allowed non-voter approved levy of "general taxes" which were not dedicated to a specific use. In response to these decisions, the voters of the State in 1986 adopted an initiative statute which imposed significant new limits on the ability of local entities to raise or levy general taxes, except by receiving majority local voter approval. Significant elements of this initiative, "Proposition 62", have been overturned in recent court cases. An initiative proposed to re-enact the provisions of Proposition 62 as a constitutional amendment was defeated by the voters in November 1990, but such a proposal may be renewed in the future.

The State and its local governments are subject to an annual "appropriations limit" imposed by Article XIII B of the California Constitution, enacted by the voters in 1979 and significantly amended by Propositions 98 and 111 in 1988 and 1990, respectively. Article XIII B prohibits the State or any covered local government from spending "appropriations subject to limitation" in excess of the appropriations limit imposed. "Appropriations subject to limitation" are authorizations to spend "proceeds of taxes," which consist of tax revenues and certain other funds, including proceeds from regulatory licenses, user charges or other fees to the extent that such proceeds exceed the cost of providing the product or service, but "proceeds of taxes" excludes most State subventions to local governments. No limit is imposed on appropriations or funds which are not "proceeds of taxes," such as reasonable user charges or fees, and certain other non-tax funds, including bond proceeds.

Among the expenditures not included in the Article XIII B appropriations limit are (1) the debt service cost of bonds issued or authorized prior to January 1, 1979, or subsequently authorized by the voters, (2) appropriations arising from certain emergencies declared by the Governor, (3) appropriations for certain capital outlay projects, (4) appropriations by the State of post-1989 increases in gasoline taxes and vehicle weight fees, and (5) appropriations made in certain cases of emergency.

The appropriations limit for each year is adjusted annually to reflect changes

in cost of living and population, and any transfers of service responsibilities between government units. The definitions for such adjustments were liberalized in 1990 by Proposition 111 to more closely follow growth in the State's economy.

"Excess" revenues are measured over a two-year cycle. Local governments must return any excess to taxpayers by rate reduction. The State must refund 50% of any excess, with the other 50% paid to schools and community colleges. With more liberal annual adjustment factors since 1988, and depressed revenues since 1990 because of the recession, few governments are currently operating near their spending limits, but this condition may change over time. Local governments may by voter approval exceed their spending limits for up to four years.

During fiscal year 1986-87, State receipts from proceeds of taxes exceeded its appropriations limit by \$1.1 billion, which was returned to taxpayers. Since that year, appropriations subject to limitation have been under the State limit. State appropriations are expected to be \$3.7 billion under the limit for Fiscal Year 1993-94.

TE-13

TAX-EXEMPT PORTFOLIOS

Because of the complex nature of Articles XIII A and XIII B of the California Constitution, the ambiguities and possible inconsistencies in their terms, and the impossibility of predicting future appropriations or changes in population and cost of living, and the probability of continuing legal challenges, it is not currently possible to determine fully the impact of Article XIII A or Article XIII B on California Municipal Obligations or on the ability of the State or local governments to pay debt service on such California Municipal Obligations. It is not presently possible to predict the outcome of any pending litigation with respect to the ultimate scope, impact or constitutionality of either Article XIII A or Article XIII B, or the impact of any such determinations upon State agencies or local governments, or upon their ability to pay debt service on their obligations. Future initiative or legislative changes in laws or the California Constitution may also affect the ability of the State or local issuers to repay their obligations.

As of April 1, 1994, the State had approximately \$18.1 billion of general obligation bonds outstanding, and \$5.6 billion remained authorized but unissued. In addition, at June 30, 1993, the State had lease-purchase obligations, payable from the State's General Fund, of approximately \$4.0 billion. Of the State's outstanding general obligation debt, 28% is presently self-liquidating (for which program revenues are anticipated to be sufficient to reimburse the General Fund for debt service payments). Four general obligation bond propositions, totalling \$5.9 billion, will be on the June 1994 ballot. In Fiscal Year 1992-93, debt service on general obligation bonds and lease-purchase debt was approximately 4.1% of General Fund revenues. The State has paid the principal of and interest on its general obligation bonds, lease-purchase debt and short-term obligations when due.

The principal sources of General Fund revenues in 1992-93 were the California personal income tax (44% of total revenues), the sales tax (38%), bank and corporation taxes (12%), and the gross premium tax on insurance (3%). The State maintains a Special Fund for Economic Uncertainties (the "Economic Uncertainties Fund"), derived from General Fund revenues, as a reserve to meet cash needs of the General Fund, but which is required to be replenished as soon as sufficient revenues are available. Year-end balances in the Economic Uncertainties Fund are included for financial reporting purposes in the General Fund balance. In most recent years, California has budgeted to maintain the Economic Uncertainties Fund at around 3% of General Fund expenditures but essentially no reserve has been budgeted in 1992-93 or 1993-1994 because reserves have been reduced by the recession.

Throughout the 1980s, State spending increased rapidly as the State population and economy also grew rapidly, including increased spending for many assistance programs to local governments, which were constrained by Proposition 13 and other laws. The largest State program is assistance to local public school districts. In 1988, an initiative (Proposition 98) was enacted which (subject to suspension by a two-thirds vote of the Legislature and the Governor) guarantees local school districts and community college districts a minimum share of State General Fund revenues (currently about 34%).

Since the start of the 1990-91 Fiscal Year, the State has faced adverse economic, fiscal, and budget conditions. The economic recession seriously affected State tax revenues. It also caused increased expenditures for health and welfare programs. The State is also facing a structural imbalance in its budget with the largest programs supported by the General Fund (education, health, welfare and corrections) growing at rates significantly higher than the growth rates for the principal revenue sources of the General Fund. As a result, the State entered a period of budget imbalance, with expenditures exceeding revenues for four of the five fiscal years through 1991-92.

TE-14

TAX-EXEMPT PORTFOLIOS

As the State fell into a deep recession in the summer of 1990, the State budget fell sharply out of balance in the 1990-91 and 1991-92 fiscal years, despite significant expenditure cuts and tax increases. The State had accumulated a \$2.8 billion budget deficit by June 30, 1992. This deficit also severely reduced the State's cash resources, so that it had to rely on external borrowing in the short-term markets to meet its cash needs.

With the failure to enact a budget by July 1, 1992, the State had no legal authority to pay many of its vendors until the budget was passed; nevertheless, certain obligations (such as debt service, school apportionments, welfare payments, and employee salaries) were payable because of continuing or special appropriations, or court orders. However, the State Controller did not have enough cash to pay all of these ongoing obligations as they came due, as well as valid obligations incurred in the prior fiscal year.

Starting on July 1, 1992, the Controller was required to issue "registered warrants" in lieu of normal warrants backed by cash to pay many State obligations. Available cash was used to pay constitutionally mandated and priority obligations. Between July 1 and September 3, 1992, the Controller issued an aggregate of approximately \$3.8 billion of registered warrants, all of which were called for redemption by September 4, 1992 following enactment of the 1992-93 Budget Act and issuance by the State of \$3.3 billion of Interim Notes.

The 1992-93 Budget Act, when finally adopted, was projected to eliminate the State's accumulated deficit, with additional expenditure cuts and a \$1.3 billion transfer of State education funding costs to local governments by shifting local property taxes to school districts. However, as the recession continued longer and deeper than expected, revenues once again were far below projections, and only reached a level just equal to the amount of expenditures. Thus, the State continued to carry its \$2.8 billion budget deficit at June 30, 1993.

The 1993-94 Budget Act was similar to the prior year, in reliance on expenditure cuts and an additional \$2.6 billion transfer of costs to local government, particularly counties. A major feature of the budget was a two-year plan to eliminate the accumulated deficit by borrowing into the 1994-95 fiscal year. With the recession still continuing longer than expected, the 1994-95 Governor's Budget now projects that in the 1993-94 Fiscal Year, the General Fund will have \$900 million less revenue and \$800 million higher expenditures than budgeted. As a result, revenues will only exceed expenditures by about \$400 million. If this projection is met, it will be the first operating surplus in four years; however, some budget analysts outside the Department of Finance project revenues in the balance of 1993-94 will not meet the revised, lower projection. In addition, the General Fund may have some unplanned costs for relief related to the January 17, 1994 Northridge earthquake.

The State has implemented its short-term borrowings as part of the deficit elimination plan, and has also borrowed additional sums to cover cash flow shortfalls in the spring of 1994, for a total of \$3.2 billion, coming due in July and December, 1994. Repayment of these short-term notes will require additional borrowing, as the State's cash position continues to be adversely affected.

The Governor's 1994-95 Budget proposal recognizes the need to bridge a gap of around \$5 billion by June 30, 1995. Over \$3.1 billion of this amount is being requested from the federal government as increased aid, particularly for costs associated with incarcerating, educating and providing health and welfare services to undocumented immigrants. However, President Clinton has not included these costs in his proposed Fiscal 1995 Budget. The rest of the

budget gap is proposed to be closed with expenditure cuts and projected \$600 million of new revenue assuming the State wins a tax case presently pending in the U.S. Supreme Court. Thus the State will once again face significant uncertainties and very difficult choices in the 1994-95 budget, as tax increases are unlikely and many cuts and budget adjustments have been made in the past three years.

TE-15

TAX-EXEMPT PORTFOLIOS

The State's severe financial difficulties for the current and upcoming budget years will result in continued pressure upon various local governments, particularly school districts and counties which depend on State aid. Despite efforts in recent years to increase taxes and reduce governmental expenditures, there can be no assurance that the State will not face budget gaps in the future.

State general obligation bonds are currently rated "A1" by Moody's and "A" by Standard & Poor's. These ratings were recently reduced from "Aa" and "A+", respectively, due to the State's inability to reduce its accumulated budget deficit, among a number of other fiscal uncertainties. Both of these ratings were previously reduced from "AAA" levels which the State held until late 1991. There can be no assurance that such ratings will be maintained in the future. It should be noted that the creditworthiness of obligations issued by local California issuers may be unrelated to the creditworthiness of obligations issued by the State of California, and that there is no obligation on the part of the State to make payment on such local obligations in the event of default.

The State is involved in certain legal proceedings (described in the State's recent financial statements) that, if decided against the State, may require the State to make significant future expenditures or may substantially impair revenues.

On December 7, 1994, Orange County, California (the "County"), together with its pooled investment fund (the "Fund") filed for protection under Chapter 9 of the federal Bankruptcy Code, after reports that the Fund had suffered significant market losses in its investments which caused a liquidity crisis for the Fund and the County. Approximately 180 other public entities, most but not all located in the County, were also depositors in the Fund. As of December 13, 1994, the County indicated that the Fund had lost about 27% of its initial deposits of approximately \$7.4 billion. The County may suffer further losses as it sells investments to restructure the Fund. Many of the entities which kept moneys in the Fund, including the County, are facing cash flow difficulties because of the bankruptcy filing and may be required to reduce programs or capital projects.

The State of California has no obligations with respect to any bonds or other securities of the County or any of the other participating entities, although under existing legal precedents, the State may be obligated to ensure that school districts have sufficient funds to operate.

State Assistance. Property tax revenues received by local governments declined more than 50% following passage of Proposition 13. Subsequently, the California Legislature enacted measures to provide for the redistribution of the State's General Fund surplus to local agencies, the reallocation of certain State revenues to local agencies and the assumption of certain governmental functions by the State to assist municipal issuers to raise revenues. Total local assistance (including public schools) accounted for approximately 75% of General Fund expenditures, including the effect of implementing reductions in certain aid reductions. To reduce State General Fund support for school districts, the 1992-93 and 1993-94 Budget Acts caused local governments to transfer \$3.9 billion of property tax revenues to school districts, representing loss of all of the post-Proposition 13 "bail-out" aid. Local governments have in return received greater revenues and greater flexibility to operate health and welfare programs. To the extent the State should be constrained by its Article XIIIB appropriations limit, or its obligation to conform to Proposition 98, or other fiscal considerations, the absolute level, or the rate of growth, of State assistance to local governments may be reduced. Any such reductions in State aid could compound the serious fiscal constraints already experienced by many local governments, particularly counties. The Richmond Unified School District (Contra Costa County) entered bankruptcy proceedings in May 1991, but the proceedings have been dismissed.

Assessment Bonds. California Municipal Obligations which are assessment bonds may be adversely affected by a general decline in real estate values or a slowdown in real estate sales activity. In many cases, such bonds are secured by land which is undeveloped at the time of issuance but anticipated to be developed within a few years after issuance. In the event of such reduction or slowdown, such development may not occur or may be delayed, thereby increasing the risk of a default on the bonds. Because the special assessments or taxes securing these bonds are not the personal liability of the owners of the property assessed, the lien on the property is the only security for the bonds. Moreover, in most cases the issuer of these bonds is not required to make payments on the bonds in the event of delinquency in the payment of assessments or taxes, except from amounts, if any, in a reserve fund established for the bonds.

California Long Term Lease Obligations. Certain California long term lease obligations, though typically payable from the general fund of the municipality, are subject to "abatement" in the event the facility being leased is unavailable for beneficial use and occupancy by the municipality during the term of the lease. Abatement is not a default, and there may be no remedies available to the holders of the certificates evidencing the lease obligation in the event abatement occurs. The most common causes of abatement are failure to complete construction of the facility before the end of the period during which lease payments have been capitalized and uninsured casualty losses to the facility (e.g., due to earthquake). In the event abatement occurs with respect to a lease obligation, lease payments may be interrupted (if all available insurance proceeds and reserves are exhausted) and the certificates may not be paid when due.

Several years ago the Richmond Unified School District (the "District") entered into a lease transaction in which certain existing properties of the District were sold and leased back in order to obtain funds to cover operating deficits. Following a fiscal crisis in which the District's finances were taken over by a State receiver (including a brief period under bankruptcy court protection), the District failed to make rental payments on this lease, resulting in a lawsuit by the Trustee for the Certificate of Participation holders, in which the State was a named defendant (on the grounds that it controlled the District's finances). One of the defenses raised in answer to this lawsuit was the invalidity of the original lease transaction. The trial court upheld the validity of the lease, and the case has been settled. A judgment in a future case against the position asserted by the Trustee in the Richmond case may have adverse implications for lease transactions of a similar nature by other California entities.

The repayment of industrial development securities secured by real property may be affected by California laws limiting foreclosure rights of creditors. Securities backed by health care and hospital revenues may be affected by changes in State regulations governing cost reimbursements to health care providers under MediCal (the State's Medicaid program), including risks related to the policy of awarding exclusive contracts to certain hospitals.

Limitations on ad valorem property taxes may particularly affect "tax allocation" bonds issued by California redevelopment agencies. Such bonds are secured solely by the increase in assessed valuation of a redevelopment project area after the start of redevelopment activity. In the event that assessed values in the redevelopment project decline (for example, because of a major natural disaster such as an earthquake), the tax increment revenue may be insufficient to make principal and interest payments on these bonds. Both Moody's and Standard & Poor's suspended ratings on California tax allocation bonds after the enactment of Articles XIII A and XIII B, and only resumed such ratings on a selective basis.

Proposition 87, approved by California voters in 1988, requires that all revenues produced by a tax rate increase go directly to the taxing entity which increased such tax rate to repay that entity's general obligation indebtedness. As a result, redevelopment agencies (which, typically, are the issuers of tax

allocation securities) no longer receive an increase in tax increment when taxes on property in the project area are increased to repay voter-approved bonded indebtedness.

The effect of these various constitutional and statutory changes upon the ability of California municipal securities issuers to pay interest and principal on their obligations remains unclear. Furthermore, other measures affecting the taxing or spending authority of California or its political subdivisions may be approved or enacted in the future. Legislation has been or may be introduced which would modify existing taxes or other revenue-raising measures or which either would further limit or, alternatively, would increase the abilities of state and local governments to impose new taxes or increase existing taxes. It is not presently possible to determine the impact of any such legislation on California Municipal Obligations in which the Fund may invest, future allocations of state revenues to local governments or the abilities of state or local governments to pay the interest on, or repay the principal of, such California Municipal Obligations.

Substantially all of California is within an active geologic region subject to major seismic activity. Any California Municipal Obligation in the Portfolio could be affected by an interruption of revenues because of damaged facilities, or, consequently, income tax deductions for casualty losses or property tax assessment reductions. Compensatory financial assistance could be constrained by the inability of (i) an issuer to have obtained earthquake insurance coverage at reasonable rates; (ii) an insurer to perform on its contracts of insurance in the event of widespread losses; or (iii) the Federal or State government to appropriate sufficient funds within their respective budget limitations.

California Tax Status

In the opinion of Orrick, Herrington & Sutcliffe, special California tax counsel to Insured California Series 14, under existing law:

Insured California Series 14 is not an association taxable as a corporation and the income of Insured California Series 14 will be treated as the income of the Unitholders under the income tax laws of California;

Amounts treated as interest on the underlying Bonds in Insured California Series 14 which are exempt from tax under California personal income tax and property tax laws when received by Insured California Series 14 will, under such laws, retain their status as tax-exempt interest when distributed to Unitholders. However, interest on the underlying Bonds attributed to a Unitholder which is a corporation subject to the California franchise tax laws may be includable in its gross income for purposes of determining its California franchise tax. Further, certain interest which is attributable to a Unitholder subject to the California personal income tax and which is treated as an item of tax preference for purposes of the federal alternative minimum tax pursuant to Section 57(a)(5) of the Internal Revenue Code of 1986 may also be treated as an item of tax preference that must be taken into account in computing such Unitholder's alternative minimum taxable income for purposes of the California alternative minimum tax enacted by 1987 California Statutes, chapter 1138. However, because of the provisions of the California Constitution exempting the interest on bonds issued by the State of California or by local governments within the state, from taxes levied on income, the application of the new California alternative minimum tax to interest otherwise exempt from the California personal income tax in some cases may be unclear;

Under California income tax law, each Unitholder in Insured California Series 14 will have a taxable event Insured California Series 14 disposes of a Bond (whether by sale, exchange, redemption, or

TE-18

TAX-EXEMPT PORTFOLIOS

payment at maturity) or when the Unitholder redeems or sells units. Because of the requirement that tax cost basis be reduced to reflect amortization of bond premium, under some circumstances a Unitholder may realize taxable gains when Units are sold or redeemed for an amount equal to, or less than, their original cost. The total cost of each Unit in Insured California Series 14 to a Unitholder is allocated among each of the Bond issues held in Insured California Series 14 (in accordance with the proportion of

Insured California Series 14 comprised by each Bond issue) in order to determine his per Unit tax cost for each Bond issue; and the tax cost reduction requirements relating to amortization of bond premium will apply separately to the per Unit cost of each Bond issue. Unitholders' bases in their Units, and the bases for their fractional interest in each Insured California Series 14 asset, may have to be adjusted for their pro rata share of accrued interest received, if any, on Bonds delivered after the Unitholders' respective settlement dates;

Under the California personal property tax laws, bonds (including the Bonds in Insured California Series 14) or any interest therein is exempt from such tax;

Under Section 17280(b)(2) of the California Revenue and Taxation Code, interest on indebtedness incurred or continued to purchase or carry Units of Insured California Series 14 is not deductible for the purposes of the California personal income tax. While there presently is no California authority interpreting this provision, Section 17280(b)(2) directs the California Franchise Tax Board to prescribe regulations determining the proper allocation and apportionment if interest costs for this purpose. The Franchise Tax Board has not yet proposed or prescribed such regulations. In interpreting the generally similar Federal provision, the Internal Revenue Service has taken the position that such indebtedness need not be directly traceable to the purchase or carrying of Units (although the Service has not contended that a deduction for interest on indebtedness incurred to purchase or improve a personal residence or to purchase goods or services for personal consumption will be disallowed). In the absence of conflicting regulations or other California authority, the California Franchise Tax Board generally has interpreted California statutory tax provisions in accordance with Internal Revenue Service interpretations of similar Federal provisions.

At the respective times of issuance of the Bonds, opinions relating to the validity thereof and to the exemption of interest thereon from Federal income tax and California personal income tax are rendered by bond counsel to the respective issuing authorities and we have relied solely upon such opinions, or, as to securities not yet delivered, forms of such opinions contained in official statements relating to such securities. Except in certain instances in which Orrick, Herrington & Sutcliffe acted as bond counsel to issuers of Bonds in Insured California Series 14, and as such made a review of proceedings relating to the issuance of certain Bonds at the time of their issuance, Orrick, Herrington & Sutcliffe has not made any review for the Trust of the proceedings relating to the issuance of the Bonds in Insured California Series 14 or of the basis for such opinions.

For a discussion of Federal tax matters relating to distributions from the Trust Fund, see "Federal Tax Status."

INSURED MICHIGAN SERIES 10

Risk Factors

Investors should be aware that the economy of the State of Michigan has, in the past, proven to be cyclical, due primarily to the fact that the leading sector of the State's economy is the manufacturing of durable goods. While the State's efforts to diversity its economy have proven successful, as reflected by the fact that the share of employment in the State in the durable goods sector has fallen from 33.1 percent

TE-19

TAX-EXEMPT PORTFOLIOS

in 1960 to 17.9 percent in 1990, durable goods manufacturing still represents a sizable portion of the State's economy. As a result, any substantial national economic downturn is likely to have an adverse effect on the economy of the State and on the revenues of the State and some of its local governmental units.

In May 1986, Moody's Investors Service raised the State's general obligation bond rating to "A1". In October 1989, Standard & Poor's Corporation raised its rating on the State's general obligation bonds to "AA".

The State's economy could continue to be affected by changes in the auto industry, notably consolidation and plant closings resulting from competitive

pressures and over-capacity. Such actions could adversely affect State revenues and the financial impact on the local units of government in the areas in which plants are closed could be more severe.

General Motors Corporation announced the scheduled closing of several of its plants in Michigan in 1993 and 1994. Some of these closings have occurred and some have been deferred. The ultimate impact these closures may have on the State's revenues and expenditures is not currently known. The impact on the financial condition of the municipalities in which the plants are located may be more severe than the impact on the State itself.

In recent years, the State has reported its financial results in accordance with generally accepted accounting principles. For each of the five fiscal years ending with the fiscal year ended September 30, 1989, the State reported positive year-end General Fund balances and positive cash balances in the combined General Fund/School Aid Fund. For the fiscal years ending September 30, 1990 and 1991, the State reported negative year-end General Fund Balances of \$310.4 million and \$169.4 million, respectively, but ended the 1992 fiscal year with its general fund in balance and ended the 1993 fiscal year with a small general fund surplus. A positive cash balance in the combined General Fund/School Aid Fund was recorded at September 30, 1990. In the 1991 thru 1993 fiscal years the State experienced deteriorating cash balances which necessitated short term borrowing and the deferral of certain scheduled cash payments. The State borrowed \$900 million for cash flow purposes in the 1993 fiscal year, which was repaid on September 30, 1993. The State's Budget Stabilization Fund received a \$283 million transfer from the General Fund in the 1993 State fiscal year, bringing the fund balance to \$303 million at September 30, 1993.

The Michigan Constitution of 1963 limits the amount of total revenues of the State raised from taxes and certain other sources to a level for each fiscal year equal to a percentage of the State's personal income for the prior calendar year. In the event that the State's total revenues exceed the limit by 1 percent or more, the Michigan Constitution of 1963 requires that the excess be refunded to taxpayers.

On March 15, 1994, Michigan voters approved a school finance reform amendment to the State's Constitution which, among other things, increased the State sales tax rate from 4% to 6% and placed a cap on property assessment increases for all property taxes. Concurrent legislation cut the State's income tax rate from 4.6% to 4.4%, reduced some property taxes and altered local school funding sources to a combination of property taxes and state revenues, some of which is provided from other new or increased State taxes. The legislation also contained other provisions that alter (and in some cases, may reduce) the revenues of local units of government, and tax increment bonds could be particularly affected. While the ultimate impact of the constitutional amendment and related legislation cannot yet be accurately predicted, investors should be alert to the potential effect of such measures upon the operations and revenues of Michigan local units of government.

TAX-EXEMPT PORTFOLIOS

TE-20

Although all or most of the Bonds in Insured Michigan Series 10 (the "Michigan Trust") are revenue obligations or general obligations of local governments or authorities rather than general obligations of the State of Michigan itself, there can be no assurance that any financial difficulties the State may experience will not adversely affect the market value or marketability of the Bonds or the ability of the respective obligors to pay interest on or principal of the Bonds, particularly in view of the dependency of local governments and other authorities upon State aid and reimbursement programs and, in the case of bonds issued by the State Building Authority, the dependency of the State Building Authority on the receipt of rental payments from the State to meet debt service requirements upon such bonds. In the 1991 fiscal year, the State deferred certain scheduled cash payments to municipalities, school districts, universities and community colleges. While such deferrals were made up at specified later dates, similar future deferrals could have an adverse impact on the cash position of some local governmental units. Additionally, the State reduced revenue sharing payments to municipalities below that level provided under formulas by \$10.9 million in the 1991 fiscal year and \$34.4 million in the 1992 fiscal year, \$45.5 million in the 1993 fiscal year and \$64.6 million (budgeted) in the 1994 fiscal year.

Insured Michigan Series 10 may contain general obligation bonds of local units

of government pledging the full faith and credit of the local unit which are payable from the levy of ad valorem taxes on taxable property within the jurisdiction of the local unit. Such bonds issued prior to December 22, 1978, or issued after December 22, 1978 with the approval of the electors of the local unit, are payable from property taxes levied without limitation as to rate or amount. With respect to bonds issued after December 22, 1978, and which were not approved by the electors of the local unit, the tax levy of the local unit for debt service purposes is subject to constitutional, statutory and charter tax rate limitations. In addition, several major industrial corporations have instituted challenges of their ad valorem property tax assessments in a number of local municipal units in the State. If successful, such challenges could have an adverse impact on the ad valorem tax bases of such units which could adversely affect their ability to raise funds for operation and debt service requirements.

Michigan Tax Status

In the opinion of Miller, Canfield, Paddock and Stone, special counsel to the Trust for Michigan tax matters, under existing Michigan law:

Insured Michigan Series 10 and the owners of Units will be treated for purposes of the Michigan income tax laws and the Single Business Tax in substantially the same manner as they are for purposes of the Federal income tax laws, as currently enacted. Accordingly, we have relied upon the opinion of Chapman and Cutler as to the applicability of Federal income tax under the Internal Revenue Code of 1986 to Insured Michigan Series 10 and the Unitholders.

Under the income tax laws of the State of Michigan, Insured Michigan Series 10 is not an association taxable as a corporation; the income of Insured Michigan Series 10 will be treated as the income of the Unitholders and be deemed to have been received by them when received by Insured Michigan Series 10. Interest on the underlying Bonds which is exempt from tax under these laws when received by Insured Michigan Series 10 will retain its status as tax exempt interest to the Unitholders.

For purposes of the foregoing Michigan tax laws, each Unitholder will be considered to have received his pro rata share of Bond interest when it is received by Insured Michigan Series 10, and each Unitholder will have a taxable event when Insured Michigan Series 10 disposes of a Bond (whether by sale, exchange, redemption or payment at maturity) or when the Unitholder redeems or sells his Unit to the extent the transaction constitutes a taxable event for Federal income tax

TAX-EXEMPT PORTFOLIOS

TE-21

purposes. The tax cost of each unit to a Unitholder will be established and allocated for purposes of these Michigan tax laws in the same manner as such cost is established and allocated for Federal income tax purposes.

Under the Michigan Intangibles Tax, Insured Michigan Series 10 is not taxable and the pro rata ownership of the underlying Bonds, as well as the interest thereon, will be exempt to the Unitholders to the extent Insured Michigan Series 10 consists of obligations of the State of Michigan or its political subdivisions or municipalities, or of obligations of the Commonwealth of Puerto Rico, Guam or of the United States Virgin Islands.

The Michigan Single Business Tax replaced the tax on corporate and financial institution income under the Michigan Income Tax, and the Intangible Tax with respect to those intangibles of persons subject to the Single Business Tax the income from which would be considered in computing the Single Business Tax. Persons are subject to the Single Business Tax only if they are engaged in "business activity", as defined in the Act. Under the Single Business Tax, both interest received by Insured Michigan Series 10 on the underlying Bonds and any amount distributed from Insured Michigan Series 10 to a Unitholder, if not included in determining taxable income for Federal income tax purposes, is also not included in the adjusted tax base upon which the Single Business Tax is computed, of either Insured Michigan Series 10 or the Unitholders. If Insured Michigan Series 10 or the Unitholders have a taxable event for Federal income tax purposes when Insured Michigan Series 10 disposes of a Bond (whether by sale, exchange, redemption or payment at maturity) or the Unitholder redeems or sells his Unit, an amount equal to any gain realized from such taxable

event which was included in the computation of taxable income for Federal income tax purposes (plus an amount equal to any capital gain of an individual realized in connection with such event but excluded in computing that individual's Federal taxable income) will be included in the tax base against which, after allocation, apportionment and other adjustments, the Single Business Tax is computed. The tax base will be reduced by an amount equal to any capital loss realized from such a taxable event, whether or not the capital loss was deducted in computing Federal taxable income in the year the loss occurred. Unitholders should consult their tax advisor as to their status under Michigan law.

Any proceeds paid under an insurance policy issued to the Trustee of the Trust, or paid under individual policies obtained by issuers of Bonds, which, when received by the Unitholders, represent maturing interest on defaulted obligations held by the Trustee, will be excludable from the Michigan income tax laws and the Single Business Tax if, and to the same extent as, such interest would have been so excludable if paid by the issuer of the defaulted obligations. While treatment under the Michigan Intangibles Tax is not premised upon the characterization of such proceeds under the Internal Revenue Code, the Michigan Department of Treasury should adopt the same approach as under the Michigan income tax laws and the Single Business Tax.

As the Tax Reform Act of 1986 eliminates the capital gain deduction for tax years beginning after December 31, 1986, the federal adjusted gross income, the computation base for the Michigan Income Tax, of a Unitholder will be increased accordingly to the extent such capital gains are realized when Insured Michigan Series 10 disposes of a Bond or when the Unitholder redeems or sells a Unit, to the extent such transaction constitutes a taxable event for Federal income tax purposes.

For a discussion of Federal tax matters relating to distributions from the Trust Fund, see "Federal Tax Status."

TAX-EXEMPT PORTFOLIOS

TE-22

INSURANCE ON THE BONDS

All Municipal Bonds in the portfolios of the Insured Trust Funds are insured as to the scheduled payment of interest and principal by the issuer or the Sponsor from Municipal Bond Investors Assurance Corporation or other insurers. See "Portfolios" and the Notes thereto. The premium for any insurance policy or policies obtained by an issuer of Municipal Bonds or the Sponsor has been paid in advance by such issuer or the Sponsor and any such policy or policies are non-cancellable and will remain in force so long as the Municipal Bonds so insured are outstanding and the insurer and/or insurers thereof remain in business. Where Municipal Bond insurance is obtained by the issuer or the Sponsor directly from Municipal Bond Investors Assurance Corporation or another insurer, no premiums for insurance are paid by an Insured Trust Fund. If the provider of an original issuance insurance policy is unable to meet its obligations under such policy or if the rating assigned to the claims-paying ability of any such insurer deteriorates, no other insurer has an obligation to insure any issue adversely affected by either of the above described events.

The aforementioned insurance guarantees the scheduled payment of principal and interest on all of the Municipal Bonds in an Insured Trust Fund. It does not guarantee the market value of the Municipal Bonds or the value of the Units of the Insured Trust Fund. Insurance obtained by the issuer of a Municipal Bond or the Sponsor is effective so long as the Bond is outstanding, whether or not held by an Insured Trust Fund. Therefore, any such insurance may be considered to represent an element of market value in regard to the Bonds thus insured, but the exact effect, if any, of this insurance on such market value cannot be predicted.

Financial Guaranty Insurance Company. Financial Guaranty is a wholly-owned subsidiary of FGIC Corporation (the "Corporation"), a Delaware holding company. The Corporation is a wholly-owned subsidiary of General Electric Capital Corporation ("GECC"). Neither the Corporation nor GECC is obligated to pay the debts or the claims against Financial Guaranty. Financial Guaranty is domiciled in the State of New York and is subject to regulation by the State of New York Insurance Department. As of September 30, 1994, the total capital

and surplus of Financial Guaranty was approximately \$871,000,000. Copies of Financial Guaranty's financial statements, prepared on the basis of statutory accounting principles, and the Corporation's financial statements, prepared on the basis of generally accepted accounting principles, may be obtained by writing to Financial Guaranty at 115 Broadway, New York, New York 10006, Attention: Communications Department (telephone number is (212) 312-3000) or to the New York State Insurance Department at 160 West Broadway, 18th Floor, New York, New York 10013, Attention: Property Companies Bureau (telephone number (212) 621-0389).

In addition, Financial Guaranty Insurance Company is currently authorized to write insurance in all 50 states and the District of Columbia.

The information relating to Financial Guaranty contained above has been furnished by such corporation. The financial information contained herein with respect to such corporation is unaudited but appears in reports or other materials filed with state insurance regulatory authorities and is subject to audit and review by such authorities. No representation is made herein as to the accuracy or adequacy of such information or as to the absence of material adverse changes in such information subsequent to the date thereof but the Sponsor is not aware that the information herein is inaccurate or incomplete.

AMBAC Indemnity Corporation. AMBAC Indemnity Corporation ("AMBAC") is a Wisconsin-domiciled stock insurance company, regulated by the Office of the Commissioner of Insurance of the State of

TAX-EXEMPT PORTFOLIOS

TE-23

Wisconsin, and licensed to do business in 50 states, the District of Columbia and the Commonwealth of Puerto Rico, with admitted assets (unaudited) of approximately \$1,988,000,000 and statutory capital (unaudited) of approximately \$1,148,000,000 as of March 31, 1994. Statutory capital consists of AMBAC policyholders' surplus and statutory contingency reserve. AMBAC is a wholly owned subsidiary of AMBAC Inc., a 100% publicly-held company. Moody's Investors Service, Inc. and Standard & Poor's Ratings Group have both assigned a AAA claims-paying ability rating to AMBAC. Copies of AMBAC's financial statements prepared in accordance with statutory accounting standards are available from AMBAC. The address of AMBAC's administrative offices and its telephone number are One State Street Plaza, 17th Floor, New York, New York 10004 and (212) 668-0340. AMBAC has entered into quota share reinsurance agreements under which a percentage of the insurance underwritten pursuant to certain municipal bond insurance programs of AMBAC has been and will be assumed by a number of foreign and domestic unaffiliated reinsurers.

Municipal Bond Investors Assurance Corporation. Municipal Bond Investors Assurance Corporation ("MBIA Corporation") is the principal operating subsidiary of MBIA, Inc., a New York Stock Exchange listed company. MBIA, Inc. is not obligated to pay the debts of or claims against MBIA Corporation. MBIA Corporation, which commenced municipal bond insurance operations on January 5, 1987, is a limited liability corporation rather than a several liability association. MBIA Corporation is domiciled in the State of New York and licensed to do business in all 50 states, the District of Columbia and the Commonwealth of Puerto Rico.

As of September 30, 1994, MBIA had admitted assets of \$3.3 billion (unaudited), total liabilities of \$2.2 billion (unaudited), and total capital and surplus of \$1.1 billion (unaudited) determined in accordance with statutory accounting practices prescribed or permitted by insurance regulatory authorities. Standard & Poor's Ratings Group has rated the claims paying ability of MBIA "AAA". Copies of MBIA Corporation's financial statements prepared in accordance with statutory accounting practices are available from MBIA Corporation. The address of MBIA Corporation is 113 King Street, Armonk, New York 10504.

Effective December 31, 1989, MBIA Inc. acquired Bond Investors Group, Inc. On January 5, 1990, the Insurer acquired all of the outstanding stock of Bond Investors Group, Inc., the parent of BIG, now known as MBIA Insurance Corp. of Illinois. Through a reinsurance agreement, BIG has ceded all of its net insured risks, as well as its unearned premium and contingency reserves, to the Insurer and the Insurer has reinsured BIG's net outstanding exposure.

Moody's Investors Service rates all bond issues insured by MBIA "Aaa" and short-term loans "MIG1," both designated to be of the highest quality.

Standard & Poor's Ratings Group rates all new issues insured by MBIA "AAA."

Financial Security Assurance. Financial Security Assurance ("Financial Security" or "FSA") is a monoline insurance company incorporated on March 16, 1984 under the laws of the State of New York. The operations of Financial Security commenced on July 25, 1985, and Financial Security received its New York State insurance license on September 23, 1985. Financial Security and its two wholly owned subsidiaries are licensed to engage in financial guaranty insurance business in 49 states, the District of Columbia and Puerto Rico.

Financial Security and its subsidiaries are engaged exclusively in the business of writing financial guaranty insurance, principally in respect of asset-backed and other collateralized securities offered in domestic and foreign markets. Financial Security and its subsidiaries also write financial guaranty

TAX-EXEMPT PORTFOLIOS

TE-24

insurance in respect of municipal and other obligations and reinsure financial guaranty insurance policies written by other leading insurance companies. In general, financial guaranty insurance consists of the issuance of a guaranty of scheduled payments of an issuer's securities, thereby enhancing the credit rating of these securities, in consideration for payment of a premium to the insurer.

Financial Security is approximately 91.6% owned by U S West, Inc. and 8.4% owned by The Tokio Marine and Fire Insurance Co., Ltd. ("Tokio Marine"). Neither U S West, Inc. nor Tokio Marine is obligated to pay the debts of or the claims against Financial Security. Financial Security is domiciled in the State of New York and is subject to regulation by the State of New York Insurance Department.

As of March 31, 1993, the total policyholders' surplus and contingency reserves and the total unearned premium reserve, respectively, of Financial Security and its consolidated subsidiaries were, in accordance with statutory accounting principles, approximately \$479,110,000 (unaudited) and \$220,078,000 (unaudited), and the total shareholders' equity and the unearned premium reserve, respectively, of Financial Security and its consolidated subsidiaries were, in accordance with generally accepted accounting principles, approximately \$628,119,000 (unaudited) and \$202,493,000 (unaudited).

Copies of Financial Security's financial statements may be obtained by writing to Financial Security at 350 Park Avenue, New York, New York, 10022, Attention Communications Department. Financial Security's telephone number is (212) 826-0100.

Pursuant to an intercompany agreement, liabilities on financial guaranty insurance written by Financial Security or either of its subsidiaries are reinsured among such companies at an agreed-upon percentage substantially proportional to their respective capital, surplus and reserves, subject to applicable statutory risk limitations. In addition, Financial Security reinsures a portion of its liabilities under certain of its financial guaranty insurance policies with unaffiliated reinsurers under various quota share treaties and on a transaction-by-transaction basis. Such reinsurance is utilized by Financial Security as a risk management device and to comply with certain statutory and rating agency requirements; it does not alter or limit Financial Security's obligations under any financial guaranty insurance policy.

Financial Security's claims-paying ability is rated "Aaa" by Moody's Investors Service, Inc., and "AAA" by Standard & Poor's Ratings Group, Nippon Investors Service Inc., Duff & Phelps Inc. and Australian Ratings Pty. Ltd. Such ratings reflect only the views of the respective rating agencies, are not recommendations to buy, sell or hold securities and are subject to revision or withdrawal at any time by such rating agencies.

Capital Guaranty Insurance Company. Capital Guaranty Insurance Company ("Capital Guaranty" or "CGIC") is a "Aaa/AAA" rated monoline stock insurance company incorporated in the State of Maryland, and is a wholly owned subsidiary of Capital Guaranty Corporation, a Maryland insurance holding company. Capital Guaranty Corporation is a publicly owned company whose shares are traded on the New York Stock Exchange.

Capital Guaranty Insurance Company is authorized to provide insurance in all 50 states, the District of Columbia and three U.S. territories. Capital Guaranty focuses on insuring municipal securities and provides policies which guaranty the timely payment of principal and interest when due for payment on new issue and secondary market issue municipal bond transactions. Capital Guaranty's claims-paying ability is rated "Triple-A" by both Moody's and Standard & Poor's.

TAX-EXEMPT PORTFOLIOS

TE-25

As of September 30, 1994, Capital Guaranty had more than \$14.6 billion in net exposure outstanding (excluding defeased issues). The total statutory policyholders' surplus and contingency reserve of Capital Guaranty was \$193,194,000 (unaudited) and the total admitted assets were \$293,036,690 (unaudited) as reported to the Insurance Department of the State of Maryland as of September 30, 1994.

Financial statements for Capital Guaranty Insurance Company, that have been prepared in accordance with statutory insurance accounting standards, are available upon request. The address of Capital Guaranty's headquarters is Steuart Tower, 22nd Floor, One Market Plaza, San Francisco, CA 94105-1413 and the telephone number is (415) 995-8000.

Chapman and Cutler, counsel for the Sponsor, has given an opinion to the effect that the payment of insurance proceeds representing maturing interest on defaulting municipal obligations paid by Financial Guaranty or another insurer would be excludable from Federal gross income if, and to the same extent as, such interest would have been so excludable if paid by the issuer of the defaulted obligations. See "Federal Tax Status."

FEDERAL TAX STATUS

All Municipal Bonds deposited in the Trust Funds will be accompanied by copies of opinions of bond counsel to the issuers thereof, given at the time of original delivery of the Municipal Bonds, to the effect that the interest thereon is excludable from gross income for Federal income tax purposes. In connection with the offering of Units of the Trust Funds, neither the Sponsor, the Trustee, the auditors nor their respective counsel have made any review of the proceedings relating to the issuance of the Municipal Bonds or the basis for such opinions. Gain realized on the sale or redemption of the Municipal Bonds by the Trustee or of a Unit by a Unitholder is, however, includable in gross income for Federal income tax purposes. Such gain does not include any amounts received in respect of accrued interest or accrued original issue discount, if any. It should be noted that under legislation described below that subjects accretion of market discount on tax-exempt bonds to taxation as ordinary income, gain realized on the sale or redemption of Municipal Bonds by the Trustee or of Units by a Unitholder that would have been treated as capital gain under prior law is treated as ordinary income to the extent it is attributable to accretion of market discount. Market discount can arise based on the price a Trust Fund pays for Municipal Bonds or the price a Unitholder pays for his or her Units. In addition, bond counsel to the issuing authorities rendered opinions as to the exemption of interest on such Bonds, when held by residents of the state in which the issuers of such bonds are located, from state income taxes and, where applicable, local income taxes.

In the opinion of Chapman and Cutler, counsel for the Sponsor, under existing law:

Each Trust Fund is not an association taxable as a corporation for Federal income tax purposes and interest and accrued original issue discount on Bonds which is excludable from gross income under the Internal Revenue Code of 1986 (the "Code") will retain its status when distributed to Unitholders, except to the extent such interest is subject to the alternative minimum tax, an additional tax on branches of foreign corporations and the environmental tax (the "Superfund Tax"), as noted below.

Exemption of interest and accrued original issue discount on any Municipal Bonds for Federal income tax purposes does not necessarily result in tax-exemption under the laws of the several states as such laws vary with respect to the taxation of such securities and in many states all or part of such interest and accrued issue discount may be subject to tax.

Each Unitholder is considered to be the owner of a pro rata portion of each asset of the respective Trust Fund in the proportion that the number of Units of such Trust Fund held by him bears to the total number of Units outstanding of such Trust Fund under subpart E, subchapter J of chapter 1 of the Code and will have a taxable event when such Trust Fund disposes of a Bond, or when the Unitholder redeems or sells his Units. Unitholders must reduce the tax basis of their Units for their share of accrued interest received by a Trust Fund, if any, on Bonds delivered after the date the Unitholders pay for their Units to the extent that such interest accrued on such Bonds during the period from the Unitholder's settlement date to the date such Bonds are delivered to a Trust Fund and, consequently, such Unitholders may have an increase in taxable gain or reduction in capital loss upon the disposition of such Units. Gain or loss upon the sale or redemption of Units is measured by comparing the proceeds of such sale or redemption with the adjusted basis of the Units. If the Trustee disposes of Bonds (whether by sale, payment on maturity, redemption or otherwise), gain or loss is recognized to the Unitholder. The amount of any such gain or loss is measured by comparing the Unitholder's pro rata share of the total proceeds from such disposition with the Unitholder's basis for his or her fractional interest in the asset disposed of. In the case of a Unitholder who purchases Units, such basis (before adjustment for earned original issue discount and amortized bond premium, if any) is determined by apportioning the cost of the Units among each of the Trust Fund's assets ratably according to their value as of the date of acquisition of the Units. The basis of each Unit and of each Municipal Bond which was issued with original issue discount must be increased by the amount of the accrued original issue discount and the basis of each Unit and of the Unitholder's interest in each Municipal Bond which was acquired by such Unitholder at a premium must be reduced by the annual amortization of Municipal Bond premium. The tax cost reduction requirements of the Code relating to amortization of bond premium may, under some circumstances, result in the Unitholder realizing a taxable gain when his Units are sold or redeemed for an amount equal to or less than his original cost.

Any insurance proceeds paid under individual policies obtained by issuers of Bonds which represent maturing interest on defaulted obligations held by the Trustee will be excludable from Federal gross income if, and to the same extent as, such interest would have been so excludable if paid in the normal course by the issuer of the defaulted obligations provided that, at the time such policies are purchased, the amounts paid for such policies are reasonable, customary and consistent with the reasonable expectation that the issuer of the obligations, rather than the insurer, will pay debt service on the obligations.

Sections 1288 and 1272 of the Code provide a complex set of rules governing the accrual of original issue discount. These rules provide that original issue discount accrues either on the basis of a constant compound interest rate or ratably over the term of the Municipal Bond, depending on the date the Municipal Bond was issued. In addition, special rules apply if the purchase price of a Municipal Bond exceeds the original issue price plus the amount of original issue discount which would have previously accrued based upon its issue price (its "adjusted issue price"). The application of these rules will also vary depending on the value of the Municipal Bond on the date a Unitholder acquires his Units, and the price the Unitholder pays for his Units. Investors with questions regarding these Code sections should consult with their tax advisers.

The Revenue Reconciliation Act of 1993 (the "Tax Act") subjects tax-exempt bonds to the market discount rules of the Code effective for bonds purchased after April 30, 1993. In general, market discount is the amount (if any) by which the stated redemption price at maturity exceeds an investor's purchase price (except to the extent that such difference, if any, is attributable to original issue discount not yet

accrued) subject to a statutory de minimis rule. Market discount can arise based on the price a Trust Fund pays for Municipal Bonds or the price a Unitholder pays for his or her Units. Under the Tax Act, accretion of market

discount is taxable as ordinary income; under prior law the accretion had been treated as capital gain. Market discount that accretes while a Trust Fund holds a Municipal Bond would be recognized as ordinary income by the Unitholders when principal payments are received on the Municipal Bond, upon sale or at redemption (including early redemption), or upon the sale or redemption of his or her Units, unless a Unitholder elects to include market discount in taxable income as it accrues. The market discount rules are complex and Unitholders should consult their tax advisers regarding these rules and their application.

In the case of certain corporations, the alternative minimum tax and the Superfund Tax depend upon the corporation's alternative minimum taxable income, which is the corporation's taxable income with certain adjustments. One of the adjustment items used in computing the alternative minimum taxable income and the Superfund Tax of a corporation (other than an S Corporation, Regulated Investment Company, Real Estate Investment Trust, or REMIC) is an amount equal to 75% of the excess of such corporation's "adjusted current earnings" over an amount equal to its alternative minimum taxable income (before such adjustment item and the alternative tax net operating loss deduction). "Adjusted current earnings" includes all tax-exempt interest, including interest on all of the Bonds in a Trust Fund and tax-exempt original issue discount. Unitholders are urged to consult their tax advisers with respect to the particular tax consequences to them including the corporate alternative minimum tax, the Superfund Tax and the branch profits tax imposed by Section 884 of the Code.

Counsel for the Sponsor has also advised that under Section 265 of the Code, interest on indebtedness incurred or continued to purchase or carry Units of a Trust Fund is not deductible for Federal income tax purposes. The Internal Revenue Service has taken the position that such indebtedness need not be directly traceable to the purchase or carrying of Units (however, these rules generally do not apply to interest paid on indebtedness incurred to purchase or improve a personal residence or to purchase goods or services for personal consumption). Also, under Section 265 of the Code, certain financial institutions that acquire Units would generally not be able to deduct any of the interest expense attributable to ownership of such Units. Investors with questions regarding these issues should consult with their tax advisers.

In the case of certain Municipal Bonds in the Trust Funds, the opinions of bond counsel indicate that interest on such Municipal Bonds received by a "substantial user" of the facilities being financed with the proceeds of these Municipal Bonds or persons related thereto, for periods while such Municipal Bonds are held by such a user or related person, will not be excludable from Federal gross income, although interest on such Municipal Bonds received by others would be excludable from Federal gross income. "Substantial user" and "related person" are defined under U.S. Treasury Regulations. Any person who believes that he or she may be a "substantial user" or a "related person" as so defined should contact his or her tax adviser.

In the case of corporations, the alternative tax rate applicable to long-term capital gains is 35% effective for long-term capital gains realized in taxable years beginning on or after January 1, 1993. For taxpayers other than corporations, net capital gains are subject to a maximum marginal stated tax rate of 28%. However, it should be noted that legislative proposals are introduced from time to time that affect tax rates and could affect relative differences at which ordinary income and capital gains are taxed. Under the Code, taxpayers must disclose to the Internal Revenue Service the amount of tax-exempt interest earned during the year.

TAX-EXEMPT PORTFOLIOS

TE-28

Under existing law, the Trust Funds are not associations taxable as corporations and the income of the Trust Funds will be treated as the income of the Unitholders under the income tax laws of the State of Missouri.

All statements of law in the Prospectus concerning exclusion from gross income for Federal, state or other tax purposes are the opinions of counsel and are to be so construed.

At the respective times of issuance of the Bonds, opinions relating to the validity thereof and to the exclusion of interest thereon from Federal gross income are rendered by bond counsel to the respective issuing authorities.

Neither the Sponsor nor Chapman and Cutler has made any special review for the Trust Funds of the proceedings relating to the issuance of the Bonds or of the basis for such opinions.

Section 86 of the Code, in general, provides that fifty percent of Social Security benefits are includible in gross income to the extent that the sum of "modified adjusted gross income" plus fifty percent of the Social Security benefits received exceeds a "base amount". The base amount is \$25,000 for unmarried taxpayers, \$32,000 for married taxpayers filing a joint return and zero for married taxpayers who do not live apart at all times during the taxable year and who file separate returns. Modified adjusted gross income is adjusted gross income determined without regard to certain otherwise allowable deductions and exclusions from gross income and by including tax-exempt interest. To the extent that Social Security benefits are includible in gross income, they will be treated as any other item of gross income.

In addition, under the Tax Act, for taxable years beginning after December 31, 1993, up to 85 percent of Social Security benefits are includible in gross income to the extent that the sum of "modified adjusted gross income" plus fifty percent of Social Security benefits received exceeds an "adjusted base amount." The adjusted base amount is \$34,000 for unmarried taxpayers, \$44,000 for married taxpayers filing a joint return and zero for married taxpayers who do not live apart at all times during the taxable year and who file separate returns.

Although tax-exempt interest is included in modified adjusted gross income solely for the purpose of determining what portion, if any, of Social Security benefits will be included in gross income, no tax-exempt interest, including that received from the Trust Fund, will be subject to tax. A taxpayer whose adjusted gross income already exceeds the base amount or the adjusted base amount must include 50% or 85%, respectively, of his or her Social Security benefits in gross income whether or not he or she receives any tax-exempt interest. A taxpayer whose modified adjusted gross income (after inclusion of tax-exempt interest) does not exceed the base amount need not include any Social Security benefits in gross income.

For a discussion of the state tax status of income earned on Units of a state trust, see the discussion of tax status for the applicable trust. Except as noted therein, the exemption of interest on state and local obligations for Federal income tax purposes discussed above does not necessarily result in exemption under the income or other tax laws of any state or city. The laws of the several states vary with respect to the taxation of such obligations.

*Kemper Corporation owns or has a controlling interest in Kemper Unit Investment Trusts (the Trusts' Sponsor and Evaluator) and Kemper Securities, Inc. Kemper Unit Investment Trusts is a service of Kemper Securities, Inc. For additional information about the Underwriters, see "Underwriting."

The Underwriters acquired the Units of the Trust Funds at a price per Unit equal to the Public Offering Prices set forth under "Essential Information" less the Underwriters' takedown. The amount of the Underwriters' takedown for Trusts with a weighted average maturity less than 7.5 years for each Unit is \$.22 for those firms committing for 10,000 to 24,999 Units, \$.22 plus 50% of any net portfolio profit for those firms committing for 25,000 to 99,999 Units and \$.23 plus 50% of any net portfolio profit for those firms committing for 100,000 or more Units. The amount of the Underwriters' takedown for Trusts with a weighted average maturity between 7.5 and 9.99 years for each Unit is \$.28 for those firms committing for 10,000 to 24,999 Units, \$.28 plus 50% of any net portfolio profits for those firms committing for 25,000 to 49,999 Units, \$.29 plus 50% of any net portfolio profit for those firms committing for 50,000 to 99,999 Units and \$.30 plus 50% of any net portfolio profit for those firms committing for 100,000 or more Units. The amount of the Underwriters' takedown for Trusts with a weighted average maturity 10 to 14.99 years for each Unit is \$.30 for those firms committing for 10,000 to 24,999 Units, \$.30 plus 50% of any net portfolio profits for those firms committing for 25,000 to 49,999 Units, \$.31 plus 50% of any net portfolio profit for those firms committing for 50,000 to 99,999 Units and \$.32 plus 50% of any net portfolio profit for those firms committing for 100,000 or more Units. The amount of the Underwriters' takedown for Trusts with a weighted average maturity greater than 14.99 years for each Unit is \$.36 for 10,000 to 24,999 Units, \$.36 plus 50% of any net portfolio profit for those firms committing for 25,000 to 49,999 Units, \$.37 plus 50% of any net portfolio profit for those firms committing for 50,000 to 99,999 Units and \$.38 plus 50% of any net portfolio profit for those firms committing for 100,000 or more Units.

TAX-EXEMPT PORTFOLIOS

TE-30

In connection with any quantity discounts (see "Public Offering of Units--Public Offering Price"), the Sponsor and the applicable Underwriter will each receive reduced concessions as a result of the reduced sales charges to the investor. In addition to such discounts, the Sponsor may, from time to time, pay or allow an additional discount, in the form of cash or other compensation, to dealers who underwrite additional Units of a Trust or who sell, during a specified time period, a minimum dollar amount of Units of a Trust and other unit investment trusts underwritten by the Sponsor. The Underwriting Agreement provides that the Sponsor will select and purchase the Municipal Bonds for deposit in the Trust Funds on its own behalf and on behalf of the other Underwriters.

The Underwriting Agreement provides that a public offering of the Units of the Trust Funds will be made by the Underwriters at the Public Offering Price described in the Prospectus. Units may also be sold to or through dealers, who are members of the National Association of Securities Dealers, Inc., and others at prices representing discounts from the Public Offering Price. However, resales of Units of the Trust Funds to the public will be made at the Public Offering Price thereof.

Underwriters and broker-dealers of the Trusts, banks and/or others are eligible to participate in a program in which such firms receive from the Sponsor a nominal award for each of their representatives who have sold a minimum number of Units of unit investment trusts created by the Sponsor during a specified time period. In addition, at various times the Sponsor may implement other programs under which the sales forces of Underwriters, brokers, dealers, banks and/or others may be eligible to win other nominal awards for certain sales efforts, or under which the Sponsor will reallocate to any such Underwriters, brokers, dealers, banks and/or others that sponsor sales contests or recognition programs conforming to criteria established by the Sponsor, or participate in sales programs sponsored by the Sponsor, an

amount not exceeding the total applicable sales charges on the sales generated by such persons at the public offering price during such programs. Also, the Sponsor in its discretion may from time to time pursuant to objective criteria established by the Sponsor pay fees to qualifying underwriters, brokers, dealers, banks or others for certain services or activities which are primarily intended to result in sales of Units of the Trusts. Such payments are made by the Sponsor out of its own assets, and not out of the assets of the Trusts. These programs will not change the price Unitholders pay for their Units or the amount that the Trusts will receive from the Units sold. Approximately every eighteen months the Sponsor holds a business seminar which is open to Underwriters that sell units of trusts it sponsors. The Sponsor pays substantially all costs associated with the seminar, excluding Underwriter travel costs. Each Underwriter is invited to send a certain number of representatives based on the gross number of units such firm underwrites during a designated time period.

TAX-EXEMPT PORTFOLIOS

ESTIMATED CASHFLOWS TO UNITHOLDERS

The tables below set forth the estimated monthly distributions of interest and principal to Unitholders on a per 100 Units basis. The tables assume no changes in expenses, no changes in the current interest rates, no exchanges, redemptions, sales or prepayments of the underlying Securities prior to maturity or expected retirement date and the receipt of principal upon maturity or expected retirement date. To the extent the foregoing assumptions change actual distributions will vary.

GENERAL INFORMATION

RATING OF UNITS

Because the Securities in the Insured Trust Funds in a Tax-Exempt Portfolio or Insured Corporate Series are insured as to the scheduled payment of principal and interest and on the basis of the financial condition and the method of operation of the insurance companies referred to in "Insurance on the Bonds" for each such Trust, Moody's Investors Service, Inc. has assigned to each of the Insured Trust Fund's Units its "Aaa" investment rating. These are the highest ratings assigned to securities by such rating agency. These ratings should not be construed as an approval of the offering of the Units by Moody's Investors Service, Inc. or as a guarantee of the market value of an Insured Trust Fund or the Units thereof. There is no guarantee that the "Aaa" investment rating will be maintained.

Securities in an Insured Trust Fund for which insurance has been obtained by the Issuer or the Sponsor (all of which were rated "AAA" by Standard & Poor's Ratings Group and/or "Aaa" by Moody's Investors Service, Inc.) may or may not have a higher yield than uninsured Securities rated "AAA" by Standard & Poor's Ratings Group or "Aaa" by Moody's Investors Service, Inc. In selecting Securities for the portfolios of an Insured Trust Fund, the Sponsor has applied the criteria hereinbefore described.

TRUST INFORMATION

Because certain of the Securities in certain of the Trusts may from time to time under certain circumstances be sold or redeemed or will mature in accordance with their terms and because the proceeds from such events will be distributed to Unitholders and will not be reinvested, no assurance can be given that a Trust will retain for any length of time its present size and composition. Neither the Sponsor nor the Trustee shall be liable in any way for any default, failure or defect in any Security. In the event of a failure to deliver any Security that has been purchased for a Trust under a contract, including those securities purchased on a "when, as and if issued" basis ("Failed Securities"), the Sponsor is authorized under the Trust Agreement to direct the Trustee to acquire other securities ("Replacement Securities") to make up the original corpus of such Trust.

Securities in certain of the Trust Funds may have been purchased on a "when, as and if issued" or delayed delivery basis with delivery expected to take place after the First Settlement Date. See "Notes to Portfolios" for each Trust. Accordingly, the delivery of such Securities may be delayed or may not occur. Interest on these Securities begins accruing to the benefit of Unitholders on their respective dates of delivery. To the extent any Municipal Bonds in a Tax-Exempt Portfolio are actually delivered to such Trust after their respective expected dates of delivery, Unitholders who purchase Units in such Trust prior to the date such "when, as and if issued" or "delayed delivery" Municipal Bonds are actually delivered to the Trustee would, to the extent such income is not offset by a reduction in the Trustee's fee (or, to the extent necessary, other expenses), be required to reduce their tax basis in their Units of such Trust since the interest accruing on such Municipal Bonds during the interval between their purchase of Units and the actual delivery of such Municipal Bonds would, for tax purposes, be considered a non-taxable return of principal rather than as tax-exempt interest. The result of such adjustment, if necessary, would be, during the first year only, that the Estimated Long-Term Returns may be, and the Estimated Current Returns would be, slightly lower than those shown herein, assuming such Trust portfolios and estimated annual expenses do not vary. See footnote (4) to "Essential Information." Unitholders of all Trusts will be "at risk" with respect to any "when, as and if issued" or "delayed delivery" Securities included in their respective Trust (i.e., may derive either gain or loss from fluctuations in the evaluation of such Securities) from the date they commit for Units.

GI-1

GENERAL INFORMATION

The Replacement Securities must be purchased within 20 days after delivery of the notice that a contract to deliver a Security will not be honored and the purchase price may not exceed the amount of funds reserved for the purchase of the Failed Securities. The Replacement Securities (i) must be payable in United States currency, (ii) must be purchased at a price that results in a yield to maturity and a current return at least equal to that of the Failed

Securities as of the Initial Date of Deposit, (iii) shall not be "when, as and if issued" or restricted securities, (iv) must satisfy any rating criteria for Securities originally included in such Trust, (v) not cause the Units of such Trust to cease to be rated Aaa by Moody's Investors Service, Inc. if the Units were so rated on the Initial Date of Deposit and (vi) in the case of Insured Trust Funds must be insured prior to acquisition by a Trust. In connection with an Insured Corporate Series only, Replacement Securities also must (i) be intermediate or long-term, as applicable, corporate bonds, debentures, notes or other straight debt obligations (whether secured or unsecured and whether senior or subordinated) without equity or other conversion features, with fixed maturity dates substantially the same as those of the Failed Securities having no warrants or subscription privileges attached, (ii) be issued after July 18, 1984 if interest thereon is United States source income and (iii) have a fixed maturity of at least 10 years. In connection with a Corporate Income Series only, Replacement Securities also must (i) be corporate bonds, debentures, notes or other straight debt obligations (whether secured or unsecured and whether senior or subordinated) without equity or other conversion features, with fixed maturity dates substantially the same as those of the Failed Securities having no warrants or subscription privileges attached, (ii) be issued after July 18, 1984 and (iii) have a fixed maturity of at least 6 years. In connection with a Tax-Exempt Portfolio only, Replacement Securities must also (i) be tax-exempt bonds issued by the appropriate state or counties, municipalities, authorities or political subdivisions thereof and (ii) have a fixed maturity date of at least 3 years if the bonds are to be deposited in a trust other than a long-term trust or at least 10 years if the bonds are to be deposited in a long-term trust. Whenever a Replacement Security is acquired for a Trust, the Trustee shall, within five days thereafter, notify all Unitholders of the Trust of the acquisition of the Replacement Security and shall, on the next monthly distribution date which is more than 30 days thereafter, make a pro rata distribution of the amount, if any, by which the cost to the Trust of the Failed Security exceeded the cost of the Replacement Security. Once all of the Securities in a Trust are acquired, the Trustee will have no power to vary the investments of the Trust, i.e., the Trustee will have no managerial power to take advantage of market variations to improve a Unitholder's investment.

If the right of limited substitution described in the preceding paragraphs is not utilized to acquire Replacement Securities in the event of a failed contract, the Sponsor will refund the sales charge attributable to such Failed Securities to all Unitholders of the Trust Fund and the Trustee will distribute the principal and accrued interest attributable to such Failed Securities not more than 30 days after the date on which the Trustee would have been required to purchase a Replacement Security. In addition, Unitholders should be aware that, at the time of receipt of such principal, they may not be able to reinvest such proceeds in other securities at a yield equal to or in excess of the yield which such proceeds would have earned for Unitholders of such Trust Fund.

Whether or not a Replacement Security is acquired, an amount equal to the accrued interest (at the coupon rate of the Failed Securities) will be paid to Unitholders of the Trust Fund to the date the Sponsor removes the Failed Securities from the Trust Fund if the Sponsor determines not to purchase a Replacement Security or to the date of substitution if a Replacement Security is purchased. All such interest paid to Unitholders which accrued after the date of settlement for a purchase of Units will be paid by the Sponsor. In the event a Replacement Security could not be acquired by a Trust, the net annual interest income per Unit for such Trust would be reduced and the Estimated Current Return and Estimated Long-Term Return might be lowered.

GI-2

GENERAL INFORMATION

Subsequent to the Initial Date of Deposit, a Security may cease to be rated or its rating may be reduced below any minimum required as of the Initial Date of Deposit. Neither event requires the elimination of such investment from a Trust, but may be considered in the Sponsor's determination to direct the Trustee to dispose of such investment. See "General Information--Investment Supervision."

The Sponsor may not alter the portfolio of a Trust except upon the happening of certain extraordinary circumstances. See "General Information--Investment Supervision." Certain of the Securities may be subject to optional call or mandatory redemption pursuant to sinking fund provisions, in each case prior to their stated maturity. A bond subject to optional call is one which is

subject to redemption or refunding prior to maturity at the option of the issuer, often at a premium over par. A refunding is a method by which a bond issue is redeemed, at or before maturity, by the proceeds of a new bond issue. A bond subject to sinking fund redemption is one which is subject to partial call from time to time at par with proceeds from a fund accumulated for the scheduled retirement of a portion of an issue to maturity. Special or extraordinary redemption provisions may provide for redemption at par of all or a portion of an issue upon the occurrence of certain circumstances, which may be prior to the optional call dates shown under "Portfolio" for each Trust. Redemption pursuant to optional call provisions is more likely to occur, and redemption pursuant to special or extraordinary redemption provisions may occur, when the Securities have an offering side evaluation which represents a premium over par, that is, when they are able to be refinanced at a lower cost. The proceeds from any such call or redemption pursuant to sinking fund provisions, as well as proceeds from the sale of Securities and from Securities which mature in accordance with their terms from a Trust, unless utilized to pay for Units tendered for redemption, will be distributed to Unitholders of such Trust and will not be used to purchase additional Securities for such Trust. Accordingly, any such call, redemption, sale or maturity will reduce the size and diversity of a Trust and the net annual interest income of such Trust and may reduce the Estimated Current Return and the Estimated Long-Term Return. See "General Information--Interest, Estimated Long-Term Return and Estimated Current Return." The call, redemption, sale or maturity of Securities also may have tax consequences to a Unitholder. See "Federal Tax Status" for each Trust. Information with respect to the call provisions and maturity dates of the Securities is contained in "Portfolio" for each Trust.

Each Unit of a Trust represents an undivided fractional interest in the Securities deposited therein, in the ratio shown under "Essential Information." Units may be purchased and certificates, if requested, will be issued in denominations of one Unit or any multiple or fraction thereof, subject to each Trust's minimum investment requirement of one Unit. Fractions of Units will be computed to three decimal points. To the extent that Units of a Trust are redeemed, the principal amount of Securities in such Trust will be reduced and the undivided fractional interest represented by each outstanding Unit of such Trust will increase. See "General Information--Redemption."

Certain of the Securities in certain of the Trusts may have been acquired at a market discount from par value at maturity. The coupon interest rates on the discount securities at the time they were purchased and deposited in the Trusts were lower than the current market interest rates for newly issued bonds of comparable rating and type. If such interest rates for newly issued comparable securities increase, the market discount of previously issued securities will become greater, and if such interest rates for newly issued comparable securities decline, the market discount of previously issued securities will be reduced, other things being equal. Investors should also note that the value of securities purchased at a market discount will increase in value faster than securities purchased at a market premium if interest rates decrease. Conversely, if interest rates increase, the value of securities purchased at a market discount will decrease faster than securities purchased at a market premium. In addition, if interest rates rise, the prepayment risk of higher yielding, premium securities and the prepayment benefit for lower yielding,

GI-3

GENERAL INFORMATION

discount securities will be reduced. A discount security held to maturity will have a larger portion of its total return in the form of taxable income and capital gain and loss in the form of tax-exempt interest income than a comparable security newly issued at current market rates. See "Federal Tax Status." Market discount attributable to interest changes does not indicate a lack of market confidence in the issue. Neither the Sponsor nor the Trustee shall be liable in any way for any default, failure or defect in any of the Securities.

Certain of the Securities in certain of the Trust Funds may be "zero coupon" bonds, i.e., an original issue discount bond that does not provide for the payment of current interest. Zero coupon bonds are purchased at a deep discount because the buyer receives only the right to receive a final payment at the maturity of the bond and does not receive any periodic interest payments. The effect of owning deep discount bonds which do not make current interest payments (such as the zero coupon bonds) is that a fixed yield is

earned not only on the original investment but also, in effect, on all discount earned during the life of such obligation. This implicit reinvestment of earnings at the same rate eliminates the risk of being unable to reinvest the income on such obligation at a rate as high as the implicit yield on the discount obligation, but at the same time eliminates the holder's ability to reinvest at higher rates in the future. For this reason, zero coupon bonds are subject to substantially greater price fluctuations during periods of changing market interest rates than are securities of comparable quality which pay interest currently. For the Federal tax consequences of original issue discount securities such as the zero coupon bonds, see "Federal Tax Status" for each Trust.

To the best of the Sponsor's knowledge, there is no litigation pending as of the Initial Date of Deposit in respect of any Security which might reasonably be expected to have a material adverse effect on the Trust Funds. At any time after the Initial Date of Deposit, litigation may be instituted on a variety of grounds with respect to the Securities. The Sponsor is unable to predict whether any such litigation may be instituted, or if instituted, whether such litigation might have a material adverse effect on the Trust Funds. The Sponsor and the Trustee shall not be liable in any way for any default, failure or defect in any Security.

RETIREMENT PLANS

Units of the Trusts (other than a Tax-Exempt Portfolio) may be well suited for purchase by Individual Retirement Accounts, Keogh Plans, pension funds and other qualified retirement plans, certain of which are briefly described below.

Generally, capital gains and income received under each of the foregoing plans are deferred from federal taxation. All distributions from such plans are generally treated as ordinary income but may, in some cases, be eligible for special income averaging or tax-deferred rollover treatment. Investors considering participation in any such plan should review specific tax laws related thereto and should consult their attorneys or tax advisers with respect to the establishment and maintenance of any such plan. Such plans are offered by brokerage firms and other financial institutions. The Trusts will waive the \$1,000 minimum investment requirement for IRA accounts. The minimum investment is \$250 for tax-deferred plans such as IRA accounts. Fees and charges with respect to such plans may vary.

Individual Retirement Account--IRA. Any individual under age 70 1/2 may contribute the lesser of \$2,000 or 100% of compensation to an IRA annually. Such contributions are fully deductible if the individual (and spouse if filing jointly) are not covered by a retirement plan at work. The deductible amount an individual may contribute to an IRA will be reduced \$10 for each \$50 of adjusted gross income over

GI-4

GENERAL INFORMATION

\$25,000 (\$40,000 if married, filing jointly or \$0 if married, filing separately), if either an individual or their spouse (if married, filing jointly) is an active participant in an employer maintained retirement plan. Thus, if an individual has adjusted gross income over \$35,000 (\$50,000 if married, filing jointly or \$0 if married, filing separately) and if an individual or their spouse is an active participant in an employer maintained retirement plan, no IRA deduction is permitted. Under the Internal Revenue Code of 1986, as amended (the "Code"), an individual may make nondeductible contributions to the extent deductible contributions are not allowed. All distributions from an IRA (other than the return of certain excess contributions) are treated as ordinary income for federal income taxation purposes provided that under the Code an individual need not pay tax on the return of nondeductible contributions. The amount includable in income for the taxable year is the portion of the amount withdrawn for the taxable year as the individual's aggregate deductible IRA contributions bear to the aggregate balance of all IRAs of the individual.

A participant's interest in an IRA must be, or commence to be, distributed to the participant not later than April 1 of the calendar year following the year during which the participant attains age 70 1/2. Distributions made before attainment of age 59 1/2, except in the case of the participant's death or disability, or where the amount distributed is to be rolled over to another IRA, or where the distributions are taken as a series of substantially equal

periodic payments over the participant's life or life expectancy (or the joint lives or life expectancies of the participant and the designated beneficiary) are generally subject to a surtax in an amount equal to 10% of the distribution. The amount of such periodic payments may not be modified before the later of five years or attainment of age 59 1/2. Excess contributions are subject to an annual 6% excise tax.

IRA applications, disclosure statements and trust agreements are available from the Sponsor upon request.

Qualified Retirement Plans. Units of a Trust may be purchased by qualified pension or profit sharing plans maintained by corporations, partnerships or sole proprietors. The maximum annual contribution for a participant in a money purchase pension plan or to paired profit sharing and pension plans is the lesser of 25% of compensation or \$30,000. Prototype plan documents for establishing qualified retirement plans are available from the Sponsor upon request.

Excess Distributions Tax. In addition to the other taxes due by reason of a plan distribution, a tax of 15% may apply to certain aggregate distributions from IRAs, Keogh plans, and corporate retirement plans to the extent such aggregate taxable distributions exceed specified amounts (generally \$150,000, as adjusted) during a tax year. This 15% tax will not apply to distributions on account of death, qualified domestic relations orders or amounts eligible for tax-deferred rollover treatment. In general, for lump sum distributions the excess distributions over \$750,000 (as adjusted) will be subject to the 15% tax.

The Trustee, Investors Fiduciary Trust Company, has agreed to act as custodian for certain retirement plan accounts. An annual fee of \$12.00 per account, if not paid separately, will be assessed by the Trustee and paid through the liquidation of shares of the reinvestment account. An individual wishing the Trustee to act as custodian must complete a Kemper UIT/IRA application and forward it along with a check made payable to Investors Fiduciary Trust Company. Certificates for Individual Retirement Accounts cannot be issued.

DISTRIBUTION REINVESTMENT

Each Unitholder of a Trust may elect to have distributions of principal (including capital gains, if any) or interest or both automatically invested without charge in shares of any mutual fund which is registered in

GI-5

GENERAL INFORMATION

such Unitholder's state of residence and is underwritten or advised by an affiliate of the Sponsor, Kemper Financial Services, Inc. (the "Kemper Funds"), other than those Kemper Funds sold with a contingent deferred sales charge.

If individuals indicate they wish to participate in the Reinvestment Program but do not designate a reinvestment fund, the Program Agent referred to below will contact such individuals to determine which reinvestment fund or funds they wish to elect. Since the portfolio securities and investment objectives of such Kemper Funds generally will differ significantly from that of the Trusts, Unitholders should carefully consider the consequences before selecting such Kemper Funds for reinvestment. Detailed information with respect to the investment objectives and the management of the Funds is contained in their respective prospectuses, which can be obtained from the Sponsor upon request. An investor should read the prospectus of the reinvestment fund selected prior to making the election to reinvest. Unitholders who desire to have such distributions automatically reinvested should inform their broker at the time of purchase or should file with the Program Agent a written notice of election.

Unitholders who are receiving distributions in cash may elect to participate in distribution reinvestment by filing with the Program Agent an election to have such distributions reinvested without charge. Such election must be received by the Program Agent at least ten days prior to the Record Date applicable to any distribution in order to be in effect for such Record Date. Any such election shall remain in effect until a subsequent notice is received by the Program Agent. See "General Information--Unitholders--Distributions to Unitholders."

The Program Agent is Investors Fiduciary Trust Company. All inquiries concerning participation in distribution reinvestment should be directed to the Program Agent at P.O. Box 419430, Kansas City, Missouri 64173-0216, telephone (816) 474-8786.

INTEREST, ESTIMATED LONG-TERM RETURN AND ESTIMATED CURRENT RETURN

As of the opening of business on the Initial Date of Deposit, the Estimated Long-Term Return and the Estimated Current Return, if applicable, for each Trust were as set forth in the "Essential Information" for each Trust. Estimated Current Return is calculated by dividing the estimated net annual interest income per Unit by the Public Offering Price. The estimated net annual interest income per Unit will vary with changes in fees and expenses of the Trustee, the Sponsor and the Evaluator and with the principal prepayment, redemption, maturity, exchange or sale of the Securities while the Public Offering Price will vary with changes in the offering price of the underlying Securities and accrued interest; therefore, there is no assurance that the present Estimated Current Return will be realized in the future. Estimated Long-Term Return is calculated using a formula which (1) takes into consideration, and determines and factors in the relative weightings of, the market values, yields (which takes into account the amortization of premiums and the accretion of discounts) and estimated retirements or average life of all of the Securities in a Trust and (2) takes into account the expenses and sales charge associated with each Trust Unit. Since the market values and estimated retirements of the Securities and the expenses of a Trust will change, there is no assurance that the present Estimated Long-Term Return will be realized in the future. Estimated Current Return and Estimated Long-Term Return are expected to differ because the calculation of Estimated Long-Term Return reflects the estimated date and amount of principal returned while Estimated Current Return calculations include only net annual interest income and Public Offering Price.

In order to acquire certain of the Securities contracted for by a Trust, it may be necessary for the Sponsor or Trustee to pay on the dates for delivery of such Securities amounts covering accrued interest on such

GI-6

GENERAL INFORMATION

Securities which exceed the amount which will be made available in the letter of credit furnished by the Sponsor on the Initial Date of Deposit. The Trustee has agreed to pay any amounts necessary to cover any such excess and will be reimbursed therefor, without interest, when funds become available from interest payments on the Securities deposited in that Trust.

Payments received in respect of mortgages underlying Ginnie Maes in each series of a GNMA Portfolio will consist of a portion representing interest and a portion representing principal. Although the aggregate monthly payment made by the obligor on each mortgage remains constant (aside from optional prepayments of principal), in the early years most of each such payment will represent interest, while in later years, the proportion representing interest will decline and the proportion representing principal will increase. However, by reason of optional prepayments, principal payments in the earlier years on mortgages underlying Ginnie Maes may be substantially in excess of those required by the amortization schedules of such mortgages. Therefore, principal payments in later years may be substantially less since the aggregate unpaid principal balances of such underlying mortgages may have been greatly reduced. To the extent that the underlying mortgages bearing higher interest rates in a GNMA Portfolio are prepaid faster than the other underlying mortgages, the net annual interest rate per Unit and the Estimated Current Return on the Units of a GNMA Portfolio can be expected to decline. Monthly payments to the Unitholders of a GNMA Portfolio will reflect all of these factors.

MARKET FOR UNITS

After the initial offering period, while not obligated to do so, the Sponsor intends to, and certain of the Underwriters may, subject to change at any time, maintain a market for Units of the Trust Funds offered hereby and to continuously offer to purchase said Units at prices, determined by the Evaluator, based on the aggregate bid prices of the underlying Securities in such Trusts, together with accrued interest to the expected dates of settlement. To the extent that a market is maintained during the initial offering period, the prices at which Units will be repurchased will be based upon the aggregate offering side evaluation of the Securities in the Trusts.

The aggregate bid prices of the underlying Securities in each Trust are expected to be less than the related aggregate offering prices (which is the evaluation method used during the initial public offering period). Accordingly, Unitholders who wish to dispose of their Units should inquire of their bank or broker as to current market prices in order to determine whether there is in existence any price in excess of the Redemption Price and, if so, the amount thereof.

The offering price of any Units resold by the Sponsor or Underwriters will be in accord with that described in the currently effective Prospectus describing such Units. Any profit or loss resulting from the resale of such Units will belong to the Sponsor and/or the Underwriters. The Sponsor and/or the Underwriters may suspend or discontinue purchases of Units of any Trust if the supply of Units exceeds demand, or for other business reasons.

REDEMPTION

A Unitholder who does not dispose of Units in the secondary market described above may cause Units to be redeemed by the Trustee by making a written request to the Trustee, Investors Fiduciary Trust Company, P.O. Box 419430, Kansas City, Missouri, 64173-0216 and, in the case of Units evidenced by a certificate, by tendering such certificate to the Trustee, properly endorsed or accompanied by a written instrument or instruments of transfer in a form satisfactory to the Trustee. Unitholders must sign the request, and such certificate or transfer instrument, exactly as their names appear on the records of the

GI-7

GENERAL INFORMATION

Trustee and on any certificate representing the Units to be redeemed. If the amount of the redemption is \$25,000 or less and the proceeds are payable to the Unitholder(s) of record at the address of record, no signature guarantee is necessary for redemptions by individual account owners (including joint owners). Additional documentation may be requested, and a signature guarantee is always required, from corporations, executors, administrators, trustees, guardians or associations. The signatures must be guaranteed by a participant in the Securities Transfer Agents Medallion Program ("STAMP") or such other guarantee program in addition to, or in substitution for, STAMP, as may be accepted by the Trustee. A certificate should only be sent by registered or certified mail for the protection of the Unitholder. Since tender of the certificate is required for redemption when one has been issued, Units represented by a certificate cannot be redeemed until the certificate representing such Units has been received by the purchasers.

Redemption shall be made by the Trustee on the seventh calendar day following the day on which a tender for redemption is received, or if the seventh calendar day is not a business day, on the first business day prior thereto (the "Redemption Date") by payment of cash equivalent to the Redemption Price for such Trust, determined as set forth below under "Computation of Redemption Price," as of the evaluation time stated under "Essential Information," next following such tender, multiplied by the number of Units being redeemed. Any Units redeemed shall be cancelled and any undivided fractional interest in the Trust extinguished. The price received upon redemption might be more or less than the amount paid by the Unitholder depending on the value of the Securities in the Trust at the time of redemption.

Under regulations issued by the Internal Revenue Service, the Trustee is required to withhold a certain percentage of the principal amount of a Unit redemption if the Trustee has not been furnished the redeeming Unitholder's tax identification number in the manner required by such regulations. Any amount so withheld is transmitted to the Internal Revenue Service and may be recovered by the Unitholder only when filing a tax return. Under normal circumstances the Trustee obtains the Unitholder's tax identification number from the selling broker. However, any time a Unitholder elects to tender Units for redemption, such Unitholder should make sure that the Trustee has been provided a certified tax identification number in order to avoid this possible "back-up withholding." In the event the Trustee has not been previously provided such number, one must be provided at the time redemption is requested.

Any amounts paid on redemption representing interest shall be withdrawn from the Interest Account for such Trust to the extent that funds are available for such purpose. All other amounts paid on redemption shall be withdrawn from the

Principal Account for such Trust. The Trustee is empowered to sell Securities for a Trust in order to make funds available for the redemption of Units of such Trust. Such sale may be required when Securities would not otherwise be sold and might result in lower prices than might otherwise be realized. To the extent Securities are sold, the size and diversity of a Trust will be reduced.

In the case of a U.S. Treasury Portfolio or a GNMA Portfolio, Securities will be sold by the Trustee so as to maintain, as closely as practicable, the original percentage relationship between the principal amounts of the Securities in such Trusts. The Securities to be sold for purposes of redeeming Units will be selected from a list supplied by the Sponsor. The Securities will be chosen for this list by the Sponsor on the basis of such market and credit factors as it may determine are in the best interests of such Trusts. Provision is made under the related Trust Agreements for the Sponsor to specify minimum face amounts in which blocks of Securities are to be sold in order to obtain the best price available. While such minimum amounts may vary from time to time in accordance with market conditions, it is anticipated that the

GI-8

GENERAL INFORMATION

minimum face amounts which would be specified would range from \$25,000 to \$100,000. Sales may be required at a time when the Securities would not otherwise be sold and might result in lower prices than might otherwise be realized. Moreover, due to the minimum principal amount in which U.S. Treasury Obligations and Ginnie Maes may be required to be sold, the proceeds of such sales may exceed the amount necessary for payment of Units redeemed. To the extent not used to meet other redemption requests in such Trusts, such excess proceeds will be distributed pro rata to all remaining Unitholders of record of such Trusts, unless reinvested in substitute Securities. See "General Information--Investment Supervision."

The Trustee is irrevocably authorized in its discretion, if an Underwriter does not elect to purchase any Unit tendered for redemption, in lieu of redeeming such Units, to sell such Units in the over-the-counter market for the account of tendering Unitholders at prices which will return to the Unitholders amounts in cash, net after brokerage commissions, transfer taxes and other charges, equal to or in excess of the Redemption Price for such Units. In the event of any such sale, the Trustee shall pay the net proceeds thereof to the Unitholders on the day they would otherwise be entitled to receive payment of the Redemption Price.

The right of redemption may be suspended and payment postponed (1) for any period during which the New York Stock Exchange is closed, other than customary weekend and holiday closings, or during which (as determined by the Securities and Exchange Commission) trading on the New York Stock Exchange is restricted; (2) for any period during which an emergency exists as a result of which disposal by the Trustee of Securities is not reasonably practicable or it is not reasonably practicable to fairly determine the value of the underlying Securities in accordance with the Trust Agreements; or (3) for such other period as the Securities and Exchange Commission may by order permit. The Trustee is not liable to any person in any way for any loss or damage which may result from any such suspension or postponement.

Computation of Redemption Price. The Redemption Price for Units of each Trust is computed by the Evaluator as of the evaluation time stated under "Essential Information" next occurring after the tendering of a Unit for redemption and on any other business day desired by it, by:

A. adding: (1) the cash on hand in the Trust other than cash deposited in the Trust to purchase Securities not applied to the purchase of such Securities; (2) the aggregate value of each issue of the Securities (including "when issued" contracts, if any) held in the Trust as determined by the Evaluator on the basis of bid prices therefor; and (3) interest accrued and unpaid on the Securities in the Trust as of the date of computation;

B. deducting therefrom (1) amounts representing any applicable taxes or governmental charges payable out of the Trust and for which no deductions have been previously made for the purpose of additions to the Reserve Account described under "General Information--Expenses of the Trusts"; (2) an amount representing estimated accrued expenses of the Trust, including but not limited to fees and expenses of the Trustee (including legal and auditing fees and any insurance costs), the Evaluator, the Sponsor and bond counsel, if any;

(3) cash held for distribution to Unitholders of record as of the business day prior to the evaluation being made; and (4) other liabilities incurred by the Trust; and

C. finally dividing the results of such computation by the number of Units of the Trust outstanding as of the date thereof.

GI-9

GENERAL INFORMATION

UNITHOLDERS

Ownership of Units. Ownership of Units of any Trust will not be evidenced by certificates unless a Unitholder, the Unitholder's registered broker/dealer or the clearing agent for such broker/dealer makes a written request to the Trustee. Certificates, if issued, will be so noted on the confirmation statement sent to the Underwriter and broker. Non-receipt of such certificate(s) must be reported to the Trustee within one year; otherwise, a 2% surety bond fee will be required for replacement.

Units are transferable by making a written request to the Trustee and, in the case of Units evidenced by a certificate, by presenting and surrendering such certificate to the Trustee properly endorsed or accompanied by a written instrument or instruments of transfer which should be sent registered or certified mail for the protection of the Unitholder. Unitholders must sign such written request, and such certificate or transfer instrument, exactly as their names appear on the records of the Trustee and on any certificate representing the Units to be transferred. Such signatures must be guaranteed by a participant in the Securities Transfer Agents Medallion Program ("STAMP") or such other signature guarantee program in addition to, or in substitution for, STAMP, as may be accepted by the Trustee.

Units may be purchased and certificates, if requested will be issued in denominations of one Unit subject to each Trust's minimum investment requirement of 100 Units or any whole Unit multiple thereof subject to any minimum requirement established by the Sponsor from time to time. Any certificate issued will be numbered serially for identification, issued in fully registered form and will be transferable only on the books of the Trustee. The Trustee may require a Unitholder to pay a reasonable fee, to be determined in the sole discretion of the Trustee, for each certificate re-issued or transferred and to pay any governmental charge that may be imposed in connection with each such transfer or interchange. The Trustee at the present time does not intend to charge for the normal transfer or interchange of certificates. Destroyed, stolen, mutilated or lost certificates will be replaced upon delivery to the Trustee of satisfactory indemnity (generally amounting to 3% of the market value of the Units), affidavit of loss, evidence of ownership and payment of expenses incurred.

Distributions to Unitholders. Interest received by each Trust, including any portion of the proceeds from a disposition of Securities which represents accrued interest, is credited by the Trustee to the Interest Account for such Trust. All other receipts are credited by the Trustee to a separate Principal Account for the Trust. The Trustee normally has no cash for distribution to Unitholders until it receives interest payments on the Securities in the Trust. Since interest usually is paid semi-annually (monthly in the case of a GNMA Portfolio), during the initial months of the Trusts, the Interest Account of each Trust, consisting of accrued but uncollected interest and collected interest (cash), will be predominantly the uncollected accrued interest that is not available for distribution. On the dates set forth under "Essential Information" for each Trust, the Trustee will commence distributions, in part from funds advanced by the Trustee.

Thereafter, assuming the Trust retains its original size and composition, after deduction of the fees and expenses of the Trustee, the Sponsor and Evaluator and reimbursements (without interest) to the Trustee for any amounts advanced to a Trust, the Trustee will normally distribute on each Interest Distribution Date (the fifteenth of the month) or shortly thereafter to Unitholders of record of such Trust on the preceding Record Date (which is the first day of each month). Unitholders of the Trusts will receive an amount substantially equal to one-twelfth of such holders' pro rata share of the estimated net annual interest income to the Interest Account of such Trust. However, interest earned at any point in time will be greater than the amount actually received by the Trustee and distributed to the Unitholders. Therefore,

GENERAL INFORMATION

there will always remain an item of accrued interest that is added to the daily value of the Units. If Unitholders of a Trust sell or redeem all or a portion of their Units, they will be paid their proportionate share of the accrued interest of such Trust to, but not including, the fifth business day after the date of a sale or to the date of tender in the case of a redemption.

In order to equalize distributions and keep the undistributed interest income of the Trusts at a low level, all Unitholders of record in such Trust on the first Record Date will receive an interest distribution on the first Interest Distribution Date. Because the period of time between the first Interest Distribution Date and the regular distribution dates may not be a full period, the first regular distributions may be partial distributions.

Because each Trust receives interest and makes monthly distributions based upon such Trust's expected total collections of interest and any anticipated expenses, certain tax reporting consequences may arise. Each Trust is required to report Unitholder information to the Internal Revenue Service ("IRS"), based upon the actual collection of interest by such Trust on the securities in such Trust, without regard to such Trust's expenses or to such Trust's payments to Unitholders during the year. If distributions to Unitholders exceed interest collected, the difference will be reported as a return of principal which will reduce a Unitholder's cost basis in its Units (and its pro rata interest in the securities in the Trust). A Unitholder must include in taxable income the amount of income reported by a Trust to the IRS regardless of the amount distributed to such Unitholder. If a Unitholder's share of taxable income exceeds income distributions made by a Trust to such Unitholder, such excess is in all likelihood attributable to the payment of miscellaneous expenses of such Trust which will not be deductible by an individual Unitholder as an itemized deduction except to the extent that the total amount of certain itemized deductions, such as investment expenses (which would include the Unitholder's share of Trust expenses), tax return preparation fees and employee business expenses, exceeds 2% of such Unitholder's adjusted gross income. Alternatively, in certain cases, such excess may represent an increase in the Unitholder's tax basis in the Units owned. Investors with questions regarding these issues should consult with their tax advisers.

Unitholders of a U.S. Treasury Portfolio which contains Stripped Treasury Securities should note that Stripped Treasury Securities are sold at a deep discount because the buyer of those securities obtains only the right to receive a future fixed payment on the security and not any rights to periodic interest payments thereon. Purchasers of these Securities acquire, in effect, discount obligations that are economically identical to the "zero-coupon bonds" that have been issued by corporations. Zero coupon bonds are debt obligations which do not make any periodic payments of interest prior to maturity and accordingly are issued at a deep discount. Under generally accepted accounting principles, a holder of a security purchased at a discount normally must report as an item of income for financial accounting purposes the portion of the discount attributable to the applicable reporting period. The calculation of this attributable income would be made on the "interest" method which generally will result in a lesser amount of includible income in earlier periods and a correspondingly larger amount in later periods. For Federal income tax purposes, the inclusion will be on a basis that reflects the effective compounding of accrued but unpaid interest effectively represented by the discount. Although this treatment is similar to the "interest" method described above, the "interest" method may differ to the extent that generally accepted accounting principles permit or require the inclusion of interest on the basis of a compounding period other than the semi-annual period. See "Federal Tax Status" for the U.S. Treasury Portfolios, if any.

Persons who purchase Units between a Record Date and a Distribution Date will receive their first distribution on the second Distribution Date following their purchase of Units. Since interest on Bonds in

GI-11

GENERAL INFORMATION

the Trusts is payable at varying intervals, usually in semi-annual installments, and distributions of income are made to Unitholders at different

intervals from receipt of interest, the interest accruing to a Trust may not be equal to the amount of money received and available for distribution from the Interest Account. Therefore, on each Distribution Date the amount of interest actually deposited in the Interest Account of a Trust and available for distribution may be slightly more or less than the interest distribution made. In order to eliminate fluctuations in interest distributions resulting from such variances, the Trustee is authorized by the Trust Agreements to advance such amounts as may be necessary to provide interest distributions of approximately equal amounts. The Trustee will be reimbursed, without interest, for any such advances from funds available in the Interest Account for such Trust.

The Trustee will distribute on each Distribution Date or shortly thereafter, to each Unitholder of record of a Trust on the preceding Record Date, an amount substantially equal to such holder's pro rata share of the cash balance, if any, in the Principal Account of such Trust computed as of the close of business on the preceding Record Date. However, no distribution will be required if the balance in the Principal Account is less than \$.01 per Unit. Notwithstanding the foregoing, the Trustee will make a distribution to Unitholders of all principal relating to maturing U.S. Treasury Obligations in any U.S. Treasury Portfolio or GNMA Portfolio within twelve business days of the date of such maturity.

In connection with GNMA Portfolios only, the terms of the Ginnie Maes provide for payment to the holders thereof (including a GNMA Portfolio) on the fifteenth day of each month of amounts collected by or due to the issuers thereof with respect to the underlying mortgages during the preceding month. The Trustee will collect the interest due a GNMA Portfolio on the Securities therein as it becomes payable and credit such interest to a separate Interest Account for such GNMA Portfolio created by the Indenture. Distributions will be made to each Unitholder of record of a GNMA Portfolio on the appropriate Distribution Date (see "Essential Information") and will consist of an amount substantially equal to such Unitholder's pro rata share of the cash balances, if any, in the Interest Account, the Principal Account and any Capital Gains Account of such GNMA Portfolio, computed as of the close of business on the preceding Record Date.

Statements to Unitholders. With each distribution, the Trustee will furnish or cause to be furnished to each Unitholder a statement of the amount of interest and the amount of other receipts, if any, which are being distributed, expressed in each case as a dollar amount per Unit.

The accounts of each Trust are required to be audited annually, at the Trust's expense, by independent auditors designated by the Sponsor, unless the Sponsor determines that such an audit would not be in the best interest of the Unitholders of such Trust. The accountants' report will be furnished by the Trustee to any Unitholder of such Trust upon written request. Within a reasonable period of time after the end of each calendar year, the Trustee shall furnish to each person who at any time during the calendar year was a Unitholder of a Trust a statement, covering the calendar year, setting forth for the applicable Trust:

A. As to the Interest Account:

1. The amount of interest received on the Securities (and for Tax-Exempt Portfolios, the percentage of such amount by states and territories in which the issuers of such Securities are located);
2. The amount paid from the Interest Account representing accrued interest of any Units redeemed;
3. The deductions from the Interest Account for applicable taxes, if any, fees and expenses (including auditing fees) of the Trustee, the Sponsor, the Evaluator, and, if any, of bond counsel;

GI-12

GENERAL INFORMATION

4. Any amounts credited by the Trustee to the Reserve Account described under "General Information--Expenses of the Trusts";
5. The net amount remaining after such payments and deductions, expressed both as a total dollar amount and a dollar amount per Unit outstanding on the last business day of such calendar year; and

B. As to the Principal Account:

1. The dates of the maturity, liquidation or redemption of any of the Securities and the net proceeds received therefrom excluding any portion credited to the Interest Account;
2. The amount paid from the Principal Account representing the principal of any Units redeemed;
3. The deductions from the Principal Account for payment of applicable taxes, if any, fees and expenses (including auditing fees) of the Trustee, the Sponsor, the Evaluator, and, if any, of bond counsel;
4. The amount of when-issued interest treated as a return of capital, if any;
5. Any amounts credited by the Trustee to the Reserve Account described under "General Information--Expenses of the Trusts";
6. The net amount remaining after distributions of principal and deductions, expressed both as a dollar amount and as a dollar amount per Unit outstanding on the last business day of the calendar year; and

C. The following information:

1. A list of the Securities as of the last business day of such calendar year;
2. The number of Units outstanding on the last business day of such calendar year;
3. The Redemption Price based on the last evaluation made during such calendar year;
4. The amount actually distributed during such calendar year from the Interest and Principal Accounts (and Capital Gains Account, if applicable) separately stated, expressed both as total dollar amounts and as dollar amounts per Unit outstanding on the Record Dates for each such distribution.

Rights of Unitholders. A Unitholder may at any time tender Units to the Trustee for redemption. The death or incapacity of any Unitholder will not operate to terminate a Trust nor entitle legal representatives or heirs to claim an accounting or to bring any action or proceeding in any court for partition or winding up of a Trust.

No Unitholder shall have the right to control the operation and management of any Trust in any manner, except to vote with respect to the amendment of the Trust Agreements or termination of any Trust.

INVESTMENT SUPERVISION

The Sponsor may not alter the portfolios of the Trusts by the purchase, sale or substitution of Securities, except in the special circumstances noted below and as indicated earlier under "General Information--Trust Information" regarding the substitution of Replacement Securities for any Failed Securities. Thus, with the exception of the redemption or maturity of Securities in accordance with their terms, the assets of the Trusts will remain unchanged under normal circumstances.

GI-13

GENERAL INFORMATION

The Sponsor may direct the Trustee to dispose of Securities the value of which has been affected by certain adverse events including institution of certain legal proceedings or decline in price or the occurrence of other market factors, including advance refunding, so that in the opinion of the Sponsor the retention of such Securities in a Trust would be detrimental to the interest of the Unitholders. The proceeds from any such sales, exclusive of any portion which represents accrued interest, will be credited to the Principal Account of such Trust for distribution to the Unitholders.

The Sponsor is required to instruct the Trustee to reject any offer made by an issuer of Securities to issue new obligations in exchange or substitution for any of such Securities pursuant to a refunding financing plan, except that the Sponsor may instruct the Trustee to accept or reject such an offer or to take

any other action with respect thereto as the Sponsor may deem proper if (1) the issuer is in default with respect to such Securities or (2) in the written opinion of the Sponsor the issuer will probably default with respect to such Securities in the reasonably foreseeable future. Any obligation so received in exchange or substitution will be held by the Trustee subject to the terms and conditions of the Trust Agreement to the same extent as Securities originally deposited thereunder. Within five days after deposit of obligations in exchange or substitution for underlying Securities, the Trustee is required to give notice thereof to each Unitholder, identifying the Securities eliminated and the Securities substituted therefor.

The Trustee may sell Securities, designated by the Sponsor, from a Trust for the purpose of redeeming Units of such Trust tendered for redemption and the payment of expenses.

ADMINISTRATION OF THE TRUSTS

The Trustee. The Trustee, Investors Fiduciary Trust Company, is a trust company specializing in investment related services, organized and existing under the laws of Missouri, having its trust office at 127 West 10th Street, Kansas City, Missouri 64105. The Trustee is subject to supervision and examination by the Division of Finance of the State of Missouri and the Federal Deposit Insurance Corporation. Investors Fiduciary Trust Company is owned by State Street Boston Corporation.

The Trustee, whose duties are ministerial in nature, has not participated in selecting the portfolio of any Trust. For information relating to the responsibilities of the Trustee under the Trust Agreements, reference is made to the material set forth under "General Information--Unitholders."

In accordance with the Trust Agreements, the Trustee shall keep records of all transactions at its office. Such records shall include the name and address of, and the number of Units held by, every Unitholder of each Trust. Such books and records shall be open to inspection by any Unitholder of such Trust at all reasonable times during usual business hours. The Trustee shall make such annual or other reports as may from time to time be required under any applicable state or Federal statute, rule or regulation. The Trustee shall keep a certified copy or duplicate original of the Trust Agreements on file in its office available for inspection at all reasonable times during usual business hours by any Unitholder, together with a current list of the Securities held in each Trust. Pursuant to the Trust Agreements, the Trustee may employ one or more agents for the purpose of custody and safeguarding of Securities comprising the Trusts.

Under the Trust Agreements, the Trustee or any successor trustee may resign and be discharged of its duties created by the Trust Agreements by executing an instrument in writing and filing the same with the Sponsor.

GI-14

GENERAL INFORMATION

The Trustee or successor trustee must mail a copy of the notice of resignation to all Unitholders then of record, not less than 60 days before the date specified in such notice when such resignation is to take effect. The Sponsor upon receiving notice of such resignation is obligated to appoint a successor trustee promptly. If, upon such resignation, no successor trustee has been appointed and has accepted the appointment within 30 days after notification, the retiring Trustee may apply to a court of competent jurisdiction for the appointment of a successor. The Sponsor may at any time remove the Trustee, with or without cause, and appoint a successor trustee as provided in the Trust Agreements. Notice of such removal and appointment shall be mailed to each Unitholder by the Sponsor. Upon execution of a written acceptance of such appointment by such successor trustee, all the rights, powers, duties and obligations of the original Trustee shall vest in the successor. The Trustee shall be a corporation organized under the laws of the United States, or any state thereof, which is authorized under such laws to exercise trust powers. The Trustee shall have at all times an aggregate capital, surplus and undivided profits of not less than \$5,000,000.

The Evaluator. Kemper Unit Investment Trusts, a service of Kemper Securities, Inc., the Sponsor, also serves as Evaluator. The Evaluator may resign or be removed by the Trustee in which event the Trustee is to use its best efforts to appoint a satisfactory successor. Such resignation or removal shall become effective upon acceptance of appointment by the successor evaluator. If upon

resignation of the Evaluator no successor has accepted appointment within 30 days after notice of resignation, the Evaluator may apply to a court of competent jurisdiction for the appointment of a successor. Notice of such resignation or removal and appointment shall be mailed by the Trustee to each Unitholder. At the present time, pursuant to a contract with the Evaluator, Muller Data Corporation, a non-affiliated firm regularly engaged in the business of evaluating, quoting or appraising comparable securities, provides, for both the initial offering period and secondary market transactions, portfolio evaluations of the Securities in the Trusts which are then reviewed by the Evaluator. In the event the Sponsor is unable to obtain current evaluations from Muller Data Corporation, it may make its own evaluations or it may utilize the services of any other non-affiliated evaluator or evaluators it deems appropriate.

Amendment and Termination. The Trust Agreements may be amended by the Trustee and the Sponsor without the consent of any of the Unitholders: (1) to cure any ambiguity or to correct or supplement any provision which may be defective or inconsistent; (2) to change any provision thereof as may be required by the Securities and Exchange Commission or any successor governmental agency; or (3) to make such provisions as shall not adversely affect the interests of the Unitholders. The Trust Agreements with respect to the Trusts may also be amended in any respect by the Sponsor and the Trustee, or any of the provisions thereof may be waived, with the consent of the holders of Units representing 66 2/3% of the Units then outstanding of such Trust, provided that no such amendment or waiver will reduce the interest of any Unitholder thereof without the consent of such Unitholder or reduce the percentage of Units required to consent to any such amendment or waiver without the consent of all Unitholders of such Trust. In no event shall any Trust Agreement be amended to increase the number of Units of a Trust issuable thereunder or to permit, except in accordance with the provisions of such Trust Agreement, the acquisition of any Securities in addition to or in substitution for those initially deposited in a Trust. The Trustee shall promptly notify Unitholders of the substance of any such amendment.

The Trust Agreements provide that the Trusts shall terminate upon the maturity, redemption or other disposition of the last of the Securities held in a Trust. If the value of a Trust shall be less than the applicable minimum value stated under "Essential Information," the Trustee may, in its discretion, and shall, when so directed by the Sponsor, terminate the Trust. A Trust may be terminated at any time by

GI-15

GENERAL INFORMATION

the holders of Units representing 66 2/3% of the Units thereof then outstanding. In the event of termination of a Trust, written notice thereof will be sent by the Trustee to all Unitholders of such Trust. Within a reasonable period after termination, the Trustee will sell any Securities remaining in such Trust and, after paying all expenses and charges incurred by the Trust, will distribute to Unitholders thereof (upon surrender for cancellation of certificates for Units, if issued) their pro rata share of the balances remaining in the Interest and Principal Accounts (and Capital Gains Account, if applicable) of such Trust.

Limitations on Liability. The Sponsor: The Sponsor is liable for the performance of its obligations arising from its responsibilities under the Trust Agreements, but will be under no liability to the Unitholders for taking any action or refraining from any action in good faith pursuant to the Trust Agreements or for errors in judgment, except in cases of its own gross negligence, bad faith or willful misconduct. The Sponsor shall not be liable or responsible in any way for depreciation or loss incurred by reason of the sale of any Securities.

The Trustee: The Trust Agreements provide that the Trustee shall be under no liability for any action taken in good faith in reliance upon prima facie properly executed documents or for the disposition of monies, Securities or certificates except by reason of its own gross negligence, bad faith or willful misconduct, nor shall the Trustee be liable or responsible in any way for depreciation or loss incurred by reason of the sale by the Trustee of any Securities. In the event that the Sponsor shall fail to act, the Trustee may act and shall not be liable for any such action taken by it in good faith. The Trustee shall not be personally liable for any taxes or other governmental charges imposed upon or in respect of the Securities or upon the interest thereon. In addition, the Trust Agreements contain other customary provisions

limiting the liability of the Trustee.

The Evaluator: The Trustee and Unitholders may rely on any evaluation furnished by the Evaluator and shall have no responsibility for the accuracy thereof. The Trust Agreements provide that the determinations made by the Evaluator shall be made in good faith upon the basis of the best information available to it, provided, however, that the Evaluator shall be under no liability to the Trustee or Unitholders for errors in judgment, but shall be liable only for its gross negligence, lack of good faith or willful misconduct.

EXPENSES OF THE TRUSTS

The Sponsor will charge the Trusts a surveillance fee for services performed for the Trusts in an amount not to exceed that amount set forth in "Essential Information" but in no event will such compensation, when combined with all compensation received from other unit investment trusts for which the Sponsor both acts as sponsor and provides portfolio surveillance, exceed the aggregate cost to the Sponsor for providing such services. Such fee shall be based on the total number of Units of the related Trust outstanding as of the January Record Date for any annual period. The Sponsor will receive a portion of the sales commissions paid in connection with the purchase of Units and will share in profits, if any, related to the deposit of Securities in the Trusts. The Sponsor and other Underwriters have borne all the expenses of creating and establishing the Trusts including the cost of the initial preparation, printing and execution of the Prospectus, Trust Agreements and certificates, legal and accounting expenses, advertising and selling expenses, payment of closing fees, the expenses of the Trustee, evaluation fees relating to the deposit and other out-of-pocket expenses.

GI-16

GENERAL INFORMATION

The Trustee receives for its services fees set forth under "Essential Information." The Trustee fee which is calculated monthly is based on the largest aggregate principal amount of Securities in a Trust at any time during the period. Funds that are available for future distributions, redemptions and payment of expenses are held in accounts which are non-interest bearing to Unitholders and are available for use by the Trustee pursuant to normal trust procedures; however, the Trustee is also authorized by the Trust Agreements to make from time to time certain non-interest bearing advances to the Trusts. During the first year the Trustee has agreed to lower its fees and absorb expenses by the amount set forth under "Essential Information." The Trustee's fee will not be increased in future years in order to make up this reduction in the Trustee's fee. The Trustee's fee is payable on or before each Distribution Date.

For evaluation of Securities in each Trust, the Evaluator shall receive a fee, payable monthly, calculated on the basis of that annual rate set forth under "Essential Information," based upon the largest aggregate principal amount of Securities in such Trust at any time during such monthly period.

The Trustee's and Evaluator's fees are deducted first from the Interest Account of a Trust to the extent funds are available and then from the Principal Account. Such fees may be increased without approval of Unitholders by amounts not exceeding a proportionate increase in the Consumer Price Index entitled "All Services Less Rent of Shelter," published by the United States Department of Labor, or any equivalent index substituted therefor. In addition, the Trustee's fee may be periodically adjusted in response to fluctuations in short-term interest rates (reflecting the cost to the Trustee of advancing funds to a Trust to meet scheduled distributions).

The following additional charges are or may be incurred by the Trusts: (a) fees for the Trustee's extraordinary services; (b) expenses of the Trustee (including legal and auditing expenses and insurance costs for Insured Trust Funds, but not including any fees and expenses charged by any agent for custody and safeguarding of Securities) and of bond counsel, if any; (c) various governmental charges; (d) expenses and costs of any action taken by the Trustee to protect a Trust or the rights and interests of the Unitholders; (e) indemnification of the Trustee for any loss, liability or expense incurred by it in the administration of a Trust not resulting from gross negligence, bad faith or willful misconduct on its part; (f) indemnification of the Sponsor for any loss, liability or expense incurred in acting in that capacity without gross negligence, bad faith or willful misconduct; and (g)

expenditures incurred in contacting Unitholders upon termination of the Trusts. The fees and expenses set forth herein are payable out of the appropriate Trust and, when owing to the Trustee, are secured by a lien on such Trust. Fees or charges relating to a Trust shall be allocated to each Trust in the same ratio as the principal amount of such Trust bears to the total principal amount of all Trusts. Fees or charges relating solely to a particular Trust shall be charged only to such Trust.

Fees and expenses of the Trusts shall be deducted from the Interest Account thereof, or, to the extent funds are not available in such Account, from the Principal Accounts. The Trustee may withdraw from the Principal Account or the interest Account of any Trust such amounts, if any, as it deems necessary to establish a reserve for any taxes or other governmental charges or other extraordinary expenses payable out of the Trust. Amounts so withdrawn shall be credited to a separate account maintained for a Trust known as the Reserve Account and shall not be considered a part of the Trust when determining the value of the Units until such time as the Trustee shall return all or any part of such amounts to the appropriate account.

GI-17

GENERAL INFORMATION

THE SPONSOR

The Sponsor, Kemper Unit Investment Trusts, with an office at 77 West Wacker Drive, 29th Floor, Chicago, Illinois 60601, (800) 621-5024, is a service of Kemper Securities, Inc., which is a wholly-owned subsidiary of Kemper Financial Companies, Inc. which, in turn, is a wholly-owned subsidiary of Kemper Corporation. The Sponsor acts as underwriter of a number of other Kemper unit investment trusts and will act as underwriter of any other unit investment trust products developed by the Sponsor in the future. As of January 31, 1994, the total stockholder's equity of Kemper Securities, Inc. was \$261,673,436 (unaudited).

If at any time the Sponsor shall fail to perform any of its duties under the Trust Agreements or shall become incapable of acting or shall be adjudged a bankrupt or insolvent or shall have its affairs taken over by public authorities, then the Trustee may (a) appoint a successor sponsor at rates of compensation deemed by the Trustee to be reasonable and not exceeding such reasonable amounts as may be prescribed by the Securities and Exchange Commission, or (b) terminate the Trust Agreements and liquidate the Trusts as provided therein, or (c) continue to act as Trustee without terminating the Trust Agreements.

The foregoing financial information with regard to the Sponsor relates to the Sponsor only and not to these Trusts. Such information is included in this Prospectus only for the purpose of informing investors as to the financial responsibility of the Sponsor and its ability to carry out its contractual obligations with respect to the Trusts. More comprehensive financial information can be obtained upon request from the Sponsor.

LEGAL OPINIONS

The legality of the Units offered hereby and certain matters relating to Federal tax law have been passed upon by Chapman and Cutler, 111 West Monroe Street, Chicago, Illinois 60603, as counsel for the Sponsor.

INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

The statements of condition and the related portfolios at the Initial Date of Deposit included in this Prospectus have been audited by Grant Thornton LLP, independent certified public accountants, as set forth in their report in the Prospectus, and are included herein in reliance upon the authority of said firm as experts in accounting and auditing.

GI-18

GENERAL INFORMATION

APPENDIX

DESCRIPTION OF RATINGS*

Standard & Poor's Ratings Group -- A brief description of the applicable Standard & Poor's Rating Group rating symbols and their meanings follow:

A Standard & Poor's corporate or municipal bond rating is a current assessment of the creditworthiness of an obligor with respect to a specific debt obligation. This assessment may take into consideration obligors such as guarantors, insurers, or lessees.

The bond rating is not a recommendation to purchase, sell or hold a security, inasmuch as it does not comment as to market price or suitability for a particular investor.

The ratings are based on current information furnished by the issuer and obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or for other circumstances.

The ratings are based, in varying degrees, on the following considerations:

I. Likelihood of default -- capacity and willingness of the obligor as to the timely payment of interest and repayment of principal in accordance with the terms of the obligation;

II. Nature of and provisions of the obligation;

III. Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization or other arrangement, under the laws of bankruptcy and other laws affecting creditors' rights.

AAA -- Bonds rated AAA have the highest rating assigned by Standard & Poor's to a debt obligation. Capacity to pay interest and repay principal is extremely strong.

AA -- Bonds rated AA have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in small degree.

A -- Bonds rated A have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than bonds in higher rated categories.

BBB -- Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category than for bonds in higher rated categories.

Bonds rated "BB," "B," "CCC," "CC," and "C" are regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal.

- - - - -

*As described by the rating company itself.

A-1

"BB" indicates the least degree of speculation and "C," the highest degree of speculation. While such Bonds will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

BB -- Bonds rated BB have less near-term vulnerability to default than other speculative grade debt. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to inadequate capacity to meet timely interest and principal payments.

B -- Bonds rated B have greater vulnerability to default but presently has the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions would likely impair capacity or willingness to pay interest and repay principal.

CCC -- Bonds rated CCC have a current identifiable vulnerability to default, and is dependent on favorable business, financial, and economic conditions to

meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, it is not likely to have the capacity to pay interest and repay principal.

CC -- The rating CC is typically applied to debt subordinated to senior debt which is assigned an actual or implied CCC rating.

C -- The rating C is typically applied to debt subordinated to senior debt which is assigned an actual or implied CCC debt rating.

D -- Bonds are rated D when the issue is in payment default, or the obligor has filed for bankruptcy. The D rating is used when interest or principal payments are not made on the date due, even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period.

Plus (+) or Minus (-): The ratings from "AA" to "A" may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Provisional Ratings: The letter "p" indicates the rating is provisional. A provisional rating assumes the successful completion of the project being financed by the bonds being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful and timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of, or the risk of default upon failure of, such completion. The investor should exercise his own judgment with respect to such likelihood and risk.

Moody's Investors Service, Inc.--A brief description of the applicable Moody's Investors Service, Inc. rating symbols and their meanings follow:

Aaa -- Bonds which are rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edge." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues. Their safety is so absolute that with the occasional exception of oversupply in a few specific instances, characteristically, their market value is affected solely by money market fluctuations.

A-2

Aa -- Bonds which are rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuations of protective elements may be of greater amplitude or there may be other elements present which make the long term risks appear somewhat larger than in Aaa securities. Their market value is virtually immune to all but money market influences, with the occasional exception of oversupply in a few specific instances.

A -- Bonds which are rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment sometime in the future. The market value of A-rated bonds may be influenced to some degree by economic performance during a sustained period of depressed business conditions, but, during periods of normalcy, A-rated bonds frequently move in parallel with Aaa and Aa obligations, with the occasional exception of oversupply in a few specific instances.

A1 -- Bonds which are rated A1 offer the maximum in security within their quality group, can be bought for possible upgrading in quality, and additionally, afford the investor an opportunity to gauge more precisely the relative attractiveness of offerings in the marketplace.

Baa -- Bonds which are rated Baa are considered as lower medium grade obligations, i.e., they are neither highly protected nor poorly secured.

Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and, in fact, have speculative characteristics as well. The market value of Baa-rated bonds is more sensitive to changes in economic circumstances and, aside from occasional speculative factors applying to some bonds of this class, Baa market valuations move in parallel with Aaa, Aa and A obligations during periods of economic normalcy, except in instances of oversupply.

Ba -- Bonds which are rated Ba are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B -- Bonds which are rated B generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa -- Bonds which are rated Caa are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca -- Bonds which are rated Ca represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C -- bonds which are rated C are the lowest rated class of bonds and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Conditional Ratings: Bonds rated "Con(--)" are ones for which the security depends upon the completion of some act or the fulfillment of some condition. These are bonds secured by (a) earnings of projects under construction, (b) earnings of projects unseasoned in operation experience, (c) rentals

A-3

which begin when facilities are completed, or (d) payments to which some other limiting conditions attaches. Parenthetical rating denotes probable credit stature upon completion of construction or elimination of basis of condition.

Note: Moody's applies numerical modifiers, 1, 2, and 3 in each generic rating classification from Aa through B in certain areas of its bond rating system. The modifier 1 indicates that the security ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.

Duff & Phelps Credit Rating Co. -- A brief description of the applicable Duff & Phelps Credit Rating Co. rating symbols and their meanings follow:

These ratings represent a summary opinion of the issuer's long-term fundamental quality. Rating determination is based on qualitative and quantitative factors which may vary according to the basic economic and financial characteristics of each industry and each issuer. Important considerations are vulnerability to economic cycles as well as risks related to such factors as competition, government action, regulation, technological obsolescence, demand shifts, cost structure, and management depth and expertise. The projected viability of the obligor at the trough of the cycle is a critical determination.

AAA -- Highest credit quality. The risk factors are negligible, being only slightly more than for risk-free U.S. Treasury debt.

AA -- High credit quality. Protection factors are strong. Risk is modest but may vary slightly from time to time because of economic conditions.

A -- Protection factors are average but adequate. However, risk factors are more variable and greater in periods of economic stress.

BBB -- Below average protection factors but still considered sufficient for

prudent investment. Considerable variability in risk during economic cycles.

BB -- Below investment grade but deemed likely to meet obligations when due. Present or prospective financial protection factors fluctuate according to industry conditions or company fortunes. Overall quality may move up or down frequently within this category.

B -- Below investment grade and possessing risk that obligations will not be met when due. Financial protection factors will fluctuate widely according to economic cycles, industry conditions and/or company fortunes. Potential exists for frequent changes in the rating within this category or into a higher or lower rating grade.

CCC -- Well below investment grade securities. Considerable uncertainty exists as to timely payment of principal, interest or preferred dividends. Protection factors are narrow and risk can be substantial with unfavorable economic/industry conditions, and/or with unfavorable company developments.

DD -- Defaulted debt obligations. Issuer failed to meet scheduled principal and/or interest payments.

THIS PROSPECTUS DOES NOT CONTAIN ALL OF THE INFORMATION SET FORTH IN THE REGISTRATION STATEMENT AND EXHIBITS RELATING THERETO, FILED WITH THE SECURITIES AND EXCHANGE COMMISSION, WASHINGTON, D.C. UNDER THE SECURITIES ACT OF 1933 AND THE INVESTMENT COMPANY ACT OF 1940, AND TO WHICH REFERENCE IS MADE.

NO PERSON IS AUTHORIZED TO GIVE ANY INFORMATION OR TO MAKE ANY REPRESENTATIONS NOT CONTAINED IN THIS PROSPECTUS AND ANY INFORMATION OR REPRESENTATION NOT CONTAINED HEREIN MUST NOT BE RELIED UPON AS HAVING BEEN AUTHORIZED BY THE TRUSTS, THE TRUSTEE, OR THE SPONSOR. THE TRUSTS ARE REGISTERED AS UNIT INVESTMENT TRUSTS UNDER THE INVESTMENT COMPANY ACT OF 1940. SUCH REGISTRATION DOES NOT IMPLY THAT THE TRUSTS OR THE UNITS HAVE BEEN GUARANTEED, SPONSORED, RECOMMENDED OR APPROVED BY THE UNITED STATES OR ANY STATE OR ANY AGENCY OR OFFICER THEREOF.

THIS PROSPECTUS DOES NOT CONSTITUTE AN OFFER TO SELL, OR A SOLICITATION OF AN OFFER TO BUY, SECURITIES IN ANY STATE TO ANY PERSON TO WHOM IT IS NOT LAWFUL TO MAKE SUCH OFFER IN SUCH STATE.

This Registration Statement on Form S-6 comprises the following papers and documents.

<TABLE>	
<C>	<S>
	The facing sheet of Form S-6.
	The cross-reference sheet.
	The prospectus.
	The signatures.
	The following exhibits.
1.1(a).	Form of Trust Indenture and Agreement for the Insured National Series 14.
1.1(b).	Form of Trust Indenture and Agreement for the Insured California Series 14 and Insured Michigan Series 10.
1.1(c).	Form of Trust Indenture and Agreement for the Corporate Income Series 3.
1.1.1(a).	Standard Terms and Conditions of Trust for the Insured National Series 14. Reference is made to Exhibit 1.1.1 to the Registration Statement on Form S-6 with respect to Kemper Defined Funds Series 13 (Registration No. 33-52165) as filed on February 17, 1994.
1.1.1(b).	Standard Terms and Conditions of Trust for the Insured California Series 14 and Insured Michigan Series 10. Reference is made to Exhibit 1.1.1 to the Registration Statement on Form S-6 with respect to Kemper Defined Funds Series 13 (Reg. No. 33-52165) as filed on February 17, 1994.
1.1.1(c).	Standard Terms and Conditions of Trust for the Corporate Income Series 3. Reference is made to Exhibit 1.1.1 to the Registration Statement on Form S-6 with respect to Kemper Defined Fund Series 9 (Reg. No. 33-56012) as filed on November 3, 1993.

KEMPER DEFINED FUNDS SERIES 30
(Insured National Series)

TRUST AGREEMENT

This Trust Agreement dated as of February 22, 1995 between Kemper Unit Investment Trusts, a service of Kemper Securities, Inc., as Depositor, and Investors Fiduciary Trust Company, as Trustee, sets forth certain provisions in full and incorporates other provisions by reference to the document entitled "Kemper Defined Funds Series 13 and Subsequent Series, Standard Terms and Conditions of Trust, Effective February 17, 1994" (herein called the "Standard Terms and Conditions of Trust"), and such provisions as are set forth in full and such provisions as are incorporated by reference constitute a single instrument.

WITNESSETH THAT:

In consideration of the premises and of the mutual agreements herein contained, the Depositor and the Trustee agree as follows:

Part I

STANDARD TERMS AND CONDITIONS OF TRUST

Subject to the provisions of Part II hereof, all the provisions contained in the Standard Terms and Conditions of Trust are herein incorporated by reference in their entirety and shall be deemed to be a part of this instrument as fully and to the same extent as though said provisions had been set forth in this instrument.

Part II

SPECIAL TERMS AND CONDITIONS OF TRUST

The following special terms and conditions are hereby agreed to:

(a) The interest-bearing tax-exempt obligations listed in the Schedules hereto have been deposited in trust under this Trust Agreement as indicated in the Trust named on the attached Schedules.

(b) For the purposes of the definition of the terms "Depositor" and "Evaluator" in Article I, it is hereby specified that such term shall mean Kemper Unit Investment Trusts, a service of Kemper Securities, Inc. or its successors or any successor Depositor appointed.

(c) For the purposes of the definition of the term "Unit" in Article

I, it is hereby specified that the fractional undivided interest in and ownership of the

Trust is the amount set forth in the section captioned "Essential Information" in the final Prospectus of the Trust (the "Prospectus") contained in Amendment No. 1 to the Trust's Registration Statement (Registration No. 33-57693) as filed with the Securities and Exchange Commission on February 22, 1995.

(d) For purposes of the definition of the term "Fund" in Article I, it is hereby specified that such term shall mean the term "Trust" as defined on page 6 of the Prospectus.

(e) For purposes of the definition of the term "Trust Fund" in Article I, it is hereby specified that such term shall include the definition of the term "Trust Fund" as set forth on page 6 of the Prospectus and specifically shall include Insured National Series 14.

(f) The term "Record Date" shall mean the "Record Dates" set forth under "Unitholders - Distributions to Unitholders" of the Prospectus.

(g) The terms "Interest Distribution Date" and "Principal Distribution Date" shall mean the "Interest Distribution Dates" and "Principal Distribution Dates" set forth under "Unitholders - Distributions to Unitholders" in the Prospectus.

(h) The number of Units of the Trust referred to in Section 2.01 is as set forth in the section captioned "Essential Information" in the Prospectus.

(i) As contemplated by Section 3.04, an initial distribution for the Trust will be made on the Distribution Date and in the amount set forth in the section captioned "Unitholders - Distributions to Unitholders" in the Prospectus to all holders of record on the Record Date set forth thereunder. Thereafter, the amounts distributed shall be calculated in the manner set forth in Section 3.04.

(j) For the purposes of Section 4.03, the Evaluator shall receive for evaluation of the Bonds in the Trust a fee, payable monthly, calculated on the basis of an annual rate of \$.30 per \$1,000 principal amount of Bonds, based upon the largest aggregate principal amount of Bonds in the Trust at any time during such monthly period.

(k) For the purposes of Section 3.13, the Depositor shall receive for portfolio surveillance services a fee calculated on the basis of an annual rate of \$.20 per \$1,000 principal amount of Bonds, based upon the largest aggregate principal amount of Bonds in the Trust at any time during such monthly period.

(l) For the purposes of Section 8.01(g), the liquidation amount is hereby specified as the amount set forth under "Essential Information - Minimum

-2-

Value of Trust under which Trust Agreement may be Terminated" in the Prospectus.

(m) For the purposes of Section 8.05, with the exception of the first year, the compensation for the Trustee is hereby specified as the amount set forth under "Essential Information". During the first year, the Trustee has agreed to lower its fee and to the extent necessary assume and pay out of its own funds expenses of the Trust by the amount set forth under "Essential Information" in the Prospectus.

(n) Any monies held to purchase "when-issued" bonds will be held in non-interest bearing accounts.

(o) The term "First Settlement Date" shall mean the "First Settlement Date" set forth under the section captioned "Essential Information" in the Prospectus.

(p) The fourth sentence of Section 8.06(a) is hereby eliminated and the last sentence of such Section shall be restated as follows:

The Depositor may at any time remove the Trustee, with or without cause, and appoint a successor Trustee by written instrument or instruments delivered to the Trustee so removed and the successor Trustee, provided that a notice of such removal and appointment of a successor Trustee shall be mailed by the successor Trustee promptly after acceptance of such appointment to each Unitholder then or record.

-3-

IN WITNESS WHEREOF, the parties hereto have caused this Trust Agreement to be duly executed.

TRUST AGREEMENT

This Trust Agreement dated as of February 22, 1995 between Kemper Unit Investment Trusts, a service of Kemper Securities, Inc., as Depositor, and Investors Fiduciary Trust Company, as Trustee, sets forth certain provisions in full and incorporates other provisions by reference to the document entitled "Kemper Defined Funds Series 13 and Subsequent Series (Tax-Exempt Portfolios), Standard Terms and Conditions of Trust, Effective February 17, 1994" (herein called the "Standard Terms and Conditions of Trust"), and such provisions as are set forth in full and such provisions as are incorporated by reference constitute a single instrument.

WITNESSETH THAT:

In consideration of the premises and of the mutual agreements herein contained, the Depositor and the Trustee agree as follows:

Part I

STANDARD TERMS AND CONDITIONS OF TRUST

Subject to the provisions of Part II hereof, all the provisions contained in the Standard Terms and Conditions of Trust are herein incorporated by reference in their entirety and shall be deemed to be a part of this instrument as fully and to the same extent as though said provisions had been set forth in this instrument.

Part II

SPECIAL TERMS AND CONDITIONS OF TRUST

The following special terms and conditions are hereby agreed to:

(a) The interest-bearing tax-exempt obligations listed in the Schedules hereto have been deposited in trust under this Trust Agreement as indicated in the Trust named on the attached Schedules.

(b) For the purposes of the definition of the terms "Depositor" and "Evaluator" in Article I, it is hereby specified that such term shall mean Kemper Unit Investment Trusts, a service of Kemper Securities, Inc. or its successors or any successor Depositor appointed.

(c) For the purposes of the definition of the term "Unit" in Article I, it is hereby specified that the fractional undivided interest in and ownership of the Trust is the amount set forth in the section captioned "Essential Information" in the final Prospectus of the Trust (the "Prospectus") contained in Amendment No. 1 to the Trust's Registration Statement (Registration No. 33-57693) as filed with the Securities and Exchange Commission on February 22, 1995.

(d) For purposes of the definition of the term "Fund" in Article I, it is hereby specified that such term shall mean the term "Trust" as defined on page 6 of the Prospectus.

(e) For purposes of the definition of the term "Trust Fund" in Article I, it is hereby specified that such term shall include the definition of the term "Trust Fund" as set forth on page 6 of the Prospectus and specifically includes Insured California Series 14 and Insured Michigan 10 (the "Insured State Trusts").

(f) The term "Record Date" shall mean the "Record Dates" set forth under "Unitholders - Distributions to Unitholders" of the Prospectus.

(g) The terms "Interest Distribution Date" and "Principal Distribution Date" shall mean the "Interest Distribution Dates" and "Principal Distribution Dates" set forth under "Unitholders - Distributions to Unitholders" in the Prospectus.

(h) The number of Units of the Trust referred to in Section 2.01 is as set forth in the section captioned "Essential Information" in the Prospectus.

(i) As contemplated by the last paragraph of Section 3.04, an initial distribution for the Trust will be made on the Distribution Date and in the amount set forth in the section captioned "Unitholders - Distributions to Unitholders" in the Prospectus to all holders of record on the Record Date set forth thereunder. Thereafter, the amounts distributed shall be calculated in the manner set forth in Section 3.04.

(j) For the purposes of Section 4.03, the Evaluator shall receive for evaluation of the Bonds in the Trust a fee, payable monthly, calculated on the basis of an annual rate of \$.30 per \$1,000 principal amount of Bonds, based upon the largest aggregate principal amount of Bonds in the Trust at any time during such monthly period.

(k) For the purposes of Section 3.13, the Depositor shall receive for portfolio surveillance services a fee, payable monthly, calculated on the basis of an annual rate of \$.20 per \$1,000 principal amount of Bonds, based upon the

largest aggregate principal amount of Bonds in the Trust at any time during such monthly period.

(l) For the purposes of Section 8.01(g), the liquidation amount is hereby specified as the amount set forth under "Essential Information - Minimum Value of Trust under which Trust Agreement may be Terminated" in the Prospectus.

(m) For the purposes of Section 8.05, with the exception of the first year, the compensation for the Trustee is hereby specified as the amount set forth under "Essential Information". During the first year, the Trustee has agreed to lower its fee and to the extent necessary assume and pay out of its own funds expenses of the Trust by the amount set forth under "Essential Information" in the Prospectus.

(n) Any monies held to purchase "when-issued" bonds will be held in non-interest bearing accounts.

(o) The term "First Settlement Date" shall mean the "First Settlement Date" set forth under the section captioned "Essential Information" in the Prospectus.

(p) The fourth sentence of Section 8.06(a) is hereby eliminated and the last sentence of such Section shall be restated as follows:

The Depositor may at any time remove the Trustee, with or without cause, and appoint a successor Trustee by written instrument or instruments delivered to the Trustee so removed and the successor Trustee, provided that a notice of such removal and appointment of a successor Trustee shall be mailed by the successor Trustee promptly after acceptance of such appointment to each Unitholder then or record.

KEMPER DEFINED FUNDS SERIES 30

TRUST AGREEMENT

This Trust Agreement dated as of February 22, 1995 between Kemper Unit Investment Trusts, a service of Kemper Securities, Inc., as Depositor, and Investors Fiduciary Trust Company, as Trustee, sets forth certain provisions in full and incorporates other provisions by reference to the document entitled "Kemper Defined Funds Corporate Income Series 1 and Subsequent Series Standard Terms and Conditions of Trust, Effective November 3, 1993" (herein called the "Standard Terms and Conditions of Trust"), and such provisions as are set forth in full and such provisions as are incorporated by reference constitute a single instrument.

WITNESSETH THAT:

In consideration of the premises and of the mutual agreements herein contained, the Depositor and the Trustee agree as follows:

Part I

STANDARD TERMS AND CONDITIONS OF TRUST

Subject to the provisions of Part II hereof, all the provisions contained in the Standard Terms and Conditions of Trust are herein incorporated by reference in their entirety and shall be deemed to be a part of this instrument as fully and to the same extent as though said provisions had been set forth in this instrument.

Part II

SPECIAL TERMS AND CONDITIONS OF TRUST

The following special terms and conditions are hereby agreed to:

(a) The interest-bearing obligations listed in the Schedule hereto have been deposited in trust under this Trust Agreement as indicated in the Trust named on the attached Schedule.

(b) For the purposes of the definition of the term "Depositor" in Article I, it is hereby specified that such term shall mean Kemper Unit Investment Trusts, a service of Kemper Securities, Inc. or its successors or any successor Depositor appointed.

(c) For the purposes of the definition of the term "Unit" in Article I, it is hereby specified that the fractional undivided interest in and ownership of the

Trust is the amount set forth in the section captioned "Essential Information" in the final Prospectus of the Trust (the "Prospectus") contained in Amendment No. 1 to the Trust's Registration Statement (Registration No. 33-57693) as filed with the Securities and Exchange Commission on February 22, 1995. The fractional undivided interest may increase by the number of any additional Units issued pursuant to Section 2.03, or decrease by the number of Units redeemed pursuant to Section 5.02.

(d) For purposes of the definition of the term "Fund" and "Trust Fund" in Article I, it is hereby specified that such term shall mean the term "Trust" as defined on page 6 of the Prospectus.

(e) The term "Record Date" shall mean the "Record Dates" set forth under "Unitholders - Distributions to Unitholders" of the Prospectus.

(f) The terms "Interest Distribution Date" and "Principal Distribution Date" shall mean the "Interest Distribution Dates" and "Principal Distribution Dates" set forth under "Unitholders - Distributions to Unitholders" in the Prospectus.

(g) The term "Initial Date of Deposit" shall mean February 22, 1995.

(h) The number of Units of the Trust referred to in Section 2.03 is as set forth in the section captioned "Essential Information" in the Prospectus.

(i) For the purposes of Section 3.13, the Depositor shall receive for portfolio surveillance services a fee calculated on the basis of that maximum annual rate set forth in "Essential Information", based upon the largest aggregate principal amount of Bonds in the Trust at any time during such monthly period.

(j) For the purposes of Section 4.03, the Evaluator shall receive for evaluation of the Bonds in the Trust a fee, payable monthly, calculated on the basis of that annual rate set forth in "Essential Information", based upon the largest aggregate principal amount of Bonds in the Trust at any time during such monthly period.

(k) For the purposes of Section 8.01(g), the liquidation amount is hereby specified as the amount set forth under "Essential Information - Minimum principal value of the trust under which Trust Agreement may be terminated" in the Prospectus.

(l) For the purposes of Section 8.05, the compensation for the Trustee for each Trust is the amount set forth in "Essential Information".

(m) Any monies held to purchase "when-issued" bonds will be held in non-interest bearing accounts.

(n) The fourth sentence of Section 8.06(a) is hereby eliminated and the last sentence of such Section shall be restated as follows:

The Depositor may at any time remove the Trustee, with or without cause, and appoint a successor Trustee by written instrument or instruments delivered to the Trustee so removed and the successor Trustee, provided that a notice of such removal and appointment of a successor Trustee shall be mailed by the successor Trustee promptly after acceptance of such appointment to each Unitholder then or record.

Exhibit 1.1(c)

IN WITNESS WHEREOF, the parties hereto have caused this Trust Agreement to be duly executed.

Re: Kemper Defined Funds Series 30

Gentlemen:

We have served as counsel for Kemper Unit Investment Trusts, as Sponsor and Depositor of Kemper Defined Funds Series 30 (the "Fund"), in connection with the preparation, execution and delivery of Trust Agreements dated the date of this opinion between Kemper Unit Investment Trusts, as Depositor, and Investors Fiduciary Trust Company, as Trustee, pursuant to which the Depositor has delivered to and deposited the Bonds listed in the Schedules to each Trust Agreement with the Trustee and pursuant to which the Trustee has issued to or on the order of the Depositor a certificate or certificates representing all the Units of fractional undivided interest in, and ownership of, the Fund, created under said Trust Agreements.

In connection therewith we have examined such pertinent records and documents and matters of law as we have deemed necessary in order to enable us to express the opinions hereinafter set forth.

Based upon the foregoing, we are of the opinion that:

1. The execution and delivery of the Trust Agreements and the execution and issuance of certificates evidencing the Units of the Fund have been duly authorized; and

2. The certificates evidencing the Units of the Fund, when duly executed and delivered by the Depositor and the Trustee in accordance with the aforementioned Trust Agreements, will constitute valid and binding obligations of the Fund and the Depositor in accordance with the terms thereof.

We hereby consent to the filing of this opinion as an exhibit to the

Registration Statement (File No. 33-57693) relating to the Units referred to above and to the use of our name and to the reference to our firm in said Registration Statement and in the related Prospectus.

Respectfully submitted,

CHAPMAN AND CUTLER

Re: Kemper Defined Funds Series 30
(Insured National Series 14, Insured California Series 14
and Insured Michigan Series 10)

Gentlemen:

We have acted as counsel for Kemper Unit Investment Trusts, Depositor of Kemper Defined Funds Series 30 (Insured National Series 14, Insured California Series 14 and Insured Michigan Series 10) (the "Fund"), in connection with the issuance of Units of fractional undivided interest in the several Trusts of said Fund under Trust Agreements dated February 22, 1995 (the "Indenture") between Kemper Unit Investment Trusts, as Depositor and Evaluator and Investors Fiduciary Trust Company, as Trustee.

In this connection, we have examined the Registration Statement, the form of Prospectus proposed to be filed with the Securities and Exchange Commission, the Indenture and such other instruments and documents as we have deemed pertinent.

Based upon the foregoing and upon an investigation of such matters of law as we consider to be applicable, we are of the opinion that, under existing Federal income tax law:

(i) Each Trust is not an association taxable as a corporation but will be governed by the provisions of subchapter J (relating to trusts) of chapter 1, Internal Revenue Code of 1986 (the "Code").

(ii) Each Unitholder will be considered as owning a pro rata share of each asset of the respective Trust in the proportion that the number of Units of such Trust held by him bears to the total number of Units outstanding of such Trust. Under subpart E, subchapter J of chapter 1 of the Code, income of each Trust will be treated as income of each Unitholder of the respective Trust in the

-2-

proportion described, and an item of Trust income will have the same character in the hands of a Unitholder as it would have in the hands of the Trustee. Accordingly, to the extent that the income of a Trust consists of interest excludable from gross income under Section 103 of the Code, such income will be excludable from Federal gross income of the Unitholders, except in the case of a Unitholder who is a substantial user (or a person related to such user) of a facility financed through issuance of any industrial development bonds or certain private activity bonds held by the respective Trust. In the case of such Unitholder (and no other) interest received with respect to his Units attributable to such industrial development bonds or such private activity bonds is includable in his gross income. In the case of certain corporations, interest on the Bonds is included in computing the alternative minimum tax pursuant to Section 56(c) of the Code, the environmental tax (the "Superfund Tax") imposed by Section 59A of the Code, and the branch profits tax imposed by Section 884 of the Code with respect to U.S. branches of foreign corporations.

(iii) Gain or loss will be recognized to a Unitholder upon redemption or sale of his Units. Such gain or loss is measured by comparing the proceeds of such redemption or sale with the adjusted basis of the Units represented by his Certificate. Before adjustment, such basis would normally be cost if the Unitholder had acquired his Units by purchase, plus his aliquot share of advances by the Trustee to the Trust to pay interest on Bonds delivered after the Unitholder's settlement date to the extent that such interest accrued on the Bonds during the period from the Unitholder's settlement date to the date such Bonds are delivered to the respective Trust, but only to the extent that such advances are to be repaid to the Trustee out of interest received by such Trust with respect to such Bonds. In addition, such basis will be increased by the Unitholder's aliquot share of the accrued original issue discount with respect to each Bond held by the Fund with respect to which there was an original issue discount at the time the Bond was issued and reduced by the annual amortization of bond premium, if any, on Bonds held by the Trust.

(iv) If the Trustee disposes of a Trust asset (whether by sale, payment on maturity, redemption or otherwise) gain or loss is recognized to the Unitholder and the amount thereof is measured by comparing the Unitholder's aliquot share of the total proceeds from the transaction with his basis for his fractional interest in the asset disposed of. Such basis is ascertained

by apportioning the tax basis for his Units among each of the Trust assets (as of the date on which his Units were acquired) ratably according to their values as of the valuation date nearest the date on which he purchased such Units. A Unitholder's basis in his Units and of his fractional interest in each Trust asset must be reduced by the amount of his aliquot share of interest received by the Trust, if any, on Bonds delivered after the Unitholder's settlement date to the extent that such

-3-

interest accrued on the Bonds during the period from the Unitholder's settlement date to the date such Bonds are delivered to the Trust; must be reduced by the annual amortization of bond premium, if any, on Bonds held by each Trust and must be increased by the Unitholder's share of the accrued original issue discount with respect to each Bond which, at the time the Bond was issued, had original issue discount.

(v) In the case of any Bond held by a Trust where the "stated redemption price at maturity" exceeds the "issue price", such excess shall be original issue discount. With respect to each Unitholder, upon the purchase of his Units subsequent to the original issuance of Bonds held by a Trust, Section 1272(a)(7) of the Code provides for a reduction in the accrued "daily portion" of such original issue discount upon the purchase of a Bond subsequent to the Bond's original issue, under certain circumstances. In the case of any Bond held by a Trust the interest on which is excludable from gross income under Section 103 of the Code, any original issue discount which accrues with respect thereto will be treated as interest which is excludable from gross income under Section 103 of the Code.

(vi) Certain bonds in the portfolios of certain of the Trusts have been insured by the issuers thereof against default in the prompt payment of principal and interest (the "Insured Bonds"). Insurance has been obtained for such bonds, or, in the case of a commitment, the bonds will be ultimately insured under the terms of such an insurance policy, which are designated as issuer insured bonds on the portfolio pages of the respective Trusts in the prospectus for the Fund, by the issuer of such bonds. Insurance obtained by the issuer is effective so long as such bonds remain outstanding. For each of these bonds, we have been advised that the aggregate principal amount of such bonds listed on the portfolio page for the respective Trust was acquired by the applicable Trust and is part of the series of such bonds listed on the portfolio page for the respective Trust in the aggregate principal amount listed on the portfolio page for the respective Trust. Based upon the assumption that the Bonds acquired by the applicable Trust are part of the series covered by an insurance policy or, in the case of a commitment, will be ultimately insured under the terms of such an insurance policy, it is our opinion that any amounts received by the applicable Trust representing maturing interest on such bonds will be excludable from federal gross income if, and to the same extent as, such interest would have been so excludable if paid in normal course by the Issuer provided that, at the time such policies

are purchased, the amounts paid for such policies are reasonable, customary and consistent with the reasonable expectation that the issuer of the bonds, rather than the insurer, will pay debt service on the bonds. Paragraph (ii) of this opinion is accordingly applicable to such payment representing maturing interest.

-4-

Sections 1288 and 1272 of the Code provide a complex set of rules governing the accrual of original issue discount. These rules provide that original issue discount accrues either on the basis of a constant compound interest rate or ratably over the term of the Bond, depending on the date the Bond was issued. In addition, special rules apply if the purchase price of a Bond exceeds the original issue price plus the amount of original issue discount which would have previously accrued based upon its issue price (its "adjusted issue price") to prior owners. The application of these rules will also vary depending on the value of the Bond on the date a Unitholder acquires his Units, and the price the Unitholder pays for his Units.

Because the Trusts do not include any "private activity bonds" within the meaning of Section 141 of the Code issued on or after August 8, 1986, none of the Trust Fund's interest income shall be treated as an item of tax preference when computing the alternative minimum tax. In the case of corporations, for taxable years beginning after December 31, 1986, the alternative minimum tax and the Superfund Tax depend upon the corporation's alternative minimum taxable income ("AMTI") which is the corporation's taxable income with certain adjustments.

Pursuant to Section 56(c) of the Code, one of the adjustment items used in computing AMTI and the Superfund Tax of a corporation (other than an S Corporation, Regulated Investment Company, Real Estate Investment Trust or REMIC) for taxable years beginning after 1989, is an amount equal to 75% of the excess of such corporation's "adjusted current earnings" over an amount equal to its AMTI (before such adjustment item and the alternative tax net operating loss deduction). "Adjusted current earnings" includes all tax-exempt interest, including interest on all Bonds in each Trust, and tax-exempt original issue discount.

Effective for tax returns filed after December 31, 1987, all taxpayers are required to disclose to the Internal Revenue Service the amount of tax-exempt interest earned during the year.

Section 265 of the Code provides for a reduction in each taxable year of 100 percent of the otherwise deductible interest on indebtedness incurred or continued by financial institutions, to which either Section 585 or Section 593 of the Code applies, to purchase or carry obligations acquired after August 7, 1986, the interest on which is exempt from Federal income taxes for such taxable year. Under rules prescribed by Section 265, the amount of interest otherwise deductible by such financial institutions in any taxable year which is deemed to

be attributable to tax-exempt obligations acquired after August 7, 1986, will be the amount that bears the same ratio to the interest deduction otherwise allowable (determined without regard to Section 265) to the taxpayer for the taxable year as the taxpayer's average adjusted basis (within the meaning of Section 1016) of tax-exempt obligations acquired after August 7, 1986, bears to such average adjusted basis for all assets of the taxpayer, unless such financial institution can otherwise establish, under regulations to

-5-

be prescribed by the Secretary of the Treasury, the amount of interest on indebtedness incurred or continued to purchase or carry such obligations.

We also call attention to the fact that, under Section 265 of the Code, interest on indebtedness incurred or continued to purchase or carry Units by taxpayers other than certain financial institutions, as referred to above, is not deductible for Federal income tax purposes. Under rules used by the Internal Revenue Service for determining when borrowed funds are considered used for the purpose of purchasing or carrying particular assets, the purchase of Units may be considered to have been made with borrowed funds even though the borrowed funds are not directly traceable to the purchase of Units. However, these rules generally do not apply to interest paid on indebtedness incurred for expenditures of a personal nature such as a mortgage incurred to purchase or improve a personal residence.

"The Revenue Reconciliation Act of 1993" (the "Tax Act") subjects tax-exempt bonds to the market discount rules of the Code effective for bonds purchased after April 30, 1993. In general, market discount is the amount (if any) by which the stated redemption price at maturity exceeds an investor's purchase price (except to the extent that such difference, if any, is attributable to original issue discount not yet accrued). Market discount can arise based on the price a Trust pays for Bonds or the price a Unitholder pays for his or her Units. Under the Tax Act, accretion of market discount is taxable as ordinary income; under prior law, the accretion had been treated as capital gain. Market discount that accretes while a Trust holds a Bond would be recognized as ordinary income by the Unitholders when principal payments are received on the Bonds, upon sale or at redemption (including early redemption), or upon the sale or redemption of his or her Units, unless a Unitholder elects to include market discount in taxable income as it accrues.

We have also examined the laws of the State of Missouri to determine their applicability to the Fund. It is our opinion that under Missouri law, as presently enacted and construed:

(i) Each Trust is not an association taxable as a corporation for Missouri income tax purposes.

(ii) The Unitholders of each Trust will be treated as the owners of a pro rata portion of each Trust and the income of each Trust will therefore be

treated as income of the Unitholders under Missouri law.

(iii) Each Trust will not be subject to the Kansas City, Missouri Earnings and Profits Tax and each Unitholder's share of income of each Trust will not generally be subject to the Kansas City, Missouri Earnings and Profits Tax or the City of St. Louis Earnings Tax (except in the case of certain Unitholders, including corporations, otherwise subject to the St. Louis City Earnings Tax).

-6-

The scope of this opinion is expressly limited to the matters set forth herein, and, except as expressly set forth above, we express no opinion with respect to any other taxes, including state or local taxes or collateral tax consequences with respect to the purchase, ownership and disposition of Units.

Very truly yours,

CHAPMAN AND CUTLER

Re: Kemper Defined Funds Series 30
(Corporate Income Series 3)

Gentlemen:

We have acted as counsel for Kemper Unit Investment Trusts, a service of Kemper Securities, Inc., as Sponsor and Depositor of Kemper Defined Funds Series 30 (Corporate Income Series 3) (the "Trust"), in connection with the issuance of Units of fractional undivided interest in the Trust, under a Trust Agreement dated February 22, 1995 (the "Indenture") between Kemper Unit Investment Trusts,

a service of Kemper Securities, Inc., as Depositor and Evaluator, and Investors Fiduciary Trust Company, as Trustee.

In this connection, we have examined the Registration Statement, the Prospectus, the Indenture, and such other instruments and documents as we have deemed pertinent.

The assets of the Trust will consist of a portfolio of high yield, high risk corporate debt obligations (the "Corporate Bonds" or the "Obligations") as set forth in the Prospectus. All Obligations have been issued after July 18, 1984.

Based upon the foregoing and upon an investigation of such matters of law as we consider to be applicable, we are of the opinion that, under existing Federal income tax law:

(i) The Trust is not an association taxable as a corporation but will be governed by the provisions of subchapter J (relating to Trusts) of chapter 1, Internal Revenue Code of 1986 (the "Code").

(ii) Each Unitholder will be considered as owning a pro rata share of each asset of the Trust in the proportion that the number of Units held by him bears

-2-

to the total number of Units outstanding. Under subpart E, subchapter J of chapter 1 of the Code, income of the Trust will be treated as income of each Unitholder in the proportion described, and an item of Trust income will have the same character in the hands of a Unitholder as it would have in the hands of the Trustee. Each Unitholder will be considered to have received his pro rata share of income derived from each Trust asset when such income is received by the Trust. Each Unitholder will also be required to include in taxable income for Federal income tax purposes, original issue discount with respect to his interest in any Obligation held by the Trust which was issued with original issue discount at the same time and in the same manner as though the Unitholder were the direct owner of such interest. Original issue discount will be treated as zero with respect to Corporate Bonds if it is "de minimis" within the meaning of Section 1273 of the Code. If a Corporate Bond is a "high-yield discount obligation" within the meaning of Section 163(e)(5) of the Code, certain special rules may apply. A Unitholder may elect to include in taxable income for Federal income tax purposes, market discount as it accrues with respect to his interest in any Corporate Bond held by the Trust which he is considered as having acquired with market discount at the same time and in the same manner as though the Unitholder were the direct owner of such interest.

(iii) The price a Unitholder pays for his Units, including sales charges, is allocated among his pro rata portion of each Obligation held by the Trust (in proportion to the fair market values thereof on the date the

Unitholder purchases his Units), in order to determine his initial cost for his pro rata portion of each Obligation held by the Trust. In general, original issue discount accrues daily under a constant interest rate method which takes into account the semi-annual compounding of accrued interest.

(iv) Gain or loss will be recognized to a Unitholder upon redemption or sale of his Units. Such gain or loss is measured by comparing the proceeds of such redemption or sale with the adjusted basis of the Units represented by his Certificate. Before adjustment, such basis would normally be cost if the Unitholder had acquired his units by purchase. In addition, such basis will be increased by the Unitholder's aliquot share of the accrued original issue discount with respect to each Obligation held by the Trust with respect to which there was original issue discount at the time such Obligation was issued and by accrued market discount which the Unitholder has elected to annually include in income with respect to each Corporate Bond and reduced by the Unitholder's aliquot share of the amortized acquisition premium, if any, which the Unitholder has properly elected to amortize under Section 171 of the Code on each Obligation held by the Trust. The tax cost reduction requirements of the Code relating to amortization of bond premium may, under certain

-3-

circumstances, result in the Unitholder realizing a taxable gain when his Units are sold or redeemed for an amount equal to or less than his original cost.

(v) If the Trustee disposes of a Trust asset (whether by sale, exchange, redemption, payment on maturity or otherwise) gain or loss will be recognized to the Unitholder and the amount thereof will be measured by comparing the Unitholder's aliquot share of the total proceeds from the transaction with his basis for his fractional interest in the asset disposed of. Such basis is ascertained by apportioning the tax basis for his Units (as of the date on which his Units were acquired) among each of the Trust assets ratably according to their values as of the valuation date nearest the date on which he purchased such Units. A Unitholder's basis in his Units and of his fractional interest in each Trust asset must be reduced by the Unitholder's share of the amortized acquisition premium, if any, on Obligations held by the Trust which the Unitholder has properly elected to amortize under Section 171 of the Code and must be increased by the Unitholder's share of the accrued original issue discount with respect to each Obligation which, at the time the Obligation was issued, had original issue discount and in the case of a Corporate Bond, by accrued market discount which the Unitholder has elected to annually include in income.

The Tax Reform Act of 1986 (the "Act"), among other things, provides that certain itemized deductions, such as investment expenses, tax return preparation fees and employee business expenses will be deductible by individuals only to the extent they exceed 2% of such individual's adjusted gross income. Temporary

regulations have been issued which require Unitholders to treat certain expenses of the Trust as miscellaneous itemized deductions subject to this limitation.

The Code provides a complex set of rules governing the accrual of original issue discount. These rules provide that original issue discount generally accrues on the basis of a constant compound interest rate. Special rules apply if the purchase price of an Obligation exceeds its original issue price plus the amount of original issue discount which would have previously accrued, based upon its issue price (its "adjusted issue price"). Similarly, these special rules would apply to a Unitholder if the tax basis of his pro rata portion of an Obligation issued with original issue discount exceeds his pro rata portion of its adjusted issue price. The application of these rules will also vary depending on the value of the Obligation on the date a Unitholder acquires his Units, and the price a Unitholder pays for his Units. It is possible that a Corporate Bond that has been issued at an original issue discount may be characterized as a "high-yield discount obligation" within the meaning of Section 163(e)(5) of the Code. To the extent that such an obligation is issued at a yield in excess of six percentage points over the applicable Federal rate, a portion of the original issue discount on such obligation will be characterized as a distribution on stock (e.g., dividends) for purposes of the dividends received deduction which is available to certain corporations with respect to certain dividends received by such corporations.

-4-

If a Unitholder's tax basis in his interest in any Corporate Bond held by the Trust is less than his allocable portion of such Corporate Bond's stated redemption price at maturity (or, if issued with original issue discount, his allocable portion of its revised issue price on the date he buys his Units), such difference will constitute market discount unless the amount of market discount is "de minimis" as specified in the Code. Market discount accrues daily computed on a straight line basis, unless the Unitholder elects to calculate accrued market discount under a constant yield method.

Accrued market discount is generally includible in taxable income of the Unitholders as ordinary income for Federal tax purposes upon the receipt of serial principal payments on Corporate Bonds held by the Trust, on the sale, maturity or disposition of such Corporate Bonds by the Trust and on the sale of a Unitholder's Units unless a Unitholder elects to include the accrued market discount in taxable income as such discount accrues. If a Unitholder does not elect to annually include accrued market discount in taxable income as it accrues, deductions of any interest expense incurred by the Unitholder to purchase or carry his Units will be reduced by such accrued market discount. In general, the portion of any interest which is not currently deductible is deductible when the accrued market discount is included in income upon the sale or redemption of the Corporate Bonds or the sale of Units.

A Unitholder will recognize taxable gain (or loss) when all or part of the pro rata interest in an Obligation is either sold by the Trust or redeemed or

when a Unitholder disposes of his Units in a taxable transaction, in each case for an amount greater (or less) than his tax basis therefor.

Any gain recognized on a sale or exchange and not constituting a realization of accrued "market discount" and any loss will, under current law, generally be capital gain or loss except in the case of a dealer or financial institution. As previously discussed, gain realized on the disposition of the interest of a Unitholder in any Corporate Bond deemed to have been acquired by the Unitholder with market discount will be treated as ordinary income to the extent the gain does not exceed the amount of accrued market discount not previously taken into income.

If a Unitholder disposes of a Unit, he is deemed thereby to have disposed of his entire pro rata interest in all trust assets including his pro rata portion of all of the Corporate Bonds represented by the Unit. This may result in a portion of the gain, if any, on such sale being taxable as ordinary income under the market discount rules (assuming no election was made by the Unitholder to include market discount in income as it accrues) as previously discussed.

A Unit who is a foreign investor (i.e., an investor other than a U.S. citizen or resident of U.S. corporation, partnership, estate or trust) will not be subject to United States Federal income taxes, including withholding taxes on interest income (including any original issue discount) on, or any gain from the sale or other disposition or redemption of any Obligation

-5-

held by the Trust or the sale of his Units provided that all of the following conditions are met:

(i) the interest income or gain is not effectively connected with the conduct by the foreign investor of a trade or business within the United States;

(ii) either

(a) the interest is United States source income (which is the case for most securities issued by United States issuers), the debt instrument is issued after July 18, 1984, the foreign investor does not own, directly or indirectly, 10% or more of the total combined voting power of all classes of voting stock of the issuer of the debt instrument and the Unitholder is not a controlled foreign corporation related (within the meaning of Section 864(d)(4) of the Code) to the issuer of the debt instrument; or

(b) the interest income is not from sources within the United States;

(iii) with respect to any gain, the foreign investor (if an individual)

is not present in the United States for 183 days or more during his or her taxable year; and

(iv) the foreign investor provides all certification which may be required of his status.

It should be noted that the "Revenue Reconciliation Act of 1993," includes a provision which eliminates the exemption from United States taxation, including withholding taxes, for certain "contingent interest." This provision applies to interest received after December 31, 1993. No opinion is expressed herein regarding the potential applicability of this provision and whether United States taxation or withholding taxes could be imposed with respect to income derived from the Units as a result thereof.

We have also examined the laws of the State of Missouri to determine their applicability to the Trust. It is our opinion that under Missouri law, as presently enacted and construed:

(i) The Trust is not an association taxable as a corporation for Missouri income tax purposes.

(ii) The Unitholders of the Trust will be treated as the owners of a pro rata portion of the Trust and the income of the Trust will therefore be treated as income of the Unitholders under Missouri law.

-6-

(iii) The Trust will not be subject to the Kansas City, Missouri Earnings and Profits Tax and each Unitholder's share of income of the Trust will not generally be subject to the Kansas City, Missouri Earnings and Profits Tax or the City of St. Louis Earnings Tax (except in the case of certain Unitholders, including corporations, otherwise subject to the St. Louis City Earnings Tax).

The scope of this opinion is expressly limited to the matters set forth herein, and, except as expressly set forth above, we express no opinion with respect to any other taxes, including state or local taxes or collateral tax consequences with respect to the purchase, ownership and disposition of Units.

Very truly yours

Re: Kemper Defined Funds Series 30
Insured California Series 14

Dear Sirs:

We have acted as special California counsel for Kemper Unit Investment Trust, a Service of Kemper Securities, Inc., as Depositor of Kemper Defined Funds Series 30--Insured California Series 14 (the "Fund"), in connection with the issuance under the Trust Indenture and Agreement dated February 22, 1995, between Kemper Unit Investment Trust, a Service of Kemper Securities, Inc., as Depositor, and Investors Fiduciary Trust Company, as Trustee, of 297,000 Units of fractional undivided interest in the Fund (the "Units") in exchange for certain bonds, as well as "regular-way" and "when-issued" contracts for the purchase of bonds (such bonds and contracts are hereinafter referred to collectively as the "Securities").

In connection therewith, we have examined such corporate records, certificates and other documents and such questions of law as we have deemed necessary or appropriate for the purpose of this opinion, and, on the basis of such examination, and upon existing provisions of the Revenue and Taxation Code of the State of California, we are of the opinion that:

1. The Fund is not an association taxable as a corporation and the income of the Fund will be treated as the income of the certificateholders under the income tax laws of California.

2. Amounts treated as interest on the underlying securities which are exempt from tax under California personal income tax and property tax laws when received by the Fund will, under such laws, retain their status as tax-exempt interest when distributed to certificateholders. However, interest on the underlying securities attributed to a certificateholder which is a corporation subject to the California franchise tax laws may be includable in its gross income for purposes of determining its California franchise tax.

3. Under California income tax law, each certificateholder in the Fund will have a taxable event when the Fund disposes of a security (whether by sale, exchange, redemption, or payment at maturity) or when the certificateholder redeems or sells Units. Because of the requirement that tax cost basis be reduced to reflect amortization of bond premium, under some circumstances a certificateholder may realize taxable gain when Units are sold or redeemed for an amount equal to, or less than, their original cost. The total tax cost of each Unit to a certificateholder is allocated among each of the bond issues held in the Fund (in accordance with the proportion of the Fund comprised by each bond issue) in order to determine his per unit tax cost for each bond issue; and the tax cost reduction requirements relating to amortization of bond premium will apply separately to the per unit cost of each bond issue. Certificateholders' bases in their Units, and the bases for their fractional interest in each Fund asset, may have to be adjusted for their pro rata share of accrued interest received, if any, on securities delivered after the certificateholders' respective settlement dates.

4. Under the California personal property tax laws, bonds (including the Securities) or any interest therein is exempt from such tax.

5. Any proceeds paid under the insurance policy, if any, issued to the Trustee of the Fund with respect to the Securities which represent maturing interest on defaulted obligations held by the Trustee will be exempt from California personal income tax if, and to the same extent as, such interest would have been so exempt if paid by the issuer of the defaulted obligations.

6. Under Section 17280(b)(2) of the California Revenue and Taxation Code, interest on indebtedness incurred or continued to purchase or carry Units of the Fund is not deductible for the purposes of the California personal income tax. While there presently is no California authority interpreting this provision, Section 17280(b)(2) directs the California Franchise Tax Board to prescribe regulations determining the proper allocation and apportionment of interest costs for this purpose. The Franchise Tax Board has not yet proposed or prescribed such regulations. In interpreting the generally similar Federal provision, the Internal Revenue Service has taken the position that such indebtedness need not be directly traceable to the purchase or carrying of Units (although the Service has not contended that a deduction for interest on indebtedness incurred to purchase or improve a personal residence or to purchase goods or services for personal consumption will be disallowed). In the absence of conflicting regulations or other California authority, the California

Franchise Tax Board generally has interpreted California statutory tax provisions in accord with Internal Revenue Service interpretations of similar Federal provisions.

Opinions relating to the validity of securities and the exemption of interest thereon from State of California income tax are rendered by bond counsel to the issuing authority at the time securities are issued and we have relied solely upon such opinions, or as to

Investors Fiduciary Trust Company

securities not yet delivered, forms of such opinions contained in official statements relating to such securities. Except in certain instances in which we acted as bond counsel to issuers of securities, and as such made a review of proceedings relating to the issuance of certain securities at the time of their issuance, we have not made any review of proceedings relating to the issuance of securities or the bases of bond counsels' opinion.

We hereby consent to the filing of this opinion as an exhibit to the Registration Statement (SEC No. 33-57693) relating to the Units referred to above and to the use of our name and to the reference to our firm in said Registration Statement and in the related Prospectus.

Very truly yours,

Re: Kemper Defined Funds State File 30
Insured Michigan Series 10

Gentlemen:

We have acted as special Michigan counsel to you as Depositor and Trustee of Kemper Defined Funds State File 30 -- Insured Michigan Series 10 (the "Insured Michigan Trust") referred to above (the "Fund") . You have asked that we, acting in such capacity, render an opinion to you with respect to certain matters relating to the issuance of the units of fractional undivided interest in the Fund (the "Units") pursuant to a Registration Statement on Form S-6 filed with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933, as amended (the "Registration Statement").

You have requested our opinion as to the applicability to the Insured Michigan Trust (the "Michigan Trust") and the holders of Units (the "Unitholders") , each of which Units represents the ownership of a specified fractional undivided interest in the assets of the Michigan Trust, of the Michigan Income Tax Act (M.C.L.A. (S) (S)206.1 et seq.; M.S.A. (S) (S)7.557(101) et seq.) (the "Michigan Income Tax"), the City Income Tax Act (M.C.L.A. (S) (S)141.501 et seq.; M.S.A. (S) (S)5.3194(1) et seq.) , which incorporates the "Uniform City Income Tax ordinance," the First Class School District excise tax upon income (M.C.L.A. (S)380.451; M.S.A. (S) (S)15.4451) (collectively, the "income tax laws"), the Michigan Single Business Tax Act (M.C.L.A. (S) (S)208.1 et seq.; M.S.A. (S) (S)7.558(1) et seq.) (the "Single Business Tax") and the Michigan Tax on ownership of Intangible Personal Property (M.C.L.A. (S) (S)205.131 et seq.; M.S.A. (S) (S)7.556(1) et seq.) (the "Intangibles Tax"). You have also requested our opinion regarding the tax status of proceeds payable from an insurance policy to be obtained by either the Fund or by the issuer of

the Bonds involved, guaranteeing prompt payment of principal and interest on all Bonds in the portfolio of the Fund.

The Michigan Trust, its formation, its proposed method of operation, the rights of owners of Certificates representing Units, the nature of such ownership and the portfolio of

Miller, Canfield, Paddock and Stone

February 22, 1995

Page 2

investments of the Michigan Trust are described and set forth in the Prospectus dated February 22, 1995, filed with the Securities and Exchange Commission in Registration No. 33-57693. In giving our opinion set forth hereunder, we have relied upon the facts contained in such Registration Statement, including the fact that, at the respective dates of issuance of the underlying Debt Obligations, opinions of bond counsel to the respective Michigan authorities issuing such Debt Obligations were given with respect to the validity of the Debt obligations and the exemption of the same, and of the interest thereon, from Michigan taxation.

Based on the above, it is our opinion that:

The Michigan Trust and the owners of Units will, in our opinion, be treated for purposes of the Michigan income tax laws and the Single Business Tax in substantially the same manner as they are for purposes of the Federal income tax laws, as currently enacted. Accordingly, we have relied upon the opinion of Messrs. Chapman and Cutler as to the applicability of Federal income tax under the Internal Revenue Code of 1986, as currently amended, to the Michigan Trust and the Unitholders.

Under the income tax laws of the State of Michigan, the Michigan Trust is not an association taxable as a corporation; the income of the Michigan Trust will be treated as the income of the Unitholders of the Michigan Trust and be deemed to have been received by them when received by the Michigan Trust. Interest on the Debt Obligations in the Michigan Trust which is exempt from tax under the Michigan income tax laws when received by the Michigan Trust will retain its status as tax exempt interest to the Unitholders of the Michigan Trust.

For purposes of the Michigan income tax laws, each Unitholder of the Michigan Trust will be considered to have received his pro rata share of interest on each Debt Obligation in the Michigan Trust when it is received by the Michigan Trust, and each Unitholder will have a taxable event when the Michigan Trust disposes of a Debt Obligation (whether by sale, exchange, redemption or payment at maturity) or when the Unitholder redeems or sells his Unit, to the extent the transaction constitutes a taxable event for Federal income tax purposes. The tax cost of each Unit to a Unitholder will be

established and allocated for purposes of the Michigan income tax laws in the same manner as such cost is established and allocated for Federal income tax purposes.

Under the Michigan Intangibles Tax, the Michigan Trust is not taxable and the pro rata ownership of the underlying Debt Obligations, as well as the interest thereon, will be exempt to the Unitholders to the extent the Michigan Trust consists of obligations of the State of Michigan or its political subdivisions or municipalities, or of obligations of the Commonwealth of Puerto Rico, Guam or of the United States Virgin Islands.

The Michigan Single Business Tax replaced the tax on corporate and financial institution income under the Michigan Income Tax, and the intangible tax with respect to those intangibles of persons subject to the Single Business Tax the income from which would

Miller, Canfield, Paddock and Stone

February 22, 1995

Page 3

be considered in computing the Single Business Tax. Persons are subject to the Single Business Tax only if they are engaged in "business activity," as defined in the Act. Under the Single Business Tax, both interest received by the Michigan Trust on the underlying Debt Obligations and any amount distributed from the Michigan Trust to a Unitholder, if not included in determining taxable income for Federal income tax purposes, is also not included in the adjusted tax base upon which the Single Business Tax is computed, of either the Michigan Trust or the Unitholders. If the Michigan Trust or the Unitholders have a taxable event for Federal income tax purposes when the Michigan Trust disposes of a Debt Obligation (whether by sale, exchange, redemption or payment at maturity) or the Unitholder redeems or sells his Unit, an amount equal to any gain realized from such taxable event which was included in the computation of taxable income for Federal income tax purposes (plus an amount equal to any capital gain of an individual realized in connection with such event but excluded in computing that individual's Federal taxable income) will be included in the tax base against which, after allocation, apportionment and other adjustments, the Single Business Tax is computed. The tax base will be reduced by an amount equal to any capital loss realized from such a taxable event, whether or not the capital loss was deducted in computing Federal taxable income in the year the loss occurred. Unitholders should consult their tax advisor as to their status under Michigan law.

Any proceeds paid under an insurance policy issued to the Trustee of the Fund, or paid under individual policies obtained by issuers of Bonds, which, when received by the Unitholders, represent maturing interest on defaulted obligations held by the Trustee, will be excludable from the Michigan income tax laws and the Single Business Tax if, and to the same extent as, such interest

would have been so excludable if paid by the issuer of the defaulted obligations. While treatment under the Michigan Intangibles Tax is not premised upon the characterization of such proceeds under the Internal Revenue Code, the Michigan Department of Treasury should adopt the same approach as under the Michigan income tax laws and the Single Business tax.

Chapman and Cutler of 111 West Monroe Street, Chicago, Illinois 60603, are entitled to rely on this opinion as though it were addressed to them.

We also advise you that, as the Tax Reform Act of 1986 eliminates the capital gain deduction for tax years beginning after December 31, 1986, the federal adjusted gross income, the computation base for the Michigan Income Tax, of a Unitholder will be increased accordingly to the extent such capital gains are realized when the Michigan Trust disposes of a Debt obligation or when the Unitholder redeems or sells a Unit, to the extent such transaction constitutes a taxable event for Federal income tax purposes.

Mr. Mike Thoms
Kemper Securities Group, Inc.
Unit Investment Trust
77 West Wacker Drive-29th Floor
Chicago, IL 60601

Re: Kemper Defined Funds, Insured National Series 14, Insured California Series 14 and Insured Michigan Series 10.

Dear Mr. Thoms:

Please be advised that once Moody's Investors Service has independently verified the existence of insurance policies on all Bonds expected to be included in the Trusts, we will assign Aaa ratings to the Units in the series of Trusts described above. The ratings on the Units will reflect the portfolios of the Trusts, which will be composed solely of securities covered by bond insurance policies. The insurance companies issuing the policies are all rated Aaa by Moody's.

Insurance guarantying the payments of principal and interest, when due, on the Bonds in the portfolio of the Trust has been obtained from an insurance company either by the Trust, by the Issuer of the Bonds involved, by a prior owner of the Bonds or by the Sponsor prior to the deposit of such Bonds in the Trust. It is important to note that the insurance relates only to the Bonds in the Trust and does not directly insure the Units or assure payment of the market value thereof. While as a result of such insurance the Units of the Trust will receive a rating of "Aaa" by Moody's Investors Service, Moody's has indicated that this rating is not a recommendation to buy, hold or sell Units. This rating reflects Moody's determination that the Bonds in the portfolio of the Trust are judged to be of the best quality. This rating does not reflect a determination by Moody's that the Unitholder will receive all principal and interest payable on such Bonds through their nominal maturity. This is due to the possibility that the Trust may, for a variety of reasons, dispose of such Bonds, including sales to meet redemptions, to pay expenses of the Trustee, to wind up the Trust when the value of the Bonds in the Trust falls below a certain minimum amount and for other reasons specified in the Indenture. Accordingly, while the "Aaa" rating reflects that such Bonds in the portfolio carry the smallest degree of

credit risk and they are generally considered to be "gilt edged", this rating does not assure a Unitholder that it will receive all principal and interest payable on such Bonds through their nominal maturity.
