Janus Investment Fund

Prospectus

* Not currently offered.

The Securities and Exchange Commission has not approved or disapproved of these securities or passed on the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

JANUS

This Prospectus describes nine portfolios (each, a “Fund” and collectively, the “Funds”) of Janus Investment Fund (the “Trust”). Janus Capital Management LLC (“Janus Capital” or “Janus”) serves as investment adviser to each Fund.

The Funds offer multiple classes of shares in order to meet the needs of various types of investors. Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, Class R Shares, and Class T Shares (individually and/or collectively, the “Shares”) are offered by this Prospectus.

The Shares are not offered directly to individual investors. Certain financial intermediaries may not offer all classes of Shares. For additional information about these classes of Shares and whether or not you are eligible to purchase these Shares, please refer to the Shareholder’ s Guide section of the Prospectus.

Fund summary

Janus Balanced Fund

Ticker: JDBAX Class A Shares JABRX Class S Shares JABNX Class N Shares JABAX Class T Shares
JABCX Class C Shares JBALX Class I Shares JDBRX Class R Shares

INVESTMENT OBJECTIVE

Janus Balanced Fund seeks long-term capital growth, consistent with preservation of capital and balanced by current income.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the “Purchases” section on page 85 of the Fund’s Prospectus and in the “Purchases” section on page 89 of the Fund’s Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees	0.55%	0.55%	0.55%	0.55%	0.55%	0.55%	0.55%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.17%	0.16%	0.28%	0.14%	0.04%	0.28%	0.28%
Total Annual Fund Operating Expenses	0.97%	1.71%	1.08%	0.69%	0.59%	1.33%	0.83%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 668	\$ 866	\$ 1,080	\$ 1,696
Class C Shares	\$ 274	\$ 539	\$ 928	\$ 2,019
Class S Shares	\$ 110	\$ 343	\$ 595	\$ 1,317
Class I Shares	\$ 70	\$ 221	\$ 384	\$ 859
Class N Shares	\$ 60	\$ 189	\$ 329	\$ 738
Class R Shares	\$ 135	\$ 421	\$ 729	\$ 1,601
Class T Shares	\$ 85	\$ 265	\$ 460	\$ 1,025

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 668	\$ 866	\$ 1,080	\$ 1,696
Class C Shares	\$ 174	\$ 539	\$ 928	\$ 2,019
Class S Shares	\$ 110	\$ 343	\$ 595	\$ 1,317
Class I Shares	\$ 70	\$ 221	\$ 384	\$ 859
Class N Shares	\$ 60	\$ 189	\$ 329	\$ 738
Class R Shares	\$ 135	\$ 421	\$ 729	\$ 1,601
Class T Shares	\$ 85	\$ 265	\$ 460	\$ 1,025

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’ s performance. During the most recent fiscal year, the Fund’ s portfolio turnover rate was 84% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally investing 35-65% of its assets in equity securities and the remaining assets in fixed-income securities and cash equivalents. The Fund normally invests at least 25% of its assets in fixed-income senior securities. Fixed-income securities may include corporate debt securities, U.S. Government obligations, mortgage-backed securities and other mortgage-related products, and short-term securities. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets. As of September 30, 2012, approximately 55.8% of the Fund’ s assets were held in equity securities.

In choosing investments for the Fund, the portfolio managers apply a “bottom up” approach with one portfolio manager focusing on the equity portion of the Fund and the other portfolio manager focusing on the fixed-income portion of the Fund. With respect to corporate issuers, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’ s investment policies. The portfolio managers may also consider economic factors, such as the effect of interest rates on certain of the Fund’ s fixed-income investments. The portfolio managers share day-to-day responsibility for the Fund’ s investments.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’ s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking a balanced portfolio, including common stocks and bonds. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’ s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers’ belief about a company’ s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’ s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio managers’ perception of a company’ s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’ s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund’ s net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. Fixed-income securities are also subject to credit

risk, prepayment risk, valuation risk, and liquidity risk. Credit risk is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. Prepayment risk is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that the portfolio managers would like or at the price that the portfolio managers believe the security is currently worth.

Mortgage-Backed Securities Risk. Mortgage-backed securities tend to be more sensitive to changes in interest rates than other types of securities. Investments in mortgage-backed securities are subject to both extension risk, where borrowers extend the duration of their mortgages in times of rising interest rates, and prepayment risk, where borrowers pay off their mortgages sooner than expected in times of declining interest rates. These risks may reduce the Fund's returns. In addition, investments in mortgage-backed securities, including those comprised of subprime mortgages, may be subject to a higher degree of credit risk, valuation risk, and liquidity risk than various other types of fixed-income securities.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. To the extent the Fund invests in foreign debt securities, such investments are sensitive to changes in interest rates. Additionally, investments in securities of foreign governments involve the risk that a foreign government may not be willing or able to pay interest or repay principal when due. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Sovereign Debt Risk. The Fund may invest in U.S. and foreign government debt securities ("sovereign debt"). Investments in U.S. sovereign debt are considered low risk. However, investments in non-U.S. sovereign debt can involve a high degree of risk, including the risk that the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or to pay the interest on its sovereign debt in a timely manner. A sovereign debtor's willingness or ability to satisfy its debt obligation may be affected by various factors including, but not limited to, its cash flow situation, the extent of its foreign currency reserves, the availability of foreign exchange when a payment is due, and the relative size of its debt position in relation to its economy as a whole. In the event of default, there may be limited or no legal remedies for collecting sovereign debt and there may be no bankruptcy proceedings through which the Fund may collect all or part of the sovereign debt that a governmental entity has not repaid.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds may be more sensitive than other types of bonds to economic changes, political changes, or adverse developments specific to the company that issued the bond, which may adversely affect their value.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares for periods prior to May 31, 2012, reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Balanced Index (reflects no deduction for expenses, fees, or taxes)	10.72%	3.96%	6.50%	7.76%

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

The Balanced Index is an internally-calculated, hypothetical combination of unmanaged indices that combines total returns from the S&P 500® Index (55%) and the Barclays U.S. Aggregate Bond Index (45%).

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Managers: **Marc Pinto**, CFA, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since May 2005. **Gibson Smith**, Co-Chief Investment Officer of Janus Capital, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since May 2005.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Contrarian Fund

Ticker: JCNAX Class A Shares JCNIX Class S Shares JCNNX Class N Shares JSVAX Class T Shares
JCNCX Class C Shares JCONX Class I Shares JCNRX Class R Shares

INVESTMENT OBJECTIVE

Janus Contrarian Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 85 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING

EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees (may adjust up or down)	0.43%	0.43%	0.43%	0.43%	0.43%	0.43%	0.43%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.23%	0.30%	0.32%	0.19%	0.07%	0.31%	0.33%
Total Annual Fund Operating Expenses	0.91%	1.73%	1.00%	0.62%	0.50%	1.24%	0.76%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 663	\$ 848	\$ 1,050	\$ 1,630
Class C Shares	\$ 276	\$ 545	\$ 939	\$ 2,041
Class S Shares	\$ 102	\$ 318	\$ 552	\$ 1,225
Class I Shares	\$ 63	\$ 199	\$ 346	\$ 774
Class N Shares	\$ 51	\$ 160	\$ 280	\$ 628
Class R Shares	\$ 126	\$ 393	\$ 681	\$ 1,500
Class T Shares	\$ 78	\$ 243	\$ 422	\$ 942

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 663	\$ 848	\$ 1,050	\$ 1,630
Class C Shares	\$ 176	\$ 545	\$ 939	\$ 2,041
Class S Shares	\$ 102	\$ 318	\$ 552	\$ 1,225
Class I Shares	\$ 63	\$ 199	\$ 346	\$ 774
Class N Shares	\$ 51	\$ 160	\$ 280	\$ 628
Class R Shares	\$ 126	\$ 393	\$ 681	\$ 1,500
Class T Shares	\$ 78	\$ 243	\$ 422	\$ 942

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 53% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity securities with the potential for long-term growth of capital. The portfolio manager emphasizes investments in companies with attractive price/free cash flow, which is the relationship between the price of a stock and the company’s available cash from operations, minus capital expenditures. The portfolio manager will typically seek attractively valued companies that are improving their free cash flow and returns on invested capital. Such companies may also include special situations companies that are experiencing management changes and/or are currently out of favor. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’s exposure to a particular market, to adjust the Fund’s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’s risk profile. The Fund’s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Value Investing Risk. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “value” stocks may perform differently than other types of stocks and from the market as a whole, and can continue to be undervalued by the market for long periods of time. It is also possible that a value stock will never appreciate to the extent expected by the Fund’s portfolio manager.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Special Situations Risk. The Fund may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in "special situations" companies can present greater risks than investments in companies not experiencing special situations, and the Fund's performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended. This gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund's net asset value and total return.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers. If Class N Shares of the Fund had been available during the periods shown, the performance may have been different.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

The Standard & Poor's ("S&P") 500® Index is a commonly recognized, market-capitalization weighted index of 500 widely held equity securities, designed to measure broad U.S. equity performance. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Daniel Kozlowski, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since July 2011.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

INVESTMENT OBJECTIVE

Janus Enterprise Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 85 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.31%	0.32%	0.32%	0.11%	0.07%	0.31%	0.32%
Total Annual Fund Operating Expenses	1.20%	1.96%	1.21%	0.75%	0.71%	1.45%	0.96%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 690	\$ 934	\$ 1,197	\$ 1,946
Class C Shares	\$ 299	\$ 615	\$ 1,057	\$ 2,285
Class S Shares	\$ 123	\$ 384	\$ 665	\$ 1,466
Class I Shares	\$ 77	\$ 240	\$ 417	\$ 930
Class N Shares	\$ 73	\$ 227	\$ 395	\$ 883
Class R Shares	\$ 148	\$ 459	\$ 792	\$ 1,735
Class T Shares	\$ 98	\$ 306	\$ 531	\$ 1,178

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 690	\$ 934	\$ 1,197	\$ 1,946
Class C Shares	\$ 199	\$ 615	\$ 1,057	\$ 2,285
Class S Shares	\$ 123	\$ 384	\$ 665	\$ 1,466
Class I Shares	\$ 77	\$ 240	\$ 417	\$ 930
Class N Shares	\$ 73	\$ 227	\$ 395	\$ 883
Class R Shares	\$ 148	\$ 459	\$ 792	\$ 1,735
Class T Shares	\$ 98	\$ 306	\$ 531	\$ 1,178

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 14% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential, and normally invests at least 50% of its equity assets in medium-sized companies. Medium-sized companies are those whose market capitalization falls within the range of companies in the Russell Midcap® Growth Index. Market capitalization is a commonly used measure of the size and value of a company. The market capitalizations within the index will vary, but as of September 30, 2012, they ranged from approximately \$778 million to \$22.0 billion. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Mid-Sized Companies Risk. The Fund’s investments in securities issued by mid-sized companies may involve greater risks than are customarily associated with larger, more established companies. Securities issued by mid-sized companies tend to be more volatile than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio manager’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other

parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on July 12, 2012.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares for periods prior to July 12, 2012, reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to July 12, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to a broad-based securities market index. The index is not actively managed and is not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class T Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Brian Demain, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since November 2007.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Forty Fund

Ticker: JDCAX Class A Shares JARTX Class S Shares JFRNX Class N Shares JACTX Class T Shares
 JACCX Class C Shares JCAPX Class I Shares JDCRX Class R Shares

INVESTMENT OBJECTIVE

Janus Forty Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 85 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees (may adjust up or down)	0.48%	0.48%	0.48%	0.48%	0.48%	0.48%	0.48%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.27%	0.23%	0.31%	0.11%	0.03%	0.29%	0.29%
Total Annual Fund Operating Expenses	1.00%	1.71%	1.04%	0.59%	0.51%	1.27%	0.77%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 671	\$ 875	\$ 1,096	\$ 1,729
Class C Shares	\$ 274	\$ 539	\$ 928	\$ 2,019
Class S Shares	\$ 106	\$ 331	\$ 574	\$ 1,271
Class I Shares	\$ 60	\$ 189	\$ 329	\$ 738
Class N Shares	\$ 52	\$ 164	\$ 285	\$ 640
Class R Shares	\$ 129	\$ 403	\$ 697	\$ 1,534
Class T Shares	\$ 79	\$ 246	\$ 428	\$ 954

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 671	\$ 875	\$ 1,096	\$ 1,729
Class C Shares	\$ 174	\$ 539	\$ 928	\$ 2,019
Class S Shares	\$ 106	\$ 331	\$ 574	\$ 1,271
Class I Shares	\$ 60	\$ 189	\$ 329	\$ 738
Class N Shares	\$ 52	\$ 164	\$ 285	\$ 640
Class R Shares	\$ 129	\$ 403	\$ 697	\$ 1,534
Class T Shares	\$ 79	\$ 246	\$ 428	\$ 954

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 9% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally investing primarily in a core group of 20-40 common stocks selected for their growth potential. The Fund may invest in companies of any size, from larger, well-established companies to smaller, emerging growth companies. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio manager’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended. This gives the Fund’s portfolio manager more flexibility to hold larger positions in a smaller number of securities. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund’s net asset value and total return.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions

where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class S Shares, Class A Shares, Class C Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009, after the reorganization of each corresponding class of shares of Janus Adviser Forty Fund ("JAD predecessor fund") into each respective share class of the Fund. Class T Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class S Shares reflects the performance of the JAD predecessor fund's Class S Shares (formerly named Class I Shares) from August 1, 2000 to July 6, 2009 (prior to the reorganization), calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers. For the periods prior to August 1, 2000, the performance shown for Class S Shares reflects the historical performance of the Retirement Shares of Janus Aspen Series - Forty Portfolio (as a result of a separate prior reorganization of those Retirement Shares into the JAD predecessor fund). The performance shown for certain periods prior to August 1, 2000 was calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, without the effect of any fee and expense limitations or waivers.

The performance shown for Class A Shares reflects the performance of the JAD predecessor fund's Class A Shares from September 30, 2004 to July 6, 2009 (prior to the reorganization), calculated using the fees and expenses of Class A Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers. For the periods August 1, 2000 to September 30, 2004, the performance shown for Class A Shares reflects the historical performance of the JAD predecessor fund's Class S Shares (formerly named Class I Shares). For the periods prior to August 1, 2000, the performance shown for Class A Shares reflects the historical performance of the Retirement Shares of Janus Aspen Series - Forty Portfolio (as a result of a separate prior reorganization of those Retirement Shares into the JAD predecessor fund).

The performance shown for certain periods prior to September 30, 2004 was calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, without the effect of any fee and expense limitations or waivers.

The performance shown for Class C Shares reflects the performance of the JAD predecessor fund's Class C Shares from September 30, 2002 to July 6, 2009 (prior to the reorganization), calculated using the fees and expenses of Class C Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers. For the periods August 1, 2000 to September 30, 2002, the performance shown for Class C Shares reflects the historical performance of the JAD predecessor fund's Class S Shares (formerly named Class I Shares). For the periods prior to August 1, 2000, the performance shown for Class C Shares reflects the historical performance of the Retirement Shares of Janus Aspen Series - Forty Portfolio (as a result of a separate prior reorganization of those Retirement Shares into the JAD predecessor fund).

The performance shown for certain periods prior to September 30, 2002 was calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares reflects the performance of the JAD predecessor fund's Class I Shares from November 28, 2005 to July 6, 2009 (prior to the reorganization), calculated using the fees and expenses of Class I Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers. For the periods August 1, 2000 to November 28, 2005, the performance shown for Class I Shares reflects the historical performance of the JAD predecessor fund's Class S Shares (formerly named Class I Shares). For the periods prior to August 1, 2000, the performance shown for Class I Shares reflects the historical performance of the Retirement Shares of Janus Aspen Series - Forty Portfolio (as a result of a separate prior reorganization of those Retirement Shares into the JAD predecessor fund). The performance shown for certain periods prior to November 28, 2005 was calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, without the effect of any fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund' s Class S Shares from July 6, 2009 to May 31, 2012, calculated using the fees and expenses of Class S Shares, net of any applicable fee and expense limitations or waivers. For the period from August 1, 2000 to July 6, 2009, the performance shown for Class N Shares reflects the performance of Class S Shares (formerly named Class I Shares) of the JAD predecessor fund (prior to the reorganization of those Class S Shares into the Fund), calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers. For the periods prior to August 1, 2000, the performance shown for Class N Shares reflects the historical performance of the Retirement Shares of Janus Aspen Series - Forty Portfolio (as a result of a separate prior reorganization of those Retirement Shares into the JAD predecessor fund). The performance for certain periods prior to August 1, 2000 was calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, without the effect of any fee and expense limitations or waivers.

The performance shown for Class R Shares reflects the performance of the JAD predecessor fund' s Class R Shares from September 30, 2004 to July 6, 2009 (prior to the reorganization), calculated using the fees and expenses of Class R Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers. For the periods August 1, 2000 to September 30, 2004, the performance shown for Class R Shares reflects the historical performance of the JAD predecessor fund' s Class S Shares (formerly named Class I Shares). For the periods prior to August 1, 2000, the performance shown for Class R Shares reflects the historical performance of the Retirement Shares of Janus Aspen Series - Forty Portfolio (as a result of a separate prior reorganization of those Retirement Shares into the JAD predecessor fund). The performance shown for certain periods prior to September 30, 2004 was calculated using the fees and expenses of Class R Shares of the JAD predecessor fund, without the effect of any fee and expense limitations or waivers.

The performance shown for Class T Shares reflects the performance of the JAD predecessor fund' s Class S Shares (formerly named Class I Shares) from August 1, 2000 to July 6, 2009 (prior to the reorganization), calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers. For the periods prior to August 1, 2000, the performance shown for Class T Shares reflects the historical performance of the Retirement Shares of Janus Aspen Series - Forty Portfolio (as a result of a separate prior reorganization of those Retirement Shares into the JAD predecessor fund). The performance shown for certain periods prior to August 1, 2000 was calculated using the fees and expenses of Class S Shares of the JAD predecessor fund, without the effect of any fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class I Shares, Class R Shares, and Class T Shares of the Fund had been available during each period prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund' s commencement of Class S Shares, Class A Shares, Class C Shares, Class I Shares, Class N Shares, Class R Shares, and Class T Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund' s average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund' s performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund' s past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

The Russell 1000® Growth Index measures the performance of those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class S Shares for periods following July 6, 2009; for the JAD predecessor fund's Class S Shares (formerly named Class I Shares) for the periods August 1, 2000 to July 6, 2009; and actual distributions for other classes of shares for periods prior to August 1, 2000. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class S Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class S Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Ron Sachs, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since January 2008.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

JGOCX Class C Shares JGROX Class I Shares JDGRX Class R Shares

INVESTMENT OBJECTIVE

Janus Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the “Purchases” section on page 85 of the Fund’s Prospectus and in the “Purchases” section on page 89 of the Fund’s Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees (may adjust up or down)	0.49%	0.49%	0.49%	0.49%	0.49%	0.49%	0.49%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.25%	0.19%	0.31%	0.14%	0.05%	0.30%	0.30%
Total Annual Fund Operating Expenses	0.99%	1.68%	1.05%	0.63%	0.54%	1.29%	0.79%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 670	\$ 872	\$ 1,091	\$ 1,718
Class C Shares	\$ 271	\$ 530	\$ 913	\$ 1,987
Class S Shares	\$ 107	\$ 334	\$ 579	\$ 1,283
Class I Shares	\$ 64	\$ 202	\$ 351	\$ 786
Class N Shares	\$ 55	\$ 173	\$ 302	\$ 677
Class R Shares	\$ 131	\$ 409	\$ 708	\$ 1,556
Class T Shares	\$ 81	\$ 252	\$ 439	\$ 978

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 670	\$ 872	\$ 1,091	\$ 1,718
Class C Shares	\$ 171	\$ 530	\$ 913	\$ 1,987
Class S Shares	\$ 107	\$ 334	\$ 579	\$ 1,283
Class I Shares	\$ 64	\$ 202	\$ 351	\$ 786
Class N Shares	\$ 55	\$ 173	\$ 302	\$ 677
Class R Shares	\$ 131	\$ 409	\$ 708	\$ 1,556
Class T Shares	\$ 81	\$ 252	\$ 439	\$ 978

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 46% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. Although the Fund may invest in companies of any size, it generally invests in larger, more established companies. As of September 30, 2012, the Fund’s weighted average market capitalization was \$102.8 billion. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio managers apply a “bottom up” approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers’ belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio managers’ perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other

income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares for periods prior to May 31, 2012, reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

The Core Growth Index is an internally-calculated, hypothetical combination of unmanaged indices that combines total returns from the Russell 1000® Growth Index (50%) and the S&P 500® Index (50%). This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 672	\$ 878	\$ 1,101	\$ 1,740
Class C Shares	\$ 288	\$ 582	\$ 1,001	\$ 2,169
Class S Shares	\$ 118	\$ 368	\$ 638	\$ 1,409
Class I Shares	\$ 78	\$ 243	\$ 422	\$ 942
Class N Shares	\$ 67	\$ 211	\$ 368	\$ 822
Class R Shares	\$ 143	\$ 443	\$ 766	\$ 1,680
Class T Shares	\$ 93	\$ 290	\$ 504	\$ 1,120

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 672	\$ 878	\$ 1,101	\$ 1,740
Class C Shares	\$ 188	\$ 582	\$ 1,001	\$ 2,169
Class S Shares	\$ 118	\$ 368	\$ 638	\$ 1,409
Class I Shares	\$ 78	\$ 243	\$ 422	\$ 942
Class N Shares	\$ 67	\$ 211	\$ 368	\$ 822
Class R Shares	\$ 143	\$ 443	\$ 766	\$ 1,680
Class T Shares	\$ 93	\$ 290	\$ 504	\$ 1,120

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 45% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally emphasizing investments in common stocks. The Fund will normally invest up to 75% of its assets in equity securities selected primarily for their growth potential and at least 25% of its assets in securities the portfolio manager believes have income potential. Eligible equity securities in which the Fund may invest include:

- domestic and foreign common stocks
- preferred stocks
- securities convertible into common stocks or preferred stocks, such as convertible preferred stocks, bonds, and debentures
- other securities with equity characteristics

Equity securities may make up part or all of the income component if they currently pay dividends or the portfolio manager believes they have potential for increasing or commencing dividend payments. The Fund invests to a lesser extent in fixed-income securities, such as corporate bonds. The Fund is not designed for investors who need consistent income, and the Fund’s investment strategies could result in significant fluctuations of income.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio manager’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund's net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. Fixed-income securities are also subject to credit risk, prepayment risk, valuation risk, and liquidity risk. Credit risk is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. Prepayment risk is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that the portfolio manager would like or at the price that the portfolio manager believes the security is currently worth.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers. If Class N Shares of the Fund had been available during the periods shown, the performance may have been different.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for

direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Marc Pinto, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since November 2007.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

INVESTMENT OBJECTIVE

Janus Research Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the “Purchases” section on page 85 of the Fund’s Prospectus and in the “Purchases” section on page 89 of the Fund’s Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Management Fees (may adjust up or down)	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	None
Other Expenses ⁽¹⁾	0.20%	0.19%	0.31%	0.14%	0.05%	0.32%
Total Annual Fund Operating Expenses	1.09%	1.83%	1.20%	0.78%	0.69%	0.96%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 680	\$ 902	\$ 1,141	\$ 1,827
Class C Shares	\$ 286	\$ 576	\$ 990	\$ 2,148
Class S Shares	\$ 122	\$ 381	\$ 660	\$ 1,455
Class I Shares	\$ 80	\$ 249	\$ 433	\$ 966
Class N Shares	\$ 70	\$ 221	\$ 384	\$ 859
Class T Shares	\$ 98	\$ 306	\$ 531	\$ 1,178

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 680	\$ 902	\$ 1,141	\$ 1,827
Class C Shares	\$ 186	\$ 576	\$ 990	\$ 2,148
Class S Shares	\$ 122	\$ 381	\$ 660	\$ 1,455
Class I Shares	\$ 80	\$ 249	\$ 433	\$ 966
Class N Shares	\$ 70	\$ 221	\$ 384	\$ 859
Class T Shares	\$ 98	\$ 306	\$ 531	\$ 1,178

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 64% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. The Fund may invest in companies of any size, from larger, well-established companies to smaller, emerging growth companies. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

Janus Capital’s equity research analysts, overseen by the Portfolio Oversight Team led by Janus Capital’s Director of Equity Research James P. Goff (the “Research Team”), select investments for the Fund. The Research Team, comprised of sector specialists, conducts fundamental analysis with a focus on “bottom up” research, quantitative modeling, and valuation analysis. Using this research process, analysts rate their stocks based upon attractiveness. Analysts bring their high-conviction ideas to their respective sector teams. Sector teams compare the appreciation and risk potential of each of the team’s high-conviction ideas and construct a sector portfolio that is intended to maximize the best risk-reward opportunities. Although the Research Team may find high-conviction investment ideas anywhere in the world, the Research Team emphasizes investments in securities of U.S.-based issuers.

Positions may be sold when, among other things, there is no longer high conviction in the return potential of the investment or if the risk characteristics have caused a re-evaluation of the opportunity. This may occur if the stock has appreciated and reflects the anticipated value, if another company represents a better risk-reward opportunity, or if the investment’s fundamental characteristics deteriorate. Securities may also be sold from the portfolio to rebalance sector weightings.

Mr. Goff oversees the investment process and is responsible for the day-to-day management of the Fund. It is expected that the Fund will be broadly diversified among a variety of industry sectors. The Fund intends to be fully invested under normal circumstances. However, under unusual circumstances, if the Research Team does not have high conviction in enough investment opportunities, the Fund’s uninvested assets may be held in cash or similar instruments.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the investment personnel’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the investment personnel’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of

securities. The Fund compares and broadly matches its sector weights to those of a growth-based index. If growth stocks are out of favor, sectors that are larger in a growth index may underperform, leading to Fund underperformance relative to indices less biased toward growth stocks.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, and Class S Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares for periods prior to May 31, 2012, reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund had been available during periods prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class N Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

The Russell 1000® Growth Index measures the performance of those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Management: James P. Goff, CFA, is Janus Capital's Director of Equity Research and Executive Vice President of the Fund, which he has managed since February 2006.

PURCHASE AND SALE OF FUND SHARES**Minimum Investment Requirements***

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Triton Fund

JGMCX Class C Shares JSMGX Class I Shares JGMRX Class R Shares

INVESTMENT OBJECTIVE

Janus Triton Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 85 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.24%	0.29%	0.31%	0.15%	0.06%	0.31%	0.31%
Total Annual Fund Operating Expenses	1.13%	1.93%	1.20%	0.79%	0.70%	1.45%	0.95%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 684	\$ 913	\$ 1,161	\$ 1,871
Class C Shares	\$ 296	\$ 606	\$ 1,042	\$ 2,254
Class S Shares	\$ 122	\$ 381	\$ 660	\$ 1,455
Class I Shares	\$ 81	\$ 252	\$ 439	\$ 978
Class N Shares	\$ 72	\$ 224	\$ 390	\$ 871
Class R Shares	\$ 148	\$ 459	\$ 792	\$ 1,735
Class T Shares	\$ 97	\$ 303	\$ 525	\$ 1,166

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 684	\$ 913	\$ 1,161	\$ 1,871
Class C Shares	\$ 196	\$ 606	\$ 1,042	\$ 2,254
Class S Shares	\$ 122	\$ 381	\$ 660	\$ 1,455
Class I Shares	\$ 81	\$ 252	\$ 439	\$ 978
Class N Shares	\$ 72	\$ 224	\$ 390	\$ 871
Class R Shares	\$ 148	\$ 459	\$ 792	\$ 1,735
Class T Shares	\$ 97	\$ 303	\$ 525	\$ 1,166

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 35% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. In pursuing that objective, the Fund invests in equity securities of small- and medium-sized companies. Generally, small- and medium-sized companies have a market capitalization of less than \$10 billion. Market capitalization is a commonly used measure of the size and value of a company.

The portfolio managers apply a “bottom up” approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers’ belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Small- and Mid-Sized Companies Risk. The Fund’s investments in securities issued by small- and mid-sized companies, which can include smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. Securities issued by small- and mid-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio managers’ perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in

a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares for periods prior to May 31, 2012, reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class T Shares (calendar year-end)							
	2006	2007	2008	2009	2010	2011	2012

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Managers: **Chad Meade** is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since July 2006. **Brian A. Schaub**, CFA, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since July 2006.

PURCHASE AND SALE OF FUND SHARES**Minimum Investment Requirements***

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Janus Venture Fund

Ticker: JVTAX Class A Shares JVTSX Class S Shares JVTNX Class N Shares
 JVTCX Class C Shares JVTIX Class I Shares JAVTX Class T Shares

INVESTMENT OBJECTIVE

Janus Venture Fund seeks capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 85 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Management Fees	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	None
Other Expenses ⁽¹⁾	0.17%	0.11%	0.30%	0.07%	0.05%	0.31%
Total Annual Fund Operating Expenses	1.06%	1.75%	1.19%	0.71%	0.69%	0.95%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 677	\$ 893	\$ 1,126	\$ 1,795
Class C Shares	\$ 278	\$ 551	\$ 949	\$ 2,062
Class S Shares	\$ 121	\$ 378	\$ 654	\$ 1,443
Class I Shares	\$ 73	\$ 227	\$ 395	\$ 883
Class N Shares	\$ 70	\$ 221	\$ 384	\$ 859
Class T Shares	\$ 97	\$ 303	\$ 525	\$ 1,166

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 677	\$ 893	\$ 1,126	\$ 1,795
Class C Shares	\$ 178	\$ 551	\$ 949	\$ 2,062
Class S Shares	\$ 121	\$ 378	\$ 654	\$ 1,443
Class I Shares	\$ 73	\$ 227	\$ 395	\$ 883
Class N Shares	\$ 70	\$ 221	\$ 384	\$ 859
Class T Shares	\$ 97	\$ 303	\$ 525	\$ 1,166

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 51% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing at least 50% of its equity assets in small-sized companies. The Fund may also invest in larger companies with strong growth potential or relatively well-known and large companies with potential for capital appreciation. Small-sized companies are defined by the portfolio managers as those companies whose market capitalization falls within the range of companies in the Russell 2000® Growth Index. Market capitalization is a commonly used measure of the size and value of a company. The market capitalizations within the index will vary, but as of September 30, 2012, they ranged from approximately \$45 million to \$4.5 billion. Companies whose capitalization or revenues fall outside these ranges after the Fund’s initial purchase continue to be considered small-sized.

The portfolio managers apply a “bottom up” approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers’ belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Small-Sized Companies Risk. The Fund’s investments in securities issued by small-sized companies, which tend to be smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. Securities issued by small-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio managers’ perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net

asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund commenced operations on May 6, 2011. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, and Class S Shares for periods prior to May 6, 2011, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to May 6, 2011, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares for periods prior to May 31, 2012, reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund had been available during periods prior to May 6, 2011, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class N Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class T Shares (calendar year-end)

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Managers: **Chad Meade** is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since July 2010. **Brian A. Schaub**, CFA, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since July 2010.

PURCHASE AND SALE OF FUND SHARES**Minimum Investment Requirements***

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Additional information about the Funds

FEES AND EXPENSES

Please refer to the following important information when reviewing the “Fees and Expenses of the Fund” table in each Fund Summary of the Prospectus. The fees and expenses shown were determined based on net assets as of the fiscal year ended September 30, 2012.

“Shareholder Fees” are fees paid directly from your investment and may include sales loads.

“Annual Fund Operating Expenses” are paid out of a Fund’s assets and include fees for portfolio management and administrative services, including recordkeeping, subaccounting, and other shareholder services. You do not pay these fees directly but, as the Example in each Fund Summary shows, these costs are borne indirectly by all shareholders.

The “Management Fee” is the investment advisory fee rate paid by each Fund to Janus Capital. Janus Contrarian Fund, Janus Forty Fund, Janus Fund, and Janus Research Fund each pay an investment advisory fee rate that adjusts up or down by a variable of up to 0.15% (assuming constant assets) on a monthly basis based upon the Fund’s performance relative to its benchmark index during a measurement period. This fee rate, prior to any performance adjustment, is 0.64% for each of Janus Contrarian Fund, Janus Forty Fund, Janus Fund, and Janus Research Fund. Any such adjustment to this base fee rate commenced February 2007 for each of Janus Contrarian Fund and Janus Research Fund, July 2011 for Janus Fund, and January 2012 for Janus Forty Fund and may increase or decrease the Management Fee. Refer to “Management Expenses” in this Prospectus for additional information with further description in the Statement of Additional Information (“SAI”).

“Distribution/Service (12b-1) Fees.” Because 12b-1 fees are charged as an ongoing fee, over time the fee will increase the cost of your investment and may cost you more than paying other types of sales charges. Distribution/Service (12b-1) Fees include a shareholder servicing fee of up to 0.25% for Class C Shares.

A contingent deferred sales charge of up to 1.00% may be imposed on certain redemptions of Class A Shares bought without an initial sales charge and then redeemed within 12 months of purchase. The contingent deferred sales charge is not reflected in the Example in each Fund Summary.

A contingent deferred sales charge of 1.00% generally applies on Class C Shares redeemed within 12 months of purchase. The contingent deferred sales charge may be waived for certain investors, as described in the Shareholder’s Guide.

“Other Expenses”

for Class A Shares, Class C Shares, and Class I Shares, may include administrative fees charged by intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Funds.

for Class S Shares, Class R Shares, and Class T Shares, include an administrative services fee of 0.25% of the average daily net assets of each class to compensate Janus Services LLC (“Janus Services”), the Funds’ transfer agent, for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of retirement plan participants, pension plan participants, or other underlying investors investing through institutional channels.

for all classes, may include acquired fund fees and expenses, which are indirect expenses a Fund may incur as a result of investing in shares of an underlying fund. “Acquired Fund” refers to any underlying fund (including, but not limited to, exchange-traded funds) in which a fund invests or has invested during the period. To the extent that a Fund invests in

Acquired Funds, the Fund’s “Total Annual Fund Operating Expenses” may not correlate to the “ratio of gross expenses to average net assets” presented in the Financial Highlights tables because that ratio includes only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. Such amounts are less than 0.01%.

for all classes, may include “Short Sale Dividend Expenses.” These expenses include dividends or interest on short sales, which are paid to the lender of borrowed securities, and stock loan fees, which are paid to the prime broker. Such expenses will vary depending on the short sale arrangement, whether the securities a Fund sells short pay dividends or

interest, and the amount of such dividends or interest. While “Short Sale Dividend Expenses” include interest and dividends paid out on short positions and may include stock loan fees, they do not take into account the interest credit a Fund earns on cash proceeds of short sales held as collateral for short positions. If applicable, such amounts are less than 0.01%.

- for all classes, may include reimbursement to Janus Capital of its out-of-pocket costs for services as administrator and to
- Janus Services of its out-of-pocket costs for serving as transfer agent and providing, or arranging by others the provision of, servicing to shareholders.

Janus Capital has contractually agreed to waive certain Funds' "Total Annual Fund Operating Expenses" to certain limits until at least February 1, 2014. The expense limits are described in the "Management Expenses" section of this Prospectus. Because a fee waiver will have a positive effect upon a fund's performance, a fund that pays a performance-based investment advisory fee may experience a performance adjustment that is considered favorable to Janus Capital as a result of a fee waiver that is in place during the period when the performance adjustment applies.

All expenses in a Fund's "Fees and Expenses of the Fund" table are shown without the effect of expense offset arrangements. Pursuant to such arrangements, credits realized as a result of uninvested cash balances are used to reduce custodian and transfer agent expenses.

ADDITIONAL INVESTMENT STRATEGIES AND GENERAL PORTFOLIO POLICIES

The Funds' Board of Trustees ("Trustees") may change each Fund's investment objective or non-fundamental principal investment strategies without a shareholder vote. A Fund will notify you in writing at least 60 days before making any such change it considers material. If there is a material change to a Fund's objective or principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that a Fund will achieve its investment objective.

Unless otherwise stated, the following additional investment strategies and general policies apply to each Fund and provide further information including, but not limited to, the types of securities a Fund may invest in when implementing its investment objective. For some Funds, these strategies and policies may be part of a principal strategy. For other Funds, these strategies and policies may be utilized to a lesser extent. Except for the Funds' policies with respect to investments in illiquid securities and borrowing, the percentage limitations included in these policies and elsewhere in this Prospectus and/or the SAI normally apply only at the time of purchase of a security. So, for example, if a Fund exceeds a limit as a result of market fluctuations or the sale of other securities, it will not be required to dispose of any securities.

Cash Position

The Funds may not always stay fully invested. For example, when the portfolio managers and/or investment personnel believe that market conditions are unfavorable for investing, or when they are otherwise unable to locate attractive investment opportunities, a Fund's cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after a Fund has committed available assets to desirable investment opportunities. Due to differing investment strategies, the cash positions among the Funds may vary significantly. When a Fund's investments in cash or similar investments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested. To the extent a Fund invests its uninvested cash through a sweep program (meaning its uninvested cash is pooled with uninvested cash of other funds and invested in certain securities such as repurchase agreements), it is subject to the risks of the account or fund into which it is investing, including liquidity issues that may delay the Fund from accessing its cash.

In addition, a Fund may temporarily increase its cash position under certain unusual circumstances, such as to protect its assets or maintain liquidity in certain circumstances to meet unusually large redemptions. A Fund's cash position may also increase temporarily due to unusually large cash inflows. Under unusual circumstances such as these, a Fund may invest up to 100% of its assets in cash or similar investments. In this case, the Fund may take positions that are inconsistent with its investment objective. As a result, the Fund may not achieve its investment objective.

Common Stock

Unless its investment objective or policies prescribe otherwise, each of the Funds may invest substantially all of its assets in common stocks. The portfolio managers and/or investment personnel generally take a "bottom up" approach to selecting companies in which to invest. This means that they seek to identify individual companies with earnings growth potential that may not be recognized by the market at large. The portfolio managers and/or investment personnel make this assessment by looking at companies one at a time, regardless of size, country of organization, place of principal business activity, or other similar selection criteria. The portfolio managers and/or investment personnel may sell a holding if, among other things, the security reaches the portfolio managers' and/or investment personnel's price target, if the company has a deterioration of

fundamentals such as failing to meet key operating benchmarks, or if the portfolio managers and/or investment personnel find a better investment opportunity. The portfolio managers and/or investment personnel may also sell a Fund holding to meet redemptions.

Janus Balanced Fund and **Janus Growth and Income Fund** may each emphasize varying degrees of income. In the case of Janus Balanced Fund and Janus Growth and Income Fund, the portfolio managers may consider dividend-paying characteristics to a greater degree than other factors in selecting common stocks. Realization of income is not a significant consideration when choosing investments for the other Funds. Income realized on the Funds' investments may be incidental to their investment objectives.

Janus Contrarian Fund emphasizes investments in companies with attractive prices compared to their free cash flow. The portfolio manager will typically seek attractively valued companies that are improving their free cash flow and improving their returns on invested capital. These companies may also include special situations companies that are experiencing management changes and/or are temporarily out of favor. A company may be considered attractively valued when, in the opinion of the portfolio manager, shares of the company are selling for a price that is below their intrinsic worth ("undervalued"). A company may be undervalued due to market or economic conditions, temporary earnings declines, unfavorable developments affecting the company, or other factors. Such factors may provide buying opportunities at attractive prices compared to historical or market price-earnings ratios, price/free cash flow, book value, or return on equity. The portfolio manager believes that buying these securities at a price that is below their intrinsic worth may generate greater returns for the Fund than those obtained by paying premium prices for companies currently in favor in the market.

Counterparties

Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to a Fund ("counterparty risk"). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to a Fund. A Fund may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. A Fund may be exposed to counterparty risk through participation in various programs including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Fund's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures, and options. Each Fund intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that a Fund focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

Emerging Markets

Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets IndexSM.

Foreign Securities

The portfolio managers and/or investment personnel seek investments that meet the selection criteria, regardless of where an issuer or company is located. Foreign securities are generally selected on a security-by-security basis without regard to any predetermined allocation among countries or geographic regions. However, certain factors, such as expected levels of inflation, government policies influencing business conditions, the outlook for currency relationships, and prospects for economic growth among countries, regions, or geographic areas, may warrant greater consideration in selecting foreign securities. There are no limitations on the countries in which the Funds may invest, and the Funds may at times have significant foreign exposure, including exposure to emerging markets.

High-Yield/High-Risk Bonds

A high-yield/high-risk bond (also called a "junk" bond) is a bond rated below investment grade by major rating agencies (i.e., BB+ or lower by Standard & Poor's Ratings Services ("Standard & Poor's") and Fitch, Inc. ("Fitch"), or Ba or lower by Moody's Investors Service, Inc. ("Moody's")) or is an unrated bond of similar quality. It presents greater risk of default (the failure to make timely interest and principal payments) than higher quality bonds. To the extent a Fund invests in high-yield/high-risk bonds, under normal circumstances, each Fund, with the exception of Janus Contrarian Fund, will limit its investments in

high-yield/high-risk bonds to 35% or less of its net assets. Janus Contrarian Fund will limit its investments in such bonds to 20% or less of its net assets.

Illiquid Investments

Although the Funds intend to invest in liquid securities, each Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment is a security or other position that cannot be disposed of quickly in the normal course of business. For example, some securities are not registered under U.S. securities laws and cannot be sold to the U.S. public because of Securities and Exchange Commission regulations (these are known as “restricted securities”). Under procedures adopted by the Funds’ Trustees, certain restricted securities that are determined to be liquid will not be counted toward this 15% limit.

Mortgage- and Asset-Backed Securities

Each Fund may purchase fixed or variable rate mortgage-backed securities issued by the Government National Mortgage Association (“Ginnie Mae”), the Federal National Mortgage Association (“Fannie Mae”), the Federal Home Loan Mortgage Corporation (“Freddie Mac”), or other governmental or government-related entities. Ginnie Mae’s guarantees are backed by the full faith and credit of the U.S. Government. Historically, Fannie Maes and Freddie Macs were not backed by the full faith and credit of the U.S. Government, and may not be in the future. In September 2008, the Federal Housing Finance Agency (“FHFA”), an agency of the U.S. Government, placed Fannie Mae and Freddie Mac under conservatorship. Under the conservatorship, the management of Fannie Mae and Freddie Mac was replaced. Since 2008, Fannie Mae and Freddie Mac have received capital support through U.S. Treasury preferred stock purchases and Treasury and Federal Reserve purchases of their mortgage-backed securities. The FHFA and the U.S. Treasury have imposed strict limits on the size of these entities’ mortgage portfolios. The FHFA has the power to cancel any contract entered into by Fannie Mae and Freddie Mac prior to FHFA’s appointment as conservator or receiver, including the guarantee obligations of Fannie Mae and Freddie Mac. Each Fund may purchase other mortgage- and asset-backed securities through single- and multi-seller conduits, collateralized debt obligations, structured investment vehicles, and other similar securities. Asset-backed securities may be backed by automobile loans, equipment leases, credit card receivables, or other collateral. In the event the underlying assets fail to perform, these investment vehicles could be forced to sell the assets and recognize losses on such assets, which could impact a Fund’s yield and your return.

Unlike traditional debt instruments, payments on these securities include both interest and a partial payment of principal. Prepayments of the principal of underlying loans at a faster pace than expected is known as “prepayment risk,” and may shorten the effective maturities of these securities. This may result in a Fund having to reinvest proceeds at a lower interest rate.

In addition to prepayment risk, investments in mortgage-backed securities, including those comprised of subprime mortgages, and investments in other asset-backed securities comprised of under-performing assets may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Mortgage- and asset-backed securities are also subject to extension risk, which is the risk that rising interest rates could cause mortgages or other obligations underlying these securities to be paid more slowly than expected, increasing a Fund’s sensitivity to interest rate changes and causing its price to decline.

Nondiversification

Diversification is a way to reduce risk by investing in a broad range of stocks or other securities. **Janus Contrarian Fund** and **Janus Forty Fund** are classified as “nondiversified.” A fund that is classified as “nondiversified” has the ability to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” This gives a fund which is classified as nondiversified more flexibility to focus its investments in companies that the portfolio managers have identified as the most attractive for the investment objective and strategy of the fund. However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified. This fluctuation, if significant, may affect the performance of the fund.

Portfolio Turnover

In general, each Fund intends to purchase securities for long-term investment, although, to a limited extent, a Fund may purchase securities in anticipation of relatively short-term gains. Short-term transactions may also result from liquidity needs, securities having reached a price or yield objective, changes in interest rates or the credit standing of an issuer, or by reason

of economic or other developments not foreseen at the time of the initial investment decision. A Fund may also sell one security and simultaneously purchase the same or a comparable security to take advantage of short-term differentials in bond yields or securities prices. Portfolio turnover is affected by market conditions, changes in the size of a Fund, the nature of a Fund's investments, and the investment style of the portfolio manager and/or investment personnel. Changes are normally made in a Fund's portfolio whenever the portfolio manager and/or investment personnel believe such changes are desirable. Portfolio turnover rates are generally not a factor in making buy and sell decisions.

Increased portfolio turnover may result in higher costs for brokerage commissions, dealer mark-ups, and other transaction costs, and may also result in taxable capital gains. Higher costs associated with increased portfolio turnover also may have a negative effect on a Fund's performance. The "Financial Highlights" section of this Prospectus shows the Funds' historical turnover rates.

Securities Lending

A Fund may seek to earn additional income through lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis. Each Fund may lend portfolio securities on a short-term or long-term basis, in an amount equal to up to $\frac{1}{3}$ of its total assets as determined at the time of the loan origination. When a Fund lends its securities, it receives collateral (including cash collateral), at least equal to the value of securities loaned. The Fund may earn income by investing this collateral in one or more affiliated or non-affiliated cash management vehicles. It is also possible that, due to a decline in the value of a cash management vehicle, the Fund may lose money. There is also the risk that when portfolio securities are lent, the securities may not be returned on a timely basis, and the Fund may experience delays and costs in recovering the security or gaining access to the collateral provided to the Fund to collateralize the loan. If the Fund is unable to recover a security on loan, the Fund may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Fund. Janus Capital intends to manage the cash collateral in an affiliated cash management vehicle and will receive an investment advisory fee for managing such assets.

Short Sales

Certain Funds may engage in short sales. No more than 10% of a Fund's net assets may be invested in short positions (through short sales of stocks, structured products, futures, swaps, and uncovered written calls). The Funds may engage in short sales "against the box" and options for hedging purposes that are not subject to this 10% limit. A short sale is generally a transaction in which a Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. A short sale is subject to the risk that if the price of the security sold short increases in value, the Fund will incur a loss because it will have to replace the security sold short by purchasing it at a higher price. In addition, the Fund may not always be able to close out a short position at a particular time or at an acceptable price. A lender may request, or market conditions may dictate, that the securities sold short be returned to the lender on short notice, and the Fund may have to buy the securities sold short at an unfavorable price. If this occurs at a time that other short sellers of the same security also want to close out their positions, it is more likely that the Fund will have to cover its short sale at an unfavorable price and potentially reduce or eliminate any gain, or cause a loss, as a result of the short sale. Because there is no upper limit to the price a borrowed security may reach prior to closing a short position, a Fund's losses are potentially unlimited in a short sale transaction. A Fund's gains and losses will also be decreased or increased, as the case may be, by the amount of any dividends, interest, or expenses, including transaction costs and borrowing fees, the Fund may be required to pay in connection with a short sale. Such payments may result in the Fund having higher expenses than a Fund that does not engage in short sales and may negatively affect the Fund's performance.

A Fund may also enter into short positions through derivative instruments such as options contracts, futures contracts, and swap agreements which may expose the Fund to similar risks. To the extent that the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Due to certain foreign countries' restrictions, a Fund will not be able to engage in short sales in certain foreign countries where it may maintain long positions. As a result, a Fund's ability to fully implement a short selling strategy that could otherwise help the Fund pursue its investment goals may be limited. There can be no assurance that the implementation of a short sale strategy will be successful.

Special Situations

The Funds may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. For example, a special situation or turnaround may arise when, in the opinion of a Fund's portfolio managers and/or investment personnel, the securities of a particular issuer will be recognized as undervalued by the market and appreciate in value due to a specific development with respect to that issuer. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. For example, issuers undergoing significant capital changes may include companies involved in spin-offs, sales of divisions, mergers or acquisitions, companies involved in bankruptcy proceedings, or companies initiating large changes in their debt to equity ratio. Companies that are redirecting cash flows may be reducing debt, repurchasing shares, or paying dividends. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in "special situations" companies can present greater risks than investments in companies not experiencing special situations, and a Fund's performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Swap Agreements

Certain Funds may utilize swap agreements as a means to gain exposure to certain common stocks and/or to "hedge" or protect their portfolios from adverse movements in securities prices, the rate of inflation, or interest rates. Swaps may also be used for capital appreciation. Swap agreements are two-party contracts to exchange one set of cash flows for another. Swap agreements entail the risk that a party will default on its payment obligations to a Fund. If the other party to a swap defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If a Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund's total return. Various types of swaps such as credit default, equity, interest rate, and total return swaps are described in the "Glossary of Investment Terms."

U.S. Government Securities

Each Fund, particularly Janus Balanced Fund, may invest in U.S. Government securities. U.S. Government securities include those issued directly by the U.S. Treasury and those issued or guaranteed by various U.S. Government agencies and instrumentalities. Some government securities are backed by the "full faith and credit" of the United States. Other government securities are backed only by the rights of the issuer to borrow from the U.S. Treasury. Others are supported by the discretionary authority of the U.S. Government to purchase the obligations. Certain other government securities are supported only by the credit of the issuer. For securities not backed by the full faith and credit of the United States, a Fund must look principally to the agency or instrumentality issuing or guaranteeing the securities for repayment and may not be able to assert a claim against the United States if the agency or instrumentality does not meet its commitment. Such securities may involve increased risk of loss of principal and interest compared to government debt securities that are backed by the full faith and credit of the United States.

Other Types of Investments

Unless otherwise stated within its specific investment policies, each Fund may also invest in other types of domestic and foreign securities and use other investment strategies, as described in the "Glossary of Investment Terms." These securities and strategies are not principal investment strategies of the Funds. If successful, they may benefit the Funds by earning a return on the Funds' assets or reducing risk; however, they may not achieve the Funds' investment objectives. These securities and strategies may include:

- debt securities (such as bonds, notes, and debentures)

- exchange-traded funds

- indexed/structured securities (such as mortgage- and asset-backed securities)

- various derivative transactions (which could comprise a significant percentage of a fund's portfolio) including, but not limited to, options, futures, forwards, swap agreements (such as equity, interest rate, inflation index, credit default, and total return swaps), participatory notes, structured notes, and other types of derivatives individually or in combination for hedging purposes or for nonhedging purposes such as seeking to earn income and enhance return, to protect unrealized

gains, or to avoid realizing losses; such techniques may also be used to adjust currency exposure relative to a benchmark index, to gain exposure to the market pending investment of cash balances, or to meet liquidity needs

securities purchased on a when-issued, delayed delivery, or forward commitment basis

bank loans (including when-issued bank loans), which may be acquired through loan participations and assignments (no more than 20% of Janus Balanced Fund's total assets)

RISKS OF THE FUNDS

The value of your investment will vary over time, sometimes significantly, and you may lose money by investing in the Funds. To varying degrees, the Funds may invest in stocks, bonds, alternative strategy investments, and money market instruments or cash/cash equivalents. The following information is intended to help you better understand some of the risks of investing in the Funds. The impact of the following risks on a Fund may vary depending on the Fund's investments. The greater the Fund's investment in a particular security, the greater the Fund's exposure to the risks associated with that security. Before investing in a Fund, you should consider carefully the risks that you assume when investing in the Fund.

Bank Loan Risk. The bank loans in which Janus Balanced Fund may invest may be denominated in U.S. or non-U.S. currencies, including the euro. Bank loans are obligations of companies or other entities entered into in connection with recapitalizations, acquisitions, and refinancings. The Fund's investments in bank loans are generally acquired as a participation interest in, or assignment of, loans originated by a lender or other financial institution. These investments may include institutionally-traded floating and fixed-rate debt securities. In addition, the bank loans underlying these securities often involve borrowers with low credit ratings whose financial conditions are troubled or uncertain, including companies that are highly leveraged or in bankruptcy proceedings. Participation interests and assignments involve credit, interest rate, and liquidity risk. To the extent the Fund invests in non-U.S. bank loan investments, those investments are subject to the risks of foreign investment, including Eurozone risk.

If the Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, the Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. There may be a number of intermediate participants in bank loan transactions and loan agreements that have specific rights, obligations, terms, and conditions. As such, any number of factors in an investment in bank loans could cause the Fund to lose income or principal on a particular investment, which in turn could affect the Fund's returns, and you could lose money.

Interest rates on floating rate bank loans adjust with interest rate changes and/or issuer credit quality, and unexpected changes in such rates could result in losses to the Fund. Additionally, borrowers may pay back principal in whole or part, prior to scheduled due dates. Such prepayment may result in the Fund realizing less income on a particular investment and replacing the floating rate bank loan with a less attractive security, which may provide less return to the Fund.

Bank loans may be subject to restrictions on resale. Certain of the Fund's investments in floating rate bank loans may be deemed illiquid and the Fund may have limited ability to trade in secondary trading markets. Such factors may have an adverse impact on the market price of such securities and may affect the Fund's returns, resulting in a loss.

The Fund may not be able to identify and invest in attractive floating rate bank loans, such as senior loans, as the market for such investments may be limited in certain economic conditions or because of a high number of potential purchasers of assignments and participations. In such cases, the Fund may invest in other floating rate debt securities or other investments which may not be as attractive. For example, the Fund may invest in junior or subordinated loans or unsecured loans. Such loans may not provide desired returns or may increase the potential for loss of income or principal. Bank loan investments may be generally considered speculative and risks arising from the Fund's investments in bank loans may be similar to those of investments in "junk" bonds or below investment grade investments. The Fund's investments in bank loans may be more sensitive to economic changes, political changes, or adverse developments specific to the borrower than higher quality investments.

Credit Quality Risk. Through a Fund's investments in fixed-income securities, a Fund is subject to the risks associated with the credit quality of the issuers of those fixed-income securities. Credit quality measures the likelihood that the issuer or borrower will meet its obligations on a bond. One of the fundamental risks is credit risk, which is the risk that an issuer will be unable to make principal and interest payments when due, or default on its obligations. Higher credit risk may negatively impact a Fund's returns and yield. U.S. Government securities are generally considered to be the safest type of investment in terms of credit risk. Municipal obligations generally rank between U.S. Government securities and corporate debt securities in terms of credit safety. Corporate debt securities, particularly those rated below investment grade, present the highest credit risk.

Many fixed-income securities receive credit ratings from services such as Standard & Poor's, Fitch, and Moody's. These services assign ratings to securities by assessing the likelihood of issuer default. The lower a bond issue is rated by an agency, the more credit risk it is considered to represent. Lower rated instruments and securities generally pay interest at a higher rate to compensate for the associated greater risk. Interest rates can fluctuate in response to economic or market conditions, which can result in a fluctuation in the price of a security and impact your return and yield. If a security has not received a rating, a Fund must rely upon Janus Capital's credit assessment, which if incorrect can also impact the Fund's returns and yield. Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by a Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, a Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent a Fund enters into short derivative positions, a Fund may be exposed to risks similar to those associated with short sales, including the risk that a Fund's losses are theoretically unlimited.

Emerging Markets Risk. Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets IndexSM. To the extent that a Fund invests a significant amount of its assets in one or more of these countries, its returns and net asset value may be affected to a large degree by events and economic conditions in such countries. The risks of foreign investing are heightened when investing in emerging markets, which may result in the price of investments in emerging markets experiencing sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on a Fund's investments. The securities markets of many of these countries may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for a Fund to obtain or to enforce a judgment against the issuers of such securities. In addition, a Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that a Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. A Fund may be subject to emerging markets risk to the extent that it invests in securities of issuers or companies which are not considered to be from emerging markets, but which have customers, products, or transactions associated with emerging markets. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent a Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the

risks of investing directly in foreign and emerging market securities may be reduced when a Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Fixed-Income Securities Risk. The Funds, particularly Janus Balanced Fund, may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause a Fund's net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. For example, while securities with longer maturities tend to produce higher yields, they also tend to be more sensitive to changes in prevailing interest rates and are therefore more volatile than shorter-term securities and are subject to greater market fluctuations as a result of changes in interest rates. Fixed-income securities are also subject to credit risk, which is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. In addition, there is prepayment risk, which is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. This may result in a Fund having to reinvest its proceeds in lower yielding securities. Fixed-income securities may also be subject to valuation risk and liquidity risk. Valuation risk is the risk that one or more of the fixed-income securities in which a Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that a portfolio manager would like or at the price that a portfolio manager believes the security is currently worth. Securities underlying mortgage- and asset-backed securities, which may include subprime mortgages, also may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Foreign Exposure Risks. Within the parameters of its specific investment policies, each Fund may invest in foreign debt and equity securities either indirectly (e.g., depositary receipts, depositary shares, and passive foreign investment companies) or directly in foreign markets, including emerging markets. Investments in foreign securities, including securities of foreign and emerging markets governments, may involve greater risks than investing in domestic securities because a Fund's performance may depend on factors other than the performance of a particular company. These factors include:

Currency Risk. As long as a Fund holds a foreign security, its value will be affected by the value of the local currency relative to the U.S. dollar. When a Fund sells a foreign currency denominated security, its value may be worth less in U.S. dollars even if the security increases in value in its home country. U.S. dollar-denominated securities of foreign issuers may also be affected by currency risk, as the value of these securities may also be affected by changes in the issuer's local currency.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in emerging markets which may have relatively unstable governments, immature economic structures, national policies restricting investments by foreigners, social instability, and different and/or developing legal systems. In some countries, there is the risk that the government may take over the assets or operations of a company or that the government may impose withholding and other taxes or limits on the removal of a Fund's assets from that country. In addition, the economies of emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Regulatory Risk. There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Foreign Market Risk. Foreign securities markets, particularly those of emerging market countries, may be less liquid and more volatile than domestic markets. These securities markets may trade a small number of securities, may have a limited number of issuers and a high proportion of shares, or may be held by a relatively small number of persons or institutions. Local securities markets may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of substantial holdings difficult or impossible at times. It is also possible that certain markets may require payment for securities before delivery, and delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for a Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, securities of issuers located in countries with emerging markets may have limited marketability and may be

subject to more abrupt or erratic price movements which could also have a negative effect on a Fund. Such factors may hinder a Fund's ability to buy and sell emerging market securities in a timely manner, affecting the Fund's investment strategies and potentially affecting the value of the Fund.

Geographic Investment Risk. To the extent that a Fund invests a significant portion of its assets in a particular country or geographic region, the Fund will generally have more exposure to certain risks due to possible political, economic, social, or regulatory events in that country or region. Adverse developments in certain regions could also adversely affect securities of other countries whose economies appear to be unrelated and could have a negative impact on a Fund's performance.

Transaction Costs. Costs of buying, selling, and holding foreign securities, including brokerage, tax, and custody costs, may be higher than those involved in domestic transactions.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds (or "junk" bonds) are bonds rated below investment grade by the primary rating agencies such as Standard & Poor's, Fitch, and Moody's or are unrated bonds of similar quality. The value of lower quality bonds generally is more dependent on credit risk than investment grade bonds. Issuers of high-yield/high-risk bonds may not be as strong financially as those issuing bonds with higher credit ratings and are more vulnerable to real or perceived economic changes, political changes, or adverse developments specific to the issuer. In addition, the junk bond market can experience sudden and sharp price swings.

The secondary market on which high-yield securities are traded is less liquid than the market for investment grade securities. The lack of a liquid secondary market may have an adverse impact on the market price of the security. Additionally, it may be more difficult to value the securities because valuation may require more research, and elements of judgment may play a larger role in the valuation because there is less reliable, objective data available.

Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Industry Risk. Industry risk is the possibility that a group of related securities will decline in price due to industry-specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react similarly to industry-specific market or economic developments. Each Fund's investments, if any, in multiple companies in a particular industry increase that Fund's exposure to industry risk.

Interest Rate Risk. Generally, a fixed-income security will increase in value when prevailing interest rates fall and decrease in value when prevailing interest rates rise. Longer-term securities are generally more sensitive to interest rate changes than shorter-term securities, but they generally offer higher yields to compensate investors for the associated risks. High-yield bond prices and floating rate debt security prices are generally less directly responsive to interest rate changes than investment grade issues or comparable fixed rate securities, and may not always follow this pattern. The Funds may use futures, swaps, options, and other derivatives to manage interest rate risk. The income component of Janus Balanced Fund's holdings includes fixed-income securities. The income component of Janus Growth and Income Fund's holdings may include fixed-income securities.

Management Risk. The Funds are actively managed investment portfolios and are therefore subject to the risk that the investment strategies employed for the Funds may fail to produce the intended results. A Fund may underperform its benchmark index or other mutual funds with similar investment objectives.

Because the Funds may invest substantially all of their assets in common stocks, the main risk is the risk that the value of the stocks they hold might decrease in response to the activities of an individual company or in response to general market and/or economic conditions. If this occurs, a Fund's share price may also decrease.

The Funds may use short sales, futures, options, swap agreements (including, but not limited to, equity, interest rate, credit default, and total return swaps), and other derivative instruments individually or in combination to "hedge" or protect their portfolios from adverse movements in securities prices and interest rates. The Funds may also use a variety of currency hedging techniques, including the use of forward currency contracts, to manage currency risk. There is no guarantee that a portfolio manager's and/or investment personnel's use of derivative investments will benefit the Funds. A Fund's performance could be worse than if the Fund had not used such instruments. Use of such investments may instead increase risk to the Fund, rather than reduce risk.

A Fund's performance may also be significantly affected, positively or negatively, by a portfolio manager's and/or investment personnel's use of certain types of investments, such as foreign (non-U.S.) securities, non-investment grade bonds ("junk" bonds), initial public offerings ("IPOs"), or securities of companies with relatively small market capitalizations. Note that a portfolio manager's and/or investment personnel's use of IPOs and other types of investments may have a magnified performance impact on a fund with a small asset base and the fund may not experience similar performance as its assets grow.

Market Risk. The value of a Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' and/or investment personnel's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of a Fund's portfolio could also decrease if there are deteriorating economic or market conditions, including, but not limited to, a general decline in prices on the stock markets, a general decline in real estate markets, a decline in commodities prices, or if the market favors different types of securities than the types of securities in which the Fund invests. If the value of the Fund's portfolio decreases, the Fund's net asset value will also decrease, which means if you sell your shares in the Fund you may lose money.

It is also important to note that events in both domestic and international equity and fixed-income markets have resulted, and may continue to result, in an unusually high degree of volatility in the markets, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. These events and the resulting market upheavals may have an adverse effect on a Fund, such as a decline in the value and liquidity of many securities held by the Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value, and an increase in Fund expenses. Because the situation is unprecedented and widespread, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Fund's ability to achieve its investment objective. It is impossible to predict whether or for how long these conditions will continue. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

Further, the instability experienced in the financial markets has resulted in the U.S. Government and various other governmental and regulatory entities taking actions to address the financial crisis. These actions include, but are not limited to, the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") in July 2010 which is expected to dramatically change the way in which the U.S. financial system is supervised and regulated. More specifically, the Dodd-Frank Act provides for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, over-the-counter derivatives, investment advisers, credit rating agencies, and mortgage lending, which expands federal oversight in the financial sector and may affect the investment management industry as a whole. Given the broad scope, sweeping nature, and the fact that many provisions of the Dodd-Frank Act must be implemented through future rulemaking, the ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain. As a result, there can be no assurance that these government and regulatory measures will not have an adverse effect on the value or marketability of securities held by a Fund, including potentially limiting or completely restricting the ability of the Fund to use a particular investment instrument as part of its investment strategy, increasing the costs of using these instruments, or possibly making them less effective in general. Furthermore, no assurance can be made that the U.S. Government or any U.S. regulatory entity (or other authority or regulatory entity) will not continue to take further legislative or regulatory action in response to the economic crisis or otherwise, and the effect of such actions, if taken, cannot be known.

In addition, European markets have recently experienced volatility and adverse trends due to concerns about economic downturns, rising government debt levels, and the possible default of government debt in several European countries, including Greece, Ireland, Italy, Portugal, and Spain. A default or debt restructuring by any European country would adversely impact holders of that country's debt and worldwide sellers of credit default swaps linked to that country's creditworthiness. These trends have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of all European countries, which in turn may have a material adverse effect on a Fund's investments in such countries, other countries that depend on European countries for significant amounts of trade or investment, or issuers with exposure to European debt.

Mortgage-Backed Securities Risk. Rising interest rates tend to extend the duration of, or reduce the rate of prepayments on, mortgage-backed securities, making them more sensitive to changes in interest rates ("extension risk"). As a result, in a period of rising interest rates, the price of mortgage-backed securities may fall, causing a Fund that holds mortgage-backed securities to exhibit additional volatility. Mortgage-backed securities are also subject to prepayment risk. When interest rates decline,

borrowers may pay off their mortgages sooner than expected. This can reduce a Fund's returns because the Fund will have to reinvest that money at lower prevailing interest rates.

In addition to extension risk and prepayment risk, investments in mortgage-backed securities, including those comprised of subprime mortgages, may be subject to a higher degree of credit risk, valuation risk, and liquidity risk than various other types of fixed-income securities.

Nondiversification Risk. Janus Contrarian Fund and Janus Forty Fund are classified as nondiversified under the Investment Company Act of 1940, as amended, and may hold a greater percentage of their assets in a smaller number of issuers. As a result, an increase or decrease in the value of a single security held by a Fund may have a greater impact on the Fund's net asset value and total return. Being nondiversified may also make a Fund more susceptible to financial, economic, political, or other developments that may impact a security. Although each Fund may satisfy the requirements for a diversified fund, and in the case of Janus Contrarian Fund has from time to time operated as diversified, each Fund's nondiversified classification gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities than a fund that is classified as diversified. A Fund's policy of concentrating its portfolio in a smaller number of holdings could result in more volatility in the Fund's performance and share price. Since Janus Forty Fund normally invests primarily in a core portfolio of 20-40 common stocks, this risk may be increased.

Real Estate Securities Risk. A Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets. REITs that invest in real estate mortgages are also subject to prepayment risk. In addition to prepayment risk, investments in mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities comprised of under-performing assets may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Small- and Mid-Sized Companies Risk. A Fund's investments in securities issued by small- and mid-sized companies, which tend to be smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. For example, while small- and mid-sized companies may realize more substantial growth than larger or more established issuers, they may also suffer more significant losses as a result of their narrow product lines, limited operating history, greater exposure to competitive threats, limited financial resources, limited trading markets, and the potential lack of management depth. Securities issued by small- and mid-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies. These holdings are also subject to wider price fluctuations and tend to be less liquid than stocks of larger companies, which could have a significant adverse effect on a Fund's returns, especially as market conditions change.

Sovereign Debt Risk. A Fund may invest in U.S. and foreign government debt securities ("sovereign debt"). Investments in U.S. sovereign debt are considered low risk. However, investments in non-U.S. sovereign debt can involve a high degree of risk, including the risk that the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or to pay the interest on its sovereign debt in a timely manner. A sovereign debtor's willingness or ability to satisfy its debt obligation may be affected by various factors, including its cash flow situation, the extent of its foreign currency reserves, the availability of foreign exchange when a payment is due, the relative size of its debt position in relation to its economy as a whole, the sovereign debtor's policy toward international lenders, and local political constraints to which the governmental entity may be subject. Sovereign debtors may also be dependent on expected disbursements from foreign governments, multilateral agencies, and other entities. The failure of a sovereign debtor to implement economic reforms, achieve specified levels of economic performance, or repay principal or interest when due may result in the cancellation of third party commitments to lend funds to the sovereign debtor, which may further impair such debtor's ability or willingness to timely service its debts. A Fund may be requested to participate in the rescheduling of such sovereign debt and to extend further loans to governmental entities, which may adversely affect the Fund's holdings. In the event of default, there may be limited or no legal remedies for collecting sovereign debt and there may be no bankruptcy proceedings through which the Fund may collect all or part of the sovereign debt that a governmental entity has not repaid.

Management of the Funds

INVESTMENT ADVISER

Janus Capital Management LLC, 151 Detroit Street, Denver, Colorado 80206-4805, is the investment adviser to each Fund. Janus Capital is responsible for the day-to-day management of the Funds' investment portfolios and furnishes continuous advice and recommendations concerning the Funds' investments. Janus Capital also provides certain administration and other services and is responsible for other business affairs of each Fund.

Janus Capital (together with its predecessors) has served as investment adviser to Janus mutual funds since 1970 and currently serves as investment adviser to all of the Janus funds, acts as subadviser for a number of private-label mutual funds, and provides separate account advisory services for institutional accounts and other unregistered products.

Janus Capital furnishes certain administration, compliance, and accounting services for the Funds and is reimbursed by the Funds for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Janus Capital provides office space for the Funds. Some expenses related to compensation payable to the Janus funds' Chief Compliance Officer and compliance staff are shared with the Janus funds. The Funds also pay for salaries, fees, and expenses of certain Janus Capital employees and Fund officers, with respect to certain specified administration functions they perform on behalf of the Janus funds. The Janus funds pay these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Funds.

MANAGEMENT EXPENSES

Each Fund pays Janus Capital an investment advisory fee and incurs expenses, including the distribution and shareholder servicing fees (12b-1 fee), administrative services fees payable pursuant to the Transfer Agency Agreement, any other transfer agent and custodian fees and expenses, legal and auditing fees, printing and mailing costs of sending reports and other information to existing shareholders, and Independent Trustees' fees and expenses. Each Fund's investment advisory fee is calculated daily and paid monthly. Each Fund's advisory agreement details the investment advisory fee and other expenses that each Fund must pay.

The following tables reflect each Fund's contractual investment advisory fee rate or base fee rate, as applicable (expressed as an annual rate), as well as the actual investment advisory fee rate paid by each Fund to Janus Capital (gross and net of fee waivers, if applicable).

Fixed-Rate Investment Advisory Fee

The Funds reflected below pay an investment advisory fee at a fixed rate based on each Fund's average daily net assets.

Fund Name	Average Daily Net Assets of the Fund	Contractual Investment Advisory Fee (%) (annual rate)	Actual Investment Advisory Fee Rate ⁽¹⁾ (%) (for the fiscal year ended September 30, 2012)
Janus Balanced Fund	All Asset Levels	0.55	0.55
Janus Enterprise Fund	All Asset Levels	0.64	0.64
Janus Growth and Income Fund	All Asset Levels	0.60	0.60
Janus Triton Fund	All Asset Levels	0.64	0.64
Janus Venture Fund	All Asset Levels	0.64	0.64

Janus Capital has agreed to waive each Fund's total annual fund operating expenses (excluding the distribution and shareholder servicing fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees (1) and expenses, and extraordinary expenses) to certain levels until at least February 1, 2014. Application of the expense waivers and their effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in each Fund Summary of the Prospectus, and additional information is included under "Expense Limitations" below. The waivers are not reflected in the contractual fee rates shown.

Performance-Based Investment Advisory Fee

Janus Contrarian Fund, Janus Research Fund, Janus Fund, and Janus Forty Fund each pay an investment advisory fee rate that may adjust up or down based on each Fund's performance relative to the cumulative investment record of its benchmark index over the performance measurement period as reflected in the table below. Any adjustment to the investment advisory fee rate was effective February 2007 for each of Janus Contrarian Fund and Janus Research Fund, July 2011 for Janus Fund, and January 2012 for Janus Forty Fund. Until such time, only the base fee rate shown below applied. The third column shows the performance hurdle for outperformance or underperformance during the measurement period relative to each Fund's respective benchmark index. The fourth column shows the performance adjusted investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period without any fee waivers. The fifth column shows the actual investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period and includes any applicable fee waiver. This fifth column shows the actual amount of the investment advisory fee rate paid by each Fund as of the end of the fiscal year.

As an example, if a Fund outperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would increase by 0.15% (assuming constant assets). Conversely, if a Fund underperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would decrease by 0.15% (assuming constant assets). Actual performance within the full range of the performance hurdle rate may result in positive or negative incremental adjustments to the advisory fee of greater or less than 0.15%. Additional details discussing the performance fee are included below with further description in the SAI.

Fund Name	Base Fee Rate (%)	Performance Hurdle vs. Benchmark Index	Performance Adjusted Investment Advisory Fee Rate (%)	Actual Investment Advisory Fee Rate (%) (for the fiscal year ended September 30, 2012)
Janus Contrarian Fund	0.64	±7.00%	0.43	0.43(1)
Janus Research Fund	0.64	±5.00%	0.64	0.64
Janus Fund	0.64	±4.50%	0.49	0.47(1)
Janus Forty Fund	0.64	±8.50%	0.48(2)	0.46(1)

Janus Capital has agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, the distribution and shareholder servicing fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to a certain level until at least February 1, 2014. Application of (1) the expense waiver and its effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in the Fund Summary of the Prospectus, and additional information is included under "Expense Limitations" below. The waiver and any applicable performance adjustment are not reflected in the base fee rate shown.

(2) Any applicable performance adjustment began January 1, 2012; until such time, the base fee rate shown applied.

For Janus Contrarian Fund, Janus Research Fund, Janus Fund, and Janus Forty Fund, the investment advisory fee rate is determined by calculating a base fee (shown in the previous table) and applying a performance adjustment (described in further detail below). The performance adjustment either increases or decreases the base fee depending on how well each Fund has performed relative to its benchmark index as shown below:

Fund Name	Benchmark Index
Janus Contrarian Fund	S&P 500® Index
Janus Research Fund	Russell 1000® Growth Index
Janus Fund	Core Growth Index
Janus Forty Fund	Russell 1000® Growth Index

The calculation of the performance adjustment applies as follows:

Investment Advisory Fee = Base Fee Rate +/- Performance Adjustment

The investment advisory fee rate paid to Janus Capital by each Fund in the table above consists of two components: (1) a base fee calculated by applying the contractual fixed rate of the advisory fee to the Fund's average daily net assets during the previous month ("Base Fee Rate"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by

applying a variable rate of up to 0.15% (positive or negative) to the Fund's average daily net assets during the applicable performance measurement period. The performance measurement period generally is the previous 36 months, although no Performance Adjustment is made until a Fund's performance-based fee structure has been in effect for at least 12 months (18 months for Janus Forty Fund). When a Fund's performance-based fee structure has been in effect for at least 12 months (18 months for Janus Forty Fund), but less than 36 months, the performance measurement period is equal to the time that has elapsed since the performance-based fee structure took effect. As noted above, any applicable Performance Adjustment began February 2007 for each of Janus Contrarian Fund and Janus Research Fund, July 2011 for Janus Fund, and January 2012 for Janus Forty Fund.

No Performance Adjustment is applied unless the difference between a Fund's investment performance and the cumulative investment record of the Fund's benchmark index is 0.50% or greater (positive or negative) during the applicable performance measurement period. The Base Fee Rate is subject to an upward or downward Performance Adjustment for every full 0.50% increment by which the Fund outperforms or underperforms its benchmark index. Because the Performance Adjustment is tied to a Fund's relative performance compared to its benchmark index (and not its absolute performance), the Performance Adjustment could increase Janus Capital's fee even if the Fund's Shares lose value during the performance measurement period and could decrease Janus Capital's fee even if the Fund's Shares increase in value during the performance measurement period. For purposes of computing the Base Fee Rate and the Performance Adjustment, net assets are averaged over different periods (average daily net assets during the previous month for the Base Fee Rate, versus average daily net assets during the performance measurement period for the Performance Adjustment). Performance of a Fund is calculated net of expenses whereas a Fund's benchmark index does not have any fees or expenses. Reinvestment of dividends and distributions is included in calculating both the performance of a Fund and the Fund's benchmark index. The Base Fee Rate is calculated and accrued daily. The Performance Adjustment is calculated monthly in arrears and is accrued throughout the month. The investment fee is paid monthly in arrears. Under extreme circumstances involving underperformance by a rapidly shrinking Fund, the dollar amount of the Performance Adjustment could be more than the dollar amount of the Base Fee Rate. In such circumstances, Janus Capital would reimburse the applicable Fund.

The application of an expense limit, if any, will have a positive effect upon a Fund's performance and may result in an increase in the Performance Adjustment. It is possible that the cumulative dollar amount of additional compensation ultimately payable to Janus Capital may, under some circumstances, exceed the cumulative dollar amount of management fees waived by Janus Capital.

The investment performance of a Fund's Class A Shares (waiving the upfront sales load) for the performance measurement period is used to calculate the Performance Adjustment. After Janus Capital determines whether a particular Fund's performance was above or below its benchmark index by comparing the investment performance of the Fund's load-waived Class A Shares against the cumulative investment record of that Fund's benchmark index, Janus Capital applies the same Performance Adjustment (positive or negative) across each other class of shares of the Fund, as applicable. It is not possible to predict the effect of the Performance Adjustment on future overall compensation to Janus Capital since it depends on the performance of each Fund relative to the record of the Fund's benchmark index and future changes to the size of each Fund.

A discussion regarding the basis for the Trustees' approval of the Funds' investment advisory agreements is included in the Funds' annual or semiannual report to shareholders. You can request the Funds' annual or semiannual reports (as they become available), free of charge, by contacting your plan sponsor, broker-dealer, or financial intermediary, or by contacting a Janus representative at 1-877-335-2687. The reports are also available, free of charge, at janus.com/info.

Expense Limitations

Janus Capital has contractually agreed to waive the advisory fee payable by each Fund listed below in an amount equal to the amount, if any, that the Fund's normal operating expenses in any fiscal year, including the investment advisory fee, but excluding any performance adjustments to management fees, the distribution and shareholder servicing fees (applicable to Class A Shares, Class C Shares, Class S Shares, and Class R Shares), administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses, exceed the annual rate shown below. For information about how the expense limit affects the total expenses of each Fund, see the "Fees and Expenses of the Fund" table in each Fund Summary of the Prospectus. Janus Capital has agreed to continue each waiver until at least February 1, 2014.

Fund Name	Expense Limit Percentage (%)
Janus Balanced Fund	0.68
Janus Contrarian Fund(1)	0.77
Janus Enterprise Fund	0.76
Janus Forty Fund(1)	0.83
Janus Fund(1)	0.83
Janus Growth and Income Fund	0.75
Janus Triton Fund	0.92
Janus Venture Fund	0.92

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to its benchmark index during a (1) measurement period. Because a fee waiver will have a positive effect upon the Fund's performance, a fee waiver that is in place during the period when the performance adjustment applies may affect the performance adjustment in a way that is favorable to Janus Capital.

INVESTMENT PERSONNEL

Unless otherwise noted, the Portfolio Manager has primary responsibility for the day-to-day management of the Fund described.

Janus Balanced Fund

Co-Portfolio Managers Marc Pinto and Gibson Smith jointly share responsibility for the day-to-day management of the Fund, with no limitation on the authority of one co-portfolio manager in relation to the other. Mr. Pinto focuses on the equity portion of the Fund. Mr. Smith focuses on the fixed-income portion of the Fund.

Marc Pinto, CFA, is Executive Vice President and Co-Portfolio Manager of Janus Balanced Fund, which he has co-managed since May 2005. Mr. Pinto is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 1994 as an analyst. Mr. Pinto holds a Bachelor's degree in History from Yale University and a Master's degree in Business Administration from Harvard University. He holds the Chartered Financial Analyst designation.

Gibson Smith is Co-Chief Investment Officer of Janus Capital. He is Executive Vice President and Co-Portfolio Manager of Janus Balanced Fund, which he has co-managed since May 2005. Mr. Smith is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 2001 as a fixed-income analyst. Mr. Smith holds a Bachelor's degree in Economics from the University of Colorado.

Janus Contrarian Fund

Daniel Kozlowski, CFA, is Executive Vice President and Portfolio Manager of Janus Contrarian Fund, which he has managed since July 2011. He is also Portfolio Manager of other Janus accounts. Mr. Kozlowski initially joined Janus Capital in 1999 and left in 2008. He re-joined Janus Capital in June 2011. From March 2008 to June 2011, Mr. Kozlowski was a portfolio manager at Plaisance Capital LLC. He holds a Bachelor's degree (cum laude) in Business Administration from the University of Miami, a Master of Business Administration degree with concentrations in Finance and Accounting from the University of Chicago, and has studied at Sophia University's School of Comparative Culture in Tokyo, Japan. Mr. Kozlowski holds the Chartered Financial Analyst designation.

Janus Enterprise Fund

Brian Demain, CFA, is Executive Vice President and Portfolio Manager of Janus Enterprise Fund, which he has managed since November 2007. Mr. Demain is also Portfolio Manager of other Janus accounts. He served as Assistant Portfolio Manager of the Fund from September 2004 to October 2007. Mr. Demain joined Janus Capital in 1999 as a securities analyst. He holds a Bachelor's degree in Economics from Princeton University, where he graduated summa cum laude and was a recipient of the Daniel L. Rubinfeld '67 Prize in Empirical Economics for his senior thesis. Mr. Demain holds the Chartered Financial Analyst designation.

Janus Forty Fund

Ron Sachs, CFA, is Executive Vice President and Portfolio Manager of Janus Forty Fund, which he has managed since January 2008. He is also Portfolio Manager of other Janus accounts. Mr. Sachs joined Janus Capital in 1996 as a research analyst. He holds a Bachelor's degree (cum laude) in Economics from Princeton and a Juris Doctorate from the University of Michigan. Mr. Sachs holds the Chartered Financial Analyst designation.

Janus Fund

Co-Portfolio Managers Jonathan D. Coleman and Burton H. Wilson are responsible for the day-to-day management of the Fund. Mr. Coleman, as lead Portfolio Manager, has the authority to exercise final decision-making on the overall portfolio.

Jonathan D. Coleman, CFA, is Co-Chief Investment Officer of Janus Capital. He is Executive Vice President and Co-Portfolio Manager of Janus Fund, which he has co-managed since November 2007. Mr. Coleman is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 1994 as a research analyst. Mr. Coleman holds a Bachelor's degree in Political Economy and Spanish from Williams College, where he was a member of Phi Beta Kappa. As a Fulbright Fellow, he conducted research on economic integration in Central America. Mr. Coleman holds the Chartered Financial Analyst designation.

Burton H. Wilson, Janus Capital's Assistant Director of Equity Research, is Executive Vice President and Co-Portfolio Manager of Janus Fund, which he has co-managed since May 2011. He is also Portfolio Manager of other Janus accounts. Mr. Wilson joined Janus Capital in 2005 as a research analyst. Mr. Wilson holds a Bachelor of Arts degree in Mathematics from the University of Virginia, a Juris Doctorate from the University of Virginia School of Law, and a Master's degree in Business Administration from the University of California at Berkeley's Haas School of Business.

Janus Growth and Income Fund

Marc Pinto, CFA, is Executive Vice President and Portfolio Manager of Janus Growth and Income Fund, which he has managed since November 2007. Mr. Pinto is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 1994 as an analyst. Mr. Pinto holds a Bachelor's degree in History from Yale University and a Master's degree in Business Administration from Harvard University. He holds the Chartered Financial Analyst designation.

Janus Research Fund

The Research Team (Janus Capital's equity research analysts overseen by the Portfolio Oversight Team led by James P. Goff) selects investments for Janus Research Fund and has done so since February 2006.

James P. Goff, CFA, is Janus Capital's Director of Equity Research and Executive Vice President of the Fund. Mr. Goff is primarily responsible for the day-to-day operations of the Fund. He leads the Portfolio Oversight Team that reviews the Fund's risks, overall structure, and guidelines. Mr. Goff joined Janus Capital in 1988. He holds a Bachelor of Arts degree (magna cum laude) in Economics from Yale University. Mr. Goff holds the Chartered Financial Analyst designation.

Janus Triton Fund

Co-Portfolio Managers Chad Meade and Brian A. Schaub jointly share responsibility for the day-to-day management of the Fund, with no limitation on the authority of one co-portfolio manager in relation to the other.

Chad Meade is Executive Vice President and Co-Portfolio Manager of Janus Triton Fund, which he has co-managed since July 2006. He is also Portfolio Manager of other accounts. Mr. Meade joined Janus Capital in 2001 as an equity research analyst. He holds a Bachelor's degree (summa cum laude) in Finance from Virginia Tech.

Brian A. Schaub, CFA, is Executive Vice President and Co-Portfolio Manager of Janus Triton Fund, which he has co-managed since July 2006. He is also Portfolio Manager of other Janus accounts. Mr. Schaub joined Janus Capital in 2000 as an equity research analyst. He holds a Bachelor's degree (cum laude) in Economics from Williams College. Mr. Schaub holds the Chartered Financial Analyst designation.

Janus Venture Fund

Co-Portfolio Managers Chad Meade and Brian A. Schaub jointly share responsibility for the day-to-day management of the Fund, with no limitation on the authority of one co-portfolio manager in relation to the other.

Chad Meade is Executive Vice President and Co-Portfolio Manager of Janus Venture Fund, which he has co-managed since July 2010. He is also Portfolio Manager of other Janus accounts. Mr. Meade joined Janus Capital in 2001 as an equity research analyst. He holds a Bachelor's degree (summa cum laude) in Finance from Virginia Tech.

Brian A. Schaub, CFA, is Executive Vice President and Co-Portfolio Manager of Janus Venture Fund, which he has co-managed since July 2010. He is also Portfolio Manager of other Janus accounts. Mr. Schaub joined Janus Capital in 2000 as an equity research analyst. He holds a Bachelor's degree (cum laude) in Economics from Williams College. Mr. Schaub holds the Chartered Financial Analyst designation.

Information about the portfolio managers' and/or investment personnel's compensation structure and other accounts managed, as well as the range of their individual ownership of securities of the specific Fund(s) they manage and the aggregate range of their individual ownership in all mutual funds advised by Janus Capital, is included in the SAI.

Conflicts of Interest

Janus Capital manages many funds and numerous other accounts, which may include separate accounts and other pooled investment vehicles, such as hedge funds. Side-by-side management of multiple accounts, including the management of a cash collateral pool for securities lending and investing the Janus funds' cash, may give rise to conflicts of interest among those accounts, and may create potential risks, such as the risk that investment activity in one account may adversely affect another account. For example, short sale activity in an account could adversely affect the market value of long positions in one or more other accounts (and vice versa). Side-by-side management may raise additional potential conflicts of interest relating to the allocation of investment opportunities and the aggregation and allocation of trades. Additionally, Janus Capital is the adviser to the Janus "funds of funds," which are funds that invest primarily in other mutual funds managed by Janus Capital. Because Janus Capital is the adviser to the Janus "funds of funds" and the Funds, it is subject to certain potential conflicts of interest when allocating the assets of a Janus "fund of funds" among such Funds. To the extent that a Fund is an underlying fund in a Janus "fund of funds," a potential conflict of interest arises when allocating the assets of the Janus "fund of funds" to the Fund. Purchases and redemptions of fund shares by a Janus "fund of funds" due to reallocations or rebalancings may result in a fund having to sell securities or invest cash when it otherwise would not do so. Such transactions could accelerate the realization of taxable income if sales of securities resulted in gains and could also increase a fund's transaction costs. Large redemptions by a Janus "fund of funds" may cause a fund's expense ratio to increase due to a resulting smaller asset base. A further discussion of potential conflicts of interest and a discussion of certain procedures intended to mitigate such potential conflicts are contained in the Funds' SAI.

Other information

CLOSED FUND POLICIES

A Fund may limit sales of its Shares to new investors if Janus Capital and the Trustees believe continued sales may adversely affect the Fund's ability to achieve its investment objective. If sales of a Fund are limited, it is expected that existing shareholders invested in the Fund would be permitted to continue to purchase Shares through their existing Fund accounts and to reinvest any dividends or capital gains distributions in such accounts, absent highly unusual circumstances. Requests for new accounts into a closed fund would be reviewed by management, taking into consideration eligibility requirements and whether the addition to the fund is believed to negatively impact existing fund shareholders. The closed fund may decline opening new accounts, including eligible new accounts, if it would be in the best interests of the fund and its shareholders. If applicable, additional information regarding general policies and exceptions can be found in the closed funds' prospectuses and in the "Shares of the Trust" section of the SAI.

LIQUIDATION/REORGANIZATION OF A FUND

It is important to know that, pursuant to the Trust's Amended and Restated Agreement and Declaration of Trust and in accordance with any applicable regulations and laws, the Trustees have the authority to merge, liquidate, and/or reorganize a Fund into another fund without seeking shareholder vote or consent.

DISTRIBUTION OF THE FUNDS

The Funds are distributed by Janus Distributors LLC ("Janus Distributors"), which is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). To obtain information about FINRA member firms and their associated persons, you may contact FINRA at www.finra.org, or 1-800-289-9999.

Distributions and taxes

DISTRIBUTIONS

To avoid taxation of the Funds, the Internal Revenue Code requires each Fund to distribute all or substantially all of its net investment income and any net capital gains realized on its investments at least annually. A Fund's income from certain dividends, interest, and any net realized short-term capital gains are paid to shareholders as ordinary income dividends. Certain dividend income may be reported to shareholders as "qualified dividend income," which is generally subject to reduced rates of taxation. Net realized long-term capital gains, if any, are paid to shareholders as capital gains distributions, regardless of how long Shares of the Fund have been held. Distributions are made at the class level, so they may vary from class to class within a single Fund.

Distribution Schedule

Dividends from net investment income for Janus Balanced Fund and Janus Growth and Income Fund are normally declared and distributed in March, June, September, and December. Dividends from net investment income for the other Funds are normally declared and distributed in December. In addition, distributions of capital gains are normally declared and distributed in December. If necessary, dividends and net capital gains may be distributed at other times as well. The date you receive your distribution may vary depending on how your intermediary processes trades. Please consult your intermediary for details.

How Distributions Affect a Fund's NAV

Distributions are paid to shareholders as of the record date of a distribution of a Fund, regardless of how long the shares have been held. Undistributed dividends and net capital gains are included in each Fund's daily net asset value ("NAV"). The share price of a Fund drops by the amount of the distribution, net of any subsequent market fluctuations. For example, assume that on December 31, a Fund declared a dividend in the amount of \$0.25 per share. If the Fund's share price was \$10.00 on December 30, the Fund's share price on December 31 would be \$9.75, barring market fluctuations. You should be aware that distributions from a taxable mutual fund do not increase the value of your investment and may create income tax obligations.

"Buying a Dividend"

If you purchase shares of a Fund just before a distribution, you will pay the full price for the shares and receive a portion of the purchase price back as a taxable distribution. This is referred to as "buying a dividend." In the above example, if you bought shares on December 30, you would have paid \$10.00 per share. On December 31, the Fund would pay you \$0.25 per share as a dividend and your shares would now be worth \$9.75 per share. Unless your account is set up as a tax-deferred account, dividends paid to you would be included in your gross income for tax purposes, even though you may not have participated in the increase in NAV of the Fund, whether or not you reinvested the dividends. You should consult with your financial intermediary or tax adviser as to potential tax consequences of any distributions that may be paid shortly after purchase.

For your convenience, distributions of net investment income and net capital gains are automatically reinvested in additional Shares of the Fund without any sales charge. To receive distributions in cash, contact your financial intermediary, or a Janus representative (1-800-333-1181) if you hold Class I Shares directly with Janus. Whether reinvested or paid in cash, the distributions may be subject to taxes, unless your shares are held in a qualified tax-deferred plan or account.

TAXES

As with any investment, you should consider the tax consequences of investing in the Funds. Any time you sell or exchange shares of a fund in a taxable account, it is considered a taxable event. For federal income tax purposes, an exchange is treated the same as a sale. Depending on the purchase price and the sale price, you may have a gain or loss on the transaction; whether the gain or loss is long-term or short-term depends on how long you owned the shares. Any tax liabilities generated by your transactions are your responsibility.

The following discussion does not apply to qualified tax-deferred accounts or other non-taxable entities, nor is it a complete analysis of the federal income tax implications of investing in the Funds. You should consult your tax adviser if you have any questions. Additionally, state or local taxes may apply to your investment, depending upon the laws of your state of residence.

Taxes on Distributions

Distributions by the Funds are subject to federal income tax, regardless of whether the distribution is made in cash or reinvested in additional shares of a Fund. When gains from the sale of a security held by a Fund are paid to shareholders, the rate at which the gain will be taxed to shareholders depends on the length of time the Fund held the security. In certain states, a portion of the distributions (depending on the sources of a Fund's income) may be exempt from state and local taxes. A Fund's net investment income and capital gains are distributed to (and may be taxable to) those persons who are shareholders of the Fund at the record date of such payments. Although a Fund's total net income and net realized gain are the results of its operations, the per share amount distributed or taxable to shareholders is affected by the number of Fund shares outstanding at the record date. Generally, account tax information will be made available to shareholders on or before January 31st of each year. Information regarding distributions may also be reported to the Internal Revenue Service.

Distributions made by a Fund with respect to Shares purchased through a qualified retirement plan will generally be exempt from current taxation if left to accumulate within the qualified plan.

Generally, withdrawals from qualified plans may be subject to federal income tax at ordinary income rates and, if made before age 59½, a 10% penalty tax may be imposed. The federal income tax status of your investment depends on the features of your qualified plan. For further information, please contact your plan sponsor or tax adviser.

The Funds may be required to withhold U.S. federal income tax on all distributions and redemptions payable to shareholders who fail to provide their correct taxpayer identification number, fail to make certain required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. The current backup withholding rate is applied.

When shareholders sell Fund shares from a taxable account, they typically receive information on their tax forms that calculates their gain or loss using the average cost method. Prior to January 1, 2012, this information was not reported to the IRS, and shareholders had the option of calculating gains or losses using an alternative IRS permitted method. In accordance with legislation passed by Congress in 2008, however, your intermediary (or the Fund, if you hold Class I Shares directly with Janus) began reporting cost basis information to the IRS for shares purchased on or after January 1, 2012 and sold thereafter. Your intermediary (or the Fund, if you hold Class I Shares directly with Janus) will permit shareholders to elect their preferred cost basis method. In the absence of an election, your cost basis method will be your intermediary's default method, unless you hold Class I Shares directly with Janus in which case the Fund will use an average cost basis method. Please consult your tax adviser to determine the appropriate cost basis method for your particular tax situation and to learn more about how the new cost basis reporting laws apply to you and your investments.

Taxation of the Funds

Dividends, interest, and some capital gains received by the Funds on foreign securities may be subject to foreign tax withholding or other foreign taxes. If a Fund is eligible, it may from year to year make the election permitted under Section 853 of the Internal Revenue Code to pass through such taxes to shareholders as a foreign tax credit. If such an election is not made, any foreign taxes paid or accrued will represent an expense to the Funds.

Certain fund transactions may involve short sales, futures, options, swap agreements, hedged investments, and other similar transactions, and may be subject to special provisions of the Internal Revenue Code that, among other things, can potentially affect the character, amount, timing of distributions to shareholders, and utilization of capital loss carryforwards. The Funds will monitor their transactions and may make certain tax elections and use certain investment strategies where applicable in order to mitigate the effect of these tax provisions, if possible. Certain transactions or strategies utilized by a Fund may generate nonqualified income that can impact an investor's taxes.

The Funds do not expect to pay any federal income or excise taxes because they intend to meet certain requirements of the Internal Revenue Code, including the distributions each year of all their net investment income and net capital gains. It is important that the Funds meet these requirements so that any earnings on your investment will not be subject to federal income taxes twice. Funds that invest in partnerships may be subject to state tax liabilities.

Shareholder' s guide

The Funds offer multiple classes of shares in order to meet the needs of various types of investors.

Class A Shares and Class C Shares are offered through financial intermediary platforms including, but not limited to, traditional brokerage platforms, mutual fund wrap fee programs, bank trust platforms, and retirement platforms. Class A Shares may be offered without an initial sales charge through certain retirement platforms and through certain financial intermediary platforms, including but not limited to, fee-based broker-dealers or financial advisors, primarily on their wrap account platform(s) where such broker-dealer or financial advisor imposes additional fees for services connected to the wrap account. Class A Shares pay up to 0.25% of net assets to financial intermediaries for the provision of distribution services and/or shareholder services on behalf of their clients. Class C Shares pay up to 0.75% of net assets for payment to financial intermediaries for the provision of distribution services and up to 0.25% of net assets for the provision of shareholder services on behalf of their clients. In addition, Class A Shares and Class C Shares pay financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders.

Class S Shares are offered through financial intermediary platforms including, but not limited to, retirement platforms and asset allocation, mutual fund wrap, or other discretionary or nondiscretionary fee-based investment advisory programs. In addition, Class S Shares may be available through certain financial intermediaries who have an agreement with Janus Capital or its affiliates to offer the Shares on their supermarket platforms. Class S Shares pay up to 0.25% of net assets to financial intermediaries for the provision of distribution services and/or shareholder services and up to 0.25% of net assets for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to or on behalf of their clients.

Class I Shares are available through certain financial intermediary platforms including, but not limited to, mutual fund wrap fee programs, managed account programs, asset allocation programs, bank trust platforms, as well as certain retirement platforms. Class I Shares pay financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders. Class I Shares are also available to certain direct institutional investors including, but not limited to, corporations, certain retirement plans, public plans and foundations/endowments.

Class N Shares are generally available only to financial intermediaries purchasing on behalf of 401(k) plans, 457 plans, 403(b) plans, Taft-Hartley multi-employer plans, profit-sharing and money purchase pension plans, defined benefit plans and nonqualified deferred compensation plans. Class N Shares also are available to Janus proprietary products. Class N Shares are not available to retail non-retirement accounts, traditional or Roth individual retirement accounts ("IRAs"), Coverdell Education Savings Accounts, SEPs, SARSEPs, SIMPLE IRAs, or 529 college savings plans.

Class R Shares are offered through financial intermediary platforms including, but not limited to, retirement platforms. Class R Shares pay up to 0.50% of net assets to financial intermediaries for the provision of distribution services and, to a certain extent, shareholder services and up to 0.25% of net assets for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to or on behalf of the plan or plan participants.

Class T Shares are available through certain financial intermediary platforms including, but not limited to, mutual fund wrap fee programs, managed account programs, asset allocation programs, bank trust platforms, as well as certain retirement platforms. In addition, Class T Shares may be available through certain financial intermediaries who have an agreement with Janus Capital or its affiliates to offer the Shares on their supermarket platforms. Class T Shares pay up to 0.25% of net assets to financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders.

The Shares are not offered directly to individual investors. Consult with your financial intermediary representative for additional information on whether the Shares are an appropriate investment choice. Certain funds may not be available through certain of these intermediaries and not all financial intermediaries offer all classes of shares. **If your financial intermediary offers more than one class of shares, you should carefully consider which class of shares to purchase. Certain classes have higher expenses than other classes, which may lower the return on your investment. For instructions on how to purchase, exchange, or redeem Shares, contact your financial intermediary or refer to your plan documents. For Class I Shares held directly with Janus, please contact a Janus representative at 1-800-333-1181.**

With certain limited exceptions, the Funds are available only to U.S. citizens or residents, and employees of Janus Capital or its affiliates.

PRICING OF FUND SHARES

The per share NAV for each class is computed by dividing the total value of assets allocated to the class, less liabilities allocated to that class, by the total number of outstanding shares of the class. A Fund's NAV is calculated as of the close of the regular trading session of the New York Stock Exchange ("NYSE") (normally 4:00 p.m. New York time) each day that the NYSE is open ("business day"). However, the NAV may be calculated earlier if trading on the NYSE is restricted, or as permitted by the Securities and Exchange Commission ("SEC"). Foreign securities held by a Fund may be traded on days and at times when the NYSE is closed and the NAV is therefore not calculated. Accordingly, the value of a Fund's holdings may change on days that are not business days in the United States and on which you will not be able to purchase or redeem a Fund's Shares.

The price you pay for purchases of Shares is the public offering price, which is the NAV next determined after your request is received in good order by a Fund or its agents, plus, for Class A Shares, any applicable initial sales charge. The price you pay to sell Shares is also the NAV, although for Class A Shares and Class C Shares, a contingent deferred sales charge may be taken out of the proceeds. Your financial intermediary may charge you a separate or additional fee for processing purchases and redemptions of Shares. In order to receive a day's price, your order must be received in good order by a Fund or its agents by the close of the regular trading session of the NYSE.

Securities held by the Funds are generally valued at market value. Certain short-term instruments maturing within 60 days or less are valued at amortized cost, which approximates market value. If a market quotation for a security is not readily available or is deemed unreliable, or if an event that is expected to affect the value of the security occurs after the close of the principal exchange or market on which the security is traded, and before the close of the NYSE, a fair value of the security (except for short-term instruments maturing within 60 days or less) will be determined in good faith under policies and procedures established by and under the supervision of the Funds' Trustees. Such events include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a non-significant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a non-valued security and a restricted or non-public security. While fair value pricing may be more commonly used with foreign equity securities, it may also be used with, among other things, thinly-traded domestic securities or fixed-income securities. For valuation purposes, quotations of foreign portfolio securities, other assets and liabilities, and forward contracts stated in foreign currency are generally translated into U.S. dollar equivalents at the prevailing market rates. The Funds may use systematic fair valuation models provided by independent pricing services to value foreign equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

Due to the subjective nature of fair value pricing, a Fund's value for a particular security may be different from the last quoted market price. Fair value pricing may reduce arbitrage activity involving the frequent buying and selling of mutual fund shares by investors seeking to take advantage of a perceived lag between a change in the value of a Fund's portfolio securities and the reflection of such change in that Fund's NAV, as further described in the "Excessive Trading" section of this Prospectus. While funds that invest in foreign securities may be at a greater risk for arbitrage activity, such activity may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that a Fund's valuation of a security is different from the security's market value, short-term arbitrage traders buying and/or selling shares of a Fund may dilute the NAV of that Fund, which negatively impacts long-term shareholders. The Funds' fair value pricing and excessive trading policies and procedures may not completely eliminate short-term trading in certain omnibus accounts and other accounts traded through intermediaries.

The value of the securities of other open-end funds held by a Fund, if any, will be calculated using the NAV of such open-end funds, and the prospectuses for such open-end funds explain the circumstances under which they use fair value pricing and the effects of using fair value pricing.

All purchases, exchanges, redemptions, or other account activity must be processed through your financial intermediary or plan sponsor. Your financial intermediary or plan sponsor is responsible for promptly transmitting purchase, redemption, and

other requests to the Funds under the arrangements made between your financial intermediary or plan sponsor and its customers. The Funds are not responsible for the failure of any financial intermediary or plan sponsor to carry out its obligations to its customers.

CHOOSING A SHARE CLASS

Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, Class R Shares, and Class T Shares are offered by this Prospectus. The Funds offer multiple classes of shares in order to meet the needs of various types of investors. For more information about these classes of Shares and whether or not you are eligible to purchase these Shares, please call 1-877-335-2687.

Each class represents an interest in the same portfolio of investments, but has different charges and expenses, allowing you to choose the class that best meets your needs. For an analysis of fees associated with an investment in each share class or other similar funds, please visit www.finra.org/fundanalyzer. When choosing a share class, you should consider:

- how much you plan to invest;
- how long you expect to own the shares;
- the expenses paid by each class; and
- for Class A Shares and Class C Shares, whether you qualify for any reduction or waiver of any sales charges.

You should also consult your financial intermediary about which class is most suitable for you. In addition, you should consider the factors below with respect to each class of Shares:

Class A Shares	
Initial sales charge on purchases	Up to 5.75%(1)
reduction of initial sales charge for purchases of \$50,000 or more	
initial sales charge waived for purchases of \$1 million or more	
Deferred sales charge (CDSC)	None except on certain redemptions of Shares purchased without an initial sales charge(1)
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.25% annual distribution/service fee
Class C Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	1.00% on Shares redeemed within 12 months of purchase(1)
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	\$2,500
Maximum purchase	\$500,000
Minimum aggregate account balance	None
12b-1 fee	1.00% annual fee (up to 0.75% distribution fee and up to 0.25% shareholder servicing fee)

Class S Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.25% annual distribution/service fee
Class I Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	
institutional investors (investing directly with Janus)	\$1,000,000
through an intermediary institution	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None
Class N Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative fees	Pays administrative fees to Janus Capital or Janus Services
Minimum initial investment	None
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None
Class R Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500 (None for defined contribution plans)
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.50% annual distribution/service fee
Class T Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None

(1) May be waived under certain circumstances.

DISTRIBUTION, SERVICING, AND ADMINISTRATIVE FEES

Distribution and Shareholder Servicing Plans

Under separate distribution and shareholder servicing plans adopted in accordance with Rule 12b-1 under the Investment Company Act of 1940, as amended, for Class A Shares, Class S Shares, and Class R Shares (each a “Plan”) and Class C Shares (the “Class C Plan”), each Fund pays Janus Distributors, the Trust’s distributor, a fee for the sale and distribution and/or shareholder servicing of the Shares based on the average daily net assets of each, at the following annual rates:

Class	12b-1 Fee for the Funds
Class A Shares	0.25%
Class C Shares	1.00% ⁽¹⁾
Class S Shares	0.25%
Class R Shares	0.50%

(1) Up to 0.75% of this fee is for distribution services and up to 0.25% of this fee is for shareholder services.

Under the terms of each Plan, the Trust is authorized to make payments to Janus Distributors for remittance to retirement plan service providers, broker-dealers, bank trust departments, financial advisors, and other financial intermediaries, as compensation for distribution and/or shareholder services performed by such entities for their customers who are investors in the Funds.

Janus Distributors is entitled to retain all fees paid under the Class C Plan for the first 12 months on any investment in Class C Shares to recoup its expenses with respect to the payment of commissions on sales of Class C Shares. Financial intermediaries will become eligible for compensation under the Class C Plan beginning in the 13th month following the purchase of Class C Shares, although Janus Distributors may, pursuant to a written agreement between Janus Distributors and a particular financial intermediary, pay such financial intermediary 12b-1 fees prior to the 13th month following the purchase of Class C Shares.

Financial intermediaries may from time to time be required to meet certain criteria in order to receive 12b-1 fees. Janus Distributors is entitled to retain some or all fees payable under each Plan in certain circumstances, including when there is no broker of record or when certain qualification standards have not been met by the broker of record.

Because 12b-1 fees are paid out of a Fund’s assets on an ongoing basis, over time they will increase the cost of your investment and may cost you more than paying other types of sales charges.

Administrative Fees

Class A Shares, Class C Shares, and Class I Shares

Certain, but not all, intermediaries may charge fees for administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided by intermediaries on behalf of shareholders of the Funds. Order processing includes the submission of transactions through the National Securities Clearing Corporation (“NSCC”) or similar systems, or those processed on a manual basis with Janus. Other shareholder services may include the provision of order confirmations, periodic account statements, forwarding prospectuses, shareholder reports, and other materials to existing customers, and answering inquiries regarding accounts. Janus Services remits these administrative fees to intermediaries on behalf of the Funds. Janus Services is then reimbursed by the Funds for such payments. Because the form and amount charged varies by intermediary, the amount of the administrative fee borne by the class is an average of all fees charged by intermediaries. In the event an intermediary receiving payments from Janus Services on behalf of the Funds converts from a networking structure to an omnibus account structure, or otherwise experiences increased costs, fees borne by the Shares may increase. The Funds’ Trustees have set limits on fees that the Funds may incur with respect to administrative fees paid for omnibus or networked accounts. Such limits are subject to change by the Trustees in the future. Janus Services also seeks reimbursement for costs it incurs as transfer agent and for providing servicing.

Class S Shares, Class R Shares, and Class T Shares

Janus Services receives an administrative services fee at an annual rate of 0.25% of the average daily net assets of Class S Shares, Class R Shares, and Class T Shares of each Fund for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Funds. Order processing includes the submission of

transactions through the NSCC or similar systems, or those processed on a manual basis with Janus. Other shareholder services may include the provision of order confirmations, periodic account statements, forwarding prospectuses, shareholder reports, and other materials to existing customers, and answering inquiries regarding accounts. Janus Services expects to use all or a significant portion of this fee to compensate intermediaries and retirement plan service providers for providing these services to their customers who invest in the Funds. Janus Services or its affiliates may also pay fees for services provided by intermediaries to the extent the fees charged by intermediaries exceed the 0.25% of net assets charged to the Funds.

PAYMENTS TO FINANCIAL INTERMEDIARIES BY JANUS CAPITAL OR ITS AFFILIATES

From their own assets, Janus Capital or its affiliates may pay selected brokerage firms or other financial intermediaries that sell Class A and Class C Shares of the Janus funds for distribution, marketing, promotional, or related services. Such payments may be based on gross sales, assets under management, or transactional charges, or on a combination of these factors. The amount of these payments is determined from time to time by Janus Capital, may be substantial, and may differ for different financial intermediaries. Payments based primarily on sales create an incentive to make new sales of shares, while payments based on assets create an incentive to retain previously sold shares. Sales- and asset-based payments currently range up to 25 basis points on sales and up to 20 basis points on average annual net assets of shares held through the intermediary and are subject to change. Payments based on transactional charges may include the payment or reimbursement of all or a portion of “ticket charges.” Ticket charges are fees charged to salespersons purchasing through a financial intermediary firm in connection with mutual fund purchases, redemptions, or exchanges. The payment or reimbursement of ticket charges creates an incentive for salespersons of an intermediary to sell shares of Janus funds over shares of funds for which there is lesser or no payment or reimbursement of any applicable ticket charge. Janus Capital and its affiliates consider a number of factors in making payments to financial intermediaries, including the distribution capabilities of the intermediary, the overall quality of the relationship, expected gross and/or net sales generated by the relationship, redemption and retention rates of assets held through the intermediary, the willingness of the intermediary to cooperate with Janus Capital’s marketing efforts, access to sales personnel, and the anticipated profitability of sales through the institutional relationship. These factors may change from time to time. Currently, these payments are limited to the top 100 distributors (measured by sales or expected sales of shares of the Janus funds). Broker-dealer firms currently receiving or expected to receive these fees are listed in the SAI.

In addition, for all share classes, Janus Capital, Janus Distributors, or their affiliates may pay fees, from their own assets, to brokerage firms, banks, financial advisors, retirement plan service providers, and other financial intermediaries for providing other marketing or distribution-related services, as well as recordkeeping, subaccounting, transaction processing, and other shareholder or administrative services (including payments for processing transactions via NSCC or other means) in connection with investments in the Janus funds. These fees are in addition to any fees that may be paid by the Janus funds for these types of services or other services.

Janus Capital or its affiliates may also share certain marketing expenses with intermediaries, or pay for or sponsor informational meetings, seminars, client awareness events, support for marketing materials, sales reporting, or business building programs for such intermediaries to raise awareness of the Funds. Janus Capital or its affiliates may make payments to participate in intermediary marketing support programs which may provide Janus Capital or its affiliates with one or more of the following benefits: attendance at sales conferences, participation in meetings or training sessions, access to or information about intermediary personnel, use of an intermediary’s marketing and communication infrastructure, fund analysis tools, business planning and strategy sessions with intermediary personnel, information on industry- or platform-specific developments, trends and service providers, and other marketing-related services. Such payments may be in addition to, or in lieu of, the payments described above. These payments are intended to promote the sales of Janus funds and to reimburse financial intermediaries, directly or indirectly, for the costs that they or their salespersons incur in connection with educational seminars, meetings, and training efforts about the Janus funds to enable the intermediaries and their salespersons to make suitable recommendations, provide useful services, and maintain the necessary infrastructure to make the Janus funds available to their customers.

The receipt of (or prospect of receiving) payments, reimbursements and other forms of compensation described above may provide a financial intermediary and its salespersons with an incentive to favor sales of Janus funds’ shares over sales of other mutual funds (or non-mutual fund investments) or to favor sales of one class of Janus funds’ shares over sales of another Janus funds’ share class, with respect to which the financial intermediary does not receive such payments or receives them in a lower amount. The receipt of these payments may cause certain financial intermediaries to elevate the prominence of the

Janus funds within such financial intermediary's organization by, for example, placement on a list of preferred or recommended funds and/or the provision of preferential or enhanced opportunities to promote the Janus funds in various ways within such financial intermediary's organization.

From time to time, certain financial intermediaries approach Janus Capital to request that Janus Capital make contributions to certain charitable organizations. In these cases, Janus Capital's contribution may result in the financial intermediary, or its salespersons, recommending Janus funds over other mutual funds (or non-mutual fund investments).

The payment arrangements described above will not change the price an investor pays for Shares nor the amount that a Janus fund receives to invest on behalf of the investor. You should consider whether such arrangements exist when evaluating any recommendations from an intermediary to purchase or sell Shares of the Funds and, if applicable, when considering which share class of a Fund is most appropriate for you. Please contact your financial intermediary or plan sponsor for details on such arrangements.

PURCHASES

With the exception of Class I Shares, purchases of Shares may generally be made only through institutional channels such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly with the Funds in certain circumstances as described in the "Minimum Investment Requirements" section. Contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with Janus, or refer to your plan documents for information on how to invest in each Fund, including additional information on minimum initial or subsequent investment requirements. Under certain circumstances, a Fund may permit an in-kind purchase of Shares at the discretion of Janus Capital. Your financial intermediary may charge you a separate or additional fee for processing purchases of Shares. Only certain financial intermediaries are authorized to receive purchase orders on the Funds' behalf. As discussed under "Payments to financial intermediaries by Janus Capital or its affiliates," Janus Capital and its affiliates may make payments to brokerage firms or other financial intermediaries that were instrumental in the acquisition or retention of shareholders for the Funds or that provide services in connection with investments in the Funds. You should consider such arrangements when evaluating any recommendation of the Funds.

Each Fund reserves the right to reject any purchase order, including exchange purchases, for any reason. The Funds are not intended for excessive trading. For more information about the Funds' policy on excessive trading, refer to "Excessive Trading."

In compliance with the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"), your financial intermediary is required to verify certain information on your account application as part of its Anti-Money Laundering Program. You will be required to provide your full name, date of birth, social security number, and permanent street address to assist in verifying your identity. You may also be asked to provide documents that may help to establish your identity. Until verification of your identity is made, your financial intermediary may temporarily limit additional share purchases. In addition, your financial intermediary may close an account if they are unable to verify a shareholder's identity. Please contact your financial intermediary if you need additional assistance when completing your application or additional information about the intermediary's Anti-Money Laundering Program.

In an effort to ensure compliance with this law, Janus' Anti-Money Laundering Program (the "Program") provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Minimum Investment Requirements

Class A Shares, Class C Shares, Class S Shares, and Class T Shares

The minimum investment is \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts. Investors in a defined contribution plan through a third party administrator should refer to their plan document or contact their plan administrator for additional information. In addition, accounts held through certain wrap programs may not be subject to these minimums. Investors should refer to their intermediary for additional information.

The maximum purchase in Class C Shares is \$500,000 for any single purchase. The sales charge and expense structure of Class A Shares may be more advantageous for investors purchasing more than \$500,000 of Fund shares.

Class I Shares

The minimum investment is \$1 million for institutional investors investing directly with Janus. Institutional investors generally may meet the minimum investment amount by aggregating multiple accounts within the same Fund. Accounts offered through an intermediary institution must meet the minimum investment requirements of \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts. Directors, officers, and employees of Janus Capital Group Inc. ("JCGI") and its affiliates, as well as Trustees and officers of the Funds, may purchase Class I Shares through certain financial intermediaries' institutional platforms. For more information about this program and eligibility requirements, please contact a Janus representative at 1-800-333-1181. Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs. For additional information, contact your intermediary, plan sponsor, administrator, or a Janus representative, as applicable.

Class N Shares

Investors in a retirement plan through a third party administrator should refer to their plan documents or contact their plan administrator for information regarding account minimums.

Class R Shares

Investors in a defined contribution plan through a third party administrator should refer to their plan document or contact their plan administrator for information regarding account minimums. For all other account types, the minimum investment is \$2,500.

Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class T Shares

Each Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. If you hold Class I Shares directly with a Fund, you may receive written notice prior to the closure of your Fund account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of a redemption.

Each Fund reserves the right to change the amount of these minimums or maximums from time to time or to waive them in whole or in part.

Systematic Purchase Plan

You may arrange for periodic purchases by authorizing your financial intermediary (or a Janus representative, if you hold Class I Shares directly with a Fund) to withdraw the amount of your investment from your bank account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary or a Janus representative for details.

Initial Sales Charge**Class A Shares**

An initial sales charge may apply to your purchase of Class A Shares of the Funds based on the amount invested, as set forth in the table below. The sales charge is allocated between Janus Distributors and your financial intermediary. Sales charges, as expressed as a percentage of offering price and as a percentage of your net investment, are shown in the table. The dollar amount of your initial sales charge is calculated as the difference between the public offering price and the net asset value of those shares. Since the offering price is calculated to two decimal places using standard rounding criteria, the number of shares purchased and the dollar amount of your sales charge as a percentage of the offering price and of your net investment may be higher or lower than the amounts set forth in the table depending on whether there was a downward or upward rounding.

Amount of Purchase at Offering Price	Class A Shares Sales Charge as a Percentage of Offering Price(1)	Class A Shares Sales Charge as a Percentage of Net Amount Invested
Under \$50,000	5.75 %	6.10 %
\$50,000 but under \$100,000	4.50 %	4.71 %
\$100,000 but under \$250,000	3.50 %	3.63 %
\$250,000 but under \$500,000	2.50 %	2.56 %
\$500,000 but under \$1,000,000	2.00 %	2.04 %
\$1,000,000 and above	None(2)	None

(1) Offering Price includes the initial sales charge.

(2) A contingent deferred sales charge of 1.00% may apply to Class A Shares purchased without an initial sales charge if redeemed within 12 months of purchase.

For purchases of Class A Shares of \$1,000,000 or greater, from its own assets, Janus Distributors may pay financial intermediaries commissions as follows:

1.00% on amounts from \$1,000,000 to \$4,000,000;
plus 0.50% on amounts greater than \$4,000,000 to \$10,000,000;
plus 0.25% on amounts over \$10,000,000.

The purchase totals eligible for these commissions are aggregated on a rolling one year basis so that the rate payable resets to the highest rate annually.

Qualifying for a Reduction or Waiver of Class A Shares Sales Charge

You may be able to lower your Class A Shares sales charge under certain circumstances. For example, you can combine Class A Shares and Class C Shares you already own (either in these Funds or certain other Janus funds) with your current purchase of Class A Shares of the Funds and certain other Janus funds (including Class C Shares of those funds) to take advantage of the breakpoints in the sales charge schedule as set forth above. Certain circumstances under which you may combine such ownership of Shares and purchases are described below. Contact your financial intermediary for more information.

Class A Shares of the Funds may be purchased without an initial sales charge by the following persons (and their spouses and children under 21 years of age): (i) registered representatives and other employees of intermediaries that have selling agreements with Janus Distributors to sell Class A Shares; (ii) directors, officers, and employees of JCGI and its affiliates; and (iii) Trustees and officers of the Trust. In addition, the initial sales charge may be waived on purchases of Class A Shares through financial intermediaries that have entered into an agreement with Janus Distributors that allows the waiver of the sales charge.

In order to obtain a sales charge discount, you should inform your financial intermediary of other accounts in which there are Fund holdings eligible to be aggregated to meet a sales charge breakpoint. These other accounts may include the accounts described under “Aggregating Accounts.” You may need to provide documents such as account statements or confirmation statements to prove that the accounts are eligible for aggregation. The Letter of Intent described below requires historical cost information in certain circumstances. You should retain records necessary to show the price you paid to purchase Fund shares, as the Funds, their agents, or your financial intermediary may not retain this information.

Right of Accumulation. You may purchase Class A Shares of a Fund at a reduced sales charge determined by aggregating the dollar amount of the new purchase (measured by the offering price) and the total prior day’s net asset value (net amount invested) of all Class A Shares of the Fund and of certain other classes (Class A Shares and Class C Shares of the Trust) of Janus funds then held by you, or held in accounts identified under “Aggregating Accounts,” and applying the sales charge applicable to such aggregate amount. In order for your purchases and holdings to be aggregated for purposes of qualifying for such discount, they must have been made through one financial intermediary and you must provide sufficient information to your financial intermediary at the time of purchase to permit verification that the purchase qualifies for the reduced sales charge. The right of accumulation is subject to modification or discontinuance at any time with respect to all shares purchased thereafter.

Letter of Intent. You may obtain a reduced sales charge on Class A Shares by signing a Letter of Intent indicating your intention to purchase \$50,000 or more of Class A Shares (including Class A Shares in other series of the Trust) over a 13-month period. The term of the Letter of Intent will commence upon the date you sign the Letter of Intent. You must refer to such Letter when placing orders. With regard to a Letter of Intent, the amount of investment for purposes of applying the sales load schedule includes (i) the historical cost (what you actually paid for the shares at the time of purchase, including any sales charges) of all Class A Shares acquired during the term of the Letter of Intent, minus (ii) the value of any redemptions of Class A Shares made during the term of the Letter of Intent. Each investment made during the period receives the reduced sales charge applicable to the total amount of the investment goal. A portion of shares purchased may be held in escrow to pay for any sales charge that may be applicable. If the goal is not achieved within the period, you must pay the difference between the sales charges applicable to the purchases made and the charges previously paid, or an appropriate number of escrowed shares will be redeemed. Please contact your financial intermediary to obtain a Letter of Intent application.

Aggregating Accounts. To take advantage of lower Class A Shares sales charges on large purchases or through the exercise of a Letter of Intent or right of accumulation, investments made by you, your spouse, and your children under age 21 may be aggregated if made for your own account(s) and/or certain other accounts such as:

trust accounts established by the above individuals (or the accounts of the primary beneficiary of the trust if the person who established the trust is deceased);

solely controlled business accounts; and

single participant retirement plans.

To receive a reduced sales charge under rights of accumulation or a Letter of Intent, you must notify your financial intermediary of any eligible accounts that you, your spouse, and your children under age 21 have at the time of your purchase.

You may access information regarding sales loads, breakpoint discounts, and purchases of the Funds' shares, free of charge, and in a clear and prominent format, on our website at janus.com/breakpoints, and by following the appropriate hyperlinks to the specific information.

Commission on Class C Shares

Janus Distributors may compensate your financial intermediary at the time of sale at a commission rate of 1.00% of the net asset value of the Class C Shares purchased. Service providers to qualified plans or other financial intermediaries will not receive this amount if they receive 12b-1 fees from the time of initial investment of assets in Class C Shares.

EXCHANGES

Contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with a Fund, or consult your plan documents to exchange into other funds in the Trust. Be sure to read the prospectus of the fund into which you are exchanging. An exchange from one fund to another is generally a taxable transaction (except for certain tax-deferred accounts).

You may generally exchange Shares of a Fund for Shares of the same class of any other fund in the Trust offered through your financial intermediary or qualified plan.

You may also exchange shares of one class for another class of shares within the same fund, provided the eligibility requirements of the class of shares to be received are met. Same-fund exchanges will only be processed in instances where there is no contingent deferred sales charge ("CDSC") on the shares to be exchanged and no initial sales charge on the shares to be received. A Fund's fees and expenses differ between share classes. Please read the Prospectus for the share class you are interested in prior to investing in that share class. Contact your financial intermediary or consult your plan documents for additional information.

You must meet the minimum investment amount for each fund.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. A Fund may suspend or terminate your exchange privilege if you make more than one round trip in the Fund in a 90-day period and may bar future purchases in the Fund or any of the other Janus funds. The Funds will work with intermediaries to apply the Funds'

exchange limits. However, the Funds may not always have the ability to monitor or enforce the trading activity in such accounts. For more information about the Funds' policy on excessive trading, refer to "Excessive Trading."

Each Fund reserves the right to reject any exchange request and to modify or terminate the exchange privilege at any time.

Waiver of Sales Charges

Class A Shares received through an exchange of Class A Shares of another fund of the Trust will not be subject to any initial sales charge of the Funds' Class A Shares. Class A Shares or Class C Shares received through an exchange of Class A Shares or Class C Shares, respectively, of another fund of the Trust will not be subject to any applicable CDSC at the time of the exchange. Any CDSC applicable to redemptions of Class A Shares or Class C Shares will continue to be measured on the Shares received by exchange from the date of your original purchase. For more information about the CDSC, please refer to "Redemptions." While Class C Shares do not have any front-end sales charges, their higher annual fund operating expenses mean that over time, you could end up paying more than the equivalent of the maximum allowable front-end sales charge.

REDEMPTIONS

Redemptions, like purchases, may generally be effected only through financial intermediaries, retirement platforms, and by certain direct institutional investors holding Class I Shares. Please contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with a Fund, or refer to the appropriate plan documents for details. Your financial intermediary may charge a processing or service fee in connection with the redemption of Shares.

Shares of each Fund may be redeemed on any business day on which the Fund's NAV is calculated. Redemptions are duly processed at the NAV next calculated after your redemption order is received in good order by a Fund or its agents. Redemption proceeds, less any applicable CDSC for Class A Shares or Class C Shares, will normally be sent the business day following receipt of the redemption order.

Each Fund reserves the right to postpone payment of redemption proceeds for up to seven calendar days. Additionally, the right to require the Funds to redeem their Shares may be suspended, or the date of payment may be postponed beyond seven calendar days, whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable.

Each Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. If you hold Class I Shares directly with a Fund, you may receive written notice prior to the closure of your Fund account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of a redemption.

Large Shareholder Redemptions

Certain accounts or Janus affiliates may from time to time own (beneficially or of record) or control a significant percentage of a Fund's Shares. Redemptions by these accounts of their holdings in a Fund may impact the Fund's liquidity and NAV. These redemptions may also force a Fund to sell securities, which may negatively impact the Fund's brokerage costs.

Redemptions In-Kind

Shares normally will be redeemed for cash, although each Fund retains the right to redeem some or all of its shares in-kind under unusual circumstances, in order to protect the interests of remaining shareholders, to accommodate a request by a particular shareholder that does not adversely affect the interests of the remaining shareholders, or in connection with the liquidation of a fund, by delivery of securities selected from its assets at its discretion. However, each Fund is required to redeem shares solely for cash up to the lesser of \$250,000 or 1% of the NAV of that Fund during any 90-day period for any one shareholder. Should redemptions by any shareholder exceed such limitation, a Fund will have the option of redeeming the excess in cash or in-kind. In-kind payment means payment will be made in portfolio securities rather than cash. If this occurs, the redeeming shareholder might incur brokerage or other transaction costs to convert the securities to cash, whereas such costs are borne by the Fund for cash redemptions.

While a Fund may pay redemptions in-kind, a Fund may instead choose to raise cash to meet redemption requests through the sale of fund securities or permissible borrowings. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and may increase brokerage costs.

Systematic Withdrawal Plan

Class A Shares and Class C Shares

You may arrange for periodic redemptions of Class A Shares or Class C Shares by authorizing your financial intermediary to redeem a specified amount from your account on a day or days you specify. Any resulting CDSC may be waived through financial intermediaries that have entered into an agreement with Janus Distributors. The maximum annual rate at which shares subject to a CDSC may be redeemed, pursuant to a systematic withdrawal plan, without paying a CDSC, is 12% of the net asset value of the account. Certain other terms and minimums may apply. Not all financial intermediaries offer this plan. Contact your financial intermediary for details.

Class S Shares, Class I Shares, Class N Shares, Class R Shares, and Class T Shares

You may arrange for periodic redemptions by authorizing your financial intermediary (or a Janus representative, if you hold Class I Shares directly with a Fund) to redeem a specified amount from your account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary or a Janus representative for details.

Contingent Deferred Sales Charge

Class A Shares and Class C Shares

A 1.00% CDSC may be deducted with respect to Class A Shares purchased without an initial sales charge if redeemed within 12 months of purchase, unless any of the CDSC waivers listed apply. A 1.00% CDSC will be deducted with respect to Class C Shares redeemed within 12 months of purchase, unless a CDSC waiver applies. The CDSC will be based on the lower of the original purchase price or the value of the redemption of the Class A Shares or Class C Shares redeemed, as applicable.

CDSC Waivers

There are certain cases in which you may be exempt from a CDSC charged to Class A Shares and Class C Shares. Among others, these include:

Upon the death or disability of an account owner;

Retirement plans and certain other accounts held through a financial intermediary that has entered into an agreement with Janus Distributors to waive CDSCs for such accounts;

Retirement plan shareholders taking required minimum distributions;

The redemption of Class A Shares or Class C Shares acquired through reinvestment of Fund dividends or distributions;

The portion of the redemption representing appreciation as a result of an increase in NAV above the total amount of payments for Class A Shares or Class C Shares during the period during which the CDSC applied; or

If a Fund chooses to liquidate or involuntarily redeem shares in your account.

To keep the CDSC as low as possible, Class A Shares or Class C Shares not subject to any CDSC will be redeemed first, followed by shares held longest.

Reinstatement Privilege

After you have redeemed Class A Shares, you have a one-time right to reinvest the proceeds into Class A Shares of the same or another fund within 90 days of the redemption date at the current NAV (without an initial sales charge). You will not be reimbursed for any CDSC paid on your redemption of Class A Shares.

EXCESSIVE TRADING

Excessive Trading Policies and Procedures

The Trustees have adopted policies and procedures with respect to short-term and excessive trading of Fund shares ("excessive trading"). Each Fund is intended for long-term investment purposes only, and the Funds will take reasonable steps to attempt to detect and deter short-term and excessive trading. Transactions placed in violation of the Funds' exchange limits or excessive trading policies may be cancelled or revoked by a Fund by the next business day following receipt by the

Fund. The trading history of accounts determined to be under common ownership or control within any of the Janus funds may be considered in enforcing these policies and procedures. As described below, however, the Funds may not be able to identify all instances of excessive trading or completely eliminate the possibility of excessive trading. In particular, it may be difficult to identify excessive trading in certain omnibus accounts and other accounts traded through intermediaries. By their nature, omnibus accounts, in which purchases and redemptions of the Funds' shares by multiple investors are aggregated by the intermediary and presented to the Funds on a net basis, may effectively conceal the identity of individual investors and their transactions from the Funds and their agents. This makes the elimination of excessive trading in the accounts impractical without the assistance of the intermediary.

The Funds attempt to deter excessive trading through at least the following methods:

- exchange limitations as described under "Exchanges;"
- trade monitoring; and
- fair valuation of securities as described under "Pricing of Fund Shares."

Generally, a purchase and redemption of Shares from the same Fund (i.e., "round trip") within 90 calendar days may result in enforcement of a Fund's excessive trading policies and procedures with respect to future purchase orders, provided that each Fund reserves the right to reject any purchase request as explained above.

The Funds monitor for patterns of shareholder frequent trading and may suspend or permanently terminate the exchange privilege of any investor who makes more than one round trip in a Fund over a 90-day period, and may bar future purchases into the Fund and any of the other Janus funds by such investor. The Funds' excessive trading policies generally do not apply to (i) a money market fund, although money market funds at all times reserve the right to reject any purchase request (including exchange purchases) for any reason without prior notice; (ii) transactions in the Janus funds by a Janus "fund of funds," which is a fund that primarily invests in other Janus mutual funds; and (iii) identifiable transactions by certain funds of funds and asset allocation programs to realign portfolio investments with existing target allocations.

The Funds' Trustees may approve from time to time a redemption fee to be imposed by any Janus fund, subject to 60 days' notice to shareholders of that fund.

Investors who place transactions through the same financial intermediary on an omnibus basis may be deemed part of a group for the purpose of the Funds' excessive trading policies and procedures and may be rejected in whole or in part by a Fund. The Funds, however, cannot always identify or reasonably detect excessive trading that may be facilitated by financial intermediaries or made difficult to identify through the use of omnibus accounts by those intermediaries that transmit purchase, exchange, and redemption orders to the Funds, and thus the Funds may have difficulty curtailing such activity. Transactions accepted by a financial intermediary in violation of the Funds' excessive trading policies may be cancelled or revoked by a Fund by the next business day following receipt by that Fund.

In an attempt to detect and deter excessive trading in omnibus accounts, the Funds or their agents may require intermediaries to impose restrictions on the trading activity of accounts traded through those intermediaries. Such restrictions may include, but are not limited to, requiring that trades be placed by U.S. mail, prohibiting future purchases by investors who have recently redeemed Fund shares, requiring intermediaries to report information about customers who purchase and redeem large amounts, and similar restrictions. The Funds' ability to impose such restrictions with respect to accounts traded through particular intermediaries may vary depending on the systems' capabilities, applicable contractual and legal restrictions, and cooperation of those intermediaries.

Certain transactions in Fund shares, such as periodic rebalancing through intermediaries (no more frequently than every 60 days) or those which are made pursuant to systematic purchase, exchange, or redemption programs generally do not raise excessive trading concerns and normally do not require application of the Funds' methods to detect and deter excessive trading.

Each Fund also reserves the right to reject any purchase request (including exchange purchases) by any investor or group of investors for any reason without prior notice, including, in particular, if the trading activity in the account(s) is deemed to be disruptive to a Fund. For example, a Fund may refuse a purchase order if the Fund's portfolio managers and/or investment personnel believe they would be unable to invest the money effectively in accordance with the Fund's investment policies or the Fund would otherwise be adversely affected due to the size of the transaction, frequency of trading, or other factors.

The Funds' policies and procedures regarding excessive trading may be modified at any time by the Funds' Trustees.

Excessive Trading Risks

Excessive trading may present risks to a Fund's long-term shareholders. Excessive trading into and out of a Fund may disrupt portfolio investment strategies, may create taxable gains to remaining Fund shareholders, and may increase Fund expenses, all of which may negatively impact investment returns for all remaining shareholders, including long-term shareholders.

Funds that invest in foreign securities may be at a greater risk for excessive trading. Investors may attempt to take advantage of anticipated price movements in securities held by a fund based on events occurring after the close of a foreign market that may not be reflected in the fund's NAV (referred to as "price arbitrage"). Such arbitrage opportunities may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that a Fund's valuation of a security differs from the security's market value, short-term arbitrage traders may dilute the NAV of a Fund, which negatively impacts long-term shareholders. Although the Funds have adopted fair valuation policies and procedures intended to reduce the Funds' exposure to price arbitrage, stale pricing, and other potential pricing inefficiencies, under such circumstances there is potential for short-term arbitrage trades to dilute the value of Fund shares.

Although the Funds take steps to detect and deter excessive trading pursuant to the policies and procedures described in this Prospectus and approved by the Trustees, there is no assurance that these policies and procedures will be effective in limiting excessive trading in all circumstances. For example, the Funds may be unable to completely eliminate the possibility of excessive trading in certain omnibus accounts and other accounts traded through intermediaries. Omnibus accounts may effectively conceal the identity of individual investors and their transactions from the Funds and their agents. This makes the Funds' identification of excessive trading transactions in the Funds through an omnibus account difficult and makes the elimination of excessive trading in the account impractical without the assistance of the intermediary. Although the Funds encourage intermediaries to take necessary actions to detect and deter excessive trading, some intermediaries may be unable or unwilling to do so, and accordingly, the Funds cannot eliminate completely the possibility of excessive trading.

Shareholders that invest through an omnibus account should be aware that they may be subject to the policies and procedures of their financial intermediary with respect to excessive trading in the Funds.

AVAILABILITY OF PORTFOLIO HOLDINGS INFORMATION

The Mutual Fund Holdings Disclosure Policies and Procedures adopted by Janus Capital and all mutual funds managed within the Janus fund complex are designed to be in the best interests of the funds and to protect the confidentiality of the funds' portfolio holdings. The following describes policies and procedures with respect to disclosure of portfolio holdings.

Full Holdings. Each Fund is required to disclose its complete holdings in the quarterly holdings report on Form N-Q within 60 days of the end of the first and third fiscal quarters, and in the annual report and semiannual report to Fund shareholders. These reports (i) are available on the SEC's website at <http://www.sec.gov>; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) are available without charge, upon request, by calling a Janus representative at 1-800-525-0020 (toll free). Portfolio holdings, consisting of at least the names of the holdings, are generally available on a calendar quarter-end basis with a 30-day lag. Holdings are generally posted approximately two business days thereafter under Full Holdings for each Fund at janus.com/info.

Each Fund may provide, upon request, historical full holdings on a monthly basis for periods prior to the previous quarter-end subject to a written confidentiality agreement.

Top Holdings. Each Fund's top portfolio holdings, in order of position size and as a percentage of a Fund's total portfolio, are available monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag.

Other Information. Each Fund may occasionally provide security breakdowns (e.g., industry, sector, regional, market capitalization, and asset allocation), top performance contributors/detractors (consisting of security names in alphabetical order), and specific portfolio level performance attribution information and statistics monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag. Top performance contributors/detractors provided at calendar quarter-end may include the percentage of contribution/detraction to Fund performance.

Full portfolio holdings will remain available on the Janus websites at least until a Form N-CSR or Form N-Q is filed with the SEC for the period that includes the date as of which the website information is current. Funds disclose their short positions, if applicable, only to the extent required in regulatory reports. Janus Capital may exclude from publication on its websites all or any portion of portfolio holdings or change the time periods of disclosure as deemed necessary to protect the interests of the Janus funds. Under extraordinary circumstances, exceptions to the Mutual Fund Holdings Disclosure Policies and Procedures may be made by Janus Capital's Chief Investment Officer(s) or their delegates. Such exceptions may be made without prior notice to shareholders. A summary of the Funds' portfolio holdings disclosure policies and procedures, which includes a discussion of any exceptions, is contained in the Funds' SAI.

SHAREHOLDER COMMUNICATIONS

Your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with a Fund) is responsible for sending you periodic statements of all transactions, along with trade confirmations and tax reporting, as required by applicable law.

Your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with a Fund) is responsible for providing annual and semiannual reports, including the financial statements of the Funds that you have authorized for investment. These reports show each Fund's investments and the market value of such investments, as well as other information about each Fund and its operations. Please contact your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with a Fund) to obtain these reports. The Funds' fiscal year ends September 30.

Financial highlights

The financial highlights tables are intended to help you understand the Funds' financial performance for each fiscal period shown. Items "Net asset value, beginning of period" through "Net asset value, end of period" reflect financial results for a single Fund Share. The gross expense ratio reflects expenses prior to any expense offset arrangement and waivers (reimbursements), if applicable. The net expense ratio reflects expenses after any expense offset arrangement and waivers (reimbursements), if applicable. The information for the fiscal periods shown has been audited by PricewaterhouseCoopers LLP, whose report, along with the Funds' financial statements, is included in the Annual Report, which is available upon request, and incorporated by reference into the SAI.

The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in the Shares of the Funds (assuming reinvestment of all dividends and distributions).

Effective February 16, 2010, Class J Shares of certain Funds were renamed Class T Shares and the eligibility requirements changed so that only clients investing through a third-party intermediary may purchase Class T Shares.

(5) 0.90% in 2010, 0.91% in 2009, and 0.89% in 2008, without the inclusion of any applicable dividends and interest on short positions and any stock loan fees.

Glossary of investment terms

This glossary provides a more detailed description of some of the types of securities, investment strategies, and other instruments in which the Funds may invest, as well as some general investment terms. The Funds may invest in these instruments to the extent permitted by their investment objectives and policies. The Funds are not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in this Prospectus.

EQUITY AND DEBT SECURITIES

Average-Weighted Effective Maturity is a measure of a bond's maturity. The stated maturity of a bond is the date when the issuer must repay the bond's entire principal value to an investor. Some types of bonds may also have an "effective maturity" that is shorter than the stated date due to prepayment or call provisions. Securities without prepayment or call provisions generally have an effective maturity equal to their stated maturity. Average-weighted effective maturity is calculated by averaging the effective maturity of bonds held by a Fund with each effective maturity "weighted" according to the percentage of net assets that it represents.

Bank loans include institutionally-traded floating and fixed-rate debt securities generally acquired as a participation interest in or assignment of a loan originated by a lender or financial institution. Assignments and participations involve credit, interest rate, and liquidity risk. Interest rates on floating rate securities adjust with interest rate changes and/or issuer credit quality. If a Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, a Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. A Fund may have difficulty trading assignments and participations to third parties or selling such securities in secondary markets, which in turn may affect the Fund's NAV.

Bonds are debt securities issued by a company, municipality, government, or government agency. The issuer of a bond is required to pay the holder the amount of the loan (or par value of the bond) at a specified maturity and to make scheduled interest payments.

Certificates of Participation ("COPs") are certificates representing an interest in a pool of securities. Holders are entitled to a proportionate interest in the underlying securities. Municipal lease obligations are often sold in the form of COPs. Refer to "Municipal lease obligations" below.

Commercial paper is a short-term debt obligation with a maturity ranging from 1 to 270 days issued by banks, corporations, and other borrowers to investors seeking to invest idle cash. A Fund may purchase commercial paper issued in private placements under Section 4(2) of the Securities Act of 1933, as amended (the "1933 Act").

Common stocks are equity securities representing shares of ownership in a company and usually carry voting rights and earn dividends. Unlike preferred stock, dividends on common stock are not fixed but are declared at the discretion of the issuer's board of directors.

Convertible securities are preferred stocks or bonds that pay a fixed dividend or interest payment and are convertible into common stock at a specified price or conversion ratio.

Debt securities are securities representing money borrowed that must be repaid at a later date. Such securities have specific maturities and usually a specific rate of interest or an original purchase discount.

Depository receipts are receipts for shares of a foreign-based corporation that entitle the holder to dividends and capital gains on the underlying security. Receipts include those issued by domestic banks (American Depositary Receipts), foreign banks (Global or European Depositary Receipts), and broker-dealers (depository shares).

Duration is the time it will take investors to recoup their investment in a bond. Unlike average maturity, duration reflects both principal and interest payments. Generally, the higher the coupon rate on a bond, the lower its duration will be. The duration of a bond portfolio is calculated by averaging the duration of bonds held by a Fund with each duration "weighted" according to the percentage of net assets that it represents. Because duration accounts for interest payments, a Fund's duration is usually shorter than its average maturity.

Equity securities generally include domestic and foreign common stocks; preferred stocks; securities convertible into common stocks or preferred stocks; warrants to purchase common or preferred stocks; and other securities with equity characteristics.

Exchange-traded funds (“ETFs”) are index-based investment companies which hold substantially all of their assets in securities with equity characteristics. As a shareholder of another investment company, a Fund would bear its pro rata portion of the other investment company’s expenses, including advisory fees, in addition to the expenses the Fund bears directly in connection with its own operations.

Fixed-income securities are securities that pay a specified rate of return. The term generally includes short- and long-term government, corporate, and municipal obligations that pay a specified rate of interest, dividends, or coupons for a specified period of time. Coupon and dividend rates may be fixed for the life of the issue or, in the case of adjustable and floating rate securities, for a shorter period.

High-yield/high-risk bonds are bonds that are rated below investment grade by the primary rating agencies (i.e., BB+ or lower by Standard & Poor’s and Fitch, or Ba or lower by Moody’s). Other terms commonly used to describe such bonds include “lower rated bonds,” “non-investment grade bonds,” and “junk bonds.”

Industrial development bonds are revenue bonds that are issued by a public authority but which may be backed only by the credit and security of a private issuer and may involve greater credit risk. Refer to “Municipal securities” below.

Mortgage- and asset-backed securities are shares in a pool of mortgages or other debt instruments. These securities are generally pass-through securities, which means that principal and interest payments on the underlying securities (less servicing fees) are passed through to shareholders on a pro rata basis. These securities involve prepayment risk, which is the risk that the underlying mortgages or other debt may be refinanced or paid off prior to their maturities during periods of declining interest rates. In that case, a Fund may have to reinvest the proceeds from the securities at a lower rate. Potential market gains on a security subject to prepayment risk may be more limited than potential market gains on a comparable security that is not subject to prepayment risk.

Mortgage dollar rolls are transactions in which a Fund sells a mortgage-related security, such as a security issued by Government National Mortgage Association, to a dealer and simultaneously agrees to purchase a similar security (but not the same security) in the future at a predetermined price. A “dollar roll” can be viewed as a collateralized borrowing in which a Fund pledges a mortgage-related security to a dealer to obtain cash.

Municipal lease obligations are revenue bonds backed by leases or installment purchase contracts for property or equipment. Lease obligations may not be backed by the issuing municipality’s credit and may involve risks not normally associated with general obligation bonds and other revenue bonds. For example, their interest may become taxable if the lease is assigned and the holders may incur losses if the issuer does not appropriate funds for the lease payments on an annual basis, which may result in termination of the lease and possible default.

Municipal securities are bonds or notes issued by a U.S. state or political subdivision. A municipal security may be a general obligation backed by the full faith and credit (i.e., the borrowing and taxing power) of a municipality or a revenue obligation paid out of the revenues of a designated project, facility, or revenue source.

Pass-through securities are shares or certificates of interest in a pool of debt obligations that have been repackaged by an intermediary, such as a bank or broker-dealer.

Passive foreign investment companies (“PFICs”) are any foreign corporations which generate certain amounts of passive income or hold certain amounts of assets for the production of passive income. Passive income includes dividends, interest, royalties, rents, and annuities. To avoid taxes and interest that a Fund must pay if these investments are profitable, the Fund may make various elections permitted by the tax laws. These elections could require that a Fund recognize taxable income, which in turn must be distributed, before the securities are sold and before cash is received to pay the distributions.

Pay-in-kind bonds are debt securities that normally give the issuer an option to pay cash at a coupon payment date or give the holder of the security a similar bond with the same coupon rate and a face value equal to the amount of the coupon payment that would have been made.

Preferred stocks are equity securities that generally pay dividends at a specified rate and have preference over common stock in the payment of dividends and liquidation. Preferred stock generally does not carry voting rights.

Real estate investment trust (“REIT”) is an investment trust that operates through the pooled capital of many investors who buy its shares. Investments are in direct ownership of either income property or mortgage loans.

Rule 144A securities are securities that are not registered for sale to the general public under the 1933 Act, but that may be resold to certain institutional investors.

Standby commitment is a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred, or assigned only with the underlying security or securities. A standby commitment entitles the holder to receive same day settlement, and will be considered to be from the party to whom the investment company will look for payment of the exercise price.

Step coupon bonds are high-quality issues with above-market interest rates and a coupon that increases over the life of the bond. They may pay monthly, semiannual, or annual interest payments. On the date of each coupon payment, the issuer decides whether to call the bond at par, or whether to extend it until the next payment date at the new coupon rate.

Strip bonds are debt securities that are stripped of their interest (usually by a financial intermediary) after the securities are issued. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities of comparable maturity.

Tender option bonds are relatively long-term bonds that are coupled with the option to tender the securities to a bank, broker-dealer, or other financial institution at periodic intervals and receive the face value of the bond. This investment structure is commonly used as a means of enhancing a security’s liquidity.

U.S. Government securities include direct obligations of the U.S. Government that are supported by its full faith and credit. Treasury bills have initial maturities of less than one year, Treasury notes have initial maturities of one to ten years, and Treasury bonds may be issued with any maturity but generally have maturities of at least ten years. U.S. Government securities also include indirect obligations of the U.S. Government that are issued by federal agencies and government sponsored entities. Unlike Treasury securities, agency securities generally are not backed by the full faith and credit of the U.S. Government. Some agency securities are supported by the right of the issuer to borrow from the Treasury, others are supported by the discretionary authority of the U.S. Government to purchase the agency’s obligations, and others are supported only by the credit of the sponsoring agency.

Variable and floating rate securities have variable or floating rates of interest and, under certain limited circumstances, may have varying principal amounts. Variable and floating rate securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to some interest rate index or market interest rate (the “underlying index”). The floating rate tends to decrease the security’s price sensitivity to changes in interest rates.

Warrants are securities, typically issued with preferred stock or bonds, which give the holder the right to buy a proportionate amount of common stock at a specified price. The specified price is usually higher than the market price at the time of issuance of the warrant. The right may last for a period of years or indefinitely.

Zero coupon bonds are debt securities that do not pay regular interest at regular intervals, but are issued at a discount from face value. The discount approximates the total amount of interest the security will accrue from the date of issuance to maturity. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities.

FUTURES, OPTIONS, AND OTHER DERIVATIVES

Credit default swaps are a specific kind of counterparty agreement that allows the transfer of third party credit risk from one party to the other. One party in the swap is a lender and faces credit risk from a third party, and the counterparty in the credit default swap agrees to insure this risk in exchange for regular periodic payments.

Derivatives are financial instruments whose performance is derived from the performance of another asset (stock, bond, commodity, currency, interest rate or market index). Types of derivatives can include, but are not limited to options, forward contracts, swaps, and futures contracts.

Equity-linked structured notes are derivative securities which are specially designed to combine the characteristics of one or more underlying securities and their equity derivatives in a single note form. The return and/or yield or income component

may be based on the performance of the underlying equity securities, an equity index, and/or option positions. Equity-linked structured notes are typically offered in limited transactions by financial institutions in either registered or non-registered form. An investment in equity-linked notes creates exposure to the credit risk of the issuing financial institution, as well as to the market risk of the underlying securities. There is no guaranteed return of principal with these securities, and the appreciation potential of these securities may be limited by a maximum payment or call right. In certain cases, equity-linked notes may be more volatile and less liquid than less complex securities or other types of fixed-income securities. Such securities may exhibit price behavior that does not correlate with other fixed-income securities.

Equity swaps involve the exchange by two parties of future cash flow (e.g., one cash flow based on a referenced interest rate and the other based on the performance of stock or a stock index).

Forward contracts are contracts to purchase or sell a specified amount of a financial instrument for an agreed upon price at a specified time. Forward contracts are not currently exchange-traded and are typically negotiated on an individual basis. A Fund may enter into forward currency contracts for investment purposes or to hedge against declines in the value of securities denominated in, or whose value is tied to, a currency other than the U.S. dollar or to reduce the impact of currency appreciation on purchases of such securities. It may also enter into forward contracts to purchase or sell securities or other financial indices.

Futures contracts are contracts that obligate the buyer to receive and the seller to deliver an instrument or money at a specified price on a specified date. A Fund may buy and sell futures contracts on foreign currencies, securities, and financial indices including indices of U.S. Government, foreign government, equity, or fixed-income securities. A Fund may also buy options on futures contracts. An option on a futures contract gives the buyer the right, but not the obligation, to buy or sell a futures contract at a specified price on or before a specified date. Futures contracts and options on futures are standardized and traded on designated exchanges.

Indexed/structured securities are typically short- to intermediate-term debt securities whose value at maturity or interest rate is linked to currencies, interest rates, equity securities, indices, commodity prices, or other financial indicators. Such securities may be positively or negatively indexed (e.g., their value may increase or decrease if the reference index or instrument appreciates). Indexed/structured securities may have return characteristics similar to direct investments in the underlying instruments and may be more volatile than the underlying instruments. A Fund bears the market risk of an investment in the underlying instruments, as well as the credit risk of the issuer.

Interest rate swaps involve the exchange by two parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments).

Inverse floaters are debt instruments whose interest rate bears an inverse relationship to the interest rate on another instrument or index. For example, upon reset, the interest rate payable on the inverse floater may go down when the underlying index has risen. Certain inverse floaters may have an interest rate reset mechanism that multiplies the effects of change in the underlying index. Such mechanism may increase the volatility of the security's market value.

Options are the right, but not the obligation, to buy or sell a specified amount of securities or other assets on or before a fixed date at a predetermined price. A Fund may purchase and write put and call options on securities, securities indices, and foreign currencies. A Fund may purchase or write such options individually or in combination.

Participatory notes are derivative securities which are linked to the performance of an underlying Indian security and which allow investors to gain market exposure to Indian securities without trading directly in the local Indian market.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period.

OTHER INVESTMENTS, STRATEGIES, AND/OR TECHNIQUES

Cash sweep program is an arrangement in which a Fund's uninvested cash balance is used to purchase shares of affiliated or non-affiliated money market funds or cash management pooled investment vehicles at the end of each day.

Diversification is a classification given to a fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Funds are classified as either "diversified" or "nondiversified." To be classified as "diversified" under the 1940 Act, a fund

may not, with respect to 75% of its total assets, invest more than 5% of its total assets in any issuer and may not own more than 10% of the outstanding voting securities of an issuer. A fund that is classified as “nondiversified” under the 1940 Act, on the other hand, has the flexibility to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified.

Industry concentration for purposes under the 1940 Act is the investment of 25% or more of a Fund’s total assets in an industry or group of industries.

Leverage is when a Fund increases its assets available for investment using borrowings or similar transactions. Because short sales involve borrowing securities and then selling them, a Fund’s short sales effectively leverage the Fund’s assets. The use of leverage may make any change in a Fund’s NAV even greater and thus result in increased volatility of returns. A Fund’s assets that are used as collateral to secure the short sales may decrease in value while the short positions are outstanding, which may force the Fund to use its other assets to increase the collateral. Leverage also creates interest expense that may lower a Fund’s overall returns.

Market capitalization is the most commonly used measure of the size and value of a company. It is computed by multiplying the current market price of a share of the company’s stock by the total number of its shares outstanding. Market capitalization is an important investment criterion for certain funds, while others do not emphasize investments in companies of any particular size.

Net long is a term used to describe when a Fund’s assets committed to long positions exceed those committed to short positions.

Repurchase agreements involve the purchase of a security by a Fund and a simultaneous agreement by the seller (generally a bank or dealer) to repurchase the security from the Fund at a specified date or upon demand. This technique offers a method of earning income on idle cash. These securities involve the risk that the seller will fail to repurchase the security, as agreed. In that case, a Fund will bear the risk of market value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security.

Reverse repurchase agreements involve the sale of a security by a Fund to another party (generally a bank or dealer) in return for cash and an agreement by the Fund to buy the security back at a specified price and time. This technique will be used primarily to provide cash to satisfy unusually high redemption requests, or for other temporary or emergency purposes.

Short sales in which a Fund may engage may be either “short sales against the box” or other short sales. Short sales against the box involve selling short a security that a Fund owns, or the Fund has the right to obtain the amount of the security sold short at a specified date in the future. A Fund may also enter into a short sale to hedge against anticipated declines in the market price of a security or to reduce portfolio volatility. If the value of a security sold short increases prior to the scheduled delivery date, the Fund loses the opportunity to participate in the gain. For short sales, the Fund will incur a loss if the value of a security increases during this period because it will be paying more for the security than it has received from the purchaser in the short sale. If the price declines during this period, a Fund will realize a short-term capital gain. Although a Fund’s potential for gain as a result of a short sale is limited to the price at which it sold the security short less the cost of borrowing the security, its potential for loss is theoretically unlimited because there is no limit to the cost of replacing the borrowed security.

When-issued, delayed delivery, and forward commitment transactions generally involve the purchase of a security with payment and delivery at some time in the future – i.e., beyond normal settlement. A Fund does not earn interest on such securities until settlement and bears the risk of market value fluctuations in between the purchase and settlement dates. New issues of stocks and bonds, private placements, and U.S. Government securities may be sold in this manner.

You can make inquiries and request other information, including a Statement of Additional Information, annual report, or semiannual report (as they become available), free of charge, by contacting your plan sponsor, broker-dealer, or financial intermediary, or by contacting a Janus representative at 1-877-335-2687. The Funds' Statement of Additional Information and most recent annual and semiannual reports are also available, free of charge, at janus.com/info. Additional information about the Funds' investments is available in the Funds' annual and semiannual reports. In the Funds' annual and semiannual reports, you will find a discussion of the market conditions and investment strategies that significantly affected the Funds' performance during their last fiscal period. Other information is also available from financial intermediaries that sell Shares of the Funds.

The Statement of Additional Information provides detailed information about the Funds and is incorporated into this Prospectus by reference. You may review and copy information about the Funds (including the Funds' Statement of Additional Information) at the Public Reference Room of the SEC or get text only copies, after paying a duplicating fee, by sending an electronic request by e-mail to publicinfo@sec.gov or by writing to or calling the Commission's Public Reference Section, Washington, D.C. 20549-1520 (1-202-551-8090). Information on the operation of the Public Reference Room may also be obtained by calling this number. You may also obtain reports and other information about the Funds from the Electronic Data Gathering Analysis and Retrieval (EDGAR) Database on the SEC's website at <http://www.sec.gov>.

JANUS

This Prospectus describes nine portfolios (each, a “Fund” and collectively, the “Funds”) of Janus Investment Fund (the “Trust”). Janus Capital Management LLC (“Janus Capital” or “Janus”) serves as investment adviser to each Fund.

The Funds offer multiple classes of shares in order to meet the needs of various types of investors. Only Class D Shares (the “Shares”) are offered by this Prospectus. The Shares are generally no longer being made available to new investors who do not already have a direct account with the Janus funds. The Shares are available only to investors who hold accounts directly with the Janus funds, and to immediate family members or members of the same household of an eligible individual investor. The Shares are offered directly through the Janus funds to eligible investors by calling 1-800-525-3713 or at janus.com/individual. The Shares are not offered through financial intermediaries.

Fund summary

Janus Balanced Fund

Ticker: JANBX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Balanced Fund seeks long-term capital growth, consistent with preservation of capital and balanced by current income.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees	0.55%
Other Expenses	0.17%
Total Annual Fund Operating Expenses	0.72%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 74	\$ 230	\$ 401	\$ 894

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 84% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally investing 35-65% of its assets in equity securities and the remaining assets in fixed-income securities and cash equivalents. The Fund normally invests at least 25% of its assets in fixed-income senior securities. Fixed-income securities may include corporate debt securities, U.S. Government obligations, mortgage-backed securities and other mortgage-related products, and short-term securities. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets. As of September 30, 2012, approximately 55.8% of the Fund's assets were held in equity securities.

In choosing investments for the Fund, the portfolio managers apply a "bottom up" approach with one portfolio manager focusing on the equity portion of the Fund and the other portfolio manager focusing on the fixed-income portion of the Fund. With respect to corporate issuers, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies. The portfolio managers may also consider economic factors, such as the effect of interest rates on certain of the Fund's fixed-income investments. The portfolio managers share day-to-day responsibility for the Fund's investments.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking a balanced portfolio, including common stocks and bonds. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio managers' perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund's net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. Fixed-income securities are also subject to credit risk, prepayment risk, valuation risk, and liquidity risk. Credit risk is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. Prepayment risk is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that the portfolio managers would like or at the price that the portfolio managers believe the security is currently worth.

Mortgage-Backed Securities Risk. Mortgage-backed securities tend to be more sensitive to changes in interest rates than other types of securities. Investments in mortgage-backed securities are subject to both extension risk, where borrowers extend the duration of their mortgages in times of rising interest rates, and prepayment risk, where borrowers pay off their mortgages sooner than expected in times of declining interest rates. These risks may reduce the Fund's returns. In addition, investments in mortgage-backed securities, including those comprised of subprime mortgages, may be subject to a higher degree of credit risk, valuation risk, and liquidity risk than various other types of fixed-income securities.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. To the extent the Fund invests in foreign debt securities, such investments are sensitive to changes in interest rates. Additionally, investments in securities of foreign governments involve the risk that a foreign government may not be willing or able to pay interest or repay principal when due. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Sovereign Debt Risk. The Fund may invest in U.S. and foreign government debt securities ("sovereign debt"). Investments in U.S. sovereign debt are considered low risk. However, investments in non-U.S. sovereign debt can involve a high degree of risk, including the risk that the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or to pay the interest on its sovereign debt in a timely manner. A sovereign debtor's willingness or

ability to satisfy its debt obligation may be affected by various factors including, but not limited to, its cash flow situation, the extent of its foreign currency reserves, the availability of foreign exchange when a payment is due, and the relative size of its debt position in relation to its economy as a whole. In the event of default, there may be limited or no legal remedies for collecting sovereign debt and there may be no bankruptcy proceedings through which the Fund may collect all or part of the sovereign debt that a governmental entity has not repaid.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds may be more sensitive than other types of bonds to economic changes, political changes, or adverse developments specific to the company that issued the bond, which may adversely affect their value.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
13.74%	8.71%	7.75%	10.56%	10.15%	-15.22%	24.28%	7.83%	1.44%	13.07%
Best Quarter: Third Quarter 2009 10.97%					Worst Quarter: Third Quarter 2011 -11.02%				

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (9/1/92)
Class D Shares				
Return Before Taxes	13.07%	5.44%	7.78%	9.74%
Return After Taxes on Distributions	11.86%	4.44%	6.91%	8.25%
Return After Taxes on Distributions and Sale of Fund Shares	9.36%	4.30%	6.47%	7.90%
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	8.37%
Barclays U.S. Aggregate Bond Index (reflects no deduction for expenses, fees, or taxes)	4.21%	5.95%	5.18%	6.30%
Balanced Index (reflects no deduction for expenses, fees, or taxes)	10.72%	3.96%	6.50%	7.76%

The Balanced Index is an internally-calculated, hypothetical combination of unmanaged indices that combines total returns from the S&P 500® Index (55%) and the Barclays U.S. Aggregate Bond Index (45%).

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Managers: **Marc Pinto**, CFA, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since May 2005. **Gibson Smith**, Co-Chief Investment Officer of Janus Capital, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since May 2005.

PURCHASE AND SALE OF FUND SHARES**Minimum Investment Requirements**

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Contrarian Fund

Ticker: JACNX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Contrarian Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.43%
Other Expenses	0.24%
Total Annual Fund Operating Expenses	0.67%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 68	\$ 214	\$ 373	\$ 835

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 53% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity securities with the potential for long-term growth of capital. The portfolio manager emphasizes investments in companies with attractive price/free cash flow, which is the relationship between the price of a stock and the company's available cash from operations, minus capital expenditures. The portfolio manager will typically seek attractively valued companies that are improving their free cash flow and returns on invested capital. Such companies may also include special situations companies that are experiencing management changes and/or are currently out of favor. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest

rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund's exposure to a particular market, to adjust the Fund's currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund's risk profile. The Fund's exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Value Investing Risk. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "value" stocks may perform differently than other types of stocks and from the market as a whole, and can continue to be undervalued by the market for long periods of time. It is also possible that a value stock will never appreciate to the extent expected by the Fund's portfolio manager.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Special Situations Risk. The Fund may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in "special situations" companies can present greater risks than investments in companies not experiencing special situations, and the Fund's performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended. This gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund's net asset value and total return.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
53.26%	22.61%	16.02%	24.58%	21.22%	-48.11%	37.02%	11.25%	-15.78%	23.97%
Best Quarter: Second Quarter 2009 30.97% Worst Quarter: Fourth Quarter 2008 -27.53%									

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (2/29/00)
Class D Shares				
Return Before Taxes	23.97%	-3.75%	10.52%	5.44%
Return After Taxes on Distributions	23.78%	-3.92%	10.12%	5.05%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	15.82%	-3.20%	9.39%	4.71%
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	2.24%
Morgan Stanley Capital International All Country World Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	16.13%	-1.16%	8.11%	2.27%

⁽¹⁾ If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Standard & Poor's ("S&P") 500® Index is a commonly recognized, market-capitalization weighted index of 500 widely held equity securities, designed to measure broad U.S. equity performance. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: **Daniel Kozlowski**, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since July 2011.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Enterprise Fund

Ticker: JANEX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Enterprise Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees	0.64%
Other Expenses	0.22%
Total Annual Fund Operating Expenses	0.86%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 88	\$ 274	\$ 477	\$ 1,061

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 14% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential, and normally invests at least 50% of its equity assets in medium-sized companies. Medium-sized companies are those whose market capitalization falls within the range of companies in the Russell Midcap® Growth Index. Market capitalization is a commonly used measure of the size and value of a company. The market capitalizations within the index will vary, but as of September 30, 2012, they ranged from approximately \$778 million to \$22.0 billion. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is

incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Mid-Sized Companies Risk. The Fund's investments in securities issued by mid-sized companies may involve greater risks than are customarily associated with larger, more established companies. Securities issued by mid-sized companies tend to be more volatile than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.49%
Other Expenses	0.19%
Total Annual Fund Operating Expenses	0.68%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 69	\$ 218	\$ 379	\$ 847

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 46% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. Although the Fund may invest in companies of any size, it generally invests in larger, more established companies. As of September 30, 2012, the Fund's weighted average market capitalization was \$102.8 billion. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio managers apply a "bottom up" approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio managers' perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
31.71%	4.69%	3.98%	10.59%	15.22%	-39.84%	37.30%	11.31%	-5.77%	17.87%
Best Quarter: First Quarter 2012 16.32% Worst Quarter: Fourth Quarter 2008 -21.93%									

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (2/5/70)
Class D Shares				
Return Before Taxes	17.87%	0.42%	6.43%	12.13%
Return After Taxes on Distributions	17.72%	0.32%	6.37%	9.63%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	11.82%	0.34%	5.66%	9.46%
Russell 1000® Growth Index (reflects no deduction for expenses, fees, or taxes)	15.26%	3.12%	7.52%	N/A
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	10.13%
Core Growth Index (reflects no deduction for expenses, fees, or taxes)	15.64%	2.41%	7.33%	N/A

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Core Growth Index is an internally-calculated, hypothetical combination of unmanaged indices that combines total returns from the Russell 1000® Growth Index (50%) and the S&P 500® Index (50%). This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 82	\$ 255	\$ 444	\$ 990

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 45% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally emphasizing investments in common stocks. The Fund will normally invest up to 75% of its assets in equity securities selected primarily for their growth potential and at least 25% of its assets in securities the portfolio manager believes have income potential. Eligible equity securities in which the Fund may invest include:

- domestic and foreign common stocks
- preferred stocks
- securities convertible into common stocks or preferred stocks, such as convertible preferred stocks, bonds, and debentures
- other securities with equity characteristics

Equity securities may make up part or all of the income component if they currently pay dividends or the portfolio manager believes they have potential for increasing or commencing dividend payments. The Fund invests to a lesser extent in fixed-income securities, such as corporate bonds. The Fund is not designed for investors who need consistent income, and the Fund's investment strategies could result in significant fluctuations of income.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund's net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. Fixed-income securities are also subject to credit risk, prepayment risk, valuation risk, and liquidity risk. Credit risk is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. Prepayment risk is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that the portfolio manager would like or at the price that the portfolio manager believes the security is currently worth.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The

performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
24.65%	11.89%	12.48%	7.82%	8.69%	-42.48%	38.64%	8.72%	-1.47%	16.79%
Best Quarter: Second Quarter 2009 18.72%					Worst Quarter: Fourth Quarter 2008 -21.67%				

Average Annual Total Returns (periods ended 12/31/12)				
	1 Year	5 Years	10 Years	Since Inception (5/15/91)
Class D Shares				
Return Before Taxes	16.79%	-0.05%	6.25%	9.80%
Return After Taxes on Distributions	16.48%	-0.24%	5.84%	8.77%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	11.31%	-0.07%	5.41%	8.41%
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	8.66%
Russell 1000® Growth Index (reflects no deduction for expenses, fees, or taxes)	15.26%	3.12%	7.52%	7.77%

⁽¹⁾ If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Marc Pinto, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since November 2007.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Research Fund

Ticker: JNRFX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Research Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.64%
Other Expenses	0.23%
Total Annual Fund Operating Expenses	0.87%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 89	\$ 278	\$ 482	\$ 1,073

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 64% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. The Fund may invest in companies of any size, from larger, well-established companies to smaller, emerging growth companies. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

Janus Capital's equity research analysts, overseen by the Portfolio Oversight Team led by Janus Capital's Director of Equity Research James P. Goff (the "Research Team"), select investments for the Fund. The Research Team, comprised of sector specialists, conducts fundamental analysis with a focus on "bottom up" research, quantitative modeling, and valuation analysis. Using this research process, analysts rate their stocks based upon attractiveness. Analysts bring their high-conviction ideas to their respective sector teams. Sector teams compare the appreciation and risk potential of each of the team's high-conviction ideas and construct a sector portfolio that is intended to maximize the best risk-reward opportunities. Although the Research Team may find high-conviction investment ideas anywhere in the world, the Research Team emphasizes investments in securities of U.S.-based issuers.

Positions may be sold when, among other things, there is no longer high conviction in the return potential of the investment or if the risk characteristics have caused a re-evaluation of the opportunity. This may occur if the stock has appreciated and reflects the anticipated value, if another company represents a better risk-reward opportunity, or if the investment's fundamental characteristics deteriorate. Securities may also be sold from the portfolio to rebalance sector weightings.

Mr. Goff oversees the investment process and is responsible for the day-to-day management of the Fund. It is expected that the Fund will be broadly diversified among a variety of industry sectors. The Fund intends to be fully invested under normal circumstances. However, under unusual circumstances, if the Research Team does not have high conviction in enough investment opportunities, the Fund's uninvested assets may be held in cash or similar instruments.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the investment personnel's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the investment personnel's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities. The Fund compares and broadly matches its sector weights to those of a growth-based index. If growth stocks are out of favor, sectors that are larger in a growth index may underperform, leading to Fund underperformance relative to indices less biased toward growth stocks.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees	0.64%
Other Expenses	0.20%
Total Annual Fund Operating Expenses	0.84%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 86	\$ 268	\$ 466	\$ 1,037

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 35% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. In pursuing that objective, the Fund invests in equity securities of small- and medium-sized companies. Generally, small- and medium-sized companies have a market capitalization of less than \$10 billion. Market capitalization is a commonly used measure of the size and value of a company.

The portfolio managers apply a "bottom up" approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' belief about a company's intrinsic worth is

incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Small- and Mid-Sized Companies Risk. The Fund's investments in securities issued by small- and mid-sized companies, which can include smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. Securities issued by small- and mid-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio managers' perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)

To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Twenty Fund

(closed to new investors)

Ticker: JNTFX Class D Shares

INVESTMENT OBJECTIVE

Janus Twenty Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.52%
Other Expenses	0.18%
Total Annual Fund Operating Expenses	0.70%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 72	\$ 224	\$ 390	\$ 871

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 12% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally investing primarily in a core group of 20-30 common stocks selected for their growth potential. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio manager’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended. This gives the Fund’s portfolio manager more flexibility to hold larger positions in a smaller number of securities. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund’s net asset value and total return.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it would in a more geographically diversified portfolio. The Fund’s investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative’s original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund’s performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund’s former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund’s commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund’s average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund’s past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
25.31%	23.89%	9.42%	12.30%	35.94%	-41.97%	43.27%	7.07%	-8.04%	22.44%
Best Quarter: First Quarter 2012 20.09% Worst Quarter: Third Quarter 2008 -26.00%									

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (4/30/85)
Class D Shares				
Return Before Taxes	22.44%	0.05%	10.02%	11.60%
Return After Taxes on Distributions	22.28%	-0.46%	9.72%	10.10%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	14.79%	-0.04%	8.91%	9.72%
Russell 1000® Growth Index (reflects no deduction for expenses, fees, or taxes)	15.26%	3.12%	7.52%	9.76%
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	10.36%

⁽¹⁾ If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Russell 1000® Growth Index measures the performance of those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Ron Sachs, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since January 2008.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Venture Fund

Ticker: JANVX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Venture Fund seeks capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees	0.64%
Other Expenses	0.19%
Total Annual Fund Operating Expenses	0.83%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 85	\$ 265	\$ 460	\$ 1,025

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 51% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing at least 50% of its equity assets in small-sized companies. The Fund may also invest in larger companies with strong growth potential or relatively well-known and large companies with potential for capital appreciation. Small-sized companies are defined by the portfolio managers as those companies whose market capitalization falls within the range of companies in the Russell 2000® Growth Index. Market capitalization is a commonly used measure of the size and value of a company. The market capitalizations within the index will vary, but as of September 30, 2012, they ranged from approximately \$45 million to \$4.5 billion. Companies whose capitalization or revenues fall outside these ranges after the Fund's initial purchase continue to be considered small-sized.

The portfolio managers apply a "bottom up" approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Small-Sized Companies Risk. The Fund's investments in securities issued by small-sized companies, which tend to be smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. Securities issued by small-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio managers' perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Foreign Exposure Risk. The Fund may have exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
55.75%	17.56%	1.55%	23.58%	16.36%	-51.43%	54.50%	27.07%	2.20%	17.22%

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Additional information about the Funds

FEES AND EXPENSES

Please refer to the following important information when reviewing the “Fees and Expenses of the Fund” table in each Fund Summary of the Prospectus. The fees and expenses shown were determined based on net assets as of the fiscal year ended September 30, 2012.

“Annual Fund Operating Expenses” are paid out of a Fund’s assets and include fees for portfolio management and administrative services, including recordkeeping, accounting, and other shareholder services, as well as reimbursement to Janus Capital of its out-of-pocket costs for services as administrator. You do not pay these fees directly but, as the Example in each Fund Summary shows, these costs are borne indirectly by all shareholders.

The “Management Fee” is the investment advisory fee rate paid by each Fund to Janus Capital. Janus Contrarian Fund, Janus Fund, Janus Research Fund, and Janus Twenty Fund each pay an investment advisory fee rate that adjusts up or down by a variable of up to 0.15% (assuming constant assets) on a monthly basis based upon the Fund’s performance relative to its benchmark index during a measurement period. This fee rate, prior to any performance adjustment, is 0.64% for each of Janus Contrarian Fund, Janus Fund, Janus Research Fund, and Janus Twenty Fund. Any such adjustment to this base fee rate commenced February 2007 for each of Janus Contrarian Fund and Janus Research Fund, July 2011 for Janus Fund, and January 2012 for Janus Twenty Fund and may increase or decrease the Management Fee. Refer to “Management Expenses” in this Prospectus for additional information with further description in the Statement of Additional Information (“SAI”).

“Other Expenses”

- include an administrative services fee of 0.12% of the average daily net assets of Class D Shares for shareholder services provided by Janus Services LLC (“Janus Services”), the Funds’ transfer agent.
- may include acquired fund fees and expenses, which are indirect expenses a Fund may incur as a result of investing in shares of an underlying fund. “Acquired Fund” refers to any underlying fund (including, but not limited to, exchange-traded funds) in which a fund invests or has invested during the period. To the extent that a Fund invests in Acquired Funds, the Fund’s “Total Annual Fund Operating Expenses” may not correlate to the “ratio of gross expenses to average net assets” presented in the Financial Highlights table because that ratio includes only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. Such amounts are less than 0.01%.
- may include “Short Sale Dividend Expenses.” These expenses include dividends or interest on short sales, which are paid to the lender of borrowed securities, and stock loan fees, which are paid to the prime broker. Such expenses will vary depending on the short sale arrangement, whether the securities a Fund sells short pay dividends or interest, and the amount of such dividends or interest. While “Short Sale Dividend Expenses” include interest and dividends paid out on short positions and may include stock loan fees, they do not take into account the interest credit a Fund earns on cash proceeds of short sales held as collateral for short positions. If applicable, such amounts are less than 0.01%.
- may include reimbursement to Janus Services of its out-of-pocket costs for arranging for the provision by third parties of certain servicing to shareholders.

Janus Capital has contractually agreed to waive certain Funds’ “Total Annual Fund Operating Expenses” to certain limits until at least February 1, 2014. The expense limits are described in the “Management Expenses” section of this Prospectus. Because a fee waiver will have a positive effect upon a fund’s performance, a fund that pays a performance-based investment advisory fee may experience a performance adjustment that is considered favorable to Janus Capital as a result of a fee waiver that is in place during the period when the performance adjustment applies.

All expenses in a Fund’s “Fees and Expenses of the Fund” table are shown without the effect of expense offset arrangements. Pursuant to such arrangements, credits realized as a result of uninvested cash balances are used to reduce custodian and transfer agent expenses.

ADDITIONAL INVESTMENT STRATEGIES AND GENERAL PORTFOLIO POLICIES

The Funds’ Board of Trustees (“Trustees”) may change each Fund’s investment objective or non-fundamental principal investment strategies without a shareholder vote. A Fund will notify you in writing at least 60 days before making any such change it considers material. If there is a material change to a Fund’s objective or principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that a Fund will achieve its investment objective.

Unless otherwise stated, the following additional investment strategies and general policies apply to each Fund and provide further information including, but not limited to, the types of securities a Fund may invest in when implementing its investment objective. For some Funds, these strategies and policies may be part of a principal strategy. For other Funds, these strategies and policies may be utilized to a lesser extent. Except for the Funds' policies with respect to investments in illiquid securities and borrowing, the percentage limitations included in these policies and elsewhere in this Prospectus and/or the SAI normally apply only at the time of purchase of a security. So, for example, if a Fund exceeds a limit as a result of market fluctuations or the sale of other securities, it will not be required to dispose of any securities.

Cash Position

The Funds may not always stay fully invested. For example, when the portfolio managers and/or investment personnel believe that market conditions are unfavorable for investing, or when they are otherwise unable to locate attractive investment opportunities, a Fund's cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after a Fund has committed available assets to desirable investment opportunities. Due to differing investment strategies, the cash positions among the Funds may vary significantly. When a Fund's investments in cash or similar investments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested. To the extent a Fund invests its uninvested cash through a sweep program (meaning its uninvested cash is pooled with uninvested cash of other funds and invested in certain securities such as repurchase agreements), it is subject to the risks of the account or fund into which it is investing, including liquidity issues that may delay the Fund from accessing its cash.

In addition, a Fund may temporarily increase its cash position under certain unusual circumstances, such as to protect its assets or maintain liquidity in certain circumstances to meet unusually large redemptions. A Fund's cash position may also increase temporarily due to unusually large cash inflows. Under unusual circumstances such as these, a Fund may invest up to 100% of its assets in cash or similar investments. In this case, the Fund may take positions that are inconsistent with its investment objective. As a result, the Fund may not achieve its investment objective.

Common Stock

Unless its investment objective or policies prescribe otherwise, each of the Funds may invest substantially all of its assets in common stocks. The portfolio managers and/or investment personnel generally take a "bottom up" approach to selecting companies in which to invest. This means that they seek to identify individual companies with earnings growth potential that may not be recognized by the market at large. The portfolio managers and/or investment personnel make this assessment by looking at companies one at a time, regardless of size, country of organization, place of principal business activity, or other similar selection criteria. The portfolio managers and/or investment personnel may sell a holding if, among other things, the security reaches the portfolio managers' and/or investment personnel's price target, if the company has a deterioration of fundamentals such as failing to meet key operating benchmarks, or if the portfolio managers and/or investment personnel find a better investment opportunity. The portfolio managers and/or investment personnel may also sell a Fund holding to meet redemptions.

Janus Balanced Fund and **Janus Growth and Income Fund** may each emphasize varying degrees of income. In the case of Janus Balanced Fund and Janus Growth and Income Fund, the portfolio managers may consider dividend-paying characteristics to a greater degree than other factors in selecting common stocks. Realization of income is not a significant consideration when choosing investments for the other Funds. Income realized on the Funds' investments may be incidental to their investment objectives.

Janus Contrarian Fund emphasizes investments in companies with attractive prices compared to their free cash flow. The portfolio manager will typically seek attractively valued companies that are improving their free cash flow and improving their returns on invested capital. These companies may also include special situations companies that are experiencing management changes and/or are temporarily out of favor. A company may be considered attractively valued when, in the opinion of the portfolio manager, shares of the company are selling for a price that is below their intrinsic worth ("undervalued"). A company may be undervalued due to market or economic conditions, temporary earnings declines, unfavorable developments affecting the company, or other factors. Such factors may provide buying opportunities at attractive prices compared to historical or market price-earnings ratios, price/free cash flow, book value, or return on equity. The portfolio manager believes that buying these securities at a price that is below their intrinsic worth may generate greater returns for the Fund than those obtained by paying premium prices for companies currently in favor in the market.

Counterparties

Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to a Fund (“counterparty risk”). Counterparty risk may arise because of the counterparty’s financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty’s inability to fulfill its obligation may result in significant financial loss to a Fund. A Fund may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. A Fund may be exposed to counterparty risk through participation in various programs including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Fund’s cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures, and options. Each Fund intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital’s analysis of a counterparty’s creditworthiness is incorrect or may change due to market conditions. To the extent that a Fund focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

Emerging Markets

Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more “developing countries” or “emerging markets.” Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets IndexSM.

Foreign Securities

The portfolio managers and/or investment personnel seek investments that meet the selection criteria, regardless of where an issuer or company is located. Foreign securities are generally selected on a security-by-security basis without regard to any predetermined allocation among countries or geographic regions. However, certain factors, such as expected levels of inflation, government policies influencing business conditions, the outlook for currency relationships, and prospects for economic growth among countries, regions, or geographic areas, may warrant greater consideration in selecting foreign securities. There are no limitations on the countries in which the Funds may invest, and the Funds may at times have significant foreign exposure, including exposure to emerging markets.

High-Yield/High-Risk Bonds

A high-yield/high-risk bond (also called a “junk” bond) is a bond rated below investment grade by major rating agencies (i.e., BB+ or lower by Standard & Poor’s Ratings Services (“Standard & Poor’s”) and Fitch, Inc. (“Fitch”), or Ba or lower by Moody’s Investors Service, Inc. (“Moody’s”)) or is an unrated bond of similar quality. It presents greater risk of default (the failure to make timely interest and principal payments) than higher quality bonds. To the extent a Fund invests in high-yield/high-risk bonds, under normal circumstances, each Fund, with the exception of Janus Contrarian Fund, will limit its investments in high-yield/high-risk bonds to 35% or less of its net assets. Janus Contrarian Fund will limit its investments in such bonds to 20% or less of its net assets.

Illiquid Investments

Although the Funds intend to invest in liquid securities, each Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment is a security or other position that cannot be disposed of quickly in the normal course of business. For example, some securities are not registered under U.S. securities laws and cannot be sold to the U.S. public because of Securities and Exchange Commission regulations (these are known as “restricted securities”). Under procedures adopted by the Funds’ Trustees, certain restricted securities that are determined to be liquid will not be counted toward this 15% limit.

Mortgage- and Asset-Backed Securities

Each Fund may purchase fixed or variable rate mortgage-backed securities issued by the Government National Mortgage Association (“Ginnie Mae”), the Federal National Mortgage Association (“Fannie Mae”), the Federal Home Loan Mortgage Corporation (“Freddie Mac”), or other governmental or government-related entities. Ginnie Mae’s guarantees are backed by the full faith and credit of the U.S. Government. Historically, Fannie Maes and Freddie Macs were not backed by the full faith and credit of the U.S. Government, and may not be in the future. In September 2008, the Federal Housing Finance Agency (“FHFA”), an agency of the U.S. Government, placed Fannie Mae and Freddie Mac under conservatorship. Under the conservatorship, the management of Fannie Mae and Freddie Mac was replaced. Since 2008, Fannie Mae and Freddie Mac have received capital support through U.S. Treasury preferred stock purchases and Treasury and Federal Reserve purchases of

their mortgage-backed securities. The FHFA and the U.S. Treasury have imposed strict limits on the size of these entities' mortgage portfolios. The FHFA has the power to cancel any contract entered into by Fannie Mae and Freddie Mac prior to FHFA's appointment as conservator or receiver, including the guarantee obligations of Fannie Mae and Freddie Mac. Each Fund may purchase other mortgage- and asset-backed securities through single- and multi-seller conduits, collateralized debt obligations, structured investment vehicles, and other similar securities. Asset-backed securities may be backed by automobile loans, equipment leases, credit card receivables, or other collateral. In the event the underlying assets fail to perform, these investment vehicles could be forced to sell the assets and recognize losses on such assets, which could impact a Fund's yield and your return.

Unlike traditional debt instruments, payments on these securities include both interest and a partial payment of principal. Prepayments of the principal of underlying loans at a faster pace than expected is known as "prepayment risk," and may shorten the effective maturities of these securities. This may result in a Fund having to reinvest proceeds at a lower interest rate.

In addition to prepayment risk, investments in mortgage-backed securities, including those comprised of subprime mortgages, and investments in other asset-backed securities comprised of under-performing assets may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Mortgage- and asset-backed securities are also subject to extension risk, which is the risk that rising interest rates could cause mortgages or other obligations underlying these securities to be paid more slowly than expected, increasing a Fund's sensitivity to interest rate changes and causing its price to decline.

Nondiversification

Diversification is a way to reduce risk by investing in a broad range of stocks or other securities. **Janus Contrarian Fund** and **Janus Twenty Fund** are classified as "nondiversified." A fund that is classified as "nondiversified" has the ability to take larger positions in a smaller number of issuers than a fund that is classified as "diversified." This gives a fund which is classified as nondiversified more flexibility to focus its investments in companies that the portfolio managers have identified as the most attractive for the investment objective and strategy of the fund. However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified. This fluctuation, if significant, may affect the performance of the fund.

Portfolio Turnover

In general, each Fund intends to purchase securities for long-term investment, although, to a limited extent, a Fund may purchase securities in anticipation of relatively short-term gains. Short-term transactions may also result from liquidity needs, securities having reached a price or yield objective, changes in interest rates or the credit standing of an issuer, or by reason of economic or other developments not foreseen at the time of the initial investment decision. A Fund may also sell one security and simultaneously purchase the same or a comparable security to take advantage of short-term differentials in bond yields or securities prices. Portfolio turnover is affected by market conditions, changes in the size of a Fund, the nature of a Fund's investments, and the investment style of the portfolio manager and/or investment personnel. Changes are normally made in a Fund's portfolio whenever the portfolio manager and/or investment personnel believe such changes are desirable. Portfolio turnover rates are generally not a factor in making buy and sell decisions.

Increased portfolio turnover may result in higher costs for brokerage commissions, dealer mark-ups, and other transaction costs, and may also result in taxable capital gains. Higher costs associated with increased portfolio turnover also may have a negative effect on a Fund's performance. The "Financial Highlights" section of this Prospectus shows the Funds' historical turnover rates.

Securities Lending

A Fund may seek to earn additional income through lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis. Each Fund may lend portfolio securities on a short-term or long-term basis, in an amount equal to up to $\frac{1}{3}$ of its total assets as determined at the time of the loan origination. When a Fund lends its securities, it receives collateral (including cash collateral), at least equal to the value of securities loaned. The Fund may earn income by investing this collateral in one or more affiliated or non-affiliated cash management vehicles. It is also possible that, due to a decline in the value of a cash management vehicle, the Fund may lose money. There is also the risk that when portfolio securities are lent, the securities may not be returned on a timely basis, and the Fund may experience delays and costs in

recovering the security or gaining access to the collateral provided to the Fund to collateralize the loan. If the Fund is unable to recover a security on loan, the Fund may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Fund. Janus Capital intends to manage the cash collateral in an affiliated cash management vehicle and will receive an investment advisory fee for managing such assets.

Short Sales

Certain Funds may engage in short sales. No more than 10% of a Fund's net assets may be invested in short positions (through short sales of stocks, structured products, futures, swaps, and uncovered written calls). The Funds may engage in short sales "against the box" and options for hedging purposes that are not subject to this 10% limit. A short sale is generally a transaction in which a Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. A short sale is subject to the risk that if the price of the security sold short increases in value, the Fund will incur a loss because it will have to replace the security sold short by purchasing it at a higher price. In addition, the Fund may not always be able to close out a short position at a particular time or at an acceptable price. A lender may request, or market conditions may dictate, that the securities sold short be returned to the lender on short notice, and the Fund may have to buy the securities sold short at an unfavorable price. If this occurs at a time that other short sellers of the same security also want to close out their positions, it is more likely that the Fund will have to cover its short sale at an unfavorable price and potentially reduce or eliminate any gain, or cause a loss, as a result of the short sale. Because there is no upper limit to the price a borrowed security may reach prior to closing a short position, a Fund's losses are potentially unlimited in a short sale transaction. A Fund's gains and losses will also be decreased or increased, as the case may be, by the amount of any dividends, interest, or expenses, including transaction costs and borrowing fees, the Fund may be required to pay in connection with a short sale. Such payments may result in the Fund having higher expenses than a Fund that does not engage in short sales and may negatively affect the Fund's performance.

A Fund may also enter into short positions through derivative instruments such as options contracts, futures contracts, and swap agreements which may expose the Fund to similar risks. To the extent that the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Due to certain foreign countries' restrictions, a Fund will not be able to engage in short sales in certain foreign countries where it may maintain long positions. As a result, a Fund's ability to fully implement a short selling strategy that could otherwise help the Fund pursue its investment goals may be limited. There can be no assurance that the implementation of a short sale strategy will be successful.

Special Situations

The Funds may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. For example, a special situation or turnaround may arise when, in the opinion of a Fund's portfolio managers and/or investment personnel, the securities of a particular issuer will be recognized as undervalued by the market and appreciate in value due to a specific development with respect to that issuer. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. For example, issuers undergoing significant capital changes may include companies involved in spin-offs, sales of divisions, mergers or acquisitions, companies involved in bankruptcy proceedings, or companies initiating large changes in their debt to equity ratio. Companies that are redirecting cash flows may be reducing debt, repurchasing shares, or paying dividends. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in "special situations" companies can present greater risks than investments in companies not experiencing special situations, and a Fund's performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Swap Agreements

Certain Funds may utilize swap agreements as a means to gain exposure to certain common stocks and/or to “hedge” or protect their portfolios from adverse movements in securities prices, the rate of inflation, or interest rates. Swaps may also be used for capital appreciation. Swap agreements are two-party contracts to exchange one set of cash flows for another. Swap agreements entail the risk that a party will default on its payment obligations to a Fund. If the other party to a swap defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If a Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund’s total return. Various types of swaps such as credit default, equity, interest rate, and total return swaps are described in the “Glossary of Investment Terms.”

U.S. Government Securities

Each Fund, particularly Janus Balanced Fund, may invest in U.S. Government securities. U.S. Government securities include those issued directly by the U.S. Treasury and those issued or guaranteed by various U.S. Government agencies and instrumentalities. Some government securities are backed by the “full faith and credit” of the United States. Other government securities are backed only by the rights of the issuer to borrow from the U.S. Treasury. Others are supported by the discretionary authority of the U.S. Government to purchase the obligations. Certain other government securities are supported only by the credit of the issuer. For securities not backed by the full faith and credit of the United States, a Fund must look principally to the agency or instrumentality issuing or guaranteeing the securities for repayment and may not be able to assert a claim against the United States if the agency or instrumentality does not meet its commitment. Such securities may involve increased risk of loss of principal and interest compared to government debt securities that are backed by the full faith and credit of the United States.

Other Types of Investments

Unless otherwise stated within its specific investment policies, each Fund may also invest in other types of domestic and foreign securities and use other investment strategies, as described in the “Glossary of Investment Terms.” These securities and strategies are not principal investment strategies of the Funds. If successful, they may benefit the Funds by earning a return on the Funds’ assets or reducing risk; however, they may not achieve the Funds’ investment objectives. These securities and strategies may include:

- debt securities (such as bonds, notes, and debentures)

- exchange-traded funds

- indexed/structured securities (such as mortgage- and asset-backed securities)

- various derivative transactions (which could comprise a significant percentage of a fund’s portfolio) including, but not limited to, options, futures, forwards, swap agreements (such as equity, interest rate, inflation index, credit default, and total return swaps), participatory notes, structured notes, and other types of derivatives individually or in combination for hedging purposes or for nonhedging purposes such as seeking to earn income and enhance return, to protect unrealized gains, or to avoid realizing losses; such techniques may also be used to adjust currency exposure relative to a benchmark index, to gain exposure to the market pending investment of cash balances, or to meet liquidity needs

- securities purchased on a when-issued, delayed delivery, or forward commitment basis

- bank loans (including when-issued bank loans), which may be acquired through loan participations and assignments (no more than 20% of Janus Balanced Fund’s total assets)

RISKS OF THE FUNDS

The value of your investment will vary over time, sometimes significantly, and you may lose money by investing in the Funds. To varying degrees, the Funds may invest in stocks, bonds, alternative strategy investments, and money market instruments or cash/cash equivalents. The following information is intended to help you better understand some of the risks of investing in the Funds. The impact of the following risks on a Fund may vary depending on the Fund’s investments. The greater the Fund’s investment in a particular security, the greater the Fund’s exposure to the risks associated with that security. Before investing in a Fund, you should consider carefully the risks that you assume when investing in the Fund.

Bank Loan Risk. The bank loans in which Janus Balanced Fund may invest may be denominated in U.S. or non-U.S. currencies, including the euro. Bank loans are obligations of companies or other entities entered into in connection with

recapitalizations, acquisitions, and refinancings. The Fund's investments in bank loans are generally acquired as a participation interest in, or assignment of, loans originated by a lender or other financial institution. These investments may include institutionally-traded floating and fixed-rate debt securities. In addition, the bank loans underlying these securities often involve borrowers with low credit ratings whose financial conditions are troubled or uncertain, including companies that are highly leveraged or in bankruptcy proceedings. Participation interests and assignments involve credit, interest rate, and liquidity risk. To the extent the Fund invests in non-U.S. bank loan investments, those investments are subject to the risks of foreign investment, including Eurozone risk.

If the Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, the Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. There may be a number of intermediate participants in bank loan transactions and loan agreements that have specific rights, obligations, terms, and conditions. As such, any number of factors in an investment in bank loans could cause the Fund to lose income or principal on a particular investment, which in turn could affect the Fund's returns, and you could lose money.

Interest rates on floating rate bank loans adjust with interest rate changes and/or issuer credit quality, and unexpected changes in such rates could result in losses to the Fund. Additionally, borrowers may pay back principal in whole or part, prior to scheduled due dates. Such prepayment may result in the Fund realizing less income on a particular investment and replacing the floating rate bank loan with a less attractive security, which may provide less return to the Fund.

Bank loans may be subject to restrictions on resale. Certain of the Fund's investments in floating rate bank loans may be deemed illiquid and the Fund may have limited ability to trade in secondary trading markets. Such factors may have an adverse impact on the market price of such securities and may affect the Fund's returns, resulting in a loss.

The Fund may not be able to identify and invest in attractive floating rate bank loans, such as senior loans, as the market for such investments may be limited in certain economic conditions or because of a high number of potential purchasers of assignments and participations. In such cases, the Fund may invest in other floating rate debt securities or other investments which may not be as attractive. For example, the Fund may invest in junior or subordinated loans or unsecured loans. Such loans may not provide desired returns or may increase the potential for loss of income or principal. Bank loan investments may be generally considered speculative and risks arising from the Fund's investments in bank loans may be similar to those of investments in "junk" bonds or below investment grade investments. The Fund's investments in bank loans may be more sensitive to economic changes, political changes, or adverse developments specific to the borrower than higher quality investments.

Credit Quality Risk. Through a Fund's investments in fixed-income securities, a Fund is subject to the risks associated with the credit quality of the issuers of those fixed-income securities. Credit quality measures the likelihood that the issuer or borrower will meet its obligations on a bond. One of the fundamental risks is credit risk, which is the risk that an issuer will be unable to make principal and interest payments when due, or default on its obligations. Higher credit risk may negatively impact a Fund's returns and yield. U.S. Government securities are generally considered to be the safest type of investment in terms of credit risk. Municipal obligations generally rank between U.S. Government securities and corporate debt securities in terms of credit safety. Corporate debt securities, particularly those rated below investment grade, present the highest credit risk.

Many fixed-income securities receive credit ratings from services such as Standard & Poor's, Fitch, and Moody's. These services assign ratings to securities by assessing the likelihood of issuer default. The lower a bond issue is rated by an agency, the more credit risk it is considered to represent. Lower rated instruments and securities generally pay interest at a higher rate to compensate for the associated greater risk. Interest rates can fluctuate in response to economic or market conditions, which can result in a fluctuation in the price of a security and impact your return and yield. If a security has not received a rating, a Fund must rely upon Janus Capital's credit assessment, which if incorrect can also impact the Fund's returns and yield. Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore

involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by a Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, a Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent a Fund enters into short derivative positions, a Fund may be exposed to risks similar to those associated with short sales, including the risk that a Fund's losses are theoretically unlimited.

Emerging Markets Risk. Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets Indexsm. To the extent that a Fund invests a significant amount of its assets in one or more of these countries, its returns and net asset value may be affected to a large degree by events and economic conditions in such countries. The risks of foreign investing are heightened when investing in emerging markets, which may result in the price of investments in emerging markets experiencing sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on a Fund's investments. The securities markets of many of these countries may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for a Fund to obtain or to enforce a judgment against the issuers of such securities. In addition, a Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that a Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. A Fund may be subject to emerging markets risk to the extent that it invests in securities of issuers or companies which are not considered to be from emerging markets, but which have customers, products, or transactions associated with emerging markets. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent a Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when a Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Fixed-Income Securities Risk. The Funds, particularly Janus Balanced Fund, may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause a Fund's net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. For example, while securities with longer maturities tend to produce higher yields, they also tend to be more sensitive to changes in prevailing interest rates and are therefore more volatile than shorter-term securities and are subject to greater market fluctuations as a result of changes in interest rates. Fixed-income securities are also subject to credit risk, which is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. In addition, there is prepayment risk, which is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. This may result in a Fund having to reinvest its proceeds in lower yielding securities. Fixed-income securities may also be subject to valuation risk and liquidity risk. Valuation risk is the risk that one or more of the fixed-income securities in which a Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that a portfolio manager would like or

at the price that a portfolio manager believes the security is currently worth. Securities underlying mortgage- and asset-backed securities, which may include subprime mortgages, also may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Foreign Exposure Risks. Within the parameters of its specific investment policies, each Fund may invest in foreign debt and equity securities either indirectly (e.g., depositary receipts, depositary shares, and passive foreign investment companies) or directly in foreign markets, including emerging markets. Investments in foreign securities, including securities of foreign and emerging markets governments, may involve greater risks than investing in domestic securities because a Fund's performance may depend on factors other than the performance of a particular company. These factors include:

Currency Risk. As long as a Fund holds a foreign security, its value will be affected by the value of the local currency relative to the U.S. dollar. When a Fund sells a foreign currency denominated security, its value may be worth less in U.S. dollars even if the security increases in value in its home country. U.S. dollar-denominated securities of foreign issuers may also be affected by currency risk, as the value of these securities may also be affected by changes in the issuer's local currency.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in emerging markets which may have relatively unstable governments, immature economic structures, national policies restricting investments by foreigners, social instability, and different and/or developing legal systems. In some countries, there is the risk that the government may take over the assets or operations of a company or that the government may impose withholding and other taxes or limits on the removal of a Fund's assets from that country. In addition, the economies of emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Regulatory Risk. There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Foreign Market Risk. Foreign securities markets, particularly those of emerging market countries, may be less liquid and more volatile than domestic markets. These securities markets may trade a small number of securities, may have a limited number of issuers and a high proportion of shares, or may be held by a relatively small number of persons or institutions. Local securities markets may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of substantial holdings difficult or impossible at times. It is also possible that certain markets may require payment for securities before delivery, and delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for a Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, securities of issuers located in countries with emerging markets may have limited marketability and may be subject to more abrupt or erratic price movements which could also have a negative effect on a Fund. Such factors may hinder a Fund's ability to buy and sell emerging market securities in a timely manner, affecting the Fund's investment strategies and potentially affecting the value of the Fund.

Geographic Investment Risk. To the extent that a Fund invests a significant portion of its assets in a particular country or geographic region, the Fund will generally have more exposure to certain risks due to possible political, economic, social, or regulatory events in that country or region. Adverse developments in certain regions could also adversely affect securities of other countries whose economies appear to be unrelated and could have a negative impact on a Fund's performance.

Transaction Costs. Costs of buying, selling, and holding foreign securities, including brokerage, tax, and custody costs, may be higher than those involved in domestic transactions.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds (or "junk" bonds) are bonds rated below investment grade by the primary rating agencies such as Standard & Poor's, Fitch, and Moody's or are unrated bonds of similar quality. The value of lower quality bonds generally is more dependent on credit risk than investment grade bonds. Issuers of high-yield/high-risk bonds may not be as strong financially as those issuing bonds with higher credit ratings and are more vulnerable to real or perceived economic changes, political changes, or adverse developments specific to the issuer. In addition, the junk bond market can experience sudden and sharp price swings.

The secondary market on which high-yield securities are traded is less liquid than the market for investment grade securities. The lack of a liquid secondary market may have an adverse impact on the market price of the security. Additionally, it may be more difficult to value the securities because valuation may require more research, and elements of judgment may play a larger role in the valuation because there is less reliable, objective data available.

Please refer to the “Explanation of Rating Categories” section of the SAI for a description of bond rating categories.

Industry Risk. Industry risk is the possibility that a group of related securities will decline in price due to industry-specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react similarly to industry-specific market or economic developments. Each Fund’s investments, if any, in multiple companies in a particular industry increase that Fund’s exposure to industry risk.

Interest Rate Risk. Generally, a fixed-income security will increase in value when prevailing interest rates fall and decrease in value when prevailing interest rates rise. Longer-term securities are generally more sensitive to interest rate changes than shorter-term securities, but they generally offer higher yields to compensate investors for the associated risks. High-yield bond prices and floating rate debt security prices are generally less directly responsive to interest rate changes than investment grade issues or comparable fixed rate securities, and may not always follow this pattern. The Funds may use futures, swaps, options, and other derivatives to manage interest rate risk. The income component of Janus Balanced Fund’s holdings includes fixed-income securities. The income component of Janus Growth and Income Fund’s holdings may include fixed-income securities.

Management Risk. The Funds are actively managed investment portfolios and are therefore subject to the risk that the investment strategies employed for the Funds may fail to produce the intended results. A Fund may underperform its benchmark index or other mutual funds with similar investment objectives.

Because the Funds may invest substantially all of their assets in common stocks, the main risk is the risk that the value of the stocks they hold might decrease in response to the activities of an individual company or in response to general market and/or economic conditions. If this occurs, a Fund’s share price may also decrease.

The Funds may use short sales, futures, options, swap agreements (including, but not limited to, equity, interest rate, credit default, and total return swaps), and other derivative instruments individually or in combination to “hedge” or protect their portfolios from adverse movements in securities prices and interest rates. The Funds may also use a variety of currency hedging techniques, including the use of forward currency contracts, to manage currency risk. There is no guarantee that a portfolio manager’s and/or investment personnel’s use of derivative investments will benefit the Funds. A Fund’s performance could be worse than if the Fund had not used such instruments. Use of such investments may instead increase risk to the Fund, rather than reduce risk.

A Fund’s performance may also be significantly affected, positively or negatively, by a portfolio manager’s and/or investment personnel’s use of certain types of investments, such as foreign (non-U.S.) securities, non-investment grade bonds (“junk” bonds), initial public offerings (“IPOs”), or securities of companies with relatively small market capitalizations. Note that a portfolio manager’s and/or investment personnel’s use of IPOs and other types of investments may have a magnified performance impact on a fund with a small asset base and the fund may not experience similar performance as its assets grow.

Market Risk. The value of a Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers’ and/or investment personnel’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of a Fund’s portfolio could also decrease if there are deteriorating economic or market conditions, including, but not limited to, a general decline in prices on the stock markets, a general decline in real estate markets, a decline in commodities prices, or if the market favors different types of securities than the types of securities in which the Fund invests. If the value of the Fund’s portfolio decreases, the Fund’s net asset value will also decrease, which means if you sell your shares in the Fund you may lose money.

It is also important to note that events in both domestic and international equity and fixed-income markets have resulted, and may continue to result, in an unusually high degree of volatility in the markets, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. These events and the resulting market upheavals may have an adverse effect on a Fund, such as a decline in the value and liquidity of many securities held by the Fund, unusually high

and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value, and an increase in Fund expenses. Because the situation is unprecedented and widespread, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Fund's ability to achieve its investment objective. It is impossible to predict whether or for how long these conditions will continue. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

Further, the instability experienced in the financial markets has resulted in the U.S. Government and various other governmental and regulatory entities taking actions to address the financial crisis. These actions include, but are not limited to, the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") in July 2010 which is expected to dramatically change the way in which the U.S. financial system is supervised and regulated. More specifically, the Dodd-Frank Act provides for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, over-the-counter derivatives, investment advisers, credit rating agencies, and mortgage lending, which expands federal oversight in the financial sector and may affect the investment management industry as a whole. Given the broad scope, sweeping nature, and the fact that many provisions of the Dodd-Frank Act must be implemented through future rulemaking, the ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain. As a result, there can be no assurance that these government and regulatory measures will not have an adverse effect on the value or marketability of securities held by a Fund, including potentially limiting or completely restricting the ability of the Fund to use a particular investment instrument as part of its investment strategy, increasing the costs of using these instruments, or possibly making them less effective in general. Furthermore, no assurance can be made that the U.S. Government or any U.S. regulatory entity (or other authority or regulatory entity) will not continue to take further legislative or regulatory action in response to the economic crisis or otherwise, and the effect of such actions, if taken, cannot be known.

In addition, European markets have recently experienced volatility and adverse trends due to concerns about economic downturns, rising government debt levels, and the possible default of government debt in several European countries, including Greece, Ireland, Italy, Portugal, and Spain. A default or debt restructuring by any European country would adversely impact holders of that country's debt and worldwide sellers of credit default swaps linked to that country's creditworthiness. These trends have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of all European countries, which in turn may have a material adverse effect on a Fund's investments in such countries, other countries that depend on European countries for significant amounts of trade or investment, or issuers with exposure to European debt.

Mortgage-Backed Securities Risk. Rising interest rates tend to extend the duration of, or reduce the rate of prepayments on, mortgage-backed securities, making them more sensitive to changes in interest rates ("extension risk"). As a result, in a period of rising interest rates, the price of mortgage-backed securities may fall, causing a Fund that holds mortgage-backed securities to exhibit additional volatility. Mortgage-backed securities are also subject to prepayment risk. When interest rates decline, borrowers may pay off their mortgages sooner than expected. This can reduce a Fund's returns because the Fund will have to reinvest that money at lower prevailing interest rates.

In addition to extension risk and prepayment risk, investments in mortgage-backed securities, including those comprised of subprime mortgages, may be subject to a higher degree of credit risk, valuation risk, and liquidity risk than various other types of fixed-income securities.

Nondiversification Risk. Janus Contrarian Fund and Janus Twenty Fund are classified as nondiversified under the Investment Company Act of 1940, as amended, and may hold a greater percentage of their assets in a smaller number of issuers. As a result, an increase or decrease in the value of a single security held by a Fund may have a greater impact on the Fund's net asset value and total return. Being nondiversified may also make a Fund more susceptible to financial, economic, political, or other developments that may impact a security. Although each Fund may satisfy the requirements for a diversified fund, and in the case of Janus Contrarian Fund has from time to time operated as diversified, each Fund's nondiversified classification gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities than a fund that is classified as diversified. A Fund's policy of concentrating its portfolio in a smaller number of holdings could result in more volatility in the Fund's performance and share price. Since Janus Twenty Fund normally invests primarily in a core portfolio of 20-30 common stocks, this risk may be increased.

Real Estate Securities Risk. A Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements,

supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets. REITs that invest in real estate mortgages are also subject to prepayment risk. In addition to prepayment risk, investments in mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities comprised of under-performing assets may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Small- and Mid-Sized Companies Risk. A Fund's investments in securities issued by small- and mid-sized companies, which tend to be smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. For example, while small- and mid-sized companies may realize more substantial growth than larger or more established issuers, they may also suffer more significant losses as a result of their narrow product lines, limited operating history, greater exposure to competitive threats, limited financial resources, limited trading markets, and the potential lack of management depth. Securities issued by small- and mid-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies. These holdings are also subject to wider price fluctuations and tend to be less liquid than stocks of larger companies, which could have a significant adverse effect on a Fund's returns, especially as market conditions change.

Sovereign Debt Risk. A Fund may invest in U.S. and foreign government debt securities ("sovereign debt"). Investments in U.S. sovereign debt are considered low risk. However, investments in non-U.S. sovereign debt can involve a high degree of risk, including the risk that the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or to pay the interest on its sovereign debt in a timely manner. A sovereign debtor's willingness or ability to satisfy its debt obligation may be affected by various factors, including its cash flow situation, the extent of its foreign currency reserves, the availability of foreign exchange when a payment is due, the relative size of its debt position in relation to its economy as a whole, the sovereign debtor's policy toward international lenders, and local political constraints to which the governmental entity may be subject. Sovereign debtors may also be dependent on expected disbursements from foreign governments, multilateral agencies, and other entities. The failure of a sovereign debtor to implement economic reforms, achieve specified levels of economic performance, or repay principal or interest when due may result in the cancellation of third party commitments to lend funds to the sovereign debtor, which may further impair such debtor's ability or willingness to timely service its debts. A Fund may be requested to participate in the rescheduling of such sovereign debt and to extend further loans to governmental entities, which may adversely affect the Fund's holdings. In the event of default, there may be limited or no legal remedies for collecting sovereign debt and there may be no bankruptcy proceedings through which the Fund may collect all or part of the sovereign debt that a governmental entity has not repaid.

Management of the Funds

INVESTMENT ADVISER

Janus Capital Management LLC, 151 Detroit Street, Denver, Colorado 80206-4805, is the investment adviser to each Fund. Janus Capital is responsible for the day-to-day management of the Funds' investment portfolios and furnishes continuous advice and recommendations concerning the Funds' investments. Janus Capital also provides certain administration and other services and is responsible for other business affairs of each Fund.

Janus Capital (together with its predecessors) has served as investment adviser to Janus mutual funds since 1970 and currently serves as investment adviser to all of the Janus funds, acts as subadviser for a number of private-label mutual funds, and provides separate account advisory services for institutional accounts and other unregistered products.

Janus Capital furnishes certain administration, compliance, and accounting services for the Funds and is reimbursed by the Funds for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Janus Capital provides office space for the Funds. Some expenses related to compensation payable to the Janus funds' Chief Compliance Officer and compliance staff are shared with the Janus funds. The Funds also pay for salaries, fees, and expenses of certain Janus Capital employees and Fund officers, with respect to certain specified administration functions they perform on behalf of the Janus funds. The Janus funds pay these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Funds.

MANAGEMENT EXPENSES

Each Fund pays Janus Capital an investment advisory fee and incurs expenses, including administrative services fees payable pursuant to the Transfer Agency Agreement, any other transfer agent and custodian fees and expenses, legal and auditing fees, printing and mailing costs of sending reports and other information to existing shareholders, and Independent Trustees' fees and expenses. Each Fund's investment advisory fee is calculated daily and paid monthly. Each Fund's advisory agreement details the investment advisory fee and other expenses that each Fund must pay.

The following tables reflect each Fund's contractual investment advisory fee rate or base fee rate, as applicable (expressed as an annual rate), as well as the actual investment advisory fee rate paid by each Fund to Janus Capital (gross and net of fee waivers, if applicable).

Fixed-Rate Investment Advisory Fee

The Funds reflected below pay an investment advisory fee at a fixed rate based on each Fund's average daily net assets.

Fund Name	Average Daily Net Assets of the Fund	Contractual Investment Advisory Fee (%) (annual rate)	Actual Investment Advisory Fee Rate ⁽¹⁾ (%) (for the fiscal year ended September 30, 2012)
Janus Balanced Fund	All Asset Levels	0.55	0.55
Janus Enterprise Fund	All Asset Levels	0.64	0.64
Janus Growth and Income Fund	All Asset Levels	0.60	0.60
Janus Triton Fund	All Asset Levels	0.64	0.64
Janus Venture Fund	All Asset Levels	0.64	0.64

Janus Capital has agreed to waive each Fund's total annual fund operating expenses (excluding administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to certain (1) levels until at least February 1, 2014. Application of the expense waivers and their effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in each Fund Summary of the Prospectus, and additional information is included under "Expense Limitations" below. The waivers are not reflected in the contractual fee rates shown.

Performance-Based Investment Advisory Fee

Janus Contrarian Fund, Janus Research Fund, Janus Fund, and Janus Twenty Fund each pay an investment advisory fee rate that may adjust up or down based on each Fund's performance relative to the cumulative investment record of its benchmark index over the performance measurement period as reflected in the table below. Any adjustment to the investment advisory fee rate was effective February 2007 for each of Janus Contrarian Fund and Janus Research Fund, July 2011 for Janus Fund, and January 2012 for Janus Twenty Fund. Until such time, only the base fee rate shown below applied. The third column shows the performance hurdle for outperformance or underperformance during the measurement period relative to each Fund's respective benchmark index. The fourth column shows the performance adjusted investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period without any fee waivers. The fifth column shows the actual investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period and includes any applicable fee waiver. This fifth column shows the actual amount of the investment advisory fee rate paid by each Fund as of the end of the fiscal year.

As an example, if a Fund outperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would increase by 0.15% (assuming constant assets). Conversely, if a Fund underperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would decrease by 0.15% (assuming constant assets). Actual performance within the full range of the performance hurdle rate may result in positive or negative incremental adjustments to the advisory fee of greater or less than 0.15%. Additional details discussing the performance fee are included below with further description in the SAI.

Fund Name	Base Fee Rate (%)	Performance Hurdle vs. Benchmark Index	Performance Adjusted Investment Advisory Fee Rate (%)	Actual Investment Advisory Fee Rate (%) (for the fiscal year ended September 30, 2012)
Janus Contrarian Fund	0.64	±7.00%	0.43	0.43(1)
Janus Research Fund	0.64	±5.00%	0.64	0.64
Janus Fund	0.64	±4.50%	0.49	0.47(1)
Janus Twenty Fund	0.64	±8.50%	0.52(2)	0.52

(1) Janus Capital has agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to a certain level until at least February 1, 2014. Application of the expense waiver and its effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in the Fund Summary of the Prospectus, and additional information is included under "Expense Limitations" below. The waiver and any applicable performance adjustment are not reflected in the base fee rate shown.

(2) Any applicable performance adjustment began January 1, 2012; until such time, the base fee rate shown applied.

For Janus Contrarian Fund, Janus Research Fund, Janus Fund, and Janus Twenty Fund, the investment advisory fee rate is determined by calculating a base fee (shown in the previous table) and applying a performance adjustment (described in further detail below). The performance adjustment either increases or decreases the base fee depending on how well each Fund has performed relative to its benchmark index as shown below:

Fund Name	Benchmark Index
Janus Contrarian Fund	S&P 500® Index
Janus Research Fund	Russell 1000® Growth Index
Janus Fund	Core Growth Index
Janus Twenty Fund	Russell 1000® Growth Index

The calculation of the performance adjustment applies as follows:

Investment Advisory Fee = Base Fee Rate +/- Performance Adjustment

The investment advisory fee rate paid to Janus Capital by each Fund in the table above consists of two components: (1) a base fee calculated by applying the contractual fixed rate of the advisory fee to the Fund's average daily net assets during the previous month ("Base Fee Rate"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by

applying a variable rate of up to 0.15% (positive or negative) to the Fund's average daily net assets during the applicable performance measurement period. The performance measurement period generally is the previous 36 months, although no Performance Adjustment is made until a Fund's performance-based fee structure has been in effect for at least 12 months (18 months for Janus Twenty Fund). When a Fund's performance-based fee structure has been in effect for at least 12 months (18 months for Janus Twenty Fund), but less than 36 months, the performance measurement period is equal to the time that has elapsed since the performance-based fee structure took effect. As noted above, any applicable Performance Adjustment began February 2007 for each of Janus Contrarian Fund and Janus Research Fund, July 2011 for Janus Fund, and January 2012 for Janus Twenty Fund.

No Performance Adjustment is applied unless the difference between a Fund's investment performance and the cumulative investment record of the Fund's benchmark index is 0.50% or greater (positive or negative) during the applicable performance measurement period. The Base Fee Rate is subject to an upward or downward Performance Adjustment for every full 0.50% increment by which the Fund outperforms or underperforms its benchmark index. Because the Performance Adjustment is tied to a Fund's relative performance compared to its benchmark index (and not its absolute performance), the Performance Adjustment could increase Janus Capital's fee even if the Fund's Shares lose value during the performance measurement period and could decrease Janus Capital's fee even if the Fund's Shares increase in value during the performance measurement period. For purposes of computing the Base Fee Rate and the Performance Adjustment, net assets are averaged over different periods (average daily net assets during the previous month for the Base Fee Rate, versus average daily net assets during the performance measurement period for the Performance Adjustment). Performance of a Fund is calculated net of expenses whereas a Fund's benchmark index does not have any fees or expenses. Reinvestment of dividends and distributions is included in calculating both the performance of a Fund and the Fund's benchmark index. The Base Fee Rate is calculated and accrued daily. The Performance Adjustment is calculated monthly in arrears and is accrued throughout the month. The investment fee is paid monthly in arrears. Under extreme circumstances involving underperformance by a rapidly shrinking Fund, the dollar amount of the Performance Adjustment could be more than the dollar amount of the Base Fee Rate. In such circumstances, Janus Capital would reimburse the applicable Fund.

The application of an expense limit, if any, will have a positive effect upon a Fund's performance and may result in an increase in the Performance Adjustment. It is possible that the cumulative dollar amount of additional compensation ultimately payable to Janus Capital may, under some circumstances, exceed the cumulative dollar amount of management fees waived by Janus Capital.

With the exception of Janus Twenty Fund, the investment performance of a Fund's Class A Shares (waiving the upfront sales load) for the performance measurement period is used to calculate the Performance Adjustment. After Janus Capital determines whether a particular Fund's performance was above or below its benchmark index by comparing the investment performance of the Fund's load-waived Class A Shares against the cumulative investment record of that Fund's benchmark index, Janus Capital applies the same Performance Adjustment (positive or negative) across each other class of shares of the Fund, as applicable. It is not possible to predict the effect of the Performance Adjustment on future overall compensation to Janus Capital since it depends on the performance of each Fund relative to the record of the Fund's benchmark index and future changes to the size of each Fund.

Because Janus Twenty Fund does not offer Class A Shares, the investment performance of the Fund's Class T Shares (formerly named Class J Shares) will be used for purposes of calculating the Fund's Performance Adjustment. After Janus Capital determines whether Janus Twenty Fund's performance was above or below its benchmark index by comparing the investment performance of the Fund's Class T Shares against the cumulative investment record of the Fund's benchmark index, Janus Capital applies the same Performance Adjustment (positive or negative) across any other class of shares of Janus Twenty Fund.

A discussion regarding the basis for the Trustees' approval of the Funds' investment advisory agreements is included in the Funds' annual or semiannual report to shareholders. You can request the Funds' annual or semiannual reports (as they become available), free of charge, by contacting a Janus representative at 1-800-525-3713. The reports are also available, free of charge, at janus.com/reports.

Expense Limitations

Janus Capital has contractually agreed to waive the advisory fee payable by each Fund listed below in an amount equal to the amount, if any, that the Fund's normal operating expenses in any fiscal year, including the investment advisory fee, but excluding any performance adjustments to management fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses, exceed the annual rate shown below. For information about how the expense limit affects the total expenses of each Fund, see the "Fees and Expenses of the Fund" table in each Fund Summary of the Prospectus. Janus Capital has agreed to continue each waiver until at least February 1, 2014.

Fund Name	Expense Limit Percentage (%)
Janus Balanced Fund	0.68
Janus Contrarian Fund(1)	0.77
Janus Enterprise Fund	0.76
Janus Fund(1)	0.83
Janus Growth and Income Fund	0.75
Janus Triton Fund	0.92
Janus Venture Fund	0.92

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to its benchmark index during a (1) measurement period. Because a fee waiver will have a positive effect upon the Fund's performance, a fee waiver that is in place during the period when the performance adjustment applies may affect the performance adjustment in a way that is favorable to Janus Capital.

INVESTMENT PERSONNEL

Unless otherwise noted, the Portfolio Manager has primary responsibility for the day-to-day management of the Fund described.

Janus Balanced Fund

Co-Portfolio Managers Marc Pinto and Gibson Smith jointly share responsibility for the day-to-day management of the Fund, with no limitation on the authority of one co-portfolio manager in relation to the other. Mr. Pinto focuses on the equity portion of the Fund. Mr. Smith focuses on the fixed-income portion of the Fund.

Marc Pinto, CFA, is Executive Vice President and Co-Portfolio Manager of Janus Balanced Fund, which he has co-managed since May 2005. Mr. Pinto is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 1994 as an analyst. Mr. Pinto holds a Bachelor's degree in History from Yale University and a Master's degree in Business Administration from Harvard University. He holds the Chartered Financial Analyst designation.

Gibson Smith is Co-Chief Investment Officer of Janus Capital. He is Executive Vice President and Co-Portfolio Manager of Janus Balanced Fund, which he has co-managed since May 2005. Mr. Smith is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 2001 as a fixed-income analyst. Mr. Smith holds a Bachelor's degree in Economics from the University of Colorado.

Janus Contrarian Fund

Daniel Kozlowski, CFA, is Executive Vice President and Portfolio Manager of Janus Contrarian Fund, which he has managed since July 2011. He is also Portfolio Manager of other Janus accounts. Mr. Kozlowski initially joined Janus Capital in 1999 and left in 2008. He re-joined Janus Capital in June 2011. From March 2008 to June 2011, Mr. Kozlowski was a portfolio manager at Plaisance Capital LLC. He holds a Bachelor's degree (cum laude) in Business Administration from the University of Miami, a Master of Business Administration degree with concentrations in Finance and Accounting from the University of Chicago, and has studied at Sophia University's School of Comparative Culture in Tokyo, Japan. Mr. Kozlowski holds the Chartered Financial Analyst designation.

Janus Enterprise Fund

Brian Demain, CFA, is Executive Vice President and Portfolio Manager of Janus Enterprise Fund, which he has managed since November 2007. Mr. Demain is also Portfolio Manager of other Janus accounts. He served as Assistant Portfolio Manager of the Fund from September 2004 to October 2007. Mr. Demain joined Janus Capital in 1999 as a securities analyst. He holds a Bachelor's degree in Economics from Princeton University, where he graduated summa cum laude and was a recipient of the Daniel L. Rubinfeld '67 Prize in Empirical Economics for his senior thesis. Mr. Demain holds the Chartered Financial Analyst designation.

Janus Fund

Co-Portfolio Managers Jonathan D. Coleman and Burton H. Wilson are responsible for the day-to-day management of the Fund. Mr. Coleman, as lead Portfolio Manager, has the authority to exercise final decision-making on the overall portfolio.

Jonathan D. Coleman, CFA, is Co-Chief Investment Officer of Janus Capital. He is Executive Vice President and Co-Portfolio Manager of Janus Fund, which he has co-managed since November 2007. Mr. Coleman is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 1994 as a research analyst. Mr. Coleman holds a Bachelor's degree in Political Economy and Spanish from Williams College, where he was a member of Phi Beta Kappa. As a Fulbright Fellow, he conducted research on economic integration in Central America. Mr. Coleman holds the Chartered Financial Analyst designation.

Burton H. Wilson, Janus Capital's Assistant Director of Equity Research, is Executive Vice President and Co-Portfolio Manager of Janus Fund, which he has co-managed since May 2011. He is also Portfolio Manager of other Janus accounts. Mr. Wilson joined Janus Capital in 2005 as a research analyst. Mr. Wilson holds a Bachelor of Arts degree in Mathematics from the University of Virginia, a Juris Doctorate from the University of Virginia School of Law, and a Master's degree in Business Administration from the University of California at Berkeley's Haas School of Business.

Janus Growth and Income Fund

Marc Pinto, CFA, is Executive Vice President and Portfolio Manager of Janus Growth and Income Fund, which he has managed since November 2007. Mr. Pinto is also Portfolio Manager of other Janus accounts. He joined Janus Capital in 1994 as an analyst. Mr. Pinto holds a Bachelor's degree in History from Yale University and a Master's degree in Business Administration from Harvard University. He holds the Chartered Financial Analyst designation.

Janus Research Fund

The Research Team (Janus Capital's equity research analysts overseen by the Portfolio Oversight Team led by James P. Goff) selects investments for Janus Research Fund and has done so since February 2006.

James P. Goff, CFA, is Janus Capital's Director of Equity Research and Executive Vice President of the Fund. Mr. Goff is primarily responsible for the day-to-day operations of the Fund. He leads the Portfolio Oversight Team that reviews the Fund's risks, overall structure, and guidelines. Mr. Goff joined Janus Capital in 1988. He holds a Bachelor of Arts degree (magna cum laude) in Economics from Yale University. Mr. Goff holds the Chartered Financial Analyst designation.

Janus Triton Fund

Co-Portfolio Managers Chad Meade and Brian A. Schaub jointly share responsibility for the day-to-day management of the Fund, with no limitation on the authority of one co-portfolio manager in relation to the other.

Chad Meade is Executive Vice President and Co-Portfolio Manager of Janus Triton Fund, which he has co-managed since July 2006. He is also Portfolio Manager of other accounts. Mr. Meade joined Janus Capital in 2001 as an equity research analyst. He holds a Bachelor's degree (summa cum laude) in Finance from Virginia Tech.

Brian A. Schaub, CFA, is Executive Vice President and Co-Portfolio Manager of Janus Triton Fund, which he has co-managed since July 2006. He is also Portfolio Manager of other Janus accounts. Mr. Schaub joined Janus Capital in 2000 as an equity research analyst. He holds a Bachelor's degree (cum laude) in Economics from Williams College. Mr. Schaub holds the Chartered Financial Analyst designation.

Janus Twenty Fund

Ron Sachs, CFA, is Executive Vice President and Portfolio Manager of Janus Twenty Fund, which he has managed since January 2008. He is also Portfolio Manager of other Janus accounts. Mr. Sachs joined Janus Capital in 1996 as a research analyst. He holds a Bachelor's degree (cum laude) in Economics from Princeton and a Juris Doctorate from the University of Michigan. Mr. Sachs holds the Chartered Financial Analyst designation.

Janus Venture Fund

Co-Portfolio Managers Chad Meade and Brian A. Schaub jointly share responsibility for the day-to-day management of the Fund, with no limitation on the authority of one co-portfolio manager in relation to the other.

Chad Meade is Executive Vice President and Co-Portfolio Manager of Janus Venture Fund, which he has co-managed since July 2010. He is also Portfolio Manager of other Janus accounts. Mr. Meade joined Janus Capital in 2001 as an equity research analyst. He holds a Bachelor's degree (summa cum laude) in Finance from Virginia Tech.

Brian A. Schaub, CFA, is Executive Vice President and Co-Portfolio Manager of Janus Venture Fund, which he has co-managed since July 2010. He is also Portfolio Manager of other Janus accounts. Mr. Schaub joined Janus Capital in 2000 as an equity research analyst. He holds a Bachelor's degree (cum laude) in Economics from Williams College. Mr. Schaub holds the Chartered Financial Analyst designation.

Information about the portfolio managers' and/or investment personnel's compensation structure and other accounts managed, as well as the range of their individual ownership of securities of the specific Fund(s) they manage and the aggregate range of their individual ownership in all mutual funds advised by Janus Capital, is included in the SAI.

Conflicts of Interest

Janus Capital manages many funds and numerous other accounts, which may include separate accounts and other pooled investment vehicles, such as hedge funds. Side-by-side management of multiple accounts, including the management of a cash collateral pool for securities lending and investing the Janus funds' cash, may give rise to conflicts of interest among those accounts, and may create potential risks, such as the risk that investment activity in one account may adversely affect another account. For example, short sale activity in an account could adversely affect the market value of long positions in one or more other accounts (and vice versa). Side-by-side management may raise additional potential conflicts of interest relating to the allocation of investment opportunities and the aggregation and allocation of trades. Additionally, Janus Capital is the adviser to the Janus "funds of funds," which are funds that invest primarily in other mutual funds managed by Janus Capital. Because Janus Capital is the adviser to the Janus "funds of funds" and the Funds, it is subject to certain potential conflicts of interest when allocating the assets of a Janus "fund of funds" among such Funds. To the extent that a Fund is an underlying fund in a Janus "fund of funds," a potential conflict of interest arises when allocating the assets of the Janus "fund of funds" to the Fund. Purchases and redemptions of fund shares by a Janus "fund of funds" due to reallocations or rebalancings may result in a fund having to sell securities or invest cash when it otherwise would not do so. Such transactions could accelerate the realization of taxable income if sales of securities resulted in gains and could also increase a fund's transaction costs. Large redemptions by a Janus "fund of funds" may cause a fund's expense ratio to increase due to a resulting smaller asset base. A further discussion of potential conflicts of interest and a discussion of certain procedures intended to mitigate such potential conflicts are contained in the Funds' SAI.

Other information

CLOSED FUND POLICIES

A Fund may limit sales of its Shares to new investors if Janus Capital and the Trustees believe continued sales may adversely affect the Fund's ability to achieve its investment objective. If sales of a Fund are limited, it is expected that existing shareholders invested in the Fund would be permitted to continue to purchase Shares through their existing Fund accounts and to reinvest any dividends or capital gains distributions in such accounts, absent highly unusual circumstances. Requests for new accounts into a closed fund would be reviewed by management, taking into consideration eligibility requirements and whether the addition to the fund is believed to negatively impact existing fund shareholders. The closed fund may decline opening new accounts, including eligible new accounts, if it would be in the best interests of the fund and its shareholders. Janus Twenty Fund has limited sales of its Shares. Additional information regarding general policies and exceptions can be found under Closed Fund Policies in the "Shareholder's Manual" section of this Prospectus and in the "Shares of the Trust" section of the SAI.

LIQUIDATION/REORGANIZATION OF A FUND

It is important to know that, pursuant to the Trust's Amended and Restated Agreement and Declaration of Trust and in accordance with any applicable regulations and laws, the Trustees have the authority to merge, liquidate, and/or reorganize a Fund into another fund without seeking shareholder vote or consent.

DISTRIBUTION OF THE FUNDS

The Funds are distributed by Janus Distributors LLC ("Janus Distributors"), which is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). To obtain information about FINRA member firms and their associated persons, you may contact FINRA at www.finra.org, or 1-800-289-9999.

Distributions and taxes

DISTRIBUTIONS

To avoid taxation of the Funds, the Internal Revenue Code requires each Fund to distribute all or substantially all of its net investment income and any net capital gains realized on its investments at least annually. A Fund's income from certain dividends, interest, and any net realized short-term capital gains are paid to shareholders as ordinary income dividends. Certain dividend income may be reported to shareholders as "qualified dividend income," which is generally subject to reduced rates of taxation. Net realized long-term capital gains, if any, are paid to shareholders as capital gains distributions, regardless of how long Shares of the Fund have been held. Distributions are made at the class level, so they may vary from class to class within a single Fund.

Distribution Schedule

Dividends from net investment income for Janus Balanced Fund and Janus Growth and Income Fund are normally declared and distributed in March, June, September, and December. Dividends from net investment income for the other Funds are normally declared and distributed in December. In addition, distributions of capital gains are normally declared and distributed in December. If necessary, dividends and net capital gains may be distributed at other times as well.

How Distributions Affect a Fund's NAV

Distributions are paid to shareholders as of the record date of a distribution of a Fund, regardless of how long the shares have been held. Undistributed dividends and net capital gains are included in each Fund's daily net asset value ("NAV"). The share price of a Fund drops by the amount of the distribution, net of any subsequent market fluctuations. For example, assume that on December 31, a Fund declared a dividend in the amount of \$0.25 per share. If the Fund's share price was \$10.00 on December 30, the Fund's share price on December 31 would be \$9.75, barring market fluctuations. You should be aware that distributions from a taxable mutual fund do not increase the value of your investment and may create income tax obligations.

"Buying a Dividend"

If you purchase shares of a Fund just before a distribution, you will pay the full price for the shares and receive a portion of the purchase price back as a taxable distribution. This is referred to as "buying a dividend." In the above example, if you bought shares on December 30, you would have paid \$10.00 per share. On December 31, the Fund would pay you \$0.25 per share as a dividend and your shares would now be worth \$9.75 per share. Unless your account is set up as a tax-deferred account, dividends paid to you would be included in your gross income for tax purposes, even though you may not have participated in the increase in NAV of the Fund, whether or not you reinvested the dividends. You should consult with your tax adviser as to potential tax consequences of any distributions that may be paid shortly after purchase.

For your convenience, distributions of net investment income and net capital gains are automatically reinvested in additional Shares of the Fund. To receive distributions in cash, contact a Janus representative at 1-800-525-3713. Whether reinvested or paid in cash, the distributions may be subject to taxes, unless your shares are held in a qualified tax-deferred plan or account.

DISTRIBUTION OPTIONS

When you open an account, it will automatically provide for reinvestment of all distributions. If you have a non-retirement account, you may change your distribution option at any time by logging on to janus.com/individual, by calling a Janus representative, or by writing to the Funds at one of the addresses listed in the Shareholder's Manual section of this Prospectus. The Funds offer the following options:

Reinvestment Option. You may reinvest your income dividends and capital gains distributions in additional shares.

Cash Option. You may receive your income dividends and capital gains distributions in cash.

Reinvest and Cash Option. You may receive either your income dividends or capital gains distributions in cash and reinvest the other in additional shares.

Redirect Option. You may direct your dividends or capital gains distributions to purchase shares of another Janus fund.

The Funds reserve the right to reinvest undeliverable and uncashed dividend and distribution checks into your open non-retirement account at the NAV next computed after the check is cancelled. Subsequent distributions may also be reinvested. For more information, refer to "Distributions."

TAXES

As with any investment, you should consider the tax consequences of investing in the Funds. Any time you sell or exchange shares of a fund in a taxable account, it is considered a taxable event. For federal income tax purposes, an exchange is treated the same as a sale. Depending on the purchase price and the sale price, you may have a gain or loss on the transaction; whether the gain or loss is long-term or short-term depends on how long you owned the shares. Any tax liabilities generated by your transactions are your responsibility.

The following discussion does not apply to qualified tax-deferred accounts or other non-taxable entities, nor is it a complete analysis of the federal income tax implications of investing in the Funds. You should consult your tax adviser if you have any questions. Additionally, state or local taxes may apply to your investment, depending upon the laws of your state of residence.

Taxes on Distributions

Distributions by the Funds are subject to federal income tax, regardless of whether the distribution is made in cash or reinvested in additional shares of a Fund. When gains from the sale of a security held by a Fund are paid to shareholders, the rate at which the gain will be taxed to shareholders depends on the length of time the Fund held the security. In certain states, a portion of the distributions (depending on the sources of a Fund's income) may be exempt from state and local taxes. A Fund's net investment income and capital gains are distributed to (and may be taxable to) those persons who are shareholders of the Fund at the record date of such payments. Although a Fund's total net income and net realized gain are the results of its operations, the per share amount distributed or taxable to shareholders is affected by the number of Fund shares outstanding at the record date. Generally, account tax information will be made available to shareholders on or before January 31st of each year. Information regarding distributions may also be reported to the Internal Revenue Service.

Distributions made by a Fund with respect to Shares purchased through a qualified retirement plan will generally be exempt from current taxation if left to accumulate within the qualified plan.

Generally, withdrawals from qualified plans may be subject to federal income tax at ordinary income rates and, if made before age 59½, a 10% penalty tax may be imposed. The federal income tax status of your investment depends on the features of your qualified plan. For further information, please contact your tax adviser.

The Funds may be required to withhold U.S. federal income tax on all distributions and redemptions payable to shareholders who fail to provide their correct taxpayer identification number, fail to make certain required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. The current backup withholding rate is applied.

When shareholders sell Fund shares from a taxable account, they typically receive information on their tax forms that calculates their gain or loss using the average cost method. Prior to January 1, 2012, this information was not reported to the IRS, and shareholders had the option of calculating gains or losses using an alternative IRS permitted method. In accordance with legislation passed by Congress in 2008, however, each Fund began reporting cost basis information to the IRS for shares purchased on or after January 1, 2012 and sold thereafter. Each Fund will permit shareholders to elect their preferred cost basis method. In the absence of an election, the Fund will use an average cost basis method. Please consult your tax adviser to determine the appropriate cost basis method for your particular tax situation and to learn more about how the new cost basis reporting laws apply to you and your investments.

Taxation of the Funds

Dividends, interest, and some capital gains received by the Funds on foreign securities may be subject to foreign tax withholding or other foreign taxes. If a Fund is eligible, it may from year to year make the election permitted under Section 853 of the Internal Revenue Code to pass through such taxes to shareholders as a foreign tax credit. If such an election is not made, any foreign taxes paid or accrued will represent an expense to the Funds.

Certain fund transactions may involve short sales, futures, options, swap agreements, hedged investments, and other similar transactions, and may be subject to special provisions of the Internal Revenue Code that, among other things, can potentially affect the character, amount, timing of distributions to shareholders, and utilization of capital loss carryforwards. The Funds will monitor their transactions and may make certain tax elections and use certain investment strategies where applicable in order to mitigate the effect of these tax provisions, if possible. Certain transactions or strategies utilized by a Fund may generate nonqualified income that can impact an investor's taxes.

The Funds do not expect to pay any federal income or excise taxes because they intend to meet certain requirements of the Internal Revenue Code, including the distributions each year of all their net investment income and net capital gains. It is important that the Funds meet these requirements so that any earnings on your investment will not be subject to federal income taxes twice. Funds that invest in partnerships may be subject to state tax liabilities.

Shareholder' s manual

This Shareholder' s Manual is for those shareholders investing directly with the Funds. This section will help you become familiar with the different types of accounts you can establish with Janus. It also explains in detail the wide array of services and features you can establish on your account, as well as describes account policies and fees that may apply to your account. Account policies (including fees), services, and features may be modified or discontinued without shareholder approval or prior notice.

DOING BUSINESS WITH JANUS

The Shares are generally no longer being made available to new investors who do not already have a direct account with the Janus funds. The Shares are available only to investors who hold accounts directly with the Janus funds, and to immediate family members or members of the same household of an eligible individual investor. Under certain limited circumstances, shareholders of other Janus share classes who no longer wish to hold shares through an intermediary may be eligible to purchase Class D Shares.

In addition, directors, officers, and employees of Janus Capital Group Inc. ("JCGI") and its affiliates, as well as Trustees and officers of the Funds, may purchase Class D Shares. Under certain circumstances, where there has been a change in the form of ownership due to, for example, mandatory retirement distributions, legal proceedings, estate settlements, or the gifting of Shares, the recipient of Class D Shares may continue to purchase Class D Shares.

The Funds offer multiple classes of shares in order to meet the needs of various types of investors. **You should carefully consider which class of shares to purchase. Certain classes have higher expenses than other classes, which may lower the return on your investment.** If you would like additional information about the other available share classes, please call 1-800-525-3713.

Online - janus.com - 24 hours a day, 7 days a week

At janus.com/individual* existing shareholders can:

Open the following types of accounts: individual, joint, UGMA/UTMA, Traditional and Roth IRAs, Simplified Employee Pension ("SEP") IRAs, and Coverdell Education Savings Accounts

Review your account or your complete portfolio

MINIMUM INVESTMENTS*

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

The Funds reserve the right to change the amount of these minimums from time to time or to waive them in whole or in part. Participants in certain retirement plans, including but not limited to, Janus prototype Money Purchase Pension and Profit Sharing plans, SEP IRAs, SAR SEP IRAs, or outside qualified retirement plans, may not be subject to the stated minimums. Employees of Janus Capital, its wholly-owned subsidiaries, INTECH, and Perkins may open Fund accounts for \$100.

Minimum Investment Requirements

Due to the proportionately higher costs of maintaining small accounts, the Funds reserve the right to deduct an annual \$25 minimum balance fee per Fund account (paid to Janus Services) with values below the minimums described under “Minimum Investments” or to close Fund accounts valued at less than \$100. This policy may not apply to accounts that fall below the minimums solely as a result of market value fluctuations or to those accounts not subject to a minimum investment requirement. The fee or account closure will occur during the fourth quarter of each calendar year. You may receive written notice before we charge the \$25 fee or close your account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of the fee being charged or the redemption.

TYPES OF ACCOUNT OWNERSHIP

Please refer to janus.com/individual or an account application for specific requirements to open and maintain an account. Janus Twenty Fund has limited sales of its Shares. Additional information regarding general policies and exceptions can be found under Closed Fund Policies in the “Shareholder’s Manual” section of this Prospectus and in the “Shares of the Trust” section of the SAI.

Individual or Joint Ownership

Individual accounts are owned by one person. Joint accounts have two or more owners.

Trust

An established trust can open an account. The names of each trustee, the name of the trust, and the date of the trust agreement must be included on the application.

Business Accounts

Corporations and partnerships may also open an account. The application must be signed by an authorized officer of the corporation or a general partner of the partnership.

TAX-DEFERRED ACCOUNTS

Please refer to janus.com/individual or an account application for specific requirements to open and maintain an account. Certain tax-deferred accounts can only be opened and maintained via written request. Please contact a Janus representative for more information.

If you are eligible, you may set up one or more tax-deferred accounts. A tax-deferred account allows you to shelter your investment income and capital gains from current income taxes. A contribution to certain of these plans may also be tax deductible. The types of tax-deferred accounts that may be opened with Janus are described below. Investors should consult their tax adviser or legal counsel before selecting a tax-deferred account. You may initiate a rollover or a transfer of assets from certain tax-deferred accounts via janus.com/individual.

Investing for Your Retirement

Please visit janus.com/individual or call a Janus representative for more complete information regarding the different types of IRAs available. Distributions from these plans may be subject to income tax and generally to an additional tax if withdrawn prior to age 59½ or used for a nonqualifying purpose.

Traditional and Roth IRAs

Both IRAs allow most individuals with earned income to contribute up to the lesser of \$5,000 or 100% of compensation, with future years increased by cost-of-living adjustments. In addition, IRA holders age 50 or older may contribute \$1,000 more than these limits.

Simplified Employee Pension (“SEP”) IRA

This plan allows small business owners (including sole proprietors) to make tax-deductible contributions for themselves and any eligible employee(s). A SEP requires an IRA (a “SEP-IRA”) to be set up for each SEP participant.

Profit Sharing or Money Purchase Pension Plans

These plans are open to corporations, partnerships, and small business owners (including sole proprietors) for the benefit of their employees and themselves. You may only open and maintain this type of account via written request. Please contact a Janus representative for more information.

ACCOUNTS FOR THE BENEFIT OF A CHILD

Custodial Accounts (UGMA or UTMA)

An UGMA/UTMA account is a custodial account managed for the benefit of a minor.

Coverdell Education Savings Account

This tax-deferred plan allows individuals, subject to certain income limitations, to contribute up to \$2,000 annually on behalf of any child under the age of 18. Contributions are also allowed on behalf of children with special needs beyond age 18. Distributions are generally tax-free when used for qualified education expenses.

Please refer to the following for information regarding opening an account and conducting business with Janus. With certain limited exceptions, the Funds are available only to U.S. citizens or residents, and employees of Janus or its affiliates.

TO OPEN AN ACCOUNT OR BUY SHARES

Certain tax-deferred accounts can only be opened and maintained via written request. Please contact a Janus representative for more information.

Although Janus Twenty Fund is closed to new investors, if you are a current Janus Twenty Fund shareholder, you may continue to purchase Fund shares through your existing Fund accounts and to reinvest dividends and capital gains in such accounts.

Online

You may open a new Fund account or you may buy shares in an existing Fund account. You may elect to have Janus electronically withdraw funds from your designated bank account. You may initiate a rollover or a transfer of assets from certain tax-deferred accounts via janus.com/individual. A real-time confirmation of your transaction will be provided via janus.com/individual.

By Telephone

For an existing account, you may use Janus XpressLine™ to buy shares 24 hours a day, or you may call a Janus representative during normal business hours. Janus will electronically withdraw funds from your designated bank account. You may also buy shares by wiring money from your bank account to your Fund account. For wiring instructions, call a Janus representative.

By Mail/In Writing

To open your Fund account, complete and sign the appropriate application. Make your check payable to Janus or elect a one-time electronic withdrawal from your bank account as noted on the appropriate application.

To buy additional shares, complete the remittance slip accompanying your confirmation statement. If you are making a purchase into a retirement account, please indicate whether the purchase is a rollover or a current or prior year contribution. Send your check and remittance slip or written instructions to the address listed on the slip.

By Automated Investments

To buy additional shares through the Automatic Investment Program, you select the frequency with which your money (\$100 minimum) will be electronically transferred from your bank account to your Fund account. Certain tax-deferred accounts are not eligible for automated investments.

You may buy additional shares using Payroll Deduction if your employer can initiate this type of transaction. You may have all or a portion of your paycheck (\$100 minimum) invested directly into your Fund account.

Note: For more information, refer to “Paying for Shares.”

TO EXCHANGE SHARES

Remember that Janus Twenty Fund is closed to new investors. Unless you meet the criteria specified in the Closed Fund Policies in this Shareholder’s Manual, once you close your account, you may not make additional investments in the Fund.

Online

Exchanges may be made online at janus.com/individual.

By Telephone

Generally all accounts are automatically eligible to exchange shares by telephone. To exchange all or a portion of your shares into any other available Janus fund, call Janus XpressLine™ or a Janus representative.

By Mail/In Writing

To request an exchange in writing, please follow the instructions in “Written Instructions.”

By Systematic Exchange

You determine the amount of money you would like automatically exchanged from one Fund account to another on any day of the month.

Note: For more information, refer to “Exchanges.”

TO SELL SHARES

Remember that Janus Twenty Fund is closed to new investors. Unless you meet the criteria specified in the Closed Fund Policies in this Shareholder’s Manual, once you close your account, you may not make additional investments in the Fund.

Online

Redemptions may be made online at janus.com/individual.

By Telephone

Generally all accounts are automatically eligible to sell shares by telephone. To sell all or a portion of your shares, call Janus XpressLine™ or a Janus representative. The Funds reserve the right to limit the dollar amount that you may redeem from your account by telephone.

By Mail/In Writing

To request a redemption in writing, please follow the instructions in “Written Instructions.”

By Systematic Redemption

This program allows you to sell shares worth a specific dollar amount from your Fund account on a regular basis.

Note: For more information, refer to “Payment of Redemption Proceeds.”

PRICING OF FUND SHARES

The per share NAV for each class is computed by dividing the total value of assets allocated to the class, less liabilities allocated to that class, by the total number of outstanding shares of the class. A Fund’s NAV is calculated as of the close of the regular trading session of the New York Stock Exchange (“NYSE”) (normally 4:00 p.m. New York time) each day that the

NYSE is open (“business day”). However, the NAV may be calculated earlier if trading on the NYSE is restricted, or as permitted by the Securities and Exchange Commission (“SEC”). Foreign securities held by a Fund may be traded on days and at times when the NYSE is closed and the NAV is therefore not calculated. Accordingly, the value of a Fund’s holdings may change on days that are not business days in the United States and on which you will not be able to purchase or redeem a Fund’s Shares.

All purchases, exchanges, and redemptions will be duly processed at the NAV as described under “Policies in Relation to Transactions” after your request is received in good order by a Fund or its agents.

Securities held by the Funds are generally valued at market value. Certain short-term instruments maturing within 60 days or less are valued at amortized cost, which approximates market value. If a market quotation for a security is not readily available or is deemed unreliable, or if an event that is expected to affect the value of the security occurs after the close of the principal exchange or market on which the security is traded, and before the close of the NYSE, a fair value of the security (except for short-term instruments maturing within 60 days or less) will be determined in good faith under policies and procedures established by and under the supervision of the Funds’ Trustees. Such events include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a non-significant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a non-valued security and a restricted or non-public security. While fair value pricing may be more commonly used with foreign equity securities, it may also be used with, among other things, thinly-traded domestic securities or fixed-income securities. For valuation purposes, quotations of foreign portfolio securities, other assets and liabilities, and forward contracts stated in foreign currency are generally translated into U.S. dollar equivalents at the prevailing market rates. The Funds may use systematic fair valuation models provided by independent pricing services to value foreign equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

Due to the subjective nature of fair value pricing, a Fund’s value for a particular security may be different from the last quoted market price. Fair value pricing may reduce arbitrage activity involving the frequent buying and selling of mutual fund shares by investors seeking to take advantage of a perceived lag between a change in the value of a Fund’s portfolio securities and the reflection of such change in that Fund’s NAV, as further described in the “Excessive Trading” section of this Prospectus. While funds that invest in foreign securities may be at a greater risk for arbitrage activity, such activity may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as “stale pricing”). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that a Fund’s valuation of a security is different from the security’s market value, short-term arbitrage traders buying and/or selling shares of a Fund may dilute the NAV of that Fund, which negatively impacts long-term shareholders. The Funds’ fair value pricing and excessive trading policies and procedures may not completely eliminate short-term trading in certain omnibus accounts and other accounts traded through intermediaries.

The value of the securities of other open-end funds held by a Fund, if any, will be calculated using the NAV of such open-end funds, and the prospectuses for such open-end funds explain the circumstances under which they use fair value pricing and the effects of using fair value pricing.

Policies in Relation to Transactions

All requests, including but not limited to, exchanges between a Fund and other Janus funds, purchases by check or automated investment, redemptions by wire transfer, ACH transfer, or check, must be received in good order by the Fund or its agents prior to the close of the regular trading session of the NYSE (normally 4:00 p.m. New York time) in order to receive that day’s NAV. Transaction requests submitted in writing and mailed to Janus’ P.O. Box, once delivered, are considered received for processing the following business day. Transactions involving funds which pay dividends will generally begin to earn dividends, as applicable, on the first bank business day following the date of purchase.

ADMINISTRATIVE SERVICES FEES

The Funds pay an annual administrative services fee of 0.12% of net assets of Class D Shares. These administrative services fees are paid by Class D Shares of each Fund for shareholder services provided by Janus Services.

PAYMENTS TO FINANCIAL INTERMEDIARIES BY JANUS CAPITAL OR ITS AFFILIATES

With respect to other share classes not offered in this Prospectus, Janus Capital or its affiliates may pay, from their own assets, selected brokerage firms or other financial intermediaries that sell the Janus funds for distribution, marketing, promotional, or related services. Such payments may be based on gross sales, assets under management, or transactional charges, or on a combination of these factors. The amount of these payments is determined from time to time by Janus Capital, may be substantial, and may differ for different financial intermediaries. Janus Capital and its affiliates consider a number of factors in making payments to financial intermediaries.

In addition, with respect to other share classes not offered in this Prospectus, Janus Capital or its affiliates may pay fees, from their own assets, to brokerage firms, banks, financial advisors, retirement plan service providers, and other financial intermediaries for providing recordkeeping, subaccounting, transaction processing, and other shareholder or administrative services (including payments for processing transactions via National Securities Clearing Corporation (“NSCC”) or other means) in connection with investments in the Janus funds. These fees are in addition to any fees that may be paid by the Janus funds for these types of services or other services.

Further, Janus Capital or its affiliates may also share certain marketing expenses with intermediaries, or pay for or sponsor informational meetings, seminars, client awareness events, support for marketing materials, sales reporting, or business building programs for such intermediaries to raise awareness of the Funds. Janus Capital or its affiliates may make payments to participate in intermediary marketing support programs which may provide Janus Capital or its affiliates with one or more of the following benefits: attendance at sales conferences, participation in meetings or training sessions, access to or information about intermediary personnel, use of an intermediary’s marketing and communication infrastructure, fund analysis tools, business planning and strategy sessions with intermediary personnel, information on industry- or platform-specific developments, trends and service providers, and other marketing-related services. Such payments may be in addition to, or in lieu of, the payments described above. These payments are intended to promote the sales of Janus funds and to reimburse financial intermediaries, directly or indirectly, for the costs that they or their salespersons incur in connection with educational seminars, meetings, and training efforts about the Janus funds to enable the intermediaries and their salespersons to make suitable recommendations, provide useful services, and maintain the necessary infrastructure to make the Janus funds available to their customers.

The receipt of (or prospect of receiving) payments described above may provide a financial intermediary and its salespersons with an incentive to favor sales of Janus funds’ shares over sales of other mutual funds (or non-mutual fund investments) or to favor sales of one class of Janus funds’ shares over sales of another Janus funds’ share class, with respect to which the financial intermediary does not receive such payments or receives them in a lower amount. The receipt of these payments may cause certain financial intermediaries to elevate the prominence of the Janus funds within such financial intermediary’s organization by, for example, placement on a list of preferred or recommended funds and/or the provision of preferential or enhanced opportunities to promote the Janus funds in various ways within such financial intermediary’s organization.

From time to time, certain financial intermediaries approach Janus Capital to request that Janus Capital make contributions to certain charitable organizations. In these cases, Janus Capital’s contribution may result in the financial intermediary, or its salespersons, recommending Janus funds over other mutual funds (or non-mutual fund investments).

The payment arrangements described above will not change the price an investor pays for Shares nor the amount that a Janus fund receives to invest on behalf of the investor. You should consider whether such arrangements exist when evaluating any recommendations from an intermediary to purchase or sell Shares of the Funds and, if applicable, when considering which share class of a Fund is most appropriate for you.

PAYING FOR SHARES

Please note the following when purchasing Shares:

Cash, credit cards, third party checks (with certain limited exceptions), travelers cheques, credit card checks, line of credit checks, or money orders will not be accepted.

All purchases must be made in U.S. dollars and checks must be drawn on U.S. banks or an accepted Canadian bank.

Purchases initiated using a bill-pay service (or an equivalent) and presented either electronically or in the form of a check are considered direct deposit transactions.

When purchasing Shares through the Automatic Investment Program, if no date or dollar amount is specified on your application, investments of \$100 will be made on the 20th of each month. Your first automatic investment may take up to two weeks to establish. If the balance in the Janus fund account you are buying into falls to zero as the result of a redemption or exchange, your Automatic Investment Program will be discontinued.

We may make additional attempts to debit your predesignated bank account for automated investments that initially fail. You are liable for any costs associated with these additional attempts. If your automated investment fails, you may purchase Shares of the Funds by submitting good funds via another method accepted by the Funds (e.g., by wire transfer). In this case, your purchase will be processed at the next NAV determined after we receive good funds, not at the NAV available as of the date of the original request.

Each Fund reserves the right to reject any purchase order, including exchange purchases, for any reason. The Funds are not intended for excessive trading. For more information about the Funds' policy on excessive trading, refer to "Excessive Trading."

If all or a portion of a purchase is received for investment without a specific fund designation, for investment in one of our closed funds, or for investment in a fund that is not yet available for public sale, the undesignated amount or entire investment, as applicable, will be invested in Janus Money Market Fund. For investments without a specific fund designation, where you own a single Fund account with a current balance greater than zero, the investment will be applied to that Fund account. For investments without a specific fund designation, where you own two or more Fund accounts with current balances greater than zero, and for investments in closed funds, unless you later direct Janus to (i) buy shares of another Janus fund or (ii) sell shares of Janus Money Market Fund and return the proceeds (including any dividends earned) to you, Janus will treat your inaction as approval of the purchase of Janus Money Market Fund. If you hold shares of a closed fund and submit an order directly to Janus for your account in that closed fund, your account must be open and your order must clearly indicate that you are currently a shareholder of the closed fund, or your money will be invested in Janus Money Market Fund. If you submit an order to buy shares of a fund that is not yet available for investment (during a subscription period), your investment will be held in Janus Money Market Fund until the new fund's commencement of operations. At that time, your investment (including any dividends) will be automatically exchanged from Janus Money Market Fund to the new fund. All orders for purchase, exchange, or redemption will receive the NAV as described under "Policies in Relation to Transactions."

For Fund purchases by check, if your check does not clear for any reason, your purchase will be cancelled.

If your purchase is cancelled for any reason, you will be responsible for any losses or fees imposed by your bank and may be responsible for losses that may be incurred as a result of any decline in the value of the cancelled purchase.

In compliance with the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"), Janus is required to verify certain information on your account application as part of its Anti-Money Laundering Program. You will be required to provide your full name, date of birth, social security number, and permanent street address to assist in verifying your identity. You may also be asked to provide documents that may help to establish your identity. Until verification of your identity is made, Janus may temporarily limit additional share purchases. In addition, Janus may close an account if they are unable to verify a shareholder's identity. Please contact a Janus representative if you need additional assistance when completing your application or additional information about the Anti-Money Laundering Program.

In an effort to ensure compliance with this law, Janus' Anti-Money Laundering Program (the "Program") provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

The Funds have also adopted an identity theft policy ("Red Flag Policy") to detect, prevent, and mitigate patterns, practices, or specific activities that indicate the possible existence of identity theft. The Funds are required by law to obtain certain personal information which will be used to verify your identity. The Red Flag Policy applies to the opening of Fund accounts and activity with respect to existing accounts.

EXCHANGES

Please note the following when exchanging shares:

An exchange represents the redemption (or sale) of shares from one Fund and the purchase of shares of another Fund, which may produce a taxable gain or loss in a non-retirement account.

You may generally exchange Shares of a Fund for Shares of the same class of any other fund in the Trust.

You may also exchange shares of one class for another class of shares within the same fund, provided the eligibility requirements of the class of shares to be received are met. A Fund's fees and expenses differ between share classes. Exchanging from a direct share class to one held through an intermediary typically results in increased expenses. This is because share classes distributed through intermediaries include additional fees for administration and/or distribution to pay for services provided by intermediaries. Please read the Prospectus for the share class you are interested in prior to investing in that share class.

New regular Janus fund accounts established by exchange must be opened with \$2,500 or the total account value if the value of the Janus fund account you are exchanging from is less than \$2,500. (If your Janus fund account balance does not meet the minimum investment requirements, you may be subject to an annual minimum balance fee or account closure. For more information, refer to "Minimum Investment Requirements.")

UGMA/UTMA accounts, Traditional or Roth IRAs, Simplified Employee Pension IRAs, and Coverdell Education Savings Accounts established by exchange must meet the minimum investment requirements previously described. If the value of the Janus fund account you are exchanging from is less than the stated minimum, you must exchange the entire balance. (If your Janus fund account balance does not meet the minimum investment requirements, you may be subject to an annual minimum balance fee or account closure. For more information, refer to "Minimum Investment Requirements.")

New Janus fund non-retirement accounts established by an exchange (or exchange purchases to an existing Roth IRA) resulting from a required minimum distribution from a retirement account do not have an initial minimum investment requirement. (If your Janus fund account balance does not meet the minimum investment requirements, you may be subject to an annual minimum balance fee or account closure. For more information, refer to "Minimum Investment Requirements.")

Exchanges between existing Janus fund accounts must meet the \$100 subsequent investment requirement.

For Systematic Exchanges, if no date is specified on your request, systematic exchanges will be made on the 20th of each month. You may establish this option for as little as \$100 per exchange. If the balance in the Janus fund account you are exchanging from falls below the Systematic Exchange amount, all remaining shares will be exchanged and your Systematic Exchange Program will be discontinued.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. A Fund may suspend or terminate your exchange privilege if you make more than one round trip in the Fund in a 90-day period and may bar future purchases in the Fund or any of the other Janus funds. Different restrictions may apply if you invest through an intermediary. For more information about the Funds' policy on excessive trading, refer to "Excessive Trading."

Each Fund reserves the right to reject any exchange request and to modify or terminate the exchange privilege at any time.

With certain limited exceptions, exchanges between Janus fund accounts will be accepted only if the registrations are identical. If you are exchanging into a closed Janus fund, you will need to meet criteria for investing in the closed fund. For more information, refer to Closed Fund Policies in the "Other Information" section of this Prospectus.

If the shares you are exchanging are held in certificate form, you must return the certificate to Janus prior to making any exchanges. Shares are no longer available in certificate form.

Note: For the fastest and easiest way to exchange shares, log on to janus.com/individual* 24 hours a day, 7 days a week.

* Certain account types do not allow transactions via janus.com. For more information, access janus.com/individual or refer to this Shareholder's Manual.

PAYMENT OF REDEMPTION PROCEEDS

By Electronic Transfer – Generally all accounts are automatically eligible for the electronic redemption option if bank information is provided.

Next Day Wire Transfer – Your redemption proceeds can be electronically transferred to your predesignated bank account on the next bank business day after receipt of your redemption request (wire transfer). You may be charged a fee for each wire transfer, and your bank may charge an additional fee to receive the wire.

ACH (Automated Clearing House) Transfer – Your redemption proceeds can be electronically transferred to your predesignated bank account on or about the second bank business day after receipt of your redemption request. There is no fee associated with this type of electronic transfer.

By Check – Redemption proceeds will be sent to the shareholder(s) of record at the address of record normally within seven days after receipt of a valid redemption request. During the 10 days following an address change, requests for redemption checks to be sent to a new address require a signature guarantee.

By Systematic Redemption – If no date is specified on your request, systematic redemptions will be made on or about the 24th of each month. If the balance in the Janus fund account you are selling from falls to zero, your Systematic Redemption Program will be discontinued.

Generally, orders to sell Shares may be initiated at any time at janus.com/individual, by telephone, or in writing. Certain tax-deferred accounts may require a written request. If the Shares being sold were purchased by check or automated investment, the Funds can delay the payment of your redemption proceeds for up to 15 days from the day of purchase to allow the purchase to clear. In addition, there may be a delay in the payment of your redemption proceeds if you request a redemption by electronic transfer and your bank information is new. Unless you provide alternate instructions, your proceeds will be invested in Shares of Janus Money Market Fund during the 15-day hold period.

Each Fund reserves the right to postpone payment of redemption proceeds for up to seven calendar days. Additionally, the right to require the Funds to redeem their Shares may be suspended, or the date of payment may be postponed beyond seven calendar days, whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable.

Note: For the fastest and easiest way to redeem shares, log on to janus.com/individual* 24 hours a day, 7 days a week.

* Certain account types do not allow transactions via janus.com. For more information, access janus.com/individual or refer to this Shareholder's Manual.

Large Shareholder Redemptions

Certain accounts or Janus affiliates may from time to time own (beneficially or of record) or control a significant percentage of a Fund's Shares. Redemptions by these accounts of their holdings in a Fund may impact the Fund's liquidity and NAV. These redemptions may also force a Fund to sell securities, which may negatively impact the Fund's brokerage costs.

Redemptions In-Kind

Shares normally will be redeemed for cash, although each Fund retains the right to redeem some or all of its shares in-kind under unusual circumstances, in order to protect the interests of remaining shareholders, to accommodate a request by a particular shareholder that does not adversely affect the interests of the remaining shareholders, or in connection with the liquidation of a fund, by delivery of securities selected from its assets at its discretion. However, each Fund is required to redeem shares solely for cash up to the lesser of \$250,000 or 1% of the NAV of that Fund during any 90-day period for any one shareholder. Should redemptions by any shareholder exceed such limitation, a Fund will have the option of redeeming the excess in cash or in-kind. In-kind payment means payment will be made in portfolio securities rather than cash. If this occurs, the redeeming shareholder might incur brokerage or other transaction costs to convert the securities to cash, whereas such costs are borne by the Fund for cash redemptions.

While a Fund may pay redemptions in-kind, a Fund may instead choose to raise cash to meet redemption requests through the sale of fund securities or permissible borrowings. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and may increase brokerage costs.

WRITTEN INSTRUCTIONS

To redeem or exchange all or part of your Shares in writing, your request should be sent to one of the addresses listed under "Doing Business with Janus." Requests or documents received in a language other than English may be inadvertently delayed or returned due to an inability to accurately translate the intended instructions. Please include the following information:

- the name of the Janus fund(s) being redeemed or exchanged;
- the account number(s);
- the amount of money or number of shares being redeemed or exchanged;
- the name(s) on the account;
- the signature(s) of one or more registered account owners; and
- your daytime telephone number.

SIGNATURE GUARANTEE

A signature guarantee for each registered account owner is required if any of the following is applicable:

- You request a redemption by check above a certain dollar amount.
- You would like a check made payable to anyone other than the shareholder(s) of record.
- You would like a check mailed to an address that has been changed within 10 days of the redemption request.
- You would like a check mailed to an address other than the address of record.
- You would like your redemption proceeds sent to a bank account other than a bank account of record.

The Funds reserve the right to require a signature guarantee under other circumstances or to reject or delay a redemption on certain legal grounds.

A signature guarantee may be refused if any of the following is applicable:

- It does not appear valid or in good form.
- The transaction amount exceeds the surety bond limit of the signature guarantee.
- The guarantee stamp has been reported as stolen, missing, or counterfeit.

How to Obtain a Signature Guarantee

A signature guarantee assures that a signature is genuine. The signature guarantee protects shareholders from unauthorized account transfers. The following financial institutions may guarantee signatures: banks, savings and loan associations, trust companies, credit unions, broker-dealers, and member firms of a national securities exchange. Call your financial institution to see if they have the ability to guarantee a signature. *A signature guarantee cannot be provided by a notary public.*

If you live outside the United States, a foreign bank properly authorized to do business in your country of residence or a U.S. consulate may be able to authenticate your signature.

CLOSED FUND POLICIES - JANUS TWENTY FUND

The Fund has limited sales of its shares because Janus Capital and the Trustees believe continued sales may adversely affect the Fund's ability to achieve its investment objective. Sales to new investors have generally been discontinued and financial intermediaries may not open new accounts with the Fund or add new investors to existing omnibus accounts. Investors who meet certain criteria described below, however, may be able to purchase shares of the Fund. You may be required to demonstrate eligibility to purchase shares of the Fund before your investment is accepted. If you are a current Fund shareholder and close an existing Fund account, you will not be able to make additional investments in the Fund unless you meet one of the specified criteria. The Fund may resume sales of its shares at some future date, but they have no present intention to do so.

Investors who meet the following criteria may be able to invest in the Fund: (i) existing shareholders invested in the Fund are permitted to continue to purchase shares through their existing Fund accounts and to reinvest any dividends or capital

gains distributions in such accounts, absent highly unusual circumstances; (ii) discretionary investment advisers may continue to invest in the Fund through an existing omnibus account at a financial institution and/or intermediary on behalf of clients who are current Fund shareholders; (iii) under certain circumstances, all or a portion of the shares held in a closed Fund account may be reallocated to a different form of ownership; this may include, but is not limited to, mandatory retirement distributions, legal proceedings, estate settlements, and the gifting of Fund shares; (iv) it is expected that existing or new participants in employer-sponsored retirement plans, including employees of JCGI and any of its subsidiaries covered under the JCGI retirement plan, that currently offer the Fund as an investment option may direct contributions to the Fund through their plan, regardless of whether the participant invested in such Fund prior to its closing; (v) Janus Capital encourages its employees to own shares of the Janus funds, and as such, upon prior approval, employees of Janus Capital and its affiliates may open new accounts in the closed Fund; Trustees of the Janus funds and directors of JCGI may also open new accounts in the closed Fund; (vi) Janus “fund of funds,” which is a fund that primarily invests in other mutual funds, may invest in the Fund; and (vii) in the case of certain mergers or reorganizations, retirement plans may be able to add the closed Fund as an investment option, and sponsors of certain wrap programs with existing accounts in the Fund would be able to continue to invest in the Fund on behalf of new customers. Such mergers, reorganizations, acquisitions, or other business combination are those in which one or more companies involved in such transaction currently offers the Fund as an investment option, and any company that as a result of such transaction becomes affiliated with the company currently offering the Fund (as a parent company, subsidiary, sister company, or otherwise). Such companies may request to add the Fund as an investment option under its retirement plan. In the case of fund mergers, existing shareholders of predecessor funds may be treated as existing shareholders of a surviving closed Fund in applying closed fund policies. In addition, new accounts may be permitted in the Fund for certain plans and programs offered in connection with employer-sponsored retirement plans where the retirement plan has an existing account in the Fund or where the retirement plan was negotiating with Janus Capital (and/or certain recognized intermediary distributors) to add the closed Fund at the time Fund closure was announced. Requests for purchases into a closed Fund will be reviewed by management on an individual basis, taking into consideration whether the addition of the Fund is believed to negatively impact existing Fund shareholders.

EXCESSIVE TRADING

Excessive Trading Policies and Procedures

The Trustees have adopted policies and procedures with respect to short-term and excessive trading of Fund shares (“excessive trading”). Each Fund is intended for long-term investment purposes only, and the Funds will take reasonable steps to attempt to detect and deter short-term and excessive trading. Transactions placed in violation of the Funds’ exchange limits or excessive trading policies may be cancelled or revoked by a Fund by the next business day following receipt by the Fund. The trading history of accounts determined to be under common ownership or control within any of the Janus funds may be considered in enforcing these policies and procedures. Direct investors should be aware that the Funds are also available for purchase through third party intermediaries. As described below, the Funds may not be able to identify all instances of excessive trading or completely eliminate the possibility of excessive trading. In particular, it may be difficult to identify excessive trading in certain omnibus accounts and other accounts traded through intermediaries. By their nature, omnibus accounts, in which purchases and redemptions of the Funds’ shares by multiple investors are aggregated by the intermediary and presented to the Funds on a net basis, may effectively conceal the identity of individual investors and their transactions from the Funds and their agents. This makes the elimination of excessive trading in the accounts impractical without the assistance of the intermediary.

The Funds attempt to deter excessive trading through at least the following methods:

- exchange limitations as described under “Exchanges;”
- trade monitoring; and
- fair valuation of securities as described under “Pricing of Fund Shares.”

Generally, a purchase and redemption of Shares from the same Fund (i.e., “round trip”) within 90 calendar days may result in enforcement of a Fund’ s excessive trading policies and procedures with respect to future purchase orders, provided that each Fund reserves the right to reject any purchase request as explained above.

The Funds monitor for patterns of shareholder frequent trading and may suspend or permanently terminate the exchange privilege of any investor who makes more than one round trip in a Fund over a 90-day period, and may bar future purchases into the Fund and any of the other Janus funds by such investor. The Funds’ excessive trading policies generally do not

apply to (i) a money market fund, although money market funds at all times reserve the right to reject any purchase request (including exchange purchases) for any reason without prior notice; (ii) transactions in the Janus funds by a Janus “fund of funds,” which is a fund that primarily invests in other Janus mutual funds; and (iii) identifiable transactions by certain funds of funds and asset allocation programs to realign portfolio investments with existing target allocations.

The Funds’ Trustees may approve from time to time a redemption fee to be imposed by any Janus fund, subject to 60 days’ notice to shareholders of that fund.

Investors in other share classes who place transactions through the same financial intermediary on an omnibus basis may be deemed part of a group for the purpose of the Funds’ excessive trading policies and procedures and may be rejected in whole or in part by a Fund. The Funds, however, cannot always identify or reasonably detect excessive trading that may be facilitated by financial intermediaries or made difficult to identify through the use of omnibus accounts by those intermediaries that transmit purchase, exchange, and redemption orders to the Funds, and thus the Funds may have difficulty curtailing such activity. Transactions accepted by a financial intermediary in violation of the Funds’ excessive trading policies may be cancelled or revoked by a Fund by the next business day following receipt by that Fund.

In an attempt to detect and deter excessive trading in omnibus accounts, the Funds or their agents may require intermediaries to impose restrictions on the trading activity of accounts traded through those intermediaries. Such restrictions may include, but are not limited to, requiring that trades be placed by U.S. mail, prohibiting future purchases by investors who have recently redeemed Fund shares, requiring intermediaries to report information about customers who purchase and redeem large amounts, and similar restrictions. The Funds’ ability to impose such restrictions with respect to accounts traded through particular intermediaries may vary depending on the systems’ capabilities, applicable contractual and legal restrictions, and cooperation of those intermediaries.

Certain transactions in Fund shares, such as periodic rebalancing through intermediaries (no more frequently than every 60 days) or those which are made pursuant to systematic purchase, exchange, or redemption programs generally do not raise excessive trading concerns and normally do not require application of the Funds’ methods to detect and deter excessive trading.

Each Fund also reserves the right to reject any purchase request (including exchange purchases) by any investor or group of investors for any reason without prior notice, including, in particular, if the trading activity in the account(s) is deemed to be disruptive to a Fund. For example, a Fund may refuse a purchase order if the Fund’s portfolio managers and/or investment personnel believe they would be unable to invest the money effectively in accordance with the Fund’s investment policies or the Fund would otherwise be adversely affected due to the size of the transaction, frequency of trading, or other factors.

The Funds’ policies and procedures regarding excessive trading may be modified at any time by the Funds’ Trustees.

Excessive Trading Risks

Excessive trading may present risks to a Fund’s long-term shareholders. Excessive trading into and out of a Fund may disrupt portfolio investment strategies, may create taxable gains to remaining Fund shareholders, and may increase Fund expenses, all of which may negatively impact investment returns for all remaining shareholders, including long-term shareholders.

Funds that invest in foreign securities may be at a greater risk for excessive trading. Investors may attempt to take advantage of anticipated price movements in securities held by a fund based on events occurring after the close of a foreign market that may not be reflected in the fund’s NAV (referred to as “price arbitrage”). Such arbitrage opportunities may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as “stale pricing”). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that a Fund’s valuation of a security differs from the security’s market value, short-term arbitrage traders may dilute the NAV of a Fund, which negatively impacts long-term shareholders. Although the Funds have adopted fair valuation policies and procedures intended to reduce the Funds’ exposure to price arbitrage, stale pricing, and other potential pricing inefficiencies, under such circumstances there is potential for short-term arbitrage trades to dilute the value of Fund shares.

Although the Funds take steps to detect and deter excessive trading pursuant to the policies and procedures described in this Prospectus and approved by the Trustees, there is no assurance that these policies and procedures will be effective in limiting excessive trading in all circumstances. For example, for share classes sold through financial intermediaries, the Funds may be unable to completely eliminate the possibility of excessive trading in certain omnibus accounts and other accounts traded

through intermediaries. Omnibus accounts may effectively conceal the identity of individual investors and their transactions from the Funds and their agents. This makes the Funds' identification of excessive trading transactions in the Funds through an omnibus account difficult and makes the elimination of excessive trading in the account impractical without the assistance of the intermediary. Although the Funds encourage intermediaries to take necessary actions to detect and deter excessive trading, some intermediaries may be unable or unwilling to do so, and accordingly, the Funds cannot eliminate completely the possibility of excessive trading.

Shareholders that invest through an omnibus account should be aware that they may be subject to the policies and procedures of their financial intermediary with respect to excessive trading in the Funds.

AVAILABILITY OF PORTFOLIO HOLDINGS INFORMATION

The Mutual Fund Holdings Disclosure Policies and Procedures adopted by Janus Capital and all mutual funds managed within the Janus fund complex are designed to be in the best interests of the funds and to protect the confidentiality of the funds' portfolio holdings. The following describes policies and procedures with respect to disclosure of portfolio holdings.

Full Holdings. Each Fund is required to disclose its complete holdings in the quarterly holdings report on Form N-Q within 60 days of the end of the first and third fiscal quarters, and in the annual report and semiannual report to Fund shareholders. These reports (i) are available on the SEC's website at <http://www.sec.gov>; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) are available without charge, upon request, by calling a Janus representative at 1-800-525-0020 (toll free). Portfolio holdings, consisting of at least the names of the holdings, are generally available on a calendar quarter-end basis with a 30-day lag. Holdings are generally posted approximately two business days thereafter under each Fund's Holdings & Details tab at janus.com/allfunds.

Each Fund may provide, upon request, historical full holdings on a monthly basis for periods prior to the previous quarter-end subject to a written confidentiality agreement.

Top Holdings. Each Fund's top portfolio holdings, in order of position size and as a percentage of a Fund's total portfolio, are available monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag.

Other Information. Each Fund may occasionally provide security breakdowns (e.g., industry, sector, regional, market capitalization, and asset allocation), top performance contributors/detractors (consisting of security names in alphabetical order), and specific portfolio level performance attribution information and statistics monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag. Top performance contributors/detractors provided at calendar quarter-end may include the percentage of contribution/detraction to Fund performance.

Full portfolio holdings will remain available on the Janus websites at least until a Form N-CSR or Form N-Q is filed with the SEC for the period that includes the date as of which the website information is current. Funds disclose their short positions, if applicable, only to the extent required in regulatory reports. Janus Capital may exclude from publication on its websites all or any portion of portfolio holdings or change the time periods of disclosure as deemed necessary to protect the interests of the Janus funds. Under extraordinary circumstances, exceptions to the Mutual Fund Holdings Disclosure Policies and Procedures may be made by Janus Capital's Chief Investment Officer(s) or their delegates. Such exceptions may be made without prior notice to shareholders. A summary of the Funds' portfolio holdings disclosure policies and procedures, which includes a discussion of any exceptions, is contained in the Funds' SAI.

SHAREHOLDER SERVICES AND ACCOUNT POLICIES

Address Changes

For the easiest way to change the address on your account, visit janus.com/individual. You may also call a Janus representative or send a written request signed by one or more shareholder(s) of record. Include the name of the Janus fund(s) you hold, the account number(s), the name(s) on the account, and both the old and new addresses. Certain options may be suspended for 10 days following an address change unless a signature guarantee is provided.

Bank Account Changes

For the easiest way to change your bank account of record or add new bank account information to your account, visit janus.com/individual. You may also send a written request signed by the shareholder of record or each shareholder of record

if more than one. Please note that you may change or add bank information online at janus.com/individual for purchases only. Certain tax-deferred accounts may require a written notice and, in some instances, bank privileges may not be available. We cannot accept changes or additions to bank account redemption options online at janus.com/individual or over the telephone. If the added bank account is a joint tenant/tenants in common account, at least one name on the bank account must match one name on the Fund account. There may be a delay in the payment of your redemption proceeds if you request a redemption by electronic transfer to a new bank or bank account.

Distributions

Generally, all income dividends and capital gains distributions will automatically be reinvested in your Fund account. If you wish to change your distribution option, please visit janus.com/individual, call a Janus representative, or send a written request signed by one or more shareholder(s) of record.

If you receive Fund distributions from an open non-retirement Fund account by check, and a distribution check sent to you at your address of record has been returned to Janus and you have failed to respond to follow up mailings from Janus, upon return of the follow up mailing the distribution check will be reinvested in your open Fund account at the next calculated NAV. In addition, your non-retirement Fund account distribution checks may be reinvested in your Fund account if you do not cash them within one year of the date they were written. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Involuntary Redemptions

The Funds reserve the right to close an account if the shareholder is deemed to engage in activities which are illegal or otherwise believed to be detrimental to the Funds. This includes, but is not limited to, accounts that a Fund or its agents believe are engaged in market timing. Any time shares are redeemed in a taxable account, it is considered a taxable event. You are responsible for any tax liabilities associated with an involuntary redemption of your account.

Online and Telephone Transactions

You may initiate many transactions through janus.com/individual or by calling Janus XpressLine™. You may also contact a Janus representative. Generally all new accounts automatically receive online and telephone transaction privileges including redemption privileges. If you do not want to receive these privileges, please visit janus.com/individual or call a Janus representative. The Funds and their agents will not be responsible for any losses, costs, or expenses resulting from unauthorized transactions when reasonable procedures designed to verify the identity of the online user or caller are followed.

Your account information should be kept private, and you should immediately review any account statements that you receive from Janus. Someone other than you could act on your account if that person is able to provide the required identifying information. Contact Janus immediately about any transactions you believe to be unauthorized.

Occasionally, we experience high call volumes due to unusual market activity or other events that may make it difficult for you to reach a Janus representative by telephone. If you are unable to reach a Janus representative by telephone, please consider visiting janus.com/individual, calling Janus XpressLine™, or sending written instructions.

Registration Changes

To change the name on an account, the shares are generally transferred to a new account. In some cases, legal documentation may be required. Please visit janus.com/individual or call a Janus representative for further instructions.

Statements, Reports, and Prospectuses

We will send you quarterly confirmations of all transactions. You may elect at janus.com/edelivery to discontinue delivery of your paper statements, and instead receive them online. In addition, at janus.com/individual, the Funds will send you an immediate transaction confirmation statement after every non-systematic transaction. If you have not elected to receive online statements, your confirmation will be mailed within two days of the transaction. The Funds reserve the right to charge a fee for additional account statement requests.

The Funds produce financial reports that include a complete list of each of the Funds' portfolio holdings semiannually, and update their prospectus annually. You may elect to receive these reports and prospectus updates electronically at janus.com/edelivery. The Funds' fiscal year ends September 30.

Unless you instruct Janus otherwise by contacting a Janus representative, the Funds will mail only one report or prospectus to your address of record ("household"), even if more than one person in your household has a Fund account. This process,

known as “householding,” reduces the amount of mail you receive and helps lower Fund expenses. If you decide that you no longer want the mailing of these documents to be combined with the other members of your household, please call a Janus representative or send a written request signed by one or more shareholder(s) of record. Individual copies will be sent within thirty (30) days after the Funds receive your instructions.

Taxpayer Identification Number

On the application or other appropriate forms, you may be asked to certify that your Social Security or employer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding, or you did not certify your taxpayer identification number, the IRS requires the Funds to withhold a certain percentage (at the currently applicable rate) of any dividends paid and redemption or exchange proceeds. In addition to this backup withholding, you may be subject to a \$50 fee to reimburse the Funds for any penalty that the IRS may impose.

Temporary Suspension of Services

The Funds or their agents may, in case of emergency, temporarily suspend telephone transactions and other shareholder services. As previously noted, the Funds may postpone payment of redemption proceeds for up to seven calendar days. In addition, the right to require the Funds to redeem their Shares may be suspended or the date of payment may be postponed beyond seven calendar days whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable. The exchange privilege may also be suspended in these circumstances.

Financial highlights

The financial highlights tables are intended to help you understand the Funds' financial performance for each fiscal period shown. Items "Net asset value, beginning of period" through "Net asset value, end of period" reflect financial results for a single Fund Share. The gross expense ratio reflects expenses prior to any expense offset arrangement and waivers (reimbursements), if applicable. The net expense ratio reflects expenses after any expense offset arrangement and waivers (reimbursements), if applicable. The information for the fiscal periods shown has been audited by PricewaterhouseCoopers LLP, whose report, along with the Funds' financial statements, is included in the Annual Report, which is available upon request, and incorporated by reference into the SAI.

The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in Class D Shares of the Funds (assuming reinvestment of all dividends and distributions).

Class D Shares of the Funds commenced operations on February 16, 2010, after the restructuring of the Funds' Class J Shares, the predecessor share class. The financial highlights shown for periods prior to February 16, 2010 reflect financial results for the Class J Shares of each respective Fund. If Class D Shares had been available, the financial results shown may have been different.

Janus Balanced Fund - Class D

Portfolio turnover rate	12%	56%	35% (2)	32%	42%	20%

† The financial highlights shown reflect financial results for Class J Shares, the predecessor share class, and are provided as supplemental information.

(1) Period February 16, 2010 (commencement of Class D Shares) through September 30, 2010. The Fund changed its fiscal year end to September 30.

(2) Not annualized for periods of less than one full year.

(3) From time to time the Fund may receive proceeds from litigation settlements, without which performance would be lower. Total return reflects a non-recurring litigation settlement against Enron Corp. This resulted in an increase to the total return of 0.29%.

(4) Annualized for periods of less than one full year.

(5) The expense ratio includes any applicable dividends and interest on short positions and may include stock loan fees. The ratio would be 0.86% in 2007, without the inclusion of any applicable dividends and interest on short positions and any stock loan fees.

(6) As a result of the recharacterization of dividend income to return of capital, the ratio of net investment income/(loss) to average net assets has been reduced by 0.09%. The adjustment had no impact on total net assets or total return.

† The financial highlights shown reflect financial results for Class J Shares, the predecessor share class, and are provided as supplemental information.

(1) Period February 16, 2010 (commencement of Class D Shares) through September 30, 2010. The Fund changed its fiscal year end to September 30.

(2) Return of capital aggregated less than \$0.01 on a per share basis.

(3) Not annualized for periods of less than one full year.

(4) Annualized for periods of less than one full year.

The expense ratio includes any applicable dividends and interest on short positions and may include stock loan fees. The ratio would be 0.84% in 2011, 0.85% in 2010, 0.91% in 2009, and 0.89% in 2008, without the inclusion of any applicable dividends and interest on short positions and any stock loan fees.

Glossary of investment terms

This glossary provides a more detailed description of some of the types of securities, investment strategies, and other instruments in which the Funds may invest, as well as some general investment terms. The Funds may invest in these instruments to the extent permitted by their investment objectives and policies. The Funds are not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in this Prospectus.

EQUITY AND DEBT SECURITIES

Average-Weighted Effective Maturity is a measure of a bond's maturity. The stated maturity of a bond is the date when the issuer must repay the bond's entire principal value to an investor. Some types of bonds may also have an "effective maturity" that is shorter than the stated date due to prepayment or call provisions. Securities without prepayment or call provisions generally have an effective maturity equal to their stated maturity. Average-weighted effective maturity is calculated by averaging the effective maturity of bonds held by a Fund with each effective maturity "weighted" according to the percentage of net assets that it represents.

Bank loans include institutionally-traded floating and fixed-rate debt securities generally acquired as a participation interest in or assignment of a loan originated by a lender or financial institution. Assignments and participations involve credit, interest rate, and liquidity risk. Interest rates on floating rate securities adjust with interest rate changes and/or issuer credit quality. If a Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, a Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. A Fund may have difficulty trading assignments and participations to third parties or selling such securities in secondary markets, which in turn may affect the Fund's NAV.

Bonds are debt securities issued by a company, municipality, government, or government agency. The issuer of a bond is required to pay the holder the amount of the loan (or par value of the bond) at a specified maturity and to make scheduled interest payments.

Certificates of Participation ("COPs") are certificates representing an interest in a pool of securities. Holders are entitled to a proportionate interest in the underlying securities. Municipal lease obligations are often sold in the form of COPs. Refer to "Municipal lease obligations" below.

Commercial paper is a short-term debt obligation with a maturity ranging from 1 to 270 days issued by banks, corporations, and other borrowers to investors seeking to invest idle cash. A Fund may purchase commercial paper issued in private placements under Section 4(2) of the Securities Act of 1933, as amended (the "1933 Act").

Common stocks are equity securities representing shares of ownership in a company and usually carry voting rights and earn dividends. Unlike preferred stock, dividends on common stock are not fixed but are declared at the discretion of the issuer's board of directors.

Convertible securities are preferred stocks or bonds that pay a fixed dividend or interest payment and are convertible into common stock at a specified price or conversion ratio.

Debt securities are securities representing money borrowed that must be repaid at a later date. Such securities have specific maturities and usually a specific rate of interest or an original purchase discount.

Depository receipts are receipts for shares of a foreign-based corporation that entitle the holder to dividends and capital gains on the underlying security. Receipts include those issued by domestic banks (American Depositary Receipts), foreign banks (Global or European Depositary Receipts), and broker-dealers (depository shares).

Duration is the time it will take investors to recoup their investment in a bond. Unlike average maturity, duration reflects both principal and interest payments. Generally, the higher the coupon rate on a bond, the lower its duration will be. The duration of a bond portfolio is calculated by averaging the duration of bonds held by a Fund with each duration "weighted" according to the percentage of net assets that it represents. Because duration accounts for interest payments, a Fund's duration is usually shorter than its average maturity.

Equity securities generally include domestic and foreign common stocks; preferred stocks; securities convertible into common stocks or preferred stocks; warrants to purchase common or preferred stocks; and other securities with equity characteristics.

Exchange-traded funds (“ETFs”) are index-based investment companies which hold substantially all of their assets in securities with equity characteristics. As a shareholder of another investment company, a Fund would bear its pro rata portion of the other investment company’s expenses, including advisory fees, in addition to the expenses the Fund bears directly in connection with its own operations.

Fixed-income securities are securities that pay a specified rate of return. The term generally includes short- and long-term government, corporate, and municipal obligations that pay a specified rate of interest, dividends, or coupons for a specified period of time. Coupon and dividend rates may be fixed for the life of the issue or, in the case of adjustable and floating rate securities, for a shorter period.

High-yield/high-risk bonds are bonds that are rated below investment grade by the primary rating agencies (i.e., BB+ or lower by Standard & Poor’s and Fitch, or Ba or lower by Moody’s). Other terms commonly used to describe such bonds include “lower rated bonds,” “non-investment grade bonds,” and “junk bonds.”

Industrial development bonds are revenue bonds that are issued by a public authority but which may be backed only by the credit and security of a private issuer and may involve greater credit risk. Refer to “Municipal securities” below.

Mortgage- and asset-backed securities are shares in a pool of mortgages or other debt instruments. These securities are generally pass-through securities, which means that principal and interest payments on the underlying securities (less servicing fees) are passed through to shareholders on a pro rata basis. These securities involve prepayment risk, which is the risk that the underlying mortgages or other debt may be refinanced or paid off prior to their maturities during periods of declining interest rates. In that case, a Fund may have to reinvest the proceeds from the securities at a lower rate. Potential market gains on a security subject to prepayment risk may be more limited than potential market gains on a comparable security that is not subject to prepayment risk.

Mortgage dollar rolls are transactions in which a Fund sells a mortgage-related security, such as a security issued by Government National Mortgage Association, to a dealer and simultaneously agrees to purchase a similar security (but not the same security) in the future at a predetermined price. A “dollar roll” can be viewed as a collateralized borrowing in which a Fund pledges a mortgage-related security to a dealer to obtain cash.

Municipal lease obligations are revenue bonds backed by leases or installment purchase contracts for property or equipment. Lease obligations may not be backed by the issuing municipality’s credit and may involve risks not normally associated with general obligation bonds and other revenue bonds. For example, their interest may become taxable if the lease is assigned and the holders may incur losses if the issuer does not appropriate funds for the lease payments on an annual basis, which may result in termination of the lease and possible default.

Municipal securities are bonds or notes issued by a U.S. state or political subdivision. A municipal security may be a general obligation backed by the full faith and credit (i.e., the borrowing and taxing power) of a municipality or a revenue obligation paid out of the revenues of a designated project, facility, or revenue source.

Pass-through securities are shares or certificates of interest in a pool of debt obligations that have been repackaged by an intermediary, such as a bank or broker-dealer.

Passive foreign investment companies (“PFICs”) are any foreign corporations which generate certain amounts of passive income or hold certain amounts of assets for the production of passive income. Passive income includes dividends, interest, royalties, rents, and annuities. To avoid taxes and interest that a Fund must pay if these investments are profitable, the Fund may make various elections permitted by the tax laws. These elections could require that a Fund recognize taxable income, which in turn must be distributed, before the securities are sold and before cash is received to pay the distributions.

Pay-in-kind bonds are debt securities that normally give the issuer an option to pay cash at a coupon payment date or give the holder of the security a similar bond with the same coupon rate and a face value equal to the amount of the coupon payment that would have been made.

Preferred stocks are equity securities that generally pay dividends at a specified rate and have preference over common stock in the payment of dividends and liquidation. Preferred stock generally does not carry voting rights.

Real estate investment trust (“REIT”) is an investment trust that operates through the pooled capital of many investors who buy its shares. Investments are in direct ownership of either income property or mortgage loans.

Rule 144A securities are securities that are not registered for sale to the general public under the 1933 Act, but that may be resold to certain institutional investors.

Standby commitment is a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred, or assigned only with the underlying security or securities. A standby commitment entitles the holder to receive same day settlement, and will be considered to be from the party to whom the investment company will look for payment of the exercise price.

Step coupon bonds are high-quality issues with above-market interest rates and a coupon that increases over the life of the bond. They may pay monthly, semiannual, or annual interest payments. On the date of each coupon payment, the issuer decides whether to call the bond at par, or whether to extend it until the next payment date at the new coupon rate.

Strip bonds are debt securities that are stripped of their interest (usually by a financial intermediary) after the securities are issued. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities of comparable maturity.

Tender option bonds are relatively long-term bonds that are coupled with the option to tender the securities to a bank, broker-dealer, or other financial institution at periodic intervals and receive the face value of the bond. This investment structure is commonly used as a means of enhancing a security’s liquidity.

U.S. Government securities include direct obligations of the U.S. Government that are supported by its full faith and credit. Treasury bills have initial maturities of less than one year, Treasury notes have initial maturities of one to ten years, and Treasury bonds may be issued with any maturity but generally have maturities of at least ten years. U.S. Government securities also include indirect obligations of the U.S. Government that are issued by federal agencies and government sponsored entities. Unlike Treasury securities, agency securities generally are not backed by the full faith and credit of the U.S. Government. Some agency securities are supported by the right of the issuer to borrow from the Treasury, others are supported by the discretionary authority of the U.S. Government to purchase the agency’s obligations, and others are supported only by the credit of the sponsoring agency.

Variable and floating rate securities have variable or floating rates of interest and, under certain limited circumstances, may have varying principal amounts. Variable and floating rate securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to some interest rate index or market interest rate (the “underlying index”). The floating rate tends to decrease the security’s price sensitivity to changes in interest rates.

Warrants are securities, typically issued with preferred stock or bonds, which give the holder the right to buy a proportionate amount of common stock at a specified price. The specified price is usually higher than the market price at the time of issuance of the warrant. The right may last for a period of years or indefinitely.

Zero coupon bonds are debt securities that do not pay regular interest at regular intervals, but are issued at a discount from face value. The discount approximates the total amount of interest the security will accrue from the date of issuance to maturity. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities.

FUTURES, OPTIONS, AND OTHER DERIVATIVES

Credit default swaps are a specific kind of counterparty agreement that allows the transfer of third party credit risk from one party to the other. One party in the swap is a lender and faces credit risk from a third party, and the counterparty in the credit default swap agrees to insure this risk in exchange for regular periodic payments.

Derivatives are financial instruments whose performance is derived from the performance of another asset (stock, bond, commodity, currency, interest rate or market index). Types of derivatives can include, but are not limited to options, forward contracts, swaps, and futures contracts.

Equity-linked structured notes are derivative securities which are specially designed to combine the characteristics of one or more underlying securities and their equity derivatives in a single note form. The return and/or yield or income component

may be based on the performance of the underlying equity securities, an equity index, and/or option positions. Equity-linked structured notes are typically offered in limited transactions by financial institutions in either registered or non-registered form. An investment in equity-linked notes creates exposure to the credit risk of the issuing financial institution, as well as to the market risk of the underlying securities. There is no guaranteed return of principal with these securities, and the appreciation potential of these securities may be limited by a maximum payment or call right. In certain cases, equity-linked notes may be more volatile and less liquid than less complex securities or other types of fixed-income securities. Such securities may exhibit price behavior that does not correlate with other fixed-income securities.

Equity swaps involve the exchange by two parties of future cash flow (e.g., one cash flow based on a referenced interest rate and the other based on the performance of stock or a stock index).

Forward contracts are contracts to purchase or sell a specified amount of a financial instrument for an agreed upon price at a specified time. Forward contracts are not currently exchange-traded and are typically negotiated on an individual basis. A Fund may enter into forward currency contracts for investment purposes or to hedge against declines in the value of securities denominated in, or whose value is tied to, a currency other than the U.S. dollar or to reduce the impact of currency appreciation on purchases of such securities. It may also enter into forward contracts to purchase or sell securities or other financial indices.

Futures contracts are contracts that obligate the buyer to receive and the seller to deliver an instrument or money at a specified price on a specified date. A Fund may buy and sell futures contracts on foreign currencies, securities, and financial indices including indices of U.S. Government, foreign government, equity, or fixed-income securities. A Fund may also buy options on futures contracts. An option on a futures contract gives the buyer the right, but not the obligation, to buy or sell a futures contract at a specified price on or before a specified date. Futures contracts and options on futures are standardized and traded on designated exchanges.

Indexed/structured securities are typically short- to intermediate-term debt securities whose value at maturity or interest rate is linked to currencies, interest rates, equity securities, indices, commodity prices, or other financial indicators. Such securities may be positively or negatively indexed (e.g., their value may increase or decrease if the reference index or instrument appreciates). Indexed/structured securities may have return characteristics similar to direct investments in the underlying instruments and may be more volatile than the underlying instruments. A Fund bears the market risk of an investment in the underlying instruments, as well as the credit risk of the issuer.

Interest rate swaps involve the exchange by two parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments).

Inverse floaters are debt instruments whose interest rate bears an inverse relationship to the interest rate on another instrument or index. For example, upon reset, the interest rate payable on the inverse floater may go down when the underlying index has risen. Certain inverse floaters may have an interest rate reset mechanism that multiplies the effects of change in the underlying index. Such mechanism may increase the volatility of the security's market value.

Options are the right, but not the obligation, to buy or sell a specified amount of securities or other assets on or before a fixed date at a predetermined price. A Fund may purchase and write put and call options on securities, securities indices, and foreign currencies. A Fund may purchase or write such options individually or in combination.

Participatory notes are derivative securities which are linked to the performance of an underlying Indian security and which allow investors to gain market exposure to Indian securities without trading directly in the local Indian market.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period.

OTHER INVESTMENTS, STRATEGIES, AND/OR TECHNIQUES

Cash sweep program is an arrangement in which a Fund's uninvested cash balance is used to purchase shares of affiliated or non-affiliated money market funds or cash management pooled investment vehicles at the end of each day.

Diversification is a classification given to a fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Funds are classified as either "diversified" or "nondiversified." To be classified as "diversified" under the 1940 Act, a fund

may not, with respect to 75% of its total assets, invest more than 5% of its total assets in any issuer and may not own more than 10% of the outstanding voting securities of an issuer. A fund that is classified as “nondiversified” under the 1940 Act, on the other hand, has the flexibility to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified.

Industry concentration for purposes under the 1940 Act is the investment of 25% or more of a Fund’ s total assets in an industry or group of industries.

Leverage is when a Fund increases its assets available for investment using borrowings or similar transactions. Because short sales involve borrowing securities and then selling them, a Fund’ s short sales effectively leverage the Fund’ s assets. The use of leverage may make any change in a Fund’ s NAV even greater and thus result in increased volatility of returns. A Fund’ s assets that are used as collateral to secure the short sales may decrease in value while the short positions are outstanding, which may force the Fund to use its other assets to increase the collateral. Leverage also creates interest expense that may lower a Fund’ s overall returns.

Market capitalization is the most commonly used measure of the size and value of a company. It is computed by multiplying the current market price of a share of the company’ s stock by the total number of its shares outstanding. Market capitalization is an important investment criterion for certain funds, while others do not emphasize investments in companies of any particular size.

Net long is a term used to describe when a Fund’ s assets committed to long positions exceed those committed to short positions.

Repurchase agreements involve the purchase of a security by a Fund and a simultaneous agreement by the seller (generally a bank or dealer) to repurchase the security from the Fund at a specified date or upon demand. This technique offers a method of earning income on idle cash. These securities involve the risk that the seller will fail to repurchase the security, as agreed. In that case, a Fund will bear the risk of market value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security.

Reverse repurchase agreements involve the sale of a security by a Fund to another party (generally a bank or dealer) in return for cash and an agreement by the Fund to buy the security back at a specified price and time. This technique will be used primarily to provide cash to satisfy unusually high redemption requests, or for other temporary or emergency purposes.

Short sales in which a Fund may engage may be either “short sales against the box” or other short sales. Short sales against the box involve selling short a security that a Fund owns, or the Fund has the right to obtain the amount of the security sold short at a specified date in the future. A Fund may also enter into a short sale to hedge against anticipated declines in the market price of a security or to reduce portfolio volatility. If the value of a security sold short increases prior to the scheduled delivery date, the Fund loses the opportunity to participate in the gain. For short sales, the Fund will incur a loss if the value of a security increases during this period because it will be paying more for the security than it has received from the purchaser in the short sale. If the price declines during this period, a Fund will realize a short-term capital gain. Although a Fund’ s potential for gain as a result of a short sale is limited to the price at which it sold the security short less the cost of borrowing the security, its potential for loss is theoretically unlimited because there is no limit to the cost of replacing the borrowed security.

When-issued, delayed delivery, and forward commitment transactions generally involve the purchase of a security with payment and delivery at some time in the future – i.e., beyond normal settlement. A Fund does not earn interest on such securities until settlement and bears the risk of market value fluctuations in between the purchase and settlement dates. New issues of stocks and bonds, private placements, and U.S. Government securities may be sold in this manner.

Janus Investment Fund

Prospectus

† The Fund is closed to new investors. Refer to the “Shareholder’s Guide” section of this Prospectus for more detail.

The Securities and Exchange Commission has not approved or disapproved of these securities or passed on the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

JANUS

This Prospectus describes Janus Twenty Fund (the “Fund”), a portfolio of Janus Investment Fund (the “Trust”). Janus Capital Management LLC (“Janus Capital” or “Janus”) serves as investment adviser to the Fund.

The Fund currently offers one or more classes of shares. Only Class T Shares (the “Shares”) are offered by this Prospectus. The Shares are not offered directly to individual investors. For additional information about Class T Shares and whether or not you are eligible to purchase the Shares, please refer to the Shareholder’s Guide section of the Prospectus.

Fund summary

Janus Twenty Fund

(closed to new investors)

Ticker: JAVLX Class T Shares

INVESTMENT OBJECTIVE

Janus Twenty Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class T
Management Fees (may adjust up or down)	0.52%
Other Expenses	0.29%
Total Annual Fund Operating Expenses	0.81%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class T Shares	\$ 83	\$ 259	\$ 450	\$ 1,002

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 12% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally investing primarily in a core group of 20-30 common stocks selected for their growth potential. The Fund may also invest in foreign equity and debt securities, which may include investments in emerging markets.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio manager’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended. This gives the Fund’s portfolio manager more flexibility to hold larger positions in a smaller number of securities. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund’s net asset value and total return.

Foreign Exposure Risk. The Fund may have significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it would in a more geographically diversified portfolio. The Fund’s investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative’s original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund’s performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund’s inception. The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund’s average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund’s past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class T Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
25.31%	23.89%	9.42%	12.30%	35.94%	-41.97%	43.27%	6.97%	-8.19%	22.31%
Best Quarter: First Quarter 2012 20.06% Worst Quarter: Third Quarter 2008 -26.00%									

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (4/30/85)
Class T Shares				
Return Before Taxes	22.31%	-0.03%	9.98%	11.59%
Return After Taxes on Distributions	22.19%	-0.52%	9.69%	10.08%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	14.67%	-0.10%	8.87%	9.71%
Russell 1000® Growth Index (reflects no deduction for expenses, fees, or taxes)	15.26%	3.12%	7.52%	9.76%
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	10.36%

⁽¹⁾ If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Russell 1000® Growth Index measures the performance of those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Ron Sachs, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since January 2008.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

The minimum investment for Class T Shares is \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange

in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Additional information about the Fund

FEES AND EXPENSES

Please refer to the following important information when reviewing the “Fees and Expenses of the Fund” table in the Fund Summary of the Prospectus. The fees and expenses shown were determined based on net assets as of the fiscal year ended September 30, 2012.

“Annual Fund Operating Expenses” are paid out of the Fund’s assets and include fees for portfolio management and administrative services, including recordkeeping, subaccounting, and other shareholder services. You do not pay these fees directly but, as the Example in the Fund Summary shows, these costs are borne indirectly by all shareholders.

The “Management Fee” is the investment advisory fee rate paid by the Fund to Janus Capital. Janus Twenty Fund pays an investment advisory fee rate that adjusts up or down by a variable of up to 0.15% (assuming constant assets) on a monthly basis based upon the Fund’s performance relative to its benchmark index during a measurement period. This fee rate, prior to any performance adjustment, is 0.64%. Any such adjustment to this base fee rate commenced January 2012 and may increase or decrease the Management Fee. Refer to “Management Expenses” in this Prospectus for additional information with further description in the Statement of Additional Information (“SAI”).

“Other Expenses”

include an administrative services fee of 0.25% of the average daily net assets of Class T Shares to compensate Janus Services LLC (“Janus Services”), the Fund’s transfer agent, for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Fund. may include acquired fund fees and expenses, which are indirect expenses the Fund may incur as a result of investing in shares of an underlying fund. “Acquired Fund” refers to any underlying fund (including, but not limited to, exchange-traded funds) in which a fund invests or has invested during the period. To the extent that the Fund invests in Acquired Funds, the Fund’s “Total Annual Fund Operating Expenses” may not correlate to the “ratio of gross expenses to average net assets” presented in the Financial Highlights table because that ratio includes only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. Such amounts are less than 0.01%. may include reimbursement to Janus Capital of its out-of-pocket costs for services as administrator and to Janus Services of its out-of-pocket costs for serving as transfer agent and providing, or arranging by others the provision of, servicing to shareholders.

All expenses in the Fund’s “Fees and Expenses of the Fund” table are shown without the effect of expense offset arrangements. Pursuant to such arrangements, credits realized as a result of uninvested cash balances are used to reduce custodian and transfer agent expenses.

ADDITIONAL INVESTMENT STRATEGIES AND GENERAL PORTFOLIO POLICIES

The Fund’s Board of Trustees (“Trustees”) may change the Fund’s investment objective or non-fundamental principal investment strategies without a shareholder vote. The Fund will notify you in writing at least 60 days before making any such change it considers material. If there is a material change to the Fund’s objective or principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that the Fund will achieve its investment objective.

Unless otherwise stated, the following additional investment strategies and general policies apply to the Fund and provide further information including, but not limited to, the types of securities the Fund may invest in when implementing its investment objective. Some of these strategies and policies may be part of a principal strategy. Other strategies and policies may be utilized to a lesser extent. Except for the Fund’s policies with respect to investments in illiquid securities and borrowing, the percentage limitations included in these policies and elsewhere in this Prospectus and/or the SAI normally apply only at the time of purchase of a security. So, for example, if the Fund exceeds a limit as a result of market fluctuations or the sale of other securities, it will not be required to dispose of any securities.

Cash Position

The Fund may not always stay fully invested. For example, when the portfolio manager believes that market conditions are unfavorable for investing, or when he is otherwise unable to locate attractive investment opportunities, the Fund’s cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after the Fund has committed available assets to desirable investment opportunities. When the Fund’s

investments in cash or similar investments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested. To the extent the Fund invests its uninvested cash through a sweep program (meaning its uninvested cash is pooled with uninvested cash of other funds and invested in certain securities such as repurchase agreements), it is subject to the risks of the account or fund into which it is investing, including liquidity issues that may delay the Fund from accessing its cash.

In addition, the Fund may temporarily increase its cash position under certain unusual circumstances, such as to protect its assets or maintain liquidity in certain circumstances to meet unusually large redemptions. The Fund's cash position may also increase temporarily due to unusually large cash inflows. Under unusual circumstances such as these, the Fund may invest up to 100% of its assets in cash or similar investments. In this case, the Fund may take positions that are inconsistent with its investment objective. As a result, the Fund may not achieve its investment objective.

Common Stock

Unless its investment objective or policies prescribe otherwise, the Fund may invest substantially all of its assets in common stocks. The portfolio manager generally takes a "bottom up" approach to selecting companies in which to invest. This means that he seeks to identify individual companies with earnings growth potential that may not be recognized by the market at large. The portfolio manager makes this assessment by looking at companies one at a time, regardless of size, country of organization, place of principal business activity, or other similar selection criteria. The portfolio manager may sell a holding if, among other things, the security reaches the portfolio manager's price target, if the company has a deterioration of fundamentals such as failing to meet key operating benchmarks, or if the portfolio manager finds a better investment opportunity. The portfolio manager may also sell a Fund holding to meet redemptions.

Counterparties

Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to the Fund ("counterparty risk"). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to the Fund. The Fund may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. The Fund may be exposed to counterparty risk through participation in various programs including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Fund's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures, and options. The Fund intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that the Fund focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

Emerging Markets

Within the parameters of its specific investment policies, the Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets Indexsm.

Foreign Securities

The portfolio manager seeks investments that meet the selection criteria, regardless of where an issuer or company is located. Foreign securities are generally selected on a security-by-security basis without regard to any predetermined allocation among countries or geographic regions. However, certain factors, such as expected levels of inflation, government policies influencing business conditions, the outlook for currency relationships, and prospects for economic growth among countries, regions, or geographic areas, may warrant greater consideration in selecting foreign securities. There are no limitations on the countries in which the Fund may invest, and the Fund may at times have significant foreign exposure, including exposure to emerging markets.

High-Yield/High-Risk Bonds

A high-yield/high-risk bond (also called a "junk" bond) is a bond rated below investment grade by major rating agencies (i.e., BB+ or lower by Standard & Poor's Ratings Services ("Standard & Poor's") and Fitch, Inc. ("Fitch"), or Ba or lower by Moody's Investors Service, Inc. ("Moody's")) or is an unrated bond of similar quality. It presents greater risk of default (the failure to make timely interest and principal payments) than higher quality bonds. To the extent the Fund invests in high-yield/high-

risk bonds, under normal circumstances, the Fund will limit its investments in high-yield/high-risk bonds to 35% or less of its net assets.

Illiquid Investments

Although the Fund intends to invest in liquid securities, it may invest up to 15% of its net assets in illiquid investments. An illiquid investment is a security or other position that cannot be disposed of quickly in the normal course of business. For example, some securities are not registered under U.S. securities laws and cannot be sold to the U.S. public because of Securities and Exchange Commission regulations (these are known as “restricted securities”). Under procedures adopted by the Fund’s Trustees, certain restricted securities that are determined to be liquid will not be counted toward this 15% limit.

Nondiversification

Diversification is a way to reduce risk by investing in a broad range of stocks or other securities. **Janus Twenty Fund** is classified as “nondiversified.” A fund that is classified as “nondiversified” has the ability to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” This gives a fund which is classified as nondiversified more flexibility to focus its investments in companies that the portfolio manager has identified as the most attractive for the investment objective and strategy of the fund. However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified. This fluctuation, if significant, may affect the performance of the fund.

Portfolio Turnover

In general, the Fund intends to purchase securities for long-term investment, although, to a limited extent, the Fund may purchase securities in anticipation of relatively short-term gains. Short-term transactions may also result from liquidity needs, securities having reached a price or yield objective, changes in interest rates or the credit standing of an issuer, or by reason of economic or other developments not foreseen at the time of the initial investment decision. The Fund may also sell one security and simultaneously purchase the same or a comparable security to take advantage of short-term differentials in bond yields or securities prices. Portfolio turnover is affected by market conditions, changes in the size of the Fund, the nature of the Fund’s investments, and the investment style of the portfolio manager. Changes are normally made in the Fund’s portfolio whenever the portfolio manager believes such changes are desirable. Portfolio turnover rates are generally not a factor in making buy and sell decisions.

Increased portfolio turnover may result in higher costs for brokerage commissions, dealer mark-ups, and other transaction costs, and may also result in taxable capital gains. Higher costs associated with increased portfolio turnover also may have a negative effect on the Fund’s performance. The “Financial Highlights” section of this Prospectus shows the Fund’s historical turnover rates.

Securities Lending

The Fund may seek to earn additional income through lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis. The Fund may lend portfolio securities on a short-term or long-term basis, in an amount equal to up to $\frac{1}{3}$ of its total assets as determined at the time of the loan origination. When the Fund lends its securities, it receives collateral (including cash collateral), at least equal to the value of securities loaned. The Fund may earn income by investing this collateral in one or more affiliated or non-affiliated cash management vehicles. It is also possible that, due to a decline in the value of a cash management vehicle, the Fund may lose money. There is also the risk that when portfolio securities are lent, the securities may not be returned on a timely basis, and the Fund may experience delays and costs in recovering the security or gaining access to the collateral provided to the Fund to collateralize the loan. If the Fund is unable to recover a security on loan, the Fund may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Fund. Janus Capital intends to manage the cash collateral in an affiliated cash management vehicle and will receive an investment advisory fee for managing such assets.

Short Sales

The Fund may engage in short sales. No more than 10% of the Fund’s net assets may be invested in short positions (through short sales of stocks, structured products, futures, swaps, and uncovered written calls). The Fund may engage in short sales “against the box” and options for hedging purposes that are not subject to this 10% limit. A short sale is generally a transaction in which the Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline. To complete the transaction, the Fund must

borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. A short sale is subject to the risk that if the price of the security sold short increases in value, the Fund will incur a loss because it will have to replace the security sold short by purchasing it at a higher price. In addition, the Fund may not always be able to close out a short position at a particular time or at an acceptable price. A lender may request, or market conditions may dictate, that the securities sold short be returned to the lender on short notice, and the Fund may have to buy the securities sold short at an unfavorable price. If this occurs at a time that other short sellers of the same security also want to close out their positions, it is more likely that the Fund will have to cover its short sale at an unfavorable price and potentially reduce or eliminate any gain, or cause a loss, as a result of the short sale. Because there is no upper limit to the price a borrowed security may reach prior to closing a short position, the Fund's losses are potentially unlimited in a short sale transaction. The Fund's gains and losses will also be decreased or increased, as the case may be, by the amount of any dividends, interest, or expenses, including transaction costs and borrowing fees, the Fund may be required to pay in connection with a short sale. Such payments may result in the Fund having higher expenses than a fund that does not engage in short sales and may negatively affect the Fund's performance.

The Fund may also enter into short positions through derivative instruments such as options contracts, futures contracts, and swap agreements which may expose the Fund to similar risks. To the extent that the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Due to certain foreign countries' restrictions, the Fund will not be able to engage in short sales in certain foreign countries where it may maintain long positions. As a result, the Fund's ability to fully implement a short selling strategy that could otherwise help the Fund pursue its investment goals may be limited. There can be no assurance that the implementation of a short sale strategy will be successful.

Special Situations

The Fund may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. For example, a special situation or turnaround may arise when, in the opinion of the portfolio manager, the securities of a particular issuer will be recognized as undervalued by the market and appreciate in value due to a specific development with respect to that issuer. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. For example, issuers undergoing significant capital changes may include companies involved in spin-offs, sales of divisions, mergers or acquisitions, companies involved in bankruptcy proceedings, or companies initiating large changes in their debt to equity ratio. Companies that are redirecting cash flows may be reducing debt, repurchasing shares, or paying dividends. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in "special situations" companies can present greater risks than investments in companies not experiencing special situations, and the Fund's performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Swap Agreements

The Fund may utilize swap agreements as a means to gain exposure to certain common stocks and/or to "hedge" or protect its portfolio from adverse movements in securities prices, the rate of inflation, or interest rates. Swap agreements are two-party contracts to exchange one set of cash flows for another. Swap agreements entail the risk that a party will default on its payment obligations to the Fund. If the other party to a swap defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If the Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund's total return. Various types of swaps such as credit default, equity, interest rate, and total return swaps are described in the "Glossary of Investment Terms."

Other Types of Investments

Unless otherwise stated within its specific investment policies, the Fund may also invest in other types of domestic and foreign securities and use other investment strategies, as described in the "Glossary of Investment Terms." These securities and strategies are not principal investment strategies of the Fund. If successful, they may benefit the Fund by earning a

return on the Fund's assets or reducing risk; however, they may not achieve the Fund's investment objective. These securities and strategies may include:

debt securities (such as bonds, notes, and debentures)

exchange-traded funds

indexed/structured securities (such as mortgage- and asset-backed securities)

various derivative transactions (which could comprise a significant percentage of a fund's portfolio) including, but not limited to, options, futures, forwards, swap agreements (such as equity, interest rate, inflation index, credit default, and total return swaps), participatory notes, structured notes, and other types of derivatives individually or in combination for hedging purposes or for nonhedging purposes such as seeking to earn income and enhance return, to protect unrealized gains, or to avoid realizing losses; such techniques may also be used to adjust currency exposure relative to a benchmark index, to gain exposure to the market pending investment of cash balances, or to meet liquidity needs

securities purchased on a when-issued, delayed delivery, or forward commitment basis

RISKS OF THE FUND

The value of your investment will vary over time, sometimes significantly, and you may lose money by investing in the Fund. To varying degrees, the Fund may invest in stocks, bonds, alternative strategy investments, and money market instruments or cash/cash equivalents. The following information is intended to help you better understand some of the risks of investing in the Fund. The impact of the following risks on the Fund may vary depending on the Fund's investments. The greater the Fund's investment in a particular security, the greater the Fund's exposure to the risks associated with that security. Before investing in the Fund, you should consider carefully the risks that you assume when investing in the Fund.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Emerging Markets Risk. Within the parameters of its specific investment policies, the Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets Indexsm. To the extent that the Fund invests a significant amount of its assets in one or more of these countries, its returns and net asset value may be affected to a large degree by events and economic conditions in such countries. The risks of foreign investing are heightened when investing in emerging markets, which may result in the price of investments in emerging markets experiencing sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. The securities markets of many of these countries may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for the Fund to obtain or to enforce a judgment against the issuers of such securities. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in

the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. The Fund may be subject to emerging markets risk to the extent that it invests in securities of issuers or companies which are not considered to be from emerging markets, but which have customers, products, or transactions associated with emerging markets. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Foreign Exposure Risks. Within the parameters of its specific investment policies, the Fund may invest in foreign debt and equity securities either indirectly (e.g., depositary receipts, depositary shares, and passive foreign investment companies) or directly in foreign markets, including emerging markets. Investments in foreign securities, including securities of foreign and emerging markets governments, may involve greater risks than investing in domestic securities because the Fund's performance may depend on factors other than the performance of a particular company. These factors include:

Currency Risk. As long as the Fund holds a foreign security, its value will be affected by the value of the local currency relative to the U.S. dollar. When the Fund sells a foreign currency denominated security, its value may be worth less in U.S. dollars even if the security increases in value in its home country. U.S. dollar-denominated securities of foreign issuers may also be affected by currency risk, as the value of these securities may also be affected by changes in the issuer's local currency.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in emerging markets which may have relatively unstable governments, immature economic structures, national policies restricting investments by foreigners, social instability, and different and/or developing legal systems. In some countries, there is the risk that the government may take over the assets or operations of a company or that the government may impose withholding and other taxes or limits on the removal of the Fund's assets from that country. In addition, the economies of emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Regulatory Risk. There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Foreign Market Risk. Foreign securities markets, particularly those of emerging market countries, may be less liquid and more volatile than domestic markets. These securities markets may trade a small number of securities, may have a limited number of issuers and a high proportion of shares, or may be held by a relatively small number of persons or institutions. Local securities markets may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of substantial holdings difficult or impossible at times. It is also possible that certain markets may require payment for securities before delivery, and delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, securities of issuers located in countries with emerging markets may have limited marketability and may be subject to more abrupt or erratic price movements which could also have a negative effect on the Fund. Such factors may hinder the Fund's ability to buy and sell emerging market securities in a timely manner, affecting the Fund's investment strategies and potentially affecting the value of the Fund.

Geographic Investment Risk. To the extent that the Fund invests a significant portion of its assets in a particular country or geographic region, the Fund will generally have more exposure to certain risks due to possible political, economic, social, or regulatory events in that country or region. Adverse developments in certain regions could also adversely affect securities of other countries whose economies appear to be unrelated and could have a negative impact on the Fund's performance.

Transaction Costs. Costs of buying, selling, and holding foreign securities, including brokerage, tax, and custody costs, may be higher than those involved in domestic transactions.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds (or “junk” bonds) are bonds rated below investment grade by the primary rating agencies such as Standard & Poor’s, Fitch, and Moody’s or are unrated bonds of similar quality. The value of lower quality bonds generally is more dependent on credit risk than investment grade bonds. Issuers of high-yield/high-risk bonds may not be as strong financially as those issuing bonds with higher credit ratings and are more vulnerable to real or perceived economic changes, political changes, or adverse developments specific to the issuer. In addition, the junk bond market can experience sudden and sharp price swings.

Please refer to the “Explanation of Rating Categories” section of the SAI for a description of bond rating categories.

Industry Risk. Industry risk is the possibility that a group of related securities will decline in price due to industry-specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react similarly to industry-specific market or economic developments. The Fund’s investments, if any, in multiple companies in a particular industry increase the Fund’s exposure to industry risk.

Management Risk. The Fund is an actively managed investment portfolio and is therefore subject to the risk that the investment strategies employed for the Fund may fail to produce the intended results. The Fund may underperform its benchmark index or other mutual funds with similar investment objectives.

Because the Fund may invest substantially all of its assets in common stocks, the main risk is the risk that the value of the stocks it holds might decrease in response to the activities of an individual company or in response to general market and/or economic conditions. If this occurs, the Fund’s share price may also decrease.

The Fund may use short sales, futures, options, swap agreements (including, but not limited to, equity, interest rate, credit default, and total return swaps), and other derivative instruments individually or in combination to “hedge” or protect its portfolio from adverse movements in securities prices and interest rates. The Fund may also use a variety of currency hedging techniques, including the use of forward currency contracts, to manage currency risk. There is no guarantee that the portfolio manager’s use of derivative investments will benefit the Fund. The Fund’s performance could be worse than if the Fund had not used such instruments. Use of such investments may instead increase risk to the Fund, rather than reduce risk.

The Fund’s performance may also be significantly affected, positively or negatively, by the portfolio manager’s use of certain types of investments, such as foreign (non-U.S.) securities, non-investment grade bonds (“junk” bonds), initial public offerings (“IPOs”), or securities of companies with relatively small market capitalizations. Note that a portfolio manager’s use of IPOs and other types of investments may have a magnified performance impact on a fund with a small asset base and the fund may not experience similar performance as its assets grow.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions, including, but not limited to, a general decline in prices on the stock markets, a general decline in real estate markets, a decline in commodities prices, or if the market favors different types of securities than the types of securities in which the Fund invests. If the value of the Fund’s portfolio decreases, the Fund’s net asset value will also decrease, which means if you sell your shares in the Fund you may lose money.

It is also important to note that events in both domestic and international equity and fixed-income markets have resulted, and may continue to result, in an unusually high degree of volatility in the markets, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. These events and the resulting market upheavals may have an adverse effect on the Fund, such as a decline in the value and liquidity of many securities held by the Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value, and an increase in Fund expenses. Because the situation is unprecedented and widespread, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Fund’s ability to achieve its investment objective. It is impossible to predict whether or for how long these conditions will continue. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

Further, the instability experienced in the financial markets has resulted in the U.S. Government and various other governmental and regulatory entities taking actions to address the financial crisis. These actions include, but are not limited to, the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) in July 2010 which is expected to dramatically change the way in which the U.S. financial system is supervised and regulated. More

specifically, the Dodd-Frank Act provides for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, over-the-counter derivatives, investment advisers, credit rating agencies, and mortgage lending, which expands federal oversight in the financial sector and may affect the investment management industry as a whole. Given the broad scope, sweeping nature, and the fact that many provisions of the Dodd-Frank Act must be implemented through future rulemaking, the ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain. As a result, there can be no assurance that these government and regulatory measures will not have an adverse effect on the value or marketability of securities held by the Fund, including potentially limiting or completely restricting the ability of the Fund to use a particular investment instrument as part of its investment strategy, increasing the costs of using these instruments, or possibly making them less effective in general. Furthermore, no assurance can be made that the U.S. Government or any U.S. regulatory entity (or other authority or regulatory entity) will not continue to take further legislative or regulatory action in response to the economic crisis or otherwise, and the effect of such actions, if taken, cannot be known.

In addition, European markets have recently experienced volatility and adverse trends due to concerns about economic downturns, rising government debt levels, and the possible default of government debt in several European countries, including Greece, Ireland, Italy, Portugal, and Spain. A default or debt restructuring by any European country would adversely impact holders of that country's debt and worldwide sellers of credit default swaps linked to that country's creditworthiness. These trends have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of all European countries, which in turn may have a material adverse effect on the Fund's investments in such countries, other countries that depend on European countries for significant amounts of trade or investment, or issuers with exposure to European debt.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended, and may hold a greater percentage of its assets in a smaller number of issuers. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund's net asset value and total return. Being nondiversified may also make the Fund more susceptible to financial, economic, political, or other developments that may impact a security. Although the Fund may satisfy the requirements for a diversified fund, the Fund's nondiversified classification gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities than a fund that is classified as diversified. The Fund's policy of concentrating its portfolio in a smaller number of holdings could result in more volatility in the Fund's performance and share price. Since Janus Twenty Fund normally invests primarily in a core portfolio of 20-30 common stocks, this risk may be increased.

Management of the Fund

INVESTMENT ADVISER

Janus Capital Management LLC, 151 Detroit Street, Denver, Colorado 80206-4805, is the investment adviser to the Fund. Janus Capital is responsible for the day-to-day management of the Fund's investment portfolio and furnishes continuous advice and recommendations concerning the Fund's investments. Janus Capital also provides certain administration and other services and is responsible for other business affairs of the Fund.

Janus Capital (together with its predecessors) has served as investment adviser to Janus mutual funds since 1970 and currently serves as investment adviser to all of the Janus funds, acts as subadviser for a number of private-label mutual funds, and provides separate account advisory services for institutional accounts and other unregistered products.

Janus Capital furnishes certain administration, compliance, and accounting services for the Fund and is reimbursed by the Fund for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Janus Capital provides office space for the Fund. Some expenses related to compensation payable to the Janus funds' Chief Compliance Officer and compliance staff are shared with the Janus funds. The Fund also pays for salaries, fees, and expenses of certain Janus Capital employees and Fund officers, with respect to certain specified administration functions they perform on behalf of the Janus funds. The Janus funds pay these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Fund.

MANAGEMENT EXPENSES

The Fund pays Janus Capital an investment advisory fee and incurs expenses, including administrative services fees payable pursuant to the Transfer Agency Agreement, any other transfer agent and custodian fees and expenses, legal and auditing fees, printing and mailing costs of sending reports and other information to existing shareholders, and Independent Trustees' fees and expenses. The Fund's investment advisory fee is calculated daily and paid monthly. The Fund's advisory agreement details the investment advisory fee and other expenses that the Fund must pay.

The table below reflects the Fund's base fee rate (expressed as an annual rate), as well as the actual investment advisory fee rate paid by the Fund to Janus Capital.

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to the cumulative investment record of its benchmark index, the Russell 1000® Growth Index, over the performance measurement period. Any adjustment to the investment advisory fee rate was effective January 2012. Until such time, only the base fee rate shown below applied. The third column shows the performance hurdle for outperformance or underperformance during the measurement period relative to the Fund's benchmark index. The fourth column shows the performance adjusted investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period. This fourth column shows the actual amount of the investment advisory fee rate paid by the Fund as of the end of the fiscal year.

As an example, if the Fund outperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would increase by 0.15% (assuming constant assets). Conversely, if the Fund underperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would decrease by 0.15% (assuming constant assets). Actual performance within the full range of the performance hurdle rate may result in positive or negative incremental adjustments to the advisory fee of greater or less than 0.15%. Additional details discussing the performance fee are included below with further description in the SAI.

Fund Name	Base Fee Rate (%)	Performance Hurdle vs. Benchmark Index	Performance Adjusted/Actual Investment Advisory Fee Rate (%) (for the fiscal year ended September 30, 2012)
Janus Twenty Fund	0.64	±8.50%	0.52 ⁽¹⁾

(1) Any applicable performance adjustment began January 1, 2012; until such time, the base fee rate shown applied.

The Fund's investment advisory fee rate is determined by calculating a base fee (shown in the previous table) and applying a performance adjustment (described in further detail below). The performance adjustment either increases or decreases the base fee depending on how well the Fund has performed relative to the Russell 1000® Growth Index.

The calculation of the performance adjustment applies as follows:

Investment Advisory Fee = Base Fee Rate +/- Performance Adjustment

The investment advisory fee rate paid to Janus Capital by the Fund consists of two components: (1) a base fee calculated by applying the contractual fixed rate of the advisory fee to the Fund's average daily net assets during the previous month ("Base Fee Rate"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by applying a variable rate of up to 0.15% (positive or negative) to the Fund's average daily net assets during the applicable performance measurement period. The performance measurement period generally is the previous 36 months, although no Performance Adjustment is made until the Fund's performance-based fee structure has been in effect for at least 18 months. When the Fund's performance-based fee structure has been in effect for at least 18 months, but less than 36 months, the performance measurement period is equal to the time that has elapsed since the performance-based fee structure took effect. As noted above, any applicable Performance Adjustment began January 2012 for the Fund.

No Performance Adjustment is applied unless the difference between the Fund's investment performance and the cumulative investment record of the Fund's benchmark index is 0.50% or greater (positive or negative) during the applicable performance measurement period. The Base Fee Rate is subject to an upward or downward Performance Adjustment for every full 0.50% increment by which the Fund outperforms or underperforms its benchmark index. Because the Performance Adjustment is tied to the Fund's relative performance compared to its benchmark index (and not its absolute performance), the Performance Adjustment could increase Janus Capital's fee even if the Fund's Shares lose value during the performance measurement period and could decrease Janus Capital's fee even if the Fund's Shares increase in value during the performance measurement period. For purposes of computing the Base Fee Rate and the Performance Adjustment, net assets are averaged over different periods (average daily net assets during the previous month for the Base Fee Rate, versus average daily net assets during the performance measurement period for the Performance Adjustment). Performance of the Fund is calculated net of expenses whereas the Fund's benchmark index does not have any fees or expenses. Reinvestment of dividends and distributions is included in calculating both the performance of the Fund and the Fund's benchmark index. The Base Fee Rate is calculated and accrued daily. The Performance Adjustment is calculated monthly in arrears and is accrued throughout the month. The investment fee is paid monthly in arrears. Under extreme circumstances involving underperformance by a rapidly shrinking Fund, the dollar amount of the Performance Adjustment could be more than the dollar amount of the Base Fee Rate. In such circumstances, Janus Capital would reimburse the Fund.

The investment performance of the Fund's Class T Shares (formerly named Class J Shares) for the performance measurement period is used to calculate the Performance Adjustment. After Janus Capital determines whether Janus Twenty Fund's performance was above or below its benchmark index by comparing the investment performance of the Fund's Class T Shares against the cumulative investment record of the Fund's benchmark index, Janus Capital applies the same Performance Adjustment (positive or negative) across any other class of shares of Janus Twenty Fund, as applicable. It is not possible to predict the effect of the Performance Adjustment on future overall compensation to Janus Capital since it depends on the performance of the Fund relative to the record of the Fund's benchmark index and future changes to the size of the Fund.

A discussion regarding the basis for the Trustees' approval of the Fund's investment advisory agreement is included in the Fund's annual or semiannual report to shareholders. You can request the Fund's annual or semiannual reports (as they become available), free of charge, by contacting your plan sponsor, broker-dealer, or financial intermediary, or by contacting a Janus representative at 1-877-335-2687. The reports are also available, free of charge, at janus.com/info.

INVESTMENT PERSONNEL

Janus Twenty Fund

Ron Sachs, CFA, is Executive Vice President and Portfolio Manager of Janus Twenty Fund, which he has managed since January 2008. He is also Portfolio Manager of other Janus accounts. Mr. Sachs joined Janus Capital in 1996 as a research analyst. He holds a Bachelor's degree (cum laude) in Economics from Princeton and a Juris Doctorate from the University of Michigan. Mr. Sachs holds the Chartered Financial Analyst designation.

Information about the portfolio manager's compensation structure and other accounts managed, as well as the range of his individual ownership of securities of the specific Fund(s) he manages and the aggregate range of his individual ownership in all mutual funds advised by Janus Capital, is included in the SAI.

Conflicts of Interest

Janus Capital manages many funds and numerous other accounts, which may include separate accounts and other pooled investment vehicles, such as hedge funds. Side-by-side management of multiple accounts, including the management of a cash collateral pool for securities lending and investing the Janus funds' cash, may give rise to conflicts of interest among those accounts, and may create potential risks, such as the risk that investment activity in one account may adversely affect another account. For example, short sale activity in an account could adversely affect the market value of long positions in one or more other accounts (and vice versa). Side-by-side management may raise additional potential conflicts of interest relating to the allocation of investment opportunities and the aggregation and allocation of trades. Additionally, Janus Capital is the adviser to the Janus "funds of funds," which are funds that invest primarily in other mutual funds managed by Janus Capital. To the extent that the Fund is an underlying fund in a Janus "fund of funds," a potential conflict of interest arises when allocating the assets of the Janus "fund of funds" to the Fund. Purchases and redemptions of fund shares by a Janus "fund of funds" due to reallocations or rebalancings may result in a fund having to sell securities or invest cash when it otherwise would not do so. Such transactions could accelerate the realization of taxable income if sales of securities resulted in gains and could also increase a fund's transaction costs. Large redemptions by a Janus "fund of funds" may cause a fund's expense ratio to increase due to a resulting smaller asset base. A further discussion of potential conflicts of interest and a discussion of certain procedures intended to mitigate such potential conflicts are contained in the Fund's SAI.

Other information

CLOSED FUND POLICIES

A fund may limit sales of its Shares to new investors if Janus Capital and the Trustees believe continued sales may adversely affect the fund's ability to achieve its investment objective. If sales of a fund are limited, it is expected that existing shareholders invested in the fund would be permitted to continue to purchase Shares through their existing fund accounts and to reinvest any dividends or capital gains distributions in such accounts, absent highly unusual circumstances. Requests for new accounts into a closed fund would be reviewed by management, taking into consideration eligibility requirements and whether the addition to the fund is believed to negatively impact existing fund shareholders. The closed fund may decline opening new accounts, including eligible new accounts, if it would be in the best interests of the fund and its shareholders. Janus Twenty Fund has limited sales of its Shares. Additional information regarding general policies and exceptions can be found under Closed Fund Policies in the "Shareholder's Guide" section of this Prospectus and in the "Shares of the Trust" section of the SAI.

LIQUIDATION/REORGANIZATION OF A FUND

It is important to know that, pursuant to the Trust's Amended and Restated Agreement and Declaration of Trust and in accordance with any applicable regulations and laws, the Trustees have the authority to merge, liquidate, and/or reorganize a fund into another fund without seeking shareholder vote or consent.

DISTRIBUTION OF THE FUND

The Fund is distributed by Janus Distributors LLC ("Janus Distributors"), which is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). To obtain information about FINRA member firms and their associated persons, you may contact FINRA at www.finra.org, or 1-800-289-9999.

Distributions and taxes

DISTRIBUTIONS

To avoid taxation of the Fund, the Internal Revenue Code requires the Fund to distribute all or substantially all of its net investment income and any net capital gains realized on its investments at least annually. The Fund's income from certain dividends, interest, and any net realized short-term capital gains are paid to shareholders as ordinary income dividends. Certain dividend income may be reported to shareholders as "qualified dividend income," which is generally subject to reduced rates of taxation. Net realized long-term capital gains, if any, are paid to shareholders as capital gains distributions, regardless of how long Shares of the Fund have been held. Distributions are made at the class level, so they may vary from class to class within the Fund.

Distribution Schedule

Dividends from net investment income and distributions of capital gains are normally declared and distributed in December but, if necessary, may be distributed at other times as well. The date you receive your distribution may vary depending on how your intermediary processes trades. Please consult your intermediary for details.

How Distributions Affect the Fund's NAV

Distributions are paid to shareholders as of the record date of a distribution of the Fund, regardless of how long the shares have been held. Undistributed dividends and net capital gains are included in the Fund's daily net asset value ("NAV"). The share price of the Fund drops by the amount of the distribution, net of any subsequent market fluctuations. For example, assume that on December 31, the Fund declared a dividend in the amount of \$0.25 per share. If the Fund's share price was \$10.00 on December 30, the Fund's share price on December 31 would be \$9.75, barring market fluctuations. You should be aware that distributions from a taxable mutual fund do not increase the value of your investment and may create income tax obligations.

"Buying a Dividend"

If you purchase shares of the Fund just before a distribution, you will pay the full price for the shares and receive a portion of the purchase price back as a taxable distribution. This is referred to as "buying a dividend." In the above example, if you bought shares on December 30, you would have paid \$10.00 per share. On December 31, the Fund would pay you \$0.25 per share as a dividend and your shares would now be worth \$9.75 per share. Unless your account is set up as a tax-deferred account, dividends paid to you would be included in your gross income for tax purposes, even though you may not have participated in the increase in NAV of the Fund, whether or not you reinvested the dividends. You should consult with your financial intermediary or tax adviser as to potential tax consequences of any distributions that may be paid shortly after purchase.

For your convenience, distributions of net investment income and net capital gains are automatically reinvested in additional Shares of the Fund. To receive distributions in cash, contact your financial intermediary. Whether reinvested or paid in cash, the distributions may be subject to taxes, unless your shares are held in a qualified tax-deferred plan or account.

TAXES

As with any investment, you should consider the tax consequences of investing in the Fund. Any time you sell or exchange shares of a fund in a taxable account, it is considered a taxable event. For federal income tax purposes, an exchange is treated the same as a sale. Depending on the purchase price and the sale price, you may have a gain or loss on the transaction; whether the gain or loss is long-term or short-term depends on how long you owned the shares. Any tax liabilities generated by your transactions are your responsibility.

The following discussion does not apply to qualified tax-deferred accounts or other non-taxable entities, nor is it a complete analysis of the federal income tax implications of investing in the Fund. You should consult your tax adviser if you have any questions. Additionally, state or local taxes may apply to your investment, depending upon the laws of your state of residence.

Taxes on Distributions

Distributions by the Fund are subject to federal income tax, regardless of whether the distribution is made in cash or reinvested in additional shares of the Fund. When gains from the sale of a security held by the Fund are paid to shareholders, the rate at which the gain will be taxed to shareholders depends on the length of time the Fund held the security. In certain states, a portion of the distributions (depending on the sources of the Fund's income) may be exempt from state and local taxes. The Fund's net investment income and capital gains are distributed to (and may be taxable to)

those persons who are shareholders of the Fund at the record date of such payments. Although the Fund's total net income and net realized gain are the results of its operations, the per share amount distributed or taxable to shareholders is affected by the number of Fund shares outstanding at the record date. Generally, account tax information will be made available to shareholders on or before January 31st of each year. Information regarding distributions may also be reported to the Internal Revenue Service.

Distributions made by the Fund with respect to Shares purchased through a qualified retirement plan will generally be exempt from current taxation if left to accumulate within the qualified plan.

Generally, withdrawals from qualified plans may be subject to federal income tax at ordinary income rates and, if made before age 59½, a 10% penalty tax may be imposed. The federal income tax status of your investment depends on the features of your qualified plan. For further information, please contact your plan sponsor or tax adviser.

The Fund may be required to withhold U.S. federal income tax on all distributions and redemptions payable to shareholders who fail to provide their correct taxpayer identification number, fail to make certain required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. The current backup withholding rate is applied.

When shareholders sell Fund shares from a taxable account, they typically receive information on their tax forms that calculates their gain or loss using the average cost method. Prior to January 1, 2012, this information was not reported to the IRS, and shareholders had the option of calculating gains or losses using an alternative IRS permitted method. In accordance with legislation passed by Congress in 2008, however, your intermediary began reporting cost basis information to the IRS for shares purchased on or after January 1, 2012 and sold thereafter. Your intermediary will permit shareholders to elect their preferred cost basis method. In the absence of an election, your cost basis method will be your intermediary's default method. Please consult your tax adviser to determine the appropriate cost basis method for your particular tax situation and to learn more about how the new cost basis reporting laws apply to you and your investments.

Taxation of the Fund

Dividends, interest, and some capital gains received by the Fund on foreign securities may be subject to foreign tax withholding or other foreign taxes. If the Fund is eligible, it may from year to year make the election permitted under Section 853 of the Internal Revenue Code to pass through such taxes to shareholders as a foreign tax credit. If such an election is not made, any foreign taxes paid or accrued will represent an expense to the Fund.

Certain fund transactions may involve short sales, futures, options, swap agreements, hedged investments, and other similar transactions, and may be subject to special provisions of the Internal Revenue Code that, among other things, can potentially affect the character, amount, timing of distributions to shareholders, and utilization of capital loss carryforwards. The Fund will monitor its transactions and may make certain tax elections and use certain investment strategies where applicable in order to mitigate the effect of these tax provisions, if possible. Certain transactions or strategies utilized by the Fund may generate nonqualified income that can impact an investor's taxes.

The Fund does not expect to pay any federal income or excise taxes because it intends to meet certain requirements of the Internal Revenue Code, including the distribution each year of all its net investment income and net capital gains. It is important that the Fund meets these requirements so that any earnings on your investment will not be subject to federal income taxes twice. Funds that invest in partnerships may be subject to state tax liabilities.

Shareholder' s guide

Class T Shares are available through certain financial intermediary platforms including, but not limited to, mutual fund wrap fee programs, managed account programs, asset allocation programs, bank trust platforms, as well as certain retirement platforms. In addition, Class T Shares may be available through certain financial intermediaries who have an agreement with Janus Capital or its affiliates to offer the Shares on their supermarket platforms. Class T Shares pay up to 0.25% of net assets to financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders.

The Shares are not offered directly to individual investors. Consult with your financial intermediary representative for additional information on whether the Shares are an appropriate investment choice. In addition, for an analysis of fees associated with an investment in Shares or other similar funds, please visit www.finra.org/fundalyzer. Certain funds may not be available through certain of these intermediaries and not all financial intermediaries offer all classes of shares. **For instructions on how to purchase, exchange, or redeem Shares, contact your financial intermediary or refer to your plan documents.**

With certain limited exceptions, the Fund is available only to U.S. citizens or residents, and employees of Janus Capital or its affiliates.

PRICING OF FUND SHARES

The per share NAV for each class is computed by dividing the total value of assets allocated to the class, less liabilities allocated to that class, by the total number of outstanding shares of the class. The Fund' s NAV is calculated as of the close of the regular trading session of the New York Stock Exchange ("NYSE") (normally 4:00 p.m. New York time) each day that the NYSE is open ("business day"). However, the NAV may be calculated earlier if trading on the NYSE is restricted, or as permitted by the Securities and Exchange Commission ("SEC"). Foreign securities held by the Fund may be traded on days and at times when the NYSE is closed and the NAV is therefore not calculated. Accordingly, the value of the Fund' s holdings may change on days that are not business days in the United States and on which you will not be able to purchase or redeem the Fund' s Shares.

All purchases and redemptions will be duly processed at the NAV next calculated after your request is received in good order by the Fund or its agents. In order to receive a day' s price, your order must be received in good order by the Fund or its agents by the close of the regular trading session of the NYSE. Your financial intermediary may charge you a separate or additional fee for processing purchases and redemptions of Shares.

Securities held by the Fund are generally valued at market value. Certain short-term instruments maturing within 60 days or less are valued at amortized cost, which approximates market value. If a market quotation for a security is not readily available or is deemed unreliable, or if an event that is expected to affect the value of the security occurs after the close of the principal exchange or market on which the security is traded, and before the close of the NYSE, a fair value of the security (except for short-term instruments maturing within 60 days or less) will be determined in good faith under policies and procedures established by and under the supervision of the Fund' s Trustees. Such events include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a non-significant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a non-valued security and a restricted or non-public security. While fair value pricing may be more commonly used with foreign equity securities, it may also be used with, among other things, thinly-traded domestic securities or fixed-income securities. For valuation purposes, quotations of foreign portfolio securities, other assets and liabilities, and forward contracts stated in foreign currency are generally translated into U.S. dollar equivalents at the prevailing market rates. The Fund may use systematic fair valuation models provided by independent pricing services to value foreign equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

Due to the subjective nature of fair value pricing, the Fund' s value for a particular security may be different from the last quoted market price. Fair value pricing may reduce arbitrage activity involving the frequent buying and selling of mutual fund shares by investors seeking to take advantage of a perceived lag between a change in the value of the Fund' s portfolio securities and the reflection of such change in the Fund' s NAV, as further described in the "Excessive Trading" section of this Prospectus. While funds that invest in foreign securities may be at a greater risk for arbitrage activity, such activity may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded

securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that the Fund's valuation of a security is different from the security's market value, short-term arbitrage traders buying and/or selling shares of the Fund may dilute the NAV of the Fund, which negatively impacts long-term shareholders. The Fund's fair value pricing and excessive trading policies and procedures may not completely eliminate short-term trading in certain omnibus accounts and other accounts traded through intermediaries.

The value of the securities of other open-end funds held by the Fund, if any, will be calculated using the NAV of such open-end funds, and the prospectuses for such open-end funds explain the circumstances under which they use fair value pricing and the effects of using fair value pricing.

All purchases, exchanges, redemptions, or other account activity must be processed through your financial intermediary or plan sponsor. Your financial intermediary or plan sponsor is responsible for promptly transmitting purchase, redemption, and other requests to the Fund under the arrangements made between your financial intermediary or plan sponsor and its customers. The Fund is not responsible for the failure of any financial intermediary or plan sponsor to carry out its obligations to its customers.

ADMINISTRATIVE SERVICES FEES

Janus Services, the Trust's transfer agent, receives an administrative services fee at an annual rate of 0.25% of the average daily net assets of Class T Shares of the Fund for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Fund. Order processing includes the submission of transactions through the National Securities Clearing Corporation ("NSCC") or similar systems, or those processed on a manual basis with Janus. Other shareholder services may include the provision of order confirmations, periodic account statements, forwarding prospectuses, shareholder reports, and other materials to existing customers, and answering inquiries regarding accounts. Janus Services expects to use all or a significant portion of this fee to compensate intermediaries and retirement plan service providers for providing these services to their customers who invest in the Fund. Janus Services or its affiliates may also pay fees for services provided by intermediaries to the extent the fees charged by intermediaries exceed the 0.25% of net assets charged to the Fund.

PAYMENTS TO FINANCIAL INTERMEDIARIES BY JANUS CAPITAL OR ITS AFFILIATES

With respect to other share classes not offered in this Prospectus, Janus Capital or its affiliates may pay, from their own assets, selected brokerage firms or other financial intermediaries that sell the Janus funds for distribution, marketing, promotional, or related services. Such payments may be based on gross sales, assets under management, or transactional charges, or on a combination of these factors. The amount of these payments is determined from time to time by Janus Capital, may be substantial, and may differ for different financial intermediaries. Janus Capital and its affiliates consider a number of factors in making payments to financial intermediaries.

In addition, Janus Capital or its affiliates may also share certain marketing expenses with intermediaries, or pay for or sponsor informational meetings, seminars, client awareness events, support for marketing materials, sales reporting, or business building programs for such intermediaries to raise awareness of the Fund. Janus Capital or its affiliates may make payments to participate in intermediary marketing support programs which may provide Janus Capital or its affiliates with one or more of the following benefits: attendance at sales conferences, participation in meetings or training sessions, access to or information about intermediary personnel, use of an intermediary's marketing and communication infrastructure, fund analysis tools, business planning and strategy sessions with intermediary personnel, information on industry- or platform-specific developments, trends and service providers, and other marketing-related services. Such payments may be in addition to, or in lieu of, the payments described above. These payments are intended to promote the sales of Janus funds and to reimburse financial intermediaries, directly or indirectly, for the costs that they or their salespersons incur in connection with educational seminars, meetings, and training efforts about the Janus funds to enable the intermediaries and their salespersons to make suitable recommendations, provide useful services, and maintain the necessary infrastructure to make the Janus funds available to their customers.

The receipt of (or prospect of receiving) payments described above may provide a financial intermediary and its salespersons with an incentive to favor sales of Janus funds' shares over sales of other mutual funds (or non-mutual fund investments) or to favor sales of one class of Janus funds' shares over sales of another Janus funds' share class, with respect to which the

financial intermediary does not receive such payments or receives them in a lower amount. The receipt of these payments may cause certain financial intermediaries to elevate the prominence of the Janus funds within such financial intermediary's organization by, for example, placement on a list of preferred or recommended funds and/or the provision of preferential or enhanced opportunities to promote the Janus funds in various ways within such financial intermediary's organization.

From time to time, certain financial intermediaries approach Janus Capital to request that Janus Capital make contributions to certain charitable organizations. In these cases, Janus Capital's contribution may result in the financial intermediary, or its salespersons, recommending Janus funds over other mutual funds (or non-mutual fund investments).

The payment arrangements described above will not change the price an investor pays for Shares nor the amount that a Janus fund receives to invest on behalf of the investor. You should consider whether such arrangements exist when evaluating any recommendations from an intermediary to purchase or sell Shares of the Fund and, if applicable, when considering which share class of the Fund is most appropriate for you. Please contact your financial intermediary or plan sponsor for details on such arrangements.

PURCHASES

Purchases of Shares may be made only through financial intermediaries. Contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund, including additional information on minimum initial or subsequent investment requirements. Under certain circumstances, the Fund may permit an in-kind purchase of Shares at the discretion of Janus Capital. Your financial intermediary may charge you a separate or additional fee for processing purchases of Shares. Only certain financial intermediaries are authorized to receive purchase orders on the Fund's behalf. As discussed under "Payments to financial intermediaries by Janus Capital or its affiliates," Janus Capital and its affiliates may make payments to brokerage firms or other financial intermediaries that were instrumental in the acquisition or retention of shareholders for the Fund or that provide services in connection with investments in the Fund. You should consider such arrangements when evaluating any recommendation of the Fund.

The Fund reserves the right to reject any purchase order, including exchange purchases, for any reason. The Fund is not intended for excessive trading. For more information about the Fund's policy on excessive trading, refer to "Excessive Trading."

In compliance with the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"), your financial intermediary is required to verify certain information on your account application as part of its Anti-Money Laundering Program. You will be required to provide your full name, date of birth, social security number, and permanent street address to assist in verifying your identity. You may also be asked to provide documents that may help to establish your identity. Until verification of your identity is made, your financial intermediary may temporarily limit additional share purchases. In addition, your financial intermediary may close an account if they are unable to verify a shareholder's identity. Please contact your financial intermediary if you need additional assistance when completing your application or additional information about the intermediary's Anti-Money Laundering Program.

In an effort to ensure compliance with this law, Janus' Anti-Money Laundering Program (the "Program") provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Minimum Investment Requirements

The minimum investment for Class T Shares is \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts. Investors in a defined contribution plan through a third party administrator should refer to their plan document or contact their plan administrator for additional information. In addition, accounts held through certain wrap programs may not be subject to these minimums. Investors should refer to their intermediary for additional information.

The Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. Please note that you may incur a tax liability as a result of a redemption.

The Fund reserves the right to change the amount of these minimums from time to time or to waive them in whole or in part.

Systematic Purchase Plan

You may arrange for periodic purchases by authorizing your financial intermediary to withdraw the amount of your investment from your bank account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary for details.

EXCHANGES

Contact your financial intermediary or consult your plan documents to exchange into other funds in the Trust. Be sure to read the prospectus of the fund into which you are exchanging. An exchange from one fund to another is generally a taxable transaction (except for certain tax-deferred accounts).

You may generally exchange Shares of the Fund for Shares of the same class of any other fund in the Trust offered through your financial intermediary or qualified plan.

You may also exchange shares of one class for another class of shares within the same fund, provided the eligibility requirements of the class of shares to be received are met. Same-fund exchanges will only be processed in instances where there is no contingent deferred sales charge ("CDSC") on the shares to be exchanged and no initial sales charge on the shares to be received. The Fund's fees and expenses differ between share classes. Please read the Prospectus for the share class you are interested in prior to investing in that share class. Contact your financial intermediary or consult your plan documents for additional information.

You must meet the minimum investment amount for each fund.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. The Fund may suspend or terminate your exchange privilege if you make more than one round trip in the Fund in a 90-day period and may bar future purchases in the Fund or any of the other Janus funds. The Fund will work with intermediaries to apply the Fund's exchange limit. However, the Fund may not always have the ability to monitor or enforce the trading activity in such accounts. For more information about the Fund's policy on excessive trading, refer to "Excessive Trading."

The Fund reserves the right to reject any exchange request and to modify or terminate the exchange privilege at any time.

REDEMPTIONS

Redemptions, like purchases, may generally be effected only through financial intermediaries. Please contact your financial intermediary or refer to the appropriate plan documents for details. Your financial intermediary may charge a processing or service fee in connection with the redemption of Shares.

Shares of the Fund may be redeemed on any business day on which the Fund's NAV is calculated. Redemptions are duly processed at the NAV next calculated after your redemption order is received in good order by the Fund or its agents. Redemption proceeds will normally be sent the business day following receipt of the redemption order.

The Fund reserves the right to postpone payment of redemption proceeds for up to seven calendar days. Additionally, the right to require the Fund to redeem its Shares may be suspended, or the date of payment may be postponed beyond seven calendar days, whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable.

The Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. Please note that you may incur a tax liability as a result of a redemption.

Large Shareholder Redemptions

Certain accounts or Janus affiliates may from time to time own (beneficially or of record) or control a significant percentage of the Fund's Shares. Redemptions by these accounts of their holdings in the Fund may impact the Fund's liquidity and NAV. These redemptions may also force the Fund to sell securities, which may negatively impact the Fund's brokerage costs.

Redemptions In-Kind

Shares normally will be redeemed for cash, although the Fund retains the right to redeem some or all of its shares in-kind under unusual circumstances, in order to protect the interests of remaining shareholders, to accommodate a request by a particular shareholder that does not adversely affect the interests of the remaining shareholders, or in connection with the liquidation of a fund, by delivery of securities selected from its assets at its discretion. However, the Fund is required to redeem shares solely for cash up to the lesser of \$250,000 or 1% of the NAV of the Fund during any 90-day period for any one shareholder. Should redemptions by any shareholder exceed such limitation, the Fund will have the option of redeeming the excess in cash or in-kind. In-kind payment means payment will be made in portfolio securities rather than cash. If this occurs, the redeeming shareholder might incur brokerage or other transaction costs to convert the securities to cash, whereas such costs are borne by the Fund for cash redemptions.

While the Fund may pay redemptions in-kind, the Fund may instead choose to raise cash to meet redemption requests through the sale of fund securities or permissible borrowings. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and may increase brokerage costs.

Systematic Withdrawal Plan

You may arrange for periodic redemptions by authorizing your financial intermediary to redeem a specified amount from your account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary for details.

CLOSED FUND POLICIES - JANUS TWENTY FUND

The Fund has limited sales of its shares because Janus Capital and the Trustees believe continued sales may adversely affect the Fund's ability to achieve its investment objective. Sales to new investors have generally been discontinued and financial intermediaries may not open new accounts with the Fund or add new investors to existing omnibus accounts. Investors who meet certain criteria described below, however, may be able to purchase shares of the Fund. You may be required to demonstrate eligibility to purchase shares of the Fund before your investment is accepted. If you are a current Fund shareholder and close an existing Fund account, you will not be able to make additional investments in the Fund unless you meet one of the specified criteria. The Fund may resume sales of its shares at some future date, but they have no present intention to do so.

Investors who meet the following criteria may be able to invest in the Fund: (i) existing shareholders invested in the Fund are permitted to continue to purchase shares through their existing Fund accounts and to reinvest any dividends or capital gains distributions in such accounts, absent highly unusual circumstances; (ii) discretionary investment advisers may continue to invest in the Fund through an existing omnibus account at a financial institution and/or intermediary on behalf of clients who are current Fund shareholders; (iii) under certain circumstances, all or a portion of the shares held in a closed Fund account may be reallocated to a different form of ownership; this may include, but is not limited to, mandatory retirement distributions, legal proceedings, estate settlements, and the gifting of Fund shares; (iv) it is expected that existing or new participants in employer-sponsored retirement plans, including employees of Janus Capital Group Inc. ("JCGI") and any of its subsidiaries covered under the JCGI retirement plan, that currently offer the Fund as an investment option may direct contributions to the Fund through their plan, regardless of whether the participant invested in such Fund prior to its closing; (v) Janus Capital encourages its employees to own shares of the Janus funds, and as such, upon prior approval, employees of Janus Capital and its affiliates may open new accounts in the closed Fund; Trustees of the Janus funds and directors of JCGI may also open new accounts in the closed Fund; (vi) Janus "fund of funds," which is a fund that primarily invests in other mutual funds, may invest in the Fund; and (vii) in the case of certain mergers or reorganizations, retirement plans may be able to add the closed Fund as an investment option, and sponsors of certain wrap programs with existing accounts in the Fund would be able to continue to invest in the Fund on behalf of new customers. Such mergers, reorganizations, acquisitions, or other business combination are those in which one or more companies involved in such transaction currently offers the Fund as an investment option, and any company that as a result of such transaction becomes affiliated with the company currently offering the Fund (as a parent company, subsidiary, sister company, or otherwise). Such companies may

request to add the Fund as an investment option under its retirement plan. In the case of fund mergers, existing shareholders of predecessor funds may be treated as existing shareholders of a surviving closed Fund in applying closed fund policies. In addition, new accounts may be permitted in the Fund for certain plans and programs offered in connection with employer-sponsored retirement plans where the retirement plan has an existing account in the Fund or where the retirement plan was negotiating with Janus Capital (and/or certain recognized intermediary distributors) to add the closed Fund at the time Fund closure was announced. Requests for purchases into a closed Fund will be reviewed by management on an individual basis, taking into consideration whether the addition of the Fund is believed to negatively impact existing Fund shareholders.

EXCESSIVE TRADING

Excessive Trading Policies and Procedures

The Trustees have adopted policies and procedures with respect to short-term and excessive trading of Fund shares (“excessive trading”). The Fund is intended for long-term investment purposes only, and the Fund will take reasonable steps to attempt to detect and deter short-term and excessive trading. Transactions placed in violation of the Fund’s exchange limits or excessive trading policies may be cancelled or revoked by the Fund by the next business day following receipt by the Fund. The trading history of accounts determined to be under common ownership or control within any of the Janus funds may be considered in enforcing these policies and procedures. As described below, however, the Fund may not be able to identify all instances of excessive trading or completely eliminate the possibility of excessive trading. In particular, it may be difficult to identify excessive trading in certain omnibus accounts and other accounts traded through intermediaries. By their nature, omnibus accounts, in which purchases and redemptions of the Fund’s shares by multiple investors are aggregated by the intermediary and presented to the Fund on a net basis, may effectively conceal the identity of individual investors and their transactions from the Fund and its agents. This makes the elimination of excessive trading in the accounts impractical without the assistance of the intermediary.

The Fund attempts to deter excessive trading through at least the following methods:

- exchange limitations as described under “Exchanges;”
- trade monitoring; and
- fair valuation of securities as described under “Pricing of Fund Shares.”

Generally, a purchase and redemption of Shares from the Fund (i.e., “round trip”) within 90 calendar days may result in enforcement of the Fund’s excessive trading policies and procedures with respect to future purchase orders, provided that the Fund reserves the right to reject any purchase request as explained above.

The Fund monitors for patterns of shareholder frequent trading and may suspend or permanently terminate the exchange privilege of any investor who makes more than one round trip in the Fund over a 90-day period, and may bar future purchases into the Fund and any of the other Janus funds by such investor. The Fund’s excessive trading policies generally do not apply to (i) a money market fund, although money market funds at all times reserve the right to reject any purchase request (including exchange purchases) for any reason without prior notice; (ii) transactions in the Janus funds by a Janus “fund of funds,” which is a fund that primarily invests in other Janus mutual funds; and (iii) identifiable transactions by certain funds of funds and asset allocation programs to realign portfolio investments with existing target allocations.

The Fund’s Trustees may approve from time to time a redemption fee to be imposed by any Janus fund, subject to 60 days’ notice to shareholders of that fund.

Investors who place transactions through the same financial intermediary on an omnibus basis may be deemed part of a group for the purpose of the Fund’s excessive trading policies and procedures and may be rejected in whole or in part by the Fund. The Fund, however, cannot always identify or reasonably detect excessive trading that may be facilitated by financial intermediaries or made difficult to identify through the use of omnibus accounts by those intermediaries that transmit purchase, exchange, and redemption orders to the Fund, and thus the Fund may have difficulty curtailing such activity. Transactions accepted by a financial intermediary in violation of the Fund’s excessive trading policies may be cancelled or revoked by the Fund by the next business day following receipt by the Fund.

In an attempt to detect and deter excessive trading in omnibus accounts, the Fund or its agents may require intermediaries to impose restrictions on the trading activity of accounts traded through those intermediaries. Such restrictions may include, but are not limited to, requiring that trades be placed by U.S. mail, prohibiting future purchases by investors who have recently redeemed Fund shares, requiring intermediaries to report information about customers who purchase and redeem large

amounts, and similar restrictions. The Fund's ability to impose such restrictions with respect to accounts traded through particular intermediaries may vary depending on the systems' capabilities, applicable contractual and legal restrictions, and cooperation of those intermediaries.

Certain transactions in Fund shares, such as periodic rebalancing through intermediaries (no more frequently than every 60 days) or those which are made pursuant to systematic purchase, exchange, or redemption programs generally do not raise excessive trading concerns and normally do not require application of the Fund's methods to detect and deter excessive trading.

The Fund also reserves the right to reject any purchase request (including exchange purchases) by any investor or group of investors for any reason without prior notice, including, in particular, if the trading activity in the account(s) is deemed to be disruptive to the Fund. For example, the Fund may refuse a purchase order if the Fund's portfolio manager believes he would be unable to invest the money effectively in accordance with the Fund's investment policies or the Fund would otherwise be adversely affected due to the size of the transaction, frequency of trading, or other factors.

The Fund's policies and procedures regarding excessive trading may be modified at any time by the Fund's Trustees.

Excessive Trading Risks

Excessive trading may present risks to the Fund's long-term shareholders. Excessive trading into and out of the Fund may disrupt portfolio investment strategies, may create taxable gains to remaining Fund shareholders, and may increase Fund expenses, all of which may negatively impact investment returns for all remaining shareholders, including long-term shareholders.

Funds that invest in foreign securities may be at a greater risk for excessive trading. Investors may attempt to take advantage of anticipated price movements in securities held by a fund based on events occurring after the close of a foreign market that may not be reflected in the fund's NAV (referred to as "price arbitrage"). Such arbitrage opportunities may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that the Fund's valuation of a security differs from the security's market value, short-term arbitrage traders may dilute the NAV of the Fund, which negatively impacts long-term shareholders. Although the Fund has adopted fair valuation policies and procedures intended to reduce the Fund's exposure to price arbitrage, stale pricing, and other potential pricing inefficiencies, under such circumstances there is potential for short-term arbitrage trades to dilute the value of Fund shares.

Although the Fund takes steps to detect and deter excessive trading pursuant to the policies and procedures described in this Prospectus and approved by the Trustees, there is no assurance that these policies and procedures will be effective in limiting excessive trading in all circumstances. For example, the Fund may be unable to completely eliminate the possibility of excessive trading in certain omnibus accounts and other accounts traded through intermediaries. Omnibus accounts may effectively conceal the identity of individual investors and their transactions from the Fund and its agents. This makes the Fund's identification of excessive trading transactions in the Fund through an omnibus account difficult and makes the elimination of excessive trading in the account impractical without the assistance of the intermediary. Although the Fund encourages intermediaries to take necessary actions to detect and deter excessive trading, some intermediaries may be unable or unwilling to do so, and accordingly, the Fund cannot eliminate completely the possibility of excessive trading.

Shareholders that invest through an omnibus account should be aware that they may be subject to the policies and procedures of their financial intermediary with respect to excessive trading in the Fund.

AVAILABILITY OF PORTFOLIO HOLDINGS INFORMATION

The Mutual Fund Holdings Disclosure Policies and Procedures adopted by Janus Capital and all mutual funds managed within the Janus fund complex are designed to be in the best interests of the funds and to protect the confidentiality of the funds' portfolio holdings. The following describes policies and procedures with respect to disclosure of portfolio holdings.

Full Holdings. The Fund is required to disclose its complete holdings in the quarterly holdings report on Form N-Q within 60 days of the end of the first and third fiscal quarters, and in the annual report and semiannual report to Fund shareholders. These reports (i) are available on the SEC's website at <http://www.sec.gov>; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by

calling 1-800-SEC-0330); and (iii) are available without charge, upon request, by calling a Janus representative at 1-800-525-0020 (toll free). Portfolio holdings, consisting of at least the names of the holdings, are generally available on a calendar quarter-end basis with a 30-day lag. Holdings are generally posted approximately two business days thereafter under Full Holdings for the Fund at janus.com/info.

The Fund may provide, upon request, historical full holdings on a monthly basis for periods prior to the previous quarter-end subject to a written confidentiality agreement.

Top Holdings. The Fund's top portfolio holdings, in order of position size and as a percentage of the Fund's total portfolio, are available monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag.

Other Information. The Fund may occasionally provide security breakdowns (e.g., industry, sector, regional, market capitalization, and asset allocation), top performance contributors/detractors (consisting of security names in alphabetical order), and specific portfolio level performance attribution information and statistics monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag. Top performance contributors/detractors provided at calendar quarter-end may include the percentage of contribution/detraction to Fund performance.

Full portfolio holdings will remain available on the Janus websites at least until a Form N-CSR or Form N-Q is filed with the SEC for the period that includes the date as of which the website information is current. Funds disclose their short positions, if applicable, only to the extent required in regulatory reports. Janus Capital may exclude from publication on its websites all or any portion of portfolio holdings or change the time periods of disclosure as deemed necessary to protect the interests of the Janus funds. Under extraordinary circumstances, exceptions to the Mutual Fund Holdings Disclosure Policies and Procedures may be made by Janus Capital's Chief Investment Officer(s) or their delegates. Such exceptions may be made without prior notice to shareholders. A summary of the Fund's portfolio holdings disclosure policies and procedures, which includes a discussion of any exceptions, is contained in the Fund's SAI.

SHAREHOLDER COMMUNICATIONS

Your financial intermediary or plan sponsor is responsible for sending you periodic statements of all transactions, along with trade confirmations and tax reporting, as required by applicable law.

Your financial intermediary or plan sponsor is responsible for providing annual and semiannual reports, including the financial statements of the Fund. These reports show the Fund's investments and the market value of such investments, as well as other information about the Fund and its operations. Please contact your financial intermediary or plan sponsor to obtain these reports. The Fund's fiscal year ends September 30.

Financial highlights

The financial highlights table is intended to help you understand the Fund's financial performance for each fiscal period shown. Items "Net asset value, beginning of period" through "Net asset value, end of period" reflect financial results for a single Fund Share. The gross expense ratio reflects expenses prior to any expense offset arrangement and waivers (reimbursements), if applicable. The net expense ratio reflects expenses after any expense offset arrangement and waivers (reimbursements), if applicable. The information for the fiscal periods shown has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Annual Report, which is available upon request, and incorporated by reference into the SAI.

The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in Class T Shares of the Fund (assuming reinvestment of all dividends and distributions).

Effective February 16, 2010, Class J Shares were renamed Class T Shares and the eligibility requirements changed so that only clients investing through a third-party intermediary may purchase Class T Shares.

Janus Twenty Fund - Class T†

	Years or Period ended September 30			Years ended October 31		
	2012	2011	2010(1)	2009	2008	2007
Net asset value, beginning of period	\$55.81	\$60.33	\$57.00	\$46.29	\$74.70	\$52.93
<i>Income from investment operations:</i>						
Net investment income/(loss)	0.24	0.16	(0.12)	0.06	0.01	0.15
Net gain/(loss) on investments (both realized and unrealized)	15.72	(4.53)	3.45	10.66	(28.27)	21.94
Total from investment operations	15.96	(4.37)	3.33	10.72	(28.26)	22.09
<i>Less distributions and other:</i>						
Dividends from net investment income	(0.04)	(0.15)	—	—	(0.15)	(0.32)
Distributions from capital gains	(9.16)	—	—	—	—	—
Return of capital	N/A	N/A	N/A	(0.01)	N/A	N/A
Total distributions and other	(9.20)	(0.15)	—	(0.01)	(0.15)	(0.32)
Net asset value, end of period	\$62.57	\$55.81	\$60.33	\$57.00	\$46.29	\$74.70
Total return(2)	32.43%	(7.28)%(3)	5.84%	23.16%	(37.91)%	41.95%
Net assets, end of period (in millions)	\$3,461	\$2,985	\$3,851	\$9,016	\$7,671	\$12,769
Average net assets for the period (in millions)	\$3,327	\$3,793	\$5,792	\$7,847	\$11,801	\$10,355
Ratio of gross expenses to average net assets(4)	0.81%	0.93%	0.91%	0.86%	0.85%	0.88%
Ratio of net expenses to average net assets(4)(5)	0.81%	0.93%	0.91%	0.86%	0.84%	0.88%
Ratio of net investment income/(loss) to average net assets(4)	0.39%	0.33%	(0.14)%	(0.10)%	(0.07)% (6)	0.22%
Portfolio turnover rate	12%	56%	35% (2)	32%	42%	20%

† Formerly named Class J Shares.

(1) Period November 1, 2009 through September 30, 2010. The Fund changed its fiscal year end to September 30.

(2) Not annualized for periods of less than one full year.

(3) From time to time the Fund may receive proceeds from litigation settlements, without which performance would be lower. Total return reflects a non-recurring litigation settlement against Enron Corp. This resulted in an increase to the total return of 0.28%.

(4) Annualized for periods of less than one full year.

(5) The expense ratio includes any applicable dividends and interest on short positions and may include stock loan fees. The ratio would be 0.86% in 2007, without the inclusion of any applicable dividends and interest on short positions and any stock loan fees.

(6) As a result of the recharacterization of dividend income to return of capital, the ratio of net investment income/(loss) to average net assets has been reduced by 0.09%. The adjustment had no impact on total net assets or total return.

Glossary of investment terms

This glossary provides a more detailed description of some of the types of securities, investment strategies, and other instruments in which the Fund may invest, as well as some general investment terms. The Fund may invest in these instruments to the extent permitted by its investment objective and policies. The Fund is not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in this Prospectus.

EQUITY AND DEBT SECURITIES

Average-Weighted Effective Maturity is a measure of a bond's maturity. The stated maturity of a bond is the date when the issuer must repay the bond's entire principal value to an investor. Some types of bonds may also have an "effective maturity" that is shorter than the stated date due to prepayment or call provisions. Securities without prepayment or call provisions generally have an effective maturity equal to their stated maturity. Average-weighted effective maturity is calculated by averaging the effective maturity of bonds held by a Fund with each effective maturity "weighted" according to the percentage of net assets that it represents.

Bank loans include institutionally-traded floating and fixed-rate debt securities generally acquired as a participation interest in or assignment of a loan originated by a lender or financial institution. Assignments and participations involve credit, interest rate, and liquidity risk. Interest rates on floating rate securities adjust with interest rate changes and/or issuer credit quality. If a Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, a Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. A Fund may have difficulty trading assignments and participations to third parties or selling such securities in secondary markets, which in turn may affect the Fund's NAV.

Bonds are debt securities issued by a company, municipality, government, or government agency. The issuer of a bond is required to pay the holder the amount of the loan (or par value of the bond) at a specified maturity and to make scheduled interest payments.

Certificates of Participation ("COPs") are certificates representing an interest in a pool of securities. Holders are entitled to a proportionate interest in the underlying securities. Municipal lease obligations are often sold in the form of COPs. Refer to "Municipal lease obligations" below.

Commercial paper is a short-term debt obligation with a maturity ranging from 1 to 270 days issued by banks, corporations, and other borrowers to investors seeking to invest idle cash. A Fund may purchase commercial paper issued in private placements under Section 4(2) of the Securities Act of 1933, as amended (the "1933 Act").

Common stocks are equity securities representing shares of ownership in a company and usually carry voting rights and earn dividends. Unlike preferred stock, dividends on common stock are not fixed but are declared at the discretion of the issuer's board of directors.

Convertible securities are preferred stocks or bonds that pay a fixed dividend or interest payment and are convertible into common stock at a specified price or conversion ratio.

Debt securities are securities representing money borrowed that must be repaid at a later date. Such securities have specific maturities and usually a specific rate of interest or an original purchase discount.

Depository receipts are receipts for shares of a foreign-based corporation that entitle the holder to dividends and capital gains on the underlying security. Receipts include those issued by domestic banks (American Depositary Receipts), foreign banks (Global or European Depositary Receipts), and broker-dealers (depository shares).

Duration is the time it will take investors to recoup their investment in a bond. Unlike average maturity, duration reflects both principal and interest payments. Generally, the higher the coupon rate on a bond, the lower its duration will be. The duration of a bond portfolio is calculated by averaging the duration of bonds held by a Fund with each duration "weighted" according to the percentage of net assets that it represents. Because duration accounts for interest payments, a Fund's duration is usually shorter than its average maturity.

Equity securities generally include domestic and foreign common stocks; preferred stocks; securities convertible into common stocks or preferred stocks; warrants to purchase common or preferred stocks; and other securities with equity characteristics.

Exchange-traded funds (“ETFs”) are index-based investment companies which hold substantially all of their assets in securities with equity characteristics. As a shareholder of another investment company, a Fund would bear its pro rata portion of the other investment company’s expenses, including advisory fees, in addition to the expenses the Fund bears directly in connection with its own operations.

Fixed-income securities are securities that pay a specified rate of return. The term generally includes short- and long-term government, corporate, and municipal obligations that pay a specified rate of interest, dividends, or coupons for a specified period of time. Coupon and dividend rates may be fixed for the life of the issue or, in the case of adjustable and floating rate securities, for a shorter period.

High-yield/high-risk bonds are bonds that are rated below investment grade by the primary rating agencies (i.e., BB+ or lower by Standard & Poor’s and Fitch, or Ba or lower by Moody’s). Other terms commonly used to describe such bonds include “lower rated bonds,” “non-investment grade bonds,” and “junk bonds.”

Industrial development bonds are revenue bonds that are issued by a public authority but which may be backed only by the credit and security of a private issuer and may involve greater credit risk. Refer to “Municipal securities” below.

Mortgage- and asset-backed securities are shares in a pool of mortgages or other debt instruments. These securities are generally pass-through securities, which means that principal and interest payments on the underlying securities (less servicing fees) are passed through to shareholders on a pro rata basis. These securities involve prepayment risk, which is the risk that the underlying mortgages or other debt may be refinanced or paid off prior to their maturities during periods of declining interest rates. In that case, a Fund may have to reinvest the proceeds from the securities at a lower rate. Potential market gains on a security subject to prepayment risk may be more limited than potential market gains on a comparable security that is not subject to prepayment risk.

Mortgage dollar rolls are transactions in which a Fund sells a mortgage-related security, such as a security issued by Government National Mortgage Association, to a dealer and simultaneously agrees to purchase a similar security (but not the same security) in the future at a predetermined price. A “dollar roll” can be viewed as a collateralized borrowing in which a Fund pledges a mortgage-related security to a dealer to obtain cash.

Municipal lease obligations are revenue bonds backed by leases or installment purchase contracts for property or equipment. Lease obligations may not be backed by the issuing municipality’s credit and may involve risks not normally associated with general obligation bonds and other revenue bonds. For example, their interest may become taxable if the lease is assigned and the holders may incur losses if the issuer does not appropriate funds for the lease payments on an annual basis, which may result in termination of the lease and possible default.

Municipal securities are bonds or notes issued by a U.S. state or political subdivision. A municipal security may be a general obligation backed by the full faith and credit (i.e., the borrowing and taxing power) of a municipality or a revenue obligation paid out of the revenues of a designated project, facility, or revenue source.

Pass-through securities are shares or certificates of interest in a pool of debt obligations that have been repackaged by an intermediary, such as a bank or broker-dealer.

Passive foreign investment companies (“PFICs”) are any foreign corporations which generate certain amounts of passive income or hold certain amounts of assets for the production of passive income. Passive income includes dividends, interest, royalties, rents, and annuities. To avoid taxes and interest that a Fund must pay if these investments are profitable, the Fund may make various elections permitted by the tax laws. These elections could require that a Fund recognize taxable income, which in turn must be distributed, before the securities are sold and before cash is received to pay the distributions.

Pay-in-kind bonds are debt securities that normally give the issuer an option to pay cash at a coupon payment date or give the holder of the security a similar bond with the same coupon rate and a face value equal to the amount of the coupon payment that would have been made.

Preferred stocks are equity securities that generally pay dividends at a specified rate and have preference over common stock in the payment of dividends and liquidation. Preferred stock generally does not carry voting rights.

Real estate investment trust (“REIT”) is an investment trust that operates through the pooled capital of many investors who buy its shares. Investments are in direct ownership of either income property or mortgage loans.

Rule 144A securities are securities that are not registered for sale to the general public under the 1933 Act, but that may be resold to certain institutional investors.

Standby commitment is a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred, or assigned only with the underlying security or securities. A standby commitment entitles the holder to receive same day settlement, and will be considered to be from the party to whom the investment company will look for payment of the exercise price.

Step coupon bonds are high-quality issues with above-market interest rates and a coupon that increases over the life of the bond. They may pay monthly, semiannual, or annual interest payments. On the date of each coupon payment, the issuer decides whether to call the bond at par, or whether to extend it until the next payment date at the new coupon rate.

Strip bonds are debt securities that are stripped of their interest (usually by a financial intermediary) after the securities are issued. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities of comparable maturity.

Tender option bonds are relatively long-term bonds that are coupled with the option to tender the securities to a bank, broker-dealer, or other financial institution at periodic intervals and receive the face value of the bond. This investment structure is commonly used as a means of enhancing a security’s liquidity.

U.S. Government securities include direct obligations of the U.S. Government that are supported by its full faith and credit. Treasury bills have initial maturities of less than one year, Treasury notes have initial maturities of one to ten years, and Treasury bonds may be issued with any maturity but generally have maturities of at least ten years. U.S. Government securities also include indirect obligations of the U.S. Government that are issued by federal agencies and government sponsored entities. Unlike Treasury securities, agency securities generally are not backed by the full faith and credit of the U.S. Government. Some agency securities are supported by the right of the issuer to borrow from the Treasury, others are supported by the discretionary authority of the U.S. Government to purchase the agency’s obligations, and others are supported only by the credit of the sponsoring agency.

Variable and floating rate securities have variable or floating rates of interest and, under certain limited circumstances, may have varying principal amounts. Variable and floating rate securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to some interest rate index or market interest rate (the “underlying index”). The floating rate tends to decrease the security’s price sensitivity to changes in interest rates.

Warrants are securities, typically issued with preferred stock or bonds, which give the holder the right to buy a proportionate amount of common stock at a specified price. The specified price is usually higher than the market price at the time of issuance of the warrant. The right may last for a period of years or indefinitely.

Zero coupon bonds are debt securities that do not pay regular interest at regular intervals, but are issued at a discount from face value. The discount approximates the total amount of interest the security will accrue from the date of issuance to maturity. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities.

FUTURES, OPTIONS, AND OTHER DERIVATIVES

Credit default swaps are a specific kind of counterparty agreement that allows the transfer of third party credit risk from one party to the other. One party in the swap is a lender and faces credit risk from a third party, and the counterparty in the credit default swap agrees to insure this risk in exchange for regular periodic payments.

Derivatives are financial instruments whose performance is derived from the performance of another asset (stock, bond, commodity, currency, interest rate or market index). Types of derivatives can include, but are not limited to options, forward contracts, swaps, and futures contracts.

Equity-linked structured notes are derivative securities which are specially designed to combine the characteristics of one or more underlying securities and their equity derivatives in a single note form. The return and/or yield or income component

may be based on the performance of the underlying equity securities, an equity index, and/or option positions. Equity-linked structured notes are typically offered in limited transactions by financial institutions in either registered or non-registered form. An investment in equity-linked notes creates exposure to the credit risk of the issuing financial institution, as well as to the market risk of the underlying securities. There is no guaranteed return of principal with these securities, and the appreciation potential of these securities may be limited by a maximum payment or call right. In certain cases, equity-linked notes may be more volatile and less liquid than less complex securities or other types of fixed-income securities. Such securities may exhibit price behavior that does not correlate with other fixed-income securities.

Equity swaps involve the exchange by two parties of future cash flow (e.g., one cash flow based on a referenced interest rate and the other based on the performance of stock or a stock index).

Forward contracts are contracts to purchase or sell a specified amount of a financial instrument for an agreed upon price at a specified time. Forward contracts are not currently exchange-traded and are typically negotiated on an individual basis. A Fund may enter into forward currency contracts for investment purposes or to hedge against declines in the value of securities denominated in, or whose value is tied to, a currency other than the U.S. dollar or to reduce the impact of currency appreciation on purchases of such securities. It may also enter into forward contracts to purchase or sell securities or other financial indices.

Futures contracts are contracts that obligate the buyer to receive and the seller to deliver an instrument or money at a specified price on a specified date. A Fund may buy and sell futures contracts on foreign currencies, securities, and financial indices including indices of U.S. Government, foreign government, equity, or fixed-income securities. A Fund may also buy options on futures contracts. An option on a futures contract gives the buyer the right, but not the obligation, to buy or sell a futures contract at a specified price on or before a specified date. Futures contracts and options on futures are standardized and traded on designated exchanges.

Indexed/structured securities are typically short- to intermediate-term debt securities whose value at maturity or interest rate is linked to currencies, interest rates, equity securities, indices, commodity prices, or other financial indicators. Such securities may be positively or negatively indexed (e.g., their value may increase or decrease if the reference index or instrument appreciates). Indexed/structured securities may have return characteristics similar to direct investments in the underlying instruments and may be more volatile than the underlying instruments. A Fund bears the market risk of an investment in the underlying instruments, as well as the credit risk of the issuer.

Interest rate swaps involve the exchange by two parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments).

Inverse floaters are debt instruments whose interest rate bears an inverse relationship to the interest rate on another instrument or index. For example, upon reset, the interest rate payable on the inverse floater may go down when the underlying index has risen. Certain inverse floaters may have an interest rate reset mechanism that multiplies the effects of change in the underlying index. Such mechanism may increase the volatility of the security's market value.

Options are the right, but not the obligation, to buy or sell a specified amount of securities or other assets on or before a fixed date at a predetermined price. A Fund may purchase and write put and call options on securities, securities indices, and foreign currencies. A Fund may purchase or write such options individually or in combination.

Participatory notes are derivative securities which are linked to the performance of an underlying Indian security and which allow investors to gain market exposure to Indian securities without trading directly in the local Indian market.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period.

OTHER INVESTMENTS, STRATEGIES, AND/OR TECHNIQUES

Cash sweep program is an arrangement in which a Fund's uninvested cash balance is used to purchase shares of affiliated or non-affiliated money market funds or cash management pooled investment vehicles at the end of each day.

Diversification is a classification given to a fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Funds are classified as either "diversified" or "nondiversified." To be classified as "diversified" under the 1940 Act, a fund

may not, with respect to 75% of its total assets, invest more than 5% of its total assets in any issuer and may not own more than 10% of the outstanding voting securities of an issuer. A fund that is classified as “nondiversified” under the 1940 Act, on the other hand, has the flexibility to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified.

Industry concentration for purposes under the 1940 Act is the investment of 25% or more of a Fund’s total assets in an industry or group of industries.

Leverage is when a Fund increases its assets available for investment using borrowings or similar transactions. Because short sales involve borrowing securities and then selling them, a Fund’s short sales effectively leverage the Fund’s assets. The use of leverage may make any change in a Fund’s NAV even greater and thus result in increased volatility of returns. A Fund’s assets that are used as collateral to secure the short sales may decrease in value while the short positions are outstanding, which may force the Fund to use its other assets to increase the collateral. Leverage also creates interest expense that may lower a Fund’s overall returns.

Market capitalization is the most commonly used measure of the size and value of a company. It is computed by multiplying the current market price of a share of the company’s stock by the total number of its shares outstanding. Market capitalization is an important investment criterion for certain funds, while others do not emphasize investments in companies of any particular size.

Net long is a term used to describe when a Fund’s assets committed to long positions exceed those committed to short positions.

Repurchase agreements involve the purchase of a security by a Fund and a simultaneous agreement by the seller (generally a bank or dealer) to repurchase the security from the Fund at a specified date or upon demand. This technique offers a method of earning income on idle cash. These securities involve the risk that the seller will fail to repurchase the security, as agreed. In that case, a Fund will bear the risk of market value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security.

Reverse repurchase agreements involve the sale of a security by a Fund to another party (generally a bank or dealer) in return for cash and an agreement by the Fund to buy the security back at a specified price and time. This technique will be used primarily to provide cash to satisfy unusually high redemption requests, or for other temporary or emergency purposes.

Short sales in which a Fund may engage may be either “short sales against the box” or other short sales. Short sales against the box involve selling short a security that a Fund owns, or the Fund has the right to obtain the amount of the security sold short at a specified date in the future. A Fund may also enter into a short sale to hedge against anticipated declines in the market price of a security or to reduce portfolio volatility. If the value of a security sold short increases prior to the scheduled delivery date, the Fund loses the opportunity to participate in the gain. For short sales, the Fund will incur a loss if the value of a security increases during this period because it will be paying more for the security than it has received from the purchaser in the short sale. If the price declines during this period, a Fund will realize a short-term capital gain. Although a Fund’s potential for gain as a result of a short sale is limited to the price at which it sold the security short less the cost of borrowing the security, its potential for loss is theoretically unlimited because there is no limit to the cost of replacing the borrowed security.

When-issued, delayed delivery, and forward commitment transactions generally involve the purchase of a security with payment and delivery at some time in the future – i.e., beyond normal settlement. A Fund does not earn interest on such securities until settlement and bears the risk of market value fluctuations in between the purchase and settlement dates. New issues of stocks and bonds, private placements, and U.S. Government securities may be sold in this manner.

You can make inquiries and request other information, including a Statement of Additional Information, annual report, or semiannual report (as they become available), free of charge, by contacting your plan sponsor, broker-dealer, or financial intermediary, or by contacting a Janus representative at 1-877-335-2687. The Fund's Statement of Additional Information and most recent annual and semiannual reports are also available, free of charge, at janus.com/info. Additional information about the Fund's investments is available in the Fund's annual and semiannual reports. In the Fund's annual and semiannual reports, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal period. Other information is also available from financial intermediaries that sell Shares of the Fund.

The Statement of Additional Information provides detailed information about the Fund and is incorporated into this Prospectus by reference. You may review and copy information about the Fund (including the Fund's Statement of Additional Information) at the Public Reference Room of the SEC or get text only copies, after paying a duplicating fee, by sending an electronic request by e-mail to publicinfo@sec.gov or by writing to or calling the Commission's Public Reference Section, Washington, D.C. 20549-1520 (1-202-551-8090). Information on the operation of the Public Reference Room may also be obtained by calling this number. You may also obtain reports and other information about the Fund from the Electronic Data Gathering Analysis and Retrieval (EDGAR) Database on the SEC's website at <http://www.sec.gov>.

INVESTMENT OBJECTIVE

Janus Global Real Estate Fund seeks total return through a combination of capital appreciation and current income.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 31 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class T
Management Fees (may adjust up or down)	0.75%	0.75%	0.75%	0.75%	0.75%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None
Other Expenses	0.54%	0.56%	0.60%	0.41%	0.58%
Total Annual Fund Operating Expenses ⁽¹⁾	1.54%	2.31%	1.60%	1.16%	1.33%
Fee Waiver ⁽¹⁾	0.10%	0.12%	0.11%	0.09%	0.09%
Total Annual Fund Operating Expenses After Fee Waiver ⁽¹⁾	1.44%	2.19%	1.49%	1.07%	1.24%

Janus Capital has contractually agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, the distribution and shareholder servicing fees - applicable to Class A Shares, Class C Shares, and Class S Shares; administrative (1) services fees payable pursuant to the Transfer Agency Agreement; brokerage commissions; interest; dividends; taxes; acquired fund fees and expenses; and extraordinary expenses) to 0.97% until at least February 1, 2014. The contractual waiver may be terminated or modified prior to this date only at the discretion of the Board of Trustees.

EXAMPLE:

The following Example is based on expenses without waivers. The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses without waivers remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 723	\$ 1,033	\$ 1,366	\$ 2,304
Class C Shares	\$ 334	\$ 721	\$ 1,235	\$ 2,646
Class S Shares	\$ 163	\$ 505	\$ 871	\$ 1,900
Class I Shares	\$ 118	\$ 368	\$ 638	\$ 1,409
Class T Shares	\$ 135	\$ 421	\$ 729	\$ 1,601

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 723	\$ 1,033	\$ 1,366	\$ 2,304
Class C Shares	\$ 234	\$ 721	\$ 1,235	\$ 2,646
Class S Shares	\$ 163	\$ 505	\$ 871	\$ 1,900
Class I Shares	\$ 118	\$ 368	\$ 638	\$ 1,409
Class T Shares	\$ 135	\$ 421	\$ 729	\$ 1,601

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 29% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity and debt securities of real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities, including, but not limited to, real estate investment trusts (“REITs”) and similar REIT-like entities, such as foreign entities that have REIT characteristics.

As a fundamental policy, the Fund will concentrate 25% or more of its net assets in securities of issuers in real estate or real estate-related industries. The Fund’s investment in companies engaged in businesses outside the real estate industry which possess significant real estate holdings will be deemed to be in the real estate industry for purposes of the Fund’s investment objective and its policy on industry concentration.

Real estate-related industries are comprised of companies that, in the opinion of the portfolio manager, at the time of investment, generally (i) derive at least 50% of their revenue from ownership, construction, extraction, financing, management, operation, sales or development of real estate, or from businesses which have a clear relationship to these activities; (ii) have at least 50% of their assets in real estate; or (iii) have more than 50% of their net asset value accounted for by real estate. A REIT is a company dedicated to owning, and usually operating, income producing real estate, or to financing real estate. REITs pool investors’ funds for investment primarily in income producing real estate or real estate-related loans or interests. Under the Internal Revenue Code of 1986, as amended (the “Code”), a REIT is not taxed on income it distributes to its shareholders if it complies with several requirements relating to its organization, ownership, assets and income, and a requirement that it generally distribute to its shareholders at least 90% of its taxable income (other than net capital gains) for each taxable year.

The Fund also invests in non-U.S. real estate and real estate-related companies. The Fund expects under normal market conditions to maintain investments in issuers from several different developed countries, including the United States. Under unusual circumstances, the Fund may invest all of its assets in a single country. The Fund may invest in emerging markets but will normally limit such investments to 15% of its net assets, measured at the time of purchase.

In selecting the investments for the Fund, the portfolio manager seeks to identify companies that have, in the opinion of the portfolio manager, good management, strong balance sheets, above average investment growth in “funds from operations,” and that trade at a discount to their assets’ underlying value. In the case of REITs, “funds from operations” generally means a REIT’s net income excluding gains or losses from debt restructuring and sales of property plus depreciation of real property.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors interested in investments focused in the real estate industry or real estate-related industries, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 8.9% of the Fund's investments were in emerging markets.

Real Estate Securities Risk. An investment in the Fund may be subject to many of the same risks as a direct investment in real estate. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

REIT Risk. Investments in REITs involve risks associated with direct ownership of real estate, including a decline in property values, extended vacancies, changes in regional and national economic conditions, increases in property taxes, and changes in interest rates. In addition, an individual REIT's performance depends on the types and locations of the properties it owns and on how well it manages those properties. REITs are also dependent upon management skills, may not be diversified, may incur substantial costs in the event of borrower or lessee defaults, and are heavily reliant upon cash flow. A REIT could possibly fail to qualify for tax free pass-through of income under the Code, as amended or could fail to maintain its exemption from registration under the Investment Company Act of 1940, as amended, which may produce adverse economic consequences for the REIT and its investors.

Concentration Risk. Since the Fund concentrates its assets in the real estate or real estate-related industry, an investment in the Fund will be closely linked to performance of the real estate markets. As a result, the Fund may be subject to greater risks and its net asset value may fluctuate more than a fund that does not concentrate its investments.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is

incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund's net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. Fixed-income securities are also subject to credit risk, prepayment risk, valuation risk, and liquidity risk. Credit risk is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. Prepayment risk is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that the portfolio manager would like or at the price that the portfolio manager believes the security is currently worth.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class I Shares, Class A Shares, Class C Shares, and Class S Shares of the Fund commenced operations on July 6, 2009, after the reorganization of each corresponding class of shares of Janus Adviser Global Real Estate Fund ("JAD predecessor fund") into each respective share class of the Fund. Class T Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class I Shares, Class A Shares, Class C Shares, and Class S Shares for periods prior to July 6, 2009, reflects the historical performance of the JAD predecessor fund's Class I Shares, Class A Shares, Class C Shares, and Class S Shares prior to the reorganization, calculated using the fees and expenses of each respective share class of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers.

The performance shown for Class T Shares for periods prior to July 6, 2009, reflects the historical performance of the JAD predecessor fund's Class I Shares prior to the reorganization, calculated using the fees and expenses of Class T Shares, without the effect of any fee and expense limitations or waivers.

If Class T Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class I Shares, Class A Shares, Class C Shares, Class S Shares, and Class T Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class I Shares (calendar year-end)

FTSE EPRA/NAREIT Developed Index (reflects no deduction for expenses, fees, or taxes)	28.65%	1.07%	0.51%

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

The FTSE EPRA/NAREIT Global Index is a global market capitalization weighted index composed of listed real estate securities in the North American, European, Asian, and South American real estate markets including both developed and emerging markets countries. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class I Shares for periods following July 6, 2009; and for the JAD predecessor fund's Class I Shares for periods prior to July 6, 2009. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class I Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class I Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Patrick Brophy is Executive Vice President and Portfolio Manager of the Fund, which he has managed since inception.

PURCHASE AND SALE OF FUND SHARES**Minimum Investment Requirements***

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares	
Non-retirement accounts	\$ 2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500
Class I Shares	
Institutional investors (investing directly with Janus)	\$ 1,000,000
Through an intermediary institution	
non-retirement accounts	\$ 2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Additional information about the Fund

FEES AND EXPENSES

Please refer to the following important information when reviewing the “Fees and Expenses of the Fund” table in the Fund Summary of the Prospectus. The fees and expenses shown were determined based on net assets as of the fiscal year ended September 30, 2012.

“Shareholder Fees” are fees paid directly from your investment and may include sales loads.

“Annual Fund Operating Expenses” are paid out of the Fund’s assets and include fees for portfolio management and administrative services, including recordkeeping, subaccounting, and other shareholder services. You do not pay these fees directly but, as the Example in the Fund Summary shows, these costs are borne indirectly by all shareholders.

The “Management Fee” is the investment advisory fee rate paid by the Fund to Janus Capital. Janus Global Real Estate Fund pays an investment advisory fee rate that adjusts up or down by a variable of up to 0.15% (assuming constant assets) on a monthly basis based upon the Fund’s performance relative to its benchmark index during a measurement period. This fee rate, prior to any performance adjustment, is 0.75%. Any such adjustment to this base fee rate commenced December 2008 and may increase or decrease the Management Fee. Refer to “Management Expenses” in this Prospectus for additional information with further description in the Statement of Additional Information (“SAI”).

“Distribution/Service (12b-1) Fees.” Because 12b-1 fees are charged as an ongoing fee, over time the fee will increase the cost of your investment and may cost you more than paying other types of sales charges. Distribution/Service (12b-1) Fees include a shareholder servicing fee of up to 0.25% for Class C Shares.

A contingent deferred sales charge of up to 1.00% may be imposed on certain redemptions of Class A Shares bought without an initial sales charge and then redeemed within 12 months of purchase. The contingent deferred sales charge is not reflected in the Example in the Fund Summary.

A contingent deferred sales charge of 1.00% generally applies on Class C Shares redeemed within 12 months of purchase. The contingent deferred sales charge may be waived for certain investors, as described in the Shareholder’s Guide.

“Other Expenses”

for Class A Shares, Class C Shares, and Class I Shares, may include administrative fees charged by intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Fund.

for Class S Shares and Class T Shares, include an administrative services fee of 0.25% of the average daily net assets of each class to compensate Janus Services LLC (“Janus Services”), the Fund’s transfer agent, for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of retirement plan participants, pension plan participants, or other underlying investors investing through institutional channels.

for all classes, may include acquired fund fees and expenses, which are indirect expenses the Fund may incur as a result of investing in shares of an underlying fund. “Acquired Fund” refers to any underlying fund (including, but not limited to, exchange-traded funds) in which a fund invests or has invested during the period. To the extent that the Fund invests in Acquired Funds, the Fund’s “Total Annual Fund Operating Expenses” may not correlate to the “ratio of gross expenses to average net assets” presented in the Financial Highlights tables because that ratio includes only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. Such amounts are less than 0.01%.

for all classes, may include reimbursement to Janus Capital of its out-of-pocket costs for services as administrator and to Janus Services of its out-of-pocket costs for serving as transfer agent and providing, or arranging by others the provision of, servicing to shareholders.

Janus Capital has contractually agreed to waive the Fund’s “Total Annual Fund Operating Expenses” to a certain limit until at least February 1, 2014. The expense limit is described in the “Management Expenses” section of this Prospectus. Because a fee waiver will have a positive effect upon a fund’s performance, a fund that pays a performance-based investment advisory fee may experience a performance adjustment that is considered favorable to Janus Capital as a result of a fee waiver that is in place during the period when the performance adjustment applies.

All expenses in the Fund’s “Fees and Expenses of the Fund” table are shown without the effect of expense offset arrangements. Pursuant to such arrangements, credits realized as a result of uninvested cash balances are used to reduce custodian and transfer agent expenses.

ADDITIONAL INVESTMENT STRATEGIES AND GENERAL PORTFOLIO POLICIES

The Fund's Board of Trustees ("Trustees") may change the Fund's investment objective or non-fundamental principal investment strategies without a shareholder vote. The Fund will notify you in writing at least 60 days before making any such change it considers material. If there is a material change to the Fund's objective or principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that the Fund will achieve its investment objective.

Unless otherwise stated, the following additional investment strategies and general policies apply to the Fund and provide further information including, but not limited to, the types of securities the Fund may invest in when implementing its investment objective. Some of these strategies and policies may be part of a principal strategy. Other strategies and policies may be utilized to a lesser extent. Except for the Fund's policies with respect to investments in illiquid securities and borrowing, the percentage limitations included in these policies and elsewhere in this Prospectus and/or the SAI normally apply only at the time of purchase of a security. So, for example, if the Fund exceeds a limit as a result of market fluctuations or the sale of other securities, it will not be required to dispose of any securities.

Cash Position

The Fund may not always stay fully invested. For example, when the portfolio manager believes that market conditions are unfavorable for investing, or when he is otherwise unable to locate attractive investment opportunities, the Fund's cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after the Fund has committed available assets to desirable investment opportunities. When the Fund's investments in cash or similar investments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested. To the extent the Fund invests its uninvested cash through a sweep program (meaning its uninvested cash is pooled with uninvested cash of other funds and invested in certain securities such as repurchase agreements), it is subject to the risks of the account or fund into which it is investing, including liquidity issues that may delay the Fund from accessing its cash.

In addition, the Fund may temporarily increase its cash position under certain unusual circumstances, such as to protect its assets or maintain liquidity in certain circumstances to meet unusually large redemptions. The Fund's cash position may also increase temporarily due to unusually large cash inflows. Under unusual circumstances such as these, the Fund may invest up to 100% of its assets in cash or similar investments. In this case, the Fund may take positions that are inconsistent with its investment policies. As a result, the Fund may not achieve its investment objective.

Common Stock

Unless its investment objective or policies prescribe otherwise, the Fund may invest substantially all of its assets in common stocks. The portfolio manager generally takes a "bottom up" approach to selecting companies in which to invest. This means that he seeks to identify individual companies with earnings growth potential that may not be recognized by the market at large. Securities are generally selected on a security-by-security basis without regard to any predetermined allocation among countries or geographic regions. However, certain factors, such as expected levels of inflation, government policies influencing business conditions, the outlook for currency relationships, and prospects for economic growth among countries, regions, or geographic areas, may warrant greater consideration in selecting foreign securities. There are no limitations on the countries in which the Fund may invest, and the Fund may at times have significant exposure to emerging markets. The portfolio manager may sell a holding if, among other things, the security reaches the portfolio manager's price target, if the company has a deterioration of fundamentals such as failing to meet key operating benchmarks, or if the portfolio manager finds a better investment opportunity. The portfolio manager may also sell a Fund holding to meet redemptions.

The Fund may shift assets to varying degrees between capital appreciation and income-oriented components of its portfolio holdings based on the portfolio manager's analysis of relevant market, financial, and economic conditions. If the portfolio manager believes that growth securities will provide better returns than the yields then available or expected on income-producing securities, the Fund will place a greater emphasis on the capital appreciation component. The Fund's income component may consist of dividend paying stocks which exhibit growth characteristics.

Counterparties

Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to the Fund ("counterparty risk"). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen

or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to the Fund. The Fund may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. The Fund may be exposed to counterparty risk through participation in various programs including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Fund's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures, and options. The Fund intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that the Fund focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

Emerging Markets

The Fund will normally limit its investments in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets" to 15% of its net assets. Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets Indexsm.

High-Yield/High-Risk Bonds

A high-yield/high-risk bond (also called a "junk" bond) is a bond rated below investment grade by major rating agencies (i.e., BB+ or lower by Standard & Poor's Ratings Services ("Standard & Poor's") and Fitch, Inc. ("Fitch"), or Ba or lower by Moody's Investors Service, Inc. ("Moody's")) or is an unrated bond of similar quality. It presents greater risk of default (the failure to make timely interest and principal payments) than higher quality bonds. To the extent the Fund invests in high-yield/high-risk bonds, under normal circumstances, the Fund will limit its investments in high-yield/high-risk bonds to 35% or less of its net assets.

Illiquid Investments

Although the Fund intends to invest in liquid securities, it may invest up to 15% of its net assets in illiquid investments. An illiquid investment is a security or other position that cannot be disposed of quickly in the normal course of business. For example, some securities are not registered under U.S. securities laws and cannot be sold to the U.S. public because of Securities and Exchange Commission regulations (these are known as "restricted securities"). Under procedures adopted by the Fund's Trustees, certain restricted securities that are determined to be liquid will not be counted toward this 15% limit.

Portfolio Turnover

In general, the Fund intends to purchase securities for long-term investment, although, to a limited extent, the Fund may purchase securities in anticipation of relatively short-term gains. Short-term transactions may also result from liquidity needs, securities having reached a price or yield objective, changes in interest rates or the credit standing of an issuer, or by reason of economic or other developments not foreseen at the time of the initial investment decision. The Fund may also sell one security and simultaneously purchase the same or a comparable security to take advantage of short-term differentials in bond yields or securities prices. Portfolio turnover is affected by market conditions, changes in the size of the Fund, the nature of the Fund's investments, and the investment style of the portfolio manager. Changes are normally made in the Fund's portfolio whenever the portfolio manager believes such changes are desirable. Portfolio turnover rates are generally not a factor in making buy and sell decisions.

Increased portfolio turnover may result in higher costs for brokerage commissions, dealer mark-ups, and other transaction costs, and may also result in taxable capital gains. Higher costs associated with increased portfolio turnover also may have a negative effect on the Fund's performance. The "Financial Highlights" section of this Prospectus shows the Fund's historical turnover rates.

Real Estate Investment Trusts

Real estate investment trusts ("REITs") are often categorized as equity REITs, mortgage REITs and hybrid REITs. An equity REIT, the most common type of REIT, invests primarily in the fee ownership of land and buildings. An equity REIT derives its income primarily from rental income but may also realize capital gains or losses by selling real estate properties in its portfolio that have appreciated or depreciated in value. A mortgage REIT invests primarily in mortgages on real estate, which may secure construction, development, or long-term loans. A mortgage REIT generally derives its income from interest payments on the credit it has extended. A hybrid REIT combines the characteristics of equity REITs and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate.

Securities Lending

The Fund may seek to earn additional income through lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis. The Fund may lend portfolio securities on a short-term or long-term basis, in an amount equal to up to $\frac{1}{3}$ of its total assets as determined at the time of the loan origination. When the Fund lends its securities, it receives collateral (including cash collateral), at least equal to the value of securities loaned. The Fund may earn income by investing this collateral in one or more affiliated or non-affiliated cash management vehicles. It is also possible that, due to a decline in the value of a cash management vehicle, the Fund may lose money. There is also the risk that when portfolio securities are lent, the securities may not be returned on a timely basis, and the Fund may experience delays and costs in recovering the security or gaining access to the collateral provided to the Fund to collateralize the loan. If the Fund is unable to recover a security on loan, the Fund may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Fund. Janus Capital intends to manage the cash collateral in an affiliated cash management vehicle and will receive an investment advisory fee for managing such assets.

Short Sales

The Fund may engage in short sales. No more than 10% of the Fund's net assets may be invested in short positions (through short sales of stocks, structured products, futures, swaps, and uncovered written calls). The Fund may engage in short sales "against the box" and options for hedging purposes that are not subject to this 10% limit. A short sale is generally a transaction in which the Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. A short sale is subject to the risk that if the price of the security sold short increases in value, the Fund will incur a loss because it will have to replace the security sold short by purchasing it at a higher price. In addition, the Fund may not always be able to close out a short position at a particular time or at an acceptable price. A lender may request, or market conditions may dictate, that the securities sold short be returned to the lender on short notice, and the Fund may have to buy the securities sold short at an unfavorable price. If this occurs at a time that other short sellers of the same security also want to close out their positions, it is more likely that the Fund will have to cover its short sale at an unfavorable price and potentially reduce or eliminate any gain, or cause a loss, as a result of the short sale. Because there is no upper limit to the price a borrowed security may reach prior to closing a short position, the Fund's losses are potentially unlimited in a short sale transaction. The Fund's gains and losses will also be decreased or increased, as the case may be, by the amount of any dividends, interest, or expenses, including transaction costs and borrowing fees, the Fund may be required to pay in connection with a short sale. Such payments may result in the Fund having higher expenses than a fund that does not engage in short sales and may negatively affect the Fund's performance.

The Fund may also enter into short positions through derivative instruments such as options contracts, futures contracts, and swap agreements which may expose the Fund to similar risks. To the extent that the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Due to certain foreign countries' restrictions, the Fund will not be able to engage in short sales in certain foreign countries where it may maintain long positions. As a result, the Fund's ability to fully implement a short selling strategy that could otherwise help the Fund pursue its investment goals may be limited. There can be no assurance that the implementation of a short sale strategy will be successful.

Special Situations

The Fund may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. For example, a special situation or turnaround may arise when, in the opinion of the portfolio manager, the securities of a particular issuer will be recognized as undervalued by the market and appreciate in value due to a specific development with respect to that issuer. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. For example, issuers undergoing significant capital changes may include companies involved in spin-offs, sales of divisions, mergers or acquisitions, companies involved in bankruptcy proceedings, or companies initiating large changes in their debt to equity ratio. Companies that are redirecting cash flows may be reducing debt, repurchasing shares, or paying dividends. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological

advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in “special situations” companies can present greater risks than investments in companies not experiencing special situations, and the Fund’s performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Swap Agreements

The Fund may utilize swap agreements as a means to gain exposure to certain common stocks and/or to “hedge” or protect its portfolio from adverse movements in securities prices, the rate of inflation, or interest rates. Swaps may also be used for capital appreciation. Swap agreements are two-party contracts to exchange one set of cash flows for another. Swap agreements entail the risk that a party will default on its payment obligations to the Fund. If the other party to a swap defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If the Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund’s total return. Various types of swaps such as credit default, equity, interest rate, and total return swaps are described in the “Glossary of Investment Terms.”

Other Types of Investments

Unless otherwise stated within its specific investment policies, the Fund may also invest in other types of domestic and foreign securities and use other investment strategies, as described in the “Glossary of Investment Terms.” These securities and strategies are not principal investment strategies of the Fund. If successful, they may benefit the Fund by earning a return on the Fund’s assets or reducing risk; however, they may not achieve the Fund’s investment objective. These securities and strategies may include:

- debt securities (such as bonds, notes, and debentures)

- exchange-traded funds

- indexed/structured securities (such as mortgage- and asset-backed securities)

- various derivative transactions (which could comprise a significant percentage of a fund’s portfolio) including, but not limited to, options, futures, forwards, swap agreements (such as equity, interest rate, inflation index, credit default, and total return swaps), participatory notes, structured notes, and other types of derivatives individually or in combination for hedging purposes or for nonhedging purposes such as seeking to earn income and enhance return, to protect unrealized gains, or to avoid realizing losses; such techniques may also be used to adjust currency exposure relative to a benchmark index, to gain exposure to the market pending investment of cash balances, or to meet liquidity needs

- securities purchased on a when-issued, delayed delivery, or forward commitment basis

RISKS OF THE FUND

The value of your investment will vary over time, sometimes significantly, and you may lose money by investing in the Fund. To varying degrees, the Fund may invest in stocks, bonds, alternative strategy investments, and money market instruments or cash/cash equivalents. The following information is intended to help you better understand some of the risks of investing in the Fund. The impact of the following risks on the Fund may vary depending on the Fund’s investments. The greater the Fund’s investment in a particular security, the greater the Fund’s exposure to the risks associated with that security. Before investing in the Fund, you should consider carefully the risks that you assume when investing in the Fund.

Concentration Risk. Since the Fund concentrates its assets in the real estate or real estate-related industry, an investment in the Fund will be closely linked to performance of the real estate markets. Unanticipated economic, legal, cultural, political, or other developments may cause property values to decline, REIT prices may drop, and changes in federal or state tax laws, may affect the value of the securities held by the Fund. Real estate-related companies are also generally sensitive to interest rates, cash flow of underlying real estate assets, supply and demand, and management skill and creditworthiness of the issuer. The Fund’s net asset value may fluctuate more than those of a fund that does not concentrate its investments.

While the Fund will not invest in real property directly, the Fund may be subject to risks similar to those associated with the direct ownership of real property (in addition to securities market risks). These risks include, but are not limited to, declines in the value of real property, risks related to general and local economic conditions, dependency on management skill, heavy cash flow dependency, adverse changes in the operations of any property or the financial condition of any tenant, possible lack of availability of mortgage funds, overbuilding, extended vacancies of properties, increased competition, increases in

property taxes and operating expenses, changes in zoning laws, losses due to costs resulting from the clean-up of environmental problems, liability to third parties for damages resulting from environmental problems, casualty or condemnation losses, limitations on rents, changes in neighborhood values and in appeal of properties to tenants and changes in interest rates.

Credit Quality Risk. Through the Fund's investments in fixed-income securities, the Fund is subject to the risks associated with the credit quality of the issuers of those fixed-income securities. Credit quality measures the likelihood that the issuer or borrower will meet its obligations on a bond. One of the fundamental risks is credit risk, which is the risk that an issuer will be unable to make principal and interest payments when due, or default on its obligations. Higher credit risk may negatively impact the Fund's returns and yield. U.S. Government securities are generally considered to be the safest type of investment in terms of credit risk. Municipal obligations generally rank between U.S. Government securities and corporate debt securities in terms of credit safety. Corporate debt securities, particularly those rated below investment grade, present the highest credit risk.

Many fixed-income securities receive credit ratings from services such as Standard & Poor's, Fitch, and Moody's. These services assign ratings to securities by assessing the likelihood of issuer default. The lower a bond issue is rated by an agency, the more credit risk it is considered to represent. Lower rated instruments and securities generally pay interest at a higher rate to compensate for the associated greater risk. Interest rates can fluctuate in response to economic or market conditions, which can result in a fluctuation in the price of a security and impact your return and yield. If a security has not received a rating, the Fund must rely upon Janus Capital's credit assessment, which if incorrect can also impact the Fund's returns and yield. Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Emerging Markets Risk. Within the parameters of its specific investment policies, the Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets IndexSM. To the extent that the Fund invests a significant amount of its assets in one or more of these countries, its returns and net asset value may be affected to a large degree by events and economic conditions in such countries. The risks of foreign investing are heightened when investing in emerging markets, which may result in the price of investments in emerging markets experiencing sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. The securities markets of many of these countries may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for the Fund to obtain or to enforce a judgment against the issuers of such securities. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. The Fund may be subject to emerging markets risk to the extent that it invests in securities of issuers or companies which are not considered to be from

emerging markets, but which have customers, products, or transactions associated with emerging markets. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as “A Shares”). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Exchange-Traded Funds Risk. The Fund may invest in exchange-traded funds (“ETFs”) which are typically open-end investment companies that are traded on a national securities exchange. ETFs typically incur fees, such as investment advisory fees and other operating expenses that are separate from those of the Fund, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund may be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest directly in stocks and bonds. Further, the price movement of an ETF may fluctuate against the underlying securities or commodities it tracks and may result in a loss. Because the value of ETF shares depends on the demand in the market, the Fund may not be able to purchase or sell an ETF at the most optimal time, which could adversely affect the Fund’s performance.

The ETFs in which the Fund invests are subject to specific risks, depending on the investment strategy of the ETF. In turn, the Fund will be subject to substantially the same risks as those associated with direct exposure to the securities or commodities held by the ETF. Because the Fund may invest in a broad range of ETFs, such risks may include, but are not limited to, leverage risk, foreign exposure risk, and commodities risk.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund’s net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. For example, while securities with longer maturities tend to produce higher yields, they also tend to be more sensitive to changes in prevailing interest rates and are therefore more volatile than shorter-term securities and are subject to greater market fluctuations as a result of changes in interest rates. Fixed-income securities are also subject to credit risk, which is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. In addition, there is prepayment risk, which is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. This may result in the Fund having to reinvest its proceeds in lower yielding securities. Fixed-income securities may also be subject to valuation risk and liquidity risk. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that a portfolio manager would like or at the price that a portfolio manager believes the security is currently worth. Securities underlying mortgage- and asset-backed securities, which may include subprime mortgages, also may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Foreign Exposure Risks. The Fund will invest in foreign debt and equity securities either indirectly (e.g., depositary receipts, depositary shares, and passive foreign investment companies) or directly in foreign markets, including emerging markets. Investments in foreign securities, including securities of foreign and emerging markets governments, may involve greater risks than investing in domestic securities because the Fund’s performance may depend on factors other than the performance of a particular company. These factors include:

Currency Risk. As long as the Fund holds a foreign security, its value will be affected by the value of the local currency relative to the U.S. dollar. When the Fund sells a foreign currency denominated security, its value may be worth less in U.S. dollars even if the security increases in value in its home country. U.S. dollar-denominated securities of foreign issuers may also be affected by currency risk, as the value of these securities may also be affected by changes in the issuer’s local currency.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in emerging markets which may have relatively unstable governments, immature economic structures, national policies restricting investments by foreigners, social instability, and different and/or developing legal systems. In some countries, there is the risk that the government may take over the assets or operations of a company or that the government may

impose withholding and other taxes or limits on the removal of the Fund's assets from that country. In addition, the economies of emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Regulatory Risk. There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Foreign Market Risk. Foreign securities markets, particularly those of emerging market countries, may be less liquid and more volatile than domestic markets. These securities markets may trade a small number of securities, may have a limited number of issuers and a high proportion of shares, or may be held by a relatively small number of persons or institutions. Local securities markets may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of substantial holdings difficult or impossible at times. It is also possible that certain markets may require payment for securities before delivery, and delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, securities of issuers located in countries with emerging markets may have limited marketability and may be subject to more abrupt or erratic price movements which could also have a negative effect on the Fund. Such factors may hinder the Fund's ability to buy and sell emerging market securities in a timely manner, affecting the Fund's investment strategies and potentially affecting the value of the Fund.

Geographic Investment Risk. To the extent that the Fund invests a significant portion of its assets in a particular country or geographic region, the Fund will generally have more exposure to certain risks due to possible political, economic, social, or regulatory events in that country or region. Adverse developments in certain regions could also adversely affect securities of other countries whose economies appear to be unrelated and could have a negative impact on the Fund's performance.

Transaction Costs. Costs of buying, selling, and holding foreign securities, including brokerage, tax, and custody costs, may be higher than those involved in domestic transactions.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds (or "junk" bonds) are bonds rated below investment grade by the primary rating agencies such as Standard & Poor's, Fitch, and Moody's or are unrated bonds of similar quality. The value of lower quality bonds generally is more dependent on credit risk than investment grade bonds. Issuers of high-yield/high-risk bonds may not be as strong financially as those issuing bonds with higher credit ratings and are more vulnerable to real or perceived economic changes, political changes, or adverse developments specific to the issuer. In addition, the junk bond market can experience sudden and sharp price swings.

Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Industry Risk. Industry risk is the possibility that a group of related securities will decline in price due to industry-specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react similarly to industry-specific market or economic developments. The Fund's investments, if any, in multiple companies in a particular industry increase the Fund's exposure to industry risk. Investments in the real estate industry, for example, are closely linked to the performance of the real estate markets. Because Janus Global Real Estate Fund concentrates its assets in the real estate industry, the Fund may be subject to risks similar to those associated with the direct ownership of real property (in addition to securities market risks).

Interest Rate Risk. Generally, a fixed-income security, and to a lesser degree common stock of REITs, will increase in value when prevailing interest rates fall and decrease in value when prevailing interest rates rise. Longer-term securities are generally more sensitive to interest rate changes than shorter-term securities, but they generally offer higher yields to compensate investors for the associated risks. High-yield bond prices and floating rate debt security prices are generally less directly responsive to interest rate changes than investment grade issues or comparable fixed rate securities, and may not always follow this pattern. The Fund may use futures, options, and other derivatives to manage interest rate risk. The income component of Janus Global Real Estate Fund's holdings may include fixed-income securities and REITs.

Management Risk. The Fund is an actively managed investment portfolio and is therefore subject to the risk that the investment strategies employed for the Fund may fail to produce the intended results. The Fund may underperform its benchmark index or other mutual funds with similar investment objectives.

Because the Fund may invest substantially all of its assets in common stocks, the main risk is the risk that the value of the stocks it holds might decrease in response to the activities of an individual company or in response to general market and/or economic conditions. If this occurs, the Fund's share price may also decrease.

The Fund may use short sales, futures, options, swap agreements (including, but not limited to, equity, interest rate, credit default, and total return swaps), and other derivative instruments individually or in combination to "hedge" or protect its portfolio from adverse movements in securities prices and interest rates. The Fund may also use a variety of currency hedging techniques, including the use of forward currency contracts, to manage currency risk. There is no guarantee that the portfolio manager's use of derivative investments will benefit the Fund. The Fund's performance could be worse than if the Fund had not used such instruments. Use of such investments may instead increase risk to the Fund, rather than reduce risk.

The Fund's performance may also be significantly affected, positively or negatively, by the portfolio manager's use of certain types of investments, such as foreign (non-U.S.) securities, non-investment grade bonds ("junk" bonds), initial public offerings ("IPOs"), or securities of companies with relatively small market capitalizations. Note that a portfolio manager's use of IPOs and other types of investments may have a magnified performance impact on a fund with a small asset base and the fund may not experience similar performance as its assets grow.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions, including, but not limited to, a general decline in prices on the stock markets, a general decline in real estate markets, a decline in commodities prices, or if the market favors different types of securities than the types of securities in which the Fund invests. If the value of the Fund's portfolio decreases, the Fund's net asset value will also decrease, which means if you sell your shares in the Fund you may lose money.

It is also important to note that events in both domestic and international equity and fixed-income markets have resulted, and may continue to result, in an unusually high degree of volatility in the markets, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. These events and the resulting market upheavals may have an adverse effect on the Fund, such as a decline in the value and liquidity of many securities held by the Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value, and an increase in Fund expenses. Because the situation is unprecedented and widespread, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Fund's ability to achieve its investment objective. It is impossible to predict whether or for how long these conditions will continue. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

Further, the instability experienced in the financial markets has resulted in the U.S. Government and various other governmental and regulatory entities taking actions to address the financial crisis. These actions include, but are not limited to, the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") in July 2010 which is expected to dramatically change the way in which the U.S. financial system is supervised and regulated. More specifically, the Dodd-Frank Act provides for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, over-the-counter derivatives, investment advisers, credit rating agencies, and mortgage lending, which expands federal oversight in the financial sector and may affect the investment management industry as a whole. Given the broad scope, sweeping nature, and the fact that many provisions of the Dodd-Frank Act must be implemented through future rulemaking, the ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain. As a result, there can be no assurance that these government and regulatory measures will not have an adverse effect on the value or marketability of securities held by the Fund, including potentially limiting or completely restricting the ability of the Fund to use a particular investment instrument as part of its investment strategy, increasing the costs of using these instruments, or possibly making them less effective in general. Furthermore, no assurance can be made that the U.S. Government or any U.S. regulatory entity (or other authority or regulatory entity) will not continue to take further legislative or regulatory action in response to the economic crisis or otherwise, and the effect of such actions, if taken, cannot be known.

In addition, European markets have recently experienced volatility and adverse trends due to concerns about economic downturns, rising government debt levels, and the possible default of government debt in several European countries, including Greece, Ireland, Italy, Portugal, and Spain. A default or debt restructuring by any European country would adversely impact holders of that country's debt and worldwide sellers of credit default swaps linked to that country's creditworthiness. These trends have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of all European countries, which in turn may have a material adverse effect on the Fund's investments in such countries, other countries that depend on European countries for significant amounts of trade or investment, or issuers with exposure to European debt.

Real Estate Securities Risk. An investment in Janus Global Real Estate Fund shares represents an indirect investment in real estate-related securities owned by the Fund. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets. REITs that invest in real estate mortgages are also subject to prepayment risk. In addition to prepayment risk, investments in mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities comprised of under-performing assets may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

REIT Risk. The Fund will be affected by risks associated with investments in REITs. The ability to trade REITs in the secondary market can be more limited than other stocks. The prices of equity REITs are affected by changes in the value of the underlying property owned by the REITs and changes in capital markets and interest rates. The prices of mortgage REITs are affected by the quality of any credit they extend, the creditworthiness of the mortgages they hold, as well as by the value of the property that secures the mortgages. Further, equity REITs and mortgage REITs are dependent upon management skills and generally may not be diversified. Equity REITs and mortgage REITs are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. In addition, equity REITs and mortgage REITs could fail to qualify for tax-free pass-through of income under the Internal Revenue Code. Such a failure would result in the U.S. federal income taxation of a disqualified REIT's distributed income at the REIT level. There is also the risk that borrowers under mortgages held by a REIT or lessees of a property that a REIT owns may be unable to meet their obligations to the REIT. In the event of a default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments. In addition to the foregoing risks, certain "special purpose" REITs in which the Fund may invest may have their assets in specific real property sectors, such as hotel REITs, nursing home REITs or warehouse REITs, and are therefore subject to the risks associated with adverse developments in these sectors.

Small- and Mid-Sized Companies Risk. The Fund's investments in securities issued by small- and mid-sized companies, which tend to be smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. For example, while small- and mid-sized companies may realize more substantial growth than larger or more established issuers, they may also suffer more significant losses as a result of their narrow product lines, limited operating history, greater exposure to competitive threats, limited financial resources, limited trading markets, and the potential lack of management depth. Securities issued by small- and mid-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies. These holdings are also subject to wider price fluctuations and tend to be less liquid than stocks of larger companies, which could have a significant adverse effect on the Fund's returns, especially as market conditions change.

Management of the Fund

INVESTMENT ADVISER

Janus Capital Management LLC, 151 Detroit Street, Denver, Colorado 80206-4805, is the investment adviser to the Fund. Janus Capital is responsible for the day-to-day management of the Fund's investment portfolio and furnishes continuous advice and recommendations concerning the Fund's investments. Janus Capital also provides certain administration and other services and is responsible for other business affairs of the Fund.

Janus Capital (together with its predecessors) has served as investment adviser to Janus mutual funds since 1970 and currently serves as investment adviser to all of the Janus funds, acts as subadviser for a number of private-label mutual funds, and provides separate account advisory services for institutional accounts and other unregistered products.

Janus Capital furnishes certain administration, compliance, and accounting services for the Fund and is reimbursed by the Fund for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Janus Capital provides office space for the Fund. Some expenses related to compensation payable to the Janus funds' Chief Compliance Officer and compliance staff are shared with the Janus funds. The Fund also pays for salaries, fees, and expenses of certain Janus Capital employees and Fund officers, with respect to certain specified administration functions they perform on behalf of the Janus funds. The Janus funds pay these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Fund.

MANAGEMENT EXPENSES

The Fund pays Janus Capital an investment advisory fee and incurs expenses, including the distribution and shareholder servicing fees (12b-1 fee), administrative services fees payable pursuant to the Transfer Agency Agreement, any other transfer agent and custodian fees and expenses, legal and auditing fees, printing and mailing costs of sending reports and other information to existing shareholders, and Independent Trustees' fees and expenses. The Fund's investment advisory fee is calculated daily and paid monthly. The Fund's advisory agreement details the investment advisory fee and other expenses that the Fund must pay.

The table below reflects the Fund's base fee rate (expressed as an annual rate), as well as the actual investment advisory fee rate paid by the Fund to Janus Capital (gross and net of fee waivers).

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to the cumulative investment record of its benchmark index, the FTSE EPRA/NAREIT Global Index, over the performance measurement period. Any adjustment to the investment advisory fee rate was effective December 2008. Until such time, only the base fee rate shown below applied. The third column shows the performance hurdle for outperformance or underperformance during the measurement period relative to the Fund's benchmark index. The fourth column shows the performance adjusted investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period without any fee waivers. The fifth column shows the actual investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period and includes any applicable fee waiver. This fifth column shows the actual amount of the investment advisory fee rate paid by the Fund as of the end of the fiscal year.

As an example, if the Fund outperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would increase by 0.15% (assuming constant assets). Conversely, if the Fund underperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would decrease by 0.15% (assuming constant assets). Actual performance within the full range of the performance hurdle rate may result in positive or negative incremental adjustments to the advisory fee of greater or less than 0.15%. Additional details discussing the performance fee are included below with further description in the SAI.

Fund Name	Base Fee Rate (%)	Performance Hurdle vs. Benchmark Index	Performance Adjusted Investment Advisory Fee Rate (%)	Actual Investment Advisory Fee Rate⁽¹⁾ (%) (for the fiscal year ended September 30, 2012)
Janus Global Real Estate Fund	0.75	±4.00%	0.75	0.74

(1) Janus Capital has agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, the distribution and shareholder servicing fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to a certain level until at least February 1, 2014. Application of the expense waiver and its effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in the Fund Summary of the Prospectus, and additional information is included under "Expense Limitation" below. The waiver and any applicable performance adjustment are not reflected in the base fee rate shown.

The Fund's investment advisory fee rate is determined by calculating a base fee (shown in the previous table) and applying a performance adjustment (described in further detail below). The performance adjustment either increases or decreases the base fee depending on how well the Fund has performed relative to the FTSE EPRA/NAREIT Global Index. Effective July 1, 2010, Janus Global Real Estate Fund's benchmark index changed from the FTSE EPRA/NAREIT Developed Index to the FTSE EPRA/NAREIT Global Index for purposes of measuring the Fund's performance and calculating the performance adjustment. Details regarding the implementation of the new benchmark index are contained in the SAI.

The calculation of the performance adjustment applies as follows:

Investment Advisory Fee = Base Fee Rate +/- Performance Adjustment

The investment advisory fee rate paid to Janus Capital by the Fund consists of two components: (1) a base fee calculated by applying the contractual fixed rate of the advisory fee to the Fund's average daily net assets during the previous month ("Base Fee Rate"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by applying a variable rate of up to 0.15% (positive or negative) to the Fund's average daily net assets during the applicable performance measurement period. The performance measurement period generally is the previous 36 months, although no Performance Adjustment is made until the Fund's performance-based fee structure has been in effect for at least 12 months. When the Fund's performance-based fee structure has been in effect for at least 12 months, but less than 36 months, the performance measurement period is equal to the time that has elapsed since the performance-based fee structure took effect. As noted above, any applicable Performance Adjustment began December 2008 for the Fund.

No Performance Adjustment is applied unless the difference between the Fund's investment performance and the cumulative investment record of the Fund's benchmark index is 0.50% or greater (positive or negative) during the applicable performance measurement period. The Base Fee Rate is subject to an upward or downward Performance Adjustment for every full 0.50% increment by which the Fund outperforms or underperforms its benchmark index. Because the Performance Adjustment is tied to the Fund's relative performance compared to its benchmark index (and not its absolute performance), the Performance Adjustment could increase Janus Capital's fee even if the Fund's Shares lose value during the performance measurement period and could decrease Janus Capital's fee even if the Fund's Shares increase in value during the performance measurement period. For purposes of computing the Base Fee Rate and the Performance Adjustment, net assets are averaged over different periods (average daily net assets during the previous month for the Base Fee Rate, versus average daily net assets during the performance measurement period for the Performance Adjustment). Performance of the Fund is calculated net of expenses whereas the Fund's benchmark index does not have any fees or expenses. Reinvestment of dividends and distributions is included in calculating both the performance of the Fund and the Fund's benchmark index. The Base Fee Rate is calculated and accrued daily. The Performance Adjustment is calculated monthly in arrears and is accrued throughout the month. The investment fee is paid monthly in arrears. Under extreme circumstances involving underperformance by a rapidly shrinking Fund, the dollar amount of the Performance Adjustment could be more than the dollar amount of the Base Fee Rate. In such circumstances, Janus Capital would reimburse the Fund.

The application of an expense limit, if any, will have a positive effect upon the Fund's performance and may result in an increase in the Performance Adjustment. It is possible that the cumulative dollar amount of additional compensation ultimately payable to Janus Capital may, under some circumstances, exceed the cumulative dollar amount of management fees waived by Janus Capital.

The investment performance of the Fund's Class A Shares (waiving the upfront sales load) for the performance measurement period is used to calculate the Performance Adjustment. After Janus Capital determines whether the Fund's performance was above or below its benchmark index by comparing the investment performance of the Fund's load-waived Class A Shares against the cumulative investment record of the Fund's benchmark index, Janus Capital applies the same Performance Adjustment (positive or negative) across each other class of shares of the Fund, as applicable. It is not possible to predict the effect of the Performance Adjustment on future overall compensation to Janus Capital since it depends on the performance of the Fund relative to the record of the Fund's benchmark index and future changes to the size of the Fund.

A discussion regarding the basis for the Trustees' approval of the Fund's investment advisory agreement is included in the Fund's annual or semiannual report to shareholders. You can request the Fund's annual or semiannual reports (as they become available), free of charge, by contacting your plan sponsor, broker-dealer, or financial intermediary, or by contacting a Janus representative at 1-877-335-2687. The reports are also available, free of charge, at janus.com/info.

Expense Limitation

Janus Capital has contractually agreed to waive the advisory fee payable by the Fund in an amount equal to the amount, if any, that the Fund's normal operating expenses in any fiscal year, including the investment advisory fee, but excluding any performance adjustments to management fees, the distribution and shareholder servicing fees (applicable to Class A Shares, Class C Shares, and Class S Shares), administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses, exceed the annual rate shown below. For information about how the expense limit affects the total expenses of the Fund, see the "Fees and Expenses of the Fund" table in the Fund Summary of the Prospectus. Janus Capital has agreed to continue the waiver until at least February 1, 2014.

Fund Name	Expense Limit Percentage (%)
Janus Global Real Estate Fund(1)	0.97

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to its benchmark index during a (1) measurement period. Because a fee waiver will have a positive effect upon the Fund's performance, a fee waiver that is in place during the period when the performance adjustment applies may affect the performance adjustment in a way that is favorable to Janus Capital.

INVESTMENT PERSONNEL

Janus Global Real Estate Fund

Patrick Brophy is Executive Vice President and Portfolio Manager of Janus Global Real Estate Fund, which he has managed since inception. Mr. Brophy is also Portfolio Manager of other Janus accounts. He joined Janus Capital in March 2005. Mr. Brophy holds a Bachelor of Arts degree in History from Dartmouth.

Information about the portfolio manager's compensation structure and other accounts managed, as well as the range of his individual ownership of securities of the Fund he manages and the aggregate range of his individual ownership in all mutual funds advised by Janus Capital, is included in the SAI.

Conflicts of Interest

Janus Capital manages many funds and numerous other accounts, which may include separate accounts and other pooled investment vehicles, such as hedge funds. Side-by-side management of multiple accounts, including the management of a cash collateral pool for securities lending and investing the Janus funds' cash, may give rise to conflicts of interest among those accounts, and may create potential risks, such as the risk that investment activity in one account may adversely affect another account. For example, short sale activity in an account could adversely affect the market value of long positions in one or more other accounts (and vice versa). Side-by-side management may raise additional potential conflicts of interest relating to the allocation of investment opportunities and the aggregation and allocation of trades. Additionally, Janus Capital is the adviser to the Janus "funds of funds," which are funds that invest primarily in other mutual funds managed by Janus Capital. To the extent that the Fund is an underlying fund in a Janus "fund of funds," a potential conflict of interest arises when allocating the assets of the Janus "fund of funds" to the Fund. Purchases and redemptions of fund shares by a Janus "fund of funds" due to reallocations or rebalancings may result in a fund having to sell securities or invest cash when it otherwise would not do so. Such transactions could accelerate the realization of taxable income if sales of securities resulted in gains and could also increase a fund's transaction costs. Large redemptions by a Janus "fund of funds" may cause a fund's

expense ratio to increase due to a resulting smaller asset base. A further discussion of potential conflicts of interest and a discussion of certain procedures intended to mitigate such potential conflicts are contained in the Fund' s SAI.

Other information

CLOSED FUND POLICIES

The Fund may limit sales of its Shares to new investors if Janus Capital and the Trustees believe continued sales may adversely affect the Fund's ability to achieve its investment objective. If sales of the Fund are limited, it is expected that existing shareholders invested in the Fund would be permitted to continue to purchase Shares through their existing Fund accounts and to reinvest any dividends or capital gains distributions in such accounts, absent highly unusual circumstances. Requests for new accounts into a closed fund would be reviewed by management, taking into consideration eligibility requirements and whether the addition to the fund is believed to negatively impact existing fund shareholders. The closed fund may decline opening new accounts, including eligible new accounts, if it would be in the best interests of the fund and its shareholders. If applicable, additional information regarding general policies and exceptions can be found in the closed funds' prospectuses and in the "Shares of the Trust" section of the SAI.

LIQUIDATION/REORGANIZATION OF A FUND

It is important to know that, pursuant to the Trust's Amended and Restated Agreement and Declaration of Trust and in accordance with any applicable regulations and laws, the Trustees have the authority to merge, liquidate, and/or reorganize a fund into another fund without seeking shareholder vote or consent.

DISTRIBUTION OF THE FUND

The Fund is distributed by Janus Distributors LLC ("Janus Distributors"), which is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). To obtain information about FINRA member firms and their associated persons, you may contact FINRA at www.finra.org, or 1-800-289-9999.

Distributions and taxes

DISTRIBUTIONS

To avoid taxation of the Fund, the Internal Revenue Code requires the Fund to distribute all or substantially all of its net investment income and any net capital gains realized on its investments at least annually. The Fund's income from certain dividends, interest, and any net realized short-term capital gains are paid to shareholders as ordinary income dividends. Certain dividend income may be reported to shareholders as "qualified dividend income," which is generally subject to reduced rates of taxation. Net realized long-term capital gains, if any, are paid to shareholders as capital gains distributions, regardless of how long Shares of the Fund have been held. Distributions are made at the class level, so they may vary from class to class within the Fund.

Distribution Schedule

Dividends from net investment income and distributions of capital gains are normally declared and distributed in December but, if necessary, may be distributed at other times as well. The date you receive your distribution may vary depending on how your intermediary processes trades. Please consult your intermediary for details.

How Distributions Affect the Fund's NAV

Distributions are paid to shareholders as of the record date of a distribution of the Fund, regardless of how long the shares have been held. Undistributed dividends and net capital gains are included in the Fund's daily net asset value ("NAV"). The share price of the Fund drops by the amount of the distribution, net of any subsequent market fluctuations. For example, assume that on December 31, the Fund declared a dividend in the amount of \$0.25 per share. If the Fund's share price was \$10.00 on December 30, the Fund's share price on December 31 would be \$9.75, barring market fluctuations. You should be aware that distributions from a taxable mutual fund do not increase the value of your investment and may create income tax obligations.

"Buying a Dividend"

If you purchase shares of the Fund just before a distribution, you will pay the full price for the shares and receive a portion of the purchase price back as a taxable distribution. This is referred to as "buying a dividend." In the above example, if you bought shares on December 30, you would have paid \$10.00 per share. On December 31, the Fund would pay you \$0.25 per share as a dividend and your shares would now be worth \$9.75 per share. Unless your account is set up as a tax-deferred account, dividends paid to you would be included in your gross income for tax purposes, even though you may not have participated in the increase in NAV of the Fund, whether or not you reinvested the dividends. You should consult with your financial intermediary or tax adviser as to potential tax consequences of any distributions that may be paid shortly after purchase.

For your convenience, distributions of net investment income and net capital gains are automatically reinvested in additional Shares of the Fund without any sales charge. To receive distributions in cash, contact your financial intermediary, or a Janus representative (1-800-333-1181) if you hold Class I Shares directly with Janus. Whether reinvested or paid in cash, the distributions may be subject to taxes, unless your shares are held in a qualified tax-deferred plan or account.

TAXES

As with any investment, you should consider the tax consequences of investing in the Fund. Any time you sell or exchange shares of a fund in a taxable account, it is considered a taxable event. For federal income tax purposes, an exchange is treated the same as a sale. Depending on the purchase price and the sale price, you may have a gain or loss on the transaction; whether the gain or loss is long-term or short-term depends on how long you owned the shares. Any tax liabilities generated by your transactions are your responsibility.

The following discussion does not apply to qualified tax-deferred accounts or other non-taxable entities, nor is it a complete analysis of the federal income tax implications of investing in the Fund. You should consult your tax adviser if you have any questions. Additionally, state or local taxes may apply to your investment, depending upon the laws of your state of residence.

Taxes on Distributions

Distributions by the Fund are subject to federal income tax, regardless of whether the distribution is made in cash or reinvested in additional shares of the Fund. When gains from the sale of a security held by the Fund are paid to shareholders, the rate at which the gain will be taxed to shareholders depends on the length of time the Fund held the security. In certain states, a portion of the distributions (depending on the sources of the Fund's income) may be exempt

from state and local taxes. The Fund's net investment income and capital gains are distributed to (and may be taxable to) those persons who are shareholders of the Fund at the record date of such payments. Although the Fund's total net income and net realized gain are the results of its operations, the per share amount distributed or taxable to shareholders is affected by the number of Fund shares outstanding at the record date. Generally, account tax information will be made available to shareholders on or before January 31st of each year. Information regarding distributions may also be reported to the Internal Revenue Service. Please note that you may receive account tax information from Janus Global Real Estate Fund at the end of February of each year, which is one month later than when most such forms are sent. REITs typically recharacterize a portion of the dividends paid during the year from ordinary income to capital gain and/or return of capital (which could relate to depreciation on real estate). The information regarding this recharacterization is generally not made available by the REIT until late January. Therefore, the actual composition of the Fund's distributions during a year may change substantially subsequent to year-end. To the extent these changes occur, they may have the effect of reducing the net investment income component of the Fund's distributions and increasing the capital gains and/or return of capital components.

Distributions made by the Fund with respect to Shares purchased through a qualified retirement plan will generally be exempt from current taxation if left to accumulate within the qualified plan.

Generally, withdrawals from qualified plans may be subject to federal income tax at ordinary income rates and, if made before age 59½, a 10% penalty tax may be imposed. The federal income tax status of your investment depends on the features of your qualified plan. For further information, please contact your plan sponsor or tax adviser.

The Fund may be required to withhold U.S. federal income tax on all distributions and redemptions payable to shareholders who fail to provide their correct taxpayer identification number, fail to make certain required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. The current backup withholding rate is applied.

When shareholders sell Fund shares from a taxable account, they typically receive information on their tax forms that calculates their gain or loss using the average cost method. Prior to January 1, 2012, this information was not reported to the IRS, and shareholders had the option of calculating gains or losses using an alternative IRS permitted method. In accordance with legislation passed by Congress in 2008, however, your intermediary (or the Fund, if you hold Class I Shares directly with Janus) began reporting cost basis information to the IRS for shares purchased on or after January 1, 2012 and sold thereafter. Your intermediary (or the Fund, if you hold Class I Shares directly with Janus) will permit shareholders to elect their preferred cost basis method. In the absence of an election, your cost basis method will be your intermediary's default method, unless you hold Class I Shares directly with Janus in which case the Fund will use an average cost basis method. Please consult your tax adviser to determine the appropriate cost basis method for your particular tax situation and to learn more about how the new cost basis reporting laws apply to you and your investments.

Taxation of the Fund

Dividends, interest, and some capital gains received by the Fund on foreign securities may be subject to foreign tax withholding or other foreign taxes. If the Fund is eligible, it may from year to year make the election permitted under Section 853 of the Internal Revenue Code to pass through such taxes to shareholders as a foreign tax credit. If such an election is not made, any foreign taxes paid or accrued will represent an expense to the Fund.

Certain fund transactions may involve short sales, futures, options, swap agreements, hedged investments, and other similar transactions, and may be subject to special provisions of the Internal Revenue Code that, among other things, can potentially affect the character, amount, timing of distributions to shareholders, and utilization of capital loss carryforwards. The Fund will monitor its transactions and may make certain tax elections and use certain investment strategies where applicable in order to mitigate the effect of these tax provisions, if possible. Certain transactions or strategies utilized by the Fund may generate nonqualified income that can impact an investor's taxes.

The Fund does not expect to pay any federal income or excise taxes because it intends to meet certain requirements of the Internal Revenue Code, including the distribution each year of all its net investment income and net capital gains. It is important that the Fund meets these requirements so that any earnings on your investment will not be subject to federal income taxes twice. Funds that invest in partnerships may be subject to state tax liabilities.

Shareholder' s guide

The Fund offers multiple classes of shares in order to meet the needs of various types of investors.

Class A Shares and Class C Shares are offered through financial intermediary platforms including, but not limited to, traditional brokerage platforms, mutual fund wrap fee programs, bank trust platforms, and retirement platforms. Class A Shares may be offered without an initial sales charge through certain retirement platforms and through certain financial intermediary platforms, including but not limited to, fee-based broker-dealers or financial advisors, primarily on their wrap account platform(s) where such broker-dealer or financial advisor imposes additional fees for services connected to the wrap account. Class A Shares pay up to 0.25% of net assets to financial intermediaries for the provision of distribution services and/or shareholder services on behalf of their clients. Class C Shares pay up to 0.75% of net assets for payment to financial intermediaries for the provision of distribution services and up to 0.25% of net assets for the provision of shareholder services on behalf of their clients. In addition, Class A Shares and Class C Shares pay financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders.

Class S Shares are offered through financial intermediary platforms including, but not limited to, retirement platforms and asset allocation, mutual fund wrap, or other discretionary or nondiscretionary fee-based investment advisory programs. In addition, Class S Shares may be available through certain financial intermediaries who have an agreement with Janus Capital or its affiliates to offer the Shares on their supermarket platforms. Class S Shares pay up to 0.25% of net assets to financial intermediaries for the provision of distribution services and/or shareholder services and up to 0.25% of net assets for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to or on behalf of their clients.

Class I Shares are available through certain financial intermediary platforms including, but not limited to, mutual fund wrap fee programs, managed account programs, asset allocation programs, bank trust platforms, as well as certain retirement platforms. Class I Shares pay financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders. Class I Shares are also available to certain direct institutional investors including, but not limited to, corporations, certain retirement plans, public plans and foundations/endowments.

Class T Shares are available through certain financial intermediary platforms including, but not limited to, mutual fund wrap fee programs, managed account programs, asset allocation programs, bank trust platforms, as well as certain retirement platforms. In addition, Class T Shares may be available through certain financial intermediaries who have an agreement with Janus Capital or its affiliates to offer the Shares on their supermarket platforms. Class T Shares pay up to 0.25% of net assets to financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders.

The Shares are not offered directly to individual investors. Consult with your financial intermediary representative for additional information on whether the Shares are an appropriate investment choice. Certain funds may not be available through certain of these intermediaries and not all financial intermediaries offer all classes of shares. **If your financial intermediary offers more than one class of shares, you should carefully consider which class of shares to purchase. Certain classes have higher expenses than other classes, which may lower the return on your investment. For instructions on how to purchase, exchange, or redeem Shares, contact your financial intermediary or refer to your plan documents. For Class I Shares held directly with Janus, please contact a Janus representative at 1-800-333-1181.**

With certain limited exceptions, the Fund is available only to U.S. citizens or residents, and employees of Janus Capital or its affiliates.

PRICING OF FUND SHARES

The per share NAV for each class is computed by dividing the total value of assets allocated to the class, less liabilities allocated to that class, by the total number of outstanding shares of the class. The Fund's NAV is calculated as of the close of the regular trading session of the New York Stock Exchange ("NYSE") (normally 4:00 p.m. New York time) each day that the NYSE is open ("business day"). However, the NAV may be calculated earlier if trading on the NYSE is restricted, or as permitted by the Securities and Exchange Commission ("SEC"). Foreign securities held by the Fund may be traded on days and at times when the NYSE is closed and the NAV is therefore not calculated. Accordingly, the value of the Fund's holdings may change on days that are not business days in the United States and on which you will not be able to purchase or redeem the Fund's Shares.

The price you pay for purchases of Shares is the public offering price, which is the NAV next determined after your request is received in good order by the Fund or its agents, plus, for Class A Shares, any applicable initial sales charge. The price you pay to sell Shares is also the NAV, although for Class A Shares and Class C Shares, a contingent deferred sales charge may be taken out of the proceeds. Your financial intermediary may charge you a separate or additional fee for processing purchases and redemptions of Shares. In order to receive a day's price, your order must be received in good order by the Fund or its agents by the close of the regular trading session of the NYSE.

Securities held by the Fund are generally valued at market value. Certain short-term instruments maturing within 60 days or less are valued at amortized cost, which approximates market value. If a market quotation for a security is not readily available or is deemed unreliable, or if an event that is expected to affect the value of the security occurs after the close of the principal exchange or market on which the security is traded, and before the close of the NYSE, a fair value of the security (except for short-term instruments maturing within 60 days or less) will be determined in good faith under policies and procedures established by and under the supervision of the Fund's Trustees. Such events include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a non-significant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a non-valued security and a restricted or non-public security. While fair value pricing may be more commonly used with foreign equity securities, it may also be used with, among other things, thinly-traded domestic securities or fixed-income securities. For valuation purposes, quotations of foreign portfolio securities, other assets and liabilities, and forward contracts stated in foreign currency are generally translated into U.S. dollar equivalents at the prevailing market rates. The Fund may use systematic fair valuation models provided by independent pricing services to value foreign equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

Due to the subjective nature of fair value pricing, the Fund's value for a particular security may be different from the last quoted market price. Fair value pricing may reduce arbitrage activity involving the frequent buying and selling of mutual fund shares by investors seeking to take advantage of a perceived lag between a change in the value of the Fund's portfolio securities and the reflection of such change in the Fund's NAV, as further described in the "Excessive Trading" section of this Prospectus. While funds that invest in foreign securities may be at a greater risk for arbitrage activity, such activity may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that the Fund's valuation of a security is different from the security's market value, short-term arbitrage traders buying and/or selling shares of the Fund may dilute the NAV of the Fund, which negatively impacts long-term shareholders. The Fund's fair value pricing and excessive trading policies and procedures may not completely eliminate short-term trading in certain omnibus accounts and other accounts traded through intermediaries.

The value of the securities of other open-end funds held by the Fund, if any, will be calculated using the NAV of such open-end funds, and the prospectuses for such open-end funds explain the circumstances under which they use fair value pricing and the effects of using fair value pricing.

All purchases, exchanges, redemptions, or other account activity must be processed through your financial intermediary or plan sponsor. Your financial intermediary or plan sponsor is responsible for promptly transmitting purchase, redemption, and other requests to the Fund under the arrangements made between your financial intermediary or plan sponsor and its customers. The Fund is not responsible for the failure of any financial intermediary or plan sponsor to carry out its obligations to its customers.

CHOOSING A SHARE CLASS

Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class T Shares are offered by this Prospectus. The Fund offers multiple classes of shares in order to meet the needs of various types of investors. For more information about these classes of Shares and whether or not you are eligible to purchase these Shares, please call 1-877-335-2687.

Each class represents an interest in the same portfolio of investments, but has different charges and expenses, allowing you to choose the class that best meets your needs. For an analysis of fees associated with an investment in each share class or other similar funds, please visit www.finra.org/fundalyzer. When choosing a share class, you should consider:

- how much you plan to invest;
- how long you expect to own the shares;
- the expenses paid by each class; and
- for Class A Shares and Class C Shares, whether you qualify for any reduction or waiver of any sales charges.

You should also consult your financial intermediary about which class is most suitable for you. In addition, you should consider the factors below with respect to each class of Shares:

Class A Shares	
Initial sales charge on purchases	Up to 5.75%(1)
reduction of initial sales charge for purchases of \$50,000 or more	
initial sales charge waived for purchases of \$1 million or more	
Deferred sales charge (CDSC)	None except on certain redemptions of Shares purchased without an initial sales charge(1)
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.25% annual distribution/service fee
Class C Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	1.00% on Shares redeemed within 12 months of purchase(1)
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	\$2,500
Maximum purchase	\$500,000
Minimum aggregate account balance	None
12b-1 fee	1.00% annual fee (up to 0.75% distribution fee and up to 0.25% shareholder servicing fee)
Class S Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.25% annual distribution/service fee

Class I Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	
institutional investors (investing directly with Janus)	\$1,000,000
through an intermediary institution	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None
Class T Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None

(1) May be waived under certain circumstances.

DISTRIBUTION, SERVICING, AND ADMINISTRATIVE FEES

Distribution and Shareholder Servicing Plans

Under separate distribution and shareholder servicing plans adopted in accordance with Rule 12b-1 under the Investment Company Act of 1940, as amended, for Class A Shares and Class S Shares (each a “Plan”) and Class C Shares (the “Class C Plan”), the Fund pays Janus Distributors, the Trust’s distributor, a fee for the sale and distribution and/or shareholder servicing of the Shares based on the average daily net assets of each, at the following annual rates:

Class	12b-1 Fee for the Fund
Class A Shares	0.25%
Class C Shares	1.00%(1)
Class S Shares	0.25%

(1) Up to 0.75% of this fee is for distribution services and up to 0.25% of this fee is for shareholder services.

Under the terms of each Plan, the Trust is authorized to make payments to Janus Distributors for remittance to retirement plan service providers, broker-dealers, bank trust departments, financial advisors, and other financial intermediaries, as compensation for distribution and/or shareholder services performed by such entities for their customers who are investors in the Fund.

Janus Distributors is entitled to retain all fees paid under the Class C Plan for the first 12 months on any investment in Class C Shares to recoup its expenses with respect to the payment of commissions on sales of Class C Shares. Financial intermediaries will become eligible for compensation under the Class C Plan beginning in the 13th month following the purchase of Class C Shares, although Janus Distributors may, pursuant to a written agreement between Janus Distributors and a particular financial intermediary, pay such financial intermediary 12b-1 fees prior to the 13th month following the purchase of Class C Shares.

Financial intermediaries may from time to time be required to meet certain criteria in order to receive 12b-1 fees. Janus Distributors is entitled to retain some or all fees payable under each Plan in certain circumstances, including when there is no broker of record or when certain qualification standards have not been met by the broker of record.

Because 12b-1 fees are paid out of the Fund's assets on an ongoing basis, over time they will increase the cost of your investment and may cost you more than paying other types of sales charges.

Administrative Fees

Class A Shares, Class C Shares, and Class I Shares

Certain, but not all, intermediaries may charge fees for administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided by intermediaries on behalf of shareholders of the Fund. Order processing includes the submission of transactions through the National Securities Clearing Corporation ("NSCC") or similar systems, or those processed on a manual basis with Janus. Other shareholder services may include the provision of order confirmations, periodic account statements, forwarding prospectuses, shareholder reports, and other materials to existing customers, and answering inquiries regarding accounts. Janus Services remits these administrative fees to intermediaries on behalf of the Fund. Janus Services is then reimbursed by the Fund for such payments. Because the form and amount charged varies by intermediary, the amount of the administrative fee borne by the class is an average of all fees charged by intermediaries. In the event an intermediary receiving payments from Janus Services on behalf of the Fund converts from a networking structure to an omnibus account structure, or otherwise experiences increased costs, fees borne by the Shares may increase. The Fund's Trustees have set limits on fees that the Fund may incur with respect to administrative fees paid for omnibus or networked accounts. Such limits are subject to change by the Trustees in the future. Janus Services also seeks reimbursement for costs it incurs as transfer agent and for providing servicing.

Class S Shares and Class T Shares

Janus Services receives an administrative services fee at an annual rate of 0.25% of the average daily net assets of Class S Shares and Class T Shares of the Fund for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Fund. Order processing includes the submission of transactions through the NSCC or similar systems, or those processed on a manual basis with Janus. Other shareholder services may include the provision of order confirmations, periodic account statements, forwarding prospectuses, shareholder reports, and other materials to existing customers, and answering inquiries regarding accounts. Janus Services expects to use all or a significant portion of this fee to compensate intermediaries and retirement plan service providers for providing these services to their customers who invest in the Fund. Janus Services or its affiliates may also pay fees for services provided by intermediaries to the extent the fees charged by intermediaries exceed the 0.25% of net assets charged to the Fund.

PAYMENTS TO FINANCIAL INTERMEDIARIES BY JANUS CAPITAL OR ITS AFFILIATES

From their own assets, Janus Capital or its affiliates may pay selected brokerage firms or other financial intermediaries that sell Class A and Class C Shares of the Janus funds for distribution, marketing, promotional, or related services. Such payments may be based on gross sales, assets under management, or transactional charges, or on a combination of these factors. The amount of these payments is determined from time to time by Janus Capital, may be substantial, and may differ for different financial intermediaries. Payments based primarily on sales create an incentive to make new sales of shares, while payments based on assets create an incentive to retain previously sold shares. Sales- and asset-based payments currently range up to 25 basis points on sales and up to 20 basis points on average annual net assets of shares held through the intermediary and are subject to change. Payments based on transactional charges may include the payment or reimbursement of all or a portion of "ticket charges." Ticket charges are fees charged to salespersons purchasing through a financial intermediary firm in connection with mutual fund purchases, redemptions, or exchanges. The payment or reimbursement of ticket charges creates an incentive for salespersons of an intermediary to sell shares of Janus funds over shares of funds for which there is lesser or no payment or reimbursement of any applicable ticket charge. Janus Capital and its affiliates consider a number of factors in making payments to financial intermediaries, including the distribution capabilities of the intermediary, the overall quality of the relationship, expected gross and/or net sales generated by the relationship, redemption and retention rates of assets held through the intermediary, the willingness of the intermediary to cooperate with Janus Capital's marketing efforts, access to sales personnel, and the anticipated profitability of sales through the institutional relationship. These factors may change from time to time. Currently, these payments are limited to the top 100 distributors (measured by sales or expected sales of shares of the Janus funds). Broker-dealer firms currently receiving or expected to receive these fees are listed in the SAI.

In addition, for all share classes, Janus Capital, Janus Distributors, or their affiliates may pay fees, from their own assets, to brokerage firms, banks, financial advisors, retirement plan service providers, and other financial intermediaries for providing other marketing or distribution-related services, as well as recordkeeping, subaccounting, transaction processing, and other shareholder or administrative services (including payments for processing transactions via NSCC or other means) in connection with investments in the Janus funds. These fees are in addition to any fees that may be paid by the Janus funds for these types of services or other services.

Janus Capital or its affiliates may also share certain marketing expenses with intermediaries, or pay for or sponsor informational meetings, seminars, client awareness events, support for marketing materials, sales reporting, or business building programs for such intermediaries to raise awareness of the Fund. Janus Capital or its affiliates may make payments to participate in intermediary marketing support programs which may provide Janus Capital or its affiliates with one or more of the following benefits: attendance at sales conferences, participation in meetings or training sessions, access to or information about intermediary personnel, use of an intermediary's marketing and communication infrastructure, fund analysis tools, business planning and strategy sessions with intermediary personnel, information on industry- or platform-specific developments, trends and service providers, and other marketing-related services. Such payments may be in addition to, or in lieu of, the payments described above. These payments are intended to promote the sales of Janus funds and to reimburse financial intermediaries, directly or indirectly, for the costs that they or their salespersons incur in connection with educational seminars, meetings, and training efforts about the Janus funds to enable the intermediaries and their salespersons to make suitable recommendations, provide useful services, and maintain the necessary infrastructure to make the Janus funds available to their customers.

The receipt of (or prospect of receiving) payments, reimbursements and other forms of compensation described above may provide a financial intermediary and its salespersons with an incentive to favor sales of Janus funds' shares over sales of other mutual funds (or non-mutual fund investments) or to favor sales of one class of Janus funds' shares over sales of another Janus funds' share class, with respect to which the financial intermediary does not receive such payments or receives them in a lower amount. The receipt of these payments may cause certain financial intermediaries to elevate the prominence of the Janus funds within such financial intermediary's organization by, for example, placement on a list of preferred or recommended funds and/or the provision of preferential or enhanced opportunities to promote the Janus funds in various ways within such financial intermediary's organization.

From time to time, certain financial intermediaries approach Janus Capital to request that Janus Capital make contributions to certain charitable organizations. In these cases, Janus Capital's contribution may result in the financial intermediary, or its salespersons, recommending Janus funds over other mutual funds (or non-mutual fund investments).

The payment arrangements described above will not change the price an investor pays for Shares nor the amount that a Janus fund receives to invest on behalf of the investor. You should consider whether such arrangements exist when evaluating any recommendations from an intermediary to purchase or sell Shares of the Fund and, if applicable, when considering which share class of the Fund is most appropriate for you. Please contact your financial intermediary or plan sponsor for details on such arrangements.

PURCHASES

With the exception of Class I Shares, purchases of Shares may generally be made only through institutional channels such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly with the Fund in certain circumstances as described in the "Minimum Investment Requirements" section. Contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with Janus, or refer to your plan documents for information on how to invest in the Fund, including additional information on minimum initial or subsequent investment requirements. Under certain circumstances, the Fund may permit an in-kind purchase of Shares at the discretion of Janus Capital. Your financial intermediary may charge you a separate or additional fee for processing purchases of Shares. Only certain financial intermediaries are authorized to receive purchase orders on the Fund's behalf. As discussed under "Payments to financial intermediaries by Janus Capital or its affiliates," Janus Capital and its affiliates may make payments to brokerage firms or other financial intermediaries that were instrumental in the acquisition or retention of shareholders for the Fund or that provide services in connection with investments in the Fund. You should consider such arrangements when evaluating any recommendation of the Fund.

The Fund reserves the right to reject any purchase order, including exchange purchases, for any reason. The Fund is not intended for excessive trading. For more information about the Fund's policy on excessive trading, refer to "Excessive Trading."

In compliance with the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"), your financial intermediary is required to verify certain information on your account application as part of its Anti-Money Laundering Program. You will be required to provide your full name, date of birth, social security number, and permanent street address to assist in verifying your identity. You may also be asked to provide documents that may help to establish your identity. Until verification of your identity is made, your financial intermediary may temporarily limit additional share purchases. In addition, your financial intermediary may close an account if they are unable to verify a shareholder's identity. Please contact your financial intermediary if you need additional assistance when completing your application or additional information about the intermediary's Anti-Money Laundering Program.

In an effort to ensure compliance with this law, Janus' Anti-Money Laundering Program (the "Program") provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Minimum Investment Requirements

Class A Shares, Class C Shares, Class S Shares, and Class T Shares

The minimum investment is \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts. Investors in a defined contribution plan through a third party administrator should refer to their plan document or contact their plan administrator for additional information. In addition, accounts held through certain wrap programs may not be subject to these minimums. Investors should refer to their intermediary for additional information.

The maximum purchase in Class C Shares is \$500,000 for any single purchase. The sales charge and expense structure of Class A Shares may be more advantageous for investors purchasing more than \$500,000 of Fund shares.

Class I Shares

The minimum investment is \$1 million for institutional investors investing directly with Janus. Institutional investors generally may meet the minimum investment amount by aggregating multiple accounts within the Fund. Accounts offered through an intermediary institution must meet the minimum investment requirements of \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts. Directors, officers, and employees of Janus Capital Group Inc. ("JCGI") and its affiliates, as well as Trustees and officers of the Fund, may purchase Class I Shares through certain financial intermediaries' institutional platforms. For more information about this program and eligibility requirements, please contact a Janus representative at 1-800-333-1181. Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs. For additional information, contact your intermediary, plan sponsor, administrator, or a Janus representative, as applicable.

Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class T Shares

The Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. If you hold Class I Shares directly with the Fund, you may receive written notice prior to the closure of your Fund account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of a redemption.

The Fund reserves the right to change the amount of these minimums or maximums from time to time or to waive them in whole or in part.

Systematic Purchase Plan

You may arrange for periodic purchases by authorizing your financial intermediary (or a Janus representative, if you hold Class I Shares directly with the Fund) to withdraw the amount of your investment from your bank account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary or a Janus representative for details.

Initial Sales Charge

Class A Shares

An initial sales charge may apply to your purchase of Class A Shares of the Fund based on the amount invested, as set forth in the table below. The sales charge is allocated between Janus Distributors and your financial intermediary. Sales charges, as expressed as a percentage of offering price and as a percentage of your net investment, are shown in the table. The dollar amount of your initial sales charge is calculated as the difference between the public offering price and the net asset value of those shares. Since the offering price is calculated to two decimal places using standard rounding criteria, the number of shares purchased and the dollar amount of your sales charge as a percentage of the offering price and of your net investment may be higher or lower than the amounts set forth in the table depending on whether there was a downward or upward rounding.

Amount of Purchase at Offering Price	Class A Shares Sales Charge as a Percentage of Offering Price ⁽¹⁾	Class A Shares Sales Charge as a Percentage of Net Amount Invested
Under \$50,000	5.75 %	6.10 %
\$50,000 but under \$100,000	4.50 %	4.71 %
\$100,000 but under \$250,000	3.50 %	3.63 %
\$250,000 but under \$500,000	2.50 %	2.56 %
\$500,000 but under \$1,000,000	2.00 %	2.04 %
\$1,000,000 and above	None ⁽²⁾	None

(1) Offering Price includes the initial sales charge.

(2) A contingent deferred sales charge of 1.00% may apply to Class A Shares purchased without an initial sales charge if redeemed within 12 months of purchase.

For purchases of Class A Shares of \$1,000,000 or greater, from its own assets, Janus Distributors may pay financial intermediaries commissions as follows:

1.00% on amounts from \$1,000,000 to \$4,000,000;
plus 0.50% on amounts greater than \$4,000,000 to \$10,000,000;
plus 0.25% on amounts over \$10,000,000.

The purchase totals eligible for these commissions are aggregated on a rolling one year basis so that the rate payable resets to the highest rate annually.

Qualifying for a Reduction or Waiver of Class A Shares Sales Charge

You may be able to lower your Class A Shares sales charge under certain circumstances. For example, you can combine Class A Shares and Class C Shares you already own (either in this Fund or certain other Janus funds) with your current purchase of Class A Shares of the Fund and certain other Janus funds (including Class C Shares of those funds) to take advantage of the breakpoints in the sales charge schedule as set forth above. Certain circumstances under which you may combine such ownership of Shares and purchases are described below. Contact your financial intermediary for more information.

Class A Shares of the Fund may be purchased without an initial sales charge by the following persons (and their spouses and children under 21 years of age): (i) registered representatives and other employees of intermediaries that have selling agreements with Janus Distributors to sell Class A Shares; (ii) directors, officers, and employees of JCGI and its affiliates; and (iii) Trustees and officers of the Trust. In addition, the initial sales charge may be waived on purchases of Class A Shares through financial intermediaries that have entered into an agreement with Janus Distributors that allows the waiver of the sales charge.

In order to obtain a sales charge discount, you should inform your financial intermediary of other accounts in which there are Fund holdings eligible to be aggregated to meet a sales charge breakpoint. These other accounts may include the accounts described under "Aggregating Accounts." You may need to provide documents such as account statements or confirmation statements to prove that the accounts are eligible for aggregation. The Letter of Intent described below requires historical cost

information in certain circumstances. You should retain records necessary to show the price you paid to purchase Fund shares, as the Fund, its agents, or your financial intermediary may not retain this information.

Right of Accumulation. You may purchase Class A Shares of the Fund at a reduced sales charge determined by aggregating the dollar amount of the new purchase (measured by the offering price) and the total prior day's net asset value (net amount invested) of all Class A Shares of the Fund and of certain other classes (Class A Shares and Class C Shares of the Trust) of Janus funds then held by you, or held in accounts identified under "Aggregating Accounts," and applying the sales charge applicable to such aggregate amount. In order for your purchases and holdings to be aggregated for purposes of qualifying for such discount, they must have been made through one financial intermediary and you must provide sufficient information to your financial intermediary at the time of purchase to permit verification that the purchase qualifies for the reduced sales charge. The right of accumulation is subject to modification or discontinuance at any time with respect to all shares purchased thereafter.

Letter of Intent. You may obtain a reduced sales charge on Class A Shares by signing a Letter of Intent indicating your intention to purchase \$50,000 or more of Class A Shares (including Class A Shares in other series of the Trust) over a 13-month period. The term of the Letter of Intent will commence upon the date you sign the Letter of Intent. You must refer to such Letter when placing orders. With regard to a Letter of Intent, the amount of investment for purposes of applying the sales load schedule includes (i) the historical cost (what you actually paid for the shares at the time of purchase, including any sales charges) of all Class A Shares acquired during the term of the Letter of Intent, minus (ii) the value of any redemptions of Class A Shares made during the term of the Letter of Intent. Each investment made during the period receives the reduced sales charge applicable to the total amount of the investment goal. A portion of shares purchased may be held in escrow to pay for any sales charge that may be applicable. If the goal is not achieved within the period, you must pay the difference between the sales charges applicable to the purchases made and the charges previously paid, or an appropriate number of escrowed shares will be redeemed. Please contact your financial intermediary to obtain a Letter of Intent application.

Aggregating Accounts. To take advantage of lower Class A Shares sales charges on large purchases or through the exercise of a Letter of Intent or right of accumulation, investments made by you, your spouse, and your children under age 21 may be aggregated if made for your own account(s) and/or certain other accounts such as:

- trust accounts established by the above individuals (or the accounts of the primary beneficiary of the trust if the person who established the trust is deceased);
- solely controlled business accounts; and
- single participant retirement plans.

To receive a reduced sales charge under rights of accumulation or a Letter of Intent, you must notify your financial intermediary of any eligible accounts that you, your spouse, and your children under age 21 have at the time of your purchase.

You may access information regarding sales loads, breakpoint discounts, and purchases of the Fund's shares, free of charge, and in a clear and prominent format, on our website at janus.com/breakpoints, and by following the appropriate hyperlinks to the specific information.

Commission on Class C Shares

Janus Distributors may compensate your financial intermediary at the time of sale at a commission rate of 1.00% of the net asset value of the Class C Shares purchased. Service providers to qualified plans or other financial intermediaries will not receive this amount if they receive 12b-1 fees from the time of initial investment of assets in Class C Shares.

EXCHANGES

Contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with the Fund, or consult your plan documents to exchange into other funds in the Trust. Be sure to read the prospectus of the fund into which you are exchanging. An exchange from one fund to another is generally a taxable transaction (except for certain tax-deferred accounts).

You may generally exchange Shares of the Fund for Shares of the same class of any other fund in the Trust offered through your financial intermediary or qualified plan.

You may also exchange shares of one class for another class of shares within the same fund, provided the eligibility requirements of the class of shares to be received are met. Same-fund exchanges will only be processed in instances where there is no contingent deferred sales charge ("CDSC") on the shares to be exchanged and no initial sales charge on the shares to be received. The Fund's fees and expenses differ between share classes. Please read the Prospectus for the share class you are interested in prior to investing in that share class. Contact your financial intermediary or consult your plan documents for additional information.

You must meet the minimum investment amount for each fund.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. The Fund may suspend or terminate your exchange privilege if you make more than one round trip in the Fund in a 90-day period and may bar future purchases in the Fund or any of the other Janus funds. The Fund will work with intermediaries to apply the Fund's exchange limit. However, the Fund may not always have the ability to monitor or enforce the trading activity in such accounts. For more information about the Fund's policy on excessive trading, refer to "Excessive Trading."

The Fund reserves the right to reject any exchange request and to modify or terminate the exchange privilege at any time.

Waiver of Sales Charges

Class A Shares received through an exchange of Class A Shares of another fund of the Trust will not be subject to any initial sales charge of the Fund's Class A Shares. Class A Shares or Class C Shares received through an exchange of Class A Shares or Class C Shares, respectively, of another fund of the Trust will not be subject to any applicable CDSC at the time of the exchange. Any CDSC applicable to redemptions of Class A Shares or Class C Shares will continue to be measured on the Shares received by exchange from the date of your original purchase. For more information about the CDSC, please refer to "Redemptions." While Class C Shares do not have any front-end sales charges, their higher annual fund operating expenses mean that over time, you could end up paying more than the equivalent of the maximum allowable front-end sales charge.

REDEMPTIONS

Redemptions, like purchases, may generally be effected only through financial intermediaries, retirement platforms, and by certain direct institutional investors holding Class I Shares. Please contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with the Fund, or refer to the appropriate plan documents for details. Your financial intermediary may charge a processing or service fee in connection with the redemption of Shares.

Shares of the Fund may be redeemed on any business day on which the Fund's NAV is calculated. Redemptions are duly processed at the NAV next calculated after your redemption order is received in good order by the Fund or its agents. Redemption proceeds, less any applicable CDSC for Class A Shares or Class C Shares, will normally be sent the business day following receipt of the redemption order.

The Fund reserves the right to postpone payment of redemption proceeds for up to seven calendar days. Additionally, the right to require the Fund to redeem its Shares may be suspended, or the date of payment may be postponed beyond seven calendar days, whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable.

The Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. If you hold Class I Shares directly with the Fund, you may receive written notice prior to the closure of your Fund account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of a redemption.

Large Shareholder Redemptions

Certain accounts or Janus affiliates may from time to time own (beneficially or of record) or control a significant percentage of the Fund's Shares. Redemptions by these accounts of their holdings in the Fund may impact the Fund's liquidity and NAV. These redemptions may also force the Fund to sell securities, which may negatively impact the Fund's brokerage costs.

Redemptions In-Kind

Shares normally will be redeemed for cash, although the Fund retains the right to redeem some or all of its shares in-kind under unusual circumstances, in order to protect the interests of remaining shareholders, to accommodate a request by a particular shareholder that does not adversely affect the interests of the remaining shareholders, or in connection with the liquidation of a fund, by delivery of securities selected from its assets at its discretion. However, the Fund is required to redeem shares solely for cash up to the lesser of \$250,000 or 1% of the NAV of the Fund during any 90-day period for any one shareholder. Should redemptions by any shareholder exceed such limitation, the Fund will have the option of redeeming the excess in cash or in-kind. In-kind payment means payment will be made in portfolio securities rather than cash. If this occurs, the redeeming shareholder might incur brokerage or other transaction costs to convert the securities to cash, whereas such costs are borne by the Fund for cash redemptions.

While the Fund may pay redemptions in-kind, the Fund may instead choose to raise cash to meet redemption requests through the sale of fund securities or permissible borrowings. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and may increase brokerage costs.

Systematic Withdrawal Plan

Class A Shares and Class C Shares

You may arrange for periodic redemptions of Class A Shares or Class C Shares by authorizing your financial intermediary to redeem a specified amount from your account on a day or days you specify. Any resulting CDSC may be waived through financial intermediaries that have entered into an agreement with Janus Distributors. The maximum annual rate at which shares subject to a CDSC may be redeemed, pursuant to a systematic withdrawal plan, without paying a CDSC, is 12% of the net asset value of the account. Certain other terms and minimums may apply. Not all financial intermediaries offer this plan. Contact your financial intermediary for details.

Class S Shares, Class I Shares, and Class T Shares

You may arrange for periodic redemptions by authorizing your financial intermediary (or a Janus representative, if you hold Class I Shares directly with the Fund) to redeem a specified amount from your account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary or a Janus representative for details.

Contingent Deferred Sales Charge

Class A Shares and Class C Shares

A 1.00% CDSC may be deducted with respect to Class A Shares purchased without an initial sales charge if redeemed within 12 months of purchase, unless any of the CDSC waivers listed apply. A 1.00% CDSC will be deducted with respect to Class C Shares redeemed within 12 months of purchase, unless a CDSC waiver applies. The CDSC will be based on the lower of the original purchase price or the value of the redemption of the Class A Shares or Class C Shares redeemed, as applicable.

CDSC Waivers

There are certain cases in which you may be exempt from a CDSC charged to Class A Shares and Class C Shares. Among others, these include:

Upon the death or disability of an account owner;

Retirement plans and certain other accounts held through a financial intermediary that has entered into an agreement with Janus Distributors to waive CDSCs for such accounts;

Retirement plan shareholders taking required minimum distributions;

The redemption of Class A Shares or Class C Shares acquired through reinvestment of Fund dividends or distributions;

The portion of the redemption representing appreciation as a result of an increase in NAV above the total amount of payments for Class A Shares or Class C Shares during the period during which the CDSC applied; or

If the Fund chooses to liquidate or involuntarily redeem shares in your account.

To keep the CDSC as low as possible, Class A Shares or Class C Shares not subject to any CDSC will be redeemed first, followed by shares held longest.

Reinstatement Privilege

After you have redeemed Class A Shares, you have a one-time right to reinvest the proceeds into Class A Shares of the same or another fund within 90 days of the redemption date at the current NAV (without an initial sales charge). You will not be reimbursed for any CDSC paid on your redemption of Class A Shares.

EXCESSIVE TRADING

Excessive Trading Policies and Procedures

The Trustees have adopted policies and procedures with respect to short-term and excessive trading of Fund shares (“excessive trading”). The Fund is intended for long-term investment purposes only, and the Fund will take reasonable steps to attempt to detect and deter short-term and excessive trading. Transactions placed in violation of the Fund’s exchange limits or excessive trading policies may be cancelled or revoked by the Fund by the next business day following receipt by the Fund. The trading history of accounts determined to be under common ownership or control within any of the Janus funds may be considered in enforcing these policies and procedures. As described below, however, the Fund may not be able to identify all instances of excessive trading or completely eliminate the possibility of excessive trading. In particular, it may be difficult to identify excessive trading in certain omnibus accounts and other accounts traded through intermediaries. By their nature, omnibus accounts, in which purchases and redemptions of the Fund’s shares by multiple investors are aggregated by the intermediary and presented to the Fund on a net basis, may effectively conceal the identity of individual investors and their transactions from the Fund and its agents. This makes the elimination of excessive trading in the accounts impractical without the assistance of the intermediary.

The Fund attempts to deter excessive trading through at least the following methods:

- exchange limitations as described under “Exchanges;”
- trade monitoring; and
- fair valuation of securities as described under “Pricing of Fund Shares.”

Generally, a purchase and redemption of Shares from the Fund (i.e., “round trip”) within 90 calendar days may result in enforcement of the Fund’s excessive trading policies and procedures with respect to future purchase orders, provided that the Fund reserves the right to reject any purchase request as explained above.

The Fund monitors for patterns of shareholder frequent trading and may suspend or permanently terminate the exchange privilege of any investor who makes more than one round trip in the Fund over a 90-day period, and may bar future purchases into the Fund and any of the other Janus funds by such investor. The Fund’s excessive trading policies generally do not apply to (i) a money market fund, although money market funds at all times reserve the right to reject any purchase request (including exchange purchases) for any reason without prior notice; (ii) transactions in the Janus funds by a Janus “fund of funds,” which is a fund that primarily invests in other Janus mutual funds; and (iii) identifiable transactions by certain funds of funds and asset allocation programs to realign portfolio investments with existing target allocations.

The Fund’s Trustees may approve from time to time a redemption fee to be imposed by any Janus fund, subject to 60 days’ notice to shareholders of that fund.

Investors who place transactions through the same financial intermediary on an omnibus basis may be deemed part of a group for the purpose of the Fund’s excessive trading policies and procedures and may be rejected in whole or in part by the Fund. The Fund, however, cannot always identify or reasonably detect excessive trading that may be facilitated by financial intermediaries or made difficult to identify through the use of omnibus accounts by those intermediaries that transmit purchase, exchange, and redemption orders to the Fund, and thus the Fund may have difficulty curtailing such activity. Transactions accepted by a financial intermediary in violation of the Fund’s excessive trading policies may be cancelled or revoked by the Fund by the next business day following receipt by the Fund.

In an attempt to detect and deter excessive trading in omnibus accounts, the Fund or its agents may require intermediaries to impose restrictions on the trading activity of accounts traded through those intermediaries. Such restrictions may include, but are not limited to, requiring that trades be placed by U.S. mail, prohibiting future purchases by investors who have recently redeemed Fund shares, requiring intermediaries to report information about customers who purchase and redeem large amounts, and similar restrictions. The Fund’s ability to impose such restrictions with respect to accounts traded through particular intermediaries may vary depending on the systems’ capabilities, applicable contractual and legal restrictions, and cooperation of those intermediaries.

Certain transactions in Fund shares, such as periodic rebalancing through intermediaries (no more frequently than every 60 days) or those which are made pursuant to systematic purchase, exchange, or redemption programs generally do not raise excessive trading concerns and normally do not require application of the Fund's methods to detect and deter excessive trading.

The Fund also reserves the right to reject any purchase request (including exchange purchases) by any investor or group of investors for any reason without prior notice, including, in particular, if the trading activity in the account(s) is deemed to be disruptive to the Fund. For example, the Fund may refuse a purchase order if the Fund's portfolio manager believes he would be unable to invest the money effectively in accordance with the Fund's investment policies or the Fund would otherwise be adversely affected due to the size of the transaction, frequency of trading, or other factors.

The Fund's policies and procedures regarding excessive trading may be modified at any time by the Fund's Trustees.

Excessive Trading Risks

Excessive trading may present risks to the Fund's long-term shareholders. Excessive trading into and out of the Fund may disrupt portfolio investment strategies, may create taxable gains to remaining Fund shareholders, and may increase Fund expenses, all of which may negatively impact investment returns for all remaining shareholders, including long-term shareholders.

Funds that invest in foreign securities may be at a greater risk for excessive trading. Investors may attempt to take advantage of anticipated price movements in securities held by a fund based on events occurring after the close of a foreign market that may not be reflected in the fund's NAV (referred to as "price arbitrage"). Such arbitrage opportunities may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that the Fund's valuation of a security differs from the security's market value, short-term arbitrage traders may dilute the NAV of the Fund, which negatively impacts long-term shareholders. Although the Fund has adopted fair valuation policies and procedures intended to reduce the Fund's exposure to price arbitrage, stale pricing, and other potential pricing inefficiencies, under such circumstances there is potential for short-term arbitrage trades to dilute the value of Fund shares.

Although the Fund takes steps to detect and deter excessive trading pursuant to the policies and procedures described in this Prospectus and approved by the Trustees, there is no assurance that these policies and procedures will be effective in limiting excessive trading in all circumstances. For example, the Fund may be unable to completely eliminate the possibility of excessive trading in certain omnibus accounts and other accounts traded through intermediaries. Omnibus accounts may effectively conceal the identity of individual investors and their transactions from the Fund and its agents. This makes the Fund's identification of excessive trading transactions in the Fund through an omnibus account difficult and makes the elimination of excessive trading in the account impractical without the assistance of the intermediary. Although the Fund encourages intermediaries to take necessary actions to detect and deter excessive trading, some intermediaries may be unable or unwilling to do so, and accordingly, the Fund cannot eliminate completely the possibility of excessive trading.

Shareholders that invest through an omnibus account should be aware that they may be subject to the policies and procedures of their financial intermediary with respect to excessive trading in the Fund.

AVAILABILITY OF PORTFOLIO HOLDINGS INFORMATION

The Mutual Fund Holdings Disclosure Policies and Procedures adopted by Janus Capital and all mutual funds managed within the Janus fund complex are designed to be in the best interests of the funds and to protect the confidentiality of the funds' portfolio holdings. The following describes policies and procedures with respect to disclosure of portfolio holdings.

Full Holdings. The Fund is required to disclose its complete holdings in the quarterly holdings report on Form N-Q within 60 days of the end of the first and third fiscal quarters, and in the annual report and semiannual report to Fund shareholders. These reports (i) are available on the SEC's website at <http://www.sec.gov>; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) are available without charge, upon request, by calling a Janus representative at 1-800-525-0020 (toll free). Portfolio holdings, consisting of at least the names of the holdings, are generally available on a calendar quarter-end basis with a 30-day lag. Holdings are generally posted approximately two business days thereafter under Full Holdings for the Fund at janus.com/info.

The Fund may provide, upon request, historical full holdings on a monthly basis for periods prior to the previous quarter-end subject to a written confidentiality agreement.

Top Holdings. The Fund's top portfolio holdings, in order of position size and as a percentage of the Fund's total portfolio, are available monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag.

Other Information. The Fund may occasionally provide security breakdowns (e.g., industry, sector, regional, market capitalization, and asset allocation), top performance contributors/detractors (consisting of security names in alphabetical order), and specific portfolio level performance attribution information and statistics monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag. Top performance contributors/detractors provided at calendar quarter-end may include the percentage of contribution/detraction to Fund performance.

Full portfolio holdings will remain available on the Janus websites at least until a Form N-CSR or Form N-Q is filed with the SEC for the period that includes the date as of which the website information is current. Funds disclose their short positions, if applicable, only to the extent required in regulatory reports. Janus Capital may exclude from publication on its websites all or any portion of portfolio holdings or change the time periods of disclosure as deemed necessary to protect the interests of the Janus funds. Under extraordinary circumstances, exceptions to the Mutual Fund Holdings Disclosure Policies and Procedures may be made by Janus Capital's Chief Investment Officer(s) or their delegates. Such exceptions may be made without prior notice to shareholders. A summary of the Fund's portfolio holdings disclosure policies and procedures, which includes a discussion of any exceptions, is contained in the Fund's SAI.

SHAREHOLDER COMMUNICATIONS

Your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with the Fund) is responsible for sending you periodic statements of all transactions, along with trade confirmations and tax reporting, as required by applicable law.

Your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with the Fund) is responsible for providing annual and semiannual reports, including the financial statements of the Fund. These reports show the Fund's investments and the market value of such investments, as well as other information about the Fund and its operations. Please contact your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with the Fund) to obtain these reports. The Fund's fiscal year ends September 30.

Financial highlights

The financial highlights tables are intended to help you understand the Fund's financial performance for each fiscal period shown. Items "Net asset value, beginning of period" through "Net asset value, end of period" reflect financial results for a single Fund Share. The gross expense ratio reflects expenses prior to any expense offset arrangement and waivers (reimbursements), if applicable. The net expense ratio reflects expenses after any expense offset arrangement and waivers (reimbursements), if applicable. The information for the fiscal periods shown has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Annual Report, which is available upon request, and incorporated by reference into the SAI.

The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in the Shares of the Fund (assuming reinvestment of all dividends and distributions).

(2) Period July 6, 2009 (commencement of Class T Shares) through July 31, 2009.

(3) Redemption fees were eliminated effective April 2, 2012.

(4) Redemption fees aggregated less than \$0.01 on a per share basis for the fiscal year end.

(5) Not annualized for periods of less than one full year.

(6) Annualized for periods of less than one full year.

Glossary of investment terms

This glossary provides a more detailed description of some of the types of securities, investment strategies, and other instruments in which the Fund may invest, as well as some general investment terms. The Fund may invest in these instruments to the extent permitted by its investment objective and policies. The Fund is not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in this Prospectus.

EQUITY AND DEBT SECURITIES

Average-Weighted Effective Maturity is a measure of a bond's maturity. The stated maturity of a bond is the date when the issuer must repay the bond's entire principal value to an investor. Some types of bonds may also have an "effective maturity" that is shorter than the stated date due to prepayment or call provisions. Securities without prepayment or call provisions generally have an effective maturity equal to their stated maturity. Average-weighted effective maturity is calculated by averaging the effective maturity of bonds held by a Fund with each effective maturity "weighted" according to the percentage of net assets that it represents.

Bank loans include institutionally-traded floating and fixed-rate debt securities generally acquired as a participation interest in or assignment of a loan originated by a lender or financial institution. Assignments and participations involve credit, interest rate, and liquidity risk. Interest rates on floating rate securities adjust with interest rate changes and/or issuer credit quality. If a Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, a Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. A Fund may have difficulty trading assignments and participations to third parties or selling such securities in secondary markets, which in turn may affect the Fund's NAV.

Bonds are debt securities issued by a company, municipality, government, or government agency. The issuer of a bond is required to pay the holder the amount of the loan (or par value of the bond) at a specified maturity and to make scheduled interest payments.

Certificates of Participation ("COPs") are certificates representing an interest in a pool of securities. Holders are entitled to a proportionate interest in the underlying securities. Municipal lease obligations are often sold in the form of COPs. Refer to "Municipal lease obligations" below.

Commercial paper is a short-term debt obligation with a maturity ranging from 1 to 270 days issued by banks, corporations, and other borrowers to investors seeking to invest idle cash. A Fund may purchase commercial paper issued in private placements under Section 4(2) of the Securities Act of 1933, as amended (the "1933 Act").

Common stocks are equity securities representing shares of ownership in a company and usually carry voting rights and earn dividends. Unlike preferred stock, dividends on common stock are not fixed but are declared at the discretion of the issuer's board of directors.

Convertible securities are preferred stocks or bonds that pay a fixed dividend or interest payment and are convertible into common stock at a specified price or conversion ratio.

Debt securities are securities representing money borrowed that must be repaid at a later date. Such securities have specific maturities and usually a specific rate of interest or an original purchase discount.

Depository receipts are receipts for shares of a foreign-based corporation that entitle the holder to dividends and capital gains on the underlying security. Receipts include those issued by domestic banks (American Depositary Receipts), foreign banks (Global or European Depositary Receipts), and broker-dealers (depository shares).

Duration is the time it will take investors to recoup their investment in a bond. Unlike average maturity, duration reflects both principal and interest payments. Generally, the higher the coupon rate on a bond, the lower its duration will be. The duration of a bond portfolio is calculated by averaging the duration of bonds held by a Fund with each duration "weighted" according to the percentage of net assets that it represents. Because duration accounts for interest payments, a Fund's duration is usually shorter than its average maturity.

Equity securities generally include domestic and foreign common stocks; preferred stocks; securities convertible into common stocks or preferred stocks; warrants to purchase common or preferred stocks; and other securities with equity characteristics.

Exchange-traded funds (“ETFs”) are index-based investment companies which hold substantially all of their assets in securities with equity characteristics. As a shareholder of another investment company, a Fund would bear its pro rata portion of the other investment company’s expenses, including advisory fees, in addition to the expenses the Fund bears directly in connection with its own operations.

Fixed-income securities are securities that pay a specified rate of return. The term generally includes short- and long-term government, corporate, and municipal obligations that pay a specified rate of interest, dividends, or coupons for a specified period of time. Coupon and dividend rates may be fixed for the life of the issue or, in the case of adjustable and floating rate securities, for a shorter period.

High-yield/high-risk bonds are bonds that are rated below investment grade by the primary rating agencies (i.e., BB+ or lower by Standard & Poor’s and Fitch, or Ba or lower by Moody’s). Other terms commonly used to describe such bonds include “lower rated bonds,” “non-investment grade bonds,” and “junk bonds.”

Industrial development bonds are revenue bonds that are issued by a public authority but which may be backed only by the credit and security of a private issuer and may involve greater credit risk. Refer to “Municipal securities” below.

Mortgage- and asset-backed securities are shares in a pool of mortgages or other debt instruments. These securities are generally pass-through securities, which means that principal and interest payments on the underlying securities (less servicing fees) are passed through to shareholders on a pro rata basis. These securities involve prepayment risk, which is the risk that the underlying mortgages or other debt may be refinanced or paid off prior to their maturities during periods of declining interest rates. In that case, a Fund may have to reinvest the proceeds from the securities at a lower rate. Potential market gains on a security subject to prepayment risk may be more limited than potential market gains on a comparable security that is not subject to prepayment risk.

Mortgage dollar rolls are transactions in which a Fund sells a mortgage-related security, such as a security issued by Government National Mortgage Association, to a dealer and simultaneously agrees to purchase a similar security (but not the same security) in the future at a predetermined price. A “dollar roll” can be viewed as a collateralized borrowing in which a Fund pledges a mortgage-related security to a dealer to obtain cash.

Municipal lease obligations are revenue bonds backed by leases or installment purchase contracts for property or equipment. Lease obligations may not be backed by the issuing municipality’s credit and may involve risks not normally associated with general obligation bonds and other revenue bonds. For example, their interest may become taxable if the lease is assigned and the holders may incur losses if the issuer does not appropriate funds for the lease payments on an annual basis, which may result in termination of the lease and possible default.

Municipal securities are bonds or notes issued by a U.S. state or political subdivision. A municipal security may be a general obligation backed by the full faith and credit (i.e., the borrowing and taxing power) of a municipality or a revenue obligation paid out of the revenues of a designated project, facility, or revenue source.

Pass-through securities are shares or certificates of interest in a pool of debt obligations that have been repackaged by an intermediary, such as a bank or broker-dealer.

Passive foreign investment companies (“PFICs”) are any foreign corporations which generate certain amounts of passive income or hold certain amounts of assets for the production of passive income. Passive income includes dividends, interest, royalties, rents, and annuities. To avoid taxes and interest that a Fund must pay if these investments are profitable, the Fund may make various elections permitted by the tax laws. These elections could require that a Fund recognize taxable income, which in turn must be distributed, before the securities are sold and before cash is received to pay the distributions.

Pay-in-kind bonds are debt securities that normally give the issuer an option to pay cash at a coupon payment date or give the holder of the security a similar bond with the same coupon rate and a face value equal to the amount of the coupon payment that would have been made.

Preferred stocks are equity securities that generally pay dividends at a specified rate and have preference over common stock in the payment of dividends and liquidation. Preferred stock generally does not carry voting rights.

Real estate investment trust (“REIT”) is an investment trust that operates through the pooled capital of many investors who buy its shares. Investments are in direct ownership of either income property or mortgage loans.

Rule 144A securities are securities that are not registered for sale to the general public under the 1933 Act, but that may be resold to certain institutional investors.

Standby commitment is a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred, or assigned only with the underlying security or securities. A standby commitment entitles the holder to receive same day settlement, and will be considered to be from the party to whom the investment company will look for payment of the exercise price.

Step coupon bonds are high-quality issues with above-market interest rates and a coupon that increases over the life of the bond. They may pay monthly, semiannual, or annual interest payments. On the date of each coupon payment, the issuer decides whether to call the bond at par, or whether to extend it until the next payment date at the new coupon rate.

Strip bonds are debt securities that are stripped of their interest (usually by a financial intermediary) after the securities are issued. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities of comparable maturity.

Tender option bonds are relatively long-term bonds that are coupled with the option to tender the securities to a bank, broker-dealer, or other financial institution at periodic intervals and receive the face value of the bond. This investment structure is commonly used as a means of enhancing a security’s liquidity.

U.S. Government securities include direct obligations of the U.S. Government that are supported by its full faith and credit. Treasury bills have initial maturities of less than one year, Treasury notes have initial maturities of one to ten years, and Treasury bonds may be issued with any maturity but generally have maturities of at least ten years. U.S. Government securities also include indirect obligations of the U.S. Government that are issued by federal agencies and government sponsored entities. Unlike Treasury securities, agency securities generally are not backed by the full faith and credit of the U.S. Government. Some agency securities are supported by the right of the issuer to borrow from the Treasury, others are supported by the discretionary authority of the U.S. Government to purchase the agency’s obligations, and others are supported only by the credit of the sponsoring agency.

Variable and floating rate securities have variable or floating rates of interest and, under certain limited circumstances, may have varying principal amounts. Variable and floating rate securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to some interest rate index or market interest rate (the “underlying index”). The floating rate tends to decrease the security’s price sensitivity to changes in interest rates.

Warrants are securities, typically issued with preferred stock or bonds, which give the holder the right to buy a proportionate amount of common stock at a specified price. The specified price is usually higher than the market price at the time of issuance of the warrant. The right may last for a period of years or indefinitely.

Zero coupon bonds are debt securities that do not pay regular interest at regular intervals, but are issued at a discount from face value. The discount approximates the total amount of interest the security will accrue from the date of issuance to maturity. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities.

FUTURES, OPTIONS, AND OTHER DERIVATIVES

Credit default swaps are a specific kind of counterparty agreement that allows the transfer of third party credit risk from one party to the other. One party in the swap is a lender and faces credit risk from a third party, and the counterparty in the credit default swap agrees to insure this risk in exchange for regular periodic payments.

Derivatives are financial instruments whose performance is derived from the performance of another asset (stock, bond, commodity, currency, interest rate or market index). Types of derivatives can include, but are not limited to options, forward contracts, swaps, and futures contracts.

Equity-linked structured notes are derivative securities which are specially designed to combine the characteristics of one or more underlying securities and their equity derivatives in a single note form. The return and/or yield or income component

may be based on the performance of the underlying equity securities, an equity index, and/or option positions. Equity-linked structured notes are typically offered in limited transactions by financial institutions in either registered or non-registered form. An investment in equity-linked notes creates exposure to the credit risk of the issuing financial institution, as well as to the market risk of the underlying securities. There is no guaranteed return of principal with these securities, and the appreciation potential of these securities may be limited by a maximum payment or call right. In certain cases, equity-linked notes may be more volatile and less liquid than less complex securities or other types of fixed-income securities. Such securities may exhibit price behavior that does not correlate with other fixed-income securities.

Equity swaps involve the exchange by two parties of future cash flow (e.g., one cash flow based on a referenced interest rate and the other based on the performance of stock or a stock index).

Forward contracts are contracts to purchase or sell a specified amount of a financial instrument for an agreed upon price at a specified time. Forward contracts are not currently exchange-traded and are typically negotiated on an individual basis. A Fund may enter into forward currency contracts for investment purposes or to hedge against declines in the value of securities denominated in, or whose value is tied to, a currency other than the U.S. dollar or to reduce the impact of currency appreciation on purchases of such securities. It may also enter into forward contracts to purchase or sell securities or other financial indices.

Futures contracts are contracts that obligate the buyer to receive and the seller to deliver an instrument or money at a specified price on a specified date. A Fund may buy and sell futures contracts on foreign currencies, securities, and financial indices including indices of U.S. Government, foreign government, equity, or fixed-income securities. A Fund may also buy options on futures contracts. An option on a futures contract gives the buyer the right, but not the obligation, to buy or sell a futures contract at a specified price on or before a specified date. Futures contracts and options on futures are standardized and traded on designated exchanges.

Indexed/structured securities are typically short- to intermediate-term debt securities whose value at maturity or interest rate is linked to currencies, interest rates, equity securities, indices, commodity prices, or other financial indicators. Such securities may be positively or negatively indexed (e.g., their value may increase or decrease if the reference index or instrument appreciates). Indexed/structured securities may have return characteristics similar to direct investments in the underlying instruments and may be more volatile than the underlying instruments. A Fund bears the market risk of an investment in the underlying instruments, as well as the credit risk of the issuer.

Interest rate swaps involve the exchange by two parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments).

Inverse floaters are debt instruments whose interest rate bears an inverse relationship to the interest rate on another instrument or index. For example, upon reset, the interest rate payable on the inverse floater may go down when the underlying index has risen. Certain inverse floaters may have an interest rate reset mechanism that multiplies the effects of change in the underlying index. Such mechanism may increase the volatility of the security's market value.

Options are the right, but not the obligation, to buy or sell a specified amount of securities or other assets on or before a fixed date at a predetermined price. A Fund may purchase and write put and call options on securities, securities indices, and foreign currencies. A Fund may purchase or write such options individually or in combination.

Participatory notes are derivative securities which are linked to the performance of an underlying Indian security and which allow investors to gain market exposure to Indian securities without trading directly in the local Indian market.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period.

OTHER INVESTMENTS, STRATEGIES, AND/OR TECHNIQUES

Cash sweep program is an arrangement in which a Fund's uninvested cash balance is used to purchase shares of affiliated or non-affiliated money market funds or cash management pooled investment vehicles at the end of each day.

Diversification is a classification given to a fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Funds are classified as either "diversified" or "nondiversified." To be classified as "diversified" under the 1940 Act, a fund

may not, with respect to 75% of its total assets, invest more than 5% of its total assets in any issuer and may not own more than 10% of the outstanding voting securities of an issuer. A fund that is classified as “nondiversified” under the 1940 Act, on the other hand, has the flexibility to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified.

Industry concentration for purposes under the 1940 Act is the investment of 25% or more of a Fund’s total assets in an industry or group of industries.

Leverage is when a Fund increases its assets available for investment using borrowings or similar transactions. Because short sales involve borrowing securities and then selling them, a Fund’s short sales effectively leverage the Fund’s assets. The use of leverage may make any change in a Fund’s NAV even greater and thus result in increased volatility of returns. A Fund’s assets that are used as collateral to secure the short sales may decrease in value while the short positions are outstanding, which may force the Fund to use its other assets to increase the collateral. Leverage also creates interest expense that may lower a Fund’s overall returns.

Market capitalization is the most commonly used measure of the size and value of a company. It is computed by multiplying the current market price of a share of the company’s stock by the total number of its shares outstanding. Market capitalization is an important investment criterion for certain funds, while others do not emphasize investments in companies of any particular size.

Net long is a term used to describe when a Fund’s assets committed to long positions exceed those committed to short positions.

Repurchase agreements involve the purchase of a security by a Fund and a simultaneous agreement by the seller (generally a bank or dealer) to repurchase the security from the Fund at a specified date or upon demand. This technique offers a method of earning income on idle cash. These securities involve the risk that the seller will fail to repurchase the security, as agreed. In that case, a Fund will bear the risk of market value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security.

Reverse repurchase agreements involve the sale of a security by a Fund to another party (generally a bank or dealer) in return for cash and an agreement by the Fund to buy the security back at a specified price and time. This technique will be used primarily to provide cash to satisfy unusually high redemption requests, or for other temporary or emergency purposes.

Short sales in which a Fund may engage may be either “short sales against the box” or other short sales. Short sales against the box involve selling short a security that a Fund owns, or the Fund has the right to obtain the amount of the security sold short at a specified date in the future. A Fund may also enter into a short sale to hedge against anticipated declines in the market price of a security or to reduce portfolio volatility. If the value of a security sold short increases prior to the scheduled delivery date, the Fund loses the opportunity to participate in the gain. For short sales, the Fund will incur a loss if the value of a security increases during this period because it will be paying more for the security than it has received from the purchaser in the short sale. If the price declines during this period, a Fund will realize a short-term capital gain. Although a Fund’s potential for gain as a result of a short sale is limited to the price at which it sold the security short less the cost of borrowing the security, its potential for loss is theoretically unlimited because there is no limit to the cost of replacing the borrowed security.

When-issued, delayed delivery, and forward commitment transactions generally involve the purchase of a security with payment and delivery at some time in the future – i.e., beyond normal settlement. A Fund does not earn interest on such securities until settlement and bears the risk of market value fluctuations in between the purchase and settlement dates. New issues of stocks and bonds, private placements, and U.S. Government securities may be sold in this manner.

You can make inquiries and request other information, including a Statement of Additional Information, annual report, or semiannual report (as they become available), free of charge, by contacting your plan sponsor, broker-dealer, or financial intermediary, or by contacting a Janus representative at 1-877-335-2687. The Fund's Statement of Additional Information and most recent annual and semiannual reports are also available, free of charge, at janus.com/info. Additional information about the Fund's investments is available in the Fund's annual and semiannual reports. In the Fund's annual and semiannual reports, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal period. Other information is also available from financial intermediaries that sell Shares of the Fund.

The Statement of Additional Information provides detailed information about the Fund and is incorporated into this Prospectus by reference. You may review and copy information about the Fund (including the Fund's Statement of Additional Information) at the Public Reference Room of the SEC or get text only copies, after paying a duplicating fee, by sending an electronic request by e-mail to publicinfo@sec.gov or by writing to or calling the Commission's Public Reference Section, Washington, D.C. 20549-1520 (1-202-551-8090). Information on the operation of the Public Reference Room may also be obtained by calling this number. You may also obtain reports and other information about the Fund from the Electronic Data Gathering Analysis and Retrieval (EDGAR) Database on the SEC's website at <http://www.sec.gov>.

JANUS

This Prospectus describes Janus Global Real Estate Fund (the “Fund”), a portfolio of Janus Investment Fund (the “Trust”). Janus Capital Management LLC (“Janus Capital” or “Janus”) serves as investment adviser to the Fund.

The Fund offers multiple classes of shares in order to meet the needs of various types of investors. Only Class D Shares (the “Shares”) are offered by this Prospectus. The Shares are generally no longer being made available to new investors who do not already have a direct account with the Janus funds. The Shares are available only to investors who hold accounts directly with the Janus funds, and to immediate family members or members of the same household of an eligible individual investor. The Shares are offered directly through the Janus funds to eligible investors by calling 1-800-525-3713 or at janus.com/individual. The Shares are not offered through financial intermediaries.

Fund summary

Janus Global Real Estate Fund

Ticker: JNGSX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Global Real Estate Fund seeks total return through a combination of capital appreciation and current income.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.75%
Other Expenses	0.59%
Total Annual Fund Operating Expenses ⁽¹⁾	1.34%
Fee Waiver ⁽¹⁾	0.19%
Total Annual Fund Operating Expenses After Fee Waiver ⁽¹⁾	1.15%

Janus Capital has contractually agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to

- ⁽¹⁾ management fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to 0.97% until at least February 1, 2014. The contractual waiver may be terminated or modified prior to this date only at the discretion of the Board of Trustees.

EXAMPLE:

The following Example is based on expenses without waivers. The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses without waivers remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 136	\$ 425	\$ 734	\$ 1,613

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 29% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity and debt securities of real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities, including, but not limited to, real estate investment trusts ("REITs") and similar REIT-like entities, such as foreign entities that have REIT characteristics.

As a fundamental policy, the Fund will concentrate 25% or more of its net assets in securities of issuers in real estate or real estate-related industries. The Fund's investment in companies engaged in businesses outside the real estate industry which possess significant real estate holdings will be deemed to be in the real estate industry for purposes of the Fund's investment objective and its policy on industry concentration.

Real estate-related industries are comprised of companies that, in the opinion of the portfolio manager, at the time of investment, generally (i) derive at least 50% of their revenue from ownership, construction, extraction, financing, management, operation, sales or development of real estate, or from businesses which have a clear relationship to these activities; (ii) have at least 50% of their assets in real estate; or (iii) have more than 50% of their net asset value accounted for by real estate. A REIT is a company dedicated to owning, and usually operating, income producing real estate, or to financing real estate. REITs pool investors' funds for investment primarily in income producing real estate or real estate-related loans or interests. Under the Internal Revenue Code of 1986, as amended (the "Code"), a REIT is not taxed on income it distributes to its shareholders if it complies with several requirements relating to its organization, ownership, assets and income, and a requirement that it generally distribute to its shareholders at least 90% of its taxable income (other than net capital gains) for each taxable year.

The Fund also invests in non-U.S. real estate and real estate-related companies. The Fund expects under normal market conditions to maintain investments in issuers from several different developed countries, including the United States. Under unusual circumstances, the Fund may invest all of its assets in a single country. The Fund may invest in emerging markets but will normally limit such investments to 15% of its net assets, measured at the time of purchase.

In selecting the investments for the Fund, the portfolio manager seeks to identify companies that have, in the opinion of the portfolio manager, good management, strong balance sheets, above average investment growth in "funds from operations," and that trade at a discount to their assets' underlying value. In the case of REITs, "funds from operations" generally means a REIT's net income excluding gains or losses from debt restructuring and sales of property plus depreciation of real property.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors interested in investments focused in the real estate industry or real estate-related industries, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance.

Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as “A Shares”). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 8.9% of the Fund’s investments were in emerging markets.

Real Estate Securities Risk. An investment in the Fund may be subject to many of the same risks as a direct investment in real estate. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund’s investments in foreign real estate markets differently than U.S. real estate markets.

REIT Risk. Investments in REITs involve risks associated with direct ownership of real estate, including a decline in property values, extended vacancies, changes in regional and national economic conditions, increases in property taxes, and changes in interest rates. In addition, an individual REIT’s performance depends on the types and locations of the properties it owns and on how well it manages those properties. REITs are also dependent upon management skills, may not be diversified, may incur substantial costs in the event of borrower or lessee defaults, and are heavily reliant upon cash flow. A REIT could possibly fail to qualify for tax free pass-through of income under the Code, as amended or could fail to maintain its exemption from registration under the Investment Company Act of 1940, as amended, which may produce adverse economic consequences for the REIT and its investors.

Concentration Risk. Since the Fund concentrates its assets in the real estate or real estate-related industry, an investment in the Fund will be closely linked to performance of the real estate markets. As a result, the Fund may be subject to greater risks and its net asset value may fluctuate more than a fund that does not concentrate its investments.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund’s net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. Fixed-income securities are also subject to credit risk, prepayment risk, valuation risk, and liquidity risk. Credit risk is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. Prepayment risk is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that the portfolio manager would like or at the price that the portfolio manager believes the security is currently worth.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative’s original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's Class I Shares calculated using the fees and expenses of Class D Shares, without the effect of any fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)					
	2008	2009	2010	2011	2012
	-42.95%	42.63%	20.46%	-13.53%	32.10%
Best Quarter: Second Quarter 2009 33.35% Worst Quarter: Fourth Quarter 2008 -27.54%					

Average Annual Total Returns (periods ended 12/31/12)			
	1 Year	5 Years	Since Inception of Predecessor Fund (11/28/07)
Class D Shares			
Return Before Taxes	32.10%	2.29%	1.47%
Return After Taxes on Distributions	31.03%	1.60%	0.80%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	21.13%	1.60%	0.91%
FTSE EPRA/NAREIT Global Index (reflects no deduction for expenses, fees, or taxes)	29.85%	0.66%	0.23%
FTSE EPRA/NAREIT Developed Index (reflects no deduction for expenses, fees, or taxes)	28.65%	1.07%	0.51%

⁽¹⁾ If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The FTSE EPRA/NAREIT Global Index is a global market capitalization weighted index composed of listed real estate securities in the North American, European, Asian, and South American real estate markets including both developed and emerging markets countries. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class I Shares for the periods prior to February 16, 2010. If Class D Shares of the Fund had been

available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: **Patrick Brophy** is Executive Vice President and Portfolio Manager of the Fund, which he has managed since inception.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Additional information about the Fund

FEES AND EXPENSES

Please refer to the following important information when reviewing the “Fees and Expenses of the Fund” table in the Fund Summary of the Prospectus. The fees and expenses shown were determined based on net assets as of the fiscal year ended September 30, 2012.

“Annual Fund Operating Expenses” are paid out of the Fund’s assets and include fees for portfolio management and administrative services, including recordkeeping, accounting, and other shareholder services, as well as reimbursement to Janus Capital of its out-of-pocket costs for services as administrator. You do not pay these fees directly but, as the Example in the Fund Summary shows, these costs are borne indirectly by all shareholders.

The “Management Fee” is the investment advisory fee rate paid by the Fund to Janus Capital. Janus Global Real Estate Fund pays an investment advisory fee rate that adjusts up or down by a variable of up to 0.15% (assuming constant assets) on a monthly basis based upon the Fund’s performance relative to its benchmark index during a measurement period. This fee rate, prior to any performance adjustment, is 0.75%. Any such adjustment to this base fee rate commenced December 2008 and may increase or decrease the Management Fee. Refer to “Management Expenses” in this Prospectus for additional information with further description in the Statement of Additional Information (“SAI”).

“Other Expenses”

- include an administrative services fee of 0.12% of the average daily net assets of Class D Shares for shareholder services provided by Janus Services LLC (“Janus Services”), the Fund’s transfer agent.
- may include acquired fund fees and expenses, which are indirect expenses the Fund may incur as a result of investing in shares of an underlying fund. “Acquired Fund” refers to any underlying fund (including, but not limited to, exchange-traded funds) in which a fund invests or has invested during the period. To the extent that the Fund invests in Acquired Funds, the Fund’s “Total Annual Fund Operating Expenses” may not correlate to the “ratio of gross expenses to average net assets” presented in the Financial Highlights table because that ratio includes only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. Such amounts are less than 0.01%.
- may include reimbursement to Janus Services of its out-of-pocket costs for arranging for the provision by third parties of certain servicing to shareholders.

Janus Capital has contractually agreed to waive the Fund’s “Total Annual Fund Operating Expenses” to a certain limit until at least February 1, 2014. The expense limit is described in the “Management Expenses” section of this Prospectus. Because a fee waiver will have a positive effect upon a fund’s performance, a fund that pays a performance-based investment advisory fee may experience a performance adjustment that is considered favorable to Janus Capital as a result of a fee waiver that is in place during the period when the performance adjustment applies.

All expenses in the Fund’s “Fees and Expenses of the Fund” table are shown without the effect of expense offset arrangements. Pursuant to such arrangements, credits realized as a result of uninvested cash balances are used to reduce custodian and transfer agent expenses.

ADDITIONAL INVESTMENT STRATEGIES AND GENERAL PORTFOLIO POLICIES

The Fund’s Board of Trustees (“Trustees”) may change the Fund’s investment objective or non-fundamental principal investment strategies without a shareholder vote. The Fund will notify you in writing at least 60 days before making any such change it considers material. If there is a material change to the Fund’s objective or principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that the Fund will achieve its investment objective.

Unless otherwise stated, the following additional investment strategies and general policies apply to the Fund and provide further information including, but not limited to, the types of securities the Fund may invest in when implementing its investment objective. Some of these strategies and policies may be part of a principal strategy. Other strategies and policies may be utilized to a lesser extent. Except for the Fund’s policies with respect to investments in illiquid securities and borrowing, the percentage limitations included in these policies and elsewhere in this Prospectus and/or the SAI normally apply only at the time of purchase of a security. So, for example, if the Fund exceeds a limit as a result of market fluctuations or the sale of other securities, it will not be required to dispose of any securities.

Cash Position

The Fund may not always stay fully invested. For example, when the portfolio manager believes that market conditions are unfavorable for investing, or when he is otherwise unable to locate attractive investment opportunities, the Fund's cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after the Fund has committed available assets to desirable investment opportunities. When the Fund's investments in cash or similar investments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested. To the extent the Fund invests its uninvested cash through a sweep program (meaning its uninvested cash is pooled with uninvested cash of other funds and invested in certain securities such as repurchase agreements), it is subject to the risks of the account or fund into which it is investing, including liquidity issues that may delay the Fund from accessing its cash.

In addition, the Fund may temporarily increase its cash position under certain unusual circumstances, such as to protect its assets or maintain liquidity in certain circumstances to meet unusually large redemptions. The Fund's cash position may also increase temporarily due to unusually large cash inflows. Under unusual circumstances such as these, the Fund may invest up to 100% of its assets in cash or similar investments. In this case, the Fund may take positions that are inconsistent with its investment policies. As a result, the Fund may not achieve its investment objective.

Common Stock

Unless its investment objective or policies prescribe otherwise, the Fund may invest substantially all of its assets in common stocks. The portfolio manager generally takes a “bottom up” approach to selecting companies in which to invest. This means that he seeks to identify individual companies with earnings growth potential that may not be recognized by the market at large. Securities are generally selected on a security-by-security basis without regard to any predetermined allocation among countries or geographic regions. However, certain factors, such as expected levels of inflation, government policies influencing business conditions, the outlook for currency relationships, and prospects for economic growth among countries, regions, or geographic areas, may warrant greater consideration in selecting foreign securities. There are no limitations on the countries in which the Fund may invest, and the Fund may at times have significant exposure to emerging markets. The portfolio manager may sell a holding if, among other things, the security reaches the portfolio manager's price target, if the company has a deterioration of fundamentals such as failing to meet key operating benchmarks, or if the portfolio manager finds a better investment opportunity. The portfolio manager may also sell a Fund holding to meet redemptions.

The Fund may shift assets to varying degrees between capital appreciation and income-oriented components of its portfolio holdings based on the portfolio manager's analysis of relevant market, financial, and economic conditions. If the portfolio manager believes that growth securities will provide better returns than the yields then available or expected on income-producing securities, the Fund will place a greater emphasis on the capital appreciation component. The Fund's income component may consist of dividend paying stocks which exhibit growth characteristics.

Counterparties

Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to the Fund (“counterparty risk”). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to the Fund. The Fund may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. The Fund may be exposed to counterparty risk through participation in various programs including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Fund's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures, and options. The Fund intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that the Fund focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

Emerging Markets

The Fund will normally limit its investments in securities of issuers or companies from or with exposure to one or more “developing countries” or “emerging markets” to 15% of its net assets. Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets IndexSM.

High-Yield/High-Risk Bonds

A high-yield/high-risk bond (also called a “junk” bond) is a bond rated below investment grade by major rating agencies (i.e., BB+ or lower by Standard & Poor’s Ratings Services (“Standard & Poor’s”) and Fitch, Inc. (“Fitch”), or Ba or lower by Moody’s Investors Service, Inc. (“Moody’s”)) or is an unrated bond of similar quality. It presents greater risk of default (the failure to make timely interest and principal payments) than higher quality bonds. To the extent the Fund invests in high-yield/high-risk bonds, under normal circumstances, the Fund will limit its investments in high-yield/high-risk bonds to 35% or less of its net assets.

Illiquid Investments

Although the Fund intends to invest in liquid securities, it may invest up to 15% of its net assets in illiquid investments. An illiquid investment is a security or other position that cannot be disposed of quickly in the normal course of business. For example, some securities are not registered under U.S. securities laws and cannot be sold to the U.S. public because of Securities and Exchange Commission regulations (these are known as “restricted securities”). Under procedures adopted by the Fund’s Trustees, certain restricted securities that are determined to be liquid will not be counted toward this 15% limit.

Portfolio Turnover

In general, the Fund intends to purchase securities for long-term investment, although, to a limited extent, the Fund may purchase securities in anticipation of relatively short-term gains. Short-term transactions may also result from liquidity needs, securities having reached a price or yield objective, changes in interest rates or the credit standing of an issuer, or by reason of economic or other developments not foreseen at the time of the initial investment decision. The Fund may also sell one security and simultaneously purchase the same or a comparable security to take advantage of short-term differentials in bond yields or securities prices. Portfolio turnover is affected by market conditions, changes in the size of the Fund, the nature of the Fund’s investments, and the investment style of the portfolio manager. Changes are normally made in the Fund’s portfolio whenever the portfolio manager believes such changes are desirable. Portfolio turnover rates are generally not a factor in making buy and sell decisions.

Increased portfolio turnover may result in higher costs for brokerage commissions, dealer mark-ups, and other transaction costs, and may also result in taxable capital gains. Higher costs associated with increased portfolio turnover also may have a negative effect on the Fund’s performance. The “Financial Highlights” section of this Prospectus shows the Fund’s historical turnover rates.

Real Estate Investment Trusts

Real estate investment trusts (“REITs”) are often categorized as equity REITs, mortgage REITs and hybrid REITs. An equity REIT, the most common type of REIT, invests primarily in the fee ownership of land and buildings. An equity REIT derives its income primarily from rental income but may also realize capital gains or losses by selling real estate properties in its portfolio that have appreciated or depreciated in value. A mortgage REIT invests primarily in mortgages on real estate, which may secure construction, development, or long-term loans. A mortgage REIT generally derives its income from interest payments on the credit it has extended. A hybrid REIT combines the characteristics of equity REITs and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate.

Securities Lending

The Fund may seek to earn additional income through lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis. The Fund may lend portfolio securities on a short-term or long-term basis, in an amount equal to up to $\frac{1}{3}$ of its total assets as determined at the time of the loan origination. When the Fund lends its securities, it receives collateral (including cash collateral), at least equal to the value of securities loaned. The Fund may earn income by investing this collateral in one or more affiliated or non-affiliated cash management vehicles. It is also possible that, due to a decline in the value of a cash management vehicle, the Fund may lose money. There is also the risk that when portfolio securities are lent, the securities may not be returned on a timely basis, and the Fund may experience delays and costs in recovering the security or gaining access to the collateral provided to the Fund to collateralize the loan. If the Fund is unable to recover a security on loan, the Fund may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Fund. Janus Capital intends to manage the cash collateral in an affiliated cash management vehicle and will receive an investment advisory fee for managing such assets.

Short Sales

The Fund may engage in short sales. No more than 10% of the Fund's net assets may be invested in short positions (through short sales of stocks, structured products, futures, swaps, and uncovered written calls). The Fund may engage in short sales "against the box" and options for hedging purposes that are not subject to this 10% limit. A short sale is generally a transaction in which the Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. A short sale is subject to the risk that if the price of the security sold short increases in value, the Fund will incur a loss because it will have to replace the security sold short by purchasing it at a higher price. In addition, the Fund may not always be able to close out a short position at a particular time or at an acceptable price. A lender may request, or market conditions may dictate, that the securities sold short be returned to the lender on short notice, and the Fund may have to buy the securities sold short at an unfavorable price. If this occurs at a time that other short sellers of the same security also want to close out their positions, it is more likely that the Fund will have to cover its short sale at an unfavorable price and potentially reduce or eliminate any gain, or cause a loss, as a result of the short sale. Because there is no upper limit to the price a borrowed security may reach prior to closing a short position, the Fund's losses are potentially unlimited in a short sale transaction. The Fund's gains and losses will also be decreased or increased, as the case may be, by the amount of any dividends, interest, or expenses, including transaction costs and borrowing fees, the Fund may be required to pay in connection with a short sale. Such payments may result in the Fund having higher expenses than a fund that does not engage in short sales and may negatively affect the Fund's performance.

The Fund may also enter into short positions through derivative instruments such as options contracts, futures contracts, and swap agreements which may expose the Fund to similar risks. To the extent that the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Due to certain foreign countries' restrictions, the Fund will not be able to engage in short sales in certain foreign countries where it may maintain long positions. As a result, the Fund's ability to fully implement a short selling strategy that could otherwise help the Fund pursue its investment goals may be limited. There can be no assurance that the implementation of a short sale strategy will be successful.

Special Situations

The Fund may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. For example, a special situation or turnaround may arise when, in the opinion of the portfolio manager, the securities of a particular issuer will be recognized as undervalued by the market and appreciate in value due to a specific development with respect to that issuer. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. For example, issuers undergoing significant capital changes may include companies involved in spin-offs, sales of divisions, mergers or acquisitions, companies involved in bankruptcy proceedings, or companies initiating large changes in their debt to equity ratio. Companies that are redirecting cash flows may be reducing debt, repurchasing shares, or paying dividends. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in "special situations" companies can present greater risks than investments in companies not experiencing special situations, and the Fund's performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Swap Agreements

The Fund may utilize swap agreements as a means to gain exposure to certain common stocks and/or to "hedge" or protect its portfolio from adverse movements in securities prices, the rate of inflation, or interest rates. Swaps may also be used for capital appreciation. Swap agreements are two-party contracts to exchange one set of cash flows for another. Swap agreements entail the risk that a party will default on its payment obligations to the Fund. If the other party to a swap defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If the Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund's total return. Various types of swaps such as credit default, equity, interest rate, and total return swaps are described in the "Glossary of Investment Terms."

Other Types of Investments

Unless otherwise stated within its specific investment policies, the Fund may also invest in other types of domestic and foreign securities and use other investment strategies, as described in the “Glossary of Investment Terms.” These securities and strategies are not principal investment strategies of the Fund. If successful, they may benefit the Fund by earning a return on the Fund’s assets or reducing risk; however, they may not achieve the Fund’s investment objective. These securities and strategies may include:

debt securities (such as bonds, notes, and debentures)

exchange-traded funds

indexed/structured securities (such as mortgage- and asset-backed securities)

various derivative transactions (which could comprise a significant percentage of a fund’s portfolio) including, but not limited to, options, futures, forwards, swap agreements (such as equity, interest rate, inflation index, credit default, and total return swaps), participatory notes, structured notes, and other types of derivatives individually or in combination for hedging purposes or for nonhedging purposes such as seeking to earn income and enhance return, to protect unrealized gains, or to avoid realizing losses; such techniques may also be used to adjust currency exposure relative to a benchmark index, to gain exposure to the market pending investment of cash balances, or to meet liquidity needs

securities purchased on a when-issued, delayed delivery, or forward commitment basis

RISKS OF THE FUND

The value of your investment will vary over time, sometimes significantly, and you may lose money by investing in the Fund. To varying degrees, the Fund may invest in stocks, bonds, alternative strategy investments, and money market instruments or cash/cash equivalents. The following information is intended to help you better understand some of the risks of investing in the Fund. The impact of the following risks on the Fund may vary depending on the Fund’s investments. The greater the Fund’s investment in a particular security, the greater the Fund’s exposure to the risks associated with that security. Before investing in the Fund, you should consider carefully the risks that you assume when investing in the Fund.

Concentration Risk. Since the Fund concentrates its assets in the real estate or real estate-related industry, an investment in the Fund will be closely linked to performance of the real estate markets. Unanticipated economic, legal, cultural, political, or other developments may cause property values to decline, REIT prices may drop, and changes in federal or state tax laws, may affect the value of the securities held by the Fund. Real estate-related companies are also generally sensitive to interest rates, cash flow of underlying real estate assets, supply and demand, and management skill and creditworthiness of the issuer. The Fund’s net asset value may fluctuate more than those of a fund that does not concentrate its investments.

While the Fund will not invest in real property directly, the Fund may be subject to risks similar to those associated with the direct ownership of real property (in addition to securities market risks). These risks include, but are not limited to, declines in the value of real property, risks related to general and local economic conditions, dependency on management skill, heavy cash flow dependency, adverse changes in the operations of any property or the financial condition of any tenant, possible lack of availability of mortgage funds, overbuilding, extended vacancies of properties, increased competition, increases in property taxes and operating expenses, changes in zoning laws, losses due to costs resulting from the clean-up of environmental problems, liability to third parties for damages resulting from environmental problems, casualty or condemnation losses, limitations on rents, changes in neighborhood values and in appeal of properties to tenants and changes in interest rates.

Credit Quality Risk. Through the Fund’s investments in fixed-income securities, the Fund is subject to the risks associated with the credit quality of the issuers of those fixed-income securities. Credit quality measures the likelihood that the issuer or borrower will meet its obligations on a bond. One of the fundamental risks is credit risk, which is the risk that an issuer will be unable to make principal and interest payments when due, or default on its obligations. Higher credit risk may negatively impact the Fund’s returns and yield. U.S. Government securities are generally considered to be the safest type of investment in terms of credit risk. Municipal obligations generally rank between U.S. Government securities and corporate debt securities in terms of credit safety. Corporate debt securities, particularly those rated below investment grade, present the highest credit risk.

Many fixed-income securities receive credit ratings from services such as Standard & Poor's, Fitch, and Moody's. These services assign ratings to securities by assessing the likelihood of issuer default. The lower a bond issue is rated by an agency, the more credit risk it is considered to represent. Lower rated instruments and securities generally pay interest at a higher rate to compensate for the associated greater risk. Interest rates can fluctuate in response to economic or market conditions, which can result in a fluctuation in the price of a security and impact your return and yield. If a security has not received a rating, the Fund must rely upon Janus Capital's credit assessment, which if incorrect can also impact the Fund's returns and yield. Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Emerging Markets Risk. Within the parameters of its specific investment policies, the Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets IndexSM. To the extent that the Fund invests a significant amount of its assets in one or more of these countries, its returns and net asset value may be affected to a large degree by events and economic conditions in such countries. The risks of foreign investing are heightened when investing in emerging markets, which may result in the price of investments in emerging markets experiencing sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. The securities markets of many of these countries may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for the Fund to obtain or to enforce a judgment against the issuers of such securities. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. The Fund may be subject to emerging markets risk to the extent that it invests in securities of issuers or companies which are not considered to be from emerging markets, but which have customers, products, or transactions associated with emerging markets. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Exchange-Traded Funds Risk. The Fund may invest in exchange-traded funds ("ETFs") which are typically open-end investment companies that are traded on a national securities exchange. ETFs typically incur fees, such as investment advisory fees and other operating expenses that are separate from those of the Fund, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund may be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest directly in stocks and bonds. Further, the price movement of an ETF may fluctuate against the underlying securities or commodities it tracks and may result in a loss. Because the value of ETF shares

depends on the demand in the market, the Fund may not be able to purchase or sell an ETF at the most optimal time, which could adversely affect the Fund's performance.

The ETFs in which the Fund invests are subject to specific risks, depending on the investment strategy of the ETF. In turn, the Fund will be subject to substantially the same risks as those associated with direct exposure to the securities or commodities held by the ETF. Because the Fund may invest in a broad range of ETFs, such risks may include, but are not limited to, leverage risk, foreign exposure risk, and commodities risk.

Fixed-Income Securities Risk. The Fund may hold debt and other fixed-income securities to generate income. Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause the Fund's net asset value to likewise decrease. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. For example, while securities with longer maturities tend to produce higher yields, they also tend to be more sensitive to changes in prevailing interest rates and are therefore more volatile than shorter-term securities and are subject to greater market fluctuations as a result of changes in interest rates. Fixed-income securities are also subject to credit risk, which is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default. In addition, there is prepayment risk, which is the risk that during periods of falling interest rates, certain fixed-income securities with higher interest rates, such as mortgage- and asset-backed securities, may be prepaid by their issuers thereby reducing the amount of interest payments. This may result in the Fund having to reinvest its proceeds in lower yielding securities. Fixed-income securities may also be subject to valuation risk and liquidity risk. Valuation risk is the risk that one or more of the fixed-income securities in which the Fund invests are priced incorrectly due to factors such as incomplete data, market instability, or human error. Liquidity risk is the risk that fixed-income securities may be difficult or impossible to sell at the time that a portfolio manager would like or at the price that a portfolio manager believes the security is currently worth. Securities underlying mortgage- and asset-backed securities, which may include subprime mortgages, also may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Foreign Exposure Risks. The Fund will invest in foreign debt and equity securities either indirectly (e.g., depositary receipts, depositary shares, and passive foreign investment companies) or directly in foreign markets, including emerging markets. Investments in foreign securities, including securities of foreign and emerging markets governments, may involve greater risks than investing in domestic securities because the Fund's performance may depend on factors other than the performance of a particular company. These factors include:

Currency Risk. As long as the Fund holds a foreign security, its value will be affected by the value of the local currency relative to the U.S. dollar. When the Fund sells a foreign currency denominated security, its value may be worth less in U.S. dollars even if the security increases in value in its home country. U.S. dollar-denominated securities of foreign issuers may also be affected by currency risk, as the value of these securities may also be affected by changes in the issuer's local currency.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in emerging markets which may have relatively unstable governments, immature economic structures, national policies restricting investments by foreigners, social instability, and different and/or developing legal systems. In some countries, there is the risk that the government may take over the assets or operations of a company or that the government may impose withholding and other taxes or limits on the removal of the Fund's assets from that country. In addition, the economies of emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Regulatory Risk. There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Foreign Market Risk. Foreign securities markets, particularly those of emerging market countries, may be less liquid and more volatile than domestic markets. These securities markets may trade a small number of securities, may have a limited number of issuers and a high proportion of shares, or may be held by a relatively small number of persons or institutions. Local securities markets may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of substantial holdings difficult or impossible at times. It is also possible that certain markets may require

payment for securities before delivery, and delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, securities of issuers located in countries with emerging markets may have limited marketability and may be subject to more abrupt or erratic price movements which could also have a negative effect on the Fund. Such factors may hinder the Fund's ability to buy and sell emerging market securities in a timely manner, affecting the Fund's investment strategies and potentially affecting the value of the Fund.

Geographic Investment Risk. To the extent that the Fund invests a significant portion of its assets in a particular country or geographic region, the Fund will generally have more exposure to certain risks due to possible political, economic, social, or regulatory events in that country or region. Adverse developments in certain regions could also adversely affect securities of other countries whose economies appear to be unrelated and could have a negative impact on the Fund's performance.

Transaction Costs. Costs of buying, selling, and holding foreign securities, including brokerage, tax, and custody costs, may be higher than those involved in domestic transactions.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds (or "junk" bonds) are bonds rated below investment grade by the primary rating agencies such as Standard & Poor's, Fitch, and Moody's or are unrated bonds of similar quality. The value of lower quality bonds generally is more dependent on credit risk than investment grade bonds. Issuers of high-yield/high-risk bonds may not be as strong financially as those issuing bonds with higher credit ratings and are more vulnerable to real or perceived economic changes, political changes, or adverse developments specific to the issuer. In addition, the junk bond market can experience sudden and sharp price swings.

Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Industry Risk. Industry risk is the possibility that a group of related securities will decline in price due to industry-specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react similarly to industry-specific market or economic developments. The Fund's investments, if any, in multiple companies in a particular industry increase the Fund's exposure to industry risk. Investments in the real estate industry, for example, are closely linked to the performance of the real estate markets. Because Janus Global Real Estate Fund concentrates its assets in the real estate industry, the Fund may be subject to risks similar to those associated with the direct ownership of real property (in addition to securities market risks).

Interest Rate Risk. Generally, a fixed-income security, and to a lesser degree common stock of REITs, will increase in value when prevailing interest rates fall and decrease in value when prevailing interest rates rise. Longer-term securities are generally more sensitive to interest rate changes than shorter-term securities, but they generally offer higher yields to compensate investors for the associated risks. High-yield bond prices and floating rate debt security prices are generally less directly responsive to interest rate changes than investment grade issues or comparable fixed rate securities, and may not always follow this pattern. The Fund may use futures, options, and other derivatives to manage interest rate risk. The income component of Janus Global Real Estate Fund's holdings may include fixed-income securities and REITs.

Management Risk. The Fund is an actively managed investment portfolio and is therefore subject to the risk that the investment strategies employed for the Fund may fail to produce the intended results. The Fund may underperform its benchmark index or other mutual funds with similar investment objectives.

Because the Fund may invest substantially all of its assets in common stocks, the main risk is the risk that the value of the stocks it holds might decrease in response to the activities of an individual company or in response to general market and/or economic conditions. If this occurs, the Fund's share price may also decrease.

The Fund may use short sales, futures, options, swap agreements (including, but not limited to, equity, interest rate, credit default, and total return swaps), and other derivative instruments individually or in combination to "hedge" or protect its portfolio from adverse movements in securities prices and interest rates. The Fund may also use a variety of currency hedging techniques, including the use of forward currency contracts, to manage currency risk. There is no guarantee that the portfolio manager's use of derivative investments will benefit the Fund. The Fund's performance could be worse than if the Fund had not used such instruments. Use of such investments may instead increase risk to the Fund, rather than reduce risk.

The Fund's performance may also be significantly affected, positively or negatively, by the portfolio manager's use of certain types of investments, such as foreign (non-U.S.) securities, non-investment grade bonds ("junk" bonds), initial public offerings ("IPOs"), or securities of companies with relatively small market capitalizations. Note that a portfolio manager's use of IPOs and other types of investments may have a magnified performance impact on a fund with a small asset base and the fund may not experience similar performance as its assets grow.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions, including, but not limited to, a general decline in prices on the stock markets, a general decline in real estate markets, a decline in commodities prices, or if the market favors different types of securities than the types of securities in which the Fund invests. If the value of the Fund's portfolio decreases, the Fund's net asset value will also decrease, which means if you sell your shares in the Fund you may lose money.

It is also important to note that events in both domestic and international equity and fixed-income markets have resulted, and may continue to result, in an unusually high degree of volatility in the markets, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. These events and the resulting market upheavals may have an adverse effect on the Fund, such as a decline in the value and liquidity of many securities held by the Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value, and an increase in Fund expenses. Because the situation is unprecedented and widespread, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Fund's ability to achieve its investment objective. It is impossible to predict whether or for how long these conditions will continue. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

Further, the instability experienced in the financial markets has resulted in the U.S. Government and various other governmental and regulatory entities taking actions to address the financial crisis. These actions include, but are not limited to, the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") in July 2010 which is expected to dramatically change the way in which the U.S. financial system is supervised and regulated. More specifically, the Dodd-Frank Act provides for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, over-the-counter derivatives, investment advisers, credit rating agencies, and mortgage lending, which expands federal oversight in the financial sector and may affect the investment management industry as a whole. Given the broad scope, sweeping nature, and the fact that many provisions of the Dodd-Frank Act must be implemented through future rulemaking, the ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain. As a result, there can be no assurance that these government and regulatory measures will not have an adverse effect on the value or marketability of securities held by the Fund, including potentially limiting or completely restricting the ability of the Fund to use a particular investment instrument as part of its investment strategy, increasing the costs of using these instruments, or possibly making them less effective in general. Furthermore, no assurance can be made that the U.S. Government or any U.S. regulatory entity (or other authority or regulatory entity) will not continue to take further legislative or regulatory action in response to the economic crisis or otherwise, and the effect of such actions, if taken, cannot be known.

In addition, European markets have recently experienced volatility and adverse trends due to concerns about economic downturns, rising government debt levels, and the possible default of government debt in several European countries, including Greece, Ireland, Italy, Portugal, and Spain. A default or debt restructuring by any European country would adversely impact holders of that country's debt and worldwide sellers of credit default swaps linked to that country's creditworthiness. These trends have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of all European countries, which in turn may have a material adverse effect on the Fund's investments in such countries, other countries that depend on European countries for significant amounts of trade or investment, or issuers with exposure to European debt.

Real Estate Securities Risk. An investment in Janus Global Real Estate Fund shares represents an indirect investment in real estate-related securities owned by the Fund. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets. REITs that invest in real estate mortgages are also subject to prepayment risk. In addition to prepayment risk,

investments in mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities comprised of under-performing assets may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

REIT Risk. The Fund will be affected by risks associated with investments in REITs. The ability to trade REITs in the secondary market can be more limited than other stocks. The prices of equity REITs are affected by changes in the value of the underlying property owned by the REITs and changes in capital markets and interest rates. The prices of mortgage REITs are affected by the quality of any credit they extend, the creditworthiness of the mortgages they hold, as well as by the value of the property that secures the mortgages. Further, equity REITs and mortgage REITs are dependent upon management skills and generally may not be diversified. Equity REITs and mortgage REITs are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. In addition, equity REITs and mortgage REITs could fail to qualify for tax-free pass-through of income under the Internal Revenue Code. Such a failure would result in the U.S. federal income taxation of a disqualified REIT's distributed income at the REIT level. There is also the risk that borrowers under mortgages held by a REIT or lessees of a property that a REIT owns may be unable to meet their obligations to the REIT. In the event of a default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments. In addition to the foregoing risks, certain "special purpose" REITs in which the Fund may invest may have their assets in specific real property sectors, such as hotel REITs, nursing home REITs or warehouse REITs, and are therefore subject to the risks associated with adverse developments in these sectors.

Small- and Mid-Sized Companies Risk. The Fund's investments in securities issued by small- and mid-sized companies, which tend to be smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. For example, while small- and mid-sized companies may realize more substantial growth than larger or more established issuers, they may also suffer more significant losses as a result of their narrow product lines, limited operating history, greater exposure to competitive threats, limited financial resources, limited trading markets, and the potential lack of management depth. Securities issued by small- and mid-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies. These holdings are also subject to wider price fluctuations and tend to be less liquid than stocks of larger companies, which could have a significant adverse effect on the Fund's returns, especially as market conditions change.

Management of the Fund

INVESTMENT ADVISER

Janus Capital Management LLC, 151 Detroit Street, Denver, Colorado 80206-4805, is the investment adviser to the Fund. Janus Capital is responsible for the day-to-day management of the Fund's investment portfolio and furnishes continuous advice and recommendations concerning the Fund's investments. Janus Capital also provides certain administration and other services and is responsible for other business affairs of the Fund.

Janus Capital (together with its predecessors) has served as investment adviser to Janus mutual funds since 1970 and currently serves as investment adviser to all of the Janus funds, acts as subadviser for a number of private-label mutual funds, and provides separate account advisory services for institutional accounts and other unregistered products.

Janus Capital furnishes certain administration, compliance, and accounting services for the Fund and is reimbursed by the Fund for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Janus Capital provides office space for the Fund. Some expenses related to compensation payable to the Janus funds' Chief Compliance Officer and compliance staff are shared with the Janus funds. The Fund also pays for salaries, fees, and expenses of certain Janus Capital employees and Fund officers, with respect to certain specified administration functions they perform on behalf of the Janus funds. The Janus funds pay these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Fund.

MANAGEMENT EXPENSES

The Fund pays Janus Capital an investment advisory fee and incurs expenses, including administrative services fees payable pursuant to the Transfer Agency Agreement, any other transfer agent and custodian fees and expenses, legal and auditing fees, printing and mailing costs of sending reports and other information to existing shareholders, and Independent Trustees' fees and expenses. The Fund's investment advisory fee is calculated daily and paid monthly. The Fund's advisory agreement details the investment advisory fee and other expenses that the Fund must pay.

The table below reflects the Fund's base fee rate (expressed as an annual rate), as well as the actual investment advisory fee rate paid by the Fund to Janus Capital (gross and net of fee waivers).

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to the cumulative investment record of its benchmark index, the FTSE EPRA/NAREIT Global Index, over the performance measurement period. Any adjustment to the investment advisory fee rate was effective December 2008. Until such time, only the base fee rate shown below applied. The third column shows the performance hurdle for outperformance or underperformance during the measurement period relative to the Fund's benchmark index. The fourth column shows the performance adjusted investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period without any fee waivers. The fifth column shows the actual investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period and includes any applicable fee waiver. This fifth column shows the actual amount of the investment advisory fee rate paid by the Fund as of the end of the fiscal year.

As an example, if the Fund outperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would increase by 0.15% (assuming constant assets). Conversely, if the Fund underperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would decrease by 0.15% (assuming constant assets). Actual performance within the full range of the performance hurdle rate may result in positive or negative incremental adjustments to the advisory fee of greater or less than 0.15%. Additional details discussing the performance fee are included below with further description in the SAI.

Fund Name	Base Fee Rate (%)	Performance Hurdle vs. Benchmark Index	Performance Adjusted Investment Advisory Fee Rate (%)	Actual Investment Advisory Fee Rate⁽¹⁾ (%) (for the fiscal year ended September 30, 2012)
Janus Global Real Estate Fund	0.75	±4.00%	0.75	0.74

(1) Janus Capital has agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to a certain level until at least February 1, 2014. Application of the expense waiver and its effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in the Fund Summary of the Prospectus, and additional information is included under "Expense Limitation" below. The waiver and any applicable performance adjustment are not reflected in the base fee rate shown.

The Fund's investment advisory fee rate is determined by calculating a base fee (shown in the previous table) and applying a performance adjustment (described in further detail below). The performance adjustment either increases or decreases the base fee depending on how well the Fund has performed relative to the FTSE EPRA/NAREIT Global Index. Effective July 1, 2010, Janus Global Real Estate Fund's benchmark index changed from the FTSE EPRA/NAREIT Developed Index to the FTSE EPRA/NAREIT Global Index for purposes of measuring the Fund's performance and calculating the performance adjustment. Details regarding the implementation of the new benchmark index are contained in the SAI.

The calculation of the performance adjustment applies as follows:

Investment Advisory Fee = Base Fee Rate +/- Performance Adjustment

The investment advisory fee rate paid to Janus Capital by the Fund consists of two components: (1) a base fee calculated by applying the contractual fixed rate of the advisory fee to the Fund's average daily net assets during the previous month ("Base Fee Rate"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by applying a variable rate of up to 0.15% (positive or negative) to the Fund's average daily net assets during the applicable performance measurement period. The performance measurement period generally is the previous 36 months, although no Performance Adjustment is made until the Fund's performance-based fee structure has been in effect for at least 12 months. When the Fund's performance-based fee structure has been in effect for at least 12 months, but less than 36 months, the performance measurement period is equal to the time that has elapsed since the performance-based fee structure took effect. As noted above, any applicable Performance Adjustment began December 2008 for the Fund.

No Performance Adjustment is applied unless the difference between the Fund's investment performance and the cumulative investment record of the Fund's benchmark index is 0.50% or greater (positive or negative) during the applicable performance measurement period. The Base Fee Rate is subject to an upward or downward Performance Adjustment for every full 0.50% increment by which the Fund outperforms or underperforms its benchmark index. Because the Performance Adjustment is tied to the Fund's relative performance compared to its benchmark index (and not its absolute performance), the Performance Adjustment could increase Janus Capital's fee even if the Fund's Shares lose value during the performance measurement period and could decrease Janus Capital's fee even if the Fund's Shares increase in value during the performance measurement period. For purposes of computing the Base Fee Rate and the Performance Adjustment, net assets are averaged over different periods (average daily net assets during the previous month for the Base Fee Rate, versus average daily net assets during the performance measurement period for the Performance Adjustment). Performance of the Fund is calculated net of expenses whereas the Fund's benchmark index does not have any fees or expenses. Reinvestment of dividends and distributions is included in calculating both the performance of the Fund and the Fund's benchmark index. The Base Fee Rate is calculated and accrued daily. The Performance Adjustment is calculated monthly in arrears and is accrued throughout the month. The investment fee is paid monthly in arrears. Under extreme circumstances involving underperformance by a rapidly shrinking Fund, the dollar amount of the Performance Adjustment could be more than the dollar amount of the Base Fee Rate. In such circumstances, Janus Capital would reimburse the Fund.

The application of an expense limit, if any, will have a positive effect upon the Fund's performance and may result in an increase in the Performance Adjustment. It is possible that the cumulative dollar amount of additional compensation ultimately payable to Janus Capital may, under some circumstances, exceed the cumulative dollar amount of management fees waived by Janus Capital.

The investment performance of the Fund's Class A Shares (waiving the upfront sales load) for the performance measurement period is used to calculate the Performance Adjustment. After Janus Capital determines whether the Fund's performance was above or below its benchmark index by comparing the investment performance of the Fund's load-waived Class A Shares against the cumulative investment record of the Fund's benchmark index, Janus Capital applies the same Performance Adjustment (positive or negative) across each other class of shares of the Fund, as applicable. It is not possible to predict the effect of the Performance Adjustment on future overall compensation to Janus Capital since it depends on the performance of the Fund relative to the record of the Fund's benchmark index and future changes to the size of the Fund.

A discussion regarding the basis for the Trustees' approval of the Fund's investment advisory agreement is included in the Fund's annual or semiannual report to shareholders. You can request the Fund's annual or semiannual reports (as they become available), free of charge, by contacting a Janus representative at 1-800-525-3713. The reports are also available, free of charge, at janus.com/reports.

Expense Limitation

Janus Capital has contractually agreed to waive the advisory fee payable by the Fund in an amount equal to the amount, if any, that the Fund's normal operating expenses in any fiscal year, including the investment advisory fee, but excluding any performance adjustments to management fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses, exceed the annual rate shown below. For information about how the expense limit affects the total expenses of the Fund, see the "Fees and Expenses of the Fund" table in the Fund Summary of the Prospectus. Janus Capital has agreed to continue the waiver until at least February 1, 2014.

Fund Name	Expense Limit Percentage (%)
Janus Global Real Estate Fund(1)	0.97

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to its benchmark index during a (1) measurement period. Because a fee waiver will have a positive effect upon the Fund's performance, a fee waiver that is in place during the period when the performance adjustment applies may affect the performance adjustment in a way that is favorable to Janus Capital.

INVESTMENT PERSONNEL

Janus Global Real Estate Fund

Patrick Brophy is Executive Vice President and Portfolio Manager of Janus Global Real Estate Fund, which he has managed since inception. Mr. Brophy is also Portfolio Manager of other Janus accounts. He joined Janus Capital in March 2005. Mr. Brophy holds a Bachelor of Arts degree in History from Dartmouth.

Information about the portfolio manager's compensation structure and other accounts managed, as well as the range of his individual ownership of securities of the Fund he manages and the aggregate range of his individual ownership in all mutual funds advised by Janus Capital, is included in the SAI.

Conflicts of Interest

Janus Capital manages many funds and numerous other accounts, which may include separate accounts and other pooled investment vehicles, such as hedge funds. Side-by-side management of multiple accounts, including the management of a cash collateral pool for securities lending and investing the Janus funds' cash, may give rise to conflicts of interest among those accounts, and may create potential risks, such as the risk that investment activity in one account may adversely affect another account. For example, short sale activity in an account could adversely affect the market value of long positions in one or more other accounts (and vice versa). Side-by-side management may raise additional potential conflicts of interest relating to the allocation of investment opportunities and the aggregation and allocation of trades. Additionally, Janus Capital is the adviser to the Janus "funds of funds," which are funds that invest primarily in other mutual funds managed by Janus Capital. To the extent that the Fund is an underlying fund in a Janus "fund of funds," a potential conflict of interest arises when allocating the assets of the Janus "fund of funds" to the Fund. Purchases and redemptions of fund shares by a Janus "fund of funds" due to reallocations or rebalancings may result in a fund having to sell securities or invest cash when it otherwise would not do so. Such transactions could accelerate the realization of taxable income if sales of securities resulted in gains and could also increase a fund's transaction costs. Large redemptions by a Janus "fund of funds" may cause a fund's

expense ratio to increase due to a resulting smaller asset base. A further discussion of potential conflicts of interest and a discussion of certain procedures intended to mitigate such potential conflicts are contained in the Fund' s SAI.

Other information

CLOSED FUND POLICIES

The Fund may limit sales of its Shares to new investors if Janus Capital and the Trustees believe continued sales may adversely affect the Fund's ability to achieve its investment objective. If sales of the Fund are limited, it is expected that existing shareholders invested in the Fund would be permitted to continue to purchase Shares through their existing Fund accounts and to reinvest any dividends or capital gains distributions in such accounts, absent highly unusual circumstances. Requests for new accounts into a closed fund would be reviewed by management, taking into consideration eligibility requirements and whether the addition to the fund is believed to negatively impact existing fund shareholders. The closed fund may decline opening new accounts, including eligible new accounts, if it would be in the best interests of the fund and its shareholders. If applicable, additional information regarding general policies and exceptions can be found in the closed funds' prospectuses and in the "Shares of the Trust" section of the SAI.

LIQUIDATION/REORGANIZATION OF A FUND

It is important to know that, pursuant to the Trust's Amended and Restated Agreement and Declaration of Trust and in accordance with any applicable regulations and laws, the Trustees have the authority to merge, liquidate, and/or reorganize a fund into another fund without seeking shareholder vote or consent.

DISTRIBUTION OF THE FUND

The Fund is distributed by Janus Distributors LLC ("Janus Distributors"), which is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). To obtain information about FINRA member firms and their associated persons, you may contact FINRA at www.finra.org, or 1-800-289-9999.

Distributions and taxes

DISTRIBUTIONS

To avoid taxation of the Fund, the Internal Revenue Code requires the Fund to distribute all or substantially all of its net investment income and any net capital gains realized on its investments at least annually. The Fund's income from certain dividends, interest, and any net realized short-term capital gains are paid to shareholders as ordinary income dividends. Certain dividend income may be reported to shareholders as "qualified dividend income," which is generally subject to reduced rates of taxation. Net realized long-term capital gains, if any, are paid to shareholders as capital gains distributions, regardless of how long Shares of the Fund have been held. Distributions are made at the class level, so they may vary from class to class within the Fund.

Distribution Schedule

Dividends from net investment income and distributions of capital gains are normally declared and distributed in December but, if necessary, may be distributed at other times as well.

How Distributions Affect the Fund's NAV

Distributions are paid to shareholders as of the record date of a distribution of the Fund, regardless of how long the shares have been held. Undistributed dividends and net capital gains are included in the Fund's daily net asset value ("NAV"). The share price of the Fund drops by the amount of the distribution, net of any subsequent market fluctuations. For example, assume that on December 31, the Fund declared a dividend in the amount of \$0.25 per share. If the Fund's share price was \$10.00 on December 30, the Fund's share price on December 31 would be \$9.75, barring market fluctuations. You should be aware that distributions from a taxable mutual fund do not increase the value of your investment and may create income tax obligations.

"Buying a Dividend"

If you purchase shares of the Fund just before a distribution, you will pay the full price for the shares and receive a portion of the purchase price back as a taxable distribution. This is referred to as "buying a dividend." In the above example, if you bought shares on December 30, you would have paid \$10.00 per share. On December 31, the Fund would pay you \$0.25 per share as a dividend and your shares would now be worth \$9.75 per share. Unless your account is set up as a tax-deferred account, dividends paid to you would be included in your gross income for tax purposes, even though you may not have participated in the increase in NAV of the Fund, whether or not you reinvested the dividends. You should consult with your tax adviser as to potential tax consequences of any distributions that may be paid shortly after purchase.

For your convenience, distributions of net investment income and net capital gains are automatically reinvested in additional Shares of the Fund. To receive distributions in cash, contact a Janus representative at 1-800-525-3713. Whether reinvested or paid in cash, the distributions may be subject to taxes, unless your shares are held in a qualified tax-deferred plan or account.

DISTRIBUTION OPTIONS

When you open an account, it will automatically provide for reinvestment of all distributions. If you have a non-retirement account, you may change your distribution option at any time by logging on to janus.com/individual, by calling a Janus representative, or by writing to the Fund at one of the addresses listed in the Shareholder's Manual section of this Prospectus. The Fund offers the following options:

Reinvestment Option. You may reinvest your income dividends and capital gains distributions in additional shares.

Cash Option. You may receive your income dividends and capital gains distributions in cash.

Reinvest and Cash Option. You may receive either your income dividends or capital gains distributions in cash and reinvest the other in additional shares.

Redirect Option. You may direct your dividends or capital gains distributions to purchase shares of another Janus fund.

The Fund reserves the right to reinvest undeliverable and uncashed dividend and distribution checks into your open non-retirement account at the NAV next computed after the check is cancelled. Subsequent distributions may also be reinvested. For more information, refer to "Distributions."

TAXES

As with any investment, you should consider the tax consequences of investing in the Fund. Any time you sell or exchange shares of a fund in a taxable account, it is considered a taxable event. For federal income tax purposes, an exchange is treated the same as a sale. Depending on the purchase price and the sale price, you may have a gain or loss on the transaction; whether the gain or loss is long-term or short-term depends on how long you owned the shares. Any tax liabilities generated by your transactions are your responsibility.

The following discussion does not apply to qualified tax-deferred accounts or other non-taxable entities, nor is it a complete analysis of the federal income tax implications of investing in the Fund. You should consult your tax adviser if you have any questions. Additionally, state or local taxes may apply to your investment, depending upon the laws of your state of residence.

Taxes on Distributions

Distributions by the Fund are subject to federal income tax, regardless of whether the distribution is made in cash or reinvested in additional shares of the Fund. When gains from the sale of a security held by the Fund are paid to shareholders, the rate at which the gain will be taxed to shareholders depends on the length of time the Fund held the security. In certain states, a portion of the distributions (depending on the sources of the Fund's income) may be exempt from state and local taxes. The Fund's net investment income and capital gains are distributed to (and may be taxable to) those persons who are shareholders of the Fund at the record date of such payments. Although the Fund's total net income and net realized gain are the results of its operations, the per share amount distributed or taxable to shareholders is affected by the number of Fund shares outstanding at the record date. Generally, account tax information will be made available to shareholders on or before January 31st of each year. Information regarding distributions may also be reported to the Internal Revenue Service. Please note that you may receive account tax information from Janus Global Real Estate Fund at the end of February of each year, which is one month later than when most such forms are sent. REITs typically recharacterize a portion of the dividends paid during the year from ordinary income to capital gain and/or return of capital (which could relate to depreciation on real estate). The information regarding this recharacterization is generally not made available by the REIT until late January. Therefore, the actual composition of the Fund's distributions during a year may change substantially subsequent to year-end. To the extent these changes occur, they may have the effect of reducing the net investment income component of the Fund's distributions and increasing the capital gains and/or return of capital components.

Distributions made by the Fund with respect to Shares purchased through a qualified retirement plan will generally be exempt from current taxation if left to accumulate within the qualified plan.

Generally, withdrawals from qualified plans may be subject to federal income tax at ordinary income rates and, if made before age 59½, a 10% penalty tax may be imposed. The federal income tax status of your investment depends on the features of your qualified plan. For further information, please contact your tax adviser.

The Fund may be required to withhold U.S. federal income tax on all distributions and redemptions payable to shareholders who fail to provide their correct taxpayer identification number, fail to make certain required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. The current backup withholding rate is applied.

When shareholders sell Fund shares from a taxable account, they typically receive information on their tax forms that calculates their gain or loss using the average cost method. Prior to January 1, 2012, this information was not reported to the IRS, and shareholders had the option of calculating gains or losses using an alternative IRS permitted method. In accordance with legislation passed by Congress in 2008, however, the Fund began reporting cost basis information to the IRS for shares purchased on or after January 1, 2012 and sold thereafter. The Fund will permit shareholders to elect their preferred cost basis method. In the absence of an election, the Fund will use an average cost basis method. Please consult your tax adviser to determine the appropriate cost basis method for your particular tax situation and to learn more about how the new cost basis reporting laws apply to you and your investments.

Taxation of the Fund

Dividends, interest, and some capital gains received by the Fund on foreign securities may be subject to foreign tax withholding or other foreign taxes. If the Fund is eligible, it may from year to year make the election permitted under Section 853 of the Internal Revenue Code to pass through such taxes to shareholders as a foreign tax credit. If such an election is not made, any foreign taxes paid or accrued will represent an expense to the Fund.

Certain fund transactions may involve short sales, futures, options, swap agreements, hedged investments, and other similar transactions, and may be subject to special provisions of the Internal Revenue Code that, among other things, can potentially affect the character, amount, timing of distributions to shareholders, and utilization of capital loss carryforwards. The Fund will monitor its transactions and may make certain tax elections and use certain investment strategies where applicable in order to mitigate the effect of these tax provisions, if possible. Certain transactions or strategies utilized by the Fund may generate nonqualified income that can impact an investor's taxes.

The Fund does not expect to pay any federal income or excise taxes because it intends to meet certain requirements of the Internal Revenue Code, including the distribution each year of all its net investment income and net capital gains. It is important that the Fund meets these requirements so that any earnings on your investment will not be subject to federal income taxes twice. Funds that invest in partnerships may be subject to state tax liabilities.

Shareholder' s manual

This Shareholder' s Manual is for those shareholders investing directly with the Fund. This section will help you become familiar with the different types of accounts you can establish with Janus. It also explains in detail the wide array of services and features you can establish on your account, as well as describes account policies and fees that may apply to your account. Account policies (including fees), services, and features may be modified or discontinued without shareholder approval or prior notice.

DOING BUSINESS WITH JANUS

The Shares are generally no longer being made available to new investors who do not already have a direct account with the Janus funds. The Shares are available only to investors who hold accounts directly with the Janus funds, and to immediate family members or members of the same household of an eligible individual investor. Under certain limited circumstances, shareholders of other Janus share classes who no longer wish to hold shares through an intermediary may be eligible to purchase Class D Shares.

In addition, directors, officers, and employees of Janus Capital Group Inc. ("JCGI") and its affiliates, as well as Trustees and officers of the Fund, may purchase Class D Shares. Under certain circumstances, where there has been a change in the form of ownership due to, for example, mandatory retirement distributions, legal proceedings, estate settlements, or the gifting of Shares, the recipient of Class D Shares may continue to purchase Class D Shares.

The Fund offers multiple classes of shares in order to meet the needs of various types of investors. **You should carefully consider which class of shares to purchase. Certain classes have higher expenses than other classes, which may lower the return on your investment.** If you would like additional information about the other available share classes, please call 1-800-525-3713.

MINIMUM INVESTMENTS*

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

The Fund reserves the right to change the amount of these minimums from time to time or to waive them in whole or in part. Participants in certain retirement plans, including but not limited to, Janus prototype Money Purchase Pension and Profit Sharing plans, SEP IRAs, SAR SEP IRAs, or outside qualified retirement plans, may not be subject to the stated minimums. Employees of Janus Capital, its wholly-owned subsidiaries, INTECH, and Perkins may open Fund accounts for \$100.

Minimum Investment Requirements

Due to the proportionately higher costs of maintaining small accounts, the Fund reserves the right to deduct an annual \$25 minimum balance fee per Fund account (paid to Janus Services) with values below the minimums described under “Minimum Investments” or to close Fund accounts valued at less than \$100. This policy may not apply to accounts that fall below the minimums solely as a result of market value fluctuations or to those accounts not subject to a minimum investment requirement. The fee or account closure will occur during the fourth quarter of each calendar year. You may receive written notice before we charge the \$25 fee or close your account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of the fee being charged or the redemption.

TYPES OF ACCOUNT OWNERSHIP

Please refer to janus.com/individual or an account application for specific requirements to open and maintain an account.

Individual or Joint Ownership

Individual accounts are owned by one person. Joint accounts have two or more owners.

Trust

An established trust can open an account. The names of each trustee, the name of the trust, and the date of the trust agreement must be included on the application.

Business Accounts

Corporations and partnerships may also open an account. The application must be signed by an authorized officer of the corporation or a general partner of the partnership.

TAX-DEFERRED ACCOUNTS

Please refer to janus.com/individual or an account application for specific requirements to open and maintain an account. Certain tax-deferred accounts can only be opened and maintained via written request. Please contact a Janus representative for more information.

If you are eligible, you may set up one or more tax-deferred accounts. A tax-deferred account allows you to shelter your investment income and capital gains from current income taxes. A contribution to certain of these plans may also be tax deductible. The types of tax-deferred accounts that may be opened with Janus are described below. Investors should consult their tax adviser or legal counsel before selecting a tax-deferred account. You may initiate a rollover or a transfer of assets from certain tax-deferred accounts via janus.com/individual.

Investing for Your Retirement

Please visit janus.com/individual or call a Janus representative for more complete information regarding the different types of IRAs available. Distributions from these plans may be subject to income tax and generally to an additional tax if withdrawn prior to age 59½ or used for a nonqualifying purpose.

Traditional and Roth IRAs

Both IRAs allow most individuals with earned income to contribute up to the lesser of \$5,000 or 100% of compensation, with future years increased by cost-of-living adjustments. In addition, IRA holders age 50 or older may contribute \$1,000 more than these limits.

Simplified Employee Pension (“SEP”) IRA

This plan allows small business owners (including sole proprietors) to make tax-deductible contributions for themselves and any eligible employee(s). A SEP requires an IRA (a “SEP-IRA”) to be set up for each SEP participant.

Profit Sharing or Money Purchase Pension Plans

These plans are open to corporations, partnerships, and small business owners (including sole proprietors) for the benefit of their employees and themselves. You may only open and maintain this type of account via written request. Please contact a Janus representative for more information.

ACCOUNTS FOR THE BENEFIT OF A CHILD**Custodial Accounts (UGMA or UTMA)**

An UGMA/UTMA account is a custodial account managed for the benefit of a minor.

Coverdell Education Savings Account

This tax-deferred plan allows individuals, subject to certain income limitations, to contribute up to \$2,000 annually on behalf of any child under the age of 18. Contributions are also allowed on behalf of children with special needs beyond age 18. Distributions are generally tax-free when used for qualified education expenses.

Please refer to the following for information regarding opening an account and conducting business with Janus. With certain limited exceptions, the Fund is available only to U.S. citizens or residents, and employees of Janus or its affiliates.

TO OPEN AN ACCOUNT OR BUY SHARES

Certain tax-deferred accounts can only be opened and maintained via written request. Please contact a Janus representative for more information.

Online

You may open a new Fund account or you may buy shares in an existing Fund account. You may elect to have Janus electronically withdraw funds from your designated bank account. You may initiate a rollover or a transfer of assets from certain tax-deferred accounts via janus.com/individual. A real-time confirmation of your transaction will be provided via janus.com/individual.

By Telephone

For an existing account, you may use Janus XpressLine™ to buy shares 24 hours a day, or you may call a Janus representative during normal business hours. Janus will electronically withdraw funds from your designated bank account.

You may also buy shares by wiring money from your bank account to your Fund account. For wiring instructions, call a Janus representative.

By Mail/In Writing

To open your Fund account, complete and sign the appropriate application. Make your check payable to Janus or elect a one-time electronic withdrawal from your bank account as noted on the appropriate application.

To buy additional shares, complete the remittance slip accompanying your confirmation statement. If you are making a purchase into a retirement account, please indicate whether the purchase is a rollover or a current or prior year contribution. Send your check and remittance slip or written instructions to the address listed on the slip.

By Automated Investments

To buy additional shares through the Automatic Investment Program, you select the frequency with which your money (\$100 minimum) will be electronically transferred from your bank account to your Fund account. Certain tax-deferred accounts are not eligible for automated investments.

You may buy additional shares using Payroll Deduction if your employer can initiate this type of transaction. You may have all or a portion of your paycheck (\$100 minimum) invested directly into your Fund account.

Note: For more information, refer to “Paying for Shares.”

TO EXCHANGE SHARES

Online

Exchanges may be made online at janus.com/individual.

By Telephone

Generally all accounts are automatically eligible to exchange shares by telephone. To exchange all or a portion of your shares into any other available Janus fund, call Janus XpressLine™ or a Janus representative.

By Mail/In Writing

To request an exchange in writing, please follow the instructions in “Written Instructions.”

By Systematic Exchange

You determine the amount of money you would like automatically exchanged from one Fund account to another on any day of the month.

Note: For more information, refer to “Exchanges.”

TO SELL SHARES

Online

Redemptions may be made online at janus.com/individual.

By Telephone

Generally all accounts are automatically eligible to sell shares by telephone. To sell all or a portion of your shares, call Janus XpressLine™ or a Janus representative. The Fund reserves the right to limit the dollar amount that you may redeem from your account by telephone.

By Mail/In Writing

To request a redemption in writing, please follow the instructions in “Written Instructions.”

By Systematic Redemption

This program allows you to sell shares worth a specific dollar amount from your Fund account on a regular basis.

Note: For more information, refer to “Payment of Redemption Proceeds.”

PRICING OF FUND SHARES

The per share NAV for each class is computed by dividing the total value of assets allocated to the class, less liabilities allocated to that class, by the total number of outstanding shares of the class. The Fund's NAV is calculated as of the close of the regular trading session of the New York Stock Exchange (“NYSE”) (normally 4:00 p.m. New York time) each day that the NYSE is open (“business day”). However, the NAV may be calculated earlier if trading on the NYSE is restricted, or as permitted by the Securities and Exchange Commission (“SEC”). Foreign securities held by the Fund may be traded on days and at times when the NYSE is closed and the NAV is therefore not calculated. Accordingly, the value of the Fund's holdings may change on days that are not business days in the United States and on which you will not be able to purchase or redeem the Fund's Shares.

All purchases, exchanges, and redemptions will be duly processed at the NAV as described under “Policies in Relation to Transactions” after your request is received in good order by the Fund or its agents.

Securities held by the Fund are generally valued at market value. Certain short-term instruments maturing within 60 days or less are valued at amortized cost, which approximates market value. If a market quotation for a security is not readily available or is deemed unreliable, or if an event that is expected to affect the value of the security occurs after the close of the principal exchange or market on which the security is traded, and before the close of the NYSE, a fair value of the security (except for short-term instruments maturing within 60 days or less) will be determined in good faith under policies and procedures established by and under the supervision of the Fund's Trustees. Such events include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific

development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a non-significant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a non-valued security and a restricted or non-public security. While fair value pricing may be more commonly used with foreign equity securities, it may also be used with, among other things, thinly-traded domestic securities or fixed-income securities. For valuation purposes, quotations of foreign portfolio securities, other assets and liabilities, and forward contracts stated in foreign currency are generally translated into U.S. dollar equivalents at the prevailing market rates. The Fund may use systematic fair valuation models provided by independent pricing services to value foreign equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

Due to the subjective nature of fair value pricing, the Fund's value for a particular security may be different from the last quoted market price. Fair value pricing may reduce arbitrage activity involving the frequent buying and selling of mutual fund shares by investors seeking to take advantage of a perceived lag between a change in the value of the Fund's portfolio securities and the reflection of such change in the Fund's NAV, as further described in the "Excessive Trading" section of this Prospectus. While funds that invest in foreign securities may be at a greater risk for arbitrage activity, such activity may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that the Fund's valuation of a security is different from the security's market value, short-term arbitrage traders buying and/or selling shares of the Fund may dilute the NAV of the Fund, which negatively impacts long-term shareholders. The Fund's fair value pricing and excessive trading policies and procedures may not completely eliminate short-term trading in certain omnibus accounts and other accounts traded through intermediaries.

The value of the securities of other open-end funds held by the Fund, if any, will be calculated using the NAV of such open-end funds, and the prospectuses for such open-end funds explain the circumstances under which they use fair value pricing and the effects of using fair value pricing.

Policies in Relation to Transactions

All requests, including but not limited to, exchanges between the Fund and other Janus funds, purchases by check or automated investment, redemptions by wire transfer, ACH transfer, or check, must be received in good order by the Fund or its agents prior to the close of the regular trading session of the NYSE (normally 4:00 p.m. New York time) in order to receive that day's NAV. Transaction requests submitted in writing and mailed to Janus' P.O. Box, once delivered, are considered received for processing the following business day. Transactions involving funds which pay dividends will generally begin to earn dividends, as applicable, on the first bank business day following the date of purchase.

ADMINISTRATIVE SERVICES FEES

The Fund pays an annual administrative services fee of 0.12% of net assets of Class D Shares. These administrative services fees are paid by Class D Shares of the Fund for shareholder services provided by Janus Services.

PAYMENTS TO FINANCIAL INTERMEDIARIES BY JANUS CAPITAL OR ITS AFFILIATES

With respect to other share classes not offered in this Prospectus, Janus Capital or its affiliates may pay, from their own assets, selected brokerage firms or other financial intermediaries that sell the Janus funds for distribution, marketing, promotional, or related services. Such payments may be based on gross sales, assets under management, or transactional charges, or on a combination of these factors. The amount of these payments is determined from time to time by Janus Capital, may be substantial, and may differ for different financial intermediaries. Janus Capital and its affiliates consider a number of factors in making payments to financial intermediaries.

In addition, with respect to other share classes not offered in this Prospectus, Janus Capital or its affiliates may pay fees, from their own assets, to brokerage firms, banks, financial advisors, retirement plan service providers, and other financial intermediaries for providing recordkeeping, subaccounting, transaction processing, and other shareholder or administrative services (including payments for processing transactions via National Securities Clearing Corporation ("NSCC") or other means) in connection with investments in the Janus funds. These fees are in addition to any fees that may be paid by the Janus funds for these types of services or other services.

Further, Janus Capital or its affiliates may also share certain marketing expenses with intermediaries, or pay for or sponsor informational meetings, seminars, client awareness events, support for marketing materials, sales reporting, or business building programs for such intermediaries to raise awareness of the Fund. Janus Capital or its affiliates may make payments to participate in intermediary marketing support programs which may provide Janus Capital or its affiliates with one or more of the following benefits: attendance at sales conferences, participation in meetings or training sessions, access to or information about intermediary personnel, use of an intermediary's marketing and communication infrastructure, fund analysis tools, business planning and strategy sessions with intermediary personnel, information on industry- or platform-specific developments, trends and service providers, and other marketing-related services. Such payments may be in addition to, or in lieu of, the payments described above. These payments are intended to promote the sales of Janus funds and to reimburse financial intermediaries, directly or indirectly, for the costs that they or their salespersons incur in connection with educational seminars, meetings, and training efforts about the Janus funds to enable the intermediaries and their salespersons to make suitable recommendations, provide useful services, and maintain the necessary infrastructure to make the Janus funds available to their customers.

The receipt of (or prospect of receiving) payments described above may provide a financial intermediary and its salespersons with an incentive to favor sales of Janus funds' shares over sales of other mutual funds (or non-mutual fund investments) or to favor sales of one class of Janus funds' shares over sales of another Janus funds' share class, with respect to which the financial intermediary does not receive such payments or receives them in a lower amount. The receipt of these payments may cause certain financial intermediaries to elevate the prominence of the Janus funds within such financial intermediary's organization by, for example, placement on a list of preferred or recommended funds and/or the provision of preferential or enhanced opportunities to promote the Janus funds in various ways within such financial intermediary's organization.

From time to time, certain financial intermediaries approach Janus Capital to request that Janus Capital make contributions to certain charitable organizations. In these cases, Janus Capital's contribution may result in the financial intermediary, or its salespersons, recommending Janus funds over other mutual funds (or non-mutual fund investments).

The payment arrangements described above will not change the price an investor pays for Shares nor the amount that a Janus fund receives to invest on behalf of the investor. You should consider whether such arrangements exist when evaluating any recommendations from an intermediary to purchase or sell Shares of the Fund and, if applicable, when considering which share class of the Fund is most appropriate for you.

PAYING FOR SHARES

Please note the following when purchasing Shares:

Cash, credit cards, third party checks (with certain limited exceptions), travelers cheques, credit card checks, line of credit checks, or money orders will not be accepted.

All purchases must be made in U.S. dollars and checks must be drawn on U.S. banks or an accepted Canadian bank.

Purchases initiated using a bill-pay service (or an equivalent) and presented either electronically or in the form of a check are considered direct deposit transactions.

When purchasing Shares through the Automatic Investment Program, if no date or dollar amount is specified on your application, investments of \$100 will be made on the 20th of each month. Your first automatic investment may take up to two weeks to establish. If the balance in the Janus fund account you are buying into falls to zero as the result of a redemption or exchange, your Automatic Investment Program will be discontinued.

We may make additional attempts to debit your predesignated bank account for automated investments that initially fail. You are liable for any costs associated with these additional attempts. If your automated investment fails, you may purchase Shares of the Fund by submitting good funds via another method accepted by the Fund (e.g., by wire transfer). In this case, your purchase will be processed at the next NAV determined after we receive good funds, not at the NAV available as of the date of the original request.

The Fund reserves the right to reject any purchase order, including exchange purchases, for any reason. The Fund is not intended for excessive trading. For more information about the Fund's policy on excessive trading, refer to "Excessive Trading."

If all or a portion of a purchase is received for investment without a specific fund designation, for investment in one of our closed funds, or for investment in a fund that is not yet available for public sale, the undesignated amount or entire investment, as applicable, will be invested in Janus Money Market Fund. For investments without a specific fund designation, where you own a single Fund account with a current balance greater than zero, the investment will be applied to that Fund account. For investments without a specific fund designation, where you own two or more Fund accounts with current balances greater than zero, and for investments in closed funds, unless you later direct Janus to (i) buy shares of another Janus fund or (ii) sell shares of Janus Money Market Fund and return the proceeds (including any dividends earned) to you, Janus will treat your inaction as approval of the purchase of Janus Money Market Fund. If you hold shares of a closed fund and submit an order directly to Janus for your account in that closed fund, your account must be open and your order must clearly indicate that you are currently a shareholder of the closed fund, or your money will be invested in Janus Money Market Fund. If you submit an order to buy shares of a fund that is not yet available for investment (during a subscription period), your investment will be held in Janus Money Market Fund until the new fund's commencement of operations. At that time, your investment (including any dividends) will be automatically exchanged from Janus Money Market Fund to the new fund. All orders for purchase, exchange, or redemption will receive the NAV as described under "Policies in Relation to Transactions."

For Fund purchases by check, if your check does not clear for any reason, your purchase will be cancelled.

If your purchase is cancelled for any reason, you will be responsible for any losses or fees imposed by your bank and may be responsible for losses that may be incurred as a result of any decline in the value of the cancelled purchase.

In compliance with the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"), Janus is required to verify certain information on your account application as part of its Anti-Money Laundering Program. You will be required to provide your full name, date of birth, social security number, and permanent street address to assist in verifying your identity. You may also be asked to provide documents that may help to establish your identity. Until verification of your identity is made, Janus may temporarily limit additional share purchases. In addition, Janus may close an account if they are unable to verify a shareholder's identity. Please contact a Janus representative if you need additional assistance when completing your application or additional information about the Anti-Money Laundering Program.

In an effort to ensure compliance with this law, Janus' Anti-Money Laundering Program (the "Program") provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

The Fund has also adopted an identity theft policy ("Red Flag Policy") to detect, prevent, and mitigate patterns, practices, or specific activities that indicate the possible existence of identity theft. The Fund is required by law to obtain certain personal information which will be used to verify your identity. The Red Flag Policy applies to the opening of Fund accounts and activity with respect to existing accounts.

EXCHANGES

Please note the following when exchanging shares:

An exchange represents the redemption (or sale) of shares from one Fund and the purchase of shares of another Fund, which may produce a taxable gain or loss in a non-retirement account.

You may generally exchange Shares of the Fund for Shares of the same class of any other fund in the Trust.

You may also exchange shares of one class for another class of shares within the same fund, provided the eligibility requirements of the class of shares to be received are met. The Fund's fees and expenses differ between share classes. Exchanging from a direct share class to one held through an intermediary typically results in increased expenses. This is because share classes distributed through intermediaries include additional fees for administration and/or distribution to pay for services provided by intermediaries. Please read the Prospectus for the share class you are interested in prior to investing in that share class.

New regular Janus fund accounts established by exchange must be opened with \$2,500 or the total account value if the value of the Janus fund account you are exchanging from is less than \$2,500. (If your Janus fund account balance does not meet the minimum investment requirements, you may be subject to an annual minimum balance fee or account closure. For more information, refer to "Minimum Investment Requirements.")

UGMA/UTMA accounts, Traditional or Roth IRAs, Simplified Employee Pension IRAs, and Coverdell Education Savings Accounts established by exchange must meet the minimum investment requirements previously described. If the value of the Janus fund account you are exchanging from is less than the stated minimum, you must exchange the entire balance. (If your Janus fund account balance does not meet the minimum investment requirements, you may be subject to an annual minimum balance fee or account closure. For more information, refer to “Minimum Investment Requirements.”)

New Janus fund non-retirement accounts established by an exchange (or exchange purchases to an existing Roth IRA) resulting from a required minimum distribution from a retirement account do not have an initial minimum investment requirement. (If your Janus fund account balance does not meet the minimum investment requirements, you may be subject to an annual minimum balance fee or account closure. For more information, refer to “Minimum Investment Requirements.”)

Exchanges between existing Janus fund accounts must meet the \$100 subsequent investment requirement.

For Systematic Exchanges, if no date is specified on your request, systematic exchanges will be made on the 20th of each month. You may establish this option for as little as \$100 per exchange. If the balance in the Janus fund account you are exchanging from falls below the Systematic Exchange amount, all remaining shares will be exchanged and your Systematic Exchange Program will be discontinued.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. The Fund may suspend or terminate your exchange privilege if you make more than one round trip in the Fund in a 90-day period and may bar future purchases in the Fund or any of the other Janus funds. Different restrictions may apply if you invest through an intermediary. For more information about the Fund’s policy on excessive trading, refer to “Excessive Trading.”

The Fund reserves the right to reject any exchange request and to modify or terminate the exchange privilege at any time.

With certain limited exceptions, exchanges between Janus fund accounts will be accepted only if the registrations are identical. If you are exchanging into a closed Janus fund, you will need to meet criteria for investing in the closed fund. For more information, refer to Closed Fund Policies in the “Other Information” section of this Prospectus.

Note: For the fastest and easiest way to exchange shares, log on to janus.com/individual* 24 hours a day, 7 days a week.

* Certain account types do not allow transactions via janus.com. For more information, access janus.com/individual or refer to this Shareholder’s Manual.

PAYMENT OF REDEMPTION PROCEEDS

By Electronic Transfer – Generally all accounts are automatically eligible for the electronic redemption option if bank information is provided.

Next Day Wire Transfer – Your redemption proceeds can be electronically transferred to your predesignated bank account on the next bank business day after receipt of your redemption request (wire transfer). You may be charged a fee for each wire transfer, and your bank may charge an additional fee to receive the wire.

ACH (Automated Clearing House) Transfer – Your redemption proceeds can be electronically transferred to your predesignated bank account on or about the second bank business day after receipt of your redemption request. There is no fee associated with this type of electronic transfer.

By Check – Redemption proceeds will be sent to the shareholder(s) of record at the address of record normally within seven days after receipt of a valid redemption request. During the 10 days following an address change, requests for redemption checks to be sent to a new address require a signature guarantee.

By Systematic Redemption - If no date is specified on your request, systematic redemptions will be made on or about the 24th of each month. If the balance in the Janus fund account you are selling from falls to zero, your Systematic Redemption Program will be discontinued.

Generally, orders to sell Shares may be initiated at any time at janus.com/individual, by telephone, or in writing. Certain tax-deferred accounts may require a written request. If the Shares being sold were purchased by check or automated investment, the Fund can delay the payment of your redemption proceeds for up to 15 days from the day of purchase to allow the purchase to clear. In addition, there may be a delay in the payment of your redemption proceeds if you request a redemption by electronic transfer and your bank information is new. Unless you provide alternate instructions, your proceeds will be invested in Shares of Janus Money Market Fund during the 15-day hold period.

The Fund reserves the right to postpone payment of redemption proceeds for up to seven calendar days. Additionally, the right to require the Fund to redeem its Shares may be suspended, or the date of payment may be postponed beyond seven calendar days, whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable.

Note: For the fastest and easiest way to redeem shares, log on to janus.com/individual* 24 hours a day, 7 days a week.

* Certain account types do not allow transactions via janus.com. For more information, access janus.com/individual or refer to this Shareholder's Manual.

Large Shareholder Redemptions

Certain accounts or Janus affiliates may from time to time own (beneficially or of record) or control a significant percentage of the Fund's Shares. Redemptions by these accounts of their holdings in the Fund may impact the Fund's liquidity and NAV. These redemptions may also force the Fund to sell securities, which may negatively impact the Fund's brokerage costs.

Redemptions In-Kind

Shares normally will be redeemed for cash, although the Fund retains the right to redeem some or all of its shares in-kind under unusual circumstances, in order to protect the interests of remaining shareholders, to accommodate a request by a particular shareholder that does not adversely affect the interests of the remaining shareholders, or in connection with the liquidation of a fund, by delivery of securities selected from its assets at its discretion. However, the Fund is required to redeem shares solely for cash up to the lesser of \$250,000 or 1% of the NAV of the Fund during any 90-day period for any one shareholder. Should redemptions by any shareholder exceed such limitation, the Fund will have the option of redeeming the excess in cash or in-kind. In-kind payment means payment will be made in portfolio securities rather than cash. If this occurs, the redeeming shareholder might incur brokerage or other transaction costs to convert the securities to cash, whereas such costs are borne by the Fund for cash redemptions.

While the Fund may pay redemptions in-kind, the Fund may instead choose to raise cash to meet redemption requests through the sale of fund securities or permissible borrowings. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and may increase brokerage costs.

WRITTEN INSTRUCTIONS

To redeem or exchange all or part of your Shares in writing, your request should be sent to one of the addresses listed under "Doing Business with Janus." Requests or documents received in a language other than English may be inadvertently delayed or returned due to an inability to accurately translate the intended instructions. Please include the following information:

- the name of the Janus fund(s) being redeemed or exchanged;
- the account number(s);
- the amount of money or number of shares being redeemed or exchanged;
- the name(s) on the account;
- the signature(s) of one or more registered account owners; and
- your daytime telephone number.

SIGNATURE GUARANTEE

A signature guarantee for each registered account owner is required if any of the following is applicable:

- You request a redemption by check above a certain dollar amount.
- You would like a check made payable to anyone other than the shareholder(s) of record.
- You would like a check mailed to an address that has been changed within 10 days of the redemption request.
- You would like a check mailed to an address other than the address of record.
- You would like your redemption proceeds sent to a bank account other than a bank account of record.

The Fund reserves the right to require a signature guarantee under other circumstances or to reject or delay a redemption on certain legal grounds.

A signature guarantee may be refused if any of the following is applicable:

- It does not appear valid or in good form.
- The transaction amount exceeds the surety bond limit of the signature guarantee.
- The guarantee stamp has been reported as stolen, missing, or counterfeit.

How to Obtain a Signature Guarantee

A signature guarantee assures that a signature is genuine. The signature guarantee protects shareholders from unauthorized account transfers. The following financial institutions may guarantee signatures: banks, savings and loan associations, trust companies, credit unions, broker-dealers, and member firms of a national securities exchange. Call your financial institution to see if they have the ability to guarantee a signature. *A signature guarantee cannot be provided by a notary public.*

If you live outside the United States, a foreign bank properly authorized to do business in your country of residence or a U.S. consulate may be able to authenticate your signature.

EXCESSIVE TRADING

Excessive Trading Policies and Procedures

The Trustees have adopted policies and procedures with respect to short-term and excessive trading of Fund shares (“excessive trading”). The Fund is intended for long-term investment purposes only, and the Fund will take reasonable steps to attempt to detect and deter short-term and excessive trading. Transactions placed in violation of the Fund’s exchange limits or excessive trading policies may be cancelled or revoked by the Fund by the next business day following receipt by the Fund. The trading history of accounts determined to be under common ownership or control within any of the Janus funds may be considered in enforcing these policies and procedures. Direct investors should be aware that the Fund is also available for purchase through third party intermediaries. As described below, the Fund may not be able to identify all instances of excessive trading or completely eliminate the possibility of excessive trading. In particular, it may be difficult to identify excessive trading in certain omnibus accounts and other accounts traded through intermediaries. By their nature, omnibus accounts, in which purchases and redemptions of the Fund’s shares by multiple investors are aggregated by the intermediary and presented to the Fund on a net basis, may effectively conceal the identity of individual investors and their transactions from the Fund and its agents. This makes the elimination of excessive trading in the accounts impractical without the assistance of the intermediary.

The Fund attempts to deter excessive trading through at least the following methods:

- exchange limitations as described under “Exchanges;”
- trade monitoring; and
- fair valuation of securities as described under “Pricing of Fund Shares.”

Generally, a purchase and redemption of Shares from the Fund (i.e., “round trip”) within 90 calendar days may result in enforcement of the Fund’s excessive trading policies and procedures with respect to future purchase orders, provided that the Fund reserves the right to reject any purchase request as explained above.

The Fund monitors for patterns of shareholder frequent trading and may suspend or permanently terminate the exchange privilege of any investor who makes more than one round trip in the Fund over a 90-day period, and may bar future purchases into the Fund and any of the other Janus funds by such investor. The Fund’s excessive trading policies generally do not apply to (i) a money market fund, although money market funds at all times reserve the right to reject any purchase

request (including exchange purchases) for any reason without prior notice; (ii) transactions in the Janus funds by a Janus “fund of funds,” which is a fund that primarily invests in other Janus mutual funds; and (iii) identifiable transactions by certain funds of funds and asset allocation programs to realign portfolio investments with existing target allocations.

The Fund’s Trustees may approve from time to time a redemption fee to be imposed by any Janus fund, subject to 60 days’ notice to shareholders of that fund.

Investors in other share classes who place transactions through the same financial intermediary on an omnibus basis may be deemed part of a group for the purpose of the Fund’s excessive trading policies and procedures and may be rejected in whole or in part by the Fund. The Fund, however, cannot always identify or reasonably detect excessive trading that may be facilitated by financial intermediaries or made difficult to identify through the use of omnibus accounts by those intermediaries that transmit purchase, exchange, and redemption orders to the Fund, and thus the Fund may have difficulty curtailing such activity. Transactions accepted by a financial intermediary in violation of the Fund’s excessive trading policies may be cancelled or revoked by the Fund by the next business day following receipt by the Fund.

In an attempt to detect and deter excessive trading in omnibus accounts, the Fund or its agents may require intermediaries to impose restrictions on the trading activity of accounts traded through those intermediaries. Such restrictions may include, but are not limited to, requiring that trades be placed by U.S. mail, prohibiting future purchases by investors who have recently redeemed Fund shares, requiring intermediaries to report information about customers who purchase and redeem large amounts, and similar restrictions. The Fund’s ability to impose such restrictions with respect to accounts traded through particular intermediaries may vary depending on the systems’ capabilities, applicable contractual and legal restrictions, and cooperation of those intermediaries.

Certain transactions in Fund shares, such as periodic rebalancing through intermediaries (no more frequently than every 60 days) or those which are made pursuant to systematic purchase, exchange, or redemption programs generally do not raise excessive trading concerns and normally do not require application of the Fund’s methods to detect and deter excessive trading.

The Fund also reserves the right to reject any purchase request (including exchange purchases) by any investor or group of investors for any reason without prior notice, including, in particular, if the trading activity in the account(s) is deemed to be disruptive to the Fund. For example, the Fund may refuse a purchase order if the Fund’s portfolio manager believes he would be unable to invest the money effectively in accordance with the Fund’s investment policies or the Fund would otherwise be adversely affected due to the size of the transaction, frequency of trading, or other factors.

The Fund’s policies and procedures regarding excessive trading may be modified at any time by the Fund’s Trustees.

Excessive Trading Risks

Excessive trading may present risks to the Fund’s long-term shareholders. Excessive trading into and out of the Fund may disrupt portfolio investment strategies, may create taxable gains to remaining Fund shareholders, and may increase Fund expenses, all of which may negatively impact investment returns for all remaining shareholders, including long-term shareholders.

Funds that invest in foreign securities may be at a greater risk for excessive trading. Investors may attempt to take advantage of anticipated price movements in securities held by a fund based on events occurring after the close of a foreign market that may not be reflected in the fund’s NAV (referred to as “price arbitrage”). Such arbitrage opportunities may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as “stale pricing”). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that the Fund’s valuation of a security differs from the security’s market value, short-term arbitrage traders may dilute the NAV of the Fund, which negatively impacts long-term shareholders. Although the Fund has adopted fair valuation policies and procedures intended to reduce the Fund’s exposure to price arbitrage, stale pricing, and other potential pricing inefficiencies, under such circumstances there is potential for short-term arbitrage trades to dilute the value of Fund shares.

Although the Fund takes steps to detect and deter excessive trading pursuant to the policies and procedures described in this Prospectus and approved by the Trustees, there is no assurance that these policies and procedures will be effective in limiting excessive trading in all circumstances. For example, for share classes sold through financial intermediaries, the Fund may be unable to completely eliminate the possibility of excessive trading in certain omnibus accounts and other accounts traded

through intermediaries. Omnibus accounts may effectively conceal the identity of individual investors and their transactions from the Fund and its agents. This makes the Fund's identification of excessive trading transactions in the Fund through an omnibus account difficult and makes the elimination of excessive trading in the account impractical without the assistance of the intermediary. Although the Fund encourages intermediaries to take necessary actions to detect and deter excessive trading, some intermediaries may be unable or unwilling to do so, and accordingly, the Fund cannot eliminate completely the possibility of excessive trading.

Shareholders that invest through an omnibus account should be aware that they may be subject to the policies and procedures of their financial intermediary with respect to excessive trading in the Fund.

AVAILABILITY OF PORTFOLIO HOLDINGS INFORMATION

The Mutual Fund Holdings Disclosure Policies and Procedures adopted by Janus Capital and all mutual funds managed within the Janus fund complex are designed to be in the best interests of the funds and to protect the confidentiality of the funds' portfolio holdings. The following describes policies and procedures with respect to disclosure of portfolio holdings.

Full Holdings. The Fund is required to disclose its complete holdings in the quarterly holdings report on Form N-Q within 60 days of the end of the first and third fiscal quarters, and in the annual report and semiannual report to Fund shareholders. These reports (i) are available on the SEC's website at <http://www.sec.gov>; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) are available without charge, upon request, by calling a Janus representative at 1-800-525-0020 (toll free). Portfolio holdings, consisting of at least the names of the holdings, are generally available on a calendar quarter-end basis with a 30-day lag. Holdings are generally posted approximately two business days thereafter under the Fund's Holdings & Details tab at janus.com/allfunds.

The Fund may provide, upon request, historical full holdings on a monthly basis for periods prior to the previous quarter-end subject to a written confidentiality agreement.

Top Holdings. The Fund's top portfolio holdings, in order of position size and as a percentage of the Fund's total portfolio, are available monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag.

Other Information. The Fund may occasionally provide security breakdowns (e.g., industry, sector, regional, market capitalization, and asset allocation), top performance contributors/detractors (consisting of security names in alphabetical order), and specific portfolio level performance attribution information and statistics monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag. Top performance contributors/detractors provided at calendar quarter-end may include the percentage of contribution/detraction to Fund performance.

Full portfolio holdings will remain available on the Janus websites at least until a Form N-CSR or Form N-Q is filed with the SEC for the period that includes the date as of which the website information is current. Funds disclose their short positions, if applicable, only to the extent required in regulatory reports. Janus Capital may exclude from publication on its websites all or any portion of portfolio holdings or change the time periods of disclosure as deemed necessary to protect the interests of the Janus funds. Under extraordinary circumstances, exceptions to the Mutual Fund Holdings Disclosure Policies and Procedures may be made by Janus Capital's Chief Investment Officer(s) or their delegates. Such exceptions may be made without prior notice to shareholders. A summary of the Fund's portfolio holdings disclosure policies and procedures, which includes a discussion of any exceptions, is contained in the Fund's SAI.

SHAREHOLDER SERVICES AND ACCOUNT POLICIES

Address Changes

For the easiest way to change the address on your account, visit janus.com/individual. You may also call a Janus representative or send a written request signed by one or more shareholder(s) of record. Include the name of the Janus fund(s) you hold, the account number(s), the name(s) on the account, and both the old and new addresses. Certain options may be suspended for 10 days following an address change unless a signature guarantee is provided.

Bank Account Changes

For the easiest way to change your bank account of record or add new bank account information to your account, visit janus.com/individual. You may also send a written request signed by the shareholder of record or each shareholder of record

if more than one. Please note that you may change or add bank information online at janus.com/individual for purchases only. Certain tax-deferred accounts may require a written notice and, in some instances, bank privileges may not be available. We cannot accept changes or additions to bank account redemption options online at janus.com/individual or over the telephone. If the added bank account is a joint tenant/tenants in common account, at least one name on the bank account must match one name on the Fund account. There may be a delay in the payment of your redemption proceeds if you request a redemption by electronic transfer to a new bank or bank account.

Distributions

Generally, all income dividends and capital gains distributions will automatically be reinvested in your Fund account. If you wish to change your distribution option, please visit janus.com/individual, call a Janus representative, or send a written request signed by one or more shareholder(s) of record.

If you receive Fund distributions from an open non-retirement Fund account by check, and a distribution check sent to you at your address of record has been returned to Janus and you have failed to respond to follow up mailings from Janus, upon return of the follow up mailing the distribution check will be reinvested in your open Fund account at the next calculated NAV. In addition, your non-retirement Fund account distribution checks may be reinvested in your Fund account if you do not cash them within one year of the date they were written. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Involuntary Redemptions

The Fund reserves the right to close an account if the shareholder is deemed to engage in activities which are illegal or otherwise believed to be detrimental to the Fund. This includes, but is not limited to, accounts that the Fund or its agents believe are engaged in market timing. Any time shares are redeemed in a taxable account, it is considered a taxable event. You are responsible for any tax liabilities associated with an involuntary redemption of your account.

Online and Telephone Transactions

You may initiate many transactions through janus.com/individual or by calling Janus XpressLine™. You may also contact a Janus representative. Generally all new accounts automatically receive online and telephone transaction privileges including redemption privileges. If you do not want to receive these privileges, please visit janus.com/individual or call a Janus representative. The Fund and its agents will not be responsible for any losses, costs, or expenses resulting from unauthorized transactions when reasonable procedures designed to verify the identity of the online user or caller are followed.

Your account information should be kept private, and you should immediately review any account statements that you receive from Janus. Someone other than you could act on your account if that person is able to provide the required identifying information. Contact Janus immediately about any transactions you believe to be unauthorized.

Occasionally, we experience high call volumes due to unusual market activity or other events that may make it difficult for you to reach a Janus representative by telephone. If you are unable to reach a Janus representative by telephone, please consider visiting janus.com/individual, calling Janus XpressLine™, or sending written instructions.

Registration Changes

To change the name on an account, the shares are generally transferred to a new account. In some cases, legal documentation may be required. Please visit janus.com/individual or call a Janus representative for further instructions.

Statements, Reports, and Prospectuses

We will send you quarterly confirmations of all transactions. You may elect at janus.com/edelivery to discontinue delivery of your paper statements, and instead receive them online. In addition, at janus.com/individual, the Fund will send you an immediate transaction confirmation statement after every non-systematic transaction. If you have not elected to receive online statements, your confirmation will be mailed within two days of the transaction. The Fund reserves the right to charge a fee for additional account statement requests.

The Fund produces financial reports that include a complete list of the Fund's portfolio holdings semiannually, and updates its prospectus annually. You may elect to receive these reports and prospectus updates electronically at janus.com/edelivery. The Fund's fiscal year ends September 30.

Unless you instruct Janus otherwise by contacting a Janus representative, the Fund will mail only one report or prospectus to your address of record ("household"), even if more than one person in your household has a Fund account. This process, known as "householding," reduces the amount of mail you receive and helps lower Fund expenses. If you decide that you no

longer want the mailing of these documents to be combined with the other members of your household, please call a Janus representative or send a written request signed by one or more shareholder(s) of record. Individual copies will be sent within thirty (30) days after the Fund receives your instructions.

Taxpayer Identification Number

On the application or other appropriate forms, you may be asked to certify that your Social Security or employer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding, or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a certain percentage (at the currently applicable rate) of any dividends paid and redemption or exchange proceeds. In addition to this backup withholding, you may be subject to a \$50 fee to reimburse the Fund for any penalty that the IRS may impose.

Temporary Suspension of Services

The Fund or its agents may, in case of emergency, temporarily suspend telephone transactions and other shareholder services. As previously noted, the Fund may postpone payment of redemption proceeds for up to seven calendar days. In addition, the right to require the Fund to redeem its Shares may be suspended or the date of payment may be postponed beyond seven calendar days whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable. The exchange privilege may also be suspended in these circumstances.

Financial highlights

The financial highlights table is intended to help you understand the Fund's financial performance for each fiscal period shown. Items "Net asset value, beginning of period" through "Net asset value, end of period" reflect financial results for a single Fund Share. The gross expense ratio reflects expenses prior to any expense offset arrangement and waivers (reimbursements), if applicable. The net expense ratio reflects expenses after any expense offset arrangement and waivers (reimbursements), if applicable. The information for the fiscal periods shown has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Annual Report, which is available upon request, and incorporated by reference into the SAI.

The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in Class D Shares of the Fund (assuming reinvestment of all dividends and distributions).

Janus Global Real Estate Fund - Class D

	Years or Period ended September 30		
	2012	2011	2010 ⁽¹⁾
Net asset value, beginning of period	\$7.66	\$9.15	\$7.64
<i>Income from investment operations:</i>			
Net investment income/(loss)	0.16	0.22	0.05
Net gain/(loss) on investments (both realized and unrealized)	2.34	(1.51)	1.45
Total from investment operations	2.50	(1.29)	1.50
<i>Less distributions and other:</i>			
Dividends from net investment income	(0.17)	(0.21)	—
Distributions from capital gains	—	—	—
Redemption fees ⁽²⁾	— (3)	0.01	0.01
Total distributions and other	(0.17)	(0.20)	0.01
Net asset value, end of period	\$9.99	\$7.66	\$9.15
Total return⁽⁴⁾	33.21%	(14.41)%	19.76%
Net assets, end of period (in thousands)	\$31,503	\$15,105	\$11,388
Average net assets for the period (in thousands)	\$19,495	\$17,244	\$4,756
Ratio of gross expenses to average net assets ⁽⁵⁾	1.34%	1.34%	1.83%
Ratio of net expenses to average net assets ⁽⁵⁾	1.34%	1.34%	1.43%
Ratio of net investment income/(loss) to average net assets ⁽⁵⁾	1.87%	2.34%	2.21%
Portfolio turnover rate	29%	68%	14%

(1) Period February 16, 2010 (commencement of Class D Shares) through September 30, 2010. The Fund changed its fiscal year end to September 30.

(2) Redemption fees were eliminated effective April 2, 2012.

(3) Redemption fees aggregated less than \$0.01 on a per share basis for the fiscal year end.

(4) Not annualized for periods of less than one full year.

(5) Annualized for periods of less than one full year.

Glossary of investment terms

This glossary provides a more detailed description of some of the types of securities, investment strategies, and other instruments in which the Fund may invest, as well as some general investment terms. The Fund may invest in these instruments to the extent permitted by its investment objective and policies. The Fund is not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in this Prospectus.

EQUITY AND DEBT SECURITIES

Average-Weighted Effective Maturity is a measure of a bond's maturity. The stated maturity of a bond is the date when the issuer must repay the bond's entire principal value to an investor. Some types of bonds may also have an "effective maturity" that is shorter than the stated date due to prepayment or call provisions. Securities without prepayment or call provisions generally have an effective maturity equal to their stated maturity. Average-weighted effective maturity is calculated by averaging the effective maturity of bonds held by a Fund with each effective maturity "weighted" according to the percentage of net assets that it represents.

Bank loans include institutionally-traded floating and fixed-rate debt securities generally acquired as a participation interest in or assignment of a loan originated by a lender or financial institution. Assignments and participations involve credit, interest rate, and liquidity risk. Interest rates on floating rate securities adjust with interest rate changes and/or issuer credit quality. If a Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, a Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. A Fund may have difficulty trading assignments and participations to third parties or selling such securities in secondary markets, which in turn may affect the Fund's NAV.

Bonds are debt securities issued by a company, municipality, government, or government agency. The issuer of a bond is required to pay the holder the amount of the loan (or par value of the bond) at a specified maturity and to make scheduled interest payments.

Certificates of Participation ("COPs") are certificates representing an interest in a pool of securities. Holders are entitled to a proportionate interest in the underlying securities. Municipal lease obligations are often sold in the form of COPs. Refer to "Municipal lease obligations" below.

Commercial paper is a short-term debt obligation with a maturity ranging from 1 to 270 days issued by banks, corporations, and other borrowers to investors seeking to invest idle cash. A Fund may purchase commercial paper issued in private placements under Section 4(2) of the Securities Act of 1933, as amended (the "1933 Act").

Common stocks are equity securities representing shares of ownership in a company and usually carry voting rights and earn dividends. Unlike preferred stock, dividends on common stock are not fixed but are declared at the discretion of the issuer's board of directors.

Convertible securities are preferred stocks or bonds that pay a fixed dividend or interest payment and are convertible into common stock at a specified price or conversion ratio.

Debt securities are securities representing money borrowed that must be repaid at a later date. Such securities have specific maturities and usually a specific rate of interest or an original purchase discount.

Depository receipts are receipts for shares of a foreign-based corporation that entitle the holder to dividends and capital gains on the underlying security. Receipts include those issued by domestic banks (American Depositary Receipts), foreign banks (Global or European Depositary Receipts), and broker-dealers (depository shares).

Duration is the time it will take investors to recoup their investment in a bond. Unlike average maturity, duration reflects both principal and interest payments. Generally, the higher the coupon rate on a bond, the lower its duration will be. The duration of a bond portfolio is calculated by averaging the duration of bonds held by a Fund with each duration "weighted" according to the percentage of net assets that it represents. Because duration accounts for interest payments, a Fund's duration is usually shorter than its average maturity.

Equity securities generally include domestic and foreign common stocks; preferred stocks; securities convertible into common stocks or preferred stocks; warrants to purchase common or preferred stocks; and other securities with equity characteristics.

Exchange-traded funds (“ETFs”) are index-based investment companies which hold substantially all of their assets in securities with equity characteristics. As a shareholder of another investment company, a Fund would bear its pro rata portion of the other investment company’s expenses, including advisory fees, in addition to the expenses the Fund bears directly in connection with its own operations.

Fixed-income securities are securities that pay a specified rate of return. The term generally includes short- and long-term government, corporate, and municipal obligations that pay a specified rate of interest, dividends, or coupons for a specified period of time. Coupon and dividend rates may be fixed for the life of the issue or, in the case of adjustable and floating rate securities, for a shorter period.

High-yield/high-risk bonds are bonds that are rated below investment grade by the primary rating agencies (i.e., BB+ or lower by Standard & Poor’s and Fitch, or Ba or lower by Moody’s). Other terms commonly used to describe such bonds include “lower rated bonds,” “non-investment grade bonds,” and “junk bonds.”

Industrial development bonds are revenue bonds that are issued by a public authority but which may be backed only by the credit and security of a private issuer and may involve greater credit risk. Refer to “Municipal securities” below.

Mortgage- and asset-backed securities are shares in a pool of mortgages or other debt instruments. These securities are generally pass-through securities, which means that principal and interest payments on the underlying securities (less servicing fees) are passed through to shareholders on a pro rata basis. These securities involve prepayment risk, which is the risk that the underlying mortgages or other debt may be refinanced or paid off prior to their maturities during periods of declining interest rates. In that case, a Fund may have to reinvest the proceeds from the securities at a lower rate. Potential market gains on a security subject to prepayment risk may be more limited than potential market gains on a comparable security that is not subject to prepayment risk.

Mortgage dollar rolls are transactions in which a Fund sells a mortgage-related security, such as a security issued by Government National Mortgage Association, to a dealer and simultaneously agrees to purchase a similar security (but not the same security) in the future at a predetermined price. A “dollar roll” can be viewed as a collateralized borrowing in which a Fund pledges a mortgage-related security to a dealer to obtain cash.

Municipal lease obligations are revenue bonds backed by leases or installment purchase contracts for property or equipment. Lease obligations may not be backed by the issuing municipality’s credit and may involve risks not normally associated with general obligation bonds and other revenue bonds. For example, their interest may become taxable if the lease is assigned and the holders may incur losses if the issuer does not appropriate funds for the lease payments on an annual basis, which may result in termination of the lease and possible default.

Municipal securities are bonds or notes issued by a U.S. state or political subdivision. A municipal security may be a general obligation backed by the full faith and credit (i.e., the borrowing and taxing power) of a municipality or a revenue obligation paid out of the revenues of a designated project, facility, or revenue source.

Pass-through securities are shares or certificates of interest in a pool of debt obligations that have been repackaged by an intermediary, such as a bank or broker-dealer.

Passive foreign investment companies (“PFICs”) are any foreign corporations which generate certain amounts of passive income or hold certain amounts of assets for the production of passive income. Passive income includes dividends, interest, royalties, rents, and annuities. To avoid taxes and interest that a Fund must pay if these investments are profitable, the Fund may make various elections permitted by the tax laws. These elections could require that a Fund recognize taxable income, which in turn must be distributed, before the securities are sold and before cash is received to pay the distributions.

Pay-in-kind bonds are debt securities that normally give the issuer an option to pay cash at a coupon payment date or give the holder of the security a similar bond with the same coupon rate and a face value equal to the amount of the coupon payment that would have been made.

Preferred stocks are equity securities that generally pay dividends at a specified rate and have preference over common stock in the payment of dividends and liquidation. Preferred stock generally does not carry voting rights.

Real estate investment trust (“REIT”) is an investment trust that operates through the pooled capital of many investors who buy its shares. Investments are in direct ownership of either income property or mortgage loans.

Rule 144A securities are securities that are not registered for sale to the general public under the 1933 Act, but that may be resold to certain institutional investors.

Standby commitment is a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred, or assigned only with the underlying security or securities. A standby commitment entitles the holder to receive same day settlement, and will be considered to be from the party to whom the investment company will look for payment of the exercise price.

Step coupon bonds are high-quality issues with above-market interest rates and a coupon that increases over the life of the bond. They may pay monthly, semiannual, or annual interest payments. On the date of each coupon payment, the issuer decides whether to call the bond at par, or whether to extend it until the next payment date at the new coupon rate.

Strip bonds are debt securities that are stripped of their interest (usually by a financial intermediary) after the securities are issued. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities of comparable maturity.

Tender option bonds are relatively long-term bonds that are coupled with the option to tender the securities to a bank, broker-dealer, or other financial institution at periodic intervals and receive the face value of the bond. This investment structure is commonly used as a means of enhancing a security’s liquidity.

U.S. Government securities include direct obligations of the U.S. Government that are supported by its full faith and credit. Treasury bills have initial maturities of less than one year, Treasury notes have initial maturities of one to ten years, and Treasury bonds may be issued with any maturity but generally have maturities of at least ten years. U.S. Government securities also include indirect obligations of the U.S. Government that are issued by federal agencies and government sponsored entities. Unlike Treasury securities, agency securities generally are not backed by the full faith and credit of the U.S. Government. Some agency securities are supported by the right of the issuer to borrow from the Treasury, others are supported by the discretionary authority of the U.S. Government to purchase the agency’s obligations, and others are supported only by the credit of the sponsoring agency.

Variable and floating rate securities have variable or floating rates of interest and, under certain limited circumstances, may have varying principal amounts. Variable and floating rate securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to some interest rate index or market interest rate (the “underlying index”). The floating rate tends to decrease the security’s price sensitivity to changes in interest rates.

Warrants are securities, typically issued with preferred stock or bonds, which give the holder the right to buy a proportionate amount of common stock at a specified price. The specified price is usually higher than the market price at the time of issuance of the warrant. The right may last for a period of years or indefinitely.

Zero coupon bonds are debt securities that do not pay regular interest at regular intervals, but are issued at a discount from face value. The discount approximates the total amount of interest the security will accrue from the date of issuance to maturity. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities.

FUTURES, OPTIONS, AND OTHER DERIVATIVES

Credit default swaps are a specific kind of counterparty agreement that allows the transfer of third party credit risk from one party to the other. One party in the swap is a lender and faces credit risk from a third party, and the counterparty in the credit default swap agrees to insure this risk in exchange for regular periodic payments.

Derivatives are financial instruments whose performance is derived from the performance of another asset (stock, bond, commodity, currency, interest rate or market index). Types of derivatives can include, but are not limited to options, forward contracts, swaps, and futures contracts.

Equity-linked structured notes are derivative securities which are specially designed to combine the characteristics of one or more underlying securities and their equity derivatives in a single note form. The return and/or yield or income component

may be based on the performance of the underlying equity securities, an equity index, and/or option positions. Equity-linked structured notes are typically offered in limited transactions by financial institutions in either registered or non-registered form. An investment in equity-linked notes creates exposure to the credit risk of the issuing financial institution, as well as to the market risk of the underlying securities. There is no guaranteed return of principal with these securities, and the appreciation potential of these securities may be limited by a maximum payment or call right. In certain cases, equity-linked notes may be more volatile and less liquid than less complex securities or other types of fixed-income securities. Such securities may exhibit price behavior that does not correlate with other fixed-income securities.

Equity swaps involve the exchange by two parties of future cash flow (e.g., one cash flow based on a referenced interest rate and the other based on the performance of stock or a stock index).

Forward contracts are contracts to purchase or sell a specified amount of a financial instrument for an agreed upon price at a specified time. Forward contracts are not currently exchange-traded and are typically negotiated on an individual basis. A Fund may enter into forward currency contracts for investment purposes or to hedge against declines in the value of securities denominated in, or whose value is tied to, a currency other than the U.S. dollar or to reduce the impact of currency appreciation on purchases of such securities. It may also enter into forward contracts to purchase or sell securities or other financial indices.

Futures contracts are contracts that obligate the buyer to receive and the seller to deliver an instrument or money at a specified price on a specified date. A Fund may buy and sell futures contracts on foreign currencies, securities, and financial indices including indices of U.S. Government, foreign government, equity, or fixed-income securities. A Fund may also buy options on futures contracts. An option on a futures contract gives the buyer the right, but not the obligation, to buy or sell a futures contract at a specified price on or before a specified date. Futures contracts and options on futures are standardized and traded on designated exchanges.

Indexed/structured securities are typically short- to intermediate-term debt securities whose value at maturity or interest rate is linked to currencies, interest rates, equity securities, indices, commodity prices, or other financial indicators. Such securities may be positively or negatively indexed (e.g., their value may increase or decrease if the reference index or instrument appreciates). Indexed/structured securities may have return characteristics similar to direct investments in the underlying instruments and may be more volatile than the underlying instruments. A Fund bears the market risk of an investment in the underlying instruments, as well as the credit risk of the issuer.

Interest rate swaps involve the exchange by two parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments).

Inverse floaters are debt instruments whose interest rate bears an inverse relationship to the interest rate on another instrument or index. For example, upon reset, the interest rate payable on the inverse floater may go down when the underlying index has risen. Certain inverse floaters may have an interest rate reset mechanism that multiplies the effects of change in the underlying index. Such mechanism may increase the volatility of the security's market value.

Options are the right, but not the obligation, to buy or sell a specified amount of securities or other assets on or before a fixed date at a predetermined price. A Fund may purchase and write put and call options on securities, securities indices, and foreign currencies. A Fund may purchase or write such options individually or in combination.

Participatory notes are derivative securities which are linked to the performance of an underlying Indian security and which allow investors to gain market exposure to Indian securities without trading directly in the local Indian market.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period.

OTHER INVESTMENTS, STRATEGIES, AND/OR TECHNIQUES

Cash sweep program is an arrangement in which a Fund's uninvested cash balance is used to purchase shares of affiliated or non-affiliated money market funds or cash management pooled investment vehicles at the end of each day.

Diversification is a classification given to a fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Funds are classified as either "diversified" or "nondiversified." To be classified as "diversified" under the 1940 Act, a fund

may not, with respect to 75% of its total assets, invest more than 5% of its total assets in any issuer and may not own more than 10% of the outstanding voting securities of an issuer. A fund that is classified as “nondiversified” under the 1940 Act, on the other hand, has the flexibility to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified.

Industry concentration for purposes under the 1940 Act is the investment of 25% or more of a Fund’s total assets in an industry or group of industries.

Leverage is when a Fund increases its assets available for investment using borrowings or similar transactions. Because short sales involve borrowing securities and then selling them, a Fund’s short sales effectively leverage the Fund’s assets. The use of leverage may make any change in a Fund’s NAV even greater and thus result in increased volatility of returns. A Fund’s assets that are used as collateral to secure the short sales may decrease in value while the short positions are outstanding, which may force the Fund to use its other assets to increase the collateral. Leverage also creates interest expense that may lower a Fund’s overall returns.

Market capitalization is the most commonly used measure of the size and value of a company. It is computed by multiplying the current market price of a share of the company’s stock by the total number of its shares outstanding. Market capitalization is an important investment criterion for certain funds, while others do not emphasize investments in companies of any particular size.

Net long is a term used to describe when a Fund’s assets committed to long positions exceed those committed to short positions.

Repurchase agreements involve the purchase of a security by a Fund and a simultaneous agreement by the seller (generally a bank or dealer) to repurchase the security from the Fund at a specified date or upon demand. This technique offers a method of earning income on idle cash. These securities involve the risk that the seller will fail to repurchase the security, as agreed. In that case, a Fund will bear the risk of market value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security.

Reverse repurchase agreements involve the sale of a security by a Fund to another party (generally a bank or dealer) in return for cash and an agreement by the Fund to buy the security back at a specified price and time. This technique will be used primarily to provide cash to satisfy unusually high redemption requests, or for other temporary or emergency purposes.

Short sales in which a Fund may engage may be either “short sales against the box” or other short sales. Short sales against the box involve selling short a security that a Fund owns, or the Fund has the right to obtain the amount of the security sold short at a specified date in the future. A Fund may also enter into a short sale to hedge against anticipated declines in the market price of a security or to reduce portfolio volatility. If the value of a security sold short increases prior to the scheduled delivery date, the Fund loses the opportunity to participate in the gain. For short sales, the Fund will incur a loss if the value of a security increases during this period because it will be paying more for the security than it has received from the purchaser in the short sale. If the price declines during this period, a Fund will realize a short-term capital gain. Although a Fund’s potential for gain as a result of a short sale is limited to the price at which it sold the security short less the cost of borrowing the security, its potential for loss is theoretically unlimited because there is no limit to the cost of replacing the borrowed security.

When-issued, delayed delivery, and forward commitment transactions generally involve the purchase of a security with payment and delivery at some time in the future – i.e., beyond normal settlement. A Fund does not earn interest on such securities until settlement and bears the risk of market value fluctuations in between the purchase and settlement dates. New issues of stocks and bonds, private placements, and U.S. Government securities may be sold in this manner.

Janus Investment Fund

Prospectus

* Not currently offered.

The Securities and Exchange Commission has not approved or disapproved of these securities or passed on the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

JANUS

This Prospectus describes nine portfolios (each, a “Fund” and collectively, the “Funds”) of Janus Investment Fund (the “Trust”). Janus Capital Management LLC (“Janus Capital” or “Janus”) serves as investment adviser to each Fund. Janus Asia Equity Fund is subadvised by Janus Capital Singapore Pte. Limited (“Janus Singapore”). In addition, a portion of the investment operations of Janus Emerging Markets Fund and Janus International Equity Fund is subadvised by Janus Singapore.

The Funds offer multiple classes of shares in order to meet the needs of various types of investors. Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, Class R Shares, and Class T Shares (individually and/or collectively, the “Shares”) are offered by this Prospectus.

The Shares are not offered directly to individual investors. Certain financial intermediaries may not offer all classes of Shares. For additional information about these classes of Shares and whether or not you are eligible to purchase these Shares, please refer to the Shareholder’s Guide section of the Prospectus.

INVESTMENT OBJECTIVE

Janus Asia Equity Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the “Purchases” section on page 88 of the Fund’s Prospectus and in the “Purchases” section on page 89 of the Fund’s Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class T
Management Fees (may adjust up or down)	0.91%	0.91%	0.91%	0.91%	0.91%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None
Other Expenses	3.27%	3.54%	3.86%	2.72%	3.43%
Total Annual Fund Operating Expenses ⁽¹⁾	4.43%	5.45%	5.02%	3.63%	4.34%
Fee Waiver ⁽¹⁾	2.88%	3.14%	3.23%	2.34%	2.80%
Total Annual Fund Operating Expenses After Fee Waiver ⁽¹⁾	1.55%	2.31%	1.79%	1.29%	1.54%

Janus Capital has contractually agreed to waive the Fund’s total annual fund operating expenses (excluding any performance adjustments to management fees, the distribution and shareholder servicing fees – applicable to Class A Shares, Class C Shares, and Class S Shares; administrative (1) services fees payable pursuant to the Transfer Agency Agreement; brokerage commissions; interest; dividends; taxes; acquired fund fees and expenses; and extraordinary expenses) to 1.25% until at least February 1, 2014. The contractual waiver may be terminated or modified prior to this date only at the discretion of the Board of Trustees.

EXAMPLE:

The following Example is based on expenses without waivers. The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses without waivers remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 994	\$ 1,838	\$ 2,693	\$ 4,871
Class C Shares	\$ 644	\$ 1,624	\$ 2,695	\$ 5,329
Class S Shares	\$ 502	\$ 1,506	\$ 2,509	\$ 5,015
Class I Shares	\$ 365	\$ 1,112	\$ 1,878	\$ 3,889
Class T Shares	\$ 435	\$ 1,315	\$ 2,206	\$ 4,486

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 994	\$ 1,838	\$ 2,693	\$ 4,871
Class C Shares	\$ 544	\$ 1,624	\$ 2,695	\$ 5,329
Class S Shares	\$ 502	\$ 1,506	\$ 2,509	\$ 5,015
Class I Shares	\$ 365	\$ 1,112	\$ 1,878	\$ 3,889
Class T Shares	\$ 435	\$ 1,315	\$ 2,206	\$ 4,486

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 75% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity securities of Asian issuers (excluding Japanese issuers). An Asian issuer is generally considered to be any company that (i) is incorporated or has its principal business activities in an Asian country; (ii) is primarily listed on the trading market of an Asian country; or (iii) derives 50% or more of its revenue from, or has 50% or more of its assets in, one or more Asian countries. The Fund considers “Asian countries” to include, but not be limited to, Hong Kong, China, South Korea, Taiwan, Singapore, Malaysia, Thailand, Indonesia, Philippines, India, Vietnam, Pakistan, Russia, and Sri Lanka. Some of these countries may represent developing or emerging markets. The Fund may have significant exposure to emerging market countries.

The Fund generally invests in equity securities, which consist primarily of common stocks, preferred stocks, depositary receipts, and convertible securities, but may also include other types of instruments, such as equity-linked securities, real estate-related companies, and real estate investment trusts issued by Asian real estate companies. The Fund may invest in companies of any market capitalization. While the Fund intends to diversify its investments across a number of different countries, including emerging market countries, it may, under unusual circumstances, invest all or a significant portion of its assets in a single Asian country. To a more limited degree, the Fund may also invest in U.S. and foreign debt securities. Due to the nature of the securities in which the Fund invests, it may have relatively high portfolio turnover compared to other funds.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies. The portfolio manager will also analyze each company from a macro perspective taking into consideration any important themes or issues that may impact the investment environment in certain regions or sectors and to estimate regional market risks.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’s exposure to a particular market, to adjust the Fund’s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’s risk profile. The Fund’s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an Asian equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 64.4% of the Fund's investments were in emerging markets.

Geographic Concentration Risk. Because the Fund intends to focus its investments in a particular geographic region, the Fund's performance is expected to be closely tied to various factors such as social, financial, economic, and political conditions within that region or country. Specifically, the Fund's investments in Asian issuers increase the Fund's exposure to the risks associated with volatile securities markets, adverse exchange rates, social, political and regulatory developments, and economic environmental events (such as natural disasters) which may be particular to Asian countries. Events that negatively affect the fiscal stability of Asian countries may cause the value of the Fund's shares to decrease, in some cases significantly. As a result, the Fund is likely to be more volatile than more geographically diverse funds. In addition, many of the economies of the Asian countries in which the Fund invests are interdependent, which may cause them to experience the impact of such events at the same time or may increase the possibility that conditions in one country or region might adversely impact the issuers of securities in a different country or region.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore

involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

Portfolio Turnover Risk. Increased portfolio turnover may result in higher costs, which may have a negative effect on the Fund's performance. In addition, higher portfolio turnover may result in the acceleration of capital gains and the recognition of greater levels of short-term capital gains, which are taxed at ordinary federal income tax rates when distributed to shareholders.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. The bar chart depicts the Fund's performance during the period indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to a broad-based securities market index. The index is not actively managed and is not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

The Morgan Stanley Capital International (“MSCI”) All Country Asia ex-Japan Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of Asia, excluding Japan. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class I Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class I Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Investment Subadviser: Janus Capital Singapore Pte. Limited

Portfolio Manager: Hiroshi Yoh is Executive Vice President and Portfolio Manager of the Fund, which he has managed since inception.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares	
Non-retirement accounts	\$ 2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500
Class I Shares	
Institutional investors (investing directly with Janus)	\$ 1,000,000
Through an intermediary institution	
non-retirement accounts	\$ 2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Emerging Markets Fund

Ticker: JMFAX Class A Shares JMFSX Class S Shares JMFNX Class N Shares
 JMFCX Class C Shares JMFIK Class I Shares JMFTX Class T Shares

INVESTMENT OBJECTIVE

Janus Emerging Markets Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 88 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Management Fees (may adjust up or down)	0.91%	0.91%	0.91%	0.91%	0.91%	0.91%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	None
Other Expenses ⁽¹⁾	1.15%	1.08%	1.35%	0.86%	0.84%	1.23%
Acquired Fund Fees and Expenses	0.05%	0.05%	0.05%	0.05%	0.05%	0.05%
Total Annual Fund Operating Expenses ⁽²⁾	2.36%	3.04%	2.56%	1.82%	1.80%	2.19%
Fee Waiver ⁽²⁾	0.78%	0.78%	0.82%	0.56%	0.56%	0.70%
Total Annual Fund Operating Expenses After Fee Waiver ⁽²⁾	1.58%	2.26%	1.74%	1.26%	1.24%	1.49%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

Janus Capital has contractually agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, the distribution and shareholder servicing fees - applicable to Class A Shares, Class C Shares, and Class S Shares; administrative

(2) services fees payable pursuant to the Transfer Agency Agreement; brokerage commissions; interest; dividends; taxes; acquired fund fees and expenses; and extraordinary expenses) to 1.25% until at least February 1, 2014. The contractual waiver may be terminated or modified prior to this date only at the discretion of the Board of Trustees.

EXAMPLE:

The following Example is based on expenses without waivers. The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses without waivers remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 800	\$ 1,269	\$ 1,763	\$ 3,116
Class C Shares	\$ 407	\$ 939	\$ 1,596	\$ 3,355
Class S Shares	\$ 259	\$ 796	\$ 1,360	\$ 2,895

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class I Shares	\$ 185	\$ 573	\$ 985	\$ 2,137
Class N Shares	\$ 183	\$ 566	\$ 975	\$ 2,116
Class T Shares	\$ 222	\$ 685	\$ 1,175	\$ 2,524

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 800	\$ 1,269	\$ 1,763	\$ 3,116
Class C Shares	\$ 307	\$ 939	\$ 1,596	\$ 3,355
Class S Shares	\$ 259	\$ 796	\$ 1,360	\$ 2,895
Class I Shares	\$ 185	\$ 573	\$ 985	\$ 2,137
Class N Shares	\$ 183	\$ 566	\$ 975	\$ 2,116
Class T Shares	\$ 222	\$ 685	\$ 1,175	\$ 2,524

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’ s performance. During the most recent fiscal year, the Fund’ s portfolio turnover rate was 136% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of issuers in emerging market countries. The Fund normally invests in securities of issuers that (i) are primarily listed on the trading market of an emerging market country; (ii) are incorporated or have their principal business activities in an emerging market country; or (iii) derive 50% or more of their revenues from, or have 50% or more of their assets in, an emerging market country. An emerging market country is any country that has been determined by an international organization, such as the World Bank, to have a low to middle income economy and/or any country that is not included in the Morgan Stanley Capital International World Indexsm, which measures the equity market performance of developed markets. The Fund generally invests in equity securities, which consist primarily of common stocks, preferred stocks and convertible securities, but may also invest in other types of instruments, such as equity-linked securities and exchange-traded funds. The Fund may invest in companies of any market capitalization. Due to the nature of the securities in which the Fund invests, it may have relatively high portfolio turnover compared to other funds.

Although the Fund intends to invest substantially all of its assets in several issuers located in emerging market countries, it may invest up to 20% of its net assets in securities of issuers located in the U.S. or other developed market issuers, and it may, under unusual circumstances, invest all or a significant portion of its assets in a single emerging market country. The Fund may also invest in domestic and foreign debt securities.

The portfolio managers apply a “bottom up” approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’ s investment policies.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’ s exposure to a particular market, to adjust the Fund’ s currency exposure relative to its benchmark index, to gain access

to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund's risk profile. The Fund's exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, particularly investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Portfolio Turnover Risk. Increased portfolio turnover may result in higher costs, which may have a negative effect on the Fund's performance. In addition, higher portfolio turnover may result in the acceleration of capital gains and the recognition of greater levels of short-term capital gains, which are taxed at ordinary federal income tax rates when distributed to shareholders.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio managers' perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore

involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

Exchange-Traded Funds Risk. The Fund may purchase shares of exchange-traded funds ("ETFs") to gain exposure to a particular portion of the market. ETFs are pooled investment vehicles, which may be managed or unmanaged, that generally seek to track the performance of a specific index. ETFs are traded on an exchange at market prices that may vary from the net asset value of their underlying investments. When the Fund invests in an ETF, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the ETF's expenses. ETFs have certain inherent risks generally associated with investments in a portfolio of securities in which the ETF is invested, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of each unit of the ETF. ETFs also involve the risk that an active trading market for an ETF's shares may not develop or be maintained.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class T Shares of the Fund commenced operations with the Fund's inception.

The performance shown for Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class T Shares is calculated using the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund's Class I Shares, calculated using the fees and expenses of Class N Shares, without the effect of any fee and expense limitations or waivers. If Class N Shares of the Fund had been available during the periods shown, the performance may have been different.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to a broad-based securities market index. The index is not actively managed and is not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Return Before Taxes	13.92%	-6.46%
Morgan Stanley Capital International Emerging Markets Index SM (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	18.22%	-0.68%

- (1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.
- (2) Calculated assuming maximum permitted sales loads.
- (3) The one year return is calculated to include the contingent deferred sales charge.

The Morgan Stanley Capital International ("MSCI") Emerging Markets Indexsm is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class I Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class I Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Investment Subadviser: Janus Capital Singapore Pte. Limited

Portfolio Managers: **Wahid Chammas** is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since inception. **Matt Hochstetler** is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since inception. **Hiroshi Yoh** is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since August 2012.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

JAGLX Class T Shares

INVESTMENT OBJECTIVE

Janus Global Life Sciences Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 88 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class T
Management Fees	0.64%	0.64%	0.64%	0.64%	0.64%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None
Other Expenses	0.20%	0.22%	0.35%	0.23%	0.35%
Total Annual Fund Operating Expenses	1.09%	1.86%	1.24%	0.87%	0.99%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 680	\$ 902	\$ 1,141	\$ 1,827
Class C Shares	\$ 289	\$ 585	\$ 1,006	\$ 2,180
Class S Shares	\$ 126	\$ 393	\$ 681	\$ 1,500
Class I Shares	\$ 89	\$ 278	\$ 482	\$ 1,073
Class T Shares	\$ 101	\$ 315	\$ 547	\$ 1,213

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 680	\$ 902	\$ 1,141	\$ 1,827
Class C Shares	\$ 189	\$ 585	\$ 1,006	\$ 2,180
Class S Shares	\$ 126	\$ 393	\$ 681	\$ 1,500
Class I Shares	\$ 89	\$ 278	\$ 482	\$ 1,073
Class T Shares	\$ 101	\$ 315	\$ 547	\$ 1,213

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 50% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of companies that the portfolio manager believes have a life science orientation. Generally speaking, the “life sciences” relate to maintaining or improving quality of life. So, for example, companies with a “life science orientation” include companies engaged in research, development, production, or distribution of products or services related to health and personal care, medicine, or pharmaceuticals. The Fund implements this policy by investing primarily in equity securities of U.S. and foreign companies selected for their growth potential. The Fund normally invests in issuers from several different countries, which may include the United States. The Fund may, under unusual circumstances, invest in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities. As a fundamental policy, the Fund normally invests at least 25% of its total assets in the “life sciences” sector, which may include companies in the following industry groups: health care; pharmaceuticals; agriculture; cosmetics/personal care; and biotechnology.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it would in a more geographically diversified portfolio. The Fund’s investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund’s investments. In addition, the Fund’s investments may be denominated in foreign currencies and therefore, changes in the value of a country’s currency

compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 4.3% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Concentration Risk. The Fund focuses its investments in "life sciences" related industry groups. As a result, the Fund may be subject to greater risks and its net asset value may fluctuate more than a fund that does not concentrate its investments.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, and Class S Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, and Class I Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class T Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

Morgan Stanley Capital International World Health Care Index (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	17.54%	4.22%	6.90%	3.30%

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Andrew Acker, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since May 2007.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares	
Non-retirement accounts	\$ 2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500
Class I Shares	
Institutional investors (investing directly with Janus)	\$ 1,000,000
Through an intermediary institution	
non-retirement accounts	\$ 2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

INVESTMENT OBJECTIVE

Janus Global Research Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 88 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class N	Class T
Management Fees (may adjust up or down)	0.74%	0.74%	0.74%	0.74%	0.74%	0.74%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	None
Other Expenses ⁽¹⁾	0.23%	0.32%	0.39%	0.23%	0.13%	0.38%
Total Annual Fund Operating Expenses	1.22%	2.06%	1.38%	0.97%	0.87%	1.12%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 692	\$ 940	\$ 1,207	\$ 1,967
Class C Shares	\$ 309	\$ 646	\$ 1,108	\$ 2,390
Class S Shares	\$ 140	\$ 437	\$ 755	\$ 1,657
Class I Shares	\$ 99	\$ 309	\$ 536	\$ 1,190
Class N Shares	\$ 89	\$ 278	\$ 482	\$ 1,073
Class T Shares	\$ 114	\$ 356	\$ 617	\$ 1,363

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 692	\$ 940	\$ 1,207	\$ 1,967
Class C Shares	\$ 209	\$ 646	\$ 1,108	\$ 2,390
Class S Shares	\$ 140	\$ 437	\$ 755	\$ 1,657
Class I Shares	\$ 99	\$ 309	\$ 536	\$ 1,190
Class N Shares	\$ 89	\$ 278	\$ 482	\$ 1,073
Class T Shares	\$ 114	\$ 356	\$ 617	\$ 1,363

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 67% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. The Fund may invest in companies of any size located anywhere in the world, from larger, well-established companies to smaller, emerging growth companies. The Fund normally invests at least 40% of its net assets in securities of issuers or companies from different countries located throughout the world, excluding the United States. The Fund may have significant exposure to emerging markets. The Fund may also invest in foreign equity and debt securities.

Janus Capital’s equity research analysts, overseen by the Portfolio Oversight Team led by Janus Capital’s Director of Equity Research James P. Goff (the “Research Team”), select investments for the Fund which represent their high-conviction investment ideas in all market capitalizations, styles, and geographies. The Research Team, comprised of sector specialists, conducts fundamental analysis with a focus on “bottom up” research, quantitative modeling, and valuation analysis. Using this research process, analysts rate their stocks based upon attractiveness. Analysts bring their high-conviction ideas to their respective sector teams. Sector teams compare the appreciation and risk potential of each of the team’s high-conviction ideas and construct a sector portfolio that is intended to maximize the best risk-reward opportunities.

Positions may be sold when, among other things, there is no longer high conviction in the return potential of the investment or if the risk characteristics have caused a re-evaluation of the opportunity. This may occur if the stock has appreciated and reflects the anticipated value, if another company represents a better risk-reward opportunity, or if the investment’s fundamental characteristics deteriorate. Securities may also be sold from the portfolio to rebalance sector weightings.

Mr. Goff oversees the investment process and is responsible for the day-to-day management of the Fund. It is expected that the Fund will be broadly diversified among a variety of industry sectors. The Fund intends to be fully invested under normal circumstances. However, under unusual circumstances, if the Research Team does not have high conviction in enough investment opportunities, the Fund’s uninvested assets may be held in cash or similar instruments.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions, or to hedge currency exposure relative to the Fund’s benchmark index) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or

economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 3.7% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the investment personnel's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the investment personnel's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities. The Fund compares and broadly matches its sector weights to those of a growth-based index. If growth stocks are out of favor, sectors that are larger in a growth index may underperform, leading to Fund underperformance relative to indices less biased toward growth stocks.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, and Class S Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers. If Class N Shares of the Fund had been available during the periods shown, the performance may have been different.

If Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, and Class I Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

The Morgan Stanley Capital International (“MSCI”) World Growth Index measures the performance of growth stocks in developed countries throughout the world. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund’s Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Management: James P. Goff, CFA, is Janus Capital’s Director of Equity Research and Executive Vice President of the Fund, which he has managed since inception.

PURCHASE AND SALE OF FUND SHARES**Minimum Investment Requirements***

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund.

Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Global Select Fund

Ticker: JORAX Class A Shares JORIX Class S Shares JSLNX Class N Shares JORNX Class T Shares
 JORCX Class C Shares JOREX Class I Shares JORRX Class R Shares

INVESTMENT OBJECTIVE

Janus Global Select Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 88 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%	0.64%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.31%	0.32%	0.34%	0.24%	0.09%	0.33%	0.34%
Total Annual Fund Operating Expenses	1.20%	1.96%	1.23%	0.88%	0.73%	1.47%	0.98%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 690	\$ 934	\$ 1,197	\$ 1,946
Class C Shares	\$ 299	\$ 615	\$ 1,057	\$ 2,285
Class S Shares	\$ 125	\$ 390	\$ 676	\$ 1,489
Class I Shares	\$ 90	\$ 281	\$ 488	\$ 1,084
Class N Shares	\$ 75	\$ 233	\$ 406	\$ 906
Class R Shares	\$ 150	\$ 465	\$ 803	\$ 1,757
Class T Shares	\$ 100	\$ 312	\$ 542	\$ 1,201

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 690	\$ 934	\$ 1,197	\$ 1,946
Class C Shares	\$ 199	\$ 615	\$ 1,057	\$ 2,285
Class S Shares	\$ 125	\$ 390	\$ 676	\$ 1,489
Class I Shares	\$ 90	\$ 281	\$ 488	\$ 1,084
Class N Shares	\$ 75	\$ 233	\$ 406	\$ 906
Class R Shares	\$ 150	\$ 465	\$ 803	\$ 1,757
Class T Shares	\$ 100	\$ 312	\$ 542	\$ 1,201

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 182% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally investing primarily in a core group of 40-70 domestic and foreign common stocks selected for their growth potential and normally investing at least 40% of its net assets in securities of issuers from different countries located throughout the world, excluding the United States. The Fund may invest in companies of any size located anywhere in the world, from larger, well-established companies to smaller, emerging growth companies. The Fund may also invest in U.S. and foreign debt securities. The Fund may also invest in emerging markets but will normally limit such investments to 30% of its net assets, measured at the time of purchase. As of September 30, 2012, the Fund held stocks of 67 companies. Of these holdings, 40 comprised approximately 73.38% of the Fund’s holdings.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’s exposure to a particular market, to adjust the Fund’s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’s risk profile. The Fund’s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund invests primarily in common stocks, which tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio manager’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended. This gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund's net asset value and total return.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 8.6% of the Fund's investments were in emerging markets.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers. If Class N Shares of the Fund had been available during the periods shown, the performance may have been different.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to a broad-based securities market index. The index is not actively managed and is not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: George P. Maris, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since August 2012.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Global Technology Fund

Ticker: JATAX Class A Shares JATSX Class S Shares JAGTX Class T Shares

INVESTMENT OBJECTIVE

Janus Global Technology Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 88 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)	Class A	Class C	Class S	Class I	Class T
Maximum Sales Charge (load) Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Class S	Class I	Class T
Management Fees	0.64%	0.64%	0.64%	0.64%	0.64%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None
Other Expenses	0.29%	0.35%	0.38%	0.28%	0.38%
Short Sale Dividend Expenses	0.02%	0.02%	0.02%	0.02%	0.02%
Remaining Other Expenses	0.27%	0.33%	0.36%	0.26%	0.36%
Total Annual Fund Operating Expenses	1.18%	1.99%	1.27%	0.92%	1.02%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 688	\$ 928	\$ 1,187	\$ 1,924
Class C Shares	\$ 302	\$ 624	\$ 1,073	\$ 2,317
Class S Shares	\$ 129	\$ 403	\$ 697	\$ 1,534
Class I Shares	\$ 94	\$ 293	\$ 509	\$ 1,131
Class T Shares	\$ 104	\$ 325	\$ 563	\$ 1,248

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 688	\$ 928	\$ 1,187	\$ 1,924
Class C Shares	\$ 202	\$ 624	\$ 1,073	\$ 2,317
Class S Shares	\$ 129	\$ 403	\$ 697	\$ 1,534
Class I Shares	\$ 94	\$ 293	\$ 509	\$ 1,131
Class T Shares	\$ 104	\$ 325	\$ 563	\$ 1,248

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 49% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of companies that the portfolio manager believes will benefit significantly from advances or improvements in technology. These companies generally fall into two categories:

companies that the portfolio manager believes have or will develop products, processes, or services that will provide significant technological advancements or improvements; and

companies that the portfolio manager believes rely extensively on technology in connection with their operations or services.

The Fund implements this policy by investing primarily in equity securities of U.S. and foreign companies selected for their growth potential. The Fund normally invests in issuers from several different countries, which may include the United States. The Fund may, under unusual circumstances, invest in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’s exposure to a particular market, to adjust the Fund’s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’s risk profile. The Fund’s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it

would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 3.4% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Industry Risk. Although the Fund does not concentrate its investments in specific industries, it may invest in companies related in such a way that they react similarly to certain market pressures. As a result, the Fund's returns may be considerably more volatile than the returns of a fund that does not invest in similarly related companies.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, and Class S Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, and Class I Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, and Class I Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future.

Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class T Shares (calendar year-end)

(1) Calculated assuming maximum permitted sales loads.

(2) The one year return is calculated to include the contingent deferred sales charge.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ

from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: J. Bradley Slingerlend, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since May 2011.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, and Class T Shares	
Non-retirement accounts	\$ 2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500
Class I Shares	
Institutional investors (investing directly with Janus)	\$ 1,000,000
Through an intermediary institution	
non-retirement accounts	\$ 2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$ 500

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Total Annual Fund Operating Expenses	1.32%	2.14%	1.45%	0.99%	0.95%	1.69%	1.20%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 702	\$ 969	\$ 1,257	\$ 2,074
Class C Shares	\$ 317	\$ 670	\$ 1,149	\$ 2,472
Class S Shares	\$ 148	\$ 459	\$ 792	\$ 1,735
Class I Shares	\$ 101	\$ 315	\$ 547	\$ 1,213
Class N Shares	\$ 97	\$ 303	\$ 525	\$ 1,166
Class R Shares	\$ 172	\$ 533	\$ 918	\$ 1,998
Class T Shares	\$ 122	\$ 381	\$ 660	\$ 1,455

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 702	\$ 969	\$ 1,257	\$ 2,074
Class C Shares	\$ 217	\$ 670	\$ 1,149	\$ 2,472
Class S Shares	\$ 148	\$ 459	\$ 792	\$ 1,735
Class I Shares	\$ 101	\$ 315	\$ 547	\$ 1,213
Class N Shares	\$ 97	\$ 303	\$ 525	\$ 1,166
Class R Shares	\$ 172	\$ 533	\$ 918	\$ 1,998
Class T Shares	\$ 122	\$ 381	\$ 660	\$ 1,455

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’ s performance. During the most recent fiscal year, the Fund’ s portfolio turnover rate was 57% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity securities. The Fund normally invests in a core group of 60-100 equity securities of issuers from different countries located throughout the world, excluding the United States. The Fund may, under unusual circumstances, invest all of its assets in a single country. The Fund may invest in emerging markets but will normally limit such investments to 20% of its net assets, measured at the time of purchase. The Fund may also invest in foreign debt securities.

The portfolio managers apply a “bottom up” approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’ s investment policies. The portfolio managers normally seek to limit any sector exposure and country exposure to plus or minus 10% of the respective weighting of the Fund’ s primary benchmark index, currently the Morgan Stanley Capital International EAFE® Index.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’ s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’ s performance than it would in a more geographically diversified portfolio. The Fund’ s investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in

developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). As of September 30, 2012, approximately 10.8% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio managers' perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class I Shares, Class A Shares, Class C Shares, Class S Shares, and Class R Shares of the Fund commenced operations on July 6, 2009, after the reorganization of each corresponding class of shares of Janus Adviser International Equity Fund ("JAD predecessor fund") into each respective share class of the Fund. Class T Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class I Shares, Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the historical performance of the JAD predecessor fund's Class I Shares, Class A Shares, Class C Shares, Class S Shares, and Class R Shares prior to the reorganization, calculated using the fees and expenses of each respective share class of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund's Class I Shares from July 6, 2009 to May 31, 2012, calculated using the fees and expenses of Class I Shares, net of any applicable fee and expense limitations or waivers. The performance shown for Class N Shares for periods prior to July 6, 2009, reflects the historical performance of the JAD predecessor fund's Class I Shares prior to the reorganization, calculated using the fees and expenses of Class I Shares of the JAD predecessor fund, net of any applicable fee and expense limitations or waivers.

The performance shown for Class T Shares for periods prior to July 6, 2009, reflects the historical performance of the JAD predecessor fund's Class I Shares prior to the reorganization, calculated using the fees and expenses of Class T Shares, without the effect of any fee and expense limitations or waivers.

If Class T Shares of the Fund had been available during periods prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class I Shares, Class A Shares, Class C Shares, Class S Shares, Class N Shares, Class R Shares, and Class T Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

The Morgan Stanley Capital International ("MSCI") EAFE® (Europe, Australasia, Far East) Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the United States and Canada. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class I Shares for periods following July 6, 2009; and for the JAD predecessor fund's Class I Shares for periods prior to July 6, 2009. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class I Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class I Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Investment Subadviser: Janus Capital Singapore Pte. Limited

Portfolio Managers: **Julian McManus** is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since June 2010. **Guy Scott**, CFA, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since June 2010. **Carmel Wellso** is Executive Vice President and Co-Portfolio Manager of the Fund, which she has co-managed since June 2010.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Overseas Fund

Ticker: JDIAX Class A Shares JIGRX Class S Shares JDINX Class N Shares JAOSX Class T Shares
JIGCX Class C Shares JIGFX Class I Shares JDIRX Class R Shares

INVESTMENT OBJECTIVE

Janus Overseas Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 88 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees (may adjust up or down)	0.44%	0.44%	0.44%	0.44%	0.44%	0.44%	0.44%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.30%	0.31%	0.32%	0.19%	0.05%	0.31%	0.32%
Total Annual Fund Operating Expenses	0.99%	1.75%	1.01%	0.63%	0.49%	1.25%	0.76%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 670	\$ 872	\$ 1,091	\$ 1,718
Class C Shares	\$ 278	\$ 551	\$ 949	\$ 2,062
Class S Shares	\$ 103	\$ 322	\$ 558	\$ 1,236
Class I Shares	\$ 64	\$ 202	\$ 351	\$ 786
Class N Shares	\$ 50	\$ 157	\$ 274	\$ 616
Class R Shares	\$ 127	\$ 397	\$ 686	\$ 1,511
Class T Shares	\$ 78	\$ 243	\$ 422	\$ 942

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 670	\$ 872	\$ 1,091	\$ 1,718
Class C Shares	\$ 178	\$ 551	\$ 949	\$ 2,062
Class S Shares	\$ 103	\$ 322	\$ 558	\$ 1,236
Class I Shares	\$ 64	\$ 202	\$ 351	\$ 786
Class N Shares	\$ 50	\$ 157	\$ 274	\$ 616
Class R Shares	\$ 127	\$ 397	\$ 686	\$ 1,511
Class T Shares	\$ 78	\$ 243	\$ 422	\$ 942

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 26% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of issuers from countries outside of the United States. The Fund normally invests in securities of issuers from several different countries, excluding the United States. Although the Fund typically invests 80% or more of its assets in issuers located outside the United States, it also may normally invest up to 20% of its assets, measured at the time of purchase, in U.S. issuers, and it may, under unusual circumstances, invest all or substantially all of its assets in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it

would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 34.4% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009. Class N Shares of the Fund commenced operations on May 31, 2012.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares for periods prior to May 31, 2012, reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, or Class N Shares of the Fund had been available during periods prior to May 31, 2012, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future.

Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

The Morgan Stanley Capital International ("MSCI") All Country World ex-U.S. Indexsm is an unmanaged, free float-adjusted, market capitalization weighted index composed of stocks of companies located in countries throughout the world, excluding the United States. It is designed to measure equity market performance in global developed and emerging markets. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Brent A. Lynn, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed or co-managed since January 2001.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Fund summary

Janus Worldwide Fund

Ticker: JDWAX Class A Shares JWGRX Class S Shares JDWNX Class N Shares JAWWX Class T Shares
JWWCX Class C Shares JWWFX Class I Shares JDWRX Class R Shares

INVESTMENT OBJECTIVE

Janus Worldwide Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Each share class has different expenses, but represents an investment in the same Fund. For Class A Shares, you may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Janus mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial professional and in the "Purchases" section on page 88 of the Fund's Prospectus and in the "Purchases" section on page 89 of the Fund's Statement of Additional Information.

SHAREHOLDER FEES

(fees paid directly from your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Maximum Sales Charge (load)							
Imposed on Purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum Deferred Sales Charge (load) (as a percentage of the lower of original purchase price or redemption proceeds)	None	1.00%	None	None	None	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class S	Class I	Class N	Class R	Class T
Management Fees (may adjust up or down)	0.59%	0.59%	0.59%	0.59%	0.59%	0.59%	0.59%
Distribution/Service (12b-1) Fees	0.25%	1.00%	0.25%	None	None	0.50%	None
Other Expenses ⁽¹⁾	0.24%	0.28%	0.33%	0.23%	0.08%	0.33%	0.33%
Total Annual Fund Operating Expenses	1.08%	1.87%	1.17%	0.82%	0.67%	1.42%	0.92%

(1) Other Expenses for Class N Shares are based on the estimated annualized expenses that the Shares expect to incur.

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and reinvest all dividends and distributions. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

If Shares are redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 679	\$ 899	\$ 1,136	\$ 1,816
Class C Shares	\$ 290	\$ 588	\$ 1,011	\$ 2,190
Class S Shares	\$ 119	\$ 372	\$ 644	\$ 1,420
Class I Shares	\$ 84	\$ 262	\$ 455	\$ 1,014
Class N Shares	\$ 68	\$ 214	\$ 373	\$ 835
Class R Shares	\$ 145	\$ 449	\$ 776	\$ 1,702
Class T Shares	\$ 94	\$ 293	\$ 509	\$ 1,131

If Shares are not redeemed:	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$ 679	\$ 899	\$ 1,136	\$ 1,816
Class C Shares	\$ 190	\$ 588	\$ 1,011	\$ 2,190
Class S Shares	\$ 119	\$ 372	\$ 644	\$ 1,420
Class I Shares	\$ 84	\$ 262	\$ 455	\$ 1,014
Class N Shares	\$ 68	\$ 214	\$ 373	\$ 835
Class R Shares	\$ 145	\$ 449	\$ 776	\$ 1,702
Class T Shares	\$ 94	\$ 293	\$ 509	\$ 1,131

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’ s performance. During the most recent fiscal year, the Fund’ s portfolio turnover rate was 49% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in equity securities, which include, but are not limited to, common stocks, preferred stocks, and depositary receipts of companies of any size located throughout the world. The Fund normally invests in issuers from several different countries, including the United States. The Fund may, under unusual circumstances, invest in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’ s investment policies.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’ s exposure to a particular market, to adjust the Fund’ s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’ s risk profile. The Fund’ s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’ s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’ s performance than it would in a more geographically diversified portfolio. The Fund’ s investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and

standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 6.9% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class T Shares (formerly named Class J Shares, the initial share class) of the Fund commenced operations with the Fund's inception. Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund commenced operations on July 6, 2009.

The performance shown for Class T Shares is calculated using the fees and expenses of Class T Shares in effect during the periods shown, net of any applicable fee and expense limitations or waivers.

The performance shown for Class A Shares, Class C Shares, Class S Shares, and Class R Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of each respective share class, without the effect of any fee and expense limitations or waivers.

The performance shown for Class I Shares for periods prior to July 6, 2009, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses of Class J Shares, net of any applicable fee and expense limitations or waivers.

The performance shown for Class N Shares reflects the performance of the Fund's Class T Shares, calculated using the fees and expenses of Class T Shares, net of any applicable fee and expense limitations or waivers. If Class N Shares of the Fund had been available during the periods shown, the performance may have been different.

If Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares of the Fund had been available during periods prior to July 6, 2009, the performance shown for each respective share class may have been different. The performance shown for periods following the Fund's commencement of Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class R Shares reflects the fees and expenses of each respective share class, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The bar chart figures do not include any applicable sales charges that an investor may pay when they buy or sell Class A Shares or Class C Shares of the Fund. If sales charges were included, the returns would be lower. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/advisor/mutual-funds or by calling 1-877-335-2687.

Annual Total Returns for Class T Shares (calendar year-end)

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

(2) Calculated assuming maximum permitted sales loads.

(3) The one year return is calculated to include the contingent deferred sales charge.

The Morgan Stanley Capital International ("MSCI") World Indexsm is a market capitalization weighted index composed of companies representative of the market structure of developed market countries in North America, Europe, and the Asia/Pacific Region. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class T Shares (formerly named Class J Shares, the initial share class). After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

After-tax returns are only shown for Class T Shares of the Fund. After-tax returns for the other classes of Shares will vary from those shown for Class T Shares due to varying sales charges (as applicable), fees, and expenses among the classes.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: **George P. Maris**, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since March 2011.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements*

Class A Shares, Class C Shares**, Class S Shares, Class R Shares, and Class T Shares		
Non-retirement accounts	\$	2,500
Certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class I Shares		
Institutional investors (investing directly with Janus)	\$	1,000,000
Through an intermediary institution		
non-retirement accounts	\$	2,500
certain tax-deferred accounts or UGMA/UTMA accounts	\$	500
Class N Shares		
No minimum investment requirements imposed by the Fund		None

* Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs.

** The maximum purchase in Class C Shares is \$500,000 for any single purchase.

Purchases, exchanges, and redemptions can generally be made only through institutional channels, such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly by certain institutional investors. You should contact your financial intermediary or refer to your plan documents for information on how to invest in the Fund. Requests must be received in good order by the Fund or its agents (financial intermediary or plan sponsor, if applicable) prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "Purchases," "Exchanges," and/or "Redemptions" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class R Shares, or Class T Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment or to recommend one share class over another. Ask your salesperson or visit your financial intermediary's website for more information.

Additional information about the Funds

FEES AND EXPENSES

Please refer to the following important information when reviewing the “Fees and Expenses of the Fund” table in each Fund Summary of the Prospectus. The fees and expenses shown were determined based on net assets as of the fiscal year ended September 30, 2012.

“Shareholder Fees” are fees paid directly from your investment and may include sales loads.

“Annual Fund Operating Expenses” are paid out of a Fund’s assets and include fees for portfolio management and administrative services, including recordkeeping, subaccounting, and other shareholder services. You do not pay these fees directly but, as the Example in each Fund Summary shows, these costs are borne indirectly by all shareholders.

The “Management Fee” is the investment advisory fee rate paid by each Fund to Janus Capital. Janus Asia Equity Fund, Janus Emerging Markets Fund, Janus Global Research Fund, Janus International Equity Fund, Janus Overseas Fund, and Janus Worldwide Fund each pay an investment advisory fee rate that adjusts up or down by a variable of up to 0.15% (assuming constant assets) on a monthly basis based upon the Fund’s performance relative to its benchmark index during a measurement period. This fee rate, prior to any performance adjustment, is 0.92% for Janus Asia Equity Fund, 1.00% for Janus Emerging Markets Fund, 0.64% for each of Janus Global Research Fund and Janus Overseas Fund, 0.68% for Janus International Equity Fund, and 0.60% for Janus Worldwide Fund. Any such adjustment to this base fee rate commenced January 2007 for Janus Global Research Fund, February 2007 for Janus Worldwide Fund, December 2007 for Janus International Equity Fund, November 2011 for Janus Overseas Fund, January 2012 for Janus Emerging Markets Fund, and August 2012 for Janus Asia Equity Fund and may increase or decrease the Management Fee. Refer to “Management Expenses” in this Prospectus for additional information with further description in the Statement of Additional Information (“SAI”).

“Distribution/Service (12b-1) Fees.” Because 12b-1 fees are charged as an ongoing fee, over time the fee will increase the cost of your investment and may cost you more than paying other types of sales charges. Distribution/Service (12b-1) Fees include a shareholder servicing fee of up to 0.25% for Class C Shares.

A contingent deferred sales charge of up to 1.00% may be imposed on certain redemptions of Class A Shares bought without an initial sales charge and then redeemed within 12 months of purchase. The contingent deferred sales charge is not reflected in the Example in each Fund Summary.

A contingent deferred sales charge of 1.00% generally applies on Class C Shares redeemed within 12 months of purchase. The contingent deferred sales charge may be waived for certain investors, as described in the Shareholder’s Guide.

“Other Expenses”

for Class A Shares, Class C Shares, and Class I Shares, may include administrative fees charged by intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Funds.

for Class S Shares, Class R Shares, and Class T Shares, include an administrative services fee of 0.25% of the average daily net assets of each class to compensate Janus Services LLC (“Janus Services”), the Funds’ transfer agent, for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of retirement plan participants, pension plan participants, or other underlying investors investing through institutional channels.

for all classes, may include “Short Sale Dividend Expenses.” These expenses include dividends or interest on short sales, which are paid to the lender of borrowed securities, and stock loan fees, which are paid to the prime broker. Such expenses will vary depending on the short sale arrangement, whether the securities a Fund sells short pay dividends or interest, and the amount of such dividends or interest. While “Short Sale Dividend Expenses” include interest and dividends paid out on short positions and may include stock loan fees, they do not take into account the interest credit a Fund earns on cash proceeds of short sales held as collateral for short positions. If applicable, the amount is indicated in a Fund’s Fees and Expenses table.

for all classes, may include reimbursement to Janus Capital of its out-of-pocket costs for services as administrator and to Janus Services of its out-of-pocket costs for serving as transfer agent and providing, or arranging by others the provision of, servicing to shareholders.

“Acquired Fund” refers to any underlying fund (including, but not limited to, exchange-traded funds) in which a fund invests or has invested during the period. Acquired fund fees and expenses are indirect expenses a fund may incur as a result of investing in shares of an underlying fund. To the extent that a Fund invests in Acquired Funds, the Fund’s “Total Annual Fund Operating Expenses” may not correlate to the “ratio of gross expenses to average net assets” presented in the Financial Highlights tables because that ratio includes only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. If applicable, or unless otherwise indicated in a Fund’s Fees and Expenses table, such amounts are less than 0.01% and are included in the Fund’s “Other Expenses.”

Janus Capital has contractually agreed to waive certain Funds’ “Total Annual Fund Operating Expenses” to certain limits until at least February 1, 2014. The expense limits are described in the “Management Expenses” section of this Prospectus. Because a fee waiver will have a positive effect upon a fund’s performance, a fund that pays a performance-based investment advisory fee may experience a performance adjustment that is considered favorable to Janus Capital as a result of a fee waiver that is in place during the period when the performance adjustment applies.

All expenses in a Fund’s “Fees and Expenses of the Fund” table are shown without the effect of expense offset arrangements. Pursuant to such arrangements, credits realized as a result of uninvested cash balances are used to reduce custodian and transfer agent expenses.

ADDITIONAL INVESTMENT STRATEGIES AND GENERAL PORTFOLIO POLICIES

The Funds’ Board of Trustees (“Trustees”) may change each Fund’s investment objective or non-fundamental principal investment strategies without a shareholder vote. A Fund will notify you in writing at least 60 days before making any such change it considers material. If there is a material change to a Fund’s objective or principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that a Fund will achieve its investment objective.

Unless otherwise stated, the following additional investment strategies and general policies apply to each Fund and provide further information including, but not limited to, the types of securities a Fund may invest in when implementing its investment objective. For some Funds, these strategies and policies may be part of a principal strategy. For other Funds, these strategies and policies may be utilized to a lesser extent. Except for the Funds’ policies with respect to investments in illiquid securities and borrowing, the percentage limitations included in these policies and elsewhere in this Prospectus and/or the SAI normally apply only at the time of purchase of a security. So, for example, if a Fund exceeds a limit as a result of market fluctuations or the sale of other securities, it will not be required to dispose of any securities.

Cash Position

The Funds may not always stay fully invested. For example, when the portfolio managers and/or investment personnel believe that market conditions are unfavorable for investing, or when they are otherwise unable to locate attractive investment opportunities, a Fund’s cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after a Fund has committed available assets to desirable investment opportunities. Due to differing investment strategies, the cash positions among the Funds may vary significantly. When a Fund’s investments in cash or similar investments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested. To the extent a Fund invests its uninvested cash through a sweep program (meaning its uninvested cash is pooled with uninvested cash of other funds and invested in certain securities such as repurchase agreements), it is subject to the risks of the account or fund into which it is investing, including liquidity issues that may delay the Fund from accessing its cash.

In addition, a Fund may temporarily increase its cash position under certain unusual circumstances, such as to protect its assets or maintain liquidity in certain circumstances to meet unusually large redemptions. A Fund’s cash position may also increase temporarily due to unusually large cash inflows. Under unusual circumstances such as these, a Fund may invest up to 100% of its assets in cash or similar investments. In this case, the Fund may take positions that are inconsistent with its investment objective. As a result, the Fund may not achieve its investment objective.

Common Stock

Unless its investment objective or policies prescribe otherwise, each of the Funds may invest substantially all of its assets in common stocks. The portfolio managers and/or investment personnel generally take a “bottom up” approach to selecting companies in which to invest. This means that they seek to identify individual companies with earnings growth potential that

may not be recognized by the market at large. Securities are generally selected on a security-by-security basis without regard to any predetermined allocation among countries or geographic regions. However, certain factors, such as expected levels of inflation, government policies influencing business conditions, the outlook for currency relationships, and prospects for economic growth among countries, regions, or geographic areas, may warrant greater consideration in selecting foreign securities. There are no limitations on the countries in which the Funds may invest, and the Funds may at times have significant exposure to emerging markets. The portfolio managers and/or investment personnel may sell a holding if, among other things, the security reaches the portfolio managers' and/or investment personnel's price target, if the company has a deterioration of fundamentals such as failing to meet key operating benchmarks, or if the portfolio managers and/or investment personnel find a better investment opportunity. The portfolio managers and/or investment personnel may also sell a Fund holding to meet redemptions.

Counterparties

Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to a Fund ("counterparty risk"). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to a Fund. A Fund may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. A Fund may be exposed to counterparty risk through participation in various programs including, but not limited to, lending its securities to third parties, cash sweep arrangements whereby the Fund's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures, and options. Each Fund intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that a Fund focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

Emerging Markets

Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets IndexSM. For Janus Emerging Markets Fund, such countries include any country that has been determined by an international organization, such as the World Bank, to have a low to middle income economy and/or any country that is not included in the Morgan Stanley Capital International World IndexSM, which measures the equity market performance of developed markets. Janus International Equity Fund will normally limit its investments in emerging market countries to 20% of its net assets.

High-Yield/High-Risk Bonds

A high-yield/high-risk bond (also called a "junk" bond) is a bond rated below investment grade by major rating agencies (i.e., BB+ or lower by Standard & Poor's Ratings Services ("Standard & Poor's") and Fitch, Inc. ("Fitch"), or Ba or lower by Moody's Investors Service, Inc. ("Moody's")) or is an unrated bond of similar quality. It presents greater risk of default (the failure to make timely interest and principal payments) than higher quality bonds. To the extent a Fund invests in high-yield/high-risk bonds, under normal circumstances, each Fund, with the exception of Janus Asia Equity Fund, Janus Emerging Markets Fund, and Janus International Equity Fund, will limit its investments in high-yield/high-risk bonds to 35% or less of its net assets. Each of Janus Asia Equity Fund, Janus Emerging Markets Fund, and Janus International Equity Fund will limit its investments in such bonds to 20% or less of its net assets.

Illiquid Investments

Although the Funds intend to invest in liquid securities, each Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment is a security or other position that cannot be disposed of quickly in the normal course of business. For example, some securities are not registered under U.S. securities laws and cannot be sold to the U.S. public because of Securities and Exchange Commission regulations (these are known as "restricted securities"). Under procedures adopted by the Funds' Trustees, certain restricted securities that are determined to be liquid will not be counted toward this 15% limit.

Nondiversification

Diversification is a way to reduce risk by investing in a broad range of stocks or other securities. **Janus Global Select Fund** is classified as “nondiversified.” A fund that is classified as “nondiversified” has the ability to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” This gives a fund which is classified as nondiversified more flexibility to focus its investments in companies that the portfolio manager has identified as the most attractive for the investment objective and strategy of the fund. However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified. This fluctuation, if significant, may affect the performance of the fund.

Portfolio Turnover

In general, each Fund intends to purchase securities for long-term investment, although, to a limited extent, a Fund may purchase securities in anticipation of relatively short-term gains. Short-term transactions may also result from liquidity needs, securities having reached a price or yield objective, changes in interest rates or the credit standing of an issuer, or by reason of economic or other developments not foreseen at the time of the initial investment decision. A Fund may also sell one security and simultaneously purchase the same or a comparable security to take advantage of short-term differentials in bond yields or securities prices. Portfolio turnover is affected by market conditions, changes in the size of a Fund, the nature of a Fund's investments, and the investment style of the portfolio manager and/or investment personnel. Changes are normally made in a Fund's portfolio whenever the portfolio manager and/or investment personnel believe such changes are desirable. Portfolio turnover rates are generally not a factor in making buy and sell decisions.

Increased portfolio turnover may result in higher costs for brokerage commissions, dealer mark-ups, and other transaction costs, and may also result in taxable capital gains. Higher costs associated with increased portfolio turnover also may have a negative effect on a Fund's performance. The “Financial Highlights” section of this Prospectus shows the Funds' historical turnover rates.

Securities Lending

A Fund may seek to earn additional income through lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis. Each Fund may lend portfolio securities on a short-term or long-term basis, in an amount equal to up to $\frac{1}{3}$ of its total assets as determined at the time of the loan origination. When a Fund lends its securities, it receives collateral (including cash collateral), at least equal to the value of securities loaned. The Fund may earn income by investing this collateral in one or more affiliated or non-affiliated cash management vehicles. It is also possible that, due to a decline in the value of a cash management vehicle, the Fund may lose money. There is also the risk that when portfolio securities are lent, the securities may not be returned on a timely basis, and the Fund may experience delays and costs in recovering the security or gaining access to the collateral provided to the Fund to collateralize the loan. If the Fund is unable to recover a security on loan, the Fund may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Fund. Janus Capital intends to manage the cash collateral in an affiliated cash management vehicle and will receive an investment advisory fee for managing such assets.

Short Sales

Certain Funds may engage in short sales. No more than 10% of a Fund's net assets may be invested in short positions (through short sales of stocks, structured products, futures, swaps, and uncovered written calls). The Funds may engage in short sales “against the box” and options for hedging purposes that are not subject to this 10% limit. A short sale is generally a transaction in which a Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. A short sale is subject to the risk that if the price of the security sold short increases in value, the Fund will incur a loss because it will have to replace the security sold short by purchasing it at a higher price. In addition, the Fund may not always be able to close out a short position at a particular time or at an acceptable price. A lender may request, or market conditions may dictate, that the securities sold short be returned to the lender on short notice, and the Fund may have to buy the securities sold short at an unfavorable price. If this occurs at a time that other short sellers of the same security also want to close out their positions, it is more likely that the Fund will have to cover its short sale at an unfavorable price and potentially reduce or eliminate any gain, or cause a loss, as a result of the short sale. Because there is no upper limit to the price a borrowed security may reach prior to closing a short position, a

Fund's losses are potentially unlimited in a short sale transaction. A Fund's gains and losses will also be decreased or increased, as the case may be, by the amount of any dividends, interest, or expenses, including transaction costs and borrowing fees, the Fund may be required to pay in connection with a short sale. Such payments may result in the Fund having higher expenses than a Fund that does not engage in short sales and may negatively affect the Fund's performance.

A Fund may also enter into short positions through derivative instruments such as options contracts, futures contracts, and swap agreements which may expose the Fund to similar risks. To the extent that the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Due to certain foreign countries' restrictions, a Fund will not be able to engage in short sales in certain foreign countries where it may maintain long positions. As a result, a Fund's ability to fully implement a short selling strategy that could otherwise help the Fund pursue its investment goals may be limited. There can be no assurance that the implementation of a short sale strategy will be successful.

Special Situations

The Funds may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. For example, a special situation or turnaround may arise when, in the opinion of a Fund's portfolio managers and/or investment personnel, the securities of a particular issuer will be recognized as undervalued by the market and appreciate in value due to a specific development with respect to that issuer. Special situations may include significant changes in a company's allocation of its existing capital, a restructuring of assets, or a redirection of free cash flow. For example, issuers undergoing significant capital changes may include companies involved in spin-offs, sales of divisions, mergers or acquisitions, companies involved in bankruptcy proceedings, or companies initiating large changes in their debt to equity ratio. Companies that are redirecting cash flows may be reducing debt, repurchasing shares, or paying dividends. Special situations may also result from:

(i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure.

Investments in "special situations" companies can present greater risks than investments in companies not experiencing special situations, and a Fund's performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Swap Agreements

Certain Funds may utilize swap agreements as a means to gain exposure to certain common stocks and/or to "hedge" or protect their portfolios from adverse movements in securities prices, the rate of inflation, or interest rates. Swaps may also be used for capital appreciation. Swap agreements are two-party contracts to exchange one set of cash flows for another. Swap agreements entail the risk that a party will default on its payment obligations to a Fund. If the other party to a swap defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If a Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund's total return. Various types of swaps such as credit default, equity, interest rate, and total return swaps are described in the "Glossary of Investment Terms."

Other Types of Investments

Unless otherwise stated within its specific investment policies, each Fund may also invest in other types of domestic and foreign securities and use other investment strategies, as described in the "Glossary of Investment Terms." These securities and strategies are not principal investment strategies of the Funds. If successful, they may benefit the Funds by earning a return on the Funds' assets or reducing risk; however, they may not achieve the Funds' investment objectives. These securities and strategies may include:

debt securities (such as bonds, notes, and debentures)

exchange-traded funds

indexed/structured securities (such as mortgage- and asset-backed securities)

various derivative transactions (which could comprise a significant percentage of a fund's portfolio) including, but not limited to, options, futures, forwards, swap agreements (such as equity, interest rate, inflation index, credit default, and

total return swaps), participatory notes, structured notes, and other types of derivatives individually or in combination for hedging purposes or for nonhedging purposes such as seeking to earn income and enhance return, to protect unrealized gains, or to avoid realizing losses; such techniques may also be used to adjust currency exposure relative to a benchmark index, to gain exposure to the market pending investment of cash balances, or to meet liquidity needs

securities purchased on a when-issued, delayed delivery, or forward commitment basis

RISKS OF THE FUNDS

The value of your investment will vary over time, sometimes significantly, and you may lose money by investing in the Funds. To varying degrees, the Funds may invest in stocks, bonds, alternative strategy investments, and money market instruments or cash/cash equivalents. The following information is intended to help you better understand some of the risks of investing in the Funds. The impact of the following risks on a Fund may vary depending on the Fund's investments. The greater the Fund's investment in a particular security, the greater the Fund's exposure to the risks associated with that security. Before investing in a Fund, you should consider carefully the risks that you assume when investing in the Fund.

Concentration Risk. Janus Global Life Sciences Fund focuses its investments in "life sciences" related industry groups. Because of this, companies in its portfolio may share common characteristics and react similarly to market developments. For example, many companies with a life science orientation are highly regulated and may be dependent upon certain types of technology. As a result, changes in government funding or subsidies, new or anticipated legislative changes, or technological advances could affect the value of such companies and, therefore, the Fund's net asset value. As a result, the Fund may be subject to greater risks and its net asset value may fluctuate more than a fund that does not concentrate its investments.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by a Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, a Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent a Fund enters into short derivative positions, a Fund may be exposed to risks similar to those associated with short sales, including the risk that a Fund's losses are theoretically unlimited.

Emerging Markets Risk. Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets Indexsm. For Janus Emerging Markets Fund, such countries include any country that has been determined by an international organization, such as the World Bank, to have a low to middle income economy and/or any country that is not included in the Morgan Stanley Capital International World Indexsm, which measures the equity market performance of developed markets. To the extent that a Fund invests a significant amount of its assets in one or more of these countries, its returns and net asset value may be affected to a large degree by events and economic conditions in such countries. The risks of foreign investing are heightened when investing in emerging markets, which may result in the price of investments in emerging markets experiencing sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on a Fund's investments. The securities markets of many of these countries may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for a Fund to obtain or to enforce a judgment against the issuers of such securities. In addition, a Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar

may affect the value of the Fund's investments. To the extent that a Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. A Fund may be subject to emerging markets risk to the extent that it invests in securities of issuers or companies which are not considered to be from emerging markets, but which have customers, products, or transactions associated with emerging markets. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent a Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when a Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Foreign Exposure Risks. Each Fund will invest in foreign debt and equity securities either indirectly (e.g., depositary receipts, depositary shares, and passive foreign investment companies) or directly in foreign markets, including emerging markets. Investments in foreign securities, including securities of foreign and emerging markets governments, may involve greater risks than investing in domestic securities because a Fund's performance may depend on factors other than the performance of a particular company. These factors include:

Currency Risk. As long as a Fund holds a foreign security, its value will be affected by the value of the local currency relative to the U.S. dollar. When a Fund sells a foreign currency denominated security, its value may be worth less in U.S. dollars even if the security increases in value in its home country. U.S. dollar-denominated securities of foreign issuers may also be affected by currency risk, as the value of these securities may also be affected by changes in the issuer's local currency.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in emerging markets which may have relatively unstable governments, immature economic structures, national policies restricting investments by foreigners, social instability, and different and/or developing legal systems. In some countries, there is the risk that the government may take over the assets or operations of a company or that the government may impose withholding and other taxes or limits on the removal of a Fund's assets from that country. In addition, the economies of emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Regulatory Risk. There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Foreign Market Risk. Foreign securities markets, particularly those of emerging market countries, may be less liquid and more volatile than domestic markets. These securities markets may trade a small number of securities, may have a limited number of issuers and a high proportion of shares, or may be held by a relatively small number of persons or institutions. Local securities markets may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of substantial holdings difficult or impossible at times. It is also possible that certain markets may require payment for securities before delivery, and delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for a Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, securities of issuers located in countries with emerging markets may have limited marketability and may be subject to more abrupt or erratic price movements which could also have a negative effect on a Fund. Such factors may hinder a Fund's ability to buy and sell emerging market securities in a timely manner, affecting the Fund's investment strategies and potentially affecting the value of the Fund.

Geographic Investment Risk. To the extent that a Fund invests a significant portion of its assets in a particular country or geographic region, the Fund will generally have more exposure to certain risks due to possible political, economic, social, or regulatory events in that country or region. Adverse developments in certain regions could also adversely affect securities of other countries whose economies appear to be unrelated and could have a negative impact on a Fund's performance.

Transaction Costs. Costs of buying, selling, and holding foreign securities, including brokerage, tax, and custody costs, may be higher than those involved in domestic transactions.

Geographic Concentration Risk. Because Janus Asia Equity Fund intends to focus its investments in a particular geographic region, the Fund's performance is expected to be closely tied to various factors such as the social, financial, economic, and political conditions within that region or country. Specifically, the Fund's investments in Asian issuers increase the Fund's exposure to various risks including, but not limited to, risks associated with volatile securities markets, currency fluctuations, social, political, and regulatory developments, economic environmental events (such as natural disasters), and changes in tax or economic policies, each of which, among others, may be particular to Asian countries or the region.

Because of the Fund's investment focus on Asian issuers, its investments will be more sensitive to social, financial, economic, political, and regulatory developments affecting the fiscal stability of a particular country and/or the broader region. Events that negatively affect the fiscal stability of a particular country and/or the broader region may cause the value of the Fund's holdings to decrease, in some cases significantly. As a result, the Fund is likely to be more volatile than a fund that is more geographically diverse in its investments.

The Asian region within which the Fund will focus its investments comprises countries in various stages of economic and political development. As a result, some countries may have relatively unstable governments or may experience adverse conditions such as overextension of credit, currency devaluations and restrictions, less efficient markets, rising unemployment, high inflation, underdeveloped financial services sectors, heavy reliance on international trade, prolonged economic recessions, and political instability, including military disruption, which could result in significant downturns and volatility in the economies of Asian countries, and therefore, have an adverse effect on the value of the Fund's portfolio. Certain Asian countries may be vulnerable to trade barriers and other protectionist measures. Some countries have restricted the flow of money in and out of the country. Further, if Asian securities fall out of favor, it may cause the Fund to underperform funds that do not focus their investments in a single region of the world.

It is also possible that from time to time, a small number of companies and industries may represent a large portion of the market in a particular country or region, and these companies and industries can be sensitive to social, financial, economic, political, and regulatory developments. The economies of the Asian countries in which the Fund invests may be interdependent, which could increase the possibility that conditions in one country will adversely impact the issuers of securities in a different country or region, or that the impact of such conditions will be experienced at the same time by the region as a whole. Likewise, the economies of the Asian region may also be dependent on the economies of other countries, such as the United States and Europe, and events in these economies could negatively impact the economies of the Asian region.

The trading volume on some Asian stock exchanges tends to be much lower than in the United States, and Asian securities of some companies are less liquid and more volatile than similar United States securities, which could lead to a significant possibility of loss to the Fund. In addition, brokerage commissions on regional stock exchanges are fixed and are generally higher than the negotiated commissions in the United States.

High-Yield/High-Risk Bond Risk. High-yield/high-risk bonds (or "junk" bonds) are bonds rated below investment grade by the primary rating agencies such as Standard & Poor's, Fitch, and Moody's or are unrated bonds of similar quality. The value of lower quality bonds generally is more dependent on credit risk than investment grade bonds. Issuers of high-yield/high-risk bonds may not be as strong financially as those issuing bonds with higher credit ratings and are more vulnerable to real or perceived economic changes, political changes, or adverse developments specific to the issuer. In addition, the junk bond market can experience sudden and sharp price swings.

Please refer to the "Explanation of Rating Categories" section of the SAI for a description of bond rating categories.

Industry Risk. Industry risk is the possibility that a group of related securities will decline in price due to industry-specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react similarly to industry-specific market or economic developments. Each Fund's investments, if any, in multiple companies in a particular industry increase that Fund's exposure to industry risk. In the life sciences, for example, many companies are subject to government regulation and approval of their products and services, which may affect their price or availability. In addition, the products and services offered by these companies may quickly become obsolete in the face of scientific or technological developments. The economic outlook of such companies may fluctuate dramatically due to changes in regulatory or competitive environments. Similarly, in technology-related industries, competitive pressures may have a significant effect on the performance of companies in which a Fund may invest. In addition, technology and technology-

related companies often progress at an accelerated rate, and these companies may be subject to short product cycles and aggressive pricing, which may increase their volatility.

Janus Global Life Sciences Fund invests in a concentrated portfolio, which may result in greater exposure to related industries. As a result, the Fund may be subject to greater risks and its net asset value may fluctuate more than a fund that does not concentrate its investments.

Management Risk. The Funds are actively managed investment portfolios and are therefore subject to the risk that the investment strategies employed for the Funds may fail to produce the intended results. A Fund may underperform its benchmark index or other mutual funds with similar investment objectives.

Because the Funds may invest substantially all of their assets in common stocks, the main risk is the risk that the value of the stocks they hold might decrease in response to the activities of an individual company or in response to general market and/or economic conditions. If this occurs, a Fund's share price may also decrease.

The Funds may use short sales, futures, options, swap agreements (including, but not limited to, equity, interest rate, credit default, and total return swaps), and other derivative instruments individually or in combination to "hedge" or protect their portfolios from adverse movements in securities prices and interest rates. The Funds may also use a variety of currency hedging techniques, including the use of forward currency contracts, to manage currency risk. There is no guarantee that a portfolio manager's and/or investment personnel's use of derivative investments will benefit the Funds. A Fund's performance could be worse than if the Fund had not used such instruments. Use of such investments may instead increase risk to the Fund, rather than reduce risk.

A Fund's performance may also be significantly affected, positively or negatively, by a portfolio manager's and/or investment personnel's use of certain types of investments, such as foreign (non-U.S.) securities, non-investment grade bonds ("junk" bonds), initial public offerings ("IPOs"), or securities of companies with relatively small market capitalizations. Note that a portfolio manager's and/or investment personnel's use of IPOs and other types of investments may have a magnified performance impact on a fund with a small asset base and the fund may not experience similar performance as its assets grow.

Market Risk. The value of a Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' and/or investment personnel's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of a Fund's portfolio could also decrease if there are deteriorating economic or market conditions, including, but not limited to, a general decline in prices on the stock markets, a general decline in real estate markets, a decline in commodities prices, or if the market favors different types of securities than the types of securities in which the Fund invests. If the value of the Fund's portfolio decreases, the Fund's net asset value will also decrease, which means if you sell your shares in the Fund you may lose money.

It is also important to note that events in both domestic and international equity and fixed-income markets have resulted, and may continue to result, in an unusually high degree of volatility in the markets, with issuers that have exposure to the real estate, mortgage, and credit markets particularly affected. These events and the resulting market upheavals may have an adverse effect on a Fund, such as a decline in the value and liquidity of many securities held by the Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value, and an increase in Fund expenses. Because the situation is unprecedented and widespread, it may also be unusually difficult to identify both investment risks and opportunities, which could limit or preclude the Fund's ability to achieve its investment objective. It is impossible to predict whether or for how long these conditions will continue. Therefore, it is important to understand that the value of your investment may fall, sometimes sharply, and you could lose money.

Further, the instability experienced in the financial markets has resulted in the U.S. Government and various other governmental and regulatory entities taking actions to address the financial crisis. These actions include, but are not limited to, the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") in July 2010 which is expected to dramatically change the way in which the U.S. financial system is supervised and regulated. More specifically, the Dodd-Frank Act provides for widespread regulation of financial institutions, consumer financial products and services, broker-dealers, over-the-counter derivatives, investment advisers, credit rating agencies, and mortgage lending, which expands federal oversight in the financial sector and may affect the investment management industry as a whole. Given the broad scope, sweeping nature, and the fact that many provisions of the Dodd-Frank Act must be implemented through future

rulemaking, the ultimate impact of the Dodd-Frank Act, and any resulting regulation, is not yet certain. As a result, there can be no assurance that these government and regulatory measures will not have an adverse effect on the value or marketability of securities held by a Fund, including potentially limiting or completely restricting the ability of the Fund to use a particular investment instrument as part of its investment strategy, increasing the costs of using these instruments, or possibly making them less effective in general. Furthermore, no assurance can be made that the U.S. Government or any U.S. regulatory entity (or other authority or regulatory entity) will not continue to take further legislative or regulatory action in response to the economic crisis or otherwise, and the effect of such actions, if taken, cannot be known.

In addition, European markets have recently experienced volatility and adverse trends due to concerns about economic downturns, rising government debt levels, and the possible default of government debt in several European countries, including Greece, Ireland, Italy, Portugal, and Spain. A default or debt restructuring by any European country would adversely impact holders of that country's debt and worldwide sellers of credit default swaps linked to that country's creditworthiness. These trends have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of all European countries, which in turn may have a material adverse effect on a Fund's investments in such countries, other countries that depend on European countries for significant amounts of trade or investment, or issuers with exposure to European debt.

Nondiversification Risk. Janus Global Select Fund is classified as nondiversified under the Investment Company Act of 1940, as amended, and may hold a greater percentage of its assets in a smaller number of issuers. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund's net asset value and total return. Being nondiversified may also make a Fund more susceptible to financial, economic, political, or other developments that may impact a security. Although the Fund may satisfy the requirements for a diversified fund, and has from time to time operated as diversified, the Fund's nondiversified classification gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities than a fund that is classified as diversified. The Fund's policy of concentrating its portfolio in a smaller number of holdings could result in more volatility in the Fund's performance and share price.

Real Estate Securities Risk. A Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets. REITs that invest in real estate mortgages are also subject to prepayment risk. In addition to prepayment risk, investments in mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities comprised of under-performing assets may be subject to a higher degree of credit risk, valuation risk, and liquidity risk.

Small- and Mid-Sized Companies Risk. A Fund's investments in securities issued by small- and mid-sized companies, which tend to be smaller, start-up companies offering emerging products or services, may involve greater risks than are customarily associated with larger, more established companies. For example, while small- and mid-sized companies may realize more substantial growth than larger or more established issuers, they may also suffer more significant losses as a result of their narrow product lines, limited operating history, greater exposure to competitive threats, limited financial resources, limited trading markets, and the potential lack of management depth. Securities issued by small- and mid-sized companies tend to be more volatile and somewhat more speculative than securities issued by larger or more established companies and may underperform as compared to the securities of larger companies. These holdings are also subject to wider price fluctuations and tend to be less liquid than stocks of larger companies, which could have a significant adverse effect on a Fund's returns, especially as market conditions change.

Sovereign Debt Risk. A Fund may invest in U.S. and foreign government debt securities ("sovereign debt"). Investments in U.S. sovereign debt are considered low risk. However, investments in non-U.S. sovereign debt can involve a high degree of risk, including the risk that the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or to pay the interest on its sovereign debt in a timely manner. A sovereign debtor's willingness or ability to satisfy its debt obligation may be affected by various factors, including its cash flow situation, the extent of its foreign currency reserves, the availability of foreign exchange when a payment is due, the relative size of its debt position in relation to its economy as a whole, the sovereign debtor's policy toward international lenders, and local political constraints to which the governmental entity may be subject. Sovereign debtors may also be dependent on expected disbursements from

foreign governments, multilateral agencies, and other entities. The failure of a sovereign debtor to implement economic reforms, achieve specified levels of economic performance, or repay principal or interest when due may result in the cancellation of third party commitments to lend funds to the sovereign debtor, which may further impair such debtor's ability or willingness to timely service its debts. A Fund may be requested to participate in the rescheduling of such sovereign debt and to extend further loans to governmental entities, which may adversely affect the Fund's holdings. In the event of default, there may be limited or no legal remedies for collecting sovereign debt and there may be no bankruptcy proceedings through which the Fund may collect all or part of the sovereign debt that a governmental entity has not repaid.

Management of the Funds

INVESTMENT ADVISER

Janus Capital Management LLC, 151 Detroit Street, Denver, Colorado 80206-4805, is the investment adviser to each Fund. Janus Capital is responsible for the day-to-day management of the Funds' investment portfolios and furnishes continuous advice and recommendations concerning the Funds' investments for all the Funds except Janus Asia Equity Fund, Janus Emerging Markets Fund, and Janus International Equity Fund. Janus Singapore is responsible for the day-to-day management of Janus Asia Equity Fund's investment portfolio and a portion of the investment operations of Janus Emerging Markets Fund and Janus International Equity Fund subject to the general oversight of Janus Capital. Janus Capital also provides certain administration and other services and is responsible for other business affairs of each Fund.

Janus Capital (together with its predecessors) has served as investment adviser to Janus mutual funds since 1970 and currently serves as investment adviser to all of the Janus funds, acts as subadviser for a number of private-label mutual funds, and provides separate account advisory services for institutional accounts and other unregistered products.

Janus Capital furnishes certain administration, compliance, and accounting services for the Funds and is reimbursed by the Funds for certain of its costs in providing those services (to the extent Janus Capital seeks reimbursement and such costs are not otherwise waived). In addition, employees of Janus Capital and/or its affiliates may serve as officers of the Trust. Janus Capital provides office space for the Funds. Some expenses related to compensation payable to the Janus funds' Chief Compliance Officer and compliance staff are shared with the Janus funds. The Funds also pay for salaries, fees, and expenses of certain Janus Capital employees and Fund officers, with respect to certain specified administration functions they perform on behalf of the Janus funds. The Janus funds pay these costs based on out-of-pocket expenses incurred by Janus Capital, and these costs are separate and apart from advisory fees and other expenses paid in connection with the investment advisory services Janus Capital provides to the Funds.

MANAGEMENT EXPENSES

Each Fund pays Janus Capital an investment advisory fee and incurs expenses, including the distribution and shareholder servicing fees (12b-1 fee), administrative services fees payable pursuant to the Transfer Agency Agreement, any other transfer agent and custodian fees and expenses, legal and auditing fees, printing and mailing costs of sending reports and other information to existing shareholders, and Independent Trustees' fees and expenses. Each Fund's investment advisory fee is calculated daily and paid monthly. Each Fund's advisory agreement details the investment advisory fee and other expenses that each Fund must pay. Janus Capital pays Janus Singapore a subadvisory fee from its investment advisory fee for managing Janus Asia Equity Fund and a portion of Janus Emerging Markets Fund and Janus International Equity Fund.

The following tables reflect each Fund's contractual investment advisory fee rate or base fee rate, as applicable (expressed as an annual rate), as well as the actual investment advisory fee rate paid by each Fund to Janus Capital (gross and net of fee waivers, if applicable). The investment advisory fee rate is aggregated to include all investment advisory fees paid by a Fund.

Fixed-Rate Investment Advisory Fee

The Funds reflected below pay an investment advisory fee at a fixed rate based on each Fund's average daily net assets.

Fund Name	Average Daily Net Assets of the Fund	Contractual Investment Advisory Fee (%) (annual rate)	Actual Investment Advisory Fee Rate (%) (for the fiscal year ended September 30, 2012)
Janus Global Life Sciences Fund	All Asset Levels	0.64	0.64
Janus Global Select Fund	All Asset Levels	0.64	0.64(1)
Janus Global Technology Fund	All Asset Levels	0.64	0.64

Janus Capital has agreed to waive the Fund's total annual fund operating expenses (excluding the distribution and shareholder servicing fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees (1) and expenses, and extraordinary expenses) to a certain level until at least February 1, 2014. Application of the expense waiver and its effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in the Fund Summary of the Prospectus, and additional information is included under "Expense Limitations" below. The waiver is not reflected in the contractual fee rate shown.

Performance-Based Investment Advisory Fee

Janus Global Research Fund, Janus Worldwide Fund, Janus International Equity Fund, Janus Overseas Fund, Janus Emerging Markets Fund, and Janus Asia Equity Fund each pay an investment advisory fee rate that may adjust up or down based on each Fund's performance relative to the cumulative investment record of its benchmark index over the performance measurement period as reflected in the table below. Any adjustment to the investment advisory fee rate was effective January 2007 for Janus Global Research Fund, February 2007 for Janus Worldwide Fund, December 2007 for Janus International Equity Fund, November 2011 for Janus Overseas Fund, January 2012 for Janus Emerging Markets Fund, and August 2012 for Janus Asia Equity Fund. Until such time, only the base fee rate shown below applied. The third column shows the performance hurdle for outperformance or underperformance during the measurement period relative to each Fund's respective benchmark index. The fourth column shows the performance adjusted investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period without any fee waivers. The fifth column shows the actual investment advisory fee rate, which is equal to the Fund's base fee rate plus or minus the performance adjustment over the period and includes any applicable fee waiver. This fifth column shows the actual amount of the investment advisory fee rate paid by each Fund as of the end of the fiscal year.

As an example, if a Fund outperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would increase by 0.15% (assuming constant assets). Conversely, if a Fund underperformed its benchmark index over the performance measurement period by its performance hurdle rate (listed in the table below), the advisory fee would decrease by 0.15% (assuming constant assets). Actual performance within the full range of the performance hurdle rate may result in positive or negative incremental adjustments to the advisory fee of greater or less than 0.15%. Additional details discussing the performance fee are included below with further description in the SAI.

Fund Name	Base Fee Rate (%)	Performance Hurdle vs. Benchmark Index	Performance Adjusted Investment Advisory Fee Rate (%)	Actual Investment Advisory Fee Rate ⁽¹⁾ (%) (for the fiscal year ended September 30, 2012)
Janus Global Research Fund	0.64	±6.00%	0.74	0.74
Janus Worldwide Fund	0.60	±6.00%	0.59	0.59
Janus International Equity Fund	0.68	±7.00%	0.81	0.81
Janus Overseas Fund	0.64	±7.00%	0.44 ⁽²⁾	0.43
Janus Emerging Markets Fund	1.00	±6.00%	0.91 ⁽³⁾	0.18
Janus Asia Equity Fund	0.92	±7.00%	0.91 ⁽⁴⁾	0.00 ⁽⁵⁾

Janus Capital has agreed to waive each Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, the distribution and shareholder servicing fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to certain levels until at least February 1, 2014. Application of the expense waivers and their effect on annual fund operating expenses is reflected, when applicable, in the "Fees and Expenses of the Fund" table in each Fund Summary of the Prospectus, and additional information is included under "Expense Limitations" below. The waivers and any applicable performance adjustments are not reflected in the base fee rates shown.

(1) Any applicable performance adjustment began November 1, 2011; until such time, the base fee rate shown applied.

(2) Any applicable performance adjustment began January 1, 2012; until such time, the base fee rate shown applied.

(3) Any applicable performance adjustment began August 1, 2012; until such time, the base fee rate shown applied.

(4) For the fiscal year ended September 30, 2012, the Fund did not pay Janus Capital any investment advisory fees (net of fee waivers) because the Fund's fee waiver exceeded the investment advisory fee.

For Janus Global Research Fund, Janus Worldwide Fund, Janus International Equity Fund, Janus Overseas Fund, Janus Emerging Markets Fund, and Janus Asia Equity Fund, the investment advisory fee rate is determined by calculating a base fee (shown in the previous table) and applying a performance adjustment (described in further detail below). The performance

adjustment either increases or decreases the base fee depending on how well each Fund has performed relative to its benchmark index as shown below:

Fund Name	Benchmark Index
Janus Global Research Fund	MSCI World Growth Index ⁽¹⁾
Janus Worldwide Fund	MSCI World Index ^{sm(1)}
Janus International Equity Fund	MSCI EAFE® Index ⁽¹⁾
Janus Overseas Fund	MSCI All Country World ex-U.S. Index ^{sm(1)}
Janus Emerging Markets Fund	MSCI Emerging Markets Index ^{sm(1)}
Janus Asia Equity Fund	MSCI All Country Asia ex-Japan Index ⁽¹⁾

(1) The index includes reinvestment of dividends, net of foreign withholding taxes.

The calculation of the performance adjustment applies as follows:

Investment Advisory Fee = Base Fee Rate +/- Performance Adjustment

The investment advisory fee rate paid to Janus Capital by each Fund in the table above consists of two components: (1) a base fee calculated by applying the contractual fixed rate of the advisory fee to the Fund's average daily net assets during the previous month ("Base Fee Rate"), plus or minus (2) a performance-fee adjustment ("Performance Adjustment") calculated by applying a variable rate of up to 0.15% (positive or negative) to the Fund's average daily net assets during the applicable performance measurement period. The performance measurement period generally is the previous 36 months, although no Performance Adjustment is made until a Fund's performance-based fee structure has been in effect for at least 12 months (15 months for Janus Overseas Fund). When a Fund's performance-based fee structure has been in effect for at least 12 months (15 months for Janus Overseas Fund), but less than 36 months, the performance measurement period is equal to the time that has elapsed since the performance-based fee structure took effect. As noted above, any applicable Performance Adjustment began January 2007 for Janus Global Research Fund, February 2007 for Janus Worldwide Fund, December 2007 for Janus International Equity Fund, November 2011 for Janus Overseas Fund, January 2012 for Janus Emerging Markets Fund, and August 2012 for Janus Asia Equity Fund.

No Performance Adjustment is applied unless the difference between a Fund's investment performance and the cumulative investment record of the Fund's benchmark index is 0.50% or greater (positive or negative) during the applicable performance measurement period. The Base Fee Rate is subject to an upward or downward Performance Adjustment for every full 0.50% increment by which the Fund outperforms or underperforms its benchmark index. Because the Performance Adjustment is tied to a Fund's relative performance compared to its benchmark index (and not its absolute performance), the Performance Adjustment could increase Janus Capital's fee even if the Fund's Shares lose value during the performance measurement period and could decrease Janus Capital's fee even if the Fund's Shares increase in value during the performance measurement period. For purposes of computing the Base Fee Rate and the Performance Adjustment, net assets are averaged over different periods (average daily net assets during the previous month for the Base Fee Rate, versus average daily net assets during the performance measurement period for the Performance Adjustment). Performance of a Fund is calculated net of expenses whereas a Fund's benchmark index does not have any fees or expenses. Reinvestment of dividends and distributions is included in calculating both the performance of a Fund and the Fund's benchmark index. The Base Fee Rate is calculated and accrued daily. The Performance Adjustment is calculated monthly in arrears and is accrued throughout the month. The investment fee is paid monthly in arrears. Under extreme circumstances involving underperformance by a rapidly shrinking Fund, the dollar amount of the Performance Adjustment could be more than the dollar amount of the Base Fee Rate. In such circumstances, Janus Capital would reimburse the applicable Fund.

The application of an expense limit, if any, will have a positive effect upon a Fund's performance and may result in an increase in the Performance Adjustment. It is possible that the cumulative dollar amount of additional compensation ultimately payable to Janus Capital may, under some circumstances, exceed the cumulative dollar amount of management fees waived by Janus Capital.

The investment performance of a Fund's Class A Shares (waiving the upfront sales load) for the performance measurement period is used to calculate the Performance Adjustment. After Janus Capital determines whether a particular Fund's performance was above or below its benchmark index by comparing the investment performance of the Fund's load-waived

Class A Shares against the cumulative investment record of that Fund's benchmark index, Janus Capital applies the same Performance Adjustment (positive or negative) across each other class of shares of the Fund, as applicable. It is not possible to predict the effect of the Performance Adjustment on future overall compensation to Janus Capital since it depends on the performance of each Fund relative to the record of the Fund's benchmark index and future changes to the size of each Fund.

A discussion regarding the basis for the Trustees' approval of the Funds' investment advisory agreements and subadvisory agreements (as applicable) is included in the Funds' annual or semiannual report to shareholders. You can request the Funds' annual or semiannual reports (as they become available), free of charge, by contacting your plan sponsor, broker-dealer, or financial intermediary, or by contacting a Janus representative at 1-877-335-2687. The reports are also available, free of charge, at janus.com/info.

Expense Limitations

Janus Capital has contractually agreed to waive the advisory fee payable by each Fund listed below in an amount equal to the amount, if any, that the Fund's normal operating expenses in any fiscal year, including the investment advisory fee, but excluding any performance adjustments to management fees, the distribution and shareholder servicing fees (applicable to Class A Shares, Class C Shares, Class S Shares, and Class R Shares), administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses, exceed the annual rate shown below. For information about how the expense limit affects the total expenses of each Fund, see the "Fees and Expenses of the Fund" table in each Fund Summary of the Prospectus. Janus Capital has agreed to continue each waiver until at least February 1, 2014.

Fund Name	Expense Limit Percentage (%)
Janus Asia Equity Fund(1)	1.25
Janus Emerging Markets Fund(1)	1.25
Janus Global Research Fund(1)	1.07
Janus Global Select Fund	1.02
Janus International Equity Fund(1)	1.00
Janus Overseas Fund(1)	1.00
Janus Worldwide Fund(1)	1.07

The Fund pays an investment advisory fee rate that may adjust up or down based on the Fund's performance relative to its benchmark index during a (1) measurement period. Because a fee waiver will have a positive effect upon the Fund's performance, a fee waiver that is in place during the period when the performance adjustment applies may affect the performance adjustment in a way that is favorable to Janus Capital.

SUBADVISER

Janus Capital Singapore Pte. Limited ("Janus Singapore") serves as subadviser to Janus Asia Equity Fund and has served in such capacity since the Fund's inception. In addition, Janus Singapore serves as subadviser for a portion of each of Janus Emerging Markets Fund and Janus International Equity Fund. Janus Singapore, #36-02 AXA Tower, 8 Shenton Way, Singapore 068811, has been in the investment advisory business since 2011 and provides day-to-day management of Janus Asia Equity Fund's portfolio operations and a portion of the investment operations of Janus Emerging Markets Fund and Janus International Equity Fund. Janus Singapore is a wholly-owned subsidiary of Janus Capital.

INVESTMENT PERSONNEL

Unless otherwise noted, the Portfolio Manager has primary responsibility for the day-to-day management of the Fund described.

Janus Asia Equity Fund

Hiroshi Yoh is Executive Vice President and Portfolio Manager of Janus Asia Equity Fund, which he has managed since inception. He is also Portfolio Manager of other Janus accounts. Mr. Yoh joined Janus Capital in April 2011. Prior to joining Janus Capital, Mr. Yoh was the Chief Investment Officer and a portfolio manager with Tokio Marine Asset Management International Pte. Ltd., a Singapore-based asset management firm from 1999 to 2011. Mr. Yoh holds a Master of Economics degree from the Graduate School of Business Administration and Political Sciences of Tsukuba University, and is a Professional Chartered Member of the Security Analysts Association of Japan. He has also completed the Harvard Advanced Management Program.

Janus Emerging Markets Fund

Co-Portfolio Managers Wahid Chammas and Matt Hochstetler jointly share responsibility for the day-to-day management of the Fund, with no limitation on the authority of one co-portfolio manager in relation to the other.

Wahid Chammas is Executive Vice President and Co-Portfolio Manager of Janus Emerging Markets Fund, which he has co-managed since inception. Mr. Chammas is also Portfolio Manager of other Janus accounts and performs duties as an equity research analyst. He joined Janus Capital in January 2005 as an equity research analyst. Mr. Chammas holds a Bachelor of Arts degree (summa cum laude) in Biology from Amherst College where he was a member of Phi Beta Kappa.

Matt Hochstetler is Executive Vice President and Co-Portfolio Manager of Janus Emerging Markets Fund, which he has co-managed since inception. Mr. Hochstetler is also Portfolio Manager of other Janus accounts and performs duties as an equity research analyst. He joined Janus Capital in June 2005 as a research intern and became a full time member of the investment team in July 2006. Prior to joining Janus Capital, Mr. Hochstetler attended Harvard Business School from 2004 to 2006. Mr. Hochstetler holds a Bachelor of Science degree (magna cum laude) in Foreign Service from Georgetown University, School of Foreign Service, where he was a member of Phi Beta Kappa. He also holds a Master's degree in Business Administration from Harvard Business School where he was a Baker Scholar.

Hiroshi Yoh is Executive Vice President and Co-Portfolio Manager of Janus Emerging Markets Fund, which he has co-managed since August 2012. He is also Portfolio Manager of other Janus accounts. Mr. Yoh joined Janus Capital in April 2011. Prior to joining Janus Capital, Mr. Yoh was the Chief Investment Officer and a portfolio manager with Tokio Marine Asset Management International Pte. Ltd., a Singapore-based asset management firm from 1999 to 2011. Mr. Yoh holds a Master of Economics degree from the Graduate School of Business Administration and Political Sciences of Tsukuba University, and is a Professional Chartered Member of the Security Analysts Association of Japan. He has also completed the Harvard Advanced Management Program.

Janus Global Life Sciences Fund

Andrew Acker, CFA, is Executive Vice President and Portfolio Manager of Janus Global Life Sciences Fund, which he has managed since May 2007. Mr. Acker is also Portfolio Manager of other Janus accounts and performs duties as a research analyst. He joined Janus Capital in 1999 as a securities analyst. Mr. Acker holds a Bachelor of Science degree (magna cum laude) in Biochemical Sciences from Harvard College where he was a member of Phi Beta Kappa. He also holds a Master's degree in Business Administration with honors from Harvard Business School. Mr. Acker holds the Chartered Financial Analyst designation.

Janus Global Research Fund

The Research Team (Janus Capital's equity research analysts overseen by the Portfolio Oversight Team led by James P. Goff) selects investments for Janus Global Research Fund and has done so since inception.

James P. Goff, CFA, is Janus Capital's Director of Equity Research and Executive Vice President of the Fund. Mr. Goff is primarily responsible for the day-to-day operations of the Fund. He leads the Portfolio Oversight Team that reviews the Fund's risks, overall structure, and guidelines. Mr. Goff joined Janus Capital in 1988. He holds a Bachelor of Arts degree (magna cum laude) in Economics from Yale University. Mr. Goff holds the Chartered Financial Analyst designation.

Janus Global Select Fund

George P. Maris, CFA, is Executive Vice President and Portfolio Manager of Janus Global Select Fund, which he has managed since August 2012. Mr. Maris joined Janus Capital in March 2011. Prior to joining Janus Capital, Mr. Maris was a portfolio manager at Northern Trust from 2008 to March 2011, and a portfolio manager with Columbia Management Group from 2004 to 2008. Mr. Maris holds a Bachelor's degree in Economics from Swarthmore College, a Juris Doctorate from the University of Illinois College of Law, and a Master of Business Administration degree from the University of Chicago. He holds the Chartered Financial Analyst designation.

Janus Global Technology Fund

J. Bradley Slingerlend, CFA, is Executive Vice President and Portfolio Manager of Janus Global Technology Fund, which he has managed since May 2011. He is also Portfolio Manager of other Janus accounts and performs duties as an equity research analyst. Mr. Slingerlend served as co-portfolio manager of the Fund from February 2006 until May 2007. Mr. Slingerlend initially joined Janus Capital in 2000 as a research analyst and left in 2007. He re-joined Janus Capital in November 2007 as an equity research analyst. He holds a Bachelor's degree in Economics and Astrophysics from Williams College. Mr. Slingerlend holds the Chartered Financial Analyst designation.

Janus International Equity Fund

Co-Portfolio Managers Julian McManus, Guy Scott, and Carmel Wellso are responsible for the day-to-day management of the Fund, with no limitation on the authority of any one co-portfolio manager in relation to the others.

Julian McManus is Executive Vice President and Co-Portfolio Manager of Janus International Equity Fund, which he has co-managed since June 2010. Mr. McManus is also Portfolio Manager of other Janus accounts and performs duties as an equity research analyst. He joined Janus Capital in December 2004 as an equity research analyst. Mr. McManus holds a Bachelor's degree in Japanese and Law from the University of London.

Guy Scott, CFA, is Executive Vice President and Co-Portfolio Manager of Janus International Equity Fund, which he has co-managed since June 2010. Mr. Scott is also Portfolio Manager of other Janus accounts and performs duties as an equity research analyst. He joined Janus Capital in September 2007 as a research analyst. Mr. Scott holds a Bachelor's degree in Economics from Lawrence University and a Master's degree with a concentration in Finance from the University of Wisconsin Business School. He holds the Chartered Financial Analyst designation.

Carmel Wellso is Executive Vice President and Co-Portfolio Manager of Janus International Equity Fund, which she has co-managed since June 2010. Ms. Wellso is also Portfolio Manager of other Janus accounts and performs duties as an equity research analyst. She joined Janus Capital in June 2008 as a research analyst. Prior to joining Janus Capital, Ms. Wellso was a partner at Standard Pacific Capital from 2005 to 2008. Ms. Wellso holds a Bachelor's degree in English Literature and Business Administration from Marquette University and a Master's degree from the Thunderbird School of Global Management.

Janus Overseas Fund

Brent A. Lynn, CFA, is Executive Vice President and Portfolio Manager of Janus Overseas Fund, which he has managed or co-managed since January 2001. Mr. Lynn joined Janus Capital in 1991 as a research analyst. He holds a Bachelor of Arts degree in Economics and a Master's degree in Economics and Industrial Engineering from Stanford University. Mr. Lynn holds the Chartered Financial Analyst designation.

Janus Worldwide Fund

George P. Maris, CFA, is Executive Vice President and Portfolio Manager of Janus Worldwide Fund, which he has managed since March 2011. Mr. Maris joined Janus Capital in March 2011. Prior to joining Janus Capital, Mr. Maris was a portfolio manager at Northern Trust from 2008 to March 2011, and a portfolio manager with Columbia Management Group from 2004 to 2008. Mr. Maris holds a Bachelor's degree in Economics from Swarthmore College, a Juris Doctorate from the University of Illinois College of Law, and a Master of Business Administration degree from the University of Chicago. He holds the Chartered Financial Analyst designation.

Information about the portfolio managers' and/or investment personnel's compensation structure and other accounts managed, as well as the range of their individual ownership of securities of the specific Fund(s) they manage and the aggregate range of their individual ownership in all mutual funds advised by Janus Capital, is included in the SAI.

Conflicts of Interest

Janus Capital and Janus Singapore each manage many funds and numerous other accounts, which may include separate accounts and other pooled investment vehicles, such as hedge funds. Side-by-side management of multiple accounts, including the management of a cash collateral pool for securities lending and investing the Janus funds' cash, may give rise to conflicts of interest among those accounts, and may create potential risks, such as the risk that investment activity in one account may adversely affect another account. For example, short sale activity in an account could adversely affect the market value of long positions in one or more other accounts (and vice versa). Side-by-side management may raise additional potential conflicts of interest relating to the allocation of investment opportunities and the aggregation and allocation of trades. Additionally, Janus Capital is the adviser to the Janus "funds of funds," which are funds that invest primarily in other mutual funds managed by Janus Capital. Because Janus Capital is the adviser to the Janus "funds of funds" and the Funds, it is subject to certain potential conflicts of interest when allocating the assets of a Janus "fund of funds" among such Funds. To the extent that a Fund is an underlying fund in a Janus "fund of funds," a potential conflict of interest arises when allocating the assets of the Janus "fund of funds" to the Fund. Purchases and redemptions of fund shares by a Janus "fund of funds" due to reallocations or rebalancings may result in a fund having to sell securities or invest cash when it otherwise would not do so. Such transactions could accelerate the realization of taxable income if sales of securities resulted in gains and could also increase a fund's transaction costs. Large redemptions by a Janus "fund of funds" may cause a fund's expense ratio to increase due to a resulting smaller asset base. A further discussion of potential conflicts of interest and a discussion of certain procedures intended to mitigate such potential conflicts are contained in the Funds' SAI.

Other information

CLOSED FUND POLICIES

A Fund may limit sales of its Shares to new investors if Janus Capital and the Trustees believe continued sales may adversely affect the Fund's ability to achieve its investment objective. If sales of a Fund are limited, it is expected that existing shareholders invested in the Fund would be permitted to continue to purchase Shares through their existing Fund accounts and to reinvest any dividends or capital gains distributions in such accounts, absent highly unusual circumstances. Requests for new accounts into a closed fund would be reviewed by management, taking into consideration eligibility requirements and whether the addition to the fund is believed to negatively impact existing fund shareholders. The closed fund may decline opening new accounts, including eligible new accounts, if it would be in the best interests of the fund and its shareholders. If applicable, additional information regarding general policies and exceptions can be found in the closed funds' prospectuses and in the "Shares of the Trust" section of the SAI.

LIQUIDATION/REORGANIZATION OF A FUND

It is important to know that, pursuant to the Trust's Amended and Restated Agreement and Declaration of Trust and in accordance with any applicable regulations and laws, the Trustees have the authority to merge, liquidate, and/or reorganize a Fund into another fund without seeking shareholder vote or consent.

DISTRIBUTION OF THE FUNDS

The Funds are distributed by Janus Distributors LLC ("Janus Distributors"), which is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). To obtain information about FINRA member firms and their associated persons, you may contact FINRA at www.finra.org, or 1-800-289-9999.

Distributions and taxes

DISTRIBUTIONS

To avoid taxation of the Funds, the Internal Revenue Code requires each Fund to distribute all or substantially all of its net investment income and any net capital gains realized on its investments at least annually. A Fund's income from certain dividends, interest, and any net realized short-term capital gains are paid to shareholders as ordinary income dividends. Certain dividend income may be reported to shareholders as "qualified dividend income," which is generally subject to reduced rates of taxation. Net realized long-term capital gains, if any, are paid to shareholders as capital gains distributions, regardless of how long Shares of the Fund have been held. Distributions are made at the class level, so they may vary from class to class within a single Fund.

Distribution Schedule

Dividends from net investment income and distributions of capital gains are normally declared and distributed in December but, if necessary, may be distributed at other times as well. The date you receive your distribution may vary depending on how your intermediary processes trades. Please consult your intermediary for details.

How Distributions Affect a Fund's NAV

Distributions are paid to shareholders as of the record date of a distribution of a Fund, regardless of how long the shares have been held. Undistributed dividends and net capital gains are included in each Fund's daily net asset value ("NAV"). The share price of a Fund drops by the amount of the distribution, net of any subsequent market fluctuations. For example, assume that on December 31, a Fund declared a dividend in the amount of \$0.25 per share. If the Fund's share price was \$10.00 on December 30, the Fund's share price on December 31 would be \$9.75, barring market fluctuations. You should be aware that distributions from a taxable mutual fund do not increase the value of your investment and may create income tax obligations.

"Buying a Dividend"

If you purchase shares of a Fund just before a distribution, you will pay the full price for the shares and receive a portion of the purchase price back as a taxable distribution. This is referred to as "buying a dividend." In the above example, if you bought shares on December 30, you would have paid \$10.00 per share. On December 31, the Fund would pay you \$0.25 per share as a dividend and your shares would now be worth \$9.75 per share. Unless your account is set up as a tax-deferred account, dividends paid to you would be included in your gross income for tax purposes, even though you may not have participated in the increase in NAV of the Fund, whether or not you reinvested the dividends. You should consult with your financial intermediary or tax adviser as to potential tax consequences of any distributions that may be paid shortly after purchase.

For your convenience, distributions of net investment income and net capital gains are automatically reinvested in additional Shares of the Fund without any sales charge. To receive distributions in cash, contact your financial intermediary, or a Janus representative (1-800-333-1181) if you hold Class I Shares directly with Janus. Whether reinvested or paid in cash, the distributions may be subject to taxes, unless your shares are held in a qualified tax-deferred plan or account.

TAXES

As with any investment, you should consider the tax consequences of investing in the Funds. Any time you sell or exchange shares of a fund in a taxable account, it is considered a taxable event. For federal income tax purposes, an exchange is treated the same as a sale. Depending on the purchase price and the sale price, you may have a gain or loss on the transaction; whether the gain or loss is long-term or short-term depends on how long you owned the shares. Any tax liabilities generated by your transactions are your responsibility.

The following discussion does not apply to qualified tax-deferred accounts or other non-taxable entities, nor is it a complete analysis of the federal income tax implications of investing in the Funds. You should consult your tax adviser if you have any questions. Additionally, state or local taxes may apply to your investment, depending upon the laws of your state of residence.

Taxes on Distributions

Distributions by the Funds are subject to federal income tax, regardless of whether the distribution is made in cash or reinvested in additional shares of a Fund. When gains from the sale of a security held by a Fund are paid to shareholders, the rate at which the gain will be taxed to shareholders depends on the length of time the Fund held the security. In certain states, a portion of the distributions (depending on the sources of a Fund's income) may be exempt from state and local

taxes. A Fund's net investment income and capital gains are distributed to (and may be taxable to) those persons who are shareholders of the Fund at the record date of such payments. Although a Fund's total net income and net realized gain are the results of its operations, the per share amount distributed or taxable to shareholders is affected by the number of Fund shares outstanding at the record date. Generally, account tax information will be made available to shareholders on or before January 31st of each year. Information regarding distributions may also be reported to the Internal Revenue Service.

Distributions made by a Fund with respect to Shares purchased through a qualified retirement plan will generally be exempt from current taxation if left to accumulate within the qualified plan.

Generally, withdrawals from qualified plans may be subject to federal income tax at ordinary income rates and, if made before age 59½, a 10% penalty tax may be imposed. The federal income tax status of your investment depends on the features of your qualified plan. For further information, please contact your plan sponsor or tax adviser.

The Funds may be required to withhold U.S. federal income tax on all distributions and redemptions payable to shareholders who fail to provide their correct taxpayer identification number, fail to make certain required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. The current backup withholding rate is applied.

When shareholders sell Fund shares from a taxable account, they typically receive information on their tax forms that calculates their gain or loss using the average cost method. Prior to January 1, 2012, this information was not reported to the IRS, and shareholders had the option of calculating gains or losses using an alternative IRS permitted method. In accordance with legislation passed by Congress in 2008, however, your intermediary (or the Fund, if you hold Class I Shares directly with Janus) began reporting cost basis information to the IRS for shares purchased on or after January 1, 2012 and sold thereafter. Your intermediary (or the Fund, if you hold Class I Shares directly with Janus) will permit shareholders to elect their preferred cost basis method. In the absence of an election, your cost basis method will be your intermediary's default method, unless you hold Class I Shares directly with Janus in which case the Fund will use an average cost basis method. Please consult your tax adviser to determine the appropriate cost basis method for your particular tax situation and to learn more about how the new cost basis reporting laws apply to you and your investments.

Taxation of the Funds

Dividends, interest, and some capital gains received by the Funds on foreign securities may be subject to foreign tax withholding or other foreign taxes. If a Fund is eligible, it may from year to year make the election permitted under Section 853 of the Internal Revenue Code to pass through such taxes to shareholders as a foreign tax credit. If such an election is not made, any foreign taxes paid or accrued will represent an expense to the Funds.

Certain fund transactions may involve short sales, futures, options, swap agreements, hedged investments, and other similar transactions, and may be subject to special provisions of the Internal Revenue Code that, among other things, can potentially affect the character, amount, timing of distributions to shareholders, and utilization of capital loss carryforwards. The Funds will monitor their transactions and may make certain tax elections and use certain investment strategies where applicable in order to mitigate the effect of these tax provisions, if possible. Certain transactions or strategies utilized by a Fund may generate nonqualified income that can impact an investor's taxes.

The Funds do not expect to pay any federal income or excise taxes because they intend to meet certain requirements of the Internal Revenue Code, including the distributions each year of all their net investment income and net capital gains. It is important that the Funds meet these requirements so that any earnings on your investment will not be subject to federal income taxes twice. Funds that invest in partnerships may be subject to state tax liabilities.

Shareholder' s guide

The Funds offer multiple classes of shares in order to meet the needs of various types of investors.

Class A Shares and Class C Shares are offered through financial intermediary platforms including, but not limited to, traditional brokerage platforms, mutual fund wrap fee programs, bank trust platforms, and retirement platforms. Class A Shares may be offered without an initial sales charge through certain retirement platforms and through certain financial intermediary platforms, including but not limited to, fee-based broker-dealers or financial advisors, primarily on their wrap account platform(s) where such broker-dealer or financial advisor imposes additional fees for services connected to the wrap account. Class A Shares pay up to 0.25% of net assets to financial intermediaries for the provision of distribution services and/or shareholder services on behalf of their clients. Class C Shares pay up to 0.75% of net assets for payment to financial intermediaries for the provision of distribution services and up to 0.25% of net assets for the provision of shareholder services on behalf of their clients. In addition, Class A Shares and Class C Shares pay financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders.

Class S Shares are offered through financial intermediary platforms including, but not limited to, retirement platforms and asset allocation, mutual fund wrap, or other discretionary or nondiscretionary fee-based investment advisory programs. In addition, Class S Shares may be available through certain financial intermediaries who have an agreement with Janus Capital or its affiliates to offer the Shares on their supermarket platforms. Class S Shares pay up to 0.25% of net assets to financial intermediaries for the provision of distribution services and/or shareholder services and up to 0.25% of net assets for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to or on behalf of their clients.

Class I Shares are available through certain financial intermediary platforms including, but not limited to, mutual fund wrap fee programs, managed account programs, asset allocation programs, bank trust platforms, as well as certain retirement platforms. Class I Shares pay financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders. Class I Shares are also available to certain direct institutional investors including, but not limited to, corporations, certain retirement plans, public plans and foundations/endowments.

Class N Shares are generally available only to financial intermediaries purchasing on behalf of 401(k) plans, 457 plans, 403(b) plans, Taft-Hartley multi-employer plans, profit-sharing and money purchase pension plans, defined benefit plans and nonqualified deferred compensation plans. Class N Shares also are available to Janus proprietary products. Class N Shares are not available to retail non-retirement accounts, traditional or Roth individual retirement accounts ("IRAs"), Coverdell Education Savings Accounts, SEPs, SARSEPs, SIMPLE IRAs, or 529 college savings plans.

Class R Shares are offered through financial intermediary platforms including, but not limited to, retirement platforms. Class R Shares pay up to 0.50% of net assets to financial intermediaries for the provision of distribution services and, to a certain extent, shareholder services and up to 0.25% of net assets for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to or on behalf of the plan or plan participants.

Class T Shares are available through certain financial intermediary platforms including, but not limited to, mutual fund wrap fee programs, managed account programs, asset allocation programs, bank trust platforms, as well as certain retirement platforms. In addition, Class T Shares may be available through certain financial intermediaries who have an agreement with Janus Capital or its affiliates to offer the Shares on their supermarket platforms. Class T Shares pay up to 0.25% of net assets to financial intermediaries for the provision of administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided to shareholders.

The Shares are not offered directly to individual investors. Consult with your financial intermediary representative for additional information on whether the Shares are an appropriate investment choice. Certain funds may not be available through certain of these intermediaries and not all financial intermediaries offer all classes of shares. **If your financial intermediary offers more than one class of shares, you should carefully consider which class of shares to purchase. Certain classes have higher expenses than other classes, which may lower the return on your investment. For instructions on how to purchase, exchange, or redeem Shares, contact your financial intermediary or refer to your plan documents. For Class I Shares held directly with Janus, please contact a Janus representative at 1-800-333-1181.**

With certain limited exceptions, the Funds are available only to U.S. citizens or residents, and employees of Janus Capital or its affiliates.

PRICING OF FUND SHARES

The per share NAV for each class is computed by dividing the total value of assets allocated to the class, less liabilities allocated to that class, by the total number of outstanding shares of the class. A Fund's NAV is calculated as of the close of the regular trading session of the New York Stock Exchange ("NYSE") (normally 4:00 p.m. New York time) each day that the NYSE is open ("business day"). However, the NAV may be calculated earlier if trading on the NYSE is restricted, or as permitted by the Securities and Exchange Commission ("SEC"). Foreign securities held by a Fund may be traded on days and at times when the NYSE is closed and the NAV is therefore not calculated. Accordingly, the value of a Fund's holdings may change on days that are not business days in the United States and on which you will not be able to purchase or redeem a Fund's Shares.

The price you pay for purchases of Shares is the public offering price, which is the NAV next determined after your request is received in good order by a Fund or its agents, plus, for Class A Shares, any applicable initial sales charge. The price you pay to sell Shares is also the NAV, although for Class A Shares and Class C Shares, a contingent deferred sales charge may be taken out of the proceeds. Your financial intermediary may charge you a separate or additional fee for processing purchases and redemptions of Shares. In order to receive a day's price, your order must be received in good order by a Fund or its agents by the close of the regular trading session of the NYSE.

Securities held by the Funds are generally valued at market value. Certain short-term instruments maturing within 60 days or less are valued at amortized cost, which approximates market value. If a market quotation for a security is not readily available or is deemed unreliable, or if an event that is expected to affect the value of the security occurs after the close of the principal exchange or market on which the security is traded, and before the close of the NYSE, a fair value of the security (except for short-term instruments maturing within 60 days or less) will be determined in good faith under policies and procedures established by and under the supervision of the Funds' Trustees. Such events include, but are not limited to: (i) a significant event that may affect the securities of a single issuer, such as a merger, bankruptcy, or significant issuer-specific development; (ii) an event that may affect an entire market, such as a natural disaster or significant governmental action; (iii) a non-significant event such as a market closing early or not opening, or a security trading halt; and (iv) pricing of a non-valued security and a restricted or non-public security. While fair value pricing may be more commonly used with foreign equity securities, it may also be used with, among other things, thinly-traded domestic securities or fixed-income securities. For valuation purposes, quotations of foreign portfolio securities, other assets and liabilities, and forward contracts stated in foreign currency are generally translated into U.S. dollar equivalents at the prevailing market rates. The Funds may use systematic fair valuation models provided by independent pricing services to value foreign equity securities in order to adjust for stale pricing, which may occur between the close of certain foreign exchanges and the close of the NYSE.

Due to the subjective nature of fair value pricing, a Fund's value for a particular security may be different from the last quoted market price. Fair value pricing may reduce arbitrage activity involving the frequent buying and selling of mutual fund shares by investors seeking to take advantage of a perceived lag between a change in the value of a Fund's portfolio securities and the reflection of such change in that Fund's NAV, as further described in the "Excessive Trading" section of this Prospectus. While funds that invest in foreign securities may be at a greater risk for arbitrage activity, such activity may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that a Fund's valuation of a security is different from the security's market value, short-term arbitrage traders buying and/or selling shares of a Fund may dilute the NAV of that Fund, which negatively impacts long-term shareholders. The Funds' fair value pricing and excessive trading policies and procedures may not completely eliminate short-term trading in certain omnibus accounts and other accounts traded through intermediaries.

The value of the securities of other open-end funds held by a Fund, if any, will be calculated using the NAV of such open-end funds, and the prospectuses for such open-end funds explain the circumstances under which they use fair value pricing and the effects of using fair value pricing.

All purchases, exchanges, redemptions, or other account activity must be processed through your financial intermediary or plan sponsor. Your financial intermediary or plan sponsor is responsible for promptly transmitting purchase, redemption, and

other requests to the Funds under the arrangements made between your financial intermediary or plan sponsor and its customers. The Funds are not responsible for the failure of any financial intermediary or plan sponsor to carry out its obligations to its customers.

CHOOSING A SHARE CLASS

Class A Shares, Class C Shares, Class S Shares, Class I Shares, Class N Shares, Class R Shares, and Class T Shares are offered by this Prospectus. The Funds offer multiple classes of shares in order to meet the needs of various types of investors. For more information about these classes of Shares and whether or not you are eligible to purchase these Shares, please call 1-877-335-2687.

Each class represents an interest in the same portfolio of investments, but has different charges and expenses, allowing you to choose the class that best meets your needs. For an analysis of fees associated with an investment in each share class or other similar funds, please visit www.finra.org/fundanalyzer. When choosing a share class, you should consider:

- how much you plan to invest;
- how long you expect to own the shares;
- the expenses paid by each class; and
- for Class A Shares and Class C Shares, whether you qualify for any reduction or waiver of any sales charges.

You should also consult your financial intermediary about which class is most suitable for you. In addition, you should consider the factors below with respect to each class of Shares:

Class A Shares	
Initial sales charge on purchases	Up to 5.75%(1)
reduction of initial sales charge for purchases of \$50,000 or more	
initial sales charge waived for purchases of \$1 million or more	
Deferred sales charge (CDSC)	None except on certain redemptions of Shares purchased without an initial sales charge(1)
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.25% annual distribution/service fee
Class C Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	1.00% on Shares redeemed within 12 months of purchase(1)
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	\$2,500
Maximum purchase	\$500,000
Minimum aggregate account balance	None
12b-1 fee	1.00% annual fee (up to 0.75% distribution fee and up to 0.25% shareholder servicing fee)

Class S Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.25% annual distribution/service fee
Class I Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative fees	Pays administrative, networking or omnibus fees to certain intermediaries, and out-of-pocket costs to Janus Services
Minimum initial investment	
institutional investors (investing directly with Janus)	\$1,000,000
through an intermediary institution	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None
Class N Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative fees	Pays administrative fees to Janus Capital or Janus Services
Minimum initial investment	None
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None
Class R Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500 (None for defined contribution plans)
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	0.50% annual distribution/service fee
Class T Shares	
Initial sales charge on purchases	None
Deferred sales charge (CDSC)	None
Administrative services fees	0.25%
Minimum initial investment	\$2,500
Maximum purchase	None
Minimum aggregate account balance	None
12b-1 fee	None

(1) May be waived under certain circumstances.

DISTRIBUTION, SERVICING, AND ADMINISTRATIVE FEES

Distribution and Shareholder Servicing Plans

Under separate distribution and shareholder servicing plans adopted in accordance with Rule 12b-1 under the Investment Company Act of 1940, as amended, for Class A Shares, Class S Shares, and Class R Shares (each a “Plan”) and Class C Shares (the “Class C Plan”), each Fund pays Janus Distributors, the Trust’s distributor, a fee for the sale and distribution and/or shareholder servicing of the Shares based on the average daily net assets of each, at the following annual rates:

Class	12b-1 Fee for the Funds
Class A Shares	0.25%
Class C Shares	1.00% ⁽¹⁾
Class S Shares	0.25%
Class R Shares	0.50%

(1) Up to 0.75% of this fee is for distribution services and up to 0.25% of this fee is for shareholder services.

Under the terms of each Plan, the Trust is authorized to make payments to Janus Distributors for remittance to retirement plan service providers, broker-dealers, bank trust departments, financial advisors, and other financial intermediaries, as compensation for distribution and/or shareholder services performed by such entities for their customers who are investors in the Funds.

Janus Distributors is entitled to retain all fees paid under the Class C Plan for the first 12 months on any investment in Class C Shares to recoup its expenses with respect to the payment of commissions on sales of Class C Shares. Financial intermediaries will become eligible for compensation under the Class C Plan beginning in the 13th month following the purchase of Class C Shares, although Janus Distributors may, pursuant to a written agreement between Janus Distributors and a particular financial intermediary, pay such financial intermediary 12b-1 fees prior to the 13th month following the purchase of Class C Shares.

Financial intermediaries may from time to time be required to meet certain criteria in order to receive 12b-1 fees. Janus Distributors is entitled to retain some or all fees payable under each Plan in certain circumstances, including when there is no broker of record or when certain qualification standards have not been met by the broker of record.

Because 12b-1 fees are paid out of a Fund’s assets on an ongoing basis, over time they will increase the cost of your investment and may cost you more than paying other types of sales charges.

Administrative Fees

Class A Shares, Class C Shares, and Class I Shares

Certain, but not all, intermediaries may charge fees for administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided by intermediaries on behalf of shareholders of the Funds. Order processing includes the submission of transactions through the National Securities Clearing Corporation (“NSCC”) or similar systems, or those processed on a manual basis with Janus. Other shareholder services may include the provision of order confirmations, periodic account statements, forwarding prospectuses, shareholder reports, and other materials to existing customers, and answering inquiries regarding accounts. Janus Services remits these administrative fees to intermediaries on behalf of the Funds. Janus Services is then reimbursed by the Funds for such payments. Because the form and amount charged varies by intermediary, the amount of the administrative fee borne by the class is an average of all fees charged by intermediaries. In the event an intermediary receiving payments from Janus Services on behalf of the Funds converts from a networking structure to an omnibus account structure, or otherwise experiences increased costs, fees borne by the Shares may increase. The Funds’ Trustees have set limits on fees that the Funds may incur with respect to administrative fees paid for omnibus or networked accounts. Such limits are subject to change by the Trustees in the future. Janus Services also seeks reimbursement for costs it incurs as transfer agent and for providing servicing.

Class S Shares, Class R Shares, and Class T Shares

Janus Services receives an administrative services fee at an annual rate of 0.25% of the average daily net assets of Class S Shares, Class R Shares, and Class T Shares of each Fund for providing, or arranging for the provision by intermediaries of, administrative services, including recordkeeping, subaccounting, order processing for omnibus or networked accounts, or other shareholder services provided on behalf of shareholders of the Funds. Order processing includes the submission of

transactions through the NSCC or similar systems, or those processed on a manual basis with Janus. Other shareholder services may include the provision of order confirmations, periodic account statements, forwarding prospectuses, shareholder reports, and other materials to existing customers, and answering inquiries regarding accounts. Janus Services expects to use all or a significant portion of this fee to compensate intermediaries and retirement plan service providers for providing these services to their customers who invest in the Funds. Janus Services or its affiliates may also pay fees for services provided by intermediaries to the extent the fees charged by intermediaries exceed the 0.25% of net assets charged to the Funds.

PAYMENTS TO FINANCIAL INTERMEDIARIES BY JANUS CAPITAL OR ITS AFFILIATES

From their own assets, Janus Capital or its affiliates may pay selected brokerage firms or other financial intermediaries that sell Class A and Class C Shares of the Janus funds for distribution, marketing, promotional, or related services. Such payments may be based on gross sales, assets under management, or transactional charges, or on a combination of these factors. The amount of these payments is determined from time to time by Janus Capital, may be substantial, and may differ for different financial intermediaries. Payments based primarily on sales create an incentive to make new sales of shares, while payments based on assets create an incentive to retain previously sold shares. Sales- and asset-based payments currently range up to 25 basis points on sales and up to 20 basis points on average annual net assets of shares held through the intermediary and are subject to change. Payments based on transactional charges may include the payment or reimbursement of all or a portion of “ticket charges.” Ticket charges are fees charged to salespersons purchasing through a financial intermediary firm in connection with mutual fund purchases, redemptions, or exchanges. The payment or reimbursement of ticket charges creates an incentive for salespersons of an intermediary to sell shares of Janus funds over shares of funds for which there is lesser or no payment or reimbursement of any applicable ticket charge. Janus Capital and its affiliates consider a number of factors in making payments to financial intermediaries, including the distribution capabilities of the intermediary, the overall quality of the relationship, expected gross and/or net sales generated by the relationship, redemption and retention rates of assets held through the intermediary, the willingness of the intermediary to cooperate with Janus Capital’s marketing efforts, access to sales personnel, and the anticipated profitability of sales through the institutional relationship. These factors may change from time to time. Currently, these payments are limited to the top 100 distributors (measured by sales or expected sales of shares of the Janus funds). Broker-dealer firms currently receiving or expected to receive these fees are listed in the SAI.

In addition, for all share classes, Janus Capital, Janus Distributors, or their affiliates may pay fees, from their own assets, to brokerage firms, banks, financial advisors, retirement plan service providers, and other financial intermediaries for providing other marketing or distribution-related services, as well as recordkeeping, subaccounting, transaction processing, and other shareholder or administrative services (including payments for processing transactions via NSCC or other means) in connection with investments in the Janus funds. These fees are in addition to any fees that may be paid by the Janus funds for these types of services or other services.

Janus Capital or its affiliates may also share certain marketing expenses with intermediaries, or pay for or sponsor informational meetings, seminars, client awareness events, support for marketing materials, sales reporting, or business building programs for such intermediaries to raise awareness of the Funds. Janus Capital or its affiliates may make payments to participate in intermediary marketing support programs which may provide Janus Capital or its affiliates with one or more of the following benefits: attendance at sales conferences, participation in meetings or training sessions, access to or information about intermediary personnel, use of an intermediary’s marketing and communication infrastructure, fund analysis tools, business planning and strategy sessions with intermediary personnel, information on industry- or platform-specific developments, trends and service providers, and other marketing-related services. Such payments may be in addition to, or in lieu of, the payments described above. These payments are intended to promote the sales of Janus funds and to reimburse financial intermediaries, directly or indirectly, for the costs that they or their salespersons incur in connection with educational seminars, meetings, and training efforts about the Janus funds to enable the intermediaries and their salespersons to make suitable recommendations, provide useful services, and maintain the necessary infrastructure to make the Janus funds available to their customers.

The receipt of (or prospect of receiving) payments, reimbursements and other forms of compensation described above may provide a financial intermediary and its salespersons with an incentive to favor sales of Janus funds’ shares over sales of other mutual funds (or non-mutual fund investments) or to favor sales of one class of Janus funds’ shares over sales of another Janus funds’ share class, with respect to which the financial intermediary does not receive such payments or receives them in a lower amount. The receipt of these payments may cause certain financial intermediaries to elevate the prominence of the

Janus funds within such financial intermediary's organization by, for example, placement on a list of preferred or recommended funds and/or the provision of preferential or enhanced opportunities to promote the Janus funds in various ways within such financial intermediary's organization.

From time to time, certain financial intermediaries approach Janus Capital to request that Janus Capital make contributions to certain charitable organizations. In these cases, Janus Capital's contribution may result in the financial intermediary, or its salespersons, recommending Janus funds over other mutual funds (or non-mutual fund investments).

The payment arrangements described above will not change the price an investor pays for Shares nor the amount that a Janus fund receives to invest on behalf of the investor. You should consider whether such arrangements exist when evaluating any recommendations from an intermediary to purchase or sell Shares of the Funds and, if applicable, when considering which share class of a Fund is most appropriate for you. Please contact your financial intermediary or plan sponsor for details on such arrangements.

PURCHASES

With the exception of Class I Shares, purchases of Shares may generally be made only through institutional channels such as financial intermediaries and retirement platforms. Class I Shares may be purchased directly with the Funds in certain circumstances as described in the "Minimum Investment Requirements" section. Contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with Janus, or refer to your plan documents for information on how to invest in each Fund, including additional information on minimum initial or subsequent investment requirements. Under certain circumstances, a Fund may permit an in-kind purchase of Shares at the discretion of Janus Capital. Your financial intermediary may charge you a separate or additional fee for processing purchases of Shares. Only certain financial intermediaries are authorized to receive purchase orders on the Funds' behalf. As discussed under "Payments to financial intermediaries by Janus Capital or its affiliates," Janus Capital and its affiliates may make payments to brokerage firms or other financial intermediaries that were instrumental in the acquisition or retention of shareholders for the Funds or that provide services in connection with investments in the Funds. You should consider such arrangements when evaluating any recommendation of the Funds.

Each Fund reserves the right to reject any purchase order, including exchange purchases, for any reason. The Funds are not intended for excessive trading. For more information about the Funds' policy on excessive trading, refer to "Excessive Trading."

In compliance with the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"), your financial intermediary is required to verify certain information on your account application as part of its Anti-Money Laundering Program. You will be required to provide your full name, date of birth, social security number, and permanent street address to assist in verifying your identity. You may also be asked to provide documents that may help to establish your identity. Until verification of your identity is made, your financial intermediary may temporarily limit additional share purchases. In addition, your financial intermediary may close an account if they are unable to verify a shareholder's identity. Please contact your financial intermediary if you need additional assistance when completing your application or additional information about the intermediary's Anti-Money Laundering Program.

In an effort to ensure compliance with this law, Janus' Anti-Money Laundering Program (the "Program") provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Minimum Investment Requirements

Class A Shares, Class C Shares, Class S Shares, and Class T Shares

The minimum investment is \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts. Investors in a defined contribution plan through a third party administrator should refer to their plan document or contact their plan administrator for additional information. In addition, accounts held through certain wrap programs may not be subject to these minimums. Investors should refer to their intermediary for additional information.

The maximum purchase in Class C Shares is \$500,000 for any single purchase. The sales charge and expense structure of Class A Shares may be more advantageous for investors purchasing more than \$500,000 of Fund shares.

Class I Shares

The minimum investment is \$1 million for institutional investors investing directly with Janus. Institutional investors generally may meet the minimum investment amount by aggregating multiple accounts within the same Fund. Accounts offered through an intermediary institution must meet the minimum investment requirements of \$2,500 per Fund account for non-retirement accounts and \$500 per Fund account for certain tax-deferred accounts or UGMA/UTMA accounts. Directors, officers, and employees of Janus Capital Group Inc. ("JCGI") and its affiliates, as well as Trustees and officers of the Funds, may purchase Class I Shares through certain financial intermediaries' institutional platforms. For more information about this program and eligibility requirements, please contact a Janus representative at 1-800-333-1181. Exceptions to these minimums may apply for certain tax-deferred, tax-qualified and retirement plans, and accounts held through certain wrap programs. For additional information, contact your intermediary, plan sponsor, administrator, or a Janus representative, as applicable.

Class N Shares

Investors in a retirement plan through a third party administrator should refer to their plan documents or contact their plan administrator for information regarding account minimums.

Class R Shares

Investors in a defined contribution plan through a third party administrator should refer to their plan document or contact their plan administrator for information regarding account minimums. For all other account types, the minimum investment is \$2,500.

Class A Shares, Class C Shares, Class S Shares, Class I Shares, and Class T Shares

Each Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. If you hold Class I Shares directly with a Fund, you may receive written notice prior to the closure of your Fund account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of a redemption.

Each Fund reserves the right to change the amount of these minimums or maximums from time to time or to waive them in whole or in part.

Systematic Purchase Plan

You may arrange for periodic purchases by authorizing your financial intermediary (or a Janus representative, if you hold Class I Shares directly with a Fund) to withdraw the amount of your investment from your bank account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary or a Janus representative for details.

Initial Sales Charge**Class A Shares**

An initial sales charge may apply to your purchase of Class A Shares of the Funds based on the amount invested, as set forth in the table below. The sales charge is allocated between Janus Distributors and your financial intermediary. Sales charges, as expressed as a percentage of offering price and as a percentage of your net investment, are shown in the table. The dollar amount of your initial sales charge is calculated as the difference between the public offering price and the net asset value of those shares. Since the offering price is calculated to two decimal places using standard rounding criteria, the number of shares purchased and the dollar amount of your sales charge as a percentage of the offering price and of your net investment may be higher or lower than the amounts set forth in the table depending on whether there was a downward or upward rounding.

Amount of Purchase at Offering Price	Class A Shares Sales Charge as a Percentage of Offering Price(1)	Class A Shares Sales Charge as a Percentage of Net Amount Invested
Under \$50,000	5.75 %	6.10 %
\$50,000 but under \$100,000	4.50 %	4.71 %
\$100,000 but under \$250,000	3.50 %	3.63 %
\$250,000 but under \$500,000	2.50 %	2.56 %
\$500,000 but under \$1,000,000	2.00 %	2.04 %
\$1,000,000 and above	None(2)	None

(1) Offering Price includes the initial sales charge.

(2) A contingent deferred sales charge of 1.00% may apply to Class A Shares purchased without an initial sales charge if redeemed within 12 months of purchase.

For purchases of Class A Shares of \$1,000,000 or greater, from its own assets, Janus Distributors may pay financial intermediaries commissions as follows:

- 1.00% on amounts from \$1,000,000 to \$4,000,000;
- plus 0.50% on amounts greater than \$4,000,000 to \$10,000,000;
- plus 0.25% on amounts over \$10,000,000.

The purchase totals eligible for these commissions are aggregated on a rolling one year basis so that the rate payable resets to the highest rate annually.

Qualifying for a Reduction or Waiver of Class A Shares Sales Charge

You may be able to lower your Class A Shares sales charge under certain circumstances. For example, you can combine Class A Shares and Class C Shares you already own (either in these Funds or certain other Janus funds) with your current purchase of Class A Shares of the Funds and certain other Janus funds (including Class C Shares of those funds) to take advantage of the breakpoints in the sales charge schedule as set forth above. Certain circumstances under which you may combine such ownership of Shares and purchases are described below. Contact your financial intermediary for more information.

Class A Shares of the Funds may be purchased without an initial sales charge by the following persons (and their spouses and children under 21 years of age): (i) registered representatives and other employees of intermediaries that have selling agreements with Janus Distributors to sell Class A Shares; (ii) directors, officers, and employees of JCGI and its affiliates; and (iii) Trustees and officers of the Trust. In addition, the initial sales charge may be waived on purchases of Class A Shares through financial intermediaries that have entered into an agreement with Janus Distributors that allows the waiver of the sales charge.

In order to obtain a sales charge discount, you should inform your financial intermediary of other accounts in which there are Fund holdings eligible to be aggregated to meet a sales charge breakpoint. These other accounts may include the accounts described under “Aggregating Accounts.” You may need to provide documents such as account statements or confirmation statements to prove that the accounts are eligible for aggregation. The Letter of Intent described below requires historical cost information in certain circumstances. You should retain records necessary to show the price you paid to purchase Fund shares, as the Funds, their agents, or your financial intermediary may not retain this information.

Right of Accumulation. You may purchase Class A Shares of a Fund at a reduced sales charge determined by aggregating the dollar amount of the new purchase (measured by the offering price) and the total prior day’s net asset value (net amount invested) of all Class A Shares of the Fund and of certain other classes (Class A Shares and Class C Shares of the Trust) of Janus funds then held by you, or held in accounts identified under “Aggregating Accounts,” and applying the sales charge applicable to such aggregate amount. In order for your purchases and holdings to be aggregated for purposes of qualifying for such discount, they must have been made through one financial intermediary and you must provide sufficient information to your financial intermediary at the time of purchase to permit verification that the purchase qualifies for the reduced sales charge. The right of accumulation is subject to modification or discontinuance at any time with respect to all shares purchased thereafter.

Letter of Intent. You may obtain a reduced sales charge on Class A Shares by signing a Letter of Intent indicating your intention to purchase \$50,000 or more of Class A Shares (including Class A Shares in other series of the Trust) over a 13-month period. The term of the Letter of Intent will commence upon the date you sign the Letter of Intent. You must refer to such Letter when placing orders. With regard to a Letter of Intent, the amount of investment for purposes of applying the sales load schedule includes (i) the historical cost (what you actually paid for the shares at the time of purchase, including any sales charges) of all Class A Shares acquired during the term of the Letter of Intent, minus (ii) the value of any redemptions of Class A Shares made during the term of the Letter of Intent. Each investment made during the period receives the reduced sales charge applicable to the total amount of the investment goal. A portion of shares purchased may be held in escrow to pay for any sales charge that may be applicable. If the goal is not achieved within the period, you must pay the difference between the sales charges applicable to the purchases made and the charges previously paid, or an appropriate number of escrowed shares will be redeemed. Please contact your financial intermediary to obtain a Letter of Intent application.

Aggregating Accounts. To take advantage of lower Class A Shares sales charges on large purchases or through the exercise of a Letter of Intent or right of accumulation, investments made by you, your spouse, and your children under age 21 may be aggregated if made for your own account(s) and/or certain other accounts such as:

trust accounts established by the above individuals (or the accounts of the primary beneficiary of the trust if the person who established the trust is deceased);

solely controlled business accounts; and

single participant retirement plans.

To receive a reduced sales charge under rights of accumulation or a Letter of Intent, you must notify your financial intermediary of any eligible accounts that you, your spouse, and your children under age 21 have at the time of your purchase.

You may access information regarding sales loads, breakpoint discounts, and purchases of the Funds' shares, free of charge, and in a clear and prominent format, on our website at janus.com/breakpoints, and by following the appropriate hyperlinks to the specific information.

Commission on Class C Shares

Janus Distributors may compensate your financial intermediary at the time of sale at a commission rate of 1.00% of the net asset value of the Class C Shares purchased. Service providers to qualified plans or other financial intermediaries will not receive this amount if they receive 12b-1 fees from the time of initial investment of assets in Class C Shares.

EXCHANGES

Contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with a Fund, or consult your plan documents to exchange into other funds in the Trust. Be sure to read the prospectus of the fund into which you are exchanging. An exchange from one fund to another is generally a taxable transaction (except for certain tax-deferred accounts).

You may generally exchange Shares of a Fund for Shares of the same class of any other fund in the Trust offered through your financial intermediary or qualified plan.

You may also exchange shares of one class for another class of shares within the same fund, provided the eligibility requirements of the class of shares to be received are met. Same-fund exchanges will only be processed in instances where there is no contingent deferred sales charge ("CDSC") on the shares to be exchanged and no initial sales charge on the shares to be received. A Fund's fees and expenses differ between share classes. Please read the Prospectus for the share class you are interested in prior to investing in that share class. Contact your financial intermediary or consult your plan documents for additional information.

You must meet the minimum investment amount for each fund.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. A Fund may suspend or terminate your exchange privilege if you make more than one round trip in the Fund in a 90-day period and may bar future purchases in the Fund or any of the other Janus funds. The Funds will work with intermediaries to apply the Funds'

exchange limits. However, the Funds may not always have the ability to monitor or enforce the trading activity in such accounts. For more information about the Funds' policy on excessive trading, refer to "Excessive Trading."

Each Fund reserves the right to reject any exchange request and to modify or terminate the exchange privilege at any time.

Waiver of Sales Charges

Class A Shares received through an exchange of Class A Shares of another fund of the Trust will not be subject to any initial sales charge of the Funds' Class A Shares. Class A Shares or Class C Shares received through an exchange of Class A Shares or Class C Shares, respectively, of another fund of the Trust will not be subject to any applicable CDSC at the time of the exchange. Any CDSC applicable to redemptions of Class A Shares or Class C Shares will continue to be measured on the Shares received by exchange from the date of your original purchase. For more information about the CDSC, please refer to "Redemptions." While Class C Shares do not have any front-end sales charges, their higher annual fund operating expenses mean that over time, you could end up paying more than the equivalent of the maximum allowable front-end sales charge.

REDEMPTIONS

Redemptions, like purchases, may generally be effected only through financial intermediaries, retirement platforms, and by certain direct institutional investors holding Class I Shares. Please contact your financial intermediary, a Janus representative (1-800-333-1181) if you hold Class I Shares directly with a Fund, or refer to the appropriate plan documents for details. Your financial intermediary may charge a processing or service fee in connection with the redemption of Shares.

Shares of each Fund may be redeemed on any business day on which the Fund's NAV is calculated. Redemptions are duly processed at the NAV next calculated after your redemption order is received in good order by a Fund or its agents. Redemption proceeds, less any applicable CDSC for Class A Shares or Class C Shares, will normally be sent the business day following receipt of the redemption order.

Each Fund reserves the right to postpone payment of redemption proceeds for up to seven calendar days. Additionally, the right to require the Funds to redeem their Shares may be suspended, or the date of payment may be postponed beyond seven calendar days, whenever: (i) trading on the NYSE is restricted, as determined by the SEC, or the NYSE is closed (except for holidays and weekends); (ii) the SEC permits such suspension and so orders; or (iii) an emergency exists as determined by the SEC so that disposal of securities or determination of NAV is not reasonably practicable.

Each Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$100, other than as a result solely of depreciation in share value. Certain accounts held through intermediaries may not be subject to closure due to the policies of the intermediaries. You may receive written notice from your intermediary to increase your account balance to the required minimum to avoid having your account closed. If you hold Class I Shares directly with a Fund, you may receive written notice prior to the closure of your Fund account so that you may increase your account balance to the required minimum. Please note that you may incur a tax liability as a result of a redemption.

Large Shareholder Redemptions

Certain accounts or Janus affiliates may from time to time own (beneficially or of record) or control a significant percentage of a Fund's Shares. Redemptions by these accounts of their holdings in a Fund may impact the Fund's liquidity and NAV. These redemptions may also force a Fund to sell securities, which may negatively impact the Fund's brokerage costs.

Redemptions In-Kind

Shares normally will be redeemed for cash, although each Fund retains the right to redeem some or all of its shares in-kind under unusual circumstances, in order to protect the interests of remaining shareholders, to accommodate a request by a particular shareholder that does not adversely affect the interests of the remaining shareholders, or in connection with the liquidation of a fund, by delivery of securities selected from its assets at its discretion. However, each Fund is required to redeem shares solely for cash up to the lesser of \$250,000 or 1% of the NAV of that Fund during any 90-day period for any one shareholder. Should redemptions by any shareholder exceed such limitation, a Fund will have the option of redeeming the excess in cash or in-kind. In-kind payment means payment will be made in portfolio securities rather than cash. If this occurs, the redeeming shareholder might incur brokerage or other transaction costs to convert the securities to cash, whereas such costs are borne by the Fund for cash redemptions.

While a Fund may pay redemptions in-kind, a Fund may instead choose to raise cash to meet redemption requests through the sale of fund securities or permissible borrowings. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and may increase brokerage costs.

Systematic Withdrawal Plan

Class A Shares and Class C Shares

You may arrange for periodic redemptions of Class A Shares or Class C Shares by authorizing your financial intermediary to redeem a specified amount from your account on a day or days you specify. Any resulting CDSC may be waived through financial intermediaries that have entered into an agreement with Janus Distributors. The maximum annual rate at which shares subject to a CDSC may be redeemed, pursuant to a systematic withdrawal plan, without paying a CDSC, is 12% of the net asset value of the account. Certain other terms and minimums may apply. Not all financial intermediaries offer this plan. Contact your financial intermediary for details.

Class S Shares, Class I Shares, Class N Shares, Class R Shares, and Class T Shares

You may arrange for periodic redemptions by authorizing your financial intermediary (or a Janus representative, if you hold Class I Shares directly with a Fund) to redeem a specified amount from your account on a day or days you specify. Not all financial intermediaries offer this plan. Contact your financial intermediary or a Janus representative for details.

Contingent Deferred Sales Charge

Class A Shares and Class C Shares

A 1.00% CDSC may be deducted with respect to Class A Shares purchased without an initial sales charge if redeemed within 12 months of purchase, unless any of the CDSC waivers listed apply. A 1.00% CDSC will be deducted with respect to Class C Shares redeemed within 12 months of purchase, unless a CDSC waiver applies. The CDSC will be based on the lower of the original purchase price or the value of the redemption of the Class A Shares or Class C Shares redeemed, as applicable.

CDSC Waivers

There are certain cases in which you may be exempt from a CDSC charged to Class A Shares and Class C Shares. Among others, these include:

Upon the death or disability of an account owner;

Retirement plans and certain other accounts held through a financial intermediary that has entered into an agreement with Janus Distributors to waive CDSCs for such accounts;

Retirement plan shareholders taking required minimum distributions;

The redemption of Class A Shares or Class C Shares acquired through reinvestment of Fund dividends or distributions;

The portion of the redemption representing appreciation as a result of an increase in NAV above the total amount of payments for Class A Shares or Class C Shares during the period during which the CDSC applied; or

If a Fund chooses to liquidate or involuntarily redeem shares in your account.

To keep the CDSC as low as possible, Class A Shares or Class C Shares not subject to any CDSC will be redeemed first, followed by shares held longest.

Reinstatement Privilege

After you have redeemed Class A Shares, you have a one-time right to reinvest the proceeds into Class A Shares of the same or another fund within 90 days of the redemption date at the current NAV (without an initial sales charge). You will not be reimbursed for any CDSC paid on your redemption of Class A Shares.

EXCESSIVE TRADING

Excessive Trading Policies and Procedures

The Trustees have adopted policies and procedures with respect to short-term and excessive trading of Fund shares ("excessive trading"). Each Fund is intended for long-term investment purposes only, and the Funds will take reasonable steps to attempt to detect and deter short-term and excessive trading. Transactions placed in violation of the Funds' exchange limits or excessive trading policies may be cancelled or revoked by a Fund by the next business day following receipt by the

Fund. The trading history of accounts determined to be under common ownership or control within any of the Janus funds may be considered in enforcing these policies and procedures. As described below, however, the Funds may not be able to identify all instances of excessive trading or completely eliminate the possibility of excessive trading. In particular, it may be difficult to identify excessive trading in certain omnibus accounts and other accounts traded through intermediaries. By their nature, omnibus accounts, in which purchases and redemptions of the Funds' shares by multiple investors are aggregated by the intermediary and presented to the Funds on a net basis, may effectively conceal the identity of individual investors and their transactions from the Funds and their agents. This makes the elimination of excessive trading in the accounts impractical without the assistance of the intermediary.

The Funds attempt to deter excessive trading through at least the following methods:

- exchange limitations as described under "Exchanges;"
- trade monitoring; and
- fair valuation of securities as described under "Pricing of Fund Shares."

Generally, a purchase and redemption of Shares from the same Fund (i.e., "round trip") within 90 calendar days may result in enforcement of a Fund's excessive trading policies and procedures with respect to future purchase orders, provided that each Fund reserves the right to reject any purchase request as explained above.

The Funds monitor for patterns of shareholder frequent trading and may suspend or permanently terminate the exchange privilege of any investor who makes more than one round trip in a Fund over a 90-day period, and may bar future purchases into the Fund and any of the other Janus funds by such investor. The Funds' excessive trading policies generally do not apply to (i) a money market fund, although money market funds at all times reserve the right to reject any purchase request (including exchange purchases) for any reason without prior notice; (ii) transactions in the Janus funds by a Janus "fund of funds," which is a fund that primarily invests in other Janus mutual funds; and (iii) identifiable transactions by certain funds of funds and asset allocation programs to realign portfolio investments with existing target allocations.

The Funds' Trustees may approve from time to time a redemption fee to be imposed by any Janus fund, subject to 60 days' notice to shareholders of that fund.

Investors who place transactions through the same financial intermediary on an omnibus basis may be deemed part of a group for the purpose of the Funds' excessive trading policies and procedures and may be rejected in whole or in part by a Fund. The Funds, however, cannot always identify or reasonably detect excessive trading that may be facilitated by financial intermediaries or made difficult to identify through the use of omnibus accounts by those intermediaries that transmit purchase, exchange, and redemption orders to the Funds, and thus the Funds may have difficulty curtailing such activity. Transactions accepted by a financial intermediary in violation of the Funds' excessive trading policies may be cancelled or revoked by a Fund by the next business day following receipt by that Fund.

In an attempt to detect and deter excessive trading in omnibus accounts, the Funds or their agents may require intermediaries to impose restrictions on the trading activity of accounts traded through those intermediaries. Such restrictions may include, but are not limited to, requiring that trades be placed by U.S. mail, prohibiting future purchases by investors who have recently redeemed Fund shares, requiring intermediaries to report information about customers who purchase and redeem large amounts, and similar restrictions. The Funds' ability to impose such restrictions with respect to accounts traded through particular intermediaries may vary depending on the systems' capabilities, applicable contractual and legal restrictions, and cooperation of those intermediaries.

Certain transactions in Fund shares, such as periodic rebalancing through intermediaries (no more frequently than every 60 days) or those which are made pursuant to systematic purchase, exchange, or redemption programs generally do not raise excessive trading concerns and normally do not require application of the Funds' methods to detect and deter excessive trading.

Each Fund also reserves the right to reject any purchase request (including exchange purchases) by any investor or group of investors for any reason without prior notice, including, in particular, if the trading activity in the account(s) is deemed to be disruptive to a Fund. For example, a Fund may refuse a purchase order if the Fund's portfolio managers and/or investment personnel believe they would be unable to invest the money effectively in accordance with the Fund's investment policies or the Fund would otherwise be adversely affected due to the size of the transaction, frequency of trading, or other factors.

The Funds' policies and procedures regarding excessive trading may be modified at any time by the Funds' Trustees.

Excessive Trading Risks

Excessive trading may present risks to a Fund's long-term shareholders. Excessive trading into and out of a Fund may disrupt portfolio investment strategies, may create taxable gains to remaining Fund shareholders, and may increase Fund expenses, all of which may negatively impact investment returns for all remaining shareholders, including long-term shareholders.

Funds that invest in foreign securities may be at a greater risk for excessive trading. Investors may attempt to take advantage of anticipated price movements in securities held by a fund based on events occurring after the close of a foreign market that may not be reflected in the fund's NAV (referred to as "price arbitrage"). Such arbitrage opportunities may also arise in funds which do not invest in foreign securities, for example, when trading in a security held by a fund is halted and does not resume prior to the time the fund calculates its NAV (referred to as "stale pricing"). Funds that hold thinly-traded securities, such as certain small-capitalization securities, may be subject to attempted use of arbitrage techniques. To the extent that a Fund's valuation of a security differs from the security's market value, short-term arbitrage traders may dilute the NAV of a Fund, which negatively impacts long-term shareholders. Although the Funds have adopted fair valuation policies and procedures intended to reduce the Funds' exposure to price arbitrage, stale pricing, and other potential pricing inefficiencies, under such circumstances there is potential for short-term arbitrage trades to dilute the value of Fund shares.

Although the Funds take steps to detect and deter excessive trading pursuant to the policies and procedures described in this Prospectus and approved by the Trustees, there is no assurance that these policies and procedures will be effective in limiting excessive trading in all circumstances. For example, the Funds may be unable to completely eliminate the possibility of excessive trading in certain omnibus accounts and other accounts traded through intermediaries. Omnibus accounts may effectively conceal the identity of individual investors and their transactions from the Funds and their agents. This makes the Funds' identification of excessive trading transactions in the Funds through an omnibus account difficult and makes the elimination of excessive trading in the account impractical without the assistance of the intermediary. Although the Funds encourage intermediaries to take necessary actions to detect and deter excessive trading, some intermediaries may be unable or unwilling to do so, and accordingly, the Funds cannot eliminate completely the possibility of excessive trading.

Shareholders that invest through an omnibus account should be aware that they may be subject to the policies and procedures of their financial intermediary with respect to excessive trading in the Funds.

AVAILABILITY OF PORTFOLIO HOLDINGS INFORMATION

The Mutual Fund Holdings Disclosure Policies and Procedures adopted by Janus Capital and all mutual funds managed within the Janus fund complex are designed to be in the best interests of the funds and to protect the confidentiality of the funds' portfolio holdings. The following describes policies and procedures with respect to disclosure of portfolio holdings.

Full Holdings. Each Fund is required to disclose its complete holdings in the quarterly holdings report on Form N-Q within 60 days of the end of the first and third fiscal quarters, and in the annual report and semiannual report to Fund shareholders. These reports (i) are available on the SEC's website at <http://www.sec.gov>; (ii) may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. (information on the Public Reference Room may be obtained by calling 1-800-SEC-0330); and (iii) are available without charge, upon request, by calling a Janus representative at 1-800-525-0020 (toll free). Portfolio holdings, consisting of at least the names of the holdings, are generally available on a calendar quarter-end basis with a 30-day lag. Holdings are generally posted approximately two business days thereafter under Full Holdings for each Fund at janus.com/info.

Each Fund may provide, upon request, historical full holdings on a monthly basis for periods prior to the previous quarter-end subject to a written confidentiality agreement.

Top Holdings. Each Fund's top portfolio holdings, in order of position size and as a percentage of a Fund's total portfolio, are available monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag.

Other Information. Each Fund may occasionally provide security breakdowns (e.g., industry, sector, regional, market capitalization, and asset allocation), top performance contributors/detractors (consisting of security names in alphabetical order), and specific portfolio level performance attribution information and statistics monthly with a 15-day lag and on a calendar quarter-end basis with a 15-day lag. Top performance contributors/detractors provided at calendar quarter-end may include the percentage of contribution/detraction to Fund performance.

Full portfolio holdings will remain available on the Janus websites at least until a Form N-CSR or Form N-Q is filed with the SEC for the period that includes the date as of which the website information is current. Funds disclose their short positions, if applicable, only to the extent required in regulatory reports. Janus Capital may exclude from publication on its websites all or any portion of portfolio holdings or change the time periods of disclosure as deemed necessary to protect the interests of the Janus funds. Under extraordinary circumstances, exceptions to the Mutual Fund Holdings Disclosure Policies and Procedures may be made by Janus Capital's Chief Investment Officer(s) or their delegates. Such exceptions may be made without prior notice to shareholders. A summary of the Funds' portfolio holdings disclosure policies and procedures, which includes a discussion of any exceptions, is contained in the Funds' SAI.

SHAREHOLDER COMMUNICATIONS

Your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with a Fund) is responsible for sending you periodic statements of all transactions, along with trade confirmations and tax reporting, as required by applicable law.

Your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with a Fund) is responsible for providing annual and semiannual reports, including the financial statements of the Funds that you have authorized for investment. These reports show each Fund's investments and the market value of such investments, as well as other information about each Fund and its operations. Please contact your financial intermediary or plan sponsor (or Janus, if you hold Class I Shares directly with a Fund) to obtain these reports. The Funds' fiscal year ends September 30.

Financial highlights

The financial highlights tables are intended to help you understand the Funds' financial performance for each fiscal period shown. Items "Net asset value, beginning of period" through "Net asset value, end of period" reflect financial results for a single Fund Share. The gross expense ratio reflects expenses prior to any expense offset arrangement and waivers (reimbursements), if applicable. The net expense ratio reflects expenses after any expense offset arrangement and waivers (reimbursements), if applicable. The information for the fiscal periods shown has been audited by PricewaterhouseCoopers LLP, whose report, along with the Funds' financial statements, is included in the Annual Report, which is available upon request, and incorporated by reference into the SAI.

The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in the Shares of the Funds (assuming reinvestment of all dividends and distributions).

Effective February 16, 2010, Class J Shares of certain Funds were renamed Class T Shares and the eligibility requirements changed so that only clients investing through a third-party intermediary may purchase Class T Shares.

Glossary of investment terms

This glossary provides a more detailed description of some of the types of securities, investment strategies, and other instruments in which the Funds may invest, as well as some general investment terms. The Funds may invest in these instruments to the extent permitted by their investment objectives and policies. The Funds are not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in this Prospectus.

EQUITY AND DEBT SECURITIES

Average-Weighted Effective Maturity is a measure of a bond's maturity. The stated maturity of a bond is the date when the issuer must repay the bond's entire principal value to an investor. Some types of bonds may also have an "effective maturity" that is shorter than the stated date due to prepayment or call provisions. Securities without prepayment or call provisions generally have an effective maturity equal to their stated maturity. Average-weighted effective maturity is calculated by averaging the effective maturity of bonds held by a Fund with each effective maturity "weighted" according to the percentage of net assets that it represents.

Bank loans include institutionally-traded floating and fixed-rate debt securities generally acquired as a participation interest in or assignment of a loan originated by a lender or financial institution. Assignments and participations involve credit, interest rate, and liquidity risk. Interest rates on floating rate securities adjust with interest rate changes and/or issuer credit quality. If a Fund purchases a participation interest, it may only be able to enforce its rights through the lender and may assume the credit risk of both the borrower and the lender. Additional risks are involved in purchasing assignments. If a loan is foreclosed, a Fund may become part owner of any collateral securing the loan and may bear the costs and liabilities associated with owning and disposing of any collateral. The Fund could be held liable as a co-lender. In addition, there is no assurance that the liquidation of any collateral from a secured loan would satisfy a borrower's obligations or that any collateral could be liquidated. A Fund may have difficulty trading assignments and participations to third parties or selling such securities in secondary markets, which in turn may affect the Fund's NAV.

Bonds are debt securities issued by a company, municipality, government, or government agency. The issuer of a bond is required to pay the holder the amount of the loan (or par value of the bond) at a specified maturity and to make scheduled interest payments.

Certificates of Participation ("COPs") are certificates representing an interest in a pool of securities. Holders are entitled to a proportionate interest in the underlying securities. Municipal lease obligations are often sold in the form of COPs. Refer to "Municipal lease obligations" below.

Commercial paper is a short-term debt obligation with a maturity ranging from 1 to 270 days issued by banks, corporations, and other borrowers to investors seeking to invest idle cash. A Fund may purchase commercial paper issued in private placements under Section 4(2) of the Securities Act of 1933, as amended (the "1933 Act").

Common stocks are equity securities representing shares of ownership in a company and usually carry voting rights and earn dividends. Unlike preferred stock, dividends on common stock are not fixed but are declared at the discretion of the issuer's board of directors.

Convertible securities are preferred stocks or bonds that pay a fixed dividend or interest payment and are convertible into common stock at a specified price or conversion ratio.

Debt securities are securities representing money borrowed that must be repaid at a later date. Such securities have specific maturities and usually a specific rate of interest or an original purchase discount.

Depository receipts are receipts for shares of a foreign-based corporation that entitle the holder to dividends and capital gains on the underlying security. Receipts include those issued by domestic banks (American Depositary Receipts), foreign banks (Global or European Depositary Receipts), and broker-dealers (depository shares).

Duration is the time it will take investors to recoup their investment in a bond. Unlike average maturity, duration reflects both principal and interest payments. Generally, the higher the coupon rate on a bond, the lower its duration will be. The duration of a bond portfolio is calculated by averaging the duration of bonds held by a Fund with each duration "weighted" according to the percentage of net assets that it represents. Because duration accounts for interest payments, a Fund's duration is usually shorter than its average maturity.

Equity securities generally include domestic and foreign common stocks; preferred stocks; securities convertible into common stocks or preferred stocks; warrants to purchase common or preferred stocks; and other securities with equity characteristics.

Exchange-traded funds (“ETFs”) are index-based investment companies which hold substantially all of their assets in securities with equity characteristics. As a shareholder of another investment company, a Fund would bear its pro rata portion of the other investment company’s expenses, including advisory fees, in addition to the expenses the Fund bears directly in connection with its own operations.

Fixed-income securities are securities that pay a specified rate of return. The term generally includes short- and long-term government, corporate, and municipal obligations that pay a specified rate of interest, dividends, or coupons for a specified period of time. Coupon and dividend rates may be fixed for the life of the issue or, in the case of adjustable and floating rate securities, for a shorter period.

High-yield/high-risk bonds are bonds that are rated below investment grade by the primary rating agencies (i.e., BB+ or lower by Standard & Poor’s and Fitch, or Ba or lower by Moody’s). Other terms commonly used to describe such bonds include “lower rated bonds,” “non-investment grade bonds,” and “junk bonds.”

Industrial development bonds are revenue bonds that are issued by a public authority but which may be backed only by the credit and security of a private issuer and may involve greater credit risk. Refer to “Municipal securities” below.

Mortgage- and asset-backed securities are shares in a pool of mortgages or other debt instruments. These securities are generally pass-through securities, which means that principal and interest payments on the underlying securities (less servicing fees) are passed through to shareholders on a pro rata basis. These securities involve prepayment risk, which is the risk that the underlying mortgages or other debt may be refinanced or paid off prior to their maturities during periods of declining interest rates. In that case, a Fund may have to reinvest the proceeds from the securities at a lower rate. Potential market gains on a security subject to prepayment risk may be more limited than potential market gains on a comparable security that is not subject to prepayment risk.

Mortgage dollar rolls are transactions in which a Fund sells a mortgage-related security, such as a security issued by Government National Mortgage Association, to a dealer and simultaneously agrees to purchase a similar security (but not the same security) in the future at a predetermined price. A “dollar roll” can be viewed as a collateralized borrowing in which a Fund pledges a mortgage-related security to a dealer to obtain cash.

Municipal lease obligations are revenue bonds backed by leases or installment purchase contracts for property or equipment. Lease obligations may not be backed by the issuing municipality’s credit and may involve risks not normally associated with general obligation bonds and other revenue bonds. For example, their interest may become taxable if the lease is assigned and the holders may incur losses if the issuer does not appropriate funds for the lease payments on an annual basis, which may result in termination of the lease and possible default.

Municipal securities are bonds or notes issued by a U.S. state or political subdivision. A municipal security may be a general obligation backed by the full faith and credit (i.e., the borrowing and taxing power) of a municipality or a revenue obligation paid out of the revenues of a designated project, facility, or revenue source.

Pass-through securities are shares or certificates of interest in a pool of debt obligations that have been repackaged by an intermediary, such as a bank or broker-dealer.

Passive foreign investment companies (“PFICs”) are any foreign corporations which generate certain amounts of passive income or hold certain amounts of assets for the production of passive income. Passive income includes dividends, interest, royalties, rents, and annuities. To avoid taxes and interest that a Fund must pay if these investments are profitable, the Fund may make various elections permitted by the tax laws. These elections could require that a Fund recognize taxable income, which in turn must be distributed, before the securities are sold and before cash is received to pay the distributions.

Pay-in-kind bonds are debt securities that normally give the issuer an option to pay cash at a coupon payment date or give the holder of the security a similar bond with the same coupon rate and a face value equal to the amount of the coupon payment that would have been made.

Preferred stocks are equity securities that generally pay dividends at a specified rate and have preference over common stock in the payment of dividends and liquidation. Preferred stock generally does not carry voting rights.

Real estate investment trust (“REIT”) is an investment trust that operates through the pooled capital of many investors who buy its shares. Investments are in direct ownership of either income property or mortgage loans.

Rule 144A securities are securities that are not registered for sale to the general public under the 1933 Act, but that may be resold to certain institutional investors.

Standby commitment is a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred, or assigned only with the underlying security or securities. A standby commitment entitles the holder to receive same day settlement, and will be considered to be from the party to whom the investment company will look for payment of the exercise price.

Step coupon bonds are high-quality issues with above-market interest rates and a coupon that increases over the life of the bond. They may pay monthly, semiannual, or annual interest payments. On the date of each coupon payment, the issuer decides whether to call the bond at par, or whether to extend it until the next payment date at the new coupon rate.

Strip bonds are debt securities that are stripped of their interest (usually by a financial intermediary) after the securities are issued. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities of comparable maturity.

Tender option bonds are relatively long-term bonds that are coupled with the option to tender the securities to a bank, broker-dealer, or other financial institution at periodic intervals and receive the face value of the bond. This investment structure is commonly used as a means of enhancing a security’s liquidity.

U.S. Government securities include direct obligations of the U.S. Government that are supported by its full faith and credit. Treasury bills have initial maturities of less than one year, Treasury notes have initial maturities of one to ten years, and Treasury bonds may be issued with any maturity but generally have maturities of at least ten years. U.S. Government securities also include indirect obligations of the U.S. Government that are issued by federal agencies and government sponsored entities. Unlike Treasury securities, agency securities generally are not backed by the full faith and credit of the U.S. Government. Some agency securities are supported by the right of the issuer to borrow from the Treasury, others are supported by the discretionary authority of the U.S. Government to purchase the agency’s obligations, and others are supported only by the credit of the sponsoring agency.

Variable and floating rate securities have variable or floating rates of interest and, under certain limited circumstances, may have varying principal amounts. Variable and floating rate securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to some interest rate index or market interest rate (the “underlying index”). The floating rate tends to decrease the security’s price sensitivity to changes in interest rates.

Warrants are securities, typically issued with preferred stock or bonds, which give the holder the right to buy a proportionate amount of common stock at a specified price. The specified price is usually higher than the market price at the time of issuance of the warrant. The right may last for a period of years or indefinitely.

Zero coupon bonds are debt securities that do not pay regular interest at regular intervals, but are issued at a discount from face value. The discount approximates the total amount of interest the security will accrue from the date of issuance to maturity. The market value of these securities generally fluctuates more in response to changes in interest rates than interest-paying securities.

FUTURES, OPTIONS, AND OTHER DERIVATIVES

Credit default swaps are a specific kind of counterparty agreement that allows the transfer of third party credit risk from one party to the other. One party in the swap is a lender and faces credit risk from a third party, and the counterparty in the credit default swap agrees to insure this risk in exchange for regular periodic payments.

Derivatives are financial instruments whose performance is derived from the performance of another asset (stock, bond, commodity, currency, interest rate or market index). Types of derivatives can include, but are not limited to options, forward contracts, swaps, and futures contracts.

Equity-linked structured notes are derivative securities which are specially designed to combine the characteristics of one or more underlying securities and their equity derivatives in a single note form. The return and/or yield or income component

may be based on the performance of the underlying equity securities, an equity index, and/or option positions. Equity-linked structured notes are typically offered in limited transactions by financial institutions in either registered or non-registered form. An investment in equity-linked notes creates exposure to the credit risk of the issuing financial institution, as well as to the market risk of the underlying securities. There is no guaranteed return of principal with these securities, and the appreciation potential of these securities may be limited by a maximum payment or call right. In certain cases, equity-linked notes may be more volatile and less liquid than less complex securities or other types of fixed-income securities. Such securities may exhibit price behavior that does not correlate with other fixed-income securities.

Equity swaps involve the exchange by two parties of future cash flow (e.g., one cash flow based on a referenced interest rate and the other based on the performance of stock or a stock index).

Forward contracts are contracts to purchase or sell a specified amount of a financial instrument for an agreed upon price at a specified time. Forward contracts are not currently exchange-traded and are typically negotiated on an individual basis. A Fund may enter into forward currency contracts for investment purposes or to hedge against declines in the value of securities denominated in, or whose value is tied to, a currency other than the U.S. dollar or to reduce the impact of currency appreciation on purchases of such securities. It may also enter into forward contracts to purchase or sell securities or other financial indices.

Futures contracts are contracts that obligate the buyer to receive and the seller to deliver an instrument or money at a specified price on a specified date. A Fund may buy and sell futures contracts on foreign currencies, securities, and financial indices including indices of U.S. Government, foreign government, equity, or fixed-income securities. A Fund may also buy options on futures contracts. An option on a futures contract gives the buyer the right, but not the obligation, to buy or sell a futures contract at a specified price on or before a specified date. Futures contracts and options on futures are standardized and traded on designated exchanges.

Indexed/structured securities are typically short- to intermediate-term debt securities whose value at maturity or interest rate is linked to currencies, interest rates, equity securities, indices, commodity prices, or other financial indicators. Such securities may be positively or negatively indexed (e.g., their value may increase or decrease if the reference index or instrument appreciates). Indexed/structured securities may have return characteristics similar to direct investments in the underlying instruments and may be more volatile than the underlying instruments. A Fund bears the market risk of an investment in the underlying instruments, as well as the credit risk of the issuer.

Interest rate swaps involve the exchange by two parties of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments).

Inverse floaters are debt instruments whose interest rate bears an inverse relationship to the interest rate on another instrument or index. For example, upon reset, the interest rate payable on the inverse floater may go down when the underlying index has risen. Certain inverse floaters may have an interest rate reset mechanism that multiplies the effects of change in the underlying index. Such mechanism may increase the volatility of the security's market value.

Options are the right, but not the obligation, to buy or sell a specified amount of securities or other assets on or before a fixed date at a predetermined price. A Fund may purchase and write put and call options on securities, securities indices, and foreign currencies. A Fund may purchase or write such options individually or in combination.

Participatory notes are derivative securities which are linked to the performance of an underlying Indian security and which allow investors to gain market exposure to Indian securities without trading directly in the local Indian market.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period.

OTHER INVESTMENTS, STRATEGIES, AND/OR TECHNIQUES

Cash sweep program is an arrangement in which a Fund's uninvested cash balance is used to purchase shares of affiliated or non-affiliated money market funds or cash management pooled investment vehicles at the end of each day.

Diversification is a classification given to a fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Funds are classified as either "diversified" or "nondiversified." To be classified as "diversified" under the 1940 Act, a fund

may not, with respect to 75% of its total assets, invest more than 5% of its total assets in any issuer and may not own more than 10% of the outstanding voting securities of an issuer. A fund that is classified as “nondiversified” under the 1940 Act, on the other hand, has the flexibility to take larger positions in a smaller number of issuers than a fund that is classified as “diversified.” However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified.

Industry concentration for purposes under the 1940 Act is the investment of 25% or more of a Fund’s total assets in an industry or group of industries.

Leverage is when a Fund increases its assets available for investment using borrowings or similar transactions. Because short sales involve borrowing securities and then selling them, a Fund’s short sales effectively leverage the Fund’s assets. The use of leverage may make any change in a Fund’s NAV even greater and thus result in increased volatility of returns. A Fund’s assets that are used as collateral to secure the short sales may decrease in value while the short positions are outstanding, which may force the Fund to use its other assets to increase the collateral. Leverage also creates interest expense that may lower a Fund’s overall returns.

Market capitalization is the most commonly used measure of the size and value of a company. It is computed by multiplying the current market price of a share of the company’s stock by the total number of its shares outstanding. Market capitalization is an important investment criterion for certain funds, while others do not emphasize investments in companies of any particular size.

Net long is a term used to describe when a Fund’s assets committed to long positions exceed those committed to short positions.

Repurchase agreements involve the purchase of a security by a Fund and a simultaneous agreement by the seller (generally a bank or dealer) to repurchase the security from the Fund at a specified date or upon demand. This technique offers a method of earning income on idle cash. These securities involve the risk that the seller will fail to repurchase the security, as agreed. In that case, a Fund will bear the risk of market value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security.

Reverse repurchase agreements involve the sale of a security by a Fund to another party (generally a bank or dealer) in return for cash and an agreement by the Fund to buy the security back at a specified price and time. This technique will be used primarily to provide cash to satisfy unusually high redemption requests, or for other temporary or emergency purposes.

Short sales in which a Fund may engage may be either “short sales against the box” or other short sales. Short sales against the box involve selling short a security that a Fund owns, or the Fund has the right to obtain the amount of the security sold short at a specified date in the future. A Fund may also enter into a short sale to hedge against anticipated declines in the market price of a security or to reduce portfolio volatility. If the value of a security sold short increases prior to the scheduled delivery date, the Fund loses the opportunity to participate in the gain. For short sales, the Fund will incur a loss if the value of a security increases during this period because it will be paying more for the security than it has received from the purchaser in the short sale. If the price declines during this period, a Fund will realize a short-term capital gain. Although a Fund’s potential for gain as a result of a short sale is limited to the price at which it sold the security short less the cost of borrowing the security, its potential for loss is theoretically unlimited because there is no limit to the cost of replacing the borrowed security.

When-issued, delayed delivery, and forward commitment transactions generally involve the purchase of a security with payment and delivery at some time in the future – i.e., beyond normal settlement. A Fund does not earn interest on such securities until settlement and bears the risk of market value fluctuations in between the purchase and settlement dates. New issues of stocks and bonds, private placements, and U.S. Government securities may be sold in this manner.

JANUS

This Prospectus describes nine portfolios (each, a “Fund” and collectively, the “Funds”) of Janus Investment Fund (the “Trust”). Janus Capital Management LLC (“Janus Capital” or “Janus”) serves as investment adviser to each Fund. Janus Asia Equity Fund is subadvised by Janus Capital Singapore Pte. Limited (“Janus Singapore”). In addition, a portion of the investment operations of Janus Emerging Markets Fund and Janus International Equity Fund is subadvised by Janus Singapore.

The Funds offer multiple classes of shares in order to meet the needs of various types of investors. Only Class D Shares (the “Shares”) are offered by this Prospectus. The Shares are generally no longer being made available to new investors who do not already have a direct account with the Janus funds. The Shares are available only to investors who hold accounts directly with the Janus funds, and to immediate family members or members of the same household of an eligible individual investor. The Shares are offered directly through the Janus funds to eligible investors by calling 1-800-525-3713 or at janus.com/individual. The Shares are not offered through financial intermediaries.

Fund summary

Janus Asia Equity Fund

Ticker: JAQDX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Asia Equity Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.91%
Other Expenses	1.85%
Total Annual Fund Operating Expenses ⁽¹⁾	2.76%
Fee Waiver ⁽¹⁾	1.25%
Total Annual Fund Operating Expenses After Fee Waiver ⁽¹⁾	1.51%

Janus Capital has contractually agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to

⁽¹⁾ management fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to 1.25% until at least February 1, 2014. The contractual waiver may be terminated or modified prior to this date only at the discretion of the Board of Trustees.

EXAMPLE:

The following Example is based on expenses without waivers. The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses without waivers remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 279	\$ 856	\$ 1,459	\$ 3,090

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 75% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity securities of Asian issuers (excluding Japanese issuers). An Asian issuer is generally considered to be any company that (i) is incorporated or has its principal business activities in an Asian country; (ii) is primarily listed on the trading market of an Asian country; or (iii) derives 50% or more of its revenue from, or has 50% or more of its assets in, one or more Asian countries. The Fund considers "Asian countries" to include, but not be limited to, Hong Kong, China, South Korea, Taiwan, Singapore, Malaysia, Thailand, Indonesia, Philippines, India, Vietnam, Pakistan, Russia, and Sri Lanka. Some of these countries may represent developing or emerging markets. The Fund may have significant exposure to emerging market countries.

The Fund generally invests in equity securities, which consist primarily of common stocks, preferred stocks, depository receipts, and convertible securities, but may also include other types of instruments, such as equity-linked securities, real

estate-related companies, and real estate investment trusts issued by Asian real estate companies. The Fund may invest in companies of any market capitalization. While the Fund intends to diversify its investments across a number of different countries, including emerging market countries, it may, under unusual circumstances, invest all or a significant portion of its assets in a single Asian country. To a more limited degree, the Fund may also invest in U.S. and foreign debt securities. Due to the nature of the securities in which the Fund invests, it may have relatively high portfolio turnover compared to other funds.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies. The portfolio manager will also analyze each company from a macro perspective taking into consideration any important themes or issues that may impact the investment environment in certain regions or sectors and to estimate regional market risks.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’s exposure to a particular market, to adjust the Fund’s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’s risk profile. The Fund’s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an Asian equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it would in a more geographically diversified portfolio. The Fund’s investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund’s investments. In addition, the Fund’s investments may be denominated in foreign currencies and therefore, changes in the value of a country’s currency compared to the U.S. dollar may affect the value of the Fund’s investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund’s performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as “A Shares”). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in

foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 64.4% of the Fund's investments were in emerging markets.

Geographic Concentration Risk. Because the Fund intends to focus its investments in a particular geographic region, the Fund's performance is expected to be closely tied to various factors such as social, financial, economic, and political conditions within that region or country. Specifically, the Fund's investments in Asian issuers increase the Fund's exposure to the risks associated with volatile securities markets, adverse exchange rates, social, political and regulatory developments, and economic environmental events (such as natural disasters) which may be particular to Asian countries. Events that negatively affect the fiscal stability of Asian countries may cause the value of the Fund's shares to decrease, in some cases significantly. As a result, the Fund is likely to be more volatile than more geographically diverse funds. In addition, many of the economies of the Asian countries in which the Fund invests are interdependent, which may cause them to experience the impact of such events at the same time or may increase the possibility that conditions in one country or region might adversely impact the issuers of securities in a different country or region.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

Portfolio Turnover Risk. Increased portfolio turnover may result in higher costs, which may have a negative effect on the Fund's performance. In addition, higher portfolio turnover may result in the acceleration of capital gains and the recognition of greater levels of short-term capital gains, which are taxed at ordinary federal income tax rates when distributed to shareholders.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. The bar chart depicts the Fund's performance during the period indicated. The table compares the Fund's average annual returns for the periods indicated to a broad-based securities market index. The index is not actively managed and is not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)	
	2012
	28.43%

Best Quarter: First Quarter 2012 **16.18%** **Worst Quarter:** Second Quarter 2012 **-7.57%**

Return After Taxes on Distributions	28.28%	0.50%
Return After Taxes on Distributions and Sale of Fund Shares	18.60%	0.48%
Morgan Stanley Capital International All Country Asia ex-Japan Index (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	22.36%	-0.79%

The Morgan Stanley Capital International ("MSCI") All Country Asia ex-Japan Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of Asia, excluding Japan. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Investment Subadviser: Janus Capital Singapore Pte. Limited

Portfolio Manager: Hiroshi Yoh is Executive Vice President and Portfolio Manager of the Fund, which he has managed since inception.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Emerging Markets Fund

Ticker: JMFDX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Emerging Markets Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.91%
Other Expenses	1.17%
Acquired Fund Fees and Expenses	0.05%
Total Annual Fund Operating Expenses ⁽¹⁾	2.13%
Fee Waiver ⁽¹⁾	0.75%
Total Annual Fund Operating Expenses After Fee Waiver ⁽¹⁾	1.38%

Janus Capital has contractually agreed to waive the Fund's total annual fund operating expenses (excluding any performance adjustments to management fees, administrative services fees payable pursuant to the Transfer Agency Agreement, brokerage commissions, interest, dividends, taxes, acquired fund fees and expenses, and extraordinary expenses) to 1.25% until at least February 1, 2014. The contractual waiver may be terminated or modified prior to this date only at the discretion of the Board of Trustees.

EXAMPLE:

The following Example is based on expenses without waivers. The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses without waivers remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 216	\$ 667	\$ 1,144	\$ 2,462

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 136% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of issuers in emerging market countries. The Fund normally invests in securities of issuers that (i) are primarily listed on the trading market of an emerging market country; (ii) are incorporated or have their principal business activities in an emerging market country; or (iii) derive 50% or more of their revenues from, or have 50% or more of their assets in, an emerging market country. An emerging market country is any country that has been determined by an international organization, such as the World Bank, to have a low to middle income economy and/or any country that is not included in the Morgan Stanley Capital International World IndexSM, which measures the equity market performance of developed markets. The Fund generally invests in equity securities, which consist primarily of common stocks, preferred stocks and convertible securities, but may also invest in other types of instruments, such as equity-linked securities and exchange-traded

funds. The Fund may invest in companies of any market capitalization. Due to the nature of the securities in which the Fund invests, it may have relatively high portfolio turnover compared to other funds.

Although the Fund intends to invest substantially all of its assets in several issuers located in emerging market countries, it may invest up to 20% of its net assets in securities of issuers located in the U.S. or other developed market issuers, and it may, under unusual circumstances, invest all or a significant portion of its assets in a single emerging market country. The Fund may also invest in domestic and foreign debt securities.

The portfolio managers apply a “bottom up” approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’s exposure to a particular market, to adjust the Fund’s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’s risk profile. The Fund’s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, particularly investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it would in a more geographically diversified portfolio.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund’s investments. In addition, the Fund’s investments may be denominated in foreign currencies and therefore, changes in the value of a country’s currency compared to the U.S. dollar may affect the value of the Fund’s investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund’s performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may

be heightened to the extent the Fund invests in Chinese local market equity securities (also known as “A Shares”). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers’ belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Portfolio Turnover Risk. Increased portfolio turnover may result in higher costs, which may have a negative effect on the Fund’s performance. In addition, higher portfolio turnover may result in the acceleration of capital gains and the recognition of greater levels of short-term capital gains, which are taxed at ordinary federal income tax rates when distributed to shareholders.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio managers’ perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative’s original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund’s losses are theoretically unlimited.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund’s investments in foreign real estate markets differently than U.S. real estate markets.

Exchange-Traded Funds Risk. The Fund may purchase shares of exchange-traded funds (“ETFs”) to gain exposure to a particular portion of the market. ETFs are pooled investment vehicles, which may be managed or unmanaged, that generally seek to track the performance of a specific index. ETFs are traded on an exchange at market prices that may vary from the net asset value of their underlying investments. When the Fund invests in an ETF, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the ETF’s expenses. ETFs have certain inherent risks generally associated with investments in a portfolio of securities in which the ETF is invested, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of each unit of the ETF. ETFs also involve the risk that an active trading market for an ETF’s shares may not develop or be maintained.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to a broad-based securities market index. The index is not actively managed and is not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)

	2011	2012
	-23.92%	14.02%

Best Quarter: First Quarter 2012 **16.03%** **Worst Quarter:** Third Quarter 2011 **-24.59%**

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	Since Inception (12/28/10)
Class D Shares		
Return Before Taxes	14.02%	-6.42%
Return After Taxes on Distributions	14.07%	-6.42%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	9.38%	-5.34%
Morgan Stanley Capital International Emerging Markets Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	18.22%	-0.68%

⁽¹⁾ If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Morgan Stanley Capital International ("MSCI") Emerging Markets Indexsm is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Global Life Sciences Fund

Ticker: JNGLX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Global Life Sciences Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees	0.64%
Other Expenses	0.26%
Total Annual Fund Operating Expenses	0.90%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 92	\$ 287	\$ 498	\$ 1,108

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 50% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of companies that the portfolio manager believes have a life science orientation. Generally speaking, the "life sciences" relate to maintaining or improving quality of life. So, for example, companies with a "life science orientation" include companies engaged in research, development, production, or distribution of products or services related to health and personal care, medicine, or pharmaceuticals. The Fund implements this policy by investing primarily in equity securities of U.S. and foreign companies selected for their growth potential. The Fund normally invests in issuers from several different countries, which may include the United States. The Fund may, under unusual circumstances, invest in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities. As a fundamental policy, the Fund normally invests at least 25% of its total assets in the "life sciences" sector, which may include companies in the following industry groups: health care; pharmaceuticals; agriculture; cosmetics/personal care; and biotechnology.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices,

as substitutes for securities in which the Fund invests. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 4.3% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Concentration Risk. The Fund focuses its investments in "life sciences" related industry groups. As a result, the Fund may be subject to greater risks and its net asset value may fluctuate more than a fund that does not concentrate its investments.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore

involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
27.44%	14.95%	11.45%	-1.95%	22.53%	-28.77%	26.30%	8.19%	7.30%	24.74%

Best Quarter: First Quarter 2012 **15.18%** **Worst Quarter:** Fourth Quarter 2008 **-18.91%**

Average Annual Total Returns (periods ended 12/31/12)				
	1 Year	5 Years	10 Years	Since Inception (12/31/98)
Class D Shares				
Return Before Taxes	24.74%	5.43%	9.84%	8.52%
Return After Taxes on Distributions	24.08%	5.29%	9.76%	8.46%
Return After Taxes on Distributions and Sale of Fund Shares	17.00%	4.68%	8.79%	7.68%
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	2.94%
Morgan Stanley Capital International World Health Care Index (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	17.54%	4.22%	6.90%	3.30%

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares

of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Janus Global Research Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.74%
Other Expenses	0.29%
Total Annual Fund Operating Expenses	1.03%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 105	\$ 328	\$ 569	\$ 1,259

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 67% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in common stocks selected for their growth potential. The Fund may invest in companies of any size located anywhere in the world, from larger, well-established companies to smaller, emerging growth companies. The Fund normally invests at least 40% of its net assets in securities of issuers or companies from different countries located throughout the world, excluding the United States. The Fund may have significant exposure to emerging markets. The Fund may also invest in foreign equity and debt securities.

Janus Capital's equity research analysts, overseen by the Portfolio Oversight Team led by Janus Capital's Director of Equity Research James P. Goff (the "Research Team"), select investments for the Fund which represent their high-conviction investment ideas in all market capitalizations, styles, and geographies. The Research Team, comprised of sector specialists, conducts fundamental analysis with a focus on "bottom up" research, quantitative modeling, and valuation analysis. Using this research process, analysts rate their stocks based upon attractiveness. Analysts bring their high-conviction ideas to their respective sector teams. Sector teams compare the appreciation and risk potential of each of the team's high-conviction ideas and construct a sector portfolio that is intended to maximize the best risk-reward opportunities.

Positions may be sold when, among other things, there is no longer high conviction in the return potential of the investment or if the risk characteristics have caused a re-evaluation of the opportunity. This may occur if the stock has appreciated and reflects the anticipated value, if another company represents a better risk-reward opportunity, or if the investment's fundamental characteristics deteriorate. Securities may also be sold from the portfolio to rebalance sector weightings.

Mr. Goff oversees the investment process and is responsible for the day-to-day management of the Fund. It is expected that the Fund will be broadly diversified among a variety of industry sectors. The Fund intends to be fully invested under normal circumstances. However, under unusual circumstances, if the Research Team does not have high conviction in enough investment opportunities, the Fund's uninvested assets may be held in cash or similar instruments.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices, as substitutes for securities in which the Fund invests. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions, or to hedge currency exposure relative to the Fund's benchmark index) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 3.7% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the investment personnel's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the investment personnel's perception of a company's growth potential is not realized, the securities purchased may not perform as expected,

reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities. The Fund compares and broadly matches its sector weights to those of a growth-based index. If growth stocks are out of favor, sectors that are larger in a growth index may underperform, leading to Fund underperformance relative to indices less biased toward growth stocks.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)							
	2006	2007	2008	2009	2010	2011	2012
	18.40%	26.75%	-45.49%	45.18%	20.70%	-7.48%	16.78%
Best Quarter: Second Quarter 2009 24.54% Worst Quarter: Fourth Quarter 2008 -24.95%							

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	Since Inception (2/25/05)
Class D Shares			
Return Before Taxes	16.78%	0.63%	8.06%
Return After Taxes on Distributions	16.67%	0.56%	7.55%
Return After Taxes on Distributions and Sale of Fund Shares	11.04%	0.54%	6.84%
Morgan Stanley Capital International World Growth Index (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	16.12%	-0.28%	4.63%
Morgan Stanley Capital International All Country World Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	16.13%	-1.16%	4.33%

The Morgan Stanley Capital International (“MSCI”) World Growth Index measures the performance of growth stocks in developed countries throughout the world. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund’s Class D Shares for the periods following February 16, 2010; and for the Fund’s Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Management: James P. Goff, CFA, is Janus Capital’s Director of Equity Research and Executive Vice President of the Fund, which he has managed since inception.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements	
To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day’s net asset value. For additional information, refer to “To Open an Account or Buy Shares,” “To Exchange Shares,” and/or “To Sell Shares” in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Janus Global Select Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees	0.64%
Other Expenses	0.26%
Total Annual Fund Operating Expenses	0.90%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 92	\$ 287	\$ 498	\$ 1,108

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 182% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by normally investing primarily in a core group of 40-70 domestic and foreign common stocks selected for their growth potential and normally investing at least 40% of its net assets in securities of issuers from different countries located throughout the world, excluding the United States. The Fund may invest in companies of any size located anywhere in the world, from larger, well-established companies to smaller, emerging growth companies. The Fund may also invest in U.S. and foreign debt securities. The Fund may also invest in emerging markets but will normally limit such investments to 30% of its net assets, measured at the time of purchase. As of September 30, 2012, the Fund held stocks of 67 companies. Of these holdings, 40 comprised approximately 73.38% of the Fund's holdings.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund's exposure to a particular market, to adjust the Fund's currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be

restricted or unavailable, or to manage the Fund's risk profile. The Fund's exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund invests primarily in common stocks, which tend to be more volatile than many other investment choices.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Nondiversification Risk. The Fund is classified as nondiversified under the Investment Company Act of 1940, as amended. This gives the Fund's portfolio manager more flexibility to hold larger positions in a smaller number of securities. As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund's net asset value and total return.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 8.6% of the Fund's investments were in emerging markets.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to a broad-based securities market index. The index is not actively managed and is not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
43.81%	14.90%	20.93%	18.64%	32.38%	-49.78%	54.74%	20.12%	-17.72%	4.23%
Best Quarter: Second Quarter 2009 26.71%					Worst Quarter: Fourth Quarter 2008 -32.29%				

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (6/30/00)
Class D Shares				
Return Before Taxes	4.23%	-4.35%	9.65%	0.46%
Return After Taxes on Distributions	4.22%	-4.43%	9.57%	0.39%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	2.96%	-3.62%	8.62%	0.38%
Morgan Stanley Capital International All Country World Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	16.13%	-1.16%	8.11%	2.12%

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: George P. Maris, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since August 2012.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements	
To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Global Technology Fund

Ticker: JNGTX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Global Technology Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees	0.64%
Other Expenses	0.30%
Short Sale Dividend Expenses	0.02%
Remaining Other Expenses	0.28%
Total Annual Fund Operating Expenses	0.94%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 96	\$ 300	\$ 520	\$ 1,155

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 49% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of companies that the portfolio manager believes will benefit significantly from advances or improvements in technology. These companies generally fall into two categories:

companies that the portfolio manager believes have or will develop products, processes, or services that will provide significant technological advancements or improvements; and

companies that the portfolio manager believes rely extensively on technology in connection with their operations or services.

The Fund implements this policy by investing primarily in equity securities of U.S. and foreign companies selected for their growth potential. The Fund normally invests in issuers from several different countries, which may include the United States. The Fund may, under unusual circumstances, invest in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities.

The portfolio manager applies a “bottom up” approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund’s investment policies.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund’s exposure to a particular market, to adjust the Fund’s currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund’s risk profile. The Fund’s exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund’s returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund’s performance than it would in a more geographically diversified portfolio. The Fund’s investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund’s investments. In addition, the Fund’s investments may be denominated in foreign currencies and therefore, changes in the value of a country’s currency compared to the U.S. dollar may affect the value of the Fund’s investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund’s performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as “A Shares”). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 3.4% of the Fund’s investments were in emerging markets.

Market Risk. The value of the Fund’s portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager’s belief about a company’s intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund’s portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be “growth” companies may be more volatile than other stocks and may involve special risks. If the portfolio manager’s perception of a company’s growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund’s returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, “growth” stocks may perform differently from the market as a whole and other types of securities.

Industry Risk. Although the Fund does not concentrate its investments in specific industries, it may invest in companies related in such a way that they react similarly to certain market pressures. As a result, the Fund’s returns may be considerably more volatile than the returns of a fund that does not invest in similarly related companies.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative’s original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund’s losses are theoretically unlimited.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund’s performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund’s former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund’s commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund’s average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions.

The Fund’s past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
47.14%	1.23%	11.50%	7.98%	21.88%	-43.27%	57.29%	24.64%	-8.41%	19.31%
Best Quarter: Second Quarter 2009 26.81%					Worst Quarter: Fourth Quarter 2008 -25.94%				

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (12/31/98)
Class D Shares				
Return Before Taxes	19.31%	3.98%	10.26%	4.87%
Return After Taxes on Distributions	19.24%	3.96%	10.25%	4.80%
Return After Taxes on Distributions and Sale of Fund Shares	12.63%	3.42%	9.18%	4.27%
S&P 500® Index (reflects no deduction for expenses, fees, or taxes)	16.00%	1.66%	7.10%	2.94%
Morgan Stanley Capital International World Information Technology Index (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	13.30%	0.87%	7.66%	0.38%

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: J. Bradley Slingerland, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since May 2011.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus International Equity Fund

Ticker: JNISX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus International Equity Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.81%
Other Expenses	0.46%
Total Annual Fund Operating Expenses	1.27%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 129	\$ 403	\$ 697	\$ 1,534

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 57% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in equity securities. The Fund normally invests in a core group of 60-100 equity securities of issuers from different countries located throughout the world, excluding the United States. The Fund may, under unusual circumstances, invest all of its assets in a single country. The Fund may invest in emerging markets but will normally limit such investments to 20% of its net assets, measured at the time of purchase. The Fund may also invest in foreign debt securities.

The portfolio managers apply a "bottom up" approach in choosing investments. In other words, the portfolio managers look at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies. The portfolio managers normally seek to limit any sector exposure and country exposure to plus or minus 10% of the respective weighting of the Fund's primary benchmark index, currently the Morgan Stanley Capital International EAFE® Index.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). As of September 30, 2012, approximately 10.8% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio managers' belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio managers' perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements, supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's Class I Shares calculated using the fees and expenses of Class D Shares, without the effect of any fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)						
	2007	2008	2009	2010	2011	2012
	22.23%	-45.99%	51.91%	14.30%	-13.77%	18.61%
Best Quarter: Second Quarter 2009 31.92% Worst Quarter: Third Quarter 2008 -24.25%						

Average Annual Total Returns (periods ended 12/31/12)			
	1 Year	5 Years	Since Inception of Predecessor Fund (11/28/06)
Class D Shares			
Return Before Taxes	18.61%	-0.81%	3.54%
Return After Taxes on Distributions	18.61%	-0.92%	3.41%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	12.53%	-0.62%	3.09%
Morgan Stanley Capital International EAFE® Index (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	17.32%	-3.69%	-0.51%
Morgan Stanley Capital International All Country World ex-U.S. Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	16.83%	-2.89%	0.95%

⁽¹⁾ If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Morgan Stanley Capital International ("MSCI") EAFE® (Europe, Australasia, Far East) Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the United States and Canada. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class I Shares for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Investment Subadviser: Janus Capital Singapore Pte. Limited

Portfolio Managers: **Julian McManus** is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since June 2010. **Guy Scott**, CFA, is Executive Vice President and Co-Portfolio Manager of the Fund, which he has co-managed since June 2010. **Carmel Wellso** is Executive Vice President and Co-Portfolio Manager of the Fund, which she has co-managed since June 2010.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Overseas Fund

Ticker: JNOSX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Overseas Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.44%
Other Expenses	0.20%
Total Annual Fund Operating Expenses	0.64%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 65	\$ 205	\$ 357	\$ 798

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 26% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing, under normal circumstances, at least 80% of its net assets in securities of issuers from countries outside of the United States. The Fund normally invests in securities of issuers from several different countries, excluding the United States. Although the Fund typically invests 80% or more of its assets in issuers located outside the United States, it also may normally invest up to 20% of its assets, measured at the time of purchase, in U.S. issuers, and it may, under unusual circumstances, invest all or substantially all of its assets in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may invest in equity and debt securities of U.S. and non-U.S. real estate-related companies. Such companies may include those in the real estate industry or real estate-related industries. These securities may include common stocks, preferred stocks, and other equity securities including, but not limited to, real estate investment trusts and similar real estate investment trust-like entities, such as entities that have real estate investment characteristics.

The Fund may invest its assets in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices,

as substitutes for securities in which the Fund invests. For purposes of meeting its 80% investment policy, the Fund may include derivatives that have characteristics similar to the securities in which the Fund may directly invest. The Fund may invest in derivative instruments (by taking long and/or short positions) for different purposes, including hedging (to offset risks associated with an investment, currency exposure, or market conditions) and to earn income and enhance returns.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent the Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 34.4% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Real Estate Securities Risk. The Fund may be affected by risks associated with investments in real estate-related securities. The value of securities of issuers in the real estate and real estate-related industries, including real estate investment trusts, is sensitive to changes in real estate values and rental income, property taxes, interest rates, tax and regulatory requirements,

supply and demand, and the management skill and creditworthiness of the issuer. These factors may impact the Fund's investments in foreign real estate markets differently than U.S. real estate markets.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
36.79%	18.58%	32.39%	47.21%	27.76%	-52.75%	78.12%	19.39%	-32.71%	12.52%
Best Quarter: Second Quarter 2009 36.78% Worst Quarter: Fourth Quarter 2008 -27.94%									

Average Annual Total Returns (periods ended 12/31/12)

	1 Year	5 Years	10 Years	Since Inception (5/2/94)
Class D Shares				
Return Before Taxes	12.52%	-5.32%	11.88%	9.98%
Return After Taxes on Distributions	11.55%	-5.83%	11.36%	9.35%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	8.48%	-4.52%	10.65%	8.91%
Morgan Stanley Capital International All Country World ex-U.S. Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	16.83%	-2.89%	9.74%	N/A
Morgan Stanley Capital International EAFE® Index (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	17.32%	-3.69%	8.21%	4.51%

(1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Morgan Stanley Capital International ("MSCI") All Country World ex-U.S. Indexsm is an unmanaged, free float-adjusted, market capitalization weighted index composed of stocks of companies located in countries throughout the world, excluding the United States. It is designed to measure equity market performance in global developed and emerging markets. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: Brent A. Lynn, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed or co-managed since January 2001.

PURCHASE AND SALE OF FUND SHARES**Minimum Investment Requirements**

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Fund summary

Janus Worldwide Fund

Ticker: JANWX Class D Shares*

* Class D Shares are closed to certain new investors.

INVESTMENT OBJECTIVE

Janus Worldwide Fund seeks long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund.

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	Class D
Management Fees (may adjust up or down)	0.59%
Other Expenses	0.24%
Total Annual Fund Operating Expenses	0.83%

EXAMPLE:

The Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated, reinvest all dividends and distributions, and then redeem all of your Shares at the end of each period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class D Shares	\$ 85	\$ 265	\$ 460	\$ 1,025

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 49% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objective by investing primarily in equity securities, which include, but are not limited to, common stocks, preferred stocks, and depositary receipts of companies of any size located throughout the world. The Fund normally invests in issuers from several different countries, including the United States. The Fund may, under unusual circumstances, invest in a single country. The Fund may have significant exposure to emerging markets. The Fund may also invest in U.S. and foreign debt securities.

The portfolio manager applies a "bottom up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the Fund's investment policies.

The Fund may also take long or short positions in derivatives, which are instruments that have a value derived from, or directly linked to, an underlying asset, such as equity securities, fixed-income securities, commodities, currencies, interest rates, or market indices. The types of derivatives in which the Fund may invest include options, futures, swaps, warrants, and forward exchange contracts. The Fund may use derivatives to hedge, to earn income or enhance returns, as a substitute for securities in which the Fund invests, to increase or decrease the Fund's exposure to a particular market, to adjust the Fund's currency exposure relative to its benchmark index, to gain access to foreign markets where direct investment may be restricted or unavailable, or to manage the Fund's risk profile. The Fund's exposure to derivatives will vary, is not limited to those derivatives listed, and could be significant at times.

PRINCIPAL INVESTMENT RISKS

The biggest risk is that the Fund's returns will vary, and you could lose money. The Fund is designed for long-term investors seeking an equity portfolio, including common stocks. Common stocks tend to be more volatile than many other investment choices.

Foreign Exposure Risk. The Fund normally has significant exposure to foreign markets as a result of its investments in foreign securities, including investments in emerging markets, which can be more volatile than the U.S. markets. As a result, its returns and net asset value may be affected to a large degree by fluctuations in currency exchange rates or political or economic conditions in a particular country. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for the Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, a market swing in one or more countries or regions where the Fund has invested a significant amount of its assets may have a greater effect on the Fund's performance than it would in a more geographically diversified portfolio. The Fund's investments in emerging market countries may involve risks greater than, or in addition to, the risks of investing in more developed countries.

Emerging Markets Risk. The risks of foreign investing mentioned above are heightened when investing in emerging markets. Emerging markets securities involve a number of additional risks, which may result from less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on the Fund's investments. In addition, the Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that the Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. Some of the risks of investing directly in foreign and emerging market securities may be reduced when the Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks. As of September 30, 2012, approximately 6.9% of the Fund's investments were in emerging markets.

Market Risk. The value of the Fund's portfolio may decrease if the value of an individual company or security, or multiple companies or securities, in the portfolio decreases or if the portfolio manager's belief about a company's intrinsic worth is incorrect. Further, regardless of how well individual companies or securities perform, the value of the Fund's portfolio could also decrease if there are deteriorating economic or market conditions. It is important to understand that the value of your investment may fall, sometimes sharply, in response to changes in the market, and you could lose money.

Growth Securities Risk. The Fund invests in companies after assessing their growth potential. Securities of companies perceived to be "growth" companies may be more volatile than other stocks and may involve special risks. If the portfolio manager's perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Fund's returns. In addition, because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by the Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time. Class D Shares of the Fund commenced operations on February 16, 2010, as a result of the restructuring of Class J Shares, the predecessor share class. The performance shown for Class D Shares for periods prior to February 16, 2010, reflects the performance of the Fund's former Class J Shares, calculated using the fees and expenses in effect during the periods shown, net of any applicable fee and expense limitations or waivers. If Class D Shares of the Fund had been available during periods prior to February 16, 2010, the performance shown may have been different. The performance shown for periods following the Fund's commencement of Class D Shares reflects the fees and expenses of Class D Shares, net of any applicable fee and expense limitations or waivers.

The bar chart depicts the change in performance from year to year during the periods indicated. The table compares the Fund's average annual returns for the periods indicated to broad-based securities market indices. The indices are not actively managed and are not available for direct investment. All figures assume reinvestment of dividends and distributions. For certain periods, the Fund's performance reflects the effect of expense waivers. Without the effect of these expense waivers, the performance shown would have been lower.

The Fund's past performance (before and after taxes) does not necessarily indicate how it will perform in the future. Updated performance information is available at janus.com/allfunds or by calling 1-800-525-3713.

Annual Total Returns for Class D Shares (calendar year-end)									
2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
24.23%	5.54%	5.84%	17.90%	9.23%	-45.02%	37.68%	15.70%	-13.74%	19.92%
Best Quarter: Second Quarter 2009 23.17%					Worst Quarter: Fourth Quarter 2008 -23.27%				

Average Annual Total Returns (periods ended 12/31/12)				
	1 Year	5 Years	10 Years	Since Inception (5/15/91)
Class D Shares				
Return Before Taxes	19.92%	-1.96%	4.94%	8.02%
Return After Taxes on Distributions	19.73%	-2.09%	4.82%	7.37%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	13.20%	-1.66%	4.34%	6.98%
Morgan Stanley Capital International World Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	15.83%	-1.18%	7.51%	6.42%
Morgan Stanley Capital International All Country World Index sm (net of foreign withholding taxes) (reflects no deduction for expenses, fees, or taxes, except foreign withholding taxes)	16.13%	-1.16%	8.11%	N/A

- (1) If the Fund incurs a loss, which generates a tax benefit, the Return After Taxes on Distributions and Sale of Fund Shares may exceed the Fund's other return figures.

The Morgan Stanley Capital International ("MSCI") World IndexSM is a market capitalization weighted index composed of companies representative of the market structure of developed market countries in North America, Europe, and the Asia/Pacific Region. The index includes reinvestment of dividends, net of foreign withholding taxes. This index is used to calculate the performance fee adjustment.

After-tax returns are calculated using distributions for the Fund's Class D Shares for the periods following February 16, 2010; and for the Fund's Class J Shares, the predecessor share class, for the periods prior to February 16, 2010. If Class D Shares of the Fund had been available during these earlier periods, distributions may have been different and thus, after-tax returns may have been different from those shown. After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your individual tax situation and may differ from those shown in the preceding table. The after-tax return information shown above does not apply to Fund shares held through a tax-deferred account, such as a 401(k) plan or an IRA.

MANAGEMENT

Investment Adviser: Janus Capital Management LLC

Portfolio Manager: George P. Maris, CFA, is Executive Vice President and Portfolio Manager of the Fund, which he has managed since March 2011.

PURCHASE AND SALE OF FUND SHARES

Minimum Investment Requirements

To open a new regular Fund account	\$2,500
To open a new UGMA/UTMA account, Coverdell Education Savings Account, or a retirement Fund account	
without an automatic investment program	\$1,000
with an automatic investment program of \$100 per month	\$500
To add to any existing type of Fund account	\$100

You may generally purchase, exchange, or redeem Fund Shares on any business day by written request, wire transfer, telephone, and in most cases, online at janus.com/individual. You may conduct transactions by mail (Janus, P.O. Box 55932, Boston, MA 02205-5932), or by telephone at 1-800-525-3713. Purchase, exchange, or redemption requests must be received in good order by the Fund or its agents prior to the close of the regular trading session of the New York Stock Exchange in order to receive that day's net asset value. For additional information, refer to "To Open an Account or Buy Shares," "To Exchange Shares," and/or "To Sell Shares" in the Prospectus.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

With respect to certain other classes of shares, the Fund and its related companies may pay select broker-dealer firms or other financial intermediaries for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing a broker-dealer or other intermediary or a salesperson to recommend the Fund over another investment or to recommend one share class over another.

Additional information about the Funds

FEES AND EXPENSES

Please refer to the following important information when reviewing the “Fees and Expenses of the Fund” table in each Fund Summary of the Prospectus. The fees and expenses shown were determined based on net assets as of the fiscal year ended September 30, 2012.

“Annual Fund Operating Expenses” are paid out of a Fund’s assets and include fees for portfolio management and administrative services, including recordkeeping, accounting, and other shareholder services, as well as reimbursement to Janus Capital of its out-of-pocket costs for services as administrator. You do not pay these fees directly but, as the Example in each Fund Summary shows, these costs are borne indirectly by all shareholders.

The “Management Fee” is the investment advisory fee rate paid by each Fund to Janus Capital. Janus Asia Equity Fund, Janus Emerging Markets Fund, Janus Global Research Fund, Janus International Equity Fund, Janus Overseas Fund, and Janus Worldwide Fund each pay an investment advisory fee rate that adjusts up or down by a variable of up to 0.15% (assuming constant assets) on a monthly basis based upon the Fund’s performance relative to its benchmark index during a measurement period. This fee rate, prior to any performance adjustment, is 0.92% for Janus Asia Equity Fund, 1.00% for Janus Emerging Markets Fund, 0.64% for each of Janus Global Research Fund and Janus Overseas Fund, 0.68% for Janus International Equity Fund, and 0.60% for Janus Worldwide Fund. Any such adjustment to this base fee rate commenced January 2007 for Janus Global Research Fund, February 2007 for Janus Worldwide Fund, December 2007 for Janus International Equity Fund, November 2011 for Janus Overseas Fund, January 2012 for Janus Emerging Markets Fund, and August 2012 for Janus Asia Equity Fund and may increase or decrease the Management Fee. Refer to “Management Expenses” in this Prospectus for additional information with further description in the Statement of Additional Information (“SAI”).

“Other Expenses”

- include an administrative services fee of 0.12% of the average daily net assets of Class D Shares for shareholder services provided by Janus Services LLC (“Janus Services”), the Funds’ transfer agent.
- may include “Short Sale Dividend Expenses.” These expenses include dividends or interest on short sales, which are paid to the lender of borrowed securities, and stock loan fees, which are paid to the prime broker. Such expenses will vary depending on the short sale arrangement, whether the securities a Fund sells short pay dividends or interest, and the amount of such dividends or interest. While “Short Sale Dividend Expenses” include interest and dividends paid out on short positions and may include stock loan fees, they do not take into account the interest credit a Fund earns on cash proceeds of short sales held as collateral for short positions. If applicable, the amount is indicated in a Fund’s Fees and Expenses table.
- may include reimbursement to Janus Services of its out-of-pocket costs for arranging for the provision by third parties of certain servicing to shareholders.

“Acquired Fund” refers to any underlying fund (including, but not limited to, exchange-traded funds) in which a fund invests or has invested during the period. Acquired fund fees and expenses are indirect expenses a fund may incur as a result of investing in shares of an underlying fund. To the extent that a Fund invests in Acquired Funds, the Fund’s “Total Annual Fund Operating Expenses” may not correlate to the “ratio of gross expenses to average net assets” presented in the Financial Highlights table because that ratio includes only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. If applicable, or unless otherwise indicated in a Fund’s Fees and Expenses table, such amounts are less than 0.01% and are included in the Fund’s “Other Expenses.”

Janus Capital has contractually agreed to waive certain Funds’ “Total Annual Fund Operating Expenses” to certain limits until at least February 1, 2014. The expense limits are described in the “Management Expenses” section of this Prospectus. Because a fee waiver will have a positive effect upon a fund’s performance, a fund that pays a performance-based investment advisory fee may experience a performance adjustment that is considered favorable to Janus Capital as a result of a fee waiver that is in place during the period when the performance adjustment applies.

All expenses in a Fund’s “Fees and Expenses of the Fund” table are shown without the effect of expense offset arrangements. Pursuant to such arrangements, credits realized as a result of uninvested cash balances are used to reduce custodian and transfer agent expenses.

ADDITIONAL INVESTMENT STRATEGIES AND GENERAL PORTFOLIO POLICIES

The Funds' Board of Trustees ("Trustees") may change each Fund's investment objective or non-fundamental principal investment strategies without a shareholder vote. A Fund will notify you in writing at least 60 days before making any such change it considers material. If there is a material change to a Fund's objective or principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that a Fund will achieve its investment objective.

Unless otherwise stated, the following additional investment strategies and general policies apply to each Fund and provide further information including, but not limited to, the types of securities a Fund may invest in when implementing its investment objective. For some Funds, these strategies and policies may be part of a principal strategy. For other Funds, these strategies and policies may be utilized to a lesser extent. Except for the Funds' policies with respect to investments in illiquid securities and borrowing, the percentage limitations included in these policies and elsewhere in this Prospectus and/or the SAI normally apply only at the time of purchase of a security. So, for example, if a Fund exceeds a limit as a result of market fluctuations or the sale of other securities, it will not be required to dispose of any securities.

Cash Position

The Funds may not always stay fully invested. For example, when the portfolio managers and/or investment personnel believe that market conditions are unfavorable for investing, or when they are otherwise unable to locate attractive investment opportunities, a Fund's cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after a Fund has committed available assets to desirable investment opportunities. Due to differing investment strategies, the cash positions among the Funds may vary significantly. When a Fund's investments in cash or similar investments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested. To the extent a Fund invests its uninvested cash through a sweep program (meaning its uninvested cash is pooled with uninvested cash of other funds and invested in certain securities such as repurchase agreements), it is subject to the risks of the account or fund into which it is investing, including liquidity issues that may delay the Fund from accessing its cash.

In addition, a Fund may temporarily increase its cash position under certain unusual circumstances, such as to protect its assets or maintain liquidity in certain circumstances to meet unusually large redemptions. A Fund's cash position may also increase temporarily due to unusually large cash inflows. Under unusual circumstances such as these, a Fund may invest up to 100% of its assets in cash or similar investments. In this case, the Fund may take positions that are inconsistent with its investment objective. As a result, the Fund may not achieve its investment objective.

Common Stock

Unless its investment objective or policies prescribe otherwise, each of the Funds may invest substantially all of its assets in common stocks. The portfolio managers and/or investment personnel generally take a "bottom up" approach to selecting companies in which to invest. This means that they seek to identify individual companies with earnings growth potential that may not be recognized by the market at large. Securities are generally selected on a security-by-security basis without regard to any predetermined allocation among countries or geographic regions. However, certain factors, such as expected levels of inflation, government policies influencing business conditions, the outlook for currency relationships, and prospects for economic growth among countries, regions, or geographic areas, may warrant greater consideration in selecting foreign securities. There are no limitations on the countries in which the Funds may invest, and the Funds may at times have significant exposure to emerging markets. The portfolio managers and/or investment personnel may sell a holding if, among other things, the security reaches the portfolio managers' and/or investment personnel's price target, if the company has a deterioration of fundamentals such as failing to meet key operating benchmarks, or if the portfolio managers and/or investment personnel find a better investment opportunity. The portfolio managers and/or investment personnel may also sell a Fund holding to meet redemptions.

Counterparties

Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to a Fund ("counterparty risk"). Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to a Fund. A Fund may be unable to recover its investment from the counterparty or may obtain a limited recovery, and/or recovery may be delayed. A Fund may be exposed to counterparty risk through participation in various programs including, but not limited to, lending its

securities to third parties, cash sweep arrangements whereby the Fund's cash balance is invested in one or more types of cash management vehicles, as well as investments in, but not limited to, repurchase agreements, debt securities, and derivatives, including various types of swaps, futures, and options. Each Fund intends to enter into financial transactions with counterparties that Janus Capital believes to be creditworthy at the time of the transaction. There is always the risk that Janus Capital's analysis of a counterparty's creditworthiness is incorrect or may change due to market conditions. To the extent that a Fund focuses its transactions with a limited number of counterparties, it will have greater exposure to the risks associated with one or more counterparties.

Emerging Markets

Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets Indexsm. For Janus Emerging Markets Fund, such countries include any country that has been determined by an international organization, such as the World Bank, to have a low to middle income economy and/or any country that is not included in the Morgan Stanley Capital International World Indexsm, which measures the equity market performance of developed markets. Janus International Equity Fund will normally limit its investments in emerging market countries to 20% of its net assets.

High-Yield/High-Risk Bonds

A high-yield/high-risk bond (also called a "junk" bond) is a bond rated below investment grade by major rating agencies (i.e., BB+ or lower by Standard & Poor's Ratings Services ("Standard & Poor's") and Fitch, Inc. ("Fitch"), or Ba or lower by Moody's Investors Service, Inc. ("Moody's")) or is an unrated bond of similar quality. It presents greater risk of default (the failure to make timely interest and principal payments) than higher quality bonds. To the extent a Fund invests in high-yield/high-risk bonds, under normal circumstances, each Fund, with the exception of Janus Asia Equity Fund, Janus Emerging Markets Fund, and Janus International Equity Fund, will limit its investments in high-yield/high-risk bonds to 35% or less of its net assets. Each of Janus Asia Equity Fund, Janus Emerging Markets Fund, and Janus International Equity Fund will limit its investments in such bonds to 20% or less of its net assets.

Illiquid Investments

Although the Funds intend to invest in liquid securities, each Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment is a security or other position that cannot be disposed of quickly in the normal course of business. For example, some securities are not registered under U.S. securities laws and cannot be sold to the U.S. public because of Securities and Exchange Commission regulations (these are known as "restricted securities"). Under procedures adopted by the Funds' Trustees, certain restricted securities that are determined to be liquid will not be counted toward this 15% limit.

Nondiversification

Diversification is a way to reduce risk by investing in a broad range of stocks or other securities. **Janus Global Select Fund** is classified as "nondiversified." A fund that is classified as "nondiversified" has the ability to take larger positions in a smaller number of issuers than a fund that is classified as "diversified." This gives a fund which is classified as nondiversified more flexibility to focus its investments in companies that the portfolio manager has identified as the most attractive for the investment objective and strategy of the fund. However, because the appreciation or depreciation of a single security may have a greater impact on the net asset value of a fund which is classified as nondiversified, its share price can be expected to fluctuate more than a comparable fund which is classified as diversified. This fluctuation, if significant, may affect the performance of the fund.

Portfolio Turnover

In general, each Fund intends to purchase securities for long-term investment, although, to a limited extent, a Fund may purchase securities in anticipation of relatively short-term gains. Short-term transactions may also result from liquidity needs, securities having reached a price or yield objective, changes in interest rates or the credit standing of an issuer, or by reason of economic or other developments not foreseen at the time of the initial investment decision. A Fund may also sell one security and simultaneously purchase the same or a comparable security to take advantage of short-term differentials in bond yields or securities prices. Portfolio turnover is affected by market conditions, changes in the size of a Fund, the nature of a Fund's investments, and the investment style of the portfolio manager and/or investment personnel. Changes are normally made in a Fund's portfolio whenever the portfolio manager and/or investment personnel believe such changes are desirable. Portfolio turnover rates are generally not a factor in making buy and sell decisions.

Increased portfolio turnover may result in higher costs for brokerage commissions, dealer mark-ups, and other transaction costs, and may also result in taxable capital gains. Higher costs associated with increased portfolio turnover also may have a negative effect on a Fund's performance. The "Financial Highlights" section of this Prospectus shows the Funds' historical turnover rates.

Securities Lending

A Fund may seek to earn additional income through lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis. Each Fund may lend portfolio securities on a short-term or long-term basis, in an amount equal to up to $\frac{1}{3}$ of its total assets as determined at the time of the loan origination. When a Fund lends its securities, it receives collateral (including cash collateral), at least equal to the value of securities loaned. The Fund may earn income by investing this collateral in one or more affiliated or non-affiliated cash management vehicles. It is also possible that, due to a decline in the value of a cash management vehicle, the Fund may lose money. There is also the risk that when portfolio securities are lent, the securities may not be returned on a timely basis, and the Fund may experience delays and costs in recovering the security or gaining access to the collateral provided to the Fund to collateralize the loan. If the Fund is unable to recover a security on loan, the Fund may use the collateral to purchase replacement securities in the market. There is a risk that the value of the collateral could decrease below the cost of the replacement security by the time the replacement investment is made, resulting in a loss to the Fund. Janus Capital intends to manage the cash collateral in an affiliated cash management vehicle and will receive an investment advisory fee for managing such assets.

Short Sales

Certain Funds may engage in short sales. No more than 10% of a Fund's net assets may be invested in short positions (through short sales of stocks, structured products, futures, swaps, and uncovered written calls). The Funds may engage in short sales "against the box" and options for hedging purposes that are not subject to this 10% limit. A short sale is generally a transaction in which a Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. A short sale is subject to the risk that if the price of the security sold short increases in value, the Fund will incur a loss because it will have to replace the security sold short by purchasing it at a higher price. In addition, the Fund may not always be able to close out a short position at a particular time or at an acceptable price. A lender may request, or market conditions may dictate, that the securities sold short be returned to the lender on short notice, and the Fund may have to buy the securities sold short at an unfavorable price. If this occurs at a time that other short sellers of the same security also want to close out their positions, it is more likely that the Fund will have to cover its short sale at an unfavorable price and potentially reduce or eliminate any gain, or cause a loss, as a result of the short sale. Because there is no upper limit to the price a borrowed security may reach prior to closing a short position, a Fund's losses are potentially unlimited in a short sale transaction. A Fund's gains and losses will also be decreased or increased, as the case may be, by the amount of any dividends, interest, or expenses, including transaction costs and borrowing fees, the Fund may be required to pay in connection with a short sale. Such payments may result in the Fund having higher expenses than a Fund that does not engage in short sales and may negatively affect the Fund's performance.

A Fund may also enter into short positions through derivative instruments such as options contracts, futures contracts, and swap agreements which may expose the Fund to similar risks. To the extent that the Fund enters into short derivative positions, the Fund may be exposed to risks similar to those associated with short sales, including the risk that the Fund's losses are theoretically unlimited.

Due to certain foreign countries' restrictions, a Fund will not be able to engage in short sales in certain foreign countries where it may maintain long positions. As a result, a Fund's ability to fully implement a short selling strategy that could otherwise help the Fund pursue its investment goals may be limited. There can be no assurance that the implementation of a short sale strategy will be successful.

Special Situations

The Funds may invest in companies that demonstrate special situations or turnarounds, meaning companies that have experienced significant business problems but are believed to have favorable prospects for recovery. For example, a special situation or turnaround may arise when, in the opinion of a Fund's portfolio managers and/or investment personnel, the securities of a particular issuer will be recognized as undervalued by the market and appreciate in value due to a specific development with respect to that issuer. Special situations may include significant changes in a company's allocation of its

existing capital, a restructuring of assets, or a redirection of free cash flow. For example, issuers undergoing significant capital changes may include companies involved in spin-offs, sales of divisions, mergers or acquisitions, companies involved in bankruptcy proceedings, or companies initiating large changes in their debt to equity ratio. Companies that are redirecting cash flows may be reducing debt, repurchasing shares, or paying dividends. Special situations may also result from: (i) significant changes in industry structure through regulatory developments or shifts in competition; (ii) a new or improved product, service, operation, or technological advance; (iii) changes in senior management or other extraordinary corporate event; (iv) differences in market supply of and demand for the security; or (v) significant changes in cost structure. Investments in “special situations” companies can present greater risks than investments in companies not experiencing special situations, and a Fund’s performance could be adversely impacted if the securities selected decline in value or fail to appreciate in value.

Swap Agreements

Certain Funds may utilize swap agreements as a means to gain exposure to certain common stocks and/or to “hedge” or protect their portfolios from adverse movements in securities prices, the rate of inflation, or interest rates. Swaps may also be used for capital appreciation. Swap agreements are two-party contracts to exchange one set of cash flows for another. Swap agreements entail the risk that a party will default on its payment obligations to a Fund. If the other party to a swap defaults, the Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If a Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund’s total return. Various types of swaps such as credit default, equity, interest rate, and total return swaps are described in the “Glossary of Investment Terms.”

Other Types of Investments

Unless otherwise stated within its specific investment policies, each Fund may also invest in other types of domestic and foreign securities and use other investment strategies, as described in the “Glossary of Investment Terms.” These securities and strategies are not principal investment strategies of the Funds. If successful, they may benefit the Funds by earning a return on the Funds’ assets or reducing risk; however, they may not achieve the Funds’ investment objectives. These securities and strategies may include:

- debt securities (such as bonds, notes, and debentures)

- exchange-traded funds

- indexed/structured securities (such as mortgage- and asset-backed securities)

- various derivative transactions (which could comprise a significant percentage of a fund’s portfolio) including, but not limited to, options, futures, forwards, swap agreements (such as equity, interest rate, inflation index, credit default, and total return swaps), participatory notes, structured notes, and other types of derivatives individually or in combination for hedging purposes or for nonhedging purposes such as seeking to earn income and enhance return, to protect unrealized gains, or to avoid realizing losses; such techniques may also be used to adjust currency exposure relative to a benchmark index, to gain exposure to the market pending investment of cash balances, or to meet liquidity needs

- securities purchased on a when-issued, delayed delivery, or forward commitment basis

RISKS OF THE FUNDS

The value of your investment will vary over time, sometimes significantly, and you may lose money by investing in the Funds. To varying degrees, the Funds may invest in stocks, bonds, alternative strategy investments, and money market instruments or cash/cash equivalents. The following information is intended to help you better understand some of the risks of investing in the Funds. The impact of the following risks on a Fund may vary depending on the Fund’s investments. The greater the Fund’s investment in a particular security, the greater the Fund’s exposure to the risks associated with that security. Before investing in a Fund, you should consider carefully the risks that you assume when investing in the Fund.

Concentration Risk. Janus Global Life Sciences Fund focuses its investments in “life sciences” related industry groups. Because of this, companies in its portfolio may share common characteristics and react similarly to market developments. For example, many companies with a life science orientation are highly regulated and may be dependent upon certain types of technology. As a result, changes in government funding or subsidies, new or anticipated legislative changes, or technological

advances could affect the value of such companies and, therefore, the Fund's net asset value. As a result, the Fund may be subject to greater risks and its net asset value may fluctuate more than a fund that does not concentrate its investments.

Derivatives Risk. Derivatives can be highly volatile and involve risks in addition to the risks of the underlying referenced securities. Gains or losses from a derivative can be substantially greater than the derivative's original cost, and can therefore involve leverage. Derivatives can be complex instruments and may involve analysis that differs from that required for other investment types used by a Fund. If the value of a derivative does not correlate well with the particular market or other asset class to which the derivative is intended to provide exposure, the derivative may not produce the anticipated result. Derivatives can also reduce the opportunity for gain or result in losses by offsetting positive returns in other investments. Derivatives can be less liquid than other types of investments and entail the risk that the counterparty will default on its payment obligations. If the counterparty to a derivative transaction defaults, a Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. To the extent a Fund enters into short derivative positions, a Fund may be exposed to risks similar to those associated with short sales, including the risk that a Fund's losses are theoretically unlimited.

Emerging Markets Risk. Within the parameters of its specific investment policies, each Fund may invest in securities of issuers or companies from or with exposure to one or more "developing countries" or "emerging markets." Such countries include, but are not limited to, countries included in the Morgan Stanley Capital International Emerging Markets Indexsm. For Janus Emerging Markets Fund, such countries include any country that has been determined by an international organization, such as the World Bank, to have a low to middle income economy and/or any country that is not included in the Morgan Stanley Capital International World Indexsm, which measures the equity market performance of developed markets. To the extent that a Fund invests a significant amount of its assets in one or more of these countries, its returns and net asset value may be affected to a large degree by events and economic conditions in such countries. The risks of foreign investing are heightened when investing in emerging markets, which may result in the price of investments in emerging markets experiencing sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, or creation of government monopolies, any of which may have a detrimental effect on a Fund's investments. The securities markets of many of these countries may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for a Fund to obtain or to enforce a judgment against the issuers of such securities. In addition, a Fund's investments may be denominated in foreign currencies and therefore, changes in the value of a country's currency compared to the U.S. dollar may affect the value of the Fund's investments. To the extent that a Fund invests a significant portion of its assets in the securities of issuers in or companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region, which could have a negative impact on the Fund's performance. A Fund may be subject to emerging markets risk to the extent that it invests in securities of issuers or companies which are not considered to be from emerging markets, but which have customers, products, or transactions associated with emerging markets. Additionally, foreign and emerging market risks, including but not limited to price controls, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, nationalization, and restrictions on repatriation of assets may be heightened to the extent a Fund invests in Chinese local market equity securities (also known as "A Shares"). Some of the risks of investing directly in foreign and emerging market securities may be reduced when a Fund invests indirectly in foreign securities through various other investment vehicles including derivatives, which also involve other risks.

Foreign Exposure Risks. Each Fund will invest in foreign debt and equity securities either indirectly (e.g., depositary receipts, depositary shares, and passive foreign investment companies) or directly in foreign markets, including emerging markets. Investments in foreign securities, including securities of foreign and emerging markets governments, may involve greater risks than investing in domestic securities because a Fund's performance may depend on factors other than the performance of a particular company. These factors include:

Currency Risk. As long as a Fund holds a foreign security, its value will be affected by the value of the local currency relative to the U.S. dollar. When a Fund sells a foreign currency denominated security, its value may be worth less in U.S. dollars even if the security increases in value in its home country. U.S. dollar-denominated securities of foreign

issuers may also be affected by currency risk, as the value of these securities may also be affected by changes in the issuer's local currency.

Political and Economic Risk. Foreign investments may be subject to heightened political and economic risks, particularly in emerging markets which may have relatively unstable governments, immature economic structures, national policies restricting investments by foreigners, social instability, and different and/or developing legal systems. In some countries, there is the risk that the government may take over the assets or operations of a company or that the government may impose withholding and other taxes or limits on the removal of a Fund's assets from that country. In addition, the economies of emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Regulatory Risk. There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Foreign Market Risk. Foreign securities markets, particularly those of emerging market countries, may be less liquid and more volatile than domestic markets. These securities markets may trade a small number of securities, may have a limited number of issuers and a high proportion of shares, or may be held by a relatively small number of persons or institutions. Local securities markets may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of substantial holdings difficult or impossible at times. It is also possible that certain markets may require payment for securities before delivery, and delays may be encountered in settling securities transactions. In some foreign markets, there may not be protection against failure by other parties to complete transactions. It may not be possible for a Fund to repatriate capital, dividends, interest, and other income from a particular country or governmental entity. In addition, securities of issuers located in countries with emerging markets may have limited marketability and may be subject to more abrupt or erratic price movements which could also have a negative effect on a Fund. Such factors may hinder a Fund's ability to buy and sell emerging market securities in a timely manner, affecting the Fund's investment strategies and potentially affecting the value of the Fund.

Geographic Investment Risk. To the extent that a Fund invests a significant portion of its assets in a particular country or geographic region, the Fund will generally have more exposure to certain risks due to possible political, economic, social, or regulatory events in that country or region. Adverse developments in certain regions could also adversely affect securities of other countries whose economies appear to be unrelated and could have a negative impact on a Fund's performance.

Transaction Costs. Costs of buying, selling, and holding foreign securities, including brokerage, tax, and custody costs, may be higher than those involved in domestic transactions.

Geographic Concentration Risk. Because Janus Asia Equity Fund intends to focus its investments in a particular geographic region, the Fund's performance is expected to be closely tied to various factors such as the social, financial, economic, and political conditions within that region or country. Specifically, the Fund's investments in Asian issuers increase the Fund's exposure to various risks including, but not limited to, risks associated with volatile securities markets, currency fluctuations, social, political, and regulatory developments, economic environmental events (such as natural disasters), and changes in tax or economic policies, each of which, among others, may be particular to Asian countries or the region.
