THE EMERGING MARKETS SMALL CAP SERIES CONTINUED

[Table of Contents](#)

ORGANIZATION

The DFA Investment Trust Company (the "Trust") is an open-end management investment company registered under the Investment Company Act of 1940. The Trust's advisor is Dimensional Fund Advisors LP (the "Advisor"). At January 31, 2022, the Trust consisted of ten operational portfolios, of which nine are included in this document and are "Master Funds" in a master-feeder structure (collectively, the "Series").

SECURITY VALUATION

The Series use a fair value hierarchy, which prioritizes the inputs-to-valuation techniques used to measure fair value into three broad levels described below:

- Level 1 - inputs are quoted prices in active markets for identical securities (including equity securities, open-end investment companies and futures contracts)
- Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Series' own assumptions in determining the fair value of investments)

Securities held by the Domestic Equity Portfolio (The U.S. Large Cap Value Series) and the International Equity Portfolios (The DFA International Value Series, The Japanese Small Company Series, The Asia Pacific Small Company Series, The United Kingdom Small Company Series, The Continental Small Company Series, The Canadian Small Company Series, The Emerging Markets Series and The Emerging Markets Small Cap Series), including over-the-counter securities, are valued at the last quoted sale price of the day. International equity securities are subject to a fair value factor, as described later in this note. Securities held by the Domestic Equity Portfolios and the International Equity Portfolios that are listed on Nasdaq are valued at the Nasdaq Official Closing Price ("NOCP"). If there is no last reported sale price or NOCP for the day, the Domestic Equity Portfolios and the International Equity Portfolios value the securities within the range of the most recent quoted bid and ask prices. Price information on listed securities is taken from the exchange where the security is primarily traded. Generally, securities issued by open-end management investment companies are valued using their respective net asset values or public offering prices, as appropriate, for purchase orders placed at the close of the New York Stock Exchange (NYSE). These securities are generally categorized as Level 1 in the hierarchy.

Securities for which no market quotations are readily available (including restricted securities), or for which market quotations have become unreliable, are valued in good faith at fair value in accordance with procedures adopted by the Board of Trustees of the Trust. Fair value pricing may also be used if events that have a significant effect on the value of an investment (as determined in the discretion of the Advisor) occur before the net asset value of the Series is calculated. When fair value pricing is used, the prices of securities used by the Series may differ from the quoted or published prices for the same securities on their primary markets or exchanges. These securities are generally categorized as Level 2 or Level 3 in the hierarchy.

The International Equity Portfolios will also apply a fair value price in the circumstances described below. Generally, trading in foreign securities markets is completed each day at various times prior to the close of the NYSE. For example, trading in the Japanese securities markets is completed each day at the close of the Tokyo Stock Exchange (normally, 2:00 a.m. ET), which is fourteen hours before the close of the NYSE (normally, 4:00 p.m. ET) and the time that the net asset values of the International Equity Portfolios are computed. Due to the time differences between the closings of the relevant foreign securities exchanges and the time the International Equity Portfolios price their shares at the close of the NYSE, the International Equity Portfolios will fair value their foreign investments when it is determined that the market quotations for the foreign investments are either unreliable or not readily available. The fair value prices will attempt to reflect the impact of the U.S. financial markets' perceptions and trading activities on the International Equity Portfolios' foreign investments since the last closing prices of the foreign investments were calculated on their primary foreign securities markets or exchanges. For these purposes, the Board of Trustees of the Fund has determined that movements in relevant indices or other appropriate market indicators, after the close of the Tokyo Stock Exchange or the London Stock Exchange, demonstrate that market quotations may be unreliable. Fair valuation of portfolio securities may occur on a daily basis. The fair value pricing by the International Equity Portfolios uses data furnished by an independent pricing service (and that data draws upon, among other information, the

[Table of Contents](#)

market values of foreign investments). When an International Equity Portfolio uses fair value pricing, the values assigned to the International Equity Portfolio's foreign investments may not be the quoted or published prices of the investments on their primary markets or exchanges. These securities are generally categorized as Level 2 in the hierarchy.

Futures contracts held by the Series are valued using the settlement price established each day on the exchange on which they are traded. These valuations are generally categorized as Level 1 in the hierarchy.

Over-the-counter derivative contracts, which include forward currency contracts, do not require material subjectivity as pricing inputs are observed from quoted markets and are categorized as Level 2 in the hierarchy.

A summary of the inputs used to value the Series' investments by each major security type, industry and/or country is disclosed previously in this note. A valuation hierarchy table has been included at the end of the Schedule of Investments. The methodology or inputs used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

FINANCIAL INSTRUMENTS

In accordance with the Series' investment objectives and policies, the Series may invest in certain financial instruments that have off-balance sheet risk in excess of the amounts recognized in the financial statements and concentrations of credit and market risk. These instruments and their significant corresponding risks are described below:

1. **FOREIGN MARKET RISKS:** Investments in foreign markets may involve certain considerations and risks not typically associated with investments in the United States of America, including the possibility of future political and economic developments and the level of foreign governmental supervision and regulation of foreign securities markets. These markets are generally smaller, less liquid and more volatile than the major securities markets in the United States of America. Consequently, acquisition and disposition of international securities held by the Series may be inhibited.

Derivative Financial Instruments

Summarized below are the specific types of derivative instruments used by the Series:

2. **FUTURES CONTRACTS:** The Series may purchase or sell futures contracts and options on futures contracts for equity securities and indices to increase or decrease market exposure based on actual or expected cash inflows to or outflows from the Series. Upon entering into a futures contract, a Series deposits cash or pledges U.S. Government securities to a broker in an amount equal to the minimum "initial margin" requirements of the exchange on which the contract is traded. Subsequent payments are received from or paid to the broker each day, based on the daily fluctuation in the market value of the contract. These receipts or payments are known as "variation margin" and are recorded daily by the Series as unrealized gains or losses until the contracts are closed. When the contracts are closed, the Series records a realized gain or loss, which is presented in the Statements of Operations as a net realized gain or loss on futures, equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Risks may arise upon entrance into futures contracts from potential imperfect price correlations between the futures contracts and the underlying securities or indices, from the possibility of an illiquid secondary market for these instruments and from the possibility that the Series could lose more than the initial margin requirements. Entering into stock index futures subjects the Series to equity price risk from those futures contracts. Counterparty credit risk related to exchange-traded futures is minimal because the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default.

FEDERAL TAX COST

At January 31, 2022, the total cost of securities for federal income tax purposes was:

	Federal Tax Cost
The U.S. Large Cap Value Series	\$17,107,085
The DFA International Value Series	10,656,397
The Japanese Small Company Series	3,035,155

[Table of Contents](#)

	Federal Tax Cost
The Asia Pacific Small Company Series	\$ 1,743,699
The United Kingdom Small Company Series	1,479,890
The Continental Small Company Series	4,822,593
The Canadian Small Company Series	1,330,333

The Emerging Markets Series.....	3,582,927
The Emerging Markets Small Cap Series.....	4,141,824

RECENTLY ISSUED ACCOUNTING STANDARDS AND REGULATIONS

In March 2020, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2020-04, Reference Rate Reform (Topic 848) – Facilitation of the Effects of Reference Rate Reform on Financial Reporting. In January 2021, the FASB issued ASU No. 2021-01, with further amendments to Topic 848. The amendments in the ASUs provide optional temporary accounting recognition and financial reporting relief from the effect of certain types of contract modifications due to the planned discontinuation of the LIBOR and other interbank-offered based reference rates as of the end of 2021 and 2023. The ASUs are effective for certain reference rate-related contract modifications that occur during the period March 12, 2020 through December 31, 2022. Management has reviewed the requirements and believes the adoption of these ASUs will not have a material impact on the Series' financial statements.

In October 2020, the SEC adopted new regulations governing the use of derivatives by registered investment companies. Rule 18f-4 (the "Derivatives Rule") imposes limits on the amount of derivatives contracts the Series could enter, eliminate the asset segregation framework currently used by the Series to comply with Section 18 of the 1940 Act, and require funds whose use of derivatives is more than a limited specified exposure to establish and maintain a derivatives risk management program and appoint a derivatives risk manager. The Derivatives Rule became effective February 19, 2021 and the Series are required to comply on August 19, 2022. Management is currently evaluating the effect, if any, the Derivatives Rule will have on the Series.

On December 3, 2020, the SEC adopted new Rule 2a-5 (the "Valuation Rule") under the Investment Company Act of 1940, establishing an updated regulatory framework for fund valuation. The Valuation Rule, in part, provides a framework for good faith fair value determination and permits a Board to designate fair value determinations to a fund's investment adviser. Further, the SEC is rescinding previously issued guidance on related issues. The Valuation Rule became effective on March 8, 2021, with a compliance date of September 8, 2022. Management is currently evaluating the Valuation Rule and its effect on the Series.

CORONAVIRUS (COVID-19) PANDEMIC

The ongoing outbreak of the novel coronavirus, COVID-19, has resulted, at times, in market closures, market volatility, liquidity constraints and increased trading costs. Efforts to contain the spread of COVID-19 have resulted in global travel restrictions and disruptions of healthcare systems, business operations and supply chains, layoffs, reduced consumer demand, defaults and credit rating downgrades, and other significant economic impacts. The effects of COVID-19 have impacted global economic activity and may heighten pre-existing political, social and economic risks, domestically or globally. The full impact of the COVID-19 pandemic is unpredictable and may adversely affect a Series' performance.

OTHER

The Series and the Trust are subject to claims and suits that arise from time to time in the ordinary course of business (for example, ongoing claw back litigation against former shareholders of portfolio companies that filed for bankruptcy, such as The Tribune Company and Nine West). Although management currently believes that resolving claims against the Series and the Trust, individually or in aggregate, will not have a material adverse impact on the Series' and the Trust's financial position, results of operations, or cash flows, these matters are subject to inherent uncertainties and management's view of these matters may change in the future.

On June 3, 2021, President Biden issued an Executive Order titled "Addressing the Threat from Securities Investments that Finance Certain Companies of the People's Republic of China" (the "Order"). Effective on August 2, 2021, the Order restricts investment in certain companies identified as "Chinese Military Industrial Complex

[Table of Contents](#)

Companies" (CMICs) by the Office of Foreign Asset Control, an agency of the Department of Treasury and the Department of Defense. As of July 27, 2021, the Series have divested of all publicly traded securities identified as CMIC's listed in the Order.

SUBSEQUENT EVENT EVALUATIONS

Management has evaluated the impact of all subsequent events on the Series through the date on which the financial statements were issued and has determined that there are no subsequent events requiring recognition or disclosure in the financial statements.
