Investment Objective

The Gabelli Gold Fund (the "Fund") seeks to provide investors with long-term capital appreciation.

More Information about these and other discounts is available from your financial professional and in the section entitled "Classes of Shares" on page 13 of the Prospectus.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class A Shares	\$ 715	\$1,010	\$1,327	\$ 2,221
Class B Shares	\$ 724	\$991	\$1,385	\$ 2,355
Class C Shares	\$ 324	\$691	\$1,185	\$ 2,544
Class I Shares	\$ 123	\$384	\$665	\$ 1,466

You would pay the following expenses if you did not redeem your shares of the Fund:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class A Shares	\$ 715	\$1,010	\$1,327	\$2,221
Class B Shares	\$ 224	\$691	\$1,185	\$2,355
Class C Shares	\$ 224	\$691	\$1,185	\$2,544
Class I Shares	\$ 123	\$384	\$665	\$1,466

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 4% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in equity securities of foreign and domestic issuers principally engaged in gold-related activities and gold bullion (the “80% Investment Policy”).

In selecting investments for the Fund, Gabelli Funds, LLC, the Fund’s investment adviser (the “Adviser”), focuses on stocks that are undervalued, but which appear to have favorable prospects for growth. Factors considered in this determination include capitalization per ounce of production, capitalization per ounce of recoverable reserves, quality of management, and the issuer’s ability to create shareholder wealth.

Because most of the world’s gold production is outside of the United States, the Fund expects that a significant portion of its assets may be invested in securities of foreign issuers, including those located in developed as well as emerging markets.

An important function of the Adviser’s investment process is to, among other things, establish through the Adviser’s research, a value at which a particular stock may be sold, provided there are no other fundamental changes in the business. The Adviser constantly monitors the Fund’s holdings to determine if such holdings continue to act in accordance with the factors described above and the Fund’s investment objective. The Adviser may sell a holding if its fundamentals deteriorate or change in a way, as determined by the Adviser, that the investment case for the holding is no longer appropriate for the Fund.

You May Want to Invest in the Fund if:

- you are investing for a long-term goal such as retirement
- you are looking to add an aggressive growth component to your portfolio
- you are willing to accept higher risks of investing in a sector of the stock market in exchange for long-term returns

Principal Risks

An investment in the Fund is not guaranteed; you may lose money by investing in the Fund. When you sell your shares of the Fund, they could be worth more or less than what you paid for them.

The principal risks presented by the Fund are:

Equity Risk. Equity risk is the risk that the prices of the securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer company’s particular circumstances.

Gold-Related Risks. Investments related to gold and other precious metals and minerals are considered speculative and are affected by a variety of worldwide economic, financial, and political factors.

Fund and Management Risk. If the portfolio manager is incorrect in his assessment of the securities the Fund holds, then the value of the Fund' s shares may decline.

Foreign Securities Risk. A fund that invests outside the United States carries additional risks that include:

Currency Risk. Fluctuations in exchange rates between the U.S. dollar and foreign currencies may negatively affect an investment.

Information Risk. Key information about an issuer, security, or market may be inaccurate or unavailable.

Political Risk. Foreign governments may expropriate assets, impose capital or currency controls, impose punitive taxes, or nationalize a company or industry.

Access Risk. The risk that some countries may restrict the Fund's access to investments or offer terms that are less advantageous than those for local investors.

Emerging Markets Risk. Investing in emerging (less developed) markets involves higher levels of risk, including increased currency, information, liquidity, market, political, and valuation risks.

Concentration Risk. The Fund may be subject to greater volatility with respect to its portfolio securities than a fund that is more broadly diversified.

Performance

The bar chart and table that follow provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year, and by showing how the Fund's average annual returns for one year, five years and ten years compare with those of broad based securities market indices and other related indexes. As with all mutual funds, the Fund's past performance (before and after taxes) does not predict how the Fund will perform in the future. Updated information on the Fund's results can be obtained by visiting www.gabelli.com.

GABELLI GOLD FUND, INC.
(Total Returns for Class A Shares for the Years Ended December 31)

The returns shown for Class A, Class B, Class C, and Class I Shares prior to their first issuance dates are those of the Class AAA Shares of the Fund which are not offered in this Prospectus. All Classes of the Fund would have substantially similar annual returns because the shares are invested in the same portfolio of securities and the annual returns would differ only to the extent that the Classes do not have the same expenses.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. In some instances, the “Return After Taxes on Distributions and Sale of Fund Shares” may be greater than “Return Before Taxes” and “Return After Taxes on Distributions” because the investor is assumed to be able to use the capital loss from the sale of Fund shares to offset other taxable gains. Actual after-tax returns depend on the investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax deferred arrangements, such as 401(k) plans or individual retirement accounts, including “Roth” IRAs and SEP IRAs (collectively, “IRAs”). After-tax returns are shown only for Class A Shares. After-tax returns for other classes will vary due to the differences in expenses.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains to taxable investors.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of the Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
