Notes to Condensed Consolidated Financial Statements (unaudited)
November 30, 2012

Note 1. - Summary of Significant Accounting Policies

The accompanying condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries after elimination of all significant intercompany accounts and transactions.

As contemplated by the Securities and Exchange Commission (the "SEC" or "Commission") instructions to Form 10-Q, the following footnotes have been condensed and, therefore, do not contain all disclosures required in connection with annual consolidated financial statements. Reference should be made to the Company's year-end consolidated financial statements and notes thereto, including a description of the accounting policies followed by the Company, contained in its Annual Report on Form 10-K for the fiscal year ended February 29, 2012, as filed with the Commission. There are no material changes in accounting policy during the nine months ended November 30, 2012.

The consolidated financial information included in this report has been prepared by the Company, without audit. In the opinion of management, the financial information included in this report contains all adjustments (all of which are normal and recurring) necessary for a fair presentation of the results for the interim periods. Nevertheless, the results shown for interim periods are not necessarily indicative of results to be expected for the full year. The February 29, 2012 consolidated balance sheet data was derived from the audited consolidated financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America.

Note 2. - Liquidity

On December 23, 2010, the Company and its subsidiaries executed a new Credit Agreement with RBC Bank and Community & Southern Bank (collectively, the "Banks") to provide new financing to the Company to replace the existing credit agreement with RBC Bank that terminated in conjunction with this Agreement. The new Agreement provided for a line of credit of up to \$17.5 million and two term loans of \$3.5 million and \$3.0 million.

1st Amendment: On May 26, 2011, the Banks amended the Credit Agreement to reduce the revolver commitment to \$15.0 million, restate the covenants to pertain to only continuing operations of the Company and to adjust the targets for the senior funded debt to EBITDA covenant for the Company's quarters ending May 31, 2011 and August 31, 2011.

2nd Amendment: On July 26, 2011, the Banks again amended the Credit Agreement to include a swing-line promissory note of \$1.0 million that is included in the revised \$15.0 million revolver commitment.

3rd Amendment: On September 1, 2011, the Banks amended the Credit Agreement to allow the Company to repurchase a limited amount of the Company's common stock, equal to ten percent of the Company's net earnings after taxes, subject to meeting certain share repurchase conditions and revised the definition of the fixed charge coverage ratio and total liabilities to tangible net worth to exclude such repurchases.

4th Amendment: On January 17, 2012, the Banks amended the Credit Agreement to allow the Company to purchase a promissory note, dated July 23, 2010, held by Hetra Secure Solutions Corporation on StingRay56.

5th Amendment: On March 5, 2012, the Banks amended the Credit Agreement to allow the Company to acquire StingRay56, Inc.

The outstanding balance of the line of credit at November 30, 2012 was \$11.1 million and the outstanding balances of the term loans were \$2.2 million and \$2.6 million, respectively. The outstanding balance of the line of credit at February 29, 2012 was \$11.1 million and the outstanding balances of the term loans were \$2.7 million and \$2.8 million, respectively. These loans are secured by all assets and personal property of the Company and a limited guarantee of the Chief Executive Officer of \$3.0 million. The \$3.0 million term loan is secured by real estate property of the Company and a building owned by Southeastern Metro Savings, LLC, a company in which the Company's Chief Executive Officer is a minority owner. The building will continue to be in the collateral pool until such time as the note is sufficiently paid down or it is replaced by other collateral.

Video Display Corporation and Subsidiaries
Notes to Condensed Consolidated Financial Statements (unaudited)
November 30, 2012

The Agreement contains three covenants: a fixed charge coverage ratio, ratio of senior funded debt to earnings before interest, taxes, depreciation and amortization (EBITDA), and total liabilities to tangible net worth. The Agreement also includes restrictions on the incurrence of additional debt or liens, investments (including Company stock), divestitures and certain other changes in the business. The Agreement expires on December 1, 2013. The interest rate on these loans is a floating LIBOR rate based on a fixed charge coverage ratio, minimum 4.0%, as defined in the loan documents.

As of November 30, 2012, the Company was not in compliance with the senior funded debt to EBITDA ratio and permitted share repurchases covenants as defined by the Banks credit line agreements. A breach of these covenants could result in default under our debt agreement, which could prompt the lender to declare all amounts outstanding under the debt agreement to be immediately due and payable and terminate all commitments to extend further credit. If the Company were unable to repay those amounts, the lender could proceed against the collateral granted to secure that indebtedness. If the lender under the debt agreement accelerates the repayment of the borrowings, there can be no assurance that the Company will have sufficient assets and funds to repay the borrowings under its debt agreements. The Company has been in talks with other banks about refinancing the current debt under an agreement with less restrictive covenants and borrowing base calculations. Management believes that a new debt agreement can be obtained by the end of the fourth quarter, however, there can be no assurance that an agreement can be reached that is reasonable to the Company or at all. Additionally, due to the activity generated by the chairman's remarks at the annual shareholder meeting concerning any potential mergers, spinoffs, sale of the Company as a whole or any other method (see 8-K), the Company put negotiations on hold with the banks amendment of the facility or potential refinance until the uncertainty and any potential outcomes could be realized. Upon any definite agreement being reached, the Company will resume the negotiations on its debt facility. As a result of these violations and the Company's likelihood of not meeting them at the next reporting period, the debt has been classified as current at November 30, 2012. The senior funded debt to EBITDA covenant was deemed to be the most restrictive by the Company and the Banks.

Note 3. - Recent Accounting Pronouncements

In September 2011, the FASB issued revised guidance FASB ASU 2011-08, "*Intangibles - Goodwill and Other (Topic 350) - Testing Goodwill for Impairment*" to allow entities to use a qualitative approach to test goodwill for impairment. The amendment permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted and the Company has chosen early adoption. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In July 2012, the FASB issued revised guidance FASB ASU 2012-02, "*Testing Indefinite Lived Assets for Impairment*" to allow entities to consider qualitative values in determining whether or not indefinite lived assets should be tested for impairment. If it is more likely than not that impairment exists, testing for impairment should be performed. The update is effective for fiscal years beginning after September 15, 2012 but early adoption is permitted. Management believes that the adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

Video Display Corporation and Subsidiaries
Notes to Condensed Consolidated Financial Statements (unaudited)
November 30, 2012

Note 4. - Inventories

Inventories are stated at the lower of cost (first in, first out) or market.

Inventories consisted of the following (in thousands):

	November 30, 2012	February 29, 2012
Raw materials	\$ 21,295	\$ 19,106
Work-in-process	6,687	6,853
Finished goods	7,560	7,027
	35,542	32,986
Reserves for obsolescence	(3,958)	(3,250)
	<u>\$ 31,584</u>	<u>\$ 29,736</u>

Note 5. - Costs and Estimated Earnings Related to Billings on Uncompleted Contracts

Information relative to contracts in progress consisted of the following:

	November 30, 2012	February 29, 2012
Costs incurred to date on uncompleted contracts	\$ 5,088	\$ 7,499
Estimated earnings recognized to date on these contracts	2,795	4,373
	7,883	11,872
Billings to date	(4,835)	(8,978)
Costs and estimated earnings in excess of billings, net	<u>\$ 3,048</u>	<u>\$ 2,894</u>
Costs and estimated earnings in excess of billings	\$ 3,244	\$ 3,236
Billings in excess of costs and estimated earnings	(196)	(342)
	<u>\$ 3,048</u>	<u>\$ 2,894</u>

Costs and estimated earnings in excess of billings are the results of contracts in progress (jobs) in completing orders to customers' specifications on contracts accounted for under FASB ASC 605-35, "Revenue Recognition: Construction-Type and Production-Type Contracts." Costs included are material, labor, and overhead. These jobs require design and engineering effort for a specific customer purchasing a unique product. The Company records revenue on these fixed-price and cost-plus contracts on the percentage of completion basis using the ratio of costs incurred to estimated total costs at completion as the measurement basis for progress toward completion and revenue recognition. Any losses identified on contracts are recognized immediately. Contract accounting requires significant judgment relative to assessing risks, estimating contract costs and making related assumptions for schedule and technical issues. With respect to contract change orders, claims, or similar items, judgment must be used in estimating related amounts and assessing the potential for realization. These amounts are only included in contract value when they can be reliably

Video Display Corporation and Subsidiaries
Notes to Condensed Consolidated Financial Statements (unaudited)
November 30, 2012

estimated and realization is probable. Billings are generated based on specific contract terms, which might be a progress payment schedule, specific shipments, etc. None of the above contracts in progress contain post-shipment obligations.

Changes in job performance, manufacturing efficiency, final contract settlements, and other factors affecting estimated profitability may result in revisions to costs and income and are recognized in the period in which the revisions are determined.

As of November 30, 2012 and February 29, 2012, there were no production costs that exceeded the aggregate estimated cost of all in-process and delivered units relating to long-term contracts. Additionally, there were no claims outstanding that would affect the ultimate realization of full contract values. As of November 30, 2012 and February 29, 2012, there were no progress payments that had been netted against inventory.

Note 6. - Intangible Assets

Intangible assets consist primarily of the unamortized value of purchased patents, customer lists, non-compete agreements and other intangible assets. Intangible assets are amortized over the period of their expected lives, generally ranging from 5 to 15 years. Amortization expense related to intangible assets was approximately \$179 thousand and \$222 thousand for the nine months ended November 30, 2012 and 2011, respectively.

The cost and accumulated amortization of intangible assets were as follows (in thousands):

	November 30, 2012		February 29, 2012	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Customer lists	\$3,611	\$ 2,788	\$3,611	\$ 2,701
Non-compete agreements	1,245	1,245	1,245	1,245
Patents	777	708	777	692
Other intangibles	649	498	649	423
	<u>\$6,282</u>	<u>\$ 5,239</u>	<u>\$6,282</u>	<u>\$ 5,061</u>

Video Display Corporation and Subsidiaries
Notes to Condensed Consolidated Financial Statements (unaudited)
November 30, 2012

Note 7. - Long-term Debt

Long-term debt consisted of the following (in thousands):

	November 30, 2012	February 29, 2012
Note payable to RBC Bank and Community & Southern Bank; interest rate at LIBOR plus applicable margin as defined per the loan agreement, minimum 4.00% (2.51% combined rate as of November 30, 2012); monthly principal payments of \$58 plus accrued interest, payable through December 2013 with an extension to December 2015 with a renewal of the credit agreement in December 2013; collateralized by all assets of the Company.	\$ 2,158	\$ 2,683
Note payable to RBC Bank and Community & Southern Bank; interest rate at LIBOR plus applicable margin as defined per the loan agreement, minimum 4.00% (2.51% combined rate as of November 30, 2012); monthly principal payments of \$17 plus accrued interest, payable through December 2013 with an extension to December 2025 with a renewal of the credit agreement in December 2013; collateralized by three properties of the Company and one property owned by the Chief Executive Officer.	2,617	2,767
Mortgage payable to bank; interest rate at Community Banks Base Rate plus 0.5% (3.75% as of November 30, 2012); monthly principal and interest payments of \$5 payable through October 2021; collateralized by land and building of Aydin Display Systems, Inc.	339	373
	5,114	5,823
Less current maturities	(4,821)	(945)
	\$ 293	\$ 4,878

Note 8. - Lines of Credit

On December 23, 2010, the Company and its subsidiaries executed a new Credit Agreement with RBC Bank and Community & Southern Bank (collectively, the "Banks") to provide new financing to the Company to replace the existing credit agreement with RBC Bank that terminated in conjunction with this Agreement. The new Agreement provided for a line of credit of up to \$17.5 million and two term loans of \$3.5 million and \$3.0 million.

1st Amendment: On May 26, 2011, the Banks amended the Credit Agreement to reduce the revolver commitment to \$15.0 million, restate the covenants to pertain to only continuing operations of the Company and to adjust the targets for the senior funded debt to EBITDA covenant for the Company's quarters ending May 31, 2011 and August 31, 2011.

Video Display Corporation and Subsidiaries
Notes to Condensed Consolidated Financial Statements (unaudited)
November 30, 2012

2nd Amendment: On July 26, 2011, the Banks again amended the Credit Agreement to include a swing-line promissory note of \$1.0 million that is included in the revised \$15.0 million revolver commitment.

3rd Amendment: On September 1, 2011, the Banks amended the Credit Agreement to allow the Company to repurchase a limited amount of the Company's common stock, equal to ten percent of the Company's net earnings after taxes, subject to meeting certain share repurchase conditions and revised the definition of the fixed charge coverage ratio and total liabilities to tangible net worth to exclude such repurchases.

4th Amendment: On January 17, 2012, the Banks amended the Credit Agreement to allow the Company to purchase a promissory note, dated July 23, 2010, held by Hetra Secure Solutions Corporation on StingRay56.

5th Amendment: On March 5, 2012, the Banks amended the Credit Agreement to allow the Company to acquire StingRay56, Inc.

The outstanding balance of the line of credit at November 30, 2012 was \$11.1 million and the balances of the term loans were \$2.2 million and \$2.6 million, respectively. The outstanding balance of the line of credit at February 29, 2012 was \$11.1 million and the balances of the term loans were \$2.7 million and \$2.8 million, respectively. These loans are secured by all assets and personal property of the Company and a limited guarantee of the Chief Executive Officer of \$3.0 million. The \$3.0 million term loan is secured by real estate property of the Company and a building owned by Southeastern Metro Savings, LLC, a company in which the Company's Chief Executive Officer is a minority officer. The building will continue to be in the collateral pool until such time as the note is sufficiently paid down or it is replaced by other collateral.

The Agreement contains three covenants: a fixed charge coverage ratio, ratio of senior funded debt to earnings before interest, taxes, depreciation and amortization (EBITDA), and total liabilities to tangible net worth. The Agreement also includes restrictions on the incurrence of additional debt or liens, investments (including Company stock), divestitures and certain other changes in the business. Substantially all of the Company's retained earnings are restricted based upon these covenants. The Agreement expires on December 1, 2013. The interest rate on these loans is a floating LIBOR rate based on a fixed charge coverage ratio, minimum 4.0%, as defined in the loan documents.

As of November 30, 2012, the Company was not in compliance with the senior funded debt to EBITDA ratio and permitted share repurchases covenants as defined by the Banks credit line agreements. A breach of these covenants could result in default under our debt agreement, which could prompt the lender to declare all amounts outstanding under the debt agreement to be immediately due and payable and terminate all commitments to extend further credit. If the Company were unable to repay those amounts, the lender could proceed against the collateral granted to secure that indebtedness. If the lender under the debt agreement accelerates the repayment of the borrowings, there can be no assurance that the Company will have sufficient assets and funds to repay the borrowings under its debt agreements. The Company has been in talks with other banks about refinancing the current debt under an agreement with less restrictive covenants and borrowing base calculations. Management believes that a new debt agreement can be obtained by the end of the fourth quarter, however, there can be no assurance that an agreement can be reached that is reasonable to the Company or at all. Additionally, due to the activity generated by the chairman's remarks at the annual shareholder meeting concerning any potential mergers, spinoffs, sale of the Company as a whole or any other method (see 8-K), the Company put negotiations on hold with the banks amendment of the facility or potential refinance until the uncertainty and any potential outcomes could be realized. Upon any definite agreement being reached, the Company will resume the negotiations on its debt facility. As a result of these violations and the Company's likelihood of not meeting them at the next reporting period, the debt has been classified as current at November 30, 2012. The senior funded debt to EBITDA covenant was deemed to be the most restrictive by the Company and the Banks.

Note 9. - Gain on Sale of Property, Plant and Equipment

On July 5, 2012 the Company sold its property at 8-18 Riverside Drive in White Mills, PA for \$750 thousand. The Company received a \$60 thousand down payment and financed the remaining \$690 thousand on a ten-year note at an 8% interest rate. The Company is accounting for the sale on the installment method. The total gain on the sale is approximately \$602 thousand. The Company recognized approximately \$48 thousand of the gain at the time of the sale and the remaining gain of approximately \$554 thousand will be recognized as payments are received.

Note 10. - Supplemental Cash Flow Information

Note 11. - Shareholder' s Equity

Earnings Per Share

Basic earnings per share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding during each period. Shares issued during the period are weighted for the portion of the period that they were outstanding. Diluted earnings per share is calculated in a manner consistent with that of basic earnings per share while giving effect to all dilutive potential common shares that were outstanding during the period.

The following table sets forth the computation of basic and diluted earnings per share for the three and nine month periods ended November 30, 2012 and 2011 (in thousands, except per share data):

	Net Income	Weighted Average Common Shares Outstanding	Earnings Per Share
Three months ended November 30, 2012			
Basic	\$148	7,566	\$0.02
Effect of dilution:			
Options	-	49	-
Diluted	<u>\$148</u>	<u>7,615</u>	<u>\$0.02</u>
Three months ended November 30, 2011			
Basic	\$1,258	7,628	\$0.17
Effect of dilution:			
Options	-	55	-
Diluted	<u>\$1,258</u>	<u>7,683</u>	<u>\$0.17</u>
Nine months ended November 30, 2012

November 30, 2012

Stock-Based Compensation Plans

For the nine-month period ended November 30, 2012 and 2011, the Company recognized general and administrative expenses of \$7.7 thousand and \$2.0 thousand, respectively, related to share-based compensation. The liability for the share-based compensation recognized is presented in the consolidated balance sheets as part of additional paid in capital. As of November 30, 2012, total unrecognized compensation costs related to stock options granted was \$5.6 thousand. The unrecognized stock option compensation cost is expected to be recognized over a period of approximately 1 year.

The Company estimates the fair value of stock options granted using the Black-Scholes option-pricing model, which requires the Company to estimate the expected term of the stock option grants and expected future stock price volatility over the term. The term represents the expected period of time the Company believes the options will remain outstanding based on historical information. Estimates of expected future stock price volatility are based on the historic volatility of the Company's common stock, which represents the standard deviation of the differences in the weekly stock closing price, adjusted for dividends and stock splits.

Three members of the board of directors were each granted 3,000 stock options during the nine-month period ended November 30, 2012.

Stock Repurchase Program

The Company has a stock repurchase program, pursuant to which it was originally authorized to repurchase up to 1,632,500 shares of the Company's common stock in the open market. On July 8, 2009, the Board of Directors of the Company approved a one time continuation of the stock repurchase program, and authorized the Company to repurchase up to 1,000,000 additional shares of the Company's common stock, depending on the market price of the shares. There is no minimum number of shares required to be repurchased under the program. For the nine months ended November 30, 2012, the Company repurchased 22,031 shares at an average price of \$4.10 per share. The Company repurchased 57,087 shares in the nine months ended November 30, 2011. Under the Company's stock repurchase program, an additional 705,106 shares remain authorized to be repurchased by the Company at November 30, 2012. The Credit Agreement executed by the Company on December 23, 2010 included restrictions on investments that restricted further repurchases of stock under this program. On September 1, 2011, the Agreement was amended to allow the Company to repurchase a limited amount of the Company's common stock, equal to ten percent of the Company's net earnings after taxes subject to meeting certain share repurchase conditions.

Note 12. - Income Taxes

The effective tax rate for the nine months ended November 30, 2012 and 2011 was 12.1% and 30.9%, respectively. These rates differ from the Federal statutory rate primarily due to the effect of state taxes, the permanent non-deductibility of certain expenses for tax purposes, and research and experimentation credits.

Note 13. - Related Party Transactions

In conjunction with an agreement involving re-financing of the Company's lines of credit and Loan and Security Agreement, on June 29, 2006 the Company's CEO provided a \$6.0 million subordinated term note to the Company with monthly principal payments of \$33.3 thousand plus interest through July 2021. The interest rate on the note was equal to the prime rate plus one percent. The note was secured by a general lien on all assets of the Company, subordinate to the lien held by RBC Bank and Community & Southern Bank. During fiscal 2012, the Company repaid the remaining balance under this loan agreement on November 28, 2011 with consent from RBC Bank and Community & Southern Bank. The payoff was approximately \$1.0 million. Interest paid on the loan in the nine months ending November 30, 2011 was \$86.4 thousand.

Video Display Corporation and Subsidiaries
Notes to Condensed Consolidated Financial Statements (unaudited)
November 30, 2012

The Company's CEO provides a portion of the collateral for the term loans with the consortium of RBC Bank and Community & Southern Bank. (See Note 8 - Lines of Credit)

Note 14. - Legal Proceedings

During 2007, the Company acquired the Cathode Ray Tube Manufacturing and Distribution Business and certain other assets of Clinton Electronics Corp. ("Clinton"), including inventory and fixed assets, for a total purchase price of \$2,550,000, pursuant to an Asset Purchase Agreement between the parties (the "APA"). The form of consideration for the assets acquired included: (i) a \$1.0 million face value Convertible Note; (ii) an agreement to deliver a stock certificate representing Company Common Shares having a \$1,125,000 in market value of the Company's common stock in January of 2008; and (iii) an agreement to deliver a stock certificate representing Company Common Shares having a \$500,000 in market value of the Company's common stock in January of 2009. The Company had paid the \$1.0 million Note Payable in January 2008. The Company disputed certain representations made by Clinton in the APA including, but not limited to, representations concerning revenue, expenses, and inventory. As a result of this dispute, the Company did not issue the stock certificates scheduled for delivery January of 2008 and January of 2009. As such, the Company had accrued a potential liability of \$1,625,000 and this accrued liability was reflected in the Company's Balance Sheet until the settlement was reached.

On August 24, 2011, the Company and the Clinton Electronics Corporation signed a settlement agreement ending the dispute involving the purchase of certain assets by the Company, pursuant to an Asset Purchase Agreement between the two companies. Prior to the negotiated settlement, the companies had agreed to arbitrate the dispute.

The terms of the settlement were not disclosed. There was no effect to the income statement due to the settlement. The previously accrued liability covered the settlement and the write off of inventory from the original agreement. The settlement did not have a material adverse effect on the Company's business, consolidated financial condition, results of operation or cash flows.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the attached interim condensed consolidated financial statements and with the Company's 2012 Annual Report to Shareholders, which included audited consolidated financial statements and notes thereto for the fiscal year ended February 29, 2012, as well as Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

The Company is a worldwide leader in the manufacturing and distribution of a wide range of display devices, encompassing, among others, industrial, military, medical, and simulation display solutions. The Company is comprised of one segment - the manufacturing and distribution of displays and display components. The Company is organized into four interrelated operations aggregated into one reportable segment pursuant to the aggregation criteria of FASB ASC Topic 280 "*Segment Reporting*":

Monitors - offers a complete range of CRT, flat panel and projection display systems for use in training and simulation, military, medical, and industrial applications.

Data Display CRT - offers a wide range of CRTs for use in data display screens, including computer terminal monitors and medical monitoring equipment.

Entertainment CRT - offers a wide range of CRTs and projection tubes for television and home theater equipment.

Component Parts - provides replacement electron guns and other components for CRTs primarily for servicing the Company's internal needs.

During fiscal 2013, management of the Company is focusing key resources on strategic efforts to dispose of unprofitable operations and seek acquisition opportunities that enhance the profitability and sales growth of the Company's more profitable product lines. The Company continues to seek new products through acquisitions and internal development that complement existing profitable product lines. Challenges facing the Company during these efforts include:

Inventory management - The Company continually monitors historical sales trends as well as projected future needs to ensure adequate on-hand supplies of inventory and to mitigate the risk of overstocking slower moving, obsolete items. The Company's inventories increased particularly in the monitor division due to new product lines it is carrying, due to requirements to fulfill contracts and last-time buys. The Company has two new divisions, Aydin Visual Solutions and Aydin Cyber Security which between the two have added \$1.7 million in inventory since February 29, 2012. The Aydin Displays subsidiary has increased inventories by \$0.8 million since February 29, 2012 to secure products that would no longer be available and are needed for an active contract and the Lexel subsidiary increased inventory by \$1.3 million due to last time buys of glass and other items needed for current orders. The other divisions decreased their inventories.

Certain of the Company's divisions maintain significant inventories of CRTs and component parts in an effort to ensure its customers a reliable source of supply. The Company's inventory turnover averages over approximately 310 days, although in many cases the Company would anticipate holding 90 to 100 days of inventory in the normal course of operations. This level of inventory is higher than some of the Company's competitors because it sells a number of products representing older, or trailing edge, technology that may not be available from other sources. The market for these trailing edge technology products is declining and, as manufacturers for these products discontinue production or exit the business, the Company may make last time buys. In the monitor operations of the Company's business, the market for its products is characterized by fairly rapid change as a result of the development of new technologies,

Video Display Corporation and Subsidiaries
November 30, 2012

particularly in the flat panel display area. If the Company fails to anticipate the changing needs of its customers and accurately forecast their requirements, it may accumulate inventories of products which its customers no longer need and which the Company will be unable to sell or return to its vendors. Because of this, the Company's management monitors the adequacy of its inventory reserves regularly, and at November 30, 2012 and February 29, 2012, believes its reserves to be adequate.

Interest rate exposure - The Company had outstanding debt of \$16.2 million as of November 30, 2012, all of which is subject to interest rate fluctuations by the Company's lenders. Higher rates applied by the Federal Reserve Board could have a negative effect on the Company's earnings. It is the intent of the Company to continually monitor interest rates and consider converting portions of the Company's debt from floating rates to fixed rates should conditions be favorable for such interest rate swaps or hedges.

Results of Operations

The following table sets forth, for the three and nine months ended November 30, 2012 and 2011, the percentages that selected items in the Condensed Consolidated Statements of Income bear to total sales:

	Three Months		Nine Months	
	Ended November 30,		Ended November 30,	
	2012	2011	2012	2011
Sales				
Monitors	96.6 %	92.3 %	95.3 %	91.6 %
Data display CRTs	3.1	7.4	4.2	7.9
Entertainment CRTs	0.1	0.1	0.1	0.2
Components parts	0.2	0.2	0.4	0.3
Total Company	100.0 %	100.0 %	100.0 %	100.0 %
Costs and expenses				
Cost of goods sold	74.0 %	66.5 %	72.3 %	67.9 %
Selling and delivery	10.3	8.8	11.0	8.1
General and administrative	13.9	12.7	14.9	12.8
	98.2 %	88.0 %	98.2 %	88.8 %
Operating profit	1.8 %	12.0 %	1.8 %	11.2 %
Interest expense	(1.3)%	(1.2)%	(1.4)%	(1.3)%
Other income, net	0.7	0.4	1.0	0.3
Income before income taxes	1.2 %	11.2 %	1.4 %	10.2 %
Income tax expense	0.0	3.4	0.2	3.2
Net income	1.2 %	7.8 %	1.2 %	7.0 %

This year's results have been negatively impacted by two new divisions, Aydin Visual Solutions and Aydin Cyber Security. The two divisions have net losses of \$565 thousand and \$1.1 million, respectively through the nine months ended November 30, 2012. These two entities are still in the start up stages, causing the losses noted and decreasing consolidated net income of the company.

Net sales

Consolidated net sales decreased \$3.4 million for the three months ended November 30, 2012 and \$12.0 million for the nine months ended November 30, 2012 as compared to the three and nine months ended November 30, 2011. The Component Parts division had a slight increase in sales during both time periods ending November 30, 2012, but the other divisions all had decreases. The Data Display and Entertainment divisions both generated less than half the sales of the comparable periods ending November 30, 2011.

The decrease in the Monitor division was lead by the Company' s Display Systems division, with sales decreasing for the nine-month period ending November 30, 2012, compared to the nine months ending November 30, 2011, from

Video Display Corporation and Subsidiaries
November 30, 2012

\$10.2 million to \$5.4 million or 46.7%. The sales decrease is a result of a transition from selling “CRT products” to developing and selling digital display solutions. The typical sales cycle of a new product solution is 12 to 18 months. Management believes Display Systems is at the cusp of seeing the results of this transition. The Company’s Aydin subsidiary’s sales decreased by 29.0% for the nine-month comparable period ending November 30, 2012, from \$20.8 million to \$14.8 million. The decrease was primarily due to approximately \$5.0 million of shipments on long-term military contracts which have been delayed and approximately \$1.0 million of projects not renewed due to lack of funding. The Z-Axis subsidiary was down 25.8% due to fewer shipments to their two major customers. Last year one of Z-Axis’ s major customers used Z-Axis’ s products to correct problems with their products already in the market place which created abnormally high demand. The second customer’ s demand has slowed due to decreases in orders from their military customers caused by the slowdown in overseas conflicts. Overall, the Company expects results to improve over the first nine months of the fiscal year; however, the revenues are not expected to reach last year’ s 12 - month results. The Data Display division decrease was due to the shutdown of the division’ s Clinton facility in the fourth quarter of fiscal 2012 and the Tucker facility’ s decrease was primarily to its top customer in flight simulation and decreases among most of its customer base.

Gross margins

Consolidated gross margins decreased by 38.9% for the three months ended November 30, 2012 over the three months ended November 30, 2011 and as a percent to sales decreased from 33.5% to 26.0%. The consolidated gross margin decreased by 34.7% for the nine months ended November 30, 2012 over the nine months ended November 30, 2011 and as a percent to sales decreased from 32.1% to 27.7% due to the decreased sales noted above while absorbing fixed costs.

Gross margins within the Monitor division decreased by 33.7% for the three month period ended November 30, 2012 over the comparable three month period ended November 30, 2011 and decreased by 32.0% for the nine month period ended November 30, 2012 over the comparative nine month period ended November 30, 2011 due to decreased sales volume. The actual gross margin percentages increased at Aydin Displays for the nine month period ending November 30, 2012 despite lower sales due to product mix. The gross margin percentage at Display Systems decreased by 61.5% due to a lack of sales volume. The Data Display division gross margins decreased by 136.0% for the three-month comparable period ended November 30, 2012, and decreased by 82.2% for the nine months ended November 30, 2012 compared to the nine months ended November 30, 2011, due to the impact of the decreased revenue at the Company’ s display facility caused by a reduction in demand for these products due to changes in technology, i.e. CRTs being replaced by flat screens in certain applications. The gross margins in home entertainment CRTs and the Component Parts were negligible as both divisions sales continue to decline and are not material to the results of the Company. The Company expects gross margins to improve slightly compared to the first nine months of the fiscal year due to improved margins at VDCDS, Aydin Displays and Z-Axis based on the forecasted product mix at these divisions.

Operating expenses

Operating expenses as a percentage of sales increased from 21.5% to 24.2% for the comparable three months ended November 30, 2012 and increased from 20.9% to 25.9% for the nine months ended November 30, 2012. This was primarily due to a larger decrease in revenues than expenses. Actual expenses decreased by \$0.4 million for the three month period and by \$0.7 million for the nine month period ending November 30, 2012 which was not as significant as the decrease in sales. We expect selling expenses will continue to track at last year’ s levels as the Company continues its marketing efforts to boost revenues. General and Administrative expenses are down approximately \$800 thousand and we anticipate they will continue to decrease compared to last year.

Video Display Corporation and Subsidiaries

November 30, 2012

Interest expense

Interest expense decreased 10.0% for the three-month comparable period ended November 30, 2012, and decreased 15.3% for the comparable nine month period ended November 30, 2012 due to decreased average borrowings by the Company. The Company expects to have higher interest costs due to the higher interest rate being charged by the bank for the covenant breach; this will be somewhat offset as the outstanding debt decreases, due to increased cash flow from operations and the management of current assets. The Company maintains various debt agreements with different interest rates, most of which are based on the prime rate or LIBOR.

Income taxes

The effective tax rate for the three months ended November 30, 2012 and 2011 was 0.0% and 30.0%, respectively and for the nine months ended November 30, 2012 and 2011 was 12.1% and 30.9%, respectively. These rates differ from the Federal statutory rate primarily due to the effect of state taxes, the permanent non-deductibility of certain expenses for tax purposes, and research and experimentation credits.

Liquidity and Capital Resources

As of November 30, 2012, the Company had total cash of zero as all cash is swept on a daily basis and pays down the line of credit and availability under the line of credit was approximately \$0.1 million based on the accounts receivable and inventory borrowing base calculations. The Company's working capital was \$22.4 million and \$37.3 million at November 30, 2012 and February 29, 2012, respectively. The decrease in the working capital is due to \$15.0 million of debt reclassified to a short-term liability due to the Company's bank covenant violation and the likelihood of doing so in subsequent quarters. In recent years, the Company has financed its growth and cash needs primarily through income from operations, borrowings under revolving credit facilities, advances from the Company's Chief Executive Officer and long-term debt. Liquidity provided by operating activities of the Company is reduced by working capital requirements (largely inventories and accounts receivable), debt service, capital expenditures, and product line additions.

The Company specializes in certain products representing trailing-edge technology that may not be available from other sources, and may not be currently manufactured. In many instances, the Company's products are components of larger display systems for which immediate availability is critical for the customer. Accordingly, the Company enjoys higher gross margins on certain products, but typically has larger investments in inventories than those of its competitors.

On December 23, 2010, the Company and its subsidiaries executed a new Credit Agreement with RBC Bank and Community & Southern Bank (collectively, the "Banks") to provide new financing to the Company to replace the existing credit agreement with RBC Bank that terminated in conjunction with this Agreement. The new Agreement provided for a line of credit of up to \$17.5 million and two term loans of \$3.5 million and \$3.0 million.

1st Amendment: On May 26, 2011, the Banks amended the Credit Agreement to reduce the revolver commitment to \$15.0 million, restate the covenants to pertain to only continuing operations of the Company and to adjust the targets for the senior funded debt to EBITDA covenant for the Company's quarters ending May 31, 2011 and August 31, 2011.

2nd Amendment: On July 26, 2011, the Banks again amended the Credit Agreement to include a swing-line promissory note of \$1.0 million that is included in the revised \$15.0 million revolver commitment.

3rd Amendment: On September 1, 2011, the Banks amended the Credit Agreement to allow the Company to repurchase a limited amount of the Company's common stock, equal to ten percent of the Company's net earnings after taxes, subject to meeting certain share repurchase conditions and revised the definition of the fixed charge coverage ratio and total liabilities to tangible net worth to exclude such repurchases.

4th Amendment: On January 17, 2012, the Banks amended the Credit Agreement to allow the Company to purchase a promissory note, dated July 23, 2010, held by Hetra Secure Solutions Corporation on StingRay56.

5th Amendment: On March 5, 2012, the Banks amended the Credit Agreement to allow the Company to acquire StingRay56, Inc.

Video Display Corporation and Subsidiaries
November 30, 2012

The outstanding balance of the line of credit at November 30, 2012 was \$11.1 million and the balances of the term loans were \$2.2 million and \$2.6 million, respectively. The outstanding balance of the line of credit at February 29, 2012 was \$11.1 million and the balances of the term loans were \$2.7 million and \$2.8 million, respectively. These loans are secured by all assets and personal property of the Company and a limited guarantee of the Chief Executive Officer of \$3.0 million. The \$3.0 million term loan is secured by real estate property of the Company and a building owned by Southeastern Metro Savings, LLC, a company in which the Company's Chief Executive Officer is a minority officer. The building will continue to be in the collateral pool until such time as the note is sufficiently paid down or it is replaced by other collateral.

The Agreement contains three covenants: a fixed charge coverage ratio, ratio of senior funded debt to earnings before interest, taxes, depreciation and amortization (EBITDA), and total liabilities to tangible net worth. The Agreement also includes restrictions on the incurrence of additional debt or liens, investments (including Company stock), divestitures and certain other changes in the business. The Agreement expires on December 1, 2013. The interest rate on these loans is a floating LIBOR rate based on a fixed charge coverage ratio, minimum 4.0%, as defined in the loan documents.

As of November 30, 2012, the Company was not in compliance with the senior funded debt to EBITDA ratio and permitted share repurchases covenants as defined by the Banks credit line agreements. A breach of these covenants could result in default under our debt agreement, which could prompt the lender to declare all amounts outstanding under the debt agreement to be immediately due and payable and terminate all commitments to extend further credit. If the Company were unable to repay those amounts, the lender could proceed against the collateral granted to secure that indebtedness. If the lender under the debt agreement accelerates the repayment of the borrowings, there can be no assurance that the Company will have sufficient assets and funds to repay the borrowings under its debt agreements. The Company has been in talks with other banks about refinancing the current debt under an agreement with less restrictive covenants and borrowing base calculations. Management believes that a new debt agreement can be obtained by the end of the fourth quarter, however, there can be no assurance that an agreement can be reached that is reasonable to the Company or at all. Additionally, due to the activity generated by the chairman's remarks at the annual shareholder meeting concerning any potential mergers, spinoffs, sale of the Company as a whole or any other method (see 8-K), the Company put negotiations on hold with the banks amendment of the facility or potential refinance until the uncertainty and any potential outcomes could be realized. Upon any definite agreement being reached, the Company will resume the negotiations on its debt facility. As a result of these violations and the Company's likelihood of not meeting them at the next reporting period, the debt has been classified as current at November 30, 2012. The senior funded debt to EBITDA covenant was deemed to be the most restrictive by the Company and the Banks.

The Company continues to monitor its cash and financing positions, seeking to find ways to lower its interest costs and to produce positive operating cash flow. The Company examines possibilities to grow its business as opportunities present themselves, such as new sales contracts or niche acquisitions. There could be an impact on working capital requirements to fund this growth. As in the past, the intent is to finance such projects with operating cash flows or existing bank lines; however, more permanent sources of capital may be required in certain circumstances.

Cash provided by operations for the nine months ended November 30, 2012 was \$1.2 million. Net income from operations provided \$0.5 million, and adjustments to reconcile net income to net cash were \$1.2 million including depreciation and reserves. Changes in working capital used \$0.5 million primarily due to an increase in inventory of \$2.8 million and an increase in costs on uncompleted contracts of \$0.2 million offset by an increase in accounts payable and accrued liabilities of \$0.2 million, a decrease in accounts receivable of \$1.3 million, a decrease in short-term notes receivable of \$0.3 million, a decrease in prepaid expenses of \$0.1 million, and a decrease in refundable taxes of \$0.6 million. Cash provided by operations for the nine months ended November 30, 2011 was \$2.2 million.

Video Display Corporation and Subsidiaries
November 30, 2012

Investing activities used cash of \$0.6 million due to the purchase of equipment for \$0.63 million offset by \$0.05 million for the proceeds from the sale of the Chroma property during the nine months ended November 30, 2012. Cash provided by investing activities for the nine months ended November 30, 2011 was \$1.0 million.

Financing activities used cash of \$0.7 million for the nine months ended November 30, 2012, due to net repayments against the line of credit of \$0.68 million and the purchase of treasury stock for \$0.09 million. Cash used by financing activities for the nine months ended November 30, 2011 was \$4.5 million.

The Company's debt agreements with financial institutions contain affirmative and negative covenants, including requirements related to tangible net worth and debt service coverage and new loans. Additionally, dividend payments, capital expenditures, and acquisitions have certain restrictions. Substantially all of the Company's retained earnings are restricted based upon these covenants.

The Company has a stock repurchase program, pursuant to which it was originally authorized to repurchase up to 1,632,500 shares of the Company's common stock in the open market. On July 8, 2009, the Board of Directors of the Company approved a one time continuation of the stock repurchase program, and authorized the Company to repurchase up to 1,000,000 additional shares of the Company's common stock, depending on the market price of the shares. There is no minimum number of shares required to be repurchased under the program. For the nine months ended November 30, 2012, the Company repurchased 22,031 shares at an average price of \$4.10 per share. The Company repurchased 57,087 shares in the nine months ended November 30, 2011. Under the Company's stock repurchase program, an additional 705,106 shares remain authorized to be repurchased by the Company at November 30, 2012. The Credit Agreement executed by the Company on December 23, 2010 included restrictions on investments that restricted further repurchases of stock under this program. On September 1, 2011, the Agreement was amended to allow the Company to repurchase a limited amount of the Company's common stock, equal to ten percent of the Company's net earnings after taxes subject to meeting certain share repurchase conditions.

On March 1, 2011, the Company sold its Fox International Ltd., Inc. subsidiary to FI Acquisitions, a company majority owned by the Company's Chief Executive Officer. The Company put its Fox International Ltd. subsidiary up for auction on January 15, 2011, and gave all interested parties a thirty-day due diligence period that was later extended until March 23, 2011, to give any potential bidders more time. FI Acquisitions was the only bidder and paid the net book value, approximately \$3.5 million, for Fox International Ltd. in a stock sale, satisfied by the Company's Chief Executive Officer exchanging 800,000 shares of the Company's stock valued at approximately \$3.3 million, approximately \$50 thousand in cash and a reduction in notes payable to officers and directors of approximately \$200 thousand. As the sale was at net book value, no gain or loss was recorded by the Company.

Critical Accounting Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations are based upon the Company's condensed consolidated financial statements. These condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. These principles require the use of estimates and assumptions that affect amounts reported and disclosed in the condensed consolidated financial statements and related notes. The accounting policies that may involve a higher degree of judgments, estimates, and complexity include reserves on inventories, revenue recognition, the allowance for bad debts and warranty reserves. The Company uses the following methods and assumptions in determining its estimates:

Reserves on inventories

Reserves on inventories result in a charge to operations when the estimated net realizable value declines below cost. Management regularly reviews the Company's investment in inventories for declines in value and establishes reserves when it is apparent that the expected net realizable value of the inventory falls below its carrying amount.

Video Display Corporation and Subsidiaries

November 30, 2012

Management considers the projected demand for CRTs in this estimate of net realizable value. Management is able to identify consumer-buying trends, such as size and application, well in advance of supplying replacement CRTs. Thus, the Company is able to adjust inventory-stocking levels according to the projected demand. The average life of a CRT is five to seven years, at which time the Company's replacement market develops. Management reviews inventory levels on a quarterly basis. Such reviews include observations of product development trends of the original equipment manufacturers, new products being marketed, and technological advances relative to the product capabilities of the Company's existing inventories. There were no significant changes in management's estimates in the third quarter of fiscal 2013 and 2012; however, the Company cannot guarantee the accuracy of future forecasts since these estimates are subject to change based on market conditions. The Company is currently assessing the adequacy of certain reserves in its monitor operations and anticipates that there will be additional reserves set aside during the fourth quarter.

Revenue recognition

Revenue is recognized on the sale of products when the products are shipped, all significant contractual obligations have been satisfied, and the collection of the resulting receivable is reasonably assured. The Company's delivery term typically is F.O.B. shipping point.

In accordance with FASB ASC Topic 605-45 "*Revenue Recognition: Principal Agent Considerations*", shipping and handling fees billed to customers are classified in net sales in the consolidated income statements. Shipping and handling costs incurred are classified in selling and delivery in the consolidated income statements.

A portion of the Company's revenue is derived from contracts to manufacture flat panel and CRTs to a buyers' specification. These contracts are accounted for under the provisions of FASB ASC Topic 605-35 "*Revenue Recognition: Construction-Type and Production-Type Contracts*". These contracts are fixed-price and cost-plus contracts and are recorded on the percentage of completion basis using the ratio of costs incurred to estimated total costs at completion as the measurement basis for progress toward completion and revenue recognition. Any losses identified on contracts are recognized immediately. Contract accounting requires significant judgment relative to assessing risks, estimating contract costs and making related assumptions for schedule and technical issues. With respect to contract change orders, claims, or similar items, judgment must be used in estimating related amounts and assessing the potential for realization. These amounts are only included in contract value when they can be reliably estimated and realization is probable.

Allowance for doubtful accounts

The allowance for doubtful accounts is determined by reviewing all accounts receivable and applying historical credit loss experience to the current receivable portfolio with consideration given to the current condition of the economy, assessment of the financial position of the creditors as well as past payment history and overall trends in past due accounts compared to established thresholds. The Company monitors credit exposure and assesses the adequacy of the allowance for doubtful accounts on a regular basis. Historically, the Company's allowance has been sufficient for any customer write-offs. Although the Company cannot guarantee future results, management believes its policies and procedures relating to customer exposure are adequate.

Warranty reserves

The warranty reserve is determined by recording a specific reserve for known warranty issues and a general reserve based on claims experience. The Company considers actual warranty claims compared to net sales, then adjusts its reserve liability accordingly. Actual claims incurred could differ from the original estimates, requiring adjustments to the reserve. Management believes that its procedures historically have been adequate and does not anticipate that its assumptions are reasonably likely to change in the future.

Video Display Corporation and Subsidiaries

November 30, 2012

Other accounting policies

Other loss contingencies are recorded as liabilities when it is probable that a liability has been incurred and the amount of the loss is reasonably estimable. Disclosure is required when there is a reasonable possibility that the ultimate loss will exceed the recorded provision. Contingent liabilities are often resolved over long time periods. Estimating probable losses requires analysis of multiple factors that often depend on judgments about potential actions by third parties.

Recent accounting pronouncements

In September 2011, the FASB issued revised guidance FASB ASU 2011-08, *“Intangibles - Goodwill and Other (Topic 350) - Testing Goodwill for Impairment”* to allow entities to use a qualitative approach to test goodwill for impairment. The amendment permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted and the Company has chosen early adoption. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In July 2012, the FASB issued revised guidance FASB ASU 2012-02, *“Testing Indefinite Lived Assets for Impairment”* to allow entities to consider qualitative values in determining whether or not indefinite lived assets should be tested for impairment. If it is more likely than not that impairment exists, testing for impairment should be performed. The update is effective for fiscal years beginning after September 15, 2012 but early adoption is permitted. Management believes that the adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

Forward-Looking Information and Risk Factors

This report contains forward-looking statements and information that is based on management's beliefs, as well as assumptions made by, and information currently available to management. When used in this document, the words “anticipate,” “believe,” “estimate,” “intends,” “will,” and “expect” and similar expressions are intended to identify forward-looking statements. Such statements involve a number of risks and uncertainties. These risks and uncertainties, which are included under Part I, Item 1A. Risk Factors in the Company's Annual Report on Form 10-K for the year ended February 29, 2012 could cause actual results to differ materially. There appears to be a greater risk that military spending could decline and therefore our sales could decline, having a material adverse effect on our business.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The Company's primary market risks include fluctuations in interest rates and variability in interest rate spread relationships, such as prime to LIBOR spreads. Approximately \$16.2 million of outstanding debt at November 30, 2012 related to indebtedness under variable rate debt. Interest on the outstanding balance of this debt will be charged based on a variable rate related to the prime rate or the LIBOR rate. Both rate bases are incremented for margins specified in their agreements. Thus, the Company's interest rate is subject to market risk in the form of fluctuations in interest rates. The effect of a hypothetical one-percentage point increase across all maturities of variable rate debt would result in a decrease of approximately \$0.2 million in pre-tax net income assuming no further changes in the amount of borrowings subject to variable rate interest from amounts outstanding at November 30, 2012. The Company does not trade in derivative financial instruments.

ITEM 4. CONTROLS AND PROCEDURES

Our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) are designed to provide reasonable assurance that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934, such as this quarterly report on Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms. Our disclosure controls and procedures are also designed to ensure that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure.

Our chief executive officer and chief financial officer have conducted an evaluation of the effectiveness of our disclosure controls and procedures as of November 30, 2012. We perform this evaluation on a quarterly basis so that the conclusions concerning the effectiveness of our disclosure controls and procedures can be reported in our annual report on Form 10-K and quarterly reports on Form 10-Q. Based on this evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures were effective as of November 30, 2012.

Changes in Internal Controls

There have not been any changes in our internal controls over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

November 30, 2012

PART II

Item 1. Legal Proceedings

During 2007, the Company acquired the Cathode Ray Tube Manufacturing and Distribution Business and certain other assets of Clinton Electronics Corp. (“Clinton”), including inventory and fixed assets, for a total purchase price of \$2,550,000, pursuant to an Asset Purchase Agreement between the parties (the “APA”). The form of consideration for the assets acquired included: (i) a \$1.0 million face value Convertible Note; (ii) an agreement to deliver a stock certificate representing Company Common Shares having a \$1,125,000 in market value of the Company’s common stock in January of 2008; and (iii) an agreement to deliver a stock certificate representing Company Common Shares having a \$500,000 in market value of the Company’s common stock in January of 2009. The Company had paid the \$1.0 million Note Payable in January 2008. The Company disputed certain representations made by Clinton in the APA including, but not limited to, representations concerning revenue, expenses, and inventory. As a result of this dispute, the Company did not issue the stock certificates scheduled for delivery January of 2008 and January of 2009. As such, the Company had accrued a potential liability of \$1,625,000 and this accrued liability was reflected in the Company’s Balance Sheet until the settlement was reached.

On August 24, 2011, the Company and the Clinton Electronics Corporation signed a settlement agreement ending the dispute involving the purchase of certain assets by the Company, pursuant to an Asset Purchase Agreement between the two companies. Prior to the negotiated settlement, the companies had agreed to arbitrate the dispute.

The terms of the settlement were not disclosed. There was no effect to the income statement due to the settlement. The previously accrued liability covered the settlement and the write off of inventory from the original agreement. The settlement did not have a material adverse effect on the Company’s business, consolidated financial condition, results of operation or cash flows.

Item 1A. Risk Factors

Information regarding risk factors appears under the caption Forward-Looking Statements and Risk Factors in Part I, Item 2 of this Form 10-Q and in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended February 29, 2012. There appears to be a greater risk that military spending could decline and therefore our sales could decline, having a material adverse effect on our business. Besides this, there have been no other material changes from the risk factors previously disclosed in our Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other information

None.

I, Ronald D. Ordway, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Video Display Corporation;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15f and 15d-15f) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls over financial reporting.

Note 3. – Recent Accounting Pronouncements

In September 2011, the FASB issued revised guidance FASB ASU 2011-08, “*Intangibles – Goodwill and Other (Topic 350) - Testing Goodwill for Impairment*” to allow entities to use a qualitative approach to test goodwill for impairment. The amendment permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted and the Company has chosen early adoption. The adoption of this guidance did not have a material impact on the Company’s consolidated financial statements.

In July 2012, the FASB issued revised guidance FASB ASU 2012-02, “*Testing Indefinite Lived Assets for Impairment*” to allow entities to consider qualitative values in determining whether or not indefinite lived assets should be tested for impairment. If it is more likely than not that impairment exists, testing for impairment should be performed. The update is effective for fiscal years beginning after September 15, 2012 but early adoption is permitted. Management believes that the adoption of this guidance will not have a material impact on the Company’s consolidated financial statements.

Note 2. – Liquidity

On December 23, 2010, the Company and its subsidiaries executed a new Credit Agreement with RBC Bank and Community & Southern Bank (collectively, the “Banks”) to provide new financing to the Company to replace the existing credit agreement with RBC Bank that terminated in conjunction with this Agreement. The new Agreement provided for a line of credit of up to \$17.5 million and two term loans of \$3.5 million and \$3.0 million.

- 1st Amendment: On May 26, 2011, the Banks amended the Credit Agreement to reduce the revolver commitment to \$15.0 million, restate the covenants to pertain to only continuing operations of the Company and to adjust the targets for the senior funded debt to EBITDA covenant for the Company’s quarters ending May 31, 2011 and August 31, 2011.
- 2nd Amendment: On July 26, 2011, the Banks again amended the Credit Agreement to include a swing-line promissory note of \$1.0 million that is included in the revised \$15.0 million revolver commitment.
- 3rd Amendment: On September 1, 2011, the Banks amended the Credit Agreement to allow the Company to repurchase a limited amount of the Company’s common stock, equal to ten percent of the Company’s net earnings after taxes, subject to meeting certain share repurchase conditions and revised the definition of the fixed charge coverage ratio and total liabilities to tangible net worth to exclude such repurchases.
- 4th Amendment: On January 17, 2012, the Banks amended the Credit Agreement to allow the Company to purchase a promissory note, dated July 23, 2010, held by Hetra Secure Solutions Corporation on StingRay56.
- 5th Amendment: On March 5, 2012, the Banks amended the Credit Agreement to allow the Company to acquire StingRay56, Inc.

The outstanding balance of the line of credit at November 30, 2012 was \$11.1 million and the outstanding balances of the term loans were \$2.2 million and \$2.6 million, respectively. The outstanding balance of the line of credit at February 29, 2012 was \$11.1 million and the outstanding balances of the term loans were \$2.7 million and \$2.8 million, respectively. These loans are secured by all assets and personal property of the Company and a limited guarantee of the Chief Executive Officer of \$3.0 million. The \$3.0 million term loan is secured by real estate property of the Company and a building owned by Southeastern Metro Savings, LLC, a company in which the Company’s Chief Executive Officer is a minority owner. The building will continue to be in the collateral pool until such time as the note is sufficiently paid down or it is replaced by other collateral.

The Agreement contains three covenants: a fixed charge coverage ratio, ratio of senior funded debt to earnings before interest, taxes, depreciation and amortization (EBITDA), and total liabilities to tangible net worth. The Agreement also includes restrictions on the incurrence of additional debt or liens, investments (including Company stock), divestitures and certain other changes in the business. The Agreement expires on December 1, 2013. The interest rate on these loans is a floating LIBOR rate based on a fixed charge coverage ratio, minimum 4.0%, as defined in the loan documents.

As of November 30, 2012, the Company was not in compliance with the senior funded debt to EBITDA ratio and permitted share repurchases covenants as defined by the Banks credit line agreements. A breach of these covenants could result in default under our debt agreement, which could prompt the lender to declare all amounts outstanding under the debt agreement to be immediately due and payable and terminate all commitments to extend further credit. If the Company were unable to repay those amounts, the lender could proceed against the collateral granted to secure that indebtedness. If the lender under the debt agreement accelerates the repayment of the borrowings, there can be no assurance that the Company will have sufficient assets and funds to repay the borrowings under its debt agreements. The Company has been in talks with other banks about refinancing the current debt under an agreement with less restrictive covenants and borrowing base calculations. Management believes that a new debt agreement can be obtained by the end of the fourth quarter, however, there can be no assurance that an agreement can be reached that is reasonable to the Company or at all. Additionally, due to the activity generated by the chairman's remarks at the annual shareholder meeting concerning any potential mergers, spinoffs, sale of the Company as a whole or any other method (see 8-K), the Company put negotiations on hold with the banks amendment of the facility or potential refinance until the uncertainty and any potential outcomes could be realized. Upon any definite agreement being reached, the Company will resume the negotiations on its debt facility. As a result of these violations and the Company's likelihood of not meeting them at the next reporting period, the debt has been classified as current at November 30, 2012. The senior funded debt to EBITDA covenant was deemed to be the most restrictive by the Company and the Banks.

Note 1. – Summary of Significant Accounting Policies

The accompanying condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries after elimination of all significant intercompany accounts and transactions.

As contemplated by the Securities and Exchange Commission (the “SEC” or “Commission”) instructions to Form 10-Q, the following footnotes have been condensed and, therefore, do not contain all disclosures required in connection with annual consolidated financial statements. Reference should be made to the Company’s year-end consolidated financial statements and notes thereto, including a description of the accounting policies followed by the Company, contained in its Annual Report on Form 10-K for the fiscal year ended February 29, 2012, as filed with the Commission. There are no material changes in accounting policy during the nine months ended November 30, 2012.

The consolidated financial information included in this report has been prepared by the Company, without audit. In the opinion of management, the financial information included in this report contains all adjustments (all of which are normal and recurring) necessary for a fair presentation of the results for the interim periods. Nevertheless, the results shown for interim periods are not necessarily indicative of results to be expected for the full year. The February 29, 2012 consolidated balance sheet data was derived from the audited consolidated financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America.

[Shareholder's Equity](#)

Note 11. – Shareholder's Equity

Earnings Per Share

Basic earnings per share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding during each period. Shares issued during the period are weighted for the portion of the period that they were outstanding. Diluted earnings per share is calculated in a manner consistent with that of basic earnings per share while giving effect to all dilutive potential common shares that were outstanding during the period.

The following table sets forth the computation of basic and diluted earnings per share for the three and nine month periods ended November 30, 2012 and 2011 (in thousands, except per share data):

	Net Income	Weighted Average Common Shares Outstanding	Earnings Per Share
Three months ended November 30, 2012			
Basic	\$148	7,566	\$0.02
Effect of dilution:			
Options	—	49	—
Diluted	<u>\$148</u>	<u>7,615</u>	<u>\$0.02</u>
Three months ended November 30, 2011			
Basic	\$1,258	7,628	\$0.17
Effect of dilution:			
Options	—	55	—
Diluted	<u>\$1,258</u>	<u>7,683</u>	<u>\$0.17</u>
Nine months ended November 30, 2012			
Basic	\$450	7,571	\$0.06
Effect of dilution:			
Options	—	53	—
Diluted	<u>\$450</u>	<u>7,624</u>	<u>\$0.06</u>
Nine months ended November 30, 2011			
Basic	\$3,497	7,619	\$0.46
Effect of dilution:			
Options	—	236	(0.01)
Diluted	<u>\$3,497</u>	<u>7,855</u>	<u>\$0.45</u>

Stock-Based Compensation Plans

For the nine-month period ended November 30, 2012 and 2011, the Company recognized general and administrative expenses of \$7.7 thousand and \$2.0 thousand, respectively, related to share-based compensation. The liability for the share-based compensation recognized is presented in the consolidated balance sheets as part of additional paid in capital. As of November 30, 2012, total unrecognized compensation costs related to stock options granted was \$5.6 thousand. The unrecognized stock option compensation cost is expected to be recognized over a period of approximately 1 year.

The Company estimates the fair value of stock options granted using the Black-Scholes option-pricing model, which requires the Company to estimate the expected term of the stock option grants and expected future stock price volatility over the term. The term represents the expected period of time the Company believes the options will remain outstanding based on historical information. Estimates of expected future stock price volatility are based on the historic volatility of the Company's common stock, which represents the standard deviation of the differences in the weekly stock closing price, adjusted for dividends and stock splits.

Three members of the board of directors were each granted 3,000 stock options during the nine-month period ended November 30, 2012.

Stock Repurchase Program

The Company has a stock repurchase program, pursuant to which it was originally authorized to repurchase up to 1,632,500 shares of the Company's common stock in the open market. On July 8, 2009, the Board of Directors of the Company approved a one time continuation of the stock repurchase program, and authorized the Company to repurchase up to 1,000,000 additional shares of the Company's common stock, depending on the market price of the shares. There is no minimum number of shares required to be repurchased under the program. For the nine months ended November 30, 2012, the Company repurchased 22,031 shares at an average price of \$4.10 per share. The Company repurchased 57,087 shares in the nine months ended November 30, 2011. Under the Company's stock repurchase program, an additional 705,106 shares remain authorized to be repurchased by the Company at November 30, 2012. The Credit Agreement executed by the Company on December 23, 2010 included restrictions on investments that restricted further repurchases of stock under this program. On September 1, 2011, the Agreement was amended to allow the Company to repurchase a limited amount of the Company's common stock, equal to ten percent of the Company's net earnings after taxes subject to meeting certain share repurchase conditions.

Note 12. – Income Taxes

The effective tax rate for the nine months ended November 30, 2012 and 2011 was 12.1% and 30.9%, respectively. These rates differ from the Federal statutory rate primarily due to the effect of state taxes, the permanent non-deductibility of certain expenses for tax purposes, and research and experimentation credits.

[Intangible Assets \[Abstract\]](#)

[Intangible Assets](#)

Note 6. – Intangible Assets

Intangible assets consist primarily of the unamortized value of purchased patents, customer lists, non-compete agreements and other intangible assets. Intangible assets are amortized over the period of their expected lives, generally ranging from 5 to 15 years. Amortization expense related to intangible assets was approximately \$179 thousand and \$222 thousand for the nine months ended November 30, 2012 and 2011, respectively.

The cost and accumulated amortization of intangible assets were as follows (in thousands):

	November 30, 2012		February 29, 2012	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Customer lists	\$3,611	\$ 2,788	\$3,611	\$ 2,701

Earnings Related to Billings
on Uncompleted Contracts
\[Abstract\]](#)

[Costs and Estimated Earnings
Related to Billings on
Uncompleted Contracts](#)

Note 5. – Costs and Estimated Earnings Related to Billings on Uncompleted Contracts

Information relative to contracts in progress consisted of the following:

	November 30, 2012	February 29, 2012
Costs incurred to date on uncompleted contracts	\$ 5,088	\$ 7,499
Estimated earnings recognized to date on these contracts	2,795	4,373
	7,883	11,872
Billings to date	(4,835)	(8,978)
Costs and estimated earnings in excess of billings, net	\$ 3,048	\$ 2,894
Costs and estimated earnings in excess of billings	\$ 3,244	\$ 3,236
Billings in excess of costs and estimated earnings	(196)	(342)
	\$ 3,048	\$ 2,894

Costs and estimated earnings in excess of billings are the results of contracts in progress (jobs) in completing orders to customers' specifications on contracts accounted for under FASB ASC 605-35, "Revenue Recognition: Construction-Type and Production-Type Contracts." Costs included are material, labor, and overhead. These jobs require design and engineering effort for a specific customer purchasing a unique product. The Company records revenue on these fixed-price and cost-plus contracts on the percentage of completion basis using the ratio of costs incurred to estimated total costs at completion as the measurement basis for progress toward completion and revenue recognition. Any losses identified on contracts are recognized immediately. Contract accounting requires significant judgment relative to assessing risks, estimating contract costs and making related assumptions for schedule and technical issues. With respect to contract change orders, claims, or similar items, judgment must be used in estimating related amounts and assessing the potential for realization. These amounts are only included in contract value when they can be reliably estimated and realization is probable. Billings are generated based on specific contract terms, which might be a progress payment schedule, specific shipments, etc. None of the above contracts in progress contain post-shipment obligations.

Changes in job performance, manufacturing efficiency, final contract settlements, and other factors affecting estimated profitability may result in revisions to costs and income and are recognized in the period in which the revisions are determined.

As of November 30, 2012 and February 29, 2012, there were no production costs that exceeded the aggregate estimated cost of all in-process and delivered units relating to long-term contracts. Additionally, there were no claims outstanding that would affect the ultimate realization of full contract values. As of November 30, 2012 and February 29, 2012, there were no progress payments that had been netted against inventory.

Note 13. – Related Party Transactions

In conjunction with an agreement involving re-financing of the Company's lines of credit and Loan and Security Agreement, on June 29, 2006 the Company's CEO provided a \$6.0 million subordinated term note to the Company with monthly principal payments of \$33.3 thousand plus interest through July 2021. The interest rate on the note was equal to the prime rate plus one percent. The note was secured by a general lien on all assets of the Company, subordinate to the lien held by RBC Bank and Community & Southern Bank. During fiscal 2012, the Company repaid the remaining balance under this loan agreement on November 28, 2011 with consent from RBC Bank and Community & Southern Bank. The payoff was approximately \$1.0 million. Interest paid on the loan in the nine months ending November 30, 2011 was \$86.4 thousand.

The Company's CEO provides a portion of the collateral for the term loans with the consortium of RBC Bank and Community & Southern Bank. (See Note 8 – Lines of Credit)

Lines of Credit

**9 Months Ended
Nov. 30, 2012**

[Long-term Debt/Lines of
Credit \[Abstract\]](#)
[Lines of Credit](#)

Note 8. – Lines of Credit

On December 23, 2010, the Company and its subsidiaries executed a new Credit Agreement with RBC Bank and Community & Southern Bank (collectively, the “Banks”) to provide new financing to the Company to replace the existing credit agreement with RBC Bank that terminated in conjunction with this Agreement. The new Agreement provided for a line of credit of up to \$17.5 million and two term loans of \$3.5 million and \$3.0 million.

- 1st Amendment: On May 26, 2011, the Banks amended the Credit Agreement to reduce the revolver commitment to \$15.0 million, restate the covenants to pertain to only continuing operations of the Company and to adjust the targets for the senior funded debt to EBITDA covenant for the Company’s quarters ending May 31, 2011 and August 31, 2011.
- 2nd Amendment: On July 26, 2011, the Banks again amended the Credit Agreement to include a swing-line promissory note of \$1.0 million that is included in the revised \$15.0 million revolver commitment.
- 3rd Amendment: On September 1, 2011, the Banks amended the Credit Agreement to allow the Company to repurchase a limited amount of the Company’s common stock, equal to ten percent of the Company’s net earnings after taxes, subject to meeting certain share repurchase conditions and revised the definition of the fixed charge coverage ratio and total liabilities to tangible net worth to exclude such repurchases.
- 4th Amendment: On January 17, 2012, the Banks amended the Credit Agreement to allow the Company to purchase a promissory note, dated July 23, 2010, held by Hetra Secure Solutions Corporation on StingRay56.
- 5th Amendment: On March 5, 2012, the Banks amended the Credit Agreement to allow the Company to acquire StingRay56, Inc.

The outstanding balance of the line of credit at November 30, 2012 was \$11.1 million and the balances of the term loans were \$2.2 million and \$2.6 million, respectively. The outstanding balance of the line of credit at February 29, 2012 was \$11.1 million and the balances of the term loans were \$2.7 million and \$2.8 million, respectively. These loans are secured by all assets and personal property of the Company and a limited guarantee of the Chief Executive Officer of \$3.0 million. The \$3.0 million term loan is secured by real estate property of the Company and a building owned by Southeastern Metro Savings, LLC, a company in which the Company’s Chief Executive Officer is a minority officer. The building will continue to be in the collateral pool until such time as the note is sufficiently paid down or it is replaced by other collateral.

The Agreement contains three covenants: a fixed charge coverage ratio, ratio of senior funded debt to earnings before interest, taxes, depreciation and amortization (EBITDA), and total liabilities to tangible net worth. The Agreement also includes restrictions on the incurrence of additional debt or liens, investments (including Company stock), divestitures and certain other changes in the business. Substantially all of the Company’s retained earnings are restricted based upon these covenants. The Agreement expires on December 1, 2013. The interest rate on these

loans is a floating LIBOR rate based on a fixed charge coverage ratio, minimum 4.0%, as defined in the loan documents.

As of November 30, 2012, the Company was not in compliance with the senior funded debt to EBITDA ratio and permitted share repurchases covenants as defined by the Banks credit line agreements. A breach of these covenants could result in default under our debt agreement, which could prompt the lender to declare all amounts outstanding under the debt agreement to be immediately due and payable and terminate all commitments to extend further credit. If the Company were unable to repay those amounts, the lender could proceed against the collateral granted to secure that indebtedness. If the lender under the debt agreement accelerates the repayment of the borrowings, there can be no assurance that the Company will have sufficient assets and funds to repay the borrowings under its debt agreements. The Company has been in talks with other banks about refinancing the current debt under an agreement with less restrictive covenants and borrowing base calculations. Management believes that a new debt agreement can be obtained by the end of the fourth quarter, however, there can be no assurance that an agreement can be reached that is reasonable to the Company or at all. Additionally, due to the activity generated by the chairman's remarks at the annual shareholder meeting concerning any potential mergers, spinoffs, sale of the Company as a whole or any other method (see 8-K), the Company put negotiations on hold with the banks amendment of the facility or potential refinance until the uncertainty and any potential outcomes could be realized. Upon any definite agreement being reached, the Company will resume the negotiations on its debt facility. As a result of these violations and the Company's likelihood of not meeting them at the next reporting period, the debt has been classified as current at November 30, 2012. The senior funded debt to EBITDA covenant was deemed to be the most restrictive by the Company and the Banks.

Recent Accounting Pronouncements (Policies)

**9 Months Ended
Nov. 30, 2012**

[Recent Accounting Pronouncements \[Abstract\]](#)

[Intangibles Goodwill and Other](#)

In September 2011, the FASB issued revised guidance FASB ASU 2011-08, “*Intangibles – Goodwill and Other (Topic 350) - Testing Goodwill for Impairment*” to allow entities to use a qualitative approach to test goodwill for impairment. The amendment permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted and the Company has chosen early adoption. The adoption of this guidance did not have a material impact on the Company’s consolidated financial statements.

[Testing Indefinite Lived Assets for Impairment](#)

In July 2012, the FASB issued revised guidance FASB ASU 2012-02, “*Testing Indefinite Lived Assets for Impairment*” to allow entities to consider qualitative values in determining whether or not indefinite lived assets should be tested for impairment. If it is more likely than not that impairment exists, testing for impairment should be performed. The update is effective for fiscal years beginning after September 15, 2012 but early adoption is permitted. Management believes that the adoption of this guidance will not have a material impact on the Company’s consolidated financial statements.

[Revenue Recognition](#)

Costs and estimated earnings in excess of billings are the results of contracts in progress (jobs) in completing orders to customers’ specifications on contracts accounted for under FASB ASC 605-35, “*Revenue Recognition: Construction-Type and Production-Type Contracts.*” Costs included are material, labor, and overhead. These jobs require design and engineering effort for a specific customer purchasing a unique product. The Company records revenue on these fixed-price and cost-plus contracts on the percentage of completion basis using the ratio of costs incurred to estimated total costs at completion as the measurement basis for progress toward completion and revenue recognition. Note 14. – Legal Proceedings

During 2007, the Company acquired the Cathode Ray Tube Manufacturing and Distribution Business and certain other assets of Clinton Electronics Corp. (“Clinton”), including inventory and fixed assets, for a total purchase price of \$2,550,000, pursuant to an Asset Purchase Agreement between the parties (the “APA”). The form of consideration for the assets acquired included: (i) a \$1.0 million face value Convertible Note; (ii) an agreement to deliver a stock certificate representing Company Common Shares having a \$1,125,000 in market value of the Company’s common stock in January of 2008; and (iii) an agreement to deliver a stock certificate representing Company Common Shares having a \$500,000 in market value of the Company’s common stock in January of 2009. The Company had paid the \$1.0 million Note Payable in January 2008. The Company disputed certain representations made by Clinton in the APA including, but not limited to, representations concerning revenue, expenses, and inventory. As a result of this dispute, the Company did not issue the stock certificates scheduled for delivery January of 2008 and January of 2009. As such, the Company had accrued a potential liability of \$1,625,000 and this accrued liability was reflected in the Company's Balance Sheet until the settlement was reached.

On August 24, 2011, the Company and the Clinton Electronics Corporation signed a settlement agreement ending the dispute involving the purchase of certain assets by the Company, pursuant to an Asset Purchase Agreement between the two companies. Prior to the negotiated settlement, the companies had agreed to arbitrate the dispute.

The terms of the settlement were not disclosed. There was no effect to the income statement due to the settlement. The previously accrued liability covered the settlement and the write off of inventory from the original agreement. The settlement did not have a material adverse effect on the Company’s business, consolidated financial condition, results of operation or cash flows.
