#### RISK FACTORS

THE SECURITIES BEING OFFERED HEREBY INVOLVE A HIGH DEGREE OF RISK. PROSPECTIVE INVESTORS SHOULD CONSIDER THE FOLLOWING RISK FACTORS INHERENT IN AND AFFECTING THE BUSINESS OF THE COMPANY AND AN INVESTMENT IN THE SHARES.

#### COMPANY RISKS

An investment in our common stock involves certain risks. Prospective investors should carefully review the following factors, together with the other information contained in this prospectus, prior to making a decision to invest in our common stock. The future trading price of shares of our common stock will be affected by the performance of our business relative to, among other things, competition, market conditions and general economic and industry conditions.

#### RISKS RELATED TO OUR FINANCIAL CONDITION AND OUR BUSINESS

## Need for additional financing

Our revenue is currently insufficient to cover the costs of our ongoing promotion and funding of recording talent, our search for additional talent, and our general operating costs. Our auditors have issued a going concern opinion, which means that there is substantial doubt that we can continue as an ongoing business for the next 12 months. Our ability to continue our operations is dependent on the continued successful signing, licensing, and promoting of talent and the revenue, and the successful making and marketing of a recording act.

To the extent such signing and promoting of recording talent produces inadequate revenues to operate profitably, the Company is dependent on the willingness and ability of Jeff Martin, a major shareholder, and other affiliates, to continue funding, through notes payable, our operations, and our ability to obtain additional sources of financing as discussed below in "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources." As of the date of this prospectus, our relationship with Mr. Martin is stable and we have no reason to doubt his willingness to continue providing additional funding. However, if Mr. Martin discontinues funding our operations and we are unable to obtain alternative financing when needed on acceptable terms, if at all, we may be unable to continue our operations.

We may be unable to meet our capital requirements which may slow down or curtail our business plans.

Since our inception on August 19, 1999 to December 31, 2004, we have suffered operational losses totaling \$3,340,722 and we expect to continue to have substantial expenditures and working capital needs. If success of our talent decreases, we experience operating difficulties, or other factors, many of which are beyond our control, cause our revenues or cash flows from operations to decrease, we may be limited in our ability to obtain the capital necessary to complete our search, promotion, and development of talent and recording acts. We have not thoroughly investigated whether this capital would be available, who would provide it, and on what terms. If we are unable, on acceptable terms, to raise the required capital, our business may be seriously harmed or even terminated.

Revenue from licensing and promoting recording acts and talent often depends on factors beyond our control.

The profitability of our operations depends upon factors which are beyond our control, including:

5

- o File sharing, downloading, and copyright infringement;
- o Poor market acceptance of our talent and record releases; and
- o Business practices of our competitors in the music industry.

Our success depends on our management team and other key personnel, the loss of any of whom could disrupt our business operations

Our success will depend on our ability to retain and to attract other talent for the development of recording acts. We will depend, to a large extent, on the efforts, musical talent, and continued employment of such personnel and members of our management team. If members of our management team should resign or we are unable to attract the necessary talent or recording acts, our business operations could be adversely affected.

One shareholder owns a significant amount of our common stock, giving him influence or control in corporate transactions and other matters, and their interests could differ from those of other shareholders

Jeffrey Martin and Martin Consultants, Inc. own 21,350,000 shares or approximately 92.4 percent of our outstanding common stock. As a result, he is in a position to significantly influence or control the outcome of matters requiring a shareholder vote, including the election of directors, the adoption of any amendment to our certificate of incorporation or bylaws, and the approval of mergers and other significant corporate transactions. His control of Skreem may delay or prevent a change of control on terms favorable to the other shareholders and may adversely affect the voting and other rights of other

shareholders.

#### RISKS RELATED TO THIS OFFERING

As there is presently no public market for our common stock and a market may never develop, investors may be unable to freely sell their securities.

We intend to apply for listing of the securities on the Over the Counter Bulletin Board ("OTCBB"); however, we cannot assure that we will be able to obtain such a listing. The over-the-counter market ("OTC") differs substantially from national and regional stock exchanges because it (1) operates through communication of bids, offers and confirmations between broker-dealers, rather than one centralized market or exchange and (2) securities admitted to quotation are offered by one or more broker-dealers rather than "specialists" which operate in stock exchanges. To qualify for listing on the OTCBB, an equity security must have at least one registered broker-dealer, which acts as the market maker listing bids or ask quotations and which sponsors an issuer listing. A market maker sponsoring a company's securities is required in order to obtain listing of securities on any of the public trading markets, including the OTCBB. We currently do not have a market maker for our securities. If we are able to obtain a market maker for our securities, we may obtain a listing on the OTCBB or develop a trading market for our common stock. We may be unable to locate a market maker that will agree to sponsor our securities. Even if we do locate a market maker, there is no assurance that our securities will be able to meet the OTCBB requirements or that the securities will be accepted for an OTCBB listing.

There can be no assurance that a market for our common stock will be established or that, if established, such market will be sustained. Therefore, purchasers of our shares registered hereunder may be unable to sell their securities, because there may not be a public market for our securities. As a result, you may find it more difficult to dispose of, or obtain accurate quotes of our common stock. Any purchaser of our securities should be in a financial position to bear the risks of losing their entire investment. Shares of our common stock may be "penny stocks."

If the market price per share of our common stock is less than \$5.00, the shares of our common stock will be "penny stocks" as defined in the Exchange Act. As a result, an investor may find it more difficult to dispose of or obtain accurate quotations as to the price of the shares of our common stock being registered under this prospectus. In addition, the "penny stock" rules adopted by the SEC under the Exchange Act subject the sale of shares of our common stock to regulations which impose sales practice requirements on broker-dealers. For example, broker-dealers selling penny stocks must, prior to effecting the transaction, provide their customers with a document that discloses the risks of investing in penny stocks.

6

Furthermore, if the person purchasing the securities is someone other than an accredited investor or an established customer of the broker-dealer, the broker-dealer must also approve the potential customer's account by obtaining information concerning the customer's financial situation, investment experience and investment objectives. The broker-dealer must also make a determination whether the transaction is suitable for the customer and whether the customer has sufficient knowledge and experience in financial matters to be reasonably expected to be capable of evaluating the risk of transactions in penny stocks. Accordingly, the SEC's rules may limit the number of potential purchasers of shares of our common stock. Moreover, various state securities laws impose restrictions on transferring "penny stocks," and, as a result, investors in our common stock may have their ability to sell their shares impaired.

The sale of a substantial number of shares of our common stock after this offering may affect our stock price.

The market price of our common stock could decline as a result of sales of substantial amounts of common stock in the public market after the closing of this offering or the perception that substantial sales could occur. These sales also might make it difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate.

Our certificate of incorporation and bylaws and the Delaware General Corporation Law contain provisions that could discourage an acquisition or change of control of Skreem.

Provisions of our certificate of incorporation and bylaws could make it more difficult for a third party to acquire control of us. These provisions include a denial of cumulative voting rights, limitations on shareholder proposals at meetings of shareholders, and restrictions on the ability of our shareholders to call special meetings. In addition, the Delaware General Corporation Law imposes restrictions on mergers and other business combinations between us and any holder of 15 percent or more of our outstanding common stock.

These provisions of Delaware law and our certificate of incorporation and bylaws may delay, defer or prevent a tender offer or takeover attempt that a shareholder might consider in his best interest, including attempts that might result in a premium over the market price for the common stock.

#### CAUTION ABOUT FORWARD-LOOKING STATEMENTS

Some of the statements under the captions "Prospectus Summary," "Risk Factors," "Use of Proceeds," "Business" and elsewhere in this prospectus are "forward-looking statements." These forward-looking statements include, but are not limited to, statements about our plans, objectives, expectations and intentions and other statements contained in this prospectus that are not historical facts. When used in this prospectus, the words "anticipates," "believes," "continue," "could," "estimates," "expects," "intends," "may," "plans," "seeks," "should" or "will" or the negative of these terms or similar expressions are generally intended to identify forward-looking statements. Because these forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including our plans, objectives, expectations and intentions and other factors discussed under "Risk Factors."

#### USE OF PROCEEDS

All proceeds received by Skreem from the sale of shares will be used for the general purpose of working capital. Assuming a sales price of \$1.00 per share, the following would be our use of proceeds assuming 25%, 50%, 75% and 100% of the securities offered being sold.

Amount of Securities Sold	500,000 shares	1,000,000 shares	1,500,000 shares	2,000,000 shares
Gross Proceeds	\$500,000 =====	\$1,000,000 =====	\$1,500,000 =====	\$2,000,000 =====
Expenses of the Offering	\$35,000 =====	\$35,000 =====	\$35,000 =====	\$35,000 =====
Working Capital	\$465,000 =====	\$965,000 =====	\$1,465,000 =====	\$1,965,000 =====

7

We anticipate the following detailed uses of working capital as follows:

- Hire additional marketing and promoting staff;
- Purchase additional advertising for artists currently promoted by Skreem;
- Develop website and increase internet presence through purchased marketing;
- Form additional recording acts through training, coordinating and consulting with talent acts;
- Service debt with interest payments (the Company anticipates that no proceeds will be used to retire debt) - Contract with producers, choreographers, and writers to develop current acts;

We will not receive any proceeds from the sales, if any, of the shares currently issued and outstanding. The sale of shares currently issued and outstanding will be restricted until after the 2,000,000 shares offered in this prospectus are sold or 180 days from the effective date of this registration statement.

## DETERMINATION OF OFFERING PRICE

The purpose of this offering is to sell 2,000,000 shares of common stock and to register our common stock outstanding as of March 15, 2005 for resale by the selling shareholders. As such the offering price applies to the 2,000,000 shares offered.

There is no established public market for the common stock being registered. As such, the offering price was determined arbitrarily. As the Company's liabilities exceed the Company's assets by approximately 1.45 million dollars at December 31, 2004, the Company determined that an offering price of \$1 per share with an offering of 2,000,000 shares was necessary to allow the Company to continue operations, particularly, to allow the Company to continue operations while maintaining and expanding the search and development of talent acts.

### DILUTION

Our net book value (deficit) as of December 31, 2004, with 23,107,856 shares outstanding, was approximately (\$1,456,790) or (\$0.06) per share before giving effect to the offering. Net book value represents the amount of total tangible assets less total liabilities, divided by the number of shares outstanding.

Assuming the sale of 2,000,000 shares and after deducting offering expenses estimated at \$35,000, our adjusted net book value as of December 31, 2004 would have been approximately \$508,210 or \$0.02 per share. This represents an immediate increase in net book value of \$0.08 per share for December 31, 2004 to the existing shareholders and an immediate dilution in net book value of \$0.98 per share for December 31, 2004 to the new investors in the shares in this offering. The following table illustrates this per share dilution:

	(Unaudited) December 31, 2004
Offering price per share	\$ 1.00
Net book value per share prior to the offering	(.06)
Increase per share attributable to new investors	.00
Adjusted net book value per share after the offering	.06
Dilution per share to new investors	1.06

Further, assuming the sale of a nominal amount of 100,000 shares, and after deducting offering expenses estimated at \$35,000, our adjusted net book value as of December 31, 2004 would have been approximately (\$1,391,790) or (\$0.06) per share. This represents significant change to the existing shareholders for December 31, 2004 and an immediate dilution in net book value of \$1.06 per share to the new investors in the shares in this offering. The following table illustrates this per share dilution:

8

	(Unaudited) December 31 2004
Offering price per share	\$ 1.00
Net book value per share prior to the offering	(.06)
Increase per share attributable to new investors	.00
Adjusted net book value per share after the offering	(.06)
Dilution per share to new investors	1.06

#### PLAN OF DISTRIBUTION

This offering consists of 2,000,000 common shares, \$0.001 par value per share, offered by us for \$1.00 per share in addition to the registration of 23,107,856 shares already issued and outstanding. The shares are offered on a best efforts minimum / maximum basis by the officers of Skreem. The offering will end one hundred and eighty (180) days after the effective date of the registration statement, during which period we will keep this registration statement current by updating the financial statements, related financial disclosures, and information on the operations of the Company.

9

Pursuant to the Securities Exchange Act of 1934, any person engaged in a distribution of the common stock offered by this prospectus may not simultaneously engage in market making activities for our common stock during the applicable "cooling off" periods prior to the commencement of the distribution.

We have advised the shareholders and officers of Skreem, that during the time as they may be engaged in a distribution of any of the shares we are registering by the Registration Statement, they are required to comply with Regulation M promulgated under the Securities Exchange Act of 1934. In general, Regulation M precludes any selling shareholder, any affiliated purchasers and any broker-dealer or other person who participates in the distribution from bidding for or purchasing, or attempting to induce any person to bid for or purchase, and any security which is the subject of the distribution until the entire distribution is complete. Regulation M defines a "distribution" as an offering of securities that is distinguished from ordinary trading activities by the magnitude of the offering and the presence of special selling efforts and selling methods. Regulation M also defines a "distribution participant" as an underwriter, prospective underwriter, broker, dealer, or other person who has agreed to participate or who is participating in a distribution.

Regulation M prohibits any bids or purchases made in order to stabilize the price of a security in connection with the distribution of that security, except as specifically permitted by Rule 104 of Regulation M. These stabilizing transactions may cause the price of the common stock to be higher than it would otherwise be in the absence of these transactions. We have advised the selling shareholders that stabilizing transactions permitted by Regulation M allow bids to purchase our common stock so long as the stabilizing bids do not exceed a specified maximum, and that Regulation M specifically prohibits stabilizing that is the result of fraudulent, manipulative, or deceptive practices. The selling shareholders and distribution participants will be required to consult with

their own legal counsel to ensure compliance with Regulation M. Subject to any future contingencies, the following table is an itemization of all expenses that we have incurred or we expect to incur in connection with the issuance and distribution of the securities being offered hereby. Items marked with an asterisk (\*) represent estimated expenses. We have agreed to pay all the costs and expenses of this offering.

Subject to preferences that may be applicable to any then outstanding series of our preferred stock, holders of our common stock are entitled to receive ratably such dividends, if any, as may be declared by our board of directors out of legally available funds. Upon our liquidation, dissolution or winding up, the holders of our common stock will be entitled to share ratably in the net assets legally available for distribution to our shareholders after the payment of all our debts and other liabilities, subject to the prior rights of any series of our preferred stock then outstanding. The preferences, powers, rights and restrictions of different series of our preferred stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and purchase funds and other matters. The issuance of a series of our preferred stock could decrease the amount of earnings and assets available for distribution to holders of our common stock or affect adversely the rights and powers, including voting rights, of the holders of our common stock, and may have the effect of delaying, deferring or preventing a change in control of us.

11

#### Provisions having possible anti-takeover effects

Our certificate of incorporation and the bylaws contain provisions that could have an anti-takeover effect. These provisions may discourage certain types of transactions that may involve an actual or threatened change of control of Skreem Entertainment Corporation.

Our board of directors has broad powers to fix by resolution the powers, preferences and rights of any new series of preferred stock. This power could be used to create a class of preferred stock that, because of its rights, could discourage a potential takeover. Additionally, our bylaws give the board of directors power to fill vacancies on the board without shareholder approval. As a result, an incumbent board, not a potential bidder, would have control over board positions in the period between annual meetings of shareholders. Our bylaws also provide for an advance notice procedure governing business to be brought before an annual meeting of shareholders, which could discourage a potential bidder from taking action at a meeting.

We are subject to the provisions of Section 203 of the DGCL. In general, this statute prohibits a publicly held Delaware corporation from engaging in a "business transaction" with an "interested stockholder" for a period of three years after the date that the person became an interested stockholder unless (with certain exceptions) the business combination or the transaction in which the person became an interested stockholder is approved in a prescribed manner. A "business combination" generally includes a merger, asset or stock sale or a transaction resulting in a financial benefit to the interested stockholder. An "interested stockholder" generally is a person who, together with affiliates and associates, owns (or within the three prior years did own) 15 percent or more of a corporation's outstanding voting stock.

## Overview

Our business is to search for recording talent and promote and fund.

### The making of a recording act

Signing and promoting a recording act falls into two distinct categories. The first is the process of signing an already established group or artist and through avenues not readily available to the act, but available to the record company, promote the act to a level of widespread public recognition. The second is a company, through auditions and referrals, forms a group or hires an artist with the goal of achieving wide spread recognition. The principal difference financially between these alternatives is that an established act will take a larger percentage of the overall revenues because they absorbed the initial costs of getting started and promoting themselves before the recording deal happened, while normally all of the costs involved in developing the second type of group are borne on by the company which will need to re-coop such costs. From the company's vantage the second process results in more control over the product and a larger percentage of the revenues. Examples of the second categories are the signing groups "Menudo", "New Kids On The Block", and "O-Town". "Back Street Boys" and "N-Sync" are examples of established acts that were signed after they were already in existence. These groups mentioned are examples of the two categories and the Company did not sign, promote or fund these groups.

For company formed acts, the Company provides the training, coordination and consultation that it deems necessary to produce a hit record. This includes, but is not limited to vocal coaching, choreography, fitness training, clothes, hair design, transportation, living expenses, as well as food and housing if necessary. In addition, the company finds and contracts with producers and writers to record songs that fit the style of the act as dictated by the

company. The act records the songs, then performs them live to promote the sales of the records and increase radio airplay. A video is also made for further promotion in the television arena. Revenue is generated through record sales, performance fees, management fees, merchandising such as T-shirts, hats, etc., and publishing royalties. This includes publishing royalties that are paid in the event that the recording(s) are included on any compilations that are released by any other entity. From these revenues the company's investment is repaid, after repayment, the remainder is split between the company and the act by percentages outline in the original recording agreement. All agreements may be different as to percentages; however, the repayment of all money invested by the company before any payment is made to the act is standard practice.

In the case of established acts, the process is the same. The main differences is the revenue split between the act and the company, and creative control. The established act will always demand a higher percentage of the revenues and more control over the musical direction of the act and the selection of the material to be recorded. With new talent, this can be controlled in the first contract but will undoubtedly be an issue in future negotiations.

#### Record Sales

Prior to 1997 the record industry enjoyed tremendous success with record sales. The past six years however have presented a new problem in the form of the internet. Downloading, also referred to as file sharing, has hurt the record industry tremendously, especially in the pop music market. If someone wants a copy of a new song by their favorite artist they can simply sign on to one of the free file sharing web sites, type in the name of the song, and download it to their own computer. They can then make a compilation of their favorites, put the downloaded songs onto a CD and listen to them without the need of paying for them. This completely bypasses the record company, the publisher, and the writer, all of whom would normally have received royalties on the sale of those recordings. Steps are currently being taken by the major record companies nationwide to stop this practice. In the meantime everyone in the industry is searching for alternative ways to generate revenue beyond the traditional means that are outlined.

13

Solutions we have initiated to insulate us from the downloading problem

In the United States we have one federal government that regulates copyrights, publishing, licensing, patenting, and most intellectual rights' laws for all of the states collectively. Therefore, when a song is released in the U.S. all states have the right to airplay and sale of that song as long as they pay the predetermined royalty rates. These royalties are tracked by and then paid to performance organizations such as ASCAP and BMI who in turn disburse the money to their respective members who are listed as either writers or publishers (or both) of each song. Every writer and publisher in the U.S. must be a member of one of these organizations to collect royalties on a commercial record release. These royalties are paid every time a song is played or purchased. This includes TV themes, Musak (elevator music), night club performances, juke boxes, radio, etc. There is a different rate for each type of venue, but it applies equally to all of the states.

In Europe, however, this is not the case. Each country is a governing entity unto itself. Therefore, when a song is released in Germany, it cannot be played, reproduced, or sold in Spain unless the company wishing to release it in Spain pays the license holder of the song a licensing fee for the Spanish rights to the song. This is the case between all countries except Germany, Austria, and Switzerland, also known as the "GAS Territory". Through an agreement between these three countries, recorded and copyrighted materials can be released in all three without special licensing. Outside of those three, all other countries must pay a licensing fee.

Because the European countries are small and easily accessible by the general public, when a song is released in one country its existence becomes known in other countries very quickly through word of mouth and DJs that travel from country to country to perform, sometimes during the same weekend. As the popularity of the song grows it attains a "chart position". A "chart" is a weekly report that lists songs currently in market order for sales, radio airplay, and DJ club play. These lists usually consist of the top selling or played 200 songs. There are DJ club charts, national charts, and radio charts that report publicly each week. The charts are posted on sites available to everyone on the internet. A song achieving the TOP 40 of any of these charts is

considered a success and is in position to create future revenues in the areas of licensing and publishing. A good chart position creates a demand for the song (and act) in each marketplace. Record companies in each marketplace must then acquire the license for their country in order to release the song. This is done by paying the original license holder a fee that is negotiated based on the song's current popularity, the highest chart position it has attained, and its predicted future popularity. The result is that the original license holder is paid a licensing fee by each country that wishes to release the song. Licensing fees for each song can range from \$5,000 to \$25,000 and more from each country depending on the popularity of the song and the act and the size of the country.

Why the European marketplace is ideal for establishing artists in our target market

Our target market is kids between 12 and 18 years of age, especially girls. Teenage girls in Europe make up the majority of the record buying public for pop music. They love American acts and want everything and anything the act has to offer as far as pictures, shirts, hats, CDs, autographs, etc. Since N-Sync has stopped touring there, few acts have come out to fill that void. The kids are hungry for new American talent with a fresh sound.

When developing a recording act in the U.S., the basic process has been the same for decades. Record a CD of songs then shop the CD to distributors and other larger record companies for distribution and promotional support. Next a single is chosen out of the CD of songs; it's released, and followed by the release of the full CD. If the act doesn't have an entire CD or close to it completed, they can almost be assured that no one will be interested. Although oversimplified, this generally is how it works. Producing a CD is expensive and time consuming. The cost of producing 12 or more songs that will stand up to the quality of what's currently on the market by established artists can be astronomical.

The European market is just the opposite. The first step in the process is to record and release a single. This minimizes cost and time. Since this is established practice, there are limited problems with distribution companies or record companies (as long as they like the act). It also allows the Company to test the market as far as musical direction and style before you commit to an entire CD of material. Then a second single is released. A video is produced for each single that's simultaneously released. Concurrently, the act will be performing doing both paid and promotional live performances. Based on the success of these two releases, the company can then determine whether or not to take on the expense of a full CD.

14

Our target market are net surfers. By creative use of the internet including a web site, online promotions such as giveaways, online chats with the act, contests with prizes such as a chance to spend a day with the act, free downloads of unreleased songs, etc., interest and record sales grows. One of the goals of all of this is to create excitement that will result sufficient record sales to attain a favorable position in the weekly charts because licensing fees are negotiated according to the popularity of the song, the act, and their position in the charts. While the act is working its live performances, internet chats, and recording, the company negotiates licenses with other companies for other countries. It will always be the license holding company's prerogative to release any song it owns the license for in any country without any fees. It will however have to take on the expense of pressing and distribution if that avenue is chosen, but if the record is a success this will be offset by not having to split revenues. The company can also enter into a limited partnership with a different company in each country and share in the profits of the release while sharing the expenses if it so chooses.

The key element in our strategy

A key element in initiating and successfully implementing a marketing and development plan such as has been described is someone who knows the marketplace intimately and is respected by the people who do business in that marketplace. Tony Harrison our Vice President fits those requirements. He has both American and German citizenship and has lived in Germany for over 20 years. He's known in the music industry as "Captain Hollywood". As a performer, he's one of the most respected in Europe. He has had worldwide hits and has been performing since 1985. He's also worked as a choreographer and /or producer for such acts as LaToya Jackson, BackStreet Boys, Natural, and O-Town. He's known by everyone in the record business in Europe and is highly respected for both his success as an entertainer and his knowledge of the industry since June 2003. As "Captain

Hollywood" he has since had two songs in the top 20 dance charts and in the top 40 national charts. His years of experience in all aspects of the business have proven invaluable in successfully introducing SKREEM Entertainment to the record industry in Europe.

Coming to America after European success

The final step is to introduce the act to Americans. This process has been successfully achieved several times in the past with Back Street Boys, Britney Spears, N-Sync, and Snap. The act will be polished and roadworthy from time spent in Europe, and will have already been making money through record sales, publishing revenues, licensing fees, live performances, and merchandising. Also, they'll have bragging rights with regards to having "Gold Records" in Europe. The catch there is that a gold record in the U.S. requires 500,000 copies sold. In Europe, depending on the country, a gold record can be earned with a few as 25,000 copies sold. American audiences do not generally realize this and assume that the act has sold many more records than they actually have sold. This is helpful in the American marketing campaign. They also come to America with many record industry people, promoters, and managers already aware of them through industry connections in Europe. This is helpful when arranging for the act to perform nationally or with an already established American act, which is the most tried and true way of introducing the act and their songs to the public.

All of this leads to launching a recording act that has the potential of creating a greater return on a much lower investment than would be necessary to achieve the same results by starting out in the American market.

#### MANAGEMENTS DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

From the time a record or CD is distributed, to the time the company collects its share of the proceeds from sale, is approximately nine months. This delay occurs because, although a record or CD is distributed, a number of records or CDs are returned and a sale figure cannot be accurately booked as of the date of distribution. Accordingly, the Company should see a significant increase in revenues during the quarterly period ending on March 31, 2005 because from July 26, 2004 to November 1, 2004, the Company distributed approximately 207,000 records and CDs of "3rd Wish" recordings. Based on current pricing, the Company should receive approximately \$2.57 per record and/or CD.

15

The Company has entered into various license agreements which grant certain exclusive rights to sell and distribute certain recordings by "3rd Wish". The table below sets forth the parties and territories covered by these license agreements:

Party(Licensee)	Territories
Cheyenne Records	Germany, Switzerland and Austria
Three 8 Music Limited	UK, Eire
Shock Records Pty Ltd	Australia, New Zealand
NRJ Music	France, Andorra, Monaco, Belgium
Megaliner Records	Russia, Azerbaijan, Armenia, Georgia, Moldova, Kazakhstan, Kyrgyzstan, Tajikistan, Uzbekistan, Turkmenistan, Ukraine, Republic of Belarus, Lithuania, Latvia, Estonia
NMC Music Ltd.	Israel

Revenue is recognized in accordance with Staff Accounting Bulletin No. 104 (SAB 104) when persuasive evidence of an arrangement exists, the price to the buyer is fixed or determinable; delivery had occurred or services have been rendered or the license period has begun; and collectibility is reasonably assured.

Revenue from the distribution of recordings under license and distribution agreements is recognized as earned under the criteria established by Statement of Financial Accounting Standard No. 50. Revenue is generally recognized when the Company receives an "accounting" of recordings sold with payment from the licensee. In the event the Company has not received an "accounting" from the licensee and if the Company has information related to the licensed use of recordings that would result in the revenue being fixed and determinable, and collection is reasonably assured, then revenue is recognized in the periods in which the license revenue is earned. Minimum guarantees (advances) received from licensees are recorded as deferred revenue and are amortized over the performance period, which is generally the period covered by the agreement.

#### MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS.

There is no established public trading market for our securities. None of our common stock is subject to outstanding options or warrants to purchase our shares. There are 23,107,856 shares of our common stock outstanding, all of which are restricted securities. The restricted securities as defined under Rule 144 of the Securities Act may only be sold under Rule 144 or otherwise under an effective registration statement or an exemption from registration, if available. Rule 144 generally provides that an affiliate, including directors, officers and control shareholders, who has satisfied a one year holding period for the restricted securities may sell, within any three month period subject to certain manner of resale provisions, an amount of restricted securities which does not exceed the greater of 1% of a company's outstanding common stock or the average weekly trading volume in such securities during the four calendar weeks prior to such sale. Sales under Rule 144 must also be made without violating the manner-of-sale provisions, notice requirements, and the availability of public information about us. A sale of shares by such security holders, whether under Rule 144 or otherwise, may have a depressing effect upon the price of our common stock in any market that might develop.

#### Penny stock considerations

Our common stock is expected to trade on the over-the-counter electronic bulletin board or on the Pink Sheets and, therefore, is subject to the requirements of certain rules promulgated under the Securities Exchange Act of 1934, which require additional disclosure by broker-dealers in connection with any trades involving a stock defined as a "penny stock". A penny stock is generally defined as any non-NASDAQ equity security that has a market price of less than \$5.00 per share, subject to certain exceptions.

Such rules require the delivery, prior to any penny stock transaction, of a disclosure schedule explaining the penny stock market and the risks associated therewith and impose various sales requirements on broker-dealers who sell penny stocks to persons other than established customers and "accredited investors". An accredited investor is generally defined as an investor with a net worth in excess of \$1,000,000, or annual income exceeding \$200,000 individually or \$300,000 together with a spouse.

20

Pursuant to Rule 15g-9 of the Securities Exchange Act of 1934, for these types of transactions, the broker-dealer must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to the sale. The broker-dealer also must disclose the commissions payable to the broker-dealer, current bid and offer quotation for the penny stock and, if the broker-dealer is the sole market-maker, the broker-dealer must disclose this fact and the broker-dealer's presumed control over the market. This information must be provided to the customer orally or in writing before or with the written confirmation of trade sent to the customer. Monthly statements must be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks. The additional burdens imposed upon broker-dealers by such requirements could, in the event the common stock were deemed to be a penny stock, discourage broker-dealers from effecting transactions in our common stock which could severely limit the market liquidity of the common stock.

These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for a stock that becomes subject to the penny stock rules. Our shares may someday be subject to such penny stock rules

and our shareholders will, in all likelihood, find it difficult to sell their securities.

No market exists for our securities and there is no assurance that a regular trading market will develop or if developed will be sustained. A shareholder in all likelihood, therefore, will not be able to resell the securities referred to herein should he or she desire to do so. Furthermore, it is unlikely that a lending institution will accept our securities as pledged collateral for loans unless a regular trading market develops. There are no plans, proposals, arrangements or understandings with any person with regard to the development of a trading market in any of our securities.

As of the date of this registration, we have approximately 110 holders of record of our common stock. We currently have one class of common stock outstanding and no preferred shares outstanding.

Transfer agent and registrar

We anticipate the registrar and transfer agent for our common shares will be OTC stock transfer.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders  
Skreem Entertainment Corporation

We have audited the accompanying consolidated balance sheet of Skreem Entertainment Corporation and subsidiary (a development stage company) (the "Company"), as of March 31, 2004, and the related consolidated statements of operations, shareholders' deficit and cash flows for the three months ended March 31, 2004 and the years ended December 31, 2003 and 2002 and for the period from August 19, 1999 (date of inception) through March 31, 2004. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company

Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Skreem Entertainment Corporation and subsidiary as of March 31, 2004 and the results of its operations, and its cash flows for the three months ended March 31, 2004 and the years ended December 31, 2003 and 2002 and for the period August 19, 1999 (date of inception) through March 31, 2004 in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company is in the development stage and has suffered recurring losses from operations and had a net capital deficit, which raises substantial doubt about its ability to continue as a going concern. Management plans to continue funding the operation through an affiliate owned by a major shareholder of the Company. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

SKREEM ENTERTAINMENT CORPORATION  
(A Development Stage Company)  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
-----

1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of the business and merger

Stanford Capital Corporation (Stanford) was incorporated under the laws of the State of Delaware on June 11, 1992. During January 2004, Stanford acquired all of the issued and outstanding shares of common stock of Skreem Entertainment Corporation (Skreem) in exchange for 22,000,000 post reverse split shares of common stock, par value \$0.001 per share, to the holders of Skreem's common stock. The transaction is considered a reverse merger and Skreem became a wholly owned subsidiary of Stanford. Stanford and Skreem are collectively referred to as "the Company". On March 16, 2004 the Company filed a Certificate of Amendment with the Delaware Secretary of State changing the Company's name to Skreem Entertainment Corporation and reverse splitting the Company's shares on a one (1) for five (5) basis. The financial statements herein reflect the effect of the reverse stock split. The proforma effects of the reverse merger are not material to the consolidated financial statements.

Skreem is a development stage company that was incorporated in Nevada on August 19, 1999. Skreem was formed to promote, finance and manage artists and projects in the music industry and is located in the State of Florida.

Basis of presentation and consolidation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The Company has elected to continue the fiscal year of the legal acquirer (registrant). As the transaction is deemed a reverse merger, this gives rise to the three month transition period ended March 31, 2004.

The consolidated financial statements include the financial statements of the Company and its wholly owned subsidiary. All significant intercompany balances and transactions, including intercompany profits and unrealized profits and losses are eliminated on consolidation.

#### Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and on deposit at a major financial institution. The Company considers highly liquid investments with original maturities of three months or less when purchased to be cash equivalents.

#### Advances to Artists

The Company advances monies to artists upon the artist signing the "Exclusive Recording Artist Agreement." An advance paid to an artist shall be reported as an asset if the past performance and current popularity of the artist to whom the advance is made provide a sound basis for estimating that the amount of the advance will be recoverable from future royalties to be earned by the artist. Any portion of advances that subsequently appear not to be fully recoverable from future royalties to be earned by the artist shall be charged to expense during the period in which the loss becomes evident.

#### 1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued Property and equipment

30

Property and equipment are stated at cost. Provisions for depreciation are computed using the double-declining method based on the estimated useful lives of the assets, generally five to seven years. Expenditures that increase the value or extend the life of the asset are capitalized, while cost of maintenance and repairs are expensed as incurred. Leasehold improvements are amortized on a straight-line basis over the shorter of the useful life of the improvement or the term of the lease. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is recognized.

In accordance with Statement of Financial Accounting Standards (SFAS) No. 144, "Accounting for the Impairment or Disposal of Long-lived Assets," the Company examines the possibility of decrease in value of fixed assets when events or changes in circumstances reflect the fact that their recorded value may not be recoverable.

#### Record masters

A record master borne by the Company is reported as a cost of production when the past performance and current popularity of the artist does not provide a sound basis for estimating that the cost will be recovered from future sales.

#### Revenue Recognition

Revenue is recognized in accordance with Staff Accounting Bulletin No. 104 (SAB 104) when persuasive evidence of an arrangement exists, the price to the buyer is fixed or determinable; delivery has occurred or services have been rendered or the license period has begun; and collectibility is reasonably assured.

Revenue from the distribution of recording under license and distribution agreements is recognized as earned under the criteria established by Statement of Financial Accounting Standard No. 50. Revenue is generally recognized when the Company receives an "accounting" of recordings sold with payment from the licensee. In the event the Company has not received an "accounting" from the licensee and if the Company has information related to the licensed use of recordings that would result in the revenue being fixed and determinable, and collection is reasonably assured, then revenue is recognized in the periods in

which the license revenue is earned. Minimum guarantees (advances) received from licensees are recorded as deferred revenue and are amortized over the performance period, which is generally the period covered by the agreement.

#### Operating expenses

Operating expenses include music production costs, artist compensation costs, and other operating expenses. The Company enters into production, promotion and related consulting agreements in the ordinary course of business.

#### Use of estimates

The preparation of financial statements in conformity with general accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### Income taxes

From inception of the Company through August 31, 2003, the Company had elected to be taxed under Subchapter S of the Internal Revenue Code. As a result, corporate income or loss passes through to the shareholder and therefore, no provision for federal or state income taxes is recorded by the Company. On August 31, 2003, the Company converted certain debt and accrued interest owed to affiliates to equity. The affiliates were a corporation and a partnership which made the Company ineligible to be taxed under subchapter S of the Internal Revenue Code. Subsequent to August 31, 2003, the Company accounts for income tax using Statements of Financial Accounting (SFAS) No. 109 "Accounting for Income Taxes."

#### Recent accounting pronouncements

In January 2003, and as revised in December 2003, the Financial Accounting Standards Board ("FASB") issued Interpretation No.46 ("FIN 46") "Consolidation of Variable Interest Entities." Until this interpretation, a company generally included another entity in its consolidated financial statements only if it controlled the entity through voting interest. FIN 46 requires a variable interest entity, as defined, to be consolidated by a company if that company is subject to a majority of the risk of loss from the variable interest entity's activities or entitled to receive a majority of the entity's residual returns. Certain provisions of FIN 46 were deferred until the period ending after March 15, 2004. The adoption of FIN 46 for provisions effective during 2003 and 2004 did not have a material impact on the Company's financial position, cash flows or results of operations.

In April 2003, the FASB issued SFAS No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities" ("SFAS 149"), which amends SFAS 133 for certain decisions made by the FASB Derivatives Implementation Group, In Particular, SFAS 149: (1) clarifies under what circumstances a contract with an initial net investment meets the characteristic of a derivative, (2) clarifies when a derivative contains a financing component, (3) amends the definition of an underlying to conform it to language used in FASB Interpretation No. 45 "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others," and (4) amends certain other existing pronouncements. This Statement is effective for contracts entered into or modified after June 30, 2003, and for hedging relationships designated after June 30, 2003. In addition, most provisions of SFAS 149 are to be applied prospectively. The adoption of SFAS 149 did not have a material impact on the Company's financial position, cash flows or results of operations.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity" ("SFAS 150"). SFAS 150 changes the accounting for certain financial instruments that under previous guidance issuers could account for as equity. It requires that those instruments be classified as liabilities in balance sheets. The guidance in SFAS 150 is generally effective for all financial instruments entered into or modified after May 31, 2003, and otherwise is effective on July 1, 2003. The adoption of SFAS 150 did not have a material impact on the Company's financial position, cash flows or results of operations.

Going Concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company sustained losses of \$205,994, \$736,364, and \$384,590 for the three months ended March 31, 2004, and years ended December 31, 2003, and 2002 respectively. The Company had an accumulated deficit of \$2,136,664 at March 31, 2004. These factors raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time. The Company is highly dependent on its ability to continue to obtain investment capital from an affiliate in order to fund the current and planned operating levels. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. The Company's continuation as a going concern is dependent upon its ability to continue receiving investment capital from an affiliate to complete promotion of the Company's artists, continue production of music and achieve a level of success that will enable it to sustain its operations. No assurance can be given that the Company will be successful in these efforts.

On August 31, 2003, the Company converted certain debt and accrued interest owed to affiliates to equity. The affiliates were a corporation and a partnership which made the Company ineligible to be taxed under subchapter S of the Internal Revenue Code. Subsequent to August 31, 2003, the Company accounts for income tax using Statements of Financial Accounting (SFAS) No. 109 "Accounting for Income Taxes."

The following table sets forth a reconciliation of federal income tax for the three months ended March 31, 2004:

	=====
Income tax benefit computed at statutory rates	(70,038)
Valuation allowance	69,322
Permanent differences, nondeductible	

expenses	716
	-----
Tax benefit	\$ -
	=====

As of March 31, 2004, the Company has net operating loss carry forwards of approximately \$448,623. The carry forwards begin to expire in the year 2023. The Company's net operating loss carry forwards may be subject to annual limitations, which could reduce or defer the utilization of the losses as a result of an ownership change as defined in section 382 of the Internal Revenue Code. The tax effects of the temporary differences between reportable financial statement income and taxable income are recognized as a deferred tax asset and liability.

Significant components of the deferred tax assets are set out below along with a valuation allowance to reduce the net deferred tax asset to zero. In order to comply with generally accepted accounting principles, management has decided to establish the valuation allowance because of the potential that the tax benefits Under lying deferred tax asset may not be realized. Significant components of the Company's deferred tax asset at March 31, 2004 are as follows:

Deferred tax assets	2003
	-----
Net operating loss carry forwards	\$ (152,531)
Less: valuation allowance	152,531
	-----
Net deferred tax assets	\$ -

Skreem Entertainment Corporation

Note 1 - BASIS OF PRESENTATION

They do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. These unaudited consolidated condensed financial statements should be read in conjunction with the consolidated financial statements and footnotes, which are included as part of the consolidated financial statements as of March 31, 2004.

Note 2 - ACCOUNTING POLICY FOR REVENUE RECOGNITION

Revenue is recognized in accordance with Staff Accounting Bulletin No. 104 (SAB 104) when persuasive evidence of an arrangement exists, the price to the buyer is fixed or determinable; delivery has occurred or services have been rendered or the license period has begun; and collectibility is reasonably assured.

Revenue from the distribution of recordings under license and distribution agreements is recognized as earned under the criteria established by Statement of Financial Accounting Standard No 50. Revenue is generally recognized when the Company receives an "accounting" of recordings sold with payment from the licensee. In the event the Company has not received an "accounting" from the licensee and if the Company has information related to the licensed use of recordings that would result in the revenue being fixed and determinable, and collection is reasonably assured, then revenue is recognized in the periods in which the license revenue is earned. Minimum guarantees (advances) received from licensees are recorded as deferred revenue and are amortized over the performance period, which is generally the period covered by the agreement.

#### Note 4 - GOING CONCERN

The accompanying financial statement has been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company sustained losses of \$1,204,058, at December 31, 2004. The Company had an accumulated deficit of \$3,340,722 at December 31, 2004. These factors raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time. The Company is highly dependent on its ability to continue to obtain investment capital and loans from an affiliate and major shareholder in order to fund the current and planned operating levels. The financial statements do not include

any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. The Company's continuation as a going concern is dependent upon its ability to continue receiving investment capital from an affiliate and obtaining loans to complete promotion of the Company's artists, continue production of music and achieve a level of success that will enable it to sustain its operations. No assurance can be given that the Company will be successful in these efforts.

Note 5 - PRIVATE PLACEMENT MEMORANDUM

The shares are offered on a "best efforts" basis. The Offering will be made in reliance upon an exemption from registration under the federal securities laws provided by Regulation D as promulgated by the United States Securities and Exchange Commission ("SEC"). The Offering will terminate upon the earlier of (i) the sale of the 3,000,000 shares or (ii) May 31, 2004 unless extended by the Company for one hundred and twenty days. The company did extend the offering for 120 days and issued 603,856 shares with proceeds of \$301,928. The Company amended the PPM reducing the share minimum to 100,000 shares. The offering concluded after the 120 day extension.

PART II  
INFORMATION NOT REQUIRED IN PROSPECTUS

INDEMNIFICATION OF DIRECTORS AND OFFICERS

Our Articles of Incorporation provide that, to the fullest extent permitted by law, none of our directors or officers shall be personally liable to us or our shareholders for damages for breach of any duty owed to our shareholders or us. Florida law provides that a director shall have no personal liability for any statement, vote, decision or failure to act, regarding corporate management or policy by a director, unless the director breached or failed to perform the duties of a director. A company may also protect its officers and directors from expenses associated with litigation arising from or related to their duties, except for violations of criminal law, transactions involving improper benefit or willful misconduct. In addition, we shall have the power, by our by-laws or in any resolution of our stockholders or directors, to undertake to indemnify the officers and directors of ours against any contingency or peril as may be determined to be in our best interest and in conjunction therewith, to procure, at our expense, policies of insurance. At this time, no statute or provision of the by-laws, any contract or other arrangement provides for insurance or indemnification of any of our controlling persons, directors or officers that would affect his or her liability in that capacity.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers, or persons controlling us pursuant to the foregoing provisions, we have been informed that, in the opinion of the SEC, that type of indemnification is against public policy as expressed in the Act and is therefore unenforceable.

There is no pending litigation or proceeding involving any of our directors or officers as to which indemnification is being sought, nor are we aware of any pending or threatened litigation that may result in claims for indemnification by any director or officer.
