Supplement dated January 2, 1998

The following information supplements the Statement of Additional Information of each of the Funds listed below.

SHAREHOLDER INVESTMENT ACCOUNT--
TAX-DEFERRED RETIREMENT ACCOUNTS

Individual Retirement Accounts. An Individual retirement account (IRA) permits the deferral of federal income tax on income earned in the account until the earnings are withdrawn. The following chart represents a comparison of the earnings in a personal savings account with those in an IRA, assuming a \$2,000 annual contribution, an 8% rate of return and a 39.6% federal income tax bracket and shows how much more retirement income can accumulate within an IRA as opposed to a taxable individual savings account.
