Tax-informed investing

An important part of any successful investment program is gauging how well your
investments have performed and measuring your progress toward your long-term
goals.

<TABLE>
<CAPTION>

Taxes dramatically alter the relative returns of the five asset classes shown
at right.

Graph showing after-tax returns, 1976-1996.

<S>	<C>
Municipals	8.26
Treasuries	5.62
Corporates	6.11
Stocks	10.51
Treasury Bills	3.87

</TABLE>

Traditionally, the most common way to measure performance has been to compare
pre-tax rates of return for different investments across similar time periods.
The rationale behind this method is that each investor is taxed at a different
rate, making pre-tax comparisons the seemingly logical way to ensure you are
comparing apples to apples.

This, however, is precisely the rationale that can make a pre-tax
performance assessment misleading. When returns are presented on a pre-tax
basis, you may lose sight of the major impact taxes can have on your earnings,
and fail to get the complete picture of your progress toward your investment
goals. At Nuveen, we've built our reputation helping investors realize that
it's not what you earn, it's what you keep.

TAX-INFORMED INVESTING: THE KEY
TO MEASURING LONG-TERM RESULTS

The true measure of an investment is its performance on an after-tax basis.
Analyzing after-tax returns gains added significance when you realize that the
taxes you pay can never be regained. Once that money is "lost," it can't be
put to work through compounding, earning additional dollars for you.

To better illustrate the ways that taxes can affect the amount you keep
versus the amount you earn, Nuveen Research recently studied 20 years of
investment returns, both pre-tax and after-tax, to determine the impact of
taxes on various asset classes. We were particularly interested in the results
for municipal bonds, an asset class that is commonly excluded from the top
performance rankings when only pre-tax returns are considered.

MEASURING WHAT YOU KEEP

The study showed that, once the impact of taxes was figured into the equation,
municipal bonds offered a distinct advantage over other fixed income
investments. Over the study period, municipal bonds outperformed both
corporate and Treasury bonds (see accompanying tables), as high tax rates and
the loss of compounding income took their toll on corporate and Treasury
results.

As investors are well aware, performance over the long term--and the
purchasing power of their earnings--can be eroded by inflation as well as
taxes. The study showed that, over the past 20 years, only municipal bonds and

stocks provided significant after-tax gains over the Consumer Price Index, the most recognized measure of inflation.

ABOUT THE STUDY

The study, "Measuring What You Keep: Historical After-Tax Returns," compared pre-tax and after-tax total returns over the past 20 years for five asset classes: municipal bonds, Treasury bonds, Treasury bills, corporate bonds, and large company stocks. Returns for each asset class were represented by the returns on commonly used market indexes compiled by Lehman Brothers and Ibbotson Associates.

A hypothetical investment of \$100,000 was made in each of these asset classes at the beginning of 1976, with all dividends and interest reinvested through the end of 1995. In addition, the after-tax proceeds of an assumed annual 20% turnover rate were reinvested. The study assumed that taxes were paid annually at the applicable federal income tax rates for an investor earning the equivalent of \$100,000 in 1995. Of course, this hypothetical investment performance neither reflects past performance nor predicts future results of any Nuveen investment.

INCORPORATING TAX-INFORMED INVESTING IN YOUR PORTFOLIO

The Nuveen study confirms what many investors have known for years: that municipal bonds can play a critical role in the long-term financial strategies of tax-informed investors.

Balancing short-term and long-term investments

Combining shorter- and longer-term tax-free investments may help you manage cumulative risk in your portfolio while still capturing the potential for attractive overall rates. Shorter-term investments can help reduce the current volatility of your portfolio and provide a source of investable funds to take advantage of additional investment opportunities as they arise. Longer-term leveraged exchange-traded funds have provided attractive yields and offer trading flexibility that allows quick and easy portfolio adjustments.

Dividend reinvestment

Studies indicate that weathering market cycles by maintaining an investment plan with long-term goals can help shield investors in the event of a declining market. The purchase of additional shares on a regular schedule, such as through dividend reinvestment, is another strategy for navigating market changes. Dividend reinvestment is an easy and convenient way to set aside dollars on a regular basis, helping you take advantage of dollar-cost averaging while gaining the benefits of tax-free compounding.

CONSISTENT AFTER-TAX PERFORMANCE

For the long-term investor, performance--even after the impact of taxes and inflation--is the true measure of an investment's merit. While most investors choose municipal bonds for their tax-free income advantage, the positive news about their after-tax returns reinforces their potential value as part of a tax-informed investment strategy designed to meet long-term objectives. Understanding the impact of taxes can mean that you keep more of what you earn, and municipal bonds can help you do just that.

Only municipals and equities generated significant increases in purchasing power over the twenty-year period, with after-tax and inflation-adjusted returns in excess of 2.75% annually.

Municipal market perspective

Over the past year the bond market has been relatively stable compared with recent years, despite some fluctuations. While 1994 represented the worst period in recent bond market history and 1995 the best in a decade, 1996 ended the year about where it began, rebounding from a mid-year decline. Following a strong start, a succession of mixed reports affecting interest rate and inflation forecasts caused investors to view the markets alternatively with enthusiasm, then uncertainty. In the third quarter, evidence of an economic slowdown, the strong U.S. dollar, and lack of inflationary pressures combined to allay investor fears, sparking a rally in bonds that continued through the post-election period. Throughout the year, the municipal market continued to reward investors with solid returns, dependable income, and opportunities to purchase bonds with strong credit quality.

A look at the current economy shows a positive tone, reflecting a combination of factors that historically bode well for the bond market, especially long-term issues. Yields remain attractive, as inflation maintains the same modest pace that it has demonstrated over the past five years, giving every indication of being well under control. At the same time, the economy continues to moderate, as evidenced by the lack of price pressure at the consumer and producer levels, steady employment statistics, low labor costs, and a stable money supply.

Photographic image of head shot of Chairman and Chief Executive Officer of Nuveen.

"Municipal bonds continue to play an important role in meeting the investment goals of conservative investors."

Dear
shareholder

As I begin my duties as the new chairman and chief executive officer of John Nuveen & Co. Incorporated and chairman of the board of the Nuveen exchange-traded funds, I am pleased to have this opportunity to report to you on the performance of your funds. My experience at Nuveen over the past 19 years has shaped my commitment to maintaining Nuveen's tradition of value investing and prudent management. We continue to focus on building shareholder value, providing research-oriented management, and delivering dependable performance, in the belief that this focus will contribute to many more years of investment success for our fund shareholders.

Municipal bonds continue to play an important role in meeting the investment goals of conservative investors. The performance of the exchange-traded funds covered in this report demonstrates the ability of quality investments to provide extremely attractive tax-free income. As of October 31, 1996, the current annual yields on share price for the Municipal Value Fund and Municipal Income Fund were 6.46% and 6.35%, respectively. To match these yields, an investor in the 36% federal income tax bracket would have had to earn at least 9.92% on taxable alternatives. Without question, taxable yields at this level on investments of comparable quality can be difficult to obtain in today's markets.

The net asset values of these funds declined slightly over the 12 months ended October 31, reflecting the mid-1996 uncertainty that drove prices lower

and yields higher. Yet returns remained attractive. For the Municipal Value Fund and Municipal Income Fund, total returns, representing changes in net asset value and reinvestment of all dividends and capital gains, if any, were 5.84% and 6.49%, respectively, equivalent to taxable investments with total returns of 9.30% and 10.17%. As concerns about the effects of a potential flat

tax evaporated and the Federal Reserve continued to stand firm on interest rates, confidence in the bond market was restored in November following the fiscal year ends of these funds.

I would like to take this opportunity to share with you the news of some recent developments that will give Nuveen the flexibility to meet expanded investor needs for capital preservation, current income, and future growth.

In November, we introduced the Nuveen Growth and Income Stock Fund, the first of three Nuveen equity-based mutual funds designed to provide a high-quality complement to our current municipal bond funds. These new funds will be offered in affiliation with Institutional Capital Corporation (ICAP), an institutional equity management firm located in Chicago that shares Nuveen's values and investment management style. Tailor-made to address the needs of many Nuveen investors, these funds can play a critical role in achieving a balanced strategy for investors who expect their investments to provide a core element of their financial security.

In another move that will increase the range of investment solutions for investors, Nuveen is acquiring Flagship Resources, Inc., a fixed income mutual fund specialist based in Dayton, Ohio. Flagship is a firm that shares our views on the importance of research and emphasizes a conservative, value-oriented approach to portfolio management. In January 1997, the tax-exempt mutual fund activities of Flagship and Nuveen will be merged, resulting in more than 40 municipal funds, the broadest selection available in the U.S.

We are excited about these recent developments, and we are pleased to be bringing Nuveen investors expanded options for achieving wealth preservation, dependable income, and long-term asset growth. We thank you for your continued confidence in Nuveen.

Sincerely,

/s/ Timothy R. Schwertfeger

Answering your questions

Tom Spalding, head of Nuveen's portfolio management team, discusses the current environment in the municipal market and aspects of Nuveen's management approach

Did the November elections have any impact on the municipal market?

No. While both the stock and bond markets have enjoyed post-election rallies, the markets had substantially anticipated the outcome of the elections, that is, the re-election of a Democratic President and the continued Republican majority in Congress. Maintaining the status quo of the past four years should have little effect on the municipal market.

What is the current mood of the municipal market?

The overall tone of the municipal market today is very positive. Over the past year, we have seen municipals perform well in comparison to Treasuries. Adding to the general optimism is the fact that the election has ended all talk of a flat tax for now, eliminating one source of uncertainty regarding municipal value. Based on these factors, we expect market sentiment to stay on the positive side in the coming months.

Are there areas of the market that look especially attractive?

Regionally, the Midwest has turned in strong performance over the past year. This is due to the fact that the economies of Illinois, Michigan, and Ohio have done very well recently, with bonds from issuers in these states benefiting from price appreciation relative to the market.

Photographic image of Tom Spalding, Portfolio Manager at Nuveen.

Tom Spalding, head of Nuveen's portfolio management team, answers investors' questions on developments in the municipal market

Do the Nuveen funds currently hold many bonds from Midwestern issuers? Historically, Nuveen's national funds have always been slightly overweighted in bonds from Midwestern issuers. Two main reasons account for this:

- o Because interest from Illinois-issued municipal bonds generally is not deductible when calculating state taxes, these bonds often provide more attractive yields and prices than bonds from other states. Therefore, at certain times, we tend to hold more bonds from this Midwestern state.

- o Because of our long history in Chicago, we are particularly well acquainted with credits in this part of the country.

We believe that much of the recent relative price appreciation opportunity in Midwest bonds may have been realized, with many of these bonds now reaching what we would consider full value.

Does the portfolio management approach differ between older and newer Nuveen funds?

While all of our funds are managed using the same philosophy and approach to security selection and portfolio construction, each fund has a unique history and set of circumstances that create different opportunities. Adding to this diversity is the fact that each portfolio manager has an individual style. These differences manifest themselves in slight variations. For example, one manager might identify more frequent opportunities to change portfolio holdings over the course of a year, while another manager might choose to buy more of a certain issue or sell at a different time.

However, all of our portfolio managers use the same fundamental value approach in the search for bonds that we believe are positioned to outperform their peers. This means that we generally focus on the same types of credits and same time horizons, and we try to maintain the same geographical and sector diversification. Our management approach involves a team atmosphere, even though each manager is overseeing separate portfolios.

Can you comment on the overall credit quality of the Nuveen funds?

Over the course of 1996, the market has seen more upgrades than downgrades in bond credit ratings, and our portfolios generally reflect this overall market trend. As opportunity allowed, Nuveen portfolio managers maintained or upgraded bonds in their portfolios to increase value and extend call protection.

What is the status of bond calls in Nuveen's older portfolios?

Our funds--especially the older state and national funds--have been dealing with the issue of bond calls and pre-refundings for years. Although this has put pressure on dividends, all of our funds have performed very well through this period. Generally, we don't expect bond calls and pre-refundings to play as major a role over the next few years as they have recently. While some of our funds still have pre-refunded and current call risk, others have restructured their portfolios and have virtually no call exposure.

<TABLE>

NUVEEN MUNICIPAL VALUE FUND, INC.
NUV

Investors in NUV have enjoyed attractive current yields; however, as older, higher coupon bonds have been called from the fund's portfolio, the dividend income has declined somewhat. Shareholders received a capital gains distribution in December 1995.

</TABLE>

Commonly used terms

Yield

An exchange-traded fund's annualized monthly dividend on a given date (in the case of this report, October 31, 1996) divided by its closing price per share on that date.

Taxable equivalent yield

The return an investor subject to a given federal income tax rate would need to obtain from a fully taxable investment to equal the fund's stated annualized yield on share price. In this report, this tax rate is assumed to be 36% for shareholders, based on incomes of \$121,300-\$263,750 for investors filing singly, \$147,700-\$263,750 for those filing jointly.

Net Asset Value (NAV)

The market value of all securities and other assets held by an exchange-traded fund, minus any liabilities. The NAV per share is the fund's net assets divided by its total number of common shares outstanding.

Total return on NAV

The percentage change in a fund's NAV per common share for a given period, assuming reinvestment of all dividends and capital gains distributions, if any.

Taxable equivalent total return

The total return an investor subject to a given federal income tax rate would need to obtain from a fully taxable investment to equal the Fund's stated total return on NAV.

Each Fund intends to repurchase shares of its own common stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the 12-month period ended October 31, 1996. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

NOTES TO FINANCIAL STATEMENTS

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

At October 31, 1996, the National Funds (the "Funds") covered in this report and their corresponding New York Stock Exchange symbols are Nuveen Municipal Value Fund, Inc. (NUV) and Nuveen Municipal Income Fund, Inc. (NMI).

Each Fund invests primarily in a diversified portfolio of municipal obligations issued by state and local government authorities. The Funds are registered under the Investment Company Act of 1940 as closed-end, diversified management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with generally accepted accounting principles.

Securities Valuation

Portfolio securities for which market quotations are readily available are valued at the mean between the quoted bid and asked prices or the yield equivalent. Portfolio securities for which market quotations are not readily available are valued at fair value by consistent application of methods determined in good faith by the Board of Directors. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are traded and valued at amortized cost.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific

identification method. Securities purchased or sold on a when-issued or delayed delivery basis may be settled a month or more after the transaction date. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of their purchase commitments. At October 31, 1996, there were no such purchase commitments in either of the Funds.

Interest Income

Interest income is determined on the basis of interest accrued, adjusted for amortization of premiums and accretion of discounts on long-term debt securities when required for federal income tax purposes.

Federal Income Taxes

The Funds intend to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies by distributing to shareholders all of their tax-exempt net investment income, in addition to any significant amounts of net realized capital gains and/or market discount realized from investment transactions. The Funds currently consider significant net realized capital gains and/or market discount as amounts in excess of \$.001 per share. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds. All regular monthly income dividends paid during the year ended October 31, 1996, have been designated Exempt Interest Dividends which are exempt from regular federal personal income tax. Net realized capital gain and market discount distributions are subject to federal taxation.

Dividends and Distributions to Shareholders

Tax-exempt net investment income is declared as a dividend monthly and payment is made or reinvestment is credited to shareholder accounts after month-end. Net realized capital gains and/or market discount from investment transactions are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryovers.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount are recorded on the ex-dividend date. The amount and timing of such distributions are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Derivative Financial Instruments

In October 1994, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 119, Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments, which prescribes disclosure requirements for transactions in certain derivative financial instruments including futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the year ended October 31, 1996.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of

the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period.

2. FUND SHARES

Transactions in shares were as follows:

<TABLE>

3. SECURITIES TRANSACTIONS

Purchases and sales (including maturities) of investments in municipal securities and temporary municipal investments during the year ended October 31, 1996, were as follows:

<TABLE>
<CAPTION>

	NUV	NMI
<S>	<C>	<C>
PURCHASES		
Investments in municipal securities	\$370,549,014	\$11,414,980
Temporary municipal investments	174,465,000	11,900,000
SALES AND MATURITIES		
Investments in municipal securities	342,402,846	9,375,445
Temporary municipal investments	175,465,000 =====	11,500,000 =====

</TABLE>

At October 31, 1996, the identified cost of investments owned for federal income tax purposes was the same as the cost for financial reporting purposes for each Fund.

4. DISTRIBUTIONS TO SHAREHOLDERS

On November 1, 1996, the Funds declared dividend distributions from their tax-exempt net investment income which were paid December 2, 1996, to shareholders of record on November 15, 1996, as follows:

<TABLE>
<CAPTION>

	NUV	NMI
<S>	<C>	<C>
Dividend per share	\$.0490 =====	\$.0635 =====

</TABLE>

5. UNREALIZED APPRECIATION (DEPRECIATION)

Gross unrealized appreciation and gross unrealized depreciation of investments at October 31, 1996, were as follows:

<TABLE>
<CAPTION>

	NUV	NMI
<S>	<C>	<C>
Gross unrealized:		
Appreciation	\$131,811,346	\$5,700,410
Depreciation	(8,958,965)	(294,363)

Net unrealized appreciation	\$122,852,381	\$5,406,047
-----------------------------	---------------	-------------

</TABLE>

6. MANAGEMENT FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Under the Funds' investment management agreements with Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company, each Fund pays to the Adviser an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net asset value of each Fund:

<TABLE>
<CAPTION>

AVERAGE DAILY NET ASSET VALUE	NUV
<S>	<C>
For the first \$500,000,000	.35 of 1%
For the next \$500,000,000	.325 of 1
For net assets over \$1,000,000,000	.3 of 1

<CAPTION>

AVERAGE DAILY NET ASSET VALUE	NMI
<S>	<C>
For the first \$125,000,000	.65 of 1%
For the next \$125,000,000	.6375 of 1
For the next \$250,000,000	.625 of 1
For the next \$500,000,000	.6125 of 1
For the next \$1,000,000,000	.6 of 1
For net assets over \$2,000,000,000	.5875 of 1

<CAPTION>

In addition, NUV pays to the Adviser an annual management fee, payable monthly, based on gross interest income as follows:

GROSS INTEREST INCOME	NUV
<S>	<C>
For the first \$50,000,000	4.125%
For the next \$50,000,000	4.000
For gross income over \$100,000,000	3.875

</TABLE>

The fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those Directors who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser.

7. COMPOSITION OF NET ASSETS

At October 31, 1996, net assets consisted of:

<TABLE>
<CAPTION>

	NUV	NMI
<S>	<C>	<C>
Shares, \$.01 par value per share	\$ 1,949,595	\$ 77,967
Paid-in surplus	1,837,715,648	87,191,534
Balance of undistributed net investment income	696,137	148,210
Accumulated net realized gain from investment transactions	21,412,797	425,385
Net unrealized appreciation of investments	122,852,381	5,406,047
Net assets	\$1,984,626,558	\$ 93,249,143
Authorized shares:		
Common	350,000,000	200,000,000

</TABLE>

8. INVESTMENT COMPOSITION

Each Fund invests in municipal securities which include general obligation, escrowed and revenue bonds. At October 31, 1996, the revenue sources by municipal purpose for these investments, expressed as a percent of total investments, were as follows:

<TABLE>
<CAPTION>

	NUV <C>	NMI <C>
<S>		
Revenue Bonds:		
Electric Utilities	25%	--%
Transportation	11	15
Health Care Facilities	10	15
Pollution Control Facilities	7	15
Housing Facilities	11	9
Water / Sewer Facilities	8	--
Lease Rental Facilities	2	--
Educational Facilities	1	3
Other	4	7
General Obligation Bonds	2	10
Escrowed Bonds	19	26
	-----	-----
	100%	100%
	=====	=====

</TABLE>

Certain long-term and intermediate-term investments owned by the Funds are either covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (40% for NUV and 28% for NMI). Such insurance or escrow, however, does not guarantee the market value of the municipal securities or the value of any of the Funds' shares.

All of the temporary investments in short-term municipal securities have credit enhancements (letters of credit, guarantees or insurance) issued by third party domestic or foreign banks or other institutions.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Fund.

9. OTHER MATTERS

As previously reported, certain legal actions challenging the Fund's 1993 rights offering brought by certain Fund shareholders are pending in federal district court in Chicago against John Nuveen & Co. Incorporated ("Nuveen"), Nuveen Advisory Corp., the directors of the Fund, in-house counsel to Nuveen (collectively "the Nuveen Defendants"), and the Fund's former outside legal counsel. (A similar legal action filed by a Fund shareholder in state court in Minnesota against the Nuveen Defendants has been dismissed and such dismissal has been affirmed on appeal.) Certain of the claims in these actions are asserted on behalf of Fund shareholders and certain are asserted on behalf of the Fund.

On November 4, 1996, a Memorandum of Understanding was signed on behalf of the plaintiffs by their counsel and on behalf of the Nuveen Defendants by their counsel, pursuant to which the above litigation will be settled contingent on agreement by the parties on settlement documentation, approval by the Court of that final settlement documentation, resolution of related claims involving the Funds' former outside counsel, and certain other contingencies. A similar agreement has been reached between plaintiffs and the Fund's former outside counsel. The settlements, which in no way constitute an admission of liability by any defendant, will be paid one half each by the

insurer for the Fund's former outside counsel and by the insurer for the Nuveen Defendants. The Memorandum of Understanding provides that the settlement amounts will be paid primarily to the Fund's shareholders allegedly injured by the rights offering and that the Fund will be reimbursed for litigation related expenses and will receive any amounts after shareholder claims are satisfied. If the Court preliminarily approves the settlement and related documentation, shareholders will receive formal notification which will include information on the shareholders' rights under the settlement and the procedure for filing any claims. Thereafter, the Court will conduct a hearing to determine whether to grant final approval of the settlement.

The Board of Directors and Shareholders
Nuveen Municipal Value Fund, Inc.
Nuveen Municipal Income Fund, Inc.

We have audited the accompanying statements of net assets, including the portfolios of investments, of Nuveen Municipal Value Fund, Inc. and Nuveen Municipal Income Fund, Inc. as of October 31, 1996, and the related statements of operations and changes in net assets for the periods indicated therein and the financial highlights for the periods since 1988. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of investments owned as of October 31, 1996, by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Municipal Value Fund, Inc. and Nuveen Municipal Income Fund, Inc. at October 31, 1996, and the results of their operations, changes in their net assets for the periods indicated therein and financial highlights for the periods since 1988, in conformity with generally accepted accounting principles.

Build your wealth automatically

Photographic image of Customer Service Rep at Nuveen.

Managing your portfolio takes skill, experience, and informed judgment, but our efforts to help you build your wealth don't stop there. At Nuveen, we offer a number of convenient ways to add to your tax-free portfolio and earn the tax-free income you need to achieve your financial goals.

NUVEEN EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen exchange-traded fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares. If you do not elect to reinvest distributions, all distributions are paid by check, or can be deposited directly your bank or brokerage account.

By choosing to reinvest, you'll be able to set aside money regularly and automatically, and watch your investment grow through the power of tax-free compounding. You'll also benefit from dollar-cost averaging, a technique of investing at regular intervals, which allows you to build a high-quality, tax-free portfolio conveniently and cost effectively over time. All reinvestments are invested in full and fractional shares and are kept in non-certificated form by the Plan Agent, Chase Manhattan Bank.

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own. Income or capital gains taxes may be payable on dividends or distributions that are reinvested.

The shares you acquire by reinvesting will either be purchased on the open market or be newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at

the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will be invested within 30 days of the dividend payment date; no interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

You may, of course, change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You also can reinvest if your shares are registered in the name of a brokerage firm, bank, or other nominee. Just ask your investment adviser if the firm will participate on your behalf. If not, it's easy to have the shares registered in your name and to apply for a reinvestment account directly. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial adviser or call us toll-free at 1.800.257.8787.

"When questions come up about your investment, we're happy to provide the up-to-date information you and your adviser need."

More than just a number

If you've ever called our toll-free customer service line, you've spoken with one of Nuveen's customer service representatives. These reps are ready to assist you with answers to your questions about current account balances, yields, and previous transactions on your accounts. They can also supply additional information about any of Nuveen's tax-free unit trusts and mutual funds.

If you have a question about your account, or whenever you need help, just call 800.257.8787. Our customer service reps are available Monday through Friday from 8:00 a.m. to 8:00 p.m. Eastern time.

Your
investment partner

Photographic image of John Nuveen, Sr., founder of Nuveen.

For nearly 100 years, Nuveen has earned its reputation as a tax-free income specialist by focusing on municipal bonds.

Since 1898, John Nuveen & Co. Incorporated has worked to bring together the various participants in the municipal bond industry and build strong partnerships that benefit all concerned. Investors, financial advisers, municipal officials, investment bankers--Nuveen believes that forging relationships with these groups based on trust and value is the key to successful investing.

As the oldest and largest municipal bond specialist in the United States, Nuveen's investment bankers work with issuers to understand and meet their needs in structuring and selling their bond issues.

Nuveen also works closely with financial advisers around the country, including brokerage firms, banks, insurance companies, and independent financial planners, to bring the benefits of tax-free investing to you. These advisers are experts at identifying your needs and recommending the best solutions for your situation. Together we make a powerful team, helping you create a successful investment plan that meets your needs today and in the future.
