=====

Dear Fellow Shareholder,

As investors of your money and ours, we constantly have to strike a rational balance between blind optimism and fear. On days when the market is advancing, we inevitably wish we had more money in the stocks that are going up the fastest. And on days when the market is declining, we become fearful about the stocks we own that are going down the most.

To help us control these powerful emotions, we have developed a discipline over the years that focuses on buying growth companies at a value price and holding them for the long haul. Normally, we do not buy the fastest growing companies, in spite of our optimism, because of our fear that when markets turn down these stocks potentially have the farthest to fall. Similarly, we don't buy "non-growth" value companies just because they are cheap since we always want to aim for growth in our portfolios.

In effect, we think growth and value are joined at the hip. No one would really ever want to own a no-growth stock, but everyone wants to buy growth. Our strategy is a compromise in that we try to buy decent growth at a value price.

In a sense, the world of investing is a world of making choices, and the stock market is not unlike the supermarket. We know when we go into the supermarket that we are going to buy something because we need to eat. Our task is to pick from the wide variety of brands available, those particular food products that will provide us with the right kind of bodily nourishment. Similarly, when the stock market opens its doors, we are likely to buy something. Our job is to pick from the diverse array of stocks available and buy only those that we think will enhance our financial nourishment. In both instances, we want to stay within our budget. What we are looking for as investors is growth on sale. Our stock choices tend to be good quality merchandise offered at a fair price. We are not interested in buying premium-priced companies or bargain-basement specials.

As we move through the last year of this millennium with the stock market in uncharted territory, we know that we will encounter numerous crosscurrents and variables that could affect corporate earnings. These range from uncertainties regarding the Presidential election in the year 2000 to the possibility of a worldwide economic recovery that could rekindle inflation. In addition, we live in an era of rapid technological change, which is reshaping the economic landscape and creating both new opportunities and risks for a wide variety of industries and companies.

In such an environment, we recognize that we will continue to be buffeted by the conflicting emotions driven by blind optimism and fear. But we are not going to turn our backs on stocks. As long-term investors, we intend to remain true to

our investment discipline of using intensive research to buy well-managed growth companies at a value price. We are confident that this discipline will guide us through whatever financial storms may come our way, providing great opportunities for compounding of wealth over time.(1)

Sincerely,

/s/ James J. McMonagle

MANAGEMENT'S DISCUSSION AND ANALYSIS

SELECTED AMERICAN SHARES, INC.

PERFORMANCE OVERVIEW

- o Selected American Shares American shares generated a total return of 16.09% for the six months ended June 30, 1999, (2) outpacing the average return of 10.93% for the 922 growth and income funds tracked by Lipper Analytical Services (3) and the 12.38% return for the Standard & Poor's 500 Index. (4)
- o The Fund provided a total return of 20.90% for the one-year period ended June 30, 1999 versus an average return of 14.48% for the 843 growth and income funds covered by Lipper and a return of 22.76% for the S&P 500.
- o From May 1, 1993 through June 30, 1999, the approximate period that Davis Selected Advisers has managed Selected American Shares, it ranked 10 out of 253 funds in the Lipper category, providing an average annual return of 22.55%. (5)
- o The Fund holds Morningstar's highest ***** (five-star) rating overall. (6) According to Morningstar, "This fund's managers have quietly outmaneuvered their peers.... By picking good stocks and then letting them ride, they've trounced most large-value funds.... In short, this fund remains a keeper." (7)

AN INTERVIEW WITH CHRISTOPHER C. DAVIS AND KENNETH CHARLES FEINBERG, PORTFOLIO MANAGERS

Q. What opportunities are you finding today?

A. Ken and I are satisfied that the performance of Selected American Shares has gotten off to a good start so far in 1999, but we are well aware that we have ground to make up after last year's disappointing results. Both of us are pleased with the quality of the companies that make up the portfolio and pleased that we were able to opportunistically add to some of our favorites during the chaos of the fall of 1998.

The greatest opportunity in investing comes from finding a great business at a great price. Such misvaluations abound in a bear market but are correspondingly scarce in a bull market. In the short sell-off of last fall we were able to find some great companies trading at cheap prices. The most notable example is American Express, which is currently one of our largest holdings and which we added to significantly during that period of short-term concern. (8)

The opportunities that we're finding in 1999 do not fall into the wonderful category of great companies selling at great prices, but instead seem to be in two less exciting categories. The first is great companies that have come under a minor cloud, creating perhaps a slight undervaluation, not a tremendously cheap valuation. For example, although Gillette is undoubtedly a great company that has declined over 30% from its high, the stock is still not outstandingly cheap on a valuation basis.

The second category is reasonably good--but not outstanding--businesses that are under a more severe cloud that makes them very cheap. For example, we added to our holding of Waste Management when it fell more than 30% from its high. The stock currently sells at about 12 times earnings--less than half the market multiple. (8)

We have also made mistakes this year and it is incumbent upon us to mention

these. Most notably, Philip Morris, after suffering its first adverse jury judgments in its many years of litigation, has declined almost 30% thus far in 1999. We had been optimistic that the large settlements previously negotiated with the states' attorneys general would help put the most dangerous litigation behind the company. This has not been the case and, although we expect these adverse verdicts to be reduced or reversed on appeal, we certainly did not anticipate them in the first place.

Street Santa Fe, New Mexico 87501

MANAGEMENT'S DISCUSSION AND ANALYSIS - CONTINUED

AN INTERVIEW WITH CHRISTOPHER C. DAVIS AND KENNETH CHARLES FEINBERG, PORTFOLIO MANAGERS - CONTINUED

Q. When do you sell great companies?

A. Our portfolio continues to benefit from increasing valuations for all technology companies--most notably IBM, Hewlett-Packard and Texas Instruments, which are up, 40%, 60% and almost 70%, respectively, year to date. (8) Yet the prospects of these companies have also improved dramatically with the growth of the Internet. Although our valuation discipline prevents us from owning most of the hot new Internet stocks we all read about, companies such as IBM, Hewlett-Packard and Texas Instruments benefit greatly from the Internet revolution by selling the electronic equivalent of picks and shovels to the prospectors in this new gold rush.

Given the strong performance of many of our companies, particularly in the technology area, it is always important to consider at what price businesses should be sold from the portfolio. Unfortunately, this is more of an art than a science. A by product of a rising market is that all sales look like mistakes and all purchases look smart.

Our estimate of fair value for many of the securities we own is very broad, as it should be based on the uncertainties in any operating business. As a result, there is no predetermined price at which we would sell all of our position in any given company if the company's underlying fundamentals had not changed.

However, if our companies were to advance to prices that we considered irrational relative to other investment alternatives, we would increasingly have to consider sales. Importantly, Ken and I do not think of ourselves as market timers. Therefore, we must constantly evaluate the owner-earnings and growth prospects of the companies we own versus both the risk-free rate and the present value of the earnings and growth prospects of other companies in the market. Using this criterion, both of us remain comfortable with most of our top holdings, although we are cognizant of the very high levels of today's valuations.

Shelby Cullom Davis once said that you make most of your money in bear markets. You just don't realize it at the time. This is because you are able to buy great companies at great prices. There is, however, an unspoken corollary that one can lose a lot of money in a bull market and not realize it at the time by buying second-rate businesses at high prices. It is this risk that we and all investors must focus on in these golden times.

SELECTED SPECIAL SHARES

PERFORMANCE OVERVIEW

- o Selected Special Shares, which crossed the \$100 million asset mark in June, provided a return of 6.58% for the six months ended June 30, 1999. (2) This compares with returns of 6.75% for the Wilshire Mid Cap Company Growth Index (4) and 9.42% for the Lipper Small Company Funds Index. (4)
- o Over the latest one, three and five years, the Fund easily outpaced its benchmarks, generating average annual returns of 11.68%, 20.44% and 21.39%, respectively. Over the same time periods, the Wilshire Mid Cap Company Growth Index generated returns of 2.36%, 9.70% and 17.29%, respectively, and the Lipper Small Company Funds Index produced returns of 1.92%, 7.77% and 15.44%, respectively.
- o For the second year in a row, the Fund was featured in an exclusive Barron's/Value Line listing of the 100 top mutual fund managers dubbed "Best of the Best." (9)

- o According to Morningstar, "Selected Special Shares' long-range vision is paying off.... Since she [Elizabeth Bramwell] took the reins in 1994...it has trounced its average rival by better than 300 basis points per year and posted moderate risk scores for its category." (10)

MANAGEMENT'S DISCUSSION AND ANALYSIS - CONTINUED

AN INTERVIEW WITH ELIZABETH R. BRAMWELL, PORTFOLIO MANAGER

Q. Could you summarize the performance of the Fund so far in 1999?

A. The market began the year with large-cap growth stocks driving the market higher and began to broaden its advance towards the end of the first half to encompass small and mid-cap stocks in a wide range of industries--including contract manufacturing, semiconductor equipment, multimedia, furniture and retailing. Strong performers in the first six months of 1999 came from many sectors and included: Charles Schwab, Tiffany, Tandy, Lexmark, Labor Ready, Kohl's, Kansas City Southern, Ethan Allen, Leggett & Platt and Flextronics. (8)

The Fund's performance was restrained in some ways because, as committed long-term investors, we do not sell companies that we believe have positive long-term outlooks due to lagging short-term returns. For example, Computer Sciences, the Fund's largest holding and one which we have held since January 1996, had a rough first quarter--falling from 64 at the end of December to 55 at the end of the March. Computer Sciences is an outsourcing firm that provides information technology services. We like the company because it has expanding recurring revenues. In addition, with a price/earnings (P/E) multiple of around 22 based on year 2000 estimated earnings, the company is selling at parity with its projected 22% earnings growth rate and at less than the overall market multiple. So we did not trade out of the stock despite its first quarter decline and were rewarded for our conviction when the shares subsequently began to rally in the second quarter, rising from 55 to 69 by the end of June. (8)

Similarly, two of the Fund's holdings, drug distributor Cardinal Health and drug store chain CVS, tailed off from February-May because of concerns about proposed health-care reform, which could possibly place price controls on the pharmaceutical industry. But these stocks recovered nicely in June and, in our opinion, continue to have favorable fundamental outlooks. (8)

Another company whose stock price came under pressure during the period is Robert Half, an outsourcing firm that provides accounting staff, which has suffered from an intermediate-term shortage of accountants to place. Not all employee-staffing firms did poorly, however. Labor Ready, which places manual labor, achieved substantial revenue and earnings gains and the stock rose 69% in the first half. (8)

We run the Fund for the long term rather than chasing quarterly performance. This long-term approach also results in relatively low turnover, which promotes tax efficiency for our shareholders. Our 1998 turnover approximated 40%, which means an average holding period of more than two years. By way of comparison, Morningstar reports that the turnover ratio of the average Mid-cap growth fund is 131%, which means an average holding period of just over 9 months. (11)

Not all holdings will do well in every quarter since stock prices do not move in straight lines. But we develop conviction about the stocks we hold because we research the businesses thoroughly before we invest and follow them closely thereafter. We prefer to ride through the quarters when the companies we own may be under unwarranted pressure relative to their long-term outlooks, and perhaps even add to our positions when we believe in their future growth potential.

MANAGEMENT'S DISCUSSION AND ANALYSIS - CONTINUED

AN INTERVIEW WITH ELIZABETH R. BRAMWELL, PORTFOLIO MANAGER - CONTINUED

Q. What are some of your favorite investment themes?

A. It's become much more of a stock picker's market, which we think should work to our advantage going forward. Industry sectors that we currently find attractive include communications, media, retailing, outsourcing and electronic commerce.(8)

We are looking for companies that use the Internet well rather than investing directly in high-flying Internet stocks where execution and valuation risk are inherently greater. Overall, the Internet is helping people work smarter and more effectively. Just think what efficiencies voice mail has brought to both business and home consumers, and the possibilities for increased efficiency with the Internet are substantially greater. Examples of companies benefiting from the Internet include printer manufacturer Lexmark, a company that is getting a boost from the rapidly expanding use of e-mail, and Paychex, a payroll processing company. And Charles Schwab, of course, has done a phenomenal job bringing online investing to the market.(8)

Providing solutions for customers is a major theme that a company like Computer Sciences is well positioned to capitalize on. In addition, the outsourcing trend has carried over into manufacturing. That's why we like Flextronics, which we added to the portfolio in the fourth quarter of 1998, and Jabil Circuit, a new holding in 1999--both of which are contract manufacturers in the semiconductor industry. We also added Teradyne, a leader in the business of semiconductor testing equipment, in the first quarter and Legato, in the data storage field, in the second quarter.(8)

Asian markets appear to be rebounding, and evidence pointing to a synchronized global recovery in the year 2000 is beginning to emerge. One Fund holding that we believe will benefit from renewed growth in Asia is Molex, a component manufacturer for a variety of electronic products, which derives about 40% of its sales from Asia.(8)

Q. How has your strategy positioned the Fund to benefit from the current market environment?

A. We invest on a stock-by-stock basis--looking at such factors as management strength, consistency of earnings and valuations. The earnings growth rate on the portfolio has been remarkably consistent and is currently about 23% based on year 2000 earnings estimates. That is well above the 7%-10% growth rate projected for the S&P 500. Yet the Fund sells at a lower P/E multiple based on year 2000 earnings estimates than the S&P's approximate P/E multiple of 25 times next year's earnings. Stock prices should move at least in line with earnings growth over time, and with the Fund selling at a discount to the overall market, there is also the opportunity for the Fund's P/E ratio to expand as well, giving shareholders an enhanced investment return.(1)

SELECTED U.S. GOVERNMENT INCOME FUND

PERFORMANCE OVERVIEW

- o The Selected U.S. Government Income Fund declined 2.02% for the six months ended June 30, 1999(2) while the 126 funds included in Lipper Analytical Services' intermediate U.S. government fund category fell 1.82% on average.(3)
- o For the one-year period ending on the same date, the Fund generated a total return of 1.10% versus an average return of 2.29% for the 123 intermediate U.S. government funds tracked by Lipper.

MANAGEMENT'S DISCUSSION AND ANALYSIS - CONTINUED

A NEW PORTFOLIO MANAGER EFFECTIVE AUGUST 1, 1999

Effective August 1, 1999, Creston A. King, Chartered Financial Analyst, has been named the portfolio manager of the Selected U.S. Government Income Fund. Prior to joining Davis Selected Advisers on June 30, 1999, he was a portfolio manager for U.S. Global Investors, Inc. where he managed two Morningstar four-star bond funds and a top-ranked money market fund. We are proud to offer the investment capabilities of Mr. King to our shareholders.

Carolyn Spolidoro, the previous portfolio manager has retired. We would like to express our appreciation to her for effectively serving our shareholders since she joined Davis Selected Advisers in 1985.

Q. What key factors influenced the Fund's performance?

A. In the first half of 1999, the bond market was gripped by concerns about inflation and concerns that the Federal Reserve would tighten the money supply. Although there were little or no signs of actual inflation, years of strong economic growth have left a nagging sense among investors that inflation could surge upward again and that the Fed may look to proactively control growth in order to mitigate inflationary forces.

In May, the Fed changed its bias toward higher rates and then followed through at the end of June by raising the target federal funds rate .25% to 5.0% in a preemptive strike against inflation. The Fed indicated that it must be particularly vigilant of the emergence or potential emergence of inflationary pressures. The Fed surprised the market by changing its bias back to neutral following the announcement of the rate hike--an indication that just one rate change may be sufficient for now. However, the consensus among investors is that the Fed's future course of action is not preordained. Signs that the economy is continuing to power ahead could ultimately lead the Fed to reconsider its bias and impose a second round of tightening.

Against this backdrop, the yield on 10-year U.S. Treasury bonds increased from 4.60% to 5.80% over the first half of the year while the bonds' total return fell by more than 5%. The Selected U.S. Government Income Fund outperformed 10-year Treasuries because the Fund owns defensive positions in mortgage-backed securities, which tend to decline less in an increasing interest rate environment. At the same time, the Fund under-performed the average intermediate U.S. government bond fund because it also holds positions in longer term U.S. government agency securities that cannot be called in or redeemed by the issuer before maturity. These securities are more sensitive to interest rate changes, meaning that when interest rates increase and bond prices fall, they tend fall in line with the market.

Our short-term under-performance was due in part to our fundamental investment approach of maintaining a balanced portfolio. However, regrettably, in the first quarter we had maneuvered the Fund to be a little more aggressive by making changes that increased portfolio duration and decreased its exposure to calls. This had the effect of increasing the portfolio's sensitivity to interest rate moves. That turned out to be a mistake. When interest rates went up and bond prices went down, we participated in that decline. In the second quarter, we made very few changes in the portfolio because of concerns about further interest rate hikes. Looking ahead, over the remainder of 1999, we do not anticipate big changes in the interest rate environment or in the positioning of the Fund.

SELECTED FUNDS

P.O. Box 1688, 124 East Marcy Street
Santa Fe, New Mexico 87501

MANAGEMENT'S DISCUSSION AND ANALYSIS - CONTINUED

AN INTERVIEW WITH CAROLYN SPOLIDORO, PORTFOLIO MANAGER - CONTINUED

Q. Could you explain the Fund's overall investment approach in a little more detail?

A. Our strategy is to create a well-diversified portfolio holding many different types of U.S. government securities with varying features. We try to buy securities with a range of maturity dates, interest rates and call or prepayment provisions because different kinds of securities react differently to interest rate changes. In addition, agency securities tend to offer slightly higher yields than comparable U.S. Treasury securities.

Currently approximately 47% of the portfolio is invested in mortgage-backed securities, including pass-through securities and collateralized mortgage obligations, and approximately 50% in callable and non-callable U.S. government agency notes. The portfolio's duration is 5.1 years and its average life is 6.9 years.

We believe fixed-income investors should focus on a combination of risk and return, not just on total return or yield. We hold a laddered portfolio of securities with a fairly even distribution of maturities over the intermediate range of the yield curve. This allows us to capture most of the yield and potential return advantage of long-term bonds with potentially less risk. The last six months have shown the advantage provided by owning a balanced

intermediate-term bond fund in a declining market as opposed to owning bonds directly.

This Semi-Annual Report is authorized for distribution only when accompanied or preceded by a current prospectus of the Selected Funds which contains more information about fees and expenses. Please read the prospectus carefully before investing or sending money.

1 Neither the Davis Investment Discipline nor any investment discipline can guarantee a profit.

2 Total return assumes reinvestment of dividends and capital gain distributions. Past performance is not a guarantee of future results. Investment return and principal value will vary so that, when redeemed, an investor's shares may be worth more or less than when purchased. The following table lists the average annual total returns for the periods ended June 30, 1999.

FUND NAME	1 YEAR	3 YEAR	5 YEAR	10 YEAR
Selected American Shares	20.90%	30.58%	27.49%	17.73%
Selected Special Shares	11.68%	20.44%	21.39%	14.17%
Selected U.S. Government Income	1.10%	5.18%	5.78%	6.32%

(3) Lipper Analytical Services' rankings and comparisons are based on total returns unadjusted for commissions.

MANAGEMENT'S DISCUSSION AND ANALYSIS - CONTINUED

(4) The definitions of indices quoted in this semi-annual report appear below. Investments cannot be made directly in any of these indices.

- I. The S&P 500 Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. The index is adjusted for dividends, weighted towards stocks with large market capitalizations, and represents approximately two-thirds of the total market value of all domestic common stocks.
- II. The Wilshire Mid Cap Company Growth Index is an unmanaged, market capitalization-weighted index of companies with market capitalizations ranging from \$826 million to \$3.0 billion and with growth characteristics screened by sales growth, return on equity and dividend payout. Investments cannot be made directly in the index.
- III. The Lipper Small Company Funds Index is comprised of the 30 largest funds that, by prospectus or portfolio practice, normally invest in companies with market capitalizations of less than \$1 billion at the time of purchase. Funds in the index are equally weighted, and returns include the reinvestment of all dividends and are net of expenses. Investments cannot be made directly in the index.

(5) Lipper Analytical Services rankings are based on total returns without adjustment for sales charges.

For the one, five and ten-year period ended June 30, 1999, Selected American Shares was ranked as follows: 157 out of 843 funds, 9 out of 323 funds, and 18 out of 149 funds, respectively, in the Lipper "Growth and Income Funds" category.

(6) Morningstar proprietary ratings reflect historical risk-adjusted performance as of June 30, 1999. The ratings are subject to change every month. Morningstar ratings are calculated from a fund's 3, 5 and 10-year average annual returns (based on available track records) in excess of 90-day Treasury bill (T-bill) returns, with appropriate fee adjustments and a risk factor that reflects fund performance below 90-day T-bill returns. Ten percent of the funds in an investment category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars, and the last 10%

receive one star.

Selected American Shares received 5 stars for the three-year period rated against 3043 Domestic Equity funds. For the five-year period it received 5 stars when rated against 1878 Domestic Equity funds. For the ten-year period it received 4 stars when rated against 748 Domestic Equity funds.

(7) Source: Morningstar Mutual Funds, April 22, 1999.

(8) Portfolio holdings and portfolio manager opinions cited in this material are current as of the date of this report, but are subject to change. See each Fund's Schedule of Investments for a detailed list of portfolio holdings.

(9) Source: Barron's July 19, 1999. Barron's used Value Line to sort through their data base of 6,000 equity funds, eliminating funds where the portfolio manager has been managing a fund for less than three years, or which were managed by more than two people. Narrow sector funds were also eliminated. Value Line then identified how much value a manager added by subtracting points for excess volatility and adding points for stable investment performance. The funds with the 100 highest scores were listed in the article.

(10) Source: Morningstar Mutual Funds, January 22, 1999.

(11) Source: Morningstar Mutual Funds, July 21, 1999.

An investment in the Fund is not a deposit of any bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

SELECTED FUNDS

NOTES TO FINANCIAL STATEMENTS

June 30, 1999 (Unaudited)

===== NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Selected Funds (the Funds) consist of Selected American Shares, Inc., (American Shares, Inc.), Selected Special Shares, Inc., (Special Shares, Inc.), and the Selected Capital Preservation Trust (the Trust). The Trust operates as a series fund, consisting of the U.S. Government Income Fund and Daily Government Fund. The Funds and Trust are registered under the Investment Company Act of 1940, as amended, as diversified, open-end management investment companies. The Trust accounts separately for the assets, liabilities and operations of each series. The following is a summary of significant accounting policies followed by the Funds in the preparation of financial statements.

American Shares, Inc. and Special Shares, Inc. are diversified, professionally managed stock-oriented funds.

Selected U.S. Government Income Fund (U.S. Government Income) seeks to obtain current income consistent with preservation of capital by investing primarily in debt obligations of the U.S. Government, its agencies or instrumentalities.

Selected Daily Government Fund (Daily Government) seeks to provide a high level of current income from short-term money market securities consistent with prudent investment management, preservation of capital and maintenance of liquidity. It invests in U.S. Government Securities and repurchase agreements in respect thereto.

An investment in any of the Funds, as with any mutual fund, includes risks that vary depending upon the fund's investment objectives and policies. There is no assurance that the investment objective of any fund will be achieved. A fund's return and net asset value will fluctuate, although Daily Government seeks to maintain a net asset value of \$1.00 per share.

A. VALUATION OF SECURITIES - Securities listed on national securities exchanges are valued at the last reported sales price on the day of valuation. Securities traded in the over the counter market and listed securities for which no sale was reported on that date are stated at the last quoted bid price. Securities for which market quotations are not readily available are valued at fair value as determined by the Boards of Directors/Trustees. The Daily Government Fund uses the amortized cost method of valuing investment securities which represents fair value as determined by the Board of Trustees. These valuation procedures are reviewed and subject to approval by the Board of Directors/Trustees.

B. FEDERAL INCOME TAXES - It is each fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to shareholders. Therefore, no provision for federal income or excise tax is required.

C. USE OF ESTIMATES IN FINANCIAL STATEMENTS - In preparing financial statements in conformity with generally accepted accounting principles, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of income and expenses during the reporting period. Actual results may differ from these estimates.

SELECTED FUNDS

NOTES TO FINANCIAL STATEMENTS - (Continued)

June 30, 1999 (Unaudited)

===== NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (Continued)

D. SECURITIES TRANSACTIONS AND RELATED INVESTMENT INCOME - Securities transactions are accounted for on the trade date (date the order to buy or sell

is executed) with realized gain or loss on the sale of securities being determined based upon identified cost. Interest income is recorded on the accrual basis and dividend income is recorded on the ex-dividend date. Discounts and premiums on debt securities (excluding convertible bonds) purchased are amortized over the lives of the respective securities in accordance with the requirements of the Internal Revenue Code.

E. DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS - Dividends and distributions to shareholders are recorded on the ex-dividend date. The character of the distributions made during the year from net investment income may differ from its ultimate characterization for federal income tax purposes. Also, due to the timing of distributions, the fiscal year in which amounts are distributed may differ from the fiscal year in which income or gain was recorded by the Funds. The Funds adjust the classification of distributions to shareholders to reflect the differences between financial statement amounts and distributions determined in accordance with income tax regulations.

NOTE 2 - INVESTMENT ADVISORY FEES

Advisory fees are paid monthly to the investment adviser. Until January 1, 1999, the rate for American Shares, Inc. was 0.65% on the first \$500 million of average net assets, 0.60% on the next \$500 million and 0.55% of average net assets in excess of \$1 billion. Effective January 1, 1999, the management fee was reduced to 0.65% on the first \$500 million of average net assets, 0.60% of the average net assets on the next \$500 million, 0.55% of the average net assets on the next \$2 billion, 0.54% of the average net assets on the next \$1 billion, 0.53% of the average net assets on the next \$1 billion, 0.52% of the average net assets on the next \$1 billion and 0.51% of the average net assets on the next \$1 billion and 0.50% of the average net assets in excess of \$7 billion. The rate for Special Shares, Inc. is 0.70% on the first \$50 million of average net assets, 0.675% on the next \$100 million, 0.65% on the next \$100 million and 0.60% of average net assets in excess of \$250 million. Until August 1, 1999, the rate for U.S. Government Income Fund was 0.50% of average net assets. Effective August 1, 1999, the management fee was reduced to 0.30% of average net assets. The rate for the Daily Government Fund is 0.30% of average net assets.

Boston Financial Data Services is the Funds' primary transfer agent. Davis Selected Advisers, L.P. (the "Adviser") is also paid for certain transfer agent services. The fee paid to the Adviser for the six months ended June 30, 1999 was \$60,548, \$6,767, \$427 and \$2,346 for American Shares, Inc., Special Shares, Inc., U.S. Government Income and Daily Government Funds, respectively. Certain directors/trustees and officers of the Funds are also directors/trustees and officers of the general partner of the Adviser.

Until August 1, 1999, the Adviser has agreed to reimburse the U.S. Government Income Fund for any expenses in excess of 1.50% of average net assets. Effective August 1, 1999, the Adviser has agreed to increase the reimbursement to 1.30% of average net assets.

Davis Selected Advisers - NY, Inc. ("DSA-NY"), a wholly-owned subsidiary of the Adviser, acts as sub-adviser to the Funds. The Funds pay no fees directly to DSA-NY.

With respect to Special Shares, Inc., Bramwell Capital Management, Inc. ("Bramwell") also acts as sub-adviser and manages the day-to-day investment operations for the fund. The Fund pays no fees directly to Bramwell, who receives from the Adviser a percentage of the total annual investment advisory fees paid by the Fund to the Adviser.

Each fund has adopted procedures to treat Shelby Cullom Davis & Co. ("SCD") as an affiliate of the Adviser. For American Shares, Inc., SCD received \$76,716 in commissions on the purchases/sales of portfolio securities.

25

SELECTED FUNDS

NOTES TO FINANCIAL STATEMENTS - (Continued)

June 30, 1999 (Unaudited)

NOTE 3 - DISTRIBUTION

For services under the distribution agreement, the Funds pay a fee of 0.25% of average daily net assets. For six months ended June 30, 1999, American Shares, Inc., Special Shares, Inc., U.S. Government Income and Daily Government Funds, incurred distribution services fees totaling \$3,836,725, \$118,578, \$7,246 and \$158,724, respectively.

NOTE 4 - PURCHASES AND SALES OF SECURITIES

Purchases and sales of investment securities (excluding short-term securities) during the six months ended June 30, 1999 were as follows:

	AMERICAN SHARES, INC.	SPECIAL SHARES, INC.	U.S. GOVERNMENT INCOME
Cost of purchases.....	\$491,184,582	\$18,394,474	\$ 747,901
Proceeds of sales.....	\$301,395,620	\$18,994,623	\$ 1,346,250

NOTE 5 - CAPITAL STOCK

At June 30, 1999, there were 300 million shares of capital stock of American Shares, Inc. (\$1.25 par value per share) authorized. At June 30, 1999, there were 50 million shares of capital stock of Special Shares, Inc. (\$0.25 par value per share) authorized. At June 30, 1999, there were unlimited shares of capital stock of Selected Capital Preservation Trust (\$0.10 par value per share) authorized. Transactions in capital stock were as follows:

NOTE 6 - CUSTODIAN FEES

Under an agreement with the custodian bank, each fund's custodian fees are reduced for earnings on cash balances maintained at the custodian by the Funds. Such reductions amounted to \$3,548, \$482, \$91 and \$148 for American Shares, Inc., Special Shares, Inc., U.S. Government Income and Daily Government, respectively.

NOTE 7 - SECURITIES LOANED

American Shares, Inc. (the "Fund") has entered into a securities lending arrangement with PaineWebber, Inc. Under the terms of the agreement, the Fund receives fee income from lending transactions; in exchange for such fees, PaineWebber, Inc. is authorized to loan securities on behalf of the Fund, against receipt of collateral at least equal to the value of the securities loaned. Cash collateral is invested by the Adviser in money market instruments. As of June 30, 1999, the Fund had on loan securities valued at \$26,816,309; cash of \$27,772,588 was received as collateral for the loans and has been invested in approved instruments. The Fund bears the risk of any deficiency in the amount of the collateral available for return to a borrower due to a loss in an approved investment.

NOTE 8 - RESTRICTED SECURITIES

Restricted securities are not registered under the Securities Act of 1933 and may have contractual restrictions on resale. They are valued under methods approved by the Board of Directors as reflecting fair value. The aggregate value of restricted securities in American Shares, Inc. was \$2,499,656, or 0.07% of the net assets of June 30, 1999. Information concerning restricted securities is as follows:
