UNIT PRICE, ESTIMATED CURRENT RETURN AND ESTIMATED LONG TERM RETURN DEPEND ON AMOUNT PURCHASED AND PAYMENT OPTION

Sales charge/volume discount applies on all concurrent purchases of any Nuveen trust units. Estimated Current Return equals net income divided by offering price. Estimated Long Term Return represents an average of the yields to maturity (or call) of the Bonds in the Trust adjusted to reflect expenses and sales charges.

  - (2) All figures as of the business day prior to Date of Deposit. The estimated current return for purchases made on such date will be as shown, as long as the portfolio size and composition remain the same.
  - (3) In contrast to Estimated Current Return, Estimated Long Term Return reflects the amortization of premium or accretion of discount, if any, on the bonds in the Trust's portfolio.

-----  
REINVESTMENT OPTIONS Specify automatic reinvestment of trust income, with no

sales charge, to earn compounded dividends with Nuveen mutual funds.

INTEREST DISTRIBUTIONS TO UNITHOLDERS Unitholders may elect to have interest distributions made on a monthly, quarterly, or semi-annual basis. Record Dates are May 1 and November 1 for semi-annual distributions; February 1, May 1, August 1 and November 1 for quarterly distributions; and the first of each month for monthly distributions. Details of interest distributions per unit under the various plans appear in the following table based upon estimated net annual interest income at the Date of Deposit:

- \* Record Dates for semi-annual distributions are May 1 and November 1; for quarterly distributions, they are February 1, May 1, August 1 and November 1. Record Dates for monthly distributions are the first day of each month.
- (1) The first distribution will be paid to all Unitholders, regardless of the distribution plan selected.
- (2) The second distribution under the quarterly distribution plan represents a 1-month distribution; subsequent quarterly distributions will be regular 3-month distributions.
- (3) The second distribution under the semi-annual distribution plan represents a 1-month distribution; subsequent semi-annual distributions will be regular 6-month distributions.

</TABLE>

+ Interest for Unitholders of this series began to accrue as of the Date of Deposit. Units purchased on the Date of Deposit will have \$.10 of accrued interest that will be added to the Public Offering Price on the Settlement Date. After provision for expenses of the Fund, the daily rate of accrual from the Date of Deposit to the first Record Date is \$.01441 per unit per day. Consequently, on the first Record Date (04/01/94), accrued interest will total \$1.0231 per unit for the 71-day period. Because a substantial portion of this interest will not yet be due from the issuers of the bonds in the Fund, the first payment to all Unitholders of Record on 04/01/94 is \$.2468, and the remaining \$.7763 of accrued interest will remain an asset of the Trust and be distributed in subsequent periods as portfolio bonds mature, or are redeemed, or sold and the accrued interest on these bonds is collected. After the first Record Date daily rates of accrual are:

Monthly - \$.01441                      Quarterly - \$.01449  
 Semi-Annual - \$.01455

This daily rate of accrual, and the annual distributions shown above, will remain the same as long as the portfolio size and composition remain the same.

DIVERSIFICATION OF PORTFOLIO INCOME
