FORWARD LOOKING INFORMATION. This Quarterly Report on Form 10-Q contains certain forward looking statements with respect to the adequacy of the allowance for loan losses, the Corporation's market risk, the effect of legal proceedings on Popular, Inc.'s financial condition and results of operations and the Year 2000 issue. These forward looking statements involve certain risks, uncertainties, estimates and assumptions by management.

Various factors could cause actual results to differ from those contemplated by such forward looking statements. With respect to the adequacy of the allowance for loan losses and market risk, these factors include, among others, the rate of growth in the economy, the relative strength and weakness in the consumer and commercial credit sectors and in the real estate markets, the performance of the stock and bond markets , the magnitude of interest rate changes and the potential effects of the Year 2000 issue. Moreover, the outcome of litigation, as discussed in "Part II, Item I. Legal Proceedings." is inherently uncertain and depends on judicial interpretations of law and the findings of judges and juries. The information regarding Year 2000 compliance is based on management's current assessment. However, this is an ongoing process involving continual evaluation, and unanticipated problems could develop that could cause compliance to be more difficult or costly than currently anticipated.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Dollars in thousands, except per share information)

## NOTE 1 - CONSOLIDATION

The consolidated financial statements of Popular, Inc. include the balance sheet of the Corporation and its wholly-owned subsidiaries, Popular Securities Incorporated; Popular International Bank, Inc. and its subsidiaries ATH Costa Rica, Banco Gerencial & Fiduciario Dominicano, S.A. and Popular North America, Inc., including Banco Popular, FSB and its wholly-owned subsidiary Equity One, Inc., Banco Popular, Illinois and its wholly-owned subsidiary Popular Leasing USA, Banco Popular National Association (California), Banco Popular National Association (Florida), Banco Popular National Association (Texas) and Popular Cash Express, Inc.; Banco Popular de Puerto Rico and its wholly-owned subsidiaries, Popular Leasing and Rental, Inc., Popular Finance, Inc. and Popular Mortgage, Inc.; and Metropolitana de Prestamos, Inc., as of September 30, 1998, December 31, 1997 and September 30, 1997 and their related statements of income, comprehensive income and cash flows for the nine-month periods then ended. These statements are, in the opinion of management, a fair statement of the results of the periods presented. These results are unaudited, but include all necessary adjustments, of a normal recurring nature, for a fair presentation of such results. Certain reclassifications have been made to the prior year consolidated financial statements to conform to the 1998 presentation.

On September 30, 1998, the Corporation acquired 45% in newly issued stock of Banco Gerencial & Fiduciario (BGF), a commercial bank operating in the Dominican Republic. Based on the provisions of the stock purchase agreement, BGF is being presented as a consolidated subsidiary of the Corporation.

## NOTE 2 - ACCOUNTING CHANGES

Effective January 1, 1998 the Corporation adopted SFAS 130, "Reporting Comprehensive Income". This statement establishes standards for reporting and display of comprehensive income and its components (revenues, expenses, gains, and losses) in a full set of general-purpose financial statements. Comprehensive income has been defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances, except those resulting from investments by owners and distributions to owners. This pronouncement requires that all items that are required to be recognized under accounting standards as components of comprehensive income be reported in a

financial statement that is displayed with the same prominence as other financial statements. The pronouncement does not require a specific format for the financial statement but requires that an enterprise display an amount representing total comprehensive income for the period in that financial statement. This statement requires the reclassification of financial statements for earlier periods presented for comparative purposes.

In June 1997, the Financial Accounting Standard Board (FASB) issued SFAS 131, "Disclosures about Segments of an Enterprise and Related Information". This statement establishes standards for the way that public business enterprises report information about operating segments in annual financial statements and requires that those enterprises report selected information about operating segments in interim financial reports issued to shareholders since the second year of application. It also establishes standards for related disclosures about products and services, geographic areas, and major customers. This statement supersedes

8

8

SFAS 14, "Financial Reporting for Segments of a Business Enterprise", but retains the requirements to report information about major customers. This statement is effective for financial statements for periods beginning after December 15, 1997. Adoption in interim financial statements is not required until the year after initial adoption, however, comparative prior period information is required.

In February 1998, the FASB issued SFAS 132, "Employers' Disclosures about Pensions and Other Postretirement Benefits". This statement supersedes the disclosure requirements in FASB statements No. 87, "Employers' Accounting for Pensions," No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits", and No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions". This statement revises employers' disclosures about pension and postretirement benefit plans. It does not change the measurement or recognition of those plans. It standardizes the disclosure requirements for pensions and other postretirement benefits to the extent practicable, requires additional information on changes in the benefit obligations and fair values on plan assets that will facilitate financial analysis, and eliminates certain disclosures that are no longer useful. The statement suggests combined formats for presentation of pension and other postretirement benefits disclosures. This statement is effective for fiscal year beginning after December 15, 1997, and requires comparative information for earlier years. Restatement of disclosures for earlier periods provided for comparative purposes is required unless the information is not readily available, in which case the notes to the financial statements should include all available information and a description of the information not available.

On June 16, 1998, the FASB issued SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities". This Statement establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. It requires that an entity recognize all derivatives as either assets or liabilities in the statement of condition and measure those instruments at fair value. If certain conditions are met, a derivative may be specifically designated as a hedge of the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment (fair value hedge), a hedge of the exposure to variable cash flows of a forecasted transaction (cash flow hedge), or a hedge of the foreign currency exposure of a net investment in a foreign operation, an unrecognized firm commitment, an available-for-sale security, or a foreign-currency-denominated forecasted transaction. The accounting for changes in the fair value of a derivative depends on the intended use of the derivative and the resulting designation. In general, the gain or loss in a fair value hedge is recognized in earnings in the period of change together with the offsetting loss or gain on the hedged item attributable to the risk being hedged. For a cash flow hedge, gains or losses are reported in other comprehensive income and subsequently reclassified into earnings. For derivatives designated as a hedge of the foreign currency exposure, the gain or loss is reported in other comprehensive income as part of the cumulative translation adjustment. This statement is effective for all quarters of fiscal years beginning after June 15, 1999. Initial application of this Statement should be as of the beginning of an entity's fiscal quarter; on that date, hedging relationships must be designated anew and documented pursuant to the provisions of this Statement. Earlier application of all the provisions of this Statement is encouraged, but it is permitted as of the beginning of any fiscal quarter that begins after issuance of the Statement. This Statement should not be applied retroactively to financial statements of prior periods. Management understands that the adoption of this Statement will not have a material effect on the consolidated financial statements of the Corporation.

</TABLE>

NOTE 4 - PLEDGED ASSETS

Securities and insured mortgage loans of the Corporation of \$4,833,416 (1997 - \$4,952,973) are pledged to secure public and trust deposits and securities and mortgages sold under repurchase agreements.

10

#### NOTE 5 - COMMITMENTS

In the normal course of business there are letters of credit outstanding and stand-by letters of credit which at September 30, 1998, amounted to \$38,370 and \$59,423. There are also outstanding other commitments and contingent liabilities, such as guarantees and commitments to extend credit, which are not reflected in the accompanying financial statements. No losses are anticipated as a result of these transactions.

#### NOTE 6 - SUBORDINATED NOTES

Subordinated notes of \$125,000 as of September 30, 1998 and 1997 consisted of notes issued by the Corporation on December 12, 1995, maturing on December 15, 2005, with interest payable semi-annually at 6.75%.

## NOTE 7 - STOCKHOLDERS' EQUITY

Authorized common stock is 180,000,000 shares with a par value of \$6 per share of which 135,555,652 were issued and outstanding at September 30, 1998, after adjusting for the stock split described below. On April 23, 1998, the Corporation's Board of Directors authorized a two-for-one common stock split effected in the form of a dividend, effective July 1, 1998. As a result of the split 68,737,693 shares were issued, and \$412 million were transferred from surplus to common stock. All references in the financial statements to the numbers of common shares and per share amounts have been restated to reflect the stock split. On May 8, 1997, the Board of Directors approved a stock repurchase program of up to three million shares of outstanding common stock of the Corporation. A total of 1,977,600 shares, after restating for the stock split, with a cost of \$39.6 million were repurchased during 1997, no additional shares were repurchased during the nine month period ended September 30, 1998.

Authorized preferred stock is 10,000,000 shares without par value of which 4,000,000, non-cumulative with a dividend rate of 8.35% and a liquidation preference value of \$25 per share, were issued and outstanding at September 30, 1998.

Popular International Bank, Inc. (PIB) and Popular North America, Inc.'s (PNA) bank subsidiaries (Banco Popular, Illinois; Banco Popular National Association (California); Banco Popular National Association (Florida); Banco Popular, National Association (Texas) and Banco Popular, FSB have certain statutory provisions and regulatory requirements and policies, such as the maintenance of adequate capital, that limit the amount of dividends they can pay. Other than these limitations, no other restrictions exist on the ability of PIB and PNA to make dividend and asset distributions to the Corporation, nor on the ability of PNA's subsidiaries, except for Banco Popular FSB, to make distributions to PNA. In connection with the acquisition by Banco Popular, FSB from the Resolution Trust Company (RTC) of four New Jersey branches of the former Carteret Federal Savings Bank, the RTC provided to Banco Popular, FSB interim financial assistance in the form of a loan in the amount of \$19.5 million, which matures on January 20, 2000, but which is prepayable any time before then. Pursuant to the terms of such financing, Banco Popular, FSB may not, among other things, declare or pay any dividends on its outstanding capital stock (unless such dividends are used exclusively for payment of principal of or interest on such RTC loan) or make any distribution of its assets until payments in full of such promissory note.

11

11

## NOTE 8 - EARNINGS PER COMMON SHARE

Earnings per common share (EPS) are calculated based on net income applicable to common stockholders which amounted to \$55,493 for the third quarter of 1998 (1997 - \$51,526) and \$163,574 for the nine months ended September 30, 1998 (1997 - \$147,981), after deducting the dividends on preferred stock. EPS are based on 135,555,652 average shares outstanding for the third quarter of 1998 (1997 - 135,732,567) and 135,496,620 average shares outstanding for the first nine months of 1998 (1997 - 135,589,283), after restating for the stock split.

During the nine month period ended September 30, 1998, the Corporation paid interest and income taxes amounting to \$575,885 and \$80,810 respectively (1997 - \$469,020 and \$76,077). In addition, the loans receivable transferred to other real estate and other property for the nine-month period ended September 30, 1998, amounted to \$6,208 and \$20,449, respectively (1997 - \$4,699 and \$18,022). The Corporation's stockholders' equity at September 30, 1998, includes \$107,172 in unrealized holding gains on securities available-for-sale, net of deferred taxes, as compared with \$19,756 as of September 30, 1997.

NOTE 10 - POPULAR INTERNATIONAL BANK, INC. (A WHOLLY-OWNED SUBSIDIARY OF POPULAR, INC.) FINANCIAL INFORMATION:

The following summarized financial information presents the unaudited consolidated financial position of Popular International Bank, Inc. (PIB) and its subsidiaries, ATH Costa Rica, Banco Gerencial & Fiduciario Dominicano, S.A. and Popular North America, Inc, including Banco Popular, FSB and its wholly-owned subsidiary Equity One, Inc., Banco Popular, Illinois and its wholly-owned subsidiary Popular Leasing, USA, Banco Popular National Association (California), Banco Popular National Association (Florida), Banco Popular National Association (Texas) and Popular Cash Express, Inc. as of August 31, 1998 and 1997, and the results of their operations for the quarters and the nine-month periods then ended.

Popular, Inc. has not presented separate financial statements and any other disclosures concerning Popular International Bank, Inc., other than the following summarized financial information, because management has determined that such information is not material to holders of debt securities issued by PIB which is guaranteed by the Corporation.

## FINANCIAL REVIEW

This financial review contains the analysis of the consolidated financial position and financial performance of Popular, Inc. and its subsidiaries (the Corporation). The Corporation is a regional diversified bank holding company engaged in the following businesses through its subsidiaries:

- Commercial Banking/Savings and Loans Banco Popular de Puerto Rico (BPPR), Banco Popular, Illinois, Banco Popular, FSB, Banco Popular National Association (California), Banco Popular National Association, (Florida), Banco Popular National Association (Texas). On September 30, 1998, the Corporation acquired 45% in newly issued stock of Banco Gerencial & Fiduciario Dominicano, S.A. (BGF) operating 22 branches in the Dominican Republic with total assets of \$496 million and deposits of \$320 million.
- o Lease Financing Popular Leasing and Rental, Inc. and Popular Leasing, USA.
- o Mortgage Banking/Consumer Finance Popular Mortgage, Inc., Equity One, Inc. and Popular Finance, Inc.
- Investment Banking Popular Securities Incorporated (Popular Securities)
- o ATM Processing Services ATH Costa Rica
- o Check cashing Popular Cash Express

## NET INCOME

Net income for the third quarter of 1998 was \$57.6 million, compared with \$53.6 million reported for the same period in 1997 and \$57.5 million reported during the second quarter of 1998. Earnings per common share (EPS), after adjusting for the stock split in the form of a dividend of one share for each share outstanding effective July 1, 1998, were \$0.41 based on 135,555,652 average shares outstanding, compared with EPS of \$0.38 for the third quarter of 1997 based on 135,732,567 average shares outstanding and EPS of \$0.41 for the second quarter of 1998 based on 135,497,786 average shares outstanding. Return on assets (ROA) and return on common equity (ROE) for the quarter ended September 30, 1998, were 1.12% and 14.94%, respectively, compared with 1.10% and 15.46% reported during the same period in 1997, and 1.16% and 15.50% for the second quarter of 1998.

For the first nine months, the Corporation reported net earnings of \$169.8 million compared with \$154.2 million for the same period in 1997. ROA and ROE for the nine months ended September 30, 1998 were 1.14% and 15.26%, respectively. These ratios were 1.15% and 15.93% for the same period in 1997.

On April 23, 1998, the Board of Directors authorized a two-for-one common stock split in the form of a dividend, bringing total outstanding shares to 135,497,786. The new shares were distributed on July 1, 1998 to shareholders of record as of June 12, 1998. As mentioned above, all per share data included herein has been adjusted to reflect the stock split.

18

18

The Corporation's results of operations for the quarter ended September 30, 1998 reflected increases of \$12.0 million in net interest income and \$4.3 million in other revenues when compared with the same quarter in 1997. These improvements were partially offset by an increase of \$11.3 million in operating expenses and \$4.8 million in the provision for loan losses.

#### NET INTEREST INCOME

Net interest income for the third quarter of 1998, amounted to \$215.0 million, an increase of 5.9% over the same period in 1997. On a taxable equivalent basis, net interest income increased to \$233.4 million from \$218.7 million reported for the third quarter of 1997.

The increase of \$14.7 million in net interest income on a taxable equivalent basis was driven by a \$18.7 million increase attributable to a higher volume of earning assets partially offset by a decrease of \$4.0 million due to rates, particularly in the mortgage and consumer loan portfolios, and by higher rates on some interest bearing liabilities. The latter was partially offset by a higher volume of non-interest bearing funds, such as demand deposits and capital, used to finance earning assets.

For analytical purposes, the interest earned on tax-exempt assets is adjusted to a taxable equivalent basis assuming the applicable statutory income tax rates. Table B summarizes the changes in the composition of average earning assets and interest bearing liabilities, and their respective interest income and expenses and yields and costs, on a taxable equivalent basis, for the third quarter of 1998, as compared with the same quarter in 1997.

#### </TABLE>

The increase of \$899 million in average earning assets was primarily related to the increase in loans which accounted for \$894 million of the total increase. The commercial and mortgage portfolios reflected the major rises, increasing \$459 million and \$252 million, respectively, due to the sustained growth in the Corporation's loan portfolio, principally at BPPR, Equity One and Banco Popular, FSB.

Investment securities decreased by \$187 million to \$6.2 billion when compared to the third quarter of 1997. The decrease relates primarily to a lower interest rate scenario that provided less attractive investment alternatives and to the aforementioned loan growth.

The average yield on earning assets, on a taxable equivalent basis, was 8.81%, four basis points lower than the 8.85% reported in the third quarter of 1997. This decrease relates primarily to a lower yield on loans which decreased from 10.29% reported in the third quarter of 1997, to 10.16% in the same period of 1998.

20

20

The increase in average interest bearing liabilities for the quarter ended on September 30, 1998, as compared with the same quarter of 1997, was mainly reflected in average interest bearing deposits, primarily at BPPR.

The average cost of interest bearing liabilities increased by nine basis points when compared with the third quarter of 1997. The increase is mainly driven by a higher rate on medium and longer term debt related to debt issued during a higher interest rate environment and floating rate instruments resetting semiannually or quarterly.

In spite of the decrease in the yield on earning assets and the increase in the average cost of interest bearing liabilities, the higher proportion of loans, which carry a relatively higher yield, and a significantly higher amount of non-interest bearing sources, allowed the Corporation to improve its net interest margin, on a taxable equivalent basis, from 4.72% reported for the third quarter of 1997 to 4.77% reported for the same quarter of 1998. During the second quarter of 1998, the net interest yield, on a taxable equivalent basis, was 4.93%.

For the nine-month period ended September 30, 1998, net interest income, on a taxable equivalent basis, increased \$75.5 million, compared with the same period of 1997. The increase in the average volume of earning assets, partially offset by an increase in the average volume of interest bearing liabilities caused a positive variance of \$78.7 million, which was offset by a negative variance of \$3.2 million due to changes in rates and in the mix of the portfolios.

## </TABLE>

As shown in Table C, average earning assets for the nine months period ended September 30, 1998, increased by \$1.8 billion when compared with the same period of 1997. Average loans increased \$1.3 billion or 74% of the total increase. All loan portfolios reflected increases, however, the commercial portfolio was the principal contributor to the increase in average loans due to the sustained growth of the Corporation's loans portfolio in Puerto Rico and in the U.S. The increase in investment securities was mainly attained at BPPR and was comprised principally of US Agency securities and collateralized mortgage obligations.

The increase of seven basis points in the average yield on earning assets, on a taxable equivalent basis, was mainly caused by a higher rate in investment securities and a higher proportion of loans, partially offset by a lower yield in the loan portfolio of three basis points, from 10.29% in the first nine months of 1997 to 10.26% in the same period of 1998.

Interest bearing liabilities increased \$1.4 billion of which \$953 million were reflected in average interest bearing deposits, when compared to the nine-month period ended September 30, 1997. All deposit categories showed increases, reflecting the growth of the Corporation in both Puerto Rico and in the United States. Average short-term borrowings increased by \$355 million, averaging \$4.4 billion at September 30, 1998 compared with \$4.0 billion at the same date in 1997, mostly due to higher arbitrage activities as compared with the first nine months of 1997.

The rise in the yield on earning assets, on a taxable equivalent basis, and the change in the mix of the portfolios, partially offset by the increase in the cost of interest bearing liabilities resulted in the increase in net interest margin, on a taxable equivalent basis, of seven basis points for the nine month period ended September 30, 1998, from 4.85% reported for the same period of 1997.

## MARKET RISK

Market risk is the risk of economic loss arising from adverse changes in market rates and prices, such as interest rates, foreign currency exchange rates, commodity prices, and other relevant market or price changes. The Corporation's primary market risk exposure is that to interest rates as the interest income is affected primarily by interest rate volatility and its impact on the repricing of assets and liabilities. The Corporation maintains a formal asset and liability management process to quantify, monitor and control interest rate risk and to assist management in maintaining stability in the net interest margin under varying interest rate environments.

The Corporation uses various techniques to assess the degree of interest rate risk, including static gap analysis, simulation and duration analysis. Each focuses on different aspects of the interest rate risk that is assumed at any point in time, and are therefore used jointly to make informed judgements about the risk levels and the appropriateness of strategies under consideration. An interest rate sensitivity analysis, performed at the corporation level, is the primary tool used in expressing the potential loss in future earnings resulting from selected hypothetical changes in interest rates.

Sensitivity is calculated on a monthly basis using a simulation model which incorporates both actual balance sheet figures detailed by maturity and interest yields or costs, the expected balance sheet dynamics, reinvestments, and other non-interest related data. Simulations are run using various interest rate scenarios to determine potential changes to the future earnings of the Corporation.

Computations of the prospective effects of hypothetical interest rate changes are based on many assumptions, including relative levels of market interest rates, loan prepayments and deposits decay. They should not be relied upon as indicative of actual results. Further, the computations do not contemplate actions the management could take to respond to changes in interest rates. By their nature, these forward looking choices are only estimates and may be different from what actually may occur in the future.

Based on the results of the sensitivity analysis as of September 30, 1998, the increase in net interest income on a hypothetical rising rate scenario for the next twelve months was \$15.8 million and the decrease for the same period utilizing a hypothetical declining rate scenario was \$8.3 million. Both hypothetical rate scenarios consider a gradual change of 150 basis points during the twelve-month period. This level of interest rate risk is well within the Corporation's policy guidelines.

In the course of its business, the Corporation occasionally enters into foreign exchange transactions. These transactions are executed as an intermediary primarily for its commercial and retail clients, and any foreign exchange positions assumed by the Corporation as a result are offset in the currency markets. Management therefore believes that the market risk assumed by the Corporation in its

23

23

foreign currency transactions is immaterial.

The Corporation is the owner of 45% of the common shares of BGF, by virtue of which it is BGF's largest shareholder. BGF is the Dominican Republic's fourth largest banking institution, and its primary business is offering retail and commercial banking services. Most of BGF's business is conducted in Dominican pesos ("DR\$"). Local (DR) regulations limit the ability of BGF to assume unhedged foreign currency positions. The value of Corporation's investment in BGF may be affected prospectively by fluctuations in future exchange rates between the DR\$ and US\$. However, management does not expect future fluctuations

between these two currencies to affect materially the value of the Corporation investment in BGF.

## PROVISION AND ALLOWANCE FOR LOAN LOSSES

The provision for loan losses totaled \$34.7 million for the third quarter of 1998, an increase of 16.1% when compared with \$29.8 million for the same quarter of 1997. For the second quarter of 1998 the provision was \$33.5 million. For the nine-month period ended September 30, 1998, the provision for loan losses increased 28.9%, from \$78.9 million for the same period of 1997. The growth in the loan portfolio coupled with the increase in non-performing assets were the major reasons for increase in the provision. Net charge-offs for the quarter ended September 30, 1998, reached \$27.7 million or 0.93% of average loans, compared with \$31.5 million or 1.14% reported for the same quarter in 1997, and \$27.2 million or 0.94% for the quarter ended on June 30, 1998. Table D presents other related information for the quarter ended September 30, 1998 and 1997 and for the first nine months of 1998 and 1997.

Consumer loans net charge-offs totaled \$17.6 million or 2.26% of average consumer loans in the third quarter of 1998, compared with \$20.0 million or 2.65% in the second quarter of 1998 and \$14.3 million or 1.90% in the third quarter of 1997. The increase in consumer loans net charge-offs as compared with the third quarter of 1997, is mostly related to higher levels of bankruptcies in the U.S. mainland and in Puerto Rico. However, the Corporation continuous collection efforts helped to offset the increase in consumer loans net charge-offs as reflected in the reduction of \$2.4 million when compared with the second quarter of 1998. On the other hand, commercial loans net charge-offs decreased \$6.2 million for the quarter ended September 30, 1998, when compared with the same quarter in 1997. This decrease was principally due to a higher amount of recoveries of \$1.7 million or 45%, together with the Corporation conservative charge-off policy applied to loans acquired during the end of the second quarter of last year.

For the nine-month period ended September 30, 1998, net charge-offs amounted to \$82.4 million or 0.94% of average loans, compared with \$72.3 million or 0.93% of average loans recorded a year ago. The increase in net credit losses was mostly related to the consumer loan portfolio, that reflected a rise of \$21.6 million, compared to the nine-month period ended September 30, 1997. Conversely, commercial loans net charge-offs decreased \$10.9 million for the nine-month period ended September 30, 1998, when compared with the same period in 1997.

At September 30, 1998, the allowance for loan losses was \$245.4 million, representing 1.98% of loans, as compared with \$205 million or 1.83% one year earlier, and \$224 million or 1.91% at June 30, 1998. Included in the allowance for loan losses as of September 30, 1998 are \$14.3 million of BGF. Management considers that the allowance for loan losses is adequate to absorb potential write-offs of the loan portfolio, based on the process established to assess its adequacy. This process incorporates portfolio risk characteristics, results of periodic credit reviews, prior loss experience, current and anticipated economic conditions and loan impairment measurement.

Although the effect of hurricane Georges on the Corporation's Puerto Rico loan portfolio is difficult to predict at this time, management considers that it will not have a material impact on the Corporation's financial results. Also, management believes that the provision recorded this quarter is adequate to cover for future losses and keeps closely monitoring the performance of the loan portfolios on the island.

24

24

Table D presents the movement in the allowance for loan losses and shows selected loan loss statistics for the three and nine-month periods ended September 30, 1998.

 4.00 | 3.24 | 4.02 | 4.01 |The Corporation has defined impaired loans as all loans with interest and/or principal past due 90 days or more and other specific loans for which, based on current information and events, it is probable that the debtor will be unable to pay all amounts due according to the contractual terms of the loan agreement. Loan impairment is measured based on the present value of expected cash flows discounted at the loan's effective rate, on the observable market price or, on the fair value of the collateral if the loan is collateral dependent. Large groups of smaller balance homogenous loans are collectively evaluated for impairment based on past experience. All other loans are evaluated on a loan-by-loan basis. Impaired loans for which the discounted cash flows, collateral value or market price equals or exceeds its carrying value do not require an allowance.

25

25

The following table shows the Corporation's recorded investment in impaired loans and the related valuation allowance calculated under SFAS No. 114 (as amended by SFAS No. 118) at September 30, 1998 and September 30, 1997.

<TABLE>

Average impaired loans during the third quarter of 1998 and 1997 were \$138 million and \$124 million, respectively. The Corporation recognized interest income on impaired loans of \$1.7 million, and \$2.1 million, respectively, for the quarters ended September 30, 1998 and 1997.

#### CREDIT OUALITY

Non-performing assets (NPA) consist of past-due loans on which no interest income is being accrued, renegotiated loans and other real estate. The Corporation reports NPA on a more conservative basis than most U.S. banks. The standard industry practice is to place non-performing commercial loans on non-accrual status when payments of principal or interest are delinquent 90 days. However, the Corporation's policy is to place commercial loans on non-accrual status when payments of principal or interest are delinquent 60 days. Lease financing, conventional mortgage and closed-end consumer loans are placed on non-accrual status when payments are delinquent 90 days. Closed-end consumer loans are charged-off against the allowance when delinquent 120 days. Open-end (revolving credit) consumer loans are charged-off when payments are delinquent 180 days. Certain loans which would be treated as non-accrual loans pursuant to the foregoing policy, are treated as accruing loans if they are considered well-secured and in the process of collection. Under the standard industry practice, closed-end consumer loans are charged-off when delinquent 120 days, but these consumer loans are not customarily placed on non-accrual status prior to being charged-off.

Table E shows information on non-performing assets as of September 30, 1998, December 31, 1997 and September 30, 1997. NPA were \$224.5 million or 1.91% of loans at June 30, 1998.

| Non-performing assets to assets      |   |                      |                      |

 1.32 | 1.10 | 1.07 |Non-performing loans totaled \$256 million as of September 30, 1998, compared with \$201 million at the same date last year and \$204 million as of June 30, 1998 and include \$31MM in loans of BGF. All loans categories reflected increases as compared with September 30, 1997. The non-performing commercial, including construction, and consumer loans increased \$30.4 million and \$18.3 million, respectively, while the mortgage and lease financing non-performing loans increased \$4.6 million and \$1.6 million, respectively. The increase in non-performing commercial loans was mainly attributed to the inclusion of \$25.2 million in non-performing commercial loans of BGF. Non-performing consumer loans also includes \$5.7 million in loans from BGF. Aside from the loans of BGF, most of the rise in consumer was related to an increased level of personal bankruptcies in P.R. and the U.S. mainland. Bankruptcy filings in U.S. federal courts, including Puerto Rico, rose 8.5 percent in the 12-month period ending June 30, 1998. In addition, the other real estate category increased \$13.7 million principally at Equity One which increased \$6.9 million, followed by BPPR

Assuming standard industry practice of placing commercial loans on non-accrual status when payments of principal or interest are past due 90 days or more and excluding the closed-end consumer loans from non-accruing loans, non-performing assets as of September 30, 1998, amounted to \$210 million or 1.70% of loans, and the allowance for loan losses would be 116.7% of non-performing assets. At September 30, 1997 and June 30, 1998, adjusted non-performing assets were \$165 million and \$166 million, respectively, or 1.47% and 1.41% of loans.

## OTHER OPERATING INCOME

Other operating income, excluding securities and trading gains, amounted to \$69.1 million for the three-month period ended September 30, 1998, compared with \$64.8 million for the same quarter in 1997, an increase of \$4.3 million or 6.7%. This rise in other income was principally driven by an increase of \$3.3 million in other service fees and \$2.0 million in service charges on deposit accounts. For the first nine-months, total other operating income grew 17.0% to \$204.1 million in 1998 from \$174.4 million in 1997.

27

2.7

Other service fees rose to \$28.6 million for the third quarter of 1998, from \$25.3 million for the same quarter in 1997. The increase in other service fees was principally attained in credit card fees and discounts which rose \$1.1 million, as credit card net sales rose 22.5% and the number of credit card active accounts grew 24.5%. Check cashing fees which are included in other fees, increased \$0.6 million as a result of the fees collected by the new subsidiary, Popular Cash Express, which started operations at the end of the second quarter of 1998. Also, trust fees rose \$0.5 million mostly in pension plan fees due to higher number of Keogh and 401K accounts. In addition, debit card fees rose \$0.4 million as a result of the sustained growth in the volume of transactions at point-of-sale (POS) terminals. The volume of transactions at POS terminals increased from a monthly average of 2.9 million in September 1997 to 4.9 million a year later.

| Total                           | \$69,162 | \$64,831 | \$ 4,331 | \$204,103          | \$174,437 | \$ 29,666 |

</TABLE>

Service charges on deposit accounts totaled \$26.3 million for the quarter ended September 30, 1998, compared with \$24.4 million for the same quarter of 1997. This increase resulted from a higher volume of deposits and increases in fees collected on commercial deposits with account analysis. For the nine-month period ended September 30, 1998, service charges on deposit accounts amounted to \$77.2 million or \$8.8 million higher than \$68.4 million reported for the same period in 1997.

Other income had a decrease of \$0.9 million as compared with the third quarter of 1997, as a result of a loan securitization of \$103 million in 1997 at Equity One, which resulted in a pretax gain of \$3.4 million.

For the third quarter of 1998, the Corporation recognized a net gain of \$4.6 million in the sale of securities and a net trading account profit of \$0.5 million compared with profits of \$0.5 million and \$1.0 million, respectively, for the same quarter last year. The gain on sale of securities for the third quarter of 1998 mostly resulted from the sale of equity securities by the Corporation's holding company, which produced a gain of \$4.4 million.

28

28

The reduction in non-interest revenues due to the effects of Hurricane Georges in Puerto Rico was not significant. Fees such as merchant discounts, debit card fees and other fees showed decreases in September due to business interruption and the lack of electricity in several towns of the Island.

## OPERATING EXPENSES

Operating expenses for the third quarter of 1998 were \$178.6 million compared with \$167.3 million for the same quarter in 1997, an increase of \$11.3 million principally reflecting higher personnel costs, professional fees, net occupancy and equipment expenses. For the first nine months of 1998, operating expenses rose to \$526.0 million from \$461.5 million for the same period in 1997.

The largest category of operating expenses, personnel costs, totaled \$84.3 million for the third quarter of 1998, increasing \$4.8 million from \$79.5 million for the same period of 1997. Salaries accounted for a significant portion of this increase rising \$5.7 million or 10.3%. This rise resulted from increased employment levels due to the Corporation's continued growth and expansion and annual merit increases. Full time equivalent employees (FTE) were 9,305 at September 30, 1998, up 609 from 8,696 FTEs as of the same date a year earlier.

Other operating expenses, excluding personnel costs, increased \$6.5 million, reaching \$94.3 million for the third quarter of 1998, compared with \$87.8 million for the same period in 1997. The increase in other operating expenses was mostly reflected in professional fees which grew \$2.3 million, reflecting expenditures associated with system developments and technical support. Equipment and net occupancy expenses increased a combined \$3.5 million mostly as a result of the costs related to the expansion of the electronic payment system, and the network of automated teller machines and POS terminals, and also to the business expansion in the US mainland. During the three-month period ended September 30, 1998, a total of 2,919 new POS terminals were installed bringing the current total to 18,215 terminals. The Corporation also increased its automated teller machines (ATM) network by 561 machines when compared with 442 at the same date last year.

Income tax expense for the quarter ended September 30, 1998 amounted to \$18.4 million, a decrease of \$0.1 million as compared with \$18.5 million recorded for the same quarter of 1997. The decrease in income tax resulted from a higher volume of tax exempt income. The effective tax rate for the third quarter of 1998 decreased to 24.2% from 25.7% for the same period in 1997. For the nine-month period ended September 30, 1998 and 1997, income tax expense amounted to \$59.6 million and \$56.3 million, respectively.

YEAR 2000

## STATE OF READINESS

The Corporation, following the guidelines established by regulators and under the direction of the Year 2000 Office, has been actively engaged in modifying, converting, and testing its computer systems and date-sensitive operating equipment. It is also working with customers and business partners to ascertain their progress toward Year 2000 compliance. Internal auditors of the Corporation are verifying and validating the work done in this important project, which has been classified as the top priority of the Corporation during 1998 and 1999.

A four phase action plan is being used to drive the activities related with the information technology components (in-house processed core applications; data processing center computers, software and equipment; networks and communication backbones; decentralized managed applications; and personal computers with their corresponding software) and date-sensitive operating equipment as explained below:

29

29

Assessment - identification of the components that may be impacted by the arrival of the new millennium. Determination of resources

needed, time frame and sequencing of the Year 2000 efforts,

Remediation - modification, conversion, replacement or elimination of components not Year 2000 ready,

Validation - testing and verification of the components by simulating data conditions for the Year 2000,

#### INFORMATION TECHNOLOGY

As of September 30, 1998 the information technology action plan was 64% completed, slightly ahead of the 61% projection. The following is a summarized report of actual results by phase and what is expected to be achieved during the next five quarters.

#### INFORMATION TECHNOLOGY SYSTEMS

 41% | 24% | 64% | 73% | 87% | 99% | 100% |The above expected completion dates are based on assumptions of future events considering the continued availability of resources and the completion of work by third parties. Even though the Corporation feels that its current state of readiness is adequate there is no guarantee that these estimates will be achieved.

The Corporation has already tested the operating system and system products of its mainframe computer and is in the process of testing applications in the Year 2000 laboratory. The principal core application, which handles the demand deposits and savings accounts of customers, has also been remediated and tested, as well as other mission critical applications.

## NON-INFORMATION TECHNOLOGY

The action plan of date-sensitive operating equipment was 98% completed as of September 30, 1998. The most recent projection is to have all items Year 2000 ready and implemented by December 31, 1998.

Significant third parties with which the Corporation interfaces with regard to the Year 2000 problem include customers and business partners (counterparts, technology vendors, service providers, payment and clearing systems, utilities, etc.). Unreadiness by these third parties would expose the Corporation to a potential loss, through impairment of business processes and activities.

The Corporation is actively assessing and already monitoring the progress of customers in their efforts

30

30

to become Year 2000 compliant and the possible effects of their inability to become Year 2000 compliant. A formal risk assessment of customers has been incorporated into the underwriting, scheduled review and credit rating process.

The Corporation is also assessing, monitoring and testing the progress of its business partners and counterparts to determine whether they will be able to successfully interact with the Corporation in the Year 2000.

For our operations in the USA mainland, which are highly dependable on a processing service bureau, several steps have been undertaken to reduce the exposure. Officers of the Corporation have an active participation in the business partner's client advisory board, which has contracted an external entity to conduct independent quarterly reviews of the Year 2000 action plan. Their progress is being monitored through the review of monthly reports and the detailed test plans that they will use to accomplish the validation phase.

Contingency plans are being defined for each business unit in the event that vendors are not able to become Year 2000 compliant by June 30, 1999.

## CONTINGENCY PLANS AND BUSINESS CONTINUITY

Even after thorough testing plans are executed, there is a possibility that problems may arise in relation to all the changes made to systems and equipment to ascertain they are ready for the Year 2000. Based on the current status of the Year 2000 action plans, the Corporation's most reasonably likely worst case scenario is that an unforeseen hardware or system failure might impair the execution of one or more critical business processes during a limited period of time. Business resumption plans are based on the assumption that the Corporation will correct any hardware or software systems failure within five working days.

The Corporation's strategy is to focus on the assessment, remediation, validation, and implementation phases of its Year 2000 action plans so as to limit errors, and therefore the need to implement business resumption plans. Nevertheless, the Corporation has established company wide business recovery plans to support critical business processes in case of an unforeseen hardware or software failure in the Year 2000. These business resumption plans include, among other things, a business impact analysis, prioritization of business processes, specific recovery strategies and alternative manual procedures for critical business processes. Business resumption plans are scheduled for testing during the fourth quarter of 1998 and the second quarter of 1999.

## COSTS TO ADDRESS THE COMPANY'S YEAR 2000 ISSUES

The Corporation expects that the principal costs of the Year 2000 project are those associated with the remediation and validation phases. The major portion, however, will be met from the existing resources through the deferral of technology projects, with the remainder representing incremental costs.

The information technology group was reinforced with 55 additional programmers and other skilled technical personnel to ascertain the availability of the necessary resources. Other relevant incremental costs are the costs to contract external consultants to manage the remediation and validation of certain specific items and scheduled upgrades that were accelerated due to the Year 2000 issue. The Corporation is funding the project through operating cash flows and does not anticipate that the related incremental costs nor the impact of the technology development initiatives being deferred will be material to the financial condition and results of operations of any single year.

Management estimates the total incremental costs of achieving Year 2000 compliance to be approximately \$11.3 million over the two year period ending in December 31, 1999. Approximately \$3.7 million has been expended to date, of which \$2.1 million are related with consultants contracted, \$1.2 million with additional technical employees hired, \$0.2 million with new hardware and software acquired and \$0.2 million with costs to contact customers, retain technical employees and other costs

31

31

of the Year 2000 project. The remaining estimated incremental costs for 1998 are \$2.6 million.

Year 2000 costs are based on management's best estimates, which were derived utilizing numerous assumptions of future events and other factors. However, there can be no guarantee that these estimates will be achieved and actual costs could differ materially from those projected.

## BALANCE SHEET COMMENTS

At September 30, 1998, the Corporation's total assets reached \$21.3 billion from \$19.3 billion reported at December 31, 1997 an increase of \$2.0 billion or 10.22%. This rise included \$496 million related to the acquisition of BGF, and the Corporation continuous business expansion. Total assets at September 30, 1997, were \$19.9 billion. Earning assets increased \$1.8 billion, reaching \$19.9 billion as of September 30, 1998, from \$18.1 billion as of December 31, 1997 and \$18.6 billion at September 30, 1997.

| Total                                   | \$12,362,527 | \$11,376,607 | \$11,182,061 |

The investment portfolio totaled \$6.5 billion as of September 30, 1998 an increase of \$833 million from \$5.6 billion as of December 31, 1997. Investment securities as of September 30, 1997 amounted to \$6.7 billion. The increase in investment securities as compared with December 31, 1997, resulted mostly from arbitrage opportunities undertaken by BPPR.

As shown on Table G, the loan portfolio increased \$986 million as compared with December 31, 1997, of which \$621 million were in commercial and construction loans and \$250 million in mortgage loans. The growth in the commercial loan portfolio resulted principally from the continued marketing efforts directed to the retail and middle market and the expansion in the United States and the Caribbean. BGF accounted for \$209 million of the increase in the commercial loans.

BPPR, Equity One and Banco Popular, FSB accounted for 82% or \$206 million of the total increase in the mortgage loans portfolio as compared with December 31, 1997. The acquisition of BGF also contributed \$66 million in consumer loans.

Total deposits at September 30, 1998, were \$12.5 billion or \$798 million over the \$11.7 billion at December 31, 1997. The acquisition of BGF contributed \$320 million in total deposits. Savings accounts and time deposits continued their growth, increasing \$233 million and \$452 million, respectively, as compared with December 31,1997. At September 30, 1997, total deposits amounted

32

32

to \$11.2 billion. Total deposits in Puerto Rico, the Corporation's principal place of business, increased to \$8.8 billion at September 30, 1998, from \$8.6 billion at December 31, 1997 and \$8.1 billion at September 30, 1997.

Table H presents the distribution of assets, loans and deposits by geographical area.

</TABLE>

Borrowed funds, including subordinated notes and capital securities, amounted to \$6.6 billion at September 30, 1998, compared with \$5.7 billion and \$6.9 billion at December 31, 1997 and September 30, 1997, respectively.

As part of the investment in BGF the Corporation recognized a minority interest of \$30.6 million, which represents the beneficial interest of the minority investors of BGF.

The Corporation's stockholder's equity at September 30, 1998 reached \$1.70 billion compared with \$1.50 billion at December 31, 1997. This increase of \$193.8 million was mostly due to earnings retention and to the unrealized holding gains on securities available-for-sale, which rose \$73.8 million as compared with year-end 1997. Also, the Corporation's Dividend Reinvestment Plan contributed \$5.2 million in additional capital since December 31, 1997. Stockholders' equity at September 30, 1997 amounted to \$1.45 billion.

The dividend payout ratio to common stockholders for the quarter ended September 30, 1998, was 26.86% compared with 23.30% for the same quarter last year. For the nine-month periods ended

33

33

September 30, 1998 and 1997, these ratios were 27.32% and 24.19%, respectively. The increase in the ratio resulted from an increase of 22.2%, from \$0.09 to \$0.11 per common share (after restating for the stock split), in the Corporation's quarterly dividend, effective with the dividend paid on October 1, 1997.

On August 13, 1998, the Board of Directors of Popular, Inc. declared a cash dividend of \$0.14 per common share payable on October 1, 1998, to shareholders of record as of September 11, 1998, representing a 27.3% increase over the \$0.11 per share paid in previous quarterly dividends.

Under the regulatory framework for prompt corrective action, banks and bank holding companies which meet or exceed a Tier I ratio of 6%, a total capital ratio of 10% and a leverage ratio of 5% are considered well-capitalized. As shown on Table I, the Corporation exceeds those regulatory risk-based capital requirements for well-capitalized institutions by wide margins, due to the high level of capital and the conservative nature of the Corporation's assets.

The market value of the Corporation's common stock at September 30, 1998, was \$28.38, compared with \$24.75 at December 31, 1997 and \$26.50 at September 30, 1997, after restating for the stock dividend. Market capitalization at September 30, 1998, was \$3.8 billion compared with \$3.4 billion as of December 31, 1997 and \$3.6 billion at September 30, 1997.

 7.37 | 6.86 | 6.88 |Popular International Bank, Inc. (PIB) and Popular North America, Inc.'s (PNA) bank subsidiaries (Banco Popular, Illinois, Banco Popular National Association (California), Banco Popular National Association (Florida), Banco Popular, National Association (Texas) and Banco Popular, FSB) have certain statutory provisions and regulatory requirements and policies, such as the maintenance of adequate capital, that limit the amount of dividends they can pay. Other than these limitations, no other restrictions exist on the ability of PIB and PNA to make dividend and asset distributions to the Corporation, nor on the ability of PNA's subsidiaries, except for Banco Popular, FSB, to make distributions to PNA. In connection with the acquisition by Banco Popular, FSB from the Resolution Trust Company (RTC) of

34

34

four New Jersey branches of the former Carteret Federal Savings Bank, the RTC provided to Banco Popular, FSB interim financial assistance in the form of a loan in the amount of \$19.5 million, which matures on January 20, 2000, but which is prepayable any time before then. Pursuant to the terms of such financing, Banco Popular, FSB may not, among other things, declare or pay any dividends on its outstanding capital stock (unless such dividends are used exclusively for payment of principal of or interest on such RTC loan) or make any distribution of its assets until payment in full of such promissory note. As of September 30, 1998 the undistributed earnings of Banco Popular, FSB totaled \$62 million.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Corporation is a defendant in a number of legal proceedings arising in the normal course of business. Management believes, based on the opinion of legal counsel, that the final disposition of these matters will not have a material adverse effect on the Corporation's financial position or results of operations.

ITEM 5. OTHER INFORMATION

Focusing on the objective of becoming the number one bank for the Hispanics in the United States, the Corporation continues its plan of corporate reorganization for its U.S. banking subsidiaries. The objective of this reorganization is to consolidate its banking operations in Florida, California, New York, New Jersey, and Illinois into one banking entity incorporated in New York. This new structure will facilitate the communication and geographic expansion while at the same time reduce costs, provide more flexibility and efficiency to the Corporation.

On September 21, 1998, Hurricane Georges struck the island of Puerto Rico, the Corporation's principal place of business. Economists estimate infrastructure and personal property losses to be about \$3.8 billion, whereas the loss of production due to the lack of electricity, water and communications could reach \$3.1 billion. In 1994, Banco Popular de Puerto Rico established a bankwide Disaster Recovery Plan that proved its effectiveness with Georges. Notwithstanding the impact this hurricane had on Puerto Rico, 86% of the branch network was fully operational seven days after the hurricane, and the operations of both the ATH network and the bank's electronic data center were never interrupted.

On October 31, 1998 the Corporation acquired First State Bank of Southern California, with \$194 million in assets and \$157 million in deposits and operating five branches located in Santa Fe Springs, Paramount, Lynwood and Los Angeles. Also, at the same date the Corporation acquired Gore-Bronson Bancorp and its subsidiaries Bronson-Gore Bank, Irving Bank, and Water Tower Bank with assets of \$281 million and deposits of \$217 million. This corporation specializes in asset-based lending and operates five branches in the Greater Chicago Metropolitan Area.

In addition, on October 31, 1998 Popular Cash Express acquired Inglewood Quick Check, Inc., a corporation that handles eight check-cashing locations and 27 mobile check-cashing operations in California.

Quarter Report

September 30, 1998

2 POPULAR, INC.

3RD QUARTER REPORT SEPTEMBER 30, 1998

TO OUR STOCKHOLDERS

Popular, Inc. reflected earnings of \$57.6 million for the third quarter of 1998, compared with \$53.6 million for the same period in 1997, for an increase of \$4.0 million or 7.4%. Earnings per common share (EPS) for the quarter ended September 30, 1998, were \$0.41, compared with \$0.38 for the third quarter of 1997. The performance measures of return on assets (ROA) and return on common equity (ROE) amounted to 1.12% and 14.94%, respectively, for the third quarter of 1998, from 1.10% and 15.46% for the same period a year earlier.

For the first nine months of 1998, net income was \$169.8 million or \$1.21 per common share, up 10.1% from the \$154.2 million or \$1.11 per common share for the first nine months of 1997. For the first nine months of this year, ROA was 1.14% and ROE was 15.26%, compared with 1.15% and 15.93% for the same period in 1997.

Net interest income rose \$12.0 million for the quarter ended September 30, 1998, when compared with the same quarter last year, as a result of sustained growth in the average volume of earning assets, partially offset by a lower yield on earning assets. In addition, other income grew \$7.9 million led by a gain realized on the sale of equity securities, a rise in other service fees coupled with an increase in service charges on deposit accounts, as a result of the Corporation's continued emphasis on diversifying sources of non-interest income.

The provision for loan losses rose \$4.8 million, principally resulting from the growth in the loan portfolio and the rise in non-performing assets. The allowance for loan losses at September 30, 1998, amounted to \$245 million, representing 1.98% of loans, compared with \$205 million or 1.83% of loans at the same date in 1997.

Operating expenses for the three-month period ended September 30, 1998, totaled \$178.6 million compared with \$167.3 million for the same quarter a year earlier. The expansion of the Corporation's business activities, the implementation of strategic initiatives and the use of technology to further enhance customer convenience were some of the driving factors that resulted in higher operating expenses.

The Corporation's total assets at September 30, 1998, were \$21.3 billion compared with \$19.9 billion at the same date in 1997 and \$20.0 billion as of June 30, 1998. Total loans reached \$12.4 billion while total deposits were \$12.5 billion. The Corporation's capital increased to \$1.70 billion at September 30, 1998, compared with \$1.45 billion a year earlier. At September 30, 1998, the market value of the Corporation's common stock amounted to \$28.38.

On August 13, 1998, the Board of Directors of Popular, Inc. declared a cash dividend of 0.14 per common share for the third quarter of 1998. This represents a 27.3% increase over the 0.11 per share paid in previous quarterly cash dividends (after adjusting for the stock split effective on July 1, 1998). The dividend was paid on October 1, 1998, to shareholders of record on September 1, 1998

In August, Banco Popular de Puerto Rico became the first bank in Puerto Rico to launch the new American Express credit card. In addition to providing revolving credit facilities, this new card will provide its holders access to over 190,000 automatic teller machines (ATM) that are part of the American Express worldwide ATM network and ATH network of Banco Popular, participation in

the American Express Retail Protection and Travel Accident Insurance Programs, among others.

On September 21, 1998, Hurricane Georges struck the island of Puerto Rico, the Corporation's principal place of business. Economists estimate infrastructure and personal property losses to be about \$3.8 billion, whereas the loss of production due to the lack of electricity, water and communications could reach \$3.1 billion. In 1994, Banco Popular de Puerto Rico established a bankwide Disaster Recovery Plan that proved its effectiveness with Georges. Notwithstanding the impact this hurricane had on Puerto Rico, 86% of the branch network was fully operational seven days after the hurricane, and the operations of both the ATH network and the bank's electronic data center were never interrupted.

On September 30, 1998, Popular, Inc. became the principal shareholder of Banco Gerencial & Fiduciario (BGF) with the acquisition of 45% in newly issued stock. BGF is the fourth largest bank in the Dominican Republic, with \$496 million in total assets and \$320 million in total deposits.

During this quarter, we continued investing in our franchise as the Corporation signed an agreement to acquire First State Bank of Southern California. First State, with \$180 million in assets and over \$155 million in deposits, has five branches located in Santa Fe Springs, Paramount, Lynwood and Los Angeles. Also, the Corporation signed an agreement to acquire Gore-Bronson Bancorp (GBB), and its subsidiaries Bronson-Gore

1

3 POPULAR, INC.

3RD QUARTER REPORT SEPTEMBER 30, 1998

Bank, Irving Bank, and Water Tower Bank with assets of \$250 million and deposits of over \$220 million. This corporation specializes in asset-based lending and operates five branches in the Greater Chicago Metropolitan Area.

In addition, Popular Cash Express (PCE) is in the process of acquiring Inglewood Quik Check, Inc., a corporation that handles eight check-cashing locations and 27 mobile check-cashing operations in California. Also, PCE will acquire Houston Check-Cashers, Inc., and The Telephone Center, located in Texas and Florida, respectively.

All of these acquisitions have received the approval from the regulatory agencies and are expected to close during the last quarter of 1998.

Furthermore, focusing on our objective of becoming the number one bank for the Hispanics in the United States, the Corporation continues its plan of corporate reorganization for its U.S. banking subsidiaries. The objective of this reorganization is to consolidate all banking operations within the U.S. mainland into one legal entity with corporate offices in Chicago and regional offices in Florida, California, New York, New Jersey, and Illinois. This new structure will facilitate the communication and geographic expansion while at the same time reduce costs, provide more flexibility and efficiency to the Corporation.

The Corporation is aggressively addressing the operating challenges imposed by the "Year 2000". We have been actively engaged in modifying, converting and testing our computer systems as well as working with customers and business partners to ascertain their progress toward Year 2000 compliance. Our projection is to have all mission critical items Year 2000 ready and implemented by June 30, 1999.

SHAREHOLDER INFORMATION

SHAREHOLDER ASSISTANCE - Shareholders requiring a change of address, records or information about lost certificates, dividend checks or dividend reinvestment should contact:

Banco Popular de Puerto Rico Trust Division (725) Popular Center Building 4th Floor Suite 400 209 Munoz Rivera Ave. Hato Rey, Puerto Rico 00918

PUBLICATIONS - For printed material (annual and quarterly reports, 10-K and 10-Q reports), contact Mr. Amilcar L. Jordan at the Comptroller's Division at (787) 765-9800 ext. 6101, or VISIT OUR WEBSITE AT HTTP://WWW.POPULARINC.COM.

8

10 POPULAR, INC.

3RD QUARTER REPORT SEPTEMBER 30, 1998

DIVIDEND REINVESTMENT PLAN - The Corporation has a dividend reinvestment plan that provides the shareholder a simple, convenient and cost-effective way to acquire Popular, Inc. common stock.

- Dividends can be automatically reinvested in additional shares at 95% of the Average Market Price.
- Participants may make optional cash payments of at least \$25 and not more than \$10,000 per calendar month for investment in additional shares.
- No brokerage commissions are charged on purchases under this plan.
- Participant's funds will be fully invested, because the plan permits fractions of shares to be credited to a participant's account.

If you would like more information on this plan, please contact our Trust Division at (787) 756-3908, (787) 765-9800 ext. 5637, 5525 and 5897.
