**CANADIAN NATURAL RESOURCES LIMITED ANNOUNCES
HORIZON OIL SANDS PRODUCTION
CALGARY, ALBERTA – May 31, 2010 – FOR IMMEDIATE RELEASE**

Canadian Natural Resources Limited (“Canadian Natural”) announces monthly production of Synthetic Crude Oil (“SCO”) at Horizon Oil Sands as follows:

Month	SCO Production (bbl/d)
Q1 2010	86,995
April 2010	101,000*
May 2010 forecast	75,000-80,000

**rounded to the nearest hundred*

May 2010 production is expected to be between 75,000 and 80,000 barrels per day of SCO due to a planned maintenance outage which reduces May’s volumes but is forecast to limit future operational issues and help reach and maintain sustained production levels.

The Company continues to target stable production levels with annual production guidance for 2010 remaining at 90,000 to 105,000 barrels per day of SCO at Horizon Oil Sands.

Canadian Natural is a senior crude oil and natural gas production company, with continuing operations in its core areas located in Western Canada, the U.K. portion of the North Sea and Offshore West Africa.
