Information for those interested in participating in the call can be found below.

Financial Highlights

- During the quarter ended March 31, 2013, FSIC generated:

 - o Increased the price, effective January 2, 2013, at which it issues shares under its distribution reinvestment plan (“DRP”) and the price at which it repurchases shares under its share repurchase program, from \$9.90 to \$10.00 as a result of appreciation in FSIC’s net asset value per share; and
 - o Conducted a quarterly tender offer pursuant to its share repurchase program and on January 2, 2013 repurchased 883,047 shares of its common stock at a price of \$10.00 per share for aggregate consideration of approximately \$8.8 million. Certain Information About Distributions

The determination of the tax attributes of FSIC's distributions is made annually as of the end of its fiscal year based upon its taxable income and distributions paid, in each case, for the full year. Therefore, a determination as to the tax attributes of the distributions made on a quarterly basis may not be representative of the actual tax attributes for a full year. FSIC intends to update stockholders quarterly with an estimated percentage of its distributions that resulted from taxable ordinary income. The actual tax characteristics of distributions to stockholders will be reported to stockholders annually on Form 1099-DIV.

The payment of future distributions on FSIC's shares of common stock is subject to the discretion of its board of directors and applicable legal restrictions, and therefore, there can be no assurance as to the amount or timing of any such future distributions.

FSIC may fund its cash distributions to stockholders from any sources of funds available to it, including expense reimbursements from Franklin Square, as well as offering proceeds, borrowings, net investment income from operations, capital gains proceeds from the sale of assets, non-capital gains proceeds from the sale of assets and dividends or other distributions paid to it on account of preferred and common equity investments in portfolio companies. FSIC has not established limits on the amount of funds it may use from available sources to make distributions. There can be no assurance that FSIC will be able to pay distributions at a specific rate or at all.
