AllianzGI NFJ Small-Cap Value Fund

(formerly Allianz NFJ Small-Cap Value Fund)

Before you invest, you may want to review the Fund's statutory prospectus, which contains more information about the Fund and its risks. You can find the Fund's statutory prospectus and other information about the Fund, including its statement of additional information (SAI) and most recent reports to shareholders, online at www.allianzinvestors.com/prospectuses. You can also get this information at no cost by calling 1-800-498-5413 or by sending an email request to Orders@MySummaryProspectus.com. This Summary Prospectus incorporates by reference the Fund's entire statutory prospectus and SAI, each dated August 29, 2012, as further revised or supplemented from time to time.

Investment Objective

The Fund seeks long-term growth of capital and income.

Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Share Class	Management Fees	Distribution and/or Service (12b-1) Fees	Other Expenses	Total Annual Fund Operating Expenses	Expense Reductions(1)	Total Annual Fund Operating Expenses After Expense Reductions(1)
Institutional	0.86%	None	0.01%	0.87%	(0.08)%	0.79%
Class P	0.96	None	0.01	0.97	(0.03)	0.94
Administrative	0.86	0.25 %	0.01	1.12	(0.08)	1.04
Class D	0.96	0.25	0.01	1.22	(0.03)	1.19

Effective November 1, 2012, AGIFM has contractually agreed to observe, through October 31, 2013, (i) an irrevocable waiver of a portion of its advisory fees (together with administrative fees paid to AGIFM, a component of "Management Fees"), which reduces the 0.60% contractual fee rate by 0.025% on assets in excess of \$3 billion, by an additional 0.025% on assets in excess of \$4 billion and by an additional 0.025% on assets in excess of \$5 billion, each based on the Fund's average daily net assets, and (ii) an irrevocable waiver of a portion of its administrative fees paid by Institutional and Administrative Class shares, which reduces the 0.30% contractual rate by 0.05% of the Fund's daily net assets attributable to the particular share class. An identical waiver arrangement was in place for the Fund during the whole of its 2011-2012 fiscal year.

Examples. The Examples are intended to help you compare the cost of investing in shares of the Fund with the costs of investing in other mutual funds. The Examples assume that you invest \$10,000 in the noted class of shares for the time periods indicated, your investment has a 5% return each year, and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, the Examples show what your costs would be based on these assumptions. The Examples are based, for the first year, on Total Annual Fund Operating Expenses After Expense Reductions and, for all other periods, on Total Annual Fund Operating Expenses.

Share Class	1 Year	3 Years	5 Years	10 Years
Institutional	\$81	\$270	\$474	\$1,065
Class P	96	306	533	1,187
Administrative	106	348	609	1,356
Class D	121	384	667	1,475

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). The Fund’s portfolio turnover rate for the fiscal year ended June 30, 2012 was 26%. High levels of portfolio turnover may indicate higher transaction costs and may result in higher taxes for you if your Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Examples above, can adversely affect the Fund’s investment performance.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by normally investing at least 80% of its net assets (plus borrowings made for investment purposes) in common stocks and other equity securities of companies with smaller market capitalizations. The Fund currently

considers smaller market capitalization companies to be companies with market capitalizations of between \$100 million and \$3.5 billion. The Fund normally invests significantly in securities of companies that the portfolio managers expect will generate income (for example, by

AllianzGI NFJ Small-Cap Value Fund

paying dividends). The portfolio managers use a value investing style focusing on companies whose securities the portfolio managers believe are undervalued. The portfolio managers partition the Fund's selection universe by industry and then identify what they believe to be undervalued securities in each industry to determine potential holdings for the Fund representing a broad range of industry groups. The portfolio managers use quantitative factors to screen the Fund's selection universe, analyzing factors such as price momentum (*i.e.*, changes in security price relative to changes in overall market prices),

earnings estimate revisions (*i.e.*, changes in analysts' earnings-per-share estimates) and fundamental changes. After narrowing the universe through a combination of qualitative analysis and fundamental research, the portfolio managers select securities for the Fund. In addition to common stocks and other equity securities (such as preferred stocks, convertible securities and warrants), the Fund may invest in real estate investment trusts (REITs) and non-U.S. securities, including emerging market securities.

Principal Risks

The Fund's net asset value, yield and total return will be affected by the allocation determinations, investment decisions and techniques of the Fund's management, factors specific to the issuers of securities and other instruments in which the Fund invests, including actual or perceived changes in the financial condition or business prospects of such issuers, and factors influencing the U.S. or global economies and securities markets or relevant industries or sectors within them (**Management Risk, Issuer Risk, Market Risk**). Equity securities may react more strongly to changes in an issuer's financial condition or prospects than other securities of the same issuer, and securities issued by smaller companies may be more volatile and present increased liquidity risk (**Equity Securities Risk, Smaller Company Risk**). Other principal risks include: **Credit Risk** (an issuer or counterparty may default on obligations); **Focused Investment Risk** (focusing on a limited number of issuers, sectors, industries or geographic regions increases risk and volatility); **Liquidity Risk** (the

lack of an active market for investments may cause delay in disposition or force a sale below fair value); **Non-U.S. Investment Risk, Emerging Markets Risk, Currency Risk** (non-U.S. securities markets and issuers may be more volatile, smaller, less liquid, less transparent and subject to less oversight, particularly in emerging markets, and non-U.S. securities values may also fluctuate with currency exchange rates); **REIT Risk** (adverse changes in the real estate markets may affect the value of REIT investments); and **Turnover Risk** (high levels of portfolio turnover increase transaction costs and taxes and may lower investment performance). Please see "Summary of Principal Risks" in the Fund's statutory prospectus for a more detailed description of the Fund's risks. It is possible to lose money on an investment in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Performance Information

The performance information below provides some indication of the risks of investing in the Fund by showing changes in its total return from year to year and by comparing the Fund's average annual total returns with those of a broad-based market index and a performance average of similar mutual funds. The bar chart and the information to its right show performance of the Fund's Institutional Class shares. Class P, Administrative Class and Class D performance would be lower than Institutional Class performance because of the lower expenses paid by Institutional Class shares. For periods prior to the inception date of a share class, performance information shown for such class may be based on the performance of an older class of shares that

dates back to the Fund's inception, as adjusted to reflect certain fees and expenses paid by the newer class. These adjustments generally result in estimated performance results for the newer class that are higher or lower than the actual results of the predecessor class due to differing levels of fees and expenses paid. Details regarding the calculation of the Fund's class-by-class performance, including a discussion of any performance adjustments, are provided under "Additional Performance Information" in the Fund's statutory prospectus and SAI. *Past performance, before and after taxes, is not necessarily predictive of future performance.* Visit www.allianzinvestors.com for more current performance information.

After-tax returns are estimated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. After-tax returns are for Institutional Class shares only. After-tax returns for other share classes will vary.
